AMENDMENT ELEVEN
Contract 71164 O4
Medicaid Managed Care Physical Health, Behavioral Health, and Pharmacy Services for the State of Nebraska
Between the State of Nebraska and WellCare of Nebraska

The State of Nebraska and WellCare of Nebraska make this Amendment (the Amendment") to Contract 71164 O4 (the "Contract"), and upon mutual agreement and other valuable consideration the parties agree to and hereby amend the contract as follows:

I. **ADDITIONS:** The following sections are hereby added:

A. Glossary of Acronyms

HHA: Heritage Health Adult

B. Glossary of Terms

Basic Coverage: Provides benefits equivalent to the current state plan with the exception of dental services, vision services, and over the counter medications.

Benefit Tier: Individuals eligible in the Heritage Health Adult program will be eligible for coverage in one of two benefit tiers, the Nebraska Basic Alternative Benefit Plan, also known as the Basic benefit tier, and the Nebraska Prime Alternative Benefit Plan, also known as the Prime benefit tier.

Case Management: Case Management plan includes the Health Risk Screen which is the initial and ongoing screening to identify care needs of a beneficiary and identify any changes in health or social status.

Heritage Health Adult Expansion: Initiative 427, which expands Medicaid eligibility to able-bodied Nebraska residents, ages 19 to 64, whose income is at or below 138 percent of the federal poverty level.

Medically Frail: For an individual to be determined medically frail, he or she must have a documented medical condition attested to by a healthcare provider who is able to diagnose within the scope of his or her respective practice act and is licensed and in good standing within the state in which they practice, identified though analysis and evaluation of historical claims data performed by the MCO, or identified through information supplied by the Department, that falls into one or more of the following categories:

(i) A disabling mental disorder;
(ii) A chronic substance abuse disorder;
(iii) A physical, intellectual, or developmental disability with functional impairment that significantly impairs the individual from performing one or more activities of daily living each time the activity occurs, see 471 NAC 12 for the definition of activities of daily living for adults;
(iv) A disability determination based on Social Security criteria;
(v) A serious and complex medical condition; or

DocuSign Envelope ID: F0EC1D8A-960D-4173-AF72-C5A870C70106

(vi) Chronically homeless as defined by the United States Department of Housing and Urban Development.

Prime coverage: Provides benefits equivalent to the current state plan including dental services, vision services, and over-the-counter medications.

C. **Section IV.A.10 – Included Populations**
m. Members eligible for Heritage Health Adult (HHA) expansion

D. **Section IV.E.6.h. – Value-Added Services**
h. HHA members in the Basic Tier are not eligible for value-added services of dental, vision, or OTC medication.

E. **Section IV.F.5.f.xxxiv. – MEMBER SERVICES AND EDUCATION**
xxxiv. HHA Benefit Tier Requirements

F. **Section IV.K.4 – SUBCONTRACTING REQUIREMENTS**
4. MCOs must be able to communicate the eligibility of Prime vs. Basic membership with their subcontractors.

G. **Section IV.I.1.n – PROVIDER NETWORK REQUIREMENTS**
n. MCO must include in its contracts with its providers the requirement that Medically Frail attestation forms must be completed by the provider.

H. **Section IV.J.3.a.xxxi – PROVIDER SERVICES**
xxxi. HHA Benefit Tier Requirements

I. **Section IV.L.2.h. – CARE MANAGEMENT**
h. MCOs are required to implement the MLTC defined Health Risk Screening questions at a minimum.

J. **Section IV.R.2.k – SYSTEMS AND TECHNICAL REQUIREMENTS**
k. Transmit and receive the HHA Inbound MCE Member Data Response File

K. **Section IV.Z. HHA - Heritage Health Adult Expansion**

Effective October 1, 2020, all eligible HHA 19 to 64 year old members will receive integrated medical, behavioral health, and pharmacy benefits through the Heritage Health managed care program.

Members who meet the criteria for the Prime benefits package will receive vision and OTC benefits through their Heritage Health plan and dental benefits through the dental prepaid ambulatory health program (PAHP). Members who do not meet the criteria for Prime benefits will receive services equivalent to the current state plan with the exception of dental services, vision services, and over the counter medications.

All members newly eligible for Medicaid under the HHA program will receive the Basic benefits package.

HHA members will receive the Prime benefits package only if:

- They are medically frail; or
- They are age 19 or 20; or
- They are a pregnant woman eligible under expansion

A. Medically Frail

1. Any Heritage Health Adult (HHA) expansion group member may be evaluated by MLTC for medically frail status during any time of the member's enrollment.
2. MLTC is responsible for determining members as medically frail and providing final notification to the member of approval or denial of medically frail.
    a. MLTC will notify the MCO when medically frail is approved or denied.
3. The MCO may identify HHA members who may be medically frail using the following methods:
    a. The member self-identifies as medically frail to the MCO.
        i. The MCO must assist members who self-identify as medically frail with obtaining necessary documentation as required in MLTC Medically Frail Guidance policy. This also includes obtaining documentation collected by the member related to the medically frail condition.
    b. Information the MCO collects from the members Health Risk Screening which includes, but is not limited to, the MLTC defined required HRS questions.
        i. The MCO must assist members that the MCO has identified as potentially medically frail with obtaining necessary documentation as required in the MLTC Medically Frail Guidance policy. This also includes obtaining documentation collected by the member related to the medically frail condition.
    c. Performing periodic evaluation of the member's historical claims data including diagnosis information that is current and verified within a 12 month look back as defined in the medically frail guidance policy.
    d. Ongoing engagement with the member through care/case management as described in Section IV.L. Care Management.
        i. Enroll the HHA member that is determined to be medically frail in active care/case management as described in Section IV.L. Care Management
4. The MCO must submit a written notification letter to all members prior to or simultaneously with the MCO submitting a medically frail referral to MLTC. The written notification letter used by the MCO must include information members may use to contact the MCO, including telephone or e-mail specific to MCO staff responsible for medically frail referrals.
5. The MCO must provide medically frail referrals to MLTC according to the specifications included in the Medically Frail Guidance policy.
    a. The MCO must provide MLTC supporting documentation simultaneously with the submission of a medically frail referral

according to the specifications included in the Medically Frail Guidance policy.
   b. As requested by MLTC, the MCO must provide additional documentation to support a medically frail determination.
   c. MCO must use available data sources to support identification of potentially medically frail members (e.g. diagnosis retrieved from electronic health information available through NEHII).
6. MCOs must reassess members that MLTC has previously determined to be medically frail and refer members to MLTC prior to the end of the current determination according to the specifications included in the Medically Frail Guidance Document.
7. As requested by MLTC, the MCO must respond to MLTC requests for supporting documentation to support periodic audits.
8. MCO must transmit medically frail data to the Department on the HHA Inbound MCE Member Data Response file.

II. **Modifications:** The Parties hereto modify the following sections:

A. Glossary of Terms

Care Management: Care Management is the individualized beneficiary plan developed to address the physical health, behavioral health, or social determinant needs of a beneficiary. Care management is the strategies and methods utilized to stabilize and then improve the health of the beneficiary. Care management plans need to be responsive to beneficiary needs and include physical and behavioral interventions and care, along with social services supports.

Care Management Plans are:

- Ongoing and modified as needed to meet the changing needs of the patient
- Comprehensive
- Evidence-based
- Care coordination with multi-disciplinary care teams
  - At a minimum includes clinical and behavioral health services, psychosocial needs, referrals and care transition management
- Cost-effective and high-quality

Value-added services: Those services a MCO provides in addition to a service covered under this contract because the MCO has determined that the health status and quality of life for the member is expected to be the same or better using the value-added health service as it would be using the covered service. Value-added services of vision, dental, and OTC medications are not available to members in the HHA Basic Tier.

B. Section IV.E.8.a.xvi. – COVERED SERVICES AND BENEFITS

xvi. Vision Services. Vision services to the HHA Basic Tier members must be medically necessary based on a diagnosed condition or an emergency vision services.

C. Section IV.E.8.a.xxiii – COVERED SERVICES AND BENEFITS

xxxiii. Pharmacy Services. HHA members in the Basic Tier are excluded from OTC benefits, including those on the PDL.

D. Section IV.E.10. – COVERED SERVICES AND BENEFITS

10. Eye Care and Vision Services. As set forth in the Medicaid State Plan and applicable regulations, the MCO must provide to all members any medically necessary eye care, vision examinations, prescriptive lenses, frames, and treatments. Eye care and vision services are to be performed by a licensed ophthalmologist or optometrist, conforming to accepted methods of screening, and diagnosis and treatment. Vision services to the HHA Basic Tier members must be medically necessary based on a diagnosed condition or an emergency vision services.

H. Section IV.E.11.e – Pharmacy Services

e. The MCO must, at a minimum, cover the OTC drugs listed in the Medicaid State Plan, except for HHA members in the Basic Tier who are excluded from OTC benefits, including those on the PDL.

L. Attachment 38 – Revised Reporting Requirements

The Reporting requirements and timeframes have been changed. The updated requirements are set forth in the amended Attachment 38 attached hereto and made a part hereof.

This Amendment becomes part of the Contract. Except as set forth in this Amendment, the contract is unaffected and shall continue in full force and effect in accordance with its terms. If there is a conflict between this Amendment and the contract or any earlier amendment, the terms of this Amendment will prevail.

IN WITNESS WHEREOF, the parties have executed this amendment as of the date of execution by both parties below.

Attachment 38 – Revised Reporting Requirements

Bi-Weekly	Due the 1st and 15th of the month.
Monthly Deliverables	Due on the 15th day of the following calendar month unless otherwise noted in the RFP or agreed to in writing by the MCO and MLTC.
Quarterly Deliverables	Due 45 calendar days after the end of the most recent quarter unless otherwise noted in the RFP or agreed to in writing by the MCO and MLTC.
Semi-Annual Deliverables	Due as specified in this attachment.
Annual Deliverables	Reports, files, and other deliverables due annually must be submitted within 45 calendar days following the 12th month of the contract year, except those reports that are specifically exempted from the 45-calendar day deadline by this RFP or by written agreement between MLTC and the MCO.
Ad Hoc Deliverables	Ad hoc reports must be submitted within five business days from the date of request, unless otherwise specified by MLTC.

- **If a due date falls on a weekend or State-recognized holiday, the deliverable is due the next business day.**
- **All reports must be submitted in an MLTC provided template or in a format approved by MLTC.**

Ad Hoc Deliverables	**Description**	**Due Date**
Criminal Report	Pursuant to IV.T.6, the MCO will report any criminal findings of a provider. The findings should include the provider identifying information (name/NPI/Taxonomy/complete address) and nature of criminal offence.	Ad Hoc
Standard Financial Reports	MLTC will request this with adequate notice given to the MCO.	Ad Hoc
Bi-Weekly Deliverables	**Description**	**Due Date**
Bi-Weekly Tips	Pursuant to IV.O, The MCO must notify MLTC if it identifies patterns of provider billing anomalies and/or the safety of Nebraska Medicaid members (42 CFR 455.15).	Bi-Weekly
Monthly Deliverables	**Description**	**Due Date**
Claims Payment Accuracy	Claims payment accuracy percentages as described in Section IV.S - Claims Management.	Monthly
Enrollment Reconciliation Report	Report identifying any member for whom the MCO received a capitation payment for a month in which the member was never enrolled per official enrollment files	Monthly
Health Risk Screening Completion Report - 90 Day Eligible	Contains information related to eligible member completion of HRS within 90 days of enrollment	Monthly

DocuSign Envelope ID: F0EC1D8A-960D-4173-AF72-C5A870C70106

Health Risk Screening Completion Report - Annual Eligible	Contains information related to eligible member completion of HRS for annual enrollment	Monthly
Member-Provider Call Center	Pursuant to Section IV.F, data summarizing relevant call center operations.	Monthly
Monthly Claims Report	Summary data on claims system.	Monthly
Monthly FWA Detection Effort Report	Summary of the MCO's fraud prevention efforts as described in Section IV.O - Program Integrity.	Monthly
Monthly FWA Report	Summary of investigations as described in Section IV.O – Program Integrity.	Monthly
Pharmacy Claims Report	Summary data on pharmacy claims system.	Monthly
Pharmacy Prior Authorization Report	Summary of prior authorizations, peer review, and peer-to-peer consultation statistics; also includes special categories of drug prior authorizations.	Monthly
Provider Network Changes	Data and metrics summarizing any change to the MCO's network.	Monthly
Supplemental Member Care Report	Contains supplemental information related to member care and case management and member outreach.	Monthly
Quarterly Deliverables	**Description**	**Due Date**
Geographic Access Standards	Details of the MCO's network, including GeoAccess reports, as described in Section IV.I – Provider Network Requirements and Attachment 39 – Revised Access Standards.	Quarterly
Language Availability Report	Summary data and metrics on language availability access as determined by MLTC.	Quarterly
LB1063_68-2004 Children's Health and Treatment Act	Data related to youth Medicaid mental health authorization requests for all children ages 0-19	Quarterly: reports submitted to the Nebraska Legislature are due Jan. 1, Apr. 1, July 1, and Oct. 1. The MCO must submit these reports to MLTC as follows: Dec. 15 (data from June 1-Nov 30), March 15th (data from Dec 1-Feb 28), June 15 (data from March 1-May 31)
MCO Financial Report	Financial Reporting Template that allows the state to measure all financial key performance indicators related to Heritage Health Managed Care, to include but not limited to costs, utilization, enrollment and revenue.	Quarterly and Annually; Due 45 calendar days after the end of the reported period.
Medication compliance report for Chronic Diseases and High Risk Therapeutic Classes	Medication compliance report for chronic disease medications and specific high-risk therapeutic classes as defined by MLTC Compliance measure aligns with HEDIS definition of compliance	Quarterly

DocuSign Envelope ID: F0EC1D8A-960D-4173-AF72-C5A870C70106

MLTC Reporting Database: Care Management Log	Data of member assessment and their care management.	Quarterly
MLTC Reporting Database: Grievance System Log table	Pursuant to Section IV.H, data regarding the grievance and appeal systems.	Quarterly
MLTC Reporting Database: Out of Network Referrals	Data regarding out of network provider authorization requests.	Quarterly
NEMT Quarterly Report	Data regarding non-emergency transportation.	Quarterly
NF Skilled Stay Authorizations	Report on the number of skilled NF stay authorizations and denials, as well as PASRR compliance verification	Quarterly
Pharmacy Call Center Report	Data summarizing relevant pharmacy call center operations.	Quarterly
Pharmacy Prospective DUR Report	DUR statistics to support preparation of MLTC's annual CMS DUR report.	Quarterly
Pharmacy Retro-DUR Education Intervention Report	Project update in a format approved by MLTC.	Quarterly
Pharmacy Utilization Management Report	Data summarizing pharmacy utilization management categories including, but not limited to: quantity limits, prior authorization, step therapy, dose optimization, MAC, top 100 drugs, and top 50 drug categories listed by expenditures and claim count.	Quarterly
Provider Appointment Availability Access	Summary data and metrics on provider network appointment access as determined by MLTC and described in Attachment 39 – Revised Access Standards.	Quarterly
Psychotropic Medications for Youth Report	Summary of prior authorization and utilization relating to clinical edits.	Quarterly
Quarterly FWA Trending Reports	Summary data and narrative regarding FWA trends.	Quarterly
Quarterly Value-Added	Summary of value added services as agreed upon by the MCO and MLTC.	Quarterly; Due 45 days after the most recent calendar quarter
Service Verification	Service verification summary as described in Section IV.O – Program Integrity, Section IV.S – Claims Management, and Section IV. T – Reporting and Deliverables.	Quarterly
Semi-Annual Deliverables	**Description**	**Due Date**

DocuSign Envelope ID: F0EC1D8A-960D-4173-AF72-C5A870C70106

Claims Auditing Reporting Requirements	A report on error rate measurement data processing, medical necessity, and provider documentation audit of a statistically valid random sample of paid claims. The MCO must prepare an error rate measurement audit plan and submit it to MLTC for review and approval a minimum of 45 calendar days prior to the audit's planned completion date. The findings of the audit plan must be submitted to NMPI when completed. MLTC may require a corrective action plan based on the audit results.	June 30 and December 31
Member Advisory Committee Report	Narrative of the activities of the MCO's Member Advisory Committee as described in Section IV.M - Quality Management.	June 30 and December 31
MRO Reporting	Data related to Medicaid mental health authorization requests for all members ages 19+ for Medicaid Rehab Option Services	June 30 and December 31
Annual Deliverables	**Description**	**Due Date**
Adult Core Measures	Adult Core Measures results.	Annually by June 30
Annual Program Integrity Confirmation	Signed form acknowledging responsibilities related to the receipt of State and federal funds as described in Section IV.O - Program Integrity.	Annually
CAP	Results and status of all corrective action plans by provider type.	Annually
Child Core Measures	CHIPRA performance measure results.	Annually by June 30
Direct Medical Education/Indirect Medical Education Verification – In accordance with 471 NAC	For the state fiscal year, financial information on direct and indirect medical costs as required by MLTC in accordance with 471 NAC.	Annually; No later than March 31, State initiates the request
Fraud, Waste, Abuse, and Erroneous Payments Annual Plan	Compliance plan addressing requirements outlined in Section IV.O - Program Integrity.	Annually
HEDIS Report	HEDIS results.	Annually by June 30
LB 1160 Legislative Report	Number of state wards receiving behavioral health services from July 1 through June 30 immediately preceding the date of the current report; percentage of children denied Medicaid reimbursed services and the level of placement requested; and children in residential treatment.	Annually; No later than September 10
MLTC Reporting Database: CAHPS -- Adult	Data regarding the annual member satisfaction survey.	Annually
MLTC Reporting Database: CAHPS – Child/CHIP with CCC	Data regarding the annual member satisfaction survey.	Annually
MLTC Reporting Database: CAHPS – Child/CHIP without CCC	Data regarding the annual member satisfaction survey.	Annually

DocuSign Envelope ID: F0EC1D8A-960D-4173-AF72-C5A870C70106

Attachment 38 – Revised Reporting Requirements

MLTC Reporting Database: Provider and Facility Survey	Data regarding the annual provider and facility satisfaction surveys. The provider satisfaction survey tool and methodology must be submitted to MLTC for approval at least 90 days prior to its administration.	Annually
Network Development Plan & Network Development Plan Template	Details of the MCO's network adequacy, including attestation, GeoAccess reports, and a discussion of any provider network gaps and the MCO's remediation plans, as described in Section IV.I – Provider Network Requirements.	Annually by November 1
PIP Report	Annual report of all PIPs.	Annually
Quality Management Work Plan and Program Evaluation	Discussion of the MCO's quality goals, initiatives and work plan; as well as data and analysis summarizing the results of the annual quality work plan. All as described in Section IV.M – Quality Management.	Annually
Department of Insurance Financial Report	Copy of annual audited financial statement	Annually; Upon request of MLTC, no later than June 1
IRS Form 8963	Copy of form	Annually; By Sept. 5

AMENDMENT NINE
Contract 71164 O4
Medicaid Managed Care Physical Health, Behavioral Health, and Pharmacy Services for the State of Nebraska
Between the State of Nebraska and WellCare of Nebraska

The State of Nebraska and WellCare of Nebraska make this Amendment (the Amendment") to Contract 71164 O4 (the "Contract"), and upon mutual agreement and other valuable consideration the parties agree to and hereby amend the contract as follows:

I. **ADDITIONS:** The following sections are hereby added:

A. Section IV.C.12.d – Audit Requirements

d. The MCO shall be subject to an audit of Managed Care Data operations and underlying security, privacy, and isolation controls, no more often than every three months, to ensure that the required controls for data isolation, access, and usage are operational. The audit will be conducted by a third party to be selected by MLTC and approved by the MCO. The MCO will provide open and complete access to the underlying systems. Any and all relevant and/or necessary documentation to support the audit must be provided by the MCO no less than ten (10) days ahead of the on-site audit. Said audit will be conducted at MCO's expense.

B. Section IV.E.3.f & g – Behavioral Health Parity

f. The MCO may not impose an annual dollar limit on mental health or substance use disorder benefits per 42 CFR 438.905 (b). Any financial, quantitative or non-qualitative limits in force, are applied consistently for medical/surgical & mental health/SUD benefits per 42 CRF 438.910.

g. MCO may not impose a nonquantitative treatment limitation for mental health or substance use disorder benefits in any classification unless, under the policies and procedures of the MCO, PIHP, or PAHP as written and in operation, any processes, strategies, evidentiary standards, or other factors used in applying the nonquantitative treatment limitation to mental health or substance use disorder benefits in the classification are comparable to, and are applied no more stringently than, the processes, strategies, evidentiary standards.

C. Section IV.R.9.I -

I. The MCO must adhere to the following Data Protection Requirements:

i. Medicaid data must be maintained and stored solely by the servicing MCO, except as in (ii) below. The MCO may not use a subcontractor or other entity owned, controlled, and/or operated by any other MCO operating within the State of Nebraska or any other state to store, maintain, utilize, share, or access any Medicaid data.

ii. During a transition period, as defined by IV.X., resulting from a merger, reorganization and/or change of ownership as defined by IV.C.11, the MCO must submit a Data Use Agreement to MLTC no later than thirty (30) days prior to the start of the transition regarding temporary dual-retention of data during the transition.

iii. Medicaid data previously stored, maintained, utilized, shared, or accessed by a MCO must be destroyed and/or rendered completely and totally inaccessible contemporaneously upon completion of a merger, reorganization, and/or change of ownership per the terms of Section IV.C.11 (Merger, Reorganization, and Change of Ownership).

D. Section IV.V.2.j

j. Data Breach

i. Should the MCO fail to protect Medicaid data in accordance with the terms of this contract or any applicable law, MTLC may assess damages of $10,000 per calendar day for each day the MCO remains in breach.

II. **MODIFICATIONS:** The Parties hereto modify the following sections:

A. Section IV.X.2.a - Transition Period

a. The transition period for the contract begins on contract award and ends 90 days after the contract start date for new contracts. The transition period for a contract resulting from a merger, reorganization, or change in ownership of an existing contract begins at the date of close of said the merger, reorganization, or change of ownership, and ends 180 days thereafter, with optional 90-day extension periods available upon request in writing by the MCO no less than ten (10) days prior to the end of each period, and upon approval by MLTC. During the transition period the MCO must implement the requirements of the contract and collaborate with MLTC to facilitate a seamless transition between MCOs, providers and programs in order to prevent an interruption of services and to ensure continuity of care for members.

With the exception of transplants, for which all previous authorizations will be honored, MCOs will honor, regardless of provider participation network status, previous authorizations for the lesser of:

i. 90 days from implementation;
ii. The end date on the authorization from the previous entity; or
iv. A new decision by the plan with consultation from the provider if determined on the medical necessity of the service.

B. Section IV.C.11 - Merger, Reorganization, and Change of Ownership

a. The MCO must submit notification to MLTC of a merger, reorganization, or change of ownership prior to its proposed effective date. The MCO must also submit a detailed merger, reorganization, or transition plan to MLTC for review prior to the effective date of the proposed merger, reorganization, or change of ownership. The purpose of the transition plan's review is to ensure uninterrupted services to members, evaluate the new entity's ability to maintain and support the contract requirements, and ensure that services to members are not diminished. In addition, the MCO must provide adequate assurances to MLTC that the major components of its organization and programs are not adversely affected by such merger, reorganization, or change in ownership. This plan must be approved by MLTC prior to any merger, reorganization, or change of ownership. MLTC will not permit one organization to own or manage more than one contract within the same program.

b. Upon a merger, reorganization, or change of ownership of any MCO, MLTC may offer open enrollment period of no more than ninety (90) calendar days to all Medicaid members. During this period of open enrollment, each member may change to another MCO for any reason. Each MCO must notify its respective members of the open enrollment period and their rights therein.

C. Section IV.C.8 – Participation in the Nebraska Health Information Initiative

The MCO is required to enter into a participation agreement with the Nebraska Health Information Initiative (NeHII). NeHII is a non-profit organization that includes health care providers, payers, and the State. NeHII's purpose is to achieve health care transformation through the creation of a secure, web-based health information exchange to serve the State. More information on NeHII can be found at: www.nehii.org.

III. MODIFICATIONS: The Parties hereto modify the following sections, effective sixty (60) days after execution of this amendment:

A. Section IV.B.3.f.iii – Auto-Assignment Algorithm

iii. MLTC reserves the right to remove the MCO from the auto-assignment round robin process for any quarter, beginning with the 4th Quarter, 2020, but members can continue to pro-actively select that plan.

This Amendment becomes part of the contract. Except as set form in this Amendment, the Contract is unaffected and shall continue in full force and effect in accordance with its terms. If there is a conflict between this Amendment and the Contract or any earlier amendment, the terms of this Amendment will prevail.

IN WITNESS WHEREOF, the parties have executed this amendment as of the date of execution by both parties below.

AMENDMENT EIGHT
Contract 71164 04
Medicaid Managed Care Physical Health, Behavioral Health, and Pharmacy Services for the State of Nebraska
Between the State of Nebraska and WellCare of Nebraska

The State of Nebraska and WellCare of Nebraska make this Amendment (the Amendment") to Contract 71164 04 (the "Contract"), and upon mutual agreement and other valuable consideration the parties agree to and hereby amend the contract as follows:

I. **ADDITIONS:** The following sections are hereby added:

A. IV.N.9.c; i; ii; iii; and iv

c. Per section 1004 of the *Substance Use-Disorder Prevention that Promotes Opioid Recovery and Treatment for Patients and Communities Act (SUPPORT Act)* consistent with section 1902(oo)(1)(A)(ii) of the Social Security Act, MCO is required to operate a DUR program and implement provisions in the DUR program, effective October 1, 2019. The MCO DUR program must have in place:

i. prospective safety edits and a claims review automated process for subsequent opioid fills (refills) when in excess of any limitation (duplicate fills, early fills, and drug quantity limitations) that may be specified by the State and retrospective safety edits and a claims review automated process for any fills in excess of the maximum MME dose limitation identified by the state.

ii. process for retrospective automated claims review (as specified by the state) that monitors concurrently prescribed opioids and benzodiazepines or opioids and antipsychotics. Permitted exclusions from the above safety edits and claims review requirements to not apply to beneficiaries receiving hospice or palliative care; receiving treatment for cancer; residents of a long-term care facility, a facility described in section 1905(d) of the Act, or of another facility for which frequently abused drugs are dispensed for residents through a contact with a single pharmacy; or other individuals the state elects to treat as exempted from such requirements

iii. program to monitor and manage appropriate use of antipsychotic medications by children not more than the age of 18 and children in foster care.

iv. process as defined by the state that identifies potential fraud or abuse of controlled substances by individuals, health care providers prescribing drugs to individuals so enrolled, and pharmacies dispensing drugs to individuals so enrolled. Process may include lock in programs and prescription drug monitoring programs.

B. Section IV.P.14; i; ii; a; i; ii; and iii; b and c – Reinvestment Accounts

Pursuant to Neb. Rev. Stat. §71-831, reinvestment of profits in excess of the contracted amount, performance contingencies imposed by the department, and any unearned (forfeited) hold-back funds must be reinvested. To this end, the MCO must establish and manage two accounts:

i. A hold-back account, for the purpose of holding funds listed in the QPP. Funds in this account include both the Federal and State share of cost in the State's Medicaid program.

ii. A reinvestment account, for the purpose of holding funds pursuant to Neb. Rev. Stat. §71-831 subject to reinvestment.

a. Both the holding and reinvestment distribution accounts must:

i. Be separate from other accounts required by the contract, or that may be required by State or Federal law.

ii. Have no risk-bearing investments.

iii. Be created and operated in full compliance with the Nebraska Uniform Trust Code (Neb. Rev. Stat. §30-3801 to 30-38110).

b. The MCO must distribute funds in the reinvestment distribution account in accordance with Neb. Rev. Stat. §71-831 and any successor statutes.

c. The MCO will be held responsible and accountable for the necessary fiduciary duties and functions required to administer the reinvestment holding and reinvestment distribution accounts. Oversight of the financial accounting will be in accordance with the financial management reporting requirements outlined in Section IV.T Reporting and Deliverables of this RFP.

C. Attachment 42 - High Risk Drug Pool Risk Corridor

The high cost drug pool risk corridors are set forth in Attachment 42 attached hereto and made a part hereof.

II. **Modifications:** The Parties hereto modify the following sections:

A. Section IV.P.2.e.xvii

xvii. Refugee Medical Assistance Program (RMAP)

B. Section IV.P.2.i – Capitation Rate Determination Process

i. Any adjusted rates will be actuarially sound and consistent with requirements set forth in 42 CFR 438.6(c), and 42 CFR 457.1203(a). Adjusted rates will require an amendment to the contract, mutually agreeable by both parties.

C. Section IV.P.9.c

c. This calculation must be completed within eleven (11) months of the end of the contract year. The risk corridor will be calculated first, and any payments/receipt under the risk corridor will be incorporated in the MLR calculation. This methodology is consistent with the Final Rule published by CMS.

D. Section IV.P.12.d

d. To ensure compliance with state law, MLTC will calculate the administrative expense rate within eleven (11) months of the end of each contract year.

E. Section IV.P.17 – High Cost Drug Pool Risk Corridor

Beginning with the CY19 contract period MLTC implemented a high cost drug pool as part of the Heritage Health program. The purpose of this pool is to develop a mechanism that will retrospectively re-allocate funding between MCOs should there be a disproportionate share of high-cost drug experience for any MCO(s). The CY19 high-cost drug pool was considered budget-neutral from the State and CMS' perspective. However, as a result of continued uncertainty regarding emerging high cost drugs coming into the market, MLTC is implementing a risk corridor around the high-cost drug pool effective January 1, 2020, as set forth in Attachment 42 – High Cost Drug Pool Risk Corridor.

F. Attachment 11 – Rates

Rates for January 1, 2020, through December 31, 2020, and are set forth in the Amended Attachment 11 attached hereto and made a part hereof.

G. Attachment 14 – Quality Performance Program Measures-Contract Year Four

The Quality Performance Program measures have been revised for the time period January 1, 2020, through December 31, 2020, and are set forth in the Amended Attachment 14 attached hereto and made a part hereof.

H. Attachment 38 – Revised Reporting Requirements

The Reporting requirements and timeframes have been changed. The updated requirements are set forth in the amended Attachment 38 attached hereto and made a part hereof.

This amendment becomes part of the contract. Except as set form in this amendment, the contract is unaffected and shall continue in full force and effect in accordance with its terms. If there is a conflict between this amendment and the contract or any earlier amendment, the terms of this amendment will prevail.

IN WITNESS WHEREOF, the parties have executed this amendment as of the date of execution by both parties below.

High Cost Drug Pool Risk Corridor

Beginning with the CY19 contract period the State has implemented a high cost drug pool as part of the Heritage Health program. The purpose of this pool is to develop a mechanism that will retrospectively re-allocate funding between MCOs should there be a disproportionate share of high-cost drug experience for any MCO(s). The CY19 high-cost drug pool was considered budget-neutral from the State and CMS' perspective. However, as a result of continued uncertainty regarding emerging high cost drugs coming into the market, the State has decided to include a risk corridor around the high-cost drug pool in CY20. Detail surrounding the high-cost drug risk corridor below.

Drug Identification Criteria
High-cost drug experience has been identified within the CY18 base data using a cost-based approach. Ten digit Generic Product Indicators (GPIs), and injectable codes on the CY18 fee schedule that have an average cost of $10,000 PMPM have been classified as high-cost. This high-cost drug pool will only be applicable to the non-dual populations. The following Heritage Health rating cohorts will be exempt: Healthy Dual, Dual LTC, and Dual Waiver.

The following steps have been taken to identify the GPIs or injectables that meet the high-cost criteria:
1. Utilizers of each GPI or injectable were identified, along with all associated member months for these utilizers.
2. The total dollars paid, and total member months for drug utilizers were summarized to determine an average "utilizer" PMPM for each GPI and injectable within the CY18 data.
3. Each GPI or injectable with an average "utilizer" PMPM of $10,000 or greater meet the criteria for the high cost pharmacy risk pool within the base data.

For example: there are 10 members who utilize a particular GPI in CY18. These 10 members have a combined 90 member months through CY18. The total expenditures for this GPI are $900,000, resulting in an average PMPM of $10,000. All expenditures associated with this GPI would now be included in the development of the high-cost drug pool.

Establish Benchmarks
Upon identification of the relevant GPIs and injectables, the total spend associated with these drugs are summarized to arrive at a specific high cost drug PMPM by COA and Rating Region. These amounts are then projected forward to the CY20 contract period. A sample of the high-cost drug pool cost projection is show below:

COA	Total COA MMs	High Cost GPI PMPM	High Cost Injectable Code PMPM	Total High Cost PMPM (GPI+J Code)	Illustrative Projection Factor	Projected to CY20
1	50,000	*$0.00*	*$0.00*	$0.00	-	$0.00
2	150,000	*$8.00*	*$2.00*	$10.00	1.15	$11.50
3	250,000	*$15.00*	*$5.00*	$20.00	1.15	$23.00

Once COA and Regional PMPM projections are established, these PMPMs are converted to MCO-specific PMPMs. MCO-specific PMPMs are calculated using the CDPS+Rx prospective risk score applicable to the CY20 Heritage Health capitation rates.

		MCO A		MCO B	
COA	**Statewide Projected to CY20**	**Risk Score**	**MCO-Specific PMPM**	**Risk Score**	**MCO-Specific PMPM**
1	$0.00	1.00	$0.00	1.00	$0.00
2	$11.50	1.10	$12.65	0.90	$10.35
3	$23.00	0.95	$21.85	1.05	$24.15

Experience Period Reconciliation

Once the CY20 contract period ends, a reconciliation will occur between MCOs to the extent that the distribution of high cost drugs between MCOs is different than the distribution projected by the rate development process.

A total pool of dollars will be calculated after the end of the CY20 contract period. This pool will be calculated based on the total CY20 member months and the MCO-specific PMPMs described in the "Establish Benchmarks" section above. Once this pool is established, dollars may be added to or subtracted from the pool, as a result of the risk corridor that is in place for CY20.

In order to determine the CY20 actual expenditures that will be compared to the high-cost drug pool, high cost GPIs and injectables relevant to CY20 will be determined. Due to the nature of new drugs coming onto the market over time, it is possible that drugs that exist in CY20 were not present in the CY18 base data period. Therefore, a separate identification of drugs with an average PMPM of $10,000 in the CY20 contract period will be completed. This will be completed in a manner consistent with the approach described in the "High Cost Drug Identification Criteria" section above, with the exception being that the membership and claims data will be based on CY20 experience, and a standardized unit cost will be applied to NDCs underlying each GPI identified. Once this identification process is completed, the total experience for the GPIs and injectables that meet the criteria in CY20 will comprise the experience to be compared to the high-cost drug pool.

Prior to determining dollar transfers between MCOs, the CY20 experience for drugs that meet the high cost criteria will be evaluated against the risk corridor. The risk corridor bands are noted below:

Corridor Bands		**State/Fed and MCO Share**	
Low	**High**	**State/Fed Share**	**MCO Share**
<=85%	85%	100%	0%
85%	90%	75%	25%
90%	95%	50%	50%
95%	100%	0%	100%
100%	105%	0%	100%
105%	110%	50%	50%

110%	115%	75%	25%
115%	>=115%	100%	0%

If the program-wide experience for high cost drugs exceeds the original pool enough to warrant a State/Fed share of the excess expenditures, new dollars will be added to the pool in addition to the capitation rates. Likewise, if the experience is far enough below the original pool to warrant State/Fed savings, then dollars will be removed and MCOs will collectively pay dollars back to the State/Fed.

Once the risk corridor is calculated, any additions or reductions to the pool are made as necessary. A dollar transfer will then occur to the extent that an MCO's total contribution to the statewide pool is proportionally different than its actual CY20 experience as compared to the statewide CY20 actual experience. For example: an MCO's CY20 member months multiplied by its MCO-Specific PMPMs contributes 30% of the high cost drug pool but its CY20 expenditures for high cost drugs reflects 35% of the statewide CY20 expenditures. In this scenario, the MCO would receive a payment of 5% (35% - 30%) of the total high-cost drug pool. Conversely, either one or two of the other MCOs would have to pay out the equivalent of the 5%.

Attachment 14
Quality Performance Program Measures – Contract Year Four

Base Performance Requirement	Payment Threshold	% of Payment Pool
Claims Processing Timeliness - 15 Days: Process and pay or deny, as appropriate, at least 90% of all claims for medical services provided to members within 15 days of the date of receipt. The date of receipt is the date the MCO receives the clean claim.	95% within 10 business days	5%
Encounter Acceptance Rate: Submitted encounters must be accepted 95% or greater by MLTC's Medicaid Management Information System pursuant to MLTC specifications.	98%	15%
Appeal Resolution Timeliness: MCO must resolve each appeal, and provide notice, as expeditiously as the member's health condition requires, within 45 calendar days from the day the MCO receives the appeal.	95% within 20 days	5%
Lead Screening in Children (LSC): Percentage of children two (2) years of age who had one or more capillary or venous lead blood test for lead poisoning by their second birthday.	69%	10%
Well-Child Visits in the First 15 Months of Life (W15): Percentage of members who turned 15 months old during the measurement year and who had the following number of well-child visits with a PCP during their first 15 months of life: • No well-child visits. • One (1) well-child visit. • Two (2) well-child visits. • Three (3) well-child visits. • Four (4) well-child visits. • Five (5) well-child visits. • Six (6) or more well-child visits.	69%	10%
Adolescent Well-Care Visits (AWC): Percentage of enrolled members 12-21 years of age who had at least one (1) comprehensive well-care visit with a PCP or an OB/GYN practitioner during the measurement year.	57%	10%
Well-Child Visits in the Third, Fourth, Fifth and Sixth Years of Life (W34): Percentage of members three (3) to six (6) years of age who had one (1) or more well-child visits with a PCP during the measurement year.	71%	10%

at least three (3) follow-up visits within a 10 month period, one of which was within 30 days of when the first ADHD medication was dispensed. Two rates are reported: • *Initiation Phase. P*ercentage of members six (6) to 12 years of age as of the IPSD with an ambulatory prescription dispensed for ADHD medication, who had one (1) follow-up visit with a practitioner with prescribing authority during the 30-day Initiation Phase. *Continuation and Maintenance (C&M) Phase*. Percentage of members six (6) to 12 years of age as of the IPSD with an ambulatory prescription dispensed for ADHD medication, who remained on the medication for at least 210 days and who, in addition to the visit in the Initiation Phase, had at least two (2) follow-up visits with a practitioner within 270 days (9 months) after the Initiation Phase ended.	Note: State pharmacy file format change may impact validation	
Prenatal and Postpartum Care: Timeliness of Prenatal Care (PPC-CH): Percentage of deliveries of live births on or between November 6 of the year prior to the measurement year and November 5 of the measurement year that received a prenatal care visit in the first trimester, on the enrollment start date, or within 42 days of enrollment in Medicaid/CHIP.	Monitoring Metric Only 2018 CMS Median 80.6%	NA
Antidepressant Medication Management (AMM): Percentage of members 18 years of age and older treated with antidepressant medication, had a diagnosis of major depression and remained on antidepressant medication treatment. Two rates are reported: 1. *Effective Acute Phase Treatment*. Percentage of members who remained on an antidepressant medication for at least 84 days (12 weeks). 2. *Effective Continuation Phase Treatment*. Percentage of members who remained on an antidepressant medication for at least 180 days (6 months).	Monitoring Metric Only Note: State pharmacy file format change may impact validation	NA

Plans may use whichever reporting methodology that they wish but must notify the state on submission. State may request supporting documentation for metrics, including but not limited to, claims extracts, denominator member list, supplemental information used in calculation, etc. If the plan does not supply the requested documentation, the measure target will be held to have not been met.

Attachment 38 – Revised Reporting Requirements

Bi-Weekly	Due the 1st and 15th of the month.
Monthly Deliverables	Due on the 15th day of the following calendar month unless otherwise noted in the RFP or agreed to in writing by the MCO and MLTC.
Quarterly Deliverables	Due 45 calendar days after the end of the most recent quarter unless otherwise noted in the RFP or agreed to in writing by the MCO and MLTC.
Semi-Annual Deliverables	Due as specified in this attachment.
Annual Deliverables	Reports, files, and other deliverables due annually must be submitted within 45 calendar days following the 12th month of the contract year, except those reports that are specifically exempted from the 45-calendar day deadline by this RFP or by written agreement between MLTC and the MCO.
Ad Hoc Deliverables	Ad hoc reports must be submitted within five business days from the date of request, unless otherwise specified by MLTC.

- **If a due date falls on a weekend or State-recognized holiday, the deliverable is due the next business day.**
- **All reports must be submitted in an MLTC provided template or in a format approved by MLTC.**

Ad Hoc Deliverables	Description	Due Date
Criminal Report	Pursuant to IV.T.6, the MCO will report any criminal findings of a provider. The findings should include the provider identifying information (name/NPI/Taxonomy/complete address) and nature of criminal offence.	Ad Hoc
Standard Financial Reports	MLTC will request this with adequate notice given to the MCO.	Ad Hoc
Bi-Weekly Deliverables	**Description**	**Due Date**
Bi-Weekly Tips	Pursuant to IV.O, The MCO must notify MLTC if it identifies patterns of provider billing anomalies and/or the safety of Nebraska Medicaid members (42 CFR 455.15).	Bi-Weekly
Monthly Deliverables	**Description**	**Due Date**
Claims Payment Accuracy	Claims payment accuracy percentages as described in Section IV.S - Claims Management.	Monthly
Enrollment Reconciliation Report	Report identifying any member for whom the MCO received a capitation payment for a month in which the member was never enrolled per official enrollment files	Monthly
Member-Provider Call Center	Pursuant to Section IV.F, data summarizing relevant call center operations.	Monthly
Monthly Claims Report	Summary data on claims system.	Monthly

Monthly FWA Detection Effort Report	Summary of the MCO's fraud prevention efforts as described in Section IV.O - Program Integrity.	Monthly
Monthly FWA Report	Summary of investigations as described in Section IV.O – Program Integrity.	Monthly
Pharmacy Claims Report	Summary data on pharmacy claims system.	Monthly
Pharmacy Prior Authorization Report	Summary of prior authorizations, peer review, and peer-to-peer consultation statistics; also includes special categories of drug prior authorizations.	Monthly
Provider Network Changes	Data and metrics summarizing any change to the MCO's network.	Monthly
Quarterly Deliverables	**Description**	**Due Date**
Geographic Access Standards	Details of the MCO's network, including GeoAccess reports, as described in Section IV.I – Provider Network Requirements and Attachment 39 – Revised Access Standards.	Quarterly
Language Availability Report	Summary data and metrics on language availability access as determined by MLTC.	Quarterly
LB1063_68-2004 Children's Health and Treatment Act	Data related to youth Medicaid mental health authorization requests for all children ages 0-19	Quarterly: reports submitted to the Nebraska Legislature are due Jan. 1, Apr. 1, July 1, and Oct. 1. The MCO must submit these reports to MLTC as follows: Dec. 15 (data from June 1-Nov 30), March 15th (data from Dec 1-Feb 28), June 15 (data from March 1-May 31)
MCO Financial Report	Financial Reporting Template that allows the state to measure all financial key performance indicators related to Heritage Health Managed Care, to include but not limited to costs, utilization, enrollment and revenue.	Quarterly and Annually; Due 45 calendar days after the end of the reported period.
MLTC Reporting Database: Care Management Log	Data of member assessment and their care management.	Quarterly
MLTC Reporting Database: Grievance System Log table	Pursuant to Section IV.H, data regarding the grievance and appeal systems.	Quarterly
MLTC Reporting Database: Out of Network Referrals	Data regarding out of network provider authorization requests.	Quarterly
NEMT Quarterly Report	Data regarding non-emergency transportation.	Quarterly

NF Skilled Stay Authorizations	Report on the number of skilled NF stay authorizations and denials, as well as PASRR compliance verification	Quarterly
Pharmacy Call Center Report	Data summarizing relevant pharmacy call center operations.	Quarterly
Pharmacy Prospective DUR Report	DUR statistics to support preparation of MLTC's annual CMS DUR report.	Quarterly
Pharmacy Retro-DUR Education Intervention Report	Project update in a format approved by MLTC.	Quarterly
Pharmacy Utilization Management Report	Data summarizing pharmacy utilization management categories including, but not limited to: quantity limits, prior authorization, step therapy, dose optimization, MAC, top 100 drugs, and top 50 drug categories listed by expenditures and claim count.	Quarterly
Provider Appointment Availability Access	Summary data and metrics on provider network appointment access as determined by MLTC and described in Attachment 39 – Revised Access Standards.	Quarterly
Psychotropic Medications for Youth Report	Summary of prior authorization and utilization relating to clinical edits.	Quarterly
Quarterly FWA Trending Reports	Summary data and narrative regarding FWA trends.	Quarterly
Quarterly Value-Added	Summary of value added services as agreed upon by the MCO and MLTC.	Quarterly; Due 45 days after the most recent calendar quarter
Service Verification	Service verification summary as described in Section IV.O – Program Integrity, Section IV.S – Claims Management, and Section IV. T – Reporting and Deliverables.	Quarterly
Semi-Annual Deliverables	**Description**	**Due Date**
Claims Auditing Reporting Requirements	A report on error rate measurement data processing, medical necessity, and provider documentation audit of a statistically valid random sample of paid claims. The MCO must prepare an error rate measurement audit plan and submit it to MLTC for review and approval a minimum of 45 calendar days prior to the audit's planned completion date. The findings of the audit plan must be submitted to NMPI when completed. MLTC may require a corrective action plan based on the audit results.	June 30 and December 31
Member Advisory Committee Report	Narrative of the activities of the MCO's Member Advisory Committee as described in Section IV.M - Quality Management.	June 30 and December 31

MRO Reporting	Data related to Medicaid mental health authorization requests for all members ages 19+ for Medicaid Rehab Option Services	June 30 and December 31
Annual Deliverables	**Description**	**Due Date**
Adult Core Measures	Adult Core Measures results.	Annually by June 30
Annual Program Integrity Confirmation	Signed form acknowledging responsibilities related to the receipt of State and federal funds as described in Section IV.O - Program Integrity.	Annually
CAP	Results and status of all corrective action plans by provider type.	Annually
Child Core Measures	CHIPRA performance measure results.	Annually by June 30
Direct Medical Education/Indirect Medical Education Verification – In accordance with 471 NAC	For the state fiscal year, financial information on direct and indirect medical costs as required by MLTC in accordance with 471 NAC.	Annually; No later than March 31, State initiates the request
Fraud, Waste, Abuse, and Erroneous Payments Annual Plan	Compliance plan addressing requirements outlined in Section IV.O - Program Integrity.	Annually
HEDIS Report	HEDIS results.	Annually by June 30
LB 1160 Legislative Report	Number of state wards receiving behavioral health services from July 1 through June 30 immediately preceding the date of the current report; percentage of children denied Medicaid reimbursed services and the level of placement requested; and children in residential treatment.	Annually; No later than September 10
MLTC Reporting Database: CAHPS -- Adult	Data regarding the annual member satisfaction survey.	Annually by November 1
MLTC Reporting Database: CAHPS – Child/CHIP with CCC	Data regarding the annual member satisfaction survey.	Annually by November 1
MLTC Reporting Database: CAHPS – Child/CHIP without CCC	Data regarding the annual member satisfaction survey.	Annually by November 1
MLTC Reporting Database: Provider and Facility Survey	Data regarding the annual provider and facility satisfaction surveys. The provider satisfaction survey tool and methodology must be submitted to MLTC for approval at least 90 days prior to its administration.	Annually
Network Development Plan & Network Development Plan Template	Details of the MCO's network adequacy, including attestation, GeoAccess reports, and a discussion of any provider network gaps and the MCO's remediation plans, as described in Section IV.I – Provider Network Requirements.	Annually by November 1
PIP Report	Annual report of all PIPs.	Annually
Quality Management Work Plan and Program Evaluation	Discussion of the MCO's quality goals, initiatives and work plan; as well as data and analysis summarizing the results of the annual quality work plan. All as described in Section IV.M – Quality Management.	Annually

Attachment 38 – Revised Reporting Requirements

Department of Insurance Financial Report	Copy of annual audited financial statement	Annually; Upon request of MLTC, no later than June 1
IRS Form 8963	Copy of form	Annually; By Sept. 5

AMENDMENT SEVEN
Contract 71164 04
Medicaid Managed Care Physical Health, Behavioral Health, and Pharmacy Services for the State of Nebraska
Between the State of Nebraska and WellCare of Nebraska

The State of Nebraska and WellCare of Nebraska make this Amendment (the Amendment") to Contract 71164 04 (the "Contract"), and upon mutual agreement and other valuable consideration the parties agree to and hereby amend the contract as follows:

I. **REMOVALS:** The following section is hereby removed:

A. Attachment 7 – Performance Measures

B. IV.I.14.i

II. **ADDITIONS:** The following sections are hereby added effective November 1, 2019:

A. Section IV.S.4.a.vi – Drug Claims Processing

vi. MLTC prohibits "spread pricing" defined as any amount charged or claimed by a PBM to an MCO that is in excess of the amount paid to the pharmacy for a prescription, including the ingredient cost, provider fee and dispensing fee.

C. Section IV.E.22.f.ix – Medical Services for Special Populations

x. Reviewed and revised upon reassessment of functional need, at least every 12 months, or when the enrollee's circumstances or needs change significantly.

III. **Modifications:** The Parties hereto modify the following sections:

A. Section IV.B.6.b – MCO Changes

b. After the initial 90 calendar day period, Medicaid members will be locked in to their MCO selection until the next annual open enrollment period. The annual open enrollment period will take place November 1 through December 31 each year of the contract.

B. Section IV.D.3.k – Additional Required Staff

k. Non-Emergency Medical Transportation (NEMT) Network Coordinator. Responsible for receiving and processing provider inquiries and complaints, investigating provider complaints, and referring complaints to the Public Service Commission (PSC) for transportation providers governed by the PSC. The NEMT Network Coordinator is also responsible for resolving provider issues to include but not limited to payment delays. This position must be available to meet personally with transportation providers but is not required to be located in Nebraska.

C. Section IV.E.6.a – Value Added Services

a. As permitted under 42 CFR 438.3(e), and to the extent consistent with provisions of State law, the MCO may, in its discretion, offer expanded services and benefits to enrollees in addition to those benefits and services specified in this section of the RFP.

D. Attachment 11 – Rates

July 1, 2019, through December 31, 2019, and are set forth in the Amended Attachment 11 attached hereto and made a part hereof.

E. Attachment 38 – Revised Reporting Requirements

The Reporting requirements and templates have been changed. The updated requirements and report titles are set forth in the amended Attachment 38 attached hereto and made a part hereof.

This amendment becomes part of the contract. Except as set form in this amendment, the contract is unaffected and shall continue in full force and effect in accordance with its terms. If there is a conflict between this amendment and the contract or any earlier amendment, the terms of this amendment will prevail.

IN WITNESS WHEREOF, the parties have executed this amendment as of the date of execution by both parties below.

Attachment 38 – Revised Reporting Requirements

Bi-Weekly	Due the 1st and 15th of the month.
Monthly Deliverables	Due on the 15th day of the following calendar month unless otherwise noted in the RFP or agreed to in writing by the MCO and MLTC.
Quarterly Deliverables	Due 45 calendar days after the end of the most recent quarter unless otherwise noted in the RFP or agreed to in writing by the MCO and MLTC.
Semi-Annual Deliverables	Due as specified in this attachment.
Annual Deliverables	Reports, files, and other deliverables due annually must be submitted within 45 calendar days following the 12th month of the contract year, except those reports that are specifically exempted from the 45-calendar day deadline by this RFP or by written agreement between MLTC and the MCO.
Ad Hoc Deliverables	Ad hoc reports must be submitted within five business days from the date of request, unless otherwise specified by MLTC.

- **If a due date falls on a weekend or State-recognized holiday, the deliverable is due the next business day.**
- **All reports must be submitted in an MLTC provided template or in a format approved by MLTC.**

Ad Hoc Deliverables	Description	Due Date
Criminal Report	Pursuant to IV.T.6, the MCO will report any criminal findings of a provider. The findings should include the provider identifying information (name/NPI/Taxonomy/complete address) and nature of criminal offence.	Ad Hoc
Standard Financial Reports	MLTC will request this with adequate notice given to the MCO.	Ad Hoc
Bi-Weekly Deliverables	**Description**	**Due Date**
Bi-Weekly Tips	Pursuant to IV.O, The MCO must notify MLTC if it identifies patterns of provider billing anomalies and/or the safety of Nebraska Medicaid members (42 CFR 455.15).	Bi-Weekly
Monthly Deliverables	**Description**	**Due Date**
Claims Payment Accuracy	Claims payment accuracy percentages as described in Section IV.S - Claims Management.	Monthly
Enrollment Reconciliation Report	Report identifying any member for whom the MCO received a capitation payment for a month in which the member was never enrolled per official enrollment files	Monthly
Member-Provider Call Center	Pursuant to Section IV.F, data summarizing relevant call center operations.	Monthly
Monthly Claims Report	Summary data on claims system.	Monthly

Monthly FWA Detection Effort Report	Summary of the MCO's fraud prevention efforts as described in Section IV.O - Program Integrity.	Monthly
Monthly FWA Report	Summary of investigations as described in Section IV.O – Program Integrity.	Monthly
Pharmacy Claims Report	Summary data on pharmacy claims system.	Monthly
Pharmacy Prior Authorization Report	Summary of prior authorizations, peer review, and peer-to-peer consultation statistics; also includes special categories of drug prior authorizations.	Monthly
Provider Network Changes	Data and metrics summarizing any change to the MCO's network.	Monthly
Quarterly Deliverables	**Description**	**Due Date**
Geographic Access Standards	Details of the MCO's network, including GeoAccess reports, as described in Section IV.I – Provider Network Requirements and Attachment 39 – Revised Access Standards.	Quarterly
Language Availability Report	Summary data and metrics on language availability access as determined by MLTC.	Quarterly
LB1063_68-2004 Children's Health and Treatment Act	Data related to youth Medicaid mental health authorization requests for all children ages 0-19	Quarterly: reports submitted to the Nebraska Legislature by MLTC on Jan. 1, Apr. 1, July 1, and Oct. 1. The MCO must submit the data for these reports to MLTC as follows: Dec 15 (data from July 1 – Nov 30), March 15th (data from Dec 1 –Feb 28), June 15 (data from March 1 – May 31).
MCO Financial Report	Financial Reporting Template that allows the state to measure all financial key performance indicators related to Heritage Health Managed Care, to include but not limited to costs, utilization, enrollment and revenue.	Quarterly and Annually; Due 45 calendar days after the end of the reported period.
MLTC Reporting Database: 30 Day Behavioral Health ER Visits	Data of ER visits with a behavioral health diagnosis subsequent to an inpatient behavioral health discharge.	Quarterly
MLTC Reporting Database: 30 Day Inpatient Re-Admits	Data of inpatient re-admissions.	Quarterly
MLTC Reporting Database: Care Management Log	Data of member assessment and their care management.	Quarterly

MLTC Reporting Database: Grievance System Log table	Pursuant to Section IV.H, data regarding the grievance and appeal systems.	Quarterly
MLTC Reporting Database: Out of Network Referrals	Data regarding out of network provider authorization requests.	Quarterly
NF Skilled Stay Authorizations	Report on the number of skilled NF stay authorizations and denials, as well as PASRR compliance verification	Quarterly
Pharmacy Call Center Report	Data summarizing relevant pharmacy call center operations.	Quarterly
Pharmacy Prospective DUR Report	DUR statistics to support preparation of MLTC's annual CMS DUR report.	Quarterly
Pharmacy Retro-DUR Education Intervention Report	Project update in a format approved by MLTC.	Quarterly
Pharmacy Utilization Management Report	Data summarizing pharmacy utilization management categories including, but not limited to: quantity limits, prior authorization, step therapy, dose optimization, MAC, top 100 drugs, and top 50 drug categories listed by expenditures and claim count.	Quarterly
Provider Appointment Availability Access	Summary data and metrics on provider network appointment access as determined by MLTC and described in Attachment 39 – Revised Access Standards.	Quarterly
Psychotropic Medications for Youth Report	Summary of prior authorization and utilization relating to clinical edits.	Quarterly
Quarterly FWA Trending Reports	Summary data and narrative regarding FWA trends.	Quarterly
Quarterly Value-Added	Summary of value added services as agreed upon by the MCO and MLTC.	Quarterly; Due 45 days after the most recent calendar quarter
Service Verification	Service verification summary as described in Section IV.O – Program Integrity, Section IV.S – Claims Management, and Section IV. T – Reporting and Deliverables.	Quarterly
Semi-Annual Deliverables	**Description**	**Due Date**
Claims Auditing Reporting Requirements	A report on error rate measurement data processing, medical necessity, and provider documentation audit of a statistically valid random sample of paid claims. The MCO must prepare an error rate measurement audit plan and submit it to MLTC for review and approval a minimum of 45 calendar days prior to	June 30 and December 31

	the audit's planned completion date. The findings of the audit plan must be submitted to NMPI when completed. MLTC may require a corrective action plan based on the audit results.	
Member Advisory Committee Report	Narrative of the activities of the MCO's Member Advisory Committee as described in Section IV.M - Quality Management.	June 30 and December 31
MRO Reporting	Data related to Medicaid mental health authorization requests for all members ages 19+ for Medicaid Rehab Option Services	June 30 and December 31
Annual Deliverables	**Description**	**Due Date**
Adult Core Measures	Adult Core Measures results.	Annually by June 30
Annual Program Integrity Confirmation	Signed form acknowledging responsibilities related to the receipt of State and federal funds as described in Section IV.O - Program Integrity.	Annually
CAP	Results and status of all corrective action plans by provider type.	Annually
Child Core Measures	CHIPRA performance measure results.	Annually by June 30
Direct Medical Education/Indirect Medical Education Verification – In accordance with 471 NAC	For the state fiscal year, financial information on direct and indirect medical costs as required by MLTC in accordance with 471 NAC.	Annually; No later than March 31, State initiates the request
Fraud, Waste, Abuse, and Erroneous Payments Annual Plan	Compliance plan addressing requirements outlined in Section IV.O - Program Integrity.	Annually
HEDIS Report	HEDIS results.	Annually by June 30
LB 1160 Legislative Report	Number of state wards receiving behavioral health services from July 1 through June 30 immediately preceding the date of the current report; percentage of children denied Medicaid reimbursed services and the level of placement requested; and children in residential treatment.	Annually; No later than September 10
MLTC Reporting Database: CAHPS -- Adult	Data regarding the annual member satisfaction survey.	Annually
MLTC Reporting Database: CAHPS – Child/CHIP with CCC	Data regarding the annual member satisfaction survey.	Annually
MLTC Reporting Database: CAHPS – Child/CHIP without CCC	Data regarding the annual member satisfaction survey.	Annually
MLTC Reporting Database: Provider and Facility Survey	Data regarding the annual provider and facility satisfaction surveys. The provider satisfaction survey tool and methodology must be submitted to MLTC for approval at least 90 days prior to its administration.	Annually
Network Development Plan & Network Development Plan Template	Details of the MCO's network adequacy, including attestation, GeoAccess reports, and a discussion of any provider network gaps and the MCO's remediation plans, as described in Section IV.I – Provider Network Requirements.	Annually by November 1

Attachment 38 – Revised Reporting Requirements

PIP Report	Annual report of all PIPs.	Annually
Quality Management Work Plan and Program Evaluation	Discussion of the MCO's quality goals, initiatives and work plan; as well as data and analysis summarizing the results of the annual quality work plan. All as described in Section IV.M – Quality Management.	Annually
Department of Insurance Financial Report	Copy of annual audited financial statement	Annually; Upon request of MLTC, no later than June 1
IRS Form 8963	Copy of form	Annually; By Sept. 5

AMENDMENT SIX
Contract 71164 04
Medicaid Managed Care Physical Health, Behavioral Health, and Pharmacy Services for the State of Nebraska
Between the State of Nebraska and WellCare of Nebraska

The State of Nebraska and WellCare of Nebraska make this Amendment (the Amendment") to Contract 71164 04 (the "Contract"), and upon mutual agreement and other valuable consideration the parties agree to and hereby amend the contract as follows:

I. **REMOVALS:** The following section is hereby removed effective January 1, 2019:

A. **Glossary of Term:**
Reinvestment Account.

II. **REMOVALS:** The following sections are hereby removed effective July 1, 2019:

Section IV.E.29.h

Section IV.P.14

III. **ADDITIONS:** The following sections are hereby added effective July 1, 2019:

A. **Glossary of Terms**

Accompanying Adults: A legally responsible adult/guardian, or an adult selected by the legally responsible adult, to accompany a minor to a Medicaid coverable service.

Common Carrier: Any commercial provider who transports passengers by motor vehicle for hire and is licensed as such with the Public Service Commission (PSC).

Consecutive Appointments: Appointments beginning, or scheduled to begin, within thirty (30) minutes of the last completed appointment.

Escort/Attendant Provider: A paid or unpaid individual or caregiver accompanying a program eligible member who is physically, mentally, or developmentally disabled and unable to travel or wait without assistance or supervision to receive a Nebraska Medicaid coverable service. The escort/attendant provider may drive or utilize transportation services with the program eligible member.

Exempt Provider: An individual or entity providing transportation services exempted from Public Service Commission licensure by law (Neb. Rev. Stat. § 75-303).

Individual Provider: A person who is not in the business of providing transportation for hire; for example, a friend, neighbor, or non-legally responsible relative, exempted from Public Service Commission (PSC) licensure by law (Neb. Rev. Stat. § 75-303.01).

Public Transportation: A fixed or non-fixed route public transit system regulated as such with the Nebraska Department of Transportation (NDOT) (See Neb. Rev. Stat. § 13-1203).

B. Section IV.A.10 – Included Populations

j. Members eligible for the Refugee Medical Assistance Program (RMAP).

k. Members eligible for the State Disability Program-Medical (SDP Medical).

l. Members with continuous eligibility that have a share of cost.

C. Section IV.D.3 – Additional Required Staff

k. Non-Emergency Medical Transportation (NMET) Network Coordinator. Responsible for receiving and processing provider inquiries and complaints, investigating provider complaints, and referring complaints to the Public Service Commission (PSC) for transportation providers governed by the PSC. The NEMT Network Coordinator is also responsible for resolving provider issues to include but not limited to payment delays. This position must be available to meet personally with transportation providers but is not required to be located in Nebraska.

IV. **Modifications:** The Parties hereto modify the following sections effective January 1, 2019:

A. Glossary of Terms

Hold-back account: The portion of the MCO's revenue that the MCO must reserve in the holding account and may potentially earn based upon MLTC's determination of the MCO's results on identified performance measures.

B. Section IV.J

3. Provider Handbook

xix. Paper and electronic claims submission protocols and standards, including instructions and all information necessary for a claim, in accordance with 42 CFR 447.45, along with samples of claims.

C. Section IV.M

6. Quality Performance Measurement and Evaluation

a. The MCO must report on CMS Adult Core, Child Core, CAHPS, and HEDIS measures, as well as additional performance measures as determined by MLTC. Measures may be removed or added at will by MLTC, and MCOs will be given a 60 day period in which to implement additional measure requirements. MCOs will report using the most

current version, specification, or manual that is available prior to required reporting deadlines, as is related to the given measure set. MCOs may request exemption from reporting specific measures within respective sets due to inability to report, subject to MLTC approval, within a MLTC designated schedule.

D. Section IV.P

5. Supplemental Delivery Payments

g. Supplemental payment for deliveries will be to reimburse the MCO for the expenses incurred between the date of admission and the date of discharge of a delivery event.

9. Risk Corridor

d. If the calculation produces a profit above the indicated amount, the MCO must ensure that the surplus is returned to MLTC, within 30 days of written notification of the final surplus amount from MLTC.

e. The MCO must provide a full financial statement and additional data, as requested to MLTC and its actuary to support the calculation. MLTC will reimburse the Federal share of the forfeited funds to CMS and retain the state share for reinvestment pursuant to Neb. Rev. Stat. §71-831.

10. MLTC Quality Performance Program

g. The MCO must return unearned (forfeited) hold-back funds to MLTC.

E. Section IV.Q

9. Reimbursement to FQHCs and RHCs

g. The MCO may stipulate that reimbursement is contingent on receiving a claim, in accordance with 42 CFR 447.45, and all medical information required to update the member's medical record.

F. Section IV.S

3. Claims Processing

ii. In accordance with 42 CFR 447.45, process and pay or deny, as appropriate, a minimum of 90% of all claims for medical services provided to members within 15 business days of the date of receipt. The date of receipt is the date the MCO receives the claim.

iii. In accordance with 42 CFR 447.45, process and pay or deny, as appropriate, a minimum of 99% of all claims for

medical services provided to members within 60 calendar days of the date of receipt.

b. For Pharmacy providers, in accordance with 42 CFR 447.45, the MCO must establish, at a minimum, a weekly payment cycle so that a minimum of 90% of all claims from pharmacy providers for covered services are paid within seven calendar days of receipt and 99% of all claims are paid within 14 calendar days of receipt, except to the extent providers have agreed to an alternative payment schedule set forth in the provider contract. Any alternative payment schedules must be reported to MLTC within three business days of their implementation.

d. Pended Claims
In accordance with 42 CFR 447.45, if a claim is received, but additional information is required for adjudication, the MCO may pend the claim and request in writing (notification via e-mail, website/provider portal, or an interim explanation of benefits (EOB) satisfies this requirement) all necessary information so the claim can be adjudicated within established timeframes.

5. Payments to Providers

e. The MCO must pay providers interest at an annualized rate of 12%, calculated daily for the full period in which a payable claim, in accordance with 42 CFR 447.45, remains unpaid beyond the 60-day claims processing deadline. Interest owed to the provider must be paid the same day that the claim is adjudicated, and reported on the encounter submission to MLTC or its designee.

7. Paid Claims Sampling

b. The MCO must stratify the sample group by dollar figure amounts in a representative manner. To the extent that the MCO or MLTC considers a particular pool to warrant closer scrutiny, the MCO may oversample this group. The paid claims sample should be a minimum of 2% of claims per month. The results must be reported to MLTC on a quarterly basis, per the requirements in Attachment 38 - Revised Reporting Requirements. Stratifications of groups should be done by the following dollar amounts: $0 – $999.99, $1,000 - $9,999.99, $10,000 - $49,999.99, $50,000 or greater.

10. Encounter Data

c. The MCO must make changes or corrections to any systems, processes, or data transmission formats as needed to comply with MLTC data quality standards as originally defined or subsequently amended. The MCO must comply with industry-accepted claim standards, in accordance with 42 CFR 447.45, for all encounter data, including submission of complete and accurate data for all fields

required on standard billing forms or electronic claim formats to support proper adjudication of a claim.

u. Encounter data must be submitted a minimum of monthly on a date designated by MLTC and include all claims, in accordance with 42 CFR 447.45, adjudicated and/or adjusted by the MCO.

G. Attachment 11 – Rates

January 1, 2019, through December 31, 2019, and are set forth in the Amended Attachment 11 attached hereto and made a part hereof.

H. Attachment 14 – Quality Performance Program Measures-Contract Year Two

The Quality Performance Program measures have been revised for the time period January 1, 2019, through December 31, 2019, and are set forth in the Amended Attachment 14 attached hereto and made a part hereof.

V. Modifications: The Parties hereto modify the following sections effective July 1, 2019:

A. Section IV. A.11 – Excluded Populations

b. Beneficiaries who have excess income or are required to pay a premium, and are intermittently eligible.

B. Section IV.E. – Covered Services and Benefits

8. Core Benefits and Services

The following services represent a minimum benefit package that the MCO must provide to its members:

a. Physical Health Services

i. Inpatient hospital services, including transitional hospital services and transplant services.

ii. Outpatient hospital services.

iii. Ambulatory surgical center (ASC) services.

iv. Physician services, including services provided by nurse practitioners, certified nurse midwives, and physician assistants, and clinic-administered injections/medications, and anesthesia services including those provided by a certified registered nurse anesthetist.

v. Services provided in federally-qualified health centers (FQHCs) and rural health clinics (RHCs).

vi. Services provided in Indian Health Service (IHS) facilities.

vii. Clinical and anatomical laboratory services, including the administration of blood draws completed in the physician's office or an outpatient clinic for a behavioral health diagnosis.

viii. Radiology services.

ix. Health Check (EPSDT) services.

x. Home health services.

xi. Private duty nursing services.

xii. Therapy services (physical therapy, occupational therapy, and speech pathology and audiology).

xiii. Durable medical equipment and medical supplies, including hearing aids, orthotics, prosthetics, and nutritional supplements.

xiv. Podiatry services.

xv. Chiropractic services.

xvi. Vision services.

xvii. Free standing birth center services.

xviii. Hospice services, except when provided in a nursing facility.

xix. Skilled/rehabilitative and transitional nursing facility services.

xx. Ambulance services.

xxi. Non-emergency medical transportation.

xxii. Transplant services.

xxiii. Pharmacy services.

xxiv. Nutrition Services.

b. Behavioral Health Services

Services for individuals age 20 and under, unless otherwise indicated:

i. Crisis stabilization services (includes treatment crisis intervention).

ii. Inpatient psychiatric hospital (acute and sub-acute).

iii. Psychiatric residential treatment facility (age 19 and under).

iv. Outpatient assessment and treatment:

- **a)** Partial hospitalization.
- **b)** Day treatment.
- **c)** Intensive outpatient.
- **d)** Medication management.
- **e)** Outpatient therapy (individual, family, or group).
- **f)** Injectable psychotropic medications.
- **g)** Substance use disorder treatment.
- **h)** Psychological evaluation and testing.
- **i)** Initial diagnostic interviews.
- **j)** Sex offender risk assessment.
- **k)** Community treatment aide (CTA) services.
- **l)** Hospital observation room services (up to 23 hours and 59 minutes in duration).
- **m)** Parent child interaction therapy.
- **n)** Child-parent psychotherapy.
- **o)** Applied behavioral analysis.
- **p)** Multi-systemic therapy.
- **q)** Functional family therapy.
- **r)** Peer support.

v. Rehabilitation services

- **a)** Day treatment/intensive outpatient.
- **b)** CTA services.
- **c)** Professional resource family care.
- **d)** Therapeutic group home.
- **e)** Community Support.
- **f)** Day rehabilitation.

28. Medical Transportation

a. The MCO must provide emergency and non-emergency medical transportation (NMET) for its members.

b. The MCO must establish policies for emergency transportation and NEMT services that ensures members' access to care and is compliant with Nebraska Medicaid guidelines for emergency transportation and NEMT.

c. The MCO must establish a broker to ensure NEMT access for its members. The broker must be responsible for and perform all administrative functions including, but not limited to:

i. Establishing a transportation network;

ii. Receiving NEMT services requests;

iii. Verifying member program eligibility and MCO enrollment;

iv. Screening members for mobility status and existing transportation resources;

v. Verifying coverage of program services, authorizing and arranging for transport; and

vi. Validating claims for provider payments

d. The direct provision of services shall be performed by transportation providers with active service provider agreements with the Department.

e. Customer Call Center

The MCO must ensure its broker maintains a toll-free telephone number, with access to oral interpretation services free of charge, and other toll-free voice and telecommunications devices for deaf clients. Toll-free telephone access for approving NEMT requests is required as follows:

i. Maintain sufficient personnel to perform the functions required herein for at least ten (10) consecutive hours during the hours of 8:00 a.m. through 7:00 p.m. Central Time, Monday through Friday;

ii. Maintain voice mail routing and response procedures;

iii. Provide twenty-four (24) hour toll-free access in order to provide information on how to access transportation for an urgent medical condition;

iv. Accept NEMT services requests by telephone and secure online ordering; and

v. Call performance standards per **Section IV.F.2.c** apply to the MCO's broker and must be included in the Member/Provider Call Center monthly report.

f. Service Approval

i. The MCO must ensure its broker is responsible for determining appropriateness for NEMT for members enrolled in the MCO per 471 NAC Chapter 27;

ii. The MCO must ensure its broker receives requests for NEMT, screen each request and, if approved, assign the trip to the most appropriate NEMT providers;

iii. The MCO must ensure that its broker requires no more than three (3) business days advance notice from the member, with the exception of urgent care or the availability of an Individual NEMT provider;

iv. The MCO must ensure that its broker establishes procedures regarding NEMT for standing orders so that members are not required to continually make arrangements for repetitive program appointments or services. Standing orders must include, but are not limited to outpatient therapy services, chemotherapy, dialysis, high-risk pregnancy prenatal care, and outpatient behavioral health services;

v. The MCO must ensure that its broker make a decision and arrange NEMT and provide notice to the member within one (1) business day of the request or as expeditiously as the member's health requires for urgent care;

vi. The MCO must ensure its broker arranges the most appropriate and lowest cost available mode of transportation based on each member's mobility status and personal capabilities;

vii. The MCO must ensure its broker maintain documentation supporting medical necessity for approval of a personal attendant/escort;

viii. The MCO must ensure its broker arrange NEMT for hospital discharges (acute, psychiatric, and state hospitals) when such requests are verified by hospital staff;

ix. The MCO must ensure its broker approve NEMT for one legally responsible adult to accompany children under the age of nineteen (19), if requested, or an adult selected by the legally responsible adult. The MCO's broker must ensure children age twelve (12) and under are not transported by a public or commercial NEMT provider without adult supervision; and

x. The MCO shall ensure consistent application of criteria for approval decisions and consultation with the member's medical service provider when appropriate.

g. NEMT Provider Service Delivery

The MCO must ensure that its broker ensures that NEMT network providers deliver service that allows members to arrive promptly for appointments, so that there is not an excessive wait for their

transportations. The pick-up and wait times should align with the following requirements:

i. The wait time for a pick-up to a scheduled appointment should not exceed sixty (60) minutes prior to the scheduled appointment time;

ii. The member should not wait more than thirty (30) minutes from drop off time to their scheduled appointment time;

iii. The wait time for a scheduled return trip, after an appointment, will not exceed sixty (60) minutes;

iv. Member's may be picked up on a "will call" basis, which will also not exceed sixty (60) minutes wait time after the NEMT provider is contacted for the return trip;

v. For multiple passenger trips, which are only allowed for commercial providers when the first member approves multi-loading, members should not remain in the vehicle for more than forty-five (45) minutes longer than the average travel time for transport, for an individual client using that mode, from the point of pick-up to the destination;

vi. Exceptions to service delivery times specified herein may be made for trips with pick-up or destinations outside the client's local area, or verified scheduled consecutive trips;

vii. Exceptions may also be made due to unusual situations such as exceptional distances in rural areas or other situations out of the control of the NEMT provider; and

viii. During periods of inclement weather conditions, the MCO's broker shall have written procedures in place that at a minimum includes notifying the members of the delay, the alternative schedule, and of any alternate pick-up arrangements.

h. The MCO must ensure its broker authorizes and reimburses a personal attendant/escort when medically necessary.

i. Record of Service Documentation

The MCO must ensure its broker require NEMT providers maintain a daily drivers' log. The daily drivers' log is excluded for fixed-route public transit systems, and commercial air. The NEMT providers'/escort's daily logs shall contain, at a minimum, the following information per transportation leg:

i. Driver/Escort's full name;

ii. Driver/Escort's signature or approved electronic signature;

iii. Vehicle Identification;

iv. Actual pick up time (clearly designate time using either a.m. or p.m. designation or military time) for each approved member;

v. Actual pick up address;

vi. Name of member transported, and, if applicable, the name of the accompanying adult or escort; and

vii. Member or parent/guardian signature or approved electronic signature and date.

j. The MCO must ensure its broker have an internal system of monitoring, analysis, evaluation, and improvement of the delivery of the NEMT service that:

i. Provides for regular utilization management and quality assessment reporting to the MCO and the Department, including profiling of NEMT provider utilization patterns;

ii. Provides for systematic data collection, analysis, and evaluation of performance; and

iii. Provides for timeliness for correction, and assignment of specific personnel to be responsible for ensuring compliance and follow up.

k. NEMT Information Technology Requirements

i. The MCO must ensure its broker has information technology systems that include unique or innovative features including a web-based system that allows remote notification of and access to errors or demonstration of benefits in a live system environment;

ii. The MCO must ensure its broker has information technology systems that accommodates screening, services approval, submission of claims for adjudication, payment, and any other information necessary to ensure that appropriate NEMT is approved and provided;

iii. The MCO must ensure its broker has information technology systems that includes a member and provider portal so that members may schedule trips and providers may accept/decline trips, schedule, and dispatch trips in the portal;

iv. The MCO must ensure its broker information system is designed to automate trip assignment to providers based first on lowest cost, appropriate mode of transportation and second on provider performance. The MCO's broker is prohibited from excluding trip assignments to NEMT providers that do not use tablet technology;

v. The MCO must ensure its broker information system is able to interface with tablet technology already in use by commercial carriers and/or NDOR supplied technology;

vi. The MCO must ensure its broker's information system has claims clearing practices with real-time access to client signature logs and GPS tagged trip verifications;

vii. The MCO must ensure its broker's information system allows for claims to be submitted electronically; and

viii. The MCO must ensure that its broker follow all other provisions of **Section IV. R** and **Section IV.S**.

This amendment becomes part of the contract. Except as set form in this amendment, the contract is unaffected and shall continue in full force and effect in accordance with its terms. If there is a conflict between this amendment and the contract or any earlier amendment, the terms of this amendment will prevail.

IN WITNESS WHEREOF, the parties have executed this amendment as of the date of execution by both parties below.

Attachment 14
Quality Performance Program Measures – Contract Year Three

Base Performance Requirement	Payment Threshold	% of Payment Pool
Claims Processing Timeliness - 15 Days: Process and pay or deny, as appropriate, at least 90% of all claims for medical services provided to members within 15 days of the date of receipt. The date of receipt is the date the MCO receives the clean claim.	95% within 10 business days	15%
Encounter Acceptance Rate: 95% of encounters submitted must be accepted by MLTC's Medicaid Management Information System pursuant to MLTC specifications.	98%	10%
Appeal Resolution Timeliness: The MCO must resolve each appeal, and provide notice, as expeditiously as the member's health condition requires, within 45 calendar days from the day the MCO receives the appeal.	95% within 20 days	5%
Lead Screening in Children: The percentage of children 2 years of age who had one or more capillary or venous lead blood test for lead poisoning by their second birthday.	68%[1]	10%
Well-Child Visits in the First 15 Months of Life: The percentage of members who turned 15 months old during the measurement year and who had the following number of well-child visits with a PCP during their first 15 months of life: 0 Visits, 1 Visit, 2 Visits, 3 Visits, 4 Visits, 5 Visits, 6 Visits or more	66%[2]	10%
Childhood Immunization Status: The percentage of children 2 years of age who had four diphtheria, tetanus and acellular pertussis (DtaP); three polio (IPV); one measles, mumps and rubella (MMR); three haemophilus influenza type B (HiB); three hepatitis B (HepB), one chicken pox (VZV); four pneumococcal conjugate (PCV); one hepatitis A (HepA); two or three rotavirus (RV); and two influenza (flu) vaccines by their second birthday. The measure calculates a rate for each vaccine and nine separate combination rates.	Combination #2 - 29%[3] Combination #10 - 19%[3]	Combination #2 - 5% Combination #10 - 5%
Immunization for Adolescents: The percentage of adolescents 13 years of age who had one dose of meningococcal conjugate vaccine, one tetanus, diphtheria toxoids and acellular pertussis (Tdap) vaccine and three doses of the human papillomavirus (HPV) vaccine by their 13th birthday. The measure calculates a rate for each vaccine and two combination rates.	Meningococcal – 77%[1] Tdap –85 %[1] HPV – 21%[1]	Meningococcal –3% Tdap – 3% HPV—4%

Cancer Screening: ***Breast Cancer Screening –*** The percentage of woman 50-74 years of age who had a mammogram to screen for breast cancer. ***Cervical Cancer Screening –*** The percentage of women 21-64 years of age who were screened for cervical cancer using either of the following criteria: 1) Women age 21-64 who had cervical cytology performed every 3 years, OR 2) Women age 30-64 who had cervical cytology/human papillomavirus co-testing performed every 5 years.	BCS – 59%[1] CCS – 59%[1]	BCS—5% CCS--5%
Antidepressant Medication Management: The percentage of members 18 years of age and older who were treated with antidepressant medication, had a diagnosis of major depression and who remained on an antidepressant medication treatment. Two rates are reported: ***Effective Acute Phase Treatment*** – The percentage of members who remained on an antidepressant medication for at least 84 days (12 weeks). ***Effective Continuation Phase Treatment*** – The percentage of members who remained on an antidepressant medication for at least 180 days (6 months).	EAPT –76%[3] ECPT – 66%[3]	5%
Follow Up Care for Children Prescribed Meds for ADHD-ADD: The percentage of children newly prescribed attention-deficit/hyperactivity disorder (ADHD) medication who had at least three follow-up care visits within a 10 month period, one of which was within 30 days of when the first ADHD medication was dispensed. Two rates are reported: ***Initiation Phase –*** The percentage of members 6-12 years of age as of the IPSD with an ambulatory prescription dispensed for ADHD medication, who had one follow-up visit with a practitioner with prescribing authority during the 30-day Initiation Phase. *Continuation and* ***Maintenance (C&M) Phase*** – The percentage of members 6-12 years of age as of the IPSD with an ambulatory prescription dispensed for ADHD medication, who remained on the medication for at least 210 days and who, in addition to the visit in the Initiation Phase, had at least two follow-up visits with a practitioner within 270 days (9 months) after the Initiation Phase ended.	IP – 46%[1] C&MP – 55%[1]	10%
Medication Management for People with Asthma: The percentage of Members 5-64 years of age during the measurement year who were identified as having persistent asthma and were dispensed appropriate medications that they remained on during the treatment period. For therapeutic purposes, the percentage of Members who remained on an asthma controller medication for at least 75% of their treatment period were monitored.	75% Med-adherent – 35%[1]	5%

AMENDMENT FIVE
Contract 71164 O4
Medicaid Managed Care Physical Health, Behavioral Health, and Pharmacy Services for the State of Nebraska
Between the State of Nebraska and WellCare of Nebraska

The State of Nebraska and WellCare of Nebraska make this Amendment (the "amendment") to Contract 71164 04 (the "contract"), and upon mutual agreement and other valuable consideration the parties agree to and hereby amend the contract as follows:

Amend the Contract End date from December 31, 2022 to December 31, 2021, with an option to be renewed for two (2) additional one (1) year periods as mutually agreed upon by both parties.

This amendment and any attachments hereto will become part of the Contract. Except as set forth in this Amendment, the Contract is unaffected and shall continue in full force and effect in accordance with its terms. If there is conflict between this amendment and the Contract or any earlier amendment, the terms of this amendment will prevail.

IN WITNESS WHEREOF, the parties have executed this Amendment as of the date of execution by both parties below.

Well-Child Visits in the First 15 Months of Life: The percentage of members who turned 15 months old during the measurement year and who had the following number of well-child visits with a PCP during their first 15 months of life: 0 Visits, 1 Visit, 2 Visits, 3 Visits, 4 Visits, 5 Visits, 6 Visits or more	66%[2]	10%
Childhood Immunization Status: The percentage of children 2 years of age who had four diphtheria, tetanus and acellular pertussis (DtaP); three polio (IPV); one measles, mumps and rubella (MMR); three haemophilus influenza type B (HiB); three hepatitis B (HepB), one chicken pox (VZV); four pneumococcal conjugate (PCV); one hepatitis A (HepA); two or three rotavirus (RV); and two influenza (flu) vaccines by their second birthday. The measure calculates a rate for each vaccine and nine separate combination rates.	Combination #2 - 29%[3] Combination #10 - 19%[3]	Combination #2 - 5% Combination #10 - 5%
Immunization for Adolescents: The percentage of adolescents 13 years of age who had one dose of meningococcal conjugate vaccine, one tetanus, diphtheria toxoids and acellular pertussis (Tdap) vaccine and three doses of the human papillomavirus (HPV) vaccine by their 13th birthday. The measure calculates a rate for each vaccine and two combination rates.	Meningococcal – 77%[1] Tdap –85 %[1] HPV – 21%[1]	Meningococcal –3% Tdap – 3% HPV—4%

Cancer Screening: ***Breast Cancer Screening –*** The percentage of woman 50-74 years of age who had a mammogram to screen for breast cancer. ***Cervical Cancer Screening –*** The percentage of women 21-64 years of age who were screened for cervical cancer using either of the following criteria: 1) Women age 21-64 who had cervical cytology performed every 3 years, OR 2) Women age 30-64 who had cervical cytology/human papillomavirus co-testing performed every 5 years.	BCS – 59%[1] CCS – 59%[1]	BCS—5% CCS--5%
Antidepressant Medication Management: The percentage of members 18 years of age and older who were treated with antidepressant medication, had a diagnosis of major depression and who remained on an antidepressant medication treatment. Two rates are reported: ***Effective Acute Phase Treatment*** – The percentage of members who remained on an antidepressant medication for at least 84 days (12 weeks). ***Effective Continuation Phase Treatment*** – The percentage of members who remained on an antidepressant medication for at least 180 days (6 months).	EAPT –76%[3] ECPT – 66%[3]	5%
Follow Up Care for Children Prescribed Meds for ADHD-ADD: The percentage of children newly prescribed attention-deficit/hyperactivity disorder (ADHD) medication who had at least three follow-up care visits within a 10 month period, one of which was within 30 days of when the first ADHD medication was dispensed. Two rates are reported: ***Initiation Phase –*** The percentage of members 6-12 years of age as of the IPSD with an ambulatory prescription dispensed for ADHD medication, who had one follow-up visit with a practitioner with prescribing authority during the 30-day Initiation Phase. *Continuation and* ***Maintenance (C&M) Phase*** – The percentage of members 6-12 years of age as of the IPSD with an ambulatory prescription dispensed for ADHD medication, who remained on the medication for at least 210 days and who, in addition to the visit in the Initiation Phase, had at least two follow-up visits with a practitioner within 270 days (9 months) after the Initiation Phase ended.	IP – 46%[1] C&MP – 55%[1]	10%
Medication Management for People with Asthma: The percentage of Members 5-64 years of age during the measurement year who were identified as having persistent asthma and were dispensed appropriate medications that they remained on during the treatment period. For therapeutic purposes, the percentage of Members who remained on an asthma controller medication for at least 75% of their treatment period were monitored.	75% Med-adherent – 35%[1]	5%

AMENDMENT FOUR
Contract 71164 O4
Medicaid Managed Care Physical Health, Behavioral Health, and Pharmacy Services for the State of Nebraska
Between the State of Nebraska and WellCare of Nebraska

The State of Nebraska and WellCare of Nebraska make this Amendment (the "amendment") to Contract 71164 04 (the "contract"), and upon mutual agreement and other valuable consideration the parties agree to and hereby amend the contract as follows:

I. **MODIFICATIONS:** The Parties hereto modify the following sections:

Section IV.E – COVERED SERVICES AND BENEFITS

25. Durable Medical Equipment

c. For in-network and out-of network providers, air fluidized beds, non-standard wheelchairs and wheelchair accessories, options, and components, including power operated vehicles, and negative pressure wound therapy (wound VAC) will be reimbursed separately to:
i) Nursing facility, or
ii) Intermediate care facility for individuals with developmental disabilities

Section IV.P - MCO REIMBURSEMENT

10. MLTC Quality Performance Program

e. Each year of the contract constitutes a performance year, beginning on the contract start date. MLTC will assess the MCO's performance based on the measures annually and notify the MCO of the amount of the earned hold-back and unearned (forfeited) hold-back. MLTC will make this determination within eleven (11) months after the end of each contract year.

II. **REMOVAL:** The following sections are hereby removed upon execution by the parties hereto:

Section IV.Z – FFS CLAIMS MANAGEMENT AND PROCESSING

III. **Attachment 11 – RATES has been updated.**
Rates for July 1, 2018, through December 31, 2018, and are set forth in the Amended Attachment 11 attached hereto and made a part hereof.

This amendment becomes part of the contract. Except as set forth in this amendment, the contract is unaffected and shall continue in full force and effect in accordance with its terms. If there is a conflict between this amendment and the contract or any earlier amendment, the terms of this amendment will prevail.

IN WITNESS WHEREOF, the parties have executed this amendment as of the date of execution by both parties below.

RE: Amendment Four

Dear Jen:

Enclosed please find a signed original of Amendment Four to MLTC's MCO Agreement with WellCare of Nebraska, Inc.

Thank you for your patience as WellCare worked through our questions with representatives from MLTC. As always, we appreciate the privilege of serving Nebraskans with Heritage Health.

Sincerely,

Lauralie Rubel
President/CEO

AMENDMENT THREE
Contract 71164 O4
Medicaid Managed Care Physical Health, Behavioral Health, and Pharmacy Services for the State of Nebraska
Between the State of Nebraska and WellCare of Nebraska

The State of Nebraska and WellCare of Nebraska. make this Amendment (the Amendment") to Contract 71164 O4 (the "Contract"), and upon mutual agreement and other valuable consideration the parties agree to and hereby amend the contract as follows:

I. **MODIFICATIONS:** The Parties hereto modify the following sections effective January 1, 2018:

A. Section IV.Q. – Provider Reimbursement

16. Pharmacy Reimbursement

d. The MCO's dispensing fee reimbursement must be, at a minimum, the Medicaid FFS rate at the time of contract start for independent pharmacies (defined as those with ownership of six (6) or fewer pharmacies), unless otherwise agreed between the MCO and the pharmacy provider.

B. Attachment 11 – Rates

January 1, 2018, through December 31, 2018, and are set forth in the Amended Attachment 11 attached hereto and made a part hereof.

C. Attachment 14 – Quality Performance Program Measures-Contract Year Two

The Quality Performance Program measures have been revised for the time period January 1, 2018, through December 31, 2018, and are set forth in the Amended Attachment 14 attached hereto and made a part hereof.

D. Attachment 38 – Revised Reporting Requirements

The reporting requirements and templates have been changed. The updated requirements and report titles are set forth in the amended Attachment 38 attached hereto and made a part hereof.

This amendment becomes part of the contract. Except as set form in this amendment, the contract is unaffected and shall continue in full force and effect in accordance with its terms. If there is a conflict between this amendment and the contract or any earlier amendment, the terms of this amendment will prevail.

IN WITNESS WHEREOF, the parties have executed this amendment as of the date of execution by both parties below.

Attachment 14
Quality Performance Program Measures – Contract Year Two

Base Performance Requirement	Payment Threshold	% of Payment Pool
Claims Processing Timeliness - 15 Days: Process and pay or deny, as appropriate, at least 90% of all clean claims for medical services provided to members within 15 days of the date of receipt. The date of receipt is the date the MCO receives the clean claim.	95% within 10 business days	20%
Encounter Acceptance Rate: 95% of encounters submitted must be accepted by MLTC's Medicaid Management Information System pursuant to MLTC specifications.	98%	20%
Call Abandonment Rate: Less than 5% of calls that reach the Member/Provider 800 lines and are placed in queue but are not answered because the caller hangs up before a representative answers the call. Measured using annual system-generated reports.	<2%	10%
Appeal Resolution Timeliness: The MCO must resolve each appeal, and provide notice, as expeditiously as the member's health condition requires, within 45 calendar days from the day the MCO receives the appeal.	95% within 20 days	10%
PDL Compliance: The MCO shall dispense medications in PDL categories compliant with Nebraska State PDL Preferred Status at least 92% of the time each quarter.	95%	10%
Lead Screening in Children - The percentage of children 2 years of age who had one or more capillary or venous lead blood test for lead poisoning by their second birthday.	65%	10%
Well-Child Visits in the First 15 Months of Life - The percentage of members who turned 15 months old during the measurement year and who had the following number of well-child visits with a PCP during their first 15 months of life: 0 Visits, 1 Visit, 2 Visits, 3 Visits, 4 Visits, 5 Visits, 6 Visits or more	52% with 6 Visits or more	10%
Childhood Immunization Status - The percentage of children 2 years of age who had four diphtheria, tetanus and acellular pertussis (DtaP); three polio (IPV); one measles, mumps and rubella (MMR); three haemophilus influenza type B (HiB); three hepatitis B (HepB), one chicken pox (VZV); four pneumococcal conjugate (PCV); one hepatitis A (HepA); two or three rotavirus (RV); and two influenza (flu) vaccines by their second birthday. The measure calculates a rate for each vaccine and nine separate combination rates.	Combination #2 - 19% Combination #10 - 8%	Combination #2 - 5% Combination #10 - 5%

Bi-Weekly	Due the 1st and 15th of the month.
Monthly Deliverables	Due on the 15th day of the following calendar month unless otherwise noted in the RFP or agreed to in writing by the MCO and MLTC.
Quarterly Deliverables	Due 45 calendar days after the end of the most recent quarter unless otherwise noted in the RFP or agreed to in writing by the MCO and MLTC.
Semi-Annual Deliverables	Due as specified in this attachment.
Annual Deliverables	Reports, files, and other deliverables due annually must be submitted within 45 calendar days following the 12th month of the contract year, except those reports that are specifically exempted from the 45-calendar day deadline by this RFP or by written agreement between MLTC and the MCO.
Ad Hoc Deliverables	Ad hoc reports must be submitted within five business days from the date of request, unless otherwise specified by MLTC.

- **If a due date falls on a weekend or State-recognized holiday, the deliverable is due the next business day.**
- **All reports must be submitted in an MLTC provided template or in a format approved by MLTC.**

Ad Hoc Deliverables	**Description**	**Due Date**
Criminal Report	Pursuant to IV.T.6, the MCO will report any criminal findings of a provider. The findings should include the provider identifying information (name/NPI/Taxonomy/complete address) and nature of criminal offence.	Ad Hoc
Standard Financial Reports	MLTC will request this with adequate notice given to the MCO.	Ad Hoc
Bi-Weekly Deliverables	**Description**	**Due Date**
Bi-Weekly Tips	Pursuant to IV.O, The MCO must notify MLTC if it identifies patterns of provider billing anomalies and/or the safety of Nebraska Medicaid members (42 CFR 455.15).	Bi-Weekly
Monthly Deliverables	**Description**	**Due Date**
Behavioral Health Children in Residential Treatment	Summary data, by member, on children in residential treatment including information on: wait list, discharges, children currently in treatment, and restraints and seclusions.	Monthly
Behavioral Health Critical Incident	Summary data on the number of critical incident reports by behavioral health facility and location.	Monthly
Claims Payment Accuracy	Claims payment accuracy percentages as described in Section IV.S - Claims Management.	Monthly

Enrollment Reconciliation Report	Report identifying any member for whom the MCO received a capitation payment for a month in which the member was never enrolled per official enrollment files	Monthly
Hospice Monthly Report	Data summarizing hospice authorizations, admissions, and discharges.	Monthly
Member-Provider Call Center	Pursuant to Section IV.F, data summarizing relevant call center operations.	Monthly
Monthly Claims Report	Summary data on claims system.	Monthly
Monthly FWA Detection Effort Report	Summary of the MCO's fraud prevention efforts as described in Section IV.O - Program Integrity.	Monthly
Monthly FWA Report	Summary of investigations as described in Section IV.O – Program Integrity.	Monthly
PDL Load Report	Data documenting that the MCO received and loaded the PDL file per contract requirements.	Monthly
Pharmacy Claims Report	Summary data on pharmacy claims system.	Monthly
Pharmacy Prior Authorization Report	Summary of prior authorizations, peer review, and peer-to-peer consultation statistics; also includes special categories of drug prior authorizations.	Monthly
Provider Network Changes	Data and metrics summarizing any change to the MCO's network.	Monthly
Restricted Services Report	Summary data related to members on restricted services.	Monthly
Third Party Resource	Summary data of all instances in which an MCO identified a TPR.	Monthly
Quarterly Deliverables	**Description**	**Due Date**
Eligible and Number of BH Services Recipients	Summary data documenting by cohort the number of members eligible for and receiving behavioral health services.	Quarterly
Geographic Access Standards	Details of the MCO's network, including GeoAccess reports, as described in Section IV.I – Provider Network Requirements and Attachment 39 – Revised Access Standards.	Quarterly
Language Availability Report	Summary data and metrics on language availability access as determined by MLTC.	Quarterly
LB1063_68-2004 Children's Health and Treatment Act	Data related to youth Medicaid mental health authorization requests for all children ages 0-19	Quarterly: reports submitted to the Nebraska Legislature are due Jan. 1, Apr. 1, July 1, and Oct. 1. The MCO must submit these reports to MLTC December 15, March 15, June 15 and September 15 for the previous calendar quarter.

Attachment 38 – Revised Reporting Requirements

MCO Financial Report	Financial Reporting Template that allows the state to measure all financial key performance indicators related to Heritage Health Managed Care, to include but not limited to costs, utilization, enrollment and revenue.	Quarterly and Annually; Due 45 calendar days after the end of the reported period.
MLTC Reporting Database: 30 Day Behavioral Health ER Visits	Data of ER visits with a behavioral health diagnosis subsequent to an inpatient behavioral health discharge.	Quarterly
MLTC Reporting Database: 30 Day Inpatient Re-Admits	Data of inpatient re-admissions.	Quarterly
MLTC Reporting Database: Admit and Re-Admit to Psych Inpatient	Data of inpatient or residential admissions and re-admissions.	Quarterly
MLTC Reporting Database: Care Management Log	Data of member assessment and their care management.	Quarterly
MLTC Reporting Database: Grievance System Log table	Pursuant to Section IV.H, data regarding the grievance and appeal systems.	Quarterly
MLTC Reporting Database: Out of Network Referrals	Data regarding out of network provider authorization requests.	Quarterly
NF Skilled Stay Authorizations	Report on the number of skilled NF stay authorizations and denials, as well as PASRR compliance verification	Quarterly
PDL Compliance Report	Data documenting accuracy in dispensing medications in PDL categories.	Quarterly
Pharmacy Call Center Report	Data summarizing relevant pharmacy call center operations.	Quarterly
Pharmacy Prospective DUR Report	DUR statistics to support preparation of MLTC's annual CMS DUR report.	Quarterly
Pharmacy Retro-DUR Education Intervention Report	Project update in a format approved by MLTC.	Quarterly
Pharmacy Utilization Management Report	Data summarizing pharmacy utilization management categories including, but not limited to: quantity limits, prior authorization, step therapy, dose optimization, MAC, top 100 drugs, and top 50 drug categories listed by expenditures and claim count.	Quarterly
Provider Appointment Availability Access	Summary data and metrics on provider network appointment access as determined by MLTC and described in Attachment 39 – Revised Access Standards.	Quarterly
Psychotropic Medications for Youth Report	Summary of prior authorization and utilization relating to clinical edits.	Quarterly

Quality Oversight Committee Report	Committee activity summary as described in Section IV.M - Quality Management.	Quarterly
Quarterly FWA Trending Reports	Summary data and narrative regarding FWA trends.	Quarterly
Quarterly IHS Tracking	Data and metrics summarizing Indian Health Service delivery.	Quarterly
Quarterly Value-Added	Summary of value added services as agreed upon by the MCO and MLTC.	Quarterly; Due 45 days after the most recent calendar quarter
Service Verification	Service verification summary as described in Section IV.O – Program Integrity, Section IV.S – Claims Management, and Section IV. T – Reporting and Deliverables.	Quarterly
Subrogation	Data summarizing new and ongoing instances of subrogation.	Quarterly
Semi-Annual Deliverables	**Description**	**Due Date**
Claims Auditing Reporting Requirements	A report on error rate measurement data processing, medical necessity, and provider documentation audit of a statistically valid random sample of paid claims. The MCO must prepare an error rate measurement audit plan and submit it to MLTC for review and approval a minimum of 45 calendar days prior to the audit's planned completion date. The findings of the audit plan must be submitted to NMPI when completed. MLTC may require a corrective action plan based on the audit results.	June 30 and December 31
Member Advisory Committee Report	Narrative of the activities of the MCO's Member Advisory Committee as described in Section IV.M - Quality Management.	June 30 and December 31
MRO Reporting	Data related to Medicaid mental health authorization requests for all members ages 19+ for Medicaid Rehab Option Services	June 30 and December 31
Annual Deliverables	**Description**	**Due Date**
Adult Core Measures	Adult Core Measures results.	Annually by June 30
Annual Program Integrity Confirmation	Signed form acknowledging responsibilities related to the receipt of State and federal funds as described in Section IV.O - Program Integrity.	Annually
CAP	Results and status of all corrective action plans by provider type.	Annually
Child Core Measures	CHIPRA performance measure results.	Annually by June 30
Direct Medical Education/Indirect Medical Education Verification – In accordance with 471 NAC	For the state fiscal year, financial information on direct and indirect medical costs as required by MLTC in accordance with 471 NAC.	Annually; No later than March 31, State initiates the request
Fraud, Waste, Abuse, and Erroneous Payments Annual Plan	Compliance plan addressing requirements outlined in Section IV.O - Program Integrity.	Annually

Attachment 38 – Revised Reporting Requirements

HEDIS Report	HEDIS results.	Annually by June 30
LB 1160 Legislative Report	Number of state wards receiving behavioral health services from September 1 to August 31 immediately preceding the date of the current report; percentage of children denied Medicaid reimbursed services and the level of placement requested; and children in residential treatment.	Annually; No later than September 10
Medication Therapy Management Report	Data and analysis that summarizes MTM program activities, the effectiveness of the program over the reporting period, and the objectives and implementation plan for the next reporting period.	Annually
MLTC Reporting Database: CAHPS – Adult	Data regarding the annual member satisfaction survey.	Annually
MLTC Reporting Database: CAHPS – Child/CHIP with CCC	Data regarding the annual member satisfaction survey.	Annually
MLTC Reporting Database: CAHPS – Child/CHIP without CCC	Data regarding the annual member satisfaction survey.	Annually
MLTC Reporting Database: Provider and Facility Survey	Data regarding the annual provider and facility satisfaction surveys. The provider satisfaction survey tool and methodology must be submitted to MLTC for approval at least 90 days prior to its administration.	Annually
Network Development Plan & Network Development Plan Template	Details of the MCO's network adequacy, including attestation, GeoAccess reports, and a discussion of any provider network gaps and the MCO's remediation plans, as described in Section IV.I – Provider Network Requirements.	Annually by November 1
PIP Report	Annual report of all PIPs.	Annually
Quality Management Work Plan and Program Evaluation	Discussion of the MCO's quality goals, initiatives and work plan; as well as data and analysis summarizing the results of the annual quality work plan. All as described in Section IV.M – Quality Management.	Annually
Utilization Management	Data and analysis summarizing the MCO's annual evaluation of its UM program.	Annually
Department of Insurance Financial Report	Copy of annual audited financial statement	Annually; Upon request of MLTC, no later than June 1
IRS Form 8963	Copy of form	Annually; By Sept. 5

AMENDMENT TWO
Contract 71164 O4
Medicaid Managed Care Physical Health, Behavioral Health, and Pharmacy Services
for the State of Nebraska
Between the State of Nebraska and WellCare of Nebraska

The State of Nebraska and WellCare of Nebraska make this Amendment (the Amendment") to Contract 71164 O4 (the "Contract"), and upon mutual agreement and other valuable consideration the parties agree to and hereby amend the contract as follows:

I. MODIFICATIONS: The Parties hereto modify the following sections upon execution of this Amendment:

A. Glossary of Terms

Adverse Benefit Determination (formerly referred to as "Action"):
(1) The denial or limited authorization of a requested service, including determinations based on the type or level of service, requirements for medical necessity, appropriateness, setting, or effectiveness of a covered benefit.
(2) The reduction, suspension, or termination of a previously authorized service.
(3) The denial, in whole or in part, of payment for a service.
(4) The failure to provide services in a timely manner, as defined by the State.
(5) The failure of the MCO to act within the timeframes provided in § 438.408(b)(1) and (2) regarding the standard resolution of grievances and appeals.
(6) The denial of an enrollee's request to dispute a financial liability, including cost sharing, copayments and other enrollee financial liabilities.

B. Section IV.B.7.c.iv

If the member's request for disenrollment is denied, the member can file a grievance to the enrollment broker or appeal the decision through the State's fair hearing process.

C. Section IV.E. – Covered Services and Benefits

8. Core Benefits and Services

<u>The following services represent a minimum benefit package that the MCO must provide to its members:</u>

a. Physical Health Services

i. Inpatient hospital services, including transitional hospital services and transplant services.

ii. Outpatient hospital services.
iii. Ambulatory surgical center (ASC) services.
iv. Physician services, including services provided by nurse practitioners, certified nurse midwives, and physician assistants, and clinic-administered injections/medications, and anesthesia services including those provided by a certified registered nurse anesthetist.
v. Services provided in federally-qualified health centers (FQHCs) and rural health clinics (RHCs).
vi. Services provided in Indian Health Service (IHS) facilities.
vii. Clinical and anatomical laboratory services, including the administration of blood draws completed in the physician's office or an outpatient clinic for a behavioral health diagnosis.
viii. Radiology services.
ix. Health Check (EPSDT) services.
x. Home health services.
xi. Private duty nursing services.
xii. Therapy services (physical therapy, occupational therapy, and speech pathology and audiology).
xiii. Durable medical equipment and medical supplies, including hearing aids, orthotics, prosthetics, and nutritional supplements.
xiv. Podiatry services.
xv. Chiropractic services.
xvi. Vision services.
xvii. Free standing birth center services.
xviii. Hospice services, except when provided in a nursing facility.
xix. Skilled/rehabilitative and transitional nursing facility services.
xx. Ambulance services.
xxi. Non-emergency ambulance transportation.
xxii. Transplant services.
xxiii. Pharmacy services.
xxiv. Nutrition Services

b. Behavioral Health Services

<u>Services for individuals age 20 and under, unless otherwise indicated:</u>

i. Crisis stabilization services (includes treatment crisis intervention).

ii. Inpatient psychiatric hospital (acute and sub-acute).

iii. Psychiatric residential treatment facility (age 19 and under).

iv. Outpatient assessment and treatment:

a) Partial hospitalization.
b) Day treatment.
c) Intensive outpatient.
d) Medication management.
e) Outpatient therapy (individual, family, or group).
f) Injectable psychotropic medications.
g) Substance use disorder treatment.
h) Psychological evaluation and testing.
i) Initial diagnostic interviews.
j) Sex offender risk assessment.
k) Community treatment aide (CTA) services.
l) Comprehensive child and adolescent assessment (CCAA).
m) CCAA addendum.
n) Hospital observation room services (up to 23 hours and 59 minutes in duration).
o) Parent child interaction therapy.
p) Child-parent psychotherapy.
q) Applied behavioral analysis.
r) Multi-systemic therapy.
s) Functional family therapy.
t) Peer support.

v. Rehabilitation services

a) Day treatment/intensive outpatient.
b) CTA services.
c) Professional resource family care.
d) Therapeutic group home.

<u>Services for adults age 21 and over:</u>

i. Crisis stabilization services (includes treatment crisis intervention).

ii. Inpatient psychiatric hospital services (acute and sub-acute).

iii. Outpatient assessment and treatment:

a) Partial hospitalization.
b) Social detoxification.
c) Day treatment.
d) Intensive outpatient.
e) Medication management.

f) Outpatient therapy (individual, family, or group).
g) Injectable psychotropic medications.
h) Substance use disorder treatment.
i) Psychological evaluation and testing.
j) Electroconvulsive therapy.
k) Initial diagnostic interviews.
~~l) Ambulatory detoxification.~~
l) In-home psychiatric nursing.
m) Peer Support

iv. Rehabilitation services

a) Dual-disorder residential.
b) Intermediate residential (SUD).
c) Short-term residential.
d) Halfway house.
e) Therapeutic community (SUD only).
f) Community support.
g) Psychiatric residential rehabilitation.
h) Secure residential rehabilitation.
i) Assertive community treatment (ACT) and Alternative (Alt) ACT.
j) Community support.
k) Day rehabilitation.

11. Pharmacy Services

c. Nebraska Medicaid Preferred Drug List

i. The MCO must follow the Nebraska Medicaid PDL. Preferred drugs must be adjudicated as payable without prior authorization, unless they are subject to clinical or utilization edits, as defined by MLTC. The PDL is subject to change on an ongoing basis. Refer to the following link for additional information: http://dhhs.ne.gov/medicaid/Pages/med_pharm.aspx
ii. The MLTC PDL vendor will provide to the MCO a weekly national drug code (NDC) file delegating the preferred or non-preferred status of each NDC.
iii. The MCO must begin updating the pharmacy claim system within twenty-four (24) hours of file receipt of the PDL file and loading must be complete within five (5) business days.
iv. The MCO must, at the direction of MLTC, begin to perform off-cycle PDL file updates within twenty-four (24) hours of file receipt of the PDL file and loading must be complete within five (5) business days.
v. The MCO must implement Pharmacy and Therapeutics Committee-reviewed PDL changes posted to the MLTC PDL website on the first day after the 30 calendar day public notice posting of such changes.

vi. The MCO is not authorized to and must not negotiate rebates with manufacturers for pharmaceutical products listed on the PDL. MLTC or its designee will negotiate rebate agreements. Regardless if the MCO or its PBM has an existing rebate agreement with a manufacturer, all Nebraska Medicaid outpatient drug claims, including provider-administered drugs, must be rebateable exclusively to Nebraska Medicaid.

vii. The MCO must nominate a non-voting member to attend the Nebraska Pharmaceutical and Therapeutics Committee's biannual meetings during the term of this contract. Written final approval of nominees is made by MLTC.

D. Section IV.H. – Grievances and Appeals

4. Appeal Process

b. Following receipt of a notification of an adverse benefit determination by the MCO, the member has sixty (60) calendar days from the date on the adverse benefit determination notice in which to file a request for an appeal to the MCO.

e. The MCO must resolve each appeal, and provide notice, as expeditiously as the member's health condition requires, within thirty (30) calendar days from the day the MCO receives the appeal. The MCO may extend the timeframes by up to 14 calendar days if the member requests the extension or the MCO shows that there is need for additional information and the reason(s) why the delay is in the member's interest. For any extension not requested by the member, the MCO must:

I. Make reasonable efforts to give the member prompt verbal notice of the delay.

II. Within two (2) calendar days, give the member written notice of the reason for the decision to extend the timeframe and inform the member of the right to file a grievance if s/he or she disagrees with that decision.

III. Resolve the appeal as expeditiously as the member's health condition requires and no later than the date on which the extension expires.

6. Continuation of Benefits

a. The MCO must continue a member's benefits if all of the following occur:

i. The member files the request for an appeal timely;

ii. The appeal involves the termination, suspension, or reduction of previously authorized services;

iii. The services were ordered by an authorized provider;

iv. The period covered by the original authorization has not expired; and

v. The member timely files for continuation of benefits, timely files means on or before the later of the following:

i. Within ten (10) calendar days of the MCO sending the notice of adverse benefit determination.

ii. The intended effective date of the MCO's proposed adverse benefit determination.

b. If the MCO continues or reinstates the member's benefits while the appeal is pending, the benefits must be continued until one of the following occurs:

vi. The member withdraws the appeal or request for state fair hearing.
vii. The member fails to request a state fair and continuation of benefits within 10 calendar days after the MCO send the notice of an adverse resolution to the member's appeal.
viii. The state fair hearing office issues a hearing decision adverse to the member.
ix. The authorization expires or authorization service limits are met.

c. The MCO may recover the cost of the continuation of services furnished to the member while the appeal was pending if the final resolution of the appeal upholds the MCO action to the extent that the services were furnished solely because of the requirements of this section.

7. Access to State Fair Hearings

c. The member or the member's representative (if any) may request a state fair hearing no later than 120 calendar days from the date of the MCO's notice of resolution.

E. Section IV.P. – MCO Reimbursement

5. Supplemental Delivery Payments

l. The MCO must not bill for a supplemental maternity payment until the delivery is paid by the MCO. The MCO must submit encounter data evidence of the delivery to be eligible to receive a supplemental delivery payment.

16. Medicare Crossover Methodology

a. The MCO must use the methodology for reconciling Medicare crossover claim experience for the period of July 1, 2017, through December 31, 2017, as set forth in Attachment 41 – Medicare Crossover Methodology.

F. Section IV.Q. – Provider Reimbursement

4. Indian Health Protections

a. Per Section 5006(d) of the American Recovery and Reinvestment Act of 2009, Public Law 111-5, the MCO must:
   i. Provide I/T/U providers, whether participating in the network or not, payment for covered services provided to Indian

members who are eligible to receive services from these providers either:

i. At the all-inclusive encounter rate that the Unites States Department of Health and Human Services establishes.

ii. Make prompt payment to all I/T/U providers in its network in compliance with Federal regulations regarding payments to practitioners in individual or group practices, per 42 CFR 447.45 and 447.46.

b. Additional required Indian health protections are included in Section IV.F Member Services and Education.

G. Section IV.S. – Claims Management

4. Drug Claims Processing

j. The MCO will send its pharmacy encounter claims to Magellan via the FTP process. The MCO will send the encounter claims in the current State of Nebraska proprietary format and must send files from the preceding month no later than the eighth (8th) day of the following month.

H. Attachment 8 – PBM Claims Processing Edits for the Nebraska Medicaid Psychotropic Drugs and Youth Initiative

The MCO must utilize prior authorization and additional edits for psychotropic drugs prescribed to youth, at a minimum, following the current DHHS guidelines.

I. Attachment 14 – Quality Performance Program Measures – Contract Year One

The updated Attachment 14 is attached hereto and made a part hereof.

J. Attachment 38 – Revised Reporting Requirements

The reporting requirements and templates have been changed. The updated requirements and report titles are set forth in the amended Attachment 38 attached hereto and made a part hereof.

K. Attachment 11 – Rates

The capitation rates for the Contractor have been adjusted for the time period of July 1, 2017, through December 31, 2017, and are set forth in the amended Attachment 11 attached hereto and made a part hereof.

IN WITNESS WHEREOF, the parties have executed this amendment as of the date of execution by both parties below.

Attachment 14
Quality Performance Program Measures – Contract Year One

Base Performance Requirement	Payment Threshold	% of Payment Pool
Claims Processing Timeliness - 15 Days: Process and pay or deny, as appropriate, at least 90% of all clean claims for medical services provided to members within 15 business days of the date of receipt. The date of receipt is the date the MCO receives the clean claim.	95% within 15 business days	20%
Pharmacy Claims Processing Timeliness - 7 Days: Process and pay or deny, as appropriate, at least 90% of all clean claims from pharmacy providers for covered services within seven calendar days of receipt. The date of receipt is the date the MCO receives the claim.	95% within 7 calendar days	10%
Encounter Acceptance Rate: 95% of encounters submitted must be accepted by MLTC's Medicaid Management Information System pursuant to MLTC specifications.	98%	20%
Call Abandonment Rate: Less than 5% of calls that reach the Member/Provider 800 lines and are placed in queue but are not answered because the caller hangs up before a representative answers the call. Measured using annual system-generated reports.	<3%	10%
Average Speed to Answer: Calls to Member/Provider lines must be answered on average within 30 seconds. Measured using annual system-generated reports.	30 seconds	10%
Appeal Resolution Timeliness: The MCO must resolve each appeal, and provide notice, as expeditiously as the member's health condition requires, within 45 calendar days from the day the MCO receives the appeal.	95% within 30 days	10%
Grievance Resolution Timeliness: The MCO must dispose of each grievance and provide notice, as expeditiously as the member's health condition requires, within State-established timeframes not to exceed 90 calendar days from the day the MCO receives the grievance.	95% within 60 days	10%
PDL Compliance: The MCO shall dispense medications in PDL categories compliant with Nebraska State PDL Preferred Status at least 92% of the time each quarter.	95%	10%

Attachment 38 – Revised Reporting Requirements

Bi-Weekly	Due the 1st and 15th of the month.
Monthly Deliverables	Due on the 15th day of the following calendar month unless otherwise noted in the RFP or agreed to in writing by the MCO and MLTC.
Quarterly Deliverables	Due 45 calendar days after the end of the most recent quarter unless otherwise noted in the RFP or agreed to in writing by the MCO and MLTC.
Semi-Annual Deliverables	Due as specified in this attachment.
Annual Deliverables	Reports, files, and other deliverables due annually must be submitted within 30 calendar days following the 12th month of the contract year, except those reports that are specifically exempted from the 30-calendar day deadline by this RFP or by written agreement between MLTC and the MCO.
Ad Hoc Deliverables	Ad hoc reports must be submitted within five business days from the date of request, unless otherwise specified by MLTC.

- **If a due date falls on a weekend or State-recognized holiday, the deliverable is due the next business day.**
- **All reports must be submitted in an MLTC provided template or in a format approved by MLTC.**

Ad Hoc Deliverables	**Description**	**Due Date**
Criminal Report	Pursuant to IV.T.6, the MCO will report any criminal findings of a provider. The findings should include the provider identifying information (name/NPI/Taxonomy/complete address) and nature of criminal offence.	Ad Hoc
Standard Financial Reports	MLTC will request this with adequate notice given to the MCO.	Ad Hoc
Bi-Weekly Deliverables	**Description**	**Due Date**
Bi-Weekly Tips	Pursuant to IV.O, The MCO must notify MLTC if it identifies patterns of provider billing anomalies and/or the safety of Nebraska Medicaid members (42 CFR 455.15).	Bi-Weekly
Monthly Deliverables	**Description**	**Due Date**
Behavioral Health Wait and Wards in Residential Treatment	Summary data, by member, of the number of days before a member is accepted into a program and, by member, the number of days before the member is admitted to the program.	Monthly
Claims Payment Accuracy	Claims payment accuracy percentages as described in Section IV.S - Claims Management.	Monthly
Eligible and Number of BH Services Recipients	Summary data documenting by cohort the number of members eligible for and receiving behavioral health services.	Monthly
Hospice Monthly Report	Data summarizing hospice authorizations, admissions, and discharges.	Monthly

Member-Provider Call Center	Pursuant to Section IV.F, data summarizing relevant call center operations.	Monthly
MLTC Reporting Database: Grievance System Log table	Pursuant to Section IV.H, data regarding the grievance and appeal systems.	15th day of the following calendar month for each of the first 6 months, then Quarterly
MLTC Reporting Database: Out of State Placement Table	Summary data on admissions and discharges of members placed in out of state residential treatment.	Monthly
Monthly Claims Report	Summary data on claims system.	Monthly
Monthly FWA Detection Effort Report	Summary of the MCO's fraud prevention efforts as described in Section IV.O - Program Integrity.	Monthly
Monthly FWA Report	Summary of investigations as described in Section IV.O – Program Integrity.	Monthly
PDL Load Report	Data documenting that the MCO received and loaded the PDL file per contract requirements.	Monthly
Pharmacy Call Center Report	Data summarizing relevant pharmacy call center operations.	Monthly
Pharmacy Claims Report	Summary data on pharmacy claims system.	Monthly
Pharmacy Prior Authorization Report	Summary of prior authorizations, peer review, and peer-to-peer consultation statistics; also includes special categories of drug prior authorizations.	Monthly
Provider Call Center Quality	MCO's report of its measurement and monitoring of the accuracy of responses by the provider call center staff.	Monthly
Provider Network Changes	Data and metrics summarizing any change to the MCO's network.	Monthly
Psychotropic Medications for Youth Report	Summary of prior authorization and utilization relating to clinical edits.	Monthly
Restricted Services Report	Summary data related to members on restricted services.	Monthly
Third Party Resource	Summary data of all instances in which an MCO identified a TPR.	Monthly
Quarterly Deliverables	**Description**	**Due Date**
BH Residential Beds and Critical Incident	Summary data on the number of behavioral health-related residential beds available statewide and the number of critical incident reports by behavioral health facility and location.	Quarterly
GEO Access	Details of the MCO's network, including GeoAccess reports, as described in Section IV.I – Provider Network Requirements.	Quarterly
IHS Pharmacy Report	Summary data related to IHS pharmacy services.	Quarterly

LB1063_68-2004 Children's Health and Treatment Act	Data related to youth Medicaid mental health authorization requests for all children ages 0-19	Quarterly: reports submitted to the Nebraska Legislature are due Jan. 1, Apr. 1, July 1, and Oct. 1. The MCO must submit these reports to MLTC December 15, March 15, June 15 and September 15 for the previous calendar quarter.
MCO Financial Report	Financial Reporting Template that allows the state to measure all financial key performance indicators related to Heritage Health Managed Care, to include but not limited to costs, utilization, enrollment and revenue.	Quarterly and Annually; Due 45 calendar days after the end of the reported period.
MLTC Reporting Database: 30 Day Behavioral Health ER Visits	Summary data of ER visits with a behavioral health diagnosis subsequent to an inpatient behavioral health discharge.	Quarterly
MLTC Reporting Database: 30 Day Inpatient Re-Admits	Summary data of inpatient re-admissions.	Quarterly
MLTC Reporting Database: Admit and Re-Admit to Psych Inpatient	Summary data of inpatient or residential admissions and re-admissions.	Quarterly
MLTC Reporting Database: Care Management Log	Summary data of member assessment and their care management.	Quarterly
MLTC Reporting Database: Grievance System Log table	Pursuant to Section IV.H, data regarding the grievance and appeal systems.	Quarterly, after the first 6 months of the contract. Monthly for the first 6 months of the contract.
MLTC Reporting Database: Out of Network Referrals	Data and analysis summarizing out of network provider authorizations.	Quarterly
MLTC Reporting Database: Restraint and Seclusion	Data summarized, by behavioral health provider, on the number of incidents of restraint or seclusion by program type and location.	Quarterly
Network Adequacy and Cultural Competency Report	Summary data and metrics demonstrating network adequacy as determined by MLTC and described in Attachment 2 - Access Standards; including data and metrics on cultural competency access as determined by MLTC.	Quarterly
PDL Compliance Report	Data documenting accuracy in dispensing medications in PDL categories.	Quarterly
Pharmacy Prospective DUR Report	DUR statistics to support preparation of MLTC's annual CMS DUR report.	Quarterly
Pharmacy Retro-DUR Education Intervention Report	Project update in a format approved by MLTC.	Quarterly

Pharmacy Utilization Management Report	Data summarizing pharmacy utilization management categories including, but not limited to: quantity limits, prior authorization, step therapy, dose optimization, MAC, top 100 drugs, and top 50 drug categories listed by expenditures and claim count.	Quarterly
Provider Network and PCP Access	Summary data and metrics on network access as determined by MLTC and described in Attachment 2 - Access Standards.	Quarterly
Quality Oversight Committee Report	Committee activity summary as described in Section IV.M - Quality Management.	Quarterly
Quarterly FWA Trending Reports	Summary data and narrative regarding FWA trends.	Quarterly
Quarterly IHS Tracking	Data and metrics summarizing Indian Health Service delivery.	Quarterly
Quarterly Value-Added	Summary of value added services as agreed upon by the MCO and MLTC.	Quarterly; Due 45 days after the most recent calendar quarter
Service Verification	Service verification summary as described in Section IV.O – Program Integrity, Section IV.S – Claims Management, and Section IV. T – Reporting and Deliverables.	Quarterly
Subrogation	Data summarizing new and ongoing instances of subrogation.	Quarterly
Semi-Annual Deliverables	**Description**	**Due Date**
Claims Auditing Reporting Requirements	A report on error rate measurement data processing, medical necessity, and provider documentation audit of a statistically valid random sample of paid claims. The MCO must prepare an error rate measurement audit plan and submit it to MLTC for review and approval a minimum of 45 calendar days prior to the audit's planned completion date. The findings of the audit plan must be submitted to NMPI when completed. MLTC may require a corrective action plan based on the audit results.	June 30 and December 31
Member Advisory Committee Report	Narrative of the activities of the MCO's Member Advisory Committee as described in Section IV.M - Quality Management.	June 30 and December 31
Annual Deliverables	**Description**	**Due Date**
Adult Core Measures	Adult Core Measures results.	Annually
Annual Program Integrity Confirmation	Signed form acknowledging responsibilities related to the receipt of State and federal funds as described in Section IV.O - Program Integrity.	Annually
CAP	Results and status of all corrective action plans by provider type.	Annually
Child Core Measures	CHIPRA performance measure results.	Annually

Direct Medical Education/Indirect Medical Education Verification – In accordance with 471 NAC	For the state fiscal year, financial information on direct and indirect medical costs as required by MLTC in accordance with 471 NAC.	Annually; No later than March 31, State initiates the request
Fraud, Waste, Abuse, and Erroneous Payments Annual Plan	Compliance plan addressing requirements outlined in Section IV.O - Program Integrity.	Annually
HEDIS Report	HEDIS results.	Annually
Medication Therapy Management Report	Data and analysis that summarizes MTM program activities, the effectiveness of the program over the reporting period, and the objectives and implementation plan for the next reporting period.	Annually
MLTC Reporting Database: CAHPS -- Adult	Data and analysis summarizing results of the annual member satisfaction survey.	Annually
MLTC Reporting Database: CAHPS – Child/CHIP with CCC	Data and analysis summarizing results of the annual member satisfaction survey.	Annually
MLTC Reporting Database: CAHPS – Child/CHIP without CCC	Data and analysis summarizing results of the annual member satisfaction survey.	Annually
MLTC Reporting Database: Provider and Facility Survey	Data and analysis summarizing results of the annual provider and facility satisfaction surveys. The provider satisfaction survey tool and methodology must be submitted to MLTC for approval at least 90 days prior to its administration.	Annually
Network Development Plan & Network Development Plan Template	Details of the MCO's network adequacy, including attestation, GeoAccess reports, and a discussion of any provider network gaps and the MCO's remediation plans, as described in Section IV.I – Provider Network Requirements.	Annually
PIP Report	Annual report of all PIPs.	Annually
Quality Management Work Plan and Program Evaluation	Discussion of the MCO's quality goals, initiatives and work plan; as well as data and analysis summarizing the results of the annual quality work plan. All as described in Section IV.M – Quality Management.	Annually
Utilization Management	Data and analysis summarizing the MCO's annual evaluation of its UM program.	Annually
Department of Insurance Financial Report	Copy of annual audited financial statement	**Annually; Upon request of MLTC, no later than June 1**
IRS Form 8963	Copy of form	**Annually; By Sept. 5**

Attachment 41 --
Medicare Crossover Methodology

The State of Nebraska is implementing a change in its methodology for reimbursing providers for crossover claims, effective July 1, 2017. The new approach will consist of Medicaid being responsible for the lesser of the Medicaid allowed amount, and the Medicare cost-sharing remaining to be paid for each claim. For example, if the Medicare allowed amount for a claim is $100, the Medicaid allowed amount is $75, and Medicare has already paid $80 (assuming 20% coinsurance), then Medicaid would pay $0. If the Medicaid allowed amount were instead $85, then Medicaid would pay $5 ($85 Medicaid allowed - $80 Medicare paid).

Due to the significant impact this adjustment has on the dually eligible populations, the State and MCOs have agreed to the conduct a risk corridor surrounding crossover claim payments for the July – December 2017 period, which provides protection against misestimating, but still provides limited risk transfer between the parties.

The process for the risk corridor reconciliation will consist of a comparison of the actual PMPM experienced for crossover claims during the July – December 2017 contract period, and the assumed crossover PMPM within the capitation rates. The initial calculation will be done by MCO, Rating Region (1 and 2), and Dual COA (Healthy Dual, Dual LTC, and Dual Waiver). However, after calculating the comparison at the detailed level, the aggregate difference between the assumed and actual PMPM amounts for an individual MCO (across all Rating Regions and COAs) will be subject to the reconciliation.

The reconciliation process will be handled as a +/- 3% risk corridor, with no transfer of funds between 97-103% of the assumed PMPM amount, and 100% reconciliation outside of that threshold. In other words, this will be handled in a manner such that experience within 3% of the assumed crossover claims PMPM within the capitation rate (converted to dollars based on actual contract period membership) for an MCO will be at full risk (no payments or recoupments from the State). Any difference in excess of +/-3% will be fully reconciled. For example, if an MCO experiences $95 in claims, and the crossover claim amount assumed within the rates was $100, the State would recoup $2 from the MCO, and vice versa if the actual experience were higher than $103. If the MCO experiences between $97-$103, no recoupments or payments will be necessary. These thresholds mirror the percentages currently in place for the Heritage Health program-wide risk corridor.

The calculation will occur with six months of claims run out (paid through June 30, 2018), with an estimate for IBNR.

Given that the State has other risk-mitigation strategies in place for the Heritage Health program, which must be conducted within nine months of the end of CY17, the outcome of the crossover claims risk corridor will be incorporated as an adjustment to MCO revenue, prior to the calculation of the program-wide risk corridor and MLR.

STATE OF NEBRASKA SERVICE CONTRACT AMENDMENT

AMENDMENT ONE
Contract 71164 O4
Medicaid Managed Care Physical Health, Behavioral Health, and Pharmacy Services
for the State of Nebraska
Between
The State of Nebraska and WellCare of Nebraska

This Amendment (the "Amendment") is made by the State of Nebraska and WellCare of Nebraska, parties to Contract 71164 O4 (the "Contract"), and upon mutual agreement and other valuable consideration the parties agree to and hereby amend the contract as follows:

I. **ADDITION:** The following section is hereby added upon execution by the parties hereto:

A. Section IV.B.4.e Retroactive Enrollment

i. For members who are enrolled with retroactive enrollment dates, the plan must establish processes for: appropriate payment of providers for services provided.
ii. Providers to request retroactive determination of medical necessity for services.
    a. Plans may only deny the retroactive request after consultation with the provider and if the plan determines that the service was not medically necessary.
iii. Reimbursement of out-of-network Medicaid providers for services provided prior to the plan selection.
iv. The plan must establish a method for waiving the claim timely filing limit if the provider submitted the claim within the State's established timely filing limit from the date of member plan selection.

B. Section IV.E.31 Continuity of Care Post Implementation

a. The plans must establish processes for continuity of care for members newly enrolled in the plan after the implementation period.

b. The plans must establish an automated process for sharing of previously approved authorizations and care management plans in which a member was enrolled. The previous plan, must respond to the request of the new plan for this information within three (3) business days.

c. The plans shall provide active assistance to members when transitioning to another Heritage Health MCO or to Medicaid FFS.

d. The receiving Heritage Health MCO shall be responsible for the provision of medically necessary services covered under the Contract that are required for the member during the transition period (i.e. prenatal care, acute care, etc.). During this transition period, the receiving MCO shall be responsible for, but not limited to, notification to the new PCP of member's selection, initiation of the request of transfer for the member's medical files, arrangement of medically necessary services (if applicable) and all other requirements for new members.

e. With the exception of transplants, for which all previous authorizations will be honored, plans will honor, regardless of provider participation network status, previous authorizations for the lesser of:

i. 30 days from the transition between Heritage Health Plans;

ii. The end date on the authorization from the previous entity; or

iii. A new decision by the plan with consultation from the provider is reached on the medical necessity of the service.

C. **Section IV.N.11.e.v.**
The MCO's must establish processes for identification of new and transferred members who have existing restricted services.

II. **REMOVAL:** The following sections are hereby removed upon execution by the parties hereto:

A. Section IV.B.2.d.
B. Section IV.P.11. State Performance Penalties

III. **MODIFICATIONS:** The following sections are hereby modified effective upon execution by the parties hereto:

A. Glossary of Terms.

Administrative cap: The upper limit a MCO may spend on non-quality improvement administrative expenses. The calculation of the administrative cap is conducted by dividing an MCO's administrative spend by the MCO's revenue. The revenue used for this calculation will be the original premium developed by the

MLTC actuary net of HIPF but gross of hold-back funds (i.e. HIPF load will be subtracted but the premium will include both earned and forfeited hold-back funds). The HIPF load is the only component removed from the premium when calculating the administrative cap.

Health care professional: A physician or any of the following: a podiatrist, optometrist, chiropractor, psychologist, dentist, licensed mental health practitioner or licensed independent mental health practitioner, physician's assistant, physical or occupational therapist, therapist assistant, speech-language pathologist, audiologist, registered or practical nurse(including nurse practitioner, clinical nurse specialist, certified registered nurse anesthetist, and certified nurse midwife), licensed and certified social worker, registered respiratory therapist, and certified respiratory therapy technician.

Risk Corridor payment: Payment made by MLTC to a MCO to compensate the MCO for losses greater than the contracted amount for year one, as determined by the risk corridor calculation.

State Fair Hearing: A request by a member or any provider to appeal a decision made by a MCO, addressed to the State.

B. Section IV.B.2. Member Enrollment/Assignment

a. The MCO must comply with all enrollment and disenrollment procedures described in this section of the RFP.

b. The MCO and all its staff and subcontractors must have an understanding of the Medicaid population and the enrollment process. The MCO must work cooperatively with MLTC to resolve issues relating to enrollee participation and the enrollment process.

c. The State maintains responsibility for the enrollment of members into MCOs through a contractual arrangement with its enrollment broker. The State or its enrollment broker provides enrollees with access to a member guidebook, plan matrix, and provider directory to assist each enrollee in choosing a MCO plan and a PCP. The enrollment broker provides impartial choice counseling to assist each enrollee in choosing an MCO.

d. The enrollment broker is the only entity, other than MLTC, authorized to assist a Medicaid enrollee in the selection of an MCO. The enrollment broker is responsible for notifying all managed care enrollees and MCO members of their enrollment and disenrollment rights and responsibilities within the timeframe specified in this section.

e. Potential enrollees determined mandatory for managed care will be immediately enrolled in a Heritage Health Plan, retroactive to the first day of the member's eligibility for Medicaid. Retroactive enrollment into a Heritage Health Plan will not exceed three (3) months prior to month of plan selection, but in no instance shall be prior to January 1, 2017.

f. The MCO must have the technological capability and resources to interface with the State's and the enrollment broker's systems as necessary to support all aspects of the enrollment and disenrollment processes.

g. The MCO's eligibility system must show the member's effective date with the MCO as the first day of the month in which the member is determined Medicaid eligible, not to exceed three (3) months prior to the month of plan selection, but in no instance shall be prior to January 1, 2017. For example, if the State's eligibility file indicates the member was determined eligible on March 15, 2017 with a retroactive eligibility date of January 1, 2017, the MCO's eligibility system must reflect an enrollment date of January 1, 2017.

h. For current Heritage Health members at the time of the effective date of this contract, the annual enrollment choice period will be aligned with the contract start date.

i. MLTC and it enrollment broker shall make every effort to ensure that Medicaid eligible individuals who are excluded from managed care are not enrolled in a MCO. To ensure that such individuals are not assigned to a MCO, the MCO must work with MLTC or its enrollment broker to identify these individuals. The MCO must also notify MLTC if it learns that a member is no longer Medicaid eligible.

j. The enrollment broker will automatically re-enroll a member who is disenrolled solely because he or she loses Medicaid eligibility, when the loss of eligibility does not exceed two (2) months, into the same MCO.

C. Section IV.B.4.b. ii.

Because individuals can be retroactively eligible for Medicaid, and the effective date of initial enrollment in a MCO is the effective date of eligibility, not to exceed

three (3) months, the effective date of enrollment may occur prior to the MCO being notified of the individual's enrollment.

D. Section IV.B.7.c.iv.

If the member's request for disenrollment is denied, the member can make a grievance or appeal to the enrollment broker.

E. Section IV.C.2.a.

All contracts must comply with all applicable Federal and State laws and regulations including Title VI of the Civil Rights Act of 1964; Title IX of the Education Amendments of 1972 (regarding educational programs and activities); the Age Discrimination Act of 1975; the Rehabilitation Act of 1973; Section 1557 of the Affordable Care Act; and the Americans with Disabilities Act. The MCO must comply with any other applicable Federal and State laws (such as Title VI of the Civil Rights Act of 1964, etc.) and 45 CFR parts 160 and 164 (the Health Insurance Portability and Accountability Act [HIPAA] privacy rule).

F. Section IV.E.25 Durable Medical Equipment

a. The MCO must provide coverage and be financially responsible for medically necessary durable medical equipment (DME), prosthetics, orthotics, medical supplies, and assistive devices including, but not limited to, hearing aids.

b. The MCO must, at a minimum, provide coverage for DME-related covered services as listed in Chapters 7 and 8 of Title 471 of the Nebraska Administrative Code.

c. For in-network and out-of network providers, air fluidized beds, non-standard wheelchairs and wheelchair accessories, options, and components, including power operated vehicles, and negative pressure wound therapy (wound VAC) will be reimbursed separately to the nursing facility or intermediate care facility for intellectual and developmental disabled according to the maximum allowable rate on the durable medical equipment and supplies fee schedule.

G. Section IV.L.6.e.

The MCO must educate staff members and providers of the DHHS Division of Behavioral Health Women's Set Aside program. The MCO must educate staff of the Priority Populations which include; pregnant and injecting drug users, pregnant substance abusers, injecting drug users, and women with dependent children. This may include collaboration with the Division of Behavioral Health (DBH) as appropriate.

H. Section IV.P.9. Risk Corridor

a. Annual MCO profits must not exceed 3% in the first contract year. Annual MCO profits must not exceed 2.5% in the second contract year, and annual MCO profits in subsequent contract years must not exceed 2%. MCO losses for the first contract year must not exceed 3%. In subsequent contract years, there is no limit on MCO losses.

b. Profits and losses are calculated by MLTC's actuary as a percentage of the aggregate of all qualifying revenue by the MCO and related parties, including parent and subsidy companies and risk bearing partners under this contract. The calculation ignores revenue taxes, non-operating income, and any forfeited hold-back.

c. This calculation must be completed within nine months of the end of the contract year. The risk corridor will be calculated first, and any payments/receipts under the risk corridor will be incorporated in the MLR calculation. This methodology is consistent with the Final Rule published by CMS.

d. If the calculation produces a profit above the indicated amount, the MCO must ensure that the surplus is deposited in the reinvestment account, as described in this section, within nine months of the end of each contract year.

e. The MCO must provide a full financial statement and additional data as requested to MLTC and its actuary to support the calculation. MLTC will reimburse the Federal share of the forfeited funds to CMS. The remaining State share of the forfeited funds will be returned to the MCO for deposit back into the reinvestment account.

f. If the calculation for the first contract year produces a loss of more than 3%, MLTC will make a payment to the MCO an amount equal to the loss above that amount.

g. There will be no payment under this calculation by either party for the first contract year if the calculation produces an amount between a 3% profit and a 3% loss. There will be no payment by the MCO under this calculation for the second contract year if the calculation produces an amount that does not exceed a 2.5% profit. There will be no payment by the MCO under this calculation

for any subsequent contract year if the calculation produces an amount that does not exceed a 2% profit.

I. Section IV.P.10.a

The MCO must participate in the MLTC quality performance program (QPP), effective as of contract start date. The MLTC QPP must be implemented in accordance with Neb. Rev. Stat. §71-831 and any successor statutes.

J. Section IV.P.10.d

The MCO must report its performance measures that affect the MCO's eligibility to earn holdback funds monthly, quarterly, annually, and upon the request of MLTC.

K. Section IV.P.12 Administrative Cap

a. Per Neb. Rev. Stat. §71-831, the MCO's administrative spending must not exceed 12%.

b. Administrative expenditures do not include profit.

c. With its quarterly financial report, the MCO must provide to MLTC an accounting of administrative expenses.

d. To ensure compliance with state law, MLTC will calculate the administrative expense rate within nine months of the end of each contract year.

e. Hold-back funds, both earned and forfeited, are factored into the administrative cap calculation.

L. Section IV.S.11.d

The MCO must ensure that its claims adjudication process only allows claims from providers with 340B Health Resources and Service Administration (HRSA) designation to carve-in Nebraska Medicaid. The MCO must have a system in place to properly identify at the claim level and transmit these claims to MLTC or its designee.

The MCO must ensure that its claims adjudication process recognizes and denies payment on 340B claims submitted by any contract pharmacy in addition to, any provider that does not have a HRSA designation carving-in Nebraska Medicaid.

M. Section IV.V.2.d. Network Performance Requirement

Between the contract award date and the contract start date, the MCO must have a contracted provider network in place, sufficient in size and composition to meet the service requirements of its members on the contract start date. The required sufficiency must be submitted to MLTC a minimum of forty-five (45) calendar days prior to contract start date. MLTC may assess a penalty of $1,000 per calendar day for each day that the provider network is not adequate to meet the service needs of its members.

N. Section IV.X.2 Transition Period

a. The transition period for the contract begins on contract award and ends 90 calendar days after the contract start date. During the transition period the MCO must implement the requirements of the contract and collaborate with MLTC to facilitate a seamless transition between MCOs, providers, and programs in order to prevent an interruption of services and to ensure continuity of care for members.

With the exception of transplants, for which all previous authorizations will be honored, MCOs will honor regardless of provider participation network status previous authorizations for the lesser of:

i. 90 days from implementation;

ii. The end date on the authorization from the previous entity; or

iii. A new decision by the plan with consultation from the provider is determined on the medical necessity of the service.

O. Attachment 11- Rates

The capitation rates for the Contractor have been adjusted for the time period of January 1, 2017 through December 31, 2017, and are set forth in the Amended Attachment 11 attached hereto and made a part hereof.

Michelle Thompson & Teresa Fleming
State Purchasing Bureau
1526 K Street, Suite 130
Lincoln, NE 68508

Dear Ms. Thompson and Ms. Fleming:

WellCare of Nebraska, Inc. (WellCare) is pleased to submit the following proposal response to RFP Number 5151 Z1 for the purpose of providing full-risk, capitated Medicaid managed care for physical health, behavioral health, and pharmacy services to members of the Nebraska Heritage Health program.

WellCare specializes in providing managed care services exclusively to members of government-sponsored Medicaid and Medicare programs. Our clinical programs and member services focus solely on meeting the needs of these vulnerable populations, including members in urban, rural, frontier and island communities. Because of this experience, we are uniquely-positioned to meet and exceed the expectations of the Nebraska Division of Medicaid & Long Term Care (MLTC) while delivering exceptional service to the citizens of Nebraska.

Our experience and proven success coupled with our approach to meeting the contract requirements and delivering high quality care, which are detailed in the enclosed proposal, will improve quality outcomes and efficiencies across the health care delivery system. We look forward to partnering with MLTC to accomplish these improvements for Heritage Health members in Nebraska.

We welcome the opportunity to formally discuss the information provided in more detail and answer any questions that the Department of Health and Human Services and MLTC may have about our programs, capabilities, and approach. If you have any immediate questions or require further information, please do not hesitate to reach out to me directly.

Sincerely,

David Reynolds
Senior Vice President, Division President

SCOPE OF SERVICE

The State of Nebraska, Administrative Services (AS), Materiel Division, State Purchasing Bureau, is issuing this Request for Proposal, RFP Number 5151 Z1 for the purpose of selecting a qualified contractor to provide full-risk, capitated Medicaid managed care program for physical health, behavioral health, and pharmacy services.

The State of Nebraska intends to award a minimum of two (2) and a maximum of three (3) MCO contracts for the scope of work as described in Section IV. A. Program Description through Y. Termination of MCO Contract. One of the awarded contracts will also include the scope of work as described in Section IV. Z. FFS Claims Management and Processing.

Written questions for the first round of questions are due no later than November 2, 2015. Written questions for the second round of questions are due no later than November 23, 2015. Questions should be submitted via e-mail to as.materielpurchasing@nebraska.gov or may be sent by facsimile to (402) 471-2089.

The First Pre-Proposal Conference will be held on October 26, 2015 from 1:00 PM – 5:00 PM CST at Nebraska State Office Building, 301 Centennial Mall South, Lower Level, Conference Room A, Lincoln, Nebraska 68508. Bidders may call into the First Pre-Proposal Conference by utilizing the conference access number: (888) 820-1398 and attendee code: 8559164#.

The Second Pre-Proposal Conference will be held at the discretion of the State. If conducted, information will be provided at a later date.

Bidder should submit one (1) original of the entire proposal. Proposals must be submitted by the proposal due date and time.

PROPOSALS MUST MEET THE REQUIREMENTS OUTLINED IN THIS REQUEST FOR PROPOSAL TO BE CONSIDERED VALID. PROPOSALS WILL BE REJECTED IF NOT IN COMPLIANCE WITH THESE REQUIREMENTS.

1. Sealed proposals must be received in State Purchasing Bureau by the date and time of proposal opening per the schedule of events. No late proposals will be accepted. No electronic, e-mail, fax, voice, or telephone proposals will be accepted.
2. This form "REQUEST FOR PROPOSAL FOR CONTRACTUAL SERVICES" MUST be manually signed, in ink, and returned by the proposal opening date and time along with bidder's proposal and any other requirements as specified in the Request for Proposal in order for a bidder's proposal to be evaluated.
3. It is the responsibility of the bidder to check the website for all information relevant to this solicitation to include addenda and/or amendments issued prior to the opening date. Website address is as follows: http://das.nebraska.gov/materiel/purchasing.html

IMPORTANT NOTICE: Pursuant to Neb. Rev. Stat. §84-602.02, all State contracts in effect as of January 1, 2014 will be posted to a public website beginning July 1, 2014. All non-proprietary or confidential information as defined by Law **WILL BE POSTED FOR PUBLIC VIEWING.**

Contractor hereby grants permission to the State of Nebraska and/or its agencies to reprint or republish any and all copyrighted documents related to Contractor's response to this Request for Proposal, and any and all figures, illustrations, photographs, charts, and other supplementary material on a website accessible by the public pursuant to Neb. Rev. Stat. §84-602.02. This waiver does not apply to proprietary information properly submitted in a separate sealed, package clearly marked "Proprietary."

Contractor represents and warrants that the contents of this response to Request for Proposal and all figures, illustrations, photographs, charts, and other supplementary material herein are original and do not libel anyone or infringe upon any patent, copyright, proprietary right, or any other right whatsoever of any other party. Contractor represents and warrants that Contractor has full power and authority to execute this Copyright Release and to grant the State of Nebraska and/or its agencies the right granted herein.

Contractor agrees to indemnify, defend, and hold harmless the State of Nebraska and/or its agencies against any and all claims, suits, and/or judgments, including costs, expenses, damages, and reasonable legal fees based upon and arising from Contractor's violation of the rights of others and/or by reason of a breach of any of the foregoing warranties.

BIDDER MUST COMPLETE THE FOLLOWING

By signing this Request for Proposal for Contractual Services form, the bidder guarantees compliance with the provisions stated in this Request for Proposal, agrees to the terms and conditions unless otherwise agreed to (see Section III) and certifies that bidder maintains a drug free work place environment.

Per Nebraska's Transparency in Government Procurement Act, Neb. Rev Stat §73-603 DAS is required to collect statistical information regarding the number of contracts awarded to Nebraska Contractors. This information is for statistical purposes only and will not be considered for contract award purposes.

_____ **NEBRASKA CONTRACTOR AFFIDAVIT**: Bidder hereby attests that bidder is a Nebraska Contractor. "Nebraska Contractor" shall mean any bidder who has maintained a bona fide place of business and at least one employee within this state for at least the six (6) months immediately preceding the posting date of this RFP.

_____ I hereby certify that I am a **Resident disabled veteran or business located in a designated enterprise zone** in accordance with Neb. Rev. Stat. §73-107 and wish to have preference, if applicable, considered in the award of this contract.

TYPED NAME & TITLE OF SIGNER: David Reynolds, Senior Vice President, Division President

III. TERMS AND CONDITIONS

By signing the "Request for Proposal for Contractual Services" form, the bidder guarantees compliance with the provisions stated in this Request for Proposal, agrees to the Terms and Conditions unless otherwise agreed to, and certifies bidder maintains a drug free work place environment.

Bidders are expected to closely read the Terms and Conditions and provide a binding signature of intent to comply with the Terms and Conditions; provided, however, a bidder may indicate any exceptions to the Terms and Conditions by (1) clearly identifying the term or condition by subsection, and (2) including an explanation for the bidder's inability to comply with such term or condition which includes a statement recommending terms and conditions the bidder would find acceptable. Rejection in whole or in part of the Terms and Conditions may be cause for rejection of a bidder's proposal. **Bidders must include completed Section III with their proposal response.**

A. GENERAL

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
DR			

The contract resulting from this Request for Proposal shall incorporate the following documents:

1. Amendment to Contract Award with the most recent dated amendment having the highest priority;
2. Contract Award and any attached Addenda;
3. The Request for Proposal form and the Contractor's Proposal, signed in ink
4. Amendments to RFP and any Questions and Answers; and
5. The original RFP document and any Addenda.

These documents constitute the entirety of the contract.

Unless otherwise specifically stated in a contract amendment, in case of any conflict between the incorporated documents, the documents shall govern in the following order of preference with number one (1) receiving preference over all other documents and with each lower numbered document having preference over any higher numbered document: 1) Amendment to Contract Award with the most recent dated amendment having the highest priority, 2) Contract Award and any attached Addenda, 3) the signed Request for Proposal form and the Contractor's Proposal, 4) Amendments to RFP and any Questions and Answers, 5) the original RFP document and any Addenda.

Any ambiguity in any provision of this contract which shall be discovered after its execution shall be resolved in accordance with the rules of contract interpretation as established in the State of Nebraska.

Once proposals are opened they become the property of the State of Nebraska and will not be returned.

B. AWARD

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
DR			

All purchases, leases, or contracts which are based on competitive proposals will be awarded according to the provisions in the Request for Proposal. The State reserves the right to reject any or all proposals, in whole or in part, or to award to multiple bidders in whole or in part, and at its discretion, may withdraw or amend the Request for Proposal at any time. The State reserves the right to waive any deviations or errors that are not material, do not invalidate the legitimacy of the proposal, and do not improve the bidder's competitive position. All awards will be made in a manner deemed in the best interest of the State. The Request for Proposal does not commit the State to

award a contract. If, in the opinion of the State, revisions or amendments will require substantive changes in proposals, the due date may be extended.
By submitting a proposal in response to this Request for Proposal, the bidder grants to the State the right to contact or arrange a visit in person with any or all of the bidder's clients.

Once intent to award decision has been determined, it will be posted to the Internet at:
http://das.nebraska.gov/materiel/purchasing.html

Protest procedure is available on the Internet at:
http://das.nebraska.gov/materiel/purchase_bureau/docs/vendors/protest/ProtestGrievanceProcedureForVendors.pdf

Any protests must be filed by a vendor within ten (10) business days after the intent to award decision is posted to the Internet.

C. COMPLIANCE WITH CIVIL RIGHTS LAWS AND EQUAL OPPORTUNITY EMPLOYMENT / NONDISCRIMINATION

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
JR			

The Contractor shall comply with all applicable local, state, and federal statutes and regulations regarding civil rights laws and equal opportunity employment. The Nebraska Fair Employment Practice Act prohibits Contractors of the State of Nebraska, and their Sub-Contractors, from discriminating against any employee or applicant for employment, with respect to hire, tenure, terms, conditions, compensation, or privileges of employment because of race, color, religion, sex, disability, marital status, or national origin (Neb. Rev. Stat. §48-1101 to 48-1125). The Contractor guarantees compliance with the Nebraska Fair Employment Practice Act, and breach of this provision shall be regarded as a material breach of contract. The Contractor shall insert a similar provision in all sub-contracts for services to be covered by any contract resulting from this Request for Proposal.

D. PERMITS, REGULATIONS, LAWS

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
JR			

The Contractor shall procure and pay for all permits, licenses, and approvals necessary for the execution of the contract. The Contractor shall comply with all applicable local, state, and federal laws, ordinances, rules, orders, and regulations.

E. OWNERSHIP OF INFORMATION AND DATA

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
JR			

The State of Nebraska shall have the unlimited right to publish, duplicate, use, and disclose all information and data developed or derived by the Contractor pursuant to this contract.

The Contractor must guarantee that it has the full legal right to the materials, supplies, equipment, and other rights or titles (e.g. rights to licenses transfer or assign deliverables) necessary to execute this contract. The contract price shall, without exception, include compensation for all royalties and costs arising from patents, trademarks, and copyrights that are in any way involved in the contract. It shall be the responsibility of the Contractor to pay for all royalties and costs, and the State must be held harmless from any such claims.

F. INSURANCE REQUIREMENTS

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
OR			Please note we intend to obtain E&O and Cyber liability coverage on a claims-made basis as permitted by Q&A #316.

The Contractor shall not commence work under this contract until all the insurance required hereunder has been obtained and such insurance has been approved by the State. The Contractor shall maintain all required insurance for the life of this contract and shall ensure that the State Purchasing Bureau has the most current certificate of insurance throughout the life of this contract. If Contractor will be utilizing any Sub-Contractors, the Contractor is responsible for obtaining the certificate(s) of insurance required herein under from any and all Sub-Contractor(s). The Contractor is also responsible for ensuring Sub-Contractor(s) maintain the insurance required until completion of the contract requirements. The Contractor shall not allow any Sub-Contractor to commence work on any Sub-Contract until all similar insurance required of the Sub-Contractor has been obtained and approved by the Contractor. Approval of the insurance by the State shall not limit, relieve, or decrease the liability of the Contractor hereunder.

If by the terms of any insurance a mandatory deductible is required, or if the Contractor elects to increase the mandatory deductible amount, the Contractor shall be responsible for payment of the amount of the deductible in the event of a paid claim.

1. WORKERS' COMPENSATION INSURANCE

The Contractor shall take out and maintain during the life of this contract the statutory Workers' Compensation and Employer's Liability Insurance for all of the contactors' employees to be engaged in work on the project under this contract and, in case any such work is sublet, the Contractor shall require the Sub-Contractor similarly to provide Worker's Compensation and Employer's Liability Insurance for all of the Sub-Contractor's employees to be engaged in such work. This policy shall be written to meet the statutory requirements for the state in which the work is to be performed, including Occupational Disease. This policy shall include a waiver of subrogation in favor of the State. The amounts of such insurance shall not be less than the limits stated hereinafter.

2. COMMERCIAL GENERAL LIABILITY INSURANCE AND COMMERCIAL AUTOMOBILE LIABILITY INSURANCE

The Contractor shall take out and maintain during the life of this contract such Commercial General Liability Insurance and Commercial Automobile Liability Insurance as shall protect Contractor and any Sub-Contractor performing work covered by this contract from claims for damages for bodily injury, including death, as well as from claims for property damage, which may arise from operations under this contract, whether such operation be by the Contractor or by any Sub-Contractor or by anyone directly or indirectly employed by either of them, and the amounts of such insurance shall not be less than limits stated hereinafter.

The Commercial General Liability Insurance shall be written on an occurrence basis, and provide Premises/Operations, Products/Completed Operations, Independent Contractors, Personal Injury, and Contractual Liability coverage. The policy shall include the State, and others as required by the contract documents, as Additional Insured(s). This policy shall be primary, and any insurance or self-insurance carried by the State shall be considered excess and non-contributory. The Commercial Automobile Liability Insurance shall be written to cover all Owned, Non-owned, and Hired vehicles.

3. **REINSURANCE**

a. The MCO must file all contracts of reinsurance, or a summary of the plan of self-insurance.

b. All reinsurance agreements or summaries of plans of self-insurance must be filed with MLTC and must remain in full force and effect for a minimum of 30 calendar days following written notice by registered mail of cancellation by either party. Pursuant to the Health Maintenance Organization Act, Neb. Rev. Stat. §44-3292 et seq. and other relevant laws.

c. The MCO must maintain reinsurance agreements throughout the contract period, including any extension(s) or renewal(s). The MCO must provide prior notification to MLTC of its intent to purchase or modify reinsurance protection for any members enrolled in the MCO.

d. The MCO must provide to MLTC the risk analyses, assumptions, cost estimates, and rationales supporting its proposed reinsurance arrangements for prior approval. If any reinsurance is provided through related parties, disclosure of the entities and details causing the related-party relationship must be specifically disclosed.

4. **INSURANCE COVERAGE AMOUNTS REQUIRED**

a. **WORKERS' COMPENSATION AND EMPLOYER'S LIABILITY**

Coverage A	Statutory
Coverage B	
Bodily Injury by Accident	$100,000 each accident
Bodily Injury by Disease	$500,000 policy limit
Bodily Injury by Disease	$100,000 each employee

b. **COMMERCIAL GENERAL LIABILITY**

General Aggregate	$2,000,000
Products/Completed Operations Aggregate	$2,000,000
Personal/Advertising Injury	$1,000,000 any one person
Bodily Injury/Property Damage	$1,000,000 per occurrence
Fire Damage	$50,000 any one fire
Medical Payments	$5,000 any one person

c. **COMMERCIAL AUTOMOBILE LIABILITY**

Bodily Injury/Property Damage	$1,000,000 combined single limit

d. **UMBRELLA/EXCESS LIABILITY**

Over Primary Insurance	$5,000,000 per occurrence

e. **ERRORS AND OMISSIONS** $10,000,000, per occurrence

f. **CYBER LIABILITY**

Breach of Privacy, Security Breach, Denial of Service, Remediation, Fines and Penalties
$10,000,000 each occurrence / aggregate

g. **SUBROGRATION WAIVER**

"Waiver of Subrogation on the Worker's Compensation in favor of the State of Nebraska."

h. **LIABILITY WAIVER**

"The State of Nebraska, Certificate holder, is an additionally insured, primary & noncontributory on the General Liability."

5. **EVIDENCE OF COVERAGE**

The Contractor should furnish the State, with their proposal response, a certificate of insurance coverage complying with the above requirements to the attention of the Buyer at 402-471-2089 (fax)

Administrative Services
State Purchasing Bureau
1526 K Street, Suite 130
Lincoln, NE 68508

These certificates or the cover sheet shall reference the RFP number, and the certificates shall include the name of the company, policy numbers, effective dates, dates of expiration, and amounts and types of coverage afforded. If the State is damaged by the failure of the Contractor to maintain such insurance, then the Contractor shall be responsible for all reasonable costs properly attributable thereto.

Notice of cancellation of any required insurance policy must be submitted to Administrative Services State Purchasing Bureau when issued and a new coverage binder shall be submitted immediately to ensure no break in coverage.

G. COOPERATION WITH OTHER CONTRACTORS

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
DR			

The State may already have in place or choose to award supplemental contracts for work related to this Request for Proposal, or any portion thereof.

9. The State reserves the right to award the contract jointly between two or more potential Contractors, if such an arrangement is in the best interest of the State.
10. The Contractor shall agree to cooperate with such other Contractors, and shall not commit or permit any act which may interfere with the performance of work by any other Contractor.

H. INDEPENDENT CONTRACTOR

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
DR			

It is agreed that nothing contained herein is intended or should be construed in any manner as creating or establishing the relationship of partners between the parties hereto. The Contractor represents that it has, or will secure at its own expense, all personnel required to perform the services under the contract. The Contractor's employees and other persons engaged in work or services required by the contractor under the contract shall have no contractual relationship with the State; they shall not be considered employees of the State.

All claims on behalf of any person arising out of employment or alleged employment (including without limit claims of discrimination against the Contractor, its officers, or its agents) shall in no way be the responsibility of the State. The Contractor will hold the State harmless from any and all such claims. Such personnel or other persons shall not require nor be entitled to any compensation, rights, or benefits from the State including without limit, tenure rights, medical and hospital care, sick and vacation leave, severance pay, or retirement benefits.

I. CONTRACTOR RESPONSIBILITY

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
DR			

The Contractor is solely responsible for fulfilling the contract, with responsibility for all services offered and products to be delivered as stated in the Request for Proposal, the Contractor's proposal, and the resulting contract. The Contractor shall be the sole point of contact regarding all contractual matters.

If the Contractor intends to utilize any Sub-Contractor's services, the Sub-Contractor's level of effort, tasks, and time allocation must be clearly defined in the Contractor's proposal. The Contractor shall agree that it will not utilize any Sub-Contractors not specifically included in its proposal in the performance of the contract without the prior written authorization of the State. Following execution of the contract, the Contractor shall proceed diligently with all services and shall perform such services with qualified personnel in accordance with the contract.

J. CONTRACTOR PERSONNEL

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
JR			

The Contractor warrants that all persons assigned to the project shall be employees of the Contractor or specified Sub-Contractors, and shall be fully qualified to perform the work required herein. Personnel employed by the Contractor to fulfill the terms of the contract shall remain under the sole direction and control of the Contractor. The Contractor shall include a similar provision in any contract with any Sub-Contractor selected to perform work on the project.

