Date: May 2, 2014

To: All Bidders

From: Teresa Fleming, Buyer
State Purchasing Bureau

RE: Questions and Answers for ITB Number 4692 OF
To be opened May 12, 2014

QUESTIONS	ANSWERS
1. I have the following questions on section 9 Our supplier used Grote Industries LED Lights, www.**grote**.com/ *is this acceptable?* They use sealed connections on all light connections. They also use a manufactured harness made for the trailer is does not run in steel conduit is this acceptable?	Grote lighting is acceptable. A manufactured harness that has a "sealed protective covering" of wires would be acceptable. No exposed wires.
2. Section 5. A. Chassis Read A. Shall be constructed throughout of high tensile strength, minimum 80,000 PSI yield strength, fabricated or structural steel. Manufacturer states the 50,000 PSI (Milled not fabricated) yield strength high tensile steel is more than adequate to make structure solid enough to carry pay load max. Can this spec be changed to the discretion of the trailer manufacturer's engineers with a statement asking bidders to declare what the tensile strength is? Especially, considering they are in this business and have been manufacturing these trailer for decades.	Please comply with specifications as written.

3. Section 5. B. Chassis Reads B. Main frame to be minimum 10" beam with minimum 80,000 PSI yield strength. Specify beam size: _____ Manufacturer's engineers says that 14" Beam with a min of 50,000 PSI (Milled not fabricated) yield strength is more than adequate for pay load max. Can the 80,000 psi be adjusted with a bigger beam or again can this be left to the discretion of the trailer manufacturer's engineers? Especially, considering they are in this business and have been manufacturing these trailer for decades.	Please comply with specifications as written.
4. Section 8. A. 2. Tires and Wheels reads 2. Tires to be Bf Goodrich, Goodyear, Uniroyal, General, Bridgestone, Michelin or Firestone and must carry said company name. Please state tires to be provided: _____ Are Hercules Brand Tires acceptable as long as they meet the rest of the tire specs and are rated for the load of this trailer? This is what the our trailer manufacture OEM's and would prefer to use.	Hercules Brand Tires are not acceptable. Please comply with specifications as written.

<u>This addendum will become part of the bid and should be acknowledged with the ITB.</u>