Personnel commitments made in the Contractor's proposal shall not be changed without the prior written approval of the State. Replacement of key personnel, if approved by the State, shall be with personnel of equal or greater ability and qualifications.

The State reserves the right to require the Contractor to reassign or remove from the project any Contractor or Sub-Contractor employee.

In respect to its employees, the Contractor agrees to be responsible for the following:

9. any and all employment taxes and/or other payroll withholding;
10. any and all vehicles used by the Contractor's employees, including all insurance required by state law;
11. damages incurred by Contractor's employees within the scope of their duties under the contract;
12. maintaining workers' compensation and health insurance and submitting any reports on such insurance to the extent required by governing State law; and
13. determining the hours to be worked and the duties to be performed by the Contractor's employees.

K. STATE OF NEBRASKA PERSONNEL RECRUITMENT PROHIBITION

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
JR			

The Contractor shall not, at any time, recruit or employ any State employee or agent who has worked on the Request for Proposal or project, or who had any influence on decisions affecting the Request for Proposal or project for a period of two years after the contract implementation date.

L. CONFLICT OF INTEREST

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
DR			

By submitting a proposal, bidder certifies that there does not now exist any relationship between the bidder and any person or entity which is or gives the appearance of a conflict of interest related to this Request for Proposal or project.

The bidder certifies that it shall not take any action or acquire any interest, either directly or indirectly, which will conflict in any manner or degree with the performance of its services hereunder or which creates an actual or appearance of conflict of interest.

The bidder certifies that it will not employ any individual known by bidder to have a conflict of interest.

M. PROPOSAL PREPARATION COSTS

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
DR			

The State shall not incur any liability for any costs incurred by bidders in replying to this Request for Proposal, in the demonstrations and/or oral presentations, or in any other activity related to bidding on this Request for Proposal.

N. ERRORS AND OMISSIONS

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
DR			

The bidder shall not take advantage of any errors and/or omissions in this Request for Proposal or resulting contract. The bidder must promptly notify the State of any errors and/or omissions that are discovered.

O. BEGINNING OF WORK

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
DR			

The bidder shall not commence any billable work until a valid contract has been fully executed by the State and the successful Contractor. The Contractor will be notified in writing when work may begin.

P. ASSIGNMENT BY THE STATE

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
DR			

The State shall have the right to assign or transfer the contract or any of its interests herein to any agency, board, commission, or political subdivision of the State of Nebraska. There shall be no charge to the State for any assignment hereunder.

Q. ASSIGNMENT BY THE CONTRACTOR

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
DR			

The Contractor may not assign, voluntarily or involuntarily, the contract or any of its rights or obligations hereunder (including without limitation rights and duties of performance) to any third party, without the prior written consent of the State, which will not be unreasonably withheld.

R. DEVIATIONS FROM THE REQUEST FOR PROPOSAL

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
DR			

The requirements contained in the Request for Proposal become a part of the terms and conditions of the contract resulting from this Request for Proposal. Any deviations from the Request for Proposal must be clearly defined by the bidder in its proposal and, if accepted by the State, will become part of the contract. Any specifically defined deviations must not be in conflict with the basic nature of the Request for Proposal, mandatory requirements, or applicable state or federal laws or statutes. "Deviation", for the purposes of this RFP, means any proposed changes or alterations to either the contractual language or deliverables within the scope of this RFP. The State discourages deviations and reserves the right to reject proposed deviations.

S. GOVERNING LAW

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
DR			

The contract shall be governed in all respects by the laws and statutes of the State of Nebraska. Any legal proceedings against the State of Nebraska regarding this Request for Proposal or any resultant contract shall be brought in the State of Nebraska administrative or judicial forums as defined by State law. The Contractor must be in compliance with all Nebraska statutory and regulatory law.

T. ATTORNEY'S FEES

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
DR			

In the event of any litigation, appeal, or other legal action to enforce any provision of the contract, the Contractor agrees to pay all expenses of such action, as permitted by law, including attorney's fees and costs, if the State is the prevailing party.

U. ADVERTISING

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
DR			

The Contractor agrees not to refer to the contract award in advertising in such a manner as to state or imply that the company or its services are endorsed or preferred by the State. News releases pertaining to the project shall not be issued without prior written approval from the State.

V. STATE PROPERTY

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
DR			

The Contractor shall be responsible for the proper care and custody of any State-owned property which is furnished for the Contractor's use during the performance of the contract. The Contractor shall reimburse the State for any loss or damage of such property; normal wear and tear is expected.

W. SITE RULES AND REGULATIONS

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
DR			

The Contractor shall use its best efforts to ensure that its employees, agents, and Sub-Contractors comply with site rules and regulations while on State premises. If the Contractor must perform on-site work outside of the daily operational hours set forth by the State, it must make arrangements with the State to ensure access to the facility and the equipment has been arranged. No additional payment will be made by the State on the basis of lack of access, unless the State fails to provide access as agreed to between the State and the Contractor.

X. NOTIFICATION

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
JR			

During the bid process, all communication between the State and a bidder shall be between the bidder's representative clearly noted in its proposal and the buyer noted in Section II.A. Procuring Office and Contact Person, of this RFP. After the award of the contract, all notices under the contract shall be deemed duly given upon delivery to the staff designated as the point of contact for this Request for Proposal, in person, or upon delivery by U.S. Mail, facsimile, or e-mail. Each bidder should provide in its proposal the name, title, and complete address of its designee to receive notices.

1. Except as otherwise expressly specified herein, all notices, requests, or other communications shall be in writing and shall be deemed to have been given if delivered personally or mailed, by U.S. Mail, postage prepaid, return receipt requested, to the parties at their respective addresses set forth above, or at such other addresses as may be specified in writing by either of the parties. All notices, requests, or communications shall be deemed effective upon personal delivery or three (3) calendar days following deposit in the mail.

2. Whenever the Contractor encounters any difficulty which is delaying or threatens to delay its timely performance under the contract, the Contractor shall immediately give notice thereof in writing to the State reciting all relevant information with respect thereto. Such notice shall not in any way constitute a basis for an extension of the delivery schedule or be construed as a waiver by the State of any of its rights or remedies to which it is entitled by law or equity or pursuant to the provisions of the contract. Failure to give such notice, however, may be grounds for denial of any request for an extension of the delivery schedule because of such delay.

Either party may change its address for notification purposes by giving notice of the change, and setting forth the new address and an effective date.

For the duration of the contract, all communication between Contractor and the State regarding the contract shall take place between the Contractor and individuals specified by the State in writing. Communication about the contract between Contractor and individuals not designated as points of contact by the State is strictly forbidden.

Y. EARLY TERMINATION

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
JR			

The contract may be terminated as follows:

1. The State and the Contractor, by mutual written agreement, may terminate the contract at any time.

2. The State, in its sole discretion, may terminate the contract for any reason upon thirty (30) calendar day's written notice to the Contractor.

3. Pursuant to 42 CFR §438.708 the State may enroll that Contractor's members in other MCOs or provide their benefits through other options included in the Medicaid State Plan if the State, at its sole discretion, determines that the Contractor has failed to carry out the substantive terms of the contract, or meet applicable requirements in Sections 1932, 1903(m) or 1905(t) of the Social Security Act.

4. Such termination shall not relieve the Contractor of warranty or other service obligations incurred under the terms of the contract. In the event of termination the Contractor shall be entitled to payment, determined on a pro rata basis, for products or services satisfactorily performed or provided.

5. The State will provide the Contractor with a timely written Notice of Intent to Terminate (Notice) that states the nature and basis of the penalty or sanction and pre-termination hearing rights.

6. The Contractor may, at the discretion of the State, be allowed to correct the deficiencies within the thirty (30) calendar day notice period, unless other provisions in this Section demand otherwise, prior to the issuance of a Notice of Termination.

7. In accordance with 42 CFR §438.710, the State will conduct a pre-termination hearing upon the request of the MCO as outlined in the Notice to provide MCO the opportunity to contest the nature and basis of the sanction.

   a. The request must be submitted in writing to the State prior to the determined date of termination stated in the Notice.

   b. The MCO shall receive a written notice of the outcome of the pre-termination hearing, if applicable, indicating decision reversal or affirmation.

8. The State will notify Medicaid members enrolled in the MCO in writing, consistent with 42 CFR §438.710 and §438.722, of the affirming termination decision and of their options for receiving Medicaid services and to disenroll immediately.

9. The State may terminate the contract immediately for the following reasons:

   a. if directed to do so by statute;

   b. Contractor has made an assignment for the benefit of creditors, has admitted in writing its inability to pay debts as they mature, or has ceased operating in the normal course of business;

   c. a trustee or receiver of the Contractor or of any substantial part of the Contractor's assets has been appointed by a court;

   d. fraud, misappropriation, embezzlement, malfeasance, misfeasance, or illegal conduct pertaining to performance under the contract by its Contractor, its employees, officers, directors, or shareholders;

   e. an involuntary proceeding has been commenced by any party against the Contractor under any one of the chapters of Title 11 of the United States Code and (i) the proceeding has been pending for a minimum of sixty (60) calendar days; or (ii) the Contractor has consented, either expressly or by operation of law, to the entry of an order for relief; or (iii) the Contractor has been decreed or adjudged a debtor;

   f. a voluntary petition has been filed by the Contractor under any of the chapters of Title 11 of the United States Code;

   g. Contractor intentionally discloses confidential information;

   h. Contractor has or announces it will discontinue support of the deliverable;

   i. second or subsequent documented "vendor performance report" form deemed acceptable by the State Purchasing Bureau; or

   j. Contractor engaged in collusion or actions which could have provided Contractor an unfair advantage in obtaining this contract.

Z. FUNDING OUT CLAUSE OR LOSS OF APPROPRIATIONS

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
DR			

The State may terminate the contract, in whole or in part, in the event funding is no longer available. The State's obligation to pay amounts due for fiscal years following the current fiscal year is contingent upon legislative appropriation of funds for the contract. Should said funds not be appropriated, the State may terminate the contract with respect to those payments for the fiscal years for which such funds are not appropriated. The State will give the Contractor written notice thirty (30) calendar days prior to the effective date of any termination, and advise the Contractor of the location (address and room number) of any related equipment. All obligations of the State to make payments after the termination date will cease and all interest of the State in any related equipment will terminate. The Contractor shall be entitled to receive just and equitable compensation for any authorized work which has been satisfactorily completed as of the termination date. In no event shall the Contractor be paid for a loss of anticipated profit.

AA. BREACH BY CONTRACTOR

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
DR			

The State may terminate the contract, in whole or in part, if the Contractor fails to perform its obligations under the contract in a timely and proper manner. The State may, by providing a written notice of default to the Contractor, allow the Contractor to cure a failure or breach of contract within a period of thirty (30) calendar days (or longer at State's discretion considering the gravity and nature of the default). Said notice shall be delivered by Certified Mail, Return Receipt Requested, or in person with proof of delivery. Allowing the Contractor time to cure a failure or breach of contract does not waive the State's right to immediately terminate the contract for the same or different contract breach which may occur at a different time. In case of default of the Contractor, the State may contract the service from other sources and hold the Contractor responsible for any excess cost occasioned thereby.

BB. ASSURANCES BEFORE BREACH

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
DR			

If any document or deliverable required pursuant to the contract does not fulfill the requirements of the Request for Proposal/resulting contract, upon written notice from the State, the Contractor shall deliver assurances in the form of additional Contractor resources at no additional cost to the project in order to complete the deliverable, and to ensure that other project schedules will not be adversely affected.

CC. ADMINISTRATION – CONTRACT TERMINATION

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
JR			

1. Contractor must provide confirmation that upon contract termination all deliverables prepared in accordance with this agreement shall become the property of the State of Nebraska; subject to the ownership provision (section E) contained herein, and is provided to the State of Nebraska at no additional cost to the State.

2. Contractor must provide confirmation that in the event of contract termination, all records that are the property of the State will be returned to the State within thirty (30) calendar days. Notwithstanding the above, Contractor may retain one copy of any information as required to comply with applicable work product documentation standards or as are automatically retained in the course of Contractor's routine back up procedures.

DD. PENALTY

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
JR			

The State has the option to invoke penalties as described in Section IV Project Description and Scope of Work.

EE. PERFORMANCE BOND

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
JR			

The Contractor shall obtain and maintain a performance bond, rated a minimum of A by A.M. Best Company, of a standard commercial scope from a surety company or companies holding a certificate of authority to transact surety business in the state. The Contractor shall not leverage the bond as collateral for debt or create other creditors using the bond as security. The Contractor shall be in breach of this contract if it fails to maintain or renew the performance bond as required by this contract.

1. The Contractor shall obtain a performance bond in an amount equal to $50,000,000.00. The bond will guarantee that the selected contractor will faithfully perform all requirements, terms and conditions of the contract. Failure to comply shall be grounds for forfeiture of the bond as liquidated damages. Amount of forfeiture will be determined by the agency based on loss to the State. The bond will be returned when the service has been satisfactorily completed as solely determined by the State, after termination or expiration of the contract.

2. The Contractor agrees that if it is declared to be in default of any term of this contract, MLTC may elect to, in addition to any other remedies it may have under this contract, obtain payment under the performance bond for the following:

   a. Making funds available through a consensus proceeding in the appropriate court for payment to subcontracted providers and non-contracted health care providers for reimbursement due to

nonpayment of claims by Contractor, in the event of a breach of Contractor's obligation under this contract;

b. Reimbursing MLTC for any payments made by MLTC on behalf of the Contractor;

c. Reimbursing MLTC for any extraordinary administrative expenses incurred by a breach of Contractor's obligations under this contract, including, expenses incurred after termination of this contract by MLTC;

d. Making any payments or expenditures deemed necessary to MLTC, in its sole discretion, incurred by MLTC in the direct operation of the contract pursuant to the terms of this contract and to reimburse MLTC for any extraordinary administrative expenses incurred in connection with the direct operation of the Contractor; and

e. The Contractor shall reimburse MLTC for expenses exceeding the performance bond amount.

FF. FORCE MAJEURE

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
JR			

Neither party shall be liable for any costs or damages resulting from its inability to perform any of its obligations under the contract due to a natural disaster, or other similar event outside the control and not the fault of the affected party ("Force Majeure Event"). A Force Majeure Event shall not constitute a breach of the contract. The party so affected shall immediately give notice to the other party of the Force Majeure Event. The State may grant relief from performance of the contract if the Contractor is prevented from performance by a Force Majeure Event. The burden of proof for the need for such relief shall rest upon the Contractor. To obtain release based on a Force Majeure Event, the Contractor shall file a written request for such relief with the State Purchasing Bureau. Labor disputes with the impacted party's own employees will not be considered a Force Majeure Event and will not suspend performance requirements under the contract.

GG. PAYMENT

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
JR			

State will render payment to Contractor when the terms and conditions of the contract and specifications have been satisfactorily completed on the part of the Contractor as solely determined by the State. Payment will be made by the responsible agency in compliance with the State of Nebraska Prompt Payment Act (See Neb. Rev. Stat. §81-2401 through 81-2408). The State may require the Contractor to accept payment by electronic means such as ACH deposit. In no event shall the State be responsible or liable to pay for any services provided by the Contractor prior to the Effective Date, and the Contractor hereby waives any claim or cause of action for any such services.

HH. RIGHT TO AUDIT

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
JR			

Contractor shall establish and maintain a reasonable accounting system that enables the State to readily audit contract. The State and its authorized representatives shall have the right to audit, to examine, and to make copies of or extracts from all financial and related records (in whatever form they may be kept, whether written, electronic, or other) relating to or pertaining to this contract kept by or under the control of the Contractor, including, but not

limited to those kept by the Contractor, its employees, agents, assigns, successors, and Sub-Contractors. Such records shall include, but not be limited to, accounting records, written policies and procedures; all paid vouchers including those for out-of-pocket expenses; other reimbursement supported by invoices; ledgers; cancelled checks; deposit slips; bank statements; journals; original estimates; estimating work sheets; contract amendments and change order files; back charge logs and supporting documentation; insurance documents; payroll documents; timesheets; memoranda; and correspondence.

Contractor shall, at all times during the term of this contract and for a period of ten (10) years after the completion of this contract, maintain such records, together with such supporting or underlying documents and materials. The Contractor shall at any time requested by the State, whether during or after completion of this contract and at Contractor's own expense make such records available for inspection and audit (including copies and extracts of records as required) by the State. Such records shall be made available to the State during normal business hours at the Contractor's office or place of business. In the event that no such location is available, then the financial records, together with the supporting or underlying documents and records, shall be made available for audit at a time and location that is convenient for the State. Contractor shall ensure the State has these rights with Contractor's assigns, successors, and Sub-Contractors, and the obligations of these rights shall be explicitly included in any subcontracts or agreements formed between the Contractor and any Sub-Contractors to the extent that those sub-contracts or agreements relate to fulfillment of the Contractor's obligations to the State.

Costs of any audits conducted under the authority of this right to audit and not addressed elsewhere will be borne by the State unless certain exemption criteria are met. If the audit identifies overpricing or overcharges (of any nature) by the Contractor to the State in excess of one-half of one percent (.5%) of the total contract billings, the Contractor shall reimburse the State for the total costs of the audit. If the audit discovers substantive findings related to fraud, misrepresentation, or non-performance, the Contractor shall reimburse the State for total costs of audit. Any adjustments and/or payments that must be made as a result of any such audit or inspection of the Contractor's invoices and/or records shall be made within a reasonable amount of time (not to exceed 90 days) from presentation of the State's findings to Contractor.

II. TAXES

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
JR			

The State is not required to pay taxes of any kind and assumes no such liability as a result of this solicitation. Any property tax payable on the Contractor's equipment which may be installed in a state-owned facility is the responsibility of the Contractor.

JJ. INSPECTION AND APPROVAL

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
JR			

Final inspection and approval of all work required under the contract shall be performed by the designated State officials. The State and/or its authorized representatives shall have the right to enter any premises where the Contractor or Sub-Contractor duties under the contract are being performed, and to inspect, monitor or otherwise evaluate the work being performed. All inspections and evaluations shall be at reasonable times and in a manner that will not unreasonably delay work.

KK. CHANGES IN SCOPE/CHANGE ORDERS

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
DR			

The State may, upon the written agreement of Contractor, make changes to the contract within the general scope of the RFP. The State may, at any time work is in progress, by written agreement, make alterations in the terms of work as shown in the specifications, require the Contractor to make corrections, decrease the quantity of work, or make such other changes as the State may find necessary or desirable. The Contractor shall not claim forfeiture of contract by reasons of such changes by the State. Changes in work and the amount of compensation to be paid to the Contractor shall be determined in accordance with applicable unit prices if any, or a pro-rated value.

Corrections of any deliverable, service or performance of work required pursuant to the contract shall not be deemed a modification. Changes or additions to the contract beyond the scope of the RFP are not permitted; however, that this RFP must meet all applicable federal legal requirements and regulations, including Medicaid laws, rules and regulations, and any future amendments to this RFP that are required to bring Nebraska in compliance with federal Medicaid law shall be deemed part of the scope of the requested bid.

LL. SEVERABILITY

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
DR			

If any term or condition of the contract is declared by a court of competent jurisdiction to be illegal or in conflict with any law, the validity of the remaining terms and conditions shall not be affected, and the rights and obligations of the parties shall be construed and enforced as if the contract did not contain the particular provision held to be invalid.

MM. CONFIDENTIALITY

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
DR			

All materials and information provided by the State or acquired by the Contractor on behalf of the State shall be regarded as confidential information. All materials and information provided by the State or acquired by the Contractor on behalf of the State shall be handled in accordance with federal and state law, and ethical standards. The Contractor must ensure the confidentiality of such materials or information. Should said confidentiality be breached by a Contractor; Contractor shall notify the State immediately of said breach and take immediate corrective action.

It is incumbent upon the Contractor to inform its officers and employees of the penalties for improper disclosure imposed by the Privacy Act of 1974, 5 U.S.C. 552a. Specifically, 5 U.S.C. 552a (i)(1), which is made applicable to Contractors by 5 U.S.C. 552a (m)(1), provides that any officer or employee of a Contractor, who by virtue of his/her employment or official position has possession of or access to agency records which contain individually identifiable information, the disclosure of which is prohibited by the Privacy Act or regulations established thereunder, and who knowing that disclosure of the specific material is prohibited, willfully discloses the material in any manner to any person or agency not entitled to receive it, shall be guilty of a misdemeanor and fined not more than $5,000.

NN. PROPRIETARY INFORMATION

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
JR			

Data contained in the proposal and all documentation provided therein, become the property of the State of Nebraska and the data becomes public information upon opening the proposal. If the bidder wishes to have any information withheld from the public, such information must fall within the definition of proprietary information contained within Nebraska's public record statutes. **All proprietary information the bidder wishes the State to withhold must be submitted in a sealed package, which is separate from the remainder of the proposal, and provide supporting documents showing why such documents should be marked proprietary.** The separate package must be clearly marked PROPRIETARY on the outside of the package. **Bidders may not mark their entire Request for Proposal as proprietary.** Failure of the bidder to follow the instructions for submitting proprietary and copyrighted information may result in the information being viewed by other bidders and the public. Proprietary information is defined as trade secrets, academic and scientific research work which is in progress and unpublished, and other information which if released would give advantage to business competitors and serve no public purpose (see Neb. Rev. Stat. §84-712.05(3)). In accordance with Attorney General Opinions 92068 and 97033, bidders submitting information as proprietary may be required to prove specific, named competitor(s) who would be advantaged by release of the information and the specific advantage the competitor(s) would receive. Although every effort will be made to withhold information that is properly submitted as proprietary and meets the State's definition of proprietary information, the State is under no obligation to maintain the confidentiality of proprietary information and accepts no liability for the release of such information.

IMPORTANT NOTICE: Pursuant to Neb. Rev. Stat. §84-602.02, all State contracts in effect as of January 1, 2014 will be posted to a public website beginning July 1, 2014. All non-proprietary or confidential information as defined by Law **WILL BE POSTED FOR PUBLIC VIEWING.**

OO. CERTIFICATION OF INDEPENDENT PRICE DETERMINATION/COLLUSIVE BIDDING

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
JR			

By submission of this proposal, the bidder certifies that it is the party making the foregoing proposal and that the proposal is not made in the interest of, or on behalf of, any undisclosed person, partnership, company, association, organization, or corporation; that the proposal is genuine and not collusive or sham; that the bidder has not directly or indirectly induced or solicited any other bidder to put in a false or sham proposal, and has not directly or indirectly colluded, conspired, connived, or agreed with any bidder or anyone else to put in a sham proposal, or that anyone shall refrain from bidding; that the bidder has not in any manner, directly or indirectly, sought by agreement, communication, or conference with anyone to fix the proposal price of the bidder or any other bidder, or to fix any overhead, profit, or cost element of the proposal price, or of that of any other bidder, or to secure any advantage against the public body awarding the contract of anyone interested in the proposed contract; that all statements contained in the proposal are true; and further that the bidder has not, directly or indirectly, submitted the proposal price or any breakdown thereof, or the contents thereof, or divulged information or data relative thereto, or paid, and will not pay, any fee to any corporation, partnership, company association, organization, proposal depository, or to any member or agent thereof to effectuate a collusive or sham proposal.

PP. STATEMENT OF NON-COLLUSION

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
DR			

The proposal shall be arrived at by the bidder independently and be submitted without collusion with, and without any direct or indirect agreement, understanding or planned common course of action with, any person; firm; corporation; bidder; Contractor of materials, supplies, equipment or services described in this RFP. Bidder shall not collude with, or attempt to collude with, any state officials, employees or agents; or evaluators or any person involved in this RFP. The bidder shall not take any action in the restraint of free competition or designed to limit independent bidding or to create an unfair advantage.

Should it be determined that collusion occurred, the State reserves the right to reject a bid or terminate the contract and impose further administrative sanctions.

QQ. PRICES

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
DR			

Price information is provided under Section IV.P MCO Reimbursement.

RR. BEST AND FINAL OFFER

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
DR			

The State will compile the final scores for all parts of each proposal. The award may be granted to the highest scoring responsive and responsible bidder. Alternatively, the highest scoring bidder or bidders may be requested to submit best and final offers. If best and final offers are requested by the State and submitted by the bidder, they will be evaluated (using the stated criteria), scored, and ranked by the Evaluation Committee. The award will then be granted to the highest scoring bidder. However, a bidder should provide its best offer in its original proposal. Bidders should not expect that the State will request a best and final offer.

SS. ETHICS IN PUBLIC CONTRACTING

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
DR			

No bidder shall pay or offer to pay, either directly or indirectly, any fee, commission compensation, gift, gratuity, or anything of value to any State officer, legislator, employee or evaluator based on the understanding that the receiving person's vote, actions, or judgment will be influenced thereby. No bidder shall give any item of value to any employee of the State Purchasing Bureau or any evaluator.

Bidders shall be prohibited from utilizing the services of lobbyists, attorneys, political activists, or consultants to secure the contract. It is the intent of this provision to assure that the prohibition of state contact during the procurement process is not subverted through the use of lobbyists, attorneys, political activists, or consultants. It is the intent of the State that the process of evaluation of proposals and award of the contract be completed without external influence. It is not the intent of this section to prohibit bidders from seeking professional advice, for example consulting legal counsel, regarding terms and conditions of this Request for Proposal or the format or content of their proposal.

If the bidder is found to be in non-compliance with this section of the Request for Proposal, they may forfeit the contract if awarded to them or be disqualified from the selection process.

In compliance with the Byrd Anti-Lobbying Amendment, contractors who apply or bid shall file the required certification that each tier will not use federal funds to pay a person or employee or organization for influencing or attempting to influence an officer or employee of any federal agency, a member of Congress, officer or employee of Congress, or an employee of a member of Congress in connection with obtaining any federal contract, grant or any other award covered by 31 U.S.C. §1352. Each tier shall also disclose any lobbying with nonfederal funds that takes place in connection with obtaining any federal award. Such disclosures are forwarded from tier-to-tier up to the recipient (45 CFR §3).

TT. INDEMNIFICATION

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
JR			

1. **GENERAL**
The Contractor agrees to defend, indemnify, hold, and save harmless the State and its employees, volunteers, agents, and its elected and appointed officials ("the indemnified parties") from and against any and all claims, liens, demands, damages, liability, actions, causes of action, losses, judgments, costs, and expenses of every nature, including investigation costs and expenses, settlement costs, and attorney fees and expenses ("the claims"), sustained or asserted against the State, arising out of, resulting from, or attributable to the willful misconduct, negligence, error, or omission of the Contractor, its employees, Sub-Contractors, consultants, representatives, and agents, except to the extent such Contractor liability is attenuated by any action of the State which directly and proximately contributed to the claims.

2. **INTELLECTUAL PROPERTY**
The Contractor agrees it will, at its sole cost and expense, defend, indemnify, and hold harmless the indemnified parties from and against any and all claims, to the extent such claims arise out of, result from, or are attributable to, the actual or alleged infringement or misappropriation of any patent, copyright, trade secret, trademark, or confidential information of any third party by the Contractor or its employees, Sub-Contractors, consultants, representatives, and agents; provided, however, the State gives the Contractor prompt notice in writing of the claim. The Contractor may not settle any infringement claim that will affect the State's use of the Licensed Software without the State's prior written consent, which consent may be withheld for any reason.

If a judgment or settlement is obtained or reasonably anticipated against the State's use of any intellectual property for which the Contractor has indemnified the State, the Contractor shall, at the Contractor's sole cost and expense, promptly modify the item or items which were determined to be infringing, acquire a license or licenses on the State's behalf to provide the necessary rights to the State to eliminate the infringement, or provide the State with a non-infringing substitute that provides the State the same functionality. At the State's election, the actual or anticipated judgment may be treated as a breach of warranty by the Contractor, and the State may receive the remedies provided under this RFP.

3. **PERSONNEL**
The Contractor shall, at its expense, indemnify and hold harmless the indemnified parties from and against any claim with respect to withholding taxes, worker's compensation, employee benefits, or any other claim, demand, liability, damage, or loss of any nature relating to any of the personnel provided by the Contractor.

UU. NEBRASKA TECHNOLOGY ACCESS STANDARDS

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
DR			

Contractor shall review the Nebraska Technology Access Standards, found at http://nitc.nebraska.gov/standards/2-201.html and ensure that products and/or services provided under the contract are in compliance or will comply with the applicable standards. In the event such standards change during the Contractor's performance, the State may create an amendment to the contract to request the contract comply with the changed standard at a cost mutually acceptable to the parties.

VV. ANTITRUST

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
DR			

The Contractor hereby assigns to the State any and all claims for overcharges as to goods and/or services provided in connection with this contract resulting from antitrust violations which arise under antitrust laws of the United States and the antitrust laws of the State.

WW. DISASTER RECOVERY/BACK UP PLAN

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
DR			

The Contractor shall have a disaster recovery and back-up plan, of which a copy should be provided to the State, which includes, but is not limited to equipment, personnel, facilities, and transportation, in order to continue services as specified under the specifications in the contract in the event of a disaster.

XX. TIME IS OF THE ESSENCE

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
DR			

Time is of the essence in this contract. The acceptance of late performance with or without objection or reservation by the State shall not waive any rights of the State nor constitute a waiver of the requirement of timely performance of any obligations on the part of the Contractor remaining to be performed.

YY. RECYCLING

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
JR			

Preference will be given to items which are manufactured or produced from recycled material or which can be readily reused or recycled after their normal use as per Neb. Rev. Stat. §81-15,159.

ZZ. POLICY

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
JR			

Contractor certifies it maintains a drug free work place environment to ensure worker safety and workplace integrity. Contractor agrees to provide a copy of its drug free workplace policy at any time upon request by the State.

AAA. EMPLOYEE WORK ELIGIBILITY STATUS

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
JR			

The Contractor is required and hereby agrees to use a federal immigration verification system to determine the work eligibility status of employees physically performing services within the State of Nebraska. A federal immigration verification system means the electronic verification of the work authorization program authorized by the Illegal Immigration Reform and Immigrant Responsibility Act of 1996, 8 U.S.C. 1324a, known as the E-Verify Program, or an equivalent federal program designated by the United States Department of Homeland Security or other federal agency authorized to verify the work eligibility status of an employee.

If the Contractor is an individual or sole proprietorship, the following applies:

1. The Contractor must complete the United States Citizenship Attestation Form, available on the Department of Administrative Services website at http://das.nebraska.gov/materiel/purchasing.html

   The completed United States Attestation Form should be submitted with the Request for Proposal response.

2. If the Contractor indicates on such attestation form that he or she is a qualified alien, the Contractor agrees to provide the US Citizenship and Immigration Services documentation required to verify the Contractor's lawful presence in the United States using the Systematic Alien Verification for Entitlements (SAVE) Program.

3. The Contractor understands and agrees that lawful presence in the United States is required and the Contractor may be disqualified or the contract terminated if such lawful presence cannot be verified as required by Neb. Rev. Stat. §4-108.

BBB. CERTIFICATION REGARDING DEBARMENT, SUSPENSION AND INELIGIBILITY

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
JR			

The Contractor, by signature to this RFP, certifies that the Contractor is not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded by any federal department or agency from participating in transactions (debarred). The Contractor also agrees to include the above requirements in any and all sub-contracts into which it enters. The Contractor shall immediately notify the Department if, during the term of this contract, Contractor becomes debarred. The Department may immediately terminate this contract by providing Contractor written notice if Contractor becomes debarred during the term of this contract.

Contractor, by signature to this RFP, certifies that Contractor has not had a contract with the State of Nebraska terminated early by the State of Nebraska. If Contractor has had a contract terminated early by the State of Nebraska, Contractor must provide the contract number, along with an explanation of why the contract was terminated early. Prior early termination may be cause for rejecting the proposal.

CCC. OFFICE OF PUBLIC COUNSEL

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
JR			

If it provides, under the terms of this contract and on behalf of the State of Nebraska, health and human services to individuals; service delivery; service coordination; or case management, Contractor shall submit to the jurisdiction of the Office of Public Counsel, pursuant to Neb. Rev. Stat. §§ 81-8,240 et seq. This section shall survive the termination of this contract and shall not apply if Contractor is a long-term care facility subject to the Long-Term Care Ombudsman Act, Neb. Rev. Stat. §§ 81-2237 et seq.

DDD. LONG-TERM CARE OMBUDSMAN

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
JR			Not Applicable

If it is a long-term care facility subject to the Long-Term Care Ombudsman Act, Neb. Rev. Stat. §§ 81-2237 et seq., Contractor shall comply with the Act. This section shall survive the termination of this contract.

EEE. LICENSE/SERVICE OR OTHER AGREEMENTS

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:
JR			

Any License/Service or other such agreements which the bidder may want the State to consider must be submitted with the bid. Any License/Service or other such agreements submitted to the State post bid opening may result in

the bid being rejected in its entirety. Any such agreement, if agreed to by the State, will be considered an addendum to the contract. Any terms and conditions contained in any such accepted agreement (addendum) must not conflict with or alter the State's Terms and Conditions (Terms and Conditions) as contained in the RFP and finalized in the contract. In the event of any conflict between the Terms and Conditions and any addendum the Terms and Conditions will prevail.

The State reserves the right to reject any submitted addendum and considers the submission of any such addendum to be a proposed alteration of the Terms and Conditions.

This clause does not apply to any third party license or service agreements.

CERTIFICATION REGARDING LOBBYING

Certification for Contracts, Grants, Loans, and Cooperative Agreements

(under 45 CFR Part 93, Appendix A)

The undersigned certifies, to the best of his or her knowledge and belief, that:

1. No Federal appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of an agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the awarding of any Federal contract, the making of any Federal grant, the making of any Federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any Federal contract, grant, loan, or cooperative agreement.

2. If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal contract, grant, loan, or cooperative agreement, the undersigned shall complete and submit Standard Form-LLL, "Disclosure Form to Report Lobbying," in accordance with its instructions.

3. The undersigned shall require that the language of this certification be included in the award documents for all subawards at all tiers (including subcontracts, subgrants, and contracts under grants, loans, and cooperative agreements) and that all subrecipients shall certify and disclose accordingly.

This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certification is a prerequisite for making or entering into this transaction imposed by section 1352, title 31, U.S. Code. Any person who fails to file the required certification shall be subject to a civil penalty of not less than $10,000 and not more than $100,000 for each such failure.

WELLCARE OF NEBRASKA, INC.

David Reynolds

Signature of Authorized Official

DAVID REYNOLDS SENIOR VICE PRESIDENT / DIVISION PRESIDENT

Name and Title of Authorized Official

12-17-15

Date

CORPORATE OVERVIEW

A. BIDDER IDENTIFICATION AND INFORMATION

The bidder must provide the full company or corporate name, address of the company's headquarters, entity organization (corporation, partnership, proprietorship), state in which the bidder is incorporated or otherwise organized to do business, year in which the bidder first organized to do business and whether the name and form of organization has changed since first organized.

NAME, ADDRESS AND OTHER INFORMATION REGARDING WELLCARE OF NEBRASKA

The bidder is WellCare of Nebraska, Inc. (WellCare of Nebraska), a Nebraska corporation. Incorporated on October 20, 2015, WellCare of Nebraska is a subsidiary of WellCare Health Plans, Inc. (WellCare). WellCare of Nebraska will be the beneficiary of WellCare's broad experience serving the full array of Medicaid populations. WellCare of Nebraska's current mailing address is 1299 Farnam St, Suite 300, Omaha, Nebraska 68102. Following award, we intend to relocate our primary office to Lincoln. In addition, to ensure we are located where our members live, work and access services, we intend to open at least four Welcome Rooms, which we currently intend to locate in Kearney, Norfolk, Omaha and Scottsbluff. WellCare of Nebraska has changed neither its name nor its form of organization since it was organized.

WellCare, WellCare of Nebraska's ultimate parent company, is a Delaware corporation publicly traded on the New York Stock Exchange under the ticker symbol "WCG". WellCare's roots go back to the incorporation of WellCare of Florida, Inc. in 1985 by a group of physicians in Tampa, Florida. Originally organized as HMO Holdings, LLC on May 8, 2002, WellCare quickly changed its name to WellCare Holdings, LLC. In June 2002 WellCare purchased WellCare of Florida and The WellCare Management Group, Inc., which had operations in New York and Connecticut. In July 2004, WellCare merged into a Delaware corporation to become a corporation, changed its name to WellCare Health Plans, Inc., and completed its initial public offering of common stock.

WellCare's address is 8735 Henderson Road, Tampa, Florida 33634.

CORPORATE OVERVIEW

B. FINANCIAL STATEMENTS

The bidder must provide three years of independently audited financial statements, prepared under U.S. generally accepted accounting principles, and associated enrollment figures applicable to the firm. The bidder must also provide the last three years rating from AM Best Company; verification of any contributions made to the bidder to improve its financial position after its most recent audit (e.g. copies of bank statements and deposit slips), if applicable; and, a statement of whether the bidder or predecessor company has filed or had filed against it any bankruptcy or insolvency proceeding, and if so, relevant details. If publicly held, the bidder must provide a copy of the corporation's most recent audited financial reports and statements, and the name, address, and telephone number of the fiscally responsible representative of the bidder's financial or banking organization in the form of a letter, indicating that the bidder's business relationship with the financial institution is in positive standing.

If the bidder is not a publicly held corporation, either the reports and statements required of a publicly held corporation, or a description of the organization, including size, longevity, client base, areas of specialization and expertise, and any other pertinent information, must be submitted in such a manner that proposal evaluators may reasonably formulate a determination about the stability and financial strength of the organization. Additionally, a non-publicly held firm must provide a banking reference.

The bidder must disclose any and all judgments, pending or expected litigation, or other real or potential financial reversals, which might materially affect the viability or stability of the organization, or state that no such condition is known to exist.

The State may elect to use a third-party to conduct credit checks as part of the corporate overview evaluation

WELLCARE IS AN ESTABLISHED AND FINANCIALLY SOUND COMPANY

The bidder, WellCare of Nebraska, Inc. (WellCare of Nebraska), was formed in October 2015 and therefore has no available audited financial statements. WellCare of Nebraska is a wholly-owned indirect subsidiary of WellCare Health Plans, Inc. (WellCare), an established and financially sound company whose stock is publicly traded on the New York Stock Exchange under the ticker "WCG". Please find enclosed with this proposal as **Attachment B1_WellCare 2014 Annual Report 10K** WellCare's Annual Report on Form 10-K for the year ended December 14, 2014 (the "Annual Report"), WellCare's most recent audited financial report prepared under U.S. generally accepted accounting principles. The Annual Report includes two additional years of audited financial statements for WellCare (a total of three years of independently audited financial statements). Enrollment information as of the end of each of our 2014, 2013 and 2012 fiscal years is included on page 12 of the Annual Report.

Please note that in June 2015, after the time period covered by the Annual Report, WellCare completed the offering and sale of $300 million aggregate principal amount of senior notes pursuant to a reopening of our existing series of such notes. As of September 30, 2015, WellCare had unrestricted regulated cash and investments of $1.4 billion. We are also party to a credit agreement that provides for a senior unsecured revolving loan facility of up to $300 million, which has not been drawn upon and may be used for general corporate purposes of WellCare and its subsidiaries.

As of September 30, 2015, WellCare's plans served approximately 2.4 million Medicaid and Children's Health Insurance Program (CHIP) members in nine states, including beneficiaries of Temporary Assistance for Needy Families, Supplemental Security Income, Aged Blind and Disabled and other state-based programs that are not part of the Medicaid program, such as CHIPs and Managed Long-Term Care programs. In addition, WellCare serves Medicare Advantage and Medicare Part D populations. As of

September 30, 2015, WellCare's plans served approximately 355,000 Medicare Advantage members, including dual-eligibles, and approximately one million Medicare Part D members.

WellCare focuses on providing services for government-sponsored health care programs, primarily Medicaid and Medicare. We have not been rated by the A.M. Best Company, Inc. WellCare is, however, rated by Moody's Investors Service, Inc. and Standard & Poor's Financial Services LLC. We have attached the last three years ratings from these companies as **Attachment B2_Moodys 2013**, **Attachment B3_Moodys 2014**; **Attachment B4_Moodys 2015**; **Attachment B5_SandP 2013**; **Attachment B6_SandP 2014**; **and Attachment B7_SandP 2015.**

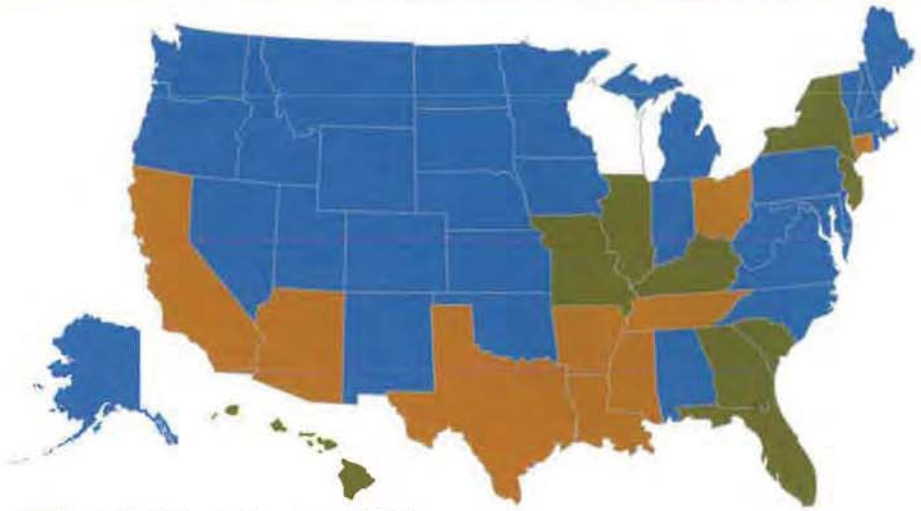
Neither WellCare of Nebraska nor WellCare, or any predecessor company of either, has filed or had filed against it any bankruptcy or insolvency proceeding.

Please find enclosed with this proposal as **Attachment B8_Wells Fargo** a letter from WellCare's banking institution, Wells Fargo, indicating that WellCare's business relationship with Wells Fargo is in positive standing and detailing the name, address and telephone number of a fiscally responsible representative of our banking organization.

To WellCare's knowledge, there are no judgments, pending or expected litigation, or other real or potential financial reversals, which might materially affect the viability or stability of WellCare or WellCare of Nebraska.

2014 Annual Report
WellCare®
Health Plans

WellCare Health Plans, Inc. provides managed care services targeted to government-sponsored health care programs, focusing on Medicaid, Medicare and Medicare Prescription Drug Plans (PDP). Headquartered in Tampa, Florida, WellCare offers a variety of health plans for families; children; the aged, blind and disabled; and seniors. The company served approximately 4.1 million members nationwide as of December 31, 2014.



- Medicaid, Medicare Advantage, and PDP
- Medicare Advantage and PDP
- Medicare stand-alone PDP

2.3 million Medicaid members in 9 states

417,000 Medicare members in 18 states

1.4 million Medicare PDP members in 49 states

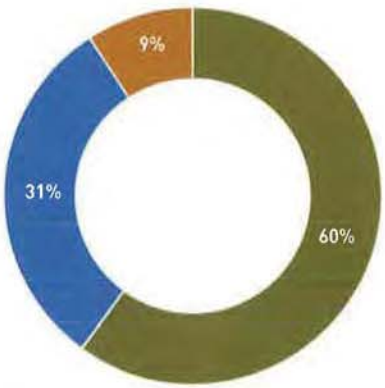
Medicare Health Plans	417,000
PDP	1,392,000
Total Membership	**4,119,000**

2014 Premium Revenue* Contribution



Medicaid Health Plans	$ 7.6 billion
Medicare Health Plans	$ 3.9 billion
PDP	$ 1.2 billion
Total Premium Revenues	**$12.7 billion**

Premium Revenue*

($ in billions)

*Excludes Medicaid state ACA industry fee reimbursement in 2014 and Medicaid premium tax revenue.

Data as of December 31, 2014

As we look forward to the coming years, we believe there are significant opportunities to build on our strengths.

KENNETH A. BURDICK
Chief Executive Officer

TO OUR STOCKHOLDERS, MEMBERS, GOVERNMENT PARTNERS, BUSINESS PARTNERS, AND ASSOCIATES:

While 2014 was a challenging year for WellCare, there were a number of seeds that were planted during the year that will bear fruit in 2015 and beyond. The actions we took in 2014 to improve our performance, combined with opportunities across all of our lines of business, give us confidence in our future.

In 2014, we made fundamental changes to our operating philosophy. We spent much of last year building a new management team by combining the best talent from within WellCare with top talent from the managed care industry. Under our new executive leadership team, we developed more rigorous processes to improve our operational and financial performance and are focused on a culture of accountability. We also began reinvesting in our associates, processes and tools to build a stronger, more enduring company. We believe this more disciplined approach, coupled with executing on our multi-year strategy that includes pursuing growth opportunities in government programs, will result in more consistent performance and margin expansion while providing value to our members, federal and state customers and provider partners.

Our focus is on government-sponsored programs—Medicaid, Medicare Advantage (MA) and Medicare Prescription Drug Plans (PDP). As of December 31, 2014, we served more than 4.1 million members across all lines of our business, growing 45 percent compared with December 31, 2013. Premium revenue of $12.7 billion for the full-year 2014 grew by 35 percent compared with the full-year 2013.*

In our Medicaid Health Plans segment, we served 2.3 million members in nine states as of December 31, 2014, growing 31 percent compared with December 31, 2013. In 2014, we successfully implemented our Florida Managed Medical Assistance Program contract to provide managed care services to Medicaid recipients in eight of 11 regions. Through this program, we added 256,000 new Medicaid members in 2014, maintaining the largest membership share in the Florida Medicaid market.

Medicaid expansion under the Affordable Care Act was also a driver of membership and revenue growth for WellCare in 2014. We currently serve the Medicaid expansion population in Hawaii, Illinois, Kentucky, New Jersey and New York, and we expect Medicaid expansion to continue to contribute to our growth in the future.

An example of one of our growth seeds is in New Jersey. WellCare began offering a Medicaid managed care product in New Jersey at the beginning of 2014, and in July 2014, we significantly expanded our presence through an acquisition of Medicaid assets in the state. We are also very pleased that in July 2014 WellCare of New Jersey received approval to participate in the state's Managed Long-Term Services and Supports program. We expect our New Jersey Medicaid business to contribute to our growth in 2015.

*Excludes Medicaid state ACA industry fee reimbursement in 2014 and Medicaid premium tax revenue.

We believe our more disciplined approach, coupled with executing on our multi-year strategy that includes pursuing growth opportunities in government programs, will result in more consistent performance and margin expansion while providing value to our members, federal and state customers and provider partners.

We also experienced strong membership and revenue growth in our Medicare Health Plans segment in 2014. Our Medicare performance in 2014 reflects a year of strong organic growth complemented by our acquisition of Windsor Health Group, Inc. in early 2014. Through this transaction, we added four new states (Arkansas, Mississippi, South Carolina and Tennessee) to our MA business and strengthened our PDP segment with new products and membership in 13 states.

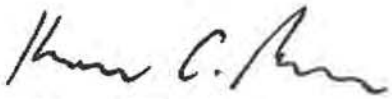
In 2014, as we looked ahead to 2015, we focused our MA bids for the 2015 plan year to balance membership with margin expansion. As part of this focus, we expect our MA membership to decline in 2015 compared with 2014, reflecting a reduction in MA membership in California due to significant benefit design changes and our exit from two counties as well as an exit from three states where we did not have meaningful scale. Overall, we anticipate that these changes will improve the financial performance of our Medicare Health Plans segment in 2015.

While our PDP segment underperformed in 2014, we believe our 2015 bid reflects a better balance between membership and margin improvement. Changes in the bid design include an increase in our basic plan premium and the introduction of deductibles. Also, in the second half of 2014, we began a major initiative to improve our pharmacy cost structure and provide greater value to our members and the federal government. As a result of this effort, in February 2015, we signed a contract with a leading pharmacy benefit management company that will be effective January 1, 2016.

As we look forward to the coming years, we believe there are significant opportunities to build on our strengths. We serve the populations that need managed care the most—the economically challenged and medically complex. Our associates are committed to our mission that includes enhancing our members' health and quality of life and partnering with providers and federal and state governments to provide quality, cost-effective health care solutions. We expect that the value proposition that WellCare has created over the past two decades will continue to be very attractive to our state and federal customers.

In closing, under our new executive leadership team, we developed a roadmap for improving our performance, and I am confident we are on the right path. The changes that we initiated last year position us for success in the years to come. We thank our associates for their hard work as we remain focused on delivering products and services that will enhance our members' health and quality of life. We look forward to continuing our long-standing relationships with our government and provider partners. We appreciate the continued support of our investors and look forward to future success.

Sincerely,



Kenneth A. Burdick
Chief Executive Officer

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§ 229.405) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. ☒

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer ☒	Accelerated filer ☐	Non-accelerated filer ☐ (Do not check if a smaller reporting company)	Smaller reporting company ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☒

The aggregate market value of Common Stock held by non-affiliates of the registrant (assuming solely for the purposes of this calculation that all directors and executive officers of the registrant are "affiliates") as of June 30, 2014 was approximately $3.3 billion (based on the closing sale price of the registrant's Common Stock on that date as reported on the New York Stock Exchange).

As of February 13, 2015, there were 43,950,595 outstanding shares of the registrant's Common Stock, par value $0.01 per share.

Documents Incorporated by Reference: Portions of the registrant's definitive Proxy Statement for the 2015 Annual Meeting of Stockholders are incorporated by reference into Part III of this Form 10-K.

References to the "Company," "WellCare," "we," "our," and "us" in this Annual Report on Form 10-K for the fiscal year ended December 31, 2014 (the "2014 Form 10-K") refer to WellCare Health Plans, Inc., together, in each case, with our subsidiaries and any predecessor entities unless the context suggests otherwise.

FORWARD-LOOKING STATEMENTS

Statements contained in this Form 10-K for the year ended December 31, 2014 ("2014 Form 10-K") which are not historical fact may be forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 and Section 21E of the Exchange Act, and we intend such statements to be covered by the safe harbor provisions for forward-looking statements contained therein. Such statements, which may address, among other things, our financial outlook, the timing of the launch of new programs, rate changes, market acceptance of our products and services, our ability to finance growth opportunities, our ability to respond to changes in laws and government regulations, implementation of our growth strategies, projected capital expenditures, liquidity and the availability of additional funding sources may be found in the sections of this 2014 Form 10-K entitled "*Business*," "*Risk Factors*," "*Management's Discussion and Analysis of Financial Condition and Results of Operations*" and elsewhere in this report generally. In some cases, you can identify forward-looking statements by terminology such as "may," "will," "should," "expects," "plans," "anticipates," "believes," "estimates," "targets," "predicts," "potential," "continues" or the negative of such terms or other comparable terminology. You are cautioned that forward-looking statements involve risks and uncertainties, including economic, regulatory, competitive and other factors that may affect our business. These forward-looking statements are inherently susceptible to uncertainty and changes in circumstances, as they are based on management's current expectations and beliefs about future events and circumstances. Given the risks and uncertainties inherent in forward-looking statements, any of WellCare's forward-looking statements could be incorrect and investors are cautioned not to place undue reliance on any of our forward-looking statements. Subsequent events and developments may cause actual results to differ, perhaps materially, from WellCare's forward-looking statements. We undertake no obligation beyond that required by law to update publicly any forward-looking statements for any reason, even if new information becomes available or other events occur in the future.

Our actual results may differ materially from those indicated by forward-looking statements as a result of various important factors including the expiration, cancellation, suspension or amendment of our state and federal contracts. In addition, our results of operations and estimates of future earnings depend, in large part, on accurately estimating and effectively managing health benefits and other operating expenses. A variety of factors, including competition, changes in health care practices, changes in the demographics of our members, higher than expected utilization of health care services by our members, changes in federal or state laws and regulations or their interpretations, inflation, provider contract changes, changes in or suspensions or terminations of our contracts with government agencies, new technologies, such as new, expensive hepatitis C medications, potential reductions in Medicaid and Medicare revenue, government-imposed surcharges, taxes or assessments, changes to how provider payments are made by governmental payors, the ability of state customers to launch new programs on their announced timeline, major epidemics, disasters and numerous other factors affecting the delivery and cost of health care, such as major health care providers' inability to maintain their operations and our ability to implement medical expense initiatives and our ability to control our medical costs and other operating expenses, including through our vendors, may affect our premium revenue, medical expenses, profitability, cash flows and liquidity. Governmental action or inaction could result in premium revenues not increasing to offset any increase in medical costs, the Affordable Care Act ("ACA") industry fee or other operating expenses. Once set, premiums are generally fixed for one-year periods and, accordingly, unanticipated costs during such periods generally cannot be recovered through higher premiums. Furthermore, if we are unable to estimate accurately incurred but not reported medical costs in the current period, our future profitability may be affected. Due to these factors and risks, we cannot provide any assurance regarding our future premium levels or our ability to control our future medical costs.

In addition, the risks and uncertainties include, but are not limited to, our progress on top priorities such as improving health care quality and access, ensuring a competitive cost position, delivering prudent, profitable growth, and achieving service excellence, our ability to effectively estimate and manage growth, our ability to address operational challenges relating to new business, our ability to effectively execute and integrate acquisitions, and the performance of our acquisitions once acquired. Due to these factors and risks, we may be required to write down or take further impairment charges of assets associated with acquisitions. Furthermore, at both the federal and state government levels, legislative and regulatory proposals have been made related to, or potentially affecting, the health care industry, including but not limited to limitations on managed care organizations, including changes to membership eligibility, benefit mandates, and reform of the Medicaid and Medicare programs. Any such legislative or regulatory action, including changes to membership eligibility, benefit mandates or reform of the Medicaid and Medicare programs, could have the effect of reducing the premiums paid to us by governmental programs, increasing our medical and administrative costs or requiring us to materially alter the manner in which we operate. We are unable to predict the specific content of any future legislation, action or regulation that may be enacted or when any such future legislation or regulation will be adopted. Therefore, we cannot predict accurately the effect or ramifications of such future legislation, action or regulation on our business. We also may be unable to comply with the terms of our Corporate Integrity Agreement, which could result in monetary penalties or exclusion from participating in federal health care programs.

PART I

Item 1. Business.

OVERVIEW

We are a leading managed care company for government-sponsored health care coverage with a focus on Medicaid and Medicare programs. Headquartered in Tampa, Florida, we offer a variety of managed care health plans for families, children, and the aged, blind and disabled, as well as prescription drug plans. As of December 31, 2014, we served approximately 4.1 million members in 49 states and the District of Columbia. We estimate that we are among the ten largest Medicaid providers of managed care services plans, and among the ten largest providers of Medicare Advantage ("MA") plans and prescription drug plans ("PDPs"), all as measured by membership. We believe that our broad range of experience and exclusive government focus allows us to effectively serve our members, partner with our providers and government clients, and efficiently manage our ongoing operations.

We were formed as a Delaware limited liability company in May 2002 and began our operations in Florida, New York and Connecticut. We completed the acquisition of these health plans through two concurrent transactions in July 2002. In July 2004, immediately prior to the closing of our initial public offering, we merged the limited liability company into a Delaware corporation and changed our name to WellCare Health Plans, Inc.

As of December 31, 2014, we operated Medicaid health plans in Florida, Georgia, Hawaii, Illinois, Kentucky, Missouri, New Jersey, New York and South Carolina. In addition, we offered MA coordinated care plans ("CCPs") in certain counties in Arizona, Arkansas, California, Connecticut, Florida, Georgia, Hawaii, Illinois, Kentucky, Louisiana, Mississippi, Missouri, New Jersey, New York, Ohio, South Carolina, Tennessee and Texas. We also offered stand-alone Medicare PDPs in 49 states and the District of Columbia. Effective January 1, 2014, as a result of our acquisition of Windsor Health Group, Inc. ("Windsor"), we began serving MA members in certain counties in Arkansas, Mississippi, South Carolina and Tennessee, as well as offering Medicare Supplement plans in 39 states. See further discussion below under "Acquisitions". Effective January 1, 2015, we no longer offer MA plans in the states of Arizona, Missouri and Ohio.

As of December 31, 2014, our Medicare plans are offered under the WellCare name, for which we hold a federal trademark registration, with the exception of our Hawaii CCP, California CCP, and Arizona CCP, which we offer under the names 'Ohana, Easy Choice and Desert Canyon Community Care, respectively. Additionally, through December 31, 2014, our Medicare plans in Arkansas, Mississippi, South Carolina and Tennessee attributable to the Windsor acquisitions were offered under the Windsor name, however, effective January 1, 2015, these plans were rebranded as WellCare MA plans. For our Medicaid plans, we offer a number of brand names depending on the state, consisting of the Staywell and HealthEase brand names in Florida, the 'Ohana brand name in Hawaii, the Harmony brand name in Illinois, the Missouri Care brand name in Missouri and the WellCare brand name in Georgia, Kentucky, New Jersey, New York and South Carolina.

We manage our business with three reportable segments: Medicaid Health Plans, Medicare Health Plans and Medicare PDPs. See **Our Product Segments** below for further discussion.

Membership Concentration

In the following table, we have summarized membership for our business segments in each state that exceeded 5% of our total membership, as well as all other states in the aggregate, as of December 31, 2014.

State	Medicaid Health Plans	Medicare Health Plans	Medicare PDPs	Total Membership	Percent of Total Membership
Florida	**722,000**	**104,000**	**62,000**	**888,000**	**21.6%**
Georgia	604,000	33,000	55,000	692,000	16.8%
Kentucky	**420,000**	**5,000**	**21,000**	**446,000**	**10.8%**
New York	116,000	52,000	59,000	227,000	5.5%
Illinois	**161,000**	**15,000**	**43,000**	**219,000**	**5.3%**
All other states (1)	287,000	208,000	1,152,000	1,647,000	40.0%
Total	2,310,000	417,000	1,392,000	4,119,000	100.0%

(1) Represents the aggregate of all states that individually have less than 5% of total membership.

Acquisitions

On January 1, 2014, we acquired all of the outstanding stock of Windsor from Munich Health North America, Inc., a part of Munich Re Group. Through its subsidiaries, Windsor serves Medicare beneficiaries with MA, PDP and Medicare Supplement products. As of December 31, 2014, Windsor offered MA plans in 192 counties in the states of Arkansas, Mississippi, South Carolina and Tennessee, through which it served 37,000 members. In addition, one of Windsor's subsidiaries offers Medicare Supplement insurance policies through which it served 43,000 members in 39 states as of December 31, 2014. Windsor also offers PDPs in 11 of the 34 Centers for Medicare & Medicaid Services ("CMS") regions, through which it served approximately 103,000 beneficiaries as of December 31, 2014. We included the results of Windsor's operations from the date of acquisition in our consolidated financial statements.

Effective July 1, 2014, our New Jersey subsidiary completed the acquisition of Medicaid assets from Healthfirst Health Plans of New Jersey, Inc., ("Healthfirst NJ"). The acquired assets primarily relate to approximately 42,000 Healthfirst NJ Medicaid members who were transferred to our Medicaid plan in New Jersey on July 1, 2014, as well as to certain provider agreements, which transferred to us. Prior to the acquisition, we began offering Medicaid managed care in Essex, Hudson, Middlesex, Passaic and Union counties in New Jersey effective January 1, 2014. As a result, effective July 1, 2014, we offered Medicaid managed care in 10 counties in New Jersey.

OUR VISION AND STRATEGY

We operate exclusively within government-sponsored health care programs, offering Medicare, Medicaid and Medicaid-related health plans that serve the full spectrum of eligibility groups, with a focus on lower-income beneficiaries. We are committed to operating our business in a manner that serves our key constituents – members, providers, government customers, and associates – while delivering competitive returns for our investors.

Vision

Our vision is to be the leader in government-sponsored health care programs in partnership with the members, providers, governments and communities we serve.

Mission

Our primary mission is to:

- Enhance our members' health and quality of life;
- Partner with providers and governments to provide cost-effective health care solutions; and
- Create a rewarding and enriching environment for our associates.

Our advantage is that we focus on serving Medicaid and Medicare members - we understand their special needs and challenges, and know the communities they live in well. We have developed a full complement of expertise in the three major areas of government-sponsored health care: Medicaid, Medicare and Medicare Prescription Drug Plans.

A key driver of our performance has been our three-product strategy: leveraging the complementary aspects of our meaningfully scaled positions in Medicaid, MA, and PDPs in order to generate better results from each program than we would were we serving only one program. We believe the strategy enhances our revenue growth because we have multiple product and program opportunities by which we can enter a new state or service area. Once established in a market, our ability to expand into other products is strengthened by the existence of our provider network, service infrastructure, and regulatory relationships. With respect to costs, offering multiple products within a service area better leverages our local investments and infrastructure, including our provider network, community support, regulatory relationships, and staffing. Providing a more comprehensive set of services not only reduces our costs associated with obtaining members, it also provides a better care experience for our members. Finally, the three-product strategy drives greater diversification of sources of revenue and earnings, and, consequently, a stronger and more stable capital position from which to serve our government customers, members, and business partners.

A natural extension of our three-product strategy is our focus on serving lower income individuals and those who are dually eligible for Medicaid and Medicare. Our provider network, community support relationships, service infrastructure, and other important elements of our business model all are targeted to serving Medicaid eligibles and Medicare eligibles who may be economically disadvantaged. This focus, combined with significant expected growth in these programs, offers us a sizable opportunity to meet the needs of a generally underserved market and further differentiates us from other managed care companies.

Aligned with our business strategy are four long-term business priorities:

- Improve health care quality and access;
- Optimize financial performance;
- Deliver prudent, profitable growth; and
- Achieve service excellence.

Improve health care quality and access

We are committed to continually improving the quality of care and service that we provide to our members, and to help them access the right care at the right time in the appropriate setting. We work closely with our provider partners and government customers to further enhance health care delivery and improve the quality of, and access to, health care services for our members. We are focused on preventive health, wellness and care management programs that help our government customers provide quality care within their fiscal constraints and offer us long-term opportunities for prudent, profitable growth. Our investments in quality have led to improvement in our results. Since 2010, we have achieved accreditation by the National Committee for Quality Assurance ("NCQA") for our health plans in Florida, Georgia, Hawaii, Kentucky, Missouri and South Carolina. Our goal is to achieve accreditation for all of our health plans. CMS recently announced 2015 MA and PDP quality ratings, also known as "Star Ratings", which reflected improvement for several of WellCare's plans. Based on Star Ratings recently reported by CMS, 95% of our December 31, 2014 MA membership will be served in a plan rated three stars or better on an overall basis for 2015.

Optimize financial performance

As both a government contractor and a publicly-held company, we have an obligation to be good stewards of our premiums, income and other financial resources. We strive to align our expense structure with our revenue base and continually assess opportunities to maintain appropriate medical benefit ratios, contain administrative costs, generate earnings that enable us to re-invest in our business, and provide an attractive rate-of-return to our shareholders. We also continue to invest in technology, regulatory compliance, and other infrastructure with the objective, among others, of improving efficiency and service quality. As a result of initiatives and investments, we have achieved meaningful improvement in our operating efficiency and leveraging of our fixed costs. During 2014, we increased our investment in infrastructure to drive efficiency. Our administrative expense ratio, excluding government investigation-related expenses, has decreased from 10.6% in 2010 to 7.7% in 2014, or 290 basis points. With respect to medical benefits expense, our initiatives are focused on reductions in unit costs as well as optimizing utilization of services and eliminating waste and abuse for medical and pharmacy services and products.

Deliver prudent, profitable growth

We pursue opportunities for prudent, profitable growth through an approach we define as "bid, build, and buy," deploying a combination of organic growth activities supplemented by acquisitions. Bidding includes Medicaid procurements of new and existing programs, as well as annual bids for PDPs and similar activities. Growth through "building" is focused on creation of the marketing, network, community support, and other capabilities required to expand organically into new service areas. Since 2012, acquiring businesses with important market and/or product positions has supplemented our organic growth. These bid, build, and buy initiatives have resulted in a 138% increase in our total premium revenues from $5.4 billion in 2010 to $12.9 billion in 2014.

Achieve service excellence

WellCare's "mission to serve" starts with our members, but it does not end there. We are committed to continually helping our members access the right care at the right time in the appropriate setting; partnering with providers to improve outcomes and quality; and serving our government customers via quality, cost-effective health care solutions. We seek to instill a culture of service in everything we do, both internally and externally.

From our headquarters in Tampa, we manage our shared services operations, which primarily handle high volume transactions that lend themselves to centralized management and provide scale efficiencies. These functions include customer service, claims processing, and utilization management, among other operations. Our shared services operations are complemented by our local market management. In each of the states in which we operate a sizable health plan, we have a market leader who manages customer-facing functions such as member outreach, provider and quality management, and state government relations. Through this model, we adapt our shared services platform to meet the specific needs of each market and customer that we serve. This approach enables us to provide access to high quality for our members and culturally sensitive health care services.

For a list of key developments and accomplishments relating to progress on our strategic business priorities that occurred or impacted our financial condition and results of operations during 2014, and in the 2015 period prior to issuance of this 2014 Form 10-K, please see Item 7 – Management's Discussion and Analysis of Financial Condition and Results of Operations, *Key Developments and Accomplishments*.

OUR BUSINESS - MEDICARE AND MEDICAID HEALTH PROGRAMS

Government-sponsored coverage is an important element of the United States' health care system. According to CMS, federal and state spending on Medicaid, Children's Health Insurance Programs ("CHIPs"), and Medicare is expected to have exceeded $1.0 trillion and aided over 125 million people in 2014. By 2024, CMS anticipates spending on these three programs to increase by 85%. Managed care solutions have a well-established track record of helping governments improve health care quality and access for beneficiaries while strengthening the fiscal sustainability of these programs. Given economic conditions, demographics, budget challenges, and the proven success of managed care programs, we believe state governments and the federal government will continue to turn to managed care solutions to help achieve program objectives.

A "managed care" plan is an integrated health care delivery system that manages health care services for an enrolled population rather than simply providing or paying for them. Services within managed care plans are usually delivered by providers who are under contract to, or employed by, the plan. Managed care plans use a variety of approaches to "manage" care, including care management, capitation, risk-sharing or incentive-based arrangements with providers, the use of primary care physicians to act as primary care gatekeepers and the use of preferred provider networks.

The Congressional Budget Office ("CBO") estimated that in 2014, approximately 61 million people were covered by the joint state and federally funded Medicaid program and approximately 54 million people were covered by the federally funded Medicare program. Of these, approximately 9 million people were dual-eligibles.

Medicare

The 1965 amendments to the Social Security Act created the Medicare program, which provides health care coverage primarily to individuals age 65 or older as well as to individuals with certain disabilities. The Medicare program consists of four parts, labeled A through D. Part A provides hospitalization benefits financed largely through Social Security taxes and requires beneficiaries to pay out-of-pocket deductibles and coinsurance. Part B provides benefits for medically necessary services and supplies including outpatient care, physician services, and home health care. Beneficiaries enrolled in Part B are required to pay monthly premiums and are subject to annual deductibles. Parts A and B are referred to as "Original Medicare."

Since the 1970s, Medicare beneficiaries have had the option to receive their Medicare benefits through private health plans, mainly HMOs, as an alternative to Original Medicare. This program is referred to as Medicare Part C. The Balanced Budget Act of 1997 named Medicare's managed care program "Medicare+Choice," and in 2003 under the Medicare Prescription Drug, Improvement and Modernization Act (the "MM Act"), the private health plan program was renamed Medicare Advantage. In geographic areas where a managed care organization has contracted with CMS pursuant to the MA program, Medicare beneficiaries may choose to receive benefits from an MA organization under Medicare Part C. Private plans provide benefits to enrollees that are at least comparable to those offered under Original Medicare and can include prescription drug coverage and supplemental benefits. Part C benefits are provided through HMOs, preferred provider organizations and private fee-for-service plans. MA plans may charge beneficiaries monthly premiums and other copayments for Medicare-covered services or for certain extra benefits.

The MM Act also established Medicare Prescription Drug Coverage, or Part D, in 2003. Effective January 1, 2006, stand-alone PDP plans could be offered to individuals eligible for benefits under Part A and/or enrolled in Part B. Plans can include varying degrees of out-of-pocket costs for premiums, deductibles and coinsurance. Depending on medical coverage type, a beneficiary has various options for accessing drug coverage. Beneficiaries enrolled in Original Medicare can either join a stand-alone PDP or forgo Part D drug coverage. Beneficiaries enrolled in Medicare Advantage Plans can join a plan with Part D coverage, select a stand-alone PDP or forgo Part D coverage. Beneficiaries who are dually-eligible for Medicare and Medicaid, and certain beneficiaries who qualify for the low-income subsidy ("LIS"), but do not enroll themselves in an MA plan with drug benefits or a PDP, are automatically assigned to a plan by CMS. These assignments are made among those PDPs that submitted bids below the applicable regional benchmarks for standard Part D plans.

Medicare Supplement policies were first introduced in 1971 as additional coverage for some of the cost sharing requirements of Original Medicare. The standardization of these Medicare Supplement plans began with the passing of the Social Security Disability Amendments of 1980, which set voluntary standards for the Supplement plans. The Omnibus Reconciliation Act of 1990 further standardized the plans by limiting them to standard benefit structures while adding several consumer protections such as guaranteed plan renewability and minimum loss ratios among others. To be enrolled in a Medicare Supplement plan, an individual must pay a monthly plan premium. Depending on the plan type selected, the Medicare Supplement plan pays all or a part of the cost sharing amount for health care services that the individual received while covered under Original Medicare. In 2012, Medicare Supplement plans covered approximately 10.2 million people.

According to CMS, Medicare expenditures have increased from $225 billion in 2000 to an estimated $586 billion in 2013 and are anticipated to further increase to $1 trillion in 2021. The number of Medicare beneficiaries is expected to grow from 53 million in 2014 to 61 million in 2019. In 2014, approximately 30% of Medicare beneficiaries, or 15.7 million people, were enrolled in an MA plan, and 23.3 million were enrolled in PDPs.

Medicaid

Medicaid was established by the 1965 amendments to the Social Security Act of 1935 as a joint federal-state program to provide medical assistance to low-income and disabled persons. It is state operated and implemented, although it is funded and regulated by both the state and federal governments. Within federal guidelines, each state may define its own package of covered medical services, resulting in considerable variation in the types of services covered and the amount of care provided across states. Many states offer a variety of public health insurance programs for low-income residents, including Temporary Assistance for Needy Families ("TANF"), Supplemental Security Income ("SSI"), Aged Blind and Disabled ("ABD") as well as other state-based programs that are not part of the Medicaid program, such as CHIP and Managed Long-Term Care ("MLTC") programs. TANF generally provides assistance to low-income families with children; ABD and SSI generally provide assistance to low-income aged, blind or disabled individuals. CHIP programs provide assistance to qualifying families who are not eligible for Medicaid because their income exceeds the applicable income thresholds. See further discussion below under "*Children's Health Insurance Program (CHIP)*". MLTC programs are designed to help people with chronic illnesses or who have disabilities and need health and long-term care services, such as home care or adult day care, to enable them to stay in their homes and communities as long as possible.

Macroeconomic conditions in recent years have, and are expected to continue to, put pressure on state budgets as the Medicaid eligible population increases, creating more need and competition for funding with other state priorities. As Medicaid consumes more and more of the states' limited dollars, states must either increase their tax revenues or reduce their total costs. Since states are limited in their ability to increase their tax revenues, states often look to reduce costs by reducing funds allotted for Medicaid or finding ways to control rising Medicaid costs, which may include reducing premium rates or imposing further restrictions on beneficiary eligibility. We believe that one of the most effective ways to control rising Medicaid costs is through managed care.

States have traditionally provided Medicaid benefits using a fee-for-service system. However, states are now more frequently implementing a managed care delivery system for Medicaid benefits. In a managed care delivery system, beneficiaries get most or all of their Medicaid services from a managed care plan or other type of organization under contract with the state. According to the Kaiser Family Foundation, only 12 states do not have some form of Medicaid managed care. With the passage of health care reform legislation (as discussed below), certain states have expanded coverage under the Medicaid program to an estimated 7 million additional beneficiaries in 2014, which will increase to 13 million additional beneficiaries in 2022, according to the CBO. Expansion of Medicaid is likely to increase the number of people enrolled in and the amount of spending for managed care. Accordingly, the opportunity for growth in managed care may be significant.

According to CMS, federal and state spending on Medicaid and CHIP has increased from $203 billion in 2000 to an estimated $521 billion in 2014, and is forecasted to grow to $730 billion in 2019. The population aided by these programs is anticipated to increase from 72 million in 2013 to 84 million in 2019.

Children's Health Insurance Program (CHIP)

We provide services under the CHIP program in eight states. In some states, like Hawaii, those beneficiaries are served as a part of the state's Medicaid program. These CHIP programs are referred to as expansion programs. In other states, including New York and Florida, the state's CHIP program is operated separately. The New York program is referred to as Child Health Plus, the Florida program is referred to as the Florida Healthy Kids program. The CHIP program was established in 1997 to serve low income, uninsured children. In some states, the program was extended to the parents of those children. As a result of the Patient Protection and Affordable Care Act, as amended by the Health Care and Education Reconciliation Act of 2010 (collectively, the "ACA"), parents previously covered under CHIP may now instead be covered through the state's Medicaid expansion or may be eligible for premium assistance and other subsidies through the state or federal exchange, as applicable. The ACA maintained the CHIP eligibility standards for children in place as of enactment through 2019 and extended CHIP funding until September 30, 2015.

Dual-eligibles

Individuals qualifying for both Medicare and Medicaid are referred to as "dual-eligibles". For dual-eligibles, if a service is covered by Medicare and Medicaid, Medicare is the primary payer. Medicaid pays for services above and beyond what Medicare covers, which is often referred to as wrap-around coverage. Medicaid may also cover some beneficiary cost-sharing associated with Medicare services beneficiaries require. For Medicaid benefits that are not covered by Medicare, such as certain

long-term care services, Medicaid covers the cost of these benefits unless there is another liable third-party payer. Medicaid is generally the payer of last resort. The Medicare and Medicaid services that dual-eligibles receive do not blend seamlessly with one another. The programs often have different eligibility requirements or scope of coverage for the same (or similar) services. Fragmentation can result in providers lacking information about the full range of services that their patients receive, which could compromise health care decision-making; beneficiary confusion; cost inefficiencies in Medicare and Medicaid; and poorer quality of care and health care outcomes for the beneficiary.

Improved care coordination is imperative to enhance care options for dual-eligibles as an aging population and increased life expectancy among Americans with disabilities increase the dual-eligible population. As such, dual-eligible programs have become an immediate target for both spending reductions and attempts to improve the quality of care beneficiaries receive. The ACA created a federal Medicare-Medicaid Coordination Office to serve dual eligibles. This Medicare-Medicaid Coordination Office has initiated a series of state Duals Demonstration Programs intended to provide better coordination and integration of care between Medicare and Medicaid on a capitated or fee for service basis, which is required to produce cost savings.

Nine states are implementing a capitated Duals Demonstration Program; one state is implementing a Duals Demonstration Program on a fee-for-service basis and one state is doing both. Of the states that have signed agreements with CMS to implement a capitated Duals Demonstration Program, we operate dual special needs plans ("D-SNPs") in six. We began participation in the Duals Demonstration Program in New York on January 1, 2015. Other states in which we operate, including Florida and Tennessee, are working toward greater integration of their Medicare and Medicaid programs outside of a demonstration program.

For those states in which we offer a D-SNP that have a Duals Demonstration Program in which we do not participate, the membership in our MA or PDPs could be reduced, depending on the program design, eligible populations and state implementation time frame.

Health Insurance Exchanges

Effective January 1, 2015, we began offering individual health plans in New York and Kentucky through state-based exchanges.

General Economic and Political Environment Impacting our Business

The U.S. health care economy currently comprises approximately 17% of the U.S. gross domestic product, according to CMS. We expect overall spending on health care in the U.S. to continue to rise due to inflation, evolving medical technology and pharmaceutical advancement, regulatory requirements, demographic trends in the U.S. population and national interest in health and well-being. The rate of market growth may be affected by a variety of factors, including macro-economic conditions and enacted health care reforms, which could also impact our results of operations.

We expect that the state and federal governments will continue to look for budgetary cost control savings through reductions in health care costs. We may also experience delays in premium payments from our state customers. The "maintenance of effort" requirements under the ACA generally prohibit states from restricting Medicaid eligibility or tightening enrollment procedures. These provisions were phased out for adults effective January 1, 2014 and will phase out for children in 2019.

Pursuant to the sequestration provisions of the Budget Control Act of 2011, approximately $1.2 trillion in domestic and defense spending reductions began in March 2013. Effective April 1, 2013, payments to MA and PDP plans were reduced by 2%. On December 26, 2013, President Obama signed into law the Bipartisan Budget Act of 2013, which provided that the 2% sequestration reduction to Medicare provider and plan payments continue in 2014 and extended the payments for two additional years through 2023. We have been able to partially offset this impact by a reduction in reimbursements to health care providers; however, our 2013 and 2014 results of operations were negatively impacted. The Bipartisan Budget Act of 2013 also funded Medicare, Medicaid and CHIP for fiscal year 2014.

On April 1, 2014, the President signed the Protecting Access to Medicare Act of 2014. This Act delayed until March 2015 the 24% reduction in Medicare payment rates that was supposed to take effect on April 1, 2014, as a result of the sustainable growth rate formula and replaced it with a 0.5% increase in payments through December 31, 2014. Unless further Congressional action is taken, the sustainable growth rate formula will reduce Medicare payment rates by 24% beginning April 1, 2015. The Act also delayed the implementation of the 10th revision of the International Statistical Classification of Diseases and Related Health Problems (ICD-10) prohibiting the Secretary of Health and Human Services from adopting the ICD-10 code sets prior to October 1, 2015. The ICD-10 code sets have required substantial investments from health care organizations, including us. We may experience complications related to supporting providers that are not fully compliant and if providers fail to provide appropriate codes for services as a result of the new coding set, we may not be adequately reimbursed for such services.

If the sustainable growth rate formula cuts are imposed, the cuts could have a significant impact on health care provider willingness to participate in Medicare programs. Congress is working towards a permanent fix to this issue, but has not yet appropriated funds for these payments for the remainder of 2015 and may fail to do so.

In addition, in 2015, the government will once again hit the debt ceiling, most likely in August. Action or inaction by Congress on the sustainable growth rate, the debt ceiling or budget issues could have a material adverse impact on our results of operations or cash flows.

Congress has proposed several plans to cut or restructure Medicare including raising the Medicare eligibility age, moving Medicare to a defined contribution model, and various modifications including cuts to provider reimbursement. Medicaid is similarly situated, consuming ever greater portions of the federal budget. As a result, several proposals have been suggested to modify the Medicaid program including moving from a match program to a block grant, moving to a per-capita capitation system, and limiting the use of provider taxes to fund the state's portion of the Medicaid program. We do not know whether any of these proposals will pass or the impact any ultimate reform will have on our business.

Health Care Reform

In March 2010, the ACA became law and significantly reformed various aspects of the U.S. health insurance industry. Financing for these reforms comes in part from substantial additional fees and taxes on us and other health insurers, health plans and individuals, as well as reductions in certain levels of payments to us and other health plans under Medicare. While regulations and interpretive guidance on some provisions of the ACA have been issued to date by the Department of Health and Human Services ("HHS"), the Department of Labor, the Treasury Department, and the National Association of Insurance Commissioners ("NAIC"), there are many significant provisions of the legislation that continue to be revised and modified by additional guidance and clarification in the form of regulations and interpretations. As a result, it is difficult to estimate the impact of this legislation on our overall business, which we expect to occur over the next several years.

The ACA included a number of changes that could impact the way MA plans operate, such as:

- ***Reduced Medicare Premium Rates.*** On April 7, 2014, CMS revised their proposed 2015 rates, which we estimate will result in a rate decrease in the low single digit percentage from our 2014 rates. In addition to the 2% sequestration cut, 2014 benchmark rates resulted in a decrease of between 2.0 to 4.0% and a further risk coding intensity reduction of 4.91% compared to 2013 rates.

- ***CMS Star Ratings.*** Certain provisions in the ACA tie MA premiums to the achievement of Star Ratings. Beginning in 2015, MA plans with an overall Star Rating of four or more stars will be eligible for a quality bonus in their basic premium rates. None of our plans are four stars, so we will not receive a quality bonus. Plans that receive quality bonuses may have a competitive advantage in the Medicare market, as they may be able to offer more attractive benefit packages to members and/or achieve higher profit margins. Also, beginning with open enrollment for the 2014 plan year, Part C or Part D Medicare plans with Star Ratings of less than three stars for three consecutive years have been excluded from mention in the CMS "Medicare and You" handbook, denoted as "low performing" plans on the CMS website, and excluded from on-line enrollment through the Medicare Plan Finder website. These actions may adversely impact these plans' ability to maintain or increase membership. CMS could exercise its authority and terminate the MA and PDP contracts for plans rated below three stars for three consecutive years for the plan year 2016. Our MA plans in Louisiana and our Windsor MA plans, representing approximately 47,000 members as of January 1, 2015, could be terminated effective December 31, 2015 if their Part C and Part D star ratings are not at least three stars for the plan year 2016. We serve a larger percentage of D-SNP members than our competitors, and this population is more challenging to serve. CMS's quality measurement methodology does not account for population differences between plans, and therefore, we may be unable to achieve a four star rating for some or all of our plans. While we are continuing efforts to improve our Star Ratings and other quality measures, there is no guarantee that we will be able to maintain or improve our Star Ratings.

- ***Minimum Medical Loss Ratio ("MLR").*** Beginning in 2014, the ACA requires the establishment of a minimum MLR for MA and Part D plans, requiring them to spend not less than 85% of premiums on medical and pharmacy benefits. The rules implementing the minimum MLR impose financial and other penalties for failing to achieve the minimum MLR, including requirements to refund to CMS shortfalls in amounts spent on medical benefits and termination of a plan's MA contract for prolonged failure to achieve the minimum MLR. The MLR prescribed by HHS differs from the MLR calculated under accounting principles generally accepted in the United States of America ("GAAP") and is determined by adding a plan's spending for clinical services, prescription drugs and other direct patient benefits, plus its total spending on quality improvement activities and dividing the total by earned premiums (after subtracting specific identified taxes and other fees). These provisions have not had a material impact to our results of operations in 2014.

Under the ACA, over a 10-year period beginning in 2010, the "coverage gap" (i.e., the dollar threshold at which an individual has to pay full price for his or her medications) under Part D has been gradually closing, with beneficiaries retaining a 25% co-pay in 2020. While this change will ultimately result in increased insurance coverage for beneficiaries, such improved benefits could result in changes in member behavior with respect to drug utilization. Such actions could impact the cost structure of our PDPs.

In April 2014, CMS also announced changes for PDPs relating to applicable beneficiary and plan dispensing/vaccine administration fees for drug claims that straddle the coverage gap for the 2015 plan year. In addition, CMS increased the Part D deductible, the initial coverage limit, and the out-of-pocket threshold for the catastrophic benefit. CMS also approved several extremely high cost drugs during 2014, and may do so in 2015 as well.

The health reforms in the ACA present both challenges and opportunities for Medicaid plans. The reforms allow states to expand the eligibility for Medicaid programs. However, state budgets continue to be strained due to economic conditions and uncertain levels of federal financing for current populations. As a result, the effects of any potential future expansions are uncertain, making it difficult to determine whether the net impact of the ACA will be positive or negative for Medicaid plans.

Additionally, the ACA imposed certain new taxes and fees, including limitations on the amount of compensation that is tax deductible, as well as an annual premium-based health insurance industry assessment (the "ACA industry fee") on health insurers which began in 2014. The total ACA industry fee levied on the health insurance industry was $8 billion in 2014 and will be $11.3 billion in 2015, with increasing annual amounts thereafter, growing to $14.3 billion by 2018. After 2018, the industry fee increases according to an index based on net premium growth. The assessment is being levied on certain health insurers that provide insurance in the assessment year, and is allocated to health insurers based on each health insurer's share of net premiums for all U.S. health insurers in the year preceding the assessment. The ACA industry fee is not deductible for income tax purposes, which has significantly increased our effective income tax rate. We incurred $137.7 million of such fees in 2014 and currently estimate that we will incur between $230 and $235 million in such fees in 2015, due to the increase in the total fee to be levied on the industry and the expected increase in our share of total 2014 industry premiums. However, the 2015 final fee amount will not be determined until August 2015. We have received amendments, written agreements or other documentation from all our Medicaid state customers, that commit them to reimburse us for the portion of the ACA industry fee on our Medicaid plans, including its non-deductibility for income tax purposes for 2014. Consequently, we recognized $124.6 million of reimbursement for the ACA industry fee as premium revenue for the year ended December 31, 2014. We have also obtained similar commitments from our Medicaid customers for 2015. CMS does not directly reimburse us for the impact of the ACA industry fee related to MA and PDP premiums.

On June 28, 2012, the U.S. Supreme Court upheld the constitutionality of the provisions in the ACA requiring most Americans meeting certain income qualifications to purchase health insurance meeting certain standards or to pay a financial penalty ("the individual mandate"). The Supreme Court made the expansion of the states' Medicaid programs to individuals with incomes up to 133% of the federal poverty line optional for states.

We currently serve the Medicaid expansion population in Hawaii, Illinois, Kentucky, New Jersey and New York. Our other Medicaid states, Florida, Georgia, Missouri and South Carolina, have not expanded their Medicaid eligibility. If other states ultimately implement the Medicaid expansion, and depending on the mechanism by which they choose to implement the expansion, our membership could increase or decrease. At this time, we are unable to predict the ultimate impact to our Medicaid membership.

In 2014, we did not participate in the health insurance exchange products, however, for 2015, we are participating in Kentucky's and New York's state exchanges. Individuals who select an exchange product other than ours or where we do not offer one, and subsequently become eligible for a Medicaid plan that we offer, may be less likely to select or be assigned to us.

Interpretive guidance continues to be issued on several significant provisions of the ACA. Given the breadth of possible changes and the uncertainties of interpretation, implementation and timing of these changes, which we expect to occur over the next several years, the ACA could change the way we do business, potentially impacting our pricing, benefit design, product mix, geographic mix, and distribution channels. The response of other companies to the ACA and adjustments to their offerings, if any, could have a meaningful impact on the health care markets. Further, various health insurance reform proposals are also emerging at the state level. It is reasonably possible that these changes, as well as future legislative changes, in the aggregate, may have a material adverse effect on our results of operations, financial position, and cash flows by restricting revenue, enrollment and premium growth in certain products and market segments; restricting our ability to expand into new markets; increasing our medical and administrative costs; lowering our Medicare payment rates and/or increasing our expenses associated with the non-deductible federal premium-based assessment and other assessments.

OUR PRODUCT SEGMENTS

Our operations are conducted in three business segments: Medicaid Health Plans, Medicare Health Plans and Medicare PDPs, which correspond with the Medicaid and Medicare products that we offer. Prior to the Windsor acquisition on January 1, 2014, we identified three operating segments for our company: Medicaid, MA and PDP. In conjunction with the Windsor acquisition, we began offering Medicare Supplement products and we reassessed our segment reporting practices and made revisions to reflect our current method of managing performance and determining resource allocation, which includes reviewing the results of Medicare Supplement and MA operations acquired as part of the Windsor acquisition together with our legacy MA plans. Accordingly, we include results for Medicare Supplement operations together with MA and renamed the segment as Medicare Health Plans. Similarly, we include the PDP operations acquired as part of the Windsor acquisition together with WellCare's PDPs and renamed the segment as Medicare PDPs. In addition, we renamed the Medicaid segment Medicaid Health Plans; however, there were no changes to the composition of this segment.

Membership by segment, and as a percentage of consolidated totals, is as follows.

	For the Years Ended December 31,					
	2014		2013		2012	
Segment	Membership	Percentage of Total	Membership	Percentage of Total	Membership	Percentage of Total
Medicaid Health Plans	**2,310,000**	**56.1%**	**1,759,000**	**61.8%**	**1,587,000**	**59.5%**
Medicare Health Plans	417,000	10.1%	290,000	10.2%	213,000	8.0%
Medicare PDPs	**1,392,000**	**33.8%**	**797,000**	**28.0%**	**869,000**	**32.5%**
Total	4,119,000	100.0%	2,846,000	100.0%	2,669,000	100.0%

Premium revenue by segment, and as a percentage of consolidated totals, is as follows.

	For the Years Ended December 31,					
	2014		2013		2012	
Segment	Premium Revenue (In Millions)	Percentage of Total	Premium Revenue (In Millions)	Percentage of Total	Premium Revenue (In Millions)	Percentage of Total
Medicaid Health Plans	**$ 7,773.9**	**60.2%**	**$ 5,661.2**	**59.5%**	**$ 4,471.2**	**60.4%**
Medicare Health Plans	3,963.2	30.7%	3,071.0	32.3%	1,936.4	26.2%
Medicare PDPs	**1,178.4**	**9.1%**	**776.9**	**8.2%**	**992.6**	**13.4%**
Total	$ 12,915.5	100.0%	$ 9,509.1	100.0%	$ 7,400.2	100.0%

Medicaid Health Plans

Our Medicaid segment includes plans for beneficiaries of TANF, SSI, ABD, MLTC programs and other state-based programs that are not part of the Medicaid program, such as CHIP. For purposes of our Medicaid segment, we define our customer as the state and related governmental agencies that have common control over the contracts under which we operate in that particular state. As of January 1, 2015, we are the largest Medicaid health plan by membership in Florida, Georgia and Kentucky.

In February 2014, we executed a contract with the Florida Agency for Health Care Administration ("AHCA") to provide managed care services to Medicaid recipients in eight of the state's 11 regions as part of the state's Managed Medical Assistance ("MMA") program. These regions include the Jacksonville, Miami, Orlando, Tallahassee and Tampa metropolitan areas. The program commenced on May 1, 2014, with the implementation of three regions. Three additional regions were implemented in June, one in July and one in August. We served over 650,000 members in these regions as of December 31, 2014, compared to 394,000 members that we served in December 2013 under the prior Florida Medicaid program.

Additionally, effective January 1, 2014, we began offering Medicaid managed care in Essex, Hudson, Middlesex, Passaic and Union counties in New Jersey. In addition, effective July 1, 2014, our New Jersey subsidiary completed the acquisition of Medicaid assets from Healthfirst Health Plan of New Jersey, Inc. ("Healthfirst NJ"), which primarily relate to approximately 42,000 Healthfirst Medicaid members who were transferred to our Medicaid plan in New Jersey, as well as certain provider agreements. As a result, effective July 1, 2014, we offer Medicaid managed care in 10 counties in New Jersey.

The Medicaid programs and services we offer to our members vary by state and county and are designed to effectively serve our constituencies in the communities in which we operate. Although our Medicaid contracts determine to a large extent the type and scope of health care services that we arrange for our members, in certain markets we customize our benefits in ways that we believe make our products more attractive. Our Medicaid plans provide our members with access to a broad spectrum of medical benefits from primary care and preventive programs to full hospitalization and long-term care.

In general, members are required to use our network to receive care, except in cases of emergencies, transition of care or when network providers are unavailable to meet their medical needs. In addition, members generally must receive referrals from their primary care providers ("PCPs") in order to receive health care from a specialist, such as an orthopedic surgeon or neurologist. Members do not pay any premiums, deductibles or co-payments for most of our Medicaid plans.

Medicaid Health Plans Membership

The following table summarizes our Medicaid Health Plans segment membership by the programs we offer.

	As of December 31,		
	2014	2013	2012
Medicaid Health Plans			
TANF	1,863,000	1,317,000	1,212,000
CHIP	178,000	212,000	207,000
SSI, ABD and duals	263,000	206,000	146,000
Other programs	6,000	24,000	22,000
Total	2,310,000	1,759,000	1,587,000

We received over 10% of our consolidated premium revenue in 2014, 2013 and 2012, individually, from the states of Florida, Georgia and Kentucky. The membership for those states is summarized in the following table.

	As of December 31,		
	2014	2013	2012
Medicaid Health Plans			
Florida	722,000	486,000	454,000
Georgia	604,000	540,000	570,000
Kentucky	420,000	292,000	207,000
All other states[1]	564,000	441,000	356,000
Total	2,310,000	1,759,000	1,587,000

(1) "All other states" consists of Hawaii, Illinois, and New York during all years presented. In 2012, it also includes Ohio; in 2013, it also includes Missouri and South Carolina; and in 2014, it also includes Missouri, New Jersey and South Carolina. Effective as of June 30, 2012, our Missouri contract expired and was not renewed. We re-entered Missouri Medicaid in March 2013 when we acquired Missouri Care. We were not awarded a Medicaid contract in Ohio for the 2013 fiscal year; however, the state of Ohio contracted with us to provide services to Ohio Medicaid beneficiaries through a transition period, which ended June 30, 2013.

Medicaid Health Plans Segment Revenues

Our Medicaid Health Plans segment generates revenues primarily from premiums received from the states in which we operate health plans. We receive a fixed premium per member per month ("PMPM") pursuant to our state contracts. Our Medicaid contracts with state governments are generally multi-year contracts subject to annual renewal provisions. We generally receive premium payments during the month in which we provide services, although from time to time, we have experienced delays in receiving payments from certain states. In some instances, our base premiums are subject to risk score adjustments based on our members' acuity. Generally, the risk score is determined by the state by analyzing encounter submissions of processed claims data to determine the acuity of our membership relative to the entire state's Medicaid membership. In Georgia, Illinois, Kentucky, Missouri, New York and South Carolina we are eligible to receive supplemental payments for obstetric deliveries and newborns. We also received such supplemental payments in Ohio until June 30, 2013. Each contract is specific as to how and when these supplemental payments are earned and paid. Upon delivery of a newborn, the state agency is notified according to the contract terms. Revenues are recorded based on membership and eligibility data provided by the states, which may be adjusted by the states for any subsequent updates to this data.

The following table sets forth information relating to premium revenues, net of premium taxes, from the states of Florida, Georgia and Kentucky, as well as all other states on an aggregate basis.

	For the Years Ended December 31,					
	2014		2013		2012	
State	Revenue (In Millions)	Percentage of Total Segment Revenue	Revenue (In Millions)	Percentage of Total Segment Revenue	Revenue (In Millions)	Percentage of Total Segment Revenue
Georgia	$ 1,624.3	20.9%	$ 1,513.5	26.7%	$ 1,460.8	32.7%
Florida	1,744.2	22.4%	1,109.3	19.6%	970.9	21.7%
Kentucky	2,287.3	29.4%	1,318.3	23.3%	723.7	16.2%
All other states[1]	2,041.6	26.3%	1,644.4	29.0%	1,233.6	27.6%
Premium taxes	76.5	1.0%	75.7	1.3%	$ 82.2	1.8%
Total	$ 7,773.9	100.0%	$ 5,661.2	100.0%	$ 4,471.2	100.0%

(1) "All other states" consists of Hawaii, Illinois, and New York during all years presented. In 2012, it also includes Ohio; in 2013, it also includes Missouri and South Carolina; and in 2014, it also includes Missouri, New Jersey and South Carolina. Effective as of June 30, 2012, our Missouri contract expired and was not renewed. We re-entered Missouri Medicaid in March 2013 when we acquired Missouri Care. We were not awarded a Medicaid contract in Ohio for the 2013 fiscal year; however, the state of Ohio contracted with us to provide services to Ohio Medicaid beneficiaries through a transition period, which ended June 30, 2013.

Certain of our Medicaid contracts require us to expend a minimum percentage of premiums on eligible medical benefits expense. To the extent that we expend less than the minimum percentage of the premiums on eligible medical benefits, we are required to refund to the state all or some portion of the difference between the minimum and our actual allowable medical benefits expense. We estimate the amounts due to the state agencies as a return of premium based on the terms of our contracts with the applicable state agency.

As discussed under Our Business-Medicare and Medicaid Health Programs, *Health Reform,* we have received amendments, written agreements or other documentation from all our Medicaid state customers, that commit them to reimburse us for the portion of the ACA industry fee on our Medicaid plans, including its non-deductibility for income tax purposes for 2014, as well as for 2015. Consequently, we recognized $124.6 million of reimbursement for the ACA industry fee as premium revenue for the year ended December 31, 2014.

Certain contracts expired in 2014, however, we are still serving members as if these contracts were still effective and expect the contracts to be renewed. Our other current Medicaid state contracts are set to expire or renew between June 2015 and June 2019. The following table sets forth the terms and expiration dates of our material Medicaid contracts with the states of Florida, Georgia and Kentucky, the three states that each accounted for greater than 10% of our consolidated premium revenues during 2014, 2013, and 2012.

State	Line of Business	Term of Contract	Expiration Date of Current Term
Florida	Medicaid (Staywell)	3-year term[1]	January 31, 2015
Florida	Medicaid (HealthEase)	3-year term[1]	January 31, 2015
Florida	Medicaid (MMA)	February 4, 2014 - December 31, 2018 [1]	December 31, 2018
Georgia	Medicaid and CHIP	1 potential one-year renewal [2]	June 30, 2015
Kentucky	Medicaid	3-year term with 4 potential one-year renewals [3]	June 30, 2015

(1) In 2014, AHCA awarded contracts for Medicaid managed care across the state. Our 2012-2015 Florida Medicaid contracts were terminated early in connection with the implementation of the new program. Our Staywell health plan participates in eight out of the state's 11 regions in the new program, which was fully implemented as of August 2014.

(2) Our Georgia contract commenced in July 2005. There is one remaining one-year option term, exercisable by the Georgia Department of Community Health ("Georgia DCH"), which would extend the total term until June 30, 2016. On February 9, 2015, the Georgia Department of Community Health issued a request for proposals for its Medicaid program, under which services would commence on July 1, 2016. We are currently preparing our response. A total of nine companies, including us, have been deemed qualified to bid.

(3) Our original Kentucky contract, not including Region 3, commenced in July 2011 and we began offering services to members on November 1, 2011. The contract has an initial three-year term and provides for four additional one-year option terms, exercisable upon mutual agreement of the parties, which potentially extends the total term until July 2018. The parties have exercised the first option term. In October 2012, we were awarded a contract by the Commonwealth of Kentucky to coordinate physical, behavioral and dental care for a total of approximately 170,000 Medicaid eligible beneficiaries in Medicaid Managed Care Region 3, which consists of 16 counties. We began serving Medicaid beneficiaries in Region 3 effective January 1, 2013.

Medicare Health Plans

Our Medicare Health Plans reportable segment includes the combined operations of both the MA and Medicare Supplement operating segments. We contract with CMS under the Medicare program to provide a comprehensive array of Part C and Part D benefits to Medicare eligible persons. These benefits are provided through our MA plans, which are comprised of CCPs. CCPs are administered through HMOs and generally require members to seek health care services and select a PCP from a network of health care providers. In addition, we offer Medicare Part D coverage, which provides prescription drug benefits, as a component of our MA plans.

As of December 31, 2014, we offered MA plans in a total of 402 counties across 18 states. In 2014, we served Medicare eligibles in 210 counties under the "WellCare" name, up from 204 counties in 2013. This included the addition of eight new counties in the states of Arizona, California and Kentucky, and the departure from one county in New Jersey and one county in Texas. As discussed above under "*Acquisitions*", we acquired Windsor in January 2014 and we served Medicare eligibles in 192 counties under the "Windsor" name in the states of Arkansas, Mississippi, South Carolina and Tennessee. Effective January 1, 2015 these plans were rebranded as WellCare MA plans.

In the 2015 plan year, we are offering MA plans in 376 counties in 15 states. We no longer offer MA plans in the states of Arizona, Missouri and Ohio, which represented 23 counties and approximately 8,000 members as of December 31, 2014. In addition, we departed from one county in Illinois and two counties in California in 2015.

We offer D-SNPs in 98% of the MA counties that we serve, and approximately 39% of our MA members are "dual-eligible" for Medicare and Medicaid and are enrolled in one of our D-SNPs. We cover a wide spectrum of medical services through our MA plans. For many of our plans, we provide additional benefits not covered by Original Medicare, such as vision, dental and hearing services. Through these enhanced benefits, out-of-pocket expenses incurred by our members are generally reduced, which allows our members to better manage their health care costs. We believe that our D-SNPs are attractive to these beneficiaries due to the enhanced benefit offerings and clinical support programs.

Some of our MA plans require members to pay a co-payment, which varies depending on the services and level of benefits provided. Typically, members of our MA CCPs are required to use our network of providers, except in specific cases such as emergencies, transition of care or when specialty providers are unavailable in our network to meet their medical needs. MA CCP members may see out-of-network specialists if they receive referrals from their PCPs and may pay incremental cost-sharing.

In October 2014, our Medicare plans in Florida and California received 3.5 overall Star Ratings and our plans in Connecticut, Georgia, Hawaii, Illinois, New Jersey, New York and Texas achieved 3.0 overall Star Ratings, while our plans in Arizona, Louisiana and Missouri and our Windsor plans received at least one Star Rating of 2.5 for at least the third consecutive year. Our Medicare plans in Kentucky, New Jersey, and Ohio received at least one Star Rating of 2.5 for the first year.

On April 7, 2014, CMS revised their proposed 2015 rates, which we estimate will result in a rate decrease in the low single digit percentage compared with our 2014 rates.

In 2015, we will focus on three main areas in MA, including continuing execution on medical expense and quality initiatives led by our clinical services group, continuing to take a more disciplined portfolio approach to our MA bids for 2016, including a focus on net income, and continuing our efforts to improve on Star ratings, both in terms of execution on quality initiatives and our advocacy position to properly match the ratings, rules and economics with the prevalent data that demonstrates the causal connection between socio-economic status and lower quality ratings.

Medicare Health Plans Membership

As of December 31, 2014, 2013 and 2012, our Medicare Health Plans segment had approximately 417,000, 290,000 and 213,000 members, respectively. Membership at December 31, 2014 includes 37,000 and 43,000 MA and Medicare Supplement members, respectively, resulting from the Windsor acquisition, which closed on January 1, 2014.

Membership as of January 1, 2015, was 380,000, a 9% decrease from 417,000 as of December 31, 2014. The approximate decrease of 37,000 members was driven by actions taken in conjunction with our 2015 bid and county withdrawals in California designed to improve the performance of Easy Choice, which resulted in a 28,000 member decrease in California, as well as the Company's exit from the Missouri, Ohio, and Arizona markets representing 8,000 members as of December 31, 2014.

Medicare Health Plans Segment Revenues

The amount of premiums we receive for each MA member is established by contract, although the rates vary according to a combination of factors, including upper payment limits established by CMS, the member's geographic location, age, gender, medical history or condition, or the services rendered to the member. MA premiums are due monthly and are recognized as revenue during the period in which we are obligated to provide services to members. We record adjustments to revenues based on member retroactivity. These adjustments reflect changes in the number and eligibility status of enrollees subsequent to when revenue was billed. We estimate the amount of outstanding retroactivity adjustments each period and adjust premium revenue accordingly. The estimates of retroactivity adjustments are based on historical trends, premiums billed, the volume of member and contract renewal activity and other information. Changes in member retroactivity adjustment estimates have not had a material impact on premiums recorded during the periods presented.

Medicare Health Plans premium revenue for the year ended December 31, 2014, 2013 and 2012 was approximately $4.0 billion, $3.1 billion and $1.9 billion, respectively. We currently offer MA plans under separate contracts with CMS for each of the states in which we offer such plans, with the exception of the states in which we offer MA plans as a result of the Windsor acquisition. These states (Arkansas, Mississippi, South Carolina and Tennessee) are served under a single contract. Our MA contracts with CMS all have one year terms that expire at the end of each calendar year and are renewable for successive one-year terms unless CMS does not authorize a renewal or we notify CMS of our decision not to renew. Our current MA contracts expire on December 31, 2015.

Medicare Risk-Adjusted Premiums

CMS provides risk-adjusted payments for MA Plans and PDPs based on the demographics and health severity of enrollees. The risk-adjusted premiums we receive are based on claims and encounter data that we submit to CMS within prescribed deadlines. We develop our estimates for risk-adjusted premiums utilizing historical experience, or other data, and predictive models as sufficient member risk score data becomes available over the course of each CMS plan year. We recognize periodic changes to risk-adjusted premiums as revenue when the amounts are determinable and collection is reasonably assured, which are possible as additional diagnosis code information is reported to CMS, when the ultimate adjustment settlements are received from CMS, or we receive notification of such settlement amounts. CMS adjusts premiums on two separate occasions on a retrospective basis. The first retrospective adjustment for a given plan year generally occurs during the third quarter of that year. This initial settlement represents the update of risk scores for the current plan year based on the severity of claims incurred in the prior plan year. CMS then issues a final retrospective risk adjusted premium settlement for that plan year in the following year.

The data provided to CMS to determine the risk score is subject to audit by CMS even after the annual settlements occur. Our Florida and Arizona MA plans have been selected by CMS for audits of the 2011 contract year and we anticipate that CMS will conduct audits of other contracts and contract years on an on-going basis. An audit may result in the refund of premiums to CMS. While our experience to date has not resulted in a material refund, future refunds could be significant, which would reduce our premium revenue in the year that CMS determines repayment is required.

Medicare PDPs

We have contracted with CMS to serve as a plan sponsor offering stand-alone Medicare Part D PDP plans to Medicare-eligible beneficiaries through our Medicare PDPs segment. We offer PDP plans in 49 states and the District of Columbia and are focused on value-conscious beneficiaries. Our PDP plans offer national in-network prescription drug coverage with approximately 71,000 pharmacies, including a preferred pharmacy network, subject to limitations in certain circumstances.

The PDP benefit design generally results in our incurring a greater portion of the responsibility for total prescription drug costs in the early stages of a plan year, and less in the latter stages of a plan year, due to the members' share of cumulative out-of-pocket costs increasing throughout the plan year. As a result, the PDP medical benefits ratio ("MBR") generally decreases throughout the year.

As discussed earlier in *Acquisitions*, in January 2014 we acquired Windsor, which offered PDP plans in 11 of the 34 CMS regions to approximately 103,000 beneficiaries as of December 31, 2014.

Our PDP contracts with CMS are renewable for successive one-year terms unless CMS notifies us of its decision not to renew by May 1 of the current contract year, or we notify CMS of our decision not to renew by the first Monday in June of the contract year.

Medicare PDPs Membership

As of December 31, 2014, 2013 and 2012, we served approximately 1,392,000, 797,000 and 869,000 PDP members, respectively. Membership as of December 31, 2014 increased by 595,000 compared to December 31, 2013, primarily as a result of our 2014 PDP bids, as well as the inclusion of membership from the Windsor acquisition. For 2014, our basic plan was below the benchmarks in 30 regions, of the 33 regions bid, and within the de minimis range in two other regions.

Due to changes in our bid design based on our 2014 experience, our 2015 PDP bids resulted in one of our basic plans being below the benchmarks in 13 of the 33 CMS regions for which we submitted bids, and within the de minimis range in nine other regions. We estimate that membership declined by approximately 21% to 1.1 million members as of January 1, 2015, as members who were auto assigned to us in 2014 and prior years in regions where our 2015 bids are not below the benchmark or within the de minimis range have been assigned to other plans. However, the outcome of our 2015 bids is expected to have a favorable impact on the 2015 segment results compared to 2014.

In 2015, we are retaining our auto-assigned members in the nine regions in which we bid within the de minimis range; however, we are not being auto-assigned new members in those regions. As of January 1, 2015, approximately 69% of our membership is comprised of beneficiaries that actively chose us for their current plan. We expect membership for the remainder of 2015 to be relatively stable, as we focus on marketing our PDP products to those who actively choose us to offset normal attrition.

Medicare PDPs Segment Revenues

Annually, we provide written bids to CMS for our PDPs, which reflect the estimated costs of providing prescription drug benefits over the plan year. Substantially all of the premium for this insurance is paid by the federal government, and the balance is due from the enrolled beneficiaries and, in some cases, state pharmacy assistance programs. The premium and subsidy components under Part D are described below.

Member Premium—We receive a monthly premium from members based on the plan year bid we submitted to CMS. The member premium, which is fixed for the entire plan year, is recognized over the contract period and reported as premium revenue.

CMS Direct Premium Subsidy—Represents monthly premiums from CMS based on the plan year bid submitted by us as a plan sponsor. The monthly payment is a risk-adjusted amount per member and is based upon the member's health status as determined by CMS. Refer to the "*Medicare Risk-Adjusted Premiums*" section under the "*Medicare Advantage (MA)*" segment discussion above for a more detailed description of risk-adjusted premiums.

Low-Income Premium Subsidy—For qualifying low-income subsidy ("LIS") members, CMS pays for some or all of the LIS member's monthly premium. The CMS payment is dependent upon the member's income level, which is determined by the Social Security Administration.

Low-Income Cost Sharing Subsidy ("LICS")—For qualifying LIS members, CMS reimburses us for all or a portion of the LIS member's deductible, coinsurance and co-payment amounts above the out-of-pocket threshold. LICS subsidies are paid by CMS prospectively as a fixed PMPM amount, as determined based upon the plan year bids submitted by us as a plan sponsor to CMS. Approximately nine to ten months subsequent to the end of the plan year, a settlement payment is made between CMS and our plans based on actual claims experience.

Catastrophic Reinsurance Subsidy—CMS reimburses plans for 80% of the drug costs after a member reaches his or her out-of-pocket catastrophic threshold through a catastrophic reinsurance subsidy. Catastrophic reinsurance subsidies are paid by CMS prospectively as a fixed PMPM amount, and are determined based upon the plan year bids submitted by us as a plan sponsor to CMS. Approximately nine to ten months subsequent to the end of the plan year, a settlement payment is made between CMS and our plans based on actual claims experience.

Coverage Gap Discount Subsidy—CMS provides monthly prospective payments for pharmaceutical manufacturer discounts made available to members. The prospective discount payments are determined based upon the plan year bid submitted by plan sponsors to CMS and current plan enrollment. Following the plan year, CMS performs an annual reconciliation of the prospective discount payments received by our plan to the amount of actual manufacturer discounts made available to each plan's enrollees under the program.

Catastrophic reinsurance subsidies and the low-income member cost sharing subsidies represent cost reimbursements under the Medicare Part D program. We are fully reimbursed by CMS for costs incurred for these contract elements and, accordingly, there is no insurance risk to us. Therefore, amounts received for these subsidies are not considered premium revenue, and are reported, net of the subsidy benefits paid, as Funds receivable/held for the benefit of members in the consolidated balance sheets. The receipts and payments between us and CMS are presented on a net basis as financing activity in our consolidated statements of cash flows since we are essentially administering and paying the benefit subsidies on behalf of CMS. Historically, the settlement payments between us and CMS have not been materially different from our recorded estimates. However, the balance of funds receivable from CMS grew substantially in 2014 due to increased drug costs relative to our bid estimates.

Coverage gap discount subsidies ("CGD") advance payments are recorded as funds receivable/held for the benefit of members in the consolidated balance sheets. Receivables are set up for manufacturer-invoiced amounts. Manufacturer payments reduce the receivable as payments are received. After the end of the contract year, during the Medicare Part D Payment reconciliation process for the CGD, CMS will perform a cost-based reconciliation to ensure the Medicare Part D sponsor is paid for gap discounts advanced at the point of sale, based on accepted claims data.

CMS Risk Corridor—Premiums from CMS are subject to risk sharing through the Medicare Part D risk corridor provisions. The CMS risk corridor calculation compares the target amount of prescription drug costs (limited to costs under the standard coverage as defined by CMS) less rebates in the plan year bid to actual experience. Variances of more than 5% above the target amount will result in CMS making additional payments to plan sponsors and variances of more than 5% below the target amount will require plan sponsors to refund to CMS a portion of the premiums received. Historically, we have not experienced material adjustments related to the CMS settlement of the prior plan year risk corridor estimate.

PDP premium revenue for the year ended December 31, 2014, 2013 and 2012 was approximately $1.2 billion, $776.9 million and $992.6 million, respectively.

OUR OPERATIONS

Provider Networks and Provider Reimbursement Methods

As of December 31, 2014, we contracted with approximately 224,000 health care providers and 71,000 pharmacies to provide our members with access to medically-necessary services. Our contracted providers deliver a variety of services to our members including: primary and specialty physician care; laboratory and imaging services; inpatient, outpatient, home health and skilled facility care; medication and injectable drug therapy; ancillary services; durable medical equipment and related services; mental health and chemical dependency counseling and treatment; transportation; and dental, hearing and vision care.

The following are the types of providers in our Medicaid and MA CCP contracted networks:

- *Professionals* such as PCPs, provider groups, specialty care physicians, psychologists and licensed social workers;
- *Facilities* such as hospitals with inpatient, outpatient and emergency services, skilled nursing facilities, outpatient surgical facilities and diagnostic imaging centers;
- *Ancillary providers* such as laboratory providers, radiology, home health, physical therapy, speech therapy, occupational therapy, ambulance providers and transportation providers; and
- *Pharmacies,* including retail pharmacies, mail order pharmacies and specialty pharmacies.

These providers are contracted through a variety of mechanisms, including agreements with individual providers, groups of providers, independent provider associations, integrated delivery systems and local and national provider chains such as hospitals, surgical centers and ancillary providers. We also contract with other companies who provide access to contracted providers, such as pharmacy, dental, hearing, vision, transportation and mental health benefit managers.

Facility, pharmacy, dental, vision and behavioral health contracts cover medically-necessary services and, under some of our plans, enhanced benefits. These contracts typically have terms of one to four years with some of the agreements automatically renewing at the end of the contract period, unless otherwise specified in writing by either party. During the contract period, these agreements typically can be terminated without cause upon written notice by either party, but the notification period may range from 90 to 180 days and early termination may subject the terminating party to financial penalties.

The contract terms require providers to participate in our quality improvement and utilization review programs, which we may modify from time to time. Providers must also adhere to applicable state and federal regulations.

We periodically review the fees paid to providers and make adjustments, as necessary. Generally, our contracts with providers do not allow for automatic annual increases in reimbursement levels. Among the factors generally considered in adjustments are changes to state Medicaid or Medicare fee schedules, competitive environment, current market conditions, anticipated utilization patterns and projected medical expenses. Some provider contracts are directly tied to state Medicaid or Medicare fee schedules, in which case reimbursement levels will be adjusted up or down, generally on a prospective basis, based on adjustments made by the state or CMS to the appropriate fee schedule.

Physicians and Provider Groups

PCPs play an important role in coordinating and managing the care of our Medicaid and MA CCP members. This coordination includes delivering preventive services as well as referring members to other providers for medically-necessary services. PCPs are typically trained in internal medicine, pediatrics, family practice, general practice or, in some markets, obstetrics and gynecology. In rare instances, a physician trained in sub-specialty care will perform primary care services for a member with a chronic condition.

PCPs and specialty care providers are typically reimbursed a specified fee for the service performed, which is known as fee-for-service. The specified fee is set as a percentage of the amount Medicaid or Medicare would pay under the applicable fee-for-service program.

We reimburse some of our PCPs and specialty care provider groups on a fixed-fee PMPM basis. This type of reimbursement methodology is commonly referred to as capitation. The reimbursement covers care provided directly by the provider as well as coordination of care from other providers as described above. In certain markets, we may also reimburse certain services such as vaccinations and laboratory or screening services delivered by the PCP in addition to the capitation payment.

For the years ended December 31, 2014 and 2013, approximately 6% of our payments to physicians serving our Medicaid members were on a capitated basis and approximately 94% were on a fee-for-service basis. During the years ended December 31, 2014 and 2013, approximately 17% of our payments to physicians serving our Medicare members in MA CCPs were on a capitated basis and approximately 83% were on a fee-for-service basis. Consistent with our long-term business priorities, we are putting increasing emphasis on aligning providers with our objective of improving healthcare quality by employing quality-based, performance-based, and shared risk contracting features in our provider agreements, as described below.

In some markets, PCPs may also be eligible for additional payments for achieving certain measurable levels of compliance with our clinical guidelines covering prevention and health maintenance or for managing patient utilization. The quality payments may be paid as a periodic bonus or when the PCP submits documentation of a member's receipt of services. For payments related to managing patient utilization, we establish a risk fund for each provider based on a percentage of premium received. We periodically evaluate and monitor this fund on an individual or group basis to determine whether these providers are eligible for additional payments or, in the alternative, whether they should reimburse us. Payments due to us are normally carried forward and offset against future potential surplus payments. PCPs participating in these specialized risk arrangements cover 68% and 25% of our MA and Medicaid membership, respectively, as of December 31, 2014. In 2015, we intend to increase our quality-based contracting with our PCPs.

In all instances, we require providers to submit data reporting all direct encounters with members. This data helps us to monitor the amount and level of medical treatment provided to our members to help improve the quality of care provided and comply with regulatory reporting requirements. Our regulators use the encounter data that we submit, as well as data submitted by other health plans, to set reimbursement rates, assign membership, assess the quality of care being provided to members and evaluate contractual and regulatory compliance.

To help ensure quality of care, we credential and re-credential all professional providers with whom we contract, including physicians, psychologists, licensed social workers, certified nurse midwives, advanced registered nurse practitioners and physician assistants who provide care under the supervision of a physician directly or through delegated arrangements. This credentialing and re-credentialing is performed in accordance with standards required by CMS and consistent with the standards of the NCQA.

Facilities

Our health plans arrange for hospital care primarily through contracts with selected hospitals in their service areas for coverage of medically-necessary care. These hospital contracts generally have multi-year terms or annual terms with automatic renewals and provide for payments on a variety of bases, including capitation, per diem rates, case rates and discounted fee-for-service schedules. These contracts typically can be canceled by either party, without cause, usually upon 90 days written notice.

In some cases, a longer notice period may be required, such as where a longer period is required by regulation or the applicable government contract.

Inpatient services are sometimes reimbursed as a fixed global payment for an admission based on the associated diagnosis related group, or DRG, as defined by CMS. In many instances, certain services, such as implantable devices or particularly expensive admissions, are reimbursed as a percentage of hospital charges either in addition to, or in lieu of, the DRG payment. Certain facilities in our networks are reimbursed on a negotiated rate paid for each day of the member's admission, known as a *per diem*. This payment varies based upon the intensity of services provided to the member during admission, such as intensive care, which is reimbursed at a higher rate than general medical services.

Facility outpatient services are reimbursed either as a percentage of charges or based on a fixed-fee schedule for the services rendered, in accordance with ambulatory payment groups or ambulatory payment categories, both as defined by CMS. Outpatient services for diagnostic imaging are reimbursed on a fixed-fee schedule as a percentage of the applicable Medicare or Medicaid fee-for-service schedule or a capitation payment.

Ancillary Providers

Our typical ancillary agreements provide for coverage of medically-necessary care and, in general, have terms of one year. These contracts automatically renew for successive one-year periods unless otherwise specified in writing by either party. These contracts typically can be canceled by either party, without cause, usually upon 90 days written notice. In some cases, a longer notice period may be required, such as where a longer period is required by regulation or the applicable government contract.

Ancillary providers, who provide services such as laboratory services, home health, physical, speech and occupational therapy, and ambulance and transportation services, are reimbursed on a capitation or fee-for-service basis.

Pharmacies

Pharmacy services are reimbursed based on a fixed fee for dispensing medication and a separate payment for the ingredients. Ingredients produced by multiple manufacturers are reimbursed based on a maximum allowable cost for the ingredient. Ingredients produced by a single manufacturer are reimbursed as a percentage of the average wholesale price. In certain instances, we contract directly with the sole-source manufacturer of an ingredient to receive a rebate, which may vary based upon volumes dispensed during the year.

Out-of-Network Providers

When our members receive services for which we are responsible from a provider outside our network, such as in the case of emergency room services from non-contracted hospitals, we generally attempt to negotiate a rate with that provider. In most cases, when a member is treated by a non-contracted provider, we are obligated to pay only the amount that the provider would have received from traditional Medicaid or Medicare.

Member Recruitment

Our member recruitment and marketing efforts for both Medicaid and Medicare members are heavily regulated by state agencies and CMS. For many products, we rely on the auto-assignment of members into our plans, including our PDP plan. The auto-assignment of a beneficiary into a health or prescription drug plan generally occurs when that beneficiary does not choose a plan. The agency with responsibility for the program determines the approach by which a beneficiary becomes a member of a plan serving the program. Some programs assign members to a plan automatically based on predetermined criteria. These criteria frequently include a plan's rates, the outcome of a bidding process, quality scores or similar factors. For example, CMS auto-assigns PDP members based on whether a plan's bids during the annual renewal process are above or below the CMS benchmark. In most states, our Medicaid health plans benefit from auto-assignment of individuals who do not choose a plan, but for whom participation in managed care programs is mandatory. Each state differs in its approach to auto-assignment, but one or more of the following criteria is typical in auto-assignment algorithms: a Medicaid beneficiary's previous enrollment with a health plan or experience with a particular provider contracted with a health plan, enrolling family members in the same plan, a plan's quality or performance status, a plan's network and enrollment size, awarding all auto-assignments to a plan with the lowest bid in a county or region, and equal assignment of individuals who do not choose a plan in a specified county or region.

Our Medicaid marketing efforts are regulated by the states in which we operate, each of which imposes different requirements for, or restrictions on, Medicaid sales and marketing. These requirements and restrictions can be revised from time to time. Several states, including our three largest Medicaid states, Florida, Georgia and Kentucky, do not permit direct sales by Medicaid health plans. We rely on member selection and auto-assignment of Medicaid members into our plans in those states.

Our Medicare marketing and sales activities are regulated by CMS and the states in which we operate. CMS has oversight over all, and in some cases has imposed advance approval requirements with respect to, marketing materials used by MA plans, and our sales activities are limited to activities such as conveying information regarding benefits, describing the operations of our managed care plans and providing information about eligibility requirements.

We also employ our own sales force and contract with independent, licensed insurance agents to market our MA and PDP products. We have continued to expand our use of independent agents whose cost is largely variable in nature and whose engagement is more conducive to the shortened Medicare selling season and the elimination of the open enrollment period. The activities of our independently-licensed insurance agents are also regulated by CMS. We also use direct mail, mass media and the Internet to market our products.

A significant portion of our PDP membership is obtained from the auto-assignment of beneficiaries, which is dependent on the outcome of a bid process whereby plans submit bids to CMS based on their estimated cost to provide services in designated regions. Plans that submit bids below the benchmark of other plans' bids in their bidding region are eligible for auto-assignment of LIS beneficiaries. For example, based on the outcome of our 2014 Medicare PDP bids, we were below the benchmarks in 30 of the 33 CMS regions for which we submitted bids. Due to changes in our bid design based on our 2014 experience, our 2015 PDP bids resulted in one of our basic plans being below the benchmarks in 13 of the 33 CMS regions for which we submitted bids. Therefore, our 2015 PDP membership has decreased to 1,098,000 as of January 1, 2015 compared to 1,392,000 as of December 31, 2014, as those PDP members who were previously auto-assigned to us have been reassigned to other plans in regions in which we were above the benchmark and the de minimis threshold. However, the outcome of our 2015 bids is expected to have a favorable impact on our 2015 PDPs financial performance compared to 2014. If our future PDP premium bids are not below the CMS benchmarks, we risk losing PDP members who were previously assigned to us and we may not have additional PDP members auto-assigned to us.

Quality Improvement

We are focused on improving quality across all of our lines of business, which is critical to the continued growth and success of our business. We continually seek to improve the quality of care delivered by our network providers to our members and our ability to measure the quality of care provided. Our quality improvement program provides the basis for our quality and utilization management functions and outlines ongoing processes designed to improve the delivery of quality health care services to our members, as well as to enhance compliance with regulatory and accreditation standards.

Our quality improvement activities will continue to focus on:

- Access;
- Preventive health and wellness and care management;
- Case and disease management;
- Health plan accreditation;
- Provider credentialing;
- Provider education and incentives for closing care gaps;
- Member education and outreach;
- Information technology initiatives related to the above activities;
- Advocacy and community-based programs; and
- Oversight and audits.

Access

We are focused on improving our members' access to a high-performing network of providers, including PCPs, specialists and ancillary providers, and ensuring that members see the appropriate providers, based on clinical condition. We help members access the right care at the right time in the appropriate setting through coordinated care teams and community partnerships. We recently added additional clinical resources in our markets to implement new care models.

Preventive health and wellness and care management

We sponsor a number of initiatives aimed at the promotion of healthy lifestyles and the prevention of disease, including preventive screenings, health education programs to inform members about health care issues and healthy behaviors and health assessment and counseling to inform members how to use the resources and services available to them to help reduce preventable diseases.

Case and disease management

We have enhanced our case management model to more effectively serve our most medically complex members. The model leverages both field-based and telephonic resources using state-specific, multi-disciplinary care teams. Our D-SNP case management helps reduce the fragmentation that exists in the current health care system, improving member access to quality care. We also employ intervention programs which include: a prenatal case management program to help women with high-risk pregnancies; a program to reduce the number of inappropriate emergency room visits; and disease management programs to decrease the need for emergency room visits and hospitalizations.

Health plan accreditation

Several of our health plans are accredited by nationally-recognized independent organizations that have been established to measure health plans' commitment to effective management and accountability. Our Florida, Georgia, Hawaii, Kentucky, Missouri and South Carolina HMOs are accredited by NCQA for Medicaid. Our Florida HMO is also NCQA accredited for Medicare.

Provider credentialing

We credential physicians, hospitals and other health care professionals in our participating provider networks using quality criteria, which meet or exceed the standards of external accreditation or state regulatory agencies, or both. Typically, most health care professionals are re-credentialed every three years, depending on applicable state laws.

Provider education and incentives for closing care gaps

As part of our quality improvement program, we have implemented changes to our reimbursement methods to reward certain providers who encourage preventive care, such as well-child check-ups, prenatal care and/or who adopt evidence based guidelines for members with chronic conditions. Additionally, several of our markets have provider incentives for closing care gaps inherent to the health care system. This initiative has resulted in increased member encounters to drive improvement in the quality of care.

Member education and outreach

We are focused on improving our members' access to a high-performing network of providers, including PCPs, specialists and ancillary providers, and ensuring that members see the appropriate providers, based on clinical condition. We have strengthened our resources focused exclusively on outreach to Medicaid and Medicare members to educate them on care gaps and to close those gaps. In addition, our medication therapy management initiatives empower patients to take an active role in managing their medications. Intervention and support activities include arranging transportation assistance, three-way calls with a member and his/her primary care physician to schedule appointments, and arranging for home visits to assess and close care gaps. We are focused on enhancing our members' experience by improving service and reducing complaint levels through improved grievance and appeals processes and member satisfaction surveys.

Information technology initiatives

We understand the importance of information technology in improving the level of service that we can provide to our members. Accordingly, we continue to invest in our information technology infrastructure and capabilities including tools that support our focus on improving our ability in providing members with quality health care. We have specialized systems to support our quality improvement activities and to gather information from our systems to identify opportunities to improve care and track the outcomes of the services provided to achieve those improvements, such as evaluating the effects of particular preventive measures.

Advocacy and community-based programs

WellCare connects community resources to help improve health outcomes and lower the overall cost of health care. WellCare works to link people to social services such as food banks or meal delivery, housing assistance, financial assistance, transportation, education support, legal assistance and employment services.

Oversight and audits

Internally, our quality improvement programs benefit from executive oversight and project management processes. Additionally, each of our health plans has a Quality Improvement Committee comprised of senior members of management, medical directors and other key associates of ours. Each of these committees report directly to the applicable health plan board of directors, which has ultimate oversight responsibility for the quality of care rendered to our members. The Quality Improvement Committees also have a number of subcommittees that are charged with monitoring certain aspects of care and service, such as health care utilization, pharmacy services and provider credentialing and re-credentialing. Several of these subcommittees include physicians as committee members.

Our board of directors recognizes the importance of delivering quality care and providing access to that care for our members and has established the Health Care Quality and Access Committee of the board. The primary purpose of this committee is to assist the board by reviewing, and providing general oversight of, our health care quality and access strategy, including our policies and procedures governing health care quality and access for our members. This input helps provide overall direction and guidance to our Quality Improvement Committees.

We conduct routine site audits of select providers and medical record audits to ensure the effectiveness of our quality improvement programs.

Information Technology

The accurate and timely capture, processing and analysis of critical data are cornerstones for providing managed care services. Focusing on data is also essential to operating our business in a cost effective manner. Data processing and data-driven decision making are key components of both administrative efficiency and medical cost management. We use our information system for premium billing, claims processing, utilization management, reporting, medical cost trending, planning and analysis. The system also supports member and provider service functions, including enrollment, member eligibility verification, primary care and specialist physician roster access, claims status inquiries, and referrals and authorizations.

On an ongoing basis, we evaluate the ability of our existing operations to support our current and future business needs and to maintain our compliance requirements. This evaluation may result in enhancing or replacing current systems and/or processes, which could result in our incurring substantial costs to improve our operations and services. We continue to work to improve service and productivity, and to comply with future regulatory requirements such as the implementation of ICD-10 by October 2015.

We have a disaster recovery plan that addresses how we recover business functionality within stated timelines. We have an agreement with a nationally-recognized, third-party vendor to provide for the restoration of our general support systems at a remote processing center. We perform disaster recovery testing at least annually for those business applications that we consider critical. Additionally, we recently formed an Information Technology Oversight Committee of the Board of Directors in order to assist the Board in its oversight of the Company's major information technology (IT) initiatives, to consult with senior management with respect to the Company's IT strategy, assist the Board in its oversight of the Company's IT security programs and assist the Audit and Finance Committee of the Board in its oversight of the Company's IT internal controls and its disaster recovery capabilities and strategies.

Reinsurance

We bear underwriting and reserving risks associated with our HMO and insurance subsidiaries. In 2014 and prior years, we retained certain of these risks through our wholly-owned, captive insurance subsidiary. Effective January 1, 2015, we are no longer ceding new risks to our captive insurance subsidiary. We reduce exposure to large catastrophic losses by insuring levels of coverage for losses in excess of what we retain internally with highly-rated, unaffiliated insurance companies. However, we remain liable in the event these insurance companies are unable to pay their portion of the losses, so we regularly monitor the financial condition of these companies to ensure that they are maintaining these high ratings.

Outsourcing Arrangements

Our care and service delivery model is designed to optimize our use of our personnel versus third parties based on an evaluation of factors, including cost, compliance, quality and procurement success. As a result, we have contracted with a number of vendors to provide significant operational support including, but not limited to, pharmacy benefit management for our members as well as certain enrollment, billing, call center, benefit administration, claims processing, mail order pharmacy, sales and marketing and certain aspects of utilization management. For example, in November 2014, we outsourced our mail order pharmacy. We also intend to change pharmacy benefit managers in 2016, which may create operational challenges and transition and transitory costs as a new vendor is implemented. Where a vendor provides services that we are required to

provide under a contract with a government customer, we are responsible for such performance and will be held accountable by our government customers for any failure of performance by our vendors. We evaluate the competency and solvency of our third-party vendors prior to execution of contracts and include service level guarantees in our contracts, where appropriate. Additionally, we perform ongoing vendor oversight activities to identify any performance or other issues related to our vendors.

Centralized Management Services

We provide centralized management services to each of our health plans from our Tampa, Florida headquarters and call centers. These services include information technology, product development and administration, finance, human resources, accounting, legal, public relations, marketing, insurance, purchasing, risk management, internal audit, actuarial, underwriting, claims processing, customer service and certain aspects of clinical service and are provided by an affiliated administrator.

Employees

We refer to our employees as associates. As of December 31, 2014, we had approximately 6,700 full-time associates. Our associates are not represented by any collective bargaining agreement, and we have never experienced a work stoppage.

OUR COMPETITION

Competitive Environment

We operate in a highly competitive environment to manage the cost and quality of services that are delivered to government health care program beneficiaries. We currently compete in this environment by offering Medicare and Medicaid health plans in which we accept all or nearly all of the financial risk for management of beneficiary care under these programs.

We typically must be awarded a contract by the government agency with responsibility for a program in order to offer our services in a particular location. Some government programs choose to limit the number of plans that may offer services to beneficiaries, while other agencies allow an unlimited number of plans to serve a program, subject to each plan meeting certain contract requirements. When the number of plans participating in a program is limited, an agency generally employs a bidding process to select the participating plans.

As a result, the number of companies with which we compete varies significantly depending on the geographic market, business segment and line of business. We believe a number of our competitors have strengths that may match or exceed our own with respect to one or more of the criteria on which we compete with them. Further, some of our competitors may be better positioned than us to withstand rate compression.

Competitive Factors—Program Participation

Regardless of whether the number of health plans serving a program is limited, we believe government agencies determine program participation based on several criteria. These criteria generally include the terms of the bids as well as the breadth and depth of a plan's provider network; quality and utilization management processes; responsiveness to member complaints and grievances; timeliness and accuracy of claims payment; financial resources; historical contractual and regulatory compliance; quality scores, references and accreditation; and other factors. As discussed in *Member Recruitment,* a significant portion of our PDP membership is obtained from the auto-assignment of beneficiaries, which is dependent on the outcome of a bid process whereby plans submit bids to CMS based on their estimated cost to provide services in designated regions.

Competitive Factors—Network Providers

In addition, we compete with other health plans to contract with hospitals, physicians, pharmacies and other providers for inclusion in our networks that serve government program beneficiaries. We believe providers select plans in which they participate based on several criteria. These criteria generally include reimbursement rates; timeliness and accuracy of claims payment; potential to deliver new patient volume and/or retain existing patients; effectiveness of resolution of calls and complaints; and other factors.

Obtaining Members

The agency with responsibility for a particular program determines the approach by which a beneficiary becomes a member of one of the plans serving the program. Generally, government programs either assign members to a plan automatically or they permit participating plans to market to potential members, though some programs employ both approaches. For more information about auto-assignment and how we obtain our members generally, see the *Member Recruitment* discussion above.

Medicaid Competitors

In the Medicaid managed care market, our principal competitors for state contracts, members and providers include the following types of organizations:

- *MCOs*—Managed care organizations ("MCOs") that, like us, receive state funding to provide Medicaid benefits to members. Many of these competitors operate in a single or small number of geographic locations. There are a few multi-state Medicaid-only organizations that are able to leverage their infrastructure over a larger membership base. Competitors include private and public companies, which can be either for-profit or non-profit organizations, with varying degrees of focus on serving Medicaid populations.

- *Medicaid Fee-For-Service*—Traditional Medicaid offered directly by the states or a modified version whereby the state administers a primary care case management model.

- *PSNs*—A Provider Service Network ("PSN") is a network of providers that is established and operated by a health care provider or group of affiliated health care providers. A PSN operates as either a fee-for-service ("FFS") health plan or as a prepaid health plan that, like us, receives a capitated premium to provide Medicaid benefits to members. A PSN that operates as a FFS health plan is not at risk for medical benefit costs. FFS PSNs are at risk for 50% of their administrative cost allocation if their total costs exceed the estimated at-risk capitation amount.

Medicare Competitors

In the Medicare market, which includes Medicare Advantage, Medicare Supplemental Insurance, and Prescription Drug Plans; our primary competitors for contracts, members and providers include the following types of competitors:

- *Original Fee-For-Service Medicare*—Original Medicare is available nationally and is a fee-for-service plan managed by the federal government. Beneficiaries enrolled in Original Medicare can go to any doctor, supplier, hospital or other facility that accepts Medicare and is accepting new Medicare patients.

- *Medicare Advantage and Prescription Drug Plans*—MA and stand-alone Part D plans are offered by national, regional and local MCOs and insurance companies that serve Medicare beneficiaries. In addition, prescription drug plans are being offered by or co-branded with retail drug store chains or other retail store chains, which may be able to offer lower priced plans and achieve benefits from integration with their pharmacy benefit management operations.

- *Employer-Sponsored Coverage*—Employers and unions may subsidize Medicare benefits for their retirees in their commercial group. The group sponsor solicits proposals from MA plans and may select an HMO, PPO and/or PDP to provide these benefits.

- *Medicare Supplements*—Original Medicare pays for many, but not all, health care services and supplies. A Medicare supplement policy, commonly called "Medigap", is private health insurance designed to supplement Original Medicare by covering the cost of items such as co-payments, coinsurance and deductibles. Some Medicare supplements cover additional benefits for an additional cost. Medicare supplement plans can be used to cover costs not otherwise covered by Original Medicare, but cannot be used to supplement MA plans.

REGULATION IMPACTING OUR BUSINESS

Our health care operations are highly regulated by both state and federal government agencies. Regulation of managed care products and health care services is an ever-evolving area of law that varies from jurisdiction to jurisdiction. Regulatory agencies generally have discretion to issue regulations and interpret and enforce laws and rules. Changes in applicable laws, statutes, regulations and interpretive guidance occur frequently. These changes may include a requirement to provide health care services not contemplated in our current contracted premium rate or to pay providers at a state-mandated fee schedule without a commensurate adjustment to the premium rate. For further information, see the *Our Operations- Provider Networks and Provider Reimbursement Methods* discussion above. In addition, government agencies may impose taxes, fees or other assessments upon us and other managed care companies at any time.

Our contracts with various state government agencies and CMS to provide managed health care services include provisions regarding provider network adequacy, maintenance of quality measures, accurate submission of encounter and health care cost information, maintaining standards of call center performance, prompt payment of claims and other requirements specific to government and program regulations. We must also have adequate financial resources to protect the state, our providers and our members against the risk of our insolvency. Our failure to comply with these requirements may result in the assessment of

penalties, fines and liquidated damages. For further information on data provided to CMS that is subject to audit, refer to the *Product Segments-Medicare Health Plans- Medicare Risk-Adjusted Premiums* discussion above.

Government enforcement authorities have become increasingly active in recent years in their review and scrutiny of various sectors of the health care industry, including health insurers and managed care organizations. We routinely respond to subpoenas and requests for information from these entities and, more generally, we endeavor to cooperate fully with all government agencies that regulate our business.

Product Compliance

Medicaid programs

Medicaid is state operated and implemented, although it is funded by both the state and federal governments. Within guidelines established by the federal government, each state:

- establishes its own eligibility standards;
- determines the type, amount, duration and scope of services;
- sets the rate of payment for services; and
- administers its own program.

We have entered into contracts with Medicaid agencies in each state in which we operate Medicaid plans. Some of the states in which we operate award contracts to applicants that can demonstrate that they meet the state's minimum requirements. Other states engage in a competitive bidding process for all or certain programs. In either case, we must demonstrate to the satisfaction of the respective agency that we are able to meet certain operational and financial requirements. For example:

- we must measure provider access and availability in terms of the time needed for a member to reach the doctor's office;
- our quality improvement programs must emphasize member education and outreach and include measures designed to promote utilization of preventive services;
- we must have linkages with schools, city or county health departments and other community-based providers of health care in order to demonstrate our ability to coordinate all of the sources from which our members may receive care;
- we must have the capability to meet the needs of disabled members;
- our providers and member service representatives must be able to communicate with members who do not speak English or who are hearing impaired; and
- our member handbook, newsletters and other communications must be written at the prescribed reading level and must be available in certain languages other than English.

Once awarded, our Medicaid program contracts generally have terms of one to three years. Most of these contracts provide for renewal upon mutual agreement of the parties, or at the option of the government agency, and both parties have certain early termination rights. In addition to the operating requirements listed above, state contract requirements and regulatory provisions applicable to us generally set forth detailed provisions relating to subcontractors, marketing, safeguarding of member information, fraud and abuse reporting and grievance procedures.

Our Medicaid plans are subject to periodic financial and informational reporting and comprehensive quality assurance evaluations. We regularly submit periodic utilization reports, operations reports and other information to the appropriate Medicaid program regulatory agencies.

Our compliance with the provisions of our contracts is subject to monitoring or examination by state regulators and their agents. Certain contracts require us to be subject to quality assurance evaluations and accreditation by a third-party organization.

Medicare programs

Medicare is a federal health insurance program that provides eligible persons age 65 and over and some disabled persons a variety of hospital, medical insurance and prescription drug benefits. Medicare beneficiaries have the option to enroll in various types of MA plans, such as MA CCP plans, PPO benefit plans or MA private-fee-for-service plans, in areas where such plans are offered. Under MA, managed care plans contract with CMS to provide benefits that are comparable to, or that may be more attractive to Medicare beneficiaries than, Original Medicare in exchange for a fixed monthly payment per member that varies based on the county in which a member resides, the demographics of the member and the member's health condition. Currently, we only offer CCP plans under the MA program.

All Part D plans, both PDPs and Medicare Advantage-Prescription Drug Plans ("MA-PDs"), bid on providing Part D benefits in June of each year. Based on the bids submitted, CMS establishes a benchmark for each of the 33 regions. CMS pays the Part D plans a percentage of the benchmark on a PMPM basis with the remaining portion of the premium being paid by the Medicare member. Members whose income falls below 150% of the federal poverty level qualify for the federal LIS, through which the federal government helps pay the member's Part D premium and certain other cost sharing expenses.

Each of our MA and PDP plan contracts with CMS are on a calendar-year basis. CMS requires that each plan meet certain regulatory requirements including, as applicable: provisions related to enrollment and disenrollment; restrictions on marketing activities; benefits or formulary requirements; quality assessment; encounter data reports; fraud, waste and abuse monitoring; maintaining relationships with health care providers; and responding to appeals and grievances.

Our MA and PDP plans perform ongoing monitoring of our compliance with the CMS requirements, including functions performed by vendors. From time to time, CMS conducts examinations of our compliance with the provisions of our MA and PDP contracts.

Licensing and Solvency Regulation

Our operations are conducted primarily through HMO and insurance subsidiaries. These subsidiaries are licensed by the insurance departments in the states in which they operate, except our New York HMO subsidiary, which is licensed as a prepaid health services plan by the New York State Department of Health, and our California HMO, which is licensed by the California Department of Managed Health Care. The subsidiaries are subject to the rules, regulations and oversight of the applicable state agencies in the areas of licensing and solvency. State insurance laws and regulations prescribe accounting practices for determining statutory net income and capital and surplus. Each of our regulated subsidiaries is required to report regularly on its operational and financial performance to the appropriate regulatory agency in the state in which it is licensed. These reports describe each of our regulated subsidiaries' capital structure, ownership, financial condition, certain intercompany transactions and business operations. From time to time, any of our regulated subsidiaries may be selected to undergo periodic audits, examinations or reviews by the applicable state agency of our operational and financial assertions.

Our regulated subsidiaries generally must obtain approval from, or provide notice to, the state in which it is domiciled before entering into certain transactions such as declaring dividends in excess of certain thresholds, entering into other arrangements with related parties, acquisitions or similar transactions involving an HMO or insurance company, or any change in control. For purposes of these laws, in general, control commonly is presumed to exist when a person, group of persons or entity, directly or indirectly, owns, controls or holds the power to vote 10% or more of the voting securities of another entity.

Each of our HMO and insurance subsidiaries must maintain a minimum amount of statutory capital determined by statute or regulation. The minimum statutory capital requirements differ by state and are generally based on a percentage of annualized premium revenue, a percentage of annualized health care costs, a percentage of certain liabilities, a statutory minimum, risk-based capital ("RBC") requirements or other financial ratios. The RBC requirements are based on guidelines established by the NAIC, and have been adopted by most states. The statutory framework for our regulated subsidiaries' minimum capital requirements could change over time. For instance, RBC requirements may be adopted by more of the states in which we operate. In addition, regulators could require our subsidiaries to maintain minimum levels of statutory net worth in excess of the amount required under the applicable state laws if the regulators determine that maintaining such additional statutory net worth is in the best interest of our members and other constituencies. Failure to maintain these requirements would trigger regulatory action by the state. Such statues, regulations and capital requirements also restrict the timing, payment, and amount of dividends and other distributions that may be paid to us as the sole stockholder. To the extent our HMO and insurance subsidiaries must comply with these regulations, they may not have the financial flexibility to transfer funds to us. Based upon current statutes and regulations, the minimum capital and surplus requirement, or net assets, for these subsidiaries that may not be transferable to us in the form of loans, advances, or cash dividends was approximately $746.0 million at December 31, 2014, and $489.0 million at December 31, 2013. The combined statutory capital and surplus of our HMO and insurance subsidiaries was $1.3 billion and $1.1 billion at December 31, 2014 and 2013, respectively, which was in compliance with the minimum capital requirements as of those dates.

Our regulated subsidiaries are also subject to restrictions on their ability to make dividend payments. Dividend restrictions vary by state, but the maximum amount of dividends which can be paid without prior approval from the applicable state is subject to restrictions relating to statutory capital, surplus and net income for the previous year. Some states require prior approval of all dividends, regardless of amount. States may disapprove any dividend that, together with other dividends paid by a subsidiary in the prior 12 months, exceeds the regulatory maximum as computed for the subsidiary based on its statutory surplus and net income. We received $68.0 million, $147.0 million and $192.0 million in dividends from our regulated subsidiaries during the years ended December 31, 2014, 2013, and 2012, respectively. The 2014 amount included $36 million not requiring prior regulatory approval, and $32 million paid after obtaining prior regulatory approval. Under applicable regulatory requirements at December 31, 2014, the amount of dividends that may be paid through the end of 2015 by our HMO

and insurance subsidiaries without prior approval by regulatory authorities is approximately $60.0 million in the aggregate. Actual dividends paid may vary due to consideration of excess statutory capital and surplus and expected future surplus requirements related to, for example, premium volume and product mix.

HIPAA and State Privacy Laws

The Health Insurance Portability and Accountability Act of 1996 ("HIPAA") and the regulations adopted under HIPAA are intended to improve the portability and continuity of health insurance coverage and simplify the administration of health insurance claims and related transactions. All health plans, including ours, are subject to HIPAA. HIPAA generally requires health plans, as well as their providers and vendors, to:

- protect the privacy and security of patient health information through the implementation of appropriate administrative, technical and physical safeguards; and
- establish the capability to receive and transmit electronically certain administrative health care transactions, such as claims payments, in a standardized format.

We are also subject to state laws that provide for greater privacy of individuals' health information; such laws are not preempted by HIPAA.

Fraud and Abuse Laws

Federal and state enforcement authorities have prioritized the investigation and prosecution of health care fraud, waste and abuse. Fraud, waste and abuse prohibitions encompass a wide range of operating activities, including kickbacks or other inducements for referral of members or for the coverage of products (such as prescription drugs) by a plan, billing for unnecessary medical services by a provider, improper marketing and violation of patient privacy rights. Companies involved in public health care programs such as Medicaid and Medicare are required to maintain compliance programs to detect and deter fraud, waste and abuse, and are often the subject of fraud, waste and abuse investigations and audits. The regulations and contractual requirements applicable to participants in these public-sector programs are complex and subject to change. Although we have structured our compliance program with care in an effort to meet all statutory and regulatory requirements, our policies and procedures are continuously under review and subject to updates and our training and education programs are always evolving. We have invested significant resources to enhance our compliance efforts and we expect to continue to do so.

Federal and state laws and regulations governing submission of information and claims to agencies

We are subject to federal and state laws and regulations that apply to the submission of information and claims to various agencies. For example, the federal False Claims Act provides, in part, that the federal government may bring a lawsuit against any person or entity who it believes has knowingly presented, or caused to be presented, a false or fraudulent request for payment from the federal government, or who has made a false statement or used a false record to get a claim approved. The federal government has taken the position that claims presented in violation of the federal anti-kickback statute may be considered a violation of the federal False Claims Act. Violations of the False Claims Act are punishable by treble damages and penalties of up to a specified dollar amount per false claim. In addition, a special provision under the False Claims Act allows a private person (for example, a "whistleblower" such as a disgruntled former associate, competitor or member) to bring an action under the False Claims Act on behalf of the government alleging that an entity has defrauded the federal government and permits the private person to share in any settlement of, or judgment entered in, the lawsuit.

A number of states, including states in which we operate, have adopted false claims acts that are similar to the federal False Claims Act.

PRINCIPAL EXECUTIVE OFFICES

Our principal executive offices are located at 8725 Henderson Road, Renaissance One, Tampa, Florida 33634, and our telephone number is (813) 290-6200.

AVAILABILITY OF REPORTS AND OTHER INFORMATION

Our corporate website is *http://www.wellcare.com*. We make available on this website or in print, free of charge, our Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, Proxy Statement and amendments to those materials filed or furnished pursuant to Section 13(a) or 15(d) of the Securities and Exchange Act of 1934, as amended, as soon as reasonably practicable after we electronically file such materials with, or furnish such materials to, the Securities and Exchange Commission ("SEC").

Also available on our website, or in print to any stockholder upon request, are WellCare's Corporate Governance Guidelines and Code of Conduct and Business Ethics, as well as charters of the following committees of the board of directors: the Audit and Finance Committee, Compensation Committee, Health Care Quality and Access Committee, Information Technology Oversight Committee, Nominating and Corporate Governance Committee and Regulatory Compliance Committee. In addition, we intend to disclose any amendments to, or waivers of, our Code of Conduct and Business Ethics on our website. To obtain printed materials contact Investor Relations at WellCare Health Plans, Inc., 8725 Henderson Road, Tampa, Florida 33634. In addition, the SEC's website is *http://www.sec.gov.* The SEC makes available on its website, free of charge, reports, proxy and information statements, and other information regarding issuers, such as us, that file electronically with the SEC. Information provided on our website or on the SEC's website is not part of this Annual Report on Form 10-K.

Item 1A. Risk Factors

You should carefully consider the following factors, together with all of the other information included in this report, in evaluating our company and our business. If any of the following risks actually occur, our business, financial condition and results of operations could be materially and adversely affected, and the value of our stock could decline. The risks and uncertainties described below are those that we currently believe may materially affect our company. Additional risks and uncertainties not presently known to us or that we currently deem immaterial also may impair our business operations. As such, you should not consider this list to be a complete statement of all potential risks or uncertainties.

Risks Related to Our Business

If we are unable to estimate and manage medical benefits expense effectively, our profitability likely will be reduced or we could become unprofitable.

Our profitability depends, to a significant degree, on our ability to estimate and effectively manage our costs related to the provision of health care services. Relatively small changes in the ratio of our expenses related to health care services to the premiums we receive (the "medical benefits ratio" or "MBR") can create significant changes in our financial results. Many aspects of the managed care business are not predictable, and estimating medical benefits expense is a continuous process, which depends on the information available to us and our ability to utilize such information. Factors that may cause medical benefits expense to exceed our estimates include:

- the addition of new members, whether by acquisition, new enrollment, program startup or expansion (including geographic expansion), whose risk profiles are uncertain or unknown and for whom initiatives to manage their care take longer than expected;
- an increase in the cost of health care services and supplies, including pharmaceuticals, whether as a result of the introduction of new products or technologies, inflation or otherwise;
- the performance of our pharmaceutical benefit manager in managing our pharmaceutical costs;
- higher-than-expected utilization of health care services;
- contractual provisions related to continuity of care for new members;
- periodic renegotiation of hospital, physician and/or other provider contracts;
- the occurrence of catastrophes, major epidemics, terrorism or bio-terrorism;
- changes in the demographics of our members and medical trends affecting them;
- challenges in implementing medical expense cost control initiatives, especially during the first year of a new Medicaid program; and
- new mandated benefits, increased mandated provider reimbursement rates or other changes in health care laws, regulations and/or practices.

The factors and assumptions that are used to develop our estimates of costs, including medical benefits expense, inherently are subject to greater variability when there is more limited experience or information available to us, such as when we commence operations in a new state or region or commence participation in a new program. In many cases, the degree of our ability to accurately estimate medical benefits expense may not be known until we have sufficient experience and more complete information. For example, levels of plan utilization and members' use of medical services, provider claims submissions, our payment processes and other factors can result in identifiable patterns emerging only following the passage of a significant period of time after the occurrence of the underlying causes of deviations from our assumptions. If our medical benefits expense increases and we are unable to manage these medical costs effectively in the future, our profits would likely be reduced or we may not remain profitable, which would also affect our liquidity, cash flows and our ability to comply with statutory requirements.

Most of our revenues are generated by premiums consisting of fixed monthly payments per member and supplemental payments for other services such as maternity deliveries, depending on the type of member in our plans. These payments are fixed by contract and we are obligated during the contract period, which is generally one to five years, to provide or arrange for the provision of health care services as established by states and the federal government. The payments are generally set based on an estimation of the medical costs using actuarial methods based on historical data. Actual experience, however, could differ from the assumptions used in the premium-setting process, which could result in premiums being insufficient to cover our medical benefits expense. For example, several new, extremely high cost hepatitis C drugs were approved in 2014. In addition, in the new Florida MMA program, our claims experience has been running significantly higher than we originally estimated. Because the new Florida MMA program has required its participating plans to utilize the state's drug formulary, it is more difficult for us to manage the pharmaceutical costs. In addition, we experienced unfavorable development of prior year reserve amounts in three of the four quarters in 2013, and in the first and second quarters of 2014, particularly in our Medicaid and Medicare Health Plans segments. Our medical benefits expense may exceed our estimates or our regulators' actuarial pricing

assumptions and we may be unable to adjust the premiums we receive under our current contracts, which could have a material adverse effect on our results of operations.

Our MA and PDP plans, as well as certain of our Medicaid plans, are subject to a minimum medical loss ratio ("MLR"), which requires health plans to spend not less than a certain percentage of premiums on medical benefits. If a minimum MLR is not met, then we could be required to refund premiums back to the state or CMS, as applicable.

In addition, there are sometimes wide variations in the established rates per member in both our Medicaid and Medicare lines of business. For instance, the rates we receive for a Supplemental Security Income ("SSI") member are generally significantly higher than for a non-SSI member who is otherwise similarly situated. As the composition of our membership base changes as the result of programmatic, competitive, regulatory, benefit design, economic or other changes; there is a corresponding change to our premium revenue, costs and margins, which may have a material adverse effect on our cash flow and results of operations.

Some provider contracts are directly tied to state Medicaid or Medicare fee schedules, which the state or CMS, respectively, may increase without granting a corresponding increase in premiums to us. We have experienced similar types of adjustments in other states in which we operate. Unless such adjustments are mitigated by an increase in premiums, or if this were to occur in any more of the states in which we operate, our profitability will be negatively impacted.

Also, in some rural areas, it is difficult to maintain a provider network sufficient to meet regulatory requirements. In situations where we have a deficiency in our provider network, regulators require us to allow members to obtain care from out-of-network providers at no additional cost, which could have a material adverse effect on our ability to manage expenses. In some states, with respect to certain services, the amount that the health plan must pay to out-of-network providers for services provided to our members is defined by law or regulation, but in certain instances it is either not defined or it is established by a standard that is not clearly translatable into dollar terms. Out-of-network providers may believe they are underpaid for their services and may either litigate or arbitrate their dispute with the health plan. The uncertainty of the amount to pay and the possibility of subsequent adjustments of the payment could adversely affect our financial position, results of operations or cash flows.

Although we maintain reinsurance to protect us against certain severe or catastrophic medical claims, we cannot assure that such reinsurance coverage currently is or will be adequate or available to us in the future or that the cost of such reinsurance will not limit our ability to obtain it.

Our pharmacy benefit manager may not perform at the level of our expectations, resulting in additional pharmacy costs or administrative costs, which would affect the profitability of our Medicaid Health Plans segment, our Medicare PDP segment and our MA plans that contain a prescription drug benefit, and could adversely affect our results of operations and cash flows.

Our pharmacy benefit manager may not perform at the level of our expectations, resulting in additional pharmacy costs or administrative costs, which would reduce the profitability of our Medicaid Health Plans segment, our Medicare PDP segment and the MA plans that also contain a prescription drug benefit. Further, because our 2015 MA and PDP bids do not account for such additional costs, and we would not be reimbursed for additional pharmacy costs that are the responsibility of CMS until the fourth quarter of 2016, our results of operations and cash flows could be adversely affected, perhaps materially.

We rely on a number of third parties, and failure of any one of the third parties to perform in accordance with our contracts could have a material adverse effect on our business and results of operations.

Our care and service delivery model is designed to optimize our use of our personnel as an alternative to third parties based on an evaluation of factors, including cost, compliance, quality and procurement success. As a result, we have contracted with a number of third parties to provide significant operational support including, but not limited to, pharmacy benefit management for our members as well as certain enrollment, billing, call center, benefit administration, claims processing functions, sales and marketing and certain aspects of utilization management. We have limited ability to control the performance of these third parties. If a third party provides services that we are required to provide under a contract with a government client, we are responsible for such performance and will be held accountable by the government client for any failure of performance by our vendors. Significant failure by a third party to perform in accordance with the terms of our contracts could subject us to fines or other sanctions or otherwise have a material adverse effect on our business and results of operations. In addition, upon termination of a third party contract, we may encounter difficulties in replacing the third party on favorable terms, transitioning services to another vendor, or in assuming those responsibilities ourselves, which may have a material adverse effect on our business, quality scores and results of operations. For example, we intend to change pharmacy benefit managers in 2016, which may create operational challenges and transition and transitory costs as a new vendor is implemented. In addition, in November 2014, we outsourced our mail order pharmacy. Further, we rely on state-operated

systems and sub-contractors to qualify and assign eligible members into our health plan. Ineffectiveness of these state operations and sub-contractors can have a material adverse effect on our enrollment.

Failure to maintain satisfactory quality scores could negatively impact our premium rates, subject us to penalties, limit or reduce our membership, impede our ability to compete for new business in existing or new markets or result in the termination of our contracts, which would have a material adverse effect on our business, rate of growth and results of operations.

Quality scores are used by certain agencies to establish premium rates or, in the case of the Centers for Medicare & Medicaid Services ("CMS"), to pay bonuses to Medicare Advantage ("MA") plans that enable high scoring plans to offer enhanced member health benefits which are attractive to members.

Certain provisions in the Patient Protection and Affordable Care Act, as amended by the Health Care and Education Reconciliation Act of 2010 (the "ACA") tie MA premiums to the achievement of Star Ratings. Beginning in 2015, only MA plans that have a 4.0 or higher overall quality score, or "Star Rating", (out of five) will be eligible for a quality bonus in their basic premium rates. Plans that receive quality bonuses may have a competitive advantage in the Medicare market, as they may be able to offer more attractive benefit packages to members and/or achieve higher profit margins. None of our plans achieved a 4.0 Star Rating in 2014, so we will not receive these quality bonuses in 2015, and we may not be able to improve our Star Ratings, to receive these quality bonuses in the future.

In addition, plans with any Star Ratings below 3.0 for three consecutive years risk contract termination. In 2014, our MA plans in Louisiana and the MA plans of Windsor Health Group, Inc. ("Windsor") we acquired in January 2014, representing approximately 47,000 members as of January 1, 2015, each received at least one Star Rating of 2.5 for at least the third consecutive year. If these Star Ratings do not equal or exceed 3.0 by the 2015 Star Rating release date, these plans may be terminated by CMS as early as plan year 2016. We serve a larger percentage of D-SNP members than our competitors, and this population is more challenging to serve. CMS's quality measurement methodology does not account for population differences between plans, and therefore, we may be unable to achieve a four star rating for some of our plans. Furthermore, plans deemed low performing that participate in state Medicare-Medicaid dual-eligible demonstration programs are ineligible for passive enrollment, which is likely to result in lower market share in those programs.

In certain state Medicaid programs, plans that do not meet applicable quality measures can be required to refund premiums previously received, may not be able to earn quality bonuses, may be required to pay penalties, or may be subject to enrollment limitations, including suspension of auto assignment of members, or termination of the contract. In addition, if the state determines that a health plan has failed to meet the contractual requirements for quality measures, these contracts may be subject to termination, or other remedies, such as liquidated damages, at the discretion of the state. We are unable to predict what actions a state may take, if any, when assessing our contractual performance.

In addition, lower quality scores compared to our competitors may adversely impact our ability to attract members and obtain regulatory approval for acquisitions or expansions. As a result, lower quality scores compared to our competitors could have a material adverse effect on our business, rate of growth and results of operations.

Difficulties in successfully estimating and managing growth may have a material adverse effect on our quality scores, results of operations, financial position and cash flows.

Our membership has grown substantially in the last three years due to acquisitions, geographic expansions and organic growth. This rapid growth has strained our operations, medical management and information technology resources. We may not be successful in improving our infrastructure to support this growth, and delays in infrastructure improvements may have a material adverse effect on our quality scores, results of operations, financial position and cash flows. In addition, due to the substantial initial costs related to acquisitions and expansions, such growth could adversely impact our short-term profitability and liquidity.

As part of our growth strategy, we identify potential acquisition targets, bid and negotiate acquisition terms, work with regulators to receive regulatory approval for the acquisition and once the transaction is closed, we must integrate the acquisition into our operations. In 2012, we completed two acquisitions, Easy Choice Health Plan, Inc. in California and certain assets of Desert Canyon Community Care in Arizona, and in the first quarter of 2013, we completed our acquisition of UnitedHealth Group Incorporated's South Carolina Medicaid plan and Aetna, Inc.'s Missouri Medicaid plan. In January 2014, we completed our acquisition of Windsor from Munich Health North America, Inc., a part of Munich Re. Through its subsidiaries, Windsor serves Medicare beneficiaries with Medicare Advantage, Prescription Drug Plan and Medicare Supplement products. We are still integrating certain aspects of these acquisitions into our operations.

On June 30, 2014, we acquired certain Medicaid-related assets of Healthfirst Health Plan of New Jersey, Inc. ("Healthfirst NJ"), with the transfer of membership effective as of July 1, 2014. The acquired assets primarily relate to approximately 42,000 Healthfirst NJ Medicaid members who were transferred to our Medicaid plan in New Jersey, as well as certain provider agreements. As a result, beginning July 1, 2014, we offer Medicaid managed care in 10 counties in New Jersey.

Once an attractive acquisition target is identified, we may not be successful in bidding against competitors. Other potential acquirers may have greater financial resources or different profitability criteria than we have. Depending on the transaction size, we may not be able to obtain appropriate financing, especially in light of the volatility in the capital markets over the past several years.

Even if we are successful in bidding against competitors, we may not be able to obtain the regulatory approval from federal and state agencies required to complete the acquisition. We may not be able to comply with the regulatory requirements necessary for approval of the acquisition or state regulators may give preference to competing offers made by locally-owned entities, competitors with higher quality scores or not-for-profit entities.

Once acquired, we may have difficulties integrating the businesses within our existing operations, due to factors such as:

- new associates who must become familiar with our operations and corporate culture;
- acquired provider networks that operate on different terms than our existing networks and whose contracts may need to be renegotiated;
- existing members who decide to switch to another health care plan;
- disparate administrative and information technology systems; and
- difficulties implementing our operations strategy to operate the acquired businesses profitably.

As a result, our acquired businesses may not perform as we anticipated, or in line with our existing businesses. In addition, if the expected future profitability of the acquired business declines, we may need to write down or incur impairment charges of the acquired assets. For example, during the year ended December 31, 2014, we recorded a charge of $18.0 million to reflect the impairment of certain intangible assets associated with the acquisition of Easy Choice in 2012, and fully impaired the assets we acquired from Desert Canyon Community Care in Arizona, due to our decision to exit the Arizona MA market. In the future, we may incur additional material expenses in connection with the integration and execution of acquisitions, expansions, and other significant transactions.

Furthermore, we may incur significant transaction expenses in connection with a potential acquisition or expansion opportunity, which may not be successful. These expenses could impact our selling, general and administrative expense ratio. If we are unable to effectively execute our acquisition strategy or integrate acquired businesses, our future growth may suffer and our profitability may decrease.

Our rate of expansion into other geographic areas may also be inhibited by factors such as:

- the time and costs associated with obtaining the necessary licenses and approvals to operate;
- lower quality scores compared to our competitors;
- participation in fewer lines of business compared to our competitors;
- our inability to develop a network of physicians, hospitals and other health care providers that meets our requirements and those of government regulators;
- CMS or state contract provisions regarding quality measures, such as CMS Star Ratings;
- competition, which increases the cost of recruiting members;
- the cost of providing health care services in those areas;
- demographics and population density; and
- applicable state regulations that, among other things, require the maintenance of minimum levels of capital and surplus.

In any program start-up, acquisition, expansion, or re-bid, the implementation of the contract as designed may be affected by factors beyond our control. These include political considerations, network development, contract appeals, incumbency, participation in other lines of business, membership assignment (allocation of members who do not self-select), errors in the bidding process, changes to the program design or implementation timing, difficulties experienced by other private vendors involved in the implementation, such as enrollment brokers, and noncompliance with contractual requirements with which we do not yet have experience and similar risks. As a result, our business, particularly plans for expansion or increased membership levels, could be negatively impacted.

In addition, when making award determinations and evaluating proposed acquisitions and expansions, regulators frequently consider the plan's historical regulatory compliance, litigation and reputation and we are required to disclose

material investigations and litigation, including in some cases investigations and litigation that occurred in the past. As a result of the previous federal and state investigations, stockholder and derivative litigation, the restatement during 2009 of our previously issued financial statements and related matters, and the criminal trial of certain of our former executives and employees that concluded in the second quarter of 2013, we have been, and may continue to be, the subject of negative publicity. As a result, continuing negative publicity and other negative perceptions regarding these matters may adversely affect our ability to grow.

Our Medicaid operations are concentrated in a limited number of states. Loss of a material contract, reduced premium rates, or delayed payment of earned premiums may adversely impact our business, financial condition or results of operations.

Our concentration of Medicaid operations in a limited number of states could cause our revenue, profitability or cash flow to change suddenly and unexpectedly as a result of significant premium rate reductions, payment delays, loss of a material contract, legislative actions, changes in Medicaid eligibility methodologies, catastrophic claims, epidemics, pandemics, unexpected increases in utilization, advances in medical technology and pharmaceutical therapies, difficulties in managing provider costs, general economic conditions and similar factors in those states. Our inability to continue to operate in any of these states, or a significant change in the nature of our existing operations, could adversely affect our business, financial condition, or results of operations. Unfavorable changes in health care or other benefit costs or reimbursement rates or increased competition in these states could therefore have a disproportionately adverse effect on our operating results.

We provide managed care programs and selected services to individuals receiving benefits under federal assistance programs, including Medicare Advantage, Medicaid, and Children's Health Insurance Program ("CHIP"). We provide those health care services under contracts with regulatory entities in the areas in which we operate. For the year ended December 31, 2014, our Medicaid operations in Florida, Georgia and Kentucky each accounted for greater than 10% of our consolidated premium revenue, net of premium taxes. These customers accounted for contracts that have terms of between one and three years with varying expiration dates.

Our Medicaid contracts are generally intended to run for one to five years and in some cases may be extended for additional years if the state or other sponsoring agency elects to do so. When our state contracts expire, they may be opened for bidding by competing health care plans. For example, the last renewal option under our Georgia Medicaid contract expires in June 2016. On February 9, 2015, the Georgia Department of Community Health issued a request for proposals for its Medicaid program, under which services would commence on July 1, 2016. We are currently preparing our response. A total of nine companies, including us, have been deemed qualified to bid. The request for proposals indicates up to four companies may be selected to participate. In addition, the State of Missouri has issued a request for proposals for its Medicaid program for the period between July 1, 2015 and June 30, 2016, with two possible annual renewal periods. We have responded and are currently waiting for the state's contract award decision. There is no guarantee that our contracts will be renewed or extended or, if renewed or extended, on what terms. Further, our contracts with the states are subject to cancellation by the state after a short notice period in the event of unavailability of state funds. Our contracts could also be terminated if we fail to perform in accordance with the standards set by state regulatory agencies. If any of our contracts are terminated, not renewed or extended, renewed or extended on less favorable terms, or not renewed or extended on a timely basis, or if an increased number of competitors were awarded contracts in these states, our business will suffer, and our financial position, results of operations or cash flows may be materially affected.

State governments generally are experiencing tight budgetary conditions within their Medicaid programs. As a result, government agencies with which we contract may seek funding alternatives, which may result in reductions in funding for their Medicaid programs. If any state in which we operate were to decrease premiums paid to us for these reasons or any other reason, or pay us less than the amount necessary to keep pace with our cost trends, it could have a material adverse effect on our revenues and results of operations. We have experienced such rate decreases in the past and may do so in the future. Economic conditions affecting state governments and agencies could also result in delays in receiving premium payments. If there is a significant delay in our receipt of premiums to pay health benefit costs, it could have a material adverse effect on our results of operations, cash flows and liquidity.

A significant percentage of our Medicaid plan enrollment results from mandatory enrollment in Medicaid managed care plans. States may mandate that certain types of Medicaid beneficiaries enroll in Medicaid managed care through CMS-approved state plan amendments or, for certain groups, through federal waivers or demonstrations. Waivers and programs under demonstrations are generally approved for two- to five-year periods, and can be renewed on an ongoing basis if the state applies and the waiver request is approved or renewed by CMS. We have no control over this renewal process. If a state in which we operate does not mandate managed care enrollment in its state plan or does not renew an existing managed care waiver, our membership would likely decrease, which could have a material adverse effect on our results of operations.

We derive a significant portion of our revenue from our PDP operations, for which we submit annual bids for participation. The results of our bids could materially reduce our cash flow, liquidity, revenue and profits.

A significant portion of our PDP membership is obtained from the auto-assignment of beneficiaries in CMS-designated regions where our PDP premium bids are below benchmarks of other plans' bids. In general, our premium bids are based on assumptions regarding PDP membership, utilization, drug costs, drug rebates and other factors for each region. Our 2014 Medicare PDP bids were below the benchmarks in 30 of the 33 CMS regions for which we submitted bids. However, our 2015 PDP bids resulted in one of our basic plans being below the benchmarks in 13 of the 33 CMS regions for which we submitted bids and within the de minimis range in nine other regions. This resulted from the realignment of our benefit designs and cost structure. We may not be able to submit bids which are below benchmarks of other plans' bids in future years. Our membership has decreased in 2015 compared to 2014 as those PDP members who had been auto assigned to us in regions where our 2015 bids are not below or within the de minimis range have been assigned to other plans. For those regions in which we are within the de minimis range, we will not be eligible to have new members auto-assigned to us, but we will not lose our existing auto-assigned membership. If our future Part D premium bids are not below the CMS benchmarks, we risk losing PDP members who were previously assigned to us and we may not have additional PDP members auto-assigned to us, which could materially reduce our revenue and profits.

In 2014, our segment PDP MBR was higher than our expectation primarily due to higher utilization of branded and specialty drugs by our new members. We may not be successful in improving our segment MBR in the future, which would materially reduce our profits. For additional risks associated with estimating and managing our MBR, see "*If we are unable to estimate and manage medical benefits expense effectively, our profitability likely will be reduced or we could become unprofitable*" above.

Because the estimated costs of providing prescription drugs in our 2014 bids were substantially lower than our actual costs of providing prescription drugs, our funds receivable from CMS is higher than we anticipated. As a result, our unregulated cash and the net proceeds from a $300.0 million term loan drawn in September 2014 are being used to fund the costs of providing prescription drugs until the funds receivable from CMS are actually paid to us, which we expect to occur in the fourth quarter of 2015. Until such time, our cash flow and liquidity will be adversely affected, perhaps materially.

We may not be able to generate or access sufficient cash to service all of our indebtedness, and may be forced to take other actions to satisfy our obligations under our indebtedness, which may not be successful.

As of December 31, 2014, we had approximately $900.0 million in aggregate principal amount of total indebtedness outstanding consisting of a $300.0 million term loan and $600.0 million senior notes due 2020 (the "notes"). In addition, our credit agreement provides us with up to an additional $300.0 million of borrowing ability thereunder. Our ability to make scheduled payments on or to refinance our debt obligations depends on our and our subsidiaries' financial condition and operating performance, which is subject to prevailing economic and competitive conditions and to certain financial, business, competitive, legislative, regulatory and other factors beyond our control. As a result, we may not be able to maintain a level of cash flows from operating activities, or to access the cash flows of our subsidiaries in an amount sufficient to permit us to pay the principal and interest on our indebtedness, including the notes and the credit agreement. We cannot assure that our business will generate sufficient cash flow from operations, or that financing sources will be available to us in amounts sufficient to enable us to pay our indebtedness, including the notes and the credit agreement, or to fund our other liquidity needs.

In September 2014, we amended and restated our existing credit agreement to provide for a $300.0 million term loan, which expires in September 2016, to fund our PDP operations due to a receivable from CMS that has been accumulating during 2014. The PDP receivable from CMS primarily relates to low-income subsidies and catastrophic reinsurance coverage (reinsurance) provided by CMS under the Medicare PDP program. Because our 2014 PDP bids for the estimated costs of providing prescription drugs were substantially lower than our actual costs of providing prescription drugs, our funds receivable from CMS is higher than we anticipated. As a result, our unregulated cash and the proceeds from the term loan facility are being used to fund costs of providing prescription drugs until the funds receivable from CMS are actually paid to us, which we expect will occur in the fourth quarter of 2015. In addition, if our costs of providing prescription drugs in 2015 are higher than our estimates included in our 2015 PDP bids, then we could accumulate an additional large receivable from CMS. Our cash flow and liquidity could be adversely affected, perhaps materially.

If our cash flows and capital resources are insufficient to fund our debt service obligations, we may be forced to reduce or delay investments and capital expenditures, or to sell assets, seek additional capital or restructure or refinance our indebtedness, including the notes. These alternative measures may not be successful and may not permit us to meet our scheduled debt service obligations. Our ability to restructure or refinance our debt will depend on the condition of the capital markets and our financial condition at such time. Any refinancing of our debt could be at higher interest rates and may require us to comply with more onerous covenants, which could further restrict our business operations. The terms of existing or future debt instruments

and the indenture that governs the notes may restrict us from adopting some or all of these alternatives. If we are unable to pay our indebtedness on time, it could result in the acceleration of our indebtedness and materially adversely affect us.

If we commit a material breach of our Corporate Integrity Agreement, we may be excluded from certain programs, resulting in the revocation or termination of contracts and/or licenses potentially having a material adverse effect on our results of operations.

On April 26, 2011, we entered into a Corporate Integrity Agreement (the "Corporate Integrity Agreement") with the Office of the Inspector General of the Department of Health and Human Services ("OIG-HHS"). The Corporate Integrity Agreement has a term of five years and concludes the previously disclosed matters relating to us under review by OIG-HHS. The Corporate Integrity Agreement requires us to maintain various ethics and compliance programs that are designed to help ensure our ongoing compliance with federal health care program requirements. The terms of the Corporate Integrity Agreement include certain organizational structure requirements, internal monitoring requirements, compliance training, screening processes for new employees, who we call associates, requirements for reporting to OIG-HHS, and the engagement of an independent review organization to review and prepare written reports regarding, among other things, our reporting practices and bid submissions to federal health care programs.

If we fail to comply with the terms of the Corporate Integrity Agreement, we may be required to pay certain monetary penalties. Furthermore, if we commit a material breach of the Corporate Integrity Agreement, OIG-HHS will exclude us from participating in federal health care programs. Any such exclusion would result in the revocation or termination of contracts and/or licenses and potentially have a material adverse effect on our business and results of operations.

The requirements of the ACA, may have a material adverse effect on our results of operations, financial position and cash flows.

We believe the ACA will continue to bring about significant changes to the American health care system. These measures are intended to expand the number of United States residents covered by health insurance and make other coverage, delivery, and payment changes to the current health care system. The costs of implementing the ACA will be financed, in part, from substantial additional fees and taxes on us and other health insurers, health plans and individuals, as well as reductions in certain levels of payments to us and other health plans under Medicare.

On June 28, 2012, the U.S. Supreme Court upheld the constitutionality of the individual mandate contained in the ACA and modified the Medicaid expansion provisions to make the expansion optional for states. Some states have decided not to participate in the Medicaid expansion, and more states may choose not to participate in the future. Congress may also withhold the funding necessary to fully implement the ACA, may attempt to replace the legislation with amended provisions or could seek to repeal the law altogether. In 2015, the U. S. Supreme Court is scheduled to consider whether premium subsidies can be used in a federally facilitated exchange. Given the breadth of possible changes and the uncertainties of interpretation, implementation, and timing of these changes, which we expect to occur over the next several years, the ACA could change the way we do business, potentially impacting our pricing, benefit design, product mix, geographic mix, and distribution channels.

Regulations and policies related to the implementation of the ACA, the Budget Control Act of 2011, and the Continuing Appropriations Act of 2014, as well as future legislative changes, may have a material adverse effect on our results of operations, financial position, and cash flows by:

- restricting revenue, enrollment and premium growth in certain products and market segments;
- restricting our ability to expand into new markets;
- increasing our medical and administrative costs;
- lowering our Medicare payment rates and/or increasing our expenses associated with the non-deductible federal premium tax and other assessments;
- encouraging states to contract with organizations that are not subject to the annual premium-based health insurance industry assessment imposed by the ACA (the "ACA industry fee") for their Medicaid programs; and
- encouraging states to integrate Medicare and Medicaid using a limited number of health plans or a fee for service model.

In addition, the response of other companies to these policy, regulatory and legislative changes and adjustments to their offerings, if any, could have a meaningful impact in the health care markets.

The ACA includes a number of changes that could impact the way MA plans will operate, such as:

- ***Reduced Medicare Premium Rates.*** On April 7, 2014, CMS revised their proposed 2015 rates, which we estimate will result in a rate decrease in the low single digit percentage from our 2014 rates.

- ***CMS Star Ratings.*** Certain provisions in the ACA tie MA premiums to the achievement of Star Ratings. Beginning in 2015, MA plans with an overall Star Rating of four or more stars will be eligible for a quality bonus in their basic premium rates. Plans that receive quality bonuses may have a competitive advantage in the Medicare market, as they may be able to offer more attractive benefit packages to members and/or achieve higher profit margins. Also, beginning with open enrollment for the 2014 plan year, Part C or Part D Medicare plans with Star Ratings of less than three stars for three consecutive years have been excluded from mention in the CMS "Medicare and You" handbook, denoted as "low performing" plans on the CMS website, and excluded from on-line enrollment through the Medicare Plan Finder website. These actions may adversely impact these plans' ability to maintain or increase membership. CMS could exercise its authority and terminate the MA and PDP contracts for plans rated below three stars for three consecutive years for the plan year 2015. However, CMS could still exercise its authority and terminate those plans for the plan year 2016. We serve a larger percentage of D-SNP members than our competitors, and this population is more challenging to serve. CMS's quality measurement methodology does not account for population differences between plans, and therefore, we may be unable to achieve a four star rating for some or all of our plans. Our MA plans in Louisiana and our Windsor MA plans, representing approximately 47,000 members as of January 1, 2015, could be terminated effective December 31, 2015 if their Part C and Part D star ratings are not at least three stars for the plan year 2016. While we are continuing efforts to improve our Star Ratings and other quality measures, there is no guarantee that we will be able to maintain or improve our Star Ratings.

- ***Minimum MLRs.*** Beginning in 2014, the ACA requires the establishment of a MLR for MA plans and Part D plans, requiring them to spend not less than 85% of premiums on medical benefits. The rules implementing the minimum MLR impose financial and other penalties for failing to achieve the minimum MLR, including requirements to refund to CMS shortfalls in amounts spent on medical benefits and termination of a plan's MA contract for prolonged failure to achieve the minimum MLR. MLR is determined by adding a plan's spending for clinical services, prescription drugs and other direct patient benefits, plus its total spending on quality improvement activities and dividing the total by earned premiums (after subtracting specific identified taxes and other fees).

Under the ACA, over a 10-year period beginning in 2010, the "coverage gap" (i.e., the dollar threshold at which an individual has to pay full price for his or her medications) under Part D has been gradually closing, with beneficiaries retaining a 25% co-pay in 2020. While this change will ultimately result in increased insurance coverage for beneficiaries, such improved benefits could result in changes in member behavior with respect to drug utilization. Such actions could impact the cost structure of our PDPs.

The ACA imposed certain new taxes and fees, including limitations on the amount of compensation that is tax deductible, as well as an annual premium-based health insurance industry assessment (the "ACA industry fee") on health insurers which began in 2014. The total ACA industry fee levied on the health insurance industry was $8 billion in 2014 and will be $11.3 billion in 2015, with increasing annual amounts thereafter, and growing to $14.3 billion by 2018. After 2018, the industry fee increases according to an index based on net premium growth. The assessment is being levied on certain health insurers that provide insurance in the assessment year, and is allocated to health insurers based on each health insurer's share of net premiums for all U.S. health insurers in the year preceding the assessment. The ACA industry fee is not deductible for income tax purposes, which has significantly increased our effective income tax rate. We incurred $137.7 million of such fees in 2014 and currently estimate that we will incur between $230 and $235 million in such fees in 2015, due to the increase in the total fee to be levied on the industry and the expected increase in our share of total 2014 industry premiums. However, the 2015 final fee amount will not be determined until August 2015. We have received amendments, written agreements or other documentation from all our Medicaid state customers, that commit them to reimburse us for the portion of the ACA industry fee on our Medicaid plans, including its non-deductibility for income tax purposes for 2014. Consequently, we recognized $124.6 million of reimbursement for the ACA industry fee as premium revenue for the year ended December 31, 2014. We have also obtained similar commitments from our Medicaid customers for 2015. CMS does not directly reimburse us for the impact of the ACA industry fee related to MA and PDP premiums.

The health reforms in the ACA allow, but do not require, states to expand eligibility for Medicaid programs. As a result, the effects of any potential future expansions and future federal financing are uncertain, making it difficult to determine whether the net impact of the ACA will be positive or negative for our Medicaid business.

Future changes in health care law present challenges for our business that could have a material adverse effect on our results of operations and cash flows.

Future changes in, or interpretations to, existing health care laws or regulations, or the enactment of new laws or the issuance of new regulations could materially reduce our revenue and/or profitability by, among other things:

- imposing additional license, registration and/or capital requirements;
- increasing our administrative and other costs;
- requiring us to change our operating structure;
- requiring significant additional reporting and technological capabilities;
- imposing additional fees and taxes, which cannot be offset by increased premium revenue;
- increasing mandated benefits;
- further limiting our ability to engage in intra-company transactions with our affiliates and subsidiaries;
- restricting our revenue and enrollment growth;
- requiring us to restructure our relationships with providers; and
- requiring us to implement additional or different programs and systems.

Requirements relating to increased plan information disclosure, expedited appeals and grievance procedures, third party review of certain medical decisions, health plan liability, access to specialists, "clean claim" (a claim for which no additional information is needed), payment methodologies and timing, utilization of mail order pharmacy, administrative simplification, mandatory network inclusion of certain providers, mandated increases in provider reimbursement rates, physician collective bargaining rights, centralized credentialing and confidentiality of medical records either have been enacted or are under consideration. Changes in state law, regulations and rules also may have a material adverse impact on our results of operations and cash flows.

The ACA ends funding for CHIP as of September 30, 2015 and the Special Needs Program has only been authorized through December 31, 2016. If these programs are not funded, renewed or extended, it could have a material adverse impact on our revenues, cash flow, membership and profitability.

Our encounter data may be inaccurate or incomplete, which could have a material adverse effect on our results of operations, cash flows and ability to bid for, and continue to participate in, certain programs.

Our contracts require the submission of complete and correct encounter data. The accurate and timely reporting of encounter data is increasingly important to the success of our programs because more states are using encounter data to determine compliance with performance standards and, in part, to set premium rates. We have expended and may continue to expend additional effort and incur significant additional costs to collect or correct inaccurate or incomplete encounter data and have been and could be exposed to operating sanctions and financial fines and penalties for noncompliance. In some instances, our government clients have established retroactive requirements for the encounter data we must submit. There also may be periods of time in which we are unable to meet existing requirements. In either case, it may be prohibitively expensive or impossible for us to collect or reconstruct this historical data.

We have experienced challenges in obtaining complete and accurate encounter data, due to difficulties with providers and third-party vendors submitting claims in a timely fashion in the proper format, and with state agencies in coordinating such submissions. As states increase their reliance on encounter data, these difficulties could affect the premium rates we receive and how membership is assigned to us, which could have a material adverse effect on our results of operations, cash flows and our ability to bid for, and continue to participate in, certain programs.

We encounter significant competition for program participation, members, network providers, key personnel and sales personnel and our failure to compete successfully may limit our ability to increase or maintain membership in the markets we serve, or have a material adverse effect on our business, growth prospects and results of operations.

We operate in a highly competitive industry. Some of our competitors are more established in the insurance and health care industries, with larger market share, greater financial resources and better quality scores than we have in some markets. We operate in, and may attempt to acquire business in, programs or markets in which premiums are determined on the basis of a competitive bidding process. In these programs or markets, funding levels established by bidders with significantly different cost structures, target profitability margins or aggressive bidding strategies could negatively impact our ability to maintain or acquire profitable businesses, which could have a material adverse effect on our results of operations.

We did not to participate in the health insurance exchange products during 2014 and we are only participating in the exchanges in Kentucky and New York in 2015. As a result, individuals who select an exchange product in our other states, and subsequently become eligible for a Medicaid plan that we offer, may be less likely to select or be assigned to us.

Regulatory reform or other initiatives may bring additional competitors into our markets. Regulators may prefer companies that operate in lines of business in which we do not operate when we bid on new business or renewals of existing business, which may cause our bid or renewal to be unsuccessful.

We compete for members principally on the basis of size and quality of provider network, benefits provided and quality of service. We may not be able to develop innovative products and services that are attractive to members. We cannot be sure that we will continue to remain competitive, nor can we be sure that we will be able to successfully retain or acquire members for our products and services at current levels of profitability.

In addition, we compete with other health plans to contract with hospitals, physicians, pharmacies and other providers for inclusion in our networks that serve government program beneficiaries. We believe providers select plans in which they participate based on several criteria including reimbursement rates, timeliness and accuracy of claims payment, potential to deliver new patient volume and/or retain existing patients, effectiveness of resolution of calls and complaints and other factors. We cannot be sure that we will be able to successfully attract or retain providers under acceptable contract terms to maintain a competitive network in the geographic areas we serve.

We may not be able to attract or retain qualified management, clinical and commercial personnel in the future due to the intense competition for qualified personnel in the managed care and health care industry. If we are not able to attract and retain necessary personnel to accomplish our business objectives, we may experience constraints that will significantly impede the achievement of our objectives, our ability to raise additional capital and our ability to implement our business strategy. In particular, if we lose any members of our senior management team, we may not be able to find suitable replacements, and our business may be harmed as a result. In addition, we have in the past and may in the future modify our senior management structure, which could impact our retention of employees and management.

Our MA plans are sold primarily through our sales personnel, who frequently work with independent brokers, consultants and agents who assist in the production and servicing of business. The independent brokers, consultants and agents generally are not dedicated to us exclusively and may also recommend and/or market health care benefits products of our competitors, and we must compete intensely for their services and allegiance. Our sales could be adversely affected if we are unable to attract or retain sales personnel and third-party brokers, consultants and agents or if we do not adequately provide support, training and education to this sales network regarding our product portfolio, which is complex, or if our sales strategy is not appropriately aligned across distribution channels.

To the extent that competition intensifies in any market that we serve, our ability to retain or increase members and providers, maintain or increase our revenue growth, and control medical cost trends and/or our pricing flexibility, may be adversely affected. Failure to compete successfully in the markets we serve may have a material adverse effect on our business, growth prospects and results of operations.

Risk-adjustment payment systems make our revenue and results of operations more difficult to estimate and could result in material retroactive adjustments that have a material adverse effect on our results of operations, financial position and cash flows.

Most of our government customers employ risk-adjustment models to determine the premium amount they pay for each member. This model pays more for members with predictably higher costs according to the health status of each beneficiary enrolled. Premium payments are generally established at fixed intervals according to the contract terms, and then adjusted on a retroactive basis. We reassess the estimates of the risk adjustment settlements each reporting period and any resulting adjustments are made to premium revenue. In addition, revisions to the risk-adjustment models have reduced, and may continue to reduce, our premium revenue.

As a result of the variability of certain factors that determine estimates for risk-adjusted premiums, including plan risk scores, the actual amount of retroactive payments could be materially more or less than our estimates. Consequently, our estimate of our plans' risk scores for any period, and any resulting change in our accrual of premium revenues related thereto, could have a material adverse effect on our results of operations, financial position and cash flows. The data provided to our government customers to determine the risk score are subject to audit by them even after the annual settlements occur. These audits may result in the refund of premiums to the government customer previously received by us, which could be significant and would reduce our premium revenue in the year that repayment is required.

Government customers have performed and continue to perform audits of selected plans to validate the provider coding practices under the risk adjustment model used to calculate the premium paid for each member. Our Florida and Arizona MA plans have been selected by CMS for audits of the 2011 contract year and we anticipate that CMS will conduct audits of other contracts and contract years on an on-going basis. An audit may result in the refund of premiums to CMS. It is likely that a

payment adjustment could occur as a result of these audits, and that any such adjustment could have a material adverse effect on our results of operations, financial position, and cash flows.

Recent changes in our senior management may cause uncertainty in, or be disruptive to, our business, results of operations, financial condition and the market price of our common stock.

We have recently experienced significant changes in our senior management. Effective January 1, 2015, Kenneth Burdick, previously our President and Chief Operating Officer, was promoted to Chief Executive Officer, replacing David Gallitano, our interim Chief Executive Officer. In December 2014, Blair Todt, previously our Senior Vice President, Chief Strategy and Development Officer, assumed the newly created role of Senior Vice President, Chief Legal and Administrative Officer and Secretary replacing Lisa Iglesias and her role as Senior Vice President, General Counsel and Secretary. In November 2014, Andrew Asher replaced Thomas Tran as our Chief Financial Officer. In April 2014, Michael Yount, our former Chief Privacy Officer, replaced Cyndi Baily as our Senior Vice President and Chief Compliance Officer. In February 2014, Rose Hauser joined us as our Chief Information Officer. These changes in our senior management may be disruptive to our business and, during the transition period, there may be uncertainty among investors, employees and others concerning our future direction and performance. Any such disruption or uncertainty could have a material adverse impact on our results of operations and financial condition and the market price of our common stock.

We are subject to extensive government regulation and risk of litigation, and any actual or alleged violation by us of the terms of our contracts, applicable laws or regulations could have a material adverse effect on our results of operations.

Our business is extensively regulated by the federal government and the states in which we operate. The laws and regulations governing our operations are generally intended to benefit and protect health plan members and providers rather than stockholders and creditors. The government agencies administering these laws and regulations have broad latitude to enforce them. These laws and regulations, along with the terms of our government contracts, regulate how we do business, what services we offer, and how we interact with our members, providers and the public. Any actual or alleged violation by us of applicable laws or regulations could reduce our revenues and profitability, thereby having a material adverse effect on our results of operations.

We face a significant risk of class action lawsuits and other litigation and regulatory investigations and actions in the ordinary course of operating our businesses. The following are examples of types of potential litigation and regulatory investigations we face:

- claims by government agencies relating to compliance with laws and regulations;
- claims relating to sales practices;
- claims relating to the methodologies for calculating premiums;
- claims relating to the denial or delay of health care benefit payments;
- claims relating to claims payments and procedures;
- claims relating to provider marketing;
- claims by providers for network termination or exclusion;
- anti-kickback claims;
- medical malpractice or negligence actions based on our medical necessity decisions or brought against us on the theory that we are liable for our providers' malpractice or negligence;
- allegations of anti-competitive and unfair business activities;
- provider disputes over compensation and termination of provider contracts or defamation claims;
- allegations of discrimination;
- allegations of breaches of duties;
- claims relating to inadequate or incorrect disclosure or accounting in our public filings and other statements;
- allegations of agent misconduct;
- claims related to deceptive trade practices; and
- claims relating to audits and contract performance.

As we contract with various governmental agencies to provide managed health care services, we are subject to various reviews, audits and investigations to verify our compliance with the contracts and applicable laws and regulations. Any adverse review, audit, investigation or result from litigation could result in:

- loss of our right to participate in government-sponsored programs, including Medicaid and Medicare;
- forfeiture or recoupment of amounts we have been paid pursuant to our government contracts;
- imposition of significant civil or criminal penalties, fines or other sanctions on us and/or our key associates;
- reduction or limitation of our membership;
- damage to our reputation in various markets;

- increased difficulty in marketing our products and services;
- inability to obtain approval for future acquisitions or service or geographic expansion;
- suspension or loss of one or more of our licenses to act as an insurer, HMO or third party administrator or to otherwise provide a service; and
- an event of default under our debt agreements.

In particular, because we receive payments from federal and state governmental agencies, we are subject to various laws commonly referred to as "fraud and abuse" laws, including the federal False Claims Act, which permit agencies and enforcement authorities to institute suit against us for violations and, in some cases, to seek treble damages, penalties and assessments. Many states, including states where we currently operate, have enacted parallel legislation. Liability under such federal and state statutes and regulations may arise if we know, or it is found that we should have known, that information we provide to form the basis for a claim for government payment is false or fraudulent.

Some courts have permitted False Claims Act suits to proceed if the claimant was out of compliance with program requirements. Liability for such matters could have a material adverse effect on our financial position, results of operations and cash flows. Qui tam actions under federal and state law can be brought by any individual on behalf of the government. Qui tam actions have increased significantly in recent years, causing greater numbers of health care companies to defend false claim actions, pay fines or be excluded from Medicare, Medicaid or other state or federal health care programs as a result of investigations arising out of such actions.

For example, in October 2008, the Civil Division of the United States Department of Justice (the "Civil Division") informed us that as part of its civil inquiry, it was investigating four qui tam complaints filed by relators against us under the whistleblower provisions of the False Claims Act. We also learned from a docket search that a former employee filed a qui tam action in state court for Leon County, Florida against several defendants, including us and one of our subsidiaries. With respect to these actions, we reached a settlement with the Civil Division, the Civil Division of the United States Attorney's Office for the Middle District of Florida, and the Civil Division of the United States Attorney's Office for the District of Connecticut. However, other qui tam actions may have been filed against us of which we are presently unaware, or other qui tam actions may be filed against us in the future.

We are currently undergoing standard periodic audits by several state agencies and CMS to verify compliance with our contracts and applicable laws and regulations. For additional risks associated with these audits, see "*Risk-adjustment payment systems make our revenue and results of operations more difficult to estimate and could result in material retroactive adjustments that have a material adverse effect on our results of operations, financial position and cash flows*" above.

In addition, there have been a number of investigations regarding the marketing practices of brokers and agents selling health care and other insurance products and the payments they receive. These have resulted in enforcement actions against companies in our industry and brokers and agents marketing and selling those companies' products. For example, CMS and state departments of insurance have increased their scrutiny of the marketing practices of brokers and agents who market Medicare products. These investigations and enforcement actions could result in penalties and the imposition of corrective action plans and/or changes to industry practices, which could adversely affect our ability to market our products.

We rely on the accuracy of eligibility lists provided by our government clients to collect premiums, and any inaccuracies in those lists may cause states to recoup premium payments from us, which could materially reduce our revenues and results of operations.

Premium payments that we receive are based upon eligibility lists produced by our government clients. A state will require us to reimburse it for premiums that we received from the state based on an eligibility list that it later discovers contains individuals who were not eligible for any government-sponsored program, have been enrolled twice in the same program, have secondary insurance or are eligible for a different premium category, or a different program. Our review of remittance files may not identify all member eligibility errors and could result in repayment of premiums in years subsequent to the year in which the revenue was recorded. We have established a reserve in anticipation of recoupment by the states of previously paid premiums that we believe to be erroneous, but ultimately our reserve may not be sufficient to cover the amount, if any, of recoupments. If the amount of any recoupment exceeds our reserves, our revenues could be materially reduced and it could have a material adverse effect on our results of operations.

In addition to recoupment of premiums previously paid, we also face the risk that a state could fail to pay us for members for whom we are entitled to payment. Our results of operations would be reduced as a result of the state's failure to pay us for related payments we made to providers and were unable to recoup.

If we are unable to access sufficient capital, whether as a result of difficulties finding acceptable public or private financing, restrictions under our credit agreement, the notes, restrictions on dividend payments from our subsidiaries, or higher levels of required statutory capital, we may be unable to grow or maintain our business, which could have a material adverse effect on our results of operations, cash flows and financial condition.

Our business strategy has been defined by four long-term business priorities, one of which includes our ability to enter new markets by pursuing attractive growth opportunities for our existing product lines. We may need to access the debt or equity markets and receive dividends from our subsidiaries to fund these growth activities.

Our ability to enter new markets may be hindered in situations where financing may not be available on terms that are favorable to us, or at all. Financing may only be available to us with unfavorable terms such as high rates of interest, restrictive covenants and other restrictions that could impede our ability to profitably operate our business and increase the expected rate of return we require to enter new markets, making such efforts unfeasible.

Our credit agreement and notes have restrictions on our ability to secure additional capital. Our substantial indebtedness and restrictive covenants:

- limit our ability to borrow additional funds for working capital, capital expenditures, acquisitions and general corporate or other purposes; and
- expose us to greater interest rate risk since the interest rate on borrowings under our credit agreement is variable.

Our debt service obligations require us to use a portion of our operating cash flow to pay interest and principal on indebtedness instead of for other corporate purposes, including funding future expansion of our business and ongoing capital expenditures, which could impede our growth. If our operating cash flow and capital resources are insufficient to comply with the financial covenants in the credit agreement or to service our debt obligations, we may be forced to sell assets, seek additional equity or debt financing or restructure our debt, which could harm our long-term business prospects.

Our credit agreement and notes also contain various restrictions and covenants that restrict our financial and operating flexibility, including our ability to grow our business or declare dividends without lender approval. If we fail to pay any of our indebtedness when due, or if we breach any of the other covenants in the instruments governing our indebtedness, one or more events of default may be triggered. If we are unable to obtain a waiver, these events of default could permit our creditors to declare all amounts owed to be immediately due and payable.

In addition, in most states, we are required to seek the prior approval of state regulatory authorities to transfer money or pay dividends from our regulated subsidiaries in excess of specified amounts or, in some states, any amount. If our state regulators do not approve payments of dividends and/or distributions by certain of our regulated subsidiaries to us or our non-regulated subsidiaries, our liquidity, unregulated cash flows, business and financial condition may be materially adversely affected.

Our licensed HMO and insurance subsidiaries are subject to state regulations that, among other things, require the maintenance of minimum levels of statutory capital and maintenance of certain financial ratios, as defined by each state. One or more of these states may raise the statutory capital level from time to time, which could have a material adverse effect on our cash flows and liquidity.

Our subsidiaries also may be required to maintain higher levels of statutory capital due to the adoption of risk-based capital requirements by other states in which we operate. Our subsidiaries are subject to their state regulators' general oversight powers. Regardless of whether a state adopts the risk-based capital requirements, the state's regulators can require our subsidiaries to maintain minimum levels of statutory net worth in excess of amounts required under the applicable state laws if they determine that maintaining such additional statutory net worth is in the best interests of our members and other constituents. For example, if premium rates are inadequate, reduced profits or losses in our regulated subsidiaries may cause regulators to increase the amount of capital required. Any additional capital contribution made to one or more of the affected subsidiaries could have a material adverse effect on our liquidity, cash flows and growth potential. In addition, increases of statutory capital requirements could cause us to withdraw from certain programs or markets where it becomes economically difficult to continue operating profitably.

Our indemnification obligations and the limitations of our director and officer liability insurance may have a material adverse effect on our financial condition, results of operations and cash flows.

Under Delaware law, our charter and bylaws and certain indemnification agreements to which we are a party, we have an obligation to indemnify, or we have otherwise agreed to indemnify, certain of our current and former directors, officers and associates with respect to current and future investigations and litigation. In connection with some pending matters, including

the recent criminal trial of certain of our former executives and associates, we are required to, or we have otherwise agreed to, advance, and have advanced, significant legal fees and related expenses and expect to continue to do so while these matters are pending. We have exhausted our insurance for the expenses associated with the criminal trial of our former executive officers and associates, and the related government investigations that commenced in 2007, and further expenses incurred by us for these matters will not be reimbursed.

We currently maintain insurance in the amount of $125.0 million which provides coverage for our independent directors and officers hired after January 24, 2008 for certain potential matters to the extent they occur after October 2007. We cannot provide any assurances that pending claims, or claims yet to arise, will not exceed the limits of our insurance policies, that such claims are covered by the terms of our insurance policies or that our insurance carrier will be able to cover our claims.

We are exposed to fluctuations in the securities and debt markets, which could impact our investment portfolio.

Our investment portfolio represents a significant portion of our assets and is subject to general credit, liquidity, market and interest rate risks. Market fluctuations in the securities and credit markets could impact the value or liquidity, of our investment portfolio and adversely impact interest income. As a result, we may experience a reduction in value or loss of liquidity which may materially impact our results of operations, liquidity and financial condition.

Risks Related to Ownership of Our Stock

We are subject to laws, government regulations and agreements that may delay, deter or prevent a change in control of our Company, which could have a material adverse effect on our ability to enter into transactions favorable to stockholders.

Our operating subsidiaries are subject to state laws that require prior regulatory approval for any change of control of an HMO or insurance company. For purposes of these laws, in most states "control" is presumed to exist when a person, group of persons or entity acquires the power to vote 10% or more of the voting securities of another entity, subject to certain exceptions. These laws may discourage acquisition proposals and may delay, deter or prevent a change of control of our company, including through transactions, and in particular through unsolicited transactions, which could have a material adverse effect on our ability to enter into transactions that some or all of our stockholders find favorable.

In addition, in our settlement with the Civil Division, we agreed to pay $35.0 million in the event that we are acquired or otherwise experience a change in control on or before April 30, 2015, provided the transaction meets certain criteria specified in the settlement agreement.

Our stock price and trading volume may be volatile and future sales of our common stock could adversely affect the trading price of our common stock.

From time to time, the price and trading volume of our common stock, as well as the stock of other companies in the health care industry, may experience periods of significant volatility. Company-specific issues and developments generally in the health care industry (including the regulatory environment) and the capital markets and the economy in general may cause this volatility. Our stock price and trading volume may fluctuate in response to a number of events and factors, including:

- variations in our operating results;
- changes in our or the market's expectations about our future operating results;
- changes in financial estimates and recommendations by securities analysts concerning our Company or the health care industry generally;
- operating and stock price performance of other companies that investors may deem comparable;
- news reports relating to trends in our markets;
- changes or proposed changes in the laws, regulations and policies affecting our business;
- acquisitions and financings by us or others in our industry;
- changes in our senior management;
- sales of substantial amounts of our common stock by our directors and executive officers or principal stockholders, or the perception that such sales could occur; and
- the risks described in "Risks Related to Our Business" above.

We may issue equity securities in the future, including securities that are convertible into or exchangeable for, or that represent the right to receive, common stock. We have an effective shelf registration statement on Form S-3 filed with the SEC under which we may offer from time to time an indeterminate amount of any combination of debt securities, common and preferred stock and warrants. The registration statement allows us to seek additional financing, subject to the SEC's rules and regulations relating to eligibility to use Form S-3. Debt financing, if available, may involve restrictive covenants.

The issuance of additional shares of our common stock or other equity securities, including sales of shares in connection with any future acquisitions, could be substantially dilutive to our stockholders. These sales may have a harmful effect on prevailing market prices for our common stock and our ability to raise additional capital in the financial markets at a time and price favorable to us. Holders of shares of our common stock have no preemptive rights that entitle them to purchase a pro rata share of any offering of shares of any class or series and, therefore, such sales or offerings could result in increased dilution to our stockholders. Our certificate of incorporation provides that we have authority to issue 100,000,000 shares of common stock and 20,000,000 shares of preferred stock.

Risks Related to Information Technology

If we are unable to maintain effective and secure management information systems and applications, successfully update or expand processing capability or develop new capabilities to meet our business needs we could experience operational disruptions and other materially adverse consequences to our business and results of operations.

Our business depends on effective and secure information systems, applications and operations. The information gathered, processed and stored by our management information systems assists us in, among other things, marketing and sales and membership tracking, billing, claims processing, medical management, medical care cost and utilization trending, financial and management accounting, reporting, and planning and analysis. These systems also support our customer service functions, provider and member administrative functions and support tracking and extensive analysis of medical expenses and outcome data. These systems remain subject to unexpected interruptions resulting from occurrences such as hardware failures or increased demand. There can be no assurance that such interruptions will not occur in the future, and any such interruptions could have a material adverse effect on our business and results of operations. Moreover, operating and other issues can lead to data problems that affect the performance of important functions, including, but not limited to, claims payment, customer service and financial reporting.

There can also be no assurance that our process of improving existing systems, developing new systems to support our operations, complying with contractual data requirements and improving service levels will not be delayed or that system issues will not arise in the future. Our information systems and applications require continual maintenance, upgrading and enhancement to meet our operational needs. If we are unable to maintain or expand our systems, we could suffer from, among other things, operational disruptions, such as the inability to pay claims or to make claims payments on a timely basis, loss of members, difficulty in attracting new members, regulatory problems, difficulty in improving quality, increases in administrative expenses and write-offs of our expenditures in unsuccessful capital investments.

Additionally, events outside our control, including terrorism or acts of nature such as hurricanes, earthquakes, or fires, could significantly impair our information systems, applications and critical business functions. To help ensure continued operations in the event that our primary operations are rendered inoperable, we have a disaster recovery plan to recover critical business functionality within stated timelines. Our plan may not operate effectively during an actual disaster and our operations and critical business functions could be disrupted, which would have a material adverse effect on business and our results of operations.

Our costs to comply with laws governing the transmission, security and privacy of health information could be significant, and any disruptions or security breaches in our information technology systems could have a material adverse effect on our business, cash flows, operating results or financial condition.

Our business requires the secure transmission of confidential information over public networks. Advances in computer capabilities, new discoveries in the field of cryptography or other events or developments could result in compromises or breaches of our security systems and client data stored in our information systems. Anyone who circumvents our security measures could misappropriate our confidential information or cause interruptions in services or operations. The Internet is a public network, and data is sent over this network from many sources. In the past, computer viruses or software programs that disable or impair computers have been distributed and have rapidly spread over the Internet. Computer viruses could be introduced into our systems or those of our providers or regulators, which could disrupt our operations or make our systems inaccessible to our providers or regulators. We may be required to expend significant capital and other resources to protect against the threat of security breaches or to alleviate problems caused by breaches.

Failure to keep our computer networks, information technology systems, computers and programs and our members' and customers' sensitive information secure from attack, damage or unauthorized access, whether as a result of our action or inaction or that of one of our business associates or other vendors, could adversely affect our reputation, membership and revenues and also expose us to mandatory disclosure to the media, contract termination, litigation (including class action litigation), and other enforcement proceedings, material fines, penalties and/or remediation costs, and compensatory, special,

punitive and statutory damages, consent orders, adverse actions against our licenses to do business and/or injunctive relief, any of which could adversely affect our business, cash flows, operating results or financial condition.

Our measures to prevent security breaches may not be successful. As we expand our business, including through acquisitions and organic growth, increase the amount of information we make available to members and consumers on mobile devices and expand our use of social media, our exposure to these data security and related cybersecurity risks, including the risk of undetected attacks, damage or unauthorized access, increases, and the cost of attempting to protect against these risks also increases.

The Health Information Technology for Economic and Clinical Health Act (the "HITECH Act"), one part of the American Recovery and Reinvestment Act of 2009 ("ARRA"), modified certain provisions of the Health Insurance Portability and Accountability Act ("HIPAA") by, among other things, extending the privacy and security provisions to business associates, mandating new regulations around electronic health records, expanding enforcement mechanisms, and increasing penalties for violations. Civil penalties for HIPAA violations by covered entities are up to an annual maximum of $1.5 million for uncorrected violations based on willful neglect. HHS is required to conduct periodic audits to confirm compliance. Investigations of violations that indicate willful neglect, for which penalties became mandatory in February 2011, are statutorily required. In addition, state attorneys general are authorized to bring civil actions seeking either injunctions or damages in response to violations of HIPAA privacy and security regulations that threaten the privacy of state residents.

In addition, the HITECH Act requires us to notify affected individuals, HHS, and in some cases the media when unsecured personal health information is subject to a security breach.

The HITECH Act also contains a number of provisions that provide incentives for states to initiate certain programs related to health care and health care technology, such as electronic health records. While provisions such as these do not apply to us directly, states wishing to apply for grants under the HITECH Act, or otherwise participating in such programs, may impose new health care technology requirements on us through our contracts with state Medicaid agencies. We are unable to predict what such requirements may entail or what their effect on our business may be.

On January 25, 2013, HHS, as required by the HITECH Act, issued the Final Omnibus Rules that provide final modifications to HIPAA rules to implement the HITECH Act. The various requirements of the HITECH Act have different compliance dates, some of which have passed and some of which will occur in the future. We will continue to assess our compliance obligations as regulations under HIPAA as modified by the HITECH Act continue to become effective and more guidance becomes available from HHS and other federal agencies. The evolving privacy and security requirements, however, may require substantial operational and systems changes, associate education and resources and there is no guarantee that we will be able to implement them adequately or prior to their effective date. Given HIPAA's complexity and the evolving regulations, which may be subject to changing and perhaps conflicting interpretation, our ongoing ability to comply with all of the HIPAA requirements is uncertain, which may expose us to the criminal and increased civil penalties provided under the HITECH Act and may require us to incur significant costs in order to seek to comply with its requirements.

Our business could be adversely impacted by adoption of the new ICD-10 standardized coding set for diagnoses.

HHS has released rules pursuant to HIPAA which mandate the use of standard formats in electronic health care transactions. HHS also has published rules requiring the use of standardized code sets and unique identifiers for providers. By October 1, 2015, the federal government will require that health care organizations, including health insurers, upgrade to updated and expanded standardized code sets used for documenting health conditions. These new standardized code sets, known as ICD-10, has required and will continue to require substantial investments from health care organizations, including us. While use of the ICD-10 code sets will require significant administrative changes, the cost of compliance with these regulations has not had and we do not expect it to have a material adverse effect on our cash flows, financial position or results of operations. However, these changes may result in errors and otherwise negatively impact our service levels, and we may experience complications related to supporting customers that are not fully compliant with the revised requirements as of the applicable compliance date. Furthermore, if physicians fail to provide appropriate codes for services provided as a result of the new coding set, we may not be reimbursed, or adequately reimbursed, for such services.

Item 1B. Unresolved Staff Comments.

None.

Item 2. Properties.

Our principal administrative, sales and marketing facilities are located at our leased corporate headquarters in Tampa, Florida. Our corporate headquarters is used in all of our lines of business. As of December 31, 2014, we also leased office space for the administration of our health plans in Arizona, California, Connecticut, Florida, Georgia, Hawaii, Illinois, Kentucky, Louisiana, Missouri, New Jersey, New York, Ohio, South Carolina, Tennessee, Texas and Washington. These properties are all in good condition and are well maintained. We believe these facilities are suitable and provide the appropriate level of capacity for our current operations. Upon expiration of the terms of the leases, we believe we could renew these leases on acceptable terms, or find suitable space elsewhere.

Item 3. Legal Proceedings.

United States Department of Health and Human Services

In April 2011, we entered into a Corporate Integrity Agreement (the "Corporate Integrity Agreement") with the Office of Inspector General of Health and Human Services ("OIG-HHS"). The Corporate Integrity Agreement has a term of five years. The Corporate Integrity Agreement requires various ethics and compliance programs designed to help ensure our ongoing compliance with federal health care program requirements. The terms of the Corporate Integrity Agreement include certain organizational structure requirements, internal monitoring requirements, compliance training, screening processes for new employees, reporting requirements to OIG-HHS, and the engagement of an independent review organization to review and prepare written reports regarding, among other things, our reporting practices and bid submissions to federal health care programs.

If we fail to comply with the terms of the Corporate Integrity Agreement we may be required to pay certain monetary penalties. Furthermore, if we commit a material breach of the Corporate Integrity Agreement, OIG-HHS may exclude us from participating in federal health care programs. Any such exclusion would result in the revocation or termination of contracts and/or licenses and have a material adverse effect on our results of operations.

Other Lawsuits and Claims

Separate and apart from the legal matter described above, we are also involved in other legal actions in the normal course of our business, including, without limitation, wage and hour claims and other employment claims, vendor disputes and provider disputes regarding payment of claims. Some of these actions seek monetary damages, including claims for liquidated or punitive damages, which are not covered by insurance. We accrue for contingent liabilities related to these matters if a loss is deemed probable and is estimable. The actual outcome of these matters may differ materially from our current estimates and therefore could have a material adverse effect on our results of operations, financial position, and cash flows.

Item 4. Mine Safety Disclosures.

Not Applicable.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.

Market for Common Stock

Our common stock is listed on the New York Stock Exchange under the symbol "WCG." The following table sets forth the high and low sales prices of our common stock, as reported on the New York Stock Exchange, for each of the periods indicated:

	High	Low
2014		
First Quarter ended March 31, 2014	$ 73.44	$ 55.16
Second Quarter ended June 30, 2014	**$ 78.37**	**$ 61.47**
Third Quarter ended September 30, 2014	$ 77.78	$ 59.71
Fourth Quarter ended December 31, 2014	**$ 84.69**	**$ 55.43**
2013		
First Quarter ended March 31, 2013	**$ 61.13**	**$ 44.75**
Second Quarter ended June 30, 2013	$ 64.29	$ 50.41
Third Quarter ended September 30, 2013	**$ 71.34**	**$ 55.12**
Fourth Quarter ended December 31, 2013	$ 75.31	$ 60.05

The last reported sale price of our common stock on the New York Stock Exchange on February 13, 2015 was $82.32. As of February 13, 2015, we had approximately 22 holders of record of our common stock.

Performance Graph

The following graph compares the cumulative total stockholder return on our common stock for the period from December 31, 2009, to December 31, 2014 with the cumulative total return on the stocks included in the Standard & Poor's 500 Stock Index and the custom composite index over the same period. The Custom Composite Index includes the stock of Aetna Inc., Anthem Inc. (formerly known as WellPoint Inc.), Centene Corp., Cigna Corp., Health Net Inc., Humana Inc., Molina Healthcare, Inc., UnitedHealth Group Inc. and Universal American Corp. The graph assumes an investment of $100 made in our common stock and the custom composite index on December 31, 2009. The graph also assumes the reinvestment of dividends and is weighted according to the respective company's stock market capitalization at the beginning of each of the periods indicated. We did not pay any dividends on our common stock during the period reflected in the graph. Further, our common stock price performance shown below should not be viewed as being indicative of future performance.

	12/31/2009	12/31/2010	12/31/2011	12/31/2012	12/31/2013	12/31/2014
WellCare Health Plans, Inc.	$ 100	$ 82	$ 143	$ 132	$ 192	$ 223
S&P 500 Index	$ 100	$ 115	$ 117	$ 136	$ 180	$ 205
Custom Composite Index (9 stocks)	$ 100	$ 110	$ 152	$ 158	$ 233	$ 316

Dividends

We have never paid cash dividends on our common stock. We currently intend to retain any future earnings to fund our business, and we do not anticipate paying any cash dividends in the foreseeable future.

Our ability to pay dividends is partially dependent on, among other things, our receipt of cash dividends from our regulated subsidiaries. The ability of our regulated subsidiaries to pay dividends to us is limited by the state departments of insurance in the states in which we operate or may operate, as well as requirements of the government-sponsored health programs in which we participate. In addition, our credit agreement and indenture have certain restrictions on our ability to pay dividends. Any future determination to pay dividends will be at the discretion of our board and will depend upon, among other factors, our results of operations, financial condition, capital requirements and contractual restrictions. For more information regarding restrictions on the ability of our regulated subsidiaries to pay dividends to us, please see Item 7 – *Management's Discussion and Analysis of Financial Condition and Results of Operations – Regulatory Capital and Restrictions on Dividends*.

Unregistered Issuances of Equity Securities

None.

Issuer Purchases of Equity Securities

We do not have a stock repurchase program. Additionally, for the majority of restricted stock units granted, the number of shares issued on the date the units vest is net of shares withheld to meet applicable tax withholding requirements. Although these withheld shares are not issued or considered common stock repurchases under a stock repurchase program, they are treated as common stock repurchases in our financial statements as they reduce the number of shares that would have been issued upon vesting.

Item 6. Selected Financial Data.

The following table sets forth our summary financial data. This information should be read in conjunction with our consolidated financial statements and the related notes and "*Management's Discussion and Analysis of Financial Condition and Results of Operations*"included elsewhere in this 2014 Form 10-K. The data for the years ended December 31, 2014, 2013 and 2012, and as of December 31, 2014 and 2013, is derived from consolidated financial statements and related notes included elsewhere in this 2014 Form 10-K.

	For the Years Ended December 31,				
	2014	2013	2012	2011	2010
	(In millions, except per share data)				
Revenues:					
Premium:					
Medicaid Health Plans	$ 7,572.8	$ 5,585.5	$ 4,389.0	$ 3,505.3	$ 3,252.4
Medicaid premium taxes	76.5	75.7	82.2	76.2	56.4
Medicaid state ACA industry fee reimbursement	124.6	—	—	—	—
Total Medicaid Health Plans	7,773.9	5,661.2	4,471.2	3,581.5	3,308.8
Medicare Health Plans	3,963.2	3,071.0	1,936.4	1,479.8	1,336.1

	(In millions)				
Balance Sheet Data:					
Cash and cash equivalents	$ 1,313.5	$ 1,482.5	$ 1,100.5	$ 1,325.1	$ 1,359.5
Total assets	4,495.0	3,450.7	2,675.5	2,488.1	2,247.3
Long-term debt (including current maturities)	900.0	600.0	135.0	146.3	—
Total liabilities	2,899.1	1,932.8	1,352.4	1,371.3	1,415.2
Total stockholders' equity	1,595.9	1,517.9	1,323.1	1,116.9	832.1

(1) Selling, general and administrative ("SG&A") expense includes $37.6 million, $57.3 million, $51.6 million, $47.0 million and $265.9 million for the years ended December 31, 2014, 2013, 2012, 2011, and 2010, respectively, of aggregate costs related to the resolution of the previously disclosed governmental and Company investigations, such as settlement accruals and related fair value accretion, legal fees and other similar costs. The 2010 costs are net of $25.8 million of D&O insurance recoveries related to the consolidated securities class action during this period.

(2) We recognized approximately $24.1 million in impairment and other charges, $18.0 million of which primarily relates to the partial impairment of certain intangible assets recorded in the 2012 acquisition of Easy Choice. The remaining charges also include a charge for the full impairment of intangible assets associated with the purchase of our Arizona MA plan after we concluded during 2014 to exit the Arizona MA market in 2015, and charges resulting from the resolution of certain matters related to the purchase price of our 2013 acquisitions.

(3) Interest expense for 2014 includes interest related to the $300 million term loan funded in September 2014, as well as interest related to $600 million 5.75% senior notes (the "Senior Notes") issued in November 2013. Interest expense for 2013 includes interest related to the Senior Notes, as well as the term loans borrowed under the 2011 Credit Agreement. A portion of the net proceeds from the issuance of the Senior Notes was used to pay off the remaining $336.5 million term loan balance under the 2011 Credit Agreement in November 2013.

(4) The estimated fair value of the net tangible and intangible assets that we acquired in connection with the Windsor acquisition has exceeded the total consideration paid, and payable, to the seller by approximately $29.5 million. We recognized the excess fair value as a bargain purchase gain, in accordance with accounting rules related to business combinations, after consideration of all relevant factors.

(5) The 2013 loss relates to the acceleration of approximately $2.8 million of deferred financing costs associated with the early payoff of the term loan outstanding under our 2011 Credit Agreement discussed above. The 2011 gain relates to the December 15, 2011 repurchase of all of the $112.5 million tradable unsecured subordinated notes we issued on September 30, 2011 in connection with the stipulation and settlement agreement, which was approved in May 2011, to resolve the putative class-action complaints filed against us in 2007.

(6) Medical benefits ratio ("MBR") measures the ratio of our medical benefits expense to premium revenue excluding reimbursement for Medicaid premium taxes and Medicaid state ACA industry fee reimbursement revenue. Because reimbursements for Medicaid premium tax and ACA industry fee impacts are both included in the premium rates or reimbursement established in certain of our Medicaid contracts and also recognized separately as a component of expense, we exclude these reimbursements from premium revenue when calculating key ratios as we believe that their impact is not indicative of operating performance. For GAAP reporting purposes, Medicaid premium taxes and Medicaid state ACA industry fee reimbursements are included in premium revenue.

(7) SG&A expense ratio measures selling, general and administrative expense as a percentage of total revenue, excluding premium taxes and Medicaid state ACA industry fee reimbursements, and does not include depreciation and amortization expense for purposes of determining the ratio.

We have never paid cash dividends on our common stock. We currently intend to retain any future earnings to fund our business, and we do not anticipate paying any cash dividends in the foreseeable future.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

(In Millions, Except Per Share Data or As Otherwise Stated)

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with Item 6 – *Selected Financial Data* and our consolidated financial statements and related notes appearing elsewhere in this 2014 Form 10-K. The following discussion contains forward-looking statements that involve risks, uncertainties and assumptions that could cause our actual results to differ materially from management's expectations. Factors that could cause such differences include those set forth under Part I, Item 1 – *Business* and Part I, Item 1A – *Risk Factors*, as well as *Forward-Looking Statements* discussed earlier in this 2014 Form 10-K.

OVERVIEW

Introduction

We are a leading managed care company for government-sponsored health care coverage with a focus on Medicaid and Medicare programs. Headquartered in Tampa, Florida, we offer a variety of managed care health plans for families, children, and the aged, blind and disabled, as well as prescription drug plans. As of December 31, 2014, we served approximately 4.1 million members in 49 states and the District of Columbia. We estimate that we are among the 10 largest Medicaid providers of managed care services plans, and among the 10 largest providers of Medicare Advantage ("MA") plans and prescription drug plans ("PDPs"), all as measured by membership. We believe that our broad range of experience and exclusive government focus allows us to effectively serve our members, partner with our providers and government clients, and efficiently manage our ongoing operations.

Summary of Consolidated Financial Results

Summarized below are the key financial highlights for the year ended December 31, 2014. For additional information, refer to the "Results of Operations" section which discusses both consolidated and segment results in more detail.

- ***Membership*** increased 45% in 2014, mainly driven by organic membership growth across all of our segments, primarily in our Medicaid Health Plans and Medicare PDPs segments, as well as the acquisition of Windsor Health Group, Inc. ("Windsor"), which was completed on January 1, 2014. The Windsor acquisition accounted for increases of 80,000 and 103,000, in our Medicare Health Plans and Medicare PDPs segments, respectively. Excluding Windsor, consolidated membership at December 31, 2014 increased 38% year over year.

- ***Premiums*** increased 36% in 2014, driven mainly by the increases in membership discussed above. The Windsor acquisition accounted for combined increases in Medicare and Medicare PDP segment revenue of $620.5 million for 2014. Additionally, the increase was driven by the net impact of ACA industry fee reimbursement from our Medicaid state customers and Medicaid membership mix changes, partially offset by rate decreases in our Medicare segment and a lower rate in our Medicare PDPs segment, consistent with our 2014 bids.

- ***Net Income*** declined 64% in 2014 due mainly to an increase in the medical benefit ratios for all three of our segments, the impact of unreimbursed ACA industry fees, increased interest expense from higher debt levels in 2014 and the recognition of $24.1 million in impairment and other charges, primarily related to Easy Choice Health Plan Inc. ("Easy Choice"). Partially offsetting these reductions was the increase in premiums from organic growth, lower administrative expenses as a percentage of total revenues and the $29.5 million we recognized from the Windsor bargain purchase gain.

Key Developments and Accomplishments

Our current business priorities include improving health care quality and access for our members, optimizing financial performance, delivering prudent and profitable growth and achieving service excellence. See Part I, Item 1 – *Business* for further discussion of our business priorities.

Presented below are key developments and accomplishments relating to progress on our business priorities that occurred or impacted our financial condition and results of operations during 2014, or occurred in 2015 prior to the filing of this 2014 Form 10-K.

- In January 2014, we acquired all of the outstanding stock of Windsor from Munich Health North America, Inc., a part of Munich Re Group. Through its subsidiaries, Windsor serves Medicare beneficiaries with MA, PDP and Medicare Supplement products. As of December 31, 2014, Windsor offered MA plans to 37,000 members in 192 counties in the states of Arkansas, Mississippi, South Carolina and Tennessee. In addition, one of Windsor's subsidiaries offers

Medicare Supplement insurance policies through which it serves approximately 43,000 members in 39 states as of December 31, 2014. Windsor also offers PDPs in 11 of the 34 CMS regions to 103,000 members as of December 31, 2014.

- In February 2014, we executed a contract with the Florida Agency for Health Care Administration ("AHCA") to provide managed care services to Medicaid recipients in eight of the state's 11 regions as part of the state's Managed Medical Assistance ("MMA") program. The program commenced on May 1, 2014, with the implementation of three regions. Three additional regions were implemented in June, one in July and one in August. We are serving over 650,000 members in these regions as of December 31, 2014, compared to 394,000 members that we served in December 2013 under the prior Florida Medicaid program.

- Effective January 1, 2014, we began offering Medicaid managed care in Essex, Hudson, Middlesex, Passaic and Union counties in New Jersey. In addition, effective July 1, 2014, our New Jersey subsidiary completed the acquisition of Medicaid assets from Healthfirst Health Plan of New Jersey, Inc. ("Healthfirst NJ"), which primarily relate to approximately 42,000 Healthfirst Medicaid members who were transferred to our Medicaid plan in New Jersey, as well as certain provider agreements. As a result, effective July 1, 2014, we offer Medicaid managed care in 10 counties in New Jersey.

- We have received amendments, written agreements or other documentation from all our Medicaid state customers, that commit them to reimburse us for the portion of the ACA industry fee on our Medicaid plans, including its non-deductibility for income tax purposes for 2014 and 2015. Consequently, we recognized $124.6 million of reimbursement for the ACA industry fee as premium revenue in the year ended December 31, 2014.

- Medicare Health Plans segment membership as of January 1, 2015, was 380,000, a 9% decrease from 417,000 as of December 31, 2014. The approximate decrease of 37,000 members was driven by actions taken in conjunction with our 2015 bids and county withdrawals in California designed to improve the performance of Easy Choice, which resulted in a 28,000 member decrease in California, as well as the Company's exit from the Missouri, Ohio, and Arizona markets representing 8,000 members as of December 31, 2014. For 2015, WellCare offers Medicare Advantage plans in 376 counties across 15 states.

- In October 2014, the Centers for Medicare & Medicaid Services ("CMS") announced 2015 MA and PDP quality ratings, known as star ratings, which reflected improvement for several of WellCare's plans. The star rating for our Florida plan, which serves approximately 31% of our January 2015 MA membership, maintained its rating of 3.5 stars for 2015. Our California plan, which serves approximately 10% of our January 2015 MA membership, improved its star rating from 3 to 3.5.

- Due to changes in our bid design based on our 2014 experience, our 2015 PDP bids resulted in one of our basic plans being below the benchmarks in 13 of the 33 CMS regions for which we submitted bids, and within the de minimis range in nine other regions. However, the outcome of our 2015 bids is expected to have a favorable impact on 2015 gross margin results compared to 2014. For 2014, our basic plan was below the benchmarks in 30 regions, of the 33 regions bid, and within the de minimis range in two other regions.

- In October 2014, WellCare received NCQA Quality Accreditation for its Medicaid and Medicare health plans in Georgia, Kentucky and Missouri.

General Economic and Political Environment and Health Care Reform

Please refer to Part I, Item 1 – *Business, General Economic and Political Environment Impacting our Business* and *Health Care Reform* for a further discussion of the current economic and political environment that is affecting our business, including discussion of the Patient Protection and Affordable Care Act, as amended by the Health Care and Education Reconciliation Act of 2010 (collectively, the "ACA") and its potential impact on our business.

The ACA imposed certain new taxes and fees, including limitations on the amount of compensation that is tax deductible, as well as an annual premium-based health insurance industry assessment (the "ACA industry fee") on health insurers which began in 2014. The total ACA industry fee levied on the health insurance industry was $8 billion in 2014 and will be $11.3 billion in 2015, with increasing annual amounts thereafter, growing to $14.3 billion by 2018. After 2018, the industry fee increases according to an index based on net premium growth. The assessment is being levied on certain health insurers that provide insurance in the assessment year, and is allocated to health insurers based on each health insurer's share of net premiums for all U.S. health insurers in the year preceding the assessment. The ACA industry fee is not deductible for income tax purposes, which has significantly increased our effective income tax rate. We incurred $137.7 million of such fees in 2014 and currently estimate that we will incur between $230 and $235 million in such fees in 2015, due to the increase in the

total fee to be levied on the industry and the expected increase in our share of total industry premiums for 2014. However, the 2015 final fee amount will not be determined until August 2015. We have received amendments, written agreements or other documentation from all our Medicaid state customers, that commit them to reimburse us for the portion of the ACA industry fee on our Medicaid plans, including its non-deductibility for income tax purposes for 2014. Consequently, we recognized $124.6 million of reimbursement for the ACA industry fee as premium revenue for the year ended December 31, 2014. We have also obtained similar commitments from our Medicaid customers for 2015. CMS does not directly reimburse us for the impact of the ACA industry fee related to MA and PDP premiums. Refer to the risks and uncertainties related to health care reform as discussed in Part I, Item 1A – *Risk Factors – Future changes in health care law present challenges for our business that could have a material adverse effect on our results of operations and cash flows.*

RESULTS OF OPERATIONS

Consolidated Financial Results

The following table sets forth condensed data from our consolidated statements of operations data, as well as other key data used in our results of operations discussions for the years ended December 31, 2014, 2013 and 2012. The historical results are not necessarily indicative of results to be expected for any future period.

	For the Years Ended December 31,		
	2014	2013	2012
Revenues:	(Dollars in millions)		
Premium	$ 12,915.5	$ 9,509.1	$ 7,400.2
Investment and other income	44.4	18.8	8.8
Total revenues	12,959.9	9,527.9	7,409.0
Expenses:			
Medical benefits	11,455.2	8,258.6	6,303.9
Selling, general and administrative	1,018.8	856.5	690.8
ACA industry fee	137.7	—	—
Medicaid premium taxes	76.5	75.7	82.2
Depreciation and amortization	59.9	44.1	31.6
Interest	39.4	11.9	4.1
Impairment and other charges	24.1	—	—
Total expenses	12,811.6	9,246.8	7,112.6
Income from operations	148.3	281.1	296.4
Bargain purchase gain	29.5	—	—
Loss on extinguishment of debt	—	(2.8)	—
Income before income taxes	177.8	278.3	296.4
Income tax expense	114.1	103.0	111.7
Net income	$ 63.7	$ 175.3	$ 184.7
Membership by Segment			
Medicaid Health Plans	2,310,000	1,759,000	1,587,000
Medicare Health Plans	417,000	290,000	213,000
Medicare PDPs	1,392,000	797,000	869,000
Total	4,119,000	2,846,000	2,669,000

Membership

2014 vs. 2013

Membership increased 45% in 2014, mainly driven by organic membership growth across all of our segments, primarily in our Medicaid Health Plans and Medicare PDPs segments, as well as the Windsor acquisition, which was completed on January 1, 2014. Membership discussion by segment follows:

- *Medicaid Health Plans.* Medicaid Health Plans segment membership increased by 551,000, or 31% year over year, to 2.3 million as of December 31, 2014, primarily driven by organic membership growth in our Florida, Georgia and Kentucky Medicaid programs. Florida membership increased mainly due to our participation in the Managed Medical Assistance ("MMA") program, which commenced implementation on May 1, 2014, while Kentucky membership increased mainly due to Kentucky's participation in the 2014 Medicaid expansion. Additionally, 42,000 members were transferred to our Medicaid plan in New Jersey as a result of the Healthfirst acquisition.

- *Medicare Health Plans.* Medicare Health Plans segment membership increased by 127,000, or 44% year over year, to 417,000 as of December 31, 2014. Membership increased primarily from the Windsor acquisition, which contributed approximately 37,000 MA and 43,000 Medicare Supplement program members as of December 31, 2014, as well as an increase resulting from the 2014 annual election period due to our continued focus on dual-eligible beneficiaries and expansion into new counties.

- *Medicare PDPs.* Medicare PDPs segment membership as of December 31, 2014 increased by 595,000, or 75%, compared to December 31, 2013 as a result of the outcome of our 2014 bids, as well as the inclusion of membership from the Windsor acquisition, which accounted for 103,000 of the increase.

2013 vs. 2012

At December 31, 2013, we served approximately 2,846,000 members; an increase of 177,000, or 7%, from 2,669,000 members at December 31, 2012. The growth in 2013 was mainly driven by acquisitions and organic membership growth in our Medicaid Health Plans and Medicare Health Plans segments, partially offset by a decline in Medicare PDPs membership. Membership discussion by segment follows:

- *Medicaid Health Plans. S*egment membership increased by approximately 172,000 compared to December 31, 2012, primarily driven by our acquisitions of plans in South Carolina and Missouri in 2013, which contributed 50,000 and 104,000 members to the year-over-year increase, respectively, as well as membership growth in our Florida and Kentucky Medicaid programs. Kentucky Medicaid membership increased 85,000 compared to 2012, including approximately 57,000 members that were transferred to us following a competitor's exit from the Kentucky market in July 2013 and 13,000 beneficiaries from Region 3 which we began serving effective January 1, 2013. These increases were partially offset by a decline of approximately 97,000 members resulting from our exit from Ohio, which was effective July 1, 2013.

- *Medicare Health Plans.* Segment membership increased by approximately 77,000 compared to December 31, 2012, due mainly to the results of the 2013 annual election period, which resulted in an increase of approximately 37,000 members effective January 1, 2013 due to our geographic expansion into 53 new counties in Florida, Georgia, Illinois, Kentucky, New York, and Texas.

- *Medicare PDPs.* Segment membership decreased by approximately 72,000 compared to December 31, 2012 as a result of our 2013 PDP bids, which resulted in the reassignment to other plans, effective January 1, 2013, of members who were auto-assigned to us in 2012 or prior years.

Net income

2014 vs. 2013

For the year ended December 31, 2014, our net income was $63.7 million compared to $175.3 million for the same period in 2013. The $111.6 million, or 64%, decrease was mainly due to higher medical benefits ratios in all of our segments, including the recognition of unfavorable prior year reserve development in 2014, which mainly impacted our Medicaid and Medicare Health Plans segments, compared to favorable prior year reserve development in 2013; the impact of unreimbursed ACA industry fees; increased interest expense from higher debt levels in 2014; and the recognition of $24.1 million in impairment and other charges, primarily related to the partial impairment of certain intangible assets recorded in the 2012 acquisition of Easy Choice Health Plan, Inc. ("Easy Choice"). These decreases were partially offset by the increase in premiums from organic membership growth and acquisitions, lower administrative expenses as a percentage of total revenues and the Windsor bargain purchase gain, which amounted to $29.5 million in 2014. Refer to *Segment Reporting* below for a discussion of current developments, operating results and other key performance measures by reportable segment.

2013 vs. 2012

For the year ended December 31, 2013, our net income was $175.3 million compared to $184.7 million for the same period in 2012. The $9.4 million, or 5%, decrease was mainly driven by the impact of lower favorable development in prior year

medical benefits payable, lower results in our Medicare PDPs segment, consistent with lower membership, and increased interest expense and other costs resulting from higher average debt levels in 2013 associated with additional borrowings in February 2013 and November 2013, partially offset by increased premium revenue in our Medicaid and Medicare Health Plans segments resulting from the membership increases noted above. Refer to *Segment Reporting* below for a discussion of current developments, operating results and other key performance measures by reportable segment.

Premium revenue

2014 vs. 2013

Premium revenue for the year ended December 31, 2014 increased approximately $3.4 billion, or 36%, compared to the same period in 2013, due mainly to the impact of organic membership growth across all of our segments and the Windsor acquisition, which accounted for combined increases in Medicare and PDP segment revenue of $620.5 million for the year ended December 31, 2014. Additionally, the increase was due to the impact of the ACA fee reimbursement from our Medicaid state customers, the favorable impact of Medicaid membership mix changes and the benefit of a full year of premiums for our South Carolina and Missouri Medicaid plans that were acquired in the first quarter of 2013. These increases were partially offset by rate decreases in our Medicare Health Plans segment and a lower rate in our Medicare PDPs segment, consistent with our 2014 bids.

2013 vs. 2012

Premium revenue for the year ended December 31, 2013 increased approximately $2.1 billion, or 28%, compared to the same period in 2012. The increase is primarily attributable to our 2012 and 2013 acquisitions, which collectively contributed $913.4 million, or 12%, to the year-over-year increase, organic membership growth in our Medicaid and Medicare Health Plans segments and rate increases in certain of our Medicaid markets, including the 7% increase in Kentucky that was effective January 1, 2013. Additionally, the increase was partially attributable to Medicaid revenue from payment arrangements with certain states associated with primary care enhanced payments, as mandated by the ACA. These increases were partially offset by the impact of lower membership in our Medicare PDPs segment. Premium revenue included $75.7 million and $82.2 million of Medicaid premium taxes for the years ended December 31, 2013 and 2012, respectively.

2015 Outlook

Excluding Medicaid premium taxes and ACA industry fee reimbursement, premium revenue for 2015 is expected to increase to approximately $13.5 billion to $13.8 billion, primarily driven by growth in our Medicaid Health Plans segment.

Investment and other income

2014 vs. 2013

Investment and other income in 2014 was $44.4 million, a $25.6 million increase from $18.8 million in 2013, primarily driven by the Windsor acquisition, as well as higher volumes of prescription drug plan copayments and specialty prescription drugs sold to non-members.

2013 vs. 2012

Investment and other income in 2013 was $18.8 million, a $10.0 million increase from $8.8 million in 2012, primarily driven by higher volumes of prescription drug plan copayments and specialty prescription drugs sold to non-members.

2015 Outlook

We expect that Investment and other income will decline to approximately $15 to $20 million in 2015, due mainly to the outsourcing of our pharmacy mail order operations and a reduction in member copayments. We expect that the decline will be more than offset by expected decreases in selling, general and administrative expense, and prescription drug cost savings resulting from the outsourcing.

Medical benefits expense

2014 vs. 2013

Total medical benefits expense for the year ended December 31, 2014 increased $3.2 billion, or 39% compared to the same period in 2013, due primarily to increased membership across all our segments, and higher current period medical and

pharmacy costs, including higher medical costs associated with the Florida MMA program, which operated at a medical benefits ratio ("MBR") that was higher than our 2013 performance in the state. Also contributing to the higher expense was unfavorable prior year reserve development in 2014, which was due to higher than expected medical services in our Medicaid and Medicare Health Plan segments that were not discernible until the impact became clearer over time as claim payments were processed. For the year ended December 31, 2014, medical benefits expense was impacted by approximately $48.1 million of unfavorable prior year reserve development compared to $3.0 million of favorable prior year reserve development recognized in 2013.

2013 vs. 2012

Total medical benefits expense for the year ended December 31, 2013 increased $2.0 billion, or 31%, compared to the same period in 2012. The increase was due mainly to the increased membership in the Medicaid and Medicare Health Plans segments, including acquisitions, the impact of lower favorable development in prior year medical benefits payable, increased medical expense in the first quarter of 2013 associated with the flu and Medicaid primary care enhanced payments, as mandated by the ACA, partially offset by a decrease in the Medicare PDP segment due to lower membership. For the year ended December 31, 2013, medical benefits expense was impacted by approximately $3.0 million of favorable prior year reserve development compared to $76.7 million of such development recognized in 2012.

Selling, general and administrative expense

SG&A expense includes aggregate costs related to the resolution of the previously disclosed governmental investigations and related litigation, such as settlement accruals and related fair value accretion, legal fees and other similar costs. Refer to Note 13–*Commitments and Contingencies* within the Consolidated Financial Statements for additional discussion of investigation-related litigation and other resolution costs. We believe it is appropriate to evaluate SG&A expense exclusive of these investigation-related litigation and other resolution costs because we do not consider them to be indicative of long-term business operations.

A reconciliation of SG&A expense, including and excluding investigation-related costs, is presented below.

	For the Years Ended December 31,		
	2014	2013	2012
	(In millions)		
SG&A expense	$ 1,018.8	$ 856.5	$ 690.8
Adjustments:			
Investigation-related litigation and other resolution costs	(1.4)	(2.5)	(3.9)
Investigation-related administrative costs	(36.2)	(54.8)	(47.7)
Total investigation-related litigation and other resolution costs	(37.6)	(57.3)	(51.6)
SG&A expense, excluding investigation-related litigation and other resolution costs	$ 981.2	$ 799.2	$ 639.2
SG&A ratio [1]	7.9%	9.1%	9.4%
Adjusted SG&A ratio [2]	7.7%	8.5%	8.7%

(1) SG&A expense, as a percentage of total premium revenue.

(2) SG&A expense, as a percentage of total premium revenue, excluding premium taxes, Medicaid state ACA industry fee reimbursements and investigation-related litigation and other resolution costs.

2014 vs. 2013

Excluding investigation-related litigation and other resolution costs, our SG&A expense for the year ended December 31, 2014 increased approximately 23%, to $981.2 million. SG&A expense increased mainly due to the growth in membership, investments in technology and infrastructure, including costs necessary to meet regulatory changes, investments related to our medical cost initiatives, increased spending related to the integration of recent acquisitions and our other growth and service initiatives. These cost increases were partially offset by improvements in operating efficiency. Our SG&A ratio decreased to 7.9% for the year ended December 31, 2014 compared to 9.1% for the same period in 2013. After excluding the investigation-related litigation and other resolution costs, our SG&A ratio in 2014 was 7.7% compared to 8.5% for the same period in 2013.

2013 vs. 2012

Excluding investigation-related litigation and other resolution costs, our SG&A expense for the year ended December 31, 2013 increased approximately $160.0 million, or 25%, to $799.2 million compared to the same period in 2012. The increase was driven mainly by the growth in membership, investments in technology and infrastructure, including costs necessary to meet regulatory changes, investments related to our medical cost initiatives and increased SG&A from the integration of acquisitions. Additionally, during the third quarter of 2013, we determined that we would be discontinuing certain projects going forward and, as a result, the software and development costs acquired to support these projects would not be fully recoverable. Consequently, we recorded a pre-tax asset impairment charge of $9.0 million. The increase in costs in 2013 noted above were partially offset by improvements in operating efficiency. Our SG&A ratio was 9.1% for the year ended December 31, 2013 compared to 9.4% for the same period in 2012. After excluding the investigation-related litigation and other resolution costs, our SG&A ratio in 2013 was 8.5% compared to 8.7% for the same period in 2012.

2015 Outlook

Our adjusted administrative expense ratio for 2015 is expected to be between approximately 8.0% and 8.2%, an increase from 7.7% in 2014. The expected increase is driven mainly by continued investments and re-establishment of variable compensation that was eliminated in 2014 due to financial and other performance criteria not meeting targets.

ACA Industry Fee

2014

For the year ended December 31, 2014, we incurred $137.7 million of non-deductible expense for the ACA industry fee, based on our share of total health insurance industry assessment. As discussed in *Key Developments and Accomplishments*, we currently have received amendments, written agreements or other documentation from all of our state Medicaid customers that commit them to reimburse us for substantially all of the impact of the ACA industry fee attributable to our Medicaid plans, including its non-deductibility for income tax purposes for 2014.

2015 Outlook

Currently, we estimate that we will incur between $230 and $235 million total ACA industry fees in 2015, due to the increase in the total fee to be levied on the industry and the expected increase in our share of total industry premiums for 2014. However, the 2015 final fee amount will not be determined until August 2015.

Medicaid premium taxes

2014 vs. 2013

Medicaid premium taxes incurred for the year ended December 31, 2014 were $76.5 million compared to $75.7 million for the same period in 2013. In 2014, Medicaid premiums related to our Medicaid contracts with Georgia, Hawaii, New Jersey and New York were subject to premium taxes.

2013 vs. 2012

Medicaid premium taxes incurred for the year ended December 31, 2013 were $75.7 million compared to $82.2 million for the same period in 2012. The year-over-year decline of approximately $6.5 million, or 8%, was primarily driven by our exit from the Ohio Medicaid market, which was effective July 1, 2013.

Depreciation and Amortization

2014 vs. 2013

Depreciation and amortization expense increased approximately $15.8 million, or 36%, to $59.9 million in 2014 from $44.1 million in 2013. The increase in the 2014 periods compared to 2013 is due primarily to incremental amortization related to the intangible assets acquired in conjunction with the Windsor acquisition, which was completed on January 1, 2014, and the Healthfirst NJ acquisition completed on July 1, 2014. Additionally, amortization for the year ended December 31, 2014 was impacted by a full year of amortization related to the Missouri Care and WellCare of South Carolina, Inc. ("WCSC") acquisitions, which were completed during the first quarter of 2013.

2013 vs. 2012

Depreciation and amortization expense increased approximately $12.5 million, or 40%, to $44.1 million in 2013 from $31.6 million in 2012, which included approximately $5.9 million of incremental amortization recorded during 2013 relating to the intangible assets acquired in conjunction with the Desert Canyon, Easy Choice, Missouri Care and WCSC acquisitions. The remaining increase is primarily attributable to incremental infrastructure related investments made during 2013.

2015 Outlook

Depreciation and amortization for 2015 is expected to increase to approximately $70 to $72 million, primarily driven by increased investments in our information technology infrastructure.

Interest expense

2014 vs. 2013

Interest expense for the year ended December 31, 2014 was $39.4 million compared to $11.9 million for the same period in 2013. The $27.5 million increase was primarily driven by higher average debt levels during 2014, as we borrowed an additional $300 million term loan (the "Term Loan") under the current credit agreement in September 2014 and, additionally, issued $600 million of 5.75% senior notes (the "Senior Notes") in November 2013.

2013 vs. 2012

Interest expense for the year ended December 31, 2013 was $11.9 million compared to $4.1 million for the same period in 2012. The $7.8 million increase was primarily driven by higher average debt levels during 2013, as we borrowed an additional $230 million in term loans under the 2011 credit agreement in February 2013 and, additionally, issued the Senior Notes in November 2013. A portion of the net proceeds from the issuance of the senior notes was used to payoff the remaining term loan balance under the 2011 credit agreement.

2015 Outlook

We expect that interest expense will increase in 2015 compared to 2014, due to higher average debt outstanding from the issuance of the Term Loan in September 2014, and is anticipated to be between $47 and $49 million.

Impairment and other charges

During the second quarter of 2014, we recognized approximately $24.1 million in impairment and other charges, $18.0 million of which primarily relates to the partial impairment of certain intangible assets recorded in the 2012 acquisition of Easy Choice. The impairment resulted primarily from estimated fair values of the intangible assets that were below the book values of such assets. The estimated fair values of these assets were determined based on an income valuation approach using assumptions appropriate for likely market participants. The estimated fair values reflect a significant decline in anticipated long-term profitability, mainly resulting from an inability to improve the medical cost structure to the degree that was previously estimated and the inability to achieve certain administrative cost savings, as a result of certain developments during the second quarter. The remaining charges also include a charge for the full impairment of intangible assets associated with the purchase of our Arizona MA plan after we concluded during 2014 to exit the Arizona MA market in 2015, and charges resulting from the resolution of certain matters related to the purchase price of our 2013 acquisitions. We were no longer able to recognize such charges as adjustments to acquired assets, since we were beyond the measurement period established in the accounting rules for business combinations.

Bargain Purchase Gain

As a result of the Windsor acquisition, the estimated fair value of the net tangible and intangible assets that we acquired has exceeded the total consideration payable to the seller by approximately $29.5 million for the year ended December 31, 2014. After consideration of all relevant factors, we concluded that the excess fair value constituted a bargain purchase gain in accordance with accounting rules related to business combinations.

Loss on extinguishment of debt

2013

In November 2013, a portion of the net proceeds from the issuance of $600 million of 5.75% senior notes was used to pay off the remaining $336.5 million term loan balance, plus accrued interest, and we then terminated our 2011 credit agreement. In conjunction with the extinguishment of debt, we incurred approximately $2.8 million for the accelerated recognition of previously deferred financing costs. For further information regarding the 2013 debt transactions, refer to Note 12 –*Debt* within the Consolidated Financial Statements.

Income tax expense

2014 vs. 2013

Income tax expense for the year ended December 31, 2014 was $114.1 million, or 64.2% of pre-tax income, compared to $103.0 million, or 37.0% of pre-tax income, for the year ended December 31, 2013. The higher 2014 effective rate mainly reflects the impact of the non-deductible ACA industry fee. Additionally, the effective rate was lower in 2013 due to an issue resolution agreement reached with the IRS regarding the tax treatment of the investigation-related litigation and other resolution costs, resulting in approximately $7.6 million in additional tax benefit over what was recorded as of December 31, 2012. These unfavorable impacts were partially offset by the favorable impact of the Windsor bargain purchase gain.

2013 vs. 2012

Income tax expense for the year ended December 31, 2013 was $103.0 million, or 37.0% of pre-tax income, compared to $111.7 million, or 37.7% of pre-tax income, for the year ended December 31, 2012. The lower effective income tax rate in 2013 is primarily due to an issue resolution agreement reached with the Internal Revenue Service during 2013 regarding the tax treatment of certain investigation-related litigation and other resolution cost, which resulted in the recognition of approximately $7.6 million in income tax benefits during the first quarter of 2013, partially offset by the impact of non-deductible compensation under certain provisions of the Affordable Care Act, which generally limits deductions on executive compensation earned after December 31, 2009 that is paid after December 31, 2012.

2015 Outlook

We expect that our effective tax rate will increase in 2015 compared to 2014 due mostly to the expected increase in non-deductible ACA industry fees in proportion to the projected earnings increase in 2015.

Segment Reporting

Reportable operating segments are defined as components of an enterprise for which discrete financial information is available and evaluated on a regular basis by the enterprise's decision-makers to determine how resources should be allocated to an individual segment and to assess performance of those segments. Accordingly, we have three reportable segments: Medicaid Health Plans, Medicare Health Plans and Medicare PDPs.

Segment Financial Performance Measures

In conjunction with the Windsor acquisition, we reassessed our segment reporting practices during the three months ended March 31, 2014, and made revisions to reflect our current method of managing performance and determining resource allocation, which includes reviewing the results of Medicare Supplement and Medicare Advantage operations acquired as part of the Windsor acquisition together with MA. Accordingly, we include results for Medicare Supplement operations together with MA and renamed the segment Medicare Health Plans. Similarly, we include the PDP operations acquired as part of the Windsor acquisition together with WellCare's PDPs and renamed the segment Medicare PDPs. No changes were made to the composition of our Medicaid segment, but we renamed the segment Medicaid Health Plans.

Our primary tools for measuring profitability of our reportable operating segments are premium revenue, gross margin and MBR. Beginning in 2014, the ACA imposes an annual premium-based health insurance industry fees on health insurers. Since the timing of revenue recognition for state Medicaid reimbursement of the ACA industry fee has been delayed and has not matched the expense recognition of the fee, and MA and PDP rates will not be adjusted for the ACA industry fee, we have determined to include the ACA industry fee expense in measuring the profitability of our reportable operating segments. Accordingly, gross margin has been redefined as premium revenue less medical benefits expense, less ACA industry fees. MBR measures the ratio of medical benefits expense to premium revenue excluding Medicaid premium taxes and Medicaid state ACA industry fee reimbursement.

We use gross margin and MBR both to monitor our management of medical benefits and medical benefits expense and to make various business decisions, including which health care plans to offer, which geographic areas to enter or exit and which health care providers to include in our networks. Although gross margin and MBR play an important role in our business strategy, we may be willing to enter new geographical markets and/or enter into provider arrangements that might produce a less favorable gross margin and MBR if those arrangements, such as capitation or risk sharing, would likely lower our exposure to variability in medical costs or for other reasons.

Changes in gross margin and MBR from period to period depend in large part on our ability to, among other things, effectively price our medical and prescription drug plans, estimate and manage medical costs and changes in estimates related to incurred but not reported claims ("IBNR"), estimate and effectively manage medical benefits expense relative to the primarily fixed premiums we receive, negotiate competitive rates with our health care providers, and attract and retain members. In addition, factors such as changes in health care laws, regulations and practices, changes in Medicaid and Medicare funding, changes in the mix of membership, escalating health care costs, competition, levels of use of health care services, general economic conditions, major epidemics, terrorism or bio-terrorism, new medical technologies, including the new, expensive hepatitis C drugs, and other external factors may affect our operations and may have a material adverse impact on our business, financial condition and results of operations.

For further information regarding premium revenues and medical benefits expense, please refer below to "*Premium Revenue Recognition and Premiums Receivable*", and "*Medical Benefits Expense and Medical Benefits Payable*" under "*Critical Accounting Estimates.*"

Reconciling Segment Results

The following table reconciles our reportable segment results with our income from operations (before income taxes), as reported in accordance with accounting principles generally accepted in the United States of America ("GAAP").

	For the Years Ended December 31,		
	2014	2013	2012
Gross Margin:	(In millions)		
Medicaid Health Plans	$ 839.2	$ 733.8	$ 579.2
Medicare Health Plans	411.6	411.5	305.8
Medicare PDPs	71.8	105.2	211.3
Total gross margin	1,322.6	1,250.5	1,096.3
Investment and other income	44.4	18.8	8.8
Other expenses	(1,218.7)	(988.2)	(808.7)
Income from operations	$ 148.3	$ 281.1	$ 296.4

Medicaid Health Plans

Our Medicaid Health Plans segment includes plans for beneficiaries of Temporary Assistance for Needy Families ("TANF"), Supplemental Security Income ("SSI"), Aged Blind and Disabled ("ABD") and other state-based programs that are not part of the Medicaid program, such as Children's Health Insurance Program ("CHIP"), Family Health Plus ("FHP") and Managed Long-Term Care ("MLTC") programs. As of December 31, 2014, we operated Medicaid health plans in Florida, Georgia, Hawaii, Illinois, Kentucky, Missouri, New Jersey, New York and South Carolina. We began serving South Carolina members on February 1, 2013, Missouri Care members on April 1, 2013 and New Jersey members on January 1, 2014. As of July 1, 2013, we no longer provided Medicaid services in Ohio.

Impacting Our Results

- Effective May 1, 2014, we began providing managed care services to Medicaid recipients in three regions as part of Florida's MMA program. Three additional regions were implemented in June, one in July and one in August, completing the implementation in all eight regions we serve. As of December 31, 2014, we were serving over 650,000 members in these regions, compared to the 394,000 members that we served in December 2013. Our anticipated Florida MMA premium is higher than our historical experience to compensate us for the enhanced benefits and services required in the MMA program, however, we have also incurred higher medical expense compared to our previous expectations, reflecting slower than anticipated medical expense improvement during the initial months of

this program. Consistent with past implementation of new programs, we are pursuing improvements to care management and expect to pursue increased reimbursement in order to enhance the financial performance of the MMA program. Care management improvements include improving reimbursement terms and collaboration models in certain of our provider contracts, terminating certain providers when we could not achieve an appropriate cost structure or an agreement to collaborate, adding clinical resources into the local health plan, and embedding nurses in some high volume facilities.

- Effective January 1, 2014, our Kentucky program began serving new members associated with Kentucky's 2014 ACA Medicaid expansion. Such membership totaled 117,000 as of December 31, 2014.

- Effective January 1, 2014, we began offering Medicaid managed care in Essex, Hudson, Middlesex, Passaic and Union counties in New Jersey. In addition, effective July 1, 2014, our New Jersey subsidiary completed the acquisition of Medicaid assets from Healthfirst NJ, which primarily relate to the approximate 42,000 Healthfirst Medicaid members who were transferred to our Medicaid plan in New Jersey, as well as to certain provider agreements that transferred to us. As a result, effective July 1, 2014, we offer Medicaid managed care in 10 counties in New Jersey.

- We have received amendments, written agreements or other documentation from all our state Medicaid customers, that commit them to reimburse us for the portion of the ACA industry fee attributable to the Medicaid programs in these states, including the related state and federal income tax gross-ups. Consequently, we recognized approximately $124.6 million in reimbursement as premium revenue in the year ended December 31, 2014.

Medicaid Segment Results

The following table sets forth the summarized results of operations and other relevant performance measures for our Medicaid segment for the years ended December 31, 2014, 2013 and 2012:

	For the Years Ended December 31,		
	2014	2013	2012
	(In millions)		
Premium revenue (1)	$ 7,572.8	$ 5,585.5	$ 4,389.0
Medicaid premium taxes (1)	76.5	75.7	82.2
Medicaid state ACA industry fee reimbursement (1)	124.6	—	—
Total premiums	7,773.9	5,661.2	4,471.2
Medical benefits expense	6,853.1	4,927.4	3,892.0
ACA industry fee	81.6	—	—
Gross margin	$ 839.2	$ 733.8	$ 579.2
Medicaid MBR, including premium taxes and Medicaid state ACA industry fee reimbursements	88.2%	87.0%	87.0%
Impact of:			
Medicaid premium taxes	0.9%	1.2%	1.7%
Medicaid state ACA industry fee reimbursement	1.4%	—	—
Medicaid MBR (1)	90.5%	88.2%	88.7%
Medicaid Membership:			
Florida	722,000	486,000	454,000
Georgia	604,000	540,000	570,000
Kentucky	420,000	292,000	207,000
Other states (2)	564,000	441,000	356,000
	2,310,000	1,759,000	1,587,000

(1) MBR measures the ratio of our medical benefits expense to premium revenue excluding reimbursement for Medicaid premium taxes and Medicaid state ACA industry fee reimbursement revenue. Because reimbursements for Medicaid premium tax and ACA industry fee impacts are both included in the premium rates or reimbursement established in certain of our Medicaid contracts and also recognized separately as a component of expense, we exclude these reimbursements from premium revenue when calculating key ratios as we believe that their impact is not indicative of operating performance. For GAAP reporting purposes, Medicaid premium taxes and Medicaid state ACA industry fee reimbursements are included in premium revenue.

(2) "All other states" consists of Hawaii, Illinois, and New York during all years presented. In 2012, it also includes Ohio; in 2013, it also includes Missouri and South Carolina; and in 2014, it also includes Missouri, New Jersey and South Carolina. Effective as of June 30, 2012, our Missouri contract expired and was not renewed. We re-entered Missouri Medicaid in March 2013 when we acquired Missouri Care. We were not awarded a Medicaid contract in Ohio for the 2013 fiscal year; however, the state of Ohio contracted with us to provide services to Ohio Medicaid beneficiaries through a transition period, which ended June 30, 2013.

2014 vs. 2013

Excluding Medicaid premium taxes and Medicaid state ACA industry fee reimbursements, Medicaid premium revenue for the year ended December 31, 2014 increased $2.0 billion, or 36%, when compared to the same period in 2013. The increase in premium revenues was driven mainly by increased membership in Florida, due to organic growth and participation in the Florida MMA program, which commenced implementation on May 1, 2014, and in Kentucky, primarily from its participation in the ACA Medicaid expansion and the additional members received following a competitor's exit from the Kentucky program in 2013. Also contributing to the increase in revenue was the net favorable impact of changes in the geographic and demographic mix of members, higher per member per month ("PMPM") rates related to the Florida MMA membership and growth in New Jersey resulting from expansion and the Healthfirst acquisition. The increase for the year ended December 31, 2014 also reflects the benefit of a full year's membership from the South Carolina and Missouri Care Medicaid acquisitions completed during the first quarter of 2013. These increases were partially offset by our exit from the Ohio Medicaid program effective July 1, 2013.

Medical benefits expense for the year ended December 31, 2014 increased by approximately 39%, when compared to the same period in 2013, mainly driven by the increase in membership, higher current period medical and pharmacy costs, and higher medical costs associated with for the Florida MMA program, which operated at a higher MBR than our 2013 performance in the state. The increase for the year ended December 31, 2014 also reflects recognition of unfavorable prior year reserve development and a full year's membership from the South Carolina and Missouri Medicaid acquisitions completed during the first quarter of 2013. Our Medicaid Health Plan segment MBR, excluding the impact of premium taxes and ACA industry fee reimbursement, increased by 230 basis points for the year ended December 31, 2014 compared to 2013, due to the impact of higher current period medical and pharmacy costs, higher cost associated with the Florida MMA program and unfavorable prior year reserve development recognized in 2014 compared to favorable prior year reserve development recognized in 2013. Pharmacy costs include increased spending on hepatitis C drugs as a result of the new, expensive drugs approved in 2014 as well as other pharmacy cost increases.

2013 vs. 2012

Excluding Medicaid premium taxes, Medicaid premium revenue for the year ended December 31, 2013 increased $1.2 billion, or 27%, when compared to the same period in 2012. The South Carolina and Missouri acquisitions increased premium revenue by $380.2 million, or 9%, year-over-year, while the remaining $816.3 million, or 18% increase was driven primarily by increased membership in our Kentucky and Florida programs, a 7% rate increase in Kentucky that was effective on January 1, 2013, rate increases in certain other markets in late 2012, changes in geographic and demographic mix of members and Medicaid revenue from payment arrangements with certain states associated with primary care enhanced payments, as mandated by the ACA. The increase in Kentucky Medicaid membership and premiums also reflect the commencement of services provided to beneficiaries in Region 3, which began on January 1, 2013, as well as the additional members received from following a competitor's exit from the Kentucky Medicaid market in July 2013.

Medicaid medical benefits expense for the year ended December 31, 2013 increased 27%, which is consistent with the increase in membership and premiums. Our Medicaid MBR for the year ended December 31, 2013 decreased by approximately 50 basis points when compared to the same period in 2012, mainly reflecting the impact of improved results in Kentucky, partially offset by a lower amount of favorable development of prior years' medical benefits payable in 2013 compared to 2012. The Kentucky program MBR declined to 90.0% in 2013 compared to 105.1% in 2012, as 2012 performance was adversely impacted by relatively high transitional medical benefit expenses for the program which launched in late 2011. The Missouri and South Carolina acquisitions also contributed to the decrease in the Medicaid segment MBR in 2013, as the MBR for these programs was lower than the segment average.

2015 Outlook

- We anticipate Medicaid segment premium revenue, excluding premium taxes and the Medicaid state ACA industry fee reimbursement, to increase to approximately $8.5 to $8.7 billion in 2015. The increase primarily results from a full year contribution from Florida MMA revenue, the New Jersey managed long-term services and supports product and the New York integrated duals program implementation.
- We currently expect our Medicaid segment MBR in 2015 to be in the range of approximately 89.25% to 90.25%, excluding the impact of Medicaid premium taxes and the Medicaid state ACA industry fee reimbursement, compared to 90.5% percent in 2014, with the largest driver being continued progress in the Florida MMA business. As discussed

in *Impacting our Results*, we expect continued margin improvement in the Florida MMA program through our performance improvement plan, including applying managed care fundamentals to the MMA population, and collaboration with the state to ensure actuarial soundness.

- We have obtained amendments, written agreements and other documentation from our Medicaid customers to reimburse us for the impact of the industry fee on our Medicaid plans for 2015, including its non-deductibility for income tax purposes.

Medicare Health Plans

We contract with CMS under the Medicare program to provide a comprehensive array of Part C and Part D benefits to Medicare eligible persons, provided through our MA plans. Our MA plans are comprised of coordinated care plans ("CCPs"), which are administered through HMOs and generally require members to seek health care services and select a primary care physician from a network of health care providers. In addition, we offer Medicare Part D coverage, which provides prescription drug benefits, as a component of most of our MA plans.

In 2014, we operated our MA CCPs in 18 states, including Arkansas, Arizona, California, Connecticut, Florida, Georgia, Hawaii, Illinois, Kentucky, Louisiana, Mississippi, Missouri, New Jersey, New York, Ohio, South Carolina, Tennessee and Texas. We cover a wide spectrum of medical services through our MA plans. For many of our plans, we provide additional benefits not covered by Original Medicare, such as vision, dental and hearing services. Through these enhanced benefits, out-of-pocket expenses incurred by our members are generally reduced, which allows our members to better manage their health care costs.

As of December 31, 2014, we also offered Medicare Supplement policies in 39 states.

Impacting Our Results

- Our MA business was subjected to substantial margin compression in 2014. As a result of legislation passed in December 2013, the 2% Federal budget sequestration reduction to Medicare provider and plan payments continued in 2014 and will extend through 2023, and our results of operations were and will continue to be negatively impacted. In addition, CMS implemented revised 2014 benchmark rates, which resulted in a rate decrease of approximately 2.0% to 4.0% from 2013 rates. CMS also made changes to the MA and PDP Medicare risk adjustment system involving a risk coding recalibration, which is being phased in over the 2014 and 2015 plan years. The new risk adjustment model included an adjustment to the calculation of health status cost risk based on each beneficiary's diagnosis codes that will reduce the positive adjustments for high-risk patients and increase the negative adjustments for low-risk patients. The change appears to most severely affect our rates for those individuals with complex medical conditions, including many of our dual-eligible and lower income members. Also, CMS implemented an MA coding intensity reduction of 4.91% from 3.41% for payment year 2014. Our MA premium rates have not been adjusted to specifically offset the impact of the ACA industry fee.

- We gained approximately 37,000 MA members in 192 counties, in the states of Arkansas, Mississippi, South Carolina and Tennessee, as a result of the Windsor acquisition. In addition, one of Windsor's subsidiaries offered Medicare Supplement insurance policies and served approximately 43,000 members in 39 states as of December 31, 2014.

Medicare Health Plans Segment Results

The following table sets forth the summarized results of operations and other relevant performance measures for our Medicare Health Plans segment for the years ended December 31, 2014, 2013 and 2012:

	For the Years Ended December 31,		
	2014	2013	2012
	(In millions)		
Premium revenue	$ 3,963.2	$ 3,071.0	$ 1,936.4
Medical benefits expense	3,506.9	2,659.5	1,630.6
ACA industry fee	44.7	—	—
Gross margin	$ 411.6	$ 411.5	$ 305.8
Medicare Health Plans Membership	417,000	290,000	213,000
Medicare Health Plans MBR	88.5%	86.6%	84.2%

2014 vs. 2013

Medicare premium revenue in 2014 increased $892.2 million, or 29%, when compared to the same period in 2013. The Windsor acquisition contributed approximately $507.2 million, or 17%, to the year-over-year increase, while organic membership growth in Florida, California, New York and Texas drove the remaining increase. Partially offsetting these increases was the impact of CMS premium rate decreases compared to 2013.

Medical benefits expense for the year ended December 31, 2014 increased $847.4 million, or 32%, compared to the same period in 2013, mainly driven by the increase in membership discussed above. The Medicare Health Plans segment MBR increased by 190 basis points compared to 2013, resulting mainly from the impact of CMS rate decreases and the federal government's budget sequestration, which took effect in April 2013, as well as unfavorable prior year reserve development, partially offset by changes to plan benefit designs and cost sharing terms in 2014 compared with 2013, as well as our ongoing medical cost management initiatives.

2013 vs. 2012

Medicare Health Plans premium revenue for the year ended December 31, 2013 increased $1.1 billion, or 59%, when compared to the same period in 2012. The Easy Choice and Desert Canyon acquisitions contributed $533.2 million, or 27%, to the year-over-year growth, while the remaining $601.4 million, or 32%, increase was mainly attributable to organic membership growth associated with our service area expansion, higher risk adjusted premium, prior year revenue adjustments and the strengthening of our sales processes and our product design.

The $1.0 billion, or 63%, increase in medical benefits expense during 2013 compared to the same period in 2012 reflects the increase in membership and premiums and increase in the Medicare Health Plans segment MBR. Medicare Health Plans segment MBR increased by 240 basis points for the year ended December 31, 2013 compared to 2012 due to the impact of Easy Choice, which operated at a higher MBR relative to the segment average, our 2013 plan design and the impact of the federal government's budget sequestration, partially offset by favorable prior period revenue adjustments.

2015 Outlook

- We expect premium revenue for our Medicare Health Plans segment in 2015 to be between $3.95 billion and $4.05 billion, stable compared to 2014.
- For the Medicare Health Plans segment, we currently expect the MBR in 2015 to be in the range of approximately 85.0% to 86.5%, compared to 88.5% in 2014. The expected improvement in 2015 is due to specific actions in 2014 designed to increase focus and make progress toward a more reasonable margin, which include specific 2015 bid actions, the continuing implementation of medical expense initiatives, and the absence of 2014's unfavorable prior year reserve development.
- As of January 2015, the Company's Medicare Health Plans segment membership was approximately 380,000 members. The approximate decrease of 37,000 members was driven by actions taken in conjunction with our 2015 bid and county withdrawals in California designed to improve the performance of Easy Choice, which resulted in a 28,000 member decrease in California, as well as the Company's exit from the Missouri, Ohio, and Arizona markets representing 8,000 members as of December 31, 2014. For 2015, WellCare offers Medicare Advantage plans in 376 counties across 15 states.

Medicare PDPs

We have contracted with CMS to serve as a plan sponsor offering stand-alone Medicare Part D PDP plans to Medicare eligible beneficiaries through our Medicare PDPs segment. As of December 31, 2014, we offered PDP plans in 49 states and the District of Columbia. The PDP benefit design generally results in our incurring a greater portion of the responsibility for total prescription drug costs in the early stages of a plan year, and less in the latter stages of a plan year, due to the members' share of cumulative out-of-pocket costs increasing throughout the plan year. As a result, the Medicare PDPs MBR generally decreases throughout the year. Also, the level and mix of members who are auto-assigned to us as and those who actively choose our PDP plans will impact the segment MBR pattern across periods.

Impacting Our Results

- Our Medicare PDP business was subjected to substantial margin compression in 2014. As a result of legislation passed in December 2013, the 2% Federal budget sequestration reduction to Medicare provider and plan payments continued in 2014 and will extend through 2023, and so our results of operations have been, and will continue to be, negatively impacted. In addition, our PDP premium rates from CMS have not been adjusted to specifically offset the impact of the ACA industry fee.

- Based on the outcome of our 2014 stand-alone PDP bids, our plans were below the benchmarks in 30 of the 33 CMS regions for which we submitted bids and within the de minimis range of the benchmark in two other CMS regions. Comparatively, in 2013, our plans were below the benchmark in 14 regions and within the de minimis range in five other regions. In 2014, we were auto-assigned newly eligible members into our plans for the 30 regions that were below the benchmark. Membership increased to approximately 1,392,000 at December 31, 2014, compared to 797,000 at December 31, 2013.

Medicare PDPs Segment Results

The following table sets forth the summarized results of operations and other relevant performance measures for our Medicare PDPs segment for the years ended December 31, 2014, 2013 and 2012:

	For the Years Ended December 31,		
	2014	2013	2012
	(In millions)		
Premium revenue	**$ 1,178.4**	**$ 776.9**	**$ 992.6**
Medical benefits expense	1,095.2	671.7	781.3
ACA industry fee	**11.4**	—	—
Gross margin	$ 71.8	$ 105.2	$ 211.3
Medicare PDPs membership	1,392,000	797,000	869,000
Medicare PDPs MBR	92.9%	86.5%	78.7%

2014 vs. 2013

PDP premium revenue increased 52% in 2014 when compared to 2013, primarily due to the increase in membership, which includes 103,000 members from the Windsor acquisition, partially offset by lower premium rates resulting from our 2014 bids. PDP MBR for the year ended December 31, 2014 increased 640 basis points over the same period in 2013 and contributed to the increase in medical benefits expense. The MBR increase is mainly due to higher drug unit costs, increased utilization of branded and specialty medications, the outcome of our 2014 bids and CMS rate decreases and the federal government's budget sequestration, which took effect in April 2013.

2013 vs. 2012

PDP premium revenue decreased 22% for the year ended December 31, 2013 when compared to the same period in 2012, primarily due a decline in membership resulting from the outcome of our 2013 bids. PDP MBR for the year ended December 31, 2013 increased 780 basis points over the same period in 2012 mainly due to the addition of our new enhanced product, designed for those who choose a PDP, and a shift in membership to this product, as well as higher drug unit costs and the outcome of our 2013 bids. Transition of care costs for the enhanced product also contributed to the increased MBR. The transition period concluded at the end of March 2013.

2015 Outlook

- We anticipate that PDP segment premium revenue will decrease to approximately $1.0 to $1.1 billion in 2015, primarily as a result of a decline in membership resulting from the outcome of our 2015 bids, as discussed below.
- We currently anticipate our PDP segment MBR for 2015 will be in the range of approximately 85.5% to 87.0%, down from 92.9% in 2014. The expected year-over-year decrease results mainly from the results of our 2015 bids, which reflect a better balance of margin and membership, including an increase in our basic plan premium.
- PDP membership as of January 1, 2015 was 1,098,000, a decrease of approximately 294,000, or 21%, from 1,392,000 as of December 31, 2014. The decline in membership in 2015 is primarily based on the outcome of our 2015 PDP bids, in which our plans were below the benchmarks in 13 of the 33 CMS regions for which we submitted bids and in the de minimis range in nine regions. In 2015, those PDP members who were auto assigned to us in regions where our plans are not below or within the de minimis range were or are being assigned to other plans. However, the outcome of our 2015 bids is expected to have a favorable impact on the 2015 segment results compared to 2014, as discussed above.

LIQUIDITY AND CAPITAL RESOURCES

Each of our existing and anticipated sources of cash is impacted by operational and financial risks that influence the overall amount of cash generated and the capital available to us. Additionally, we operate as a holding company in a highly regulated industry. The parent and other non-regulated companies ("non-regulated subsidiaries") are dependent upon dividends and management fees from our regulated subsidiaries, most of which are subject to regulatory restrictions. For a further discussion of risks that can affect our liquidity, see Part I – Item 1A – *Risk Factors* included in this 2014 Form 10-K.

Liquidity

The Company maintains liquidity at two levels: the regulated subsidiary level and the non-regulated parent and subsidiary level.

Regulated subsidiaries

Our regulated subsidiaries' primary liquidity requirements include:

- payment of medical claims and other health care services;
- management fees paid to our non-regulated administrator subsidiary under intercompany services agreements and direct administrative costs, which are not covered by an intercompany services agreement, such as selling expenses and legal costs; and
- federal tax payments to the parent company under an intercompany tax sharing agreement.

Our regulated subsidiaries meet their liquidity needs by:

- maintaining appropriate levels of cash, cash equivalents and short-term investments;
- generating cash flows from operating activities, mainly from premium revenue;
- cash flows from investing activities, including investment income and sales of investments; and
- capital contributions received from our non-regulated subsidiaries.

We refer collectively to the cash, cash equivalents and investment balances maintained by our regulated subsidiaries as "regulated cash and investments." Our regulated subsidiaries generally receive premiums in advance of payments of claims for medical and other health care services; however, regulated cash and cash equivalents can fluctuate significantly in a particular period depending on the timing of receipts for premiums from our government partners. Our unrestricted regulated cash and investments (which represent our regulated cash and investments not on deposit with a state in which we operate) was $1.7 billion as of December 31, 2014, an increase of $300 million from $1.4 billion at December 31, 2013. The increase is due mainly to cash flows from operating activities as well as $89.0 million of contributions received from our non-regulated subsidiaries, partially offset by $68.0 million in dividends distributed to our non-regulated subsidiaries.

Our regulated subsidiaries are each subject to applicable state regulations that, among other things, require the maintenance of minimum levels of capital and surplus. We continue to maintain significant levels of aggregate excess statutory capital and surplus in our regulated subsidiaries. See further discussion under *Regulatory Capital and Dividend Restrictions* below.

Parent and non-regulated subsidiaries

Liquidity requirements at the non-regulated parent and subsidiary level generally consist of:

- payment of administrative costs not directly incurred by our regulated operations, including, but not limited to, staffing costs, business development, rent, branding and certain information technology services;
- capital contributions and advances paid to our regulated subsidiaries;
- capital expenditures;
- debt service; and
- federal tax payments.

Our non-regulated parent and subsidiaries normally meet their liquidity requirements by:

- management fees earned by our non-regulated administrator subsidiary under intercompany services agreements;
- dividends received from our regulated subsidiaries;
- collecting federal tax payments from the regulated subsidiaries;
- proceeds from issuance of debt and equity securities; and
- cash flows from investing activities, including investment income and sales of investments.

Unregulated cash, cash equivalents and investments was $89.5 million at December 31, 2014, a decrease of $405.6 million from $495.1 million at December 31, 2013. The decrease resulted mainly from funding provided to certain regulated subsidiaries for various subsidies and other payments the subsidiaries made on behalf of CMS as a Part D plan sponsor for which CMS will reimburse us. The CMS subsidies and payments include, among others, the catastrophic reinsurance subsidy and various premium and cost sharing subsidies for low income members, as well as the CMS risk corridor. Growth in our PDP and MA membership and high drug unit costs has resulted in higher subsidy payments compared with our bids and prior years, and our unregulated cash will continue to be used to fund these benefits until they are settled with CMS, which we expect to occur in the fourth quarter of 2015. Additionally, the decrease in unregulated cash reflects $89.0 million of capital contributions made to certain regulated subsidiaries and payment of certain investigation resolution costs and other related costs. These decreases were partially offset by the $298.6 million in net proceeds from the Term Loan received in September 2014 and $68.0 million of dividends received from regulated subsidiaries.

Outlook

Based on our experience in 2014, our 2015 PDP and MA bids reflected significantly higher estimates for cash outflows for the government's responsibility of the Part D benefit plan design, particularly for the catastrophic reinsurance subsidy. While the level of subsidy payments we make on behalf of CMS compared with our 2015 bids may still be significant due to the composition of our 2015 PDP membership, which reflects a higher number of dual eligible members relative to our overall population than we expected, we expect a meaningful reduction in our CMS receivable upon settling the 2014 plan year with CMS in the fourth quarter of 2015.

Auction Rate Securities

As of December 31, 2014, $32.3 million of our long-term investments were comprised of municipal note securities with an auction reset feature ("auction rate securities"), which are issued by various state and local municipal entities for the purpose of financing student loans, public projects and other activities. Two auction rate securities with an aggregate fair value of $21.3 million have investment grade security credit ratings and one auction rate security with a fair value of $11.0 million has a credit rating below investment grade. Liquidity for these auction rate securities is typically provided by an auction process which allows holders to sell their notes and resets the applicable interest rate at pre-determined intervals, usually every seven or 35 days. As of the date of this 2014 Form 10-K, auctions have failed for our auction rate securities and there is no assurance that auctions will succeed in the future. An auction failure means that the parties wishing to sell their securities could not be matched with an adequate volume of buyers. In the event that there is a failed auction the indenture governing the security requires the issuer to pay interest at a contractually defined rate that is generally above market rates for other types of similar instruments. The securities for which auctions have failed will continue to accrue interest at the contractual rate and be auctioned every seven or 35 days until the auction succeeds, the issuer calls the securities, or they mature. As a result, our ability to liquidate and fully recover the carrying value of our remaining auction rate securities in the near term may be limited or non-existent. In addition, if the issuers are unable to successfully close future auctions and their credit ratings deteriorate, we may in the future be required to record an impairment charge on these investments.

Although auctions continue to fail, we believe we will be able to liquidate these securities without significant loss. There are government guarantees or municipal bond insurance in place and we have the ability and the present intent to hold these securities until maturity or market stability is restored. Accordingly, we do not believe our auction rate securities are impaired and as a result, we have not recorded any impairment losses for our auction rate securities. However, it could take until the final maturity of the underlying securities to realize our investments' recorded value. The final maturity as of December 31, 2014 of the underlying securities could be as long as 23 years. The weighted-average life of the underlying securities for our auction rate securities portfolio is 18 years.

Cash Flow Activities

Our cash flows are summarized as follows:

	For the Years Ended December 31,		
	2014	2013	2012
	(In millions)		
Net cash provided by (used in) operating activities	$ 299.3	$ 178.9	$ (30.7)
Net cash used in investing activities	(75.6)	(290.5)	(222.8)
Net cash (used in) provided by financing activities	(392.7)	493.6	28.9
Total net (decrease) increase in cash and cash equivalents	$ (169.0)	$ 382.0	$ (224.6)

Net cash provided by (used in) operating activities

We generally receive premiums in advance of payments of claims for health care services; however, cash flows related to our operations can fluctuate significantly in a particular period depending on the timing of premiums receipts from our government partners or payments related to the resolution of government investigations and related litigation.

2014 vs. 2013

Cash provided by operating activities for 2014 was $299.3 million compared to $178.9 million for 2013, mainly resulting from an increase in premiums associated with the growth in membership, as well as the timing of certain premium receipts, partially offset by the $137.7 million ACA industry fee payment remitted to the IRS during September 2014. Operating cash flows for 2014 and 2013 also reflect payments of approximately $36.5 million and $37.6 million, respectively, made to the Civil Division under the terms of the settlement agreement discussed in "Financial Impact of Government Investigation and Litigation" below.

2013 vs. 2012

Cash provided by operating activities in 2013 was $178.9 million compared to cash used in operating activities of $30.7 million for 2012. The year-over-year improvement primarily resulted from the increase in premiums associated with the growth in membership. Operating cash flows in 2013 and 2012 also reflect payments made to the Civil Division of approximately $37.6 million and $39.8 million, respectively.

Net cash used in investing activities

2014 vs. 2013

Net cash used in investing activities for 2014 was $75.6 million compared to $290.5 million for 2013. The decrease in cash used in 2014 primarily resulted from a higher amount of cash used in acquisitions in 2013 relative to 2014, including $133.6 million advanced in December 2013 in connection with the Windsor acquisition, which closed in January 2014. Conversely, in 2014 cash flows reflect $48.0 million of net cash acquired from acquisitions. Excluding acquisitions, investment activities primarily reflect our investment in marketable securities and restricted investments, purchases of property and equipment and proceeds from maturities of marketable securities and restricted investments, which in combination, did not materially change year over year.

2013 vs. 2012

Net cash used in investing activities was $290.5 million in 2013 compared to $222.8 million in 2012. The increase in cash used in 2013 compared to 2012 was primarily due to the $133.6 million advanced in December 2013 in connection with the Windsor acquisition which closed in January 2014, partially offset by the impact from lower collective amounts paid in connection with the 2013 acquisitions as compared to the collective amounts paid in connection with the 2012 acquisitions.

Net cash (used in) provided by financing activities

Net cash used in financing activities was $392.7 million in 2014, compared to net cash provided of $493.6 million and $28.9 million for 2013 and 2012, respectively. These cash flows mainly reflect:

- Net funds paid for the benefit of members of approximately $687.9 million for 2014, compared to funds received of $34.0 million and $36.3 million during 2013 and 2012, respectively. These funds represent the net amounts of subsidies received from CMS and the related prescription drug benefits we paid in connection with the low-income cost sharing, catastrophic reinsurance and coverage gap discount components of the Medicare Part D program related to the government's portion of financial responsibility. The increased cash outflows in 2014 are due mainly to increased drug costs relative to our MA and PDP bids.
- Aggregate net proceeds of $298.6 million in 2014 resulting from the $300.0 million Term Loan issued during September 2014, compared to aggregate net proceeds from debt transactions of $451.4 million in 2013. Debt-related activity in 2013 includes net proceeds of $228.5 million received in connection with the second amendment to our 2011 credit agreement and $587.9 million of net proceeds from the issuance of the Senior Notes in November 2013, partially offset by $28.5 million of payments made on the term loan under our 2011 credit agreement during the first three quarters of 2013. During November 2013, we used a portion of the net proceeds from the issuance of the Senior Notes to pay off the remaining $336.5 million term loan balance under our 2011 credit agreement, plus accrued interest, and used the remaining net proceeds for general corporate purposes and organic growth opportunities.

Financial Impact of Government Investigation and Litigation

Under the terms of settlement agreements entered into on April 26, 2011, and finalized on March 23, 2012, to resolve matters under investigation by the Civil Division and certain other federal and state enforcement agencies (the "Settlement"), WellCare agreed to pay the Civil Division a total of $137.5 million in four equal annual principal payments, plus interest accrued at 3.125%. The estimated fair value of the discounted remaining liability was $35.2 million at December 31, 2014.

The Settlement also provides for a contingent payment of an additional $35.0 million in the event that we are acquired or otherwise experience a change in control on or before April 30, 2015, provided that the change in control transaction exceeds certain minimum transaction value thresholds as specified in the Settlement.

We currently maintain directors' and officers' liability insurance in the amount of $125.0 million for other matters not addressed above.

Capital Resources

Credit Agreement

In September 2014, we amended and restated our existing credit agreement (as amended and restated, the "Credit Agreement") to provide for the $300.0 million Term Loan, in addition to the previously-existing $300.0 million senior unsecured revolving loan facility (the "Revolving Credit Facility"), which may be used for general corporate purposes of the Company and its subsidiaries. The Revolving Credit Facility provides that up to $75.0 million may be used for letters of credit. The Credit Agreement also provides that we may, at our option, increase the aggregate amount of the Revolving Credit Facility and/or obtain incremental term loans in an amount up to $75.0 million without the consent of any lenders not participating in such increase, subject to certain customary conditions and lenders committing to provide the increase in funding. The Term Loan matures in full in September 2016, with no amortization payments or prepayment penalties. We are not able to reborrow amounts repaid under the Term Loan. The commitments under the Revolving Credit Facility expire on November 14, 2018 and any amounts outstanding under the facility will be payable in full at that time. Borrowings under the Credit Agreement bear interest at a rate of LIBOR plus a spread of between 1.50% and 2.625%, or a rate equal to the Prime Rate plus a spread of between 0.50% to 1.625%, depending upon our cash flow leverage ratio (which is defined as the ratio of our total debt to total consolidated EBITDA.) Unutilized commitments under the Credit Agreement are subject to a fee of 0.25% to 0.45% depending upon our cash flow leverage ratio.

The Credit Agreement contains negative and financial covenants that limit certain activities of our company and its subsidiaries, including (i) restrictions on our ability to incur additional indebtedness; and (ii) financial covenants that require (a) the cash flow leverage ratio not to exceed a maximum; (b) a minimum interest expense and principal payment coverage ratio; and (c) 105% of our required level of statutory net worth for our health maintenance organization and insurance subsidiaries. The Credit Agreement also contains customary representations and warranties that must be accurate in order for us to borrow under the Revolving Credit Facility. In addition, the Credit Agreement contains customary events of default. If an event of default occurs and is continuing, we may be required immediately to repay all amounts outstanding under the Credit Agreement. Lenders holding at least 50% of the loans and commitments under the Credit Agreement may elect to accelerate the maturity of the loans and/or terminate the commitments under the Credit Agreement upon the occurrence and during the continuation of an event of default.

We received net proceeds of $298.6 million in connection with the funding of the Term Loan and the closing of the Credit Agreement in September 2014. The Term Loan is classified as long-term debt in the Company's consolidated balance sheet at December 31, 2014 based on its September 2016 maturity date. The interest rate on the Term Loan was 2.5% as of December 31, 2014.

Additionally, in November 2013, we terminated our 2011 credit agreement in connection with our entry into the Credit Agreement described above. All amounts outstanding under the 2011 credit agreement were paid in full on November 14, 2013.

As of December 31, 2014 and as of the date of this filing, we have not drawn upon the Revolving Credit Facility and we remain in compliance with all covenants under both the Credit Agreement and the Senior Notes (defined below).

Senior Notes

In November 2013, we completed the offer and sale of $600.0 million in principal amount of 5.75% unsecured Senior Notes due 2020. We received net proceeds of $587.9 million upon issuance of the Senior Notes, after deduction of approximately $12.1 million incurred in debt issuance costs. The Senior Notes will mature on November 15, 2020, with interest

on the Senior Notes payable semi-annually on May 15 and November 15 of each year, which commenced on May 15, 2014. We used a portion of the net proceeds from the offering to repay the full $336.5 million outstanding under our 2011 credit agreement, and the remaining net proceeds are being used for general corporate purposes, including organic growth opportunities and potential acquisitions.

The indenture under which the Senior Notes were issued contains covenants that, among other things, limit the ability of our company and its restricted subsidiaries to:

- incur additional indebtedness and issue preferred stock;
- pay dividends or make other distributions;
- make other restricted payments and investments;
- sell assets, including capital stock of restricted subsidiaries;
- create certain liens;
- incur restrictions on the ability of restricted subsidiaries to pay dividends or make other payments, and in the case of our subsidiaries, guarantee indebtedness;
- engage in transactions with affiliates;
- create unrestricted subsidiaries; and
- merge or consolidate with other entities.

For additional information on our long-term debt, see Note 12 – *Debt* to the Consolidated Financial Statements.

Shelf Registration Statement

In August 2012, we filed a shelf registration statement on Form S-3 with the SEC that became automatically effective covering the registration, issuance and sale of an indeterminate amount of our securities, including common stock, preferred stock, senior or subordinated debt securities, depository shares, securities purchase contracts, units or warrants. We may publicly offer securities in the future at prices and terms to be determined at the time of the offering.

Initiatives to Increase Our Unregulated Cash

We may pursue alternatives to raise additional unregulated cash. Some of these initiatives may include, but are not limited to, obtaining dividends from certain of our regulated subsidiaries, provided sufficient capital in excess of regulatory requirements exists in these subsidiaries, utilizing the Revolving Credit Facility, and/or accessing the debt and equity capital markets. However, we cannot provide any assurances that we will obtain applicable state regulatory approvals for additional dividends to our non-regulated subsidiaries by our regulated subsidiaries or be successful in accessing the capital markets if we determine to do so. We believe that we have sufficient capital, or sufficient access to capital, including through the Revolving Credit Facility, to meet our capital needs for at least the next twelve months.

Regulatory Capital and Dividend Restrictions

Each of our HMO and insurance subsidiaries must maintain a minimum amount of statutory capital determined by statute or regulation. The minimum statutory capital requirements differ by state and are generally based on a percentage of annualized premium revenue, a percentage of annualized health care costs, a percentage of certain liabilities, a statutory minimum, risk-based capital ("RBC") requirements or other financial ratios. The RBC requirements are based on guidelines established by the National Association of Insurance Commissioners ("NAIC"), and have been adopted by most states. The statutory framework for our regulated subsidiaries' minimum capital requirements could change over time. For instance, RBC requirements may be adopted by more of the states in which we operate. In addition, regulators could require our subsidiaries to maintain minimum levels of statutory net worth in excess of the amount required under the applicable state laws if the regulators determine that maintaining such additional statutory net worth is in the best interest of our members and other constituencies. Failure to maintain these requirements would trigger regulatory action by the state. Such statues, regulations and capital requirements also restrict the timing, payment, and amount of dividends and other distributions that may be paid to us as the sole stockholder. To the extent our HMO and insurance subsidiaries must comply with these regulations, they may not have the financial flexibility to transfer funds to us. Based upon current statutes and regulations, the minimum capital and surplus requirement, or net assets, for these subsidiaries that may not be transferable to us in the form of loans, advances, or cash dividends was approximately $746.0 million at December 31, 2014, and $489.0 million at December 31, 2013. The combined statutory capital and surplus of our HMO and insurance subsidiaries was $1.3 billion and $1.1 billion at December 31, 2014 and 2013, respectively, which was in compliance with the minimum capital requirements as of those dates.

Our regulated subsidiaries are also subject to restrictions on their ability to make dividend payments. Dividend restrictions vary by state, but the maximum amount of dividends which can be paid without prior approval from the applicable state is subject to restrictions relating to statutory capital, surplus and net income for the previous year. Some states require prior

approval of all dividends, regardless of amount. States may disapprove any dividend that, together with other dividends paid by a subsidiary in the prior 12 months, exceeds the regulatory maximum as computed for the subsidiary based on its statutory surplus and net income. We received $68.0 million, $147.0 million and $192.0 million in dividends from our regulated subsidiaries during the years ended December 31, 2014, 2013, and 2012, respectively. The 2014 amount included $36 million not requiring prior regulatory approval, and $32 million paid after obtaining prior regulatory approval. Under applicable regulatory requirements at December 31, 2014, the amount of dividends that may be paid through the end of 2015 by our HMO and insurance subsidiaries without prior approval by regulatory authorities is approximately $60.0 million in the aggregate. Actual dividends paid may vary due to consideration of excess statutory capital and surplus and expected future surplus requirements related to, for example, premium volume and product mix.

For additional information on regulatory requirements, see Note 17 – *Regulatory Capital and Dividend Restrictions* to the Consolidated Financial Statements.

Commitments and Contingencies

The following table sets forth information regarding our contractual obligations as of December 31, 2014.

	Payments due to period				
	Total	Less Than 1 Year	1 - 3 Years	3 - 5 Years	More than 5 Years
			(In millions)		
Operating leases	$ 72.4	$ 24.9	$ 28.0	$ 11.5	$ 8.0
Purchase obligations (1)	125.3	80.7	29.6	15.0	—
Amounts accrued related to investigation resolution (2)	35.2	35.2	—	—	—
Long-term debt	900.0	—	300.0	—	600.0
Interest on debt (3)	217.6	42.2	76.2	69.0	30.2
Total	$ 1,350.5	$ 183.0	$ 433.8	$ 95.5	$ 638.2

(1) Our purchase obligations include commitments under contracts for equipment leases, software maintenance and the purchase of pharmaceuticals from our pharmacy benefit manager.
(2) Based on the terms of the settlement agreement reached with the Civil Division effective as of March 23, 2012, as discussed in Note 13 – *Commitments and Contingencies* to the Consolidated Financial Statements.
(3) Represents projected interest on our 5.75% $600.0 million Senior Notes and our $300.0 million Term Loan.

We are not an obligor under or guarantor of any indebtedness of any other party; however, we may have to pay referral claims of health care providers under contract with us who are not able to pay costs of medical services provided by other providers.

OFF BALANCE SHEET ARRANGEMENTS

At December 31, 2014, we did not have any off-balance sheet financing arrangements except for operating leases as described in the table above.

CRITICAL ACCOUNTING ESTIMATES

In the ordinary course of business, we make a number of estimates and assumptions relating to the reporting of our results of operations and financial condition in conformity with GAAP. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances. Actual results could differ significantly from those estimates under different assumptions and conditions. We believe that our accounting estimates relating to premium revenue recognition and premiums receivable, medical benefits expense and medical benefits payable, and goodwill and intangible assets, are those that are most important to the portrayal of our financial condition and results and require management's most difficult, subjective and complex judgments, often as a result of the need to make estimates about the effect of matters that are inherently uncertain.

Premium Revenue Recognition and Premiums Receivable

We earn premium revenue through our participation in Medicaid, Medicaid-related and Medicare programs. Our Medicaid contracts with state agencies generally are multi-year contracts subject to annual renewal provisions. Our Medicare contracts with CMS renew annually. Our Medicare and Medicaid contracts establish fixed, monthly premium rates per member ("PMPM"), which are generally determined at the beginning of each new contract renewal period; however, premiums may be adjusted by CMS and state agencies throughout the terms of the contracts in certain cases. Premium rate changes are recognized in the period the change becomes effective, when the impact of the change in the rate is reasonably estimable, and collection is assured. Our contracts also have additional provisions as described in the sections below.

We recognize premium revenue in the period in which we are obligated to provide services to our members. We are generally paid by CMS and state agencies in the month in which we provide services. On a monthly basis, we bill members for any premiums for which they are responsible according to their respective plan. We record premiums earned but not received as premiums receivable and record premiums received in advance of the period of service as unearned premiums in the consolidated balance sheets. Unearned premiums are recognized as revenue when we provide the related services. Member premiums are recognized as revenue in the period of service. We estimate, on an on-going basis, the amount of members' billings that may not be collectible, based on our evaluation of historical trends. An allowance is established for the estimated amount that may not be collectible. In addition, we routinely monitor the collectability of specific premiums receivable from CMS and state agencies, including Medicaid receivables for obstetric deliveries and newborns and net receivables for member retroactivity and reduce revenue and premiums receivable by the amount we estimate may not be collectible.

Premium payments are based upon eligibility lists produced by CMS and state agencies. We verify these lists to determine whether we have been paid for the correct premium category and program. From time to time, CMS and state agencies require us to reimburse them for premiums that we received for individuals who were subsequently determined by us, or by CMS or state agencies, to be ineligible for any government-sponsored program or to belong to a plan other than ours. Additionally, the verification of membership may result in additional premiums due to us from CMS and state agencies for individuals who were subsequently determined to belong to our plan for periods in which we received no premium for those members. We estimate the amount of outstanding retroactivity adjustments and adjust premium revenue based on historical trends, premiums billed, the volume of member and contract renewal activity and other information. We record amounts receivable in premiums receivable, net and amounts payable in other accrued expenses and liabilities in the consolidated balance sheets.

Supplemental Medicaid Premiums

We earn, or earned, supplemental premium payments for eligible obstetric deliveries and newborns of our Medicaid members in Georgia, Illinois, Kentucky, Missouri, New York, South Carolina and, until June 30, 2013, in Ohio. Each state Medicaid contract specifies how and when these supplemental payments are earned and paid. Upon delivery of a newborn, we notify the state agency according to the contract terms. We also earn supplemental Medicaid premium payments in some states for high cost drugs and certain services such as early childhood prevention screenings. We recognize supplemental premium revenue in the period we provide related services to our members.

Medicaid Risk-Adjusted Premiums

In some instances, our Medicaid premiums are subject to risk score adjustments based on the health profile of our membership. Generally, the risk score is determined by the state agency's analysis of encounter submissions of processed claims data to determine the acuity of our membership relative to the entire state's Medicaid membership. The frequency of when states adjust premiums varies, but is usually done quarterly or semi-annually on a retrospective basis. We recognize periodic changes to risk-adjusted premiums as revenue when the amounts are determinable and collection is reasonably assured.

Medicaid ACA Industry Fee reimbursement

The ACA imposed certain new taxes and fees, including limitations on the amount of compensation that is tax deductible, as well as an annual premium-based health insurance industry assessment on health insurers which began in 2014. As discussed in "Medicaid Segment Results- *Impacting Our Results*", we have received amendments, written agreements or other documentation from all our Medicaid state customers, that commit them to reimburse us for the portion of the ACA industry fee on our Medicaid plans, including its non-deductibility for income tax purposes for 2014. Consequently, we recognized $124.6 million of reimbursement for the ACA industry fee as premium revenue for the year ended December 31, 2014.

Medicare Risk-Adjusted Premiums

CMS provides risk-adjusted payments for MA Plans and PDPs based on the demographics and health severity of enrollees. The risk-adjusted premiums we receive are based on claims and encounter data that we submit to CMS within prescribed deadlines. We develop our estimates for risk-adjusted premiums utilizing historical experience, or other data, and predictive models as sufficient member risk score data becomes available over the course of each CMS plan year. We recognize periodic changes to risk-adjusted premiums as revenue when the amounts are determinable and collection is reasonably assured, which is possible as additional diagnosis code information is reported to CMS, when the ultimate adjustment settlements are received from CMS, or we receive notification of such settlement amounts. CMS adjusts premiums on two separate occasions on a retrospective basis. The first retrospective adjustment for a given plan year generally occurs during the third quarter of that year. This initial settlement represents the update of risk scores for the current plan year based on the severity of claims incurred in the prior plan year. CMS then issues a final retrospective risk adjusted premium settlement for that plan year in the following year. We develop our estimates for risk-adjusted premiums utilizing historical experience and predictive models as sufficient member risk score data becomes available over the course of each CMS plan year. We populate our models with available risk score data on our members and base risk premium adjustments on risk score data from the previous year. We are not privy to risk score data for members new to our plans in the current plan year; therefore we include assumptions regarding these members' risk scores. We periodically revise our estimates of risk-adjusted premiums as additional diagnosis code information is reported to CMS and adjust our estimates to actual amounts when the ultimate adjustment settlements are either received from CMS or we receive notification from CMS of such settlement amounts. As a result of the variability of factors that determine our estimates for risk-adjusted premiums, the actual amount of the CMS retroactive payment could be materially more or less than our estimates and could have a material effect on our results of operations, financial position and cash flows. We record any changes in estimates in current operations as adjustments to premium revenue. Historically, we have not experienced significant differences between our estimates and amounts ultimately received. However, in the third quarter of 2013, we recognized risk adjusted premium received as part of the 2012 final settlement that was higher than our original estimates, mainly related to members in our California MA plan that were new to Medicare in 2012. The data provided to CMS to determine members' risk scores is subject to audit by CMS even after the annual settlements occur. An audit may result in the refund of premiums to CMS. While our experience to date has not resulted in a material refund, future refunds could materially reduce premium revenue in the year in which CMS determines a refund is required and could be material to our results of operations, financial position and cash flows.

Minimum Medical Expense and Risk Corridor Provisions

We may be required to refund certain premium revenue to state agencies and CMS under various contractual and plan arrangements. We estimate the impact of these arrangements on a monthly basis and reflect any adjustments to premium revenues in current operations. We report the estimated net amounts due to state agencies and CMS in other payables to government partners in the consolidated balance sheets.

Certain of our Medicaid contracts require us to expend a minimum percentage of premiums on eligible medical benefits expense. To the extent that we expend less than the minimum percentage of the premiums on eligible medical benefits, we are required to refund to the state all or some portion of the difference between the minimum and our actual allowable medical benefits expense. We estimate the amounts due to the state agencies as a return of premium based on the terms of our contracts with the applicable state agency.

Our MA and PDP prescription drug plan premiums are subject to risk sharing through the CMS Medicare Part D risk corridor provisions. The risk corridor calculation compares our actual experience to the target amount of prescription drug costs, limited to costs under the standard coverage as defined by CMS, less rebates included in our submitted plan year bid. We receive additional premium from CMS if our actual experience is more than 5% above the target amount. We refund premiums to CMS if our actual experience is more than 5% below the target amount. Based on the risk corridor provision and PDP activity-to-date, an estimated risk-sharing receivable or payable is recorded as an adjustment to premium revenue. After the close of the annual plan year, CMS performs the risk corridor calculation and any differences are settled between CMS and our plans. Historically, we have not experienced material differences between the subsequent CMS settlement amount and our estimates.

Beginning in 2014, the ACA requires the establishment of a minimum medical loss ratio ("MLR") for MA plans and Part D plans, requiring them to spend not less than 85% of premiums on medical benefits. The rules implementing the minimum MLR impose financial and other penalties for failing to achieve the minimum MLR, including requirements to refund to CMS shortfalls in amounts spent on medical benefits and termination of a plan's MA contract for prolonged failure to achieve the minimum MLR. MLR is determined by adding a plan's spending for clinical services, prescription drugs and other direct patient benefits, plus its total spending on quality improvement activities and dividing the total by earned premiums (after subtracting specific identified taxes and other fees). These provisions did not have a material impact on our results of operations in 2014.

Medicare Part D Subsidies

For qualifying low income PDP members, CMS pays for some, or all, of the member's monthly premium.

We receive certain Part D prospective subsidy payments from CMS for our MA and PDP members as a fixed monthly per member amount, based on the estimated costs of providing prescription drug benefits over the plan year, as reflected in our bids. Approximately nine to ten months subsequent to the end of the plan year, or later in the case of the coverage gap discount subsidy, a settlement payment is made between CMS and our plans based on the difference between the prospective payments and actual claims experience. The subsidy components under Part D are described below.

Low-Income Cost Sharing Subsidy (LICS)- For qualifying low income members, CMS reimburses us for all or a portion of the low income member's deductible, coinsurance and co-payment amounts above the out-of-pocket threshold.

Catastrophic Reinsurance Subsidy- CMS reimburses plans for 80% of the drug costs after a member reaches his or her out-of-pocket catastrophic threshold through a catastrophic reinsurance subsidy.

Coverage Gap Discount Subsidy (CGD)- CMS provides monthly prospective payments for pharmaceutical manufacturer discounts made available to members.

Catastrophic reinsurance subsidies and the low-income cost sharing subsidies represent cost reimbursements under the Medicare Part D program. We are fully reimbursed by CMS for costs incurred for these contract elements and, accordingly, there is no insurance risk to us. Therefore, amounts received for these subsidies are not considered premium revenue, and are reported, net of the subsidy benefits paid, as Funds receivable/held for the benefit of members in the consolidated balance sheets. The receipts and payments between us and CMS are presented on a net basis as financing activity in our consolidated statements of cash flows since we are essentially administering and paying the benefit subsidies on behalf of CMS. Historically, the settlement payments between us and CMS have not been materially different from our estimates. However, the balance of funds receivable from CMS grew substantially in 2014 due to increased drug costs relative to our bid estimates.

CGD subsidies advance payments are recorded as Funds receivable/held for the benefit of members in the consolidated balance sheets. Receivables are set up for manufacturer-invoiced amounts. Manufacturer payments reduce the receivable as payments are received. After the end of the contract year, during the Medicare Part D Payment reconciliation process for the CGD, CMS will perform a cost-based reconciliation to ensure the Medicare Part D sponsor is paid for gap discounts advanced at the point of sale, based on accepted Prescription Drug Event data.

For a further description of the revenue elements related to our segments, see Part I - Item 1 - Business - *OUR PRODUCT SEGMENTS.*

Estimating Medical Benefits Expense and Medical Benefits Payable

The cost of medical benefits is recognized in the period in which services are provided and includes an estimate of the cost of incurred but not reported ("IBNR") direct medical benefits expense. Medical benefits payable includes estimates for IBNR, amounts for claims fully adjudicated but not yet paid and certain medically-related administrative costs. Direct medical expenses include amounts paid or payable to hospitals, physicians, pharmacy benefit managers and providers of ancillary services. Recorded direct medical expenses are reduced by the amount of pharmacy rebates earned, which are estimated based on historical utilization of specific pharmaceuticals, current utilization and contract terms. Pharmacy rebates earned but not yet received from pharmaceutical manufacturers are included in pharmacy rebates receivable in the accompanying consolidated balance sheets. Direct medical expenses may also include reserves for estimated referral claims related to health care providers under contract with us who are financially troubled or insolvent and who may not be able to honor their obligations for the costs of medical services provided by other providers. In these instances, we may be required to honor these obligations for legal or business reasons. Based on our current assessment of providers under contract with us, such losses have not been and are not expected to be significant. Also, included in direct medical expense are estimates for provider settlements due to clarification of contract terms, out-of-network reimbursement, claims payment differences and amounts due to contracted providers under risk-sharing arrangements. Medically-related administrative costs include preventive health and wellness, care management, case and disease management, and other quality improvement costs. Other medically-related administrative costs such as utilization review services, network and provider credentialing and claims handling costs, are recorded in selling, general, and administrative expenses.

Medical benefits payable represents amounts for claims fully adjudicated but not yet paid and estimates for IBNR. Our estimate of IBNR is the most significant estimate included in our consolidated financial statements. We determine our best estimate of the base liability for IBNR utilizing consistent standard actuarial methodologies based upon key assumptions which vary by business segment. Our assumptions include current payment experience, trend factors, and completion factors. Trend

factors in our standard actuarial methodologies include contractual requirements, historic utilization trends, the interval between the date services are rendered and the date claims are paid, denied claims activity, disputed claims activity, benefit changes, expected health care cost inflation, seasonality patterns, maturity of lines of business, changes in membership and other factors.

The following table provides a detail of the components of medical benefits payable:

	December 31, 2014	% of Total	December 31, 2013	% of Total
	(In millions)			
IBNR	$ 1,111.5	75%	$ 690.1	72%
Other medical benefits payable	372.3	25%	263.3	28%
Total medical benefits payable	$ 1,483.8	100%	$ 953.4	100%

The factors and assumptions that are used to develop our estimate of medical benefits expense and medical benefits payable inherently are subject to greater variability when there is more limited experience or information available to us. The ultimate claims payment amounts, patterns and trends for new products and geographic areas cannot be precisely predicted at their onset, since we, the providers and the members do not have experience in these products or geographic areas. Standard accepted actuarial methodologies, discussed above, would allow for this inherent variability. This can result in larger differences between the originally estimated medical benefits payable and the actual claims amounts paid. Conversely, during periods where our products and geographies are more stable and mature, we have more reliable claims payment patterns and trend experience. With more reliable data, we should be able to more closely estimate the ultimate claims payment amounts; therefore, we may experience smaller differences between our original estimate of medical benefits payable and the actual claim amounts paid.

In developing our estimates, we apply different estimation methods depending on the month for which incurred claims are being estimated. For the more recent months, which constitute the majority of the amount of the medical benefits payable, we estimate claims incurred by applying observed trend factors to the fixed fee PMPM costs for prior months, which costs have been estimated using completion factors, in order to estimate the PMPM costs for the most recent months. We validate our estimates of the most recent PMPM costs by comparing the most recent months' utilization levels to the utilization levels in prior months and actuarial techniques that incorporate a historical analysis of claim payments, including trends in cost of care provided and timeliness of submission and processing of claims.

Many aspects of the managed care business are not predictable. Medical cost trends potentially are more volatile than other segments of the economy. Therefore, we must continually monitor our historical experience in determining our trend assumptions to reflect the ever-changing mix, needs and size of our membership. External factors such as government-mandated benefits or other regulatory changes, catastrophes and epidemics may impact medical cost trends. Other internal factors such as system conversions and claims processing changes may impact our ability to accurately predict estimates of historical completion factors or medical cost trends. We believe that the amount of medical benefits payable as of December 31, 2014 is adequate to cover our ultimate liability for unpaid claims as of that date; however, actual payments may differ from established estimates. If the completion factors we used in estimating our IBNR for the year ended December 31, 2014 were decreased by 1%, our net income would decrease by approximately $132.2 million. If the completion factors were increased by 1%, our net income would increase by approximately $129.2 million.

After determining an estimate of the base liability for IBNR, we make an additional estimate, also using standard actuarial techniques, to account for adverse conditions that may cause actual claims to be higher than the estimated base reserve. We refer to this additional liability as the provision for moderately adverse conditions. Our estimate of the provision for moderately adverse conditions captures the potential adverse development from factors such as:

- our entry into new geographical markets;
- our provision of services to new populations such as the aged, blind and disabled;
- variations in utilization of benefits and increasing medical costs, including higher drug costs;
- changes in provider reimbursement arrangements;
- variations in claims processing speed and patterns, claims payment and the severity of claims; and
- health epidemics or outbreaks of disease such as the flu or enterovirus.

We consider the base actuarial model liability and the provision for moderately adverse conditions as part of our overall assessment of our IBNR estimate to properly reflect the complexity of our business, the number of states in which we operate, and the need to account for different health care benefit packages among those states.

Changes in medical benefits payable estimates are primarily the result of obtaining more complete claims information and medical expense trend data over time. Differences between actual experience and estimates used to establish the liability, which we refer to as prior period developments, are recorded in the period when such differences become known and have the effect of increasing or decreasing the reported medical benefits expense in such periods. As discussed below, the cumulative effect of prior year reserve development in 2014 and 2013 was an unfavorable $48.1 million and a favorable $3.0 million, respectively, however, we recognized unfavorable prior periods reserve development in three of four quarters in 2013, and in the first and second quarters of 2014. Based on the unfavorable prior period reserve development experience in these quarters, we refined certain of these assumptions, resulting in increased current period medical benefits costs incurred.

The following table provides a reconciliation of the beginning and ending balance of medical benefits payable:

	Years Ended December 31,		
	2014	2013	2012
	(In millions)		
Balances as of beginning of period	$ 953.4	$ 733.0	$ 744.8
Acquisitions	107.0	71.6	—
Medical benefits incurred related to:			
Current year	11,481.4	8,333.2	6,450.5
Prior year	(26.2)	(74.6)	(146.6)
Total	11,455.2	8,258.6	6,303.9
Medical benefits paid related to:			
Current year	(10,089.6)	(7,490.6)	(5,754.9)
Prior year	(942.2)	(619.2)	(560.8)
Total	(11,031.8)	(8,109.8)	(6,315.7)
Balances as of end of year	$ 1,483.8	$ 953.4	$ 733.0

Medical benefits payable recorded at December 31, 2014, 2013 and 2012 developed favorably by approximately $26.2 million, $74.6 million and $146.6 million in 2014, 2013 and 2012, respectively. A portion of the prior period development was attributable to the release of the provision for moderately adverse conditions, which is included as part of the assumptions. The release of the provision for moderately adverse conditions was substantially offset by the provision for moderately adverse conditions established for claims incurred in the current year. Accordingly, the change in the amount of the incurred claims related to prior years in the Medical benefits payable does not directly correspond to an increase in net income recognized during the period.

Medical benefits expense for the year ended December 31, 2014 was impacted by approximately $48.1 million of unfavorable prior year reserve development, mainly due to higher than expected medical services in our Medicaid and Medicare Health Plan segments that were not discernible until the impact became clearer over time as claim payments were processed, while 2013 and 2012 were impacted by approximately $3.0 million and $76.7 million, respectively, of favorable development related to prior years. The favorable development in 2013 was due mainly to the medical cost trend emerging favorably in our Medicaid segment due to lower utilization. The favorable development in 2012 was due to the medical cost trend emerging favorably, mostly in our Medicaid segment and to a lesser extent in our MA and PDP segments, primarily due to lower than projected utilization, partially offset by higher than expected medical services in Kentucky.

Goodwill and Other Intangible Assets

Goodwill represents the excess of the cost over the fair market value of net assets acquired. Goodwill recorded at December 31, 2014 was $263.2 million, which consisted of $152.8 million and $110.4 million attributable to our Medicaid and Medicare Advantage reporting segments, respectively. Goodwill recorded at December 31, 2013 was $236.8 million, which consisted of $126.8 million and $110.0 million attributable to our Medicaid and Medicare Advantage reporting segments, respectively.

We test goodwill for impairment at the reporting unit level at least annually, or more frequently if events or circumstances indicate that it would be more likely than not that the fair value of a reporting unit is below its carrying value. Such events or circumstances could include a significant adverse change in business climate, an adverse action or assessment by a regulator, unanticipated competition and the testing for recoverability of a significant asset group within a reporting unit, among others. To determine whether goodwill is impaired, we compare an estimate of the fair value of the applicable reporting unit to its

carrying value, including goodwill. If the carrying value exceeds the estimated fair value, we compare the implied fair value of the applicable goodwill to its carrying value to measure the amount of goodwill impairment, if any. We perform our annual goodwill impairment test based on our financial position and results of operations as of June 30 of each year, which generally coincides with the finalization of federal and state contract negotiations and our initial budgeting and planning process. The annual impairment tests are based on an evaluation of estimated future discounted cash flows. The estimated discounted cash flows are based on the best information available to us at the time, including supportable assumptions and projections we believe are reasonable. Our discounted cash flow estimates use discount rates that correspond to a weighted-average cost of capital consistent with a market-participant view. The discount rates are consistent with those used for investment decisions and take into account the operating plans and strategies of our operating segments. Certain other key assumptions utilized, including changes in membership, premium, health care costs, operating expenses, fees, assessments and taxes and effective tax rates, are based on estimates consistent with those utilized in our annual budgeting and planning process that we believe are reasonable. However, if we do not achieve the results reflected in the assumptions and estimates, our goodwill impairment evaluations could be adversely affected, and we may impair a portion of our goodwill, which would adversely affect our operating results in the period of impairment. Impairments, if any, would be classified as an operating expense. Based on the results of our annual impairment testing in 2014, we determined that the fair value of each reporting unit substantially exceeded its carrying value and no goodwill impairment losses were recognized.

Other intangible assets resulting from our previous acquisitions include provider networks, broker networks, trademarks, state contracts, non-compete agreements, licenses and permits. We amortize other intangible assets over their estimated useful lives ranging from approximately one to 15 years. These assets are allocated to reporting segments for impairment testing purposes. We review our other intangible assets for impairment when events or changes in circumstances occur, which may potentially affect the estimated useful life or recoverability of the remaining balances of our intangible assets. Such events and changes in circumstances would include significant changes in membership, state funding, federal and state government contracts and provider networks. Upon such an occurrence, recoverability of assets to be held and used is measured by comparing the carrying amount of an asset to current forecasts of undiscounted future net cash flows expected to be generated by the assets. Identifiable cash flows are measured at the lowest level for which they are largely independent of the cash flows of other groups of assets and liabilities. If these assets are determined to be impaired, the amount of impairment recognized is measured by the amount by which the carrying amount of the assets exceeds their fair value.

During 2014, we recognized approximately $24.1 million in impairment and other charges, approximately $18.0 million of which related to the partial impairment of certain intangible assets recorded in the 2012 acquisition of Easy Choice Health Plan, Inc. ("Easy Choice"). During the year, our Easy Choice MA health plan continued to underperform, mainly reflecting an inability to improve the medical cost structure to the degree that was previously estimated, and the inability to achieve certain administrative cost savings. As a result, we performed an updated assessment of the recoverability of these intangible assets. The current projections of undiscounted future net cash flows expected to be generated by the Easy Choice health plan reflect a significant decline in the anticipated long-term profitability of this business relative to projections we completed in prior periods. The decline in projected profitability is resulting from the factors noted above, as well the continuing margin compression that is impacting the MA business as a whole. We compared the carrying values of the underlying intangible assets to the projected, undiscounted future net cash flows and determined that the undiscounted future net cash flows were insufficient to recover the carrying value of the assets. We measured the fair values of these assets at June 30, 2014 using an income-based valuation approach, and decreased the carrying values of the intangible assets to the estimated fair values, which resulted in an impairment charge of approximately $18.0 million. We believe the assumptions used in the income approach, including the projected cash flows associated with the assets, as well as other key factors and assumptions, including the selection of an appropriate discount rate, were consistent with those that likely market place participants would experience when operating in the same market, with the same membership. The remaining charges for the quarter also include a charge for the full impairment of intangible assets associated the purchase of our Arizona MA plan after we concluded during 2014 to exit the Arizona MA market in 2015, and charges resulting from the resolution of certain matters related to the purchase price of our 2013 acquisitions. We were no longer able to recognize the latter charges as adjustments to acquired assets, since we were beyond the measurement period established in the accounting rules for business combinations.

RECENTLY ADOPTED ACCOUNTING STANDARDS

Refer to Note 2 – *Summary of Significant Accounting Policies*, included in the Consolidated Financial Statements for information and disclosures related to new accounting standards which are incorporated herein by reference.

Item 7A. Qualitative and Quantitative Disclosures about Market Risk.

Investment Return Market Risk

As of December 31, 2014, we had cash and cash equivalents of $1.3 billion, investments classified as current assets of $172.8 million, long-term investments of $257.3 million and restricted investments on deposit for licensure of $150.3 million. The short-term investments classified as current assets consist of highly liquid securities with maturities between three and twelve months and longer term bonds with floating interest rates that are considered available for sale. Restricted assets consist of cash and cash equivalents and U.S. Treasury instruments deposited or pledged to state agencies in accordance with state rules and regulations. These restricted assets are classified as long-term regardless of the contractual maturity date due to the nature of the states' requirements. The investments classified as long term are subject to interest rate risk and will decrease in value if market rates increase. Because of their contractual maturity dates, however, we would not expect the value of these investments to decline significantly as a result of a sudden change in market interest rates. Assuming a hypothetical and immediate 1% increase in market interest rates at December 31, 2014, the fair value of our fixed income investments would decrease by approximately $3.7 million. Similarly, a 1% decrease in market interest rates at December 31, 2014 would increase the fair value of our investments by approximately $4.1 million.

Item 8. Financial Statements and Supplementary Data.

Our consolidated financial statements and related notes required by this item are set forth in the WellCare Health Plans, Inc. financial statements included in Part IV, Item 15 of this filing.

Item 9. Changes In and Disagreements with Accountants on Accounting and Financial Disclosure.

None.

Item 9A. Controls and Procedures.

(a) ***Evaluation of Disclosure Controls and Procedures***

Management, under the leadership of our Chief Executive Officer ("CEO") and our Chief Financial Officer ("CFO"), is responsible for maintaining disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) that are designed to ensure that information required to be disclosed in reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC rules and forms and that such information is accumulated and communicated to management, including our CEO and CFO, to allow timely decisions regarding required disclosures.

In connection with the preparation of this 2014 Form 10-K, our management, under the leadership of our CEO and CFO, evaluated the effectiveness of our disclosure controls and procedures ("Disclosure Controls"). Based on that evaluation, our CEO and CFO concluded that, as of December 31, 2014, our Disclosure Controls were effective in timely alerting them to material information required to be included in our reports filed with the SEC.

(b) Management's Report on Internal Control Over Financing Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting (as such term is defined in Rule 13a-15(f) under the Exchange Act). An evaluation was performed under the supervision and with the participation of our management, including our CEO and CFO, of the effectiveness of our internal control over financial reporting based on the framework in *Internal Control — Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission and updated in 2013 (the "COSO Framework"). Based on our evaluation under the COSO Framework, our management concluded that our internal control over financial reporting was effective as of December 31, 2014. Our independent registered public accounting firm, Deloitte & Touche, LLP, has issued an attestation report on the effectiveness of our internal control over financial reporting as of December 31, 2014, that is included herein.

(c) ***Changes in Internal Controls***

As required by Rule 13a-15(d), our management including our CEO and CFO, also conducted an evaluation of our internal control over financial reporting to determine whether any changes occurred during the quarter ended December 31, 2014 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting. We implemented a change in internal control over financial reporting during the quarter ended December 31, 2014 to remediate a material weakness identified in internal controls during the quarter related to the accounting for Medicaid premium rate changes. Specifically, we completed the implementation of redesigned control processes for increased levels of review performed by our personnel in relation to this area. The material weakness related to the first three quarters of 2014. We have completed our testing of the additional control processes outlined above and conclude that the previously identified material weakness has been satisfactorily remediated as of December 31, 2014.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of
WellCare Health Plans, Inc. and Subsidiaries
Tampa, Florida

We have audited the internal control over financial reporting of WellCare Health Plans, Inc. and subsidiaries (the "Company") as of December 31, 2014, based on criteria established in *Internal Control — Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed by, or under the supervision of, the company's principal executive and principal financial officers, or persons performing similar functions, and effected by the company's board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2014, based on the criteria established in *Internal Control — Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements and financial statement schedules as of and for the year ended December 31, 2014 of the Company and our report dated February 16, 2015 expressed an unqualified opinion on those financial statements and financial statement schedules.

Item 9B. Other Information.

None

PART III

Items 10, 11, 12, 13 and 14.

The information required by Items 10, 11, 12, 13 and 14 is omitted because, no later than 120 days after December 31, 2014, we will file and distribute our definitive proxy statement for our annual meeting of stockholders containing the information required by such Items. Such omitted information is incorporated herein by reference.

PART IV

Item 15. Exhibits, Financial Statement Schedules.

(a) Financial Statements and Financial Statement Schedules

(1) Financial Statements are listed in the Index to Consolidated Financial Statements on page F-1 of this report.
(2) Financial Statement Schedules are listed in the Index to Consolidated Financial Statements on Page F-1 of this report.

(b) Exhibits

For a list of exhibits to this 2014 Form 10-K, see the Exhibit Index which is incorporated herein by reference.

(c) Financial Statements

We file as part of this report the financial schedules listed on the index immediately preceding the financial statements at the end of this report.

SIGNATURES

Pursuant to the requirements of Section 13 or 15(d) of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

Financial Statement Schedules

Schedule I — Condensed Financial Information of Registrant	F-41
Schedule II — Valuation and Qualifying Accounts	F-44

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of
WellCare Health Plans, Inc. and Subsidiaries
Tampa, Florida

We have audited the accompanying consolidated balance sheets of WellCare Health Plans, Inc. and subsidiaries (the "Company") as of December 31, 2014 and 2013, and the related consolidated statements of comprehensive income, changes in stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2014. Our audits also included the financial statement schedules listed in the Index at Item 15. These consolidated financial statements and financial statement schedules are the responsibility of the Company's management. Our responsibility is to express an opinion on the consolidated financial statements and financial statement schedules based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of WellCare Health Plans, Inc. and subsidiaries as of December 31, 2014 and 2013, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2014, in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, such financial statement schedules, when considered in relation to the basic consolidated financial statements taken as a whole, present fairly in all material respects the information set forth therein.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of December 31, 2014, based on the criteria established in *Internal Control-Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 16, 2015 expressed an unqualified opinion on the Company's internal control over financial reporting.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
Years Ended December 31, 2014, 2013, and 2012
(In millions, except member, per share and share data)

1. ORGANIZATION AND BASIS OF PRESENTATION

WellCare Health Plans, Inc., (the "Company," "we," "us," or "our"), provides managed care services exclusively to government-sponsored health care programs. The Company was formed as a Delaware limited liability company in May 2002 to acquire our Florida, New York and Connecticut health plans. We completed the acquisition of the health plans through two concurrent transactions in July 2002. In July 2004, immediately prior to the closing of our initial public offering, we merged the limited liability company into a Delaware corporation and changed our name to WellCare Health Plans, Inc.

As of December 31, 2014, we served approximately 4.1 million members. In 2014, we operated Medicaid health plans in Florida, Georgia, Hawaii, Illinois, Kentucky, Missouri, New Jersey, New York and South Carolina. In connection with our acquisitions of Medicaid plans in South Carolina and Missouri (see Note 3), our Medicaid operations in those states began in February 2013 and April 2013, respectively.

Our Medicaid contract in Ohio expired on June 30, 2012. We were not awarded a Medicaid contract in Ohio for the 2013 fiscal year; however, the state contracted with us to provide services to Ohio Medicaid beneficiaries through the transition period, which ended June 30, 2013. As of July 1, 2013, we no longer provided Medicaid services in Ohio. The Ohio Medicaid contract contributed approximately $137.4 million, and $265.3 million of premium revenue, net of premium taxes, to our operations for the years ended December 31, 2013 and 2012, respectively.

As of December 31, 2014, we offered Medicare Advantage ("MA") coordinated care plans ("CCPs") in certain counties in Arizona, Arkansas, California, Connecticut, Florida, Georgia, Hawaii, Illinois, Kentucky, Louisiana, Mississippi, Missouri, New Jersey, New York, Ohio, South Carolina, Tennessee and Texas, as well as stand-alone Medicare prescription drug plans ("PDP") in 49 states and the District of Columbia. Our MA plans in Arkansas, Mississippi, South Carolina and Tennessee are attributable to our acquisition of Windsor Health Group, Inc. ("Windsor") and our MA operations in those states began on January 1, 2014. Effective January 1, 2015, we no longer offer MA plans in the states of Arizona, Missouri and Ohio, which, combined, accounted for approximately $97.7 million, $127.7 million and $83.4 million of premium revenue, net of premium taxes, for the years ended December 31, 2014, 2013 and 2012, respectively.

Basis of Presentation and Use of Estimates

The consolidated balance sheets and statements of comprehensive income (loss), changes in stockholders' equity, and cash flows include the accounts of the Company and all of its majority-owned subsidiaries. We eliminated all intercompany accounts and transactions.

We prepared the consolidated financial statements in accordance with accounting principles generally accepted in the United States ("GAAP"), which requires us to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. We base these estimates on our knowledge of current events and anticipated future events and evaluate and update our assumptions and estimates on an ongoing basis; however, actual results may differ from our estimates. We evaluated all material events subsequent to the date of these consolidated financial statements.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Recently Adopted Accounting Standards

In July 2013, the Financial Accounting Standards Board ("FASB") issued ASU 2013-11, "*Income Taxes (Topic 740): Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists.*" This update addresses the diversity in practice regarding financial statement presentation of an unrecognized tax benefit when a net operating loss carryforward, a similar tax loss, or a tax credit carryforward exists. The guidance requires an unrecognized tax benefit, or a portion thereof, to be presented in the financial statements as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward. To the extent the deferred tax asset is not available at the reporting date to settle any additional income taxes that would result from the disallowance of a tax position, the unrecognized tax benefit should be presented in the financial statements as a liability and should not be combined with the deferred tax asset. The amendments in this standard are effective for reporting periods beginning after December 15, 2013, with early adoption permitted. We adopted this standard effective January 1, 2014, without any material impact on our consolidated financial position, results of operations or cash flows.

In February 2013, the FASB issued ASU 2013-04, *Liabilities (Topic 405): Obligations Resulting from Joint and Several Liability Arrangements for Which the Total Amount of the Obligation Is Fixed at the Reporting Date.* This update provides guidance for the recognition, measurement and disclosure of obligations resulting from joint and several liability arrangements for which the total amount of the obligation within the scope of the guidance is fixed at the reporting date. The guidance in this update also requires the entity to disclose the nature and amount of the obligation, as well as other information about such obligations. The guidance is effective for fiscal years beginning after December 15, 2013, with early adoption permitted. We adopted this standard effective January 1, 2014, without any material impact on our consolidated financial position, results of operations or cash flows.

In July 2011, the FASB issued ASU 2011-06, "*Other Expenses – Fees Paid to the Federal Government by Health Insurers.*" This update addresses accounting for the annual fees mandated by the ACA. The ACA imposes an annual fee on health insurers, payable to the U.S. government, calculated on net premiums and third-party administrative agreement fees. The updated standard requires that the liability for the fee be estimated and accrued in full once the entity provides qualifying health insurance in the applicable calendar year in which the fee is payable with a corresponding deferred cost that is amortized to expense. The fees are initiated for calendar years beginning January 1, 2014, and the amendments provided by this update become effective for calendar years beginning after December 31, 2013. We adopted this standard effective January 1, 2014. See additional discussion in '*ACA Industry Fee*'.

Premium Revenue Recognition and Premiums Receivable

We earn premium revenue through our participation in Medicaid, Medicaid-related and Medicare programs. Our Medicaid contracts with state agencies generally are multi-year contracts subject to annual renewal provisions. Our Medicare contracts with CMS renew annually. Our Medicare and Medicaid contracts establish fixed, monthly premium rates per member ("PMPM"), which are generally determined at the beginning of each new contract renewal period; however, premiums may be adjusted by CMS and state agencies throughout the terms of the contracts in certain cases. Premium rate changes are recognized in the period the change becomes effective, when the impact of the change in the rate is reasonably estimable, and collection is assured. Our contracts also have additional provisions as described in the sections below.

We recognize premium revenue in the period in which we are obligated to provide services to our members. We are generally paid by CMS and state agencies in the month in which we provide services. On a monthly basis, we bill members for any premiums for which they are responsible according to their respective plan. We record premiums earned but not received as premiums receivable and record premiums received in advance of the period of service as unearned premiums in the consolidated balance sheets. Unearned premiums are recognized as revenue when we provide the related services. Member premiums are recognized as revenue in the period of service. We estimate, on an on-going basis, the amount of members' billings that may not be collectible, based on our evaluation of historical trends. An allowance is established for the estimated amount that may not be collectible. In addition, we routinely monitor the collectability of specific premiums receivable from CMS and state agencies, including Medicaid receivables for obstetric deliveries and newborns and net receivables for member retroactivity and reduce revenue and premiums receivable by the amount we estimate may not be collectible. We reported premiums receivable net of an allowance for uncollectible premiums receivable of $21.1 million and $15.8 million at December 31, 2014 and 2013, respectively. Historically, the provision for uncollectible premiums for member premiums receivable has not been material relative to consolidated premium revenue.

Premium payments are based upon eligibility lists produced by CMS and state agencies. We verify these lists to determine whether we have been paid for the correct premium category and program. From time to time, CMS and state agencies require us to reimburse them for premiums that we received for individuals who were subsequently determined by us, or by CMS or state agencies, to be ineligible for any government-sponsored program or to belong to a plan other than ours. Additionally, the verification of membership may result in additional premiums due to us from CMS and state agencies for individuals who were subsequently determined to belong to our plan for periods in which we received no premium for those members. We estimate the amount of outstanding retroactivity adjustments and adjust premium revenue based on historical trends, premiums billed, the volume of member and contract renewal activity and other information. We record amounts receivable in premiums receivable, net and amounts payable in other accrued expenses and liabilities in the consolidated balance sheets.

Supplemental Medicaid Premiums

We earn, or earned, supplemental premium payments for eligible obstetric deliveries and newborns of our Medicaid members in Georgia, Illinois, Kentucky, Missouri, New York, South Carolina and, until June 30, 2013, in Ohio. Each state Medicaid contract specifies how and when these supplemental payments are earned and paid. Upon delivery of a newborn, we notify the state agency according to the contract terms. We also earn supplemental Medicaid premium payments in some states for high cost drugs and certain services such as early childhood prevention screenings. We recognize supplemental premium revenue in the period we provide related services to our members. For the years ended December 31, 2014, 2013, and 2012 we

recognized approximately $278.4 million, $242.9 million and $246.3 million, respectively, of supplemental Medicaid premium revenue.

Medicaid Risk-Adjusted Premiums

In some instances, our Medicaid premiums are subject to risk score adjustments based on the health profile of our membership. Generally, the risk score is determined by the state agency's analysis of encounter submissions of processed claims data to determine the acuity of our membership relative to the entire state's Medicaid membership. The frequency of when states adjust premiums varies, but is usually done quarterly or semi-annually on a retrospective basis. We recognize periodic changes to risk-adjusted premiums as revenue when the amounts are determinable and collection is reasonably assured.

Medicaid ACA Industry Fee reimbursement

The Patient Protection and Affordable Care Act, as amended by the Health Care and Education Reconciliation Act of 2010 (the "ACA") imposed certain new taxes and fees, including limitations on the amount of compensation that is tax deductible, as well as an annual premium-based health insurance industry assessment (the "ACA industry fee") on health insurers which began in 2014. As discussed in "ACA Industry Fee", we have received amendments, written agreements or other documentation from all our Medicaid state customers, that commit them to reimburse us for the portion of the ACA industry fee on our Medicaid plans, including its non-deductibility for income tax purposes for 2014. Consequently, we recognized $124.6 million of reimbursement for the ACA industry fee as premium revenue for the year ended December 31, 2014.

Medicare Risk-Adjusted Premiums

CMS provides risk-adjusted payments for MA Plans and PDPs based on the demographics and health severity of enrollees. The risk-adjusted premiums we receive are based on claims and encounter data that we submit to CMS within prescribed deadlines. We develop our estimates for risk-adjusted premiums utilizing historical experience, or other data, and predictive models as sufficient member risk score data becomes available over the course of each CMS plan year. We recognize periodic changes to risk-adjusted premiums as revenue when the amounts are determinable and collection is reasonably assured, which is possible as additional diagnosis code information is reported to CMS, when the ultimate adjustment settlements are received from CMS, or we receive notification of such settlement amounts. CMS adjusts premiums on two separate occasions on a retrospective basis. The first retrospective adjustment for a given plan year generally occurs during the third quarter of that year. This initial settlement represents the update of risk scores for the current plan year based on the severity of claims incurred in the prior plan year. CMS then issues a final retrospective risk adjusted premium settlement for that plan year in the following year. Historically, we have not experienced significant differences between our estimates and amounts ultimately received. However, in the third quarter of 2013, we recognized risk adjusted premium received as part of the 2012 final settlement that was higher than our original estimates, mainly related to members in our California MA plan that were new to Medicare in 2012. The data provided to CMS to determine members' risk scores is subject to audit by CMS even after the annual settlements occur. An audit may result in the refund of premiums to CMS. While our experience to date has not resulted in a material refund, future refunds could materially reduce premium revenue in the year in which CMS determines a refund is required and could be material to our results of operations, financial position and cash flows. Premiums receivable in the accompanying condensed consolidated balance sheets include risk-adjusted premiums receivable of $178.7 million and $107.2 million as of December 31, 2014 and 2013, respectively.

Minimum Medical Expense and Risk Corridor Provisions

We may be required to refund certain premium revenue to state agencies and CMS under various contractual and plan arrangements. We estimate the impact of the following arrangements on a monthly basis and reflect any adjustments to premium revenues in current operations. We report the estimated net amounts due to state agencies and CMS in other payables to government partners in the consolidated balance sheets.

Certain of our Medicaid contracts require us to expend a minimum percentage of premiums on eligible medical benefits expense. To the extent that we expend less than the minimum percentage of the premiums on eligible medical benefits, we are required to refund to the state all or some portion of the difference between the minimum and our actual allowable medical benefits expense. We estimate the amounts due to the state agencies as a return of premium based on the terms of our contracts with the applicable state agency.

Our MA and PDP prescription drug plan premiums are subject to risk sharing through the CMS Medicare Part D risk corridor provisions. The risk corridor calculation compares our actual experience to the target amount of prescription drug costs, limited to costs under the standard coverage as defined by CMS, less rebates included in our submitted plan year bid. We receive additional premium from CMS if our actual experience is more than 5% above the target amount. We refund premiums

to CMS if our actual experience is more than 5% below the target amount. Based on the risk corridor provision and PDP activity-to-date, an estimated risk-sharing receivable or payable is recorded as an adjustment to premium revenue. After the close of the annual plan year, CMS performs the risk corridor calculation and any differences are settled between CMS and our plans. Historically, we have not experienced material differences between our recorded estimates and the subsequent CMS settlement amounts.

Beginning in 2014, the Patient Protection and Affordable Care Act, as amended by the Health Care and Education Reconciliation Act of 2010 (collectively, the "ACA"), requires the establishment of a minimum medical loss ratio ("MLR") for MA plans and Part D plans, requiring them to spend not less than 85% of premiums on medical benefits. The rules implementing the minimum MLR impose financial and other penalties for failing to achieve the minimum MLR, including requirements to refund to CMS shortfalls in amounts spent on medical benefits and termination of a plan's MA contract for prolonged failure to achieve the minimum MLR. MLR is determined by adding a plan's spending for clinical services, prescription drugs and other direct patient benefits, plus its total spending on quality improvement activities and dividing the total by earned premiums (after subtracting specific identified taxes and other fees). These provisions did not have a material impact to our results of operations in 2014.

A summary of other net receivables (payables) to government partners is as follows (in millions):

	As of December 31,	
	2014	2013
Liability to states under Medicaid minimum medical expense provisions	$ (14.3)	$ (21.0)
Receivable from (liability to) CMS under risk corridor provision	84.7	(16.3)
Liability to CMS under MA/PDP minimum MLR provisions of the ACA	(1.7)	—
Net receivables (payables) to government partners[1]	$ 68.7	$ (37.3)

(1) The components of net receivables (payables) to government partners are classified in the consolidated balance sheets as $83.0 million and $14.3 million in current assets and current liabilities, respectively, as of December 31, 2014, and $37.3 million in current liabilities as of December 31, 2013.

Medicare Part D Settlements

We receive certain Part D prospective subsidy payments from CMS for our MA and PDP members as a fixed monthly per member amount, based on the estimated costs of providing prescription drug benefits over the plan year, as reflected in our bids. Approximately nine to ten months subsequent to the end of the plan year, or later in the case of the coverage gap discount subsidy, a settlement payment is made between CMS and our plans based on the difference between the prospective payments and actual claims experience. The subsidy components under Part D are described below.

Low-Income Cost Sharing Subsidy (LICS)-For qualifying LIS members, CMS reimburses us for all or a portion of the LIS member's deductible, coinsurance and co-payment amounts above the out-of-pocket threshold.

Catastrophic Reinsurance Subsidy-CMS reimburses plans for 80% of the drug costs after a member reaches his or her out-of-pocket catastrophic threshold through a catastrophic reinsurance subsidy.

Coverage Gap Discount Subsidy-CMS provides monthly prospective payments for pharmaceutical manufacturer discounts made available to members.

Catastrophic reinsurance subsidies and the low-income cost sharing subsidies represent cost reimbursements under the Medicare Part D program. We are fully reimbursed by CMS for costs incurred for these contract elements and, accordingly, there is no insurance risk to us. Therefore, amounts received for these subsidies are not considered premium revenue, and are reported, net of the subsidy benefits paid, as Funds receivable/held for the benefit of members in the consolidated balance sheets. The receipts and payments between us and CMS are presented on a net basis as financing activity in our consolidated statements of cash flows since we are essentially administering and paying the benefit subsidies on behalf of CMS. Historically, the settlement payments between us and CMS have not been materially different from our estimates. However, the balance of funds receivable from CMS grew substantially in 2014 due to increased drug costs relative to our bid estimates.

Coverage gap discount subsidies (CGD) advance payments are recorded as Funds receivable/held for the benefit of members in the consolidated balance sheets. Receivables are set up for manufacturer-invoiced amounts. Manufacturer payments reduce the receivable as payments are received. After the end of the contract year, during the Medicare Part D Payment reconciliation process for the CGD, CMS will perform a cost-based reconciliation to ensure the Medicare Part D sponsor is paid for gap discounts advanced at the point of sale, based on accepted Prescription Drug Event data.

Funds receivable (held) for the benefit of members consisted of the following (in millions):

	As of December 31,	
	2014	2013
Low-income cost sharing subsidy	$ 323.1	$ 95.4
Catastrophic reinsurance subsidy	492.5	19.6
Coverage gap discount subsidy	(34.1)	(21.5)
Funds receivable for the benefit of members	$ 781.5	$ 93.5

Medical Benefits Expense and Medical Benefits Payable

We recognize the cost of medical benefits in the period in which services are provided, including an estimate of the cost of medical benefits incurred but not reported ("IBNR"). Medical benefits expense includes direct medical expenses and certain medically-related administrative costs.

Direct medical expenses include amounts paid or payable to hospitals, physicians, pharmacy benefit managers and providers of ancillary services. We also record direct medical expenses for estimated referral claims related to health care providers under contract with us who are financially troubled or insolvent and who may not be able to honor their obligations for the costs of medical services provided by others. In these instances, we may be required to honor these obligations for legal or business reasons. Based on our current assessment of providers under contract with us, such losses have not been and are not expected to be significant. We record direct medical expense for our estimates of provider settlement due to clarification of contract terms, out-of-network reimbursement, claims payment differences and amounts due to contracted providers under risk-sharing arrangements. We estimate pharmacy rebates earned based on historical utilization of specific pharmaceuticals, current utilization and contract terms and record amounts as a reduction of recorded direct medical expenses.

Consistent with the criteria specified and defined in guidance issued by the Department of Health and Human Services ("HHS") for costs that qualify to be reported as medical benefits under the minimum medical loss ratio provision of the ACA, we record certain medically-related administrative costs such as preventive health and wellness, care management, and other quality improvement costs, as medical benefits expense. All other medically-related administrative costs, such as utilization review services, network and provider credentialing and claims handling costs, are recorded in selling, general, and administrative expense.

Medical benefits payable represents amounts for claims fully adjudicated but not yet paid and estimates for IBNR. Our estimate of IBNR is the most significant estimate included in our consolidated financial statements. We determine our best estimate of the base liability for IBNR utilizing consistent standard actuarial methodologies based upon key assumptions which vary by business segment. Our assumptions include current payment experience, trend factors, and completion factors. Trend factors in our standard actuarial methodologies include contractual requirements, historic utilization trends, the interval between the date services are rendered and the date claims are paid, denied claims activity, disputed claims activity, benefit changes, expected health care cost inflation, seasonality patterns, maturity of lines of business, changes in membership and other factors.

After determining an estimate of the base liability for IBNR, we make an additional estimate, also using standard actuarial techniques, to account for adverse conditions that may cause actual claims to be higher than the estimated base reserve. We refer to this additional liability as the provision for moderately adverse conditions. Our estimate of the provision for moderately adverse conditions captures the potential adverse development from factors such as:

- our entry into new geographical markets;
- our provision of services to new populations such as the aged, blind and disabled;
- variations in utilization of benefits and increasing medical costs, including higher drug costs;
- changes in provider reimbursement arrangements;
- variations in claims processing speed and patterns, claims payment and the severity of claims; and
- health epidemics or outbreaks of disease such as the flu or enterovirus.

We consider the base actuarial model liability and the provision for moderately adverse conditions as part of our overall assessment of our IBNR estimate to properly reflect the complexity of our business, the number of states in which we operate, and the need to account for different health care benefit packages among those states. We evaluate our estimates of medical benefits payable as we obtain more complete claims information and medical expense trend data over time. We record differences between actual experience and estimates used to establish the liability, which we refer to as favorable and

unfavorable prior period developments, as increases or decreases to medical benefits expense in the period we identify the differences. The cumulative effect of prior year reserve development in 2014 and 2013 was an unfavorable $48.1 million and a favorable $3.0 million; respectively, however, we recognized unfavorable prior period reserve development in three of four quarters in 2013, and in the first and second quarters of 2014. Based on the unfavorable prior period reserve development experience in these quarters, we have refined certain of these assumptions, resulting in increased current period medical benefits costs incurred in 2014.

Reinsurance

We enter into excess of loss reinsurance arrangements to reduce the risk associated with large losses or catastrophic events. We are contingently liable in the event the reinsurance companies do not meet their contractual obligations. We evaluate the financial condition of the reinsurance companies on a regular basis and only contract with well-known, well-established reinsurance companies that have strong financial ratings. We evaluate the terms of the arrangements to determine whether risk transfer and other criteria are met to qualify as reinsurance contracts for GAAP accounting purposes in accordance with ASC 944, Financial Services-Insurance. Premiums paid, or ceded, to the reinsurer, are recorded as a reduction to premium revenue, and expected reimbursements for losses, or recoveries, are recorded as a reduction to medical benefits expense. Amounts recoverable from the reinsurer are estimated in a manner consistent with the claim liability associated with the reinsured policies.

ACA Industry Fee

The total ACA industry fee levied on the health insurance industry was $8 billion in 2014 and will be $11.3 billion in 2015, with increasing annual amounts thereafter, growing to $14.3 billion by 2018. After 2018, the industry fee increases according to an index based on net premium growth. The assessment is being levied on certain health insurers that provide insurance in the assessment year, and is allocated to health insurers based on each health insurer's share of net premiums for all U.S. health insurers in the year preceding the assessment. The ACA industry fee is not deductible for income tax purposes, which has significantly increased our effective income tax rate. The initial estimated liability for each year is accrued as of January 1, with a corresponding deferred expense asset that is amortized over 12 months to expense on a straight line basis. The fee is payable by September 30 of each year. We incurred $137.7 million of such fees in 2014. We have received amendments, written agreements or other documentation from all our Medicaid state customers, that commit them to reimburse us for the portion of the ACA industry fee on our Medicaid plans, including its non-deductibility for income tax purposes for 2014. See discussion under "Premium Revenue Recognition and Premiums Receivable".

Equity-Based Employee Compensation

During the second quarter of 2013, our stockholders approved the WellCare Health Plans, Inc. 2013 Incentive Compensation Plan (the "2013 Plan"). Upon approval of the 2013 Plan, a total of 2,500,000 shares of our common stock were available for issuance pursuant to the 2013 Plan, minus any shares subject to outstanding awards granted on or after January 1, 2013 under our 2004 Equity Incentive Plan ("the Prior Plan"). In addition, shares subject to awards forfeited under the Prior Plan will become available for issuance under the 2013 Plan. No further awards are permitted to be granted under our Prior Plan. The Compensation Committee of our Board of Directors (the "Compensation Committee") awards certain equity-based compensation under our stock plans, including stock options, restricted stock units ("RSUs"), performance stock units ("PSUs") and market stock units ("MSUs"), each of which is described below:

RSUs - For each RSU granted, employees receive one share of common stock, net of taxes, at the end of the vesting period. RSUs typically vest one to three years from the date of grant.

PSUs - The actual number of common stock shares earned upon vesting will range from zero shares up to 100%, 150% or 200% of the target award, depending on the award date, the target award amounts for the PSU awards and our achievement of certain financial and quality-based performance goals set by the Compensation Committee at its sole discretion. PSUs generally cliff-vest 3 years from the grant date based on the achievement of the performance goals and conditioned on the employee's continued service through the vesting date.

MSUs - The number of shares of common stock earned upon vesting is determined based on the ratio of the Company's average common stock price during the last 30 days market trading days of the calendar year immediately preceding the vesting date to the comparable average common stock price in the year immediately preceding the grant date, applied to the base units granted. The performance ratio is capped at 150% or 200%, depending on the grant date. If our common stock price declines by more than 50% over the performance period, no shares are earned by the recipient. Each vested MSU represents one share of common stock and will be paid in shares of common stock, net of taxes.

We estimate equity-based compensation expense based on awards ultimately expected to vest. We make assumptions of forfeiture rates at the time of grant and continuously reassess our assumptions based on actual forfeiture experience. We estimate compensation cost for stock options, RSUs and MSUs based on the grant date fair value and recognize the expense ratably over the vesting period of the award. For stock options, the grant date fair value is measured using the Black-Scholes options-pricing model. For RSUs, the grant date fair value is based on the closing price of our common stock on the date of grant. For MSUs, the grant date fair value is measured using a Monte Carlo simulation approach which estimates the fair value of awards based on randomly generated simulated stock-price paths through a lattice-type structure. MSUs expected to vest are recognized as expense on a straight-line basis over the vesting period, which is generally three years.

Our PSUs are subject to variable accounting since they do not have a grant date fair value for accounting purposes due to the subjective nature of the terms of the PSUs which precludes a mutual understanding of the key terms and conditions. We recognize expense for PSUs ultimately expected to vest over the requisite service period based our estimates of progress made towards the achievement of the predetermined performance measures and changes in the market price of our common stock.

Member Acquisition Costs

We incur member acquisition costs, including internal commissions, external agent commissions on renewal policies, agent referral commissions, policy issuance and other administrative costs, in the acquisition and retention of our members. We record these costs as selling, general and administrative expense in the period we incur them.

We advance commissions to external agents and brokers for the acquisition of new members to our MA and PDP plans and defer amortization of these costs to the period in which we earn associated premium revenue, which is generally not more than one year.

Advertising Costs

We record the production costs of advertising activities as selling, general and administrative expense when incurred. We expense the costs of advertising campaigns in the period the advertising takes place. We recorded advertising and related marketing expense of $5.4 million, $3.2 million, and $7.2 million for the years ended December 31, 2014, 2013 and 2012, respectively.

Medicaid Premium Taxes

Premiums related to our Medicaid contracts with Georgia, Hawaii, New Jersey and New York, and, until June 30, 2013, Ohio, are, or were, subject to an assessment or tax on Medicaid premiums. The premium revenues we receive from these states include the premium tax assessment. We have reported premium taxes on a gross basis, as premium revenue and as premium tax expense in the consolidated statements of income. We recognize the premium tax assessment as expense in the period we earn the related premium revenue and remit the taxes back to the state agencies on a periodic basis. We incurred Medicaid premium taxes of $76.5 million, $75.7 million and $82.2 million for the years ended December 31, 2014, 2013 and 2012, respectively.

Income Tax Expense (Benefit)

We record income tax expense (benefit) as incurred based on enacted tax rates, estimates of book-to-tax differences in income, and projections of income that will be earned in each taxing jurisdiction. We recognize deferred tax assets and liabilities for the estimated future tax consequences of differences between the carrying amounts of existing assets and liabilities and their respective tax basis. We measure deferred tax assets and liabilities using tax rates applicable to taxable income in the years in which we expect to recover or settle those temporary differences. We record a valuation allowance on deferred taxes if we determine it is more likely than not that we will not fully realize the future benefit of deferred tax assets. We file tax returns after the close of our fiscal year end and adjust our estimated tax receivable or liability to the actual tax receivable or due per the filed state and federal tax returns. Historically, we have not experienced significant differences between our estimates of income tax expense (benefit) and actual amounts incurred.

State and federal taxing authorities may challenge the positions we take on our filed tax returns. We evaluate our tax positions and only recognize a tax benefit if it is more likely than not that a tax audit will sustain our conclusion. Based on our evaluation of tax positions, we believe that potential tax exposures have been recorded appropriately. State and federal taxing authorities may propose additional tax assessments based on periodic audits of our tax returns. We believe our tax positions comply with applicable tax law in all material aspects and we will vigorously defend our positions on audit. The ultimate resolution of these audits may materially impact our financial position, results of operations or cash flows. We have not experienced material adjustments to our consolidated financial statements as a result of these audits.

We participate in the Internal Revenue Service ("IRS") Compliance Assurance Program ("CAP"). The objective of CAP is to reduce taxpayer burden and uncertainty by working with the IRS to ensure tax return accuracy prior to filing, thereby reducing or eliminating the need for post-filing examinations.

Cash and Cash Equivalents

We classify unrestricted cash and short-term investments with original maturities of three months or less as cash and cash equivalents in the consolidated balance sheets. We record cash and cash equivalents at cost, which approximates fair value.

Investments

We classify our fixed maturity securities, including short-term, long-term, and restricted investments, as available-for-sale and report them at fair value. We record unrealized gains and losses on securities, net of deferred income taxes, as a separate component of accumulated other comprehensive loss in the consolidated balance sheets. We record investment income when earned and classify investment income earned but not received in prepaid expenses and other current assets in the consolidated balance sheets. We may purchase fixed maturity securities at a premium or discount. We amortize these premiums and discounts as adjustments to investment income over the estimated remaining term of the securities. We determine realized gains and losses on sales of securities on a specific identification basis.

We determine the fair value of fixed maturity securities based on quoted prices in active markets or market prices provided by a third-party pricing service. The third-party pricing service determines market prices using inputs such as reported trades, benchmark yields, issuer spreads, bids, offers, estimated cash flows and prepayment spreads. Based on the typical trading volumes and the lack of quoted market prices for fixed maturities, third party pricing services will normally derive the security prices through recent reported trades for identical or similar securities making adjustments through the reporting date based upon available market observable information. If there are no recent reported trades, the pricing services may use matrix or model processes to develop a security price using future cash flow expectations based upon collateral performance and discount this at an estimated market rate. Our long-term investments include municipal note investments with an auction reset feature ("auction-rate securities"). We record the fair value of these auction-rate securities based on a discounted cash flow analysis.

We regularly compare the fair value of our investments to amortized cost of those investments. The evaluation of impairment is a quantitative and qualitative process which is subject to risk and uncertainties. Our fixed maturity investments are exposed to four primary sources of investment risk: credit, interest rate, liquidity and market valuation. The financial statement risks are those associated with the recognition of impairments and income, as well as the determination of fair values.

We perform a case-by-case evaluation of the underlying reasons for the decline in fair value and consider a wide range of factors about the security issuer, including assumptions and estimates about the operations of the issuer and its future earnings potential. We use our best judgment in evaluating the cause of the decline in the estimated fair value of the security and in assessing the prospects for near-term recovery. Our evaluation of impairment includes, but is not limited to:

- the length of time and the extent to which the market value has been below cost;
- the potential for impairments of securities when the issuer is experiencing significant financial difficulties;
- the potential for impairments in an entire industry sector or sub-sector;
- the potential for impairments in certain economically depressed geographic locations;
- the potential for impairments of securities where the issuer, series of issuers or industry has suffered a catastrophic type of loss or has exhausted natural resources;
- unfavorable changes in forecasted cash flows on asset-backed securities; and
- other subjective factors, including concentrations and information obtained from regulators and rating agencies.

We recognize impairments of securities when we consider a decline in fair value below the amortized cost basis to be other-than-temporary. If we intend to sell a security, or it is more likely than not that we will be required to sell the security before recovery of its amortized cost basis, we recognize an other-than-temporary impairment ("OTTI") in earnings equal to the entire difference between the security's amortized cost basis and its fair value. If we do not intend to sell the security and it is more likely than not that we will not be required to sell the security before recovery of its amortized cost basis, but the present value of the cash flows expected to be collected is less than the amortized cost basis of the security (referred to as the credit loss), we conclude an OTTI has occurred. In this instance, we bifurcate the total OTTI into the amount related to the credit loss, which we recognize in earnings as investment income, net, with the remaining amount of the total OTTI attributed to other factors (referred to as the noncredit portion) recognized as a separate component in other comprehensive income. After the recognition of an OTTI, we account for the security as if it had been purchased on the measurement date of the OTTI, with an amortized cost basis equal to the previous amortized cost basis less than the OTTI recognized in earnings. We did not realize any OTTI for the years ended December 31, 2014, 2013 or 2012.

Restricted Investments

As a condition for licensure, we are required to maintain certain funds on deposit or pledged to various state agencies. Certain of our state contracts require the issuance of surety bonds. We record our restricted investments, which include cash, cash equivalents, and other short-term investments, at fair value. We classify restricted investments as long-term regardless of the contractual maturity date of the securities held, due to the nature of the states' requirements.

Prepaid Expenses and Other Current Assets

Prepaid expenses and other current assets, net, are comprised of the following (in millions):

	As of December 31,	
	2014	2013
Prepaid expenses	$ 46.5	$ 58.4
Pharmaceutical coverage gap discounts receivable	52.8	13.5
Advances to providers	5.5	6.8
Other	67.0	37.6
	171.8	116.3
Allowance for uncollectible advances to providers	(1.3)	(1.3)
Prepaid expenses and other current assets, net	$ 170.5	$ 115.0

We record pharmaceutical coverage gap discounts receivable for amounts billed to pharmaceutical manufacturers by CMS for Medicare Part D coverage gap discounts advanced by us. Pharmaceutical manufacturers remit payments directly to us (see "Premium Revenue Recognition and Premiums Receivable - *Medicare Part D Settlements*").

Property, Equipment and Capitalized Software, net

Property, equipment and capitalized software are stated at historical cost, net of accumulated depreciation. We capitalize certain costs incurred in the development of internal-use software, including external direct costs of materials and services and payroll costs of employees devoted to specific software development. We expense other software development costs, such as training and data conversion costs, as incurred. We capitalize the costs of improvements that extend the useful lives of the related assets.

We record depreciation expense using the straight-line method over the estimated useful lives of the related assets, which ranges from three to ten years for leasehold improvements, five for furniture and equipment, and three to five years for computer equipment and software. We include amortization of equipment under capital leases in depreciation expense. We record maintenance and repair costs as selling, general and administrative expense when incurred.

On an ongoing basis, we review events or changes in circumstances that may indicate that the carrying value of an asset may not be recoverable. If the carrying value of an asset exceeds the sum of estimated undiscounted future cash flows, we recognize an impairment loss in the current period for the difference between estimated fair value and carrying value. If assets are determined to be recoverable but the useful lives are shorter than we originally estimated, we depreciate the remaining net book value of the asset over the newly determined remaining useful lives. During 2013, we determined that we would be discontinuing certain projects going forward and, as a result, the software and development costs acquired to support these projects would not be fully recoverable. In accordance with the guidance for the impairment of long-lived assets, we evaluated these assets for recovery and recorded a pre-tax asset impairment charge of $9.0 million, which is included in selling, general and administrative expenses in our consolidated statement of comprehensive income for the year ended December 31, 2013.

Goodwill and Intangible Assets

Goodwill represents the excess of the cost over the fair market value of net assets acquired. Goodwill recorded at December 31, 2014 was $263.2 million, which consisted of $152.8 million and $110.4 million attributable to our Medicaid and Medicare Health Plans reporting segments, respectively. Goodwill recorded at December 31, 2013 was $236.8 million, which consisted of $126.8 million and $110.0 million attributable to our Medicaid and Medicare Health Plans reporting segments, respectively.

We test goodwill for impairment at the reporting unit level at least annually, or more frequently if events or circumstances indicate that it would be more likely than not that the fair value of a reporting unit is below its carrying value. Such events or circumstances could include a significant adverse change in business climate, an adverse action or assessment by a regulator, unanticipated competition and the testing for recoverability of a significant asset group within a reporting unit, among others. To determine whether goodwill is impaired, we compare an estimate of the fair value of the applicable reporting unit to its carrying value, including goodwill. If the carrying value exceeds the estimated fair value, we compare the implied fair value of the applicable goodwill to its carrying value to measure the amount of goodwill impairment, if any. We perform our annual goodwill impairment test based on our financial position and results of operations as of June 30 of each year, which generally coincides with the finalization of federal and state contract negotiations and our initial budgeting and planning process. The annual impairment tests are based on an evaluation of estimated future discounted cash flows. The estimated discounted cash flows are based on the best information available to us at the time, including supportable assumptions and projections we believe are reasonable. Our discounted cash flow estimates use discount rates that correspond to a weighted-average cost of capital consistent with a market-participant view. The discount rates are consistent with those used for investment decisions and take into account the operating plans and strategies of our operating segments. Certain other key assumptions utilized, including changes in membership, premium, health care costs, operating expenses, fees, assessments and taxes and effective tax rates, are based on estimates consistent with those utilized in our annual budgeting and planning process that we believe are reasonable. However, if we do not achieve the results reflected in the assumptions and estimates, our goodwill impairment evaluations could be adversely affected, and we may impair a portion of our goodwill, which would adversely affect our operating results in the period of impairment. Impairments, if any, would be classified as an operating expense. Based on the results of our annual impairment testing in 2014, we determined that the fair value of each reporting unit substantially exceeded its carrying value and no goodwill impairment losses were recognized.

Other intangible assets resulting from our acquisitions include provider networks, broker networks, trademarks, state contracts, non-compete agreements, licenses and permits. We amortize other intangible assets over their estimated useful lives ranging from approximately one to 15 years. These assets are allocated to reporting segments for impairment testing purposes. We review our other intangible assets for impairment when events or changes in circumstances occur, which may potentially affect the estimated useful life or recoverability of the remaining balances of our intangible assets. Such events and changes in circumstances would include significant changes in membership, state funding, federal and state government contracts and provider networks. Upon such an occurrence, recoverability of assets to be held and used is measured by comparing the carrying amount of an asset to current forecasts of undiscounted future net cash flows expected to be generated by the assets. Identifiable cash flows are measured at the lowest level for which they are largely independent of the cash flows of other groups of assets and liabilities. If these assets are determined to be impaired, the amount of impairment recognized is measured by the amount by which the carrying amount of the assets exceeds their fair value.

During 2014, we recognized approximately $24.1 million in impairment and other charges, approximately $18.0 million of which related to the partial impairment of certain intangible assets recorded in the 2012 acquisition of Easy Choice Health Plan, Inc. ("Easy Choice"). During the year, our Easy Choice MA health plan continued to underperform, mainly reflecting an inability to improve the medical cost structure to the degree that was previously estimated, and the inability to achieve certain administrative cost savings. As a result, we performed an updated assessment of the recoverability of these intangible assets. The projections of undiscounted future net cash flows expected to be generated by the Easy Choice health plan reflected a significant decline in the anticipated long-term profitability of this business relative to projections we completed in prior periods. The decline in projected profitability resulted from the factors noted above, as well the continuing margin compression that is impacting the MA business as a whole. We compared the carrying values of the underlying intangible assets to the projected, undiscounted future net cash flows and determined that the undiscounted future net cash flows were insufficient to recover the carrying value of the assets. We measured the fair values of these assets at June 30, 2014 using an income-based valuation approach, and decreased the carrying values of the intangible assets to the estimated fair values, which resulted in an impairment charge of approximately $18.0 million. We believe the assumptions used in the income approach, including the projected cash flows associated with the assets, as well as other key factors and assumptions, including the selection of an appropriate discount rate, were consistent with those that likely market place participants would experience when operating in the same market, with the same membership. The remaining charges also include a charge for the full impairment of intangible assets associated the purchase of our Arizona MA plan after we concluded during 2014 to exit the Arizona MA market in 2015, and charges resulting from the resolution of certain matters related to the purchase price of our 2013 acquisitions. We were no longer able to recognize the latter charges as adjustments to acquired assets, since we were beyond the measurement period established in the accounting rules for business combinations.

Acquisitions

In January 2014, we acquired all of the outstanding stock of Windsor from Munich Health North America, Inc., a part of Munich Re Group. Through its subsidiaries, Windsor serves Medicare beneficiaries with MA, PDP and Medicare Supplement products. As of December 31, 2014, Windsor offered MA plans to 37,000 members in 192 counties in the states of Arkansas,

Mississippi, South Carolina and Tennessee. In addition, one of Windsor's subsidiaries offers Medicare Supplement insurance policies through which it serves approximately 43,000 members in 39 states as of December 31, 2014. Windsor also offers PDPs in 11 of the 34 CMS regions to 103,000 members as of December 31, 2014.

Effective January 1, 2014, we began offering Medicaid managed care in Essex, Hudson, Middlesex, Passaic and Union counties in New Jersey. In addition, effective July 1, 2014, our New Jersey subsidiary completed the acquisition of Medicaid assets from Healthfirst Health Plan of New Jersey, Inc. ("Healthfirst NJ"), which primarily relate to approximately 42,000 Healthfirst NJ Medicaid members who were transferred to our Medicaid plan in New Jersey, as well as certain provider agreements. As a result, effective July 1, 2014, we offer Medicaid managed care in 10 counties in New Jersey.

Pro Forma Financial Information

The results of operations and financial condition for our 2012, 2013 and 2014 acquisitions have been included in our consolidated financial statements since the respective acquisition dates. The unaudited pro forma financial information presented below assumes that the acquisitions occurred as of January 1, 2012. The pro forma adjustments include the pro forma effect of the amortization of finite-lived intangible assets arising from the purchase price allocations, adjustments necessary to align the acquired companies' accounting policies to our accounting policies and the associated income tax effects of the pro forma adjustments. The following unaudited pro forma results have been prepared for comparative purposes only and do not purport to be indicative of the results of operations that would have occurred had the acquisitions been consummated at the beginning of the periods presented. Only pro forma results for 2012 and 2013 have been presented, as Windsor was acquired on January 1, 2014, and its results of operations have been included in our consolidated financial statements from that date.

	Pro forma- unaudited	
	For the Years Ended December 31,	
(in millions, except per share data)	2013	2012
Premium revenues	$ 10,657.1	$ 9,387.9
Net earnings	$ 201.5	$ 106.4
Earnings per share:		
Basic	$ 4.63	$ 2.47
Diluted	$ 4.58	$ 2.43

3. ACQUISITIONS

Healthfirst NJ

On July 1, 2014, our New Jersey subsidiary completed the acquisition of Medicaid assets from Healthfirst NJ. The acquired assets primarily relate to approximately 42,000 Healthfirst NJ Medicaid members who were transferred to our Medicaid plan in New Jersey, as well as certain provider agreements.

Based on the preliminary purchase price allocation, we allocated $10.8 million of the purchase price to identified intangible assets and recorded the excess of purchase price over the aggregate fair values of $16.2 million as goodwill. The recorded goodwill and other intangible assets related to the Healthfirst NJ acquisition are deductible for income tax purposes. It is possible that further adjustments could be made to the purchase price and allocations depending on the resolution of certain matters related to the purchase price, although we are unable to estimate the impact at this time.

Windsor

On January 1, 2014, we acquired all of the outstanding stock of Windsor from Munich Health North America, Inc., a part of Munich Re Group. Through its subsidiaries, Windsor serves Medicare beneficiaries with MA, PDP and Medicare Supplement products. As of December 31, 2014, Windsor offered MA plans in 192 counties in the states of Arkansas, Mississippi, South Carolina and Tennessee, through which it served 37,000 members. In addition, one of Windsor's subsidiaries offers Medicare Supplement insurance policies through which it served 43,000 members in 39 states as of December 31, 2014. Windsor also offers PDPs in 11 of the 34 CMS regions, through which it served approximately 103,000 beneficiaries as of December 31, 2014. We included the results of Windsor's operations from the date of acquisition in our consolidated financial statements. Windsor's operations contributed premium revenue of $620.5 million and a net pre-tax loss of $0.3 million, including certain one-time costs for severance and integration, for the year ended December 31, 2014.

As of December 31, 2014, we have completed the accounting for the Windsor acquisition. The following table summarizes the allocation of the purchase price to the tangible and intangible assets acquired and liabilities assumed at the acquisition date.

Cash and cash equivalents	$	169.0
Investments		47.1
Premiums receivable, net		87.4
Pharmacy rebates receivable, net		32.2
Other intangible assets		54.3
Other assets		34.0
Deferred tax asset		33.6
Total assets acquired		457.6
Medical benefits payable		(107.0)
Accrued expenses and other payables		(80.8)
Deferred tax liability		(20.2)
Total liabilities assumed		(208.0)
Fair value of net assets acquired	$	249.6

As a result of the Windsor acquisition, the fair value of the net tangible and intangible assets that we acquired exceeded the total consideration payable to the seller by approximately $29.5 million. When assessing this result from an accounting perspective, we considered:

- the seller's decision to divest Windsor following a review of its business strategy in the U.S. and focus on other types of health businesses;
- the value of net assets we acquired included the benefit of net operating losses and other tax benefits, and
- a credit reflected in the purchase price for certain transition costs we expected to incur after the transaction closed.

After consideration of all relevant factors, including those cited above, and verifying that all assets acquired and liabilities assumed were identified, we concluded that the excess fair value of $29.5 million constituted a bargain purchase gain in accordance with accounting rules related to business combinations.

As reflected in the table above, we recorded $54.3 million for the preliminary valuation of identified other intangible assets, including MA and Medicare Supplement membership bases of $20.1 million (15-year useful life), PDP membership bases of $17.5 million (8-year useful life), provider networks of $5.2 million (15-year useful life), broker networks of $3.3 million (10-year useful life) and aggregated other identified intangible assets of $8.2 million (9-year useful life). We valued the other intangible assets using a combination of income and cost approaches, where appropriate. Membership bases were valued based on the income approach using a discounted future cash flow analysis based on our consideration of historical financial results and expected industry and market trends. We discounted the future cash flows by a weighted-average cost of capital based on an analysis of the cost of capital for guideline companies within our industry. We amortize the intangible assets on a straight-line basis over the period we expect these assets to contribute directly or indirectly to the future cash flows. The weighted average amortization period for these intangibles was 11.5 years.

WellCare of South Carolina

On January 31, 2013, we acquired all outstanding stock of WellCare of South Carolina, Inc. ("WCSC"), formerly UnitedHealthcare of South Carolina, Inc., a South Carolina Medicaid subsidiary of UnitedHealth Group Incorporated. We included the results of WCSC's operations from the date of acquisition in our consolidated financial statements.

We completed certain aspects of the accounting for the WCSC acquisition during the first quarter of 2014, and based on the final purchase price allocation, we allocated $24.7 million of the purchase price to identified tangible net assets and $9.5 million of the purchase price to identified intangible assets. We recorded the excess of purchase price over the aggregate fair values of $12.7 million as goodwill. The recorded goodwill and other intangible assets related to the WCSC acquisition are deductible for tax purposes.

Missouri Care

On March 31, 2013, we acquired all outstanding stock of Missouri Care, Incorporated, a subsidiary of Aetna Inc. ("Missouri Care"), which participates in the Missouri HealthNet Medicaid program. We began serving Missouri Care members effective April 1, 2013 and we included the results of Missouri Care's operations from the date of acquisition in our consolidated financial statements.

We completed certain aspects of the accounting for the Missouri Care acquisition during the first quarter of 2014, and based on the final purchase price allocation, we allocated $10.2 million of the purchase price to identified tangible net assets and $7.1 million of the purchase price to identified intangible assets. We recorded the excess of purchase price over the aggregate fair values of $10.7 million as goodwill, which reflects a $7.7 million increase recognized during the first quarter of 2014. The recorded goodwill and other intangible assets related to the Missouri Care acquisition are deductible for income tax purposes.

Easy Choice

On November 9, 2012, we acquired all outstanding interests in America's 1st Choice California Holdings, LLC, the sole shareholder of Easy Choice Health Plan, Inc. (collectively, "Easy Choice"). We included the results of Easy Choice's operations from the date of acquisition in our consolidated financial statements.

We completed certain aspects of the accounting for the Easy Choice acquisition during 2013, and based on the final purchase price allocation, we allocated $7.6 million of the purchase price to identified tangible net liabilities and $47.7 million of the purchase price to identified intangible assets. We recorded $110.0 million of goodwill for the excess of the purchase price over the estimated fair value of net assets and identifiable intangible assets acquired and assigned the goodwill to our Medicare Health Plans segment. Recorded goodwill and other intangible assets related to the Easy Choice acquisition are not deductible for tax purposes.

4. SEGMENT REPORTING

On a regular basis, we evaluate discrete financial information and assess the performance of our three reportable segments, Medicaid Health Plans, Medicare Health Plans and Medicare PDPs, to determine the most appropriate use and allocation of Company resources. Prior to the Windsor acquisition on January 1, 2014, we identified three operating segments for our company: Medicaid, MA and PDP. In conjunction with the Windsor acquisition, we began offering Medicare Supplement products and we reassessed our segment reporting practices and made revisions to reflect our current method of managing performance and determining resource allocation, which includes reviewing the results of Medicare Supplement and MA operations acquired as part of the Windsor acquisition together with our legacy MA plans. Accordingly, we include results for Medicare Supplement operations together with MA and renamed the segment as Medicare Health Plans. Similarly, we include the PDP operations acquired as part of the Windsor acquisition together with WellCare's PDPs and renamed the segment as Medicare PDPs. In addition, we renamed the Medicaid segment Medicaid Health Plans; however, there were no changes to the composition of this segment.

Medicaid Health Plans

Our Medicaid Health Plans segment includes plans for beneficiaries of Temporary Assistance for Needy Families ("TANF"), Supplemental Security Income ("SSI"), Aged Blind and Disabled ("ABD") and other state-based programs that are not part of the Medicaid program, such as Children's Health Insurance Program ("CHIP") and Managed Long-Term Care ("MLTC") programs. TANF generally provides assistance to low-income families with children. ABD and SSI generally provide assistance to low-income aged, blind or disabled individuals. CHIP programs provide assistance to qualifying families who are not eligible for Medicaid because their income exceeds the applicable income thresholds. The MLTC program is designed to help people with chronic illnesses or who have disabilities and need health and long-term care services, such as home care or adult day care, to enable them to stay in their homes and communities as long as possible.

Our Medicaid operations in certain states individually account for 10% or more of our consolidated premium revenue. Those states, and the respective Medicaid premium revenue as a percentage of total consolidated premium revenue, are as follows:

	For the Years Ended December 31,		
	2014	2013	2012
Kentucky	18%	14%	10%
Florida	14%	12%	13%
Georgia	13%	16%	20%

In February 2014, we executed a contract with the Florida Agency for Health Care Administration ("AHCA") pursuant to which our Staywell health plan participates in eight out of the state's 11 regions in the new program, which was fully implemented as of August 2014. Our 2012-2015 Florida Medicaid contracts were terminated early in connection with the implementation of the new program.

The Georgia Department of Community Health (the "Georgia DCH") exercised its option in June 2014 to extend the term of our Georgia Medicaid contract until June 30, 2015. There is one remaining one-year option term, exercisable by the Georgia DCH, which would potentially extend the contract term to June 30, 2016. On February 9, 2015, the Georgia Department of Community Health issued a request for proposals for its Medicaid program, under which services would commence on July 1, 2016. We are currently preparing our response. A total of nine companies, including us, have been deemed qualified to bid.

Our primary Kentucky contract commenced in July 2011, has an initial three-year term and provides for four additional one-year option terms, exercisable upon mutual agreement of the parties, which potentially extends the total term until July 2018. The parties have exercised the first option term.

Medicare Health Plans

Our Medicare Health Plans reportable segment includes the combined operations of both the MA and Medicare Supplement operating segments. Medicare is a federal program that provides eligible persons age 65 and over and some disabled persons with a variety of hospital, medical and prescription drug benefits. MA is Medicare's managed care alternative to the original Medicare program, which provides individuals standard Medicare benefits directly through CMS. Our MA CCPs generally require members to seek health care services and select a primary care physician from a network of health care providers. In addition, we offer coverage of prescription drug benefits under the Medicare Part D program as a component of most of our MA plans. We also offer Medicare Supplement policies in certain states.

Medicare PDPs

We offer stand-alone Medicare Part D coverage to Medicare-eligible beneficiaries in our Medicare PDPs segment. The Medicare Part D prescription drug benefit is supported by risk sharing with the federal government through risk corridors designed to limit the losses and gains of the participating drug plans and by reinsurance for catastrophic drug costs. The government subsidy is based on the national weighted average monthly bid for this coverage, adjusted for risk factor payments. Additional subsidies are provided for dually-eligible beneficiaries and specified low-income beneficiaries. The Part D program offers national in-network prescription drug coverage that is subject to limitations in certain circumstances.

Summary of Financial Information

We allocate goodwill and other intangible assets to our reportable operating segments. We do not allocate any other assets and liabilities, investment and other income, or selling, general and administrative, depreciation and amortization, or interest expense to our reportable operating segments, with the exception of the ACA industry fee. The Company's decision-makers primarily use premium revenue, medical benefits expense and gross margin to evaluate the performance of our reportable operating segments. A summary of financial information for our reportable operating segments through the gross margin level and a reconciliation to income before income taxes is presented in the tables below.

	For the Years Ended December 31,		
	2014	2013	2012
Premium revenue:			
Medicaid Health Plans	$ 7,773.9	$ 5,661.2	$ 4,471.2
Medicare Health Plans	**3,963.2**	**3,071.0**	**1,936.4**
Medicare PDPs	1,178.4	776.9	992.6
Total premium revenue	12,915.5	9,509.1	7,400.2
Medical benefits expense:			
Medicaid Health Plans	**6,853.1**	**4,927.4**	**3,892.0**
Medicare Health Plans	3,506.9	2,659.5	1,630.6
Medicare PDPs	**1,095.2**	**671.7**	**781.3**
Total medical benefits expense	11,455.2	8,258.6	6,303.9
ACA industry fee expense:			
Medicaid Health Plans	81.6	—	—
Medicare Health Plans	**44.7**	—	—
Medicare PDPs	11.4	—	—
Total ACA industry fee expense	137.7	—	—
Gross margin:			
Medicaid Health Plans	**839.2**	733.8	**579.2**
Medicare Health Plans	411.6	411.5	305.8
Medicare PDPs	**71.8**	105.2	**211.3**
Total gross margin	1,322.6	1,250.5	1,096.3
Investment and other income	**44.4**	**18.8**	**8.8**
Other expenses	(1,218.7)	(988.2)	(808.7)
Income from operations	**$ 148.3**	**$ 281.1**	**$ 296.4**

5. EARNINGS PER SHARE

We compute basic net income per common share on the basis of the weighted-average number of unrestricted common shares outstanding. We compute diluted net income per common share on the basis of the weighted-average number of unrestricted common shares outstanding plus the dilutive effect of outstanding stock options, restricted stock, RSUs, MSUs and PSUs using the treasury stock method.

We calculated weighted-average common shares outstanding — diluted as follows:

	For the Years Ended December 31,		
	2014	2013	2012
Weighted-average common shares outstanding — basic	43,864,367	43,535,927	43,104,216
Dilutive effect of:			
Unvested restricted stock units, market stock units and performance stock units	290,392	342,346	526,030
Stock options	8,842	122,290	196,039
Weighted-average common shares outstanding — diluted	44,163,601	44,000,563	43,826,285
Anti-dilutive stock options, restricted stock awards and performance equity awards excluded from computation	30,217	79,978	57,455

6. INVESTMENTS

The Company considers all of its investments as available-for-sale securities. The amortized cost, gross unrealized gains or losses and estimated fair value of short-term and long-term investments by security type are summarized in the following tables.

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
December 31, 2014				
Auction rate securities	$ 34.1	$ —	$ (1.8)	$ 32.3
Certificates of deposit	0.3	—	—	0.3
Corporate debt and other securities	162.2	0.1	(0.4)	161.9
Money market funds	41.4	—	—	41.4
Municipal securities	86.9	0.5	(0.1)	87.3
Variable rate bond fund	85.1	0.2	(0.1)	85.2
U.S. government securities	21.7	0.1	(0.1)	21.7
Total	$ 431.7	$ 0.9	$ (2.5)	$ 430.1
December 31, 2013				
Auction rate securities	$ 34.2	$ —	$ (2.4)	$ 31.8
Certificates of deposit	1.6	—	—	1.6
Corporate debt and other securities	104.5	0.1	(0.1)	104.5
Money market funds	43.4	—	—	43.4
Municipal securities	108.9	—	—	108.9
Variable rate bond fund	84.9	0.4	—	85.3
U.S. government securities	19.5	0.1	—	19.6
Total	$ 397.0	$ 0.6	$ (2.5)	$ 395.1

Contractual maturities of long-term available-for-sale investments at December 31, 2014 are as follows:

	Total	Within 1 Year	1 Through 5 Years	5 Through 10 Years	Thereafter
Auction rate securities	$ 32.3	$ —	$ —	$ —	$ 32.3
Certificates of deposit	0.3	0.3	—	—	—
Corporate debt and other securities	161.9	23.2	137.4	0.4	0.9
Money market funds	41.4	41.4	—	—	—
Municipal securities	87.3	19.3	57.8	8.7	1.5
Variable rate bond fund	85.2	85.2	—	—	—
U.S. government securities	21.7	3.4	18.2	—	0.1
Total	$ 430.1	$ 172.8	$ 213.4	$ 9.1	$ 34.8

Actual maturities may differ from contractual maturities due to the exercise of pre-payment options.

Excluding investments in U.S. government securities, we are not exposed to any significant concentration of credit risk in our fixed maturities portfolio. Our long-term investments include $32.3 million estimated fair value of municipal note securities with an auction reset feature ("auction rate securities"), which were issued by various state and local municipal entities for the purpose of financing student loans, public projects and other activities. Liquidity for these auction rate securities is typically provided by an auction process which allows holders to sell their notes and resets the applicable interest rate at pre-determined intervals, usually every seven or 35 days. We consider our auction rate securities to be in an inactive market as auctions continued to fail in 2014. Our auction rate securities have been in an unrealized loss position for more than twelve months. Two auction rate securities with an aggregate par value of $22.5 million have investment grade security credit ratings and one auction rate security with a par value of $11.6 million has a credit rating below investment grade. Our auction rate securities are covered by government guarantees or municipal bond insurance and we have the ability and intent to hold these

securities until maturity or market stability is restored. Accordingly, we do not believe our auction rate securities are impaired and have not recorded any other-than-temporary impairment as of December 31, 2014.

Redemptions and sales of our auction rate securities during the years ended December 31, 2014 and 2013 were not material, however, during the year ended December 31, 2012, we redeemed $0.8 million of auction rate securities at par. We did not realize any losses associated with selling or redeeming our auction rate securities for those years.

During the years ended December 31, 2014, 2013, and 2012, respectively, we sold or redeemed fixed maturity bond investments totaling $348.7 million, $360.2 million, $378.1 million, respectively. Realized gains and losses on sales and redemptions of investments, including sales and redemptions of the fixed maturity bond investments, were not material for the years ended December 31, 2014, 2013 or 2012. Additionally, we did not realize any OTTI for any of these years.

7. RESTRICTED INVESTMENTS

The amortized cost, gross unrealized gains, gross unrealized losses and fair value of our restricted cash and investment securities are as follows:

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
December 31, 2014				
Cash	$ 53.3	$ —	$ —	$ 53.3
Certificates of deposit	1.0	—	—	1.0
Money market funds	65.9	—	—	65.9
U.S. government securities	30.1	0.1	(0.1)	30.1
Total	$ 150.3	$ 0.1	$ (0.1)	$ 150.3
December 31, 2013				
Cash	$ 40.2	$ —	$ —	$ 40.2
Certificates of deposit	1.4	—	—	1.4
Money market funds	19.0	—	—	19.0
U.S. government securities	22.0	—	(0.1)	21.9
Total	$ 82.6	$ —	$ (0.1)	$ 82.5

Realized gains or losses related to sales and redemptions of restricted investments were not material for the years ended December 31, 2014, 2013, or 2012.

8. PROPERTY, EQUIPMENT AND CAPITALIZED SOFTWARE

Property, equipment and capitalized software and related accumulated depreciation is as follows:

	December 31,	
	2014	2013
Leasehold improvements	$ 26.1	$ 22.2
Computer equipment	69.3	62.9
Capitalized software	256.9	185.4
Furniture and equipment	26.4	22.4
	378.7	292.9
Less accumulated depreciation	(191.6)	(145.5)
Total property and equipment, net	$ 187.1	$ 147.4

We recognized depreciation expense on property, equipment and capitalized software of $46.8 million, $36.7 million, and $29.2 million for the years ended December 31, 2014, 2013, and 2012, respectively, including amortization expense on capitalized software of $30.4 million, $22.0 million and $15.4 million for the years ended December 31, 2014, 2013, and 2012, respectively.

9. GOODWILL AND OTHER INTANGIBLE ASSETS, NET

A summary of changes in our goodwill by reportable business segment is as follows for 2014 and 2013:

	Medicaid Health Plans	Medicare Health Plans	Total
Balance as of December 31, 2012	$ 111.1	$ 112.7	$ 223.8
Acquisitions and acquisition related adjustments	15.7	(2.7)	13.0
Balance as of December 31, 2013[1]	126.8	110.0	236.8
Acquisitions and acquisition related adjustments	26.0	0.4	26.4
Balance as of December 31, 2014[1]	$ 152.8	$ 110.4	$ 263.2

(1) Cumulative impairment charges relating to goodwill were $78.3 million as of December 31, 2014 and 2013, which related to goodwill assigned to our Medicare Health Plans reporting unit which we impaired during 2008.

Other intangible assets as of December 31, 2014 and 2013, and the related weighted-average amortization periods as of December 31, 2014, are as follows:

	As of December 31,						
	2014				2013		
	Weighted Average Amortization Period (In Years)	Gross Carrying Amount	Accumulated Amortization	Other Intangibles, Net	Gross Carrying Amount	Accumulated Amortization	Other Intangibles, Net
Provider networks	15.2	$ 9.9	$ (3.0)	$ 6.9	$ 6.1	$ (2.5)	$ 3.6
Licenses and permits	15.0	7.7	(3.4)	4.3	5.3	(2.9)	2.4
Trademarks and tradenames	12.8	15.9	(10.0)	5.9	13.3	(8.1)	5.2
Membership and state contracts	12.3	93.2	(14.2)	79.0	56.6	(6.4)	50.2
Other	7.3	5.7	(0.8)	4.9	6.4	(1.3)	5.1
Total other intangible assets	12.5	$ 132.4	$ (31.4)	$ 101.0	$ 87.7	$ (21.2)	$ 66.5

We recorded amortization expense of $13.1 million, $7.4 million, and $2.3 million for the years ended December 31, 2014, 2013 and 2012, respectively. The increase in amortization expense for 2014 resulted from the 2014 acquisitions of Windsor and Healthfirst NJ, and the 2013 acquisitions of WCSC and Missouri Care. Amortization expense expected to be recognized during fiscal years subsequent to December 31, 2014 is as follows:

	Expected Amortization Expense
2015	$ 11.1
2016	11.1
2017	10.6
2018	9.9
2019	9.7
2020 and thereafter	48.6
Total	$ 101.0

10. FAIR VALUE MEASUREMENTS

Our consolidated balance sheets include the following financial instruments: cash and cash equivalents, investments, receivables, accounts payable, medical benefits payable, long-term debt, and other liabilities. We consider the carrying amounts of cash and cash equivalents, receivables, other current assets and current liabilities to approximate their fair value due to the short period of time between the origination of these instruments and the expected realization or payment.

For other financial instruments, including short- and long-term investments, restricted investments, amounts accrued related to investigation resolution, and long-term debt, fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Assets and liabilities measured at fair value are classified using the following hierarchy, which is based upon the transparency of inputs to the valuation as of the measurement date.

Level 1—Quoted (unadjusted) prices for identical assets or liabilities in active markets: We include investments in commercial paper, money market funds, cash, U.S. government securities and the variable rate bond fund, as well as certain certificates of deposit and corporate debt, asset-backed and other municipal securities in Level 1. The carrying amounts of money market funds and cash approximate fair value because of the short-term nature of these instruments. We base fair values of the other investments included in Level 1 on unadjusted quoted market prices for identical securities in active markets.

Level 2—Inputs other than quoted prices in active markets: We include in Level 2 investments in certain certificates of deposit, corporate debt, asset-backed and other municipal securities for which fair market valuations are based on quoted prices for identical securities in markets that are not active, quoted prices for similar securities in active markets, broker or dealer quotations, or alternative pricing sources or for which all significant inputs are observable, either directly or indirectly, including interest rates and yield curves observable at commonly quoted intervals, volatilities, prepayment speeds, loss severities, credit risks, and default rates.

In addition to using market data, we make assumptions when valuing our assets and liabilities, including assumptions about risks inherent in the inputs to the valuation technique. When there is not an observable market price for an identical or similar asset or liability, we use an income approach reflecting our best assumptions regarding expected cash flows, discounted using a commensurate risk-adjusted discount rate. We estimated the fair value of the future payments related to investigation resolution using a discounted cash flow analysis and recorded these amounts at fair value in the short- and long-term portions of amounts accrued related to investigation resolution line items in our consolidated balance sheets.

Level 3—Unobservable inputs that cannot be corroborated by observable market data: We hold investments in auction rate securities, designated as available for sale and reported at fair value. At December 31, 2014, the auction rate securities had par values of $34.1 million. Liquidity for these auction rate securities is typically provided by an auction process which allows holders to sell their notes and resets the applicable interest rate at pre-determined intervals, usually every seven or 35 days. Auctions for these auction rate securities continued to fail during the twelve months ended December 31, 2014. An auction failure means that the parties wishing to sell their securities could not be matched with an adequate volume of buyers. As a result, our ability to liquidate and fully recover the carrying value of our remaining auction rate securities in the near term may be limited or non-existent. However, when there is a failed auction, the indenture governing the security requires the issuer to pay interest at a contractually defined rate that is generally above market rates for other types of similar instruments. We continue to receive interest payments on the auction rate securities we hold. Based on our analysis of anticipated cash flows, we have determined that it is more likely than not that we will be able to hold these securities until maturity or until market stability is restored. Additionally, there are government guarantees or municipal bond insurance in place and we have the ability and the present intent to hold these securities until maturity or market stability is restored. Based on this, we do not believe our auction rate securities are impaired and as a result, we have not recorded any impairment losses for our auction rate securities. However, as these securities are believed to be in an inactive market, we have estimated the fair value of these securities using a discounted cash flow model and update these estimates on a quarterly basis. Our analysis considered, among other things, the collateralization underlying the securities, the creditworthiness of the counterparty, the timing of expected future cash flows and the capital adequacy and expected cash flows of the subsidiaries that hold the securities. The estimated values of these securities were also compared, when possible, to valuation data with respect to similar securities held by other parties. Significant unobservable inputs used in the discounted cash flow model include the historical municipal bond index return rate and individual security credit ratings. Increases or decreases in the municipal bond index return rate or changes in security credit ratings could result in a significant change in the fair value estimation of our auction rate securities. Unobservable inputs included in our estimation of fair value of auction rate securities at December 31, 2014 included security credit ratings ranging from AAA/Aaa to BB-/Ba3 and historical municipal bond index returns ranging from 0% to 6.0%. The fair values of auction rate securities are based on an approach that relies heavily on management assumptions and qualitative observations and therefore fall within Level 3 of the fair value hierarchy.

We determine transfers between levels at the end of the reporting period. No transfers between levels were recognized for the years ended December 31, 2014 and 2013.

Recurring Fair Value Measurements

Assets and liabilities measured at fair value on a recurrring basis at December 31, 2014 are as follows:

		Fair Value Measurements Using		
	Carrying Value	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Investments:				
Asset backed securities	$ 23.3	$ —	$ 23.3	$ —
Auction rate securities	32.3	—	—	32.3
Certificates of deposit	0.3	—	0.3	—
Corporate debt securities	138.6	—	138.6	—
Money market funds	41.4	41.4	—	—
Municipal securities	87.3	—	87.3	—
U.S. government and agency obligations	21.7	16.8	4.9	—
Variable rate bond fund	85.2	85.2	—	—
Total investments	$ 430.1	$ 143.4	$ 254.4	$ 32.3
Restricted investments:				
Money market funds	$ 65.9	$ 65.9	$ —	$ —
Cash	53.3	53.3	—	—
Certificates of deposit	1.0	—	1.0	—
U.S. government and agency obligations	30.1	30.1	—	—
Total restricted investments	$ 150.3	$ 149.3	$ 1.0	$ —
Amounts payable related to investigation resolution	$ 35.2	$ —	$ 35.2	$ —

Assets and liabilities measured at fair value on a recurring basis at December 31, 2013 are as follows:

	Carrying Value	Fair Value Measurements Using: Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Investments:				
Asset backed securities	$ 1.6	$ —	$ 1.6	$ —
Auction rate securities	31.8	—	—	31.8
Certificates of deposit	1.6	—	1.6	—
Corporate debt securities	102.9	—	102.9	—
Money market funds	43.4	43.4	—	—
Municipal securities	108.9	—	108.9	—
U.S. government securities	19.6	19.6	—	—
Variable rate bond fund	85.3	85.3	—	—
Total investments	$ 395.1	$ 148.3	$ 215.0	$ 31.8
Restricted investments:				
Money market funds	$ 19.0	$ 19.0	$ —	$ —
Cash	40.2	40.2	—	—
Certificates of deposit	1.4	—	1.4	—
U.S. government securities	21.9	21.9	—	—
Total restricted investments	$ 82.5	$ 81.1	$ 1.4	$ —
Amounts payable related to investigation resolution	$ 70.3	$ —	$ 70.3	$ —

The following table presents the changes in the fair value of our Level 3 auction rate securities for the years ended December 31, 2014, 2013 and 2012:

	Fair Value Measurements Using Significant Unobservable Inputs (Level 3): December 31, 2014	December 31, 2013	December 31, 2012
Balance as of January 1	$ 31.8	$ 32.0	$ 32.4
Realized gains (losses) in earnings	—	—	—
Changes in net unrealized gains and losses in other comprehensive income	0.5	(0.2)	0.4
Purchases, sales and redemptions	—	—	(0.8)
Net transfers in or (out) of Level 3	—	—	—
Balance as of December 31	$ 32.3	$ 31.8	$ 32.0

As a result of the increase (or decrease) in the fair value of our investments in auction rate securities, we recorded net unrealized gains (losses) of $0.5 million, $(0.2) million, and $0.4 million to accumulated other comprehensive loss during the years ended December 31, 2014, 2013 and 2012, respectively. There were no material redemptions or sales of our auction rate securities during the years ended December 31, 2014 and 2013, however, during the year ended December 31, 2012, we redeemed $0.8 million auction rate securities at par. We did not realize any losses associated with selling or redeeming our auction rate securities in 2012.

Debt

The following table presents the carrying value and fair value of our Senior Notes and Term Loan as of December 31, 2014, and our senior notes as of December 31, 2013:

	December 31, 2014	December 31, 2013
Long term debt	$ 900.0	$ 600.0
Approximate fair value of our long-term debt	908.7	615.0

The fair value of our Senior Notes was determined based on quoted market prices at December 31, 2014 and December 31, 2013, respectively, and therefore would be classified within Level 1 of the fair value hierarchy. The fair value of our Term Loan at December 31, 2014 was determined based on a discounted cash flow analysis, and would therefore be classified within Level 2 of the fair value hierarchy.

11. MEDICAL BENEFITS PAYABLE

Medical benefits payable consists of:

	As of December 31, 2014	% of Total	As of December 31, 2013	% of Total
IBNR	$ 1,111.5	75%	$ 690.1	72%
Other medical benefits payable	372.3	25%	263.3	28%
Total medical benefits payable	$ 1,483.8	100%	$ 953.4	100%

A reconciliation of the beginning and ending balances of medical benefits payable is as follows:

	For the Years Ended December 31,		
	2014	2013	2012
Beginning balance	$ 953.4	$ 733.0	$ 744.8
Acquisitions	107.0	71.6	—
Medical benefits incurred related to:			
Current period	11,481.4	8,333.2	6,450.5
Prior period	(26.2)	(74.6)	(146.6)
Total	11,455.2	8,258.6	6,303.9
Medical benefits paid related to:			
Current period	(10,089.6)	(7,490.6)	(5,754.9)
Prior periods	(942.2)	(619.2)	(560.8)
Total	(11,031.8)	(8,109.8)	(6,315.7)
Ending balance	$ 1,483.8	$ 953.4	$ 733.0

Our estimates of medical benefits expense recorded at December 31, 2014, 2013 and 2012 developed favorably by approximately $26.2 million, $74.6 million, and $146.6 million in 2014, 2013 and 2012, respectively. The release of the provision for moderately adverse conditions included in our prior period estimates was substantially offset by the provision for moderately adverse conditions established for claims incurred in the current year. Accordingly, the favorable development in our estimate of medical benefits payable related to claims incurred in prior years does not directly correspond to a decrease in medical benefits expense recognized during the period.

Excluding the prior period development related to the release of the provision for moderately adverse conditions, our estimates of medical benefits expense recorded at December 31, 2014 developed unfavorably by approximately $48.1 million compared to favorable development of $3.0 million and $76.7 million in 2013 and 2012, respectively. The unfavorable development recognized in 2014 was due to higher than expected medical services in our Medicaid and Medicare Health Plan

segments that were not discernible until the impact became clearer over time as claim payments were processed. The favorable development in 2013 was due mainly to the medical cost trend emerging favorably in our Medicaid segment due to lower utilization. The favorable development in 2012 was due to the medical cost trend emerging favorably, mostly in our Medicaid segment and to a lesser extent in our MA and PDP segments, primarily due to lower than projected utilization, partially offset by higher than expected medical services in Kentucky.

Our acquisitions in 2012, 2013 and 2014 resulted in increases to medical benefits payable as of the effective date for each of the acquisitions. See Note 3, *Acquisitions*, for additional information.

12. DEBT

Credit Arrangements

In September 2014, we amended and restated our existing credit agreement (as amended and restated, the "Credit Agreement") to provide for a $300.0 million term loan (the "Term Loan") in addition to the previously-existing senior unsecured revolving loan facility (the "Revolving Credit Facility") of up to $300.0 million, which may be used for general corporate purposes of the Company and its subsidiaries. The Revolving Credit Facility provides that up to $75.0 million may be used for letters of credit. The Credit Agreement also provides that we may, at our option, increase the aggregate amount of the Revolving Credit Facility and/or obtain incremental term loans in an amount up to $75.0 million without the consent of any lenders not participating in such increase, subject to certain customary conditions and lenders committing to provide the increase in funding. The Term Loan matures in September 2016, with no amortization payments or prepayment penalties. We are not able to re-borrow amounts repaid under the Term Loan. The commitments under the Revolving Credit Facility expire on November 14, 2018 and any amounts outstanding under the facility will be payable in full at that time. Borrowings under the Credit Agreement bear interest at a rate of LIBOR plus a spread between 1.50% and 2.625%, or a rate equal to the Prime Rate plus a spread between 0.50% to 1.625%, depending upon our cash flow leverage ratio (which is defined as the ratio of our total debt to total consolidated EBITDA.) Unutilized commitments under the Credit Agreement are subject to a fee of 0.25% to 0.45% depending upon our cash flow leverage ratio.

The Credit Agreement contains negative and financial covenants that limit certain activities of our company and its subsidiaries, including (i) restrictions on our ability to incur additional indebtedness; and (ii) financial covenants that require (a) the cash flow leverage ratio not to exceed a maximum; (b) a minimum interest expense and principal payment coverage ratio; and (c) a minimum level of statutory net worth for our health maintenance organization and insurance subsidiaries. The Credit Agreement also contains customary representations and warranties that must be accurate in order for us to borrow under the Revolving Credit Facility. In addition, the Credit Agreement contains customary events of default. If an event of default occurs and is continuing, we may be required immediately to repay all amounts outstanding under the Credit Agreement. Lenders holding at least 50% of the loans and commitments under the Credit Agreement may elect to accelerate the maturity of the loans and/or terminate the commitments under the Credit Agreement upon the occurrence and during the continuation of an event of default.

We received net proceeds of $298.6 million in connection with the funding of the Term Loan and closing of the Credit Agreement in September 2014. The Term Loan is classified as long-term debt in the Company's consolidated balance sheet at December 31, 2014 based on its September 2016 maturity date. The interest rate on the Term Loan was 2.50% as of December 31, 2014.

As of December 31, 2014 and as of the date of this filing, we have not drawn upon the Revolving Credit Facility and we remain in compliance with all covenants under both the Credit Agreement and the Senior Notes (defined below).

Additionally, in November 2013, we terminated our senior secured credit facility dated August 1, 2011, as amended to date, (the "2011 Credit Agreement") in connection with our entry into the Credit Agreement described above. All amounts outstanding under the 2011 Credit Agreement as of November 14, 2013, which amounted to $336.5 million, were paid in full upon termination of the agreement. In conjunction with the extinguishment of debt, we incurred approximately $2.8 million for the accelerated recognition of previously deferred financing costs.

Senior Notes due 2020

In November 2013, we completed the offering and sale of $600.0 million aggregate principal amount of 5.75% unsecured senior notes due 2020 (the "Senior Notes"). The aggregate net proceeds from the issuance of the Senior Notes were $587.9 million, with a portion of the net proceeds from the offering being used to repay the full $336.5 million outstanding under the 2011 Credit Agreement, and the remaining net proceeds were used for general corporate purposes, including organic growth opportunities. The Senior Notes will mature on November 15, 2020, and bears interest at a rate of 5.75% per annum. Interest is

computed on the basis of a 360-day year comprised of twelve 30-day months. Interest on the Senior Notes is payable semi-annually on May 15 and November 15 of each year, and commenced on May 15, 2014.

The Senior Notes were issued under an indenture, dated as of November 14, 2013 (the "Base Indenture"), as supplemented by the First Supplemental Indenture, dated as of November 14, 2013 (the "First Supplemental Indenture" and, together with the Base Indenture, the "Indenture") each between us and The Bank of New York Mellon Trust Company, N.A., as trustee. The indenture under which the notes were issued contain covenants that, among other things, limit our ability and the ability of our restricted subsidiaries to:

- incur additional indebtedness and issue preferred stock;
- pay dividends or make other distributions;
- make other restricted payments and investments;
- sell assets, including capital stock of restricted subsidiaries;
- create certain liens;
- incur restrictions on the ability of restricted subsidiaries to pay dividends or make other payments, and in the case of the our subsidiaries, guarantee indebtedness;
- engage in transactions with affiliates;
- create unrestricted subsidiaries; and
- merge or consolidate with other entities.

Ranking and Optional Redemption

The Senior Notes are senior obligations of our company and rank equally in right of payment with all of our other existing and future unsecured and unsubordinated indebtedness. In addition, the Senior Notes will be structurally subordinated to all indebtedness and other liabilities of our subsidiaries (unless our subsidiaries become guarantors of the Senior Notes). We may redeem up to 40% of the aggregate principal amount of the Senior Notes at any time prior to November 15, 2016, at a redemption price equal to 105.75% of the principal amount of the Senior Notes redeemed, plus accrued and unpaid interest.

On or after November 15, 2016, we may on any one or more occasions redeem all or part of the Senior Notes, at the redemption prices (expressed as percentages of principal amount) set forth below, if redeemed during the twelve-month period beginning on November 15 of the years indicated below, subject to the rights of holders of Senior Notes on the relevant record date to receive interest due on the relevant interest payment date:

Period	Redemption Price
2016	102.875%
2017	101.438%
2018 and thereafter	100%

The Senior Notes are classified as long-term debt in the Company's Consolidated Balance Sheet at December 31, 2014 based on their November 2020 maturity date.

13. COMMITMENTS AND CONTINGENCIES

Government Investigations

Under the terms of settlement agreements entered into on April 26, 2011, and finalized on March 23, 2012, to resolve matters under investigation by the Civil Division of the U.S. Department of Justice ("Civil Division") and certain other federal and state enforcement agencies (the "Settlement"), we agreed to pay the Civil Division a total of $137.5 million in four annual installments of $34.4 million over 36 months plus interest accrued at 3.125%. The estimated fair value of the discounted remaining liability, and related interest, was $35.2 million at December 31, 2014, all of which has been included in the current amounts payable related to the investigation resolution in the accompanying consolidated balance sheet as of December 31, 2014.

The Settlement also provides for a contingent payment of an additional $35.0 million in the event that we are acquired or otherwise experience a change in control on or before April 30, 2015, provided that the change in control transaction exceeds certain minimum transaction value thresholds as specified in the Settlement.

Securities Class Action Complaint

In December 2010, we entered into a Stipulation and Agreement of Settlement (the "Stipulation Agreement") with the lead plaintiffs in the consolidated securities class action *Eastwood Enterprises, L.L.C. v. Farha, et al.*, Case No. 8:07-cv-1940-VMC-EAJ. The Stipulation Agreement requires us to pay to the class 25% of any sums we recover from Todd Farha, Paul Behrens and/or Thaddeus Bereday related to the same facts and circumstances that gave rise to the consolidated securities class action. Messrs. Farha, Behrens and Bereday are three former executives that were implicated in the government investigations of the Company that commenced in 2007.

Corporate Integrity Agreement

We operate under a Corporate Integrity Agreement (the "Corporate Integrity Agreement") with the Office of Inspector General of the United States Department of Health and Human Services ("OIG-HHS"). The Corporate Integrity Agreement has a term of five years from its effective date of April 26, 2011 and mandates various ethics and compliance programs designed to help ensure our ongoing compliance with federal health care program requirements. The terms of the Corporate Integrity Agreement include certain organizational structure requirements, internal monitoring requirements, compliance training, screening processes for employees, reporting requirements to OIG-HHS, and the engagement of an independent review organization to review and prepare written reports regarding, among other things, WellCare's reporting practices and bid submissions to federal health care programs.

Indemnification Obligations

Under Delaware law, our charter and bylaws and certain indemnification agreements to which we are a party, we are obligated to indemnify, or we have otherwise agreed to indemnify, certain of our current and former directors, officers and associates with respect to current and future investigations and litigation, including the matters discussed in this footnote. The indemnification agreements for our directors and executive officers with respect to events occurring prior to May 2009 require us to indemnify an indemnitee to the fullest extent permitted by law if the indemnitee was or is or becomes a party to or witness or other participant in any proceeding by reason of any event or occurrence related to the indemnitee's status as a director, officer, employee agent or fiduciary of the Company or any of our subsidiaries and all expenses, including attorney's fees, judgments, fines, settlement amounts and interest and other charges, and any taxes as a result of the receipt of payments under the indemnification agreement. We will not indemnify the indemnitee if not permitted under applicable law. We are required to advance all expenses incurred by the indemnitee. We are entitled to reimbursement by an indemnitee of expenses advanced if the indemnitee is not permitted to be reimbursed under applicable law after a final judicial determination is made and all rights of appeal have been exhausted or lapsed.

We amended and restated our indemnification agreements in May 2009. The revised agreements apply to our officers and directors with respect to events occurring after that time. Pursuant to the 2009 indemnification agreements, we will indemnify the indemnitee against all expenses, including attorney's fees, judgments, penalties, fines, settlement amounts and any taxes imposed as a result of payments made under the indemnification agreement incurred in connection with any proceedings that relate to the indemnitee's status as a director, officer or employee of the Company or any of our subsidiaries or any other enterprise that the indemnitee was serving at our request. We will also indemnify for expenses incurred by the indemnitee if an indemnitee, by reason of his or her corporate status, is a witness in any proceeding. Further, we are required to indemnify for expenses incurred by an indemnitee in defense of a proceeding to the extent the indemnitee has been successful on the merits or otherwise. Finally, if the indemnitee is involved in certain proceedings as a result of the indemnitee's corporate status, we are required to advance the indemnitee's reasonable expenses incurred in connection with such proceeding, subject to the requirement that the indemnitee repay the expenses if it is ultimately determined that the indemnitee is not entitled to be indemnified. We are not obligated to indemnify an indemnitee for losses incurred in connection with any proceeding if a determination has not been made by the Board of Directors, a committee of disinterested directors or independent legal counsel in the specific case that the indemnitee has satisfied any standards of conduct required as a condition to indemnification under Section 145 of the Delaware General Corporation Law.

Pursuant to our obligations, we have advanced, and will continue to advance, legal fees and related expenses to three former officers and two additional associates who were criminally indicted in connection with the government investigations of the Company that commenced in 2007 related to federal criminal health care fraud charges including conspiracy to defraud the United States, false statements relating to health care matters, and health care fraud in connection with their defense of criminal charges. In June 2013, the jury in the criminal trial reached guilty verdicts on multiple charges for the four individuals that were tried in 2013. In May 2014, the individuals were sentenced and our request for restitution was denied. All four individuals filed notices of appeal and the government has filed notices of cross appeal on three of the four individuals, which the government subsequently voluntarily dismissed. The fifth individual is expected to be tried after the appeals have been decided.

We have also previously advanced legal fees and related expenses to these five individuals regarding disputes in Delaware Chancery Court related to whether we were legally obligated to advance fees or indemnify certain of these executives; the class actions titled Eastwood Enterprises, L.L.C. v. Farha, et al. and Hutton v. WellCare Health Plans, Inc. et al. filed in federal court; six stockholder derivative actions filed in federal and state courts between October 2007 and January 2008; an investigation by the United States Securities & Exchange Commission (the "Commission"); and an action by the Commission filed in January 2012 against Messrs. Farha, Behrens and Bereday. The Delaware Chancery Court cases have concluded. We settled the class actions in May 2011. In 2010, we settled the stockholder derivative actions and we were realigned as the plaintiff to pursue our claims against Messrs. Farha, Behrens and Bereday. These actions, as well as the action by the Commission, have been stayed until at least 90 days after the conclusion of the criminal trial (including post-trial motions and proceedings).

In connection with these matters, we have advanced to the five individuals, cumulative legal fees and related expenses of approximately $185.9 million from the inception of the investigations to December 31, 2014. We incurred $30.0 million, $46.0 million and $38.2 million of these legal fees and related expenses during the years ended December 31, 2014, 2013 and 2012, respectively. We expense these costs as incurred and classify the costs as selling, general and administrative expense incurred in connection with the investigations and related matters.

In August 2010, we entered into an agreement and release with the carriers of our directors and officers ("D&O") liability insurance relating to coverage we sought for claims relating to the previously disclosed government investigations and related litigation. We accepted payment of $32.5 million prior to 2012 in satisfaction of the $45.0 million face amount of the relevant D&O insurance policies and the carriers agreed to waive any rights they may have to challenge our coverage under the policies. As a result, we have exhausted our insurance policies related to reimbursement of our advancement of fees related to these matters.

We expect the continuing cost of our obligations to the five individuals in connection with their defense and appeal of criminal charges and related litigation to be significant and to continue for a number of years. We are unable to estimate the total amount of these costs or a range of possible loss. Accordingly, we continue to expense these costs as incurred. Even if it is eventually determined that we are entitled to reimbursement of the advanced expenses, it is possible that we may not be able to recover all or any portion of our advances. Our indemnification obligations and requirements to advance legal fees and expenses may have a material adverse effect on our financial condition, results of operations and cash flows.

Other Lawsuits and Claims

Based on the nature of our business, we are subject to regulatory reviews or other investigations by various state insurance and health care regulatory authorities and other state and federal regulatory authorities. These authorities regularly scrutinize the business practices of health insurance and benefits companies and their reviews focus on numerous facets of our business, including claims payment practices, provider contracting, competitive practices, commission payments, privacy issues and utilization management practices, among others. Some of these reviews have historically resulted in fines imposed on us and some have required changes to our business practices. We continue to be subject to such reviews, which may result in additional fines and/or sanctions being imposed or additional changes in our business practices.

Separate and apart from the legal matters described above, we are also involved in other legal actions in the normal course of our business, including, without limitation, wage and hour claims and other employment claims, vendor disputes and provider disputes regarding payment of claims. Some of these actions seek monetary damages, including claims for liquidated or punitive damages, which are not covered by insurance. We review relevant information with respect to litigation matters and we update our estimates of reasonably possible losses and related disclosures. We accrue an estimate for contingent liabilities, including attorney's fees related to these matters, if a loss is probable and estimable. Currently, we do not expect that the resolution of any currently pending actions, either individually or in the aggregate, will differ materially from our current estimates or have a material adverse effect on our results of operations, financial position, and cash flows. However, the outcome of any legal actions cannot be predicted, and therefore, actual results may differ from those estimates.

Operating Leases

We recorded rental expense of $25.2 million, $20.4 million, and $17.0 million for the years ended December 31, 2014, 2013 and 2012, respectively, related to our operating leases for office space. Future minimum lease payments under non-cancelable operating leases with initial or remaining lease terms in excess of one year at December 31, 2014 are as follows:

	Minimum Lease Payments
2015	$ 24.9
2016	15.9
2017	12.1
2018	7.4
2019	4.1
2020 and thereafter	8.0
Total	$ 72.4

14. INCOME TAXES

The Company and subsidiaries file a consolidated federal income tax return and separate state franchise, income and premium tax returns, as applicable. The following table provides components of income tax expense (benefit):

	For the Years Ended December 31,		
	2014	2013	2012
Current:			
Federal	$ 105.1	$ 78.6	$ 84.0
State	15.1	7.5	8.6
	120.2	86.1	92.6
Deferred:			
Federal	(5.7)	16.0	18.1
State	(0.4)	0.9	1.0
	(6.1)	16.9	19.1
Total income tax expense	$ 114.1	$ 103.0	$ 111.7

A reconciliation of income tax at the statutory federal rate of 35% to income tax at the effective rate is as follows:

	For the Years Ended December 31,		
	2014	2013	2012
Income tax expense at statutory federal rate	$ 62.2	$ 97.4	$ 103.7
Adjustments resulting from:			
State income tax, net of federal benefit	9.4	5.8	6.7
Tax exempt bargain purchase gain	(10.3)	—	—
Non-deductible executive compensation	3.8	5.1	2.4
Non-deductible amounts related to investigation resolution	0.1	(6.9)	(1.3)
Non-deductible ACA industry fees	48.2	—	—
Interest on unrecognized tax benefits	—	—	(0.1)
Other, net	0.7	1.6	0.3
Total income tax expense	$ 114.1	$ 103.0	$ 111.7

Our effective income tax rate on pre-tax income was 64.2% for the year ended December 31, 2014, compared to 37.0% for the year ended December 31, 2013 and 37.7% for the year ended December 31, 2012. The higher 2014 effective rate mainly reflects the impact of the non-deductible ACA industry fee. Additionally, the effective rate was lower in 2013 due to an issue resolution agreement reached with the IRS regarding the tax treatment of the investigation-related litigation and other resolution costs, resulting in approximately $7.6 million in additional tax benefit over what was recorded as of December 31, 2012. These unfavorable impacts were partially offset by the favorable impact of the Windsor bargain purchase gain.

Significant components of our deferred tax assets and liabilities are:

	As of December 31,	
Deferred tax assets:	2014	2013
Medical and other benefits discounting	$ 14.2	$ 11.7
Unearned premium discounting	6.4	—
Tax basis assets	10.1	10.1
Allowance for doubtful accounts	10.1	3.6
Amount payable related to investigation resolution	6.8	13.7
Accrued expenses and other	18.6	19.0
	66.2	58.1
Deferred tax liabilities:		
Goodwill, other intangible assets and property and equipment	3.5	26.0
Software development costs	68.9	54.9
Prepaid assets	5.1	8.9
	77.5	89.8
Net deferred tax liability	$ (11.3)	$ (31.7)

We have not recorded a valuation allowance at December 31, 2014 and 2013 as we expect that we will fully realize our deferred tax assets.

We classify deferred tax assets and liabilities in the consolidated balance sheets as follows:

	As of December 31,	
	2014	2013
Current assets	$ 37.1	$ 23.7
Non-current liabilities	(48.4)	(55.4)
Net deferred tax liability	$ (11.3)	$ (31.7)

In September 2014, the IRS issued final regulations on the ACA's $0.5 million limit on the deduction for compensation paid to service providers of a covered health insurance provider under Code section 162(m)(6). As a result, we no longer believe the deduction limitations apply to WellCare, and we reversed $10.4 million of previously recorded tax expense from prior periods during the year ended December 31, 2014. However, we are not able to conclude at this time that our tax position is more likely than not to be sustained upon IRS CAP review. Therefore, we recognized a liability for unrecognized tax benefits amounting to $10.4 million at December 31, 2014. The unrecognized tax benefit, if recognized, would reduce the effective tax rate.

A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows:

	Years Ended December 31,	
	2014	2013
Gross unrecognized tax benefits, beginning of period	$ —	$ —
Gross increases:		
Prior year tax positions	—	—
Current year tax positions	10.4	—
Gross decreases:		
Prior year settlements	—	—
Prior year tax positions	—	—
Statute of limitations lapses	—	—
Gross unrecognized tax benefits, end of period	$ 10.4	$ —

We believe it is reasonably possible that our liability for unrecognized tax benefits will not significantly increase or decrease in the next twelve months as a result of audit settlements and the expiration of statutes of limitations in certain major jurisdictions.

We classify interest and penalties associated with uncertain income tax positions as income taxes within our consolidated financial statements. We did not incur or record interest and accrued penalties for the years ended December 31, 2014 and 2013.

We file our income tax returns in the U.S. federal jurisdiction and various states. The IRS has concluded its CAP review of our 2012 tax return as well as all the prior years. We expect the IRS will conclude its CAP review of our 2013 tax return, with the exception of the compensation deduction limitation issue under Code section 162(m)(6), in 2015. We are no longer subject to state and local tax examinations prior to 2004. As of December 31, 2014, we are not aware of any material proposed adjustments.

15. EQUITY-BASED COMPENSATION

We recorded equity-based compensation expense of $15.7 million, $12.5 million and $14.9 million for the years ended December 31, 2014, 2013, and 2012, respectively. As of December 31, 2014, we expect $25.6 million of unrecognized compensation cost related to non-vested equity-based compensation arrangements, net of estimated forfeitures, to be recognized over a weighted-average period of 1.8 years. The unrecognized compensation cost for our PSUs, which are subject to variable accounting, was determined based on the closing common stock price of $82.06 as of December 31, 2014 and amounted to approximately $11.4 million of the total unrecognized compensation. Due to the nature of the accounting for these awards, future compensation cost will fluctuate based on changes in our common stock price.

The weighted-average grant-date fair values of shares granted during the years ended December 31, 2014, 2013, and 2012 were $64.49, $61.33, and $64.19, respectively. The total fair value of all shares vested during the year ended December 31, 2014 was $11.4 million. We generally repurchase vested shares to satisfy tax withholding requirements and then retire the repurchased shares.

Stock Options

We have not granted stock option awards since 2010, but some remain outstanding. A summary of our stock option activity for the year ended December 31, 2014, and the aggregate intrinsic value and weighted average remaining contractual term for our stock options as of December 31, 2014, is:

	Shares	Weighted Average Exercise Price	Aggregate Intrinsic Value	Weighted Average Remaining Contractual Term (Years)
Outstanding as of January 1, 2014	31,381	$ 29.47		
Granted	—	—		
Exercised	(21,954)	26.98		
Forfeited and expired	(1,407)	14.49		
Outstanding as of December 31, 2014 (1)	8,020	38.92	$ 0.3	0.2

(1) All of the Company's outstanding stock options were vested and exercisable as of December 31, 2014.

The total intrinsic value of options exercised during the years ended December 31, 2014, 2013, and 2012 was $0.9 million, $14.1 million, and $9.8 million, respectively.

For the years ended December 31, 2014, 2013, and 2012, we received cash from option exercises of $0.5 million, $10.3 million, and $9.4 million, respectively. We currently expect to satisfy equity-based compensation awards with available unissued registered shares.

Restricted Stock and RSUs

A summary of the activity for our restricted stock and RSU awards for the year ended December 31, 2014 is:

	Restricted Stock and RSUs	Weighted Average Grant-Date Fair Value
Outstanding as of January 1, 2014	259,836	$ 56.51
Granted	325,336	64.65
Vested	(116,132)	57.46
Forfeited and expired	(62,137)	59.95
Outstanding as of December 31, 2014	406,903	62.23

MSUs

A summary of the activity for our MSU awards for the year ended December 31, 2014 is:

	MSUs	Weighted Average Grant-Date Fair Value
Outstanding as of January 1, 2014	83,889	$ 79.38
Granted	74,784	71.42
Vested	—	—
Forfeited and expired	(45,010)	78.97
Outstanding as of December 31, 2014	113,663	74.31

PSUs

A summary of the activity for our PSU awards, which are subject to variable accounting, for the year ended December 31, 2014 is:

	PSUs	Weighted Average Award-Issuance Fair Value
Outstanding as of January 1, 2014	288,487	$ 55.30
Granted	270,417	62.38
Vested	(62,640)	40.57
Forfeited and expired	(101,189)	60.61
Outstanding as of December 31, 2014	395,075	61.13

16. RELATED-PARTY TRANSACTIONS

The Graham Companies

We lease office space from The Graham Companies, in which a member of the board of directors and his immediate family has a 23% ownership interest. We paid $0.2 million in rental expense to The Graham Companies in each of the years ended December 31, 2014 and 2013, and $0.1 million in rental expense in the year ended December 31, 2012.

17. REGULATORY CAPITAL AND DIVIDEND RESTRICTIONS

Each of our health maintenance organizations ("HMO") and insurance subsidiaries must maintain a minimum amount of statutory capital determined by statute or regulation. The minimum statutory capital requirements differ by state and are generally based on a percentage of annualized premium revenue, a percentage of annualized health care costs, a percentage of certain liabilities, a statutory minimum, risk-based capital ("RBC") requirements or other financial ratios. Failure to maintain these requirements would trigger regulatory action by the state. Such statues, regulations and capital requirements also restrict the timing, payment, and amount of dividends and other distributions that may be paid to us as the sole stockholder. Based upon current statutes and regulations, the minimum capital and surplus requirement, or net assets, for these subsidiaries that may not be transferable to us in the form of loans, advances, or cash dividends was approximately $746.0 million at December 31, 2014, and $489.0 million at December 31, 2013. The combined statutory capital and surplus of our HMO and insurance subsidiaries was $1.3 billion and $1.1 billion at December 31, 2014 and 2013, respectively, which was in compliance with the minimum capital requirements as of those dates.

Dividend restrictions vary by state, but the maximum amount of dividends which can be paid without prior approval from the applicable state is subject to restrictions relating to statutory capital, surplus and net income for the previous year. Some states require prior approval of all dividends, regardless of amount. States may disapprove any dividend that, together with other dividends paid by a subsidiary in the prior 12 months, exceeds the regulatory maximum as computed for the subsidiary based on its statutory surplus and net income. We received $68.0 million, $147.0 million and $192.0 million in dividends from our regulated subsidiaries during the years ended December 31, 2014, 2013, and 2012, respectively. The 2014 amount included $36 million not requiring prior regulatory approval, and $32 million paid after obtaining prior regulatory approval. Under applicable regulatory requirements at December 31, 2014, the amount of dividends that may be paid through the end of 2015 by our HMO and insurance subsidiaries without prior approval by regulatory authorities is approximately $60.0 million in the aggregate.

18. EMPLOYEE BENEFIT PLANS

401(k) Plan

We offer a defined contribution 401(k) plan. Eligible employees of the Company and its subsidiaries may elect to participate in this plan. Participants may contribute a certain percentage of their compensation, subject to maximum Federal and plan limits. We incurred matching contribution expense of $7.9 million, $6.0 million and $4.3 million during the years ended December 31, 2014, 2013 and 2012, respectively.

Long-term Incentive Program

Certain of our senior level employees, including executive officers, are eligible for long-term incentive awards ("LTI Program"), consisting of a mix of cash and equity awards, which are granted pursuant to the 2013 Incentive Compensation Plan during 2013 and 2014 and the 2004 Equity Incentive Plan during 2012 and certain prior years. We designed the LTI Program to motivate and promote the achievement of our long-term financial and operating goals and improve retention. Under the LTI Program, we grant multi-year performance period awards that are not realized by employees and officers until subsequent years. We base award amounts on each participant's pre-established long-term incentive target and allocate the awards to various types of equity awards and performance-based cash, depending on job level. The Compensation Committee has sole discretion of the ultimate funding and payout of awards under the LTI program. We accrued compensation costs related to the LTI Program performance-based cash bonus of $1.0 million and $5.2 million as of December 31, 2014 and 2013, respectively.

19. QUARTERLY FINANCIAL INFORMATION

Selected unaudited quarterly financial data is as follows (in millions, except membership and per share data):

	For the Three Month Periods Ended			
	March 31, 2014	June 30, 2014[1]	September 30, 2014	December 31, 2014[2]
Total revenues	$ 2,985.7	$ 3,151.9	$ 3,407.5	$ 3,414.8
Gross margin	312.9	268.9	365.0	375.8
Income (loss) from operations	37.3	(14.6)	69.5	56.1
Income (loss) before income taxes[3]	65.6	(3.5)	61.7	54.0
Net income (loss)	44.1	(7.5)	19.3	7.7
Net income (loss) per share - basic	$ 1.01	$ (0.17)	$ 0.44	$ 0.18
Net income (loss) per share - diluted	1.00	(0.17)	0.44	0.18
Period end membership	3,530,000	3,874,000	4,037,000	4,119,000

(1) During the second quarter of 2014, we recognized approximately $24.1 million in impairment and other charges, $18.0 million of which primarily relates to the partial impairment of certain intangible assets recorded in the 2012 acquisition of Easy Choice. The remaining charges also include a charge for the full impairment of intangible assets associated with the purchase of our Arizona MA plan after we concluded during 2014 to exit the Arizona MA market in 2015, and charges resulting from the resolution of certain matters related to the purchase price of our 2013 acquisitions.
(2) In the three months ended December 31, 2014, we recognized $4.6 million in net out of period adjustments that decreased income (loss) before income taxes, mainly related to reductions in Medicaid revenues associated with rate changes that occurred in previous quarters in 2014. We have evaluated the effects of these adjustments, both quantitatively and qualitatively, and concluded that they are not material to any prior quarterly or annual period impacted.
(3) The estimated fair value of the net tangible and intangible assets that we acquired in connection with the Windsor acquisition has exceeded the total consideration paid, and payable, to the seller. We recognized the excess fair value as a bargain purchase gain, in accordance with accounting rules related to business combinations, after consideration of all relevant factors, which resulted in gains of approximately $28.3 million and $11.1 million in the first and second quarters of 2014, and charges of $7.8 million and $2.1 million in the third and fourth quarters of 2014.

	For the Three Month Periods Ended			
	March 31, 2013	June 30, 2013	September 30, 2013	December 31, 2013
Total revenues	$ 2,256.6	$ 2,332.1	$ 2,500.4	$ 2,438.8
Gross margin	265.0	311.5	350.9	323.1
Income from operations	**22.9**	**77.2**	**106.8**	**74.2**
Income before income taxes	22.9	77.2	106.8	71.4
Net income	**21.5**	**46.9**	**64.0**	**42.9**
Net income per share - basic	$ 0.50	$ 1.08	$ 1.47	$ 0.98
Net income per share - diluted	0.49	1.07	1.45	0.97
Period end membership	2,703,000	2,842,000	2,824,000	2,846,000

The sum of the quarterly amounts may not equal the amount reported for the full year due to rounding. Additionally, per share amounts are computed independently for each quarter and for the full year based on respective weighted-average shares outstanding and other dilutive potential shares and units.

Vision

Our vision is to be the leader in government-sponsored health care programs in partnership with the members, providers, governments and communities we serve.

Mission

Our primary mission is to:

- Enhance our members' health and quality of life;
- Partner with providers and governments to provide quality, cost-effective health care solutions; and
- Create a rewarding and enriching environment for our associates.

Values

Partnership. Members are the reason we are in business; providers are our partners in serving our members; and regulators are the stewards of the public's resources and trust. We will deliver excellent service to our partners.

Integrity. Our actions must consistently demonstrate a high level of integrity that earns the trust of those we serve.

Accountability. All associates must be responsible for the commitments we make and the results we deliver.

Teamwork. With our fellow associates, we can expect – and are expected to demonstrate – a collaborative approach in the way we work.

Together we'll go far

CORPORATE OVERVIEW

C. CHANGE OF OWNERSHIP

If any change in ownership or control of the company is anticipated during the twelve (12) months following the proposal due date, the bidder must describe the circumstances of such change and indicate when the change will likely occur. Any change of ownership to an awarded vendor(s) will require notification to the State.

WELLCARE DOES NOT ANTICIPATE A CHANGE IN OWNERSHIP OR CONTROL

WellCare does not anticipate any change in ownership or control during the 12 months following the proposal due date for either WellCare or WellCare of Nebraska.

CORPORATE OVERVIEW

D. OFFICE LOCATION

The bidder's office location responsible for performance pursuant to an award of a contract with the State of Nebraska must be identified.

MEETING MEMBERS WHERE THEY ARE: A NEBRASKA SOLUTION

WellCare's mission is to deliver culturally-competent, locally-based care to our members on behalf of our state partners. To achieve this goal, we rely on becoming embedded in the local fabric of each state. For us this means having a main office location in the capital of the state where we are operating. Being easily accessible to our state partners facilitates a responsive and collaborative relationship.

Once awarded a contract, Lincoln will be the site of WellCare of Nebraska's main office. Plan leaders, government affairs associates and other senior staff will be based in this office location. Currently, we have an office located in Omaha at 1299 Farnam Street, Suite 300.

A Best-in-Class Solution

WellCare of Nebraska will operate four Welcome Rooms across the state in addition to our main office to better reach members in the communities in which they live, work and access care.

Not only do we have an office in Nebraska, but for months now, senior leadership from our corporate office in Tampa have traveled to Nebraska to establish relationships with providers, with advocates and community service organizations leaders. Out of these relationships and the local knowledge gleaned from them, we can prepare and plan for a truly Nebraska-oriented plan.

We recognize our Heritage Health members will be living across the entire state in urban, rural and frontier areas. To reach them, we will open Welcome Rooms (**Figure 1**) in strategic locations to make it easy for our members to access us. Housed in strategically selected, high traffic, retail shopping areas in the neighborhoods and communities where enrollees live, work and frequent, our Welcome Rooms are designed and equipped to engage the community by being outreach centers and walk-in member service hubs. Members and families can meet face-to-face with a member service representative at a local Welcome Room to get personalized attention to their needs. These locations are intended to be a destination point for our members and offer computers, internet access and activities geared toward our members and the community we serve. The Welcome Rooms will host events such as children's reading and literacy support classes, nutrition education classes, special needs resource navigation, and a variety of other activities and events for the community each month, becoming an important community resource. In Nebraska, we will have Welcome Rooms located in Omaha, Kearney, Scottsbluff and Norfolk. The size of the state and the locations where the majority of our membership lives drives the decision-making around the location of these offices. The map below (**Figure 2**) illustrates the breadth of our geographic scope and access for our members.

CORPORATE OVERVIEW

E. RELATIONSHIPS WITH THE STATE

The bidder shall describe any dealings with the State over the previous five (5) years. If the organization, its predecessor, or any party named in the bidder's proposal response has contracted with the State, the bidder shall identify the contract number(s) and/or any other information available to identify such contract(s). If no such contracts exist, so declare.

DEALINGS WITH THE STATE OVER THE PREVIOUS FIVE YEARS

Neither WellCare nor any of its subsidiaries or predecessors has contracted, or had any other form of business arrangement, with the State of Nebraska during the previous five years.

CORPORATE OVERVIEW

F. BIDDER'S EMPLOYEE RELATIONS TO STATE

If any party named in the bidder's proposal response is or was an employee of the State within the past twelve (12) months, identify the individual(s) by name, State agency with whom employed, job title or position held with the State, and separation date. If no such relationship exists or has existed, so declare.

If any employee of any agency of the State of Nebraska is employed by the bidder or is a Sub-Contractor to the bidder, as of the due date for proposal submission, identify all such persons by name, position held with the bidder, and position held with the State (including job title and agency). Describe the responsibilities of such persons within the proposing organization. If, after review of this information by the State, it is determined that a conflict of interest exists or may exist, the bidder may be disqualified from further consideration in this proposal. If no such relationship exists, so declare.

WELLCARE DOES NOT EMPLOY ANY STATE EMPLOYEES

No party named in this proposal response is or was an employee of the State of Nebraska within the past 12 months.

No employee of any agency of the State of Nebraska is employed by WellCare or is a proposed Sub-Contractor to WellCare as of the due date for proposal submission.

CORPORATE OVERVIEW

G. CONTRACT PERFORMANCE

If the bidder or any proposed Sub-Contractor has had a contract terminated for default during the past five (5) years, all such instances must be described as required below. Termination for default is defined as a notice to stop performance delivery due to the bidder's non-performance or poor performance, and the issue was either not litigated due to inaction on the part of the bidder or litigated and such litigation determined the bidder to be in default.

It is mandatory that the bidder submit full details of all termination for default experienced during the past five (5) years, including the other party's name, address, and telephone number. The response to this section must present the bidder's position on the matter. The State will evaluate the facts and will score the bidder's proposal accordingly. If no such termination for default has been experienced by the bidder in the past five (5) years, so declare.

If at any time during the past five (5) years, the bidder has had a contract terminated for convenience, non-performance, non-allocation of funds, or any other reason, describe fully all circumstances surrounding such termination, including the name and address of the other contracting party.

CONTRACT TERMINATIONS IN THE PAST FIVE YEARS

WellCare

In the past five years, neither WellCare nor any of its subsidiaries has had a contract terminated for default or non-performance. However, during that period, two of WellCare's plans have had contracts to provide services to state prescription assistance programs ("SPAPs") terminated for reasons completely unrelated to our plans' performance. In each case, the SPAP sponsor de-funded the underlying SPAP program and, with no funds to pay for services, the administering agency terminated all contracts for services under those programs:

- **Illinois SPAP**: The Illinois General Assembly did not appropriate funds for the Illinois SPAP program for the state's 2013 fiscal year, which began July 1, 2012. At that time two WellCare subsidiaries, WellCare Prescription Insurance, Inc. (WellCare Rx) and Harmony Health Plan of Illinois, Inc., provided services to the Illinois SPAP program pursuant to Contracts 2010-22-005, each effective as of January 1, 2010, with the Illinois Department of Healthcare and Family Services (Illinois DHFS). As a result of the General Assembly's decision not to appropriate funds for the SPAP program, Illinois DHFS terminated all of its contracts with SPAP service providers as of July 1, 2012, including its contracts with WellCare Rx and Harmony. Contact information: Michelle Maher, Chief, Bureau of Managed Care, Illinois Department of Healthcare and Family Services, 201 South Grand Avenue East, Springfield, IL 62763; (217) 524-7478.
- **North Carolina SPAP**: From 2007 to 2011, North Carolina funded its SPAP program through the North Carolina Health and Wellness Trust Fund (HWTF), one of three entities created by the North Carolina General Assembly to administer funds received through a settlement between the state and tobacco manufacturers. However, the HWTF ceased funding the SPAP program as of June 30, 2011. At that time WellCare Rx provided services to the North Carolina SPAP program through Contract #90009208 dated January 13, 2010, with the North Carolina Department of Health and Human Services, Office of Rural Health and Community Care (North Carolina DHHS). With no funds with which to operate the SPAP program, North Carolina DHHS terminated all of its contracts with SPAP service providers as of June 30, 2011, including its contract with WellCare Rx. Contact information: John Price, North Carolina Department of Health and Human Services, Office of Rural Health and Community Care, 2009 Mail Service Center, Raleigh, NC 27699; (919) 527-6440. Please note that this is the most recent contact information we have; the program terminated four years ago.

In addition to the SPAP contracts above, we wanted to disclose the following. On February 16, 2015, the Iowa Department of Human Services ("DHS") issued Iowa Department of Human Services - Request for Proposal - Iowa High Quality Healthcare Initiative - RFP MED-16-009 (the "Iowa RFP"). On August 17, 2015, DHS issued a Notice of Intent to Award contracts arising out of the RFP to four entities including WellCare of Iowa, Inc. ("WCIA"). Three unsuccessful bidders filed bid protests challenging the intended contract awards. Those protests were denied and each of the protestors timely appealed the denial of their protests to the Iowa Department of Inspection and Appeals, Division of Administrative Hearings in the case styled *Iowa Total Care, Inc. et al. v. Iowa Department of Human Services, et al.*, Appeal Nos. 16001573, 16001590, and 16001623. During the pendency of those appeals, the winning bidders, including WCIA, entered into contracts with DHS on October 9, 2015. On November 25, 2015, following an administrative hearing, Administrative Law Judge Christie J. Scase issued a Proposed Decision which, among other things, reversed the Notice of Intent to Award a contract to WCIA. WCIA, DHS, and the protesting bidders each sought review of the Administrative Law Judge's Proposed Decision. Review was granted and on December 18, 2015, Iowa Department of Administrative Services Director Janet E. Phipps (the "Director") issued a Final Order reversing the Notice of Intent to Award to WCIA and terminating WCIA's contract with DHS. WCIA disputes the facts and law as set forth in both the Proposed Order and Final Order and will seek judicial review of the Final Order, including the Director's decision to terminate the contract between WCIA and DHS. DHS' contact person, address and phone number for purposes of the now terminated contract is:

Mikki Stier, Medicaid Director
Iowa Medicaid Enterprise
100 Army Post Road
Des Moines, IA 50315
515-256-4647

Proposed Sub-Contractors

All but one of WellCare's proposed Sub-Contractors has confirmed that they have not had a contract terminated for default or non-performance in the past five years. The remaining proposed Sub-Contractor, R.R. Donnelley & Sons Company (Donnelley), is a publicly traded company (NNM: RRD). Its net sales in 2014 were $11.6 billion and it has tens of thousands of contracts with customers all over the world. Because of the scope of its operations, Donnelley was unable to definitely confirm that in the last five years it has not had a single customer contract terminated for default or non-performance. However, Donnelley has confirmed that to the best of its knowledge and belief, no prior terminations would have a material impact on Donnelley's ability to provide products or services under the Request for Proposal.

CORPORATE OVERVIEW

H. SUMMARY OF BIDDER'S CORPORATE EXPERIENCE

The bidder shall provide a summary matrix listing the bidder's previous projects similar to this Request for Proposal in size, scope, and complexity. The State will use no more than three (3) narrative project descriptions submitted by the bidder during its evaluation of the proposal.

The bidder must address the following:

I. Provide narrative descriptions to highlight the similarities between the bidder's experience and this Request for Proposal. These descriptions must include:

a) The time period of the project;

b) The scheduled and actual completion dates;

c) The Contractor's responsibilities;

d) For reference purposes, a customer name (including the name of a contact person, a current telephone number, a facsimile number, and e-mail address); and

e) Each project description shall identify whether the work was performed as the prime Contractor or as a Sub-Contractor. If a bidder performed as the prime Contractor, the description must provide the originally scheduled completion date and budget, as well as the actual (or currently planned) completion date and actual (or currently planned) budget.

II Contractor and Sub-Contractor(s) experience must be listed separately. Narrative descriptions submitted for Sub-Contractors must be specifically identified as Sub-Contractor projects.

III If the work was performed as a Sub-Contractor, the narrative description shall identify the same information as requested for the Contractors above. In addition, Sub-Contractors shall identify what share of contract costs, project responsibilities, and time period were performed as a Sub-Contractor.

I. WELLCARE HAS EXTENSIVE RELEVANT EXPERIENCE SERVING MEDICAID MEMBERS

WellCare plans have been proud to serve Medicaid managed care members since 1994 and currently operate Medicaid plans in nine states covering 2.4 million members. All of our plans cover TANF and CHIP members and some of our plans cover aged, blind and disabled (ABD), SSI, members in long-term supports and services (LTSS), duals and/or foster children, giving us broad experience with the various members we would serve in Nebraska. Please find below summaries of our experience serving Medicaid managed care programs in three of our programs as requested – Florida, Hawaii and Kentucky. As would be the case for Nebraska, WellCare's plans have served government programs only as prime Contractors rather than as Sub-Contractors. Therefore we have not included a response for subsections II and III of this question.

Florida

a) ***Time period:*** WellCare of Florida, Inc. has served Florida Medicaid under successive contracts since 1994.

b) ***Scheduled and actual completion dates:*** WellCare of Florida's current contract with the Florida Agency for Health Care Administration (AHCA) expires on December 31, 2018. WellCare of Florida serves CHIP members ages 5 to 18 years under a separate contract with the Florida Healthy Kids Corporation (FHKC). WellCare of Florida's current contract with FHKC expires on September 30, 2017. It may be extended by FHKC for up to an additional two one-year periods, for a potential term through September 30, 2019.

c) ***Contractor's responsibilities:***

Populations currently served: TANF, SSI, CHIP, ABD, duals

Benefits currently covered: Comprehensive and integrated , including inpatient, outpatient, behavioral health, substance use disorder, pharmacy, dental, hearing, vision, laboratory, therapy, DME, home health, assistive care, transportation and hospice services.

Number of members currently served: As of September 30, 2015, WellCare of Florida served approximately 788,000 Medicaid and CHIP members.

WellCare of Florida is a fully capitated plan operating in eight of Florida's 11 Medicaid regions. The plan is responsible for ensuring the provision of services in sufficient amount, duration and scope to ensure the provision of all covered services under the contract. In particular, the following aspects of our experience in Florida will be valuable in serving our Heritage Health members:

- We serve a particularly diverse population
- We provide integrated medical and behavioral health services
- We provide services to aged, blind and disabled members
- Our members live in a mix of urban and rural settings

d) ***Customer name and contact information:*** Elizabeth Dudek, Secretary, Agency for Health Care Administration, (850) 412-4007 (phone), (850) 922-2897 (fax), Elizabeth.Dudek@ ahca.myflorida.com (email)

e) ***Whether work performed as the prime Contractor or as a Sub-Contractor:*** WellCare of Florida is contracted with AHCA as a prime Contractor.

Originally scheduled and actual completion date: As noted above, WellCare of Florida's current contract with AHCA is scheduled to expire December 31, 2018 and its current contract with FHKC is scheduled to expire September 30, 2019 (if extended for all additional terms).

Originally scheduled and actual budget: WellCare of Florida is paid a monthly capitation rate for the members enrolled in its plans, so there is no budget for these projects in the traditional sense.

- For calendar year 2014, WellCare of Florida projected Medicaid and CHIP premiums in an amount of $1,481,724,000; actual (reported) premiums for this period were $1,744,957,051
- For the period of January 1, 2015, through September 30, 2015 WellCare of Florida projected Medicaid and CHIP premiums in an amount of $1,553,129,000; actual (reported) premiums for this period were $1,696,144,738

Hawaii

a) ***Time period:*** WellCare Health Insurance of Arizona, Inc., d/b/a 'Ohana Health Plan, Inc. ('Ohana) has served the Hawaii Medicaid program under successive contracts since 2009.

b) ***Scheduled and actual completion dates:*** 'Ohana's current contract with the Hawaii Department of Human Services/Med-QUEST Division (DHS) to provide Medicaid managed care services (the "QUEST Integration Contract") expires on December 31, 2017 but may be extended by up to four additional one year terms for a potential term through December 31, 2021. Since 2013 'Ohana has also served as DHS's exclusive contractor under Hawaii's Community Care Services program. 'Ohana's Community Care Services (CCS) contract is scheduled to expire on June 30, 2016 but may be extended by up to two additional one year terms for a potential term through June 30, 2018.

c) ***Contractor's responsibilities:***

Populations currently served: TANF, SSI, CHIP, ABD, LTSS, duals

Benefits currently covered: Comprehensive and integrated, including inpatient, outpatient,

behavioral health, substance use disorder, LTSS, pharmacy, hearing, vision, laboratory, therapy, DME, home health, assistive care, transportation and hospice services.

Number of members currently served: As of September 30, 2015, 'Ohana served approximately 48,000 Medicaid and CHIP members.

'Ohana is a fully capitated plan operating on a statewide basis. The plan is responsible for providing for the direction, coordination, monitoring and tracking of the medical, behavioral health, and LTSS services needed by its members. Many 'Ohana members receive home and community-based services to help support their independence. In addition, 'Ohana coordinates additional behavioral health services for Medicaid-eligible adults who have a severe mental illness (SMI) or severe and persistent mental illness (SPMI) under the CCS Contract. In particular, the following aspects of our experience in Hawaii will be valuable in serving our Heritage Health members:

- We serve a particularly diverse population
- We provide integrated medical and behavioral health services
- We provide services to aged, blind and disabled members
- Our members live in a mix of urban and rural settings

d) ***Customer name and contact information:*** Jon Fujii, Research Officer, Temporary Assignment, Health Care Services Branch Administrator, Department of Human Services, Med-QUEST Division, (808) 692-8093 (phone), (808) 692-8087 (fax), jfujii@ medicaid.dhs.state.hi.us (email)

e) ***Whether work performed as the prime Contractor or as a Sub-Contractor:*** 'Ohana is contracted with DHS as a prime Contractor.

Originally scheduled and actual completion date: As noted above, 'Ohana's current QUEST Integration Contract is scheduled to expire December 31, 2021 (if extended for all additional terms) and its CCS Contract is scheduled to expire June 30, 2018 (if extended for all additional terms).

Originally scheduled and actual budget: 'Ohana is paid a monthly capitation rate for the members enrolled in its plan, so there is no budget for this project in the traditional sense.

- For calendar year 2014, 'Ohana projected Medicaid and CHIP premiums in an amount of $514,829,000; actual (reported) premiums for this period were $513,596,844
- For the period of January 1, 2015, through September 30, 2015, 'Ohana projected Medicaid and CHIP premiums in an amount of $407,396,000; actual (reported) premiums for this period were $378,580,380

Kentucky

a) ***Time period:*** WellCare Health Insurance Company of Kentucky, Inc. d/b/a WellCare of Kentucky, Inc. has served the Kentucky Medicaid program under successive contracts since 2011.

b) ***Scheduled and actual completion dates:*** WellCare of Kentucky's current contract with the Commonwealth of Kentucky, Cabinet for Health and Family Services, Division of Medicaid Services (DMS) expires on June 30, 2016. The contract may be renewed for up to four additional one-year periods upon the mutual agreement of the parties. For a potential term through June 30, 2020.

c) ***Contractor's responsibilities:***

Populations currently served: TANF, CHIP, ABD, foster children, duals

Benefits currently covered: Comprehensive and integrated, including inpatient, outpatient, behavioral health, substance use disorder, pharmacy, dental, hearing, vision, laboratory, therapy, DME, home health, transportation and hospice services.

Number of members currently served: As of September 30, 2015, WellCare of Kentucky served

approximately 436,000 Medicaid and CHIP members.

WellCare of Kentucky is a fully capitated plan operating on a statewide basis. The plan is responsible for providing covered services in an amount, duration, and scope that is no less than the amount, duration, and scope furnished Medicaid recipients under Kentucky's fee-for-service program. In particular, the following aspects of our experience in Kentucky will be valuable in serving our Heritage Health members:

- We serve a particularly diverse population
- We provide integrated medical and behavioral health services
- We provide services to aged, blind and disabled members
- Our members live in a mix of urban and rural settings

d) ***Customer name and contact information:*** Don Speer, Executive Director, Kentucky Finance and Administration Cabinet, Office of Procurement Services, (502) 564-4510 (phone), (502) 564-1434 (fax), don.speer@ky.gov (email)

e) ***Whether work performed as the prime Contractor or as a Sub-Contractor:*** WellCare of Kentucky is contracted with DMS as a prime Contractor.

Originally scheduled and actual completion date: As noted above, the current contract between WellCare of Kentucky and DMS is scheduled to expire June 30, 2020 (if extended for all additional terms).

Originally scheduled and actual budget: WellCare of Kentucky is paid a monthly capitation rate for the members enrolled in its plan, so there is no budget for this project in the traditional sense.

- For calendar year 2014, , WellCare of Kentucky projected Medicaid and CHIP premiums in an amount of $1,726,528,000; actual (reported) premiums for this period were $2,290,331,769
- For the period of January 1, 2015, through September 30, 2015, WellCare of Kentucky projected Medicaid and CHIP premiums in an amount of $1,860,179,000; actual (reported) premiums for this period were $1,948,652,725

Other States

In addition to the above, WellCare plans currently serve Medicaid managed care members in the following states:

- Georgia (since 2006)
- Illinois (since prior to the plan's acquisition by WellCare in 2004)
- Missouri (since prior to the plan's acquisition by WellCare in 2013)
- New Jersey (since 2014)
- New York (since prior to the plan's acquisition by WellCare in 2002)
- South Carolina (since prior to the plan's acquisition by WellCare in 2013)

CORPORATE OVERVIEW

I. SUMMARY OF BIDDER'S PROPOSED PERSONNEL/MANAGEMENT APPROACH

The bidder must present a detailed description of its proposed approach to the management of the project.

The bidder must identify the specific professionals who will work on the State's project if their company is awarded the contract resulting from this Request for Proposal. The names and titles of the team proposed for assignment to the State project shall be identified in full, with a description of the team leadership, interface and support functions, and reporting relationships. The primary work assigned to each person should also be identified.

The bidder shall provide resumes for all personnel proposed by the bidder to work on the project. The State will consider the resumes as a key indicator of the bidder's understanding of the skill mixes required to carry out the requirements of the Request for Proposal in addition to assessing the experience of specific individuals.

Resumes must not be longer than three (3) pages. Resumes shall include, at a minimum, academic background and degrees, professional certifications, understanding of the process, and a minimum of three (3) references (name, address, and telephone number) who can attest to the competence and skill level of the individual. Any changes in proposed personnel shall only be implemented after written approval from the State.

WellCare has developed an approach to managing the Heritage Health project that is centered on building a local fully integrated team while leveraging the decades of experience and solid expertise of the WellCare family of health plans through a corporate "shared services" structure. This two-pronged approach allows us an opportunity to leverage a robust pool of intellectual capital comprised of both instrumental local knowledge as well as national expertise.

As part of our process, we have identified key personnel to work on the project as we build up our local leadership team. These leaders have a broad depth of experience working with state Medicaid programs and implementing new plans, with a particular emphasis on an integrated approach to best meet the physical, behavioral, pharmacy and social needs of our members.

When we enter a new state, we consider a three-phased approach to managing the project:

- Strategy Development
- Implementation
- Continuing Operations.

We set up our processes to seamlessly move through phases and ensure institutional knowledge about the program is catalogued and passed from phase to phase.

Phase one, Strategy Development, begins even before an award is made. We value having identified people in a state who can help us determine the right strategies for the people of that state. In Nebraska, we have engaged consultants from the advocacy and provider communities to assist us, and we have dedicated WellCare staff members who have visited the state for more than year leading up to this procurement. This includes staff members experienced in integrated programs and in behavioral health specifically, as well as staff members engaged with our Health*Connections* and community advocacy program. The Strategy Development phase allows us to begin building important relationships and our core local knowledge base so that we can seamlessly and easily move into the Implementation phase. As described in greater detail below, during the implementation phase, our identified leadership will be supported by a robust set of rigorous standards for project governance and a team of project management professionals who are well versed in working with state Medicaid programs to bring up new plans through readiness and launch. Once we go live, we transition from implementation to ongoing operations

with a built-in "Rapid Response" structure in the early months to mitigate any challenges that arise when new populations or provider types come into managed care, particularly from traditional fee-for-service Medicaid.

Once fully into the continuing operations phase, the local WellCare of Nebraska leadership and staff will own the project with ongoing support from corporate operational functions and WellCare leadership.

From Implementation to Continuing Operations: WellCare's Approach to Project Management

WellCare values the process by which we must demonstrate to Nebraska's MLTC that we are ready to assume responsibility for contracted services. As part of implementation and readiness review process, we will maintain a detailed implementation plan with the understanding that it is subject to MLTC approval. This plan, already in development will detail tasks, staff responsibilities, timelines, milestones, contingencies and other processes which will ensure that contracted services begin at the agreed upon date. With our experience in other states, WellCare has developed a best-practices approach to project governance detailed below.

WellCare's Project Governance Team

The WellCare Corporate Enterprise Project Management Office (ePMO) "Market Initiatives Team" manages the implementation of State and Federal contracts for all markets and products. Our team is well-versed in standard Software Development Lifecycle (SDLC) waterfall and Agile planning and development methodologies. Our professional project managers leverage ePMO-developed, best-practice "Playbooks" that reflect years of industry experience and lessons learned across numerous contract implementations.

The ePMO works hand-in-hand with Market leaders, Government partners, other corporate business functions and SMEs, corporate IT, and ancillary vendors to ensure a compliant, operationally-sound Medicaid implementation that seamlessly transitions new members and providers into our health plan. The individuals staffed on the project are highly experienced and more specifically have worked previously implementing new programs including the introduction and/or expansion of Medicaid managed care in Kentucky, Georgia, Florida and New York.

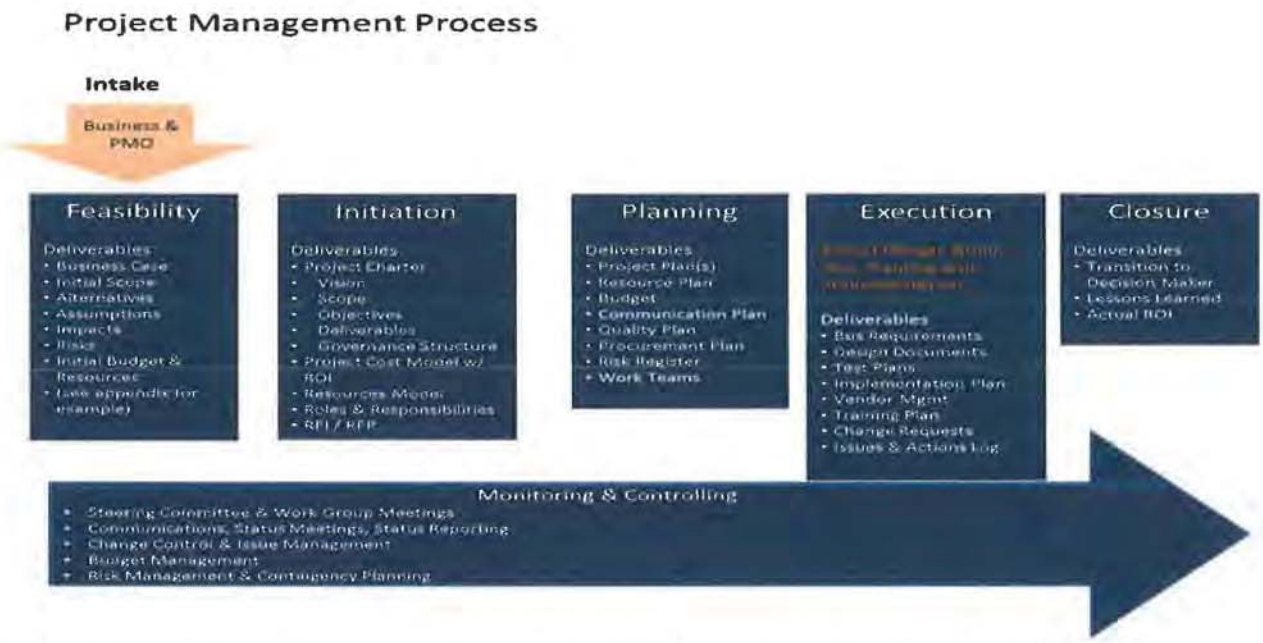
Project Governance Responsibilities

The ePMO's involvement begins early with the selection of a Senior Project Manager (PM) who monitors the RFP process and determines impacts to "People, Processes and Technology" associated with the requirements of the contract based on the RFP. The PM develops a high-level business requirements tool that documents any significant impacts, particularly those involving systems and technology. The PM then develops a high-level implementation plan that identifies tasks, milestones, and resource requirements.

To ensure we meet the specifications of the RFP and Scope of Work we incorporate a series of best practices, including the use of eleven cross-functional project work streams and underlying project teams that will manage end-to-end implementation activities. The eleven project streams include: contract to payment (claims), network development, enrolling a member (member services), member and provider communications, care coordination (includes grievance and appeals), quality and analytics (quality and utilization management), finance, training, regulatory compliance, information technology, and readiness delivery (transition and implementation).

We have already appointed governance team members to the various streams who will be responsible for all Nebraska implementation deliverables. The governance team will oversee the timely completion of activities on the implementation plan, ensure cross-team communication, identify issues, and provide weekly project status reports to our executive leadership team, to whom they are accountable. Once WellCare submits the RFP to the State, the PM launches the formal ePMO Project Management Process illustrated in **Figure 3.**

Figure 3



In the earliest stages of the project, the PM develops a high-level scope document, "MS Project" work plan, resource plan, organizational chart, budget, and risk document. The PM introduces these artifacts with the broader team at the Project Kick Off meeting, and continually refines them as the project progresses into later stages. The process is underscored by a cadence of regularly scheduled internal Steering Committee, Work Group, Status, Issue/Risk, and Change Control meetings to ensure effective communication, timely project delivery, issue resolution, scope control, and escalation to appropriate parties when necessary. The ePMO will also supply weekly status reports in a MLTC-approved format, including updates to the work plan and timeline, and participate in weekly status meetings with MLTC.

Following the implementation, we will provide ongoing management and oversight with unmatched rigor. In new market implementations such as this one, we have found it especially beneficial to supplement traditional operations oversight and the necessary reporting and analytics with ongoing and candid external stakeholder discussions. In addition, rigorous annual evaluations that go beyond traditional, obligatory utilization and quality management program evaluations provide us with even more actionable information. We will complete a comprehensive assessment of our compliance with the RFP and Scope of Work, which will include a detailed analysis of process and outcomes metrics. To supplement this internal review, our corporate compliance and audit teams will conduct independent and objective assessments of plan compliance and will establish, monitor and report on any associated corrective action. This rigor and discipline will ensure that we are meeting the state's expectations and those areas where we can improve will be identified and corrected quickly.

Deploying Highly-Qualified, Passionate Staff to Deliver the Nebraska DHHS, Division of Medicaid and Long-Term Care Program

Building and deploying the right staffing model is critical to our ability to meet the operational requirements of the Heritage Health program and deliver on its unique goals and objectives. Our analysis of the RFP and Scope of Work, coupled with the insights gleaned from our statewide campaign, has informed our organizational design and staffing model. Our plan features a large Nebraska-based operation that will be supplemented with corporately-supplied resources. This plan will be fully implemented upon contract award. As we build toward go-live, we will supplement the implementation team with additional resources, consistent with our hiring/staffing plan outlined. For example, we will

deploy resources to Nebraska to begin staff recruitment and hiring efforts while working closely with MLTC to secure necessary approvals for key staff hires. This deployment of incremental resources is a best practice identified during previous implementations and will ensure our ability to meet implementation timelines and expectations. As described in the plan, we expect to be fully staffed well before go-live. **Figure 4** provides an overview of the team that will lead the implementation of the State of Nebraska contract. It summaries their respective primary work assigned and reporting relationships.

Figure 4

Team Leadership Title	Full Name	Primary Work Assigned	Reporting Relationship
Chief Executive Officer	Lauralie M. Rubel	Lauralie Rubel is currently a state president for WellCare and will serve as the interim leader for Nebraska. In this capacity, Ms. Rubel will provide overall direction and prioritization for the MCO; develop and execute leadership strategies, ensure contractual requirements are followed, provide operational oversight and implement integration models ensuring coordination with system partners.	Lauralie Rubel reports to Dave Reynolds, SVP, Regional President for the division that includes Nebraska
Chief Operating Officer	William Keena	Mr. Keena is Vice President of Integrated Solutions. He will serve in an interim capacity as COO for Nebraska until a local COO is appointed. In this role, Mr. Keena will manage day-to-day operations of WellCare's Nebraska-based departments and Staff.	William Keena reports directly to Mike Polen, our SVP of Operations.
Medical Director/Chief Medical Officer	Dr. James Howatt	Dr. Howatt will serve as Medical Director for Nebraska on an interim basis until a Nebraska-based Medical Director is appointed. In this capacity, he will develop, implement and interpret medical policies and procedures; administer the Nebraska medical management activities; participate at Quality meetings with MLTC and lead the UM, QA, Credentialing, Performance Improvement and Provider Advisory committees.	Dr. Howatt reports to Lauralie Rubel, our interim Nebraska CEO
Behavioral Health Clinical Director	Dr. Michael Orlosky	Dr. Orlosky is WellCare's Vice President of Behavioral Health, and will serve as Nebraska's Behavioral Health Clinical Director until a local incumbent is identified. In this capacity, he will be responsible for all behavioral health activities within Nebraska,	Dr. Orlosky reports to Michael Radu, SVP Clinical Operations and Business Development.

Team Leadership Title	Full Name	Primary Work Assigned	Reporting Relationship
Member Services Manager	Paul Hineman	Paul Hineman is VP Channel Communications for WellCare and will serve as Nebraska's interim Member Services Manager until a local incumbent is identified. In this capacity he will be responsible for coordinating communications between WellCare Nebraska and its members, and ensuring there are ample member services representatives available to serve our members' robust needs.	Paul Hineman reports to Mike Polen, SVP Operations.
Provider Services Manager	Drew Hobby	Drew Hobby is VP Business Development. Mr. Hobby's previous role at WellCare was VP Field Network Management. He will serve as interim Provider Services Manager until a local incumbent is identified. In this capacity, he will coordinate communications between WellCare Nebraska and our subcontracted providers.	Drew Hobby reports to Troy Hildreth, VP Business Development Strategy. In his interim capacity, Drew will co-report to Lauralie Rubel, interim Nebraska CEO.
Information Management and Systems Director	Bob Klopotek	Bob Klopotek is VP Information Systems and will serve in an interim basis as Information Management & Systems Director for the Nebraska Market until a local incumbent is identified. In this capacity, he will oversee all of the information systems functions for the Nebraska Market	Bob Klopotek reports to Mike Polen, SVP Operations.
Quality Management Coordinator	Dr. Rich Petrucci	Dr. Rich Petrucci is VP Population Outcomes for WellCare, a function which has enterprise-wide responsibility for Quality. Dr. Petrucci will serve in an interim capacity as Quality Management Coordinator for Nebraska until a local incumbent is identified. In this role, he will be responsible for quality management and improvement for the Nebraska contract.	Dr. Petrucci reports to Michael Radu, SVP Clinical Operations and Business Development.
Case Management Administrator	Lelis Welch	Lelis (Marcia) Welch is VP Clinical Services for WellCare. She will serve in an interim capacity as Case Management Administrator for Nebraska until a local incumbent is identified and will, in this capacity, oversee case management functions for the market. Nielsen, Oldsmar, FL

Vice President, Florida Operations Leader (2011)

Senior Vice President, US Call Center Operations (2012 – 2015)

- Accountable for the strategic direction of four US based Market Research call centers and two third party vendors internationally consisting of 2,200 part time and full time associates supporting Operations, Training, Quality and Work Force Management departments. Leveraged predictive dialers to initiate over 100MM dials and completed over 6MM surveys and recruitment calls annually.
- Led initial integration for 1.3B Arbitron acquisition representing the Data Acquisition department which consisted of both field and call centers totaling 1,000 impacted employees. Process required consistent collaboration with key business owners and stakeholders including frequent engagement with the COO.
- Integrated six Call Centers and three Lines of Business due to a large acquisition late 2013
- Budgetary savings as a result of the integrations and subsequent consolidation in excess of 15% or 8MM through first 18 months primary through site consolidation and labor efficiencies.
- Led integration efforts on new CATI and Dialer solutions for improved quality and efficiency through improvements in contacts, dialing efficiency and agent usability.

WellCare Health Plans, Inc., Tampa, FL

Vice President, Customer Service Operations (2009 – 2011)

- Provided the strategic direction of internal and external customer service groups that supported multiple products under the Medicare and Medicaid lines of business. Ensured Training, Quality, Productivity, and Compliance standards were met through effective communication, training, and planning.
- Led Customer Service process improvement initiatives focused on new member enrollment and intake activities.
- Drove efforts to enhance the Member's experience at our two Philippines sites through improved on line help tools, training enhancements and use of analytics from 3rd party quality vendor.
- Provided direction to consolidate site locations for Medicare product lines with increased concentration at near shore site in the Dominican Republic with savings of 20%+ for this LOB.
- Coordinated the launch of the customer service function for the newest market, Hawaii.

Senior Director, Customer Service Operations (2008 – 2009)

- Provided strategic direction of external customer service groups that supports multiple product lines under the Medicare line of business.
- Led efforts to enhance and promote usage of an external website for self-service functionality for both Providers and Members with increases over 150% in under 12 months.
- Established process improvement initiatives for call center functions derived from analysis on first call resolution and a third party customer satisfaction survey process.
- Provided support to launch two vendors sites in the Philippines in efforts to reduce costs by as much as 40% for two Medicare product lines.
- Contracted with 3rd party Quality vendor to provide independent quality review to provide analytics on compliance and quality standards.
- Achieved recertification for call center excellence from JD Power in 2008.

Director, Customer Service (2005 – 2008)

- Led the coordination and set up of the customer service function for the new national Medicare Part D product, Prescription Drug Plan, responsible for generating over one billion in revenue by 2008. Successfully managed the launch of five call centers to support this product in under 90 days.
- Established vendor contracts, telecom and IT set up, product training, policies and procedures, and support team for call centers in less than 90 days.
- Achieved 15% reduction in 25MM call center budget over the first 8 months of 2006.
- Improved productivity in the call centers through the implementation of a new User Interface for the call center staff that reduced Average Handle Time by 32% over seven months.
- Implemented a post-call satisfaction survey and maintained 82%+ satisfaction rates since launch of the product.
- Managed numerous on-going and proactive outbound call campaigns to improve customer satisfaction and retention.
- Provided strategic direction and oversight for the customer service function for both Medicare and Medicaid product lines within an internal and outsourced environment.
- Achieved JD Power certification for call center excellence in 2007.

DREW HOBBY

Career History

WellCare Health Plans, Inc. Tampa, FL

Vice President, Business Development (April 2015 – Present)

Vice President, Field Network Management (March 2014 – April 2015)

- Lead organization responsible for hospital contracting, physician contracting, risk provider contracting, provider relations, behavioral health and provider solutions across the state of Florida.
- Responsible for development and execution of organization's network contracting and management strategy.
- Partner with internal resources to analyze cost data, medical trends, and quality results to deliver network that meets strategic priorities of market.
- Provide strategic negotiation assistance to team specifically around rate evaluation and contractual language. Constantly monitor regulatory landscape, proactively evaluate contractual feasibility, and partner with other departments (legal, government affairs, configuration, finance, and legal) to ensure ability to implement accordingly.

Senior Director, Product Operations – Florida Healthy Kids (January 2012 – March 2014)

- Responsible for P&L ownership of WellCare's Florida Healthy Kids (SCHIP) product.
- Led the program design, RFP response, and negotiations of statewide RFP.
- Obtained largest award and successfully expanded county footprint from 18 to 65 (out of 67) counties.
- Expanded top line revenue by over 30% in year one.
- Led the successful implementation of a large scale roll-out across 48 counties with varying degrees of experience with managed care.
- Led WellCare of Florida's Exchange offering including network build and other strategic product offering components.

Senior Director, Medicaid Expansion (April 2011 – January 2012)

- Identified, pursued, and won new Medicaid business for the organization
- Worked with existing market leaders or business development team to understand local regulator's Medicaid program needs, design WellCare's response, and help lead response to RFI/RFP requests

KPMG, LLP

Senior Manager/Director, Advisory (March 2003 – March 2006; August 2007 - March 2011)

- Service Line Leadership – Led the "North Florida" service line (Tampa, Orlando, and Jacksonville) for Information Risk Management within external audit clients. Led team responsible for managing over 500 engagements per year
- Revenue Generation and Management – Responsible for selling advisory services (through new client generation, revenue expansion, and new service offerings) throughout Tampa/Orlando/Jacksonville, the Southeast, and HealthCare and Technology companies across the United States
- Engagement Management – Responsible for managing multi-million dollar engagements at 15 to 20 clients per year. Ultimate engagement management responsibility including delivery of contracted services, ensuring client satisfaction, execution within approved budgets, and project quality
- Industry Focus – Primary focus within the healthcare (providers and payors) and technology (software, hardware, IT services, technology distribution, and IT staffing augmentation) industries

WellCare Health Plans, Tampa, FL

Finance Corporate Development Manager (March 2006 – July 2007)

- Served as finance corporate development manager for one of the leading providers of government sponsored health plans. Responsible for the successful delivery of strategic and cross-functional projects in role as lead project manager on strategic projects for Chief Financial Officer.

JDH Consulting

Independent Consultant (November 2001 – February 2003)

- Provided customer service consulting services to Fortune 1000 companies. Scope of engagements included review of insourcing/outsourcing model, operating model re-design, and process improvement opportunities within call center arena. Re-designed call script process for leading handheld technology company that resulted in multi-million dollar savings (annualized).

Intel Corporation

Business Analyst (June 2000 – October 2001)

- Performed analysis of Intel's financial processes as well as the computer systems used to support accounting and finance functions. Responsible for the review of business requirements and the configuration of systems around respective processes. Conduit between programmer analysts and management in the design and day-to-day operations of financial software and systems.

ROBERT D. KLOPOTEK

Career History

WellCare Health Plans, Inc., Tampa, FL

Vice President, Information Systems (October 2005 – Present)

- Initial accountability (and successful launch) for all IT aspects of WellCare's national PDP plan, providing solutions for both internal and government partner challenges.
- Assumed responsibility for stabilizing Medicaid enrollment processes for 3 new, large Medicaid plans.
- Successfully led the design, development, and implementation of enterprise-wide Enrollment intake and Correspondence Tracking capabilities supporting both Medicaid and Medicare.
- Corporate Accountability for conducting Regulatory Steering Committee to ensure timely and accurate transition of regulatory changes to system solutions. Includes oversight and delivery for associated projects, ranging from annual AEP and CMS releases to Medicaid Reporting and NPI deployment.
- Assumed responsibility for a large collection of home-grown, surround applications in Delphi. Reduced operating costs and improved productivity by documenting requirements, retiring several applications by eliminating redundancy, and migrating to C#/Oracle during major system upgrade.
- Accountable for all aspects of Core Platform application support. Accomplishments include stabilizing platform and eliminating outages, successfully completing two major upgrades during 3-day weekends without business disruption, and successfully negotiating long-term vendor contract that provides dedicated vendor staff and long-term platform stability at a very affordable cost per member.
- Responsible for primary interactions with operational and product development business units. Approach became the model for the corporate IT Single Point of Contact (SPOC) process.
- Assumed responsibility for operations area and transformed the focus "from IT Operations to Production Control". Includes negotiation, monitoring, and delivery of business-meaningful SLAs as well as 24x7 monitoring of business operations and functions, with playbooks and escalation procedures to ensure effective business outcomes.
- Continually maintain focus on recruitment and staffing activities, placing emphasis on balanced, honest feedback that provides actionable improvement and growth information, a recruitment process that brings in only quality additions, and continuous knowledge transition. Demonstrated through 5 years as IT instructor for internal "Essentials of Managed Care" program, serving as advisor to USF Graduate Student program (2012) student project, and high annual Associate Opinion Survey scores.
- Transitioned to accountability as Chief Architect of WellCare (2014), accountable for Enterprise Architecture and management of Solution Architects to ensure development of robust, scalable applications in support of our government partners.

Amisys Synertech, Inc., Harrisburg, PA

Vice President, Product Engineering (ASI) (October 2003 – October 2005)

- Reporting to CTO, responsible for activities of all software development staff of >70 FTEs and contractors. Primary activities were the successful development and support, in an ASP arrangement, of CDH solutions for 3 early entrants (Lumenos, Definity, HMI) in a 6 month period as well as the migration of the AMISYS application from proprietary HP 3000 to Java/Oracle platform. Both solutions continue to be utilized and generate revenue.
- Continued maintenance and support for all ASP products and solutions, including "HSII", "QMACS", "Pathways Managed Care" platforms and application code.
- Technology platforms supported included MUMPS, Visual Basic/.Net and SQL Server, C++ and Sybase, COBOL and Turbo Image (HP3000), Java/J2EE and Oracle, and web technologies such as JSP, HTML, and Struts Framework.
- Led development and implementation of process improvement and BPM solutions utilizing Microsoft BizTalk to improve claims processing productivity and reduce operational costs.

Chief Information Officer (March 2001 – October 2003)

- Successfully provided and managed all infrastructure and IT components of ASP business operations, running multiple server platforms and operating systems (Compaq Proliant/Windows and HP/HP-UX; also Linux, Sun/Solaris, and HP 3000). Exceeded contractual 99.5% availability standards with actual average of >99.9%.
- Accountable for budget, availability, vendor selection and management functions of delivering seamless implementation and support for all infrastructure components, ranging from network and telecom (internal network, dial up, frame relay, and wireless internet), connectivity (including Citrix and VPN), security (Intrusion Detection, Firewalls, Virus scanning) and data center facilities.
- Led and managed 24x7x365 operations area responsible for tens-of-thousands of weekly job process and file transmission activities. Implemented and met business-driven SLAs for these operations.
- Responsible for all Business Process Outsourcing and Software Development Functions in Pick/Unidata, MUMPS, Oracle and SQL Server along with Lotus Domino, Sybase, and Turbo Image.
- Responsible for IT Policy and Governance including topics such as IT Security and Password, HIPAA, and Change Management policies and leadership and oversight of Corporate Technology Committee.
- Accountable for development, annual testing, and revision of Data Center recovery plan, demonstrating the ability to meet the contractually-obligated 72 hour recovery time objective.
- Led service desk area for >1000 internal users and >2000 external users supporting all application and infrastructure services, managing to aggressive response time and resolution SLAs.

Director, Managed Care Software Development (1996-2001)

- Oversight of software development and maintenance for flagship software offerings. Accountable for budget and delivery obligations of >50 FTEs and contractors supporting

multiple software solutions ("HSII", "QMACS", and "Tingley) and corresponding custom software on multiple technology platforms (including MUMPS, Visual Basic/.Net and SQL Server, Java and Oracle).
- Successfully led the development and implementation of Medicare Part C solutions for new and existing clients in 9 months, including all CMS transactions and formats.
- Supported the Advanced Systems group charged with migrating MUMPS application and code generation tools to object-oriented, Java-based solution.
- Successfully developed and executed skills transition plan of MUMPS and Pick developers to newer technologies, including VB, SQL Server, and object-oriented approaches.

MARCIA LELIS WELCH, RN, BSN, CCM

Career History

WellCare Health Plans, Inc., Tampa, FL

Vice President, Clinical Services (April 2014 – Present)

- Directs the plan's health services function which may include pre-authorization, concurrent review, complex case management, quality improvement, credentialing, health and wellness and disease management.
- Oversight of the overall coordination, implementation and monitoring of activities to yield quality driven, compliant, efficient and cost-effective results.

Aetna/CoventryCares of Kentucky, Louisville, KY

Vice President, Health Services (August 2012 – April 2014)

- Direct report to the Chief Medical Officer to meet targets for inpatient bed days, meeting Medical Loss Ratio targets and increasing quality of care for members, developing and adhering to the budget for the Health Services Department and oversight of the corporate case management programs, and for developing programs specific to the needs of the Kentucky population.

Select Health of South Carolina, Charleston, SC

Regional Clinical Lead for the Southern Region (February 2012 – August 2012)

- The parent company, AmeriHealth Mercy, expanded into additional states creating the need to expand the scope of the then current clinical lead position in South Carolina. Responsible for oversight and development of the Utilization Management, Case Management, Maternal Child Case Management, Rapid Response Unit and the Appeals Department for all 3 states, including developing the budget for all three states. A total of 380,000 Medicaid/SCHIP members were managed between the plans.

Senior Director, Medical Services (September 2008 – February 2012)

- Responsible for designing and implementing policies and procedures for our UM, CM and DM departments, which contributed to their obtaining their initial NCQA accreditation, budgetary oversight, monitoring of under and over utilization and development of productivity standards. Areas of responsibility included Case Management, Disease Management, Maternal Child Case Management, Utilization Management, Provider Appeals and Delegated Onsite activities for external vendors for Behavioral Health and High Tech Imaging for a 170,000 member Medicaid Program, in addition to managing the new SCHIP membership in South Carolina.

Health Integrated, Tampa, Florida

Senior Director, Behavioral Health Utilization Management and Case Management (January 2008 - June 2008)

- Areas of responsibility included Behavioral Health Utilization Management and Case Management for a combination of Commercial, Medicaid and Medicare Advantage members.

BlueCross BlueShield of Tennessee, Chattanooga, TN

Director/Senior Manager for Medical Management (October 2006 – November 2007)

- Responsible for the continued development of the Medicaid (BlueCare) line of business for 600,000 members; development of the Medical Management platform for the newly assigned SCHIP members; and the development of two commercial products to offer to Tennessee's low-income uninsured and the uninsurable populations (Cover Tennessee).

- Senior Managers and Managers over Utilization Management, Disease Management, Case Management, Care Coordination, Member Outreach, Member Appeals, Provider Appeals, Retrospective and Pre-existing Reviews, Systems and Education, and the Senior Manager who coordinated Behavioral Health Services with the State's Behavioral Health Organization reported to this position. Responsible for developing the budgets for all 4 lines of business for the Medical Management areas.

Senior Manager, Commercial Medical Management Division (2005 – 2006)

- Responsible for oversight and continued development of the Utilization Management, Case Management, Catastrophic Case Management, Care Coordination, Transplant Case Management, High Risk OB Case Management areas, including managing the Federal Employees (FEP) medical management department, for a total of 1.6 million lives. Responsible for the budget for this department's Medical Management Division and meeting medical management targets.

- Three highlights during this period were our department's development of a DVT prevention program, an end-stage support program (HOPE), which focused on Hospice, Oncology, Palliative Care and End State Disease, and participation in the design, development and implementation of Custom Care Solutions, a programmed designed to meet the needs of one of our large municipal accounts with high cost members to reward members for participation in the case management program, with a focus on referring members to best-practice practitioners.

Senior Manager, Medical Management (1999-2005)

- During this period all of the medical management departments at BlueCross Blue Shield of Tennessee were combined into one department, with management being divided into East

and West. This position was responsible for providing direction and management for the eastern part of Tennessee, which included Commercial and Medicaid lines of business. In addition, the Eastern Division managed Security Blue, an HMO Medicare Product which was just available to members residing in one geographical section of the eastern part of the state. 1.4 million lives were managed for the eastern part of the state.

Manager, Clinical Services, Medicaid Division (1997 – 1999)

- Manager for all of the medical management staff who worked in the areas of Utilization Management, Case Management, Provider Appeals, Member Outreach, and Demand Management (our internal 24/7 Nurse Line) for a membership of 600,000. During 1996/1997 the Case Management and Demand Management departments were created for the Medicaid population. The Utilization Management function for Medicaid was transitioned from the Commercial side.

CORPORATE OVERVIEW

J. SUB-CONTRACTORS

If the bidder intends to Sub-Contract any part of its performance hereunder, the bidder must provide:

vi. name, address, and telephone number of the Subcontractor(s);

vii. specific tasks for each Subcontractor(s);

viii. percentage of performance hours intended for each Subcontract; and

ix. total percentage of Subcontractor(s) performance hours.

Subcontractors: Our Experience Driving Their Performance

To complement our internal capabilities, WellCare contracts with best-in-class service providers to offer the most advanced and effective services for our members and providers. We see our business relationship with subcontractors as one element of our long-term business strategy. We carefully select and monitor subcontractors who can provide outstanding service to our members and our organization as a whole. Each market drives the decision regarding which subcontractors are selected and in what capacity they are to be used. The subcontractors selected to work on our Heritage Health Plan will reflect the skills needed to execute on the MLTC's respective goals for its Medicaid program.

Figure 5 is a list of key subcontractors we propose to use to serve Nebraska's Heritage Health members and providers. The table below details demographic information for each proposed subcontractor along with an estimation of the percent of our time the subcontractor will spend engaged in activities to support Heritage Health members.

Figure 5

TECHNICAL APPROACH

TECHNICAL APPROACH

A. Understanding of the project requirements (limited to three pages)

WELLCARE, HERITAGE HEALTH ARE A PERFECT FIT: UNDERSTANDING PROJECT REQUIREMENTS

WellCare of Nebraska, Inc., a subsidiary of WellCare Health Plans, Inc. has spent more than a year meeting with Nebraska Medicaid members, providers, advocates and stakeholders to fully assess the needs and opportunities of the state's Medicaid program. We have engaged staff members from every functional area of our enterprise and studied closely the requirements for the provision of full-risk, capitated Medicaid managed care for physical health, behavioral health, and pharmacy services provided to members of the Nebraska Heritage Health program. We fully understand and accept the requirements outlined in the Project Description and Scope of Work of this RFP, as well as each of the attachments, including the financial guidelines and rates. Additionally, we are well versed in federal regulations governing Medicaid managed care programs, as well as state laws, the Nebraska State Plan Amendment, waivers and other regulations governing the Heritage Health program.

Through our deep understanding of the project requirements, our understanding of the specific and unique needs of Nebraska Medicaid members and the system that serves them, as well as the goals of the Division of Medicaid and Long Term Services (MLTC), we believe there is no company better positioned to serve Nebraska's Heritage Health members than WellCare of Nebraska.

WellCare specializes exclusively in serving members of government-sponsored health care programs, including Medicaid, Children's Health Insurance Programs (CHIP), Medicare Advantage, Prescription Drug Plans and the Health Insurance Marketplace. As such, we are one of the largest providers of Medicaid managed care services in the country and have an infrastructure that today serves about 3.8 million people across all lines of business and provides solid experience for every aspect of this project. As Nebraska continues to take bold steps to modernize its Medicaid program, ***WellCare's focused approach aligns perfectly with MLTC's goals of improving health outcomes, enhancing integration, emphasizing person-centered care, reducing the rate of costly and avoidable care and improving the financial sustainability of the system.***

WellCare Health Plans' Experience with Medicaid Modernization Efforts

WellCare has helped transform Medicaid service delivery models in some of the country's largest and most complex states, including Kentucky, Georgia, Florida, and Hawaii. We currently support 53 separate Medicaid, LTSS, and related products in nine states. We proudly provide person-centered managed care services to 2.4 million Medicaid members across the full spectrum of eligibility groups including, but not limited to the aged, blind and disabled (ABD), home and community based services (HCBS) waiver, Foster Care, Children's Health Insurance Programs (CHIP), Temporary Assistance to Needy Families (TANF), supplemental security income (SSI), and long-term services and supports (LTSS) populations.

As an organization dedicated solely to improving the health and lives of members enrolled in government programs, WellCare's technical expertise in product development, administrative processing, network development, member and provider services, care management, quality, and information technology systems and infrastructure is focused on providing precisely the types of services sought for Nebraska.

Applying WellCare's unique brand of Medicaid managed care to Nebraska

Based on our experience with Medicaid and, more importantly, Medicaid modernization efforts, we understand the importance of having intimate knowledge of prospective members' needs along with a deep understanding and appreciation for the unique attributes and challenges inherent to each individual state in which we operate. Since 2014, we have made it a priority to understand the Heritage Health populations. Our team of business development and outreach staff has canvassed the state for months,

meeting with local community stakeholders across the state including Scottsbluff, the tri-cities area, Omaha, Lincoln and the Northeast region of the state. A sampling of these engagements included:

- Provider organizations including the Nebraska Hospital Association, the Nebraska Medical Association, Leading Age of Nebraska, Nebraska Health Care Association, Nebraska Association of Behavioral Health Organizations, Nebraska Pharmacists Association, Health Center Association of Nebraska, National Association of Social Workers (Nebraska Chapter)
- Tribal clinics including those with the Santee Sioux, Winnebago, Omaha and Ponca Nations
- Individual providers including Boys Town, Children's Hospital and Medical Center, University of Nebraska, SERPA ACO, Nemaha County Hospital and Centerpointe, among others.
- FQHCs including People's Health, Charles Drew, Heartland Health Center and OneWorld
- Social Service Agencies and Advocates like Community Action Agencies, AARP, the ARC of Nebraska, Sienna Francis House, Salvation Army, Clyde Malone Community Center, Child Advocacy Center, Salvation Army, Together, Inc. various food banks and several more.
- Government programs including various individuals with regional public health agencies and regional behavioral health authorities

Additionally, we held multiple focus groups with Medicaid members including ABD members and moms of children in the TANF/CHIP programs from both urban and rural communities.

These interactions provided invaluable insight that shaped our understanding of the requirements for this project to be successful and informed our strategy for Nebraska. A sampling of what we heard includes:

- There is a strong appetite for integration and collaboration between behavioral and physical health
- Providers seek additional support from Medicaid managed care to be innovative, co-locate, enhance their participation in value-based purchasing programs, engage in telehealth and adoption of electronic health records
- The system is ripe for increased data exchange and the use of data and evidence-based decision support tools to drive performance improvement and better health outcomes
- Rural and frontier communities continue to face challenges with access to services
- Foster Care children need focused support to address their continuum of care
- There is opportunity to expand access to evidence-based and recovery-focused services, particularly for children with Serious Emotional Disturbance
- Members need support in navigating through unique social determinants of health such as housing instability, transportation and food insecurity
- Members want simple, culturally competent information that eases their efforts navigating an often complex and sometimes difficult to access health care system

WellCare of Nebraska has developed our comprehensive Heritage Health strategy aimed at addressing the requirements of the project along with what we learned from our stakeholder engagement. Some key elements of that strategy, which is detailed in the accompanying pages of this proposal, are:

- Locally-based and locally-governed
  - We will locate Welcome Rooms with local staff in Scottsbluff, Omaha, Kearney and Norfolk in addition to our main office in Lincoln.
  - Key staff operating within Nebraska and supported by additional required staff in-state will have accountability to design program and make decisions that are best for Nebraskans.
- Person-Centered
  - We will offer field-based in-home care management for members with the highest acuity levels including a specialized program for Foster Care Children.

- Our Care Model incorporates person-centered care planning, including social supports and social interactions planning, and Interdisciplinary Care Teams.

- Fully Integrated
  - WellCare offers a fully integrated program with behavioral and physical health under a single organizational structure. Our hybrid model for pharmacy also maximizes integration while leveraging best-in-class core operations infrastructure.
  - Our Medical Management Platform and Information Technology Solutions offer a comprehensive view of each member highlighting their entire care record and engagement history in one place.
- Responsive to members' psychosocial needs
  - WellCare's proprietary Health*Connections* model will offer Nebraska an industry-leading approach to connecting members to social safety net resources with our CommUnity Assistance Line, Navigator Database, Local Community Outreach specialists and HealthConnections Councils that work in local communities to identify needs.
- Quality focused
  - WellCare's network development plan is grounded in the ideas of offering members the highest quality care. We offer a Value-Based Purchasing program focused on improving quality.
  - We offer an array of data and decision support tools to measure individual and system performance and engage in a continuous cycle of improvement.
- Collaborative and Transparent
  - We believe in building collaborative relationships with our contracted providers, empowering them with actionable member specific and population health data, as well as a number of supports to help enhance operational effectiveness, and ultimately, improved health outcomes.
  - We include several opportunities for members, providers and stakeholders to engage with us including an array of formal and informal touch points, designated points of contact, committees and councils to ensure there is effective two-way communication.

DEPLOYING WELLCARE VALUES IN NEBRASKA: A NOTE ON UNDERSTANDING THIS PROJECT

Our company is driven by four values: Accountability, Integrity, Partnership and Teamwork. These values underpin everything we do as an organization and are supported at the highest levels of our executive and operational structure, including in developing this response.

- **Integrity:** We do what we say we're going to do. WellCare has adopted and industry leading process to certify to the contents of the documents submitted in connection with this proposal. This process spans several days and involves multiple layers of attestation with associates at the front-line, management and executive leadership levels signing off on the content and strategies proposed.
- **Accountability:** WellCare values the public trust and understands that when operating in the public space, transparency is a premium. To that end, we have elected to not redact any material within this proposal. We believe it's critical that stakeholders in the system have a complete view of what we have offered here and what we expect to be held accountable to should we be awarded a contract.
- **Partnership:** We didn't just create this proposal in a silo. We partnered with individuals in Nebraska – hiring local consultants and meeting with stakeholders from across the state over the past year to shape something that we could confidently believe matches the unique needs of Nebraska.
- **Teamwork:** Nearly 100 people across WellCare touched this proposal. We worked together to build strategies across functional areas that meet the needs of Nebraskans.

TECHNICAL APPROACH

1. If applicable, describe the MCO's proposed risk bearing partnerships/relationships including designated functions of each entity, and how delegated functions will be overseen. *(Page limit 2 pages)*

WELLCARE'S PROPOSED RISK BEARING PARTNERSHIPS

Currently, WellCare of Nebraska is not proposing any risk bearing partnerships or relationships as part of our strategy to manage care for Heritage Health members.

TECHNICAL APPROACH

2. Identify and describe any regulatory action or sanction, including both monetary and non-monetary sanctions imposed by any federal or state regulatory entity against the MCO's organization within the last five years. In addition, identify and describe any letter of deficiency issued, as well as any corrective actions required by any federal or state regulatory entity within the last five years that relate to Medicaid and CHIP contracts. Include the organization's parent company, affiliates, and subsidiaries in the response to this question.

REGULATORY ACTIONS, SANCTIONS, LETTERS OF DEFICIENCY AND CORRECTIVE ACTION PLANS

Overview

WellCare takes any regulatory action or sanction received seriously. Our Compliance team works with our local plan personnel and other operational groups as necessary to investigate the underlying circumstances and where a deficiency has occurred we perform a root cause analysis to help prevent recurrences. We have put in place numerous processes designed to ensure we comply not only with applicable laws and regulations but with our contractual commitments as well. These include:

- **Automated Tracking Systems**. We use a multi-faceted system that helps us both track our compliance with contractual requirements and administer our policies and procedures and internal action plans. With respect to contractual requirements, our automated system generates assessment requests and sends them to the applicable process owners to assess compliance with the requirements. The system then identifies gaps and tracks internal remediation plans. With respect to policies and procedures, the system provides a central searchable repository for all policies and procedures and tracks the date when each was last revised to ensure they are reviewed not less than annually. We also use another automated system to track reports submitted to regulatory agencies and other correspondence with regulatory agencies. This helps ensure all reports are submitted on a timely basis.
- **Audits and Monitoring**. WellCare has established an Internal Audit function whose mission is, in part, to help ensure WellCare and its associates comply with state, federal and regulatory requirements including applicable policies, standards, procedures, laws and regulations. Each year Internal Audit develops and executes a formal audit plan. The audits conducted by Internal Audit help to identify potential areas of non-compliance and opportunities for improvements in processes.
- **Compliance Hotline**. WellCare offers its officers, directors and associates multiple ways to report a compliance concern, including both a phone and web-based hotline. Reports made to the hotline may be made anonymously. The hotline is maintained by a third party, EthicsPoint, to help assure associates of their anonymity if they wish it. WellCare's policy of non-retaliation, included in its Code of Conduct and communicated through multiple channels, also helps to ensure associates and others are comfortable reporting any compliance concerns they may have.
- **Discipline.** WellCare maintains a disciplinary policy for compliance violations. Associates who violate laws, regulations or WellCare policies are subject to discliplinary acton, up to and including termination of employment. Likewise, such violations by subcontractors may result in the termination of their contracts with WellCare.
- **Policies and Procedures**. WellCare has adopted a comprehensive set of policies and procedures designed to, among other things, help ensure our operations comply with all applicable laws and regulations. WellCare recognizes that state laws and requirements can vary and we develop our policies and procedures accordingly. For example, we have adopted a number of grievance policies and procedures in order to ensure not only compliance with the requirements of Subpart F of 42 C.F.R. Part 438, but also compliance with applicable state laws. Recognizing there are different requirements applicable to each state, we have separate policies and/or procedures relating to

grievances for each of our Medicaid plans. As required by the accreditation requirements of the National Committee for Quality Assurance (NCQA), our policies and procedures are reviewed not less than annually to ensure they are kept up to date and reflect any changes in laws, regulations or contractual requirements.

- **Report Integrity**. WellCare has specific policies and procedures that ensure that all reports are appropriately reviewed, validated, certified and approved prior to their submission to any regulatory agency. The purpose of these policies and procedures is to help ensure that all submissions are accurate, complete, timely submitted, compliant and in accordance with all governing contractual provisions and the underlying laws and other requirements.

Further details about our comprehensive Compliance Program are included in our response to Question 10.

Regulatory Actions and Sanctions

None of WellCare or its subsidiaries has been excluded or debarred from participating in any federal or state procurement or non-procurement program. However, certain of WellCare's affiliates have received other types of sanctions and regulatory actions over the last five years related to our Medicaid and CHIP contracts. We ran the relevant reports to prepare our response on November 10, 2015, so the five year period covers November 10, 2010 – November 10, 2015. For convenience we have summarized these in Figure 1 below.

In Figure 1 "**AHCA**" is the Florida Agency for Health Care Administration, "**CHFS**" is the Kentucky Cabinet for Health and Family Services, "**DHFS**" is the Illinois Department of Healthcare and Family Services, "**DMAHS**" is the New Jersey Department of Human Services, Division of Medical Assistance and Health Services, "**DSS**" is the Missouri Department of Social Services and "**ODJFS**" is the Ohio Department of Job and Family Services.

In addition to the regulatory actions summarized in **Figure 1**, please note that WellCare is currently operating under a Corporate Integrity Agreement. Details about our Corproate Integrity Agreement are included in our response to Question 3 of this RFP.

Figure 1

State	Issuing Agency	Subject	Type of Action or Sanction	CAP	Description
FL	AHCA	Claims	Liquidated Damages/ Fines	No	Claims processing timeliness did not meet 90 day processing performance standard. Aggregate liquidated damages of $10,000.*
FL	AHCA	Claims	Liquidated Damages/ Fines	No	Claims processing timeliness standards for assistive care services not met (one provider). Liquidated damages of $40,000.
FL	AHCA	Encounters	Liquidated Damages/ Fines	No	Pharmacy encounters not submitted timely. Aggregate liquidated damages of $50,000.
FL	AHCA	Financial	Liquidated Damages/ Fines	Yes	Failure to maintain financial surplus requirements as a result of placing the annual ACA premium payments within the first quarter. Liquidated damages of $43,000.
FL	AHCA	Network	Liquidated Damages/ Fines	No	Network deficiencies regarding birthing centers located within the service area. Liquidated damages of $3,000.

State	Issuing Agency	Subject	Type of Action or Sanction	CAP	Description
FL	AHCA	Network	Liquidated Damages/ Fines	No	Failure to timely remove three terminated facilities from the paper and online provider directory resulting in inaccurate information in provider directory. Aggregate liquidated damages of $8,500.
FL	AHCA	Network	Liquidated Damages/ Fines	No	Submission of Provider Network File one day past due date. Liquidated damages of $250.
FL	AHCA	Network	Liquidated Damages/ Fines	No	Provider Network File did not meet specifications. Aggregate liquidated damages of $25,500.
FL	AHCA	Reporting	Liquidated Damages/ Fines	No	Late submission of corrective action plan for child health check-up. Liquidated damages of $3,000.
FL	AHCA	Reporting	Liquidated Damages/ Fines	No	Submission of unaudited financials one day after deadline. Liquidated damages of $1,000.
FL	AHCA	Reporting	Liquidated Damages/ Fines	No	Claims Aging Report not submitted timely. Liquidated damages of $3,500.
FL	AHCA	Utilization	Liquidated Damages/ Fines	No	Failure to meet internal corrective action plan standards tied to child health checkup. Aggregate liquidated damages of $73,000.
FL	AHCA	Utilization	Liquidated Damages/ Fines	No	Failure to meet HEDIS performance standards in all respects. Aggregate liquidated damages of $131,500.
FL	AHCA	Utilization	Liquidated Damages/ Fines	No	Child health check-up participation rate not met. Aggregate liquidated damages of $75,000.
FL	AHCA	Utilization	Liquidated Damages/ Fines	No	Clinical performance measures for therapy services not met. Liquidated damages of $7,500.
FL	AHCA	Utilization	Liquidated Damages/ Fines	No	Failure to mail a written notice of action within required timeframe. Liquidated damages of $2,500.
FL	AHCA	Utilization	Liquidated Damages/ Fines	No	Denial of speech therapy services for members under the age of 21. Liquidated damages of $17,500.

State	Issuing Agency	Subject	Type of Action or Sanction	CAP	Description
IL	DHFS	Quality	Auto-Enrollment Suspension	Yes	Suspension of auto-enrollment from November 11, 2014 – January 8, 2015 due to failure to meet certain threshold quality scores for the 2013 calendar year. Noting a lack of improvement from prior reported scores, DHFS concluded that the plan had not adopted adequate practice guidelines to meet certain contractual requirements. Suspension lifted after DHFS determined that the plan had made substantial progress.
IL	DHFS	Network	Auto-Enrollment Suspension	Yes	Suspension of auto-enrollment from November 5, 2015 – present in Illinois' Region 5 due to failure to correct certain network deficiencies in that region. The plan has been required to obtain participating provider contracts rather than single case agreements for services. The plan is currently negotiating these participating provider cotnracts.
KY	CHFS	Administrative	Liquidated Damages/ Fines	No	Late submission of a response to a letter of concern. Liquidated damages of $6,500.
KY	CHFS	Encounters	Liquidated Damages/ Fines	No	Liquidated damages related to encounter data reporting. Aggregate liquidated damages of $727,235.
KY	CHFS	Encounters	Payment Withholds	No	Submission of encounter files that either failed the SNIP edits or had another front end failure. CHFS withheld $10,134,654.14 and $10,847,823.64, in November 2014 and April 2015, respectively. In each case, the full amounts withheld were released to WellCare of Kentucky the following month after successful resubmission of the files.
MO	DSS	Quality	Intermediate Monetary Sanction	No	Failure to provide behavioral health services to members. No corrective action plan was required because between the time the deficiencies had been identified and the sanction was imposed, the plan had contracted with a new subcontractor for behavioral health services. Intermediate sanction of 0.47 percent of the plan's monthly capitation payment for the May 5, 2011 payment cycle.

State	Issuing Agency	Subject	Type of Action or Sanction	CAP	Description
NJ	DMAHS	Encounters	Payment Withholds	No	Payment withholds related to a "rolling" withhold system in which deficiencies are calculated monthly based on the encounter records submitted through the previous month. Amounts may be released once the deficient encounter records have been corrected and resubmitted. Amounts withheld become liquidated damages after 12 months if the encounters have not been corrected and resubmitted. To date, the plan has been assessed approximately $93,000 in liquidated damages under this system. For service months through January 2015, $1,180.993 remained on withhold through November 4, 2015.
OH	ODJFS	Quality	Liquidated Damages/ Fines	No	State performance standard not met for high risk care management. Liquidated damages of $300,000.

** Liquidated damage estimates include items that are under reconsideration or appeal with the applicable regulatory agency. As such a portion of the penalties assessed may be returned to WellCare pending the outcome of the reconsideration or appeal.*

Letters of Deficiency and Corrective Action Plans

WellCare and its subsidiaries from time-to-time receive letters of deficiency and corrective actions. **Figure 2** below summarizes the letters of deficiency and corrective action plans imposed on WellCare and its subsidiaries related to our Medicaid and CHIP contracts within the last five years (November 10, 2010 – November 10, 2015). Please note that because letters of concern are usually informational and do not rise to the level of a CAP, we did not believe them to be responsive to this question and have not included them. Information regarding letters of concern is available upon request.

In **Figure 2** "**AHCA**" is the Florida Agency for Health Care Administration, "**CHFS**" is the Kentucky Cabinet for Health and Family Services, "**DCH**" is the Georgia Department of Community Health, "**DHFS**" is the Illinois Department of Healthcare and Family Services, "**DHHS**" is the South Carolina Department of Health and Human Services, "**DHS**" is the Hawaii Department of Human Services, "**DMAHS**" is the New Jersey Department of Human Services, Division of Medical Assistance and Health Services, "**DOH**" is the New York State Department of Health, "**DSS**" is the Missouri Department of Social Services and "**ODJFS**" is the Ohio Department of Job and Family Services.

Figure 2

State	Issuing Agency	Subject	Type of Action	Description
FL	AHCA	Administrative	CAP	Newly hired associates not being trained timely on a on risk management program
FL	AHCA	Claims	CAP	Plan not providing sufficient claims submission support to specific providers
FL	AHCA	Network	CAP	DME provider template failed to meet contractual requirements

State	Issuing Agency	Subject	Type of Action	Description
FL	AHCA	Network	CAP	Inaccuracies between the updated network list submitted to the agency and printed provider directory
FL	AHCA	Reporting	CAP	Behavioral health claims not included on Claims Aging Report
FL	AHCA	Utilization	CAP	Behavioral health claims being denied for services provided to members eligible for Home Safe Net but who had not yet been enrolled in a Child Welfare Prepaid Mental Health Plan
FL	AHCA	Utilization	CAP	In connection with decisions to deny or authorize therapy services, a subcontractor was using criteria that were not compliant with contractual requirement
GA	DCH	Network	CAPs	CAPs related to deficiencies identified in quarterly network monitoring reviews - provider network accessibility and related CAPs to address data in provider listings
GA	DCH	Quality	CAP	Our Georgia plan is audited annually by the state's External Quality Review Organization (EQRO). CAPs requested from the 2011, 2012, 2013 and 2014 EQRO audits have covered various issues, including provider wait time standards, returning patient calls by providers, geographic access standards, provision of cultural competency plan on the website, form of QAPI program assessment, CPG (Clinical Practice Guideline) compliance by providers, performance goals, care management processes, disease management processes, transitions of care and discharge planning, monitoring case managers and assessment, care plan and discharge planning processes, coordination and continuity of care, revisions to member handbook and notice of action and EOB denial templates, improvements to UMAC minute
GA	DCH	Quality	CAPs	Failure to meet various performance targets for timely appointment acces
GA	DCH	Reimbursement	CAP	Erroneous NICU kick payment requests filed with incorrect diagnosis-related groups resulting in the return of an $82,842.77 overpayment
GA	DCH	Reporting	CAP	Failure to reconcile pharmacy rebates within agency deadline
GA	DCH	Reporting	CAP	Errors in PCP Assignment Report
GA	DCH	Utilization	CAP	Lack of authorization for a member's request for incontinence supplies covered under EPSDT benefit
HI	DHS	Administrative	CAP	Deficiencies in notice of action, grievances and appeals templates
HI	DHS	Network	CAP	Deficiencies related to obtaining disclosure statements from providers and provider contract template
HI	DHS	Quality	CAP	CAPs relating to EQRO visit – member and provider grievances and administrative issues

State	Issuing Agency	Subject	Type of Action	Description
HI	DHS	Quality	CAP	CAPs relating to EQRO audit – revisions to grievance, appeal and service authorization policies, timely processing of authorizations, revisions to member handbook, prior authorization reporting
HI	DHS	Various	CAP	CAPs relating to readiness review – various findings requiring CAPs from font size for large print materials to revisions to service plan development and exclusion check processes
IL	DHFS	Claims	CAP	DHFS requested CAPs from all participating plans relating to avoiding preventable errors in encounter data
KY	CHFS	Administrative	CAP	Brochure sent to an individual who was a recent former member of the plan
KY	CHFS	Administrative	Letter of Deficiency	Failure to provide access to plan's MIS system
KY	CHFS	Administrative	CAP	Plan must be able to provide identity and cover documents for undercover law enforcement officers
KY	CHFS	Administrative	CAP	Notice of action did not contain correct information regarding how to appeal an adverse decision
KY	CHFS	Administrative	CAP	Failure to meet call abandonment rate standards
KY	CHFS	Claims	CAP	Failure to comply with performance standards relating to processing clean claims
KY	CHFS	Encounters	CAP	Failure to achieve less than a five percent error rate for encounter data
KY	CHFS	Network	CAP	Deficiencies in provider network and reporting of same
KY	CHFS	Network	CAP	Issues related to actions taken by the plan's PBM which resulted in the appearance that certain active pharmacies were terminated in the system resulting in the delay in payment of claims but no delay on access to care
KY	CHFS	Quality	CAP	CAPs related to EQRO audit –behavioral health services, health risk assessments, care management and care coordination
KY	CHFS	Reporting	CAP	Deficiencies related to outstanding CAP (correspondence not provided in accordance with the CAP)
KY	CHFS	Reporting	CAP	Inaccuracies in provider network files resulted in the exclusion of hospitals from the state submission
KY	CHFS	Utilization	CAP	Historical data regarding prior authorizations not being transferred from plan to subcontractor
MO	DSS	Administrative	CAP	CAPs regarding various administrative matters – deficiencies in documentation regarding which positions held by in-state personnel, retention of report return receipts, FWA reporting documentation
MO	DSS	Encounters	CAP	Failure to submit attestations with encounter data

State	Issuing Agency	Subject	Type of Action	Description
MO	DSS	Network	CAP	Failure to comply with provider directory requirements
MO	DSS	Reporting	CAP	Deficiencies in the format and quality of data reported
MO	DSS	Quality	CAP	CAPs from BH clinical performance review including provider network analysis, BH training, care plan documentation, monitoring of care managers, reporting, improvements to discharge planning and involvement of BH medical director in complex cases
MO	DSS	Utilization	CAP	Erroneous imposition of prior authorization requirements for childhood immunizations
NJ	DMAHS	Administrative	CAP	Submission of incorrect address for community event
NJ	DMAHS	Quality	CAPs	Deficiencies related to care management in the case of two members - failure to contact a transitioned member to assess needs and enroll her in care management and failure to provide care management, medically necessary services and reimbursement for another member
NJ	DMAHS	Quality	CAP	CAPs from review of annual reports, including quality assurance activities, intervention efforts appointment availability and customer service
NJ	DMAHS	Reporting	Letter of Deficiency	Failure to submit quality committee agendas, sign in sheets and minutes
NJ	DMAHS	Reporting	CAPs	Deficiencies in grievance and appeals reporting
NY	DOH	Network	CAPs	CAPs related to audits of provider network regarding accuracy of information in provider directory
NY	DOH	Network	CAPs	Deficiencies in provider network
OH	ODJFS	Administrative	CAPs	Failure to comply with appeals and grievances timeframe
OH	ODJFS	Administrative	CAPs	Failure to meet call center abandonment rate and/or average speed of answer standards
OH	ODJFS	Encounters	CAPs	Failure to meet encounter data volume standards
OH	ODJFS	Quality	CAPs	Failure to meet access and/or clinical performance standards
OH	ODJFS	Utilization	CAP	CAPs related to EQRO review of pharmacy claims - drugs improperly denied as not covered, as prior authorization required and for members in transition
OH	ODJFS	Utilization	CAP	Failure to cover drugs covered by Ohio Medicaid under the EPSDT and general program
OH	ODJFS	Utilization	CAP	Failure to comply with the expense ratio standard
SC	DHHS	Administrative	CAP	Deficiencies related to credentialing and re-credentialing
SC	DHHS	Various	CAP	CAP related to a number of topics including data integration, governance, recording of health plan receivables, claims data and other matters

Iowa Medicaid Contract

On February 16, 2015, the Iowa Department of Human Services ("DHS") issued Iowa Department of Human Services - Request for Proposal - Iowa High Quality Healthcare Initiative - RFP MED-16-009 (the "Iowa RFP"). On August 17, 2015, DHS issued a Notice of Intent to Award contracts arising out of the RFP to four entities including WellCare of Iowa, Inc. ("WCIA"). Three unsuccessful bidders filed bid protests challenging the intended contract awards. Those protests were denied and each of the protestors timely appealed the denial of their protests to the Iowa Department of Inspection and Appeals, Division of Administrative Hearings in the case styled *Iowa Total Care, Inc. et al. v. Iowa Department of Human Services, et al.*, Appeal Nos. 16001573, 16001590, and 16001623. During the pendency of those appeals, the winning bidders, including WCIA, entered into contracts with DHS on October 9, 2015. On November 25, 2015, following an administrative hearing, Administrative Law Judge Christie J. Scase issued a Proposed Decision which, among other things, reversed the Notice of Intent to Award a contract to WCIA. WCIA, DHS, and the protesting bidders each sought review of the Administrative Law Judge's Proposed Decision. Review was granted and on December 18, 2015, Iowa Department of Administrative Services Director Janet E. Phipps (the "Director") issued a Final Order reversing the Notice of Intent to Award to WCIA and terminating WCIA's contract with DHS. WCIA disputes the facts and law as set forth in both the Proposed Order and Final Order and will seek judicial review of the Final Order, including the Director's decision to terminate the contract between WCIA and DHS. DHS' contact person, address and phone number for purposes of the now terminated contract is:

Mikki Stier, Medicaid Director
Iowa Medicaid Enterprise
100 Army Post Road
Des Moines, IA 50315
515-256-4647

TECHNICAL APPROACH

3. State whether or not the MCO is currently, or has been within the past five years, the subject of a criminal or civil investigation by a state or federal agency. If yes, provide an explanation with relevant details and the outcome. If the outcome was against the MCO, provide the corrective action plan or measures taken to prevent such future offenses. Include the organization's parent company, affiliates, and subsidiaries in the response to this question.

CRIMINAL OR CIVIL INVESTIGATIONS BY A STATE OR FEDERAL AGENCY

For purposes of this response, the "Company" refers collectively to WellCare Health Plans, Inc., the parent organization of WellCare of Nebraska, Inc., together with its subsidiaries and affiliates.

Investigations

2006 Qui Tams and Related Matters

In or about 2006, after certain then-current and former employees filed qui tam or "whistleblower" lawsuits alleging misconduct and seeking the recovery of monetary damages, federal and state enforcement authorities initiated investigations of the Company. These investigations have been successfully resolved, as summarized below. Moreover, all of the individuals whose actions or judgment were implicated by the factual allegations and legal claims asserted were separated or terminated from the Company by the end of 2008. ***During these investigations, the Company cooperated fully with these regulatory bodies and took extensive actions to remediate itself. A summary of some of these remediation efforts, which have transformed the culture of the Company, follows our discussion of the investigations.***

United States Attorney's Office / Florida Attorney General's Office

In May 2009 the Company agreed to enter a Deferred Prosecution Agreement (DPA) with the United States Attorney's Office (USAO) for the Middle District of Florida and the Florida Attorney General's Office. The DPA resolved the investigations regarding the matters above by those offices without adjudication of the matter on its merits.

As part of the DPA, the Company retained an independent monitor (the "Monitor") from August 2009 to February 2011. Among other things, the Monitor reviewed and evaluated the Company's compliance with the DPA and all applicable federal and state health care laws, regulations and programs. The Company successfully completed the Monitorship in February 2011.

On April 3, 2012, the USAO and the Florida Attorney General's Office notified the Company that they agreed to an early termination of the DPA. On April 4, 2012, the Federal Court granted the USAO's motion to dismiss the charges contained in the Information with prejudice.

Civil Division of the United States Department of Justice

In connection with the government investigation, the Company learned that four federal *qui tam* complaints (the "Federal *qui tam* complaints") had been filed by relators against the Company under the whistleblower provisions of the False Claims Act, 31 U.S.C. sections 3729-3733 and one *qui tam* action had been filed against the Company in a Florida state court (the "Leon County *qui tam* suit"). The United States government elected to intervene in the Federal *qui tam* complaints.

These complaints arose from conduct which occurred in or before 2007. On April 26, 2011, the Company entered into settlement agreements (collectively, the "Settlement Agreements") with various government entities. Signatories for the various government entities were (a) the United States (the "Federal Settlement Agreement"), the United States Department of Justice, the Office of Inspector General of the Department of Health and Human Services (OIG-HHS) and the Civil Divisions of the United States

Attorneys' Offices for the Middle District of Florida and the District of Connecticut and (b) the following states: Connecticut, Florida, Georgia, Hawaii, Illinois, Indiana, Missouri, New York and Ohio. The Settlement Agreements became effective as of March 23, 2012. Under the Settlement Agreements the Company agreed, among other things, to pay the Civil Division of the United States Department of Justice (the "Civil Division") $137.5 million in installments over a period of up to 36 months after the effective date of the Federal Settlement Agreement plus interest.

As a result of the Settlement Agreements, the Federal *qui tam* complaints and the Leon County *qui tam* complaints were dismissed.

All amounts payable by the Company pursuant to the Settlement Agreements have been paid.

Corporate Integrity Agreement

As part of the settlement of the civil inquiries by the government, in April 2011, the Company also entered into a Corporate Integrity Agreement with OIG-HHS. The Corporate Integrity Agreement has a term of five years and concludes the matters relating to the Company under review by OIG-HHS. The Corporate Integrity Agreement requires that the Company maintain its existing ethics and compliance programs. These programs are designed to help ensure the Company's ongoing compliance with federal health care program requirements. The terms of the Corporate Integrity Agreement include certain organizational structure requirements, internal monitoring requirements, compliance training, screening processes for new associates, reporting requirements to OIG-HHS, and the engagement of an independent review organization to review and prepare written reports regarding, among other things, the Company's reporting practices and bid submissions to federal health care programs.

2013 New York Investigation

WellCare received notice on June 10, 2013 that the United States Attorney's Office for the Northern District of New York was investigating allegations that WellCare of New York, Inc. knowingly accepted monthly Medicaid capitation payments from the State of New York and ultimately from the United States to which it was not entitled.

The USAO indicated that it was reviewing the payments made to 10 managed care organizations (MCOs) in New York for payments made to beneficiaries who at some point during their enrollment moved out of state. WellCare cooperated fully with the USAO investigation including internally researching the 20 beneficiaries identified as members of WellCare of New York. The USAO and the New York State Department of Health and Office of the Medicaid Inspector General entered into settlement agreements with the MCOs. The settlement agreements specifically stated that the government found no evidence of a False Claims Act violation or other wrongdoing by WellCare of New York. The settlement was based upon payment-by-mistake theory attributable to processing errors and omissions made by the New York Human Resource Administration rather than misconduct by the MCOs. The total settlement received from the MCOs was $1.3 million. WellCare of New York's share was $52,000.

Remediation

The Company has taken steps to significantly transform itself by remediating the issues that led to the government investigations described above and to build itself into a strong, well-governed, and compliant company. This change extends to WellCare's Board of Directors, which established two new committees in 2008. One of these committees, the Regulatory Compliance Committee, is focused on the compliance activities of the Company. The second of these committees, the Health Care Quality and Access Committee, is focused on the care of our plans' members. Highlights of these changes include:

- Change in the senior management team, including the removal of the Company's then CEO, CFO and General Counsel in 2008.
- Expansion of and improvements to its corporate ethics and compliance program including enhancements to the associate corporate ethics and compliance training program and implementation

of a Code of Conduct and Business Ethics and related policies and procedures. The corporate compliance program covers all aspects of our company and is designed to assist us with conducting our business in accordance with applicable federal and state laws and high standards of business ethics. The corporate compliance program applies to members of WellCare's Board, our officers and all of our associates. The following are several features of our compliance program:

- **Regulatory Compliance Committee.** The Regulatory Compliance Committee of WellCare's Board oversees our compliance activities and programs. This committee meets not less than quarterly. It receives periodic reports from our Chief Compliance Officer and is responsible, along with the Audit and Finance Committee of WellCare's Board, with assisting the Board with the oversight of WellCare's compliance activities.
- **Chief Compliance Officer.** Our Chief Compliance Officer reports directly to our Chief Executive Officer and the Regulatory Compliance Committee and is responsible for the day-to-day activities of the compliance program, including monitoring the timeliness and appropriateness of regulatory reporting and affiliated company arrangements, among other things.
- **Corporate Compliance Committee.** Our corporate Compliance Committee operates under a charter approved by the Regulatory Compliance Committee, is chaired by our Chief Compliance Officer and is comprised of members of senior management, including (among others) our Chief Legal and Administrative Officer, Senior Vice President, Operations, our Chief Auditor, Chief Information Officer and Chief Medical Officer. The corporate Compliance Committee assists WellCare's Board with overseeing the compliance program and reviews areas of legal, regulatory and compliance risk throughout the Company.
- **Communications with regulators.** We have implemented a comprehensive program to help us identify regulatory reporting issues and report such issues to the appropriate federal or state regulator. The program, which is administered under the supervision of our Chief Compliance Officer, is designed to ensure the timeliness, details and sufficiency of the information we communicate to regulators.
- **Compliance training.** Our corporate training program includes mandatory compliance training for all associates. New associates receive compliance training within 30 days of hire, while existing associates complete required compliance training on an annual basis. Associates who fail to timely complete such training are subject to disciplinary action.
- **Non-retaliation policies and multiple reporting channels.** As an integral part of the compliance program, we emphasize non-retaliation and provide a variety of channels for associates to express concerns, including an external hotline and web portal where information can be left anonymously.
- **Written policies and procedures.** We have adopted written policies and procedures to reflect our commitment to corporate integrity and compliance and our duty to report.

- Implementation of a Company-wide compliance management system to assist the Company in the management of its compliance responsibilities, retain attestations related to state contract compliance and to serve as a central repository for all corporate policies and procedures; and
- Implementation of a contractual reporting certification policy so that associates with the appropriate level of authority certify that reports provided to regulatory entities are complete and accurate.

SECTION III.F INSURANCE REQUIREMENTS

4. Describe the risk analysis, assumptions, cost estimates and rationale supporting the MCO's proposed reinsurance arrangements. If any reinsurance is provided through related parties, provide a disclosure of the entities and details causing the related party relationship. *(Page limit 2 pages)*

WELLCARE'S REINSURANCE APPROACH AND OVERVIEW

WellCare entities reinsure high dollar claim risk through the use of an external reinsurance vendor to mitigate claim fluctuation risk and stress on operating capital. WellCare has no immediate plans to utilize reinsurance through related parties at this time. Any future reinsurance coverage involving related parties would be submitted for approval through the normal contract approval process with the State.

The coverage terms are developed as part of the overall corporate risk management strategy described below. The contract will typically address the following terms:

- Policy Year contract period including eligible service dates, payment timeframe, and carryover provisions for claims that may be incurred during one contract period, but eligible to be counted for recovery in subsequent contract periods.
- Financial terms of coverage including deductible, coinsurance, and annual/lifetime benefits limits.
- Reimbursement schedule applicable for recoveries, which may be different than the reimbursement basis paid to the provider, may be tied to the minimum of the actual paid claims and a standard schedule such as 100% of Medicare or Medicaid.
- Services eligible for recovery reimbursement under the contract, or specific excluded services.
- General and supplemental insolvency coverage, if required for a given market.
- Data reporting and disclosure requirements, including process to file for recoveries.
- Key networks or providers which may be preferred or required for certain services such as transplants.
- Member census information and rate schedule by product/plan.
- Specific membership coverage that may differ from the standard coverage. (For example if a member is known to have a maintenance condition that requires $2,500,000, the reinsurer may propose coverage for that member at a higher deductible such as $3,000,000. This allows WellCare to reinsure the remainder of the population at a rate which excludes the known high cost member's experience, resulting in a lower rate for the remainder of the population. This protects WellCare from paying higher rates on the entire population in the case that the known high cost member lapses coverage. The end result is lower reinsurance costs to WellCare and less risk transferred to the reinsurer)
- Any experience refunds, if applicable.
- Termination clauses.

RISK ANALYSIS, ASSUMPTIONS, COST ESTIMATES AND RATIONALE SUPPORTING WELLCARE'S REINSURANCE ARRANGEMENTS

- WellCare will determine whether it will consider coverage only from its incumbent carrier or whether quotes from other reinsurers will be considered for the upcoming Policy Year risk assessment. Any additional quotes may be facilitated through independent solicitation or through a broker. The decision of whether to consider additional quotes may be driven by changes in the reinsurance market, corporate risk capacity, satisfaction with current carrier, or other drivers.
- A separate in-house rate development is conducted by WellCare's Actuarial Services team to determine reasonable ranges for reinsurance premium rates. This pricing uses WellCare-specific data, but may also utilize other source data which is available such as data from consultant rate reports,

data from other state programs, marketplace trends, and other publicly-available sources.

- Some key considerations unique to reinsurance coverage are factored into the analysis. Some of these include:
  - Reinsured claims have higher volatility than the total claims that include "first-dollar" claims below the deductible. For this reason, it is sound practice to consider the credibility of a given observation and utilize multiple measurement periods when determining reinsurance rates, whenever possible.
  - Claims above a deductible exhibit a leveraged effect on the experience above the deductible. Therefore, claim trends become magnified for risk measured above the deductible. This may result in percentage rate changes that are much higher than the total claim trend. To illustrate this, suppose a member had $2,400,000 in hospital claims, and reinsurance coverage at a $2,000,000 deductible and 100% coinsurance, then the claims covered by reinsurance would be $400,000. If the same member had the same claims next year but the hospital fee schedule increased by 5%, the total claims would be $2,520,000, and the claims covered by reinsurance would be $520,000. The leveraging effect can be seen in that the total claims increased by 5%, but the claims covered by reinsurance increased by 30%. This is an important consideration when assessing the percentage rate changes proposed by the reinsurer.
  - Certain populations or events may trigger significant changes to reinsurance risk. Some of these include changes in NICU coverage or incidence rate, changes to high cost specialty drugs for hemophilia and other diseases requiring drug therapy regimens, and transplant incidence. Therefore a small change to the experience of these relatively- small subpopulations can cause significant changes in the underwritten reinsurance risk pool. Such changes are reviewed as part of the annual risk assessment process.
  - The in-house rates are compared to those produced by the reinsurer, and key variances are identified. Discussion regarding the rate development assumptions and data sources are conducted to understand the variances. Since the reinsurer may have access to additional data sources (i.e., multi-provider claims data bases, consultant models, etc.), variances in pricing are not uncommon and can often be attributed to the reinsurer's pricing information, manual rating system, and underwriting guidelines. The rates are considered acceptable once key variances are resolved with the end result of WellCare actuaries gaining a comfort level that the rates are reasonable for the marketplace.
  - Key contract terms are assessed for potential coverage to reflect any changes in Medicare or in the state's Medicaid program.
  - A senior management team typically including the Chief Financial Officer, Chief Accounting Officer, and Chief Actuary are involved in the final decision process for coverage. This incorporates high level input around financial position, rate levels, and corporate risk tolerance into the analysis. These discussions may result in proposing changes to the overall risk reinsured, including deciding the appropriate level of deductible to trigger reinsurance.
  - The final agreed-upon rates are then approved through a signed binder, amendment of necessary contract terms, and submission of contracts to the appropriate state agencies for approval.

SECTION IV.B ELIGIBILITY AND ENROLLMENT

5. Provide a comprehensive discussion of the MCO's approach to maximizing the number of members who have a relationship with a PCP, including:

- The strategy the MCO will use initially, and on an ongoing basis, to ensure PCP selection within 30 calendar days.
- Examples of successful strategies and lessons learned in encouraging PCP relationships.

(Page limit 2 pages)

MAXIMIZING THE NUMBER OF MEMBERS WHO HAVE A PCP RELATIONSHIP

As a plan solely focused on serving people in government-sponsored health care programs for more than 20 years, we have tailored our approach to support relationships between our members and their primary care providers (PCP) with the unique challenges of our membership in mind. Our strategy places a premium on member choice and helps our members make that choice in the most streamlined and efficient way possible. Our strategy also recognizes that successful member-PCP relationships require engagement from both sides, so we use similar tools of customer service and data exchange to support both members and providers in connecting.

We employ several different strategies to ensure that our members are matched with PCPs who are culturally appropriate and can meet their healthcare needs, again, with a focus on member choice. We give members multiple ways to make a proactive choice of PCP including, but not limited to:

- Selecting a PCP during the initial member welcome call
- Calling a member services representative to select a PCP
- Seeking assistance from a WellCare of Nebraska member representative in person or at one of our Welcome Rooms placed across the state
- Selecting a PCP through WellCare.com, which includes a provider search function that is built using natural language (i.e. a member can search for "heart" rather than "cardiologist") for ease of member use and to meet health literacy needs of our membership

We will reach out to all members who have not made a proactive PCP selection during enrollment within 10 business days of receiving enrollment files from the state to assist them in selecting a PCP. And, if the member still has not chosen a PCP, we will conduct auto-assignment within one month of the enrollment date.

When Members do not make a proactive choice, we deploy algorithms that take into consideration a number of factors focused on aligning members with the best PCP for their needs. Because we place a premium on existing PCP relationships, our first step is to honor any existing relationships as detailed to us in member files provided by the state or transitioning managed care organizations. Additionally, we consider family member PCP relationships, location, language and/or special or cultural needs. For instance, Native American members would be connected to the most appropriate 638 Tribal Clinic or Indian Health Service provider as their PCP if no proactive selection is made.

Our Nebraska policies and procedures on PCP assignment will address these processes, as well as detail the methods and frequency of PCP assignment reporting to MLTC. We recognize that MLTC will need to approve our assignment algorithm along with our policies and procedures.

We recognize that members can change their PCP assignment at any time, and we work with members to ensure they know of that right and to help them should they choose to exercise it.

Building Meaningful Relationships between Members and PCPs

Having a PCP selected or assigned is the first step to promoting the member-PCP relationship. We take additional steps to promote a meaningful relationship.

- Connecting with PCPs through Care Coordination
  - **Care Gap Identification:** our systems are built to flag member records if there is a gap in care including routine PCP contact.
  - **Care Management and Discharge Planning:** Our Care Management team works with assigned Members to identify and ensure completion of an integrated care plan that includes identifying appropriate appointments with the PCP.
  - **Utilization Reporting:** Monthly, we provide each of our PCPs with a list of assigned Members who had a preventable admission or re-admission, or an avoidable use of the (ED). We work with our PCPs to contact the members to address gaps in care and implement solutions to problems that resulted in the preventable admissions and avoidable ED use.

In addition, we incentivize members to attend their first PCP appointment by offering them *Healthy Behaviors Rewards* such as a gift card.

Successful Strategies for Encouraging Primary Care Providers

Not only do we engage with members to drive PCP selection, we also use our analytic capability and our Clinical HEDIS Practice Advisors (CHPAs) to drive PCP engagement of new members. WellCare's CHPAs are specially trained provider support personnel who help providers address quality of care issues in their practices. In our Kentucky affiliate, CHPAs help PCPs connect with their members (whether a member selected them or they were auto-assigned) through our "New Member" reports. Reports are generated monthly identifying new members to the provider's panel, and CHPAs distribute these reports to providers. This report gives providers an opportunity to outreach their new members and get them in for needed visits.

Also, in Kentucky, we have developed a PCP Change Request form to better ensure PCP assignment is a meaningful process. Even with the best algorithms and member education, all health plans see members seeking out providers not assigned to them. Our CHPAs promote and use the PCP Change Request form to identify members who would like to change their current PCP selection. We use claims data to obtain this information, and we pre-populate the form for these members with the member and provider information. The CHPAs ensure providers have these forms when a member who would like to change PCPs comes into their office. In 2014 we entered 4,464 PCP changes. So far in 2015, we have entered 11,929 PCP changes in an effort to maximize the member-PCP relationship and honor member selection of PCP. We will use CHPAs in these same roles in Nebraska.

Best Practice: Leveraging Community Relationships to Identify and Resolve Member Barriers

There are many potential barriers that can keep a member from engaging with their PCP. We learn about them from our community partners who assist us in better understanding our members who face a multitude of cultural and socioeconomic challenges as they interact with the health care system. Some of the common barriers our members experience include lack of reliable transportation, language barriers, poor fit between member and PCP for other cultural reasons, child care needs, concern about lost wages, and housing instability.

Through our community engagement model, Health*Connections*, we can identify the gaps in the social safety net in a given locale, anticipate how it will affect our members and provide a service or find a community service organization to meet that need. Through these partnerships, we identify and ameliorate those needs that prevent members from being able to engage with their PCP.

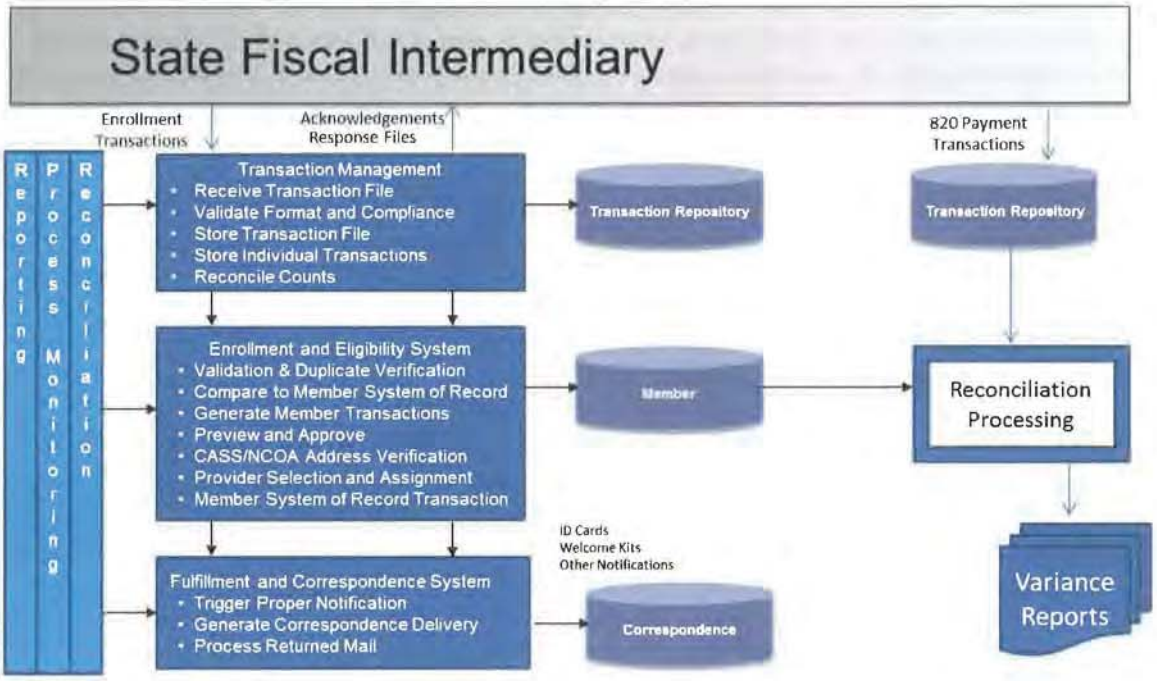
SECTION IV.B ELIGIBILITY AND ENROLLMENT

6. Describe the MCO's anticipated process to utilize the eligibility and enrollment files from MLTC or its designee to manage membership. Include the process for resolving discrepancies between these files and internal membership records. *(Page limit 1 page)*

Utilizing MLTC's Eligibility and Enrollment Files

WellCare of Nebraska's Enrollment Eligibility System (EES) allows us to receive, process and update enrollment data daily. The system will use information transmitted by MLTC through 834 files delivered on the frequency specified by MLTC, including monthly roster and termination files. Our EES tracks and reconciles each individual transaction from receipt through membership update. Our member eligibility processes recognize MLTC as the source of truth for member eligibility and demographic data. As a result, each transaction received on the 834 files is compared to our Core Processing System (CPS) member tables. We then update our member tables to align with the information from MLTC. This information is generated and executed, ensuring that our member information accurately reflects active membership. Our member data is also reconciled on a monthly basis with capitation payment reports to ensure that payments (by rate cell) tie to our membership records. **Figure 1** shows a visual of our EES.

Figure 1



Weekly Reconciliation

As specified in the scope of work, we will reconcile the enrollment file received from the enrollment broker weekly and will provide written notification to the broker within ten calendar days of any inconsistencies noted. Likewise we will comply with notifying the MLTC within three months of any discrepancies of members for whom we received a capitation. To facilitate this process, WellCare of Nebraska will designate staff to coordinate with the Enrollment and Revenue Reconciliation teams to communicate all membership discrepancy types (including name, out-of-service-area address, date of birth, category of eligibility, cap payments, etc.).

SECTION IV.B ELIGIBILITY AND ENROLLMENT

7. Describe the interventions the MCO will use prior to seeking to disenroll a member who requests disenrollment outside the annual open enrollment period. Provide examples of scenarios in which the MCO has effectively intervened to avert disenrollment of a member or members. *(Page limit 2 pages)*

Averting Member Initiated Disenrollment

Our members are our reason for being, and we work hard to develop a trusting relationship with them. Historically, we have found that if we proactively and expeditiously address member concerns, members rarely choose to change to another MCO. Should a member request disenrollment, we have policies and procedures to ensure a smooth transition. However, we also work to mitigate member-initiated disenrollment by proactively identifying members who may have concerns and working quickly to resolve member issues.

We understand that members may disenroll from their managed care organization (MCO) without cause during the first 90 days of initial enrollment. After the first 90 days the member may only request disenrollment "for cause". Members will also be allowed to change MCOs during the annual open enrollment. Members may also request disenrollment when the state imposes the intermediate sanction specified in 42 CFR 438 702(a)(3). We recognize that disenrollment provisions apply regardless of mandatory or voluntary enrollment. After 90 days, members may disenroll for the following "for cause" reasons: member moves out of the service area, member needs related services and all related services are not available within the network, and other reasons including poor quality of care, and lack of access to services or providers.

Resolving Member Concerns to Prevent Disenrollment

We strive to provide every member with excellent service, support and access to care. If, however, a member experiences an issue and desires to disenroll, we also recognize that this process can be troubling and disruptive to the member. In response, we work closely with members to resolve concerns that may result in a request for disenrollment and take each opportunity of contact with a member experiencing difficulties to engage and resolve issues using the most appropriate intervention available, whether it is better access to treatment, education, coordination of services, or care management. As with all member interactions, we document the interventions, any outcomes and follow-up required in our system of record. We also engage with the member's PCP to collaborate on potential solutions and interventions.

MEMBER STORY

Resolving Member Concerns to Prevent Disenrollment

- A Florida Medicaid member recently filed a complaint with the state requesting disenrollment because she could not locate a rheumatologist. The member was asked to contact us for resolution prior to disenrollment. After receiving the member's grievance, we took action. We were able to find a rheumatologist in the member's area. We then called the member's PCP to confirm the referral, contacted the rheumatologist and helped the member schedule an appointment. The member was satisfied and remains enrolled with us.

Using Data Analytics to Identify and Resolve Unmet Member Needs

We run regular analytics to identify members who may be at risk of disenrolling. We use a predictive modeling based upon the member's engagement with their PCP or our call center to identify members at risk before they even seek to disenroll. For instance, we can identify members who have made several calls to member services and the time between calls to trigger an intervention. Additionally, phone interactions between our members and customer service representatives are monitored for key words that indicate a member may be at risk of disenrolling. Those key words flag the call and escalate it to a supervisor to help ensure the member concern is resolved quickly. Using both predictive modeling and

real time speech analytic capabilities provide us needed information to identify members who have concerns or unmet needs.

Members who have a concern that could potentially lead to a request for disenroll may express their concern through our formal grievance system. We encourage members to file grievances as it helps us identify issues in the system that can help us drive toward continued performance improvement. Grievances received electronically as well as those received by mail, fax, email, and through staff members, are processed by a dedicated grievance department staff. As grievances are received by our grievance department, they are logged into the grievance tracking database. We adhere to all applicable state and federal guidelines as well as accreditation standards for grievance procedures. We know often members have grievances based on a unique clinical need or situations. When this occurs, the grievance coordinators refer cases to clinical staff members for review and input. Depending on the nature of the need, the Chief Medical Officer or other clinical team members will engage with the member, their caregiver or advocate to address his or her need.

Averting Disenrollment through Community Partnerships and Mitigating Social Service Barriers

Through our CommUnity Advocacy program, WellCare of Nebraska maintains strong relationships with community partners to encourage collaboration and increased knowledge about how to navigate the healthcare system. WellCare of Nebraska identified more than 5,000 partners with whom to collaborate to divert potential transitions of members by providing information about how to navigate the health plan and benefits as well as effectively access and use social services to address barriers created by social determinants of health.

MEMBER STORY

Resolving Member Concerns to Prevent Disenrollment

- Our CommUnity Advocate in New Jersey partnered with a local care manager to help a member at risk for losing Medicaid benefits. The care manager established a relationship with the member which strengthened over time. With a series of struggles, the member and her husband nearly lost SSI benefits. The Case Manager learned about their situation and helped connect the family to several social services and Medicaid benefits. Accessing these programs helped the member avert disenrollment and continue receiving the care she needed for her advanced rheumatoid arthritis.

SECTION IV.B ELIGIBILITY AND ENROLLMENT

8. Describe the MCO's process to identify unborn individuals anticipated to begin coverage at the time of birth. Describe the operational process to obtain identifying information when the unborn status changes to newborn. *(Page limit 1 page)*

IDENTIFYING UNBORN INDIVIDUALS BY FIRST IDENTIFYING EXPECTANT MOTHERS

Based on our experience serving moms and babies in other states, WellCare has developed various strategies to identify unborn individuals anticipated to begin coverage at the time of their birth. This process begins with the identification of expectant mothers – both to make sure they get the care they need and to make sure we can identify the child for coverage once born.

We identify members who are pregnant through a number of methods, including state eligibility 834 file, referrals from state or community agencies, member or caregiver referrals, provider referrals, behavioral health provider referrals, the Nurse Line and crisis line referrals. We contact our members who are pregnant at least 60 days prior to their scheduled delivery date, and we allow at least two weeks postpartum for the mom to choose a PCP for her infant. In addition to the more routine methods of identifying and caring for expectant moms, WellCare of Nebraska will leverage its proprietary CommUnity Advocacy program to identify and coordinate care for expectant moms and their babies in the Heritage Health program.

A key step to identifying unborn individuals is to partner with providers effectively. We do this several ways:

- Creation of a global authorizations to cover pregnancy services and authorization for the subsequent delivery – through our authorization, our Medical Management Platform allows us to stay abreast of the member's progress through her pregnancy.
  - In high-risk pregnancies, where care management has been triggered, care coordinators are aware of the birth and work with the moms to identify a suitable PCP for her infant.
  - For other moms, our claims process triggers our awareness of the child's birth, and we begin the process of enrolling the child and communicating that information to MLTC.
- Partnering with hospitals to receive information at the time of birth. Our hospital contracts will include provisions that the hospital should notify us when one of our members gives birth. Additionally, WellCare has a robust process to partner with facilities on discharge planning, which starts at the time of admission (or before) and has tailored elements for births.

As noted above, our experience with Medicaid programs covering moms and children has informed our process in Nebraska, and we fully recognize each state has its own nuances around eligibility and enrollment of newborns, so we are eager to partner closely with MLTC to inform these processes through implementation.

Our Florida affiliate, for example, identifies newly born children through our providers and also through claims history data. We then use this information to follow up with the mom telephonically to ensure that she has selected a PCP for her child and has followed up with Florida's Division of Children and Families as she is required to do. This process has worked well for our members, and we anticipate leveraging this best practice in Nebraska.

SECTION IV.B ELIGIBILITY AND ENROLLMENT

9. Describe the MCO's approach to working with other MCOs in the event a member changes his/her MCO during ongoing operations of the program. Describe how the MCO will work with other MCOs to ensure a seamless transition and transfer of relevant information. *(Page limit 1 page)*

TRANSITIONS OF CARE: ENSURING CONTINUITY FOR MEMBERS WHEN THEY CHANGE PLANS

WellCare has spent more than 20 years coordinating care for our members under a number of different scenarios including members transitioning from fee-for-service or from another managed care organization. To ensure the least disruption possible, our transition of care policies and procedures prioritize member needs by ensuring smooth information exchange, relationship-building among MCO care managers and engaging the member through communicating about the process, the responsibilities of the MCOs, and the member's continued access to services and providers.

Transitioning Members Between MCOs

A critical step in any transition is educating the member on the process, and coordinating with the member to ensure that needs are met, and the member's care continuum is not interrupted.

For members transitioning away from WellCare, complete member records are provided to the new MCO. Those member records include the member's care plan, any relevant additional information regarding the member's physical and behavioral health needs as well as any community supports to which they have been referred in order to assure that the new MCO is equally equipped to provide continuity of care for that member. For members engaged in active telephonic or field-based care management, transmission of information is followed with engagement by a care manager as needed to facilitate continuity of the care plan and any special needs.

For members coming into WellCare from another MCO, we will incorporate information provided to us by the departing MCO or the state, conduct our own assessment and stratify the member informed by the member experience with the previous plan and current situation. We will welcome the new member with all of our new member welcome processes including the initial welcome call, mailed welcome packet and health risk screening. We will also work to ensure seamless transition of the member's primary care provider (PCP) and take every step possible to maintain that existing relationship unless the member chooses a different PCP.

Using Systems and Technology to Ensure a Seamless Transition

The information we receive from another MCO or other payer relinquishing a member is typically claims history data used for the purpose of identifying members enrolled in a care management program. We also solicit care plans and treating provider's contact information from the previous payer. We have systems that accommodate obtaining Health Risk Assessment information via an 834 enrollment file.

In Nebraska, additionally, we have identified an opportunity that will enhance information sharing which is beneficial for members transitioning into and out of different health plans. We believe the Nebraska Health Information Initiative (NeHII) plays a valuable role in the transition of care by offering access to clinical records. NeHII currently holds or accesses records from a growing share of the hospitals and providers in Nebraska. WellCare was invited to provide input to the NeHII Strategic Planning meeting on October 2, 2105 where we encouraged NeHII to allow and encourage MCOs to provide information and have access to the network. This would further smooth a member's transition, not only between MCOs, but between providers and health homes as well. This information, in machine-readable form, would aid care managers and providers and be used in population health management programs to ensure the right treatment is available at the right time.

IV.C Business Requirements

IV.C BUSINESS REQUIREMENTS

10. Describe the approach the MCO will take to ensure compliance with all relevant provisions of Part 438 of Chapter 42 of the CFR, Title 471, 477, and 482 NAC.

WELLCARE IS DESIGNED TO ENSURE COMPLIANCE WITH ALL RELEVANT LAWS AND REGULATIONS

WellCare understands and acknowledges that we must meet all relevant provisions of Part 438 of Chapter 42 of the Code of Federal Regulations and Titles 471, 477 and 482 of the Nebraska Administrative Code. We will observe and comply with all current federal and State laws related to or affecting the Contract, including any law that may be enacted during the term of the Contract. Among other things, this means we will protect members' privacy and other rights, reimburse for services and benefits in accordance with state laws, and adhere to applicable cost sharing requirements. WellCare also recognizes our responsibility to ensure that our associates and providers do the same.

WellCare affiliates are currently providing Medicaid managed care services in nine states, so we have established knowledge, infrastructure and experience with the various programmatic requirements of Part 438 of Chapter 42 of the Code of Federal Regulations. We recognize that regulations are ever-evolving and monitor rulemaking related to Part 438. As part of the implementation of our Nebraska plan, we have been reviewing relevant Nebraska state laws and regulations, including Titles 471, 477 and 482 of the Nebraska Administrative Code, to ensure that our plan operations are consistent and compliant with state programmatic requirements.

WellCare will ensure compliance through our mature Corporate Compliance Program as detailed below.

Identifying and Analyzing Applicable Laws and Regulations

In order for a compliance program to effectively monitor compliance with laws and regulations, the enterprise must first have a process to identify and analyze those laws and regulations that impact its operations.

WellCare's Compliance, Regulatory Affairs and Government Affairs/Public Policy teams each has a role in identifying and analyzing laws and regulations impacting our business and the manner in which we serve our members. In each of our state affiliates, our local Regulatory Affairs personnel track legislative and regulatory changes impacting our individual plans, and our corporate Government Affairs/Public Policy team tracks legislative and regulatory changes impacting WellCare's plans more generally, such as regulations adopted by the Centers for Medicare & Medicaid Services (CMS). Our Regulatory Affairs teams coordinate meetings with impacted functions across the WellCare enterprise to review amendments to our state contracts and other regulatory changes to ensure programmatic changes are understood and addressed in a coordinated manner. Compliance assists with analyzing rule changes as necessary and with risk assessments to help ensure programmatic changes are reflected in the appropriate policies, procedures and processes. The Compliance team also reviews and shares guidance on contractual amendments, new regulations, CMS memoranda and other guidance through a variety of means including our Regulatory Adherence Committee. This new committee was expressly established to provide us with a mechanism to identify, evaluate and help ensure proper implementation of regulatory and contractual changes that impact the manner in which we serve our members and government clients.

Ensuring Compliance with Federal and State Laws and Regulations through WellCare's Compliance Program

Our Compliance Program is intended to promote ethical conduct in all aspects of our operations and to ensure compliance by WellCare and its associates, subcontractors and providers with applicable federal and State laws, regulatory requirements and standards through:

- Written corporate policies and procedures, developed to provide guidance and internal controls on

matters affecting legal and regulatory compliance issues

- Compliance training programs, conducted to ensure that policies, procedures and related compliance concerns are clearly understood and followed by all WellCare officers, associates and directors
- Open lines of communication for WellCare associates, members and others to easily and confidentially/anonymously ask questions or report suspected violations of company policies or of legal and regulatory requirements without fear of retaliation
- Internal attestation process to ensure information provided to government agencies through RFP responses and reports is accurate, timely and complete
- Prompt investigation of reported concerns and the implementation of effective corrective action when required
- Periodic audits and routine monitoring of business operations to measure and assess WellCare's compliance with internal controls and with applicable federal and state laws, regulations and guidance
- Clear and specific disciplinary policies that address violations and promote accountability

WellCare's Compliance Program applies to WellCare and its direct and indirect subsidiaries and covers our Medicare, Medicaid and state-based programs. When required, WellCare notifies and obtains federal or state regulatory agency approval for changes to the compliance plan.

Code of Conduct and Business Ethics

The Code of Conduct and Business Ethics is the foundation of our Compliance Program. It describes WellCare's commitment to operate in accordance with the laws and regulations governing our business and accepted standards of business integrity.

Everyone in WellCare's organization must adhere to the Code at all times. Officers, associates and directors are required to acknowledge that they have reviewed the Code and will carry out their responsibilities lawfully and according to WellCare policies.

Under the Code, WellCare associates have an obligation to report suspected compliance violations. Associates are required to play an active role in preventing and eliminating fraud, waste and abuse and other program violations, and must speak up when they become aware of a possible compliance violation. The Code contains a strong non-retaliation policy on behalf of associates to encourage them to come forward if they become aware of possible compliance violations.

The Code of Conduct and Business Ethics is reviewed and approved annually by the Board of Directors. The Code is available to associates through the WellCare intranet and to the public on WellCare's website.

Policies and Procedures

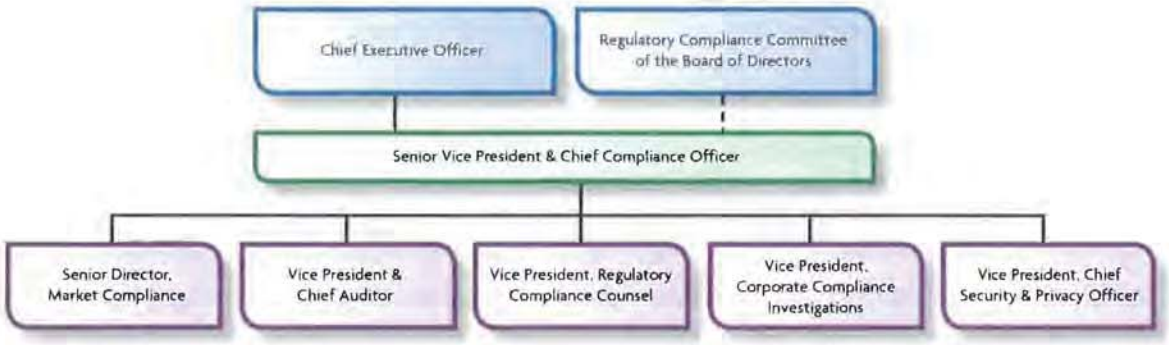
Our Compliance Program is carried out through a comprehensive system of internal policies and procedures that address day-to-day compliance risks and help reduce the prospect of fraudulent, wasteful and abusive activity by identifying and responding to specific risk areas. All corporate departments and local plans are responsible for developing written policies and procedures that address areas of compliance risk in their business units and/or markets. These policies and procedures must be reviewed by the Corporate Policy and Procedure team and provided to all affected associates. Because risk areas evolve and change over time, our policy is to review our policies and procedures not less than annually and to revise them periodically as necessary to keep them up to date with laws and practices.

Organization and Oversight

WellCare's administrative structure emphasizes the importance we place on compliance. As explained in further detail below, WellCare's Board of Directors has had a standing committee dedicated to compliance, the Regulatory Compliance Committee (RCC), since 2008. WellCare's Chief Compliance Officer (CCO) is an executive-level officer that reports directly to WellCare's Chief Executive Officer

(CEO) and the RCC. WellCare's Compliance Department is currently staffed by 136 associates dedicated to ensuring WellCare's operations are conducted with the highest level of integrity and in compliance with all laws and regulations. Please see **Figure 1** below for a high-level organizational chart for our Compliance department.

Figure 1



The Chief Compliance Officer

WellCare's CCO is an executive officer of WellCare who reports directly to WellCare's CEO and to the RCC. The CCO oversees and directs the Compliance Program throughout the organization and is responsible for ensuring that the program's goals are achieved and maintained. The CCO also is responsible for the oversight and monitoring of compliance with Medicaid and state-based programs, Medicare Advantage and Medicare Part D program requirements, compliance training and education, privacy and information security compliance, investigation of compliance and regulatory violations, and the detection and prevention of fraud, waste and abuse by members, subcontractors and providers. The CCO also serves as the point of contact for WellCare associates regarding compliance concerns or violations.

Committee Oversight and Structure

The WellCare Board of Directors is responsible for the overall organization and performance of the Compliance Program through the RCC. The RCC is currently comprised of four independent directors and meets on a quarterly basis, or more frequently as needed. The RCC reviews and evaluates reports from the CCO and independent sources and initiates actions as it deems necessary to promote the overall effectiveness of the program. Consistent with best corporate governance practices, the RCC also evaluates the results of a compliance program effectiveness assessment annually to review and assess the structure, operation and efficacy of the Compliance Program.

The Corporate Compliance Committee (CCC), established by the WellCare Board of Directors and chaired by the CCO, oversees the operations of WellCare's Compliance Program through an established program charter and serves as a resource to the CCO. The CCC is comprised of senior executives throughout the company. The principal purpose of the CCC is to ensure the development and implementation of an effective corporate ethics and compliance program for all WellCare lines of business, including Medicaid and state-based programs, Medicare Advantage and Medicare Part D, and to oversee the activities of the WellCare Compliance department. In addition, the CCC is tasked, with assistance from the CCO and the Compliance department, with advising, reporting to and supporting the RCC in performing its responsibilities. Generally, but at least three times per year, the CCC through the CCO will update the RCC regarding the activities and status of the Compliance Program, including issues identified, investigated and resolved through the Compliance Program. Additional updates are provided as necessary.

Compliance Liaisons and Market Compliance Oversight Committees

WellCare recognizes that in order for its Compliance Program to be truly effective it must be implemented at the local level as well as the corporate level. Our associates located in Nebraska will be the best situated to recognize compliance risks that may arise locally. Therefore, in our Medicaid markets we have established the position of Compliance Liaison (also known as a Director of Market Compliance) and/or local Market Compliance Oversight Committees. We anticipate both hiring a Compliance Liaison and establishing a Market Compliance Oversight Committee in Nebraska.

The Compliance Liaison assists the CCO with the implementation of policies, procedures, and practices designed to ensure compliance with the requirements set forth in applicable federal and State laws, regulations, health care program requirements and plan contracts. The Compliance Liaison serves as the contact for the CCO for compliance and ethics activities in WellCare's principal plans. The Compliance Liaison also functions as the local contact for the Compliance department's functional units and serves as a local resource for identifying, tracking, mitigating and reporting on operational compliance risks.

Market Compliance Oversight Committees provide local Compliance Program oversight, risk assessment and business engagement, and provide a forum for open communication and coordination of local and corporate compliance matters, regulatory notices and changes. Each Market Compliance Oversight Committee is chaired by the local Compliance Liaison and consists of the plan President and leaders of Regulatory Affairs, Government Affairs, Network Management, Provider Operations, Provider Relations, Sales, Operations, Health Services, Human Resources and any other members as the Market Compliance Oversight Committee may designate. Through the Market Compliance Oversight Committee, visibility is provided to the CCO and Corporate Compliance staff on market compliance concerns and day to day activities in the markets.

The Compliance Department

The Compliance department staff has responsibility for the oversight of WellCare's compliance performance, including risk assessment, compliance policy development, education, investigations of alleged violations, oversight and response to incidents of non-compliance and auditing. The department includes units concentrating on compliance investigations, policies and training; regulatory compliance; HIPAA privacy and security; record and information management and our Compliance Liaisons.

Training and Education

WellCare conducts mandatory compliance training upon hire and annually for all associates, officers and directors. All associates are required to take over 10 hours of compliance training annually. The program includes certification to the Code, general compliance training, which includes training on fraud, waste and abuse, as well as mandatory courses on fraud, waste and abuse and HIPAA privacy and security. Associates who are responsible for specific functions or services related to Medicare and Medicaid business areas receive additional specialized training on issues which may pose unique compliance risks, and many associates are required to take more based on their job functions. Completion of compliance training is tracked through an automated system. The system sends reminders to associates and alerts associates' supervisors as training due dates approach. Failure to complete this training in a timely fashion results in disciplinary action as documented in our Associate Handbook.

WellCare also oversees delegated entities to ensure that their personnel performing work for us or interacting with our members receive compliance training and guidance and have reporting mechanisms to respond to suspected or identified fraud, waste or abuse.

WellCare maintains and updates, as appropriate, the curricula of general and specialized compliance training programs to educate all impacted parties on the requirements of federal and State laws, regulations and guidance and to detect possible violations.

Compliance Reporting and Investigations

WellCare's compliance reporting and inquiry system assures efficient and confidential communication between and amongst the Compliance department, the CCO, associates, officers and directors, agents, first tier, downstream, and related entities, members and other company stakeholders.

WellCare's Compliance Hotline and web portal are central components of WellCare's compliance reporting and inquiry system. By accessing the Compliance Hotline or web portal, associates and others can report compliance program violations at any time. Hotline calls and web entries are reviewed and addressed by Compliance department staff with the assistance of department or area managers (e.g., Legal, Human Resources and Finance) as necessary. Consistent with compliance best practices, the web portal is hosted by an independent third party vendor, ensuring complete anonymity when desired by the reporter.

Associates are obligated to report actual or suspected violations of law or of the Code or other WellCare policies. The availability of the Hotline and web portal is publicized to the WellCare community through the Code, office posters and our intranet. Hotline activity is reviewed regularly by the CCC. Callers who report violations may remain anonymous upon their request.

Associates also may raise compliance questions with or report a suspected violation to:

- Their immediate supervisor
- The Human Resources department
- The Chief Compliance Officer
- Compliance Liaisons
- The Chief Legal Officer
- The Chief Auditor

Matters reported through the Compliance Hotline or other communication sources that suggest violations of our policies, federal or State health care program requirements or applicable laws are investigated promptly to determine their veracity and significance. Depending on the nature of the issue, an investigation may be conducted with the assistance of the Legal department or outside counsel.

WellCare maintains a non-retaliation policy strictly prohibiting retaliation against any individual who in good faith reports a possible ethics violation or compliance concern.

WellCare reports suspected or confirmed cases of fraud, waste and abuse, violations of the False Claims Act or potential fraud or misconduct to appropriate law enforcement agencies, the Centers for Medicare & Medicaid Services ("CMS") or its designee and/or other State or federal government agencies as described in WellCare's policy on fraud, waste and abuse in accordance with applicable program requirements.

Internal Attestations

WellCare is committed to submitting fair, truthful, accurate and complete bids to participate in Medicaid programs and other federal and state health care programs. We have implemented processes and procedures designed to ensure the integrity and accuracy of our bids. As part of our bid process, each WellCare associate, consultant and/or contractor who submits material information or data to be included in our bid, must certify that the information he or she submitted is fair, accurate, truthful and complete. These attestations are collected and tracked through Compliance 360, a compliance and risk management system.

WellCare recognizes that government agencies rely on the information it provides through the lives of its contracts and has adopted other specific policies and procedures to ensure report integrity. These policies and procedures ensure that reports are appropriately reviewed, validated, certified and approved prior to

their submission to any regulatory agency. The purpose of these policies and procedures is to help ensure that all submissions are accurate, complete, timely submitted, compliant and in accordance with all governing contractual provisions and the underlying laws and other requirements.

Auditing and Oversight

The Corporate Audit & Oversight department is comprised of our Enterprise Risk Management, Internal Audit, Compliance Oversight, and Delegation Oversight teams.

The Chief Auditor is responsible for leading Corporate Audit & Oversight and reports functionally to the Audit and Finance Committee of WellCare's Board of Directors and has a dotted line reporting relationship to both WellCare's Chief Financial Officer and Chief Compliance Officer. This reporting relationship is intended to promote the independence of Corporate Audit & Oversight, comprehensive audit coverage, and appropriate coordination with the other activities of management and our independent external auditor. The CCO also provides functional leadership to the Corporate Audit & Oversight team activities that focus on WellCare's compliance with State and federal laws and regulations.

Audits may be conducted as part of an investigation of a reported issue or as a proactive means of monitoring regulatory compliance in areas of actual or potential risk. Specific to compliance, Corporate Audit & Oversight provides independent, objective assurance designed to add value and improve WellCare's operations by bringing a systematic and disciplined approach to evaluating the effectiveness of our control, risk management, and compliance processes. Through audit procedures including observation, inquiry and sample testing; Internal Audit's evaluations are designed to provide reasonable assurance that our network of control, risk management and compliance processes, as designed and represented by management, are in all material respects adequate and functioning in a manner to help ensure the following:

- Significant financial, managerial, and operating information is accurate, reliable, and timely
- Significant risks are appropriately identified and managed
- WellCare and its associates comply with corporate, State, federal and regulatory requirements including applicable policies, standards, procedures, contracts, laws and regulations

Corporate Audit & Oversight also provides senior management with reasonable assurances that WellCare remains compliant with State and federal guidelines by supporting each functional business area with compliance enforcement through monitoring, oversight, and appropriate response to incidents.

Corporate Audit & Oversight issues formal reports that identify opportunities to improve management controls and compliance. Audit reports are distributed to the Audit and Finance Committee of the Board of Directors. Department management and senior leadership, including the CCO, also receive the audit reports. Management's action plans (MAPs) to mitigate identified risks are outlined in the report. Corporate Audit & Oversight monitors MAPs to completion.

In addition to our internal audits, under our Corporate Integrity Agreement, which is discussed in greater detail in our response to Question 3, an independent review organization (IRO) reviews and analyzes a selection of bid submissions each year. Among other things, the IRO assesses the accuracy and completeness of the select bids and produces recommendations aimed at continuously improving WellCare's bid submission systems and processes.

Compliance Program Enforcement

If an investigation, regulatory audit or monitoring process identifies a compliance issue, the Compliance department works closely with the affected area or department to promptly resolve the issue and take necessary corrective action, including timely and appropriate disciplinary action.

Discipline

WellCare maintains a strict disciplinary policy for compliance violations. Individuals who have violated laws, regulations, CMS and/or State guidance or WellCare policies are subject to disciplinary action, up to and including termination of employment and, where appropriate, potential referral for criminal prosecution. Likewise, such violations by subcontractors may result in the termination of their contractual relationship with WellCare.

Screening for Excluded Parties

WellCare, through a third party vendor, screens current and new associates, contractors, sales representatives and agents against the Department of Health and Human Services Office of Inspector General's List of Excluded Individuals/Entities, the General Service Administration's System for Award Management and applicable State exclusion lists. WellCare will not hire or retain an associate, contractor, sales representative or agent who is excluded, debarred or suspended from participating in federally funded programs. Health care providers are also screened against these lists using an internal process.

Detecting and Preventing Fraud, Waste and Abuse by Members, Subcontractors and Providers

WellCare's Special Investigation Unit (SIU) is responsible for the detection, prevention, investigation, reporting, correction and deterrence of fraud, waste and abuse by members, subcontractors and providers. The SIU reports to the CCO and is charged with implementing our Fraud, Waste and Abuse Plan. Suspicions of fraud, waste or abuse can be reported to the SIU anonymously through a designated SIU Hotline or electronic communication. More detailed information regarding our SIU is included in our response to Question 93 of this RFP.

Information Security and Privacy Office

The purpose of the WellCare Information Security and Privacy Office is to manage privacy, security, and records and information management (RIM) compliance requirements. Privacy and security is managed in accordance with the Health Insurance Portability and Accountability Act (HIPAA), as amended to date including by the Health Information Technology for Economic and Clinical Health (HITECH) Act, HIPAA's implementing regulations and State requirements. RIM is managed in accordance with the generally accepted recordkeeping principles set forth by ARMA International.

The mission of the WellCare Information Security and Privacy Office is to serve as a central resource for the privacy, security, and retention of member data and company records and to provide leadership in the development of programs and practices to meet relevant requirements and standards. The Information Security and Privacy Office is responsible for ensuring our policies around the protection of protected health information (PHI) are consistent with federal and State legislation. The major roles of the Information Security and Privacy Office include:

- Development, implementation and on-going management of WellCare's Information Security, Privacy, and RIM Compliance Program and governance process
- Oversight of development and monitoring of information security, privacy, and RIM compliance policies and procedures
- Development and monitoring of information security, privacy, and RIM compliance education and training programs
- Development and implementation of effective lines of information security, privacy, and RIM Compliance Program communications and reporting mechanisms
- Development and implementation of appropriate oversight committees and/or procedures to enforce sanctions and disciplinary actions for violations of information security, privacy, and RIM regulations or policies
- Monitoring and auditing for ongoing compliance

- Investigation of reported and detected non-compliance incidents and development of corrective action initiatives

The development, implementation and maintenance of organizational procedures in support of corporate information security and privacy policies are the responsibility of covered departments and business areas. Likewise, ongoing operational compliance is a department/business area responsibility. The Information Security and Privacy Office monitors compliance activities, advises on compliance concerns, investigates potential areas of noncompliance and reports on compliance issues.

IV.C BUSINESS REQUIREMENTS

11. Describe how the bidder meets the Federal definition of a MCO. Include a copy of the COA from the Department of Insurance. *(Page limit 1 page, excluding copy of COA)*

HOW WELLCARE OF NEBRASKA MEETS THE FEDERAL DEFINITION OF AN MCO

The Code of Federal Regulations [42 C.F.R. § 438.2] defines a managed care organization (MCO) as either a federally-qualified HMO or an entity that (A) meets prescribed advance directives requirements, (B) "[m]akes the services it provides to its Medicaid enrollees as accessible (in terms of timeliness, amount, duration, and scope) as those services are to other Medicaid beneficiaries within the area served by the entity" and (C) meets certain solvency standards.

While WellCare of Nebraska is not a federally-qualified HMO, it will meet the federal definition of an MCO as an entity that meets the conditions of 42 C.F.R. § 438.2(2) summarized above.

A. Advance Directive Requirements

WellCare maintains written policies and procedures regarding advance directives with respect to adults receiving care through our plans. Among other items, we require that information regarding advance directives be included in member handbooks and that a member's advance directive be maintained in his or her medical record. The advance directive information in our member handbooks explains the member's rights to make decisions relating to his or her medical care.

WellCare also recognizes the need to educate its staff and its providers regarding advance directives. WellCare includes education regarding advance directives as part of its ongoing training of relevant staff. WellCare also includes in its provider handbook information for providers regarding advance directives and their responsibilities relating to advance directives.

B. Accessibility

Our goal is to maintain a provider network that makes services available to our Medicaid members in excess of required access and availability standards where possible. Our provider networking team monitors the network on a continuous basis to identify any gaps in access and availability and seeks to recruit additional providers as may be necessary. Where there are gaps, we seek to enter single case agreements to ensure our members have access to all medically necessary services. In this way, WellCare ensures that the services its network provides to its Medicaid members are as accessible (in terms of timeliness, amount, duration, and scope) as those services are to other Medicaid beneficiaries within the areas served by WellCare's plans.

C. Solvency

As demonstrated by the financial statements submitted for the Corporate Overview of this response, WellCare is an established and financially strong company with sufficient resources to support Medicaid operations in Nebraska. WellCare will transfer to WellCare of Nebraska sufficient capital to meet statutory minimum levels and risk-based capital requirements and, more importantly, to ensure WellCare of Nebraska is able to operate without becoming insolvent. WellCare monitors compliance with the minimum capital requirements on a quarterly basis and to the extent additional capital contributions are needed, WellCare will infuse capital to maintain compliance.

CERTIFICATE OF AUTHORITY

Please find attached as **Attachment 11a_Certificate of Authority Attestation** WellCare of Nebraska's attestation relating to its Certificate of Authority.

Certificate of Authority Attestation

This attestation is provided pursuant to Section IV(C)(3) of Request for Proposal 5151 Z1 issued by the State of Nebraska, Administrative Services, Materiel Division, State Purchasing Bureau, on October 21, 2015. WellCare of Nebraska, Inc. ("WellCare of Nebraska") hereby attests that it will obtain a Certificate of Authority to transact the business of health insurance in Nebraska as a health maintenance organization prior to executing a contract with MLTC. WellCare of Nebraska further attests that it submitted its application for a Certificate of Authority on November 6, 2015.

WELLCARE OF NEBRASKA, INC.

By: David T. Reynolds

David T. Reynolds, President

IV.C BUSINESS REQUIREMENTS

12. Describe the MCO's proposed approach for collaboration with other entities and programs, as required in Section IV.C.6 *(Page limit 3 pages)*

PARTNERSHIP: A CORE VALUE OF WELLCARE THAT DRIVES OUR APPROACH TO COLLABORATION

WellCare is guided by four core values: Accountability, Integrity, Partnership and Teamwork. The value of Partnership underscores our approach to building collaborative working relationships across the array of stakeholders within each of the states that we serve. In Nebraska, we have spent the past year working to form collaborative partnerships meeting with more than 100 stakeholder organizations. This investment has allowed us to learn about existing challenges and opportunities and develop strategies for collaborating on large-scale initiative as well as addressing individual member needs.

In addition to partnering directly with agencies and organizations, WellCare's commitment to partnership is supported by our practice and commitment to:

- Hire locally and place individuals in the communities in which our members live and work
- Have a physical presence throughout the state, with offices in Lincoln, Omaha, Kearney, Scottsbluff and Norfolk from which to engage and collaborate with all stakeholder groups
- Designate points of contact for collaboration with entities and programs that serve our members

FORMAL COLLABORATION: DEFINING PROCESSES AND PROCEDURES AND DESIGNATING POINTS OF CONTACT

In addition to the natural relationship building that occurs as a result of our hiring, physical presence and designated points of contact practices, we will also develop formal collaboration processes and procedures with several key stakeholder partners serving Heritage Health members.

Division of Behavioral Health Funded Programs

To inform our approach to working with programs funded through the Division of Behavioral Health (DBH), we met with Division of Behavioral Health leadership, two of the state's Regional Behavioral Health Authorities, several stakeholders engaged in the Behavioral Health system including the Nebraska Association of Behavioral Health Organizations (NABHO) and Children and Family Coalition of Nebraska, for example. We also met with providers engaged in the system such as Centerpointe. Because Behavioral Health funded programs tend to work both with Medicaid members and individuals without health coverage and cared for through state and federal programs, WellCare recognizes the critical importance of alignment among payer sources to build a sustainable continuum of care. Some select strategies we will bring to this endeavor include:

- Dedicated behavioral health field-based and telephonic behavioral health care managers who will work across agencies as needed to coordinate care for members with high levels of need, such as members discharging from state psychiatric hospitals or coming out of incarceration
- Clinical Liaison positions to assist, as needed, organizations already providing care coordination for members to prevent duplication of efforts
- Collaborate and on-going engagement between our local Behavioral Health clinical and executive leadership and NABHO including attendance at their meetings as requested
- Collaborate with Regional Behavioral Health Authorities with field-based staff in markets across the state to participate in community-based councils or other stakeholder engagement opportunities
- Representation of Behavioral Health funded programs on our provider and member advisory committees, as well as other quality committees

- Development of a Behavioral Health Advisory Subcommittee of the Provider Advisory Committee with regular and formal interaction and feedback opportunities

Division of Children and Family Services funded programs

To inform our approach to working with programs funded through the Division of Children and Family (DCFS) Services funded programs, we met with several of the largest stakeholders in that system including Boys Town, the Children and Family Coalition of Nebraska, Children's Hospital and Medical Center in Omaha, Appleseed, the Child Guidance Center and others. Nebraska's challenge of having the highest rate of children in foster care, including high rates of children in out-of-home or residential placement is a unique one for managed care organizations that requires a unique set of solutions and a robust approach to collaboration and partnership. ***Because of this, we are proposing a dedicated Foster Care Care Management team with care management staff specially trained in the unique behavioral, physical, pharmacy and social needs of foster children and in working with DCFS, the courts and other advocates in the best interest of foster care children.*** Other strategies to collaborate with DCFS-funded programs include:

- Conducting clinical "Grand Rounds" on a regular schedule with DCFS representatives to discuss challenging cases with an intense focus on moving children into community-based services
- Having care managers who can work with the state's Bridge to Independence Program for Transition Age Youth to ensure our members achieve and maintain independence
- Collaborate with MLTC and DCFS through examination of data analytics to identify best practices and implement system of care principles and services to help reduce the number of youth in out of home placement
- Participate in all DCFS stakeholder and community-based meetings and events in Nebraska urban, rural and frontier communities through our staff members located throughout the state

Division of Developmental Disabilities programs

Through our meetings with the ARC of Nebraska and leadership of the Division of Developmental Disabilities (DDD) within the Department of Health & Human Services (DHHS), we have been building our understanding of the state's developmentally disabled population and the services provided to them. We recognize that our Heritage Health membership will include individuals with developmental disabilities and, while we won't manage their home and community based waiver or institutional services, we will be helping to coordinate care for various behavioral and physical health care services. Our strategies to collaborate with these programs include:

- Working with Beatrice State Developmental Center as requested for members transitioning out of institutional care who have co-morbid physical and/or behavioral health needs
- Training care managers on the unique needs of individuals with developmental disabilities
- Having Clinical Liaison positions to assist, as needed, organizations already providing care coordination for members to prevent duplication of efforts
- Engaging in formal council meetings with ARC and DDD as invited

Nebraska Department of Education Early Development Network

One of our early meetings in Nebraska was with the Buffet Early Childhood Institute at the University Of Nebraska in Omaha where we learned about the array of initiatives under way in the state to promote healthy development in the early stages of children's lives. Our care management model, as well as partnerships with providers, is built to help rapidly identify children who can benefit from early intervention for special health conditions that can affect their development. Other strategies to work with the Nebraska Department of Education Early Development Network (EDN) include:

- Robust promotion and monitoring of the EPSDT periodicity schedule and guidelines with our provider offices and members to ensure children are identified and referred to EDN appropriately
- Developmental of formal referral process within our care management program should a member appear eligible for EDN services
- Ideally, we would like to develop a reciprocal relationship between EDN and WellCare so members engaged in either or both programs receive unduplicated but thorough coordination services
- Training of member services and community advocacy staff of EDN's offerings
- Inclusion of EDN as a resource in the member handbook, on our member website and in other materials as appropriate

Community Agencies (i.e. Areas Agencies on Aging and League of Human Dignity Waiver Offices)

Through our Health*Connections* model, we have been engaging in Nebraska for more than a year, including meeting with a broad array of Community Agencies including, but not limited to Community Action Agencies, Area Agencies of Aging, Clyde Malone Community Health Center, Sienna Francis House and several others. We have awarded nearly $10,000 in micro-grants to agencies focused on programs that address social determinants of health for our members such as homelessness, food insecurity, and behavioral health needs. Strategies we use to further collaborate with community agencies include, but are not limited to:

- Establish Health*Connections* Councils in communities across the state. These Councils are community-based planning councils that focus on issues affecting the social safety net and its viability and sustainability, including health and treatment disparities.
- Develop Business Associate Agreements with organizations to formalize the referral process for members, coordinate care and specifically track outcomes.
- Populate our exclusive database of community resources (we already have about 5,000 entries for Nebraska in our database).
- Implement our CommUnity Assistance Line and promote it within our organization to assist members and with our agency partners to help connect members to social services.
- Conduct and or attend periodic meetings for various agencies and advocacy groups including the National Association of Area Agencies on Aging (n4a).

Office of Probation

WellCare has been following closely the discussions about care for individuals coming out of the prison system, particularly as it relates to behavioral health. The L.R.295 Interim Study has highlighted ongoing challenges of working with this population. Given the nature of transient eligibility for people engaged in the penal system, it's imperative that MCOs work closely with Probation and other stakeholders in that system to understand triggers for eligibility and ineligibility, care needs and resources available. Some strategies include:

- Train WellCare associates on the unique needs of members coming out of the penal system
- Partner with the Office of Probation and others who work with this population on our CommUnity assistance line to help connect members with social services to strengthen their transition
- Include representatives from the Office of Probation in stakeholder engagement opportunities

IV.C BUSINESS REQUIREMENTS

13. Describe if any of the MCO's Medicaid MCOs are accredited by NCQA and, if not currently accredited in Nebraska, how it will attain accreditation for its Nebraska MCO. Please describe any unsuccessful accreditation attempts in other states. *(Page limit 1 page)*

WELLCARE'S MEDICAID ACCREDITATIONS

WellCare is committed to continuous quality improvement both in our own internal operations as well as in the care delivered through our provider networks. Of our eight currently accredited Medicaid plans, two have achieved an NCQA status of Commendable, demonstrating our commitment to holistic, patient-centered, high-quality care to our members. To date, WellCare has been successful ineach of its attempts to gain accreditation for its Medicaid plans. **Figure 2** below shows our current accreditations.

Figure 2

PLAN	STATE	CURRENT ACCREDITATION STATUS
WellCare of Georgia, Inc.	Georgia	Commendable
WellCare of New York, Inc.	New York	Commendable
Harmony Health Plan of Illinois, Inc.	Illinois	Accredited
Missouri Care, Incorporated	Missouri	Accredited
'Ohana Health Plan, Inc.	Hawaii	Accredited
WellCare of Florida, Inc.	Florida	Accredited
WellCare of Kentucky, Inc.	Kentucky	Accredited
WellCare of South Carolina, Inc.	South Carolina	Accredited

Our ninth Medicaid plan operates in the state of New Jersey. Our New Jersey plan is currently deploying our established quality infrastructure locally in order to start the accreditation process. It is expected to achieve NCQA accreditation in 2016.

As outlined in the RFP, WellCare of Nebraska will initiate the NCQA accreditation process as soon after the contract's award date as allowed by NCQA and will achieve NCQA accreditation within 18 months of the contract award. WellCare already holds a corporate NCQA certification for the centralized functions of credentialing, utilization management, case management, disease management and appeals. These centralized functions apply to all of WellCare's plans, including WellCare of Nebraska.

WellCare's corporate NCQA Accreditation team will bring its experience and expertise to the accreditation process for WellCare of Nebraska. However, WellCare recognizes that each state is unique, with its own membership, culture and practices and does not believe that a "one size fits all" approach is best for serving members. The NCQA Accreditation team works collaboratively with each affiliate's local leadership to help the plan attain and maintain accreditation in the manner best suited for that state and their local members. Among other functions, the team provides guidance on quality measures, helps to ensure plans meet or exceed accreditation standards and audits files from internal departments such as Utilization Management, Case Management, Appeals and Pharmacy to identify areas of opportunity to improve accreditation scores. In addition, each plan designs interventions appropriate for its populations in order to improve the quality of care received by members and thereby increase its HEDIS scores. WellCare also partners with external NCQA consultants to hold mock NCQA audits and summits, in which we review all plan documentation and discuss methods for meeting and exceeding accreditation standards.

IV.C BUSINESS REQUIREMENTS

14. If applicable, describe any restriction of coverage for counseling or referral services the MCO is required to provide because of moral or religious obligation. Describe how the MCO will provide members with access to those services. *(Page limit 1 page)*

NO RESTRICTION ON COVERAGE FOR COUNSELING OR REFERRAL SERVICES

WellCare will not impose any restriction of coverage for counseling or referral services it is required to provide because of moral or religious obligation.

IV.D STAFFING REQUIREMENTS

15. Describe the organization's number of employees, lines of business, and office locations. Submit an organizational chart showing the structure and lines of responsibility and authority in the company. Include the organization's parent organization, affiliates, and subsidiaries that will support this contract.

(3 Page limit)

EXPERTISE IN GOVERNMENT HEALTH CARE PROGRAMS DRIVING OUR NEBRASKA APPROACH

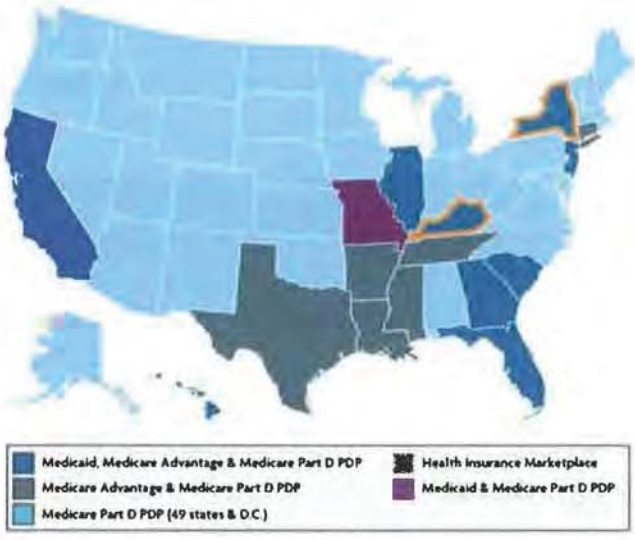
From a structural perspective, WellCare's success is founded on our local approach. We establish a state-based workforce to maximize accessibility for our members, providers, and our government clients. We then complement the local team with support through our robust corporate shared services organization, including claims processing, call center administration and information systems. Through substantial demonstrated experience gained through operations of WellCare's Medicaid footprint, WellCare of Nebraska is well-positioned to deliver on its contractual commitments to the State of Nebraska.

Lines of Business: A Focused Experience

Figure 1

Company Snapshot

OUR PRESENCE



Data is per the last reported quarter ending June 30, 2015
All numbers are approximated
Updated September 18, 2015

Founded in 1985 in Tampa, Fla.:
- Serving 3.8 million members nationwide.
- 339,000 contracted health care providers.
- 70,000 contracted pharmacies.

Serving 2.4 million Medicaid members, including:
- Aged, Blind and Disabled (ABD).
- Children's Health Insurance Program (CHIP).
- Family Health Plus (FHP).
- Supplemental Security Income (SSI).
- Temporary Assistance for Needy Families (TANF).

Serving 1.4 million Medicare members, including:
- 349,000 Medicare Advantage members.
- 1 million Prescription Drug Plan (PDP) members.

Serving the full spectrum of member needs:
- Dual-eligible populations (Medicare and Medicaid).
- Managed Long Term Care (MLTC).

Spearheading efforts to sustain the social safety net:
- The WellCare Community Foundation.
- Advocacy Programs.
- Creation of Public-Private Partnerships.

Significant contributor to the national economy:
- A FORTUNE 500 and Barron's 500 company.
- 6,600 associates nationwide.
- Offices in all states where the company provides managed care.

We have more than 20 years of experience focused on economically disadvantaged populations and government-sponsored health care. (**Figure 1**)WellCare's specialized focus in government-sponsored health care, and particularly in Medicaid, is unique and remains at the heart of what we do. Our technical expertise in product development, administrative processing, care management, and information technology systems and infrastructure is focused on providing precisely the types of services sought for Nebraska's Heritage Health program. The following shows our lines of business and demonstrates the depth and breadth of our government-sponsored health care program experience and capabilities:

- **Medicaid**
  - We operate Medicaid plans in nine states: Florida, Georgia, Hawaii, Illinois, Kentucky, Missouri, New Jersey, New York and South Carolina
  - We provide patient-centered managed care services to 2.4 million Medicaid members across the full spectrum of eligibility groups including, but not limited to, Aged, Blind and Disabled (ABD), those in home and community based services (HCBS) waivers, foster care, Children's Health Insurance Programs (CHIP), Temporary Assistance to Needy Families (TANF), supplemental security income (SSI), and long-term services and supports (LTSS) populations
- **Medicare**
  - We serve 1 million Medicare Part D members
  - We serve 349,000 Medicare Advantage members. Over one-half of our Medicare members are dually eligible
- **Insurance Marketplace:** We also offer marketplace products in Kentucky and New York.

Number of employees and office locations

Through our extensive experience, we have built a team of associates who put the needs of our members at the forefront of our planning and operational execution. ***We have 6,600 associates serving our members across our entire enterprise (Figure 2).*** These associates are carefully selected and rigorously trained to meet the complex needs of our members. The table below illustrates our commitment to offering a locally-based and staffed plan in each market. Each local plan has its own organizational structure and accountabilities and is supported by a corporate structure that is closely aligned. The size and need of the populations being served dictates the numbers of associates and regional offices or Welcome Rooms that we have dispersed across the state. The physical geography of the state coupled with the scope of our plan (statewide or regional) are also critical factors in the numbers of offices we locate within each state. We believe that "brick and mortar" accessibility for our members is instrumental in our being able to meet their needs and address their concerns.

Figure 2

WellCare Locations			
WellCare Medicaid Market	**Main Headquarters Location**	**Number of Additional Support Offices**	**Number of Staff Located in the Market**
Florida	Tampa, Florida	19	534
Georgia	Atlanta, Georgia	4	305
Hawai'i	Kapolei, Hawai'i	3	210
Illinois	Chicago, Illinois	0	110
Kentucky	Louisville, Kentucky	6	230
Missouri	Columbia, Missouri	1	95
New Jersey	Newark, New Jersey	0	130
New York	New York, City	16	670
South Carolina	Columbia, South Carolina	1	60
WellCare's total number of associates for all lines of business in all locations is 6,000.			

WellCare's main headquarters is located at 8725 Henderson Road in Tampa, Florida. Primary plan operations for WellCare of Nebraska, Inc. will be conducted in Nebraska. We believe that a local presence is the key to both successful implementation and ongoing operations but more importantly, local service to our members and providers has a positive impact on quality and availability of member care.

As you will see in the enclosed bid proposal, we will maintain five locations throughout Nebraska employing highly engaged, locally-based clinical services, community outreach, quality management, compliance, and provider relations staff. Our Nebraska office is currently at 1299 Farnam St., Suite 300 in Omaha. Should we be awarded a Heritage Health contract, we would locate our Nebraska headquarters in Lincoln and have Welcome Rooms in Omaha, Kearney, Norfolk and Scottsbluff.

Our Nebraska staff members will be dedicated exclusively to caring for WellCare of Nebraska members and meeting the requirements of the contract. We will develop a diverse workforce that meets the needs of the populations we serve. Our local operations will be supported by corporately-supplied resources and shared service operations which provide scale, eliminate redundancy and offer added security and support, which will be particularly important in the months leading up to the anticipated start date and throughout the first year of implementation. With our scalable infrastructure, government programs competency and strong community linkages, we are prepared and uniquely positioned to serve Medicaid members throughout the state. This model enables us to best serve our members but also provides a direct economic impact to the state of Nebraska through salaries and facility costs.

Parent Organization and affiliates

As is common in the industry, WellCare consolidates its core operations in one management company – Comprehensive Health Management, Inc. (CHMI). On behalf of the WellCare group of companies, CHMI employs all of our associates, including those based locally in the states in which we operate. CHMI also holds leases to all real estate and/or office space, owns the personal property, and maintains the key vendor contracts (e.g., information technology systems, pharmacy benefit manager) for the enterprise. The CHMI management services structure ensures effective and appropriate decision-making with a span of control that aligns scope of authority with responsibilities as well as accountability. WellCare's organizational structure is reflected on the attached organizational chart (**Attachment 15_Organizational Chart**).

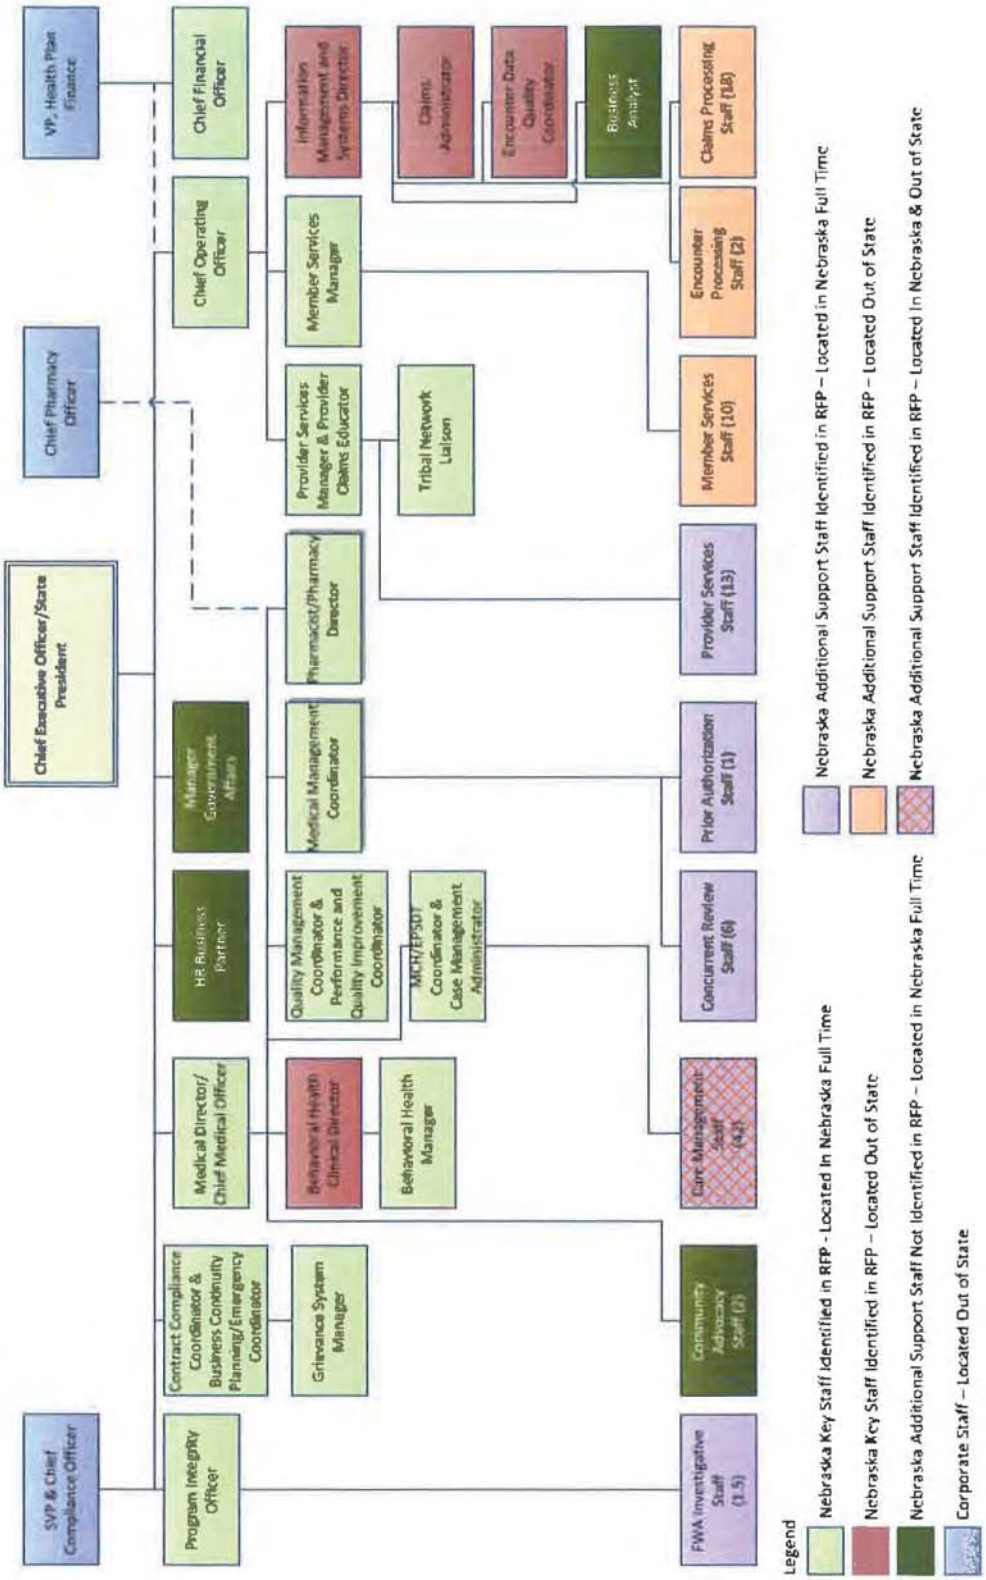
IV.D STAFFING REQUIREMENTS

16. Provide an organizational chart for this contract, including but not limited to key staff and additional required staff. Label this "Nebraska Organizational Chart"

Heritage Health members will have dedicated, experienced staff working throughout the state of Nebraska to help them achieve their best health. As the organizational chart on the following page (**Figure 3**) indicates, WellCare of Nebraska will have key, additionally required and supplemental staff sufficient to fulfill all contract requirements and deliver best in class care to its members.

Figure 3

Nebraska Organizational Chart



IV.D STAFFING REQUIREMENTS

17. In table format, indicate the proposed number of FTEs for each key staff and additional required staff for discrete time periods (no longer than 3 month intervals) from contract award through 6 months after the start date of operations and whether or not positions are located in Nebraska. Label this table "Proposed FTEs by Time Period."

Proposed FTEs by Discrete Time Period for each key staff and additional staff. **(Figure 4)**

IV.D STAFFING REQUIREMENTS

18. Provide job descriptions (including education and experience qualifications) of employees in key staff positions. *(Page limit 1 page per job description)*

WellCare is committed to hiring and retaining a highly productive, customer-oriented, engaged workforce. Our systemic recruitment process is highly selective and ensures that experienced, well-trained personnel will be provided to support implementation and ongoing administration of Nebraska's Heritage Health program.

Please see the following one page documents for the job descriptions which correspond with key staff positions.

Chief Executive Officer

GENERAL JOB INFORMATION

Title: Chief Executive Officer

JOB SUMMARY

Responsible for the overall operations of the health plan, including strategic direction, administration of all existing programs and development of new programs to ensure goals and objectives are met or exceeded. Working closely with the Division President and WellCare's executive leadership team, leads and directs overall operations including: provider contracting and relations, sales and marketing, medical management, regulatory compliance, government relations and finance, as well as interfacing with corporate office operations. May serve as the representative of the health plan to government entities and other external agencies. Ensures compliance with all relevant state and federal regulatory agencies, contracts and regulations. Incumbent will be responsible for supporting the State contract on a full-time basis.

ESSENTIAL FUNCTIONS

Note: The following is not intended to be an exhaustive list of all duties required of this position

Key Duties and Responsibilities

- Providing overall direction and prioritization for the local state plan.
- Develop and carry out all leadership strategies and initiatives associated with supporting the state contract.
- Ensure that the policies and contractual requirements are followed.
- Leads and directs the day to day operations of the health plan. This includes providing leadership and direction to the management team to ensure the organization's strategic plan is translated into tactical goals and objectives that guarantee performance objectives are met or exceeded.
- Developing and implementing integration models that ensure coordination with state customers and other system partners.
- Sets the tone from the top that compliance with all regulations and contract adherence is critical to WellCare success.
- Directs and manages the organization's financial performance. Takes appropriate actions to increase revenue, leverage resources, manage and/or minimize expenses.
- Directs the development of annual budgets and presents the budgets for approval.
- Establishes formal and informal mechanisms to promote and maintain credibility, competence, and a positive corporate image by exhibiting strong communication to the corporate office, providers, members and committees.
- Leads organizational development activities that develop and foster strong working relationships among the members of the management team. Builds and promotes the culture to be consistent with the values established by the corporate office.
- Assists and leads where appropriate, with aspects of state and federal government relationships, including working with regulators, as necessary, to establish and continue effective working relationships. Ensures that all state and federal regulations are met.
- Recommends and leads improvement processes and initiatives

MINIMUM QUALIFICATIONS

Education

Education Level	Education Details	Required/Preferred
A Bachelor's Degree in	business administration, finance, healthcare administration or a related field	Required
A Master's Degree in a related field		Preferred

Work Experience

Experience Level	Experience Details	Required/Preferred
5+ years of experience in	senior management with profit and loss accountability for a managed care organization	Required

Medical Director

GENERAL JOB INFORMATION

Title: Medical Director

JOB SUMMARY

Oversees clinical direction of medical services and quality improvement functions at the health plan level. Provides medical management leadership for the health plan and, as applicable, manages all major clinical and quality program components under health plan operations. Oversees medical coordination required for effective utilization and quality management of the health plan network. Functions as medical leadership for effective care integration of WellCare pharmacy operations, utilization/case/disease Management activities, quality improvement activities, and provider relations functions. Incumbent will be dedicated full time to the local contract.

ESSENTIAL FUNCTIONS

Note: The following is not intended to be an exhaustive list of all duties required of this position

Key Duties and Responsibilities

- Developing, implementing, and interpreting medical policies and procedures. Duties may include, but are not limited to: service authorizations, claims review, discharge planning, credentialing, referral management, and medical review of grievances and appeals.
- Administrating the medical management activities of the local plan.
- Participating via telephone or in person at every Quality meeting with the state customer and other system partners, and as requested by the state customer.

Behavioral Health Clinical Director

GENERAL JOB INFORMATION

Title: Behavioral Health Clinical Director

JOB SUMMARY

Serves as the lead clinical strategist and spokesperson for WellCare Integrated Medical Behavioral Health Solutions. Provides guidance and consultation to behavioral health which may include Health Concurrent Review, Case Management, and Provider Relations. Oversees all clinical aspects of Behavioral Health, and helps establish policy and procedures for Behavioral Health, including its integration with medical care and pharmacy. Serves as a key representative and spokesperson with respect to the external behavioral health community in the market. Supports Behavioral Health Operations improvement of the network delivery system in the market, including working collaboratively with providers to encourage development of new and more community based types of care and better integrating behavioral health with physical health and social services.

ESSENTIAL FUNCTIONS

Note: The following is not intended to be an exhaustive list of all duties required of this position

Key Duties and Responsibilities

- Incumbent will be responsible for providing clinical case management consultations and clinical guidance for contracted PCPs treating behavioral health-related concerns not requiring referral to behavioral health specialists.
- Responsible for developing comprehensive care management programs for youth and adults with behavioral health concerns, typically treated by PCPs, such as ADHD and depression.
- Developing targeted education and training for the local plan's PCPs that commonly encounter behavioral health issues.
- Provides overall clinical thought leadership in behavioral health for WellCare. This person will be responsible for overseeing all clinical aspects of behavioral health, including care and utilization management, network and provider relations, quality improvement, health IT, and overall administration including legal and finance.
- Responsible for overseeing and ensuring integration of behavioral health health into all functional areas of the health plan, and working collaboratively with corporate behavioral health and medical staff to implement integrated policies and procedures. Provides reliable assistance to the assigned market medical director and clinical staff to assure effective integration of behavioral services into health plan medical management activities.
- Helps establish policy and procedures for behavioral health, including its integration with medical care and pharmacy. This person will be the thought leader for behavioral health, and will provide teaching, training, coaching, and supervision of internal staff.

7+ years of experience in	a licensed pharmacist role	Required
3+ years of management experience		Required
3+ years of experience in	Supporting formularies, designing prior authorization requirements, and working with clinical information	Required
Other	Experience in managed care	Required

Licenses and Certifications

Other	Licensed and registered pharmacist in state of operation	Required

IV.D STAFFING REQUIREMENTS

19. Describe how the MCO's administrative structure and practices will support the integration of the delivery of physical health, behavioral health, and pharmacy services. *(Page limit 4 pages)*

WELLCARE'S INTEGRATED INFRASTRUCTURE: THE KEY TO SUPPORTING THE WHOLE PERSON

WellCare's administrative and staffing structure, practices and information technology (IT) platforms fully support the integrated delivery of physical, behavioral health and pharmacy services. Additionally, our approach further enhances the integrated delivery of services by seamlessly weaving in social supports and community advocacy activities into our structures and practices. Through our experience with both carved-in and carved-out models of management, we have learned that the best outcomes are produced by having physical and behavioral care management teams integrated and working together side by side on behalf of members.

Administrative Structures that Support the Delivery of Integrated Care

Because of our commitment to holistic and integrated care for our members, we made the decision in 2013 to in-source our behavioral health management. Previously, we had used a third party to manage this aspect of our member's care delivery; however, we found that it did not provide the seamless integration of services to deliver top quality care. We know from our experience that true integration flows from the administrative structure overseeing its delivery. Our medical and clinical staffs (including care management, utilization management, and quality) are structured in such a way that both behavioral and physical clinical services fall under the same clinical services administrative structure but continue to have specialized expertise in their respective fields to meet the individualized and often complex needs of our members.

Our Senior Vice President over Clinical Operations supervises all of our medical leadership including our Chief Medical Director of Quality, our Chief Medical Director of Utilization Management and our Chief Medical Director, Care Management as well as our Vice President for Behavioral Health and Chief Pharmacy Officer. This combined accountability and reporting structure ensures that integration of services begins at the top of our management structure and flows down into our state plans and our service delivery at the member level. Our WellCare of Nebraska infrastructure shows similar layers of accountability with behavioral, pharmacy and physical health staff aligned through the administrative and operational structure.

WellCare's Administrative Structure Supports Pharmacy Integration

For pharmacy, WellCare maintains the clinical aspects of pharmacy management in house, while partnering with a pharmacy benefits manager with decades of experience in claims processing, pricing and network management. Our care managers have access to pharmacy information about our members and the expertise of our in-house pharmacy leadership. This provides our care managers with easily accessible staff to do medication reviews on an individual basis. Likewise, our clinical pharmacy staff can quickly spot trends and adjust our clinical guidelines accordingly

Best in Class: Pharmacy Integration

Working with our behavioral health and medical teams, the pharmacy director in Kentucky led an effort to work with providers to switch members from Suboxone to Zubsolv for treatment of opioid addiction. Zubsolv shows greater outcomes, and the switch is helping our members succeed in their recovery.

An example of pharmacy integration is the role of our pharmacy director in our Kentucky affiliate. There

the pharmacy director works directly with local medical and behavioral health leadership, joining clinical rounds for complex and chronic cases, lending guidance for Step Therapy and helping to control polypharmacy issues which could possibly lead to poor member outcomes.

Our Approach to Integrated Physical and Behavioral Health

Company-wide, WellCare incorporated all behavioral health functions into our health plan in 2013, and launched our long-term supports and services program with fully integrated behavioral health in 2014. Through this complete integration, we are better able to collect and analyze all data associated with a member's utilization, including medical, pharmaceutical and behavioral health care. In addition, we are able to ensure the most appropriate setting of care for members who need both medical and behavioral health services.

As a result of our integrated approach WellCare has developed:

- A single set of integrated, standardized policies and procedures addressing the management of both medical and behavioral health care
- A unified quality monitoring (QM) plan and a single utilization management (UM) plan that address both medical and behavioral health
- An identification and assessment process used to determine our members' holistic health care needs
- A system of care approach to care coordination that includes assessing and offering services for social determinates of health
- An integrated claims payment process for all medical and behavioral health claims integrated within the same IT platform
- A comprehensive Member Services function within our call center that addresses both medical and behavioral health needs
- Consolidated reporting and management of medical, behavioral health finance, and risk.
- Behavioral health reporting that tracks Seriously Emotionally Disturbed (SED) and SPMI Members who have co-morbid chronic medical disorders
- An integrated clinical management platform where staff who specialize in both medical and behavioral health work in the same environment and view all service authorizations together, including pharmacy information

Finally, a key tool to our success is an integrated technology platform which allows for interdisciplinary care management teams, whether co-located or virtual. Through our Medical Management Platform (MMP), we have a comprehensive view of our members across the entire assessment, care planning and service delivery continuum. Through this integrated structure, the member's full spectrum of health care needs is managed and met.

Care Management That Supports Integration

Our care management staff members work diligently to ensure that members with medical and special health care needs are provided the best and most appropriate services available. WellCare care managers work with pregnant women to ensure early and regular prenatal care. For our pediatric members we have a well-coordinated EPSDT outreach and engagement strategy to encourage members to maintain compliance with EPSDT periodicity schedules and visits. For our members with multiple or complex health care needs, our care managers work in an interdisciplinary team approach to identify services across the health and social services spectrum.

Utilizing optimized outcome principles, WellCare supports its members to achieve their full potential by providing access to a comprehensive network of medical and behavioral health providers who offer evidence based treatment services. Our behavioral health care managers partner with community behavioral health and medical providers to coordinate care and facilitate treatment needs for members.

Care managers coordinate the medical, behavioral, and social service needs of their members through assessment, care planning, implementation and monitoring. WellCare's field-based quality improvement team will monitor quality for all care managers, members and providers throughout the system. In addition, we know that our members often face barriers to good health and recovery that go beyond services in a traditional health coverage benefits package.

Leveraging Our Health*Connections* Model to Integrate Social Services into our Members' Care

To supplement traditional managed care coordination, WellCare uses the Health*Connections* Model to identify the available social safety net providers within the WellCare footprint, assess the critical service gaps (existing and potential) and identify ways to sustain the network of the social safety net.

This collaboration with local agencies ensures that our members have access to services to address social determinants of health such as food, housing, and educational opportunities. For us, integrated care includes medical, behavioral, pharmacy *and* social service coordination of service delivery. We believe that integrating this piece is essential for our members' lives to truly improve.

To facilitate our member's access to our plan and benefits, WellCare will place field-based teams working out of our Lincoln headquarters, as well as our Welcome Rooms located in Omaha, Kearney, Scottsbluff and Norfolk. These Welcome Rooms will offer local access to service and support for our members, providers and community partners. At times, these Welcome Rooms may be co-located with a social service safety net provider. Strategic placement of these resources across the state maximizes our responsiveness to members, their caregivers and our provider network and increases the integration of their care. Members, their families and providers will be encouraged to visit their nearest WellCare of Nebraska office, which will offer onsite member and caregiver support, chronic care management classes, member services and provider education.

Community partnerships reach beyond the agencies/organizations that will be sharing responsibility for care management. When we need additional partners to further enhance the benefits to our members, we will support other Nebraska-based organizations for their expertise and community ties.

MEMBER STORY

Screening for Behavioral Health Needs in Primary Care: Integrated Teams Improve Member Outcomes

- A registered nurse with our Georgia affiliate, WellCare of Georgia, who was part of a member's integrated care team, was providing care coordination for the member's medical condition. Having been trained in the high rate of co-occurring depression for individuals with serious and chronic medical conditions, she administered a PHQ-9 and identified that the member screened positive for major depression. The nurse referred the member to a Behavioral Health Case Manager (BHCM) for a comprehensive assessment.
- The BHCM completed a face-to-face assessment and created a safety plan that incorporated the use of natural supports, including the member's sister. The BHCM coordinated care with a behavioral health specialist to secure an immediate appointment with a community-based Provider, Genesis Alliance for Mental Health, which provides comprehensive, community-based, recovery-oriented services including Intensive Day (Partial Hospitalization) Programs, Assertive Community Treatment and Psychosocial Rehabilitation to help individuals remain safely in the community. While the assessment was being scheduled, the BHCM kept in contact with the member to ensure that the safety plan was followed.
- Because the case manager was trained to recognize the importance of screening in both primary care and behavioral health settings, the member received behavioral health supports and services in addition to treatment for a medical condition. Our integrated approach to addressing the continuum of member needs fosters this holistic approach to care.

Additional Strategies for Integrating Physical and Behavioral Health

Strategies and processes for facilitating the reciprocal exchange of health information between physical and behavioral health providers that are active and will be implemented in our Nebraska program include the following:

On a monthly basis we use data to identify members who have behavioral health needs and one or more serious physical co-morbidities. This report identifies members and queues them up for immediate triage, assessment and referral into our care management program. We actively coordinate for members who are currently in a provider-based (Integrated Health Home or Patient Centered Medical Home) care coordination program. For these members, we send the relevant clinical data to the health home care management team so that follow-up can be made and treatment plans can be updated with the latest clinical information.

For members identified with medical/behavioral comorbidities we share with treating providers the data- either through our care managers or through regular feedback and reports periodically given to our high-volume providers.

Additionally, we have a monitoring system for behavioral health providers that focuses on high-volume providers and outliers (with relation to under-utilizers or over-utilizers). We meet with behavioral health providers who are identified as outliers to gain a better understanding of the particular population they serve and partner together to identify opportunities to improve the quality of care for our shared members.

Some, not all, behavioral health providers are given a performance report card if they are identified as outliers. We meet with those providers face-to-face, and when indicated a corrective action plan is requested. Our provider relations team, along with the behavioral health operations and quality improvement team, all have a part in monitoring of providers. A similar process is in place for medical providers.

IV.D STAFFING REQUIREMENTS

20. Describe how the MCO will train staff on issues that affect its members, including: issues related to housing, education, food, physical and sexual abuse, violence, food security; behavioral health risk and protective factors; finding community resources and making referrals to these agencies and other programs; and meeting the needs of the LTSS population, including individuals with developmental disabilities and mental health concerns. *(Page limit 6 pages)*

DEVELOPING INTEGRATED TRAINING WITH A FOCUS ON SOCIAL DETERMINANTS OF HEALTH

WellCare has a one-of-a-kind approach to helping members navigate social services and supports, so our associates have access to a unique set of tools and skills focused on getting members referred to the right resources at the right time. In addition to training our staff, we recruit, hire and retain associates through our Workforce Diversity and Inclusion program who have similar backgrounds as our members. This diverse workforce fosters an even greater level of trust and compassion between our associates and our membership. Increasing knowledge and fostering empathy among our associates for our members are the driving values behind our training programs.

Our systematic recruitment process is highly selective and ensures that experienced, well-trained personnel will support implementation and ongoing administration of the Nebraska contract. Candidates are sourced and placed via a robust, multifaceted talent acquisition search. To ensure our plan is oriented toward the local needs of members, we will proactively look for Nebraskans to staff those positions that are based in Nebraska. All prospective candidates are vetted via a multi-step, behaviorally-based interviewing program. Final candidates undergo an extensive background screening process that validates education, experience and credentials via an independent third party vendor. This background screening process is consistent for both full time (W-2) employees as well as subcontractors.

Once hired, WellCare offers a thorough associate onboarding process which equips each new WellCare associate with a well-rounded perspective on the organization, the populations we serve including the complex life circumstances of our members, and the aspects of that particular associate's new role.

Creating New Training Curricula for Associates

WellCare's Enterprise Learning and Development department includes a team of professional instructional designers who create new training modules specific to each market we serve. Content for these training modules is developed in accordance with the regulations and characteristics of that market. Recent examples include curriculum designed for our New Jersey MLTSS expansion and New York Behavioral Health. To create new training modules, a professional instructional designer serves as both consultant and producer of effective, state-specific training modules.

Incorporating CommUnity Knowledge in our Training Curricula

For Nebraska, WellCare will develop training modules which provide all staff with an in-depth understanding of the populations, care coordination needs and regulatory requirements specific to Nebraskans. This training supplements standard training offered, and it will include training around social determinants of health – how to recognize need and make referrals to care. Through our CommUnity advocacy program we have quantified the role that community service organizations play in supporting our members in their local communities. We blend that national knowledge with the robust knowledge we have gleaned from our on the ground experience in Nebraska cataloguing and interacting with community services organizations. For example, all associates who will attend directly to member's needs are trained on how to refer members to our Community Assistance line where the member can be referred to access needed resources such as food, shelter and crisis intervention.

Content Development for Training: Targeted, Timely, and Responsive

An agile training curriculum capable of responding to evolving learning needs via rapidly redefined content is a critical component of our training program. Our content provides both baseline training and training targeted to address new programs, programmatic and business process changes.

Programmatic changes are conveyed timely to all staff via a variety of communication vehicles and integrated into materials that support new hire orientation and onboarding. All departmental team leads are charged with initiating a training request when a programmatic change occurs in his or her area. When a team leader becomes aware of a programmatic change, he or she submits a training request to our Business Training Intake Request system. The Training Request prompts the team leader to specify details about the need for training, including type of training (new or updating of information), impact to the organization and value to different staff members.

One of our training managers performs intake and triage of each request, including contacting the requester to discuss and ensure an understanding of the scope of the request. By using a triage method for training requests, our training department can rapidly respond to regulatory changes or other such changes as directed.

Staff training is delivered through a blended learning strategy which incorporates instructor-led classroom training, computer-based training modules, and virtual learning via webinar. In addition to Nebraska-specific modules, training content is comprised of enterprise curriculum on a wide range of topics such as HIPAA, member advance directives and key tools and systems. All training curricula incorporates a two-pronged learning assessment methodology.

Once the training request is validated, the training manager initiates a training material modification that adheres to the ADDIE Training Model (Analysis, Design, Develop, Implement and Evaluate).

- **Analysis:** During Analysis, the training manager identifies and validates impacted staff, departments and artifacts, and the changes that need to be communicated and made, as well as the requisite timeframe.
- **Design:** During Design, the training manager designs curriculum and determines the best method for conveying that curriculum to the designated audience(s). Methods for communicating programmatic changes to staff include:
  - Instructor Led Training
  - Virtual Instructor Led Webinars
  - Web Based Training
  - Information Distribution via existing forums (e.g. staff meetings, town halls)
  - Dedicated written communications (e.g. email, intranet updates)
- **Development:** During Development, the training manager develops new or makes changes to training materials and develops ancillary communications. During this phase, the business training manager also develops the methods by which the training will be monitored and evaluated.
- **Implementation:** During Implementation, the training manager completes the tasks necessary to deploy the training to the designated audiences via the appropriate methodology, including: instructor led training, deployment of new or updated computer based trainings, updates to web content or distribution of memoranda or other written artifacts. Implementation includes monitoring for compliance targeted at certifying that all designated staff and departments have participated in training, and all affected baseline artifacts are updated and incorporated into the training asset repositories for use during onboarding of new staff.
- **Evaluation:** During Evaluation, the training manager completes evaluation of the training plan for the designated change. A recent example of a request submitted to the Training Intake Request system dealt with changes to necessary staff knowledge and competencies related to behavioral health

conditions and substance use in high-risk pregnancies. As a result of the ADDIE process, the business training manager facilitated the development of a newly required web based training module. The project required development of the training module itself as well as updates to policies and monitoring systems to ensure the staff mandated to complete the training module are assigned the training, and that their managers monitor completion.

All WellCare associates and subcontractors who will bear any responsibility in the execution of commitments made in this RFP response will be required to complete a detailed training program specific to the population in Nebraska. This training will include teaching associates how life circumstances such as poverty, homelessness, domestic violence, and mental illness affect the population we serve. Further content for the training modules will be developed in accordance with the regulations, eligible populations and characteristics of the Nebraska RFP Number 5151 Z1.

Recent examples developing new training curricula include the New Jersey MLTSS expansion and our participation in New York's Fully Integrated Duals Advantage (FIDA) program. In both instances, a trained instructional designer served as both consultant and producer of effective, state-specific training modules.

Be Ready Training and WellCare University

WellCare places the highest value on effective associate onboarding and training. While associate satisfaction and retention are important byproducts, the most important results of our training investment are reflected in the service received by our members and providers.

To effectively support our new associates, WellCare has developed a comprehensive learning and development strategy called "BeReady." BeReady is comprised of two key elements – a role-specific training agenda, which we call a Learning Roadmap, and a corresponding Learning Plan which provides opportunities for hands-on mentoring and supervision in a live environment.

Beyond initial new hire training, associates and subcontractors are required to complete annual regulatory compliance training. Continuing education in new benefit designs and service areas occur annually, and changes to any operations or regulatory requirements occur as warranted by the change.

WellCare also offers open access to nearly 2,000 courses for all of our associates through our learning management system from industry-leading Cornerstone OnDemand, which is internally branded as WellCare University. While initial training development and delivery will be managed by a Tampa-based training team, WellCare of Nebraska will hire and equip a professional training team to be based in Lincoln for ongoing associate development.

MEMBER NEEDS DRIVE OUR TRAINING

Preparing Associates to Recognize and Help Solve for Member Needs

We know that our members face an array of difficult life circumstances from food and housing concerns, to violence and domestic abuse. These circumstances dictate their health, and our associates must be prepared to identify areas of concern and provide the member with resources for dealing with the situation. At WellCare, we have a two pronged approach to this complex problem. The first is our CommUnity engagement model which identifies community social supports and links our members to these vital programs.

CommUnity Liaison Program

WellCare created a new department to research and catalogue available social services across the United States. This team is hired through Workforce Innovation programs like Ticket to Work, Welfare to Work, Military/Veteran and student worker programs and so on. In September 2014, WellCare launched social

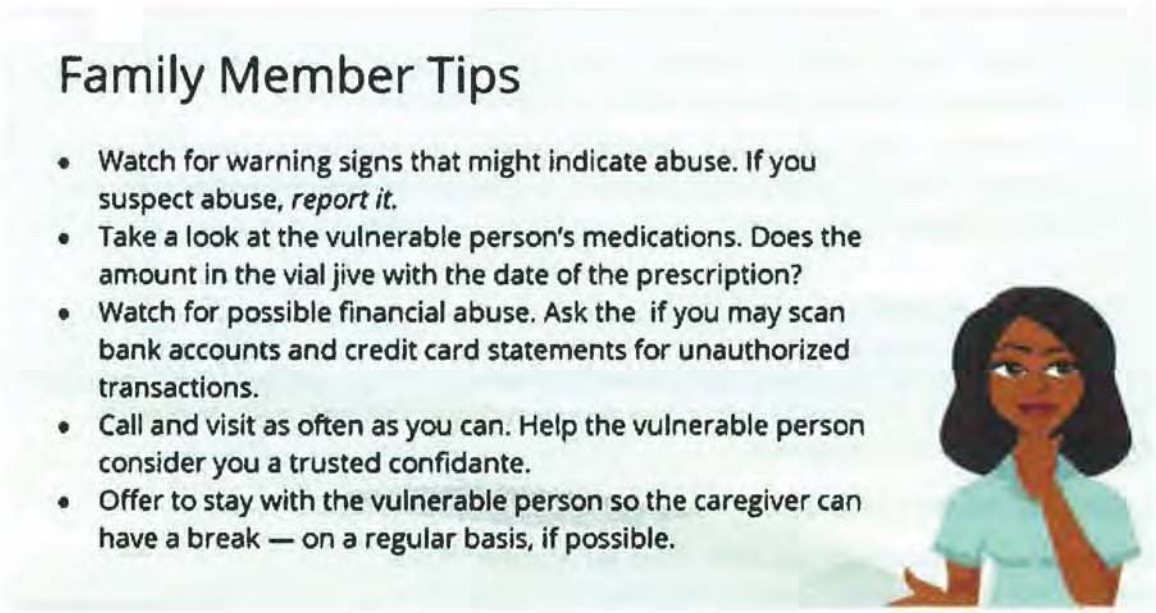
service resource line for members, their families and the community-at-large. CommUnity Liaisons help callers find and access community-based programs and services in their local area. Since launching, the CommUnity Assistance Line team connected more than 4,000 callers to 5,300 organizations for 17,000 services.

WellCare maintains a social service electronic health record (SSEHR) on each caller. This SSEHR maintains information on the organizations and the services to which our teams refer members and callers plus the disposition of their referral. This information is aggregated and released on a monthly basis along with details about the social service network itself. In addition, the Advocacy & CommUnity Based Programs department works closely with the clinical teams in each market to infuse feedback from the Health*Connections* Model into the clinical and quality operations as well as messaging used to educate our associates. For example, in 2015, WellCare launched an internal campaign highlighting the unique social barriers of our members, their families and the community-at-large.

Training Associates to Recognize Risks to Our Most Vulnerable Members

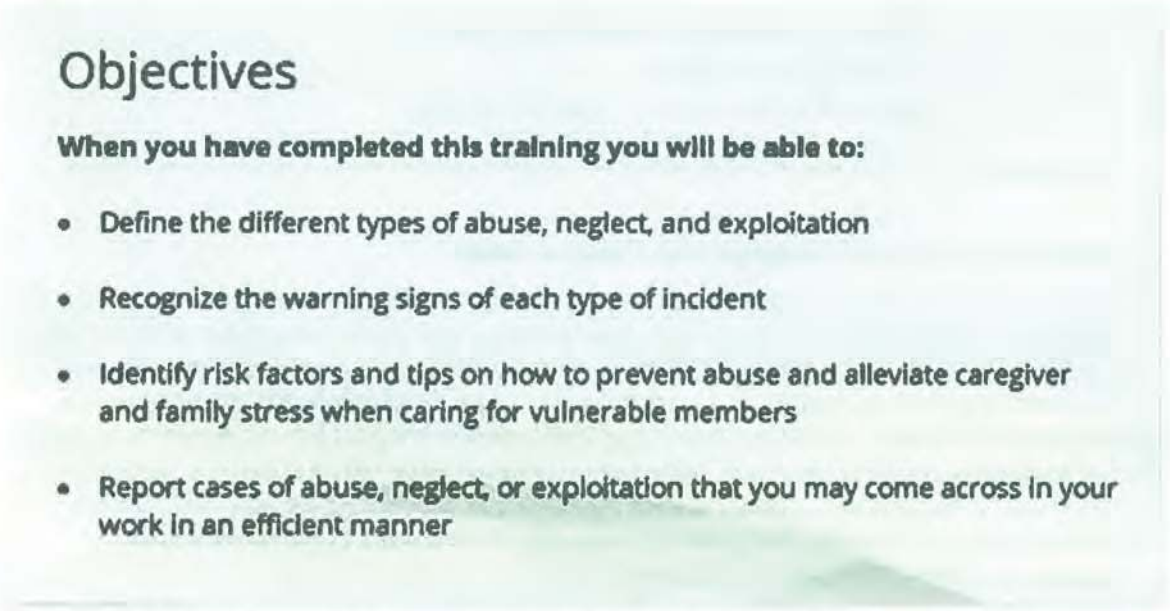
Our second strategy is the training we provide our associates to identify members who are at risk in their own homes. For example, as part of one of our new hire trainings for clinical services, associates are taught to spot abuse for vulnerable members. In this slide (**Figure 5**) care managers are trained on how to help family members who may be overwhelmed providing care to their sick or infirm family member.

Figure 5



The overall objectives are listed in **Figure 6** below:

Figure 6



This type of training occurs for all of our clinical services personnel and is enhanced for those associates who will be handling situations in which behavioral health needs of the member are high. Other training emphasizes how associates may refer caregivers to respite resources that we have identified through our CommUnity advocacy program.

Special Populations Additional Training

For associates who will interact with members who have behavioral health needs, additional training is provided. For example, our medical care managers are cross trained to collaborate with their behavioral health counterparts and vice versa. Our behavioral health director offers a weekly, "Doctor Is In," program in which case managers are invited to ask behavioral health questions and problem solve difficult cases as a group. Behavioral health care management and utilization management positions are filled with associates who have extensive training in behavioral health such as psychologists, LSCWs and licensed marriage and family therapists. As part of our utilization management ongoing training for both medical and behavioral health care managers, there is also a quarterly refresher training course which is mandatory for all associates.

As an example of topics addressed in our behavioral health training in our New York affiliate, associates receive the following training (**Figure 7**) on an ongoing basis:

Figure 7

AN EXAMPLE: WELLCARE OF NEW YORK ONGOING TRAINING	
Monthly	Modules available for skill enhancement and refresher training to ensure Associate Success. ➢ Transitioning Aged Youth ➢ Assisted Outpatient Treatment, AOT ➢ NY *Specific* Cultural Competency ➢ An Integrated Approach to COPD ➢ An Integrated Approach to Treating Heart Disease ➢ Integrated Care of Diabetes Mellitus

	➢ An Integrated Approach to Managing Sickle Cell Disease ➢ An Integrated Approach to Asthma ➢ Behavioral Health Conditions in High Risk Pregnancy ➢ Substance Use Disorders in High Risk Pregnancy ➢ Fostering Behavior Change
Quarterly	➢ Behavioral Health Program - 4 Quadrant Strategy ➢ BH Clinical Policy

WellCare's Diversity & Inclusion Program: Our Values at Work

By undertaking measures to foster an inclusive environment, WellCare actively reflects the communities in which it operates and populations for which it provides services. The overarching goals of WellCare's award-winning Diversity & Inclusion (D&I) Program are to strengthen our interconnectivity with our diverse communities. WellCare embarked on a workforce innovation initiative in 2013that focuses on four key complementary elements including identifying opportunities to adjust job requirements to enable participation in workforce incentive programs, targeting recruitment efforts around diverse candidates, and incorporating D&I principles and communication methods into onboarding for new associates. As a result, WellCare created 4 pilots which have now grown and become standard operations within the company including the CommUnity Liaison Program.

Our members are our reason for being. Training our associates to serve them in an informed and compassionate manner is at the heart of our training curricula. We created a culture of inclusion and understanding through our formal training modules which address the challenges our members often face. In addition, we have changed our corporate culture by recruiting and hiring associates from similar backgrounds as our members.

IV.D STAFFING REQUIREMENTS

21. Describe how the MCO will coordinate with the MLTC Dental Benefits Manager, including processes for reciprocal referral for needed services. Include the MCO's plan to identify a dental services liaison. *(Page limit 2 pages)*

BUILDING PARTNERSHIPS AND EXPERTISE: OUR APPROACH TO COORDINATING DENTAL BENEFITS

WellCare has extensive experience coordinating care with entities that have a special expertise in managing dental benefits for Medicaid members. Either through our own contracts or through "carved-out" programs like that being developed for Heritage Health, the basic processes remain the same and include designated staff, training, member education, data exchange and facilitation of referrals and follow-ups. We believe we can serve as an asset to MLTC's contracted Dental Benefits Manager by leveraging the power of primary care physicians (PCPs), particularly within the Patient-Centered Medical Home (PCMH) framework of Nebraska, to facilitate strong preventive care and referral to ensure members get the oral health care they need.

Best in Class: An Example

Our affiliate, WellCare of Georgia, is the leader among all care management organizations managing Medicaid populations for annual dental visits.

To facilitate the coordination of oral health care benefits with our members, and the MLTC–selected Dental Benefits Manager, we are going to designate one of our care coordinators to be the liaison between the Dental Benefits Manager and WellCare. We have chosen to locate this function within the scope of our care management program because we know it will promote integration and coordination of all the pieces of the member's overall health. The designated liaison will serve to continually educate colleagues on how to make referrals to the Dental Benefits Manager and ensure the lines of communication and referral processes between our two entities remain productive. We would support a multi-payer effort to streamline the referral process and would be eager to work with MLTC to help develop the forms and necessary business agreements to make reciprocal referral effective and efficient.

One of the critical tools we use in many states to help the children we serve maintain good oral health care is the EPSDT periodicity schedule and care gap identification. In a carved-out model, we would use data provided by our state partners to help populate this effort. We view our relationship with the state and the dental service provider as a symbiotic one wherein we are all utilizing the information available to ensure the member receives all necessary services.

Because pediatricians often have the closest relationships to families, we believe it's critical to empower PCPs to help drive dental referrals. To do this, we communicate with and secure commitment of network pediatricians and PCPs to support our efforts in ensuring that our Members access EPSDT and dental services according to national clinical practice guidelines. Our network Providers are fully committed to continue to engage in our EPSDT program, educate our Members about preventive health, and make the appropriate referrals to dental care Providers.

Helping the Dental Benefits Manager Reach Members: Education and Outreach

Another way we can help coordinate care and partner with the Dental Benefits Manager is to leverage our member connections to share critical information and education around oral health care.

- **Initial Engagement:** Should the state have a Dental Benefits Manager selected during initial implementation, we will include information about how to access those services in our initial welcome materials.

- **Periodicity Letters:** WellCare identifies members having a birthday who are due for age-appropriate screenings and assessments according to the EPSDT periodicity schedule. WellCare mails them an age-specific letter informing them of the recommended screenings and services, including dental services and follow up on dental referrals.
- **Newsletters:** We will mail quarterly newsletters to members and can use those opportunities to do periodic reminders about accessing dental health benefits.
- **Member Awareness and Education via Digital Media:** Our health and wellness Member portal provides parents and children with helpful, age-appropriate information about a variety of health topics including annual dental visits (**Figure 8**). Our Healthy Kids and Teen Member Portal provides educational tools and resources. For parents, we offer an extensive library of articles, frequently asked questions (FAQs) and fact sheets. In addition, our mobile application for Smartphones and mobile devices, MyWellCare, provides friendly, timely alerts when Members are due for check-ups.

Figure 8

WellCare has also developed community-based strategies to increase oral health awareness as well as increase access to care by addressing social barriers. In 2014 WellCare accomplished the following across 12 different states:

- CommUnity Activities
  - Hosted or participated in 228 total activities related to oral health reaching nearly 14,000 children and families.
  - Collaborated with more than 31,000 community stakeholders related to increasing access to dental/oral health services within the community.
- Social Service Utilization Support
  - Bridged more than 43 gaps in needed free or reduced dental/oral health support.
- CommUnity Health Investment Program
  - Partnered with Help a Child Smile to bring a community-based mobile dental clinic to an area of rural Georgia with limited access to dental services. The program was located at a local school to increase EPSDT compliance with regular dental checkups for all children, including WellCare members.

IV.E COVERED SERVICES AND BENEFITS

22. Provide the MCO's definition of medical necessity. Describe the process for developing and periodically reviewing and revising the definition. Describe the degree to which the definition is consistent with or differs from MLTC's definition of medically necessity per 471 NAC 1-002.02A. *(Page limit 3 pages)*

DEFINING MEDICAL NECESSITY: A FOCUS ON ENSURING MEMBERS GET THE RIGHT SERVICES

WellCare's definition of medical necessity and our review criteria are predicated on our mission to support and engage members and providers, improve access and outcomes, inform clinical care, and maintain our role as stewards of government-funded resources without delaying or compromising care. With that in mind, our medical necessity definition, clinical practice guidelines and utilization management (UM) processes are designed to deliver efficiencies while mitigating the impact on network providers and members.

Through our experience serving Medicaid members in urban, rural and island areas across nine states, we are well positioned to effectively apply the criteria and guidelines in a manner that considers the complexities of the Medicaid population including considerations for individual factors (i.e., age, comorbidities and complications, etc.) as well as the local Nebraska delivery system and the availability of services. ***Our member-centered approach to medical necessity determinations means that medical necessity may supersede benefit coverage unless services are specifically excluded.***

Based upon generally accepted medical practices in light of conditions at the time of treatment, WellCare defines *medically necessary* as those services that are:

- Appropriate and consistent with the diagnosis of the treating provider and the omission of which could adversely affect the eligible member's medical condition
- Compatible with the standards of acceptable medical practice in the community
- Provided in a safe, appropriate and cost-effective setting given the nature of the diagnosis and the severity of the symptoms
- Not provided solely for the convenience of the member or the convenience of the provider
- Not primarily custodial care unless custodial care is a covered service or benefit under the member's Evidence of Coverage

There must be no other effective and more conservative or substantially less costly treatment, service and setting available.

For Medicaid children under 21 years of age, WellCare will provide medically necessary services to correct or ameliorate physical and behavioral health disorders, a defect or a condition identified during an Early Periodic Screen, Diagnostic and Treatment (EPSDT) screening or preventive visit regardless of whether these services are included in the State Plan, but are otherwise allowed pursuant to 1905(a) of the Social Security Act.

MEDICAL NECESSITY REVIEW AND REVISION PROCESS

Written, Evidence-Based Guidelines and Criteria

In making medical necessity determinations, WellCare applies written, evidence-based guidelines and review criteria to ensure members receive the right care, at the right time and in the right setting. Guidelines and criteria are vitally important decision support tools which ensure medical necessity decisions are based on sound clinical evidence. They also enable fair, impartial and consistent decision-making. By evaluating requests against nationally accepted, evidence-based guidelines, WellCare assists providers in determining the most appropriate treatment and services for our members, avoiding

unnecessary duplication of services, and appropriately managing utilization to mitigate both under-utilization and over-utilization of services. These actions result in optimal health outcomes for our members in a quality, cost-effective, efficient manner. Our guidelines and criteria include:

- InterQual® Clinical Guidelines
- Behavioral Health Guidelines
- CareCore® National Guidelines
- Apollo® Guidelines
- Pharmacy Guidelines
- Clinical Coverage Guidelines
- Hayes Health Technology
- Clinical Practice Guidelines
- Preventive Health Guidelines
- Medicare Local Coverage Determinations

WellCare will apply these guidelines along with the Nebraska Medicaid State Plan, the Nebraska Children's Health Insurance Program (CHIP) State Plan, and MLTC's definition of medically necessity per 471 NAC 1-002.02A. All decision support tools will be applied in a manner that is customized for the complexities of the Heritage Health population including considerations for individual factors such as age, comorbidities, complications, progress, psychosocial situation, home environment, the local delivery system and the availability of services.

Adoption and Implementation of Guidelines

Our guidelines and criteria are reviewed and updated annually and as needed in accordance with the specific guideline policies, review schedules or changes from professional societies and oversight bodies. Prior to implementation, our medical and behavioral health (non-pharmacy) guidelines and criteria will be reviewed and approved by the following WellCare committees:

- **Medical Policy Committee:** WellCare's corporate Medical Policy Committee (MPC) meets monthly to identify and approve new and updated guidelines and review criteria. The (MPC) is chaired by our corporate Vice President for Clinical Services Management and includes WellCare's corporate and state medical directors.
- **Clinical Advisory Committee:** Our Clinical Advisory Committee (CAC) will be comprised of individuals who care for children, adolescents and adults in Nebraska across a variety of ages and races/ethnicities, have an awareness of differences between urban, rural, and frontier populations and represent pharmacists, physical health providers, and behavioral health providers. The CAC will review and approve WellCare's initial practice guidelines and criteria as well as all significant changes to the guidelines thereafter.
- **Pharmacy and Therapeutics Committee:** Our pharmacy guidelines are reviewed and approved by WellCare's corporate Pharmacy & Therapeutics (P&T) Committee. The P&T Committee is chaired by our Senior Medical Director of Pharmacy and is comprised of both WellCare and independent practicing physicians. Once guidelines are approved, they are integrated into our clinical systems and processes. Staff members are trained accordingly and the guidelines are disseminated through the provider portal, via the website and communicated through individual authorization decisions.

CONSISTENCY WITH MLTC DEFINITION OF MEDICAL NECESSITY

WellCare has reviewed the Department of Health and Human Services (DHHS), Division of Medicaid & Long-Term Care (MLTC) definition of medical necessity per 471 NAC 1-002.02A and has found that our definition is no more restrictive than MLTC's definition. The following table (**Figure 1**) compares the two definitions and illustrates alignment:

Figure 1

MEDICAL NECESSITY		
Comparison of Definitions		
MLTC Definition	**WellCare Definition***	**Alignment**
Necessary to meet the basic health needs of the client	Appropriate and consistent with the diagnosis of the treating provider and the omission of which could adversely affect the eligible member's medical condition	✓
Rendered in the most cost-efficient manner and type of setting appropriate for the delivery of the covered service	There must be no other effective and more conservative or substantially less costly treatment, service and setting available.	✓
Consistent in type, frequency, duration of treatment with scientifically based guidelines of national medical, research, or health care coverage organizations or governmental agencies;	Compatible with the standards of acceptable medical practice in the community	✓
Consistent with the diagnosis of the condition	Appropriate and consistent with the diagnosis of the treating provider and the omission of which could adversely affect the eligible member's medical condition	✓
Required for means other than convenience of the client or his or her physician	Not provided solely for the convenience of the member or the convenience of the provider Not primarily custodial care unless custodial care is a covered service or benefit under the member's Evidence of Coverage	✓
No more intrusive or restrictive than necessary to provide a proper balance of safety, effectiveness, and efficiency	Provided in a safe, appropriate and cost-effective setting given the nature of the diagnosis and the severity of the symptoms	✓
Of demonstrated value	Compatible with the standards of acceptable medical practice in the community	✓
No more intense level of service than can be safely provided	There must be no other effective and more conservative or substantially less costly treatment, service and setting available.	✓
**Comparable WellCare medical necessity definitional language underlined*		

SECOND OPINION

Consistent with MLTC requirements, it is WellCare's policy to provide our members the right to a second surgical and/or medical opinion in any instance when the member disagrees with his or her physician's opinion of the reasonableness or necessity of surgical procedures, or when the member is subject to a serious injury or illness. The second surgical and/or medical opinion, if requested, will be provided by a physician chosen by the member who may select from a qualified health care professional within the network, or we will arrange for the member to obtain one outside the network, at no cost to the member. Our pharmacy program offers an appeal process for all denied prior authorizations and if necessary, an outside expert is used in rendering a decision.

IV.E COVERED SERVICES AND BENEFITS

23. Provide a description of the value-added services the MCO proposes to offer to members. For each service:

- Define and describe the service.
- Identify the category or group of members eligible to receive the service if it is not appropriate for all members.
- Note any limitations or restrictions that apply to the service.
- Identify the types of providers responsible for providing the service.
- Propose how and when members and providers will be notified of the service's availability.
- Describe how a member may obtain/access the service.
- Describe how the MCO will identify the expanded benefit in administrative or encounter data.

IMPROVING HEALTH OUTCOMES THROUGH VALUE-ADDED SERVICES

WellCare provides a holistic and person-centered approach to member care through a variety of innovative valued added services that are designed to improve the health and wellness of members by increasing their access to comprehensive health services in a cost-effective manner. These services and benefits address member needs and contribute to improvement in quality outcomes by removing barriers to care and enhancing quality of life.

Determining Value-added Services

WellCare will utilize our field-tested continuous development process for value-added services that begins with research, outreach, and needs assessment and continues throughout implementation including continuous solicitation of member feedback and evaluation. This five-step process (**Figure 2**) is described below:

Figure 2

Research and Needs Assessment

The value-added services and benefits that we will implement in Nebraska and propose to deliver under the Heritage Health contract have been developed through significant collaborative efforts with stakeholders and community based organizations in Nebraska as well as our research and thorough understanding of the Nebraska Medicaid

Figure 3

Weight Watchers
Over the Counter (OTC) Benefits
Discount Card
Tobacco Cessation Program
Improving Health Outcomes through Community Engagement
Welcome Rooms/Concierge
Health Fairs
WellCare Days
Mini Farmer's Markets
Health*Connections* Activities

population and barriers they face in accessing care. **Between September and November of 2015, WellCare Community Relations associates met with community based organizations around the state to identify health, social, cultural and economic needs of the communities and members we will serve in Nebraska,** including the health disparities present in the Heritage Health population and the community at large.

Development and Organizational Readiness

Based on our initial research and assessment of Heritage Health members' needs, WellCare designed the value-added services package described in **Figure 3**. We also reviewed our proposed value-added services to ensure that we have the platforms, systems, and human resources needed to provide these services and do so in a culturally competent manner specific to Heritage Health members' needs. The development phase will also include, in collaboration with MLTC, identification of evaluation metrics to determine the success of value-added services.

Program Deployment

WellCare will implement these valued added services to improve the health and wellness of members. Implementation of value-added services and programs will link WellCare members to community resources, enhance cultural and linguistic capabilities of our provider partners, and educate members so that their experience with the health system is more positive and their health outcomes are more favorable.

Member and Provider Feedback

WellCare will gather information from members and providers through written and oral surveys, online forms, emails, letters, or phone calls. The information received will be an important resource for improving and addressing the needs and wants of our members and providers through value-added services.

Evaluation

Using the metrics identified in the development phase, WellCare will collect data annually to identify its progress towards success as well as opportunities for ongoing process and quality improvement. As

determined through our evaluation efforts, WellCare may make additions, deletions, or modifications to our value-added services during the contract period and will submit such changes for approval to the Department of Health and Human Services (DHHS), Division of Medicaid & Long-Term Care (MLTC) a minimum of 45 calendar days prior to implementation.

WellCare's Value-added Services

We have grouped our value-added benefits and services into five areas (as shown in Figure 2) tailored to specifically address Nebraska's population-specific needs and health outcome goals. We believe these value-added services will deliver meaningful, lasting improvements for our members thereby delivering value to our Providers and MLTC. Our value-added benefits are developed to go above and beyond MLTC's required covered services and are designed to ensure care is delivered holistically. Below, we define and describe the valued added services and provide details regarding member eligibility, limitations, access and the provision of services, and how members and providers will be notified of the service.

Reduction in Non-Emergency use of the Emergency Department through Increased Access

The issue of inappropriate emergency department (ED) use is complex, requiring a multi-disciplinary and multi-pronged approach. We propose a suite of valued added services (**Figure 4**) that seek to substantially improve members' continuity of care, health outcomes and quality of life while reducing cost and inappropriate ED use. We will leverage our experience implementing ED diversion programs in other states and include other services and supports to reduce barriers to care, including the following services:

- Emergency Department Diversion Program
- Supplemental Transportation
- 24-Hour Behavioral Health Crisis Line
- Telemonitoring Diabetic Management System
- Optional Mail Order Pharmacy
- MyWellCare Mobile Application
- Focused Homeless Initiative

Figure 4

EMERGENCY DEPARTMENT DIVERSION PROGRAM	
Description	Through our emergency room diversion processes, we help reduce Emergency Department (ED) expenditures by identifying and educating members who unnecessarily or frequently and inappropriately utilize emergency room services. This begins by identifying members who over-utilize ED services. Our Care Management team contacts the member, conducts a telephonic assessment to determine underlying issues that drive inappropriate ED use, and connects the member to the most appropriate, cost-effective services and resources for their condition. These services are typically provided by the patient's primary care physician or a specialist as necessary. Throughout the process, a care manager communicates with the member regularly, encouraging primary care physician visits and relationships. Follow-up is also provided to ensure the patient keeps their scheduled appointments. Re-education is also performed when necessary.
Eligible Members	All members
Limitations/Restrictions	Not applicable
Responsible Providers	WellCare Care Managers

Notification of Availability	Members will be notified through Member Handbook, website, and WellCare newsletter. Providers will be notified through Provider Manual, website, and onsite education and training.
Member Access to Service	Benefit will be included in member service plan.
Reporting	WellCare will use existing service codes to identify service in administrative data.
SUPPLEMENTAL TRANSPORTATION	
Description	WellCare will cover the cost to reimburse families and friends who provide supplemental transportation to members to their doctor appointments. With this expanded benefit, members can focus on getting the care they need without concern of financial barriers to care. Millions of Americans miss or delay non-emergency medical care each year because they have no way to get there. Numerous studies prove increasing transportation access to medical services results in significant savings. Transportation is inexpensive compared to the high and rapidly growing cost of health care, making it more cost-effective to transport a member to preventative care rather than waiting for a serious health condition to arise. This value-added service will supplement the Heritage Health non-emergency transportation benefit and will address a significant barrier to access to getting Medical care.
Eligible Members	All members
Limitations/Restrictions	Medically necessary/Requires prior authorization
Responsible Providers	Transportation management vendor
Notification of Availability	Members will be notified through Member Handbook, website, and WellCare newsletter. Providers will be notified through Provider Manual, website, and onsite education and training.
Member Access to Service	Benefit will be included in member service plan.
Reporting	WellCare will use existing service codes to identify service in administrative data.
24-HOUR BEHAVIORAL CRISIS HOTLINE	
Description	WellCare will provide members with access to a 24-hour behavioral health crisis line. Should a member contact the 24/7 behavioral health crisis line, the call will be answered by a specially trained, non-clinician, within established time frames for call handling. If the call is a true crisis call, a behavioral health clinician will immediately join the call to assess, support and manage the situation for the most timely and effective outcome for the member in need. Crisis calls will be triaged and the appropriate intervention will be arranged based on the member's needs, logging the call for submission to WellCare via secure network access. Depending on the situation, the law enforcement and ER avenues are avoidable. The expected outcome of this model is a decrease in unnecessary ER visits and BH hospitalizations. Foster children and their caregivers have access to this service from WellCare of Kentucky.
Eligible Members	All members
Limitations/Restrictions	Not applicable
Responsible Providers	Behavioral Crisis Hotline vendor
Notification of Availability	Members will be notified through Member Handbook, website, and WellCare newsletter. Providers will be notified through Provider Manual, website, and onsite education and training.
Member Access to Service	Benefit will be included in member service plan.

Reporting	WellCare will use existing service codes to identify service in administrative data.
TELEMONITORING DIABETIC MANAGEMENT SYSTEM	
Description	WellCare will provide telemonitoring diabetic management through a system that connects patients to their provider and family through a cellular-enabled device. This system aims to aid and assist all individuals that live with diabetes in day-to-day lifestyle and condition management to help them stay out of critical care and higher risk categories. It actively supports individuals living with diabetes while removing barriers to managing their condition successfully. It is both a patient engagement tool and a cellular-enabled blood glucose meter. The system allows members the unique ability to measure their blood glucose, which automatically triggers the transmission of the data to a WellCare nurse, the members' provider, and/or caregiver. It also provides member feedback messages after each test, which is an ideal opportunity for members to receive feedback designed to inspire, encourage, educate, and support the member in best-practice self-management behavior.
Eligible Members	All diabetic members meeting medically necessity
Limitations/Restrictions	Requires prior authorization
Responsible Providers	Telemonitoring vendor
Notification of Availability	Members will be notified through Member Handbook, website, and WellCare newsletter. Providers will be notified through Provider Manual, website, and onsite education and training.
Member Access to Service	Benefit will be included in member service plan.
Reporting	WellCare will use existing service codes to identify service in administrative data.
OPTIONAL MAIL ORDER PHARMACY	
Description	Adequate usage and obtaining required prescription drugs is vital to ensuring that our members are appropriately managing their health care. WellCare will provide a voluntary mail order pharmacy option to address the challenges faced by members who live in rural areas and may not have a pharmacy that is close by, those with transportation constraints, or those impacted by health care issues that make it difficult to leave their homes—in turn making them at risk for not obtaining their needed medications. Members will still have the ability to access the traditional use of the local pharmacy and obtain prescriptions through this method. The mail order pharmacy supplements the current process by offering our members of varying needs an option to relieve any of the barriers described above and manage their pharmacy health care needs as appropriate.
Eligible Members	All members
Limitations/Restrictions	Not applicable
Responsible Providers	Pharmacy Benefits Management (PBM) vendor
Notification of Availability	Members will be notified through Member Handbook, website, and WellCare newsletter. Providers will be notified through Provider Manual, website, and onsite education and training.
Member Access to Service	Benefit will be included in member service plan.

Reporting	WellCare will use existing service codes to identify service in administrative data.
MyWellCare Mobile Application	
Description	WellCare makes it easy for members to interact with us when and how they want. Heritage Health members will be able to download our *MyWellCare* application to their Apple or Android device to have easy access to their member ID Card, Find-a-Provider tool, Quick Care (urgent care and hospital services locator), Contact Us and Wellness Services, which include care gaps.
Eligible Members	All members
Limitations/Restrictions	Not applicable
Responsible Providers	*MyWellCare* application vendor
Notification of Availability	Members will be notified through Member Handbook, website, and WellCare newsletter. Providers will be notified through Provider Manual, website, and onsite education and training.
Member Access to Service	Benefit will be included in member service plan.
Reporting	WellCare tracks and will report the number of times the application has been downloaded.
Focused Homeless Initiative	
Description	WellCare will collaborate with local community based organizations to create additional services such as behavioral health assessments, parenting support, group therapy, nutritional education and medical access that impact retention rates and wait times of homeless community members. The focus of the interventions will be on increasing the longevity of stabilization and evaluating the impact of health outcomes.
Eligible Members	Members experiencing homelessness
Limitations/Restrictions	Requires prior authorization
Responsible Providers	*MyWellCare* application vendor
Notification of Availability	Members will be notified through Member Handbook, website, and WellCare newsletter. Providers will be notified through Provider Manual, website, and onsite education and training.
Member Access to Service	Benefit will be included in member service plan.
Reporting	WellCare tracks and will report the number of times the application has been downloaded.

Improving Birth Outcomes through Prenatal, Postnatal, and Inter-Pregnancy Care

WellCare will support and educate pregnant Heritage Health members on the importance of prenatal and postpartum care through a variety of value-added services designed to engage expectant mothers early in their pregnancy and providing guidance, information and support. Our Prenatal Care Management Program and other value-added services are aimed at preventing low birth weight rates and decreasing the risk of preterm delivery through face-to-face contact with members and providers, member education, member incentives, and supports. These value-added services (**Figure 5**) are described below.

- Prenatal Care Management Program
- Community Baby Showers
- Stroller/Portable Playpen Program
- Doula Services for Pregnant Youth

Figure 5

PRENATAL CARE MANAGEMENT PROGRAM	
Description	Through our Prenatal Care Management Program, we improve care management of pregnant women by engaging expectant mothers early in their pregnancy and providing guidance, information and support. Through this program, we identify members with potential risk factors (behavioral, social and medical) that may adversely affect their pregnancy outcome. The Prenatal Care Management Program will encourage pregnant women to practice good prenatal care through face-to-face contact with WellCare care managers. We conduct direct mailings of educational materials so that members are directed through each stage of their pregnancy. Members may contact WellCare care managers regarding any questions and concerns. WellCare care managers also advocate for consistent follow-up with a member's provider.
Eligible Members	Pregnant members
Limitations/Restrictions	Based on medical necessity
Responsible Providers	WellCare Care Management
Notification of Availability	Members will be notified through Member Handbook, website, and WellCare newsletter. Providers will be notified through Provider Manual, website, and onsite education and training.
Member Access to Service	Benefit will be included in member service plan.
Reporting	WellCare will use existing service codes to identify service in administrative data.
COMMUNITY BABY SHOWERS	
Description	WellCare will offer free community baby showers for new and expectant mothers. The showers are open to moms during pregnancy or within six months of birth. These events focus on providing mothers with critical health care information for themselves and their babies, successful parenting techniques, a gift basket, an opportunity to participate in a raffle and refreshments. The community baby showers also connect our members with organizations that can help address social variables that impact a healthy pregnancy, such as appropriate housing, nutrition, medical care and counseling.
Eligible Members	Pregnant members
Limitations/Restrictions	Not applicable
Responsible Providers	WellCare Member Outreach Team
Notification of Availability	Members will be notified through Member Handbook, website, and WellCare newsletter. Providers will be notified through Provider Manual, website, and onsite education and training.
Member Access to Service	Benefit will be included in member service plan.
Reporting	WellCare will use existing service codes to identify service in administrative data.

STROLLER/PORTABLE PLAYPEN PROGRAM	
Description	Early and regular prenatal care is the cornerstone in preventing low birth weight rates and decreasing the risk of preterm delivery. WellCare will offer its Stroller/Portable Playpen Program to encourage Heritage Health members to receive the care they need for a healthy pregnancy and baby and to prevent infant mortality. This program will provide a reward for Heritage Health members who attend six prenatal visits and one postpartum visit. For completing these important preventative care services, WellCare will provide a free stroller or a portable playpen, which are conveniently delivered to the member's home.
Eligible Members	Pregnant members
Limitations/Restrictions	One stroller or playard per member per pregnancy
Responsible Providers	WellCare Care Management
Notification of Availability	Members will be notified through Member Handbook, website, and WellCare newsletter. Providers will be notified through Provider Manual, website, and onsite education and training.
Member Access to Service	Benefit will be included in member service plan.
Reporting	WellCare will use existing service codes to identify service in administrative data.
DOULA SERVICES FOR PREGNANT YOUTH	
Description	Pregnant youth being served by the Nebraska Division of Children & Family Services (DCFS) can be supported through the labor and delivery process with the assistance of a doula. WellCare will provide doula services to these members who live in a group home, maternity group home, or in home placement where there is minimal parental support. The goal of this value-added service is to improve birth outcomes, reduce pre-term births, improve prenatal care, enhance members' understanding of the birth process, and increase role of a doula in the overall labor and delivery plan.
Eligible Members	Pregnant members up to age 21 being served by DCFS
Limitations/Restrictions	Based on medical necessity
Responsible Providers	Doulas
Notification of Availability	Members will be notified through Member Handbook, website, and WellCare newsletter. Providers will be notified through Provider Manual, website, and onsite education and training.
Member Access to Service	Benefit will be included in member service plan.
Reporting	WellCare will use existing service codes to identify service in administrative data.

Coordinating and Integrating Prevention-focused Physical and Behavioral Health Services

WellCare does not carve out behavioral health services to a vendor and instead uses a strategy of integrating behavioral health care management with medical, social and pharmacy management and directly contracts with behavioral health providers. Co-existing behavioral health needs, chronic medical illness and often significant social challenges occur among our higher-risk cohorts today, and we have designed our Care Management programs and services to be holistic and member-centered, including integrated and streamlined approaches for screening and assessment of physical and behavioral health needs, care planning, and monitoring and ensuring services are provided. In addition to our integrated care management supports, we will provide members with value-added services (**Figure 6**) that seek to further coordinate and integrated physical and behavioral services, including:

- Comprehensive Peer Support Program

- Family Support Specialists
- COBALT Therapeutics
- Foster Care Transition Services

Figure 6

COMPREHENSIVE PEER SUPPORT PROGRAM	
Description	As part of our approach in fostering trusting relationships with enrollees and community based providers, we will work closely with peer and peer supports that have often developed strong, positive relationships with members and their families. Peers have experienced similar conditions and circumstances as members, and have successfully recovered from them. They will provide substantial support, information, education, guidance and coaching for members particularly when it comes to medication. Peers and peer supports will also help members develop and lead their own service plans, including Wellness Recovery Action Plans and help empower members to implement them. They will help members identify triggers that worsen symptoms and develop strategies for dealing with them, including contacting their physician or psychiatrist.
Eligible Members	Members with a behavioral health diagnosis
Limitations/Restrictions	Participation in active case management program
Responsible Providers	Certified Peer Support and Wellness Specialists
Notification of Availability	Members will be notified through Member Handbook, website, and WellCare newsletter. Providers will be notified through Provider Manual, website, and onsite education and training.
Member Access to Service	Benefit will be included in member service plan.
Reporting	WellCare will use existing service codes to identify service in administrative data.
FAMILY SUPPORT SPECIALISTS	
Description	WellCare will partner with the Nebraska Family Support Network to advocate, mentor, and educate families affected by mental, emotional, or behavioral health issues. Families will receive counseling on the side effects of the condition, depression, anxiety, and behavior modification/coaching.
Eligible Members	Members with a behavioral health diagnosis
Limitations/Restrictions	Participation in active case management program
Responsible Providers	Certified Family Support Specialist
Notification of Availability	Members will be notified through Member Handbook, website, and WellCare newsletter. Providers will be notified through Provider Manual, website, and onsite education and training.
Member Access to Service	Benefit will be included in member service plan.
Reporting	WellCare will use existing service codes to identify service in administrative data.

COBALT THERAPEUTICS	
Description	WellCare provides free, confidential online cognitive behavioral therapy through the COBALT Therapeutics Program. COBALT is a web-based program that offers a portfolio of behavioral health self-management tools for a variety of conditions. The use of COBALT has been shown effective in engaging members in appropriate self-care by reducing the self-destructive cognitive and behavioral patterns caused by depression, anxiety, insomnia and substance use.
Eligible Members	All members
Limitations/Restrictions	Not applicable
Responsible Providers	COBALT online service
Notification of Availability	Members will be notified through Member Handbook, website, and WellCare newsletter. Providers will be notified through Provider Manual, website, and onsite education and training.
Member Access to Service	Benefit will be included in member service plan.
Reporting	WellCare will use existing service codes to identify service in administrative data.
FOSTER CARE TRANSITION SERVICES	
Description	For youth aging out of foster care, medical and behavioral health needs may continue after they become an adult and they will need to learn to navigate the health care system. Most children have parents or family members to assist them in this process, however this population often needs help and guidance with their overall health care literacy. A key component of WellCare's care management model is the assignment of a care manager to each member in foster care. The care manager is assigned to the transitioning child to provide health education and literary services to understand critical components such as how to access benefits, co-pays, provider network, frequency of visitation, and importance of preventative care. The WellCare care manager will partner with the member's Independence Coordinator assigned through Nebraska's Bridge to Independence (B2I) program to support and supplement their efforts to help the member transition to adulthood.
Eligible Members	Members in foster care, ages 18-20
Limitations/Restrictions	Not applicable
Responsible Providers	WellCare Care Management
Notification of Availability	Members will be notified through Member Handbook, website, and WellCare newsletter. Providers will be notified through Provider Manual, website, and onsite education and training.
Member Access to Service	Benefit will be included in member service plan.
Reporting	WellCare will use existing service codes to identify service in administrative data.

Improving Overall Health and Wellness

WellCare has developed a set of value-added services (**Figure 7**) to reach all Heritage Health members across the state to educate and empower them to access resources designed to improve their overall health and well-being. These value-added prevention focused services seek to address a variety of chronic conditions including diabetes, asthma, cardiovascular related conditions, obesity, and other diseases. These services are aimed at providing incentives and rewards to members by encouraging them to be active and educated consumers of health care services that will improve their long term health and wellness.

- Health Rewards Program
- Hypoallergenic Bedding Allowance
- Weight Watchers
- Over the Counter (OTC) Benefits
- Discount Card
- Tobacco Cessation Programs

Figure 7

HEALTHY REWARDS PROGRAM

Description

WellCare Healthy Rewards Program rewards Members who complete specific preventive health, wellness and engagement milestones with a Healthy Rewards debit or gift card. The Healthy Rewards debit or gift card is credited with dollars upon completion of specific activities and services, which may include the following:

Activities and Services with Incentives for Completion

Population Segment	Focus Area	Activity Criteria
New Members	Initial PCP Visit	Initial PCP Visit within 90 days of enrollment
	Health Risk Assessment	Each quarter, WellCare of Georgia will draw the names of four people and provide them with an IPad.
Children's Health	0-15 months of age	Well child visit per periodicity schedule (six visits)
	3-6 years of age	Child health check-up visit
	7-21 years of age	Adolescent check-up visit
Health Pregnancy	Prenatal Care Visits	Attend ≥ six prenatal visits before the birth of the baby
	Postpartum Care Visit	Attend one post-partum visit 21-56 days after the birth of the baby
	Completion of Both	Completion of prenatal + postpartum visits = total incentive
Diabetes	Diabetes	Complete eye exam (Members with diabetes ages 18-75)
		Complete HgbA1C lab test (Members with diabetes ages 18-75)
Well Woman	Cervical Cancer Screening	Complete office visit for cervical cancer screening (pap smear) (ages 21-64)
	Screening Mammogram	Completion of screening mammogram (ages 40-65)
Adult Health	Annual Adult Health Screening	Complete annual adult screening (wellness visit – Members > 21 years of age)

Eligible Members	All members
Limitations/Restrictions	Members must meet requirements for established healthy behaviors
Responsible Providers	NOVU

Notification of Availability	Members will be notified through Member Handbook, website, and WellCare newsletter. Providers will be notified through Provider Manual, website, and onsite education and training.
Member Access to Service	Benefit will be included in member service plan.
Reporting	WellCare will use existing service codes to identify service in administrative data.
HYPOALLERGENIC BEDDING ALLOWANCE	
Description	The burden of asthma is most severe among populations with lower socioeconomic status, those living in low-income neighborhoods and certain racial and ethnic minority groups. To complement our asthma disease management program and our efforts to improve asthma outcomes and reduce clinical disparities among those with asthma, we provide an allowance for hypoallergenic bedding (i.e., bed linens, cushions, mattress protectors and pillow coverings). Providing this benefit for those with an asthma diagnosis helps them reduce their exposures to asthma triggers, which can prevent asthma-related emergency department visits, hospital admissions and missed days of school and work. Members in need of this benefit are identified through utilization management criteria associated with asthma triggers. By effectively managing asthma triggers, we can prevent asthma-related emergency department visits, hospital admissions and missed days of school and work.
Eligible Members	All members with an asthma diagnosis
Limitations/Restrictions	Based on medical necessity
Responsible Providers	Durable medical equipment (DME) providers
Notification of Availability	Members will be notified through Member Handbook, website, and WellCare newsletter. Providers will be notified through Provider Manual, website, and onsite education and training.
Member Access to Service	Benefit will be included in member service plan.
Reporting	WellCare will use existing service codes to identify service in administrative data.
WEIGHT WATCHERS	
Description	Obesity can be a direct trigger for serious health care issues such as diabetes and heart disease. To address this problem, WellCare offers a weight loss program that provides a free six-month membership to Weight Watchers. The program has been popular in other states where we have offered the service. Members receive the following: ➢ Simple ways to make healthier food choices ➢ A weight loss plan based on the latest nutritional science ➢ This program is offered at no cost for six months ➢ To be successful attend weekly Weight Watchers meetings and reach the goals given to you by your WellCare Health Coach
Eligible Members	Obese members (age 13 and over) identified by WellCare's disease management unit via the completion of Health Risk Screenings (HRS), physician referral, or self-referrals
Limitations/Restrictions	Requires prior authorization
Responsible Providers	Weight Watchers Clubs
Notification of Availability	Members will be notified through Member Handbook, website, and WellCare newsletter. Providers will be notified through Provider Manual, website, and onsite education and training.
Member Access to Service	Benefit will be included in member service plan.

Reporting	WellCare will use existing service codes to identify service in administrative data.
OVER-THE-COUNTER (OTC) BENEFITS	
Description	Medicaid members have limited resources with which to purchase needed over-the-counter (OTC) benefits to meet their daily living needs. WellCare will offer a $25.00 head\-of-household monthly OTC medication allowance benefit to our members in order to promote self-directed prevention, maintenance and on-going medical management. Items offered will not only include traditional products (e.g. diapers, pain relievers, vitamins) but will be expanded to also include eyeglass kits, reading glasses, and assistive aid devices such as pill containers or magnifying glasses to improve adherence to medication usage and to avoid errors in taking their medications which could result in hospitalization. Members may order products from our OTC catalog by our toll-free customer service line where they can speak with a representative or place their order using our automated phone service. Members may also log onto our website from a computer or smart phone and place their OTC orders.
Eligible Members	All members (households)
Limitations/Restrictions	Not applicable
Responsible Providers	OTC vendor
Notification of Availability	Members will be notified through Member Handbook, website, and WellCare newsletter. Providers will be notified through Provider Manual, website, and onsite education and training.
Member Access to Service	Benefit will be included in member service plan.
Reporting	WellCare will use existing service codes to identify service in administrative data.
DISCOUNT CARD	
Description	Members will receive monthly discounts beyond what is available to the general public from pre-selected retailers. This benefit allows members to purchase needed items (e.g. milk, bread, detergent, and over-the counter pharmacy items) at a discount and supports the financial barriers faced by low-income Medicaid eligible.
Eligible Members	All members
Limitations/Restrictions	Members must meet established requirements
Responsible Providers	Discount care vendor
Notification of Availability	Members will be notified through Member Handbook, website, and WellCare newsletter. Providers will be notified through Provider Manual, website, and onsite education and training.
Member Access to Service	Benefit will be included in member service plan.
Reporting	WellCare will use existing service codes to identify service in administrative data.

Tobacco Cessation Programs	
Description	Smoking is the leading preventable cause of death worldwide, and quitting smoking significantly reduces the risk of dying from tobacco-related diseases such as heart disease and lung cancer. While a great deal of progress has been made in Nebraska, Tobacco Free Nebraska (TFN) reports that the rate of smoking among all adults in 2013 was 18.5 percent, and the rate among youth (grades 9-12) is 11 percent (down from 34 percent in 1993). Nationally, 70 percent of smokers would like to quit smoking, and 50 percent report attempting to quit within the past year. The majority of smokers who try to quit do so without assistance, though only 3 to 6 percent of quit attempts without assistance are successful. For this reason WellCare will supplement TFN's smoking cessation services by providing educational materials, gum, patches, lozenges, and help with obtaining counseling for qualified members
Eligible Members	All members
Limitations/Restrictions	Based on Medical Necessity
Responsible Providers	Durable medical equipment (DME) providers
Notification of Availability	Members will be notified through Member Handbook, website, and WellCare newsletter. Providers will be notified through Provider Manual, website, and onsite education and training.
Member Access to Service	Benefit will be included in member service plan.
Reporting	WellCare will use existing service codes to identify service in administrative data.

Improving Health Outcomes through Community Engagement

We recognize the power of the social safety net community to help us reach members. Disadvantaged and vulnerable circumstances impact the availability and accessibility of health care and influence lifestyle choices that impact health outcomes. Therefore, we offer the following value-added services (**Figure 8**) to improve health outcomes through ongoing community engagement.

- Welcome Room/Concierge
- Health Fairs
- WellCare Days
- Mini Farmer's Markets
- Health*Connections* Activities

Figure 8

Welcome Room/Concierge	
Description	Provides support for medical and non-medical needs. Includes application assistance, transportation assistance, community support needs.
Eligible Members	All members
Limitations/Restrictions	Not applicable
Responsible Providers	WellCare Community Relations staff
Notification of Availability	Members will be notified through Member Handbook, website, and WellCare newsletter. Providers will be notified through Provider Manual, website, and onsite education and training.
Member Access to Service	Benefit will be included in member service plan.
Reporting	WellCare will use existing service codes to identify service in administrative data.

HEALTH FAIRS	
Description	WellCare's Community Relations staff will attend and participate in health-focused events to share information, resources and education concerning a variety of health topics such as diabetes management, back-to-school health, the importance of physical activity and general overall health and well-being.
Eligible Members	All members
Limitations/Restrictions	Not applicable
Responsible Providers	WellCare Community Relations staff
Notification of Availability	Members will be notified through Member Handbook, website, and WellCare newsletter. Providers will be notified through Provider Manual, website, and onsite education and training.
Member Access to Service	Benefit will be included in member service plan.
Reporting	WellCare will use existing service codes to identify service in administrative data.
WELLCARE DAYS	
Description	WellCare will conduct on-site events called *WellCare Days* to promote and educate members on health plan resources and health information. We will conduct *WellCare Days* events in key locations and agencies across the state to conveniently provide members with health education, information and benefit assistance on site. When we host a *WellCare Days* event, our Community Relations staff will set up iPads with health information on asthma and diabetes on which members will be able to interact and gather helpful information.
Eligible Members	All members
Limitations/Restrictions	Not applicable
Responsible Providers	WellCare Community Relations staff
Notification of Availability	Members will be notified through Member Handbook, website, and WellCare newsletter. Providers will be notified through Provider Manual, website, and onsite education and training.
Member Access to Service	Benefit will be included in member service plan.
Reporting	WellCare will use existing service codes to identify service in administrative data.
MINI FARMER'S MARKETS	
Description	WellCare will hold Mini Farmer's Markets throughout the state to educate and promote health nutrition. At these events, we make a small display of healthy fruits and vegetables available to members. We will hold up to 10 events annually and plan to continue holding these events in conjunction with community partners. The events promote healthy living information such as good nutrition practices and portion control.
Eligible Members	All members
Limitations/Restrictions	Not applicable
Responsible Providers	WellCare Community Relations staff
Notification of Availability	Members will be notified through Member Handbook, website, and WellCare newsletter. Providers will be notified through Provider Manual, website, and onsite education and training.

Member Access to Service	Benefit will be included in member service plan.
Reporting	WellCare will use existing service codes to identify service in administrative data.

HEALTH*CONNECTIONS* ACTIVITIES	
Description	Through our CommUnity Advocay efforts built from our proprietary Health*Connections* model we partner with community organizations to locate and educate members. In Nebraska, we have already been building these relationships meeting with agencies from across the state and already have such partnership commitments including Together in Omaha which helps people access documents like birth certificates and social security cards or SPEAKOUT in Western and Central Nebraska which helps people apply for various benefits. The beauty of the WellCare model is it benefits WellCare members and the community at large. Through these partnerships, not only will we be able to better reach and educate our members, anyone who accesses services through one of our partner agencies can also benefit from access to our one-of-a-kind CommUnity Assistance Line and Navigator Database. These are the programs we use to connect people in need to social support services – such as housing assistance, food banks or transportation. Our database of programs in Nebraska already contains some 5,000 groups. The primary goal of the Health*Connections* model is to improve the health and vitality of our members and communities by sustaining the social safety net and quantifying its impact on health outcomes. WellCare has identified four complementary program elements to achieve this goal. ➢ **CommUnity Activities**: Community-based health and wellness events leveraging existing programs. ➢ **Health*Connections* Councils**: Community-planning councils focused on quantifying the breadth and scope of the available social safety net and identifying creative and innovative ways to sustain the network together with other community and civic leaders. ➢ **Social Service Utilization Support:** Facilitating member connections to social services and bridging gaps in available community-based programs and services. ➢ **CommUnity Health Investment Program:** Strategic philanthropic granting program to support community-based innovation and to pilot potential social service payment models. In 2014, WellCare expanded the CommUnity Health Investment Program to include nearly 50 individual investment programs in five different states. To support the primary goal identified above using the four complementary strategies, WellCare created the CommUnity Command Center, a comprehensive and inter-related data lake of community-related information across multiple databases that provides our staff ease of access to community supports that other managed care organizations simply do not have. In addition to natural supports, service providers and community stakeholders, information is shared across the health care delivery system, to facilitate a comprehensive, holistic and person-centered approach to care and address issues and concerns as they arise.
Eligible Members	All members
Limitations/Restrictions	Not applicable
Responsible Providers	WellCare Community Relations staff
Notification of Availability	Members will be notified through Member Handbook, website, and WellCare newsletter. Providers will be notified through Provider Manual, website, and onsite education and training.
Member Access to Service	Benefit will be included in member service plan.

IV.E COVERED SERVICES AND BENEFITS

24. Describe the MCO's approach to member education and outreach regarding EPSDT, including any innovative mechanisms. Address the use of the MCO's system for tracking each member's screening, diagnosis and treatment to ensure services are delivered within the established timeframes. *(Page limit 4 pages)*

ENSURING MEMBERS UNDER 21 RECEIVE EPSDT SERVICES

WellCare's comprehensive Early and Periodic, Screening, Diagnostic, and Treatment (EPSDT) program is designed to connect children and their families with appropriate preventive care and medically necessary treatment and/or services to correct or ameliorate health conditions. Chronic and/or complex physical or behavioral health issues are identified, prevented, managed and treated sooner to ensure that children have the best opportunity to grow into healthy, productive adults. To achieve this goal, our EPSDT program features proactive education, outreach, follow-up, and incentives delivered through a variety of channels targeting members and providers. We have made, and continue to make, significant investments in our EPSDT program and related systems and processes to support nearly 1.6 million members under the age of 21 we serve in our Medicaid markets.

A WellCare Affiliate Example of Excellence

WellCare's affiliate in Georgia is the leader in adolescent well-care visits among all Care Management Organizations in Georgia, exceeding targets.

Our EPSDT program reinforces the principles of the EPSDT health benefit including early assessment at birth and continuing throughout childhood and adolescence. These efforts include:

- Identification, diagnosis and treatment of medical conditions as early as possible,
- Periodic assessment through well-child visits at regular intervals throughout childhood and adolescence
- Screenings for health as well as developmental and behavioral concerns (e.g. health history, developmental and behavioral assessment, physical exam, immunizations, lab tests, nutrition/obesity prevention, oral health, health education, and vision and hearing screenings)
- Effective diagnosis and treatment of health, developmental or social-emotional problems

Our EPSDT program and its formal program description, policy and procedures comply with all Nebraska and federal statutes, regulations, administrative rules, and Medicaid contract requirements governing EPSDT.

OUR APPROACH FOR EPSDT EDUCATION AND OUTREACH

WellCare recognizes the need for multiple varied and innovative strategies to effectively educate and outreach to members and parents and guardians regarding the benefits of EPSDT screening, diagnosis, and treatment services. WellCare will assist members in making responsible decisions about preventive health care and appropriate utilization of health care services. Our EPSDT program features a blend of outreach and informational activities targeted to specific segments of the population, including newly enrolled, age-specific and pregnant. By offering communication through these various avenues, we continually reinforce the importance of EPSDT program and services. Our outreach and informational efforts address the importance of preventive care, periodicity and immunization schedules, information on diagnostic testing, screenings and assessments, how and where to access services, transportation and scheduling assistance, and a statement to members that services are provided without cost.

New Member Education

Member Materials: Our efforts to educate members and parents/guardians about the EPSDT benefit and the importance of following the periodicity preventive health screening schedule begin as soon as members enroll with WellCare. Within 10 calendar days of enrollment, all new members are sent a member packet informing them and their family of the availability and the benefits of EPSDT services. The new member packet contains information on a variety of topics such as outlining the need for a health and screening visit within 90 calendar days of enrollment and within 24 hours of birth. This packet includes a Member Handbook, which has detailed information about pediatric preventive health guidelines from birth through age 21 of available and recommended screening, diagnostic and immunization schedules. The Member Handbook also informs members of their rights to treatment for medically necessary services discovered through preventive health screening visits, including physical and behavioral health conditions.

Member Contact: All new EPSDT-eligible members, including reinstated members, are automatically scheduled for a welcome call within 15 business days of the date we send the welcome packet. The welcome calls with members (or their parents/guardians) will include a health risk screening (HRS) to identify chronic conditions, barriers to accessing care, special needs, pregnancy, or the need for care coordination services. We also determine through claims and encounter information whether the member has seen a Primary Care Provider (PCP) within 90 days of joining WellCare. For those members who have not yet seen their PCP, we mail a letter encouraging them to schedule an appointment for their EPSDT health screening. This direct contact further expands our ability to connect members with their PCPs which improves EPSDT compliance rates.

Targeted and Innovative Member Outreach Strategies: Reaching Members Where They Are

The following are examples of our various EPSDT education campaigns and activities:

- **Ongoing Event-Triggered Outreach:** In accordance with our periodicity letter policy, on a monthly basis WellCare identifies all members having a birthday who may be due for age-appropriate screenings and assessments according to the approved periodicity schedule. We mail state approved, age-specific letters informing members and/or parents/guardians of the recommended screenings and services they may be due for.
- **Proactive Member Telephonic Outreach:** The telephonic outreach program educates members and encourages certain behaviors aimed at improving the rate of preventive care participation of our members. WellCare proactively conducts outbound phone calls for members who have not had an EPSDT visit that corresponds with the appropriate HEDIS measures for recommended visits. The outbound phone call ensures that members and parents and guardians understand the need and importance of seeing their PCP for a well-child check-up including immunizations and lead screenings. Our representatives educate members and parents and guardians and assists with scheduling an appointment with the PCP via a three-way phone call. If transportation is a barrier to care, the representative will also assist in obtaining a ride to and from the appointment for the member. Proactively identifying members and encouraging compliance with EPSDT services has resulted in significant improvements in our corresponding HEDIS measures for these populations.
- **Member Calls to Member Services:** WellCare effectively capitalizes on member-initiated calls to Member Services as an opportunity to remind members about recommended screenings, checkups and immunizations. During the inbound call, the member services representative addresses outstanding care gaps with the member. For children and adolescents, we target adolescent well-care visits, childhood immunizations, lead screening, well-child visits for 0 to 15 months and well-child visits for those 3 to 6 years old. For those members with care gaps, the member services representative provides basic education about the needed preventive service and asks the member if an appointment has been scheduled. If an appointment has not been scheduled, the representative offers to assist the member in scheduling the appointment, and transportation if needed, through a

three-way phone call with the provider's office or transportation broker. Members receive an automated reminder 24 hours beforehand.

- **Pregnancy-Related EPSDT Outreach and Education:** We know the key to healthy children is reaching moms and moms-to-be and supporting their efforts to raise healthy children. WellCare's maternity education program includes a variety of materials including brochures, pamphlets and booklets like *Your Journey through Pregnancy* and *Mommy & Baby Matters*. These explain the importance of newborn screenings in the hospital, well-baby checkups and immunizations. In addition, WellCare staff members provide education, both one-on-one (in person and via telephone) and in group settings at our community prenatal/postpartum education sessions and our community-based Prenatal Baby Showers. Community outreach staff members also provide education on the importance of selecting a pediatrician and scheduling appointments for checkups. Once the baby has been delivered, we use telephonic outreach conducted by our centralized telephonic outreach staff to educate members about the importance of the postpartum follow-up visit and the first well-child checkup. If the member would like assistance scheduling appointments, the outreach specialist facilitates a three-way phone call between the member and her OB provider and/or the baby's pediatrician.
- **Targeted Care Management:** When specific health issues are identified through assessments and screenings, care management is engaged. One such example is our Lead Care Management program for EPSDT-eligible children and their households when there is a positive blood lead test equal to or greater than 10 micrograms per deciliter. The Lead Care Management program supports children, their families, and their providers through education and development of a written care plan that includes all necessary referrals, coordination with public health agencies, environmental lead assessments, and monitoring of non-compliance with follow-up testing and appointments.
- **Community Outreach:** Our Nebraska-based CommUnity Advocates will work with community partners to find innovative community-based programs that use evidence-based practice guidelines to which we refer our members. In addition, our CommUnity Advocates connect with social service agencies to establish a contractual relationship through which we track members referred to services for outcomes reporting. Team members not only create opportunities for member engagement, they also work closely with community partners, providers and stakeholders who are serving our member population to enhance or expand services being offered to the membership base. Among the team's many grassroots efforts are *WellCare Days*, which are outreach initiatives in places where we can most successfully reach members in their communities such as provider offices, school-based health clinics, farmer's markets, health department offices, Women, Infants, and Children (WIC) offices, and other social service agencies. WellCare events, including *WellCare Days*, are designed to educate members on their benefits, PCP home and health screenings (EPSDT, well-baby checkups, prenatal care, etc.).
- **Digital Media and Mobile Technology:** WellCare leverages digital media and mobile technology to reinforce the importance of preventive screenings and immunizations. WellCare's health and wellness member portal provides parents and children with helpful, age-appropriate information about a variety of health topics. Our Kid Zone features child-friendly newsletters, games, comics and coloring books, including information on the importance of dental health. For parents, we offer a library of articles, frequently asked questions and fact sheets related to the various recommended immunizations. In addition, our mobile application for smartphones and mobile devices, "MyWellCare," provides friendly and timely alerts when members are due for wellness services or checkups. The application enables us to send messages to members about important, time relevant items – like reminders about flu shots, upcoming enrollment periods or changes in benefits. WellCare also engages with our Facebook community, which includes members, around topics such as health and social services and support, community engagement, and member and community education and services. WellCare does not share protected health information (PHI) of any kind on social media without expressed permission from the member and/or designated guardian. Member comments on

social media that include PHI are removed by WellCare. In 2016 we expect to launch a Twitter account and a company blog to further these efforts.

- **Reaching Members through Providers:** In addition to outreaching to members directly, WellCare also partners with our providers to conduct member outreach. For example, on a monthly basis, WellCare sends providers a list of WellCare members assigned to the PCP who are not in compliance with the health check periodicity schedule and/or have failed to access initial health check services within 90 days of enrollment based on claims history. The letter encourages the provider to outreach to the members to schedule appointments. We also leverage our provider portal which includes member-level information about specific screenings, immunizations and overdue services. In addition, our Nebraska-based Clinical HEDIS Practice Advisors (CHPAs) deliver education and consultation to providers and provider practice sites on a number of preventive and chronic health management measures including immunizations and well-child/well-care checks. They assist provider offices with barrier analysis and developing strategies to improve compliance within the practice.

WellCare's System for Tracking and Ensuring Delivery of EPSDT Services

WellCare uses data to not only optimize our outreach efforts, but to objectively evaluate program performance capitalizing on best practices and addressing inefficiencies in order to improve member health, well-being and health outcomes. Our comprehensive efforts and systems to ensure delivery of EPSDT services include quarterly and annual analysis of our EPSDT program to identify population-wide trends and opportunities to improve the program overall. Our performance management metrics include a balanced selection of process-related metrics and outcomes metrics as described below.

Outcomes and Process Measures

On a quarterly basis, our Data Analytics and Quality Improvement teams analyze EPSDT-related outcomes and process measures, looking for program performance, trends and opportunities for improvement. As part of this analysis, we evaluate outreach contacts and compliance rates in total as well as by race, region, ethnicity and screening or service. The insights derived are then applied to program enhancements. Measures include, but are not limited to, the number and percentage of members having screens/visits as prescribed by the Recommendations for Preventive Pediatric Health Care Bright Futures Periodicity Schedules; members receiving appropriate immunizations, lead and TB testing; and members receiving diagnostic and treatment services, including referrals. WellCare also tracks process measures to evaluate program activity, including the number and percentage of members mailed periodicity reminder letters, providers mailed a list of members needing health check screening, and members on the provider's monthly membership list.

Medical Records Audit

WellCare conducts annual review of contracted provider office medical records using criteria based on general medical record documentation standards and adherence to preventive care guidelines. The review identifies compliance with medical record review standards and if needed, opportunities for improvement. A random sample of providers is selected each year. The EPSDT component of the audit evaluates provider adherence with EPSDT recommendations within each of the randomly selected medical records. Individual provider corrective action plans are required for providers who are below 80 percent compliance with all elements of the review.

25. Describe the MCO's plan to utilize telehealth for any services in the benefits package, including how the MCO will incorporate member preference for in-person or telehealth service, how it will be operationalized throughout the state, and how its use relates to the MCO's utilization management strategies. *(Page limit 3 pages)*

REACHING MEMBERS WHERE THEY ARE: WELLCARE'S APPROACH TO TELEHEALTH

WellCare has adopted a telehealth strategy to provide a tangible way to expand access to care for members in areas that have few providers or in instances where a member has difficulty traveling to be seen. Among its many benefits, telehealth increases access to specialty care for patients in rural and frontier areas, decreases travel time and saves money for patients and caretakers.

As we traveled the state building our Nebraska strategy and meeting with stakeholder organizations, we learned that there is a strong appetite for telehealth solutions and a great opportunity for more innovation by managed care organizations in the state to support telehealth initiatives. The Center for Rural Affairs in Lyons, for instance, shared with us a significant need for telehealth innovation that takes these technologies to the next level for the communities they represent and shared with us exciting early opportunities that can be leveraged and supported moving forward, including interesting initiatives in neighboring South Dakota. Whether it's one of the Tribal Clinics we met with that is using telepsychiatry to support their behavioral health patients or one of the state's largest providers of children's services equipping each of its clinic with telehealth capability, it was clear to us that the time is ripe for innovation and expansion of telehealth opportunities for the people of Nebraska.

From our experience with Medicaid managed care programs, we have identified three primary ways we will support, promote and/or facilitate the use of telehealth in Nebraska:

- Develop reimbursement methodologies to make it worthwhile for providers to use existing technologies to conduct telehealth such as reimbursement for the hosting site
- Help support through grant funds the development of new telehealth sites in remote areas where such services don't currently exist
- Provide for the technology to support direct provider to member care using telehealth technologies, such as Cobalt Therapeutics, an online tool for members to access Cognitive Behavioral therapy and self-management tools; or through our relationship with American Well, a telehealth company that provides a network of available providers online 24/7.

Implementing Telehealth throughout Nebraska

WellCare will partner with providers, groups of providers and with the Nebraska Statewide Telehealth Network (NSTN) to extend health care resources to those in need using video technology. NSTN is a collaboration of over 110 sites, including hospitals, health departments, mental health centers, physician offices and rural health clinics. This includes clinical consultation, support groups, education and training and connectivity for administrative meetings among professionals.

Telehealth Reimbursement

As a value-added service, WellCare will reimburse telehealth originating sites for hosting services.

WellCare's telehealth providers will be required to follow all applicable state and federal regulations governing their practice and the services they provide. WellCare will follow all MLTC policies and procedures as defined in 471 NAC 1-006, including site criteria and conditions for payment. Our telehealth sites will be required to conduct telehealth via interactive telecommunication systems and in compliance with the Health Insurance Portability and Accountability Act (HIPAA). Health care facilities that receive reimbursement for

consultations provided by a Medicaid-participating provider will also be required to establish quality-of-care protocols and patient confidentiality guidelines.

- **Equipment Criteria:** Medicaid-covered telehealth services delivered by a health care practitioner must utilize an interactive audio and video telecommunications system that permits real-time communication between the health care practitioner at the distant site and the client at the originating site. Reimbursed telehealth services will not include a telephone conversation, electronic mail message, facsimile transmission between a health care practitioner and a client, a consultation between two health care practitioners and asynchronous "store and forward" technology.
- **Confidentiality and Security Criteria:** WellCare will require that interactive video telecommunications comply with HIPAA patient privacy regulations at the member's location, the consulting provider's location and in the transmission process. All communication must also be on a secure network in compliance with HIPAA encryption and redundancy requirements.
- **Telehealth Reporting:** We will identify and report on all locations of telehealth presentation sites and the number of providers who commit to providing telehealth.
- **Reimbursement:** WellCare will cover medically necessary telehealth services at a rate comparable to an in-person consultation. As part of our value-added set of services, WellCare will also reimburse originating sites for hosting services.
- **Safety Plan:** For each member receiving telehealth behavioral health services, a safety plan will be developed, should it be needed at any time during or after the provision of the telehealth service. This plan will document the actions the member and the health care practitioner will take in an emergency or urgent situation that arises during or after the telehealth service.
- **Pediatric telehealth behavioral health services:** For each member who is a child who is receiving telehealth behavioral health services, an appropriately trained staff member or employee familiar with the child's treatment plan or familiar with the child will be immediately available in person to the child receiving a telehealth behavioral service in order to attend to any urgent situation or emergency that may occur during provision of such service. This requirement may be waived by the child's parent or legal guardian. The medical record shall document the waiver.
- **Originating Sites:** Where there are gaps in service locations for originating sites, WellCare will leverage our CommUnity Advocacy team to identify ways to address member access. We will look for opportunities to partner with a local library, community action agency, or other organizations to support HIPAA-compliant telehealth originating site services. As necessary, we will also equip our geographically dispersed Welcome Rooms, which can serve as convenient telehealth originating sites.
- **Telehealth Online:** WellCare's telehealth program in Nebraska will also include web-based consultations to our members. This innovative service will provide members with online (through two-way video technology) physician consultations for clinically appropriate conditions. Members will be able to access through a secure Internet connection or an app on their mobile phone. This service will complement the continuum of options for our members, enhance their access to services and provide alternatives to the emergency department.

Examples of innovate efforts that WellCare has undertaken and will leverage as appropriate include:

- **School-based Health Centers:** WellCare of Georgia provided the funding to equip Appling County Elementary and Appling County High schools with telehealth systems which will allow school nurses to connect injured and sick students and faculty to health care providers at Appling HealthCare System via a video conference
- **Pilot programs:** We are piloting programs in New York, Kentucky and South Carolina that will target reducing hospital readmissions through the use of telemedicine, including leveraging telemedicine platforms to connect case managers and members. In South Carolina, telehealth is being used to engage members after discharge to ensure they are making their follow-up programs and

compliant with their discharge plan.

Member Preference for In-Person or Telehealth Services

Interest and satisfaction in telehealth is increasing as more people become comfortable with the technology. Some even prefer it. WellCare will enable Heritage Health members to make their own decisions about whether telehealth is right for them:

- **Member Education:** We will educate members through multiple avenues of communication. WellCare's provider relations representatives in rural and frontier areas will distribute colorful member-friendly brochures to providers in their regions, so providers can make them available to our members. The brochure will include a toll-free number and the website for members to obtain information about telehealth scheduling and referrals. Additionally, WellCare distributes quarterly newsletters by mail and online. Our newsletters will periodically include information about how members can learn more about using telehealth by asking their doctor or calling Customer Service.
- **Member Informed Consent:** Before an initial telehealth service, WellCare will require that health care practitioners provide the member (or parent/guardian) with written information in the form of the *Nebraska Medicaid Telehealth Patient Consent Form* which must be acknowledged by the member. An information packet will include Health Insurance Portability and Accountability Act (HIPAA) information and the consent form to acknowledge that telemedicine will be used. The consent form will include what alternative options are available, including in-person services, all existing laws and protections (e.g. confidentiality, access to medical records, and dissemination of member identifiable information), whether the telehealth session will be recorded, and the right to be informed who is present during the telehealth session.

TELEMONITORING

Telemonitoring involves easy-to-use equipment to help members track their vital signs at home. Vitals are transmitted automatically to a provider and monitored by a nurse. WellCare has begun discussions with several telemonitoring companies and is currently evaluating platforms and services for telemonitoring. WellCare believes that telemonitoring can be used to prevent hospital admissions and readmissions. At a minimum, WellCare will cover telemonitoring services when the following conditions have been met:

- The member has been hospitalized two or more times in the last twelve (12) months for conditions related to the disease. This provision is not required for infant apnea monitoring
- The member is cognitively capable of operating the equipment or has a willing and able person to assist in the transmission of the electronic data
- The originating site has space for all program equipment and full transmission capability
- The provider's record contains data that supports the medical necessity of the service, all transmissions, and subsequent review received from the member, and how the data transmitted from the member is used in the continuous development and implementation of the member's plan of care

As a value-added service, WellCare will also provide telemonitoring services for diabetic members, when clinically appropriate, so they can send daily blood glucose readings to their provider and a diabetic nurse.

Telehealth and Telemonitoring: An Integral Part of our Utilization Management Strategies

We believe these tools can help us reach the goals of our Utilization Management strategies to ensure members get the right levels of care at the right time and aren't forced into higher levels of care simply because the right level isn't available. And to further streamline access, WellCare does not require authorization for referrals to telehealth specialists.

IV.E COVERED SERVICES AND BENEFITS

26. Describe the MCO's experience with an integrated pharmacy benefit in other states and specify the type of plan and enrollment. Provide a preliminary work plan identifying key milestones, tasks, and accountability for implementation of Pharmacy Services as described in the RFP. *(Page limit 3 pages, excluding preliminary work plan)*

PROVIDING INTEGRATED PHARMACY BENEFIT TO MEMBERS

WellCare has more than 20 years of experience serving the pharmacy needs of Medicaid members. ***Annually, we manage more than 200,000 pharmacy prior authorizations across all of our Medicaid plans with nearly 100 percent resolved within 24 hours where required.*** In accordance with the Department of Health and Human Services (DHHS), Division of Medicaid & Long-Term Care (MLTC) requirements, WellCare will provide coverage for all therapeutic classes of drugs covered by the Nebraska Medicaid pharmacy benefit and will follow the Nebraska Medicaid preferred drug list (PDL). WellCare of Nebraska's Pharmacy Director, who will be a registered pharmacist with a current Nebraska license, will work collaboratively with our corporate pharmacy department and MLTC to coordinate the necessary clinical services and to ensure appropriate pharmacy benefit design, decision-making criteria, and formulary exceptions are followed.

WellCare's Experience with an Integrated Pharmacy Benefit in Other States

WellCare currently provides integrated pharmacy services across eight states. The table below (**Figure 9**) summarizes plan types and enrollment:

Figure 9

WELLCARE INTEGRATED PHARMACY BENEFIT			
Experience			
State	**Plan Type**	**Enrollment**	**Start Year***
Florida	Medicaid (TANF, ABD), CHIP	752,000	1985
Georgia	Medicaid (TANF), CHIP	589,000	2006
Hawaii	Medicaid (TANF, ABD), Behavioral Health	48,000	2009
Illinois	Medicaid (TANF)	173,000	2004
Kentucky	Medicaid (TANF, ABD), CHIP	436,000	2011
New Jersey	Medicaid (TANF, ABD, MLTSS)	60,000	2013
New York	Medicaid (TANF), CHIP	113,000	2002
South Carolina	Medicaid (TANF, ABD)	62,000	2013
**Start Year indicates the first year in which WellCare manages integrated pharmacy benefit.*			

Our approach in each state is tailored to the needs and requirements of our government partners. In 2014, for example, we implemented the State of Florida's Medicaid PDL for our 752,000 Florida Medicaid members.

WellCare's Pharmacy Operations Model

WellCare's experience in pharmacy operations is characterized by our unique hybrid model (**Figure 10**) with a number of critical pharmacy management functions performed in-house by WellCare personnel coupled with the activities of a pharmacy benefits manager (PBM). Under our hybrid model, our corporate pharmacy resources are responsible for prior authorization determinations, appeals, claims testing, Pharmacy and Therapeutics (P&T) Committee, quality improvement, retrospective drug utilization reviews, rebate management, and members and provider communications. Our PBM partner processes the pharmacy claims point-of-sale, contracts and remits the pharmacy network, performs phone, desk, and on-site audits, coordinates transition of care, answers after-hours provider calls, and provides explanations of benefits.

Figure 10

WellCare's Pharmacy Operations Model

WellCare's pharmacy operating model retains critical pharmacy benefit management functions in-house managed by experienced WellCare staff.

WellCare is responsible for:

- Coverage Determination Requests
- Redeterminations & Appeals
- Formulary Development & Management
- Pharmacy &Therapeutics (P&T) Committee
- Pharmacy Quality Oversight Committee
- Retrospective Drug Utilization Reviews
- Rebate Dispute Resolutions
- Provider Escalated Calls

Our PBM is responsible for:

- Pharmacy Claims Processing
- Pharmacy Network Development
- MAC List Management
- Audits
- Transition of Care letters
- After-hours Provider calls
- Explanations of Benefits (EOBs)
- Pharmacy Remittance Advices

Corporate Pharmacy Organization

WellCare's corporate pharmacy organization employs more than 380 associates, including a senior medical director, 40 clinical pharmacists, 195 pharmacy technicians and 154 support staff and management personnel (of whom 25 are pharmacists). Additional licensed medical directors provide support for pharmacy prior authorization requests on an ongoing basis.

PBM Vendor

WellCare chose our PBM vendor based upon their successful partnership with managed Medicaid clients of all ages during the past 20 years. Our PBM vendor currently manages Medicaid members across 27

states, representing more than 12 million covered lives. The PBM's ability to customize their services and programs to meet the unique needs of Medicaid-focused customers' objectives sets them apart in the marketplace. They have a comprehensive clinical focus that is dedicated to monitoring per member per month utilization and prescribing patterns, while implementing innovative programs that address managed Medicaid members. The PBM's managed Medicaid experience has resulted in the creation of a number of customizable tools that help optimize appropriate drug utilization, including:

- Step therapy programs that operate under nationally recognized, evidence-based clinical guidelines
- Online decision support tool to help us view and manage our plan's performance
- Flexible clinical programs designed to improve key HEDIS measures

The State of Nebraska will benefit from our ability to analyze utilization trends and create custom tools to match their unique needs. Heritage Health members will benefit because we will be in a better position to ensure appropriate access to medications in a timely manner. Figure 26.2 describes our hybrid approach to pharmacy operations.

Pharmacy Operations Workflows

Our experience includes recent investments in our pharmacy prior authorization technology and processes, notably in our custom, proprietary, role- and task-based Drug Evaluation Review (DER) Work Flow System, which serves as our prior authorization platform. This fully automated platform allows us to track and process DER requests, including prior authorizations and formulary exceptions, in a timely manner and in accordance with contract requirements. Key features of the DER Work Flow System include:

- Intelligent routing to specialized pharmacy technicians based on the type of medication requested
- Color-coded alerts to notify pharmacy staff of approaching service level deadlines
- Integrated decision tools that are used by administrative and clinical reviewers to evaluate information provided by the requestor, review the patient's prescription history and consult any and all medical documentation accompanying a request

All prior authorization requests are dated and time-stamped to ensure they are resolved within the required 24-hour time frame (unless an exception applies). If an emergency supply of medication is needed while the DER review is pending, we provide the required 72-hour supply of covered outpatient medication drugs, and will continue to do so. Additionally, to ensure members receive their medications in a timely manner over weekends and when providers' offices are closed, WellCare members are eligible for a seven day supply of medications while the review is being conducted, far exceeding the mandated 72-hour supply. For any DER request that is denied, the system generates a Drug Utilization Reviews (DUR) form and automatically transmits it to the prescriber and the pharmacy (if applicable). The DUR includes a clear description of the reason for the denial, any preferred alternatives or additional details, and other information which the member and provider can use to understand the decision.

PRELIMINARY WORK PLAN

See **Attachment 26a_Pharmacy Services Preliminary Work Plan** for a copy of WellCare's preliminary work plan identifying key milestones, tasks, and accountability for implementation of pharmacy services as described in the RFP. Consistent with those requirements, at least 60 calendar days prior to the contract start date, WellCare will submit to MLTC for written approval all policies and procedures related to the provision of the pharmacy benefit, including the formulary, utilization review policies, procedures to ensure compliance with the PDL, clinical and utilization edits, provider requirements, subcontracts, pricing and reimbursement.

Pharmacy Work Plan for Nebraska

ID	Task Name	Duration	Start	Finish
1	**Pharmacy**	**195 days**	**Mon 04/04/16**	**Fri 12/30/16**
2	**Formulary Management**	**171 days?**	**Tue 05/03/16**	**Tue 12/27/16**
3	Obtain benefit design	140 days	Mon 06/06/16	Fri 12/16/16
4	Obtain PDL/RDL	140 days	Mon 06/06/16	Fri 12/16/16
5	Decision on transition policy	140 days	Mon 06/06/16	Fri 12/16/16
6	Establish pharmacy network	101 days	Mon 07/04/16	Mon 11/21/16
7	Rebate contracts	101 days	Mon 07/11/16	Mon 11/28/16
8	Website - pharmacy related	116 days	Mon 06/13/16	Mon 11/21/16
9	Provider/Member communications - all forms	57 days	Mon 07/18/16	Tue 10/04/16
10	Create member eligibility files	111 days	Mon 07/25/16	Mon 12/26/16
11	State/Regulatory reporting - pharmacy related	101 days	Mon 07/18/16	Mon 12/05/16
12	Ensure P & P Compliance	120 days	Mon 05/02/16	Fri 10/14/16

29	Hours of Operations	100 days	Mon 04/04/16	Fri 08/19/16
30	Appeals	128 days	Fri 12/02/16	Wed 06/28/17

Page 1

IV.E COVERED SERVICES AND BENEFITS

27. Describe how the MCO will ensure compliance with the Mental Health Parity and Addiction Equity Act, including how the MCO will evaluate and measure its compliance. *(Page limit 3 pages)*

ENSURING COMPLIANCE WITH THE MENTAL HEALTH PARITY AND ADDICTION EQUITY ACT

WellCare has developed a best-in-class fully integrated approach to comprehensive, coordinated health care that supports physical, behavioral and pharmaceutical services, as well as social services for our members. We fully support the goals of the Mental Health Parity and Addiction Equity Act (MHPAEA), which generally prevents certain health plans that provide mental health or substance use disorder benefits from imposing less favorable benefit limitations on those benefits than on medical/surgical benefits. In April 2015, the Centers for Medicare & Medicaid Services (CMS) proposed to apply certain provisions of the parity act to requirements for Medicaid managed care organizations, Medicaid alternative benefit plans, and the Children's Health Insurance Program (CHIP). We understand there were many substantive comments submitted in response to the proposed regulation; therefore, final implementation plans will need to be revised to reflect any changes made in the final regulation. To date, we have executed our current business to support all aspects of the MHPAEA and will continue to work with Nebraska's Department of Health and Human Services (DHHS), Division of Medicaid & Long-Term Care (MLTC) to ensure continued compliance with the final regulation.

WellCare is currently in the process of reviewing all of our current behavioral health benefits, prior authorization programs and other utilization management policies to identify any changes that will need to be made to ensure continued compliance. We anticipate having that review completed by July 1, 2016. At that time, and after the publication of the final regulation, we will begin implementing any necessary changes. Given our already integrated approach, our analysis has shown that we are already in a good position as it relates to parity requirements and, in some cases, ahead of the curve.

We believe close coordination between MLTC and Heritage Health managed care organizations will be necessary to carefully review the application of Non-Quantitative Treatment Limits (NQTLs) as we compare physical and behavioral health services and their application to other home and community based and intermediate level services. NQTLs are limitations that are not expressed numerically and cannot be translated into quantitative limitations (such as prior authorization or geographic limitations), including medical management standards, standards for provider admission to participate in a network, and conditioning benefits on completion of a course of treatment.

We also look forward to working with the MLTC to ensure that all services provided in order to be in compliance with the MHPAEA are included in the managed care rates as required in both the Proposed Managed Care regulation and the Proposed Mental Health Parity regulation.

EVALUATING AND MEASURING COMPLIANCE

WellCare operates a fully integrated health plan and as such, we are able to review all of our clinical and operational processes through a single regulatory and compliance program. Attention is paid to all government regulations to assure we are compliant. The MHPAEA requirements are thoroughly reviewed and the areas of the health plan affected by the Act are involved in implementing processes and monitoring compliance. The behavioral health leaders of our organization serve as subject matter experts to inform the company on all issues related to the requirements around meeting MHPAEA. Staff members receive training on MHPAEA, and policies and procedures have been developed. Ongoing review of our utilization management program, health plan benefits and claims processing is performed.

To ensure and measure compliance with MHPAEA requirements, WellCare will undertake the activities outlined in the items below.

Implementing Consistent and Equitable Medical Management Techniques

WellCare ensures medical management techniques utilized are deployed in a single operating system/medical management platform within the standards of NCQA. Providers, whether medical or behavioral, make treatment requests through the same process. The medical review, denials and appeals processes are handled essentially the same with consistent timelines and medical necessity review. We conduct inter-rater reliability analysis annually to monitor and ensure consistent application of utilization management guidelines.

Ensuring MHPAEA Compliance for non-State Plan Services

Authorization of value-added services that go beyond the Nebraska State Plan is reviewed to assure MHPAEA compliance. All members, regardless of their treatment needs, have access to value-added services.

Providing Medical Necessity Criteria upon Request

In making medical necessity determinations, WellCare applies written, evidence-based guidelines and review criteria to ensure members receive the right care, at the right time and in the right setting. Guidelines and criteria are vitally important decision support tools which ensure medical necessity decisions are based on sound clinical evidence. They also enable fair, impartial and consistent decision-making. All medical and behavioral health medical necessity criteria are accessible to members and providers upon request. We post links to our criteria on our member and provider websites as well.

Providing Reasons for Denial of PaymentWellCare uses nationally recognized medical necessity criteria as well as nationally recognized and developed evidence best practice clinical care guidelines to determine the medical necessity of services. To ensure that high quality, clinically appropriate services are provided to members in the right place, for the right length of time, *we minimize prior authorization requirements for most outpatient, community-based services for behavioral health and co-morbid conditions.* We manage these services by analyzing our data and identifying outliers.

If, however, a request for service is made that does not meet criteria, a denial could be issued. WellCare takes a proactive approach on educating our providers and members on how to handle claim denials:

- **Provider Explanation of Payments:** Each explanation of payment to a provider informs them of their obligation to dispute or appeal a claim denial and not to balance bill the member
- **Member Notice of Action:** For denials, a notification goes out to the member explaining their appeal rights through State-Fair Hearing should it be necessary

When a denial is made, our staff members offer or recommend an alternative level of care that does meet criteria. When a request is made for services not covered under a medical or behavioral health benefit, we work with the provider or member to find alternative services as needed. If the member is under 21, we consider if the service meets EPSDT requirements as well. For instance, a member of our Florida affiliate had need of partial hospitalization for an eating disorder which was authorized outside of the benefit package because it was determined the best course of action.

As part of our company-wide commitment to quality and service improvement, we use data from our appeals system to evaluate and measure denial and appeal rates. We generate quarterly and annual member appeals reports to help us identify deficiencies or patterns in specific program areas, including utilization management. We will initiate corrective action as needed based on those findings. These reports will be presented to our Quality Assurance and Performance Improvement Committee (QAPIC) on a quarterly basis and include trends in volume and types of appeals, volume of appeal levels, volume

of appeals over-turned and results for overturned appeals. This analysis will allow us to compare appeals across physical and behavioral health services. As part of our subcontractor oversight process, all appeal data from our delegated subcontractors will be incorporated into the reports presented to the QAPIC.

Providing for Out-of-Network Coverage through a Balanced Approach

WellCare applies out of network criteria the same for medical and behavioral out-of-network services. In general, WellCare will approve out-of-network services for members when an in-network provider is not available, the service needed is not available or the member is experiencing a crisis outside of the network area. WellCare establishes relationships with non-participating providers through a single case agreement (SCA) on a case-by-case basis to address gaps or barriers to care to ensure access standards are met. A SCA allows a member's health care needs to be met within geographic access and appointment availability standards when access to a particular type of provider, including behavioral health providers, is not available through our contracted network.

While we have well-developed processes for providing out-of-network services when necessary, WellCare will conduct comprehensive ongoing monitoring and development of our physical and behavioral health network of providers. This ongoing development allows us to maintain and exceed Heritage Health members' satisfaction rates, Nebraska Medicaid access to care standards, and comply with MLTC contract requirements. To do this, we will review multiple data sources, including quarterly GeoAccess analyses, appointment availability audits, member grievance information, closed panel reports and non-participating provider paid claims. If a network inadequacy or gap is discovered, our Network Development team creates a plan to close the gap. Particularly in rural and frontier areas of Nebraska that lack behavioral health providers, WellCare will provide telehealth services as one of several strategies to improve access. WellCare will enable Heritage Health members to make their own decisions about whether telehealth is right for them through member education strategies and use of the *Nebraska Medicaid Telehealth Patient Consent Form.*

IV.F MEMBER SERVICES AND EDUCATION

28. Describe member services processes including:

- Training of customer service staff (both initial and ongoing).
- Routing calls to appropriate persons, including escalation.
- Making information available to customer service staff (the type of information and how it is provided, e.g. hard copy or on-line search capacity).
- Handling calls from members with limited English proficiency and persons who are hearing impaired.
- Monitoring and ensuring the quality and accuracy of information provided to members.
- Monitoring and ensuring adherence to performance standards.
- How MSRs will interact with other organizations including MLTC, other MCOs, and other programs/social service entities (e.g., WIC, housing assistance, and homeless shelters).
- After hours procedures.

(Page limit 6 pages)

WELLCARE'S MEMBER-FIRST PHILOSOPHY IN ACTON: MEMBER SERVICES OVERVIEW

Building long-term relationships with members is the essence of our successful approach to managed care. We understand that these relationships are built on the trust that comes from open, helpful and timely communication with members. This is particularly important when members are transitioning from fee-for-service or other health care delivery systems. To that end, we guide members through this process with care and compassion as we endeavor to improve their health and quality of life.

WellCare's experience in guiding members with a diverse set of needs is broad and includes expertise in serving people with complex needs including aged, blind and disabled, those dually eligible for Medicare and Medicaid, those in home and community based waivers or receiving long term supports and services, and individuals with an array of other special needs. ***Our robust member services operation serviced more than 9 million calls in 2014 across our programs.***

We use a multi-modal approach toward member services allowing us to meet our members where they are and in their preferred mode of communication whether telephonically, by mail, in person, in a welcome room, during member outreach, through social media, our website, our mobile application, email, or instant messaging.

- **Contact Center**: We offer multi-modal contact options to our members. In addition to live agent telephonic interaction, members may contact us by email, chat and social media and request many services using natural language through our enhanced speech recognition call system.
- **In Person:** Our welcome rooms will be located strategically throughout the state to offer members opportunities to meet with a WellCare associate for in-person assistance.
- **Electronic**: Our member website contains a wide array of resources and tools, including the member handbook and the find-a-provider tool. Our members are educated about the availability of our website as part of our initial welcome packet and call and are offered materials in hard copy should they desire them. Our mobile application is also available to members with Apple or Android devices.

BRINGING OUR EXPERTISE TO NEBRASKA: DEPLOYING AN INTEGRATED CONTACT CENTER

WellCare will operate an integrated member services contact center to respond to the needs of Heritage Health members whether for physical, behavioral, pharmacy or social supports. Our one-stop-shop approach is intended to give members seamless access to the services they need in one place and includes access to our robust social safety net referral system. Associates working on our dedicated toll-free member services line will be be specifically equipped with local knowledge of the community to adeptly respond to the needs of our Nebraska members.

Our contact center will be staffed Monday through Friday from 8:00 a.m. – 5:00 p.m. Central Time except on state holidays. Our associates will be specifically trained on all aspects of the Heritage Health plan. Our contact center will be operated based on established and documented policies and procedures including staffing, training, hours of operation, access and response standards, warm transfers, care management referrals, call escalation, data entry, reporting, performance and call quality monitoring. Mapping search engines are available to contact center associates as tools to recommend providers and assist with member transportation. The Nebraska-dedicated toll-free number and hours of availability will be printed in the member handbook and on each member ID card, as well as listed on our website.

Successful Member Engagement

WellCare measured a member satisfaction rate of 90 percent across our nine Medicaid states.

A measure of our success in delivering exceptional customer service is demonstrated by our member satisfaction of 90 percent, across our nine Medicaid states January through July 2015. We will combine this expertise with our understanding of local issues as we implement our Nebraska-specific member services program.

Training of Customer Service Staff: Initial and Ongoing

WellCare will use our well-established training policies, processes and procedures to support our customer service contact center prepare for serving Nebraska members. These trainings will be customized for the unique needs and requirements of Nebraska. Our processes include a train-the-trainer methodology, training supervisors first and then contact center staff, and a detailed contact center training plan with documented completion. WellCare has developed, refined and consistently utlized this curriculum to effectively prepare thousands of member services associates, including those servicing markets and assisting beneficiaries new to managed care.

New Hire Training Program

Our member services associates undergo a comprehensive training and testing regimen prior to being placed on the inbound phone queue. Initial training consists of four-weeks of instructor-led, classroom-based training. Associates will be specifically trained on all aspects of the Heritage Health plan and will be able to service all members regardless of their needs – physical, behavioral, pharmacy or social supports. Our training curriculum consists of 37 courses that include, among other topics:

- A comprehensive overview on Medicaid and the Heritage Health plan including state geography, culture and correct pronunciation of cities, towns and surnames
- Health plan operations including special populations, member rights and responsibilities, advance directives, grievances and appeals handling, reporting fraud and abuse, care management, prior authorizations, identifying and handling quality of care and service concerns, PCP assignment, early and periodic screening, diagnostic and treatment (EPSDT) services, our provider network, and pharmacy services to name a few
- Needs of members receiving Long-Term Supports and Services (LTSS) including coordination with Nebraska Area Agencies on Aging and other care coordination entities for the LTSS population
- Member experience including building member connections and telephone etiquette
- Health crises, including but not limited to suicidal callers
- Cultural competency and sensitivity training
- Social determinant's impact on members' health and wellness and connecting members with community resources through our CommUnity Liasons and CommUnity Assistance Line
- Processes for speaking with caregivers and guardians while complying with privacy laws

- Use of our CAREConnects system, how to assess caller needs, determine urgency (and handle the calls accordingly), the processes for call routing (including routing to care managers), call escalation, accessing program information (e.g. benefits) to effectively and efficiently respond to inquiries, links to Health Effectiveness Data and Information Set (HEDIS) care gaps and care management programs

Following completion of the classroom-based training, the prospective associate must demonstrate proficiency by successfully completing a skills and knowledge test. Those who achieve 85 percent or better on the proficiency test, are shifted to training in a transition setting. In the transition training environment, the prospective associate is placed on the phone while he or she is closely monitored by supervisors who listen in on calls through our telephone monitoring system. While in transition training, the prospective associate is evaluated on a daily basis on his or her response time, telephone etiquette, accuracy, and knowledge of our operations. Upon successful completion of the transition training period, the associate is certified by the supervisor. The associate is then promoted to a regular phone queue.

Ongoing Training Program

Our member services associates are engaged in training activities on a regular basis including programmatic changes, prior authorization modifications and identifying and handling quality of care or service concerns. In addition, associates are required to complete certain training annually. These training topics include cultural competency; fraud, waste and abuse; Health Insurance Portability and Accountability Act (HIPAA), and advance directives. Ongoing role-based training is provided in a variety of formats including instructor-led training, team meeting-based training, and rigorous web-based training with auto triggering reminders. Additionally associates receive weekly one-on-one coaching from their supervisors based on the results of call-monitoring, and review of member complaints and grievances. Our advanced speech analytics system automatically alerts a supervisor in real time to join a call to facilitate ongoing training and call resolution.

ROUTING CALLS TO APPROPRIATE PERSONS

Best-in-Class Solution

Our advanced speech analytics can flag key words and alert a supervisor in real time to join a call as needed.

CAREChannels, our telephone and communication platform, is designed to enhance the member experience. Our enhanced speech recognition automated call distribution system effectively answers, routes, tracks and reports calls and inquiries. This solution allows members to gain access to the information they seek or perform routine transactions by speaking naturally. Many of the informational and transactional services available on our website are accessible telephonically. Members may speak naturally to request an ID card and even order over-the-counter supplies. The system provides callers with clear, easy-to-follow instructions on what to do in case of an emergency. Callers are also informed calls may be monitored for quality purposes.

WellCare will use a single member services line for all members, eliminating the need for members to call separate numbers. Our enhanced speech recognition interactive voice response system allows members to speak naturally about their needs and be routed accordingly. During normal business hours, members will be connected to a live agent upon choosing that option. Our member services associates handle all call types, including behavioral health and pharmacy. Should a member need to be transferred to another area within the company, a warm transfer occurs. The associate provides the person picking up the call a brief summary of the member's concern and introduces the member before exiting the call. Members may access the behavioral health crisis line by speaking naturally. Our crisis line is staffed 24 hours a day, 7 days a week with licensed mental health clinicians who are trained to provide telephonic crisis intervention services and have the ability to direct crisis care needs using a comprehensive database of community emergency crisis services. Calls are also tracked to ensure outreach by the crisis team should the caller be disconnected or hang up. Our telephone platform also allows member services

associates to warm transfer members to outside entities such as provider offices or state agencies to facilitate the provision of high quality member service.

Care Manager Transfer and Call Escalation

Members who have an assigned care manager have direct access to their care manager during business hours. Our contact center will also have specific policies and procedures regarding transfer of member calls to a care manager during normal business hours. If a call transfer is not possible, we will ensure that a care manager is notified and returns the call within 30 minutes.

In the event of urgent yet non-life threatening matters, the associate will assess the situation and attempt to resolve the matter using available CAREConnects' logic and support tools. For example, if a member is having difficulty obtaining medication or is out of medication, the associate contacts the provider, pharmacy or any other necessary source in order to assist the member in obtaining his or her medications in a timely manner. Once the associate has exhausted all options to assist, the call is transferred to the pharmacy escalation team. This team has additional tools and resources at its disposal including the ability to override certain denials. Documented protocols also exist for urgent and emergent matters including warm transfer to the member's local area 911 services or other crisis and emergency services.

Member services associates are also supported by an "escalation team" comprised of highly-experienced, proficient staff members that handle a variety of complex issues. To proactively intervene before issues are escalated as well as reduce hold-times and transfers, our real-time speech analytics system automatically flags a supervisor to join a call when specific key words are said. This sytem is also used retrospectively for trending and coaching.

24-Hour Nurse Line

Members are able to access our nurse line at any time through our dedicated toll-free member services line. Our 24-hour nurse line team use a nationally recognized triage decision-making tool to assist the member in deciding whether to see their doctor, go to an urgent care center, or seek immediate emergency care. Nurses who answer the nurse line are able to assist the member in making an appointment with their PCP when appropriate as well as locating the closest urgent care center. Our nurse line plays a pivotal role in our program by directing members to the most appropriate site for care and, in return, lowering the cost of care. Nurse line staff include Spanish-speaking nurses, and interpreter services are available for other languages. WellCare will submit our protocols for the nurse line to the MLTC for approval.

MAKING INFORMATION AVAILABLE TO CUSTOMER SERVICE STAFF

Our call management system, CAREConnects, is the proprietary agent desktop solution used by member services. It is built around telephone systems, web capabilities and self-service solutions. CAREConnects efficiently guides member services associates through on-line scripting, workflows, and actions based on the callers' individual needs. ***CAREConnects improves the quality of call handling, ensures consistency across member services associates, facilitates first-call resolution, and allows us to identify and meet members' unmet needs.*** It also helps us identify training needs and increases the effectiveness of training and quality of newly hired member services associates more expeditiously. Analytics and reporting features allow us to identify repeat callers and the reasons for their calls, training opportunities and opportunities for continuous quality improvement. To supplement CAREConnects, we use an extensive on-line library, searchable by key words and inquiry type, available to member services associates.

HANDLING CALLS FROM OUR HEARING IMPAIRED AND NON-ENGLISH SPEAKING MEMBERS

WellCare's member services is available for all callers. Members whose primary language is Spanish are able to easily and directly access our Spanish auto-attendant and Spanish-speaking member services associates. In addition to hiring a diverse staff, we also partner with Voiance Language Services (VLS) to provide oral interpretation services for members with limited English proficiency.

VLS offers interpretation in more than 200 distinct languages and dialects. VLS employee interpreters undergo in-depth screening interviews, qualification assessments, and receive more than 120 hours of classroom training. All VLS language interpreters are based in the United States and are familiar with the vernacular used by our members. When a translation need is identified our member services associates place the caller on hold, contact VLS, secure the appropriate translator, bring the member back on the call, and speak to the translator as if they were the member. ***In 2014, our average connection time to an interpreter was less than 20 seconds.***

Best-in-Class: Language Services

In 2014, almost 7,000 orders for translation services were filled with an average connection time to an interpreter of less than 20 seconds.

In addition to servicing members with limited English proficiency, we also care for members with hearing impairments using TDD or relay services. ***For example, our Florida Medicaid plan annually handles more than 600 TDD/relay calls with an average speed of answer of less than 20 seconds.***

To address members's social service needs, we also use our proprietary CommUnity Assistance Line, which is free and available to anyone, to connect members to social services in their area. The line is staffed by 36 CommUnity Liaisons, two of whom are hearing-impaired. These two peer-support specialists use video relay and video chat to help those who are also deaf or hard-of-hearing to find and access the social services they need to help them mitigate barriers to a healthier life.

Monitoring and Ensuring Quality and Accuracy

Our approach to quality monitoring is extensive and supported through a dedicated, specialized quality assurance team. Continuous evaluation occurs through our quality oversight program which includes call monitoring of at least eight calls per month per associate, real-time audits, and random sampling audits. Supervisors monitor results of call monitoring for accuracy of response and telephone etiquette, secret shopper calls, and random sample audits to learn about individual associate strengths and weaknesses and to identify where coaching is necessary. These efforts are supplemented with real-time listening sessions where supervisors observe the call unobtrusively. Post-call member satisfaction surveys assess the member's experience. The results are analyzed for individual and group opportunities for improvement. All calls are recorded and stored for 10 years.

Monitoring and Ensuring Adherence to Performance Standards

The heart of the contact center operation is our Command Center, located in our headquarters in Tampa, Florida. It is the control center for all member services functions and performance. The Command Center provides real-time monitoring of service levels of more than 200 different skills and call types and coordinates action to achieve service level targets. The Command Center features numerous screens that display data and trends including calls in each queue, length of time callers have been waiting to speak to a member services associate and number of member services associates available to assist callers. The Command Center operation also allows us to quickly adjust to call volumes or emergency situations so members can easily and quickly get resolutions to their concerns or questions.

Our Command Center allows us to measure real time number of calls in queue, hold time, total number of calls, average number of calls, average hours of use and average calls handled per day, week, month, average hours of use per day, busiest times and days by numbers of call.

Our contact center metrics will comply with Heritage Health contact center performance standards including 90 percent of calls answered within 30 seconds and an abandonment rate of not more than 5 percent. All voice mails will be returned no later than the next business day. ***We routinely meet or exceed contact center standards across multiple states as evidenced by our Florida plan which handled over one million calls in 2014, answering 90 percent within 30 seconds with a two percent abandoned rate.*** See **Figure 1** for a sample of member services performance monitoring. We have the capability to analyze call resolution based on language, service level, call type, average speed of answer, average talk time, average hold time, and first call resolution, among others.

Figure 1

MEMBER
Sample Performance Monitoring/3rd Quarter 2014

	Avg. Speed of Answer		Abandonment Rate %		Service Level		Avg. Hold Time	
	Target	Measure	Target	Measure	Target	Measure	Target	Measure
FL	<30	15	<5%	2%	90%	90%	<3 min	00:00:42
GA		20		4%	80%	82%		00:00:33

NY		12		2%	80%	94%		00:01:10
SC		14		2%	80%	89%		00:00:29
TOTAL		15		3%		88%		00:00:50

Interactions With Other Organizations

Our phone system supports a warm transfer to any outside entity to facilitate high quality customer service. We routinely warm transfer members to enrollment brokers, state offices, behavioral health crisis lines, provider offices, the Ombudsman, the Department of Health and Human Services fraud and abuse hotline, home and community based services (HCBS) waiver and other case management programs. Our member services associates have the ability to warm transfer calls to MLTC, other MCOs, programs and agencies as appropriate.

Members in need of social services such as housing assistance, a homeless shelter or WIC are connected with our CommUnity Assistance Line where our CommUnity Liaisons help members, their families and the community-at-large find and access community-based programs and services. We maintain an online library of these organizations for our agents to reference in CAREConnects.

After Hours Procedures

We fully understand that our members need access to us 24 hours a day and offer an array of tools that allow members, providers, and partners to obtain access to care, information, and communicate with us 24/7 including:

- Enhanced speech recognition call distribution system through our dedicated toll-free number
- Messaging to advise callers with an emergency to hang-up and dial 911
- Access to the 24-hour nurse line and behavioral health crisis line
- Website and mobile application with self service functions and real-time directory lookup
- Submission of questions and requests via our website and email
- Pharmacy benefits manager (PBM) after-hours service for provider-related issues
- A voice mail box with adequate capacity and messages responded to within one business day

IV.F MEMBER SERVICES AND EDUCATION

29. Describe the informational materials the MCO proposes to send to new members. *(Page limit 2 pages)*

WELCOMING NEW MEMBERS TO THE WELLCARE FAMILY: AN OVERVIEW OF MATERIALS

WellCare will build on our more than 20 years of experience and best practices serving Medicaid and Medicare members to develop effective tools to welcome our new Heritage Health members. Our focus is on empowering members through using robust and compliant information to ensure they have what they need to engage in their own health care and can access the many avenues of support available to them. All new member material for Heritage Health will be provided in a manner and format that is easily understood and will be submitted to MLTC for review and approval a minimum of 45 calendar days prior to contract start date and ongoing.

Identification Card

WellCare has well-established processes and partnerships for the successful and compliant production and distribution of member identification (ID) cards. The member ID card we issue will display the member's name, Medicaid identification number, PCP name and telephone number including after-hours number if different, MCO name and address, member services toll-free number, enrollment broker toll-free number, emergency instructions, and the Nebraska specific website address. Pharmacy electronic routing information will also be on the card. The member ID card will be mailed within ten calendar days of receiving notification of enrollment from MLTC. The letter accompanying the member ID card will explain the purpose of the card and how to use it with the MLTC-issued card, include a reminder to present the card to the member's provider for any health service and a reminder to contact the PCP for all of the non-emergency health care needs. See **Figure 2** for a sample member ID card.

Figure 2

Welcome Packet

New member materials are automatically initiated as enrollment transactions are processed. Our fulfillment and correspondence application generates correspondence and delivers it to print vendors at least daily. When appropriate, individual correspondence can be generated on demand. Each new member packet is given a unique tracking number and is traced throughout the delivery process until confirmation of posting to the portal or acceptance and pick up by the postal service. This unique tracking number also allows us to monitor and act on returned or undelivered correspondence and ensures that end-to-end reconciliation with each enrollment transaction is completed. WellCare can deliver member enrollment materials to alternative individuals when needed, including the ability to automatically send materials for children in foster care directly to the case worker.

In 2014, we successfully fulfilled more than 18 million identification cards, welcome packets and member correspondence.

Using these system capabilities, we are confident in meeting our commitment to ensure member materials are sent within ten calendar days of our receipt of an enrollment file. Member materials are also available

on our member website and secure portal. In developing our welcome packet, our focus is on empowering our members to access services and quickly identifying those members with the greatest health care needs.

Our Heritage Health plan welcome packet will include:

- Welcome letter
- Instructions on accessing the member handbook and provider directory. These instructions will include their availability on the member website and that printed copies may be requested by calling member services
- Website quick guide which will identify materials found on the member website and the availability of printed copies of website material by calling member services
- Member rights and responsibilities
- Availability of member material in alternate formats or communication modes by calling member services
- Information on the appropriate use of the emergency department
- Healthy rewards program brochure, a program that rewards members who complete specific preventive health, EPSDT, wellness, and engagement milestones
- Health risk screening form and instructions for online completion

We may also include other tools in the initial welcome packet or in subsequent member communications such as prenatal care materials, and important phone numbers including nurse line and the CommUnity Assistance line. Members will be directed to call our member services' toll-free line to obtain written material, receive assistance with the member website, or to receive assistance on any other matter. All material included in the welcome packet will be made available on the member website.

Welcome Letter

The welcome letter contains a description of our plan and an ID card reminder, which should already have been received. It advises the member to check the PCP listed on the card to ensure the PCP is the one they have been seeing or is otherwise satisfactory. It instructs the member to consult the online provider directory (available hard copy upon request) and call member services to make a change if he or she prefers another provider. Members may request a PCP change whenever, and as often, as they wish.

The welcome letter also offers a brief overview of how to access health care benefits, including information on our 24-hour toll-free nurse line. It emphasizes the importance of completing the health risk screening and returning it in the enclosed self-addressed, stamped envelope. It will also provide information about options to complete it either telephonically or on the secure member portal. The letter asks members to contact member services with any questions.

Provider Directory

In addition to our web based tools, our hard copy provider directory is available when requested for members, potential members, and the enrollment broker. The hard copy directory for members is updated a minimum of monthly and includes PCPs, specialty physicians, urgent care clinics, federally qualified health clinics (FQHCs), rural health clinics (RHCs), laboratories, radiology providers, behavioral health providers, hospitals, ancillary providers, allied providers and pharmacies participating in the plan. Information includes telephone numbers, service site addresses, board certification status and languages spoken. PCPs, specialists, and other providers not accepting new patients will be identified. Provider hours including the identification of providers with non-traditional hours (before 8:00 a.m., after 5:00 p.m., or any weekend hours) are included.

IV.F MEMBER SERVICES AND EDUCATION

30. Describe the approach the MCO will take to provide members with written material that is easily understood, including alternate formats and other languages. Address how the MCO will ensure that materials are at the appropriate reading level. *(Page limit 2 pages)*

MEETING MEMBERS WHERE THEY ARE: OUR APPROACH TO EASILY UNDERSTOOD MATERIALS

Using our WellCare in-house experts, we provide educationally and culturally appropriate member material to more than 2.4 million Medicaid members. Our populations include members from such diverse states as Hawaii, Georgia, New York and Florida. It also includes individuals with a diverse set of needs such as families and pregnant women, youth in or transitioning from Foster Care, those who are aged, blind and disabled and those receiving long-term supports and services.

We use the Centers for Medicare and Medicaid Services (CMS) health literacy toolkit as our guideline when preparing written member material and consult with health literacy experts, as appropriate. In addition, we will consult with our Member Advisory Committee to ensure our materials are culturally competent, understandable and fully accessible, and address our members' health education and literacy needs. Our Member Advisory Committee reviews our outreach materials and processes, including our member handbook, website, member portal, newsletters, social media and other communication tools. We will modify material based on their input. Our Missouri affiliate, for example, recently modified its member handbook based on Member Advisory Committee feedback to add visual highlights and change readability flow. WellCare will comply with all requirements of Section IV.F of this Request for Proposal (RFP) related to member materials, including their distribution to new members within 10 calendar days of enrollment. At a minimum, member material will be in a 12-point font with the exception of the ID card or as otherwise approved by MLTC.

ALTERNATE FORMATS AND LANGUAGES

WellCare makes all required written materials available to our members in alternative formats and in a manner that takes into consideration the member's special needs, including the needs of the visually or hearing impaired, blind, deaf, aged or those with limited reading proficiency. We notify our members that health and benefits information is available in alternative formats, and we provide instructions for accessing them in these alternative formats through the member handbook, member website, outreach activities and during welcome calls when a need is identified. Alternative formats include but are not limited to 508 compliance, Braille, large font letters, CD and verbal explanations of written materials.

All written materials will be provided in English and Spanish and will be reviewed and approved by MLTC. We will prepare materials in any other languages spoken by five percent or more of the enrolled populations, and we will prepare materials in other languages that do not reach the five percent threshold when directed by MLTC or requested by members.

WellCare will proactively use the language spoken data supplied through the state's 834 enrollment file to fulfill new member enrollment material in alternative languages. This indicator is stored in the member record and is referenced and used for member correspondence and communications. For example, members enrolling with a language indicator of Spanish will be sent new member materials in Spanish. Members may also change or update their language preference and subsequent material will be delivered in that language, if available. In addition to new member materials, subsequent correspondence will be fulfilled in Spanish or other required language preferences.

Oral Interpretation Services

WellCare will provide free on-site sign language and oral interpreters for members with hearing impairment or Limited English Proficiency (LEP). Through effective partnerships with interpreters, our

Florida Medicaid plan fulfilled almost 3,000 requests for onsite sign language and LEP/oral interpreters in 2014. These interpreter requests were most typically made for medical (PCP, specialist, hospital), behavioral health, ancillary (dental, vision, hearing), and therapy (physical, occupational, and/or speech) visits.

WellCare partners with Voiance Language Services to provide oral interpretation services in more than 200 different languages for members with limited English proficiency. Onsite sign language interpretation is provided to our members by Interpretek, a national provider of in-person sign language interpreters, as well as video remote interpreting (VRI), which allows interpreters to serve individuals wherever an internet connection exists. Interpretek has Registry of Interpreters for the Deaf (RID) Super Site status, meaning that it meets the needs of the interpreting community on an elevated level. Interpretek will have a Nebraska-specific link on its website, enabling members to request an interpreter online. Members who are deaf or hearing impaired will also be able to access sign language interpreters by calling member services via a telecommunication device for the deaf (TDD) or relay services or through their case managers.

Onsite translation services for members with limited English proficiency are provided through Translation Station. Established in 1998, Translation Station offers translation services in more than 130 languages and is a member of the American Translators Association. Members, providers, and associates will be trained on the availability of translation services – both onsite and telephonic – including how to access the services for members with interpreter needs. Members and providers will be instructed to contact member services to request interpreters, both sign and alternative language. Those in need of onsite translation services will be encouraged to call member services at least three business days prior to the appointment for us to coordinate services. However, urgent requests are filled within 24 hours.

All multi-page written member materials, including the member handbook, will contain information on the process to obtain real-time oral interpretation services in any language and translated written information at no expense by contacting member services. Additionally, all written materials will include a tagline in prevalent languages instructing the member to call member services for materials in other languages.

We will notify our members and potential members that oral interpretation services and translated written information is available at no expense through the member handbook, member website, outreach activities, welcome call, and during any other contact when a need is identified.

Appropriate Reading Level

Member materials are prepared in a style and reading level that accommodates the reading skills of our members. Writing will be no higher than a 6th grade level, as determined by the Flesch-Kincaid Readability Test. Appropriate documentation is maintained and available should MLTC ask WellCare to submit evidence of compliance.

Assisting Members with Special Needs

For our members with special health care needs, the care manager and PCP will work with the member and the family/caregiver to ensure an understanding of the member material and resources available to them. Education material is reviewed verbally and rephrased as appropriate with consideration for health disparities and literacy. Translation, interpreter services and on-site sign language services are always available to facilitate this process. We will also design strategies to meet the needs of our members including those who may be illiterate or require translation services. Examples include such tactics as developing materials with descriptive pictures and less focus on words; facilitating public meetings where information is presented in an oral format; and reading member materials to members.

IV.F MEMBER SERVICES AND EDUCATION

31. Provide an overview of the MCO's proposed member website, including how it will satisfy requirements in this RFP. Provide examples of information that will be available on the website and on portals for members. *(Page limit 6 page excluding attachments)*

REACHING MEMBERS WHERE THEY ARE: AN OVERVIEW OF OUR MEMBER WEBSITE

Our Nebraska website will be an important communication tool to inform, educate and communicate with members about the Heritage Health plan and WellCare. It will also be an avenue through which we promote health, wellness and service to our members. ***Our single integrated website, which was developed and is continuously enhanced based on feedback from members and caregivers, supports members across the spectrum of care, whether physical, behavioral, pharmacy or social services.*** Our website follows all written marketing guidelines included in Section IV.G and is HIPAA-compliant. All written content found on the member website will be submitted to MLTC for review and approval in advance of its intended posting. Our member portal is interactive and accessible using mobile devices. It also allows member to submit questions and comments electronically to WellCare and receive responses.

Website Reach: By the Numbers

Our Medicaid home pages received about 396,000 visits in October 2015 alone.

Our website meets applicable accessibility requirements, specifically including Section 508 Compliance and support of both English and Spanish languages. Our members may use any browser to access our website and no special interfaces are required. Our website is accessible via mobile devices. It is also compliant with applicable privacy and security requirements when providing or receiving any protected member information, including but not limited to member eligibility or member identification information. Our website is built to recognize location, so a member coming to the Wellcare.com URL will be directed to the Nebraska homepage automatically once the page is live. See **Figure 3** for a screenshot of our draft member website home page for Nebraska.

Figure 3

We recently made a major investment in a best-in-class website to enhance our member's ability to communicate with us. ***The redesign of our website was based on independent research and investigation which included direct feedback from more than 200 prospective members, 800 current members, and 750 providers in addition to competitive analysis reviews and reviews of state and industry sites likely to be accessed by our members and providers***. See **Figure 4** for a detailed description of our member website and secure member portal.

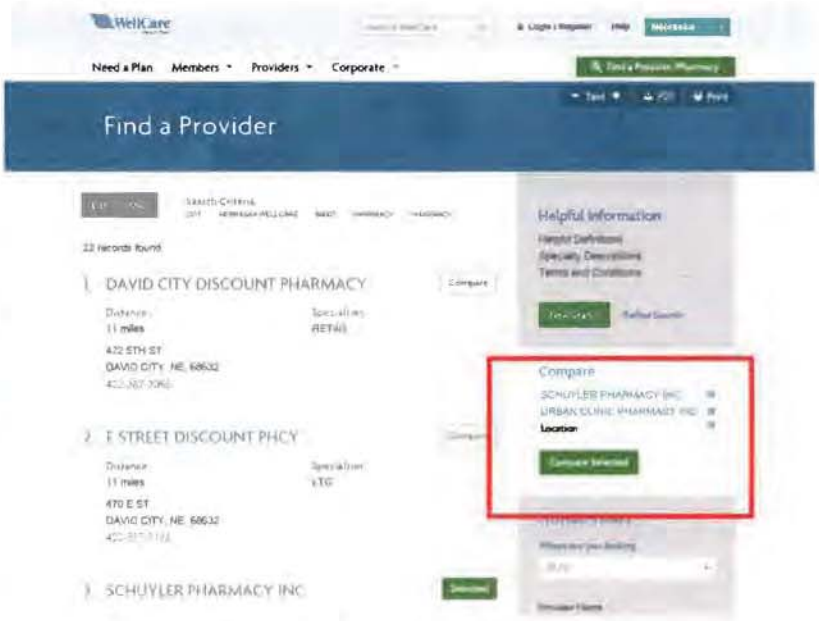
Figure 4

MEMBER WEBSITE CONTENT	
Our website for the general public allows existing members and the general public to access general information without any login credentials. The core web content will include:	
Contact Us	➢ Important phone numbers and addresses including toll free customer service number prominently displayed and telecommunications device for the deaf (TDD) number ➢ Questions/comments ➢ Alternative communication methods with members through things like electronic question submission
Searchable Member Handbook	➢ Member Services Line and 24-hour Nurse Call Line ➢ Pharmacy preferred drug list ➢ Covered services ➢ Service authorization requirements ➢ After-hours and emergency services ➢ Member protections, rights and responsibilities ➢ Grievances and appeals ➢ Cost sharing ➢ Preventive health ➢ Requesting out-of-network services ➢ Health risk screenings ➢ Quality improvement and member satisfaction ➢ Advance directives ➢ Changing MCOs ➢ Reporting suspected abuse and neglect ➢ Ombudsman information ➢ Accessing benefits not paid for by WellCare ➢ How to select or change a PCP
Searchable Provider Directory	➢ Find-A-Provider tool is refreshed daily with current information on network providers that include: ▪ Primary care ▪ Specialists ▪ Urgent care clinics ▪ Federally Qualified Health Clinics and Rural Health Clinics ▪ Laboratories ▪ Radiology providers ▪ Behavioral health providers ▪ Hospitals ▪ Pharmacies ▪ Vision providers

MEMBER WEBSITE CONTENT	
Health Information	➢ Wellness programs and health conditions ➢ Health and wellness tips ➢ Appropriate use of the emergency department ➢ Availability of care management and disease management ➢ Forms and brochures
Other Helpful Information	➢ How to access interpreter services ➢ Pharmacy formulary and preferred drug list ➢ Pharmacy conditions for coverage and utilization limits ➢ Behavioral health information ➢ Current and archived quarterly member newsletters ➢ Preventative health tips ➢ Member satisfaction survey ➢ Self-management tips ➢ Non-emergency transportation ➢ Frequently asked questions ➢ Enrollment broker toll free number for enrollment questions
Links to External Partners	➢ Nebraska MLTC ➢ Enrollment Broker ➢ Medicaid Eligibility website ➢ Other state agencies ➢ Social agencies or supports
What's New	➢ Identifies newly added sections
Secure Member Portal	
Our secure portal for members (and caregivers) requires validated login and password credentials for access and is designed to further enable interactions with members, provide access to information and complete routine transactions. Core content includes:	
Eligibility Check	➢ Obtain PCP assignment, health plan assignment and copayment information
Authorization Check	➢ Review status of pending prior authorization submissions and historical submissions
Claim Status Check	➢ Review pending claim submissions
Self-Service Order Tool and Repository	➢ Review order status for a replacement ID card and new member materials such as member handbook
Member Toolbox	➢ Place over-the-counter orders, request a new ID card, print a digital copy of the ID card, request a change of PCP, send notifications of change in address, etc
Member Message Center	➢ Published member messages from public environment ➢ Secure message board to deliver personal content and messaging ➢ Access to correspondence ➢ Correspondence preference management capabilities

Provider Search Function

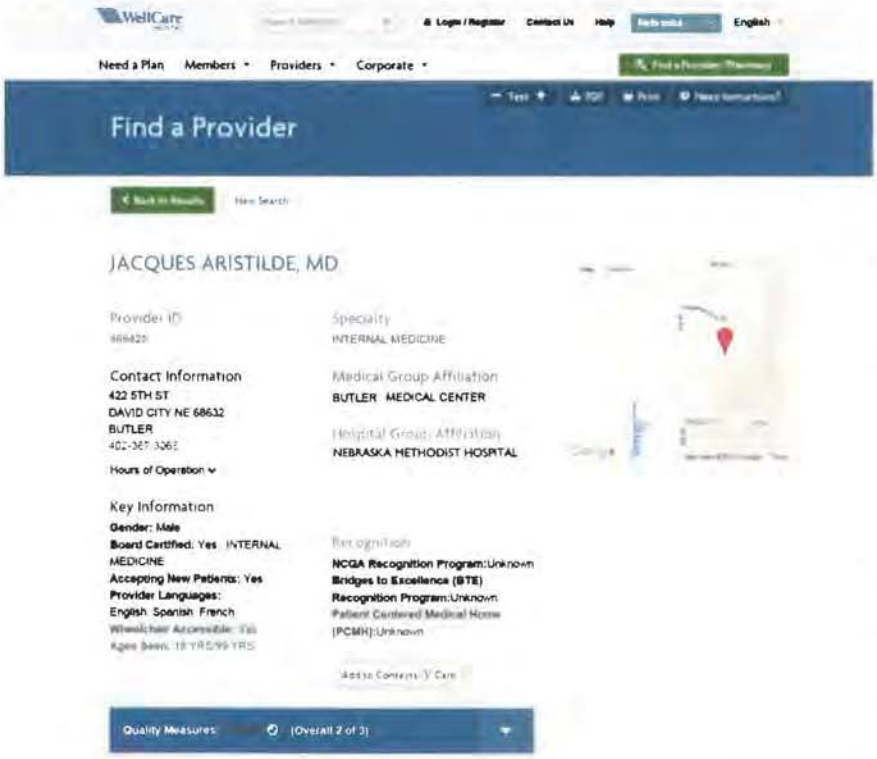
Figure 5



Our Find-a-Provider, online searchable provider directory tool makes it easy for members to search for providers and then alter, refine, and update their search results through intuitive refinement tools. Our tags and naming conventions are set up to meet members' health literacy needs when searching, so they can use common language such as "heart" to search for cardiologists, as an example. This tool also quickly allows members to refine their search based on the provider's gender, languages, accessibility considerations, provider and specialty types and distance from a user-chosen location, whether work, home, or their current location. Provider information is updated daily. Individuals do not need to login for access.

Another key feature (**Figure 5**) is the comparison tool. Using the same intuitive search capability, up to three providers can be selected and compared to each other. This feature helps members further evaluate provider options. The initial search response provides information that includes telephone numbers, service site addresses and contact information. Additionally, distance and navigation information is readily accessible from this first search result list.

Figure 6



More detailed information (**Figure 6**) is available with a simple click on the provider's name. In addition to providing the summary information, details on credentialing status and other key items are also available. We also include further explanations on the meaning, reference, or importance of concepts such as board certification which may not be initially well understood by many members. PCPs, specialists, and other providers not accepting new patients will be identified. Hours of operation will include non-traditional hours (before 8:00 a.m. after 5:00 p.m., or any weekend hours) if available.

Mobile Technology

Our mobile application for members includes many helpful and educational resources and is available for Apple and Android devices in English and Spanish and at no cost.

- Features available without logging in include:
  - Find-A-Provider tool, as shown in **Figure 7**, with advanced quick care (urgent and hospital emergency) service locator.
    - Similar to our online tool this electronic, searchable provider directory makes it easy for members to search for different providers and then alter, refine, and update their search results through intuitive refinement tools. This is enhanced by the 'use your location' extension that smartphones can offer – allowing members to find providers and quick care centers near their current location.
  - Messages from WellCare
    - We are able to send messages to members about important, time relevant items – like reminders about flu shots, upcoming enrollment periods, or changes in benefits.
  - Contact Us
- Features available after logging into the secure area of the application include:
  - ID Card
    - If a member needs to see a copy of their ID card but does not have it on hand, they can look up their ID card. They can also send it to their provider by email or fax.
  - Wellness Services (Care Gap)
    - Members will be reminded of care gaps, PCP's name and phone number and scheduled appointments as shown in **Figure 8**.

Figure 7

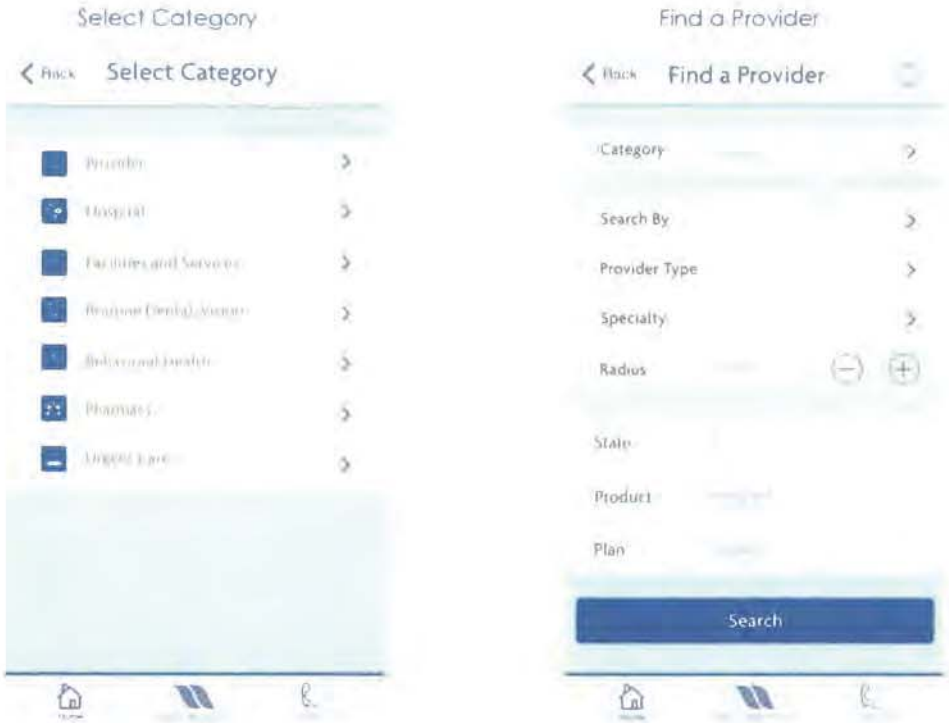


Figure 8

Since the mobile application is so valuable to our members we use a number of different ways to communicate these advantages to members, including but not limited to newsletter articles, messaging in wellness materials, and verbal communications during sessions like those with care managers or disease managers.

Our mobile application software allows us to report on member usage including:

- Total downloads, which includes types of phones like Apple and Android
- Feature Usage Report - Number of visits to some of the functionality
  - Used find-a-provider
  - Viewed, faxed and emailed ID card
  - Viewed messages
  - Looked for quick care centers
  - Viewed wellness services

Attention Deficit/ Hyperactivity Disorder

Does your child have trouble paying attention?

Does he or she talk nonstop or have trouble staying still?

Does your child have a hard time controlling his or her behavior?

For some children, these may be symptoms of attention deficit/ hyperactivity disorder, or ADHD.

Attention Deficit/ Hyperactivity Disorder

What is attention deficit/hyperactivity disorder, or ADHD?

ADHD is a common childhood disorder, and it may affect children differently. It makes it hard for a child to focus and pay attention. Some kids may be hyperactive or have trouble being patient. ADHD can make it hard for a child to do well in school or behave at home.

ADHD can be treated. Doctors and specialists can help.

Who can develop ADHD?

Children of all backgrounds can have ADHD. Teens and adults can have ADHD too.

What causes ADHD?

No one knows for sure. ADHD probably comes from a combination of things. Some possibilities are:

- **Genes**, because the disorder sometimes runs in families
- **Lead** in old paint and plumbing parts
- **Smoking and drinking** alcohol during pregnancy
- **Certain brain injuries**
- **Food additives** like artificial coloring, which might make hyperactivity worse.

Some people think **refined sugar causes ADHD.** But most research does not support the idea that sugar causes ADHD.

What are the symptoms of ADHD?

ADHD has many symptoms. Some symptoms at first may look like normal behaviors for a child, but ADHD makes them much worse and occur more often. Children with ADHD have at least six symptoms that start in the first five or six years of their lives.

Children with ADHD may:

- Get distracted easily and forget things often
- Switch too quickly from one activity to the next
- Have trouble with directions
- Daydream too much
- Have trouble finishing tasks like homework or chores
- Lose toys, books, and school supplies often
- Fidget and squirm a lot
- Talk nonstop and interrupt people
- Run around a lot
- Touch and play with everything they see
- Be very impatient
- Blurt out inappropriate comments
- Have trouble controlling their emotions.

How do I know if my child has ADHD?

Your child's doctor may make a diagnosis. Or sometimes the doctor may refer you to a mental health specialist who is more experienced with ADHD to make a diagnosis. There is no single test that can tell if your child has ADHD.

It can take months for a doctor or specialist to know if your child has ADHD. He or she needs time to watch your child and check for other problems. The specialist may want to talk to you, your family, your child's teachers, and others.

Sometimes it can be hard to diagnose a child with ADHD because symptoms may look like other problems. For example, a child may seem quiet and well-behaved, but in fact he or she is having a hard time paying attention and is often distracted. Or, a child may act badly in school, but teachers don't realize that the child has ADHD.

If your child is having trouble at school or at home and has been for a long time, ask his or her doctor about ADHD.

How do children with ADHD get better?

Children with ADHD can get better with treatment, but there is no cure. There are three basic types of treatment:

1. **Medication.** Several medications can help. The most common types are called stimulants. Medications help children focus, learn, and stay calm.

Sometimes medications cause side effects, such as sleep problems or stomachaches. Your child may need to try a few medications to see which one works best. It's important that you and your doctor watch your child closely while he or she is taking medicine.

2. **Therapy.** There are different kinds of therapy. Behavioral therapy can help teach children to control their behavior so they can do better at school and at home.

3. **Medication and therapy combined.** Many children do well with both medication and therapy.

How can I help my child?

Give your child guidance and understanding. A specialist can show you how to help your child make positive changes. Supporting your child helps everyone in your family. Also, talk to your child's teachers. Some children with ADHD can get special education services.

How does ADHD affect teens?

Being a teenager isn't always easy. Teens with ADHD can have a tough time. School may be a struggle, and some teens take too many risks or break rules. But like children with ADHD, teens can get better with treatment.

What can I do for my teen with ADHD?

Support your teen. Set clear rules for him or her to follow. Try not to punish your teen every time he or she breaks the rules. Let your teen know you can help.

Can adults have ADHD too?

Many adults have ADHD and don't know they have it. Like ADHD in children and teens, ADHD in adults can make life challenging. ADHD can make it hard for adults to feel organized, stick with a job, or get to work on time. Adults with ADHD may have trouble in relationships. The disorder can also make adults feel restless.

ADHD in adults can be diagnosed and treated. For some adults, finding out they have ADHD can be a big relief. Being able to connect ADHD to longtime problems helps adults understand that they can get better. If you're an adult and think you may have ADHD symptoms, call your doctor.

IV.F MEMBER SERVICES AND EDUCATION

32. Discuss the MCO's approach to welcoming new members, addressing requirements listed in the RFP. Discuss any proposed alternate methods or plans the MCO would use to effectively welcome members. *(Page limit 3 pages)*

BRINGING MEMBERS INTO THE WELLCARE FAMILY: OUR APPROACH TO WELCOMING MEMBERS

Our comprehensive member onboarding strategy begins with our new member welcome packet, sent to members within ten calendar days of notification of enrollment. In this welcome packet, members are made aware of how to access health care benefits, the comprehensive information and tools on our member website, our member services contact center, and our 24-hour nurse line.

Welcome Calls

All new members, including reinstated members, are automatically scheduled for a welcome call within 15 business days of the date we send the welcome packet. Welcome calls are administered in both English and Spanish and a total of six contact attempts are made. In the event the member cannot be reached, a letter is sent asking the member to call member services at their convenience. We also initiate a process to identify alternative numbers using a phone append process through skip trace technologies, automatic pulls from incoming phone calls, case manager notes and outreach to provider offices. Members identified as potentially high-risk are contacted separately through care management. WellCare will report to MLTC on a monthly basis the members we are unable to contact after three attempts with the name, telephone number(s) and Medicaid ID Number.

Our welcome call includes the following components:

- Explanation of the Heritage Health program and confidentiality requirements.
- Availability of oral interpretation and written translations and how to obtain them free of charge.
- Verification of receipt of the member ID card and new member packet, and the initial PCP assignment. The welcome packet is resent if the member indicates it was not received or lost.
- Discussion of patient-centeredness, including the importance of making the first appointment with the PCP to obtain preventive services and care for an ongoing illness or condition.
- Offer of PCP appointment assistance to all members with a particular focus on those who face barriers to accessing care, are pregnant, or have chronic conditions.
- Assistance in changing PCPs should the member wish to do so. Members have the opportunity to change the PCP assignment at any time and are informed of this during this initial outreach.
- Assistance in obtaining social services such as those offered by the Women, Infants, and Children (WIC) program or housing agencies through our CommUnity Assistance Line. Once referred our CommUnity Assistance Line team assists the caller in finding and accessing needed services and tracking the callers' progress through the process.
- Verification of the member's address, current services and equipment, and the member's independence and lifestyle. This information is used for transition of care and care management.
- Health risk screening (HRS) to determine if the member is pregnant, identify chronic conditions, barriers to accessing care, special needs, or care coordination services. Before completion of the HRS, the member is given the opportunity to be transferred to a member services associate to discuss any health issues of concern or to have any other questions answered.

WellCare has successfully transitioned large populations of members in states newly adopting statewide managed care including Florida, Georgia and Kentucky. Using predictive dialing technologies we were able to meet the large initial volume and complete the call within the first 15 days of the member's

effective date. For example, in Florida alone we executed outreach welcome calls for more than 600,000 members prior to program effective date. Upon receipt of enrollment files we immediately begin outreach to welcome members, identify coordination of care issues, and provide materials.

Solutions for Members We are Unable to Reach

Our experience with government programs has led to an understanding of rural, economic, and social challenges which can make communications difficult, including a high rate of members we are unable to reach. As a result, we have implemented a robust Unable to Contact (UTC) program for all members to ensure we are able to reach and communicate with these members. Our new member operations and correspondence solutions leverage multiple data sources and methods for ensuring the ability to make contact with members. This includes skip trace technologies to identify alternative numbers when outreach attempts fail; case manager case notes of alternative or temporary contact numbers; outreach to provider offices; member alerts through our secure portal; and automatic pulls from incoming phone calls, incoming mail and secure portal logins when confirmed contacts are received. When we reach the member, we update the member record with the correct telephone number. This new number is then available to all member-facing associates. Our UTC process will also prospectively search for members who have had no activity for 12 months and automatically initiate the UTC process.

Identification of Primary Care Provider for Each Member

Our emphasis on building and supporting successful relationships between members and their PCP is unparalleled. Our selection and change processes reflect our patient-centered philosophy and our understanding of the critical and fundamental nature of the member/provider relationship in the managed care setting.

From our experience, we understand the importance of the PCP/member relationship and the value of establishing that connection as soon as possible – each member requires individualized support. We have found that having the Enrollment Broker capture the member's selection of their desired PCP at the time they choose a health plan promotes a smooth transition to managed care. If the 834 file indicates the member has not made a choice of PCP assignment, they are auto-assigned upon enrollment using a hierarchy that includes existing PCP, former PCP, family's history with a PCP, geographic proximity, language spoken and PCP quality tier. We also reach out to members without an auto-assignment to help them proactively select a PCP if possible. Members may change PCPs at any time.

ALTERNATIVE METHODS TO ENGAGE MEMBERS WHERE THEY ARE

WellCare has found that our member welcome calls and welcome packets, as well as strong PCP connections, are effective ways to connect with new members. We propose to continue this process, in accordance with the requirements of the RFP, for Heritage Health members. In addition to welcome calls, we are deploying a number of additional strategies, which are outlined below, to connect with our Heritage Health members, understanding the diverse geographies and populations we would be serving in Nebraska.

Figure 9

Welcome Rooms

In addition to our primary office in Lincoln, we will offer Welcome Rooms (**Figure 9**) in key locations across the state, including in Omaha, Kearney, Scottsbluff, and Norfolk. Housed in strategically selected, high traffic, retail shopping areas close to social services in the neighborhoods and communities where

our members live, work and frequent, our Welcome Rooms are designed and equipped to engage the community by being outreach centers and walk-in member service hubs. Members and families can meet face-to-face with a member service representative at a local Welcome Room to get personalized attention to their needs, learn more about the Heritage Health plan, or receive information on important health topics. These locations are intended to be a destination point for our members and offer computers, internet access and activities geared toward our members and the community we serve. Welcome Rooms will host events such as children's reading and literacy support classes, health education classes, special needs resource navigation, and a variety of other activities and events for the community each month. Ongoing education will be available through monthly classes. At least one daytime and one evening class will be held per month.

Health*Connections* Model

We recognize the power of the social safety net community to help us reach members. Through our CommUnity Advocacy efforts built from our proprietary Health*Connections* model we partner with community organizations to locate and educate members. For example our Kentucky plan has established a partnership with HOTEL Inc. to locate homeless members. HOTEL Inc. offers an outreach program to find homeless residents, transition them into housing and connect them to health care. As WellCare members are identified, they are connected with our care management team and our services.

In Nebraska, we have already been building these relationships meeting with agencies from across the state and already have such partnership commitments including from Together in Omaha which helps people access documents like birth certificates and social security cards and from SPEAKOUT in Western and Central Nebraska which helps people apply for various benefits.

The beauty of the WellCare model is it benefits WellCare members and the community at large. Through these partnerships, not only will we be able to better reach and educate our members, anyone who accesses services through one of our partner agencies can also benefit from access to our one-of-a-kind CommUnity Assistance Line and CommUnity Command Center. These are the programs we use to connect people in need to social support services – such as housing assistance, food banks or transportation. Our database of programs in Nebraska already contains more than 5,000 groups.

Managing Large Member Transitions

WellCare is a leader in transitioning large numbers of members from other MCOs and from Medicaid and Medicare fee-for-service into managed care, including benefit carve-ins. Our outreach to members will be extensive whether it is through statewide new member orientation sessions, local welcome rooms, outreach at health fairs, or educational partnerships with advocates and other organizations. We will meet the members where they are to engage and empower them on the Heritage Health plan and their own health care.

IV.F MEMBER SERVICES AND EDUCATION

33. Detail the strategies the MCO will use to influence member behavior to access health care resources appropriately and adopt healthier lifestyles. *(Page limit 5 pages)*

EMPOWERING OUR MEMBERS: STRATEGIES TO INFLUENCE MEMBER BEHAVIOR

After meeting with Nebraskans receiving Medicaid benefits, one thing that is clear is that members need multiple avenues of support and empowerment to take advantage of opportunities to appropriately access health care resources and adopt healthier lifestyles. The aged, blind and disabled members we met with, for example, shared how challenging it was simply to meet the basic demands of accessing the multitude of specialists, medications and equipment they need day in and day out. To help them take additional steps toward wellness, we recognize that our approaches have to be culturally sensitive, geographically appropriate and population specific.

WellCare uses a multi-pronged approach to empower our members to access health care resources appropriately and adopt healthier lifestyles, this includes all member-facing associates whether they be a member services associate talking to a member who is new to Heritage Health, a care manager working with a member to develop a care plan, a CommUnity advocate talking to a member at a health fair, or a member advocacy associate holding class in a welcome room. We broadly define health education as any opportunity to provide members information to help them make an informed decision regarding their health care and influence behavior. See **Figure 10** for a sample of our member touchpoints.

Figure 10

HEALTH EDUCATION AND OUTREACH METHODS	
Welcome Rooms	- Outreach centers and member walk-in service hubs with daytime and evening classes to educate members.
Welcome Calls and Health Risk Screenings	- Educates members on Heritage Health program and provides assistance in appointment setting and referrals to social services - Conducts health risk screening to quickly identify health issues and connect members with appropriate resources.
Member Services Contact Center	- Care gap alerts trigger associates to set appointments to close gaps in care while the member is on the phone. - 24-hour nurse line educates and triages the member to appropriate services. - Facilitate access to health education programs and health care resources.
Centralized Telephonic Outreach Program	- Outreach to members to explain care caps and initiate a three-way call with the member's provider to help set-up appointment to close the care gap.
Member Engagement Unit	- Outreach to members with recent emergency department visits, members new to care management and discharge follow-up.
CommUnity Assistance Line	- Connects members with social services to mitigate the impact of social determinates on health.
CommUnity Advocates	- Statewide health education and outreach activities in the communities our members live and work.
Care Managers	- Outreach to high risk members in person or telephonically based on acuity. During assessment and care plan development members are educated about their conditions, how to access information about services, and the appropriate use of the emergency department.
Disease Managers/Chronic Disease Coaches	- Provide members a broad range of educational materials and tools to help members in self-management prevent triggers that could place them in higher acuity levels of need. These include such items as mailings on

Health Education and Outreach Methods	
	managing diabetes or controlling environmental factors that exacerbate asthma symptoms.
Member Website, Mobile Application and Social Media	▸ Provides access to a wealth of educational material, and benefit information to empower the member

Member Story

The Empowerment Model in Action

A 55-year-old member had a history of multiple chronic conditions including COPD, congestive heart failure, diabetes, neuropathy, depression and smoking. The member came to WellCare in 2014, and she entered our intensive care management program after a below the knee amputation. Besides needing support through her recovery and an active desire to quit smoking, the member entered care management with multiple needs including:

- A lack of understanding of the importance of weighing herself daily to help manage her congestive heart failure
- Difficulty with her oxygen provider
- Difficulty getting to the pharmacy to pick up medications
- Challenges getting to a podiatrist
- Inability to get eye exams because of lack of knowledge about benefits

The WellCare care manager took several steps including:

- Supporting the member to complete her physical therapy
- Educating the member on the importance of CHF management, having an action plan and providing her a scale to weigh herself daily
- Supporting and coaching to help her quit smoking, which she has done without any cessation aids
- Connecting her with a podiatrist
- Educating the member on mail-order pharmacy options allowing her to get direct access to her medications
- Assisting with changing her oxygen provider
- Providing the member with vision information, resulting in the member receiving new glasses
- Connecting the member to job training and placement services as well

Today, this member is now independent and uses prosthesis. She drives and is walking around her block. She has started school and is working to get her Master's degree with a goal of getting off of Medicaid.

In addition to these broad member-facing education and outreach activities, we use value-added services and our Health*Connections* model to influence member behavior.

Influencing Member Behavior To Access Resources

Our specific strategies to influence member behavior to access resources include a focus on reducing non-emergency use of the emergency department, improving birth-outcomes and prevention-focused physical and behavioral health services.

Reducing Non-Emergency Use of the Emergency Department through Increased Access

The issue of inappropriate emergency department use is complex, requiring a multi-level approach. Our strategy includes services to reduce barriers to care including, as a sample, those in **Figure 11**.

Figure 11

Helping Members with Appropriate Use of Emergency Departments	
Emergency Department Diversion	▸ Our care management team contacts members who inappropriately use emergency department services to determine the underlying issues and connect them to the most appropriate, cost-effective services and resources.
Supplemental Transportation	▸ Reimburses friends and family who provide supplemental transportation to

Helping Members with Appropriate Use of Emergency Departments	
	members to their doctor appointments.
24-Hour Behavioral Crisis Line	- Provides access to a 24-hour behavioral health crisis line.
My WellCare Mobile App	- Provides members with easy access to the member ID card, find-a-provider tool, quick care (urgent care and hospital services locator), contact us, and wellness services which includes care gaps.

Improving Birth-Outcomes

We support and educate pregnant Heritage Health members on the importance of prenatal and postpartum care through a variety of strategies aimed at engaging expectant mothers early in their pregnancy and providing guidance, information, and support including those illustrated in **Figure 12.**

Figure 12

Helping Members Toward Healthier Pregnancies	
Prenatal Care Management	- Face-to-face contact with WellCare care managers to encourage pregnant women to practice good prenatal care.
Community Baby Showers	- Free community baby showers for new and expectant mothers that focus on providing mothers with critical health information for themselves and their babies, and successful parenting techniques. A gift basket and opportunity to participate in a raffle is also provided.
Stroller/Portable Playpen Program	- Rewards members who complete prenatal and postnatal care with a stroller or playpen.
Doula Services for Pregnant Youth	- Doula services for members who live in a group home or in home placement where there is minimal parental support with a goal of improved birth outcomes, reduced pre-term births, and improved prenatal care.

Prevention-focused Physical and Behavioral Health Services

Co-existing behavioral health needs, chronic medical illness, and social challenges occur among our higher-risk cohorts today. In addition to our integrated care management support, we offer prevention focused services to coordinate and integrate physical and behavioral services as shown in **Figure 13.**

Figure 13

Supporting Co-Morbid Physical and Behavioral Health Needs	
Comprehensive Peer Support	- We work closely with peer and peer supports as they provide substantial support, information, education, guidance, and coaching for members, particularly when it comes to medication.
Family Support Specialists	- A partnership with Nebraska Family Support Network where families receive counseling on the side effects of the member's condition, depression, anxiety, and behavior modification/coaching.
COBALT Therapies	- Free online cognitive behavioral therapy. Web-based tool that offers behavioral health self-management tools for a variety of conditions.

Influencing Member Behavior to Adopt Healthier Lifestyles

Improving Overall Health and Wellness

WellCare has developed a set of value added services to reach all Heritage Health members across the state to educate and empower them to adopt healthier lifestyles. These value-added prevention focused services seek to address a variety of chronic conditions including diabetes, asthma, cardiovascular related conditions, obesity and other diseases and include those shown in **Figure 14.**

Figure 14

VALUE-ADDED BENEFITS AND SERVICES	
Healthy Rewards	➢ Rewards members who complete specific preventive health, wellness and engagement milestones, such as PCP visits, well child visits, and cervical screenings, with a reloadable healthy rewards debit card.
Weight Watchers	➢ A free six-month membership to Weight Watchers.
Over the Counter (OTC) Benefits	➢ A $25 head-of-household monthly OTC allowance to promote self-directed prevention and maintenance. Members may use our OTC catalog to select items such as toothbrushes, first aid items and vitamins that are then delivered to their home. These items are not typically covered by Medicaid.
Discount Card	➢ Provides monthly discounts beyond what is available to the general public from pre-selected retailers allowing members to purchase needed items such as milk, bread, and detergent at a discount.
Tobacco Cessation Program	➢ Supplements Tobacco Free Nebraska's smoking cessation services by providing educational materials, gum, patches, lozenges, and help with obtaining counseling.

Improving Health Outcomes through Community Engagement

Disadvantaged and vulnerable circumstances impact the availability and accessibility of health care and influence lifestyle choices that impact health outcomes. Some of our many community engagement activities are detailed in **Figure 15**.

Figure 15

HELPING TO MANAGE SOCIAL DETERMINANTS OF HEALTH	
Welcome Rooms/Concierge	➢ Provides support for medical and non-medical needs including application assistance, transportation assistance, community support needs.
Health Fairs	➢ CommUnity advocates attend and participate in health-focused events to share information, resources and education concerning a variety of health topics such as diabetes management, back-to-school health, the importance of physical activity and general overall health and well-being.
WellCare Days	➢ On-site events called *WellCare Days* to promote and educate members on health plan resources and health information. Conducted in key locations and agencies across the state to conveniently provide members with health education, information and benefit assistance on site.
Health*Connections* Activities	➢ Community-based health and wellness events leveraging existing programs. ➢ HealthConnections Councils focusing on identifying creative and innovative ways to sustain the social safety network. ➢ CommUnity Assistance Line to connect members to social services.

Health*Connections* Model

WellCare understands the correlation between environmental factors and health outcomes and created the Health*Connections* model to address it. Applying research-based quality improvement methods we focus on population health metrics that will improve the overall health for Nebraskans by:

- Identifying needs through an analysis of key population metrics, by county and age, such as the
  - Percentage of Nebraskans who smoke, have diabetes, are overweight or obese, have limited access to healthy food, face severe housing problems, or are homeless
  - Number of deaths by suicide, mentally unhealthy days, and low birth weights
  - Population ethnicity

- Meeting with advocates to create a state-specific inventory of community programs and services
- Working within the community to identify opportunities to develop new programs or expand services
- Creating self-sustaining programs through the use of grants and business associate agreements targeted at the specific needs of our members

As part of our Health*Connections* Model, WellCare has developed numerous strategies that encourage our members to adopt healthier lifestyles. Below is an example of our strategy in addressing food insecurity.

Tackling Food Insecurity

The United States Department of Agriculture (2014) estimates that one in five children and one in seven adults in Nebraska face food insecurity. On average, 180,000 Nebraskans access the Supplemental Nutrition Assistance Program each month. See **Figure 16** for limited access by county. WellCare attacked the issue of food insecurity head on by creating a Healthy Food Access Initiative. By aligning all the community engagement strategies around the topic of healthy food access, WellCare accomplished the following in 2014 across 12 different states:

Figure 16

CommUnity Activities

- Hosted or participated in 803 total activities related to nutrition and healthy food access reaching nearly 600,000 people
- Collaborated with more than 18,000 stakeholders related to nutrition and healthy food resources

Social Service Utilization Support

- Referred more than 800 people to more than 1,400 local nutrition and healthy food resources
- Bridged more than 50 gaps in needed nutrition and healthy food resources

CommUnity Health Investment Program

- Launched seven healthy food access programs in three states to increase participation in WIC/SNAP by doubling benefits at Farmers Markets
- Increased access and purchase of healthy food by 85 percent among more than 65,000 participants

In Illinois in particular, our local CommUnity Advocacy team partnered with a community-based non-profit and the local farmer's market association to offer a double coupon program for low-income families accessing Supplemental Nutrition Assistance Program (SNAP) benefits when they used their benefit at a local farmers market to buy healthy food options like fruits and vegetables. Called LinkUP Illinois, more than 40 farmer's markets now participate with health benefits for both the SNAP recipients and to the farmer's market vendors.

IV.F MEMBER SERVICES AND EDUCATION

34. Describe the processes the MCO will put in place to ensure the MCO does not restrict the choice of providers from whom the member may receive family planning services and supplies. *(Page limit 1 page)*

FREEDOM OF CHOICE FOR FAMILY PLANNING SERVICES AND SUPPLIES

WellCare believes in patient-centered services that provide tools and information needed for effective family planning as well as to establish and reach personal health goals. We strive to offer an extensive network of contracted family planning clinics, and we allow members freedom of choice for family planning services or supplies. In accordance with our policies and MLTC requirements, WellCare covers family planning services and supplies provided by any Medicaid provider.

WellCare encourages our members to receive family planning services through our network of providers to ensure coordination of the member's total care. Family planning clinics are an important component of our network development plan, and we will extend contracts to all identified Nebraska family planning clinics funded by Title X monies. We have learned first-hand, through our meetings with local providers and advocates the challenges members face in rural and frontier areas.

WellCare ensures members have the freedom to receive family planning services and related supplies from appropriate Medicaid providers outside our provider network without restrictions by:

- Removing all referral requirements from family planning services and related supplies
- Configuring our core processing system to pay the Medicaid provider at no less than the Medicaid rate in effect on the date of service
- Educating members on freedom of choice through all avenues of member communication including the member handbook, member newsletter, member service and care management touchpoints
- Educating providers on freedom of choice through our provider contracts, provider handbook and all other avenues of provider communication

WellCare takes an active role in educating our members about the availability of family planning services including but not limited to education and counseling, physical exams, pregnancy testing, and contraceptives. Upon enrollment, WellCare provides members with information about the availability of family planning services through our member handbook. The handbook advises that family planning services are available at no cost and without a referral. Additional information about family planning services is available through our member website. The member website includes helpful information on a wide variety of family planning-related topics including contraception and pregnancy tests. For those members who are pregnant, WellCare provides a variety of tools and educational resources to promote family planning services. Our *Mommy & Babies Matter* book, provided to all pregnant members, offers valuable information about family planning services. Those members enrolled in perinatal case management receive additional education about family planning services and support in accessing these services after the birth of the baby.

In addition, through WellCare's EPSDT program, family planning services and counseling are offered to appropriate members. In accordance with our EPSDT program requirements, the provider makes available and encourages all pregnant women and mothers to receive, and provides documentation in the medical records to reflect, counseling and services for family planning to women and their partners. WellCare also provides community-based education on the importance of family planning services.

WellCare shares in MLTC's goal to improve birth outcomes. We are confident that our family planning services' policies, education and outreach efforts, and community engagement help our members to obtain valuable family planning services thereby increasing intervals between births, encouraging healthy pre-pregnancy behaviors, and addressing risk factors with better birth outcomes and healthy babies.

IV.F MEMBER SERVICES AND EDUCATION

35. Describe proposed member education content and materials and attach examples used with Medicaid or CHIP populations in other states. Describe innovative methods the MCO has used for member education.

Describe how the MCO will provide equitable member education throughout the State. Provide examples and descriptions of how member education will be used to improve service coordination including:

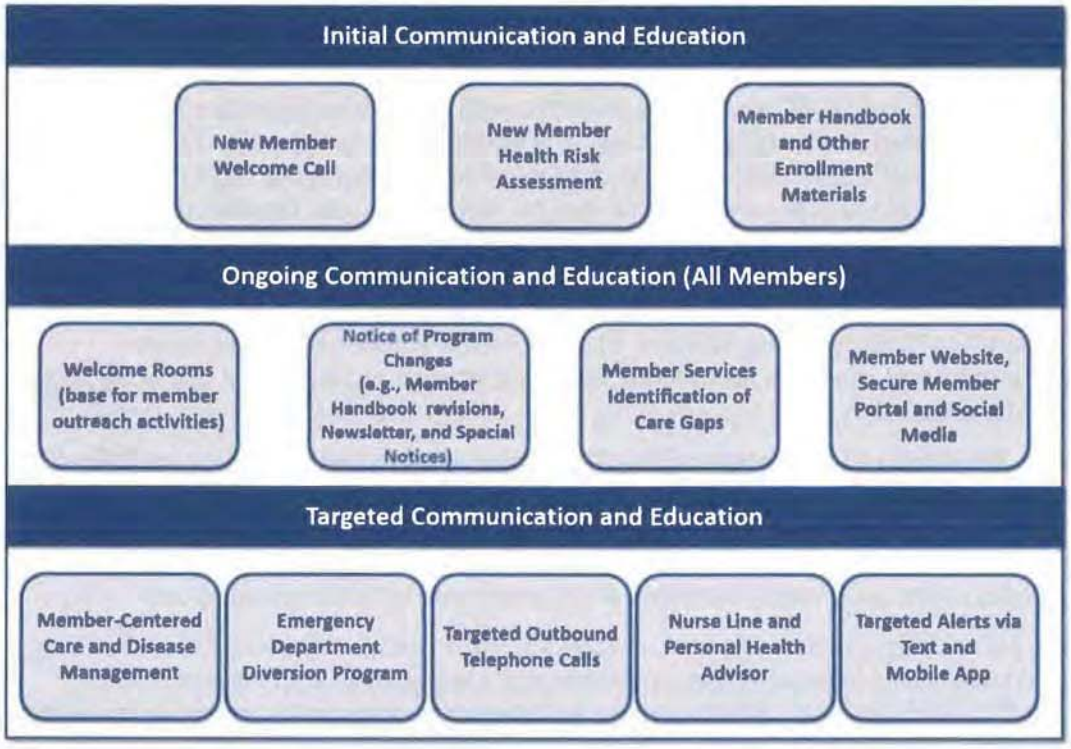
- Integration of physical, behavioral health and pharmacy services.
- EPSDT compliance.
- Appropriate emergency room utilization.
- The use of prenatal services.
- The use of technological tools, including social media and mobile technology.
- Partnership with community-based organizations for education and outreach.

(Page limit 10 page, excluding attachments)

EMPOWERING MEMBERS THROUGH COMPREHENSIVE MEMBER EDUCATION AND COMMUNICATION

Our comprehensive member education strategy includes initial, ongoing and targeted communication and education that is culturally competent and tailored to meet individual needs regardless of disability or education level. All mechanisms employed are specifically designed to help potential enrollees and current members understand the requirements and benefits of the plan as well as the supports available to empower them to navigate the health care system. Member education begins when the member joins our program and continues for as long as she or he is enrolled with us. It extends beyond the distribution of required information to include both broad-based and targeted outreach and member retention campaigns, as summarized in **Figure 17**.

Figure 17



Our member communication strategy is supported by:

- A comprehensive onboarding process for new members including solutions for those members we are unable to reach
- A toll-free line for potential enrollees and members
- Local community outreach aimed at educating potential enrollees and members about Heritage Health
- Welcome rooms that serve as outreach centers and walk-in member service hubs strategically located across the state
- Technology solutions including member website, mobile applications, and social media
- Member engagement unit that conducts telephonic outreach to members on a wide range of matters including welcome calls, satisfaction surveys, recent emergency department visits and discharge follow up
- Centralized telephonic outreach program where outreach specialists call members with outstanding care gaps to explain the gap, and set-up a doctor appointment to close the care gap
- Care managers and disease managers who proactively engage members through specific patient-centered interventions on a wide range of health education topics
- Our Health Connections Model to improve the health and vitality of our members by sustaining the social safety net

MEMBER HANDBOOK

Our member handbook will provide vital information related to benefit coverage and obtaining care and will comply with all the requirements described in this RFP. In addition it will comply with the requirements in 42 CFR 438.10(f) (6). Key information that will be available in our member handbook includes but is not limited to:

- Who we are, important contact information including member services toll-free telephone number, fax number, email address, mailing address and member website
- Services available under the contract including amount, duration and scope
- Role of the primary care provider (PCP) and choosing a PCP
- Procedures for obtaining benefits, including referral and authorization requirements
- Availability of non-emergency transportation and how to access
- Appropriate and inappropriate behavior when seeing a provider
- How to use the member identification card
- How to make appointments
- Extent to which members may obtain benefits, including family planning services, from out of network providers
- Prenatal services and post-partum care
- Hours of operation including the availability of the member services toll-free line and the 24-hour nurse line
- Preventive health services: Well child care, EPSDT guidelines
- How to change managed care organizations (MCOs) and when that is possible
- How to make a complaint and recommend a change in policy or service
- Care coordination, health education and promotion programs
- Notifying WellCare when you are pregnant or involved in an accident
- How to report fraud and abuse
- Second opinions
- Alternative methods or formats of communication and how to request interpreter or translation services
- Advance directives

- Information on the grievance and appeal process
- After-hours and emergency services and appropriate use of the emergency department
- Post stabilization care services
- Right to refuse services or treatments
- How to change PCPs
- Member protections, rights and responsibilities
- How to access Medicaid State Plan benefits and LTSS
- Cultural Competency
- Smoking cessation
- Indian Health Services/Tribal 638/Urban Indian Health
- Community resources and the CommUnity Assistance Line
- Patient confidentiality and HIPAA
- Contact information and the role of the Ombudsman
- How to report suspected abuse and neglect
- How to access behavioral health services
- How to contact the enrollment broker
- Roles and responsibilities
- Value added services
- Family planning
- Coordination of benefits and third party liability
- Getting help on issues surrounding housing, education, food, physical and sexual abuse and violence
- Getting help on behavioral health and protective factors

The MLTC-approved member handbook will be available in both English and Spanish and written at a sixth grade reading level. WellCare will publish the handbook to our member website with hard copies available upon request. Our members are informed of the availability of hard copy in the welcome packet and are asked to call member services to obtain one.

The handbook will be updated once a year and revised as needed to incorporate changes to the Heritage Health Plan and program. The updated member handbook will be made available to our members annually through the member website. For significant changes we will also provide our members written notice of the change at least 30 calendar days in advance of the effective date. This notice will include instructions to call member services if they would like a hard copy. Our draft member handbook is included as an attachment to this question.

CORE MEMBER EDUCATION OUTREACH

Our consistent focus on the member is supported by direct engagement with our members throughout their enrollment. This is accomplished through a wide variety of core activities including our welcome packet, welcome call, member newsletters, inbound calls to our member services contact center, and digitally through our member website and secure portal. WellCare recognizes that all member materials will be submitted to MLTC in the timeframes outlined in the Heritage Health contract.

Welcome Packet and Welcome Call

Member education begins with our welcome packet and welcome call. The welcome packet is sent within 10 calendar days of enrollment and is followed up with a welcome call during which the Heritage Health program and WellCare of Nebraska's role is explained, patient-centeredness is discussed, assistance in obtaining social services through our CommUnity Assistance Line and PCP appointment setting is offered.

Member Newsletters

Our quarterly newsletters (**Figure 18**) educate members on a variety of health, wellness, benefits and requirements of the plan including:

- Information on chronic illnesses and ways to self-manage care

- Behavioral health
- EPSDT screenings, reminders of flu shots and other prevention measures at appropriate times
- Medicare Part D issues
- Cultural competency issues
- Tobacco cessation information and programs
- HIV/AIDS testing for pregnant women
- Other health-related topics

The newsletter is available in English and Spanish. Other languages are available upon request as well as alternative formats. The newsletter will be available digitally on our website and mailed to members on request. WellCare will work closely with MLTC as to suggested topics for our Nebraska specific newsletter.

Figure 18

Member Contact Center

Our member services contact center offers well trained contact center associates who are knowledgeable about the Heritage Health Plan to help members and prospective enrollees understand the benefits and requirements of the plan, answer questions and facilitate resolution of issues. Our member services associates are alerted to care gaps when talking to members and initiate a three way call to schedule an appointment with the member's PCP and arrange transportation if needed. An automated reminder call occurs 24 hours before the appointment.

Member Website

Our Nebraska website will be an important communication tool to inform, educate and communicate with members. It will also be an avenue through which we promote health, wellness and service to our members. We offer a website for the general public allowing both existing members and potential members to access general information without any login credentials. Our secure member portal requires validated login and password credentials for access.

Innovative Member Education Solutions

In addition to core functions, WellCare uses a variety of innovative member eduation solutions such as community outreach associates, welcome rooms, a member engagement unit, outreach specialists who close care gaps, our mobile application, social media, web-based tools, and the Health*Connections* Model.

Nebraska Based Community Outreach Associates

Our integrated care management program is based on identifying the needs of our members; outreaching to them where they live; understanding how they prefer to engage with the health care system; facilitating their access to care; and helping them whenever, wherever and however they need us. Our community outreach associates are hired locally and have knowledge of the community including community services and partners. These associates are trained on compliant and effective engagement with prospective enrollees and members. Our community outreach department will support our integrated care management program through dissemination of information and education related to programs offered by the state of Nebraska and community organizations. Specific goals of the community outreach department include educating target audiences about the availability of health care coverage, and providing sufficient

information to promote and encourage enrollment and retention within the program.

Activities designed to achieve our community outreach include:

- Participation and sponsorship of educational events and health fairs
- Dissemination of MLTC-approved outreach materials
- Hosting table top events at approved community venues
- Partnering with organizations that have a primary focus on the well-being of children, families, the elderly and special populations
- Increasing awareness within the provider community to promote referral opportunities into the program
- Providing wellness information through social media, such as Facebook
- Promoting cultural awareness to reduce barriers to program access

In 2014, WellCare participated or hosted more than 5,000 total community activities reaching more than one million community stakeholders. These included peer support groups, children's dental days, car seat safety, healthy food access programs, baby showers, homeless outreach and more. WellCare also reached community stakeholders from diverse cultures and backgrounds including African American (299,000), Asian (221,000), Hispanic (260,000), Native American (13.000), and Native Hawaiian (12,000) cultures as well as many segments within the disability community (195,000) across more than 175 counties in seven different states.

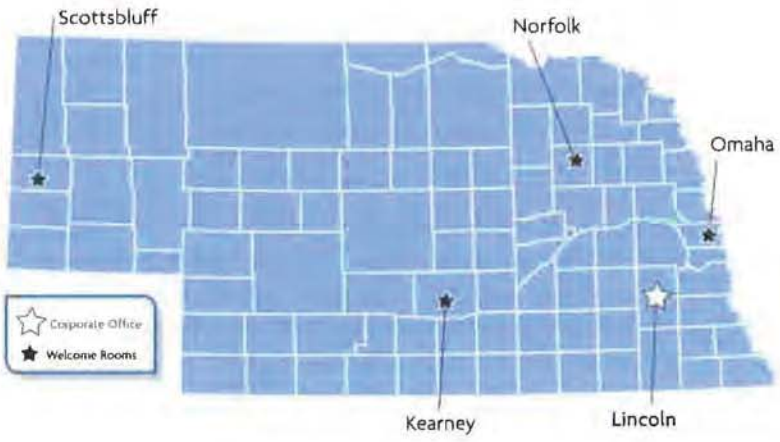
In Kentucky, we participated or sponsored 713 events and activities in 2014 with nearly 632,000 individual community touches.

WellCare intends to bring this focused support to the state of Nebraska. To this end, we have met community stakeholders from across the state to identify opportunities for collaboration. In meeting with these partners, we learned about several initiatives that offer opportunities to connect with members and the community-at-large.

Welcome Rooms

Our Welcome Rooms, strategically located in neighborhoods and communities where enrollees live, work, and frequent, are equipped to function as outreach centers and walk-in member service hubs. Here members and families can meet face-to-face with a member services associate and receive personalized attention to their needs. Ongoing education will be available through monthly classes. At least one day- time and one evening class will be held per month. Our welcome rooms provide an ideal opportunity for members to learn more about the Heritage Health Plan and receive information on important health topics. See **Figure 19** for our welcome room locations.

Figure 19



Member Engagement Unit

Our Member Engagement Unit conducts telephonic outreach to members on a wide range of matters including welcome calls, satisfaction surveys, recent emergency department visits, members new to care management and discharge follow up.

Centralized Telephonic Outreach Program

Outreach specialists call members with system identified care gaps to explain the gap and initiate a three-way call with the member's provider to help them set-up their appointment to close the care gap.

Care Management and Disease Management

Our care managers and disease managers proactively engage members through specific patient-centered interventions on a wide range of health education topics including appropriate use of the emergency department and medication compliance. They also teach the member how to access information about benefits and help the member access social services.

Mobile Application

Our mobile application for members includes many helpful and educational resources and is available for Apple and Android devices in English and Spanish. The mobile application allows us to send messages to members about important time relevant items such as reminders about flu shots. Through the secure portal of the mobile application, members will be reminded of care gaps, and scheduled appointments.

Social Media

WellCare engages with our Facebook community, which includes members, around topics such as health and social services and support, community engagement, and member and community education and services

Our social media policy requires we respond to inquiries made via social media within 12 hours. WellCare does not share protected health information (PHI) of any kind on social media without expressed permission from the member and/or designated guardian. Member comments on social media that include PHI are removed by WellCare. In 2016 we expect to further these efforts through the launch of our Twitter account, and Company blog. Visit our Facebook page at https://www.facebook.com/WellCareHealthPlans and our YouTube channel https://www.youtube.com/user/WellCareHealthPlan

Web-based Tools

Our website offers members a variety of web-based tools to help them manage their health. These include:

- Succeed Snapshot, a web-based health screening available online that a member can take in the comfort of their own home and at their own pace
- Cobalt Therapeutic Intervention, a web-based program for members with behavioral health needs to access counseling services online to drive their own recovery, as they see fit

Health*Connections* Model

Partnerships with community programs are a core part of our Health*Connections* model. Through these community activities, we support a wide range of community-based health and wellness activities aimed at empowering members to lead healthier lives. During the CommUnity Activities process we assemble and monitor available social safety net services and find the gaps and identify the corresponding impact of them on disadvantaged populations. We also partner with local communities and states to find innovative ways to sustain the safety net programs, while increasing their reach to our members, and integrating these services into member care plans. Key components of our model include:

My Family Navigator (aka Navigator): A searchable database of all public assistance programs that also provides the platform for community-focused statistical analyses and predictive modeling as well as a relationship management tool to use in collaborating closely with community organizations comprising the social safety net.

Social Service Electronic Health Record: A searchable interface created to assist our member-facing associates when they are searching for community-based programs and social services as well as tracking individual referral history by member, by provider and by service. Through this function, WellCare has referred more than 6,000 people to 21,000 community-based programs and services since the launch in 2011. In addition, WellCare identified and bridged more than 1,500 gaps in needed social services using traditional community mobilizing methods. This information led to the design and launch of nearly 100 different pilots leveraging evidence-based or evidence-informed wellness and disease management programs for member access and community benefit.

Member Education Plan

WellCare will develop a formal plan for ongoing education of our members prior to, during and after implementation of the Heritage Health Plan and will submit this plan to MLTC at least 45 calendar days prior to contract start date. WellCare has successfully implemented approved education plans in several states such as Hawaii and New York and in states newly adopting statewide managed care including Florida, Georgia, and Kentucky. See **Figure 20** for a summary of our member education plan.

Figure 20

Member Education Plan		
Member, Potential Member and Caregiver Education Plan		
Activity	**Timeline**	**Topics or Function**
Welcome Rooms	Open prior to go-live and continuing for duration of the program	▸ Serve as outreach centers and walk-in member service hubs to assist members or potential enrollees with specific questions, changes in PCP etc.
Statewide Orientation sessions	Beginning 90 days prior to go-live and continuing 30 days post implementation, then quarterly thereafter	▸ Who are we? ▸ Program overview including covered benefits, accessing care, role of a PCP and choosing a PCP, availability of transportation, grievance and appeal process ▸ Question and answer period
Member Outreach associates in place	30 days prior to go-live	▸ Conduct community outreach activities where the members are
Member Contact Center	Open 30 days prior to go-live or earlier as needed	▸ Answer member and potential member questions ▸ Assist with PCP assignment process
Member Website	Operational 60 days prior to go-live	▸ Provider search function ▸ Member collaterals ▸ Frequently asked questions
CommUnity Assistance Line	Operational 60 days prior to go-live	▸ Available social services catalogued and made available to prospective members and their

Activity	**Timeline**	**Topics or Function**
		families/caregivers
Member Engagement Unit	Operational 60 days prior to go-live	▸ Outreaches to members in need of care management services

Providing Equitable Member Education Throughout the State

WellCare uses multiple modalities of reaching members for the very purpose of ensuring we reach members in an equitable way regardless of where they live. We recognize the unique challenges of the rural, and particularly, frontier communities. Having met with the Center for Rural Affairs in Lyons, we are eager to build innovative partnerships to further support these goals. One step is making sure we have member facing associates located throughout the state. The other is to offer members multiple ways to interact with us including in-person, telephonic, web-based, email, text and chat. Activities and events are tracked to ensure we are reaching our members in the most effective manner. See **Figure 21** for a summary of examples and descriptions of member education to improve service coordination. Detailed examples follow the summary.

Figure 21

Summary of Examples and Descriptions of Member Education to Improve Service Coordination	
Integration of physical, behavioral health and pharmacy	▸ Community partnerships throughout the state to promote the integration of services and coordination of care ▸ Partnerships with health departments and regional health authorities on the distribution of materials to the entire population ▸ Health education for SPMI populations on obesity and chronic conditions ▸ Educational material on co-existing conditions including diabetes and depression, medication adherence, impact of smoking, impact of stress
EPSDT compliance	▸ Periodicity letters mailed to children birth-21 on their birthday month with a reminder of age appropriate preventive care services ▸ Care gap alerts on mobile application site ▸ Outbound calls to educate member on care gaps, schedule appointments, and arrange transportation ▸ Care alerts to member facing associates as to gaps in care whenever members call us. Associates educate member and offer assistance with appointment scheduling and transportation ▸ Using member incentives such as gift cards or distributing other low-dollar items
Appropriate emergency room utilization	▸ 24 hour nurse line directing members to appropriate setting ▸ 24 hour behavioral crisis line ▸ Outbound calls on recent emergency room visits ▸ Member handbook, newsletters and welcome packet ▸ Provider directory with urgent care look-up ▸ Find-A-Provider mobile application with advanced quick care service location ▸ Clinics in pharmacies and retailers to educate members on appropriate use of the emergency room ▸ Comprehensive outreach to homeless residents
Use of prenatal services	▸ Text4baby a free mobile information service designed to promote maternal and child health ▸ Healthy behaviors program rewards members who have had appropriate prenatal

Summary of Examples and Descriptions of Member Education to Improve Service Coordination	
	visits and timely postpartum care with a free stroller or play yard - Meeting with expectant mothers in the community to discuss importance of prenatal and postpartum care - Prenatal risk assessment and care management services for prenatal members

Use of technological tools, including social media and mobile technology	- Text4baby offering free text4baby pregnancy messages starting at enrollment, provides 3 texts per week through birth and weekly through baby's first 12 months
	- Mobile application available for Apple and Android devices includes:
	  ▪ Find-A-Provider advanced quick care service locator (urgent and hospital emergency)
	  ▪ Message to members about important, time relevant items such as flu shots or changes in benefits
	  ▪ Care gap reminders to members, including PCP's name and phone number and scheduled appointments
	  ▪ Member education campaigns promoting the mobile application
	  ▪ Reporting software measuring member usage including total downloads Find-A-Provider, viewed messages, searches for quick care centers, viewed wellness services
	- Cobalt Therapies online modules for anxiety, depression, insomnia and substance abuse
	- Succeed Snapshot online health screening tool
	- Social media content around
	  ▪ Health and social services and support
	  ▪ Community engagement
	  ▪ Member and community education and services

Partnerships with community-based organizations for education and outreach	- Nebraska based community outreach associates supporting our community-based partners throughout the state with our Health*Connections* model - Attending health fairs to distribute health related information and conduct appropriate screenings - Member referrals to community-based programs and services such as farmer's markets and farm-to-community mobile markets - Member referrals to community-based, evidence-based chronic-disease self-management programs offered through local Area Agencies on Aging - Hosting caregiver support and education programs through welcome rooms

Best Practices: An Example of Integration of Physical, Behavioral and Pharmacy Services

Our Georgia affiliate introduced our integrated model of care to Hope House, a residential substance and mental health program in the East region. After the initial meeting with Hope House, our member outreach team provided education - explaining benefit information, how to access to care and how to complete applications. Additionally, a care manager assessed pregnant members and evaluated high risk pregnancy related complications. Through this partnership, our Georgia plan now refers members to Hope House for services, and Hope House refers members to WellCare on an on-going basis for medical and behavioral health care management. Prescription oversight is an integral component of the care plan.

Best practices: An Example of Maximizing EPSDT Compliance

Our CAREConnects system supports our enterprise quality improvement goals by providing member services associates with care alerts when a member's record indicates he or she has not received an important health screening or service. The member services associate educates the member about the care gap and supports the member in taking action (i.e., scheduling an appointment). If an appointment is

scheduled, the member receives an automated reminder 24 hours before the scheduled appointment.

Best practices: An Example of Encouraging Appropriate Emergency Room Utilization

Our 24-hour nurse line team performs a risk assessment or triage of the health concerns, problems or symptoms. They then use a nationally recognized triage decision-making tool to assist the member in deciding whether to see their doctor, go to an urgent care center, or seek immediate emergency care.The use of the nurse line helps control costs and minimizes inappropriate use of the emergency room while delivering the highest quality care. This solution involves around-the-clock access to specially trained nurses who refer members to in-network providers, facilities, and support groups as well as provide assistance in scheduling much needed preventive appointments. Nurses who answer the 24-hour nurse line are able to assist the member in making an appointment with their PCP when appropriate as well as assist in locating the closest participating urgent care center for the member. ***In the fourth quarter of 2014, 65 percent of callers inclined to access the emergency room were diverted by the nurse line team to a lower level of care than originally inclined.***

Best practices: An Example of Technology Partnership

WellCare partners with national, state and local resources to identify community-based best practices while also testing additional programs. Our Georgia affiliate recently partnered with the East Central Public Health District to target children with asthma between the age of 5 and 9. This health district was selected because they have one of the highest rates of asthma-related emergency room visits in Georgia.

Under our pilots, the child is enrolled in a program through the school to manage their asthma and its triggers using an Ipod Touch. During weekly check in meetings, the school-based nurse or community health worker monitors the child's medication usage, trigger information and other factors to provide asthma education and support to the child and his or her family. In addition to this program, the local health departments also participate in the "healthy homes" initiative through which in-home supports are offered to the family to help reduce in-home triggers by introducing hypo-allergenic linens, reducing pet dander and so on. Using our proprietary Health*Connections* model, WellCare works locally to identify community programs like these to support families in their own community.

Partnerships with Community-based Organizations for Education and Outreach Example

WellCare engages with community based organizations who offer local and often innovative programs and services. For example, WellCare of Georgia works with a community organization called Help a Child Smile, a mobile dental program offering comprehensive dental services at local schools in 100 counties throughout Georgia. By contracting with Help a Child Smile, WellCare is connecting with non-compliant pediatric members as well as other children at their school, with their parent's permission, to ensure they receive their annual dental checkup. The CommUnity Advocacy team has been trained on completing community health needs assessments and traditional public-health community mobilizing techniques. So, as the pilot progresses, our team will assemble a Health*Connections* Council dedicated to the topic of dental coverage and expanding coverage. This allows WellCare to work with community partners to identify best practices and facilitate the expansion of a program like Help a Child Smile. In addition to the draft Member Handbook included in the required Attachment 5 attachments, we have included the following examples of member engagement materials.

Attachments:

- Attachment 35a_Member Newsletter
- Attachment 35b_Mommy & Baby Matters Booklet
- Attachment 35c_text4baby Brochure
- Attachment 35d_Cobalt Therapies Quick sheets
- Attachment 35e_Periodicity Letter

RESTORE™

"This program has been proven to help people sleep better and feel better."

(6 Modules)

Getting Started

1

- Insomnia
- Problematic sleeping habits
- Consequences of insomnia
- Realistic sleep expectations
- Set Goals
- Homework: self-monitoring of sleep

Stimulus Control and Sleep Restriction

3

- Stimulus control
- Cues which promote sleepiness
- Sleep restriction
- Medication
- Homework: Practice the above techniques

Sleep Hygiene

5

- Noise
- Exercise
- Napping
- Temperature
- Lighting
- Smoking
- Caffeine
- Alcohol
- Eating
- Sleep Hygiene Exercise

Mindfulness

6

- Mindful observing
- Mindful listening
- Homework: practice mindfulness, continue with sleep diary

Sleep Diary

Sleep diary: best if done every night

Relaxation Techniques

2

- Paced breathing
- Deep muscle relaxation
- Imagery-induced relaxation
- Self hypnosis
- Homework: Practice relaxation techniques

Cognitive Behavioral Therapy

4

- Identify unhelpful thoughts
- Challenge their validity
- Substitute more helpful thoughts
- "So what if..." Technique
- Worry Time
- Homework: Generate a list of coping thoughts

MoodCalmer ™

"This program helps people reduce depression and develop long-lasting improvements."

(4 Modules)

- Getting Started
- Explanation of CBT
- Initial questionnaires
- Psychoeducation
- Triggers
- Real life case studies introduced
- No Homework

Getting Started ❶

Challenging Thoughts ❷

- Pleasant activities
- Effects of reduced activity on thoughts
- Benefits of pleasant activities
- Activities to do alone and with others
- Rewarding yourself
- Activity: Pleasant Activity Exercise

Pleasant Activities ❸

- Cycle of negative thinking
- Negative automatic thoughts
- Common thinking errors
- Challenging negative thoughts
- Homework: Challenging thoughts exercise

Keeping Well ❹

- Keeping well
- Sleep
- Diet
- Exercise
- Activity: Complete sleep management plan and personal relapse prevention plan

Real Lives Each session includes case studies based on real patients experience using the program

FearFighter™

"Thousands of people have used this software program to help them overcome their anxiety, panic, and/or phobia."

(9 Modules)

- Overview of steps and activities
- Introduction to CBT, Anxiety, Panic and Phobia
- The Fight or Flight Response
- Find a Helper

Getting Started

1

2

How to Beat Fear

- Spot signs of anxiety
- Identify safety behaviors
- Keep a FearFighter™ diary

3

Anxiety Management

- Learn anxiety management techniques
- Exposure therapy
- Diaphragmatic breathing
- Progressive Muscle Relaxation

4

Challenging Thoughts

- Characteristics of negative thoughts
- Challenging thoughts exercise
- Recognize Thinking Errors

5

Core Beliefs

- Challenge core beliefs
- List the evidence
- Build alternative and more helpful core beliefs

6

Exposure and SMART Goals

- Practice exposure therapy
- Create a fear hierarchy with SMART goals

7

Exposure and Rehearsal

- Face triggers
- Work through fear hierarchy

8

Continuing Exposure

- Review exposure therapy
- Track progress

9

Maintaining Your Goals

- Deal with Setbacks
- Relapse Prevention
- Goal Rehearsal

OCFighter™

"Recognized for absolute clinical efficacy."

(9 Modules)

- Overview of steps and activities
- Introduction to CBT and ERP
- Benefits of OCFighter

Getting Started

1

- Identifying Triggers for your Rituals
- Measuring level of discomfort
- Real Lives: How Carol and Bill identified their triggers

Identifying Triggers

3

- Creating a fear hierarchy
- How To Create An Effective Goal
- Reviewing case study hierarchy

Goal Setting and Exposure

5

- Interactive ERP Review
- Dealing with many triggers at once
- Checking, contamination etc.

Continuing Exposure Part One

7

8

Relapse Prevention

9

- Using up free time and pleasant activities
- Tracking Progress
- Rituals And Cost
- Preventing relapse
- Staying well plan
- Booster Sessions

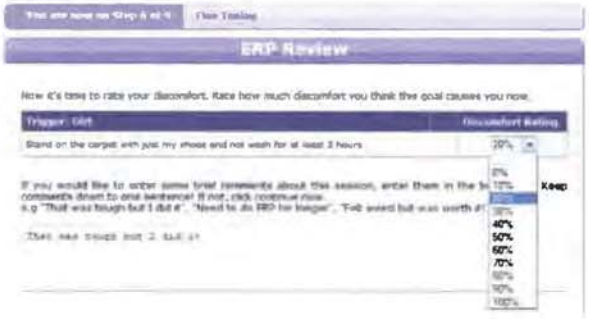
Continuing Exposure Part Two

- Interactive ERP Review
- Depression, alcohol, drugs, and pure obsessions
- Complete Working On Triggers
- Putting Triggers On Hold

6

Fine Tuning

- Interactive ERP Review
- Planning goals
- Working on triggers
- Common problems with ERP



2

Rituals and Their Cost

- Explanation of CBT model of OCD
- Explanation of exposure with ritual prevention
- Real lives: two case studies (Carol and Bill)

4

Obsessive Thoughts

- Trigger Log Activity Check
- Understanding obsessive thoughts
- Identifying thinking styles

SHADE™

"Demonstrated to significantly reduce substance use, drinking, binge drinking, hazardous use and depression."

(10 Modules)

- How to examine and evaluate life events
- Important information about alcohol, drugs and depression
- How to identify pros and cons of using

Getting Started

❶

Mindful Awareness

- How to monitor thoughts and behaviors in everyday life
- Examine the costs and benefits of drinking/using
- Learn about "Mindful Awareness"

❷

- How thoughts and behaviors are linked
- Analyze pros and cons in regard to changing situations
- Learn to experience routine activities in a mindful way

The "ABC Model"

❸

Developing a Change Plan

- Use 'Activity Log' to schedule one pleasant activity and one achievement activity each day
- Develop a 'Change of Plan' for current situation
- Learn more about experience of cravings and impulses

❹

- Learn about problematic ways of thinking common to depression and using
- Learn to manage problematic patterns
- Develop mindfulness skills

Managing Problem Behaviors

❺

- Learn about schema
- Identify problematic schema
- Learn how to develop alternative, balanced schema

Identifying Schema

❼

Problem Solving

- Learn and practice problem solving skills
- Develop Mindfulness skills

❻

Using Mindfulness

- Learn about 'Seemingly Irrelevant Decisions"
- Identify and manage the 'Breaking the Rule' effect
- Learn how to look after wellbeing

❽

Preparing for Life

- Learn strategies to help cope
- Learn to effectively refuse
- Develop an Emergency Craving Plan

❾

Relapse Prevention

- Learn about the importance of relapse prevention
- Develop their own 'Relapse Management and Prevention Plan

❿

SECTION IV.H GRIEVANCES AND APPEALS

36. Provide a flowchart and comprehensive written description of the MCO's member grievance and appeals process, including the approach for meeting the general requirements and plan to: *(3 pages)*

- Ensure individuals who make decisions about grievances and appeals have the appropriate expertise and were not involved in any previous level of review.
- Ensure an expedited process exists when taking the standard time could seriously jeopardize the member's health. As part of this process, explain how the MCO will determine when the expedited process is necessary.
- Use data from the grievance and appeals system to improve the MCO's operational performance

(Page limit 3 pages)

WellCare Supports Important Protections for Our Medicaid Members

As a service-oriented organization, we communicate with members about their rights, including their right to express dissatisfaction or their right to request an appeal when services are denied, reduced, suspended or terminated. Grievances provide invaluable feedback about our members' experiences with us and the health care delivery system at large, so we strive to create an environment where our members trust that we take their concerns seriously and will address problems when they are encountered. Appeals are not just a basic right of enrollment but an integral part of our overall quality-oriented medical management program. ***Given the importance of grievances and appeals, our company policy prohibits delegation of these functions to subcontractors; instead, all are managed in-house.***

A Comprehensive Review of WellCare's Grievance and Appeals Processes

Our grievance and appeals system complies with Federal and State regulatory requirements and includes processes to receive, process, and report on member grievances and appeals. Our internal review process, which provides one level of appeal, allows members and providers to present new or additional information about the member's health so we may evaluate previously denied, reduced, or suspended services. As required, our grievance and appeals system includes access to the State's fair hearing system allowing members and providers at any time to appeal WellCare's decision to uphold the denial.

WellCare Provides Timely Acknowledgement of Grievances and Requests for Appeal

Upon receipt of a grievance or request for appeal, we assign the member's request to a coordinator who records the request in our database capturing information about the member's circumstances and prepares a written acknowledgement of receipt so the member is assured we have received the concern and are addressing it. Our letters use easy-to-understand language and are sent in the language in which the member has submitted the request. As an added measure, the English version of our letters includes information about how to request the letter in alternative languages and formats for those members requiring them. The letter is sent to the member within ten calendar days of receipt of the request.

WellCare's Grievance and Appeals Process

Our approach to meeting general requirements for grievances is demonstrated in the attached flow diagram (**Attachment 36a_Grievance Process Flow**). Upon receipt, the grievance coordinator researches the member's complaint. If the grievance requires input by another department, including clinical professionals for grievances involving clinical issues, the coordinator works with the department(s) to gather facts. If the grievance is from a member enrolled in care management, the coordinator contacts the care manager to inform him/her of the grievance and engage the care manager in the review which is especially critical when the issue pertains to care the member is receiving. Upon completion of the

research, the coordinator updates the database summarizing the issue, key dates associated with the matter (i.e., receipt date, date acknowledged), and the final disposition. The coordinator also prepares the grievance disposition letter explaining the research conducted, our findings, and the actions we have taken or will take. The grievance disposition letter is sent as expeditiously as the member's health condition requires but no more than 90 calendar days from the date the grievance was received.

For appeals, we do not give deference to the original adverse determination. As demonstrated in the attached flow diagrams (**Attachment 36b_Pharmacy Appeals Process Flow** and **Attachment 36c_Medical Appeals Process Flow**), upon receipt the reviewer begins investigating the request, including all aspects of clinical care involved, taking into account all comments, documents, records, or any other information submitted by the member or his/her representative without regard to whether such information was supplied or considered in the initial review.

Once the review is complete, the reviewer documents findings and makes a determination. If the request is approved, the reviewer enters the authorization in our Medical Management Platform and sends written notification to the member and provider (or triggers reprocessing of the claim if services have been rendered). If the recommendation is to uphold the denial, the reviewer forwards the request and supporting documentation to a Medical Director for final determination. While our internal review process does not require review by our Appeals Committee (only review by a physician with appropriate clinical expertise who was not involved in previous levels of review or decision-making), our Medical Directors may engage our Appeals Committee as an additional level of multi-specialty physician review to objectively evaluate the determination and the best interests of the member.

Upon completion of the review, the reviewer updates the database with a dated summary of the issue or request, key dates associated with the request (i.e., receipt date, date closed), and final disposition. The coordinator also prepares and sends written notice of the appeal decision, which includes the results and date of the appeal outcome, information about the criteria used for the evaluation, the rationale for the decision, and information about the appeal rights available to the member through the State's fair hearing system including how to request a State fair hearing. The notice also informs the member of his/her right to continue receiving benefits pending further review, how to request continuation of benefits and information that the member may be liable for the cost of any continued benefit received if the action is upheld in a hearing. For pre-service appeals, we issue notices as quickly as the member's health condition requires but no more than 30 days from the date the request was received, which is more stringent than the required 45 days in the RFP. ***In 2014, WellCare completed Medicaid pre-service appeals in an average of 15.4 calendar days.***

WellCare Ensures Decisions are Made by Individuals With the Appropriate Expertise

WellCare has specialized and separate teams who handle grievances and appeals. Our grievance team, operating within Member and Provider Communications, is comprised of 74 highly-qualified associates. Hiring skilled associates is a high priority so we seek individuals with at least one year of experience in customer service and give strong preference to those with health care and grievance job experience. We also have a highly-qualified appeals team aligned within our clinical services organization, which includes care management, pharmacy, utilization management, and behavioral health. Our appeals teams include 167 associates (five pharmacists, 17 supervisors, 34 pharmacy technicians, and 111 appeals associates including appeals coordinators and reviewers, and intake specialists). For clinical reviews, only health care practitioners who have appropriate training and experience in the field of medicine are involved in the case reviews. Because we offer an in-house pharmacy, behavioral health, and medical program, our clinical experts include pharmacy medical directors, staff psychiatrists, and medical directors of varied specialties. If necessary, we have external physician advisors for a same/similar specialist review.

Unbiased Reviews Through Individuals Not Involved in Previous Level of Review

To offer an unbiased evaluation of an appeal, it is important to ensure the decision-making process does not include those who may have been involved in the previous level of review, nor the subordinate of any such individual. When physician review is required at the appeal, **our reviewer identifies the physician involved in the previous level of review and excludes that physician from any part of the review, instead conferring with available medical directors or an external physician advisor as noted above.**

WellCare's Approach to Ensure Timely Reviews to Not Jeopardize Members' Health

We offer expedited review of appeals when standard resolution could seriously jeopardize our members' life, health, or ability to attain, maintain, or regain maximum function. Members and providers may request an expedited appeal, which is evaluated for exigency by a clinical reviewer and medical director. Our staff, specially trained to evaluate standard requests, may also determine a member's clinical circumstances necessitate expedited review. If the request to expedite is approved, the reviewer proceeds with the review in an expedited fashion providing notice verbally and in writing within 72-hours of receipt of the request or identification. If the request to expedite is denied, we provide prompt verbal notice and mail written notice within two calendar days of the denial advising that the review is being processed under the standard timeframe of no longer than 30 calendar days from the day the appeal was received. In all cases, our policies prohibit punitive action from being taken against anyone who requests or supports a request for an expedited appeal.

Our Data-Driven Approach to Grievance and Appeals Improves Operations

Central to our grievance system is our proprietary grievance and appeals database, where all requests are captured and categorized to help easily identify trends and opportunities for improvement. Our multi-disciplinary Grievance Governance team meets weekly and is singularly focused on delivering an improved member experience. They do so by driving operational improvements through the routine analysis of grievance data. Using routine and ad hoc reports the team thoroughly reviews grievance data, identifies trends, reviews results of root cause analysis, develops actions to remediate issues negatively affecting members, and monitors performance. Appeals and grievance reports, including action plans, are presented to the Customer Service Quality Improvement Workgroup (CSQIW) and Utilization Management (UMC) and Quality Assurance and Performance Improvement Committees (QAPIC).

Through our disciplined approach, we have made significant improvements in our members' experiences. For example, we identified an issue of providers balance billing our members. In response, we implemented a Member Services team to personally assist members with balance billing problems and conducted provider education through our Claims team. As a result, **we successfully reduced balance billing-related grievances by 91 percent in three months**. We achieved similar success with non-emergency medical transportation (NEMT)-related grievances. In response to a negative trend, we implemented local "strike force" teams in Medicaid markets experiencing an especially high volume of grievances. These strike force teams were responsible for receiving grievance data and taking action by addressing the NEMT drivers' companies through telephone and face-to-face meetings. They also managed disciplinary action, including termination of poor performing contracts, and added new NEMT subcontractors. As a result, **we reduced NEMT-related grievances by 67 percent in seven months**.

We continue to invest in our grievance systems including its supporting technology. To that end, over the next 18 months we will fully deploy our new CAREPath system for appeals. CAREPath is our next generation proprietary application that will provide enhanced end-to-end tracking and monitoring of all grievances and appeals. The platform is designed to effectively manage the grievance system processes thereby providing a 360 degree view of the issue and workflow touchpoints. Built on the highly effective Pegasystem platform, this true workflow solution will provide a unified channel to handle grievances and appeals. Additionally, it will enable a faster, accurate and quality-controlled response to our members.

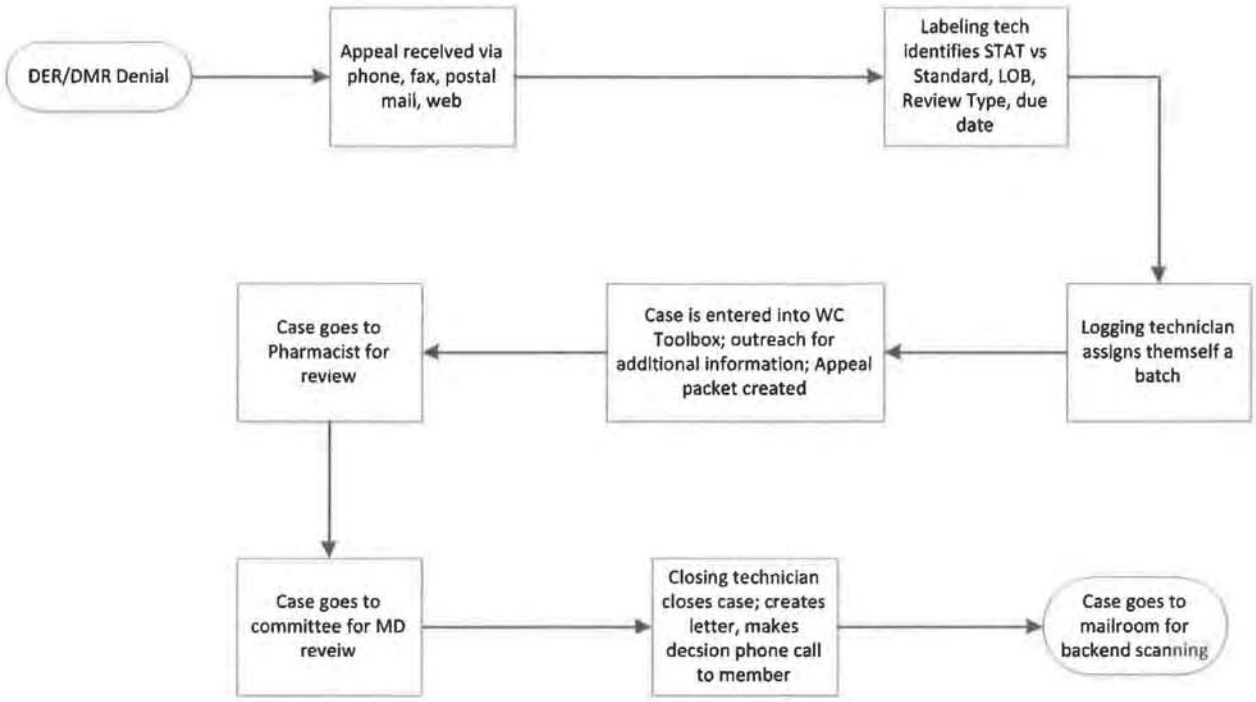
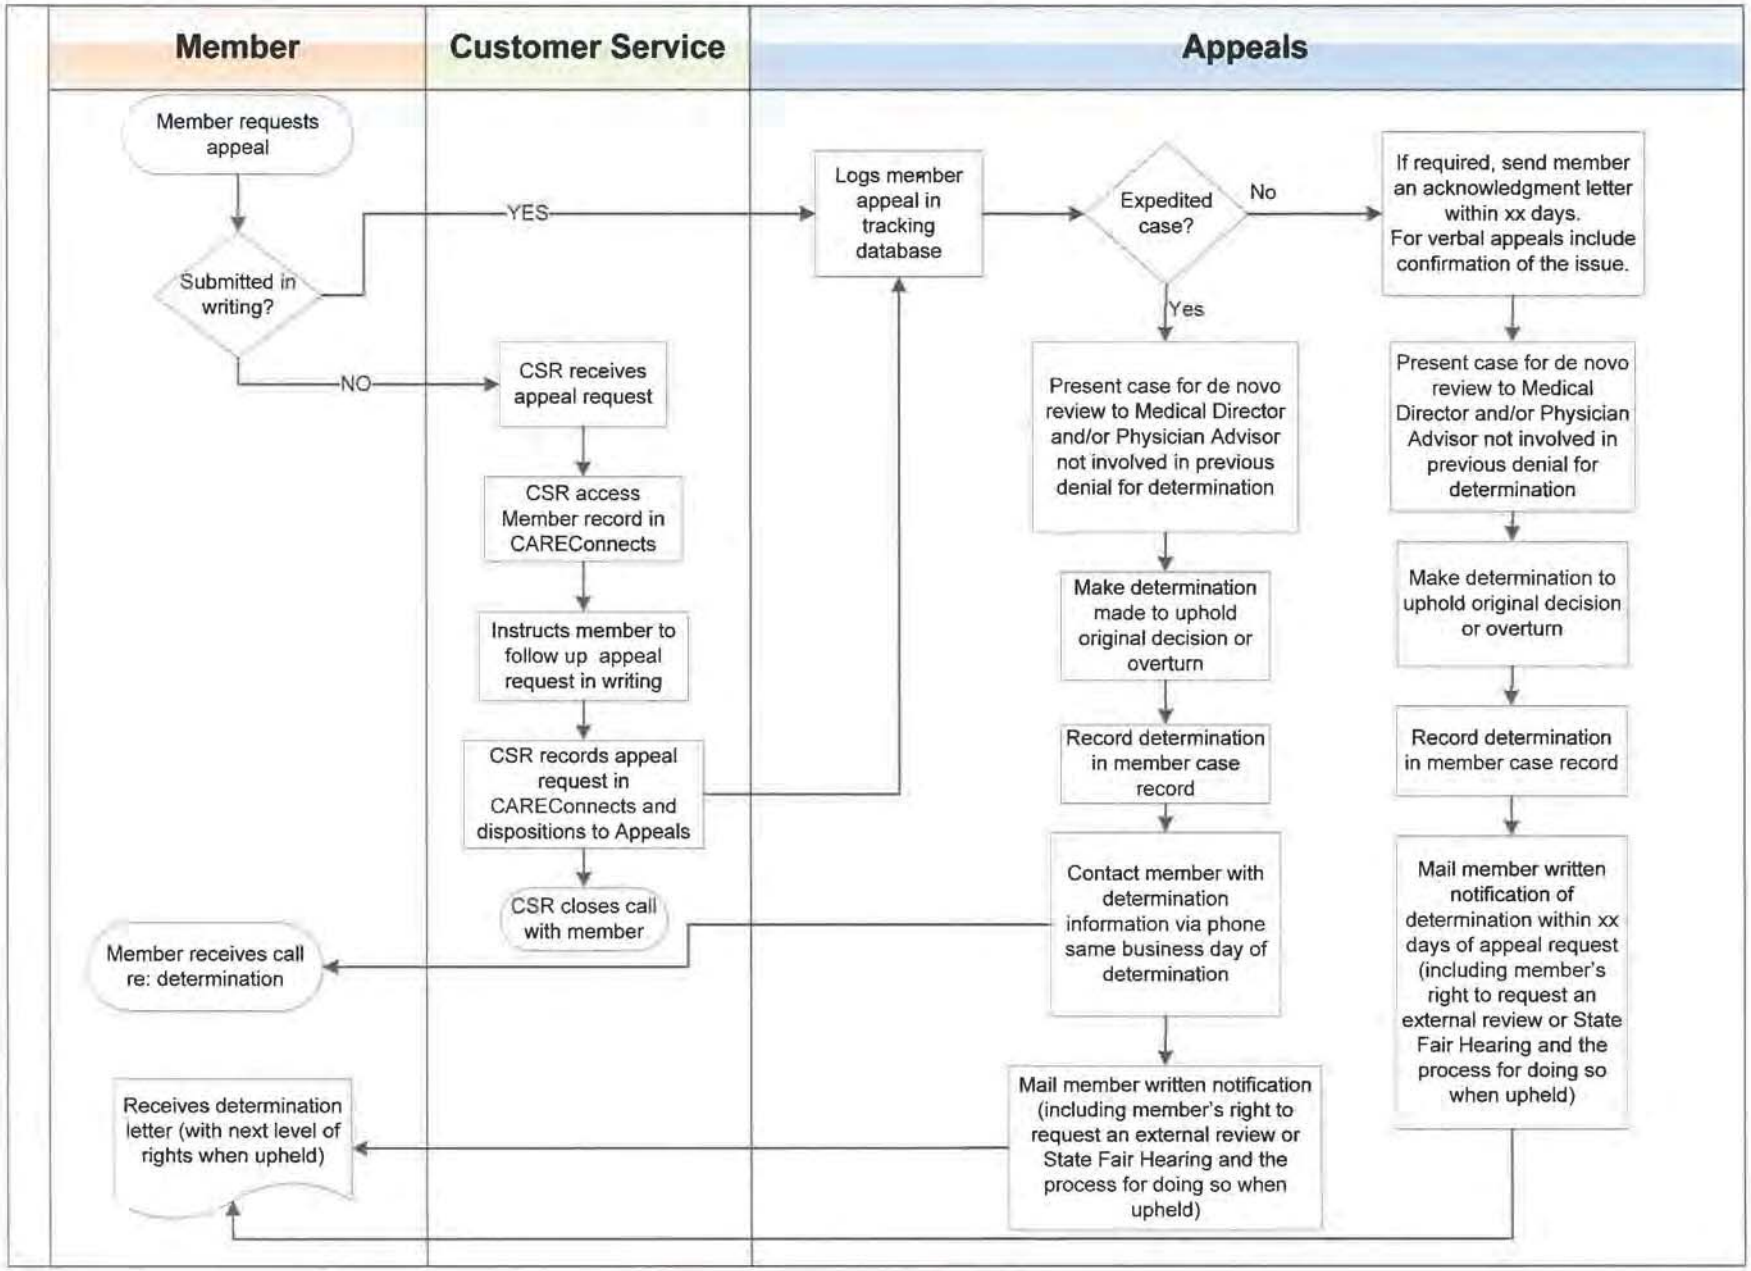
Attachment 36b_Pharmacy Appeals Process Flow



MEMBER CLINICAL APPEALS FLOW CHART



SECTION IV.H GRIEVANCES AND APPEALS

37. Describe the approach the MCO will take to provide members with grievance, appeal, and State fair hearing information. Address how the MCO will ensure the grievance and appeals system policies and procedures, and all notices, will be available in the member's primary language and that reasonable assistance will be given to members to file a grievance or appeal. *(Page limit 2 pages)*

WELLCARE'S APPROACH TO HELPING MEMBERS UNDERSTAND AND EXERCISE THEIR GRIEVANCE, APPEAL, AND STATE FAIR HEARING RIGHTS

Having focused on members who receive health care coverage through government programs for more than 20 years, WellCare knows that effective communication requires a multi-faceted approach tailored to the unique needs of the diverse populations we serve. After meeting with individuals in both the family and aged, blind and disabled programs in Nebraska, it became clear to us that traditional communication methods alone will not be sufficient. For example, one individual with whom we met, a Native American, dually-eligible for Medicare and Medicaid, told us that she had been denied access to a provider because she could not afford the $50 they wanted to collect from her as a "co-pay." When we asked if she knew she could call her Medicaid or Medicare plan to file a complaint, she said she had "no idea". While she received member materials, they were too daunting to read so she had not read them.

Our Strategies Feature Best Practices Tailored to Meet the Needs of Nebraskans

Because of experiences like this one, WellCare will seek to partner with stakeholders in Nebraska to develop the right communication strategies for Nebraskans. Strategies we have successfully used include:

- Adding specific and simple language as part of a keepsake item, such as a magnet, in a welcome packet that lets members know they can easily file a grievance or appeal
- Leveraging our large network of social service agencies and partners (as identified in our proprietary Navigator Database of social safety net programs and all of the databases within the CommUnity Command Center) to spread critical coverage information, including information on how to file a grievance or appeal
- Partnering with providers to help members navigate the processes, particularly for appeals where providers can advocate on behalf of the member

Additionally, we will use standard managed care approaches to inform members of appeal and grievance rights and procedures including posting detailed information online, including detailed information in the member handbook, and featuring information in our quarterly member newsletters. Among the important information we will feature in the handbook will be information about grievances, appeals and State fair hearings, as described in 42 CFR 438.400-424 and section IV. F. 5. F. xxvii of the RFP. These approaches will be tailored to meet the cultural, linguistic and socioeconomic needs of our members.

Making it Easy for Members to Exercise Their Rights

Our grievance and appeals submission processes are designed to make it easy for members to initiate grievances and appeals. We offer members the opportunity to submit a grievance or request for appeal through our website in addition to the standard submission channels of postal mail, fax, and telephone.

In addition to our main office in Lincoln, WellCare will also have Welcome Centers in Omaha, Kearney, Scottsbluff, and Norfolk. These offices will be staffed by a team of specialists who will provide local access to service and support, including assistance with grievances and appeals, for our members, providers and community partners. In addition to providing general information about and assistance with grievances and appeals, these associates will be able to receive members' grievances and appeals for those who prefer to discuss their concerns face-to-face or choose to hand-deliver their written request to WellCare. All associates who may interact with Nebraska members will be trained on recognizing a

grievance and assisting members with initiating the process. Our member services associates are trained and have job aids to guide them in informing members about their rights and the policies and processes related to grievances, appeals (including expedited appeals), and State fair hearings, including the member's exhausting internal appeal methods prior to appealing to the State.

WellCare also includes information about members' rights to file a grievance, request an appeal, and request a State fair hearing in the initial notice of adverse action, notice of appeal decision, and grievance closure letters. These communications include simple, easy-to-understand instructions for how to do so.

We also communicate with providers about member grievance and appeal rights so they are knowledgeable about the process and can assist members accordingly. This includes important information about the member's right to request continuation of benefits during an appeal or State fair hearing filing and, if the action is upheld in a hearing, that the member may be liable for the cost of any continued benefits received while the appeal was pending. This information is communicated with providers in the provider manual, through our quarterly provider newsletter, and our provider portal as well as in the notice of action and notice of appeal decision letters.

Communicating with associations and groups of providers is an additional component of this process. We will disseminate our grievance and appeals process through groups like the Nebraska Health Care Association, Nebraska Association of Behavioral Health Organizations, Nebraska Medical Association, Nebraska Hospital Association, 638 Tribal Clinics/Indian Health and the Health Center Association of Nebraska. We have already begun a dialogue with these groups and will leverage our relationship with them to help inform how we best communicate with individual providers around grievances and appeals.

Helping When A Member's Primary Language Is Not English or They Have Visual Impairments

WellCare has extensive experience serving members whose primary language is not English or who have visual impairments. We currently communicate with Medicaid members throughout the country in our affiliate plans in a variety languages and formats including Spanish, Chinese, Russian, Korean, Vietnamese, Tagalog, large print, Braille, and audio. For Nebraska members, we will make the member handbook available in Spanish and alternative formats (i.e., audio). Our website is standardly available in Spanish and is compliant with Section 508 of the Rehabilitation Act of 1973, as amended, ensuring access for members who are visually impaired. In addition, all English grievance and appeal correspondence, including our acknowledgement letters and closure letters, prominently feature information about how to request the correspondence in other languages or formats. Member services associates help members with verbal translation if urgent. Otherwise, our member service and local staff can request the correspondence be translated at no cost to the member and mailed to the member in his/her language or format of choice. In instances where we know in advance that the member needs an alternative language, such as Spanish, we proactively translate the correspondence and mail it to the member.

WellCare's Special Handling to Assist Members in Filing Grievances and Appeals

We encourage members and their families to be actively involved in the grievance and appeal process. Our acknowledgement letters advise members that they may present evidence and allegations of fact or law in person as well as in writing. Additionally, we make accommodations to assist members who may have impaired hearing, impaired vision, or speak a language other than English with filing an appeal or grievance (i.e., completing forms, taking procedural steps). This includes, but is not limited to, providing interpreter services at no cost to the member and toll-free numbers that have adequate TTD and interpreter capability. Members are also instructed of their right to examine the case file, including medical records and any other material to be considered, at any time before and during the process. Our member service, appeals, and grievance associates provide members with individualized support to help them navigate the grievance and appeal process.

IV.I Provider Network Requirements

SECTION IV.I PROVIDER NETWORK REQUIREMENTS

38. Describe the MCO's proposed provider network outreach approach and recruitment strategy. Provide a detailed work plan for developing an adequate network within the timeframe described in Section IV.I.

Describe the method the MCO plans to use on an ongoing basis to assess and ensure that MLTC's network standards are maintained, including standards related to:

- Distance.
- Appointment access.
- Cultural competency.
- After-hours access.
- Inclusion of PCPs.
- Inclusion of behavioral health providers.
- Inclusion of high volume specialists.
- Inclusion of FQHCs and RHCs.
- Inclusion of urgent care centers.
- Inclusion of pharmacies.
- Inclusion of hospitals.

(Page limit 6 pages, excluding plan for developing an adequate network)

BUILDING A HIGH QUALITY PROVIDER NETWORK: WELLCARE'S OVERVIEW AND EXPERIENCE

WellCare embraces the fundamental imperative that ease of access to integrated high quality health care services is crucial to member health, wellness and satisfaction. We have extensive experience in the development and management of diverse and comprehensive provider networks. Our current networks deliver services to 3.8 million Medicaid, Medicare Advantage and Medicare Part D members through more than 170,000 contracted health care providers and 70,000 contracted pharmacies. This broad experience, built through our network development approach and policies, will ensure that covered services are available to Heritage Health members from a comprehensive network of providers.

In recognition of the impact of social determinates on a member's health and wellness, WellCare thinks of providers broadly to include social services. As part of our community engagement strategy we develop and maintain a state-specific inventory of community providers and programs which we call our social service network. For Nebraska, we have identified more than 5,000 local and national organizations to augment our existing catalog of 110,000 partners in all 50 states.

PROVIDER NETWORK OUTREACH APPROACH AND RECRUITMENT STRATEGY

Our recruitment strategy focuses on the development of a broad-based, integrated network that is well positioned to deliver the full array of covered benefits and services to our members including children in foster care and members with special health care needs. As part of our network development strategy we recognize the need to enhance access to behavioral health services by building a stronger behavioral health network than currently exists in Nebraska. We will also build on the ground-breaking efforts Nebraska has undertaken to adopt patient-centered medical homes and the current pilots for integration to support the rise of behavioral health homes (also referred to as integrated health homes).

In developing our network, we first and foremost understand that the delivery of health care is local. As demonstrated by our Nebraska provider engagement activity to date (described below), we will frequently communicate with and listen to the provider community as we build our Nebraska network. We have found that there is no better teacher about local health care delivery than the provider community itself.

We employ a five-phase approach to network development and management, moving from early analysis of the market and membership needs to targeted recruitment, contracting, training and retention activities,

as detailed in our network development plan. See **Figure 1** for our network development and contracting continuum.

Figure 1

WellCare recruitment resources and tools will be located in the Nebraska marketplace. We will deploy a large team of local resources to support face-to-face encounters with institutions, physicians and other providers. These resources are supplemented by our national network development team which includes specialists in institutional, group practice, and ancillary contracting and legal experts in contract development. Our pharmacy benefit manager (PBM) also brings experienced staff to the network development process. Our network recruitment center will be staffed by a team of contract specialists who actively collect executed contracts, process mailings, answer inbound calls, make outbound follow up calls, and assist providers with all aspects of contracting and credentialing.

Track Record of Building Networks in Other States

WellCare has extensive experience in the development of broad, integrated high-performing provider networks in both long and shorter-term implementation windows. Our fundamental operating principles are based on effective, trust-based relationships, so whenever we initiate development of a new provider network, we first begin with relationship development. From there, we are well-positioned to begin more active contract negotiations.

For example, upon being awarded a contract for Kentucky's Medicaid managed care program in late April 2011, we had roughly 90 days to build a fully accessible provider network in time for readiness review and a September 1st implementation. Because our Kentucky leadership had for several months been actively engaged in relationship building with key health systems across the Commonwealth, we were prepared to address and resolve any barriers to contract negotiation right away. Our success in launching a strong provider network in Kentucky contributed to a significant surge in member choice rates in the first quarter of 2011, continuing through 2012.

Nebraska Provider Engagement

For more than a year, we have deployed WellCare leaders to meet with key stakeholders across Nebraska to gain an understanding of issues related to the delivery of health care in Nebraska, including meetings with Nebraska Hospital Association, Nebraska Medical Association, Leading Age Nebraska, Nebraska Health Care Association, Nebraska Association of Behavioral Health Organizations Nebraska

Pharmacists Association, Health Center Association of Nebraska, Children and Family Coalition of Nebraska, Southeast Regional Provider Association ACO and tribal clinic/Indian Health Services representatives. We researched patterns of care and current gaps in care and built relationships with key providers and advocacy groups. We gathered input from the provider community on partnerships and also conducted blinded focus groups with members from many different populations including individuals with disabilities and their caregivers, children in the foster care system and children who have aged out, and low income families. We will build on this knowledge of the Nebraska delivery system as we develop our Nebraska network. The feedback we received accomplished multiple goals including:

- Helping guide the WellCare care model to best utilize existing innovation within the state
- Defining current gaps and challenges for providers that WellCare can focus on solving at launch
- Creating communication channels with providers to help maximize their success during the transition
- Establishing a network of social support organizations

Network Development Plan and Provider Contract Template

Our plan to develop an adequate provider network is in **Attachment 38a_Network Development Plan.** Our provider contract template is in **Attachment 38b_Provider Contract Template.**

METHODS TO ASSESS AND ENSURE NETWORK STANDARDS ARE MET

WellCare will provide available, accessible and adequate numbers of high-performing providers for the provision of covered services. Our goal is to meet and exceed the appointment availability and geographic access in Attachment 39 as well as Section IV.I requirements. In establishing and maintaining our provider networks, we consider the anticipated enrollment, expected utilization of services, the numbers and types of providers required to furnish services, the numbers of providers who are not accepting new patients, the geographic location of providers and members, and the services necessary to support our members with special health care needs. See **Figure 2** for a summary of our network development standards.

Figure 2

WELLCARE NEBRASKA NETWORK DEVELOPMENT APPOINTMENT AVAILABILITY ACCESS STANDARDS	
Provider Type	**Standard**
Emergency Services	Available immediately upon presentation 24/7. Emergent behavioral health needs referred within one hour or two hours in designated rural areas
Urgent care	Same day by PCP or as arranged by MCO
Non-urgent, sick care	Within 72 hours or sooner if the member's medical condition deteriorates
Family planning	Within 7 calendar days
Non-urgent, preventive	Within 4 weeks
PCPs	1 physician practice, office hours of at least 20 hours a week 2 or more physician practice, office hours of at least 30 hours a week
High volume specialists*	Routine: 30 calendar days of referral
Other specialists	Consultation available within 1 month of referral or as clinically indicated
Laboratory and x-ray	Routine: 3 weeks; Urgent: 48 hours (or as clinically indicated)
Maternity care	1st trimester: 14 calendar days; 2nd trimester: 7 calendar days; 3rd trimester: 3 calendar days; High-risk: 3 calendar days of identification

WellCare Nebraska Network Development Geographic Access Standards	
Provider Type	**Standard**
PCPs	2 PCPs in 30 miles urban; 1 PCP in 45 miles rural; 1 PCP in 60 miles frontier PCPs include physicians specializing in general practice, family practice, internal medicine, pediatrics or obstetrics/gynecology (OB/GYN); advanced practice nurses and physician assistants when practicing within the scope of their license
Behavioral health inpatient and residential	Rural and frontier: Sufficient locations to allow members to travel and return home within a single day or alternative plans for accessing comparable levels of care if no inpatient available within that standard
Behavioral health outpatient	Urban: Adequate choice with 30 miles Rural: Minimum of 2 providers within 45 miles Frontier: Minimum of 2 providers within 60 miles Rural and Frontier: Use of telehealth if no providers in county
High volume specialists*	1 provider within 90 miles
Federally qualified health centers (FQHCs) and rural health clinics (RHCs)	Contract with all FQHCs and RHCs in Nebraska Notify Division of Medicaid and Long-Term Care (MLTC) if contract cannot be reached
Urgent care centers	Good faith effort to contract with urgent care centers in Nebraska Maximize availability of urgent care services to members, maintain documentation
Pharmacists	Urban: 1 retail pharmacy within 5 miles of 90% of members Rural: 1 retail pharmacy within 15 miles of 70% of members Frontier: 1 retail pharmacy within 60 miles of 70% of members
Hospitals	Contract with a sufficient number of hospitals to ensure that transport time will not exceed 30 minutes, except in rural areas where access time may be greater Critical access hospitals as defined by Attachment 16, other Nebraska and contiguous hospitals
Indian Health Services/Tribal 638/Urban Indian Health (I/T/U)	Extend contracts to all Sufficient number to ensure timely access to services for American Indian members
Contiguous states	Extend contracts to providers in contiguous states to address local referral patterns
**Includes cardiology, neurology, hematology/oncology, OB/GYNs and orthopedics specialties*	

Geographic Distance

We monitor geographical access between members and our provider network on a monthly, quarterly and ad hoc basis using Optum GeoAccess® GeoNetworks® software. Ongoing monitoring and trending of providers' member panel capacity is also analyzed. GeoAccess software is the industry standard to analyze and monitor potential provider network gaps. A large provider group or high volume specialist type or facility leaving our network or an anticipated change in population or covered services may trigger an ad hoc GeoAccess analysis.

GeoAccess software allows us to comprehensively monitor our network to maintain and exceed time and distance standards. Examples of reports produced for monitoring network adequacy include:

- **GeoAccess Reports**: Displays network adequacy by region, county and provider specialty type including detailed listing by specialty combination showing number of members to total number of providers. These reports will be run quarterly or on an ad-hoc basis

- **Exception History Log (EHL):** Records network gaps, current patterns of care and a narrative justification with steps to remedy for each network deficiency identified in GeoAccess
- **Compliance and Expansion Maps:** Real-time statistical analysis software maps that allow network management users to assess provider gaps and drill-down to investigate identified deficiencies
- **Access Compliance Snapshot:** A drillable GeoAccess dashboard report of the provider network specialties by county, run monthly. Each report is validated and then analyzed for network trends
- **Zip Code Analysis for Members without Access:** An analysis of members without access to specific specialties at the zip code level

To ensure specialist access, we regularly perform analysis of high volume specialists accepting new and existing members to determine if we meet the required distance and drive time access standards. High volume specialists will include those specialties identified in Attachment 39 as well as those identified annually through claims utilization data. The specialty types will be chosen based on the highest claim count within an annual reporting period. Our specialist analysis affords the opportunity to develop targeted recruitment opportunities to ensure necessary provider specialties are accessible to the members we serve. This analysis looks at the remaining providers of the same specialty type(s) to ensure that no access gaps have been created.

Monitoring Appointment Access

We monitor the timeliness of appointment access within our network through a variety of tools including appointment accessibility surveys, member grievances and provider complaints, member services and member engagement associates, member and provider satisfaction surveys, closed panel reports, out of network provider data, provider efficiency reports, and HEDIS results. We require all providers offer hours of operation that are no less than those offered to commercial or fee-for-service patients.

- **Appointment Accessibility Surveys:** We conduct quarterly telephone surveys to assess appointment availability, appointment wait time, and after-hours coverage. We re-audit any providers who fall short of standards and follow up with a corrective action plan as needed.
- **Member Grievances and Provider Complaints:** We review member grievances as well as provider complaints to monitor access to care. Our member services representatives review, log, and categorize grievances and complaints by cause, disposition and type for review and follow-up.
- **Member Services and Care Managers:** These associates work directly with members to monitor access and availability and assure members receive services in a timely manner. Our associates make outbound calls to members with identified care gaps to set provider appointments and close care gaps. They also help our members who are having difficulty obtaining services in a timely manner.
- **Member and Provider Satisfaction Surveys:** Our annual surveys include key questions about the quality and adequacy of our provider network. We review the results of the survey to identify areas of opportunities for additional contracting as well as service improvements.
- **Closed Panel Reports:** Monthly closed panel reports are reviewed to identify providers who recently closed panels. Outreach is made to each provider in an attempt to have them re-open their panel. Closed panel percentages are reviewed by specialty to determine if additional providers are needed.
- **Out-of-Network Paid Claims:** We monitor out-of-network paid claim reports to identify providers that are currently not contracted with WellCare and target recruitment activities.

Using Local Community Knowledge to Continuously Fill Network Gaps

Our provider services representatives, care managers, clinical practice advisors, and member outreach associates are in the field daily working with members, families, providers and community-based organizations who are a valuable source of feedback concerning needs and opportunities to improve our members' access to covered services. Our provider services associates also meet regularly with providers in their region and initiate recruitment activities when they hear of a new provider moving to the area or

when a network provider contacts them about an out of network referral.

Promoting Cultural Competency Standards

We applaud Nebraska's efforts to promote the delivery of services in manner that is respectful of culture, language and heritage, and WellCare's proven experience with a broad array of diverse populations will add significant value to these efforts. We recognize that Nebraska has very specific regional needs and we will constantly strive to meet those needs by recruiting providers that can meet linguistic, cultural and social needs. While Latinos constitute 9.9 percent of the state's total population, according to the U.S, Bureau of the Census, a significantly higher penetration exists in some counties such as Colfax, Dakota, Dawson and Hall.

Cultural Sensitivity

Our Hawaii Medicaid plan included a native Hawaiian healer in a member's service plan because the member did not fully trust Western medicine.

We currently administer Medicaid programs in Florida, New York and Hawaii, three of the most culturally diverse states of the country. We will draw on that broad experience as we build our plan to deliver Nebraska services in a culturally competent manner. Our cultural competence strategy includes:

- Recruitment of a diverse array of providers
- Cultural competency training as part of the provider onboarding process and annual cultural competency training for all WellCare associates
- A yearly "cultural needs" assessment to assess performance, identify opportunities for improvement and actions to improve
- Monitoring physical access, accommodations, and accessible equipment for our members with physical, developmental, or mental disabilities
- Providing onsite sign language and oral interpretation service in provider offices at no charge to the provider or the member

When a specific cultural need is identified our provider services team will implement targeted recruitment of providers speaking that language or representing that culture in the geographic region.

Monitoring After-Hours Access Standards

PCPs are required to maintain 24-hour on-call coverage in accordance with WellCare standards. We will also offer non-emergent after-hours services through a network of urgent care centers and our 24/7 nurse line. Our patient-centered medical home (PCMH) standards include the provision for on-call access 24/7 and extended hours. Urgent care will be available the same day by the PCP or through other network providers such as urgent care centers.

Inclusion of Various Provider Types

As detailed in our network development standards above and the attached network development plan, WellCare will recruit a broad range of provider types including PCPs, behavioral health providers, specialists and high volume specialists, FQHCs, RHCs, Indian Health Service/Tribal 838 Clinics/Urban Indian (U/T/I) providers, urgent care centers, pharmacies, and hospitals. We will extend offers to contract to providers currently providing physical, behavioral health and pharmacy service to Nebraska Medicaid members and we will comply with all requirements of Section IV.I of this Request for Proposal (RFP) as we recruit providers. We will measure our network against our network development plan and standards which include geographic and appointment access, cultural competency and after-hour access. We currently offer Medicare Part D in Nebraska and have a pharmacy network of 489 pharmacies. This includes chains such as Wal-Mart, Walgreens, Hy-Vee, Shopko and CVS as well as many independent chains and independent community pharmacies. Any willing pharmacy that will accept the terms and conditions of the contract and meet credentialing requirements is eligible to be in the network.

WellCare
Health Plans

WellCare of Nebraska Network Development Plan

SECTION 1: GOALS AND STRATEGY OF NETWORK DEVELOPMENT

WellCare's extensive experience with the development of high-performing provider networks for government-sponsored healthcare programs provides us with the needed background and understanding of the specific health, geographic, cultural needs and preferences of the Nebraska Medicaid population that we will serve. Our network development and engagement strategy makes covered services available to the members of the Heritage Health program, through a committed network of primary care providers (PCPs), specialists, hospitals, Indian health services/tribal 638/urban Indian health (I/T/U) providers, urgent care facilities, federally qualified health centers (FQHCs), rural health clinics (RHCs), public health facilities, allied health care professionals, ancillary providers, behavioral health providers, and pharmacies.

The goal and approach of our network development strategy is to meet our members' needs by partnering with a diverse network of providers that represent a range of specialties and services and bring the most value to our members within each geographic region.

For over a year we have deployed WellCare leaders to meet with key stakeholders across Nebraska, laying the groundwork to prepare for network development in all areas of the state. We have met with hospitals, physicians, behavioral health specialists and social safety net providers. We have also focused on engaging with FQHCs, RHCs, and the state's medical, hospital, and health care associations because safety providers and the affiliations that currently exist are critical to building a comprehensive system of care to address Nebraska's needs. Our association meetings included meetings with Nebraska Hospital Association, Nebraska Medical Association, Leading Edge Nebraska, Nebraska Health Care Association, Nebraska Pharmacists Association, Health Care Association of Nebraska, Children and Family Coalition of Nebraska, Southeast Regional Provider Association ACO and tribal representatives. These efforts ensure that WellCare is prepared to fully execute our network development strategy to meet the state's expectations and do so by meeting the specific needs and challenges of local areas in Nebraska through the information gathered and relationships WellCare has built. WellCare is fully prepared to begin executing on our network development plan upon contract award.

As an example of our track record in building effective provider networks, upon being awarded a contract for Kentucky's Medicaid managed care program in late April 2011, we were required to build a fully accessible provider network in roughly ninety days in preparation for readiness review and a September 2011 implementation. Because WellCare had been actively engaged in building relationships with key providers and health systems for several months prior to being awarded the contract, as we have done in Nebraska, we were prepared to effectively execute on our network development strategy. Our success in launching a strong provider network in Kentucky contributed to supporting the state achieve its goal of implementing its program on schedule while ensuring that members received adequate access to services.

SECTION 2: Development of Network

WellCare of Nebraska understands the network requirements of the Heritage Health program contract. WellCare has combined the requirements with the expected membership and conducted geo-analytics to determine the network targets. In developing our networks we apply the necessary resources to actively recruit and maintain a network that offers our members a broad array of high-performing providers who deliver the scope of preventive, primary and specialty services, along with behavioral, pharmacy, and social services and supports. Our fundamental network development strategy is to:

- Determine expected enrollment
- Accurately determine precise network requirements to meet time, distance and appointment availability standards

- Target providers critical to meeting those standards and providing a comprehensive scope of services
- Expand our core network to encompass as many qualified participants as possible allowing both member choice and increased access to care

We employ a five-phase approach to network development and management, moving from early analysis of the market and membership needs to targeted recruitment, contracting, training and retention activities as described our network development and contracting continuum.

Our expected member enrollment is outlined in the table below.

Rating Region 1 (East)	Rating Region 2 (West)	Total
58,325	17,834	76,159

By segmenting the marketplace, adding the required time and distance standards and the required and essential providers, then layering the expected utilization, a targeted list of providers was created for our network. The targets are as follows:

- Providers currently providing physical, behavioral health and pharmacy services to Nebraska Medicaid members will be extended offers to contract
- Two largest hospital systems in Nebraska along with critical access hospitals, as described in Attachment 16
- Three largest provider groups collectively with over 1000 physicians, 150 large provider groups and small and individual providers throughout the state
- Independent urgent care centers
- FQHCs and RHCs throughout the state
- The complete Magellan behavioral health network
- Major behavior health facilities across the state
- Advanced practice nurses and physician assistants throughout the state
- Any willing pharmacy that accepts the terms and conditions of the contract
- All I/T/U providers
- WellCare national ancillary targets such as vision providers
- Providers in contiguous states to address specialty shortages and local referral patterns

Execution of the Strategy and Tactics

WellCare recruitment resources and tools will be located in the Nebraska marketplace. WellCare will deploy a large team of local resources to support face-to-face encounters with institutions, physicians and other providers. These resources will be supplemented by our national network development team which includes specialists in institutional, group practice, and ancillary contracting and legal experts in contract development. Our pharmacy benefit manager (PBM) also brings experienced staff to the network development process. Our network recruitment center will be staffed by a team of contract specialists who actively collect executed contracts, process mailings, answer inbound calls, make outbound follow up calls, gather and record required documentation, and assist providers with all aspects of contracting and credentialing.

We review and monitor daily and weekly target reports to determine the completion of the network and to identify necessary network adjustments.

WellCare Health Plans

Key Network Development Plan Activities & Milestones

WELLCARE OF NEBRASKA NETWORK DEVELOPMENT PLAN	
Month	**Goals and Tasks**
August 2015	➢ Research current delivery systems ➢ Identify key provider types for eligible populations ➢ Initiate relationships with key systems
November 2015	➢ Research patterns of care and current gap analysis; what populations are underserved and why? ➢ Build out relationships with key providers, professional societies and advocacy groups ➢ Initiate development of provider list based on specialty types and network access parameters
December 2015	➢ Develop Letter of Intent for interim use, if appropriate ➢ Conduct analysis of competitor networks and waiver provider network ➢ Analyze state fee-for-service file ➢ Obtain advocate feedback ➢ Review providers that have initiated a request to participate in the network ➢ Further develop provider list, identifying PCPs, behavioral health providers, specialists, FQHCs, RHCs, urgent care centers, laboratories, pharmacies, I/T/U providers, hospitals and other provider types for recruitment ➢ Preparation work on contract templates for PCP, specialty, ancillary and provider agreements ➢ Professional society visits, gather input from provider community on transformative partnerships. What has not worked and why
February 2016	➢ Provider Mailing #1: Distribute corporate overview to key health systems and provider groups ➢ Establish web and telephonic methods for provider questions and answers on network participation ➢ Develop network access strategies for rural/frontier/underserved areas. Examples might include telehealth, mobile delivery, clinic incentives, etc. ➢ Build out range of reimbursement options for fee for service, shared savings and value-based purchasing
March 2016	➢ Ancillary contract negotiation underway with national vendors (vision, 24/7 nurse line) ➢ Provider Mailing #2: Offer to contract letter to all providers on current list, including instructions on how to request a contract ➢ Create and secure approval for a workflow flyer to accompany all provider contracts, demonstrating the steps for provider credentialing and configuration ➢ Create email inbox for provider contract requests and/or questions and answers, establish frequently asked question workflow and publication method
April 2016	Initiate negotiations/redlines with key hospitals, facilities, IPAs and complex providers Inventory management established for incoming provider contracts, including data integrity audit Provider Mailing #3: Filter mailing list against in-house inventory, then drop PCP/specialist contracts via USPS Round One: Regional Provider Information Summits –Informational and open question and answer (Q&A) forums for all Nebraska and border-state providers
May 2016	➢ Post Nebraska Provider Q&A link on WellCare of Nebraska home page ➢ Filter mailing list against in-house inventory, then drop PCP/specialist contracts via USPS

	➢ Ground game: Initiate outbound call campaign to schedule network development visits and promote Q&A interface ➢ Round Two: Regional Provider Information Summits – Informational and open Q&A forums for all Nebraska and border-state providers
June 2016	➢ M-W-F Checkpoints: Weekly gap analysis review each Monday morning, with Wednesday p.m. and Friday p.m. progress reports ➢ All inbound contracts and credentialing applications audited for complete information (signatures, W9, etc.) before provider load form (PLF) created ➢ PLF exceptions for missing/inaccurate information under a 72-hour turnaround. Flat file load template disseminated as appropriate ➢ County-by-county blitz visits to non-respondents, daily debrief and determination of barriers and remediation strategies
September 2016	➢ Access-compliant network contracts in house and in credentialing/configuration workflow for directory production and January 1, 2017 implementation. ➢ Submit our provider network to MLTC at least 90 calendar days prior to contract start date.
October 2016	➢ Submit documentation to MLTC 45 days prior to implementation on any services or provider types that do not meet MLTC standards due to lack of providers in the area.

In developing our network we will

- Offer female members direct access to a woman's health specialist for routine and preventive care
- Offer direct access to specialists in special situations including members who meet special health care needs criteria
- Ensure a provider network that includes sufficient numbers of providers with experience and expertise in:
  - Co-occurring mental health and substance use disorders/developmental disabilities
  - Serious and persistent mental illness
  - Severe emotional disturbance among children and adolescents
  - Sex-offending behaviors, eating disorders, co-occurring serious mental illness, and common chronic physical illness
- Contract with providers who demonstrate a commitment to the behavioral health principles of care defined in the Request for Proposal (RFP) Section IV.L, Care Management, including rehabilitation and recovery and focus on recovery-oriented, trauma informed services and trauma-specific treatment programs
- Cooperate with the Department of Health and Human Services Division of Behavioral Health and state behavioral health regions as we establish our network

SECTION 3: Ongoing Network Management – Including network adequacy, identifying and resolving barriers and network gaps

Once the initial network is completed, assessing the adequacy of our provider network is a continuous process. The staff uses numerous tools and data sets to identify potential gaps and the need for expansion activities. Our ongoing activities allow us to identify opportunities as they arise to proactively respond with enhancement strategies. A key element to our overall Network Development Plan is the ongoing management and assessment of our network of providers at a regional and county level.

The comprehensive, ongoing monitoring and development of our provider network allows us to maintain and work to exceed member satisfaction, access to care and to comply with the Heritage Health program requirements. Analysis includes:

- **GeoAccess Reports:** On a monthly basis, these reports evaluate that time and distance standards are

being adequately met at the provider level to meet the needs of members in each county. GeoAccess results are the key element reviewed at a quarterly meeting and an actionable plan results from the analysis.

- **Quality Dashboard:** On a monthly basis, we measure HEDIS results at the provider or group level. Quality trends and care gap quality improvement data is shared with providers during regularly scheduled meetings with providers, our field quality team and our provider services specialists.
- **Provider Efficiency:** On a monthly basis, we will review member cost of care with our key provider groups to identify providers with utilization levels that are outside of a normal range of bell curve utilization. We also review key statistics at a provider level, including their use of electronic funds transfer and electronic data interchange for administrative efficiency.
- **Appointment Availability:** When recruiting providers for our network, we validate that they have capacity and are able to make appointment times available to members on a timely basis. We engage a third-party vendor to conduct an annual study of appointment availability using a statistically valid sample of PCP and specialist practices. Average appointment times are evaluated to ensure that offices are in compliance with the access standards as defined in the contract.
- **Out Of Network Monitoring:** On a monthly basis, out-of-network utilization reports are reviewed by health services and the network teams.
- **Open/Closed Panels:** Primary care closed panels are measured and reported to provider services.

Our network development standards are detailed in the table below.

WELLCARE NEBRASKA NETWORK DEVELOPMENT APPOINTMENT AVAILABILITY ACCESS STANDARDS	
Provider Type	**Standard**
Emergency Services	Available immediately upon presentation 24/7. Emergent behavioral health needs referred within one hour or two hours in designated rural areas
Urgent care	Same day by PCP or as arranged by MCO
Non-urgent, sick care	Within 72 hours or sooner if the member's medical condition deteriorates
Family planning	Within 7 calendar days
Non-urgent, preventive	Within 4 weeks
PCPs	1 physician practice, office hours of at least 20 hours a week 2 or more physician practice, office hours of at least 30 hours a week
High volume specialists*	Routine: 30 calendar days of referral
Other specialists	Consultation available within 1 month of referral or as clinically indicated
Laboratory and x-ray	Routine: 3 weeks Urgent: 48 hours (or as clinically indicated)
Maternity care	1st trimester: 14 calendar days; 2nd trimester: 7 calendar days; 3rd trimester: 3 calendar days; High-risk: 3 calendar days of identification
WELLCARE NEBRASKA NETWORK DEVELOPMENT GEOGRAPHIC ACCESS STANDARDS	
Provider Type	**Standard**
PCPs	2 PCPs in 30 miles urban; 1 PCP in 45 miles rural; 1 PCP in 60 miles frontier PCPs include: - Physicians specializing in general practice, family practice, internal medicine, pediatrics

	or obstetrics/gynecology (OB/GYN) ➢ Advanced practice nurses and physician assistants when practicing within the scope and requirements of their license
Behavioral health inpatient and residential	Rural and frontier: Sufficient locations to allow members to travel and return home within a single day or alternative plans for accessing comparable levels of care if no inpatient available within that standard
Behavioral health outpatient	Urban: Adequate choice with 30 miles Rural: Minimum of 2 providers within 45 miles Frontier: Minimum of 2 providers within 60 miles Rural and Frontier: Use of telehealth if no providers in county
High volume specialists*	1 provider within 90 miles
FQHCs and RHCs	Contract with all FQHCs and RHCs in Nebraska Notify MLTC if contract cannot be reached
Urgent care centers	Good faith effort to contract with urgent care centers in Nebraska Maximize availability of urgent care services to members Maintain documentation detailing the efforts
Pharmacists	Urban: 1 retail pharmacy within 5 miles of 90% of members Rural: 1 retail pharmacy within 15 miles of 70% of members Frontier: 1 retail pharmacy within 60 miles of 70% of members
Hospitals	Contract with a sufficient number of hospitals to ensure that transport time will not exceed 30 minutes, except in rural areas where access time may be greater Critical access hospitals as defined by Attachment 16, other Nebraska and contiguous hospitals
Indian Health Services/Tribal 638/Urban Indian Health	Extend contracts to all Sufficient number to ensure timely access to services for American Indian members
Contiguous states	Extend contracts to providers in contiguous states to address local referral patterns

*Includes cardiology, neurology, hematology/oncology, OB/GYNs and orthopedics specialties

In the event that we discover that there are gaps in the network or barriers to care that require network remediation, WellCare of Nebraska employs the following solutions:

- **Leverage Provider Partnerships:** Our network development team and provider services teams encourage partner network providers to extend hours and reach to expand access during initial contracting and ongoing conversations with the network.
- **Closed Panel Management:** The providers identified with closed panels are specifically contacted by provider services to determine if they are closed panel because their practice is at full capacity and are closed to all payers, or if there is an issue with WellCare that can be resolved.
- **Telehealth:** WellCare will partner with providers, groups of providers, and the Nebraska Statewide Telehealth Network (NSTN) to extend health care resources to those in need using video technology. NSTN is a collaboration of over 110 sites, including hospitals, health departments, mental health centers, provider offices and rural health clinics. This includes clinical consultation, support groups, education and training and connectivity for administrative meetings among professionals.
- **Transportation:** Recognizing transportation as one of the biggest barriers to health care in Nebraska, we will facilitate coordination of transportation for members to improve access to care. We will use warm transfers and assist members in making appointments with the transportation vendor. In

addition, we track all referrals to non-benefited services including transportation.

- **Out-of-Network Utilization:** As needed, we will develop relationships with non-participating providers to allow us to work with them on a case-by-case basis to secure member access to the appropriate level of medically necessary care. Typically, we arrange care with out of network providers by executing single case agreements that authorize care for a specific member. In limited instances we will seek to establish a permanent non-participating agreement with high-impact providers who do not wish to contract. We will always seek to contract with any high-quality provider that has out of network utilization.

SECTION 4: Provider Training & Support

Initial and ongoing provider training and support is foundational to our network development and management plan, as well as provider retention. WellCare's provider services staff delivers training and answers provider questions related to training content. We employ a blended training delivery model that includes classroom, provider's office, web courses, & real-time interactive web meetings. The following provider training modules support compliance, improve provider performance and quality, and enhance provider satisfaction.

- How to register with our Provider Portal
- How to Request an Authorization
- How to File a Claim
- How to submit a corrected claim
- How to Submit Encounters when a service is rendered that is not tied to payment
- Understanding Explanation of Payments Documents and Files, using the Provider Portal
- Electronic Funds Transfer (EFT) and Electronic Remittance Advices for Claims Payments
- How to File an Appeal if a claim is denied , focusing on the process and timeframes
- Member Enrollment and Eligibility Verification
- Member Engagement Strategies
- Completing Health Risk Assessment and Comprehensive Assessments
- Benefits Overview
- Cultural /Linguistic/Social Needs of Members/Cultural Competency
- Heritage Health Program and Contract requirements
- EPSDT Requirements and Processes
- Identification & Reporting of Abuse, Neglect, and Exploitation of Children & Vulnerable Adults
- Education on Care Management/Disease Management/Wellness programs
- Utilization Management Criteria
- Complaints and Grievances
- Pharmacy Processes and Resources
- Health Information Exchange (HIE)/Electronic Health Record (EHR)
- HEDIS & Other Quality Goals & Tools
- Coding/Medical Records

PARTICIPATING PROVIDER AGREEMENT

THIS PARTICIPATING PROVIDER AGREEMENT ("**Agreement**") is made and entered into by and between WellCare of Nebraska, Inc. ("**Health Plan**") and [Insert Name of Contracted Provider] ("**Contracted Provider**"). Health Plan and Contracted Provider are sometimes referred to together as the "**Parties**" and individually as a "**Party**".

WHEREAS, Health Plan issues (or is pursuing a license allowing it to issue) health benefit plans and seeks to include health care providers in one or more provider networks for such plans; and

WHEREAS, Contracted Provider provides or arranges for the provision of health care items and services to the general public by health care providers employed by or subcontracted with Contracted Provider; and

WHEREAS, Health Plan and Contracted Provider desire to enter into this Agreement whereby Contracted Provider will provide or arrange for the provision of health care items and services to Health Plan's health benefit plan enrollees in exchange for payments from Health Plan, all subject to and in accordance with the terms and conditions of this Agreement;

NOW THEREFORE, the Parties agree as follows:

1. Construction.

1.1. The base part of this Agreement is designed for use with a variety of providers and Benefit Plans. Provisions specific to particular providers and Benefit Plans are included in Attachments to the Agreement.

1.2. The following rules of construction apply to this Agreement: (a) the word "**include**", "**including**" or a variant thereof shall be deemed to be without limitation; (b) the word "**or**" is not exclusive; (c) the word "**day**" means calendar day unless otherwise specified; (d) the term "**business day**" means Monday through Friday, except Federal holidays; (e) all words used in this Agreement will be construed to be of such gender or number as the circumstances require; (f) references to specific statutes, regulations, rules or forms, such as CMS 1500 and UB-04 forms, include subsequent amendments or successors to them; and (g) references to a government department or agency include any successor departments or agencies.

2. Definitions. In addition to terms defined elsewhere in this Agreement, the following capitalized terms when used in this Agreement shall have the meanings set forth below. If an identical term is defined in a Program Attachment, the definition in the Program Attachment shall control with respect to Benefit Plans governed by the Program Attachment.

2.1. "**Affiliate**" means, with respect to a particular entity, another entity that directly, or indirectly through one or more intermediaries, controls, is controlled by or is under common control with, the entity. An entity "**controls**" an entity in which it has the power to vote, directly or indirectly, 50 percent or more of the voting interests in such entity or in the case of a partnership if it is a general partner, or the power to direct or cause direction of management and policies of such entity, whether through the ownership of voting shares, by contract or otherwise.

2.2. "**Benefit Plan**" means a health benefit policy or other health benefit contract or coverage document (a) issued by Health Plan or (b) administered by Health Plan pursuant to a Government

Contract. Benefit Plans and their designs are subject to change periodically.

2.3. "**Carve Out Agreement**" means an agreement between Health Plan and a third party Participating Provider whereby the third party assumes financial responsibility for or may provide certain management services related to particular Covered Services. Examples of possible Carve Out Agreements include agreements for radiology, laboratory, dental, vision, or hearing services.

2.4. "**Clean Claim**" means a claim for Covered Services that is (i) received timely by Health Plan, (ii) is on a completed, legible CMS 1500 form or UB 04 form, or electronic equivalent, (iii) is true, complete, accurate, and includes all necessary supporting documentation, (iv) includes all relevant information necessary to comply with Laws and Program Requirements and to determine payor liability, (v) is not subject to coordination of benefits, and (vi) is not under review for Medical Necessity. A Clean Claim does not include a claim from a Provider who is under investigation for fraud or abuse.

2.5. "**Credentialing Criteria**" means Health Plan's criteria for the credentialing or re-credentialing of Providers.

2.6. "**Covered Services**" means Medically Necessary health care items and services covered under a Benefit Plan.

2.7. "**DHHS**" means the U.S. Department of Health and Human Services, including its agency the Centers for Medicare and Medicaid Services ("**CMS**") and its Office of Inspector General ("**OIG**").

2.8. "**Effective Date**" means the date this Agreement becomes effective as determined by Health Plan and set forth on the signature page of this Agreement. Federal law prohibits Health Plan from contracting with individuals or entities that are barred from participation in Federal Health Care Programs. Accordingly, the Effective Date is subject to Health Plan's completion of credentialing and determination that Contracted Provider meets the Credentialing Criteria.

2.9. "**Emergency Services**" shall be as defined in the applicable Program Attachment.

2.10. "**Encounter Data**" means encounter information, data and reports for Covered Services provided to a Member that meets the requirements for Clean Claims.

2.11. "**Federal Health Care Program**" means a Federal health care program as defined in section 1128B(f) of the Social Security Act, and includes Medicare, Medicaid, and CHIP.

2.12. "**Government Contract**" means a contract between Health Plan and a Governmental Authority or government authorized entity for Health Plan to provide health benefits coverage for Federal Health Care Program beneficiaries.

2.13. "**Governmental Authority**" means the United States of America, the States, or any department or agency thereof having jurisdiction over Health Plan, a Provider or their respective Affiliates, employees, subcontractors or agents.

2.14. "**Ineligible Person**" means an individual or entity who (a) is currently excluded, debarred, suspended or otherwise ineligible to participate in (i) Federal Health Care Programs, as may be identified in the List of Excluded Individuals/Entities maintained by the OIG, or (ii) Federal procurement or non-procurement programs, as may be identified in the System for Award Management maintained by the General Services Administration, (b) has been convicted of a criminal offense subject to OIG's

mandatory exclusion authority for Federal Health Care Programs described in section 1128(a) of the Social Security Act, but has not yet been excluded, debarred or otherwise declared ineligible to participate in such programs, or (c) is currently excluded, debarred, suspended or otherwise ineligible to participate in State medical assistance programs, including Medicaid or CHIP, or State procurement or non-procurement programs as determined by a State Governmental Authority.

2.15. "**Laws**" means any and all applicable laws, rules, regulations, statutes, orders, standards, guidance and instructions of any Governmental Authority, as adopted, amended, or issued from time to time, including (a) the Social Security Act, including Titles XVIII ("**Medicare**"), XIX ("**Medicaid**") and XXI (State Children's Health Insurance Program or "**CHIP**"), (b) the Health Insurance Portability and Accountability Act of 1996 ("**HIPAA**"), (c) Federal and State privacy laws other than HIPAA, (d) Federal and State laws regarding patients' advance directives, (e) State laws and regulations governing the business of insurance, (f) State laws and regulations governing third party administrators or utilization review agents, and (g) State laws and regulations governing the provision of health care services.

2.16. "**Medically Necessary**" or "**Medical Necessity**" shall be as defined in the applicable Program Attachment.

2.17. "**Member**" means an individual properly enrolled in a Benefit Plan and eligible to receive Covered Services at the time such services are rendered.

2.18. "**Member Expenses**" means copayments, coinsurance, deductibles, or other cost share amounts, if any, that a Member is required to pay for Covered Services under a Benefit Plan.

2.19. "**Non-Contracted Services**" means Covered Services that are (a) subject to Carve Out Agreements and not approved by Health Plan in advance as further described in this Agreement, or (b) provided by an Ineligible Person.

2.20. "**Overpayment**" means the payments a Provider receives from Health Plan or its Affiliates to which the Provider is not entitled, including payments (a) for items and services that are not Covered Services, (b) paid in error, (c) resulting from enrollment errors, (d) resulting from claims payment errors, data entry errors or incorrectly submitted claims, or (e) for claims paid when Health Plan was the secondary payor and the Provider should have been reimbursed by the primary payor. An Overpayment also includes any payment Health Plan makes to satisfy an obligation of a Provider, including refunds of improperly collected Member Expenses to a Member or reimbursement to subcontracted Providers.

2.21. "**Participating Provider**" means an individual or entity that has entered into an agreement with Health Plan or a Health Plan contractor to provide or arrange for the provision of Covered Services to Members.

2.22. "**Principal**" means a person with a direct or indirect ownership interest of five percent or more in Provider.

2.23. "**Program**" means (a) a Federal Health Care Program, or (b) a commercial insurance program, including a program created under Laws regarding commercial health insurance exchanges.

2.24. "**Program Attachment**" means an attachment to this Agreement describing the terms of a Provider's participation in Health Plan's provider network for a Program.

2.25. "**Program Requirements**" means the requirements of Governmental Authorities

governing a Provider's participation in Health Plan's provider network and rendering Covered Services to Members pursuant to a Benefit Plan, including where applicable the requirements of a Government Contract, which include those terms set forth in a Program Attachment.

2.26. "**Provider**" means (a) Contracted Provider or (b) other individual or entity that is employed, or directly or indirectly subcontracted by Contracted Provider to provide or arrange for the provision of Covered Services to Members under this Agreement.

2.27. "**Provider Manual**" means, collectively, Health Plan's provider manuals, quick reference guides, WellCare Companion Guide, and educational materials setting forth Health Plan's requirements, rules, policies and procedures applicable to Participating Providers, as adopted or amended by Health Plan from time to time. The Provider Manual is available on Health Plan's website.

2.28. "**State**" means any of the 50 United States, the District of Columbia or a U.S. territory.

2.29. "**WellCare**" means WellCare Health Plans, Inc., an Affiliate of Health Plan.

2.30. "**WellCare Companion Guide**" means the transaction guide that sets forth data requirements and electronic transaction requirements for Clean Claims and Encounter Data submitted to Health Plan or its Affiliates, as amended from time to time. The WellCare Companion Guide is part of the Provider Manual.

3. Scope.

3.1. Non-Contracted Services are outside the scope of this Agreement.

3.2. Providers may freely communicate with Members about their treatment regardless of benefit coverage limitations. Health Plan does not dictate or control clinical decisions respecting a Member's medical treatment or care. Medical care is the responsibility of the treating Provider regardless of any coverage determination by Health Plan. Nothing in this Agreement shall be interpreted to permit interference by Health Plan with communications between a Provider and a Member regarding the Member's medical condition or available treatment options.

3.3. This is not an exclusive agreement for either Party, and there is no guarantee (a) Health Plan will participate in any particular Program, or (b) any particular Benefit Plan will remain in effect.

3.4. Subject to Laws and Program Requirements, Health Plan reserves the right to create distinct provider networks for a Benefit Plan, and to determine Provider participation in such networks.

3.5. Subject to Laws and Program Requirements, Health Plan reserves the right to approve any Provider's participation under this Agreement, or to terminate or suspend any Provider from participation under this Agreement or one or more particular Benefit Plans. Health Plan is not obligated to refer or assign a minimum number of Members to or maintain a minimum number of Members with a Provider.

4. Provider Responsibilities.

4.1. Principals. Contracted Provider shall comply with requirements for disclosure of ownership and control, business transactions, and information for persons convicted of crimes against Federal Health Care Programs as described in section 1124 of the Social Security Act, 42 CFR part 420 subpart C (Program Integrity: Medicare) and 42 CFR part 455 subpart B (Program Integrity: Medicaid).

Contracted Provider represents that it has provided Health Plan with the information listed on the Attachment titled "Information for Contracted Provider / Principals" for itself and all of its Principals as of the Effective Date. Contracted Provider shall notify Health Plan of any change in the information within 30 days of such change.

4.2. Providers. Contracted Provider shall provide Health Plan with the information listed on the Attachment titled "Information for Providers" for itself and the Providers as of the Effective Date, in a form and format acceptable to Health Plan. Contracted Provider shall provide notice to Health Plan of any change in the information for itself and the Providers within 30 days of the change. When Contracted Provider terminates a Provider, other than for cause, Contracted Provider will give Health Plan at least 90 days prior written notice of the termination.

4.2.1. Employed Providers. Contracted Provider shall maintain and enforce binding internal policies and procedures or agreements with its employed Providers that are consistent with and require adherence to this Agreement. Contracted Provider shall provide Health Plan with such information requested by Health Plan, or as required by a Governmental Authority or accreditation body, necessary to verify the employment of its employed Providers.

4.2.2. Subcontracted Providers. If Contracted Provider, such as an independent practice association, physician hospital organization or physician group, uses subcontracted Providers:

(a) Contracted Provider shall maintain and enforce written agreements with its subcontracted Providers that are consistent with and require adherence to this Agreement. Upon Health Plan's request, Contracted Provider shall provide Health Plan with copies of entire agreements between itself or other Providers and the subcontracted Providers. The compensation terms in such agreements may be redacted unless required by Governmental Authorities. In no event shall an agreement between or among Providers supersede this Agreement respecting matters covered by this Agreement. Notwithstanding anything to the contrary in any such agreement, this Agreement shall control over the terms of any such agreement in all respects as to matters covered by this Agreement.

(b) Upon Health Plan's request, Contracted Provider shall provide Health Plan with a duly executed Opt In Agreement in the form set forth on the Attachment titled "Form of Opt-In Agreement" from each subcontracted Provider. Each executed Opt In Agreement shall be made a part of and incorporated into this Agreement, and Contracted Provider accepts the appointment in the Opt In Agreement to act on the subcontracted Provider's behalf. If Health Plan requests and does not receive a duly executed Opt In Agreement for a proposed subcontracted provider, Health Plan shall not approve the proposed subcontracted provider or its employed providers as Providers under this Agreement. Contracted Provider waives any non-compete provisions in its agreements with subcontracted Providers to the extent that, if enforced, would prohibit a subcontracted Provider from contracting directly with Health Plan pursuant to the Opt-In Agreement.

(c) Subcontracted Providers shall maintain and enforce binding internal policies and procedures or agreements with their employed Providers that are consistent with and require adherence to this Agreement. Subcontracted Providers shall provide Health Plan with such information requested by Health Plan, or as required by a Governmental Authority or accreditation body, necessary to verify the employment of their employed Providers.

(d) Any obligation of Contracted Provider in this Agreement shall apply to subcontracted Providers to the same extent that it applies to Contracted Provider. Contracted Provider shall require the timely and faithful performance of this Agreement by subcontracted Providers.

4.2.3. Credentialing. All Providers must meet the Credentialing Criteria. Subject to Laws and Program Requirements, (a) Health Plan conducts credentialing of providers before they begin providing Covered Services and re-credentialing from time to time thereafter as required for Health Plan's compliance with Laws, Program Requirements and accreditation standards, and Providers shall consent to and cooperate with such credentialing/re-credentialing, which may include site reviews, and (b) until successful completion of credentialing of a provider by Health Plan, (i) the provider shall not be added as a Participating Provider under this Agreement, and (ii) the provision of, and payment for, Health Plan authorized Covered Services to Members by the provider shall be subject to Health Plan's policies and procedures for non-participating providers.

4.3. Covered Services. Providers shall provide Covered Services to Members, subject to and in accordance with the terms of this Agreement.

4.3.1. Standards. Providers shall provide Covered Services in accordance with Laws and generally accepted standards of medical practice, including nationally recognized clinical protocols and guidelines where available. Providers shall ensure that Covered Services are available to Members on a 24 hour/day, 7 day/week basis, except Providers who do not provide Emergency Services shall ensure that Covered Services are available to Members in accordance with standard operating hours for each Provider location and shall maintain an after-hours phone service for individuals to seek instructions in the event of an emergency.

4.3.2. Eligibility. Except for Emergency Services, Providers shall verify Member eligibility in accordance with the Provider Manual before providing Covered Services to a Member. Health Plan provides member eligibility information through Health Plan's provider website and other means. For Emergency Services, Providers shall verify Member eligibility no later than the next business day after the Member is stabilized or the Provider learning the individual may be a Member, whichever is later. Members' eligibility status is subject to retroactive disenrollment, and Health Plan may, unless prohibited by Laws and Program Requirements, recoup payments for items or services provided to such individuals after the effective date of disenrollment even if such items and services were authorized by Health Plan.

4.3.3. Prior Authorization. Except for Emergency Services or where prior authorization is not required by the Provider Manual, Providers shall obtain prior authorization for Covered Services in accordance with the Provider Manual. Except where not permitted by Laws or Program Requirements, Health Plan may deny payment for Covered Services where a Provider fails to meet Health Plan's requirements for prior authorization.

4.3.4. Referrals. Providers shall not refer Members to other health care providers, including other Participating Providers, for Covered Services without the approval of Health Plan, except (a) in case of Emergency Services, (b) when Member self-referral is permitted by the Benefit Plan, or (c) as permitted by the Provider Manual. When making a referral to another health care provider, a Provider shall furnish the other provider complete information on treatment procedures and diagnostic tests performed prior to such referral, which may include providing copies of the medical records.

4.3.5. Non-Covered Services. Before a Provider provides items or services to a Member that are not Covered Services, Provider shall (a) inform the Member of the specific items or services that are not Covered Services and that they will not be paid for by Health Plan, and (b) obtain the Member's written agreement to pay for such specific items or services after being so advised. Provider may contact Health Plan to determine if an item or service is a Covered Service.

4.3.6. Carve Out Agreements. While a Carve Out Agreement is in effect, Covered Services subject to the Carve Out Agreement shall be Non-Contracted Services and are not within the scope of this Agreement, except for (a) Emergency Services, or (b) Covered Services authorized by Health Plan in advance in accordance with the Provider Manual, in which cases the terms and conditions of this Agreement, including compensation, shall apply. Health Plan shall notify Contracted Provider of Carve Out Agreements through the Provider Manual or other notice. Upon expiration or termination of a Carve Out Agreement, Provider shall provide the Covered Services to Members that were subject to the Carve Out Agreement, subject to and in accordance with the terms of this Agreement, including compensation.

4.4. Claims and Encounter Data / EDI.

4.4.1. Clean Claims. Providers shall electronically prepare and submit Clean Claims to Health Plan within _____ days or such other time period required by Laws or Program Requirements, of the date of a Covered Service or the date of discharge from an inpatient facility, as the case may be. Unless prohibited by Laws and Program Requirements, Health Plan may deny payment for any claims that fail to meet Health Plan's submission requirements for Clean Claims or that are received after the time limit in this Agreement for filing Clean Claims.

4.4.2. Additional Reports. If Health Plan requests additional information, data, or reports from a Provider regarding Covered Services provided to Members for risk adjustment data validation or other administrative purposes, even if Health Plan has paid claims or accepted Encounter Data related to the Covered Services, the Provider shall provide the information, data or reports as requested by Health Plan.

4.4.3. NPI Numbers / Taxonomy Codes. Payment of compensation for Covered Services is conditioned on Providers including their NPI numbers and Provider taxonomy codes on claims or encounter data submitted under this Agreement, and Health Plan may deny payment for Covered Services where a Provider fails to meet these requirements.

4.4.4. Electronic Transaction Requirements. Provider shall submit all claims and encounter data to Health Plan electronically. Providers shall (a) follow the requirements for electronic data interchange in accordance with the current HIPAA Administrative Simplification transaction standards and WellCare Companion Guide, and (b) submit all claims and encounter data either through a clearinghouse used by Health Plan or directly to Health Plan in accordance with the WellCare Companion Guide.

4.4.5. EFT / Remittance Advice. If a Provider is able to accept payments and remittance advice electronically, (a) the Provider shall register and complete the forms for electronic funds transfer and electronic remittance advice no later than 60 days following Health Plan's confirmation of Provider's status as participating, and (b) Health Plan shall make all payments and remittance advice to the Provider electronically. If a Provider is not able to accept payments and remittance advice electronically, the Provider shall make good faith efforts to be able to accept electronic funds transfer and electronic remittance within 24 months of the Effective Date.

4.4.6. Coordination of Benefits. Health Plan shall coordinate payment for Covered Services in accordance with the terms of a Member's Benefit Plan and Laws. Providers shall provide Health Plan with explanations of benefits and other documents and information in their possession regarding insurance covering a Member that is primary to the Member's Benefit Plan. Providers shall bill primary insurers for items and services they provide to a Member before they submit claims for the same

items or services to Health Plan. If Health Plan is not the primary payor for Covered Services provided to a Member, then when not prohibited by Laws or Program Requirements, Health Plan's payment to Provider for such services shall not exceed the compensation in this Agreement less amounts payable by the primary payor or payors, less Member Expenses. Unless prohibited by Laws and Program Requirements, Health Plan may recoup payments for items or services provided to a Member where other insurers are determined to be responsible for such items and services.

4.4.7. Subrogation. Providers shall cooperate and assist Health Plan with its subrogation efforts.

4.4.8. No payment made by Health Plan under this Agreement is intended as a financial incentive or inducement to reduce, limit or withhold Covered Services required by Members.

4.5. Member Protections.

4.5.1. Providers shall not discriminate in their treatment of Members based on Members' health status, source of payment, cost of treatment, participation in Benefit Plans, race, ethnicity, national origin, religion, gender, age, mental or physical disability, sexual orientation, or genetic information.

4.5.2. In no event including nonpayment by Health Plan, Health Plan's insolvency or breach of the this Agreement, shall a Provider bill, charge, collect a deposit from, seek compensation, remuneration or reimbursement from, or have any recourse against any Member or persons (other than Health Plan) acting on the Member's behalf, for amounts that are the legal obligation of Health Plan. This provision (a) shall survive termination or expiration of this Agreement regardless of the cause giving rise to termination or expiration, (b) shall be construed for the benefit of Members, (c) does not prohibit collection of Member Expenses where lawfully permitted or required, and (d) supersedes any oral or written agreement to the contrary now existing or hereafter entered into between a Provider and Members or persons acting on their behalf.

4.5.3. Regardless of any denial of a claim or reduction in payment to a Provider by Health Plan, in no event will a Member be responsible for payment for any Covered Services other than Member Expenses. However, Members shall not be responsible for Member Expenses where collection of Member Expenses is prohibited by Laws, Program Requirements, or this Agreement. If payment of an amount sought in a claim is denied or reduced by Health Plan, the Provider shall adjust Member Expenses accordingly.

4.5.4. Except where collection of Member Expenses is prohibited by Laws, Program Requirements, or this Agreement, a Provider shall (a) collect Member Expenses directly from the Member, and (b) not waive, discount or rebate any such amounts except as permitted by and in accordance with Laws and Program Requirements regarding prohibited inducements to Federal Health Care Program beneficiaries.

4.5.5. Providers shall not bill Members for any items or services, such as missed appointments or administrative fees, where such billing is prohibited by Laws or Program Requirements.

4.6. Provider Manual. The Provider Manual supplements and is made a part of and incorporated into this Agreement, and Providers shall comply with the Provider Manual. Health Plan may amend the Provider Manual from time to time upon notice to Provider by posting to Health Plan's provider website, email or other means of notice permitted by this Agreement, provided that in the case of

material revisions to the Provider Manual, Health Plan shall provide notice in accordance with the provisions of this Agreement regarding written notice. Changes to the Provider Manual shall become effective 15 days after such posting or notice, or such other time period required for Health Plan to comply with Laws, Program Requirements or accreditation standards. Providers shall have and maintain systems necessary for access to Health Plan's provider website, and check for revisions to the Provider Manual from time to time.

4.7. Quality Improvement. Providers shall comply with Health Plan's quality improvement programs, including those designed to improve quality measure outcomes in the then current Healthcare Effectiveness Data and Information Set (HEDIS) or other quality or outcome measures. Health Plan may audit Providers periodically and upon request Providers shall provide Records to Health Plan for HEDIS or other quality reasons and risk management purposes, including Records that will enable Health Plan to perform a thorough assessment of the overall care being provided to Members.

4.8. Utilization Management. Providers shall cooperate and participate in Health Plan's utilization review and case management programs. Health Plan's utilization review/case management programs may include provisions for (a) verification of eligibility and prior authorization for Covered Services, (b) concurrent and retrospective reviews, (c) requirements regarding referrals to third party Participating Providers, and (d) corrective action plans.

4.9. Member Grievances / Appeals. Providers shall comply with the Provider Manual, Laws and Program Requirements regarding Member grievances and appeals, including by providing information, records or documents requested by Health Plan and participating in the grievance/appeal process.

4.10. Compliance. In performing this Agreement, Providers shall comply with all Laws and Program Requirements. Providers shall (a) cooperate with Health Plan with respect to Health Plan's compliance with Laws and Program Requirements, including downstream requirements that are inherent to Health Plan's responsibilities under Laws or Program Requirements, and (b) not knowingly take any action contrary to Health Plan's obligations under Laws or Program Requirements.

4.10.1. Privacy / HIPAA. Providers shall maintain Member information and medical records in accordance with Laws, including Federal and State Laws related to privacy and confidentiality of Member information and medical records, including HIPAA, and shall use and disclose such information or records only in accordance with Laws and Program Requirements.

4.10.2. Fraud, Waste and Abuse. Providers shall comply with Laws designed to prevent or ameliorate fraud, waste, and abuse, including applicable provisions of Federal criminal law, the False Claims Act (31 USC §§ 3729 et. seq.), and the anti-kickback statute (section 1128B(b) of the Social Security Act).

4.10.3. Compliance Program / Reporting. OIG publishes compliance program guidance for health care firms available at http://oig.hhs.gov/fraud/complianceguidance.asp. Contracted Provider shall, and shall require its employees and its subcontractors and their employees to, comply with Health Plan compliance program requirements, including Health Plan's compliance training requirements, and to report to Health Plan any suspected fraud, waste, or abuse or criminal acts by Health Plan, Contracted Provider, other Providers, their respective employees or subcontractors, or by Members. Reports may be made anonymously through the WellCare fraud hotline at (866) 678-8355. Also, if DHHS publishes compliance program requirements that providers must follow as a condition of participation in Federal Health Care Programs, Contracted Provider shall, and shall require its subcontractors to, comply with

such requirements.

4.10.4. Accreditation. Providers shall comply with policies and procedures required for Health Plan to obtain or maintain its accreditation from accreditation bodies, including the National Committee for Quality Assurance or Utilization Review Accreditation Commission.

4.10.5. Acknowledgement of Federal Funding. Claims, data and other information submitted to Health Plan pursuant to this Agreement may be used, directly or indirectly, for purposes of obtaining payments from Federal or State governments under Federal Health Care Programs, and payments that Providers receive under this Agreement may be, in whole or in part, from Federal funds.

(a) Providers shall, upon request of Health Plan, certify, based on its best knowledge, information and belief, that all data and other information directly or indirectly reported or submitted to Health Plan pursuant to this Agreement is accurate, complete and truthful.

(b) Providers shall not claim payment in any form, directly or indirectly, from a Federal Health Care Program for items or services covered under this Agreement, except for wrap around payments made directly by Governmental Authorities to certain qualified providers, such as Federally qualified health centers ("**FQHCs**") or rural health clinics ("**RHCs**") where applicable.

(c) If a Governmental Authority imposes a reduction to the Federal or State funds Health Plan receives under a Government Contract, Health Plan may adjust its payments to Provider by an equivalent or comparable amount. Such adjustment shall be effective concurrent with the effective dates such reductions are imposed upon Health Plan.

4.10.6. Ineligible Persons. Contracted Provider warrants and represents as of the Effective Date and throughout the term of the Agreement and the duration of post expiration or termination transition activities described in this Agreement, that none of it, its Principals or any individual or entity it employs or has contracted with to carry out its part of this Agreement is an Ineligible Person.

4.10.7. Compliance Audit. Health Plan shall be entitled to audit Providers with respect to compliance issues, including their compliance programs, and require them to address compliance issues through education, counseling or corrective action plans. Providers shall cooperate with Health Plan with respect to any such audit, including by providing Health Plan with Records and site access within such time frames as requested by Health Plan.

4.10.8. Fines / Penalties. The following applies if Provider is capitated or Health Plan has delegated activities to Provider pursuant to a separate delegation addendum: Provider shall reimburse Health Plan for any fines, penalties or costs of corrective actions required of Health Plan by Governmental Authorities caused by Provider's failure to comply with Laws or Program Requirements, including failure to submit accurate encounters on a timely basis or to properly perform delegated functions.

4.11. Licensure. Providers shall secure and maintain all necessary licenses, certificates, permits, registrations, consents, approvals and authorizations that must be obtained by them to perform their obligations under this Agreement. As required by Program Requirements, Providers shall meet the conditions of participation and be enrolled in applicable Federal Health Care Programs (including for dual eligible special needs plan Members, both Medicare and Medicaid) and have all accreditations necessary to meet such conditions of participation.

4.12. Insurance. Contracted Provider and its subcontracted Providers shall secure and maintain for themselves and their employees, commercial general liability and professional liability (malpractice) insurance or self-insurance coverage for claims arising out of events occurring during the term of this Agreement and any post expiration or termination activities under this Agreement, in amounts required to meet Credentialing Criteria, and worker's compensation insurance as required by State Laws. Contracted Provider and its subcontracted Providers shall, upon request of Health Plan, provide Health Plan with certificates of insurance or other evidence of coverage reflecting satisfaction of the foregoing requirements of this paragraph. Contracted Provider and the subcontracted Providers shall provide at least 30 days prior notice to Health Plan in advance of any material modification, cancellation or termination of their insurance.

4.13. Proprietary Information. In connection with this Agreement, Health Plan or its Affiliates may disclose to Providers, directly or indirectly, certain information that Health Plan or its Affiliate have taken reasonable measures to maintain as confidential and which derives independent economic value from not being generally known or readily ascertainable by the public (**"Proprietary Information"**). Proprietary Information includes Member lists, the compensation provisions of this Agreement, and other information relating to Health Plan's or its Affiliates' business that is not generally available to the public. Contracted Provider shall, and shall require its subcontractors to, hold in confidence and not disclose any Proprietary Information and not use Proprietary Information except (a) as expressly permitted under this Agreement, or (b) as required by Laws or legal or regulatory process. Contracted Provider shall, and shall require its subcontractors to, provide Health Plan with prior notice of any such disclosure required by Laws or legal or regulatory process so that Health Plan can seek an appropriate protective order. Contracted Provider shall, and shall require its subcontractors to, disclose Proprietary Information only in order to perform their obligations under this Agreement, and only to persons who have agreed to maintain the confidentiality of the Proprietary Information. The requirements of this Agreement regarding Proprietary Information shall survive expiration or termination of this Agreement.

4.14. Required Notices. In addition to any other notices required under this Agreement, Contracted Provider shall notify Health Plan within five business days of Contracted Provider's knowledge, or when Contracted Provider should have known, of any event that could reasonably be expected to impair the ability of a Provider to comply with the obligations of this Agreement, including any of the following: (a) an occurrence that causes any of the representations and warranties in this Agreement made by or on behalf of a Provider to be inaccurate, (b) a Provider fails to maintain insurance as required by this Agreement, (c) a Provider's license, certification or accreditation expires or is suspended, revoked, conditioned or otherwise restricted, (d) a Provider is excluded, suspended or debarred from, or sanctioned under a Federal Health Care Program, (e) a disciplinary action is initiated by a Governmental Authority against a Provider, (f) where applicable, a Provider's hospital privileges are suspended, limited, revoked or terminated, (g) a Provider is under investigation for fraud or a felony, or (h) a Provider enters into a settlement related to any of the foregoing.

5. Health Plan Responsibilities.

5.1. ID Cards. Health Plan shall issue identification cards to Members and instruct them to present their cards to providers when seeking health care items and services.

5.2. Claims Processing. Health Plan shall pay or deny Clean Claims within the time period set forth in Attachment C. Health Plan uses claims editing software programs to assist it in determining proper coding for provider claim reimbursement. Such software programs use industry standard coding criteria and incorporate guidelines established by CMS such as the National Correct Coding Initiative and the National Physician Fee Schedule Database, the AMA and Specialty Society correct coding guidelines,

and state specific regulations (collectively, "Coding Authorities"). These software programs may result in claim edits for specific procedure code combinations.

5.3. Compensation. Compensation shall be as set forth in Attachment C. Providers shall accept such compensation (plus wrap around payments from Governmental Authorities to qualified providers such as FQHCs or RHCs where applicable) as payment in full for Covered Services rendered to Members and all other activities of Providers under this Agreement. Items and services constituting "**never events**" as described in the Provider Manual shall not be paid. Health Plan shall not pay for Non-Contracted Services.

5.4. Medical Record Review. Health Plan shall be entitled to perform concurrent or retrospective reviews of medical records for utilization management purposes or to verify that items and services billed to or paid for by Health Plan were provided and billed correctly in accordance with this Agreement and the Provider Manual, or were Covered Services (including that such items and services were Medically Necessary).

5.5. Overpayments. Overpayment recovery shall be in accordance with Health Plan's Provider Manual and Providers shall refund Overpayments to Health Plan within 30 days (or such other timeframe as required by Laws or Program Requirements) of the Provider's receipt of notice from Health Plan of such Overpayments ("Notice Period") or Provider's knowledge of such Overpayment. This section regarding Overpayments shall survive expiration or termination of this Agreement. Health Plan shall not seek repayment of an Overpayment from a Provider beyond the time period set forth in Health Plan's Provider Manual, unless a longer time is required or permitted by Laws or Program Requirements. Notwithstanding anything to the contrary herein, there shall be no deadline within which Health Plan may seek recovery of an Overpayment in a case of fraud.

5.5.1 Unless prohibited by Laws or Program Requirements, Contracted Provider, for itself and the Providers, authorizes Health Plan to offset Overpayments against any future payments due to Provider.

5.5.2 Except for offsets related to changes in Member eligibility, which shall not require notice prior to deducting Overpayments, Health Plan shall notify Providers that an offset against future payments will occur unless the Provider (a) refunds such amounts within the Notice Period, or (b) provides Health Plan with a written explanation of why the Overpayments should not be refunded along with any supporting documentation. If the Provider does not respond within the Notice Period, Health Plan shall deduct Overpayments from future payments.

5.5.3 If Provider disputes Overpayments within the Notice Period, Health Plan shall review the Provider's explanation and supporting documentation. Health Plan shall notify Provider of its decision to either uphold or overturn its initial determination that the payment at issue was an Overpayment. If Health Plan upholds its decision, the Overpayment will be offset against future payments unless prohibited by Law or Program Requirements.

5.6. Suspension of Payment. If DHHS suspends payments to a Provider while Governmental Authorities investigate a credible allegation of fraud (as determined by DHHS), then Health Plan may suspend the Provider and payments for Covered Services provided by the Provider during the period of the DHHS suspension of payments.

5.7. Health Plan Designees. With regard to administering Benefit Plans, Health Plan may delegate administrative functions to third parties, and Provider shall cooperate with such third parties to

the same extent Provider is required to cooperate with Health Plan.

6. Records, Access & Audits.

6.1. Maintenance. Contracted Provider shall, and shall cause its Providers and subcontractors to, maintain operational, financial and administrative records, contracts, books, files, data, information, and other documentation related to the Covered Services provided to Members, claims filed, quality and cost outcomes, quality measurements and initiatives, and other services and activities conducted under this Agreement (collectively, "**Records**"). Contracted Provider shall ensure that such Records are kept in accordance with Laws, Program Requirements, generally accepted accounting principles (as applicable), and prudent record keeping practices and are sufficient to enable Health Plan to enforce its rights under this Agreement, including this section, and to determine whether Contracted Provider and its subcontractors and their respective employees are performing or have performed Contracted Provider's obligations in accordance with this Agreement, Laws and Program Requirements. Contracted Provider shall, and shall cause its subcontractors to, maintain such Records for the time period set forth in the applicable Program Attachment governing the Benefit Plan. Records that are under review or audit shall be retained until the completion of such review or audit if that date is later than the time frame indicated above.

6.2. Access & Audit. Health Plan shall have the right to monitor, inspect, evaluate and audit Contracted Provider, Providers, and their subcontractors. In connection with any monitoring, inspection, evaluation or audit, Contracted Provider shall, and shall cause Providers and its subcontractors to, provide Health Plan with access to all Records, personnel, physical facilities, equipment and other information necessary for Health Plan or its auditors to conduct the audit. Within [three][five] business days of Health Plan's written request for Records, or such shorter time period required for Health Plan to comply with requests of Governmental Authorities, Contracted Provider shall, and shall cause its subcontractors to, collect, compile, and prepare all such Records and furnish such Records to Health Plan in a format reasonably requested by Health Plan. Copies of such Records shall be at no cost to Health Plan.

6.3. The requirements of this Agreement regarding Records, access and audit shall survive expiration or termination of this Agreement.

7. Term and Termination.

7.1. Term. The term of this Agreement shall begin on the Effective Date and continue for a period of one year, and thereafter shall renew for successive periods of one year each unless a Party provides notice of nonrenewal to the other at least [90] [Hospital: 180] days before the end of the then current (initial or renewal) term, unless and until the Agreement is terminated in accordance with the terms and conditions of the Agreement, including those in a Program Attachment.

7.2. Termination.

7.2.1. Termination for Convenience. Either Party may terminate this Agreement, in whole or with respect to any particular Program, Benefit Plan, or Covered Service, at any time for any reason or no reason upon [90] [Hospital: 180] days prior notice to the other. Health Plan may terminate this Agreement as to any particular Provider at any time for any reason or no reason upon [90] [Hospital: 180] days prior notice to Contracted Provider.

7.2.2. Termination for Cause.

(a) A Party may terminate this Agreement for material breach by the other

Party of any of the terms or provisions of this Agreement by providing the other Party at least 90 days prior notice specifying the nature of the material breach. During the first 60 days of the notice period, the breaching Party may cure the breach to the reasonable satisfaction of the non-breaching Party.

(b) Health Plan may terminate this Agreement as to a particular Provider for a material failure by the Provider to comply with any of the terms or provisions of this Agreement by providing Contracted Provider at least 90 days prior notice specifying the nature of the material failure. During the first 60 days of the notice period, the affected Provider may cure the material failure to the reasonable satisfaction of Health Plan.

7.2.3. Immediate Termination. Health Plan may terminate this Agreement in its entirety, or with respect to a particular Provider, upon immediate notice to Contracted Provider upon the occurrence of any of the following: (a) termination is necessary for health and safety of Members, (b) a Provider suffers the loss, suspension or restriction of a license from a Governmental Authority or accreditation from an accreditation body required to carry out its obligations under this Agreement, including meeting the conditions of participation in applicable Programs, (c)(1) Contracted Provider becomes an Ineligible Person or voluntarily withdraws from participation in applicable Programs, or (2) another Provider becomes an Ineligible Person or voluntarily withdraws from participation in applicable Programs, and is not immediately terminated by Contracted Provider, (d) a Governmental Authority orders Health Plan to terminate the Agreement, (e) Health Plan reasonably determines or a Governmental Authority determines or advises that a Provider is engaging or has engaged in fraud or abuse, or has submitted a false claim, (f) a Provider fails to meet Credentialing Criteria, (g) a Provider fails to maintain insurance as required by this Agreement, (h) a Provider undergoes a change of control that is not acceptable to Health Plan, or (i) a Provider becomes insolvent, is adjudicated as bankrupt, has its business come into possession or control of any trustee in bankruptcy, has a receiver appointed for it, or makes a general assignment for the benefit of its creditors.

7.2.4. Transition of Care. To ensure that a transition is undertaken in an orderly manner that maximizes Member safety and continuity of care, upon expiration or termination of this Agreement for any reason except for immediate termination, Providers shall (a) continue providing Covered Services to Members through (1) the lesser of the period of active treatment for a chronic or acute medical condition or up to 90 days, (2) the postpartum period for Members in their second or third trimester of pregnancy, or (3) such longer period required by Laws or Program Requirements, and (b) cooperate with Health Plan for the transition of Members to other Participating Providers. The terms and conditions of this Agreement shall apply to any such post expiration or termination activities, provided that if a Provider is capitated, Health Plan shall pay the Provider for such Covered Services at 100 percent of Health Plan's then current rate schedule for the applicable Benefit Plans. The transition of care provisions in this Agreement shall survive expiration or termination of this Agreement.

7.2.5. Notification to Members. Upon expiration or termination of this Agreement, Health Plan will communicate such expiration or termination to Members as required by and in accordance with Laws and Program Requirements. Providers shall obtain Health Plan's prior written approval of Provider communications to Members regarding the expiration or termination of this Agreement. The foregoing sentence shall not prevent a Provider from engaging in communications with his patient regarding the patient's health.

8. Dispute Resolution.

8.1. Provider Administrative Review and Appeals. Where applicable, a Provider shall exhaust all Health Plan's review and appeal rights in accordance with the Provider Manual before seeking

any other remedy. Where required by Laws or Program Requirements, administrative reviews and appeals shall be subject to and resolved in accordance with administrative law.

8.2. Except as prohibited by State Laws, all claims and disputes between Health Plan and a Provider related to this Agreement must be submitted to arbitration within one year of the act or omission giving rise to the claim or dispute, except for claims based on fraud, which must be brought within the State statute of limitation governing fraud claims. The failure to initiate arbitration within the foregoing time period will constitute waiver of such claims and disputes.

8.3. Negotiation. Before a Party initiates arbitration regarding a claim or dispute under this Agreement, the Parties shall meet and confer in good faith to seek resolution of the claim or dispute. If a Party desires to initiate the procedures under this section, the Party shall give notice (a "**Dispute Initiation Notice**") to the other providing a brief description of the nature of the dispute, explaining the initiating Party's claim or position in connection with the dispute, including relevant documentation, and naming an individual with authority to settle the dispute on such Party's behalf. Within 20 days after receipt of a Dispute Initiation Notice, the receiving Party shall give a written reply (a "**Dispute Reply**") to the initiating Party providing a brief description of the receiving Party's position in connection with the dispute, including relevant documentation, and naming an individual with the authority to settle the dispute on behalf of the receiving Party. The Parties shall promptly make an investigation of the dispute, and commence discussions concerning resolution of the dispute within 20 days after the date of the Dispute Reply. If a dispute has not been resolved within 30 days after the Parties have commenced discussions regarding the dispute, either Party may submit the dispute to arbitration subject to the terms and conditions herein.

8.4. Arbitration. Except as barred or excepted by this Agreement, all claims and disputes between the Parties shall be resolved by binding arbitration in _____, _____. The arbitration shall be conducted through the American Arbitration Association ("**AAA**") pursuant to the AAA Commercial Arbitration Rules then in effect, subject to the following: Arbitration shall be commenced by completing and filing with AAA a Demand for Arbitration form in accordance with the Commercial Arbitration Rules setting forth a description of the dispute, the amount involved and the remedy sought, and sending notice of the demand to the opposing Party. The arbitration shall be held before a single arbitrator, unless the amount in dispute is more than $10 million, in which case it will be held before a panel of three arbitrators. In a case with a single arbitrator, the Parties shall select the arbitrator by agreement within 30 days of the date the Demand for Arbitration is filed, and if the Parties are unable to agree on the selection of an arbitrator within such time, AAA shall select an independent arbitrator. In the case of a panel, within 30 days of the date the Demand for Arbitration is filed each Party shall select an arbitrator, and the two arbitrators shall select the third arbitrator, and if the two arbitrators are unable to agree on the selection of a third arbitrator within such time, AAA shall select an independent third arbitrator. The arbitrator or panel may not certify a class or conduct class based arbitration. The decision of the arbitrator or panel shall be final and binding on the Parties. The award of the arbitrator or panel may be confirmed or enforced in any court having jurisdiction. Each Party shall assume its own costs related to the arbitration, including costs of subpoenas, depositions, transcripts, witness fees, and attorneys' fees. The compensation and expenses of the arbitrator and administrative fees or costs of the arbitration shall be borne equally by the Parties.

9. Miscellaneous.

9.1. Governing Law / Venue. This Agreement shall be governed by and construed and enforced in accordance with the laws of the State of _____, except where Federal law applies, without regard to principles of conflict of laws. Each of the Parties hereby agrees and consents to

be subject to the exclusive jurisdiction and venue of the appropriate State or Federal court located in _____, _____, in any suit, action, or proceeding seeking to enforce any provision of, or based on any matter arising out of or in connection with, this Agreement.

9.2. Waiver of Jury Trial. Each Party hereby irrevocably and unconditionally waives, to the fullest extent it may legally and effectively do so, trial by jury in any suit, action or proceeding arising hereunder.

9.3. Equitable Relief. Notwithstanding anything in this Agreement, either Party may bring court proceedings to seek an injunction or other equitable relief to enforce any right, duty or obligation under this Agreement.

9.4. Independent Contractors. The Parties are independent contractors. This Agreement shall not be deemed to create a partnership or joint venture, or an employment or agency relationship between the Parties. Neither Party has the right or authority to assume or create any obligation or responsibility on behalf of the other. Neither Party is liable for the acts of the other.

9.5. No Steering. For the term of this Agreement and for one year thereafter, Providers shall not engage in steering or otherwise directly or indirectly solicit any Member to join a competing health plan or induce any Member to cease doing business with Health Plan.

9.6. No Offshore Contracting. No work related to this Agreement may be performed outside of the United States without Health Plan's prior written consent.

9.7. The following applies to State plans: Contracted Provider shall not, and shall require Providers and their subcontractors not to, make any payments for items or services provided under a State plan to financial institutions or entities such as provider bank accounts or business agents located outside of the States. Further Contracted Provider shall not, and shall require its Providers and their subcontractors not to, make payments to telemedicine providers located outside of the States, or payments to pharmacies located outside of the States. Any such funds paid may be recovered by Health Plan or a State Governmental Authority with applicable jurisdiction over a plan.

9.8. Notices. Except for non-material revisions to the Provider Manual, all notices required or permitted under this Agreement must be in writing and sent by (a) hand delivery, (b) U.S. certified mail, postage prepaid, return receipt requested, (c) overnight delivery service providing proof of receipt, (d) facsimile, or (e) regular U.S. mail, first-class postage prepaid, to the addresses of the Parties as set forth on the signature page. Each Party may designate by notice any future or different addresses to which notices will be sent. Notices will be deemed delivered upon receipt or refusal to accept delivery, except for regular U.S. mail, which shall be deemed delivered seven days after the date of mailing. Notice to Contracted Provider shall constitute notice to all Providers. Routine day to day operational communications between the Parties are not notices in accordance with this section.

9.9. Incorporation of Laws / Program Requirements / Accreditation Standards. All terms and conditions of this Agreement are subject to Laws, Program Requirements, and accreditation standards. Any term, condition or provision now or hereafter required to be included in the Agreement by Laws, Program Requirements, or accreditation standards shall be deemed incorporated herein and binding upon and enforceable against the Parties, regardless of whether or not the term, condition or provision is expressly stated in this Agreement. Health Plan may amend this Agreement upon notice to Contracted Provider to comply with Laws, Program Requirements, or accreditation standards, and such amendment shall be effective upon receipt.

9.10. Amendment. Except as otherwise set forth in this Agreement, any amendments to this Agreement shall be in writing and signed by both Parties. However, Health Plan may amend this Agreement upon 30 days prior notice to Contracted Provider, and if Contracted Provider objects to the amendment, Contracted Provider shall notify Health Plan of the objection within the 30 day notice period, and Health Plan may terminate this Agreement for convenience in accordance with this Agreement.

9.11. Third Parties. Except as otherwise provided in this Agreement, this Agreement is not a third party beneficiary contract and no provision of this Agreement is intended to create or may be construed to create any third party beneficiary rights in any third party, including any Member.

9.12. Assignment. Contracted Provider may not assign, delegate or transfer this Agreement, in whole or in part, without the prior written consent of Health Plan. Health Plan may assign this Agreement, in whole or in part, to any purchaser of the assets or successor to the operations of Health Plan or its Affiliate. As used in this section, the term "**assign**" or "**assignment**" includes a change of control of a Party by merger, consolidation, transfer, or the sale of the majority or controlling stock or other ownership interest in such Party.

9.13. Name, Symbol and Service Mark. The Parties shall not use each other's name, symbol, logo, or service mark for any purpose without the prior written approval of the other. However, (a) Providers may include Health Plan's or Benefit Plan names in listings of health plans the providers participate in, and (b) Health Plan may use information about Providers in information or publications identifying Participating Providers or as required by Laws or Program Requirements. Providers shall provide comparable treatment to Health Plan as provided to other managed care organizations with respect to marketing or the display of cards, plaques or other logos provided by Health Plan to identify Participating Providers to Members.

9.14. Other Agreements. If a Provider participates as a Participating Provider under more than one agreement with Health Plan for a particular Program, Health Plan will compensate the Provider for Covered Services it provides to Members of Benefit Plans in that Program under the agreement selected by Health Plan.

9.15. Health Plan Affiliates. If a Provider renders covered services to a member of a benefit plan issued or administered by a Health Plan Affiliate, the Health Plan Affiliate may pay for such covered services, and the Provider shall accept, the applicable out of network rates paid by the Health Plan Affiliate for the member's benefit plan. A list of Health Plan Affiliates is available in the Provider Manual or on Health Plan's provider website. There shall be no joint liability between or among Health Plan and its Affiliates.

9.16. Force Majeure. The Parties shall have and maintain disaster recovery plans in accordance with high industry standards. However, if either Party's performance under this Agreement is prevented, hindered or delayed by reason of any cause beyond the Party's reasonable control that cannot be overcome by reasonable diligence, including war, acts of terrorism, civil disorders, labor disputes (other than strikes within such Party's own labor force), governmental acts, epidemics, quarantines, embargoes, fires, earthquakes, storms, or acts of God, such Party shall be excused from performance to the extent that it is prevented, hindered or delayed thereby, during the continuances of such cause; and such Party's obligations hereunder shall be excused so long as and to the extent that such cause prevents or delays performance. If a Provider is unable to perform under this Agreement due to an event as described in this paragraph, Health Plan may take whatever action is reasonable and necessary under the circumstances to ensure its compliance with Laws and Program Requirements and equitably adjust payments to the Provider until the Provider resumes its performance under this Agreement.

9.17. Severability. When possible, each provision of this Agreement shall be interpreted in such manner as to be effective, valid and enforceable under Laws. If any provision of this Agreement is held to be prohibited by, or invalid or unenforceable under Laws, such provision shall be ineffective only to the express extent of such prohibition, unenforceability or invalidity, without invalidating the remainder of this Agreement.

9.18. Waiver. No waiver shall be effective unless in writing and signed by the waiving Party. A waiver by a Party of a breach or failure to perform this Agreement shall not constitute a waiver of any subsequent breach or failure.

9.19. Entire Agreement. This Agreement, including the Attachments each of which are made a part of and incorporated into this Agreement, the Provider Manual and any addenda or amendments comprises the complete agreement between the Parties and supersedes all previous agreements and understandings (whether verbal or in writing) related to the subject matter of this Agreement.

9.20. Headings. The various headings of this Agreement are provided for convenience only and shall not affect the meaning or interpretation of this Agreement or any provision of it.

9.21. Interpretation. Both Parties have had the opportunity to review this Agreement with legal counsel, and any ambiguity found in this Agreement shall not be construed in a Party's favor on the basis that the other Party drafted the provision containing the ambiguity.

9.22. Survival. Any provision of this Agreement, including an Attachment, that requires or reasonably contemplates the performance or existence of obligations by a Party after expiration or termination of this Agreement shall survive such expiration or termination regardless of the reason for expiration or termination.

9.23. Rights Cumulative. Except as set forth herein, all rights and remedies of a Party in this Agreement are cumulative, and in addition to all legal rights and remedies available to such Party.

9.24. Counterparts / Electronic Signature. This Agreement may be executed in any number of counterparts. The exchange of copies of this Agreement and of signature pages by facsimile transmission or electronic mail shall constitute effective execution and delivery of this Agreement as to the parties and may be used in lieu of the original Agreement for all purposes.

9.25. Warranties and Representations. Each Party warrants and represents, as of the Effective Date and continuously thereafter throughout the entire term of this Agreement and during the post expiration or termination transition period described herein, as follows:

9.25.1. The Party is a corporation or other legally recognized entity duly incorporated or organized, validly existing and in good standing under the laws of the State in which it is incorporated, organized or operating and it has the authority to transact business in each State in which it operates.

9.25.2. The Party has the corporate or company power and legal authority to, and has taken all necessary corporate or other action on its part to, authorize the execution and delivery of this Agreement and the performance of its obligations hereunder.

9.25.3. This Agreement has been duly executed and delivered by the Party, and constitutes a legal, valid, and binding agreement that is enforceable against such Party in accordance with its terms, except as limited by applicable bankruptcy, reorganization, moratorium and similar Laws affecting the enforcement of creditors' rights.

9.25.4. The execution and delivery of this Agreement and the performance of the Party's obligations hereunder do not (a) conflict with or violate any provision of the Party's organizational documents or Laws, or (b) conflict with, or constitute a default under, any contractual obligation of the Party.

The following Attachments are incorporated into and made a part of this Agreement:
Attachment A - Provider Specific Requirements/Covered Services/Information
Attachment B - Program Attachments
Attachment C - Compensation

DRAFT

ATTACHMENT A-1
PROVIDER SPECIFIC REQUIREMENTS / COVERED SERVICES
(PHYSICIAN/IPA/PHYSICIAN GROUP/NP/FQHC/RHC/BEHAVIORAL HEALTH SERVICES)

1. Additional Definitions.

   a. "**Assigned Member**" means a Member who selects or is assigned by Health Plan to a Primary Care Provider or (if required by Laws or Program Requirements) an allied health care practitioner supervised by a Physician, as the Member's Primary Care Provider.

   b. "**Covering Provider**" means a Provider who provides health care items and services to another Provider's patients when the other Provider is not available.

   c. "**Nurse Practitioner**" means a Provider who is licensed as a nurse practitioner and certified in advanced or specialized nursing practice, in accordance with applicable state Laws.

   d. "**Physician**" means a Provider who is a doctor of medicine or osteopathy.

   e. "**Primary Care Provider**" means a Physician, Nurse Practitioner, certified nurse midwife, physician assistant, or other duly licensed Provider who spends the majority of his/her clinical time providing Primary Care Services to patients, and may include a Provider in the practice of family medicine, general medicine, internal medicine or pediatrics, or obstetrics and gynecology.

   f. "**Primary Care Services**" means health care items or services available from Primary Care Provider within the scope of their medical or professional licenses or certifications, and shall include primary care items and services required by the Provider Manual or Program Requirements, which may include (i) assuring the timeliness of urgent, emergent, sick and preventive care to Members; (ii) conducting initial health assessments of new Members when such assessments are Covered Services under the applicable Benefit Plan; (iii) informing Members of specific health care needs that require follow up; (iv) instructing Members on measures they may take to promote their own health; (v) providing the coordination necessary for the referral of Members to specialists; or (vi) monitoring and follow-up of care provided by other providers for diagnosis and treatment.

   g. "**Specialty Provider**" means a Provider who provides Specialty Services.

   h. "**Specialty Services**" means health care items and services within the scope of a particular medical specialty.

2. Subject to and in accordance with the terms of this Agreement, applicable Laws, and Program Requirements, Contracted Provider shall provide or arrange for the provision of all Covered Services available from Providers that are within the scope of their medical or professional licenses or certifications.

3. If Contracted Provider employs or subcontracts with Providers to provide Covered Services, Contracted Provider shall be responsible to ensure that (a) Primary Care Providers render Primary Care Services to Members, including their Assigned Members, and (b) Specialty Providers provide Specialty Services to Members upon appropriate referral. If a Provider provides Covered Services that are subject to a Carve-Out Agreement, such services shall be Non-Contracted Services.

4. If a Provider provides or arranges for the provision of Primary Care Services to Assigned Members:

   a. The Provider shall have primary responsibility for arranging and coordinating the overall health care of Assigned Members, including (i) the provision of Primary Care Services from Primary Care Provider and appropriate referral to other Participating Providers, or if a Participating Provider is unavailable to any health care provider upon authorization of Health Plan, and (ii) managing and coordinating the performance of administrative functions relating to the delivery of Covered Services to Assigned Members.

   b. The Provider shall ensure Primary Care Provider make all reasonable efforts to (i) establish satisfactory provider-patient relationships with their Assigned Members and (ii) instruct their Assigned Members on measures they may take to promote their own health.

5. If a Provider provides or arranges for the provision of Specialty Services, the Provider shall ensure that Specialty Provider (i) care for common medical conditions in their medical specialty, (ii) provide consultation summaries or appropriate periodic progress notes to the Member's Primary Care Provider on a timely basis, after a referral or routinely scheduled consultative visit, and (iii) notify the Member's Primary Care Provider when scheduling a hospital admission or other procedure requiring the Primary Care Provider's approval.

6. Except for Emergency Services, when a Member requires a hospital admission by a Primary Care Provider or other Provider that the Primary Care Provider has referred a Member to, the Primary Care Provider shall, or shall arrange for the other Provider to, secure authorization for such admission from Health Plan prior to the admission. Providers shall seek further authorization for any extension of the initial length of stay approved for the Member in accordance with the Provider Manual.

7. Subject to Laws and Program Requirements regarding provider to patient ratios, a Provider shall accept Members as patients as long as the Provider is accepting new patients. Contracted Provider shall give Health Plan 60 days' prior notice in advance of any circumstance where a Provider is not available to accept Members as patients.

ATTACHMENT A-1
PROVIDER SPECIFIC REQUIREMENTS / COVERED SERVICES
(MEDICAL FACILITY)

Subject to and in accordance with the terms of this Agreement, applicable Laws, and Program Requirements, Contracted Provider shall provide or arrange for the provision of all Covered Services that are facility based health care items or services available from the Providers that are within the scope of their medical or professional licenses or certifications.

- Billing office telephone and facsimile numbers
- Billing office email address
- Billing office contact person

ATTACHMENT A-4
FORM OF OPT IN AGREEMENT
(SUBCONTRACTED PROVIDER)

THIS OPT IN AGREEMENT ("**Opt In Agreement**") is made by and between Health Plan and the subcontracted Provider identified below ("**Subcontractor**").

WHEREAS, Health Plan and [Name of Contracted Provider] ("**Contracted Provider**") are Parties to the Participating Provider Agreement (as now or hereafter amended, the "**PPA**"); and

WHEREAS, Subcontractor is a subcontracted Provider under the PPA and will receive substantial benefits from the PPA;

NOW, THEREFORE, in consideration of those benefits and Health Plan entering into the PPA and this Opt In Agreement, Subcontractor agrees to the following:

1. Subcontractor has reviewed the PPA. The PPA is made a part of and incorporated into this Opt In Agreement. Capitalized terms not defined in this Opt In Agreement have the same definition as given in the PPA.

2. Subcontractor agrees to the terms and conditions of the PPA. Wherever in the PPA an action is required to be taken by Contracted Provider or a Provider, Subcontractor agrees to perform such action. Wherever in the PPA any representation or warranty is made by Contracted Provider or a Provider, Subcontractor agrees to comply with such representation or warranty.

3. Any obligation of Subcontractor in this Opt In Agreement or the PPA shall apply to Subcontractor's Providers to the same extent that it applies to Subcontractor. Subcontractor shall maintain and enforce internal policies and procedures or written agreements with its employed Providers that are consistent with and require adherence to the terms and conditions of this Opt In Agreement and the PPA. Subcontractor has the authority to bind its subcontracted Providers to this Opt In Agreement and PPA, and shall require the timely and faithful performance of this Opt In Agreement and the PPA by its subcontracted Providers.

4. Subcontractor hereby grants to Contracted Provider a power of attorney, coupled with an interest, to represent and bind Subcontractor in connection with all matters related to the PPA and this Opt In Agreement including granting any waivers of any of the terms of the PPA and this Opt In Agreement, and entering into any amendments or modifications of the PPA or this Opt In Agreement.

5. Subcontractor shall not assign any of its rights or delegate any of its duties or obligations under this Opt In Agreement or the PPA, in whole or in part, without the prior written consent of Health Plan.

6. If the PPA is terminated for any reason or Contracted Provider goes out of business, ceases operations or becomes insolvent, then Subcontractor: (a) for at least six months, shall continue to provide Covered Services to Members, subject to and in accordance with the terms and conditions of the PPA and this Opt In Agreement, (b) shall accept compensation from Health Plan for such Covered Services at the fee for service rates set forth in the PPA for the applicable Benefit Plans or, if the PPA does not include fee for service rates, at 100 percent of Health Plan's then current fee for service rates for the applicable Benefit Plans, and (c) after six months, may terminate its continuing participation under the PPA and this Opt-In Agreement upon 90 days prior notice to Health Plan.

7. In no event including nonpayment by Health Plan, Health Plan's insolvency or breach of the PPA or

this Opt In Agreement, shall Subcontractor bill, charge, collect a deposit from, seek compensation, remuneration or reimbursement from, or have any recourse against any Member or persons other than Health Plan acting on any Member's behalf, for amounts that are the legal obligation of Health Plan. This provision (a) shall be construed for the benefit of Members, (b) does not prohibit collection of Member Expenses where lawfully permitted or required, and (c) supersedes any oral or written agreement to the contrary now existing or hereafter entered into between Subcontractor and Members or persons acting on their behalf.

8. This Opt In Agreement shall be governed by and construed and enforced in accordance with the laws of the State of Nebraska, except where Federal law applies, without regard to principles of conflict of laws.

9. Any dispute with respect to this Opt In Agreement or the PPA or Subcontractor's performance under this Opt In Agreement or PPA shall be subject to and resolved in accordance with the dispute resolution procedures in the PPA.

10. Subcontractor warrants and represents the Providers listed on the attached schedule are included in and subject to this Opt In Agreement and Subcontractor has the power and legal authority to, and has taken all necessary corporate or other action to, authorize the execution and delivery of this Opt In Agreement and the performance of its obligations hereunder and in accordance with the PPA.

The undersigned Subcontractor, with the intent to be legally bound, hereby agrees and accepts the terms of this Opt In Agreement by signing below.

ATTACHMENT B
PROGRAM ATTACHMENTS

(See following attachments)

DRAFT

ATTACHMENT B-1
NEBRASKA MEDICAID AND CHIP
PROGRAMS ATTACHMENT

1. Participation in Nebraska Contract. Subject to and in accordance with the terms of the Agreement, including this Attachment, Contracted Provider agrees to participate in Health Plan's provider networks and render Covered Services to Members pursuant to the Benefit Plan offered or administered by Health Plan for the Programs in accordance with the Nebraska Contract.

2. Compensation. Compensation for Covered Services provided to Members of Benefit Plans under the Nebraska Contract is set forth in Attachment C.

3. Additional Definitions. The following definitions shall be incorporated into the Agreement. Capitalized terms used and not otherwise defined in this Agreement shall have the meanings set forth in the Agreement or, if not defined in the Agreement, in the Nebraska Contract or under Nebraska law:

   a. "**Department**" means the Nebraska Department of Health and Human Services.

   b. "**Emergency Medical Condition**" means a physical or behavioral condition manifesting itself by acute symptoms of sufficient severity (including, but not limited to severe pain) that a prudent layperson, who possesses an average knowledge of medicine and health, could reasonably expect the absence of immediate medical attention to result in the following: (i) placing the health of the individual (or with respect to a pregnant woman, the health of the woman or her unborn child) in serious jeopardy; or (ii) serious impairment to bodily functions; or (iii) serious dysfunction of any bodily organ or part.

   c. "**Emergency Services**" means covered inpatient and outpatient services that are as follows: (i) furnished by a provider that is qualified to furnish these services under Title 42 CFR; or (ii) needed to evaluate or stabilize an Emergency Medical Condition.

   d. **"MLTC"** means the **M**edicaid and **L**ong-**T**erm **C**are division of the Nebraska Department of Health and Human Services.

   e. "**Medically Necessary**" or "**Medical Necessity**" means those Covered Services and supplies that are, under the terms and conditions of the Nebraska Contract, determined through Health Plan utilization management to be: (1)Necessary to meet the basic health needs of the Member; (2)Rendered in the most cost-efficient manner and type of setting appropriate for the delivery of the covered service; (3)Consistent in type, frequency and duration of treatment with scientifically-based guidelines of national medical, research or health care coverage organizations or governmental agencies; (4) Consistent with the diagnosis of the condition; (5) Required for means other than the convenience of the Member, the Member's physician or other provider; and (6) No more intrusive or restrictive than necessary to provide a proper balance of safety, effectiveness and efficiency; (7) Of demonstrated value; and (8) No more intensive level of Covered Services than can be safely provided.

   f. "**Member**" means an individual or Covered Person enrolled in a Benefit Plan issued by Health Plan pursuant to the Nebraska Contract.

g. "**Nebraska Contract**" or "**NE Contract**" means the Contract between the DHHS and Health Plan, and includes, without limitation, the collective documentation, exhibits, schedules, amendments, and addendums containing the terms, conditions and requirements to implement the Benefit Plan such as the General Terms, Special Terms (SOW) and Special Contract Attachments. The Nebraska Contract is a Government Contract as defined in the Agreement.

h. "**Nebraska Medicaid Program**" **(NE Medicaid or Medicaid)** means health care services to eligible elderly and disabled individuals and eligible low-income pregnant women, children and parents. NE Medicaid also includes the Children's Health Insurance Program and home and community-based services for individuals qualified for Medicaid waivers. NE Medicaid is administered by the Division of Medicaid and Long Term Care (MLTC) of the Nebraska Department of Health and Human Services.

i. "**Nebraska Medical Assistance Program**" means Nebraska Medicaid

j. "**Patient-centered medical home**" **(PCMH)** means a community-based primary care setting that provides and coordinates high quality, planned, family-centered, health promotion, acute illness care, and chronic condition management.

k. "**Post-Stabilization Care Services**" means, in accordance with 42 C.F.R. § 438.114(a), Covered Services, related to an Emergency Medical Condition, that are provided after a Member is stabilized in order to maintain, improve or resolve the Member's stabilized condition.

l. "**State**" means the state of Nebraska or its designated regulatory agencies.

m. "**Subcontractor**" means any organization or person who provides a function or service for the Health Plan specifically related to securing or fulfilling the Health Plan's obligations under the terms of a contract. A subcontractor does not include a provider unless the provider is responsible for services other than those that could be covered by a provider agreement.

n. "**Value-Based Contract**" means payment and contractual arrangements with providers that include two (2) components: (i) provisions that introduce contractual accountabilities for improvements in defined service, outcome, cost or quality metrics and (ii) payment methodologies that align their financial and contractual incentives with those of the Health Plan through mechanisms that include, but are not limited to, performance bonuses, capitation, shared savings arrangements, etc.

4. Cumulative Provisions. All provisions of the Agreement and this Attachment are cumulative. All provisions shall be given effect when possible. If there is inconsistent or contrary language between this Attachment and any other part of the Agreement, the provisions of this Attachment shall prevail with respect to the Program described in this Attachment. Any obligation of Contracted Provider in this Attachment shall apply to Providers. Contracted Provider agrees to include the terms and conditions contained herein in its contracts with Providers. This Attachment may be updated as required by the Nebraska Contract, DHHS or other Governmental Authority.

5. Value-Based Contracts. Contracted Provider agrees that all applicable terms and conditions in the Nebraska Contract, any incorporated documents, and all applicable State and federal laws, as amended, including, without limitation 42 C.F.R. § 434.6, govern Contracted Provider's duties and responsibilities with regard to the provision of services to Members. **[NE Contract § IV.Q.6.c.]**

6. Emergency Services. Providers shall not be required to seek prior authorization for Emergency Services before the Member has been stabilized. Once a Member who receives Emergency Services is stabilized, the Provider shall seek prior authorization for Post-Stabilization Care Services for the Members specified in 42 CFR 438.114(e) and 42 CFR 422.113(c)(2). **[NE Contract § IV.E.14.b.]**

7. Covered Population. The covered population includes Health Plan's Members covered under the Nebraska Contract.

8. Unique Identifier. Providers who are physicians shall have a unique identifier in compliance with 42 USC § 1396u-2(d)(4).

9. NPI. All Providers that submit claims to Health Plan shall have a national provider identifier (NPI) number; this requirement shall be consistent with 45 C.F.R. § 162.410. The NPI number(s) must be the same NPI number(s) used for enrollment in the Nebraska Medicaid program. **[NE Contract § IV.S.4.h.]**

10. Cultural Competency. Providers are required to deliver services in a culturally competent manner to all members, including those with limited English proficiency or diverse cultural and ethnic backgrounds and provide for interpreters in accordance with 42 CFR 438.206(c)(2). **[NE Contract § IV.I.1.k.]**

11. American Indian Health Protections. In compliance with Section 5006(a) of the American Recovery and Reinvestment Act (ARRA) of 2009, any American Indian who is eligible to receive, is currently receiving or has ever received an item or service furnished by an American Indian health care provider or through referral is exempt from all copayments, cost sharing or similar charges. **[NE Contract § IV.F.1.b. (iii)]**

12. Mainstreaming of Members. To ensure mainstreaming of Nebraska Medicaid members, the Provider must take affirmative action so that members are provided covered services without regard to payer source, race, color, creed, gender, religion, age, national origin (to include those with limited English proficiency), ancestry, marital status, sexual-orientation, genetic information, or physical or mental illnesses. The Provider must take into account a member's literacy and culture when addressing members and their concerns, and must take reasonable steps to ensure subcontractors do the same. Examples of prohibited practices include, but are not limited to, the following, in accordance with 42 CFR 438.6(f): (i) denying or not providing a member any covered service or access to an available facility; (ii) providing to a member any medically necessary covered service that is different, or is provided in a different manner or at a different time from that provided to other members, other public or private patients or the public at large, except where medically necessary; (iii) subjecting a member to segregation or separate treatment in any manner related to the receipt of any covered service; or restricting a member in any way in his/her enjoyment of any advantage or privilege enjoyed by others receiving any covered service; and (iv) assigning times or places for the provision of services on the basis of the race, color, creed, religion, age, gender, national origin, ancestry, marital status, sexual orientation, income status, Medicaid membership, or physical or mental illnesses of the participants to be served. **[NE Contract § IV.I.3.a.]**

13. Deficit Reduction Act. In accordance with Section 6032 of the Deficit Reduction Act of 2005 ("DRA"), Contracted Provider shall, and shall require the other Providers to, comply with Health Plan's Fraud and Abuse Prevention Policy, as revised from time to time by Health Plan, and as otherwise may be required under the Nebraska Contract.

14. Compliance with Laws. The parties must comply with all applicable Federal and State laws and regulations including Title VI of the Civil Rights Act of 1964; Title IX of the Education Amendments of 1972 (regarding educational programs and activities); the Age Discrimination Act of 1975; the Rehabilitation Act of 1973; and the Americans with Disabilities Act. **[NE Contract § IV.C.2.a.]**

15. Physician Incentive Plan Programs. The Parties shall comply with the requirements of the Physician Incentive Plan (PIP) regulations contained in 42 C.F.R. § 438.6(h), 42 C.F.R. §§ 422.208 and 422.210. No specific payment will be made directly or indirectly as an inducement to reduce or limit Medically Necessary services furnished to a Member. Contracted Provider shall provide any physician incentive plan information in an accurate and timely manner to Health Plan in the format requested by Health Plan. As applicable, Contracted Provider agrees to incorporate the requirements of the PIP regulations and this provision into its agreements with any persons/entities for the provision of services under this Agreement. **[42 C.F.R. 417.479, 422.208, 210] [NE Contract § IV.Q.7.]**

16. Maintenance of Records. Contracted Provider shall maintain an adequate medical record system which includes a complete medical record for each Member in accordance with State laws and regulations. In addition, Contracted Provider will maintain a medical records system which maintains inactive medical records. Contracted Provider must document all medical services that the Member receives in accordance with all applicable laws and consistent with utilization control requirements in 42 C.F.R. § 456. Contracted Provider must maintain Members' medical records in a detailed and comprehensive manner that conforms to good professional medical practice, permits effective professional medical review and medical audit processes and facilitates an accurate system for follow-up treatment. Contracted Provider will maintain methods and procedures that guarantee each Member the right to request and receive a copy of his or her medical records. Medical records must be legible, signed, dated and maintained in accordance will all applicable Laws. The Provider must have online retrieval and access to documents and files for six (6) years in live systems and ten (10) years in archival systems, for audit and reporting purposes. The Provider must provide 48-hour turnaround or shorter for requests for access to information that is six (6) years old, and 72-hour turnaround or shorter for requests for access to information in machine readable form, that is between six (6) and ten (10) years old. If an audit or administrative, civil, or criminal investigation or prosecution is in progress; or audit findings or administrative, civil, or criminal investigations or prosecutions are unresolved; then, information must be kept in electronic form until all tasks or proceedings are completed. **[NE Contract § IV.R.13.]**

17. Response to Record Requests. Contracted Provider shall furnish duly authorized and identified agents or representatives of the State and federal governments, including but not limited to, the MLTC, the Secretary of the Department of Health and Human Services ("DHHS"), the DHHS Office of the Inspector General ("OIG"), or the Nebraska Medicaid Program Integrity Unit ("NMPI"), Medicaid Fraud and Patient Abuse Unit ("MFPAU")and Health Plan with such information as they may request regarding payments claimed for Medicaid services. The Contracted Provider must timely provide copies of the requested records within ten (10) business to the agency, the agency's designee (including Health Plan) or MFCU from the date of the request, unless the agency or MFCU sets, at its sole discretion, a period greater than 10 days. If such original documentation is not made available as requested, Contracted Provider, must provide transportation, lodging and subsistence at no cost, for all State and/or Federal representatives to carry out their audit functions at the principal office of Contracted Provider (or Contracted Provider's other locations, as applicable). Additionally, Contracted Provider agrees to grant the MLTC, DHHS, OIC, MFCU and/or Health Plan access during regular business hours to examine health service and financial records related to a health service

billed to the program. The MLTC will notify Health Plan no less than twenty-four (24) hours before obtaining access to a health service or financial record. **[42 C.F.R. 434.6, 438.6]**

18. Confidentiality of Member Records. Contracted Provider agrees in accordance with 42 C.F.R. § 438.224, that all Member medical records, as well as any other health information that contains individually identifiable health information, is used and disclosed in accordance with the privacy requirements set forth in HIPAA, including confidentiality of family planning services. Contracted Provider further agrees to protect and maintain the confidentiality of mental health information and to release mental health information only as allowed and to release substance use disorder information only in compliance with policies set forth in 42 C.F.R. Part 2 and other applicable State and federal law and regulations. Contracted Provider agrees to notify Health Plan within one (1) day upon discovery of a non-HIPAA –related breach.

19. Business Transaction Disclosures. Contracted Provider shall provide full disclosure of significant business transactions as set forth in 42 C.F.R. § 455.105. Contracted Provider shall submit, within thirty (30) calendar days of a request made by MLTC, federal DHHS or Health Plan, full and complete information about: (i) the ownership of any subcontractor with whom the Contracted Provider has had business transactions totaling more than $25,000 during the twelve (12) month period ending on the date of the request; and (ii) any significant business transactions between the Contracted Provider and any wholly owned supplier, or between the Contracted Provider and any subcontractor, during the five (5) year period ending on the date of the request. In addition, Contracted Provider agrees to provide these disclosures to Health Plan at any time, upon Health Plan's request within the time requested by Health Plan in order for Health Plan to meet its requirements under the Nebraska Contract. **[NE Contract § IV.T.3.]**

20. Ownership Disclosures. Contracted Provider shall make full disclosure of ownership, management and control information for the Contracted Provider, any subcontracting entities or Providers as required by 42 C.F.R. §§ 455.100 through 455.106. This information shall be delivered to Health Plan upon execution of this Agreement, and to Health Plan or MLTC within thirty (30) calendar days after any change in ownership. In addition, Contracted Provider agrees to provide these disclosures to Health Plan at any time, upon Health Plan's request within the time requested by Health Plan in order for Health Plan to meet its requirements under the Nebraska Contract. **[NE Contract § IV.T.2.]**

21. Cost Sharing and Member Liability. Contracted Provider, and/or its assignee or subcontractor, hereby agrees that in no event, including, but not limited to nonpayment by the State to Health Plan or nonpayment by Health Plan, Health Plan's insolvency or breach of this Agreement, shall Contracted Provider, or its assignee or subcontractor, bill, charge, collect a deposit from, seek compensation, remuneration or reimbursement from, or have any recourse against a Member or persons, other than the Health Plan, acting on their behalf for services provided pursuant to this Agreement. This provision shall not prohibit collection of supplemental charges or copayments on Health Plan's behalf made in accordance with the terms of the agreement between Health Plan and Members. In compliance with 42 U.S.C. § 1396u-2(b)(6), Contracted Provider shall not bill Members for Covered Services any amount greater than would be owed in the entity provided the services directly (i.e., no balance billing by Providers). Contracted Provider, or its assignee or subcontractor, further agrees that (1) this provision shall survive the termination of this Agreement regardless of the cause giving rise to termination and shall be construed to be for the benefit of the Member and that (2) this provision supersedes any oral or written contrary agreement now existing or hereafter entered into between Provider and Members or persons acting on their behalf. **[NE Contract § IV.C.16.]**

22. Continuation of Benefits. Continuation of benefits shall be in accordance with Nebraska laws and the Nebraska Contract. Upon the termination of the Agreement, except if the termination is for cause by Health Plan, Contracted Provider agrees to continue to provide care for non-pregnant Members who are undergoing a course of treatment for ninety (90) days, or if sooner, upon completion of the prescribed treatment plan. Contracted Provider agrees to continue to provide care to pregnant Members in their second or third trimester of pregnancy through postpartum care related to the child birth and delivery, which shall also include the post-partum visit. **[NE Contract § IV.S.17.c.]**

23. Provider Preventable Conditions. No payment will be made for provider-preventable conditions, as identified by the Nebraska Contract, or applicable federal or State law, as any may be amended. Contracted Provider agrees to comply with the reporting requirements of 42 C.F.R. § 447.26(d) as a condition of payment. **[42 C.F.R. 434.6] [NE Contract § IV.Q.12.]**

24. Coordination of Benefits. Contracted Provider must coordinate benefits in accordance with 42 CFR 433.135, et seq., and agrees not to pursue collection from the member but to identify third party liability coverage, including without limitation, Medicare and long-term care insurance as applicable, and except as allowed in 468 NAC Chapter 4-002 and 471 NAC Chapter 3-004, seek such third party liability payment before submitting claims to Health Plan. **[NE Contract § IV.S.15.a.(v. and xi.)]**

25. Claim Submission. Contracted Provider shall submit Clean Claims, which do not involve a third party payer, promptly. Upon termination or expiration of the Agreement, Contracted Providers shall supply all information necessary for reimbursement of any outstanding medical claims. **[42 C.F.R. 434.6]**

26. Nondiscrimination. Health Plan will not discriminate for the participation, reimbursement or indemnification of Providers acting within the scope their license solely on the basis of that license or certification and will not discriminate against Providers who serve high-risk populations or specialize in conditions that require costly treatment. **[42 C.F.R. 438.12, 42 C.F.R. 438.214] [NE Contract § IV.I.2.b.]**

27. FQHCs/RHCs. If Contracted Provider is an FQHC or RHC, this Agreement provides for reimbursement for the FQHC/RHC at the Prospective Payment System (PPS) rate in effect on the date of service for each encounter in accordance with 471 NAC Chapters 29 and 34. **[NE Contract § IV.Q.9.**

28. Timely Access. Contracted Provider must meet the Nebraska Contract timely access to care and services standards. Contracted Provider must meet the hours of operation and appointment time requirements set forth in the Nebraska Contract and Health Plan's Provider Manual. Contracted Provider agrees to maintain hours of operation for Members no less than hours of operation offered to commercial enrollees or comparable to other Medicaid fee-for-service enrollees. Contracted Provider shall be available to Members twenty-four (24) hours a day, seven (7) days a week as required by the Nebraska Contract and Contracted Provider acknowledges that Health Plan shall implement corrective actions for Providers identified through the audit as failing to meet this standard. **[NE Contract § IV.I.1.g.]**

29. Newborn Enrollment Notification. If Contracted Provider is a hospital, Contracted Provider agrees to report births of Members to the Health Plan within 24 hours of the birth. **[NE Contract § IV.B.4.d.]**

30. Provider-Patient Relationship. Subject to the limitations described in 42 CFR 438.102(a)(2), Health Plan agrees that it will not prohibit or otherwise restrict Contracted Provider from advising or

advocating on behalf of a Member who isa patient of the Provider, regardless of whether benefits for such care or treatment are provided under the contracts, regarding: (i) the Member's health status; (ii) medical, behavioral health, or long-term care treatment options, including any alternative treatment that may be self-administered; (iii) any information the Member needs in order to decide among all relevant treatment options; (iv) the risks, benefits and consequences of treatment or non-treatment; or (v) the Member's right to participate in decisions regarding his or her health care, including the right to refuse treatment, and to express preferences about future treatment decisions. **[NE Contract § IV.J.7.]**

31. Patient-Centered Medical Homes. Health Plan agrees to promote and facilitate the capacity of its provider to provide patient-centered care by using systematic, patient-centered medical home (PCMH) management processes and health information technology to deliver improved quality of care, health outcomes, and patient compliance and satisfaction. Patients must be cared for by a physician who leads a medical team that coordinates all aspects of the preventive, acute and chronic needs of members, using best available evidence and appropriate technology. **[NE Contract § IV.I.7.]**

32. Excluded Persons. Contracted Provider agrees that it will not execute any agreement with an individual or entity that has been excluded from participation in the Medicare, Medicaid, and/or CHIP Programs pursuant to Sections 1128 or 1156 of the Social Security Act or who are otherwise not in good standing with a State's Medicaid program or the Medicare program. Contracted Provider agrees to disclose the identity of any person excluded or who may be excluded to Health Plan immediately upon Contracted Provider's knowledge. Contracted Provider shall disclose the identity of any person described in 42 C.F.R. § 1001.1001(a)(1). Health Plan must abide by any direction provided by the DHHS regarding whether or not to permit a Provider for participation in Health Plan's network. If any person who has ownership or control interest in Contracted Provider, or who is an agent or managing employee of Contracted Provider, has been convicted of a criminal offense related to that person's involvement in any program established under Medicare, Medicaid, or the Title XXI Services program, or if DHHS or Health Plan determines that Provider did not fully and accurately make any disclosure required pursuant to 42 C.F.R. § 1001.1001(a)(1), then Health Plan shall not permit the Provider into the provider network.

33. Laboratory Services. If Contracted Provider is an entity that provides laboratory services, it agrees to comply with the provisions of the Clinical Laboratory Improvement Amendments of 1988 (CLIA), Public Law 100-578, and implementing federal regulations published at 42 C.F.R. Part 493, Subpart A, as amended. Verification of CLIA licensure (including the CLIA Identification number) or Certificate of Waiver during the provider registration process is required. Payment shall not be afforded for services provided by an enrolled Medicaid provider supplying laboratory services that fails to meet these requirements. For the purposes of this rule, laboratory services are defined as services to examine human specimens for the diagnosis, prevention or treatment of any disease or impairment of, or assessment of, the health of human beings. **[NE Contract § IV.I.9.]**

34. Obligation to Suspend Payment to Providers. Health Plan, in compliance with 42 C.F.R. § 455.23 and the Nebraska Contract, shall suspend payments to a provider when there is credible allegation of fraud. NMPI will determine whether to suspend payments or if an exception is appropriate. Health Plan will comply with the applicable provisions of 42 C.F.R. § 455.23 and the Nebraska Contract when implementing this provision. **[NE Contract § IV.8.b.xvi]**

35. Termination of Providers. Health Plan shall comply with all requirements for provider disenrollment and termination as required by 42 C.F.R. § 455.416.

36. Enroll In State Medicaid Program. All Providers participating under this Agreement must first enroll with State Medicaid. **[NE Contract § IV.I.13.a.]**

37. Certification Regarding Lobbying. Contracted Provider certifies that no federal appropriated funds have been paid or will be paid on behalf of the Contracted Provider or any subcontractor or Provider to any person for influencing or attempting to influence an officer or employee of any federal agency, a Member of the Congress, an officer or employee of the Congress, or an employee of a Member of Congress in connection with the awarding of any federal contract, the making of any federal grant, the making of any federal loan, the entering into of any cooperative agreement, or the extension, continuation, renewal, amendment, or modification of any federal contract, grant loan, or cooperative agreement. If any funds other than federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any federal agency, a Member of the Congress, an officer or employee of the Congress, or an employee of a Member of Congress in connection with the Nebraska Contract, grant loan, or cooperative agreement, Contracted Provider shall complete and submit Standard Form-LLL, "Disclosure Form to Report Lobbying," in accordance with its instructions. **[45 CFR § 3]**

38. Additional Requirements for Home and Community-Based Service (HCBS) Providers. If Contracted Provider and/or any Providers participate in Health Plan's HCBS Program ("HCBS Provider"), they shall ensure non-institutional Long Term Services and Support are provided in settings that comport with the CMS home and community-based setting requirements as defined in regulations at 42 C.F.R. § 441.301(c)(4) and 42 C.F.R. § 441.710(a). In accordance with 42 C.F.R. § 441.301(b)(1), Contracted Provider shall ensure that waiver services are not furnished to individuals who are inpatient in a hospital, nursing facility, institution for mental diseases, or IDF/ID.

ATTACHMENT C
COMPENSATION

(See following attachments)

DRAFT

ATTACHMENT C-[#]
NEBRASKA MEDICAID AND CHP COMPENSATION
(FEE FOR SERVICE)

1. The compensation rates set forth in this Attachment apply for Benefit Plans under Nebraska Contracts. Compensation shall be subject to and in accordance with the terms and conditions of the Agreement, including this Attachment.

2. Compensation. Fee for service compensation for Covered Services provided to Members shall be the lesser of the Provider's usual and customary billed charges or the following, less Member Expenses, if any:

[TO BE NEGOTIATED WITH PROVIDER]

3. Health Plan shall process claims and pay or deny a Clean Claim within the time period required by applicable Laws or the Nebraska Contract. The date of receipt is the date the Health Plan receives the Clean Claim as indicated by its data stamp on the claim. The date of payment is the date of the electronic funds transfer, check or other form of payment.

4. Health Plan may adjust claim payments due to coordination of benefits or subrogation.

5. Health Plan implements and prospectively applies Department's changes to its Nebraska Medicaid fee schedules as of the later of (i) the effective date of the change, or (ii) 45 days from the date the Department publishes the change on its website. Health Plan will not retrospectively apply rate changes to claims that have already been paid.

6. Health Plan may update code numbers or delete retired codes without notice or amendment to this Agreement as such are revised or implemented by the Department from time to time. Where applicable, such as for value added benefits covered by a Benefit Plan, Health Plan will determine rates for items and services that are not included in the Department's payment system or fee schedule published on the its website.

7. The amount of compensation paid is based on the treating Provider's licensure and Health Plan's credentialing requirements for that discipline, not on the Provider's academic credentials. For example, a Provider who is a licensed clinical social worker (LCSW) will be paid at the rate for LCSWs, regardless of whether the LCSW has an advanced degree.

SECTION IV.I PROVIDER NETWORK REQUIREMENTS

39. Describe the MCO's required PCP responsibilities and how the MCO will verify PCPs are performing them. *(Page limit 2 pages)*

PRIMARY CARE PROVIDER RESPONSIBILITIES AND VERIFICATION PROCESS

Our primary care network will include a broad range of qualified primary care provider types including specialists who have agreed to assume the roles and responsibilities of a PCP for members with special health care needs. Any American Indian member may choose a participating Indian Health Service/Tribal Health (638 Clinic) /Urban Indian Health (I/T/U) provider as their PCP as long as the provider participates as a PCP and has capacity to provide the service.

Our provider contract and handbook document the PCP responsibilities that providers must agree to in order to be available as a PCP choice to members. WellCare proactively engages with our PCPs to support them in the delivery of their responsibilities and verifies their performance through multiple avenues including:

- Field-based provider services representatives who have up to 18 office visits or telephonic meetings per year with PCPs
- Field-based clinical HEDIS practice advisors (CHPAs) who meet with PCPs in their office up to four times a year. CHPAs partner with providers on the importance of quality care and use health outcomes data at the provider level to monitor care gaps for members
- Nebraska medical director who oversees care delivery, designs interventions, and meets with PCPs for coaching and education
- Nebraska pharmacy director who meets monthly with up to 25 providers on prescribing patterns
- Provider data analytics and profiling allowing us to profile providers, evaluate clinical treatment and protocols provided to our members, and identify gaps in care
- Member complaints and grievances which are investigated promptly with quality of care findings included in the provider's credentialing file along with information on corrective actions ordered and verification of implementation
- Emergency department monitoring reports delivered to high-volume PCPs so they may redirect their members to the primary care setting
- Quarterly Member Advisory Committee meetings providing feedback on PCP performance
- Quarterly provider office surveys validating appointment availability and wait time standards
- Member satisfaction surveys
- Credentialing and re-credentialing

See **Figure 3** for a sampling of PCP responsibilities and the verification process for each.

Figure 3

PCP Responsibility	Verification Process
• Coordinate, monitor and supervise the delivery of medically necessary primary and preventive care services to each member, including Early and Periodic Screening, Diagnosis and Treatment (EPSDT) services for members under the age of 21	• Provider services representatives, CHPAs, medical director, pharmacy director, data analytics and profiling, member complaints and grievances, emergency department monitoring, medical record review
• Routine office visits for new and established members, including hearing services, counseling and risk intervention, family planning, immunizations, x-	• Data analytics and profiling, medical record review, member advisory committee, program integrity

PCP Responsibility	Verification Process
ray and medically necessary laboratory services, in-office tests and procedures	
See members for an initial office visit and assessment within the first 90 days of enrollment	CHPAs, data analytics and profiling, complaints and grievances, emergency department monitoring, member advisory committee, satisfaction surveys
Initiating and/or authorizing referrals for specialty care	Data analytics and profiling, complaints and grievances, medical record review, member advisory committee, satisfaction surveys
Provide appropriate referrals of potentially eligible women, infants, and children to the Women, Infant and Children (WIC) program for nutritional assistance	Provider services representatives, complaints and grievances, member advisory committee
Provide or arrange for coverage of services, consultation or approval for referrals 24 /7. Maintain 24-hour on-call coverage in accordance with WellCare standards	Provider services representative, complaints and grievances, member advisory committee, provider office survey, satisfaction surveys , credentialing
Adhere to the standards of timeliness for appointments and in-office wait times for various types of services that take into consideration the immediacy of the member's needs	Provider services representative, member advisory committee, quarterly provider office survey, satisfaction surveys
Assure members are aware of the availability of public transportation where available	Provider services representative, member advisory committee, satisfaction surveys
Submit an encounter for each visit where the provider sees the member or the member receives a service	Provider services representative, CHPAs, provider data analytics and profiling
Ensure members use network providers (with the exception of family planning services and I/T/U providers); contact WellCare for help locating a participating provider	Data analytics and profiling, complaints and grievances, medical record review, member advisory committee, satisfaction surveys
Comply with and participate in corrective action and performance improvement plans	Provider services representative, medical director, pharmacy director, CHPAs, program integrity
Deliver services in a culturally competent manner	Provider services representative, complaints and grievances, member advisory committee, satisfaction surveys
Maintain continuity of care and participate in an inter-disciplinary care team	Medical director, pharmacy director, CHPAs, medical record review
Maintain the member's medical record in accordance with state and WellCare requirements	CHPAs, medical record review
Maintain admitting and treatment privileges at one or more network general acute care hospitals or, subject to WellCare approval, have written arrangements with at least one other network provider with admitting and treatment privileges at a network hospital	Provider services representative, credentialing
Fulfill all contractual responsibilities defined in the quality improvement program description	Medical director, pharmacy director, provider services representative, CHPAs, data analytics and profiling

SECTION IV.I PROVIDER NETWORK REQUIREMENTS

40. Describe innovative strategies the MCO's intends to use to identify specialty types for which member access is limited. Describe the MCO's intended initiatives for increasing the number of specialists within those specialty types that participate in the MCO's network.

Identify potential challenges the MCO anticipates in ensuring members receive appropriate care for specialties where access concerns exist, and explain how the MCO will mitigate those challenges. *(Page limit 3 pages)*

INNOVATIVE STRATEGIES TO IDENTIFY WHERE ACCESS IS LIMITED

WellCare has actively researched the unique network development challenges in Nebraska and met with hundreds of stakeholders in the state. In our discussions with Nebraska providers, professional organizations and advocacy organizations, access to care in rural and frontier communities, particularly specialty care, was one of the most commonly identified issues related to closing health disparities between frontier, rural, and urban counties.

Key facts we have learned about the challenges associated with serving the rural, frontier, and underserved areas in Nebraska include:

- 48 of Nebraska's 93 counties did not have a mental health provider in 2014 (source June 2015 Nebraska Behavioral Health Workforce report)
- 83 of Nebraska's counties were designated mental health shortage areas, eight were partially designated
- More than half of the licensed mental health workforce is over the age of 50
- Significant workforce shortages exist for Nebraska, especially in rural and frontier counties, in primary care, mental health, dentistry, family medicine, general internal medicine, general pediatrics, general surgery and pharmacy [Final Report Legislative Solutions 22 (2013) and 42(2014)]

Our meetings with professional associations such as the Nebraska Hospital Association, Nebraska Medical Association, Leading Age Nebraska, Nebraska Health Care Association, Health Center Association of Nebraska, Nebraska Association of Behavioral Health Organizations, Children and Family Coalition of Nebraska and tribal clinic representatives, as well as individual providers and community advocacy organizations have helped us understand how these issues are playing out and informed our strategies for addressing them.

Initiatives to Increase the Number of Specialists

WellCare constantly analyzes access data and aligns incentives and rates to support underserved areas and the closure of network gaps. We will address the challenges associated with specialist services, particularly around behavioral health, in rural, frontier, and underserved areas using some of the tools we have developed in other states, customizing them for Nebraska. These include:

Partnerships with Major Health Systems

WellCare will leverage partnerships with major Nebraska-based health systems such as the University of Nebraska to leverage existing satellite programs for primary and subspecialty care and look for opportunities to help expand those opportunities where appropriate. We will also use telehealth as a tool to connect rural and frontier PCPs to urban health care systems and to link rural and frontier providers with other providers for peer support and counseling. In our meetings with Boys Town, for example, we discussed how we might support their efforts to expand telehealth capabilities in each of its clinics to provide access back to specialty providers, particularly for children's psychiatry services.

Supporting PCPs in the Delivery of Behavioral Health Services

The shortage of psychiatrists being experienced nationwide requires an array of unique strategies that include supporting and enhancing the PCP's role. Our strategies include training PCPs to bolster their role in prescribing and medical management, supporting prescribing PCPs with counseling for members, and enhancing telehealth opportunities to provide consultation to PCPs.

Mid-Level Provider Types

Advanced practice nurses (APNs) and physician assistants can be critical to increasing access to health care, often offering services in remote locations where physicians may not be available. Legislative Bill 107 reduced barriers to full practice for APNs. WellCare will include access to APNs and physician assistants to the full extent allowed under Nebraska law. We will also rely on the availability of certified nurse midwives.

Mobile Health

We will recruit providers who are able to provide mobile health care services in locations convenient to our members. We have employed this mobile strategy in other states to increase capacity to provide services and fill care gaps in remote locations or in states with provider shortages.

Behavioral Health

We will use specific strategies to increase access to behavioral health services in underserved areas. These strategies are based on our understanding of the shortage of behavioral health professionals in Nebraska and the long preparation time for licensure. These include:

- **Behavioral Health Toolkit**: Our behavioral health toolkit supports the integration of behavioral health and primary care. The toolkit, which is posted on our website and featured in provider newsletters, helps PCPs manage their members with co-occurring behavioral health conditions. Plans are underway to develop PCP training modules on recovery and resiliency programs.
- **Peer Support Resources**: Peer supports have become an effective tool in health care delivery. WellCare will support and collaborate with providers who have established innovative peer supports program such as ED Connections in Lincoln using peer supports in the emergency department and the REAL Program collaboration between the Lincoln Police Department and the Mental Health Association.
- **Behavioral Health Telehealth**: Partnerships in the delivery of behavioral telehealth services. For example, in Georgia we partnered with Hope House to sponsor a behavioral health telehealth service expansion for a residential substance abuse treatment facility. A process is now established for Hope House to refer members in the program to WellCare for physical and behavioral health care management services.
- **Integrated Health Homes**: As we continue to identify providers who could potentially pilot our Integrated Health Home model, we will develop our contracting and incentives around common interests such as improving access to services and the co-location of physical and behavioral health.
- **Provisional Licensing:** Provisionally licensed mental health practitioners can be an important option for expanding access to mental health services. It is our understanding that provisional licensure is helping in the rural and frontier areas of the state and there is a discussion underway lead in part by Legislative Resolution 185 to address the need to extend provisional licensure to urban areas in the state as well. WellCare will continue to monitor this issue and look for opportunities to expand access to mental health services.

POTENTIAL CHALLENGES AND MITIGATION STRATEGIES

Based on our time in Nebraska and our national experience, we know there are potential challenges in behavioral health services of all types especially psychiatry. In addition we anticipate challenges in

primary care and specialist services in rural and frontier counties. We will use the following strategies to mitigate these challenges.

Telehealth

WellCare will partner with providers, groups of providers, and the Nebraska Statewide Telehealth Network (NSTN) to extend health care resources to those in need using video technology. We are also working with a telehealth vendor, American Well, who provides members access to live video visits with licensed physicians and behavioral health providers 24/7 by computer or a mobile application for smart phones and tablets and established telehealth kiosks at strategic locations. Below is a member story from our Georgia affiliate where tailored telehealth solutions were deployed to meet unique needs of a member.

MEMBER STORY

Telehealth: Increasing Access to Behavioral Health Care

- An adolescent member living in a rural county experienced frequent inpatient behavioral health admissions. The family did not have the resources for transportation and did not want to utilize Medicaid transportation, and his behavioral health condition went largely untreated. In addition, the family experienced multiple socioeconomic stressors that greatly exacerbated the member's condition.
- The member was enrolled in special education services. The care manager leveraged the existing services and relationship with the school to arrange for Care Partners of Georgia to provide tele-psychiatry in the school for a weekly evaluation, assessment and medication management.
- As a result of the coordination between WellCare, the school and the provider, telehealth services were provided to create access to needed behavioral health services. The member's condition stabilized and he continues to attend school.

Contiguous States

Recognizing the patterns of care and importance of cross-border providers in the Nebraska delivery system, we will reach out to providers in contiguous states to initiate contracting. We will adhere to the payment rules and guidelines for providers in those states.

Transportation

Recognizing transportation as one of the biggest barriers to health care in Nebraska, we will facilitate coordination of transportation for members to improve access to care. We will use warm transfers and assist members in making appointments with the transportation vendor. In addition, we track all referrals to non-benefited services including transportation. In Georgia, we are piloting innovative programs with local universities to restructure bus schedules to facilitate easier access to health care within the community, benefiting our members and the communities at large.

Our Homeless Members

Understanding the issue of homelessness in Nebraska, we will build on our strategies in other states to deliver care to the homeless population through community partners. Homeless or housing challenged members represent one population who rely heavily on the emergency department for care. In Kentucky, for example, we partnered with HOTEL INC. on a street medicine program to identify homeless residents and link them with health services including preventive care outside of the emergency department.

Out-of-Network Utilization

As needed, we will develop relationships with non-participating providers to allow us to work with them on a case-by-case basis to secure member access to the appropriate level of medically necessary care. Typically, we arrange care with out-of-network providers by executing single case agreements that authorize care for a specific member.

SECTION IV.I PROVIDER NETWORK REQUIREMENTS

41. Describe the MCO's process for monitoring and ensuring adherence to MLTC's requirements regarding appointment availability and wait times. *(Page limit 2 pages)*

MONITORING AVAILABILITY AND ENSURING ADHERENCE

Appointment standards for members are of primary concern to us. Providers are educated on these standards as part of their initial training and through ongoing reminders. We monitor provider adherence to appointment availability and wait times through a variety of tools including our Member Advisory Committee, quarterly provider office surveys, member surveys, complaints and grievances, member outcome data and care gaps, and feedback from member services associates, care managers, state partners, advocates, and legislators. We require that all providers offer hours of operation that are no less than the hours of operation offered to commercial or fee-for-service patients. We also require PCP providers to arrange for coverage of services after-hours. WellCare will establish and implement a Nebraska-specific policy, subject to MLTC review and approval, to ensure our network providers comply with all appointment availability access standards and wait times. We recognize that our members have the freedom to access family planning services from any appropriate Medicaid provider regardless of network participation and educate both our members and our providers on this freedom of choice. To streamline access to family planning there are no authorization or referral requirements. We also recognize that our American Indian members have the freedom to see I/T/U providers whether participating in the network or not and will work closely with tribal entities to ensure timely access to services.

Member Advisory Committee

Our Member Advisory Committee will provide valuable feedback on appointment availability and wait times. This committee meets quarterly and provides input on the quality of their customer experiences with health care providers and helps us identify root causes of barriers to receiving care as well as potential strategies for overcoming barriers.

Quarterly Provider Office Surveys

We conduct a quarterly phone audit using a sampling methodology to survey network providers for appointment timeliness, wait time, and after-hours availability. A phone survey script for each metric will be used to complete the audit for various provider types based upon the MLTC access standards found in Attachment 2.

Typically, we perform an initial audit on a statistically valid sampling of our providers for all wait time and appointment requirements. If a provider fails the initial audit, a representative from our provider services team contacts the provider by letter and recommends remediation strategies. In the following quarter, the failing provider is contacted for a second round audit to determine if the original failure has been corrected.

Kentucky Member Satisfaction

Our 2014 Kentucky Medicaid member satisfaction survey reported an adult satisfaction rate of 86.7% and a child satisfaction rate of 93% with Getting Appointments and Care Quickly.

Surveyors make three attempts to reach all providers in the sample. If a call attempt for the first provider in the sample is unsuccessful, the surveyor asks for the next provider listed at the same phone number to try to complete as many surveys for the same office as possible to minimize repeat calls to the same office for the same survey period.

Member Surveys

Member feedback is among our most valuable resources in monitoring appointment availability. Members are surveyed annually to assess their experiences with appointment availability. Selection for the survey is based on member claims data received from providers so we are specifically soliciting feedback from members who have received care. The claims are sorted by the type of service, such as: urgent care (adult and pediatric), PCP (adult and pediatric) and specialists. The member survey is based on services that have occurred in the past six months, and the results are based on a member's perception of the visit.

Member Complaints and Grievances

Complaints and grievances are closely monitored with regard to access and availability of care. When issues are identified, provider services staff members intervene to re-educate the provider on their contractual obligation to adhere to standards and corrective action plans are developed, if needed.

Local Input

Our member services associates, care managers, medical director, practice advisors, and other field-based associates offer valuable input as to access and availability of care as do our state partners, other agencies, advocates and legislators. Reports regarding lack of appointment availability and wait times are carefully investigated by our provider services team with the appropriate corrective action. Our practice advisors use health outcomes data at the provider level to monitor care gaps for members which may be an indication of an appointment availability issue.

ADDRESSING DEFICIENCIES

We take corrective action to remediate providers not adhering to appointment availability, wait time or after-hours call return time standards. By letter, we notify providers who fail compliance testing, include information about the standards, and include suggested remediation strategies. We work with network providers to amend their procedures to adhere to the standards. When appropriate the provider is contacted by a provider services representative.

We re-audit all failed providers the following quarter to determine if the education efforts are successful in changing the behavior of the providers and are successful in influencing them to meet the performance standards. Any provider that fails the re-audit is notified by letter, and our medical director makes a recommendation for peer-review and sanctions to our Credentialing Committee. Provider sanctions may include the revocation of credentials and contract termination.

PATIENT-CENTERED MEDICAL HOME

Our patient-centered medical home (PCMH) standards include requirements for patient accessibility to services such as on-call access 24/7, appointments outside traditional business hours and day-of-call appointments. As providers move to PCMH and integrated health home models we anticipate further improvements in both the ease and speed of getting appointments.

Compliance with PCMH standards is monitored routinely by WellCare and corrective action is taken through education and appropriate remediation. We also share with our PCMHs information regarding members who present to the emergency department for non-emergent care. This helps the PCMH evaluate the success of their after-hours program.

SECTION IV.I PROVIDER NETWORK REQUIREMENTS

42. Describe the MCO's approach to promoting and facilitating the capacity of its providers to provide:

- Patient-centered care.
- Improved health outcomes.
- Member compliance.
- Member satisfaction.

Discuss the MCO's successes with patient-centeredness in other Medicaid programs, what lessons have been learned, and the MCO's planned approach in Nebraska *(Page limit 3 pages)*

PROMOTING AND FACILITATING CAPACITY FOR PROVIDERS TO DELIVER PATIENT-CENTERED CARE

Provider partners are the most critical element in WellCare's approach to helping members receive the kind of patient-centered care that ultimately improves compliance and satisfaction while enhancing health outcomes and member quality of life. Having exclusively served members in government-sponsored health care programs for more than 20 years, we recognize that our members face unique challenges. Whether it's a mom in Kearney living in a homeless shelter trying to care for three children or an elderly woman in Norfolk living on SSI/Disability with barely enough money for a month's worth of food, our members enter their doctors' offices with an entirely different set of needs that require an entirely different set of strategies if we're going to be successful in improving health outcomes.

To meet these challenges, WellCare uses a multi-faceted approach to promote and facilitate patient-centered care. Our approaches are tailored based on where providers are starting from in terms of their capacity for patient-centeredness. Generally, the layers of support we offer, based on provider need, include:

- Clinical practice support and training through our clinical HEDIS practice advisers (CHPAs), medical director, pharmacy director, behavioral health manager, quality management coordinator, medical management coordinator, care managers, disease mangers, and utilization managers as well as the ongoing support of our provider services representatives, operations account representatives, and CommUnity advocates
- Sharing of data and analytics including
  - Quality dashboard with HEDIS scores, care gap reports, and quality trends
  - Measures of provider efficiency such as use of electronic funds and electronic data interchange
- Information technology (IT) infrastructure such as assistance with health information exchange (HIE) connectivity and electronic health record (EHR) support
- Care managers who educate members and partner with providers to ensure appropriate medically-necessary services are delivered to the member
- Disease managers who provide health education and chronic disease health coaching to members
- CommUnity Assistance Line offering connections to community resources to help address social barriers and needs through our award-winning proprietary Health*Connections* model
- Member incentives and education programs to support healthy behaviors, member empowerment and member engagement in their own health care
- Centralized telephonic outreach program with outreach specialists who contact members with identified care gaps and initiate a three-way call with the member's provider to help set-up an appointment to close the care gap
- Member engagement unit that outreaches to members about recent emergency department visits to reconnect them to their PCP and conducts discharge follow-up

- Integrated system of care focused on the collaboration of behavioral health providers with PCPs, service providers, hospitals and consumer/peer providers

While patient-centeredness can have many definitions, patient centered medical home (PCMH) standards established by the state of Nebraska as well as the National Committee of Quality Assurance (NCQA) PCMH standards provide a solid starting point for defining how providers practice patient-centered care. We believe the PCMH model is an important tool to promote and facilitate the capacity of providers to deliver care in a manner that supports the member's overall health and well-being and addresses the full spectrum of services, whether physical, behavioral, pharmacy or social.

We know that Nebraska has been a leader on this initiative, beginning with the legislatively created medical home pilot in Medicaid that began in 2010. The ground-breaking PCMH Participation Agreement with multiple insurers implemented last year means that 83.1 percent of Nebraskans live in counties with a PCMH. Leveraging the PCMH model to promote and facilitate patient-centered care is a natural fit in Nebraska.

However, we believe it is critical to recognize that providers are at different stages in terms of their capacity to be patient-centered. To ensure they are appropriately supported, we tailor our multiple layers of support to facilitate patient-centered care, improved health outcomes, member compliance and member satisfaction. So, for instance, a provider operating as a mature integrated PCMH or Integrated Health Home with embedded care management may benefit more from our support in the form of data analytics and care gap reporting than a provider without care coordination who may benefit from a more hands-on care management approach.

It's important to note that regardless of where providers are on this spectrum, our primary focus is on quality, and our incentive programs and investments in providers are predicated on improving health outcomes.

Successes in Other States with Promoting Patient-Centeredness

Since the health home model is one of the most direct links to identifying providers as being patient-centered, several of our affiliates have placed an emphasis on promoting PCMH standards to help providers achieve patient-centeredness goals and improved health outcomes. For example, our Georgia affiliate has aligned itself as a formal NCQA PCMH recognition program partner in quality, which means they provide an array of incentives and supports to promote and facilitate the PCMH model. For example, PCMH standards require providers to offer after-hours appointment – a general best practice for patient-centered care. To support this particular part of the PCMH effort, WellCare of Georgia introduced an enhanced reimbursement to incent PCPs who increase access to primary care services through after-hours appointments. They monitor after-hours codes to track utilization of these services to determine if other initiatives are warranted. ***This incentive, coupled with their Emergency Department (ED) Diversion program, has contributed to a 7 percent decrease in ED utilization in the Medicaid population since 2012, and in a 10 percent decrease in ED utilization in the SCHIP population.*** WellCare of Georgia's data overall provide empirical evidence that investments in redesigning the delivery of care around a PCMH model result in reductions in emergency department visits and inpatient hospitalizations, as shown in **Figure 4**.

Figure 4

WellCare of Georgia PCMH Versus Non-PCMH Utilization 2013			
Measure	**Non-PCMH Practices**	**PCMH-Recognized Practices**	**Percent Reduction for PCMH Practices**
Emergency Department Visits per 1,000	647	579	10.5%
Inpatient Admits per 1,000	39	24	38.2%

WellCare of Georgia PCMH Versus Non-PCMH Utilization 2013			
Measure	Non-PCMH Practices	PCMH-Recognized Practices	Percent Reduction for PCMH Practices
Inpatient Days per 1,000	141	91	35.5%

Lessons Learned

Our patient-centered care program represents an evolution of both successes and lessons learned. Some of those are summarized below:

- The PCMH model should support the provider where the member is receiving the majority of his or her health care whether it is in a primary care, behavioral, specialist, or long term care setting.
- Integration of physical and behavioral health services is a critical component of patient-centeredness. The rate of co-morbidity among Medicaid members requires a strong integrated approach to care. This could be accomplished through co-location, consultation or rapid referral processes.
- Practice readiness is key, and pre-assessment tools that identify resources and EHR capabilities are essential supports for provider offices.
- To support their patients, providers need assistance around solving for social determinants of health.

Planned Approach in Nebraska

As noted above, we tailor our approach to meet providers where they are, so working with a provider group like Southeast Regional Physicians Association (SERPA), the Nebraska Health Network or the clinics of Children's Hospital & Medical Center of Nebraska will look different than working with smaller practices or practices less advanced in their PCMH efforts.

One part of our approach that is standard is assistance with referral to and accessing community resources to address social determinants of health. Our CommUnity Assistance Line will be available to practices seeking help for their members for everything from access to healthy food to housing or utilities assistance. We already have more than 5,000 organizations in our CommUnity database, and our method of tracking referrals for our members ensures that we are able to tie health outcomes to the social help they are accessing.

Additionally, as noted above, we will flex our care management strategy based on certain to-be-determined criteria so if embedding a care manager in a practice makes sense, we will take that approach. If providing more of a clinical liaison roll to more advanced practices is warranted, we'll do that to support those care coordination functions. Some other tailored approaches we would deploy in Nebraska based on our experiences in states like Florida, Georgia, Hawaii and others include:

Data and Analytical Support: Even advanced providers often have gaps in their data like hospital readmissions or emergency department use. We will help providers at all levels fill those gaps by providing strong data and analytics and walking providers through their individual profiles, care gap reports and HEDIS-based outcomes metrics.

Technical Support: For providers seeking PCMH certification, integration, co-location or other practice transformation efforts that support patient-centered care, we have an array of support tools to offer, including access to our PCMH expertise for such things as writing policies and procedures or best practices for integrating behavioral and physical health care within a practice.

NeHII and EHR Support: We will support our providers in the adoption of Nebraska Health Information Initiative (NeHII) and leverage our value based purchasing program to provide incremental payment bonuses to non-PCMH practices with a minimum panel size who adopt EHRs. The payments will reward providers who adopt EHRs, even if they are not fully recognized as PCMHs.

SECTION IV.I PROVIDER NETWORK REQUIREMENTS

43. Describe how the MCO's network development plan will establish patient-centered medical homes consistent with the requirements included in Section IV.I Provider Network Requirements. The description must address requirements in the RFP including:

- Promoting and facilitating provider capacity to meet PCMH standards.
- Maintaining contact with members throughout their interactions with the health care system.
- Managing referrals.
- Illness and disease prevention.
- Encouraging active participation of the member or family/guardian/authorized representative in health care decision-making
- Encouraging the use of specialty services and supports.
- Providing access to care outside normal business hours.
- Facilitating open scheduling and same-day appointments where possible.

(Page limit 5 pages)

HELPING TO IMPROVE MEMBER OUTCOMES THROUGH PATIENT CENTERED MEDICAL HOMES

WellCare of Nebraska's Patient Centered Medical Home (PCMH) development plan focuses on increasing the number of smaller provider practices attaining PCMH recognition while supporting providers to meet PCMH requirements through facilitation and promotion of patient-centered care strategies.

We know that Nebraska has been a leader in the PCMH movement establishing state-level criteria and working at all levels – government, payer and provider – to significantly increase access of residents to PCMH-recognized practices with 83.1 percent of Nebraskans now living in counties with at least one PCMH. WellCare's goals and experience around promoting PCMHs is aligned with the state's goals of building medical and health homes to drive improved population health outcomes. We will submit a formal PCMH Implementation Plan to MLTC 90 calendar days of the date of this contract.

The goals of our PCMH Program include:

- Increase the number of providers and practice sites in our network with PCMH recognition which will help increase the number of members cared for by a PCMH recognized provider
- Improve access to our network PCPs through the extended hours, open schedules, same-day appointments, and after-hours coverage offered through the PCMH model
- Improve our member's experiences of care including social services
- Encourage members to seek routine care and care for ambulatory sensitive conditions from their PCP rather than the emergency room
- Manage chronic conditions in a proactive rather than a reactive way through the creation of care treatment plans and the use of specialty services and supports
- Encourage more members to have well-care or well-child appointments
- Encourage active participation of the member or family/guardian/authorized representative in health care decision-making
- Improve the management of referrals with the PCMH maintaining contact with members throughout their interactions with the health care system

- Improve patient safety through the use of comprehensive medical records
- Provide members with education about their health and self-management tools for chronic conditions
- Most importantly, help members establish better relationships with their PCPs

Providers are educated on the PCMH Program by our provider services representatives and our clinical HEDIS practice advisors (CHPAs) as part of their site visits. Additionally, we will provide information about PCMH standards on our provider website.

PROMOTING AND FACILITATING PROVIDER CAPACITY TO MEET PCMH STANDARDS

We deploy five primary strategies to facilitate and promote the capacity of providers to meet PCMH strategies depending on provider size, individual needs and requests:

- Provide infrastructure and start-up support and/or grant money particularly for adoption of an Electronic Health Record and to connect to Nebraska Health Information Initiative (NeHII)
- Provide technical assistance to get started through education, support and assistance with such items as necessary Policies and Procedures and sharing of best practices
- Develop reimbursement mechanisms that reward improved quality health outcomes and recognize the role achieving PCMH standards plays in achieving improved performance
- Provide ongoing data, assistance and support to their care coordination efforts for our members
- Share information about our CommUnity resources program to help them better connect their patients to community agencies that help address social determinants of health such as homelessness or food insecurity

Payment methodology to support transformation

WellCare recognizes the considerable effort and investment that practices make to achieve PCMH recognition. We also believe strongly in structuring value-based reimbursement strategies around quality health outcomes. To make sure we support providers in their efforts to transform and meet the patient-centered standards of the PCMH model, ***we will offer in Nebraska financial incentives based on panel size and other criteria that will encompass such standards as adoption of an electronic health record, HIE connectivity and after-hours access.***

PCMHs will also be eligible for our value-based reimbursement options that meet them where they are in their own development. From basic fee-for-service (FFS) or capitation with quality bonuses, to shared savings, to full risk models, to global capitation, we are prepared to work with our PCMH providers and others to match the right model of reimbursement with their practice.

While we offer many different value-based purchasing programs across our Medicaid markets, most can be categorized into two core frameworks:

- **Pay for Quality (P4Q):** Offers PCPs a per member per month (PMPM) bonus for achieving specified quality of care targets which are usually based on HEDIS measures.
- **Gain / Risk Sharing with Quality Standards:** Larger provider organizations, including PCP groups and health systems, who meet the criteria and display a willingness to participant in shared savings, are offered the opportunity to earn a portion of the savings achieved when they meet specified quality and cost efficiency performance targets.

We will work with existing PCMH's in Nebraska and emerging PCMH's to design the right payment methodologies for them and that stay focused on improved member health outcomes and enhanced quality of life.

Facilitating Integrated Behavioral Health Care

With Nebraska offering an integrated platform of care for the Heritage Health program, we also believe it's critical to build on our current PCMH Program to increase the availability of Integrated Health Homes

(also known as Behavioral Health Homes). In the IHH model, the behavioral health specialist takes on the role of serving as the member's home for care, and they are responsible for coordinating physical and behavioral health care, as well as other specialty, rehabilitative and recovery services.

We have developed a detailed program description, clinical and payment models for IHH programs and have already had early conversations with providers in Nebraska interested in pursuing integration. The IHH program encourages whole person orientation, enhances access to care, coordination and integration of care, quality and safety and evaluation through quality metrics. ***This model promotes the integration of behavioral health providers with other programs and services members receive to promote their recovery, empowerment, and use of their family's strengths to achieve members' clinical goals and health outcomes.*** In addition, we will also work with all of our PCMHs to coordinate rehabilitation programs that promote and provide skill building, community support, supported employment and full competitive employment by members. This includes recovery support services, natural community supports and anonymous recovery programs for members and their families. **Figure 5** provides an example of successful PCMH partnerships.

Figure 5

BEST-IN-CLASS: WELLCARE OF GEORGIA LEADS PCMH EFFORTS

WellCare of Georgia is recognized as a formal Partner in Quality with the NCQA's PCMH Recognition Program because of its longstanding and ongoing support of PCMH practices. As an NCQA Partner in Quality, WellCare of Georgia is able to offer a 20 percent discount per clinician on the NCQA's submission fee for PCMH recognition.

"We are thrilled to have WellCare as an NCQA Partner in Quality to help promote coordinated, quality care to their members," said Margaret E. O'Kane, NCQA president. "WellCare knows that the NCQA PCMH program raises the bar in defining high-quality care and we are happy to support their strategy to expand coordinated care."

MAINTAINING CONTACT WITH MEMBERS THROUGHOUT THEIR INTERACTIONS WITH THE HEALTH CARE SYSTEM

WellCare's Care Model is grounded in the concept of member-centricity and assisting members to navigate the health care and social services systems. We provide in-person care management services for members with the most complex co-morbid conditions and chronic needs and have multiple levels of telephonic care management support including disease management and wellness. When working with members already engaged in a PCMH, we are able to flex our care management structure depending on how much care coordination is already being provided to avoid duplication. One key role for us is to help providers maintain contact with their patients throughout their engagement in the health care system.

We have several strategies to do this including:

- Engaging providers in Interdisciplinary Care Teams (ICT), which are established for members in care management programs to help drive care planning and monitoring the care plan
- Sharing Care Gap reports with providers so they can monitor the needs of their members and close gaps in care such as preventive and wellness visits
- Sending providers lists of new members who select them or are auto-assigned so they can make contact and get them in for an initial visit
- Sharing contact information and reaching out to providers as part of our Unable to Contact (UTC) protocols so providers can partner with us to reach hard-to-reach members
- Sharing data on Emergency Room visits and other member experiences to drive interventions

Managing Referrals

The use of EHRs can assure that information from multiple, diverse sources can be pulled together into a single system to support the comprehensive information needs of the PCMH. It is also an important referral management tool. To support providers in moving toward a PCMH recognition program, we leverage our flexible reimbursement strategies to provide incremental payment bonuses to practices with a minimum panel size and who meet other criteria who adopt EHRs. The payments will reward providers who adopt EHRs, even if they are not fully recognized as PCMHs. We will also be supporting providers who can engage in NeHII, which is a great way to help track member care as it relates to referrals.

WellCare will also monitor PCMH compliance with this core competency standard as part of our ongoing oversight of the PCMH program. Additionally, we can help providers manage referrals for their patients through many of the same strategies noted above such as the ICT, defined care plan, data sharing and care gap reporting.

Social Service Referrals

Understanding that disadvantaged populations often face barriers to good health and recovery that go beyond traditional covered services, WellCare has developed tools to help the PCMH find needed social services for their patient. Our Health*Connections* Model identifies the available social safety net providers within the WellCare footprint, assesses the critical service gaps (existing and potential) and identifies ways to sustain the network of the social safety net. Our PCMH partners are encouraged to call our CommUnity Assistance Line when they identify patients in need of social services. Once referred, our CommUnity Assistance Line arranges for needed social services and tracks them through to delivery.

Illness and Disease Prevention

WellCare makes disease management material available to our providers based on the needs of the individual member and offers case manager support in the development of embedded on-site care management services. We have a library of wellness and prevention materials available to providers to help them meet this ongoing requirement. Additionally, our CommUnity Advocacy staff offers wellness programs that can be accessed by providers seeking additional resources for their members.

The WellCare Disease Management Program is designed to be complimentary and supportive to our members. A member may be referred directly to the Disease Management Program or referred upon completion of the Short term or Complex Case Management Programs. The Disease Management Program staff has full view of the member's assessments, case notes and health care claims to deliver education, guidance and support for the primary chronic condition for which a member may need additional support, and this information can be shared with the PCMH or PCP as part of our ongoing coordination on member care.

Disease Management Program members are offered supportive disease specific educational materials from our Vendor Partner, Krames written in easy to understand language for better management of their condition. Upon completion of the Disease Management Program, the member is offered supplemental condition specific mailings twice a year via mail as long as desired. Additionally, a Health Coaching Program is available to support members who desire to address weight management (Obesity) or smoking cessation. These programs are designed to be offered as a unique program or in collaboration with Case or Disease Management Program.

We also provide our network practices access to secure, on-demand data, analytics and actionable reports from anywhere using an internet browser and a secure login. The reports include data and information that is key to managing a panel of members and critical to a provider's advancement in achieving and succeeding under a PCMH model of care. Resources include:

- Population management reporting from our predictive modeling tools

- Provider profiling to assess under- and over-utilization
- Efficiency and quality metrics such as HEDIS
- Rates of readmissions, emergency room visits, and high-cost outpatient radiology

These tools give PCMHs access to a variety of dashboards and reports so that they can easily identify opportunities to improve member outcomes and reduce costs.

Encouraging Active Participation of the Member In Health Care Decision-Making

WellCare will educate, support and monitor providers moving towards PCMH designation on the importance of the participation of the member or family/guardian/authorized representative in health care decision-making. We will offer our patient education and self-management tools to the PCMH, as appropriate, to facilitate this activity. Additionally, our care planning process which includes PCP participation is member-centered, so members and their caregivers are actively involved.

Encouraging the use of Specialty Services and Supports

Our integrated care model supports the coordination of all services including behavioral health and specialist care. The PCMH is responsible for developing a care plan that includes coordination with all specialists. As part of our oversight process, WellCare will review management reports to confirm evidence of coordination of care with all specialists. When issues arise, we will educate the PCMH and provide tools, as needed, to support coordination activities.

WellCare also supports PCMHs in the delivery of appropriate behavioral services in a PCP setting. Through our monitoring of PCMH activities we are able to identify care gaps such as antidepressant medication initiation and maintenance to increase visibility to the PCMH on their members' needs.

Our integrated model of care also supports the co-location of physical and behavioral health services. We have held preliminary discussions with Nebraska providers about the need to expand the co-location services in Nebraska.

Providing access to Care Outside Normal Business Hours

PCMH standards require the PCMH provide access to care outside normal business hours. Our data analytics package includes members who present to the emergency room for non-emergency care. This helps the PCMH identify those members in need of outreach and evaluate the success of their after-hours program. We also have the experience of providing incentive payments to certain providers for offering after-hours enhanced access to routine and urgent care.

Facilitating Open Scheduling and Same-Day Appointments

PCMH standards require the PCMH facilitate open scheduling and same-day appointments. To help the PCMH evaluate the success of their process, WellCare monitors member use of non-emergent use of the emergency department and provides this information to the PCMH. Additionally, we can provide best practices to help providers figure out how open scheduling can work for them.

SECTION IV.I PROVIDER NETWORK REQUIREMENTS

44. Describe how the MCO would respond to the network termination or loss of a large-scale provider group or health system. Take the following areas into consideration in the response:

- Notification to MLTC.
- Coordination with the PBM.
- The automated systems and membership supports used to assist affected members with provider transitions.
- Systems and policies used for continuity of care of members experiencing provider transitions.
- Impact if the loss is in a geographic area where other providers of the same provider type are not available and the MCO's response to that impact.

(Page limit 3 pages)

A FOCUS ON CONTINUITY OF CARE --TERMINATION OR LOSS OF LARGE PROVIDER GROUP OR HEALTH SYSTEM

Due to our experience working with members with complex needs, we have faced the loss of providers in our markets for a variety of reasons from time to time. Small or large, the loss of a provider can have deep effects on members and caregivers. Members feel uncertain, and the key to helping them is open, pro-active communication to create awareness and plan for the transition. Transition planning and its process must focus on minimizing the disruption to members' lives to the greatest extent possible.

Our continuity of care protocols and processes and our general approach to Medicaid managed care in individual states are consistently aimed at minimizing disruption of members' care. However, situations are unique, and we retain enough local flexibility and control to tailor our response as needed in partnership with the state health agency and other key stakeholders. For instance, the closure of a large skilled nursing facility in Hawaii required a different approach from the recent bankruptcy and loss of a large health home and durable medical equipment provider in Florida. The common factor is WellCare's culture of patient-centeredness that ensures every team member working on care transitions is sensitive to members' needs first and foremost throughout the process.

Some elements to our response when facing the loss of a large provider group or health system

- **Network Adequacy and Duplication:** The most important step in this response happens long before the loss of the provider when we ensure that there is enough capacity in the network should something like this happen. Additionally, we develop contingency plans in situations where we have single source or a large-scale provider seeing a large percentage of members.
- **Care Management Engagement:** Depending on the number of members and the types of acuity, we will tier members by acuity levels and start by proactively reaching out to complex and medically needy members first. Through this process, we establish different levels of outreach and transition activities based on members' acuity level.
- **Supporting Remaining Providers:** Our provider services team will proactively reach out to all providers who could be affected by increased volume or who need updated information for referring members. This ensures the system as a whole continues to function efficiently.
- **Streamlining Utilization:** We establish a timeline for honoring existing prior authorizations from the terminating provider to the new providers and base those timelines on the needs of the system and in partnership with MLTC as appropriate. In Florida, for instance, we are honoring prior authorizations for 60 days post-transition.
- **Customer Service Engagement:** Even as we work to minimize disruption on the front-end, we prepare to assist members who contact us. To ensure quality, we create situationally appropriate

scripts for member and provider services associates and gear up our grievance teams to address issues in real-time.

- **Keeping our Partners Informed:** Our local health plan leadership will proactively communicate with MLTC, other state partners, advocates, local legislators, tribal entities, and professional associations such as Nebraska Hospital Association, Nebraska Medical Association and Leading Age Nebraska so they are well equipped to respond to member concerns.
- **Delivery of services:** Our provider services team will arrange for single case agreements even after contract termination, as appropriate and possible, to ensure members have access to medically necessary services and to support continuity of care.
- **An enterprise-wide focus:** Again, given the size and scope of the provider loss, WellCare's local health plan leadership will engage WellCare corporate resources for support as needed. In Florida, for instance, after the loss of a large provider, daily calls were held in a Command Center environment with as many as many as 40 to 50 WellCare staff members and leadership engaged to ensure that members were being cared for during this transition period.

Notifying MLTC

WellCare will comply with all MLTC provider termination notice requirements including submission of an updated network sufficiency analysis and network development plan when a significant change occurs, as defined by MLTC. We will also provide ongoing updates to the state ahead of and during the transition of members.

Coordination with Pharmacy Benefit Manager

Upon notice of the loss of a provider group, our Pharmacy Benefit Manager (PBM) will provide pharmacies advance notice that the group will no longer be in the network. WellCare's policy has been to ensure payment of pharmacy claims for non-participating providers, so the expectation is that members would not experience an access to care issue with the immediate termination of a provider group from our medical network. Members would need to see a new participating provider after they have exhausted available refills. The communication from the PBM to the pharmacy network is focused on ensuring pharmacies are assisting these impacted members.

Automated Systems and Membership Supports

We implement automated systems and membership communications guided by written policies and procedures to address any potential significant loss of a provider group. We begin with a notification to members of a significant network change. There are three letters automatically generated, and supplemented by outbound calls, to assist affected members with provider transition:

- Members assigned to the affected PCP
- Members who have seen a specialist twice in the previous six months
- Members with open authorizations who will need a transition of care

When members have questions in regard to a change in the provider network, WellCare makes several lines of communication available to them. WellCare takes pride in working with our community and member outreach teams to prepare them for member discussions and questions. In addition to the 24-hour availability of our member portal, members may contact member services, care managers or our member outreach team for assistance. Although the letter generation is an automated process, member support can require more individualized attention.

For example, at our Georgia affiliate when a large provider went out of business, we collaborated with the provider to develop a personalized letter that the provider sent to the members that listed available providers in the community. In addition, we contacted the providers listed on the letter to make sure they

had extra intake staff available who could give the member access to an immediate appointment. The member outreach team also contacted all the members the provider had seen within the previous three months and gave the member other available providers in their community and assisted with making appointments as needed.

Systems and Policies Used for Continuity of Care for Impacted Members

We have policies and procedures that dictate the continuity of care for members transitioning to alternative providers in the WellCare network, including those in an active course of treatment of an acute medical condition or an acute phase of a chronic condition. In addition, our current provider agreements require a 90 day transition of care for our members in the event of a termination.

For members in the midst of treatment for an acute medical condition or an acute phase of a chronic condition, we take the following steps:

- Members in care management are transitioned by their care managers
- We outreach to members in an active course of treatment to transition care
- Members with procedures authorized by a WellCare provider or facility can proceed with and complete the authorized course of treatment
- Care management staff identify any possible barriers that would prevent a successful transition and follow up with providers and other organizations to ensure there is no disruption of services

WellCare recognizes the criticality of physical and behavioral health co-existing conditions, especially as it pertains to pregnant members with behavioral health and/or substance use issues. Our continuity of care policies and procedures allow pregnant members to continue to receive services from their behavioral health or substance use treatment provider, without any form of prior authorization, until the birth of the child, the cessation of pregnancy, or loss of eligibility.

Redeveloping the Network

When a major provider termination or loss occurs, an important objective is to redevelop the network. Our redevelopment activities typically include the following actions:

Impact Assessment and Needs Analysis

- Run Geo Access reports to determine if the termination creates a gap in access to care for our members
- Run member utilization reports to identify members who have outstanding authorizations with the terminated providers or who received care within the past six months
- Identify potential providers for recruitment to resolve gaps in access to care
- Maintain an issue log to track provider concerns and identify alternative service locations

Measure and Evaluate

- Evaluate Geo Access reports to determine the impact on the network
- Deploy provider services representatives to discuss the termination and address concerns of local providers
- Conduct network development activities to resolve gaps in access to care
- Arrange for single case agreements, telehealth, and member transportation, as necessary, to ensure members have access to medically necessary services

SECTION IV.I PROVIDER NETWORK REQUIREMENTS

45. Describe the MCO's credentialing and re-credentialing process including:

- Ensuring that providers are enrolled in Medicaid and have a valid identification number.
- Obtaining information on ownership and control.
- Identifying excluded providers and persons convicted of crimes searches.
- Using quality and utilization measures in the recredentialing process.

(Page limit 3 pages)

CREDENTIALING AND RE-CREDENTIALING PROCESS

WellCare operates credentialing programs for our Medicaid and Medicare Advantage plans in 16 states and will perform credentialing and re-credentialing for our Heritage Health providers in strict accordance with federal, state and current NCQA Standards and Guidelines for the Accreditation of MCOs requirements as well as Section IV.I of this RFP. WellCare has established policies and procedures around all aspects of our credentialing program and will submit them to MLTC for review and approval. WellCare of Nebraska's medical director is responsible for oversight of care delivery and all quality improvement activities, including oversight of credentialing.

Our credentialing program includes:

- Comprehensive training plan to educate staff as to credentialing and re-credentialing requirements
- Provisions for monitoring and auditing compliance with standards
- Provisions for prompt response and corrective action when non-compliance is detected
- Description of the types of providers credentialed
- Methods to verify credentialing assertions, including any evidence of prior sanctions
- Prohibitions against employment or contracting with excluded providers
- Provisions to ensure enrollment in Medicaid and validate Medicaid identification number
- Provisions to obtain information on ownership and control
- Provisions to identify persons convicted of crimes
- Provisions to incorporate quality and utilization measures in the recredentialing process
- Credentialing Committee chaired by the WellCare of Nebraska medical director and comprised of participating Nebraska peer providers

Credentialing and re-credentialing is performed for every independent practitioner and organizational provider in our network. Hospital ancillary providers are not required to be independently credentialed if those providers serve our members only through the hospital. Initial credentialing is conducted prior to the effective date of the provider's contract, and re-credentialing is conducted at least every three years. WellCare will completely process credentialing applications for all provider types within 30 calendar days of receipt of a completed a credentialing application. A completed application includes all necessary documentation and attachments. This will include the loading of the provider to our provider files or the denial of the application. In the event a denial decision is recommended, the provider is notified of the credentialing committee's determination and provided with appeal rights.

Delegated Credentialing

We approve entities that have a demonstrated ability to perform high-quality and accurate credentialing of providers through a delegated agreement. Prior to approval, we conduct a pre-implementation review to verify that the entity meets or exceeds our policies and procedures. Post implementation we conduct semi-annual targeted audits of the entity's credentialing and re-credentialing processes and adherence to our

policy. The results of those audits are reported to the Credentialing Committee for review and approval. WellCare will obtain MLTC approval of all delegates and the credentialing process, including delegated components. We understand that MLTC retains final approval of our credentialing delegates and process.

Universal Credentialing Application

We will accept a Council for Affordable Quality Healthcare (CAQH) universal credentialing application form or a WellCare credentialing application. We will also accept any standardized provider credentialing form or process for applicable providers within 60 calendar days of its development or approval by the administrative simplification committee and MLTC.

Comprehensive Review

All applicants undergo a comprehensive review and verification of their education, experience, licensing and other requirements in accordance with NCQA guidelines. The credentialing process begins with the provider's completion and submission of either an electronic or paper application form. The application and all corresponding documentation are collected by our provider services and network management department and submitted into our workflow/tracking system to credentialing. Once the application is determined to be complete, a credentialing associate will review it for completeness.

Ensuring Enrollment in Medicaid and a Valid Medicaid Identification Number

We will require all of our contracted providers enroll with MLTC as an approved service provider. To expedite provider network participation, we will begin our credentialing process concurrently with a provider's Medicaid provider enrollment rather than waiting for MLTC approval of the provider's enrollment. We will verify the Medicaid enrollment with the state of Nebraska through the mechanism provided to the MCOs.

Obtaining Information on Ownership and Control

As part of our credentialing process we require each provider entity disclose information in accordance with 42 CFR 455.104. Ownership and Control disclosures are obtained for providers during initial contracting. WellCare will maintain copies of all Ownership and Control form requests and responses made and will make those request and response materials available to MLTC upon request, and advise MLTC when there is no response to a request.

Identifying Excluded Providers and Persons Convicted of a Crime

At the time of initial credentialing, we verify whether a provider has been sanctioned through the National Practitioner Data Bank (NPDB). For non-individual providers, we review the System for Award Management (SAM). The Office of Inspector General Cumulative Sanctions Report may also be accessed. State Medicaid sanctioned provider listings are also queried as available. In the event a new applicant is identified as having Medicare or Medicaid sanctions, or evidence of a conviction for defrauding Medicare or Medicaid, the applicant is advised in writing that WellCare does not accept for provider participation any applicant with current Medicare or Medicaid sanctions or violations.

On a monthly basis we check current staff, subcontractors and providers against the federal List of Excluded Individuals and Entities (LEIE) and the federal System for Award Management (SAM) (includes the former Excluded Parties List System (EPLS)) or their equivalent, to identify excluded parties. We also conduct these checks during the process of engaging the services of new employees, subcontractors and providers and during renewal of agreements and re-credentialing. We do not engage the services of an entity that is in nonpayment status or is excluded from participation in federal health care programs under ss. 1128 and 1128A of the Social Security Act.

Credentialing Committee

The Credentialing Committee will be chaired by the WellCare of Nebraska medical director and comprised of participating peer providers from the state of Nebraska. Providers who meet our established

"clean credentialing file" criteria are individually approved by our medical director and then presented in a list format at each meeting of the credentialing committee as opposed to being reviewed by the committee individually. If a file does not meet our established criteria for clean files, (e.g. the provider has malpractice claims, quality of care issues or past licensure sanctions) the details of the applicant's file are presented to the credentialing committee for review and recommendation. The credentialing committee holds regularly scheduled meetings every month to review applications. The credentialing committee will also convene ad-hoc meetings as necessary to accommodate large network expansions such as a new market. Providers are notified of the decision of the credentialing committee in writing and if credentialing or re-credentialing is denied are advised of their right to appeal.

Systems Capabilities

We use the Computer Assisted Credentialing Tracking Update System (CACTUS), which is an industry-leading credentialing tool, to manage inventory and information accurately and efficiently. CACTUS allows us to customize credentialing practices and generate ad-hoc reports that may be required or requested from internal or external customers.

Ongoing Monitoring

During the intervening years, providers are monitored on a routine basis. This monitoring includes review of Medicare/Medicaid Sanction Exclusion and Reinstatement reports, the List of Excluded Individuals and Entities, Medicare Opt-Out listings, System for Award Management Exclusions, professional licensing actions and internal provider performance monitoring through the collection and review of grievance and adverse event information.

Using Quality and Utilization Measures in Re-credentialing

We re-credential providers every three years. Complaints or grievances related to quality of care, access or other issues are investigated promptly through our quality improvement process. Findings are included in the provider's credentialing file along with information on corrective actions ordered and verification of implementation. Utilization management also reviews claims for the evidence of aberrant practice patterns. We rely on peer-to-peer counseling by a medical director or pharmacy director to assist providers in addressing issues resulting in member complaints and aberrant practice patterns. These monitoring activities along with the results of any individual member satisfaction surveys are reviewed as part of the re-credentialing process.

Evidence of Current Credentials

We maintain evidence of current credentials in each network provider's file. We have established processes that automate the provider maintenance processes. We currently have the technology to conduct primary source verification automatically for provider medical licenses and DEA licenses.

Special Assistance to Providers

Our Nebraska based provider services representatives will be educated about credentialing requirements as part of their new hire training. These representatives will be actively involved in the credentialing process and will work directly with providers to facilitate the credentialing process and collect missing information. Since some of these providers may be new to the credentialing process, we will put special focus on these provider types, using all resources available to get them through the process. We have successfully done this in other states.

SECTION IV.I PROVIDER NETWORK REQUIREMENTS

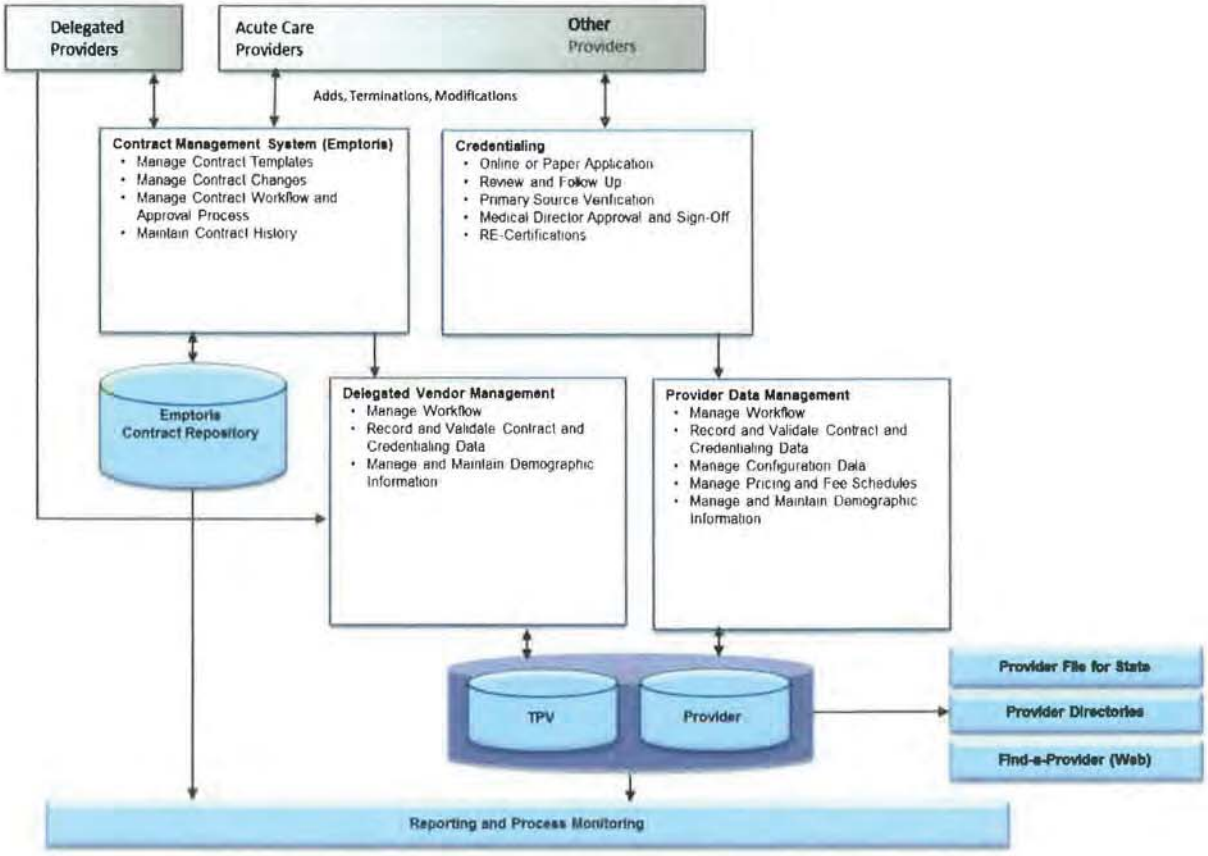
46. Explain the process the MCO will put in place to maintain the provider file with detailed information on each provider sufficient to support provider payment, including issuance of IRS 1099 forms, meeting all federal and MLTC reporting requirements, and cross referencing State and Federal identification numbers to ensure excluded providers are identified. *(Page limit 2 pages)*

WELLCARE'S PROCESS TO MAINTAIN PROVIDER FILES

WellCare's provider management applications support the crucial need to identify, contract with, and maintain productive relationships with a broad network of providers and community agencies. Our provider data file is supported by multiple departments including network integrity, provider services, contracting, credentialing and configuration. See **Figure 6** for our provider data loading process. Each step in the process includes data and quality review steps to fully support provider payment and ensure that WellCare is continually able to provide an accurate, current, and up to date provider directory to our members and providers. Examples include address verification processes to ensure physical and mailing addresses are accurate and usable for correspondence, and GeoAccess verification.

Figure 6

WellCare Provider Credentialing, Contracting and Loading Process



Data Elements in Provider File to Support Payment

WellCare's provider database includes associating the critical data elements of the national provider identifier and state Medicaid identification number to each provider entity in addition to requiring federal tax identification number information for any provider prior to making payments. These validations ensure the ability to support the routine generation of 1099 forms and data files to the Internal Revenue Service. Among the many data elements included in our provider data file are provider name, contracted services, place of service, office phone numbers, office hours of operation, emergency/after-hours provisions, professional qualifications and licensing, areas of specialty, cultural and linguistic capabilities, malpractice insurance coverage and history, and credentialing status.

WellCare Provider Databases
WellCare maintains over one million provider records in support of Medicaid and Medicare provider payments.

Based on review of reporting requirements in the RFP and Attachment 6, the data captured in WellCare's provider database supports meeting federal and MLTC reporting requirements, including items like provider termination information, network and network adequacy, appeals and grievances, and fraud reporting. Upon release of the reporting guidelines, WellCare will review the detailed requirements, identify and resolve any data collection gaps that may exist.

Excluded Providers

WellCare ensures compliance with 42 CFR 438.610, Federal Acquisition Regulation and Executive Order 12549 through mechanisms designed to prevent WellCare from having a known relationship with any debarred, suspended, excluded or otherwise ineligible party. WellCare performs monthly state and federal exclusion check reviews, including the OIG-LEIE and SAM databases, on individuals and entities contracted by WellCare, both internally and utilizing a third party vendor. Both participating and non-participating providers are tested for exclusion criteria prior to loading them into our systems for payment and on a recurring monthly basis. Individuals or entities confirmed to be debarred, suspended, excluded or otherwise ineligible are removed from contracting and no payment is made for any items or services furnished, ordered or prescribed by the individual or entity. WellCare notifies state and federal authorities as mandated by contractual and regulatory requirements.

In addition to our internal mechanisms to identify excluded parties, subcontractors themselves are contractually required to immediately notify WellCare of debarment, suspension, exclusion or any other cause for removal from federal and state health care program participation.

Provider Payment

WellCare generates all payments using electronic funds transfer (EFT) and remittances (using the 835) electronically. These transactions are submitted to our vendor PaySpan for execution. Completed transactions are returned for tracking, reconciliation and final payment verification. Providers unable or unwilling to utilize electronic formats are accommodated by PaySpan with paper documents produced from these electronic transactions or the ability to download remittance advices directly from their web portal. PaySpan is a payment card industry (PCI) compliant payment organization and independently registers providers and maintains EFT bank account information. This strategy provides additional compliance support with PCI security requirements.

SECTION IV.J PROVIDER SERVICES

47. Provide a description of the MCO's provider services program/department and how the MCO intends to partner with the provider community to deliver covered services. Include:

- Information available in the provider handbook or other media.
- Description of any committees the MCO will form for providers to offer input regarding issues such as the MCO's service delivery, MCO/provider interactions, and potential opportunities/ innovations for improved health outcomes.
- Description of how the MCO will develop, establish and maintain its provider advisory committee, with representation as identified in this RFP.
- Sample provider outreach methods.

(Page limit 4 pages excluding examples of outreach methods)

PARTNERING WITH OUR PROVIDERS: AN OVERVIEW OF WELLCARE PROVIDER SERVICES

WellCare was founded by physicians 30 years ago, and has consistently maintained our focus on building effective partnerships with our providers because we know they are the key to improving member health and enhancing their quality of life. Our provider engagement model is designed to aid both providers and WellCare to achieve our shared goal of improved health outcomes. The program includes the following:

- An account management structure to resolve providers' claims issues consistently and efficiently
- Personnel and tools to improve quality scores, effective utilization and operational efficiency
- Trained associates who focus on managing relationships, timely performance and issue resolution

WellCare recognizes that exceptional service for health care providers can only be achieved with true collaboration and strategic placement of field staff from various disciplines. Our integrated provider engagement model includes eight departments who collaborate to support providers in an integrated fashion. To maintain account ownership and accountability, our provider services representatives are the primary point of contact.

Field-based associates supporting our provider partnerships include:

- **Provider services representatives**: These representatives specialize by provider type and are our primary provider-facing staff. They are focused overall on partnering with and supporting providers, in conjunction with our medical director, on issues such as quality, cost and appropriate utilization. They educate providers on relevant tools, including electronic health records and our provider portal. WellCare will have sufficient provider services representatives to cover the 93 counties in Nebraska.
- **Clinical HEDIS Practice Advisors (CHPAs):** These field nurses are deployed to work with practices to improve Health Effectiveness and Data Information Set ® (HEDIS) quality measures focusing on well-child care, preventive care and addressing care gaps to ensure optimal management of chronic conditions.
- **Operations Account Representatives:** Operations accounts representatives are specialists assigned to high volume practices to provide education on billing practices and reimbursement policies, and resolve issues related to claims, reimbursement, authorizations and referrals. These account representatives are able to adjust claims in real time and on-site at the provider's office if needed.

Our field-based support also includes our Nebraska based medical director, behavioral health manager, pharmacy director, quality management coordinator, EPSDT coordinator, medical management coordinator and tribal network liaison who are available face-to-face, via telephone and email.

In addition to our main office in Lincoln, we will locate provider services staff in Welcome Rooms in key locations across the state, including Omaha, Kearney, Scottsbluff and Norfolk.

Provider Engagement Model Visits: Tools and Resources

Our provider engagement model uses proactive tools and resources to support the work of the team. Our staff is equipped with planning and provider tools for effective and efficient visits as described below.

- **Pre-visit Checklist:** Pre-visit checklists that serve as a tool to support better quality, lower costs and improved patient experience
- **Provider Summary:** Includes the primary care provider's (PCP) assigned members' care gaps and health care utilization, HEDIS quality scores, and medical economic reports
- **Issue Resolution:** Associates assist providers in resolving issues or administrative barriers such as obtaining specialty services for a member or adjusting claims real time in provider offices

Partnerships with the Provider Community

When we enter a new market, WellCare first establishes relationships with key providers and professional societies to gather their input on transformative partnerships, what has worked, what has not worked and why. An example of our focus on partnerships comes from our recent meeting with the Nebraska Association of Behavioral Health Organizations (NABHO) and various follow-up meetings with members of their board. During those meetings we discussed the behavioral health challenges in the state and possible partnerships to develop a true crisis continuum that is recovery focused and trauma informed which will meet the needs of the adult population and children, particularly those in foster care.

Examples of our partnerships in our other markets include:

- Facilitating selected telehealth services that may not otherwise be accessible to members through a partnership with Georgia Partnership for TeleHealth
- Helping a Georgia Federally Qualified Health Center build a satellite clinic to fill a primary care gap

PROVIDER HANDBOOK AND OTHER MEDIA

Our provider handbook will be specific to the Heritage Health plan and available as a searchable and downloadable electronic copy on our provider website. A printed copy of the provider handbook is available at no charge to the provider and may be requested through our toll-free line. Providers are notified of this resource during initial training and in our newsletter. In administering our program we take all necessary steps to afford our providers all rights outlined in the provider handbook. Consistent with Division of Medicaid and Long-Term Care (MLTC) requirements, our provider handbook will include the sample topics listed below.

- Description of WellCare and our corporate entity
- WellCare chronic care and disease management programs including making referrals
- Paper and electronic claims submission protocols and standards including clean and complete claim instructions and samples
- Services and benefits provided, including value-added services
- Compound prescription requirements
- Prompt payment requirements
- Emergency service responsibilities
- Prospective DUR response requirements
- MLTC standards for geographic access and appointment availability
- Provider rights and responsibilities
- WellCare grievance system policies and procedures including instructions for filing a grievance or appeal on behalf of the member
- Utilization management requirements, including procedures for service authorizations, concurrent review, extensions of lengths of stay, and retrospective reviews
- Process to verify a member's enrollment
- Quality performance standards and requirements
- Clinical criteria for admission, continued stay and discharge for each covered service

- Medical necessity standards as defined by MLTC and WellCare
- Process for appealing payment and service denial decisions
- Reporting requirements for serious reportable events and reportable adverse incidents
- Practice guidelines and protocols
- How to use web-based provider services
- Use of MLTC preferred drug list
- Credentialing process and criteria
- Contact center number and hours
- PCP responsibilities
- Medical record standards
- Names and contact information of provider services staff
- Mainstreaming requirements

Our provider handbook will be updated annually to ensure program changes are included. This update will happen in consultation with MLTC and, as appropriate, our members, their families, providers and other stakeholders. Input from the Nebraska Provider Advisory Committee will be obtained as part of our handbook update. As policies and procedures change, updates will be issued by WellCare in the form of provider bulletins and will be incorporated into subsequent versions of the handbook. WellCare will notify providers of changes to the handbook through a table of revisions in the front of the handbook. Provider bulletins will be posted to our website and in the monthly provider newsletter. For material changes, we send a formal notice in accordance with the terms of our provider contracts. Providers will be alerted to provider bulletins containing changes in the provider handbook by email.

Committees for Providers to Offer Input

Nebraska network providers will serve on the following committees:

- **Clinical Advisory:** Provides input into all WellCare policies, procedures, and practices associated with care management and utilization management functions.
- **Compliance:** Assists the board in overseeing WellCare of Nebraska's regulatory compliance program, policies and procedures and compliance with our code of conduct and business ethics and related policies.
- **Credentialing:** Responsible for credentialing and re-credentialing oversight and peer review of provider quality of care/service and conduct issues.
- **Pharmacy and Therapeutics:** An advisory group of physicians and pharmacy providers responsible for recommending the adoption of, or assisting in the formulation of, broad professional policies regarding the evaluation, selection, and therapeutic use of drugs by the network providers.
- **Provider Advisory:** An advisory group of providers to ensure ongoing two-way communication between WellCare's staff and the provider network. The Behavioral Health Advisory Committee serves as a subcommittee, and behavioral health providers also sit on the larger Provider Advisory Committee.
- **Utilization Management**: Oversees all clinical quality improvement, utilization management, behavioral health and long term services and supports activities.

All committees will report to the Quality Improvement Committee, and committee representation will include a broad cross section of provider types and rural, frontier and urban providers.

Giving Local Providers a Voice: WellCare's Nebraska Provider Advisory Committee

WellCare will establish a Nebraska Provider Advisory Committee (PAC) with representation from the major provider organizations in Nebraska, individual providers, behavioral health providers, pharmacy providers, hospitals and providers who primarily serve individuals with disabilities. It is our intent to work collaboratively with our PAC and established provider organizations as we create network development and management strategies and procedures. A Behavioral Health Advisory Committee (BHAC) will provide even more specialized input to the PAC. We will work closely with the PAC to

secure input on planned initiatives and feedback on existing services. Sample discussion topics include network development and management strategies, coordination of care, provider communication needs and educational opportunities, health plan and provider experiences, health services and integrated care, operations, quality initiatives, value based purchasing tools and technology, access to care, and cultural competency. The PAC will play an active role in idea generation and decision-making as we work in partnership with the provider community.

PAC meetings will occur quarterly. Local staff will participate in the meetings including our provider services manager and medical director who will work directly with the PAC to establish methods for processing and responding to provider concerns. We will seek nominations to the PAC from WellCare staff as well as the provider community. Information about the PAC will be available on the provider website, in the handbook and in the newsletter. We will promote participation of providers by scheduling a conference call at a regular and mutually agreeable time, and by providing a monetary stipend to recognize the value of the provider's time.

Sample Provider Outreach Methods

See **Figure 1** for a sample of our provider outreach methods.

Figure 1

Heritage Health Sample Provider Outreach Methods

Outreach	Description
Provider Services Visits	General education and assistance. The Provider Summary, a dashboard with HEDIS scores and measures of provider efficiency, is the primary tool used during provider services visit.
CHPA visits	General education around the HEDIS measures and HEDIS Toolkit including measures, required documentation, quick coding tips and other information.
Provider Contact Center	Dedicated toll-free provider services telephone line available to providers for questions, to verify eligibility and obtain other services.
Provider Website and Portal	Provides a broad array of information to the provider including orientation brochures, quick reference guides and training material. (see question 49 for more information)
Provider Newsletter	Monthly provider newsletter which includes a wealth of general and Nebraska-specific information such as tips for improving patient adherence, ICD-10, and formulary updates.
Provider Tidbits	Ad hoc communications typically emailed and reinforced by provider services representatives that address current issues such as updates/changes, friendly reminders, and resource links.
Campaigns/sweeps	Campaigns are performed to emphasize a specific topic to the entire network within a very short time using all available methods.
Other routine	Orientation brochures, quick reference guides, fax blasts and web announcements

WellCare Health Plans

Introducing Online emotional health support for WellCare members

Web-based confidential care

When it comes to your patients' emotional health, we have a program that makes it easy for them to get the support they need. Access self-guided, self-paced, online programs to support them anytime and anywhere.

Programs are:

- Clinically proven
- Medication free
- Easy to use
- Long-lasting improvement

You can refer your patients now to these programs:

- RESTORE—for difficulty sleeping, 7 online sessions
- SHADE—for alcohol or substance use, 10 online sessions
- FEARFIGHTER—for anxiety, panic and phobia, 9 online sessions
- MOODCALMER—for mild to moderate depression, 4 online sessions

This is short-term, goal oriented, computerized cognitive behavioral therapy (CCBT) that focuses on problem-solving and skill building to help identify thoughts, modify beliefs and change behaviors.

Enroll patients now by going to:
wellcare.cobaltcbt.com and select "Create Account Now"

SECTION IV.J PROVIDER SERVICES

48. Describe the MCO's Provider Services toll-free telephone line, including:

- How the MCO will provide a fully-staffed line between the hours of 7:00 a.m. and 8:00 p.m. CST. Monday through Friday, to address non-emergency issues and how the MCO will provide a clinical pharmacist staffed at all times during the hours of 8:00 a.m. and 8:00 p.m. CST Monday through Friday.
- How the MCO will ensure that provider calls are acknowledged and resolved within three business days of receipt.
- The location of operations, and if out of state, describe how the MCO will accommodate services for Nebraska.
- How the MCO will measure and monitor the accuracy of responses provided by call center staff, as well as caller satisfaction.

(Page limit 3 pages)

BEING THERE FOR OUR PROVIDERS: WELLCARE'S INTEGRATED CONTACT CENTER APPROACH

WellCare will operate an integrated provider services contact center to respond to the needs of our Heritage Health providers. A dedicated toll-free line will be available to our providers for inquiries regarding authorizations, member eligibility, demographic changes, claims status, benefits, questions, concerns or complaints. Our provider services contact center will be staffed by highly trained agents with broad-based experience handling provider inquiries. These associates will undergo an additional four-week training program with focus on claims, eligibility, authorizations and other provider contact types specific to the Heritage Health Plan.

Integrated Contact Center

In 2014, WellCare responded to more than 1.3 million Medicaid provider calls in less than 30 seconds on average.

Our provider service line will be staffed Monday through Friday from 7:00 a.m. –8:00 p.m. Central Time, except for state holidays, to address non-emergency provider issues, and anytime for non-routine prior authorization requests and emergent provider and pharmacy issues. Clinical pharmacists will be available Monday through Friday 8:00 a.m.-8:00 p.m. Central Time for clinical questions and prior authorization processing. After normal business hours, on weekends and on established state holidays, providers have access to our automated system with recorded information about normal business hours and self-service options. Our automated system will provide information and clear instructions for callers to follow to verify enrollment for a member with an emergency or urgent medical condition. Verification is not required for emergency department services and care. Callers may also leave a message and our staff will return any message within one business day.

Our secure provider portal allows providers to process authorizations 24 hours a day, 7 days a week. Authorizations are never required for emergency care. After-hour calls into utilization management are warm transferred directly to nurses on call who addresses emergent needs. Should consultation be required with the medical director, the associate will outreach directly to the medical director by telephone to discuss the situation live.

CAREChannels, our telephone and communication platform, is designed to enhance the provider experience. Our enhanced speech recognition automated call distribution system effectively answers, routes, tracks and reports calls and inquiries. This solution allows providers to gain access to the information they seek or perform routine transactions by speaking naturally to request information about claims, authorizations, eligibility, pharmacy and prescription inquiries, including member copayments, if

applicable. These services are available 24/7. During normal business hours, callers will be connected to a live person upon indicating that option. To minimize confusion, WellCare uses a single provider services line for all providers, eliminating the need for providers to call different numbers.

First-Call Resolution: WellCare's Philosophy to Streamline Provider Engagement

Drawing on extensive experience and technologies from WellCare's corporate offices, our driving goal will be rapid, first-call resolution of all provider requests. Our contact center is operated based on established and documented policies and procedures including staffing, training, hours of operation, access and response standards, warm transfers, call escalation, data entry, reporting, performance and call quality monitoring. Contact center associates have access to mapping search engines and use these as needed to locate referral providers and assist with member transportation.

Our contact center associates also have access to our provider claims support team to facilitate real-time adjustments for simple low-dollar claims issues and a provider escalation team that time-sensitive calls can be transferred to for real-time resolution. In addition, our real time speech analytics system automatically flags a supervisor to join a provider services call when specific key words are said, allowing for proactive intervention.

Key to first-call resolution is our call management system, CAREConnects. CAREConnects is the proprietary agent desktop solution used by provider services. It is built around telephony systems, web capabilities (including chat and email) and self-service solutions. CAREConnects efficiently guides our associates through on-line scripting, workflows, and actions based on the callers' individual needs. Contact center associates have access to view electronic documentation from previous calls to assist with call resolution. Associates can respond to provider inquiries and document them through closure.

CAREConnects also helps us identify training needs and increases the effectiveness of training and quality of newly hired contact center associates more expeditiously. Analytics and reporting features allow us to identify repeat callers and the reasons for their calls as well as to identify trends and opportunities for continuous quality improvement purposes. To supplement CAREConnects, we use an extensive on-line resource library available to provider services. The library is easily searchable by key words and inquiry type.

Acknowledgement and Resolution within Timeframes

As discussed above, our provider services unit allows for the real time resolution of simple claim inquiries. These associates undergo four weeks of training on claims processing and are equipped with the resources to allow first call education and claim resolution to providers. Cases that cannot be resolved real time or require additional research are escalated to our provider escalation team to complete with resolution back to the provider within the required timeframe. All inquiries are documented in our system and should there be a situation where an inquiry cannot be resolved within three business days, we notify the provider of the expected timeframe for resolution which will not be more than 20 business days. This includes referrals from MLTC.

Location of Operations

Our Nebraska field-based associates will provide the majority of the support to our provider partners. These include provider services representatives, practice advisors, operations account representatives and CommUnity Advocates. These Nebraska associates are supplemented by our provider contact center, our provider website and our secure provider portal. In our 20 years of Medicaid experience we have developed highly competent provider services contact centers staffed by associates who are well equipped to help providers solve complex issues. These service centers offer a redundancy of qualified provider services associates which is especially important at program start when a large volume of calls is anticipated or in the event of a natural disaster. These highly trained associates are equipped to deliver exceptional provider service and first-call resolution at program start. Associates will also undergo

additional Heritage Health plan training including the geography of the state, the culture and correct pronunciation of cities, towns, and surnames.

Measuring and Monitoring Call Accuracy and Caller Satisfaction

Our approach to quality monitoring is extensive and supported through a dedicated, specialized quality assurance team as well as supervisors. Continuous evaluation occurs through our quality oversight program which includes call monitoring of at least eight calls per month per associate, secret shopper calls, real-time audits, and random sampling audits. Supervisors monitor the results for accuracy of response and telephone etiquette, to learn about individual associate strengths and weaknesses, and to identify where coaching is necessary. These efforts are supplemented with real-time listening sessions where supervisors observe the call unobtrusively. All calls are recorded and stored for 10 years.

Our quality monitoring activities are supplemented by post-call provider satisfaction surveys to assess the provider's experience with provider services. The results are analyzed for individual opportunities as well as broader organization or team opportunities for improvement.

Contact Center Monitoring to Ensure Adherence to Performance Standards

The heart of the contact center operation is our command center, located in our headquarters in Tampa, Florida. It is the control center for all provider service functions and performance. The command center provides real-time monitoring of service levels for more than 200 different skills and call types and coordinates action to achieve service targets. The command center operation also allows us to quickly and seamlessly adjust to call volumes or emergency situations so providers can easily and quickly get resolutions to their concerns or questions. See **Figure 2** for a sample of our provider services performance monitoring .

Figure 2

PROVIDER
Sample Performance Monitoring/3rd Quarter 2014

	Avg. Speed of Answer		Abandonment Rate %		Service Level		Avg. Hold Time	
	Target	Measure	Target	Measure	Target	Measure	Target	Measure
FL	<30	13	<5%	1%	90%	90%	<3 min	00:01:03
GA		25		2%	80%	84%		00:01:11
HI		18		2%	80%	88%		00:01:50
IL		21		2%	80%	86%		00:01:12
KY		27		2%	80%	82%		00:01:40
MO		22		3%	90%	89%		00:01:26
NJ		20		2%	90%	86%		00:00:50
NY		29		2%	80%	81%		00:01:23
SC		22		2%	80%	85%		00:00:51
TOTAL		21		2%		86%		00:01:16

Our contact center metrics will comply with the Heritage Health plan contact center standards including an average speed of answer (ASA) of 30 seconds and an abandonment rate of not more than five percent. We routinely meet or exceed contact center standards across multiple states. For example, in our Florida affiliate, we handled more than 300,000 provider calls in 2014 with an ASA of 18 seconds.

CommUnity Assistance Line

In addition to the provider service line, our CommUnity Assistance line is staffed by 36 CommUnity Liaisons and operates Monday through Friday from 9:00 a.m. to 6:00 p.m. Eastern Time to help provider offices and members find and access social services, including transportation, food and utilities.

SECTION IV.J PROVIDER SERVICES

49. Provide an overview of the MCO's proposed provider website, including examples of information that will be available on the website and on portals for providers.

Include proposed resources and tools that will be of use to providers. Please provide a description of technology that will be used to enhance the provider website.

(Page limit 5 pages excluding sample resources, tools and materials)

REACHING PROVIDERS WHERE THEY ARE: AN OVERVIEW OF WELLCARE'S PROVIDER WEBSITE

Our Nebraska provider website will be an important communication tool to inform, educate and communicate with providers about the Heritage Health plan and WellCare. It will also offer important resources and tools for providers including tools for claim submission, claim status check, prior authorization submission and online training modules. Our policies and procedures ensure our website will be maintained with accurate and current information and we will follow all written guidelines included in Section IV.G of this Request for Proposal (RFP).

Website Adoption

In October 2015, there were approximately 320,000 visits to our provider pages.

Our Nebraska specific website will be Section 508 and HIPAA compliant as well as accessible 24/7 for network and non-network providers seeking information about the Heritage Health plan. It will also meet any other applicable privacy and security requirements. Our provider website (**Figure 3**) has both public (unsecured) and private (secured portal) environments and is accessible through an internet connected device with a browser, including smart phones.

Figure 3

Examples of Information Available

A detailed description of our provider website content follows as **Figure 4**. In addition to meeting minimum requirements, we have multiple tools to enhance the providers' experience including no-cost electronic claims submission and online training.

Figure 4: Provider Website Content

Provider Website Content	
Our dedicated provider website will include a variety of information for contracted and prospective providers, as well as the general public, that can be easily accessed without supplying log-in credentials. Available searchable information and functionality includes, but is not limited to the following:	
Searchable Provider Handbook	➢ Provider helpline information ➢ Electronic funds transfer enrollment ➢ Grievances and appeals and how to file a complaint ➢ WellCare policies and procedures ➢ Available in PDF format with searchable content
Searchable Provider Directory	➢ Find-A-Provider tool is refreshed daily with current information on network providers that include: ▪ Primary Care and specialists ▪ Urgent Care Clinics ▪ Federally Qualified Health Clinics and Rural Health Clinics ▪ Laboratories and radiology providers ▪ Behavioral health providers ▪ Hospitals ▪ Pharmacies
Pharmacy preferred drug list	➢ Online searchable drug tool
Other Helpful Information	➢ Contact information including numbers for provider service staff and prescription filing questions ➢ Quarterly provider newsletters ➢ Overview of enhancements for website functionality ➢ Limitations on provider marketing ➢ Appointment and access standards reminder ➢ Quality and health news ➢ Information and an online request for network participation ➢ Forms and documents repository ➢ Upcoming provider trainings and training manuals ➢ Clinical practice guidelines ➢ Companion and quick reference guides ➢ Frequently asked questions ➢ Member rights and responsibilities ➢ How to obtain prior authorizations or referrals including pharmacy prior authorization requirements ➢ WellCare formulary and Nebraska preferred drug list ➢ MAC pricing through pharmacy benefit manager (PBM) link ➢ MLTC bulletins, as applicable to MCO
Links to External Partners	➢ Delegated subcontractors ➢ MLTC website and other related websites ➢ WellCare Corporate

Provider Website Content	
Inquiry submission	➢ Contact us feature ➢ Allows providers to offer feedback and submit questions
What's new	➢ Identifies newly added sections
Secure Provider Portal	
Our secured environment for the provider website, requiring login and password credentials, gives our providers an opportunity to access various easy-to-use tools to obtain information and perform day-to-day tasks such as:	
Member Information	➢ Eligibility verification ➢ PCP assignment information ➢ Pharmacy utilization ➢ Inpatient admission log ➢ Membership panel assignment report ➢ Member care gaps and member care plans
Claims Support	➢ No-cost electronic claims submission via direct data entry. Includes real time HIPAA EDI compliance check supporting Strategic National Implementation Process (SNIP) data validation with error responses ➢ Check claim status ➢ Edit and rebill a claim (corrected claim)
Authorization Support	➢ Prior authorization submission ➢ Check authorization requirements ➢ Check status of prior authorization
Training	➢ Complete assigned training modules such as ▪ Provider Orientation ▪ Cultural Competency: Provider Program ▪ Secure Provider Portal Overview ▪ Interactive HEDIS Online Portal Training
Contact Form	➢ Request additional information

We will make MLTC-approved formulary changes, prior authorization requirements, clinical criteria and revisions available to providers on our website at least 30 calendar days prior to their being effective.

Provider Resources and Tools

As summarized above, WellCare has in place numerous resources and tools on the provider website and secure provider portal to streamline provider office processes. These include:

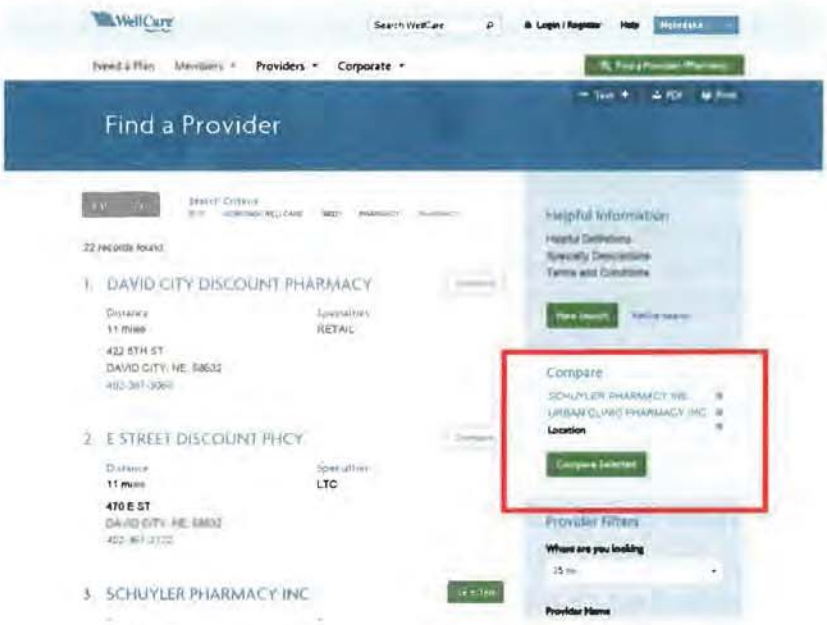
Searchable Provider Directory

Our Find-a-Provider capability makes it easy for providers, members, MLTC staff, WellCare associates and anyone else to locate network providers through an intuitive search refinement tool found on our website. Network providers, facilities and pharmacies are included with information about clinical specialization, languages spoken, disciplines and demographics. This tool allows the user to quickly refine their search based on the provider's gender, languages, accessibility considerations, provider and specialty types and distance from a user-chosen location, whether work, home, or their current location. Provider information is updated daily. Individuals do not need to login for access.

Another key feature of the Find-a-Provider tool is our comparison tool (**Figure 5**). Using the same intuitive search capability, up to three providers can be selected and compared to each other.

The initial search response provides information that includes telephone numbers, service site addresses and contact information. Additionally, distance and navigation information is readily accessible from this first search result list.

Figure 5



More detailed information is available with a simple click on the provider's name. In addition to providing the summary information, details on credentialing status and other key items such as board certification, medical group affiliations, hospital affiliations, languages spoken and ages seen.

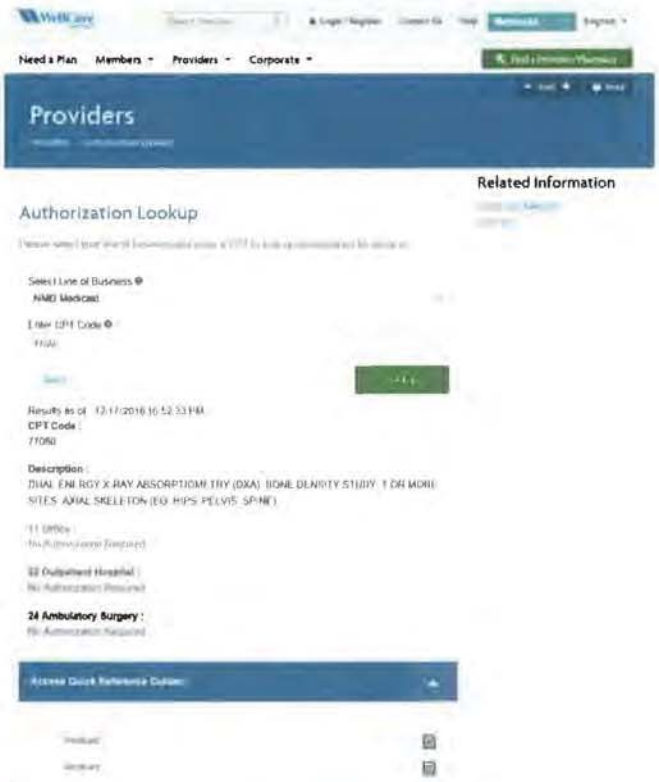
Pharmacy-Preferred Drug List

Our online searchable drug tool is available by Medicaid category of eligibility. Users can search all brand and generic drugs and view detailed drug information including actual drug name, dosage and strength, prescription drug type (brand or generic), therapeutic class, notes, and restrictions.

Provider and Member Inquiries

Figure 6

Our website has an electronic form so that members and providers can submit questions easily and securely right from their desktop or mobile device. These questions are answered by dedicated representatives who respond in the users expressed way. Electronic replies with HIPAA, payment card information or personal health information are posted to the secure portals and an email is sent to the user telling them their response is available there.



Online Authorization Submission Tool

Our online authorization submission tool (**Figure 6**) allows the submission of initial authorization and other requests.

In implementing the Heritage Health plan, WellCare will work collaboratively with MLTC and the provider community to identify program content for the provider website and additional useful resources and tools.

TECHNOLOGY USED TO ENHANCE PROVIDER WEBSITE

To ensure the consumers of our solutions are provided the maximum benefit, we obtained direct feedback from more than 750 providers and completed an independent competitive analysis to support the recent redesign of the WellCare.com website. Based on our analysis and the direct feedback, WellCare deliberately selected technology solutions that best support those needs.

To provide a uniform and consistent look and feel from any device (desktop, smartphone, tablet), the site is built using a responsive, adaptive framework which ensures our web pages are automatically rendered at the most appropriate scale for the users device, The chosen technologies that implement these latest concepts in digital user experience include **HTML5**, **CSS (Cascading Style Sheets)**, and **JavaScript**.

To ensure that timely, dynamic content is provided to users based on their individual personas (location, relationship to WellCare, and prior interactions), WellCare selected **Sitecore**, the world's leading web content management and personalization engine for .NET/Windows.

Web analytics is a core feature of our digital platform for which we are using a two-pronged technology approach. Our public site is integrated with **Google Analytics** and is complemented by Sitecore's own analytics engine called **Sitecore DMS** to provide advanced analytical and decision-making capability. To enable dynamic search of both content and custom data and leverage the latest features, search engine features such as incremental searching, progressive type-ahead, and text filtering using the **Coveo Enterprise Search** (CES) technology are embedded into the application.

Our digital investment strategy includes continuous enhancements and improvements, including the migration of our secure provider portal to this new digital platform, complete with a redesigned user experience based on extensive feedback from our provider community.

SAMPLE RESOURCES, TOOLS AND MATERIALS

We have included as attachments some of the many resources, tools, and materials found on our provider website, as detailed previously in this response.

Attachment 49a_HEDIS Online Training

Attachment 49b_Web Quick Guide

Attachment 49c_HEDIS Pediatric Quick Trips

Attachment 49d_Provider Services Quick Access Guide

SECTION IV.J PROVIDER SERVICES

50. Describe the MCO's proposed provider education and training program, including:
- A description of the training program.
- A work plan that outlines education and training activities, including frequency of office visits to conduct activities.
- A listing of the types of materials and content the MCO will distribute (include three samples of materials).
- How the MCO will evaluate usefulness of educational sessions and utilize feedback to influence future training sessions.

(page limit 5 pages, excluding sample materials)

WellCare's Integrated Approach to Provider Education and Training

WellCare recognizes the value of a well-informed network of providers, and provider communications is a priority of our senior executive and local management teams. As we implement the Heritage Health plan, we will bring to bear all necessary resources up front to ensure Nebraska providers are ready to partner with us and participate in our network. Our experience in other states demonstrates that effective, two-way provider communication improves service delivery for our members and increases provider satisfaction. We will build on our more than 20 years of experience training providers on Medicaid managed care programs throughout the country to develop Nebraska-specific programs to train, onboard and grow our network. Our activities will include:

- Extensive training curriculum to providers
- A variety of modalities and locations, accessible real time at the time and frequency needed
- Specialized training sessions by provider type including nursing homes, and behavioral health
- All training material placed on our provider website for convenient 24/7 access

Go Live Provider Onboarding Activities

We recognize that provider network preparation and education will be critical to the successful launch of the WellCare's Heritage Health plan. We have already informally been meeting with individual providers and provider groups including the Nebraska Hospital Association, the Nebraska Medical Association, the Nebraska Association of Behavioral Health Organizations, Children and Family Coalition of Nebraska, Nebraska Pharmacists Association, Health Center Association of Nebraska and the Tribal 638 Clinics/Indian Health Services. These meetings have informed our strategy for Nebraska including provider education and outreach activities.

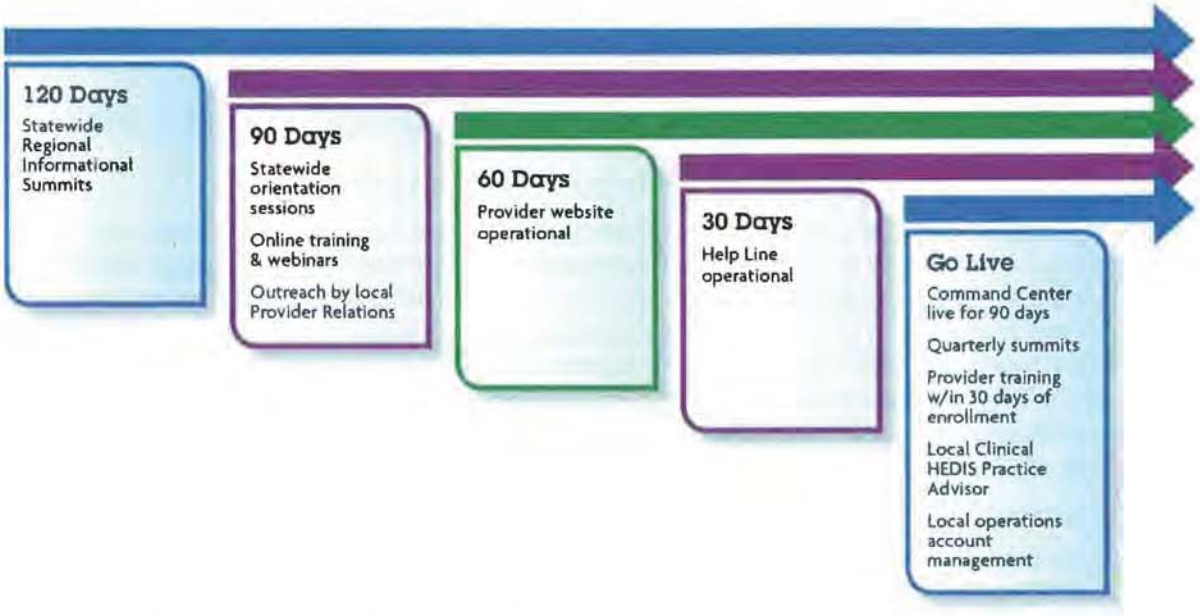
Upon award of the contract, we will continue to build on those relationships with ongoing engagement, and begin our formal provider educational initiative 120 days prior to the first enrollment date (See **Figure 7**). We will invite all providers to attend statewide orientation sessions scheduled at convenient locations throughout their area and continue these sessions through program launch and beyond. We will offer the same curriculum through multiple delivery modalities including classroom training, online, and video training, to allow as many providers as possible to participate. For providers who are unable to attend a formal training session, we will review the critical elements of the curriculum with them during an office visit. We will accommodate the training times and days of the week requested by our providers, including evenings and weekends, as needed through the implementation period.

Our delivery modalities will promote efficiency and accommodate the varied needs of our providers. In addition to provider office visits these modalities will include:

- Statewide orientation sessions in regional offices as well as at hospitals or community centers near a provider's location. Subject matter experts on-site to assist with questions and demonstrate tools.

- Web-based provider training, featuring real-time interactive courses conducted via the web. Recorded provider trainings will also be available on our website.
- Secure provider portal training offering online training modules that are available to providers 24/7. Includes provider orientation, provider portal overview and interactive HEDIS online portal modules.
- Short videos hosted on a WellCare branded YouTube channel. Videos will cover topics from completing claims forms to quick reference guidelines to help improve processes for providers.

Figure 7



Nebraska Provider Support During Go Live

WellCare will also use best practices from other WellCare implementations to facilitate the smooth transition of members into the Heritage Health plan. At program go-live and continuing for the first four weeks beyond implementation, a team of experienced provider services associates will be available in a Command Center environment to respond immediately to provider questions and facilitate the prompt resolution of any issues. Regional staff will also be deployed to key providers with anticipated large member volume for onsite provider support.

Initial Training

For newly contracted providers, our provider services department sends a welcome letter that introduces our website and provider portal. The provider services representative follows this with an introductory phone call to make initial training available within 30 calendar days to the provider, whether face-to-face, telephonic, or through web-based training. Initial training includes digital solution registration and website capabilities, access standards and audits, HEDIS quality reports, review of the Medicaid Quick Reference Guide, Heritage Health plan requirements, authorizations, claims, appropriate utilization of emergency department services, behavioral health emergencies, identifying the special needs of the member (including the LTSS populations), and limitations on provider marketing. The provider services representative follows up with the practice two to three weeks after the scheduled orientation to review and answer any questions. The provider services representative also conducts specialized training and education for nursing facilities regarding billing procedures when a member transitions from a skilled to a custodial level of care.

Providers New to Integrated Managed Care contracts

WellCare understands that many of the providers will be new to integrated managed care and some will be moving from Medicaid or Medicare only or carve-out arrangements. To support these providers we will develop and offer specialized initial and ongoing training on billing procedures, authorization requests, and other processes that will be new to these providers. Specialized training will also be developed for behavioral health providers and pharmacists. We will notify MLTC of these sessions and welcome their attendance.

Ongoing Training

Providers will receive ongoing training and education throughout the duration of this contract through the following activities:

- Online training available on the provider website, website articles and self-study programs
- Onsite visit training conducted by provider services representatives and regional practice advisors
- Webcasts that allow the opportunity to interact and ask questions
- Periodic amendments to the provider manual
- Provider newsletter

Examples of ongoing training topics include alcohol and substance use screening, enrollment and credentialing processes, and claims submission and payment processes.

Provider Forums

Following best practices from our other Medicaid markets, we will hold statewide provider forums to foster relationships with local staff members and create the opportunity for providers to ask questions and have open, honest dialogue on their experience with us. We will conduct these forums quarterly in regional venues across the state, and all supporting documents and follow-up questions and answers will be made available on our provider website. These forums will be open to all providers and facilitated by our Nebraska CEO or designee. We will continue to meet with Nebraska provider organizations and individual providers on a regular basis to obtain their input. Additionally, we have formal processes, such as the Provider Advisory Committee, to ensure robust facilitation of provider engagement and input. To facilitate process improvement, information discussed during the forums and association meetings will be made available to our executive management and MLTC.

WORK PLAN OUTLINING EDUCATION AND TRAINING ACTIVITIES

Our work plan (**Figure 8**) outlines educational targets, education and training activities and staff members providing the education and training. WellCare will submit a copy of the provider training handbook and training schedule to MLTC for review and approval at least 90 days prior to contract start date. Any changes to the handbook will be submitted to MLTC at least 45 calendar days prior to scheduled changes and dissemination of such changes. Documentation of training sessions and attendance will be available to MLTC upon request.

Figure 8

PROVIDER EDUCATION AND TRAINING WORK PLAN			
Activity	**Frequency and Format**	**Staff**	**Target Audience**
Initial Orientation	Within 30 days of receipt of welcome letter and as requested; available in person, telephonic, or on secure provider portal	Provider services representatives	All network providers
Ongoing Training Through Provider	Up to 18 office visits or telephonic meetings per year	Provider services representatives	All provider sites with frequency of scheduled

Provider Education and Training Work Plan			
Activity	**Frequency and Format**	**Staff**	**Target Audience**
Engagement Model			visits/interactions driven by volume of members served; and ad hoc as needed/appropriate
Pharmacy Network Improvement Program	As needed office visits or telephonic meetings, total of approximately 25 education encounters statewide per month	Pharmacy Director	PCPs, specialists, and pharmacies
HEDIS Measures	Up to 4 office visits per year	Clinical HEDIS practice advisors	PCPs serving 80% of membership; others on request
Cultural Competency	Required annually	Module available on secure provider portal	All network providers and office staff
Electronic Claims Adoption	Dedicated team to assist providers with the implementation of electronic claims transactions	Dedicated EDI support team	All network providers
Provider Forums	Quarterly in venues across the state	Lead by CEO or designee	All network providers
Providers New to Managed Care	Specialized training at program start and as needed	Provider claims educator/operations account representative	Providers transitioning from fee-for-service or carve-out arrangements
Nursing Facility training	Specialized training at program start and as needed	Provider claims educator/operations account representative	Nursing facilities
Targeted Group Education	As needed or requested	Faculty dependent on content covered	Provider type dependent on topic

Listing of Materials and Content

WellCare makes the materials shown in **Figure 9** available to providers through the provider education and training programs described above. Three samples of material are included as attachments.

Figure 9

Education and Training Material and Content	
Name	**Content**
Authorizations	➢ Guideline on authorization process
Behavioral Health Program	➢ Medication reference guide, billing resources, instructions for outpatient service requests, clinical coverage guidelines
Billing Guidelines	➢ Billing resources for specific services including EPSDT services
Claims Companion Guides	➢ Detailed instructions on claim submissions
Clinical Coverage Guidelines	➢ Evidence-based guidelines detailing the medical necessity of procedures or technology
Clinical Practice Guidelines	➢ Best-practice recommendations
Cultural Competency	➢ Materials and training on the secure provider portal

Education and Training Material and Content	
Name	**Content**
Electronic Funds Transfer	➢ Quick guide on how to enroll in electronic funds transfer (EFT)
Provider Responsibilities	➢ Brochure specific to educating providers on their responsibilities
Medical Management	➢ Brochure on key objectives of our medical management program
Disease Management	➢ Brochure outlining disease management programs and how to enroll a member
Prenatal Program	➢ Description of prenatal benefits and guidelines
Fraud and Abuse	➢ Examples of fraud and abuse and how to report it
Job Aids (How to Guides)	➢ Coordination of benefits, appointment timeliness standards, website registration, corrected or voided claims, quick access to provider services
Pharmacy Reports	➢ Pharmacy utilization data to facilitate quality and cost discussions
Pharmacy Services	➢ Preferred drug list and authorization, determination and appeal procedures
Planning for Healthy Babies	➢ Website training on family planning services
Provider Handbook	➢ Encompasses all aspects of providing care to members
Provider Newsletters	➢ Includes articles to educate providers on various services, programs, benefits
Provider Orientation	➢ Orientation program for newly contracted WellCare providers
Provider Resource Guide	➢ Summary of instructions for web portal, authorizations, claims submissions, EFT, appeals, disputes, among others
Provider Summary	➢ Individual provider summary containing member gaps in care, health care utilization, HEDIS quality scores and other measures
Provider Website and Portal	➢ Depository for provider education, training material and provider tools
Quality Tools	➢ HEDIS resource guide; Care coordination: Provider tips
Quick Reference Guide	➢ Basic information and guidelines for providers

Evaluating Usefulness and Using Feedback

Some of our most successful programs were developed from provider input. For example, providers requested clinical assistance in improving HEDIS® quality measures. We recognized the value of having nurses work with providers and made an investment by adding practice advisors to field staff.

WellCare solicits provider feedback on education and training through several mechanisms:

- Annual survey asking providers to rate the quality of the provider on-boarding orientation, on-site education and technical assistance, training and educational sessions, provider tools including the website, and the quality of written communications, policy bulletins and manuals.
- Evaluation cards obtained directly after an education and training session.
- Input from individual providers is solicited during outreach activities
- Survey form on provider website rating the value of their provider services visit
- Provider Advisory Committee and other committees with provider membership

Encounter Data Submissions	59354	

WellCare follows the Centers for Medicare and Medicaid Services' (CMS) guidelines for paper claim submissions. Since Oct. 28, 2010, **WellCare accepts only the original red claim form for claim and encounter submissions. WellCare does not accept handwritten, faxed or replicated claim forms.**

Claim forms and guidelines may be found on our website at georgia.wellcare.com/provider/claimsupdates

Mail paper claim submissions to:

WellCare Health Plans, Inc.
Claims Department
P.O. Box 31224
Tampa, FL 33631-3224

Claim Payment Disputes

The claim payment dispute process is designed to address claims when there is disagreement regarding reimbursement. Claim payment disputes must be submitted to WellCare in writing within 90 days of the date of denial on the EOP.

Mail or fax the written claim payment dispute and documentation to:

WellCare Health Plans, Inc. **Fax 1-877-277-1808**
Attn: Georgia Claim Payment Disputes
P.O. Box 31370
Tampa, FL 33631-3370

Claims Payment Policy Disputes

The Claims Payment Policy Department has created a new mailbox for provider issues related strictly to payment policy issues. Disputes for payment policy related issues (EOP Codes beginning with CEXXX, IHXXX, MKXXX or PDXXX) must be submitted to WellCare in writing within 90 days of the date of denial on the EOP.

Mail or fax all disputes related to payment policy issues to:

WellCare Health Plans, Inc. **Fax 1-877-277-1808**
Payment Policy Disputes Department
P.O. Box 31426
Tampa, FL 33631-3426

Appeals (Medical)

Providers may seek an appeal through the Appeals Department within 30 calendar days of a claim denial for lack of prior authorization, services exceeding the authorization, insufficient documentation or late notification.

WellCare Health Plans, Inc. **Fax 1-866-201-0657**
Attn: Appeals Department
P.O. Box 31368
Tampa, FL 33631-3368

Grievances

Member grievances may be filed orally by contacting Customer Service or submitted via fax or mail. Providers may also file a grievance on behalf of the member with the member's written consent. Mail or fax member grievances to:

WellCare Health Plans, Inc. **Fax 1-866-388-1769**

Avesis

Dental Services – Avesis **1-800-231-0979**

Facility (e.g., hospital or ambulatory surgery center) and anesthesia claims should still be submitted directly to WellCare for reimbursement.

Transportation Non-Emergency Transportation (NET)
Non-emergency transportation is a benefit offered by Georgia Department of Community Health. Please click on the link above for information about the program, including contact information for the transportation vendors.

Outpatient Physical, Occupational and Speech Therapy Services will be handled by:
Therapy Network of Georgia Phone **1-855-825-7818** Fax **1-855-597-2697**

Prior Authorization (PA) Requirements

This WellCare PA list supersedes any lists that have been distributed to our providers. Please ensure that older lists are replaced with this updated version. Authorization changes are denoted by a Þ symbol for easy identification. Requirements that have been edited for clarification only are denoted with a ⓘ symbol.

All services rendered by nonparticipating providers and facilities require authorization. Primary care physicians must refer members to participating specialists. It is the responsibility of the provider rendering care to verify that the authorization request has been approved before services are rendered.

A searchable Authorization Lookup Tool is available on our website at: georgia.wellcare.com/auth_lookup.

WELLCARE'S PRIOR AUTHORIZATION (PA) LIST:

***Urgent* Authorization Requests and Admission Notifications – Call 1-866-231-1821 and follow the prompts.**

- Notify us of unplanned inpatient hospital admissions **by the next business day following admission** (except normal maternity delivery admissions). Telephone authorizations must be followed by a fax submission of clinical information – by the next business day.
- Outpatient authorizations may be requested by phone for urgent and time-sensitive services when warranted by the member's condition. Please have **CPT and ICD-9 codes** available. Standard authorization requests may be submitted online or via fax using the numbers listed below.

Place-of-service codes (POS) are specified for some services.*

About WellCare

- WellCare Health Plans, Inc. is a family of health plans that works with physicians and other healthcare professionals to provide our members with quality care
- WellCare has over 20 years experience, and is the leading provider of government sponsored health plans such as Medicare, Medicaid, State Children's Health Insurance Program and others
- WellCare is among the largest Medicaid and Medicare only contractor in the nation with approximately 2.2 million members as of December 31, 2010.
- Effective July 7, 2011, WellCare has contracted with the Kentucky Cabinet for Health and Family Services, Department for Medicaid Services (the "Department") to provide Medicaid and Children's Health Insurance Plan (CHIP) managed care services in seven (7) of eight (8) of the state's regions beginning November 1, 2011.

Benefits of Partnership

When you join WellCare, you gain…

- Local market focus – dedicated staff to serve providers in your communities
- Prompt provider payment – receiving claims electronically, processing claims rapidly
- Quality improvement program – patient-focused with an emphasis on preventive care
- Diverse network – selection of experienced and qualified providers who offer multilingual capabilities and cultural competency

Program Overview

- Eligibility for Kentucky's Medicaid program is solely determined by the Kentucky Department for Medicaid Services. Upon determination of eligibility, Kentucky Medicaid recipients will be enrolled with a Medicaid Managed Care plan, provided the following conditions are met:

  - The individual must reside within a Medicaid Managed Care Region
  - The individual must qualify to receive Medicaid assistance under one of the aid categories defined by the Department including, but not limited to:
    - Temporary Assistance to Needy Families (TANF)
    - Aged, blind and disabled (ABD)
      - Medicaid only; or
      - Receiving State Supplementation or Supplemental Security Income (SSI)
    - Poverty level pregnant women and children including presumptive eligibility

- For more information on Medicaid assistance, refer to the Kentucky Department for Medicaid Services at http://chfs.ky.gov/dms/.

WellCare Resources

- Providers have access to a variety of easy-to-use reference materials at **www.kentucky.wellcare.com**, including:
  - Resource Guides related to claims, authorizations, EFT and how to contact us
  - Provider Manuals
  - Clinical Practice and Clinical Coverage Guidelines
  - Provider & Pharmacy lookup
  - Quick Reference Guides provide contact information for specific departments and authorization information
  - Provider Training
- By registering for WellCare's Provider Portal, providers have access to member eligibility and co-pay information, authorization requests, claims status and inquiry, a provider inbox to receive specific messages from WellCare and provider training.
- Provider Relations representatives are available to assist in many requests for participating WellCare providers. Contact your local market office for assistance.

Provider Responsibilities

- All participating providers are responsible for adhering to the Participation Agreement and the Provider Manual.
- The Provider Manual supplements the Agreement and provides information such as:
  - Credentialing and Re-Credentialing requirements
  - Access and availability, including after-hours coverage
  - Safeguarding member confidentiality in compliance with HIPAA
  - Medical records requirements such as record retention timeframes and Advance Directive & Living Wills documentation
  - Mandatory participation in Quality Improvement projects and medical record review activities such as HEDIS® and the Department's External Quality Review Organizations (EQRO)
  - Assisting members with special health care needs, including mental, developmental and physical disabilities and/or environmental risk factors
  - Adhering to WellCare's compliance requirements
- For more information on Provider rights and responsibilities, refer to the Provider Manual.

Member Rights

- Member rights are outlined in the Member Handbooks, which are mailed to all newly enrolled members.

- Member rights include, but are not limited to, the right to:
  - Be treated with fairness, respect and dignity
  - Have the availability of language designated materials, hearing-impaired interpreter and sign language services
  - To make complaints about WellCare or the care provided
  - To appeal medical or administrative decisions WellCare has made by using the grievance process
  - A Women's Health Specialist for female members

- For more information on Member Rights, refer to the Provider Manual.

Member Responsibilities

Members are responsible for:

- Telling their PCP and other health care providers that they are enrolled in WellCare.
- Providing their PCP and other providers the information they need to care for them, and to follow the treatment plans and instructions that they and their providers agree upon.
- Becoming familiar with their benefit coverage and the rules they must follow to get care as a member.
- Informing WellCare if they have any other health insurance coverage.
- Paying their plan premiums and any co-payments or coinsurance.
- Informing WellCare about their concerns, problems or suggestions by calling Customer Service.

❑ For more information on Member Rights, refer to the Provider Manual.

WellCare's Compliance Program

- All providers, including provider employees and sub-contractors, their employees, and delegated entities are required to comply with WellCare compliance program requirements.

- WellCare's compliance requirements include, but are not limited to, the following:
  - Provider Training Requirements
  - Limitations on Provider Marketing
  - Code of Conduct and Business Ethics
  - Cultural Competency and sensitivity
  - Fraud, Waste and Abuse
  - Americans with Disabilities Act (ADA)

- For more information on WellCare's Compliance program, refer to the Provider Manual.

Covered Services

- Covered Services currently provided to WellCare's Kentucky Medicaid members include, but are not limited to:
  - Behavioral Health Services
  - Dental Services
  - Early and Periodic Screening, Diagnosis & Treatment (EPSDT)
  - Family Planning
  - Inpatient Services
  - Outpatient Services
  - Pharmacy Services
- Providers must verify patient eligibility and enrollment prior to service delivery. WellCare is not financially responsible for non-covered benefits or for services rendered to ineligible recipients. Certain covered benefits, such as non-emergency transportation, are administered outside of the managed care program.
- For more information on Covered Services, refer to the WellCare Provider Manual. Or you may access the Department's administrative regulations, 907 KAR, online at http://www.lrc.ky.gov/kar/TITLE907.HTM.

Covered Services - EPSDT

- Providers will be sent a monthly membership list which specifies the health assessment for eligible children who have not had an encounter within 120 days of joining the plan or are not in compliance with the EPSDT Program.
- Any provider who provides Early and Periodic Screening, Diagnosis and Treatment (EPSDT) screening service are responsible for:
  - Monitoring, tracking and following up with members:
    - Who have not had a health assessment screening
    - Who miss appointments to assist them in obtaining an appointment
    - To ensure they receive the necessary medical services
  - Ensuring members receive the proper referrals to treat any conditions or problems identified during the health assessment.
  - Assisting members with transition to other appropriate care for children who age-out of EPSDT services.
- The Provider's compliance with member monitoring, tracking and follow-up, will be assessed through random Medical Record Review audits conducted by the WellCare Quality Improvement Department and corrective action plans will be required for providers who are below 80 percent compliance with all elements of the review.
- For more information on EPSDT Covered Services or the periodicity schedule, refer to the Provider Manual and the Pediatric Preventive Health Care Guidelines at www.kentucky.wellcare.com. Or for more information on the Department's administrative regulations, visit the Department's website at http://chfs.ky.gov/dms/.

Behavioral Health

WellCare

- ❑ All provisions contained within the manual are applicable to medical and behavioral health providers unless otherwise noted in the *Behavioral Health* section of the Provider Manual.
- ❑ Coordination and continuity of care between behavioral health care providers and medical care providers is critical to positively influencing member outcomes.
- ❑ PCPs may provide any clinically appropriate behavioral health services within the scope of their practice. Conversely, behavioral health providers may only provide physical health care services if they are licensed to do so.
- ❑ Behavioral health providers are required to:
  - Use the DSM-IV multi-axial classification when assessing member for behavioral health services and document the DSM-IV diagnosis and assessment/outcome information in the member's medical record;
  - Contact the member within twenty-four (24) hours of a missed appointment to reschedule the missed appointment; and
  - Submit, with the member's or member's legal guardian's consent, a summary report of the member's behavioral health status quarterly, at a minimum, to the PCP.
- ❑ All members receiving inpatient psychiatric services must be scheduled for outpatient follow-up and/or continuing treatment prior to discharge, and the outpatient treatment must occur within seven (7) days from the date of discharge.
- ❑ For more information on behavioral health, refer to the Provider Manual and the Quick Reference Guide.

Pharmacy

WellCare

- To ensure members receive the most out of their pharmacy benefit, please consider the following guidelines when prescribing:
  - Follow national standards of care guidelines for treating conditions;
  - Prescribe drugs on WellCare's Preferred Drug List (PDL);
  - Prescribe generic drugs when therapeutic equivalent drugs are available within a therapeutic class; and
  - Evaluate medication profiles for appropriateness and duplication of therapy.

- WellCare has pharmaceutical utilization management (UM) tools that are used to optimize the pharmacy program. These UM tools are described in detail in the Provider Manual including:
  - Preferred Drug List (PDL)
  - Drug Evaluation Review (DER) process
  - Mandatory Generic Policy
  - Step Therapy (ST)
  - Quantity Level Limit (QL)
  - Pharmacy Lock-In Program
  - Network Improvement Program (NIP)

Pharmacy (cont.)

Additional important information covered in the Provider Manual includes:

- ❑ Non-covered drugs and/or drug categories that are excluded from the Medicaid benefit;
- ❑ Over-the-Counter (OTC) items listed on the PDL require a prescription. All other OTC items offered as an expanded benefit by WellCare do not.
- ❑ Requesting additions and exceptions to the PDL through the Drug Evaluation Review (DER) process, including information on:
  - How to submit a DER
  - When a DER is required, including, but not limited to:
    - ❑ Most self-injectable and infusion medications
    - ❑ Drugs not listed on the PDL
    - ❑ Drugs listed on the PDL but still require a Prior Authorization
    - ❑ Brand name drugs when a generic exists
- ❑ Requesting an appeal of a DER request decision.

- ❑ For more information on WellCare's Pharmacy program, refer to the Provider Manual, the Quick Reference Guide, and the web for appropriate Forms, Documents and contact information.

Utilization Management (UM)

- WellCare's Utilization Management (UM) program includes review processes such as notifications, referrals, prior authorization, concurrent review and/or retrospective review.
- **Prior Authorization**

  - WellCare requires prior authorization for elective or non-emergency services as designated by WellCare.
  - Reasons for requiring authorization may include:
    - Review for medical necessity
    - Appropriateness of rendering provider
    - Appropriateness of setting
    - Case and Disease Management considerations
  - Decision timeframes are determined by either NCQA requirements, contractual requirements or a combination of both. See the Provider Manual for decision timeframes.
  - Prior authorizations may be requested via fax, phone or online at www.kentucky.wellcare.com. For more information on prior authorizations, and the information necessary to include in your request, refer to the Provider Manual and Quick Reference Guide.

Utilization Management (UM) (cont.)

WellCare

- **Concurrent Review**
  - Is initiated as soon as WellCare is notified of a member's admission to a hospital, LTAC, skilled nursing facility or acute rehabilitation facility.
  - Subsequent reviews are based on the severity of the individual case.
  - Providers are required to submit notification and clinical information on the next business day after the admission, as well as upon request from the WellCare Concurrent Review team.
    - Failure to submit necessary documentation may result in non-payment.
  - Discharge Planning begins upon admission and is designed to identify the member's post-hospital needs
    - The attending physician, hospital discharge planner, PCP, ancillary providers and/or community resources are required to coordinate care and post-discharge services to ensure the member receives the appropriate level of care.
  - Transitional Care Management identifies members in the hospital and/or recently discharged who are at risk for hospital readmission.
    - The member is contacted by a WellCare Care Manager to assist the member in reducing avoidable readmissions and/or offer Case/Disease Management.

Utilization Review (UM) (cont.)

WellCare

❑ Retrospective Review

- WellCare will review post-service requests for authorization of inpatient admissions or outpatient services.

- This review includes making coverage determinations for the appropriate level of services, quality issues, utilization issues and the rationale behind failure to follow WellCare's prior authorization guidelines.

- A retrospective review can be initiated by WellCare or the provider.

❑ Transition of Care

- Members identified by the treating provider as having "special circumstances" such as a disability, a congenital condition, a life-threatening illness or is past the 24th week of pregnancy, are eligible for transition of care.

- During the first 90 days of enrollment, authorization is not required for those members with previously approved services by the state or another Managed Care plan.

- The member may continue to receive ongoing out-of-network treatment until the member is transitioned to an in-network provider.

- WellCare's obligation to pay expires:

  - ❑ Beyond the 90th day after the effective date of the termination from the previous plan
  - ❑ Beyond 9 months in the case of a covered person who at the time of the termination had been diagnosed with a terminal illness
  - ❑ Beyond the first 6 weeks following delivery of a newborn.

- In the event you are providing treatment to a member identified as having "special circumstances", please notify the UM department.

Utilization Management (UM) (cont.)

WellCare

- Refer to the Provider Manual for additional information including, but not limited to:
  - Criteria for UM decisions
  - Decision timeframes for service authorizations
  - Non-covered services and procedures
  - Limits to abortion, sterilization and hysterectomy coverage
  - Reconsideration for adverse determination (i.e., appeal)
  - WellCare Proposed Actions
  - Individuals with Special Health Care Needs (ISHCN)
  - Second Medical Opinion
  - Authorization request forms and Prenatal Notification Form.

- Forms are made available to assist you in gathering all pertinent information to enable WellCare to provide a timely response to your request.
- For more information on Utilization Management, Case Management and Disease Management, refer to the Provider Manual. For more information on authorizations and/or how to contact UM, CM and/or DM, refer to your Quick Reference Guide.

PCP Notification of Admissions

- Wellcare recognizes the importance of timely physician follow-up for members who are discharged from an acute care hospital to home. Timely and effective physician follow-up care enhances the quality of the member's health.

- Contracted PCPs will receive a "real-time" fax notification alerting them when an assigned member is hospitalized. The notification will contain sufficient information for the PCP to schedule timely and appropriate post-hospital follow up.

- Monthly summary reports by PCP can be generated upon request or at the discretion of Provider Relations to trend admission events by hospital and PCP.

- It is imperative providers frequently update contact information such as fax and phone numbers by contacting Customer Service or your Provider Relations representative.

Quality Improvement Program

- WellCare's Quality Improvement Program activities include, but are not limited to:
  - Monitoring clinical indicators or outcomes
  - Monitoring appropriateness of care
  - Quality studies
  - Healthcare Effectiveness Data and Information Set (HEDIS®) measures
  - Medical record audits
- Providers are contractually responsible for participating in quality improvement projects and medical record review activities.
- HEDIS® is a mandatory process that occurs annually. It is an opportunity for WellCare and providers to demonstrate the quality and consistency of care that is available to members
- WellCare is pleased to offer our Pay for Quality (P4Q) incentives for providers who meet certain quality indicators and outcomes. Additional information about this program is forthcoming.
- For more information on WellCare's Quality Improvement Program, refer to the Provider Manual.

Claim Submission Requirements

- Claims, paper and electronic, should include all necessary, completed, correct and compliant data including:
  - Current CPT and ICD-9 (or its successor) codes
  - Tax ID
  - NPI numbers
  - Provider and/or practice name(s) that match those on the W-9 initially submitted to WellCare
  - Correct taxonomy code consistent with Provider Demographic Information for the covered services being rendered
  - A preauthorization number, if applicable
- WellCare encourages providers to submit electronically via Electronic Data Interchange (EDI) or Direct Data Entry (DDE). Both are less costly than paper and, in most instances, allows for quicker claims processing.
- All claims and encounter transactions are validated for transaction integrity/syntax based on the Strategic National Implementation Process (SNIP) guidelines.
- For more information on Claims submission requirements and timeframes, refer to the Provider Manual, *Provider Resource Guide* and *Provider How-To Guide*.

Encounter Data Submission

- WellCare is required to provide encounter data to the Department for Medicaid Services that substantiates every service provided to every WellCare member.
- Financial sanctions can be imposed on WellCare by the Department for Medicaid Services if encounter data does not meet the Service Level Agreements for timeliness of submission, completeness or accuracy.
- Unless otherwise stated in the Agreement, vendors and providers should submit complete and accurate encounter files to WellCare as follows:
  - Encounters submission will be weekly
  - Capitated entities will submit within ten (10) calendar days of service date
  - Non-capitated entities will submit within ten (10) calendar days of the paid date
    - *The above apply to both corrected claims (error correction encounters) and cap-priced encounters.*
- Encounters may be submitted electronically via:
  - WellCare's preferred clearinghouse, RelayHealth
  - WellCare's Secure FTP (SFTP) process
  - WellCare's Direct Data Entry (DDE)
- For more information on Encounter Data Submission requirements and submission methods, refer to the Provider Manual.

Appeals

- Providers have the right to file an appeal regarding provider payment or contractual issues.
- If the case is not appealed within the applicable timeframe, it will be denied for untimely filing.
- WellCare will review the case for medical necessity and conformity to WellCare guidelines. Cases lacking necessary documentation will be denied.
- When submitting an appeal:
  - Supply specific, pertinent documentation that supports the appeal
  - Include all medical records that apply to the service
  - Submit the appeal & accompanying documentation to the address on the Quick Reference Guide (QRG)
- Upon review of the appeal, WellCare will either reverse or affirm the original decision and notify the provider.

- For more information on provider appeals, including submission timeframes, how to submit and determination timeframes, refer to the Provider Manual and the Quick Reference Guide.

Grievances

- A provider may not file a grievance on behalf of the member without written consent from the member as the member's representative.
- Providers have the right to file a grievance no later than thirty (30) calendar days from the date the provider becomes aware of the issue generating the grievance.
- WellCare will provide written resolution to the provider within timeframes established. Extensions may be requested by WellCare and/or the provider.
- Providers may submit a grievance in writing
- For more information on member and provider grievances, refer to the Provider Manual and Quick Reference Guide.

For More Information...

WellCare

- Review the ***Provider Manual*** for more detailed information about provider requirements and how-to's including:

Provider and Member Administrative Guidelines	Claims	Credentialing
Utilization Management and Case & Disease Management	Quality Improvement	Appeals and Grievances
Delegated Entities	Compliance	Pharmacy Services

- Refer to the ***Provider Resource Guide*** and ***Provider How-To Guide*** as your one-stop-shop guides to the most common transactions with WellCare, including:
  - Registering for, and how to use, WellCare's provider portal such as member eligibility and co-pay information, authorization requests, claims status and inquiry, provider news and more;
  - How to file a claim via paper, electronically or via WellCare's Direct Data Entry (DDE);
  - How to file a grievance; and
  - How to file an appeal.
- Refer to the ***Quick Reference Guide*** for authorization requirements, addresses and phone numbers for key departments.
- Refer to the corporate ***Clinical Practice Guidelines*** and ***Clinical Coverage Guidelines*** to determine medical necessity, criteria for coverage of a procedure or technology, and best practice recommendations based on available clinical outcomes and scientific evidence.
- Contact your Provider Relations representative to schedule an in-service meeting.

SECTION IV.J PROVIDER SERVICES

51. Describe the MCO's proposed approach to promoting communication between providers and the MCO. Include a discussion of how the MCO will work with providers to improve administrative efficiencies, and engage providers in developing and monitoring clinical policies and operational issues.

Discuss how the provider network liaison will work with the Provider Advisory Committee to respond to provider concerns, develop provider trainings, and enhance MCO-provider communication strategies.

Provide examples of how the MCO has successfully collaborated with providers to identify necessary changes and how these changes have been implemented. *(Page limit 2 pages)*

PARTNERSHIP AND TRANSPARENCY: THE KEYS TO PROMOTING COMMUNICATION

Across our affiliate plans, WellCare of Nebraska uses multiple strategies to communicate with our provider partners because we know that we can't achieve our goals to enhance the quality of life for our members, improve overall population health outcomes and reduce costs in the Medicaid program without an engaged provider network. These strategies range from the informal, such as forums with local leadership and providers to formal, such as the Provider Advisory Committee and monthly newsletters.

Communication with providers must be two-way to be effective. In implementing the Heritage Health program, we intend to establish engagement strategies to ensure that we not only are communicating important information to providers, but that we can solicit formal and informal feedback from providers to add to our many efforts for continuous programmatic and quality improvement.

In addition to meeting the requirements set out in Section IV.J of this RFP, other methods we will use to promote communication between WellCare of Nebraska and our Heritage Health providers includes:

- Quarterly roundtable discussions or forums with WellCare of Nebraska leadership
- Provider membership on oversight, quality and clinical committees including the Credentialing, Utilization Management, Clinical Advisory, Corporate Compliance, and Pharmacy and Therapeutics Committee
- Development of a formal Provider Advisory Committee to respond to provider concerns and develop provider trainings as well as get feedback on key initiatives or administrative changes
- Placement of provider services staff in our office in Lincoln as well as in welcome rooms in key locations across the state, including Omaha, Kearney, Scottsbluff and Norfolk to provide in-person support and a personal connection for individual and groups of providers to connect with us
- E-mail alerts as outlined by MLTC to ensure a broad and continuous education of our system and the greater health care landscape at large
- Monthly newsletters

ENGAGING THE PROVIDER ADVISORY COMMITTEE TO ENHANCE OUR PARTNERSHIP WITH PROVIDERS

In implementing the Heritage Health plan, we will use our Provider Advisory Committee to obtain input on a wide number of topics affecting our providers including administrative efficiencies, clinical policies, and operational issues. Examples of committee discussion items include health plan and provider experiences, coordination of care, quality initiatives, provider communication needs and educational opportunities, the integrated care model, operations, and access to care.

Our provider network liaison, who is identified as the provider services manager, will work directly with the Provider Advisory Committee to:

- Establish processes for responding to provider concerns

- Develop provider trainings in response to identified needs or program changes
- Enhance our provider communication strategies

It is important to note that we will ensure providers from different regions of the state are included in our Provider Advisory Council as well as other various opportunities to engage with us so that rural, frontier and urban provider concerns are equally heard and addressed. Varying provider types are reflected on the various committee structures so whether it's a primary care provider, a behavioral health specialist, a pharmacist, or a provider who mainly serves individuals with disabilities, they all have a voice in our processes.

Engaging providers on clinical policies, operational enhancements and administrative efficiencies

Through these many layers of engagement with providers, we will consistently seek opportunities to streamline administrative processes while focusing on clinical practices that best serve our members. To that end, in addition to the requirements outlined in the RFP we will engage providers through:

- Training including access to our secure provider portal
- Obtaining feedback on our provider portal to ensure an efficient and effective use of this powerful tool to track practice and member information
  - Our Florida plan, for example, used the opportunity of a redesign of the provider portal to seek feedback on the changes and make additional changes to reflect provider requests and input
- Active provider participation on our clinical and quality committees with provider input built into our continuous improvement practices
  - This includes the engagement of the Provider Advisory Committee as noted above

EXAMPLES OF COLLABORATING AND IMPLEMENTING CHANGE

WellCare's Georgia affiliate provides examples of changes as a result of provider collaboration. This plan has both a Provider Advisory Committee and a Behavioral Health Provider Committee.

As a result of provider engagement on these committees, our Georgia plan is in the process of instituting program changes, including:

- Changes in the behavioral health home program that is under development to include a significant increase in payments based on feedback that the proposed rate was not sufficient for providers to consider becoming behavioral health homes
- A partnership with the largest community mental health center on a new program to provide Omega 3 to patients with new onset psychosis due to the strong evidence this will improve outcomes and prolong the time to the next psychotic episode
- A coordinated activity with the two largest independent practice associations to enroll members in a computerized cognitive behavioral therapy program (COBALT) with modules for depression, anxiety, insomnia and substance abuse while they are in their provider's waiting room
- Modifications to the care plan engagement process to include the care manager accompanying high priority and complex care management members on their next appointment to review, emphasize, and develop care plan interventions if an integrated care team meeting is not possible or timely
- Expanded care plan delivery modes from the default of fax to include others such as hand delivery, email or through the provider portal

SECTION IV.J PROVIDER SERVICES

52. Provide a description of the MCO's proposed approach to handling provider complaints. Include intended interaction and correspondence, as well as timeframes in which the MCO will acknowledge and resolve inquiries and grievances. Explain how the MCO will track provider complaints and how the MCO will use this type of information to improve provider services. Include a description of any type of internal reporting the MCO will perform, and how the MCO will use reporting information to influence the activities of the MCO's provider services representatives. *(Page limit 3 pages)*

WellCare's Approach to Handling Provider Complaints

WellCare maintains a comprehensive provider complaint program designed for ease of use as well as rapid and thorough responsiveness. Our goal is to resolve all provider complaints and inquiries accurately and timely to maintain our strong relationship with our providers. We have a strict and formal process, supported by robust tools and technology that ensures that every provider complaint is appropriately captured, logged, documented, tracked, resolved and reported on from beginning to end. In addition to resolving individual provider issues, we trend and analyze provider complaint data to identify potential systemic issues so that we can take action and prevent future sources of dissatisfaction.

Our established provider complaint process provides for the resolution of any disputes between WellCare and providers which is specific to providers. A provider complaint is defined as any verbal or written expression, originating from a provider and delivered to any WellCare employee, voicing dissatisfaction with a policy, procedure, payment or any other communication or action by WellCare.

WellCare will develop a Nebraska specific written policy and procedure describing our provider complaint system, leveraging similar documents from other programs. These policies and procedures will be submitted to MLTC for review and approval at least 45 calendar days before the contract's start date. As part of our initial and ongoing training, provider service associates are trained to distinguish between a provider complaint and a member grievance or appeal for which the provider is acting on the member's behalf.

A description of our provider complaint process is included in our provider handbook and on our website along with instructions on how to contact our provider services staff and the contact information for the staff person who receives and processes provider complaints. Our provider complaint policies and procedures will be distributed to our network providers at the time of contracting in a summary format with instructions on accessing the full policies and procedures on our website. This summary will include the ability of a provider to request a hard copy from WellCare at no charge to the provider. Out-of-network providers receive this information with the remittance advice.

We accept written provider complaints for a period of 30 calendar days, from the date of the issue or incident. We also give providers the opportunity to consolidate multiple complaints that involve similar issues, regardless of the number of individual patients or instances included in the bundled complaint. We understand there are times a provider needs to contact us with a general question, or obtain our assistance in resolving a problem. Our provider services teams are ready to assist our providers with these inquiries whether received over the phone, through email, in person or in writing. If our provider services team is unable to quickly assist the provider, they offer their assistance with helping the provider file a complaint.

Interactions, Correspondence and Timeframes to Acknowledge and Resolve

WellCare's goal is to resolve all provider complaints and inquiries accurately and timely. While the Heritage Health RFP does not appear to have mandated acknowledgement and timeliness standards governing provider complaints, our internal standard is to resolve all provider complaints within 45 calendar days of receipt and to provide written notice of the disposition. We have dedicated personnel that are authorized to receive and process provider complaints and all WellCare executives who have the

authority to review and resolve provider complaints are involved in the provider complaint process. Provider complaint data is reviewed by the Customer Service Quality Workgroup Committee, Utilization Management Committee (UMC) and the Quality Improvement Committee. Corrective actions are identified, as appropriate, and action plans are developed and monitored. Network providers serve on UMC and offer input through the review process.

Turn-Around Time
In third quarter 2015, WellCare resolved 100% of Medicaid provider complaints within 36 days.

We strive for the real-time resolution of all provider inquiries. In some cases, inquiries are resolved in real-time by a provider services associate who can appropriately clarify matters, provide necessary information, or rectify misinformation. When a provider services associate is not able to resolve an inquiry at the time of the call, we have designated departments with enhanced system capabilities that can take ownership of the call, a provider claims support team that handles high-level claims inquiries and a provider escalation team that handles highly escalated calls. If an inquiry cannot be fulfilled at the time of the call, we route the inquiry internally with all associated and available data to the responsible department. An outbound call is made to the provider within three business days from the date of the call acknowledging the issue was received and outlining an expected time frame for the issue to be resolved.

Each complaint is thoroughly investigated using applicable statutory, regulatory, contractual and provider subcontract provisions and all pertinent facts are collected from all parties in accordance with WellCare written policies and procedures. As part of the process, providers or their representatives are given the opportunity to present their case in person.

WellCare uses internal database applications to capture, track, and report the status and resolution of all provider complaints, including associated documentation, from receipt to resolution. This system captures and tracks all complaints, regardless of source or network status.

Tracking Provider Complaints and Improving Provider Services

As part of our global commitment to quality and service improvement, WellCare uses data from both provider complaints and inquiries to identify opportunities to improve our performance in functional areas such as grievance, medical management, administrative services, provider network development and handbook clarity. This allows us to address not only issues affecting individual provider satisfaction, but to also identify and address potential trends in the delivery system as a whole. As identified, prompt steps are taken to mitigate those issues that lead to provider complaints and inquiries.

Our goals for using this data are to:

- Use complaint and grievance data to drive our performance improvement process and improve operations or outcomes, or to make recommendations to the state about potential process improvements, such as a change to an administrative rule
- Improve the effectiveness and quality of our operational processes by identifying claim processing and billing errors and identifying opportunities for provider and internal claim processor education
- Increase member and provider satisfaction with the services provided by working across multiple departments (care management, provider services, configuration, etc.) to resolve member and provider concerns, creating a healthy relationship between member and provider
- Decrease the number of denial decisions that are reversed during the member and provider appeal processes by identifying repeat issues with correct billing, compliance with authorization requirements, and gaps in the provider network, then partnering with provider services and network development to educate providers and close network gaps

Examples of Service Improvements

Provider Contact Center: Our Georgia affiliate provider contact center team reviewed inquiry data from 2013 to determine the reason for increases in calls related to claims. This prompted the team to focus on first-call resolution in 2014 with the implementation of the provider claims support team, contact center technology enhancements, and additional claims training for provider services associates. With the new technology, improved claims training and the implementation of our provider claims support unit, we have seen direct correlations of reduced overall call volume.

Credentialing: In 2014 WellCare noted an increase of inquiries from providers checking on their credentialing status. When our provider complaint data began to reflect this same trend in credentialing issues, our provider services team began a thorough investigation of the entire credentialing process. The team reached out directly to some of the same providers that had filed the original inquiries and complaints and they discovered a pattern where a sample claim form was being requested and was rarely provided with the provider's credentialing packet. The provider services team determined this piece of information was not a critical element for credentialing. As a result, we removed the requirement and the credentialing team was able to quickly resolve many of the pending credentialing cases.

INTERNAL REPORTING AND ITS USE TO INFLUENCE ACTIVITIES OF PROVIDER SERVICES REPRESENTATIVES

All complaints and inquiries captured in our database applications are categorized to help easily identify trends and opportunities for improvement. WellCare produces a monthly internal report to track and trend provider complaints that include total number and type of provider complaints, date received and resolved, actions taken, and a summary of the complaint's disposition. Reports are reviewed by our provider services team to identify provider educational opportunities. As an example, if a specific complaint is received multiple times over several months, the internal report triggers our team to issue a widespread provider communication such as newsletter articles, bulletins, and field talking points to address concerns before additional complaints are received. Specific initiatives undertaken as a result of our provider feedback include:

- Outbound call unit established to proactively educate provider offices on balance billing issues and work with them to identify root cause and underlying issues. See Question 99 for additional detail.
- Clinical HEDIS practice advisors established to work with practices to improve HEDIS quality measures.
- Operations account representatives established with ability to adjust claims in real time and on-site at the provider's office.

SECTION IV.J PROVIDER SERVICES

53. Describe the MCO's plans and ability to support network providers' "meaningful use" of electronic health records and current/future Federal IT requirements. *(Page limit 1 page)*

MEANINGFUL USE SUPPORT

WellCare actively supports the use of Electronic Health Records by its providers, as well as the sharing of data through the statewide implementation of Nebraska Health Information Initiative (NeHII). The NeHII provides a secure electronic information infrastructure for sharing health information among health care organizations and offers health care providers the functionality to support meaningful use. We believe the Nebraska Health Information Initiative (NeHII) has a valuable role in transition of care by offering access to clinical records. NeHII currently holds or accesses records from a growing share of the hospitals and providers in Nebraska. WellCare was invited to provide input to the NeHII strategic planning meeting on October 2, 2105 where we encouraged NeHII to allow and encourage managed care organizations (MCOs) to provide information and have access to the data. This would facilitate member transitions between MCOs, providers and the patient centered medical home (PCMH). We were also the only known MCO to send participants to the annual Health Information Exchange (HIE) Users Group conference in late September, 2015 in Park City, Utah. We are preparing to work with any interested HIE to find mutually beneficial solutions to our common problems around medical record sharing.

FEDERAL IT REQUIREMENTS

WellCare continues to evaluate and follow federal and state guidance and requirements related to health care information technology. As meaningful use progresses from stage 1 and its focus on data capture and sharing, through stages 2 and 3 and the focus on advanced clinical processes and improved outcomes, WellCare intends to lead its internal and provider community to adopt these important goals. These federal goals align with WellCare's care model which emphasizes the right care in the right setting at the right time. WellCare regularly reviews applicable federal and state regulations and adjusts policies, procedures and training to reflect not only the letter of these regulations but to ensure the best possible care for our members.

PATIENT CENTERED MEDICAL HOME SUPPORT

WellCare has worked with providers in other states to assist them in the transition toward PCMH certification, in which EHR capabilities play an important role. This includes capitalizing on federal or state grants, or private funding to assist with seed funds to get them started. We will share data with providers across the system to help them determine the needs of their communities and determine their growth capacity and their ability to incrementally move towards a PCMH model. For example, our Georgia affiliate offers providers a PCMH pre-assessment form that includes an EHR capabilities tool.

We believe that allowing for the incremental growth of individual practices will develop a strong and comprehensive PCMH system over time, and that increasing the number of PCMH certified providers is a way to encourage provider's meaningful use of EHRs. The use of EHRs can assure that information from multiple sources is pulled together into a single system to support the comprehensive information needs of PCPs. To support providers in moving toward the WellCare PCMH recognition program, we will leverage our value-based purchasing program to provide incremental payment bonuses to non-PCMH practices with a minimum panel size who adopt EHRs.

WellCare uses other provider interaction opportunities to support meaningful use. We will direct providers to visit https://nehii.org/ to obtain more information on this program and guidance on how providers can make the NeHII connection. Our provider pre-visit checklist will include discussions about meaningful use and the adoption of NeHII.

SECTION IV.J PROVIDER SERVICES

54. Discuss how the MCO will engage and educate PCPs about their role in the provision of behavioral health services and the coordination of co-existing conditions. *(Page limit 2 pages)*

STRATEGIES TO ENGAGE AND EDUCATE PCPS IN PROVISION OF BEHAVIORAL HEALTH SERVICES

As a fully integrated health plan, our entire clinical system is designed to ensure that a whole-person, patient-centered strategy is fully executed and operational throughout all of our programs and lines of business nationally.

The June 2015 Nebraska Behavioral Health Workforce report indicated that 48 of Nebraska's 93 counties did not have a mental health provider in 2014 and 83 of Nebraska's counties were designated mental health shortage areas. This shortage of mental health providers in Nebraska requires an array of unique strategies that include supporting and enhancing the PCPs role in providing basic behavioral health services.

Our strategies include:

- Training PCPs to bolster their role in prescribing, medical management and the administration of behavioral health screenings
- Supporting prescribing PCPs with counseling for members and supporting co-location of licensed mental health professionals when possible
- Supporting the use of extender providers when appropriate and when supported by our data infrastructure to ensure quality outcomes
- Supporting and enhancing telehealth opportunities particularly to provide consultation to PCPs
- Identifying community-level leaders to bring together community stakeholders to find solutions unique to individual communities
- Ensuring services such as psychotherapy and counseling, which may not require the expertise level of a psychiatrist, are managed by behavioral health clinicians with better accessibility
- Contracting arrangements with PCPs that allow them to provide and bill for behavioral health services for which they are appropriately credentialed
- Partnerships with academic medical centers to facilitate the transfer of knowledge, resources and educational opportunities into rural and frontier communities to enhance the PCPs' ability to meet behavioral health needs

COORDINATION OF CO-EXISTING CONDITIONS

WellCare assists PCP and behavioral health providers in the coordination of care through:

- Ongoing support of provider practices with co-located services, particularly in practices like the state's Federally Qualified Health Centers (FQHCs) or 638 Tribal/Indian Health Service Clinics
- Flexibility in the use of forms, screenings and assessment tools to allow integration into EHRs
- Developing data sharing strategies either through portals, interconnectivity options or various reporting tools
- Supporting and facilitating grand rounding on shared cases with complexity
- Developing care plans for more complex members and identify care teams that include both
- Training and toolkits for both PCPs and behavioral health specialists to help them identify members where care coordination is needed and help them build strategies into their practice, such as internal rounds and consultation, to coordinate

- Relationship building with care managers, the primary care and the behavioral health care providers
- Connectivity to social safety net services, family caregiver support and other formal and informal supports
- Alternative payment structures for providers who have the infrastructure and a desire to take on more pieces of care coordination. In these structures, providers may be paid a per member per month (PMPM) to "own" management of their patients
- Supporting and monitoring the communication between the behavioral health provider and the PCP through medical record audits

An example of these coordination activities is our Behavioral Health Toolkit which supports the integration of behavioral health and primary care. The toolkit, which is posted on our website and featured in provider newsletters, helps PCPs manage their members with co-existing behavioral health conditions. Our provider services team receives training on the toolkit and educates PCPs on the integration of physical and behavioral health as part of initial and ongoing training. Plans are underway to develop PCP training modules on recovery and resiliency programs.

For PCPs who choose to operate as a PCMH, there are enhanced opportunities to coordinate behavioral and medical care delivery. As an example, through WellCare's monitoring of PCMH activities we are able to identify care gaps such as antidepressant medication initiation and maintenance to increase visibility to the PCP on their members' needs.

Finally, WellCare employs a web-based self-management tool for depression, anxiety, substance use disorders and insomnia. This tool, COBALT, allows for immediate access to self-management tools and in many instances after only one or two sessions, members are able to experience significant improvements in their symptoms. Having this capability can assist the PCP in having a ready referral to behavioral health assistance.

Our Georgia affiliate provides an example of screening for behavioral needs in primary care.

MEMBER STORY

Screening for Behavioral Health Needs in Primary Care: Integrated Teams Improve Member Outcomes

- A registered nurse who was part of a member's integrated care team was providing care coordination for the member's medical condition. Having been trained in the high rate of co-occurring depression for individuals with serious and chronic medical conditions, she administered a PHQ-9 and identified that the member screened positive for major depression. The nurse referred the member to a behavioral health care manager (BHCM) for a comprehensive assessment.
- A BHCM completed a face-to-face assessment and created a safety plan that incorporated the use of natural supports, including the member's sister. The BHCM coordinated care with a behavioral health specialist to secure an immediate appointment with a community-based provider to provide comprehensive, community-based, recovery-oriented services. While the assessment was being scheduled, the BHCM kept in contact with the member to ensure that the safety plan was followed.
- Because the care manager was trained to recognize the importance of screening in both primary care and behavioral health settings, the member received behavioral health supports and services in addition to treatment for a medical condition. Our integrated approach to addressing the continuum of member needs fostered this holistic approach to care.

SECTION IV.J PROVIDER SERVICES

55. Describe the approach the MCO will take to assess provider satisfaction, including tools the MCO plans to use, frequency of assessment, and responsible parties. Provide relevant examples of how the MCO has utilized survey results to implement quality improvements in similar programs and how these changes have improved outcomes. *(Page limit 5 pages)*

APPROACH TO ASSESSING PROVIDER SATISFACTION

WellCare assesses provider satisfaction through a number of modes designed for frequent feedback. These include post-call surveys, website surveys and our quarterly Provider Advisory Committee. In addition we administer a more formal annual provider satisfaction survey to measure provider satisfaction with our health plans. This survey is designed to support NCQA standards for health plan accreditation, as well as ensure our provider satisfaction program remains compliant with key reporting requirements and any new requirements for our health plans. The survey helps identify opportunities for improvement by asking providers for feedback on a variety of topics, including:

- Overall satisfaction and loyalty
- Contact center/member services/provider services staff
- Provider relations
- Continuity/coordination of care
- Network
- Utilization and quality management
- Finance issues
- Pharmacy and drug benefits

Results are correlated to identify the items most important to overall provider satisfaction.

TOOLS, METHODOLOGY AND FREQUENCY OF ASSESSMENT

Our annual provider satisfaction survey is conducted by SPH Analytics (SPHA), a National Committee for Quality Assurance (NCQA) certified survey vendor.

SPHA provides guidance and resources, empowering expertise and innovation in survey design, data collection, analysis, and reporting. Their survey clients include more than 225 health plans for which they mailed more than five million surveys and conducted more than seven million calls in 2014. Information obtained from this survey allows WellCare to measure how well we are meeting our providers' expectations and needs. Based on the data collected, a provider satisfaction report is produced summarizing the results and identifying individual health plan strengths and opportunities.

WellCare provides SPHA with databases that consist of eligible providers for each of our plans. Databases are de-duplicated by SPHA against all other samples based on the national provider identification number. Up to eight surveys are pulled for each provider address among high volume PCPs and specialists. If necessary the sample is filled with other PCPs or specialists. SPHA uses a two-wave mail and internet, and a telephonic follow-up survey methodology to administer the provider satisfaction survey for each affiliate. Mail surveys are considered ineligible if returned for the following reasons: bad address with no forwarding information, provider is deceased, or if the provider no longer participates with the plan. In the case of our 2015 provider satisfaction survey, a total of 5,400 surveys were completed. WellCare's aggregate composite overall satisfaction for 2015 was 81 percent.

Peer Comparisons

All survey questions have specific response options designed for inclusion in our summary rate scoring.

These scores are computed as the proportion of favorable responses to the total number of valid responses for each question and are displayed as percentages. SPHA then compares our survey rate scores with their 2013 Medicaid/Medicare book of business or trend data to establish peer comparisons.

Our health plans in Florida, Georgia, New Jersey, and New York scored significantly higher than their peer health plans on the overall satisfaction and loyalty composite. Overall satisfaction correlations included:

- Helpfulness of provider services staff in obtaining specialist referrals
- Helpfulness of provider services staff in obtaining referrals to behavioral health services
- Timeliness to answer questions and/or resolve problems
- Timeliness to resolve complaints
- Process of obtaining member information (eligibility, benefit coverage, co-pay amounts)

Florida Provider Satisfaction

Our 2015 Florida provider satisfaction survey reported 87.3% of providers would recommend WellCare to other physicians' practices.

Survey Changes Based on Provider Input

Recognizing changes in the health care environment, SPHA recently evaluated our survey tool to confirm relevance of the survey topics, determine the preferred method of completing the survey, identify opportunities to increase response rates, and identify opportunities to improve the flow and ease of completing the survey. Focus groups were held with PCPs and specialists of varying practice sizes. A new provider satisfaction survey has been developed based on the outcome of that research. WellCare will implement this new tool for 2016. Benefits from upgrading to the new tool may include:

- More providers responding
- Shorter survey to prompt response
- Added value competitor-specific overall satisfaction questions
- More balanced response scale (based on provider feedback)
- Questions/topics approved by providers and office managers

The new survey will measure satisfaction with the following: all other plans (comparative rating), finance issues, utilization and quality management, network/coordination of care, pharmacy, health plan contact center service staff, provider services, and the health plan and competitors' plans.

RESPONSIBLE PARTIES

The provider communications team manages the survey process and is responsible for the administration and dissemination of results throughout WellCare.

Beginning in 2016, SPHA will provide performance improvement consulting services, which include identification and prioritization of improvement opportunities at the aggregate level, and documentation of best practices for improvement initiatives. SPHA will consult with our individual health plans to address improvement opportunities and activities. Meetings held with each health plan will address improvement opportunities and activities, including:

- Strategic and tactical plans
- Improvement activities
- Custom questions for the following year's provider satisfaction survey

Action plans will be developed and assigned to responsible parties with progress tracked through committee.

Using Survey Results to Implement Quality Improvements and Improve Outcomes

Provider satisfaction survey data is analyzed by our quality improvement team for strengths, opportunities, and areas to monitor. These results are presented to the Survey Core Planning Committee, which is typically chaired by provider services leadership with representatives from key operational areas.

Missouri Health Plan Example

Based on the 2014 provider satisfaction survey data, our Missouri affiliate, Missouri Care implemented a performance improvement project on the exchange of information between physical and behavioral health providers to promote coordination and continuity of care. The 2014 provider satisfaction report showed that overall Missouri Care PCPs and specialists were not receiving timely feedback and reports from behavioral health providers. Behavioral health providers also reported they did not send feedback and reports as often as they should, and it was not timely when sent. The lack of feedback and reports from behavioral health providers can potentially affect members' care. It is important for providers to be aware of all aspects of care given by behavioral health providers so medication interactions do not occur or conflicting plans of care are not followed.

In an effort to improve continuity and coordination of care between PCPs and behavioral health providers, the 2014 provider satisfaction survey results were presented to Missouri Care's service improvement committee (SIC). SIC is a cross-departmental committee, which advises and makes recommendations about service issues impacting members and providers. Through the committee's discussion, it was recognized that Missouri Care's provider services representatives should have talking points to promote continuity and coordination of care between behavioral health providers and PCPs.

Additionally, in 2014, Missouri Care identified an opportunity to improve relationships with behavioral health providers. The provider services department designated one provider services representative to work exclusively with the behavioral health provider network. This provider services representative visits high volume behavioral health provider offices and offers education, such as the importance of continuity and coordination of care between behavioral health care providers and PCPs. Goals were established based on the NCQA effect size table as shown in **Figure 10**.

Figure 10

Performance Improvement Metrics					
Provider Satisfaction Survey	**2014 Rate**	**Year Over Year**	**Goal**	**Goal Met Y/N**	**2015 Goal**
Q14. Do you receive feedback/ reports from Behavioral Health Clinicians regarding patients in your care?	53.7%	Baseline	Baseline	Baseline	59.7%
Q15. Timeliness of feedback/reports from behavioral health clinicians for patients in your care?	29.4%	Baseline	Baseline	Baseline	35.4%
Q16. Do you send feedback/reports to Medical Physicians regarding patients in your care?	66.3%	Baseline	Baseline	Baseline	71.3%
Q17. Timeliness of feedback/reports from Behavioral Health provider to Medical Physicians for patients in your care.	48.9%	Baseline	Baseline	Baseline	54.9%

Georgia Health Plan Example

Based on the 2014 provider satisfaction survey data, our Georgia affiliate is in the process of implementing a performance improvement project to increase provider satisfaction where it is most needed. They have partnered with a large regional provider group to implement multiple interventions with the goal of increasing their provider satisfaction rate by 10 percent. If the project is successful, they will scale the interventions to other regions as part of their ongoing commitment to maintain a high level of provider satisfaction.

Our Georgia market has made other improvements based on provider satisfaction survey results. This includes such actions as relaxing authorization requirements, improving the provider portal functionality, creating a provider appreciation program and implementation of the enhanced provider engagement program.

WellCare of Nebraska, Inc. Response to
State of Nebraska
Request for Proposal (RFP) for
Full-Risk, Capitated Medicaid Managed Care Program for
Physical Health, Behavioral Health, and Pharmacy Services
RFP Number 5151 Z1

January 5, 2016

ORIGINAL: Volume 2 of 2

WellCare Health Plans

SECTION IV.K SUBCONTRACTING REQUIREMENTS

56. For each subcontractor included in the proposal, provide the organization's role in this project, corporate background, size, resources and details addressing the following:

- The date the company was formed, established or created.
- Ownership structure (whether public, partnership, subsidiary, or specified other).
- Organizational chart.
- Total number of employees.
- Whether the subcontractor is currently providing services for the MCO in other states and the subcontractor's location.

(Page limit 1 page per subcontracting organization)

AN INTRODUCTION TO WELLCARE'S SUBCONTRACTORS PROPOSED TO SERVE NEBRASKA HERITAGE HEALTH MEMBERS AND PROVIDERS

To complement our internal capabilities, WellCare contracts with best-in-class service providers to offer the most advanced and effective services for our members and providers. The following is a brief list of key subcontractors we propose to use to serve Nebraska's Heritage Health members and providers. Details regarding each proposed subcontractor including its proposed role in the project, corporate background, and resources follow on the subsequent pages.

SUMMARY LIST OF PROPOSED KEY SUBCONTRACTORS	
Proposed Subcontractor Name	**Services to be Provided**
Administep.com LLC	Clearing House Services for Claims and Real-Time Transaction
Advanced Medical Reviews	Utilization Management Review & Determination
Alere Health Improvement Company	Maternity Risk Assessment & High-Risk Case Management
American Well	Telemedicine Services
Audiology Distribution LLC, d/b/a HearUSA	Hearing Management Services Vendor
CareNet Healthcare Services (Infomedia)	24 Hour Nurse Line
CDR Associates, LLC	Credit Balance – Recovery
Comprehensive Health Management, Inc.	Management Services
Concentrix	Claims Processing Services
Council for Affordable Quality Healthcare	Third Party Liablity
CSI Southeast Inc., d/b/a Interpretek	Sign Language Interpretation
CVS Caremark	Pharmacy Benefit Manager
CyraCom International, d/b/a Voiance Language Services	Telephonic Translation Services
Eliza Corporation	Interactive Voice Recognition – Member Risk Assessments
eviCore Healthcare LLC, f/k/a CareCore	Utilization Management Services
Financial Recovery Group	Claims Review and Overpayment
First Recovery Group, LLC	Third Party Liability – Subrogation
FOCUS Health, Inc.	Behavioral Health Utilization Management

Summary List of Proposed Key Subcontractors	
Proposed Subcontractor Name	**Services to be Provided**
HealthIntgrated	24/7 Behavioral Crisis Line
Health Management Systems, Inc.	Third Party Liability – Coordination of Benefits, Credit Balance, Data Mining
LifePlans, Inc.	Call Center Services (Live Member Health Assessments)
McKesson Health Solutions	Clearing House
Medical Transportation Management, Inc. (MTM)	Transportation Services
Multilingual Group, Inc.	Written Translation Services
ONEIL Digital Solution, LLC	Print Services
Premier Eye Care	Vision Management Services
RR Donnelley & Sons Company	Print Services
Symphony Performance Health, Inc., d/b/a SPH Analytics	Consumer Assessment of Healthcare Providers and Systems (CAHPS) Surveys
Syrtis Solutions, LTD	Third Party Liability – Verification of Benefits Eligibility
TPUSA, Inc. (Teleperformance)	Customer Service
Translation Station, Inc.	Interpreter Services - Providers' Offices
TransUnion Healthcare, Inc.	Third Party Liability

We acknowledge this list is preliminary, and we commit to submitting all proposed subcontracts for the provision of any services under this RFP for prior review and approval a minimum of 120 calendar days prior to the subcontract's planned implementation as required by MLTC. Additionally, prior to selecting a subcontractor, we will evaluate its ability to perform the activities to be delegated a minimum of 90 calendar days prior to the planned contract start date. We acknowledge that MLTC reserves the right to participate in these evaluations, and we must submit a copy of our findings to MLTC a minimum of 30 calendar days prior to the contract's start date. We further acknowledge MLTC has the right to review and approve or disapprove all subcontracts entered into for the provision of any services under this RFP, including but not limited to, our contract with our pharmacy benefits manager.

Subcontractor name: Administep.com LLC

Subcontractor's location: 4965 Preston Park Blvd., Suite 600 Plano, TX 75093-5150

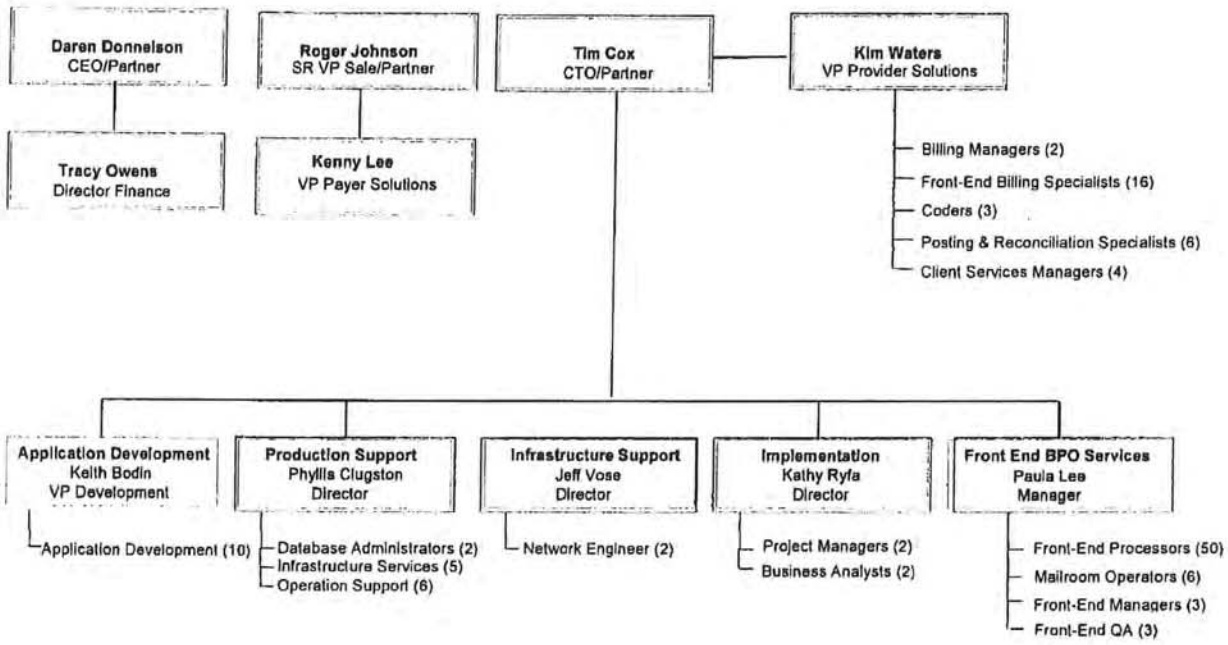
Description of role in project: Clearing House Services for Claims and Real-Time Transaction

Date company was formed, established or created: 1996

Ownership structure: Partnership; Limited Liability Company

Organizational chart:

ADMINISTEP ORGANIZATIONAL CHART



Total number of employees: 128

Does subcontractor currently provide services for WellCare: ☑ Yes ☐ No

Subcontractor name: Advanced Medical Reviews

Subcontractor's location: 2950 31st Street Ste. 100, Santa Monica, CA 90405

Description of role in project: Utilization Management Review

Total number of employees: 10

Does subcontractor currently provide services for WellCare: ☑ Yes ☐ No

Subcontractor name: TransUnion Healthcare, Inc.

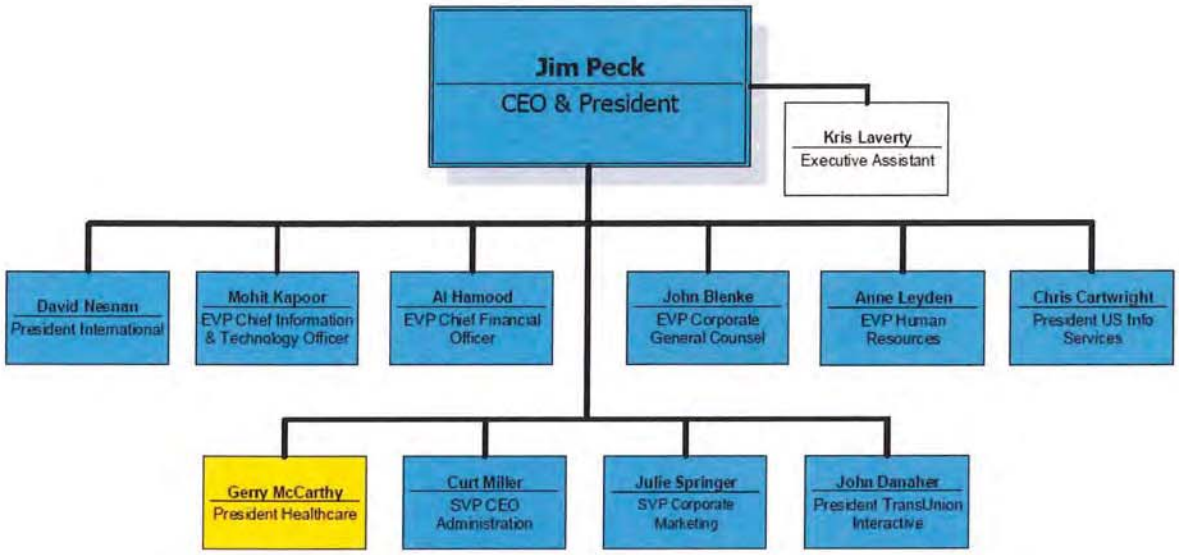
Subcontractor's location: 555 W. Adams St., Chicago, IL 60661

Description of role in project: Third Party Liability

Date company was formed, established or created: October 22, 2009

Ownership structure: Subsidiary of a publicly traded company

Organizational chart:



Total number of employees: Parent – 4,300, Subsidiary – 300

Does subcontractor currently provide services for WellCare: ☑ Yes ☐ No

SECTION IV.K SUBCONTRACTING REQUIREMENTS

57. For subcontracted roles included in the proposal, describe the MCO's process for monitoring and evaluating performance and compliance, including but not limited to how the MCO will:

- Ensure receipt of all required data including encounter data.
- Ensure that utilization of health care services is at an appropriate level.
- Ensure delivery of administrative and health care services at an acceptable or higher level of care to meet all standards required by this RFP.
- Ensure adherence to required grievance policies and procedures.
- Ensure that subcontracts do not contain terms for reimbursement at rates that are less than the published Medicaid FFS rate in effect on the date of service unless a request has been submitted to and approved by MLTC.

(Page limit 8 pages)

ENHANCING THE SERVICES WE PROVIDE THROUGH THE USE OF HIGH-QUALITY SUBCONTRACTORS

WellCare views subcontracting as a long-term business strategy where we selectively choose highly-qualified subcontractors to complement and enhance the services we provide to our members and providers. Our approach to determining what activities are sub-contracted is strategic, tailored to individual state needs and designed to enhance our operations while protecting members and providers. For example, WellCare's pharmacy operation is a hybrid model with a number of critical pharmacy functions performed in-house by WellCare personnel coupled with services performed by our contracted pharmacy benefits manager (PBM). Under our hybrid model, we retain in-house responsibility for coverage determinations, redeterminations, formulary development and management, Pharmacy and Therapeutics (P&T) Committee, quality, retrospective drug utilization reviews, rebates, and member and provider calls. Our PBM is responsible for pharmacy claims, pharmacy network development and management, audit, transition, after-hours provider calls and explanations of benefits. Similarly, ***with our decision to bring behavioral health management in house,*** we selectively use subcontractors to enhance the services we provide such as credentialing of behavioral health providers.

Our subcontractors are specialists in their respective fields and, because they work frequently with Medicare and Medicaid populations, they demonstrate broad and deep knowledge of the various populations and program requirements. ***Our ability to create a seamless experience in the delivery of benefits and services through our subcontractors is rooted in our Delegation Oversight Program, which is designed to achieve the MLTC's goals related to rigorous oversight of subcontractors.***

MONITORING AND EVALUATING SUBCONTRACTOR PERFORMANCE AND COMPLIANCE

As defined in our Delegation Oversight Program and the Nebraska Full-Risk, Capitated Medicaid Managed Care Program for Physical Health, Behavioral Health, and Pharmacy Services Scope of Work, a subcontractor is "any organization or person who provides a function or service for a MCO specifically related to securing or fulfilling the MCO's obligations under the terms of a contract." Our oversight program is based on our understanding that subcontractor relationships are an extension of us, and we are ultimately accountable for our subcontractors' performance related to all contract compliance requirements. This understanding has informed every element of our comprehensive subcontractor oversight program including our policies, organizational design, systems, and committee structure.

WellCare's Delegation Oversight System: Ensuring Quality Across 249 Subcontractors Nationally

Our industry-leading delegation oversight policies and procedures are operationalized through our

Delegation Oversight team, which is fully dedicated to subcontractor oversight across our network of 249 delegates covering 2.4 million Medicaid members nationally. This team, a unit of our Corporate Compliance department under the leadership of our Chief Compliance Officer, along with the functional business owners accountable for the contracts, are responsible for the overall onboarding of subcontractors as well as the ongoing oversight and monitoring of performance and compliance.

WellCare's Delegation Oversight team consists of subject matter experts who have experience in each of the functional areas they represent and oversee. Half of the associates are clinical professionals including registered nurses and licensed practical nurses. On an ongoing basis, these associates collaborate with functional business owners, including Encounters, Claims, Claims Audit, Utilization Management, and others regarding oversight requirements as well as pre-delegation audits, annual audits, monitoring, and completion of corrective action plans, as necessary. All delegation oversight staff members leverage the same systems and governance structure to support their day-to-day activities.

WellCare's Delegation Policy

In order to ensure quality services are provided to members and providers, it is our policy to thoroughly evaluate and certify work performed by subcontractors. Our formal evaluation occurs prior to initiating delegation with a prospective subcontractor and annually thereafter. Our monitoring of subcontractor performance and compliance is a formal, ongoing process that occurs throughout the year. Through our monitoring and oversight, activities we conduct include:

- Evaluating prospective subcontractors' abilities to perform activities to be delegated
- Ensuring subcontractors are financially stable
- Executing written contracts with subcontractors specifying the activities and reporting responsibilities delegated to the subcontractors and providing for the revocation of delegation or other sanctions if subcontractors' performance is inadequate
- Monitoring subcontractor performance on an ongoing basis and subject it to formal review according to a periodic schedule consistent with industry standards
- Identifying deficiencies or areas for improvement and taking corrective action

Ensuring Subcontractors are Able to Perform Activities at Least 90 Days Prior to Implementation

We acknowledge that we must submit all proposed subcontracts for the provision of any services to MLTC for prior review and approval. We commit to doing so a minimum of 90 calendar days prior to their planned implementation. Additionally, we understand that MLTC has the right to review and approve or disapprove all subcontracts entered into for the provision of any services under the scope of work, including but not limited to, our pharmacy benefits manager contract.

As noted in **Figure 1**, prior to delegating core functions (e.g., credentialing, utilization management, member services), WellCare performs due diligence, including a comprehensive assessment, to prospectively evaluate the subcontractor's ability to perform the activities to be delegated. This evaluation will occur a minimum of 90 calendar days prior to the planned contract start date. We understand that MLTC reserves the right to participate in these evaluations, and we commit to submitting a copy of our evaluation findings to MLTC a minimum of 30 calendar days prior to the contract's start date.

Figure 1

All WellCare pre-delegation audits are based on NCQA, and state and federal requirements. Our subcontractors are invited to log into our secure compliance system, Compliance 360 (C360), using a

unique password. There, they complete a comprehensive self-assessment and upload required supporting documentation including, but not limited to, policies, procedures, and sample reports. Once completed, the subcontractor submits the pre-assessment questionnaire and related documents to WellCare through C360 where it is routed, through embedded business rules, to a WellCare delegation auditor.

Upon receipt of the questionnaire and the supporting documentation, WellCare completes the following:

- A review of the services contract and related addenda to verify that:
  - Responsibilities are clearly delineated between WellCare and the entity
  - Appropriate statutory clauses exist
  - Appropriate periodic reporting exists to monitor the entity's activities
  - Appropriate remedial action rights exist for non-performance and/or non-compliance, including termination of services
- An extensive review of policy and procedures for the respective services to be delegated, as well as HIPAA, fraud, waste and abuse, business continuity, and compliance
- An analysis of the potential delegated entity's financial statements to verify solvency
- Verification that the entity has not been excluded from participation in the Medicare and/or Medicaid program pursuant to Section 1128 of the Social Security Act (42 U.S.C. §1320a-7) or otherwise barred from participation in the Medicaid or Medicare programs.

Upon completion of the desk audit, the auditor then performs an onsite review of the subcontractor's facilities to verify capabilities to serve our members and providers. Here, we thoroughly review the subcontractor's staffing plans, interview the staff, and validate the entity's reporting capabilities.

Upon completion of the desk and onsite audits, the auditor determines if delegation is to be approved. If issues have been identified through the pre-delegation audit, they are documented and sent to the subcontractor, who is required to remediate all delegation issues within 20 days or otherwise forego delegation of services. If no issues are identified, or they are remediated timely, the auditor submits the delegate for approval to Delegation Oversight management. Delegation Oversight management reviews and approves delegation, if warranted, and reports the delegation to the Delegation Oversight Committee, Quality Improvement Committee, Corporate Compliance Committee and Regulatory Compliance Committee. The auditor also schedules a subsequent audit six months after the effective date of delegation of services. During this follow up audit we complete file reviews, where applicable, to evaluate the subcontractor's performance against our standards and regulatory requirements.

Ensuring Ongoing Subcontractor Performance and Compliance with Contract Standards

WellCare's success with subcontractor oversight begins with the pre-delegation process (as noted above) and continues with a collaborative performance management system as represented in **Figure 2**. Our Delegation Oversight team monitors and thoroughly evaluates the provision of core services provided by subcontractors and provides reasonable assurance that the delegated functions are in compliance with federal and state regulations, contractual obligations, accreditation standards and WellCare policies and procedures. Delegation Oversight's audit and monitoring activities include, but are not limited to, the following:

- Executing the Delegation Oversight audit and monitoring plan, including cross-functional collaboration to monitor the subcontractor's operational metrics
- Performing analysis and trending of data submitted by subcontractors to identify potential anomalies and areas of non-compliance
- Confirming on a monthly basis that subcontractors remain eligible for participation in the Medicaid and Medicare programs
- Ensuring that written agreements with each subcontractor are maintained and clearly specify the

entities' responsibilities, reporting requirements, and appropriate State and Federal clauses

- Issuing formal reports for each audit performed which identify opportunities to improve the subcontractor's controls and compliance with requirements
- Issuing formal corrective action plans based on audits and monitoring results
- Ensuring subcontractors implement adequate controls to remediate issues identified during audit and oversight activities
- Recommending sanctions up to and including the revocation of delegation and termination of services if the subcontractor continuously fails to comply with established standards
- Reporting to the Delegation Oversight Committee, Quality Improvement Committees, Corporate Compliance Committee, and Regulatory Compliance Committee on the compliance risks associated with delegated entity activities

Figure 2

Continuous Monitoring of Subcontractor Performance to Ensure Contract Compliance

WellCare formally monitors subcontractor performance on an ongoing basis. WellCare monitors and trends transactional data then analyzes results of monitoring and auditing activities and solicits appropriate corrective action plans when deficiencies are identified. WellCare has a suite of reporting tools that allow transparency into monitoring and auditing activities performed, status of audits and monitoring plans, metrics on outstanding corrective action plans, and trending of subcontractor performance through scorecards. This layered approach to oversight allows WellCare to ensure subcontractors are performing in accordance with contract provisions.

WellCare conducts monthly Joint Operating Committee (JOC) meetings with national subcontractors to monitor performance with key performance indicators, communicate critical information and provide performance feedback – WellCare to the subcontractor and subcontractor to WellCare. JOC meetings are specific to the functions delegated and include participants from the subcontractor, National Ancillary, Member Services, Encounters, Delegation Oversight, Clinical Services, Claims, and Compliance.

Ensuring Receipt of Required Data Including Encounter Data

WellCare understands the significance of providing complete and accurate encounter data to MLTC for purposes such as federal reporting, rate setting, risk adjustment, service verification, quality improvement, utilization patterns, access to care determinations, and research studies. We will comply with the required format and timelines provided by MLTC and will ensure encounter data includes claims paid or denied by our subcontractors for services delivered to members through the specified reporting period. We acknowledge our responsibility to ensure that our subcontractors comply with MLTC requirements within the specified timeframes. WellCare's dedicated Encounter team is responsible for ensuring complete and timely encounter data from our subcontractors. Upon contract award, WellCare will document specific requirements for the Nebraska submissions in our Encounter Data Submission Companion Guide. We will then meet individually with each of the subcontractors to review the Companion Guide and

submission rules. We will then initiate testing by creating test files and an extensive set of test scenarios. This test cycle will be key to having accurate data submissions post-implementation. Beyond the encounter data submission set up and testing, our Encounters team will use a variety of methods to ensure ongoing receipt of accurate and complete data including

- **Contracts:** WellCare's contracts contain specific language detailing the requirements for encounter data submissions. Subcontractors are required to submit encounters in a HIPAA compliant 837 transaction format. Encounter transactions must meet standard rules set by the Strategic National Implementation Process (SNIP) edits as well as comply with all state and federal validation guidelines. Any encounter that does not meet these requirements is reviewed, adjusted, and resubmitted by the subcontractor within 30 days of the initial notification of rejection. WellCare provides HIPAA standard response files as well as custom reports which must be reviewed by the subcontractors. Subcontractors must submit 100 percent (as tracked by CDJ/835) of all encounters with an overall acceptance rate of no less than 95 percent or as superseded by specific state requirements within 90 days from date of service. Compliance with this requirement is monitored monthly and measured as an aggregate of 12 months via Encounter Scorecard Monthly Reports.

  For the two most recent reporting periods, our subcontractors had an average overall encounter acceptance rate of 95 percent.

- **Encounter Scorecard Monthly Reports:** As a data-driven organization, our Encounter Scorecard Monthly Reports are a key element of our oversight program. The scorecards track submission frequency and volume, compliance and accuracy of provider submissions by subcontractor. The scorecard includes the number of encounters submitted by subcontractor by month, the number passing front-end quality edits, and the number accepted by the Medicaid agency. Data is reported for each provider and subcontractor and is used by management, the national ancillary team and the local affiliate leadership to manage subcontractor activity.
- **Subcontractor Education:** To complement the Encounter Scorecard Monthly Reports, WellCare conducts targeted education sessions with our subcontractors. The goal of our education sessions is to ensure quality submissions by teaching subcontractors how to correct errors with their encounter data.
- **Contract Enforcement:** WellCare uses the contract to enforce encounter data timeliness, completeness and accuracy. We develop corrective action plans (CAPs) and track adherence to these CAPs until the subcontractor comes into compliance. WellCare also applies financial penalties if encounter data acceptance levels are not met. Subcontractors who continue to perform poorly with encounter data submission are subject to further disciplinary action including revocation of functions if necessary.
- **Pharmacy Encounter Data:** We use our PBM to develop the encounter data submission and to reconcile the response files. WellCare and our PBM have a shared responsibility to correct any errors and to ensure all service levels are met, as outlined in our contract. Currently, our PBM supports D.0, Post Adjudication 4.2, and Post Adjudication 4.4. They will, however, make modifications in accordance with MLTC's specifications. WellCare will use a Reporting Package developed by our PBM to ensure accurate, timely, and complete submissions. Additionally, we will have a dedicated subject matters expert within WellCare who will specialize in pharmacy data and who will support the Nebraska pharmacy submissions ongoing.

Ensuring the Appropriate Utilization of Health Care Services

In addition to annual delegation audits, subcontractors are required to submit all utilization determinations to WellCare so we can systematically monitor that the utilization of services is at the appropriate level. Upon receipt, the subcontractor's utilization determinations are imported into our medical management system. From here, the data is integrated into our standard set of clinical reporting where we monitor

subcontractor performance.

Subcontractor utilization data is measured against the subcontractor's historical data, expected performance and benchmarks to identify potential issues or areas of non-compliance. In addition, because WellCare does not delegate appeals, we carefully monitor appeals data to identify any negative trends with adverse determinations that would suggest problems with utilization of health care services. As issues are identified, we initiate focused audits to validate the appropriate application of medical necessity criteria and adherence to policies and procedures.

To supplement the review of submitted utilization data, we leverage data produced by our Quality Analytics team to identify trends in care caps suggesting under-utilization of services. Utilization management and care gap data are reviewed and analyzed regularly and discussed at quarterly business reviews between WellCare and our subcontractors delegated for utilization management. Information is also presented to our Utilization Management Committee to solicit feedback and drive actions to improve utilization and, ultimately, health outcomes.

Ensuring Delivery of Administrative and Health Care Services to Meet or Exceed all Standards

Monitoring of subcontractor performance is part of our Quality Improvement Work Plan. In collaboration with functional areas and Regulatory Affairs, we developed a standard performance scorecard (**Figure 3**) for our subcontractors. The scorecard provides for the regular monitoring of key performance indicators (i.e., turn-around times, percent of requests denied) to ensure delivery of administrative and health care services at or exceeding all established standards. On a quarterly basis, subcontractors must submit their completed scorecards by the 10th of the month following the quarter. Scorecards are submitted through a secure FTP site where they are systematically placed into the subcontractor's delegation folder for the assigned auditor. The auditor evaluates the subcontractor's performance over the past quarter noting any issues, trends or deficiencies. This information is then reported to the respective Quality Improvement and Utilization Management Committees. Subcontractors that fail to provide timely scorecards are immediately placed under corrective action as are subcontractors that perform below standards. As a process enhancement, beginning in 2016, subcontractors will also be required to supply the raw data to substantiate the report card metrics. The scorecards allow the subcontractors to continue to self-report key metrics while the raw data will allow WellCare to conduct yet another level of audit and oversight.

Figure 4

In addition, all subcontractors delegated utilization or care management activities are subject

to further routine evaluation to ensure the delivery of administrative and health care services to meet or exceed all standards. We evaluate these subcontractors on 31 Key Performance Indicators (KPIs) across six weighted categories that include cost, delivery and support, flexibility and ease of doing business, contractual compliance, quality, and partnership. As reflected in **Figure 4**, we rate each subcontractor's performance on the KPIs using a five-point Likert scale. Concurrently, we invite the subcontractors to complete a self-assessment. We then meet with the subcontractors to review the results and discuss opportunities.

Ensuring Adherence to Required Grievance Policies and Procedures

As previously noted, under our Delegation Oversight policy and procedures, appeals and grievances are never delegated functions. WellCare retains operational control of required grievances policies and procedures. Subcontractors are required to manage any grievances they receive with the same vigor as we manage grievances submitted to WellCare.

Ensuring Subcontracts Comply with Reimbursement Rate Requirements

Our dedicated Claims Audit unit, a team independent of our Claims and Delegation Oversight teams yet highly integrated, is responsible for ensuring our subcontractors comply with reimbursement rate requirements. They do so using a variety of methods, including:

- **Contracts:** WellCare's contracts contain specific language detailing the requirements for reimbursement rates. The language specifies that subcontractors' contracts must not contain terms for reimbursement at rates that are less than the published Medicaid fee for service rate in effect on the date of service.
- **Claim Audits:** Annually, our Claims Audit team performs a financial accuracy audit of all subcontractors' delegated claims payment. As part of this review, the Claims Audit team checks for proper reimbursement at rates specified by the provider contracts and the contract with WellCare. If the subcontractor's financial accuracy and payment accuracy scores do not meet expected performance levels of 99 percent and 95 percent, respectively, a second audit is performed. If the re-audit produces unacceptable accuracy scores, the subcontractor is placed on corrective action and monitored through the Delegation Oversight Committee. ***Year to date for 2015, our delegated vendors are at 96.5 and 95.7 percent for financial and payment accuracy, respectively.***
- **Contract Enforcement:** WellCare uses the contract to enforce financial and payment accuracy requirements. We develop corrective action plans (CAPs), track adherence to these CAPs, and perform a second audit. Subcontractors who continue to perform poorly are subject to further disciplinary action including revocation of claims payment functions. For 2015, the relatively small number of subcontractors who did not meet required thresholds have been placed on a corrective action plan and are scheduled for reaudit.

Annual Evaluation of Subcontractors' Performance to Ensure Continued Contract Compliance

In addition to the ongoing monitoring described herein, at least annually, WellCare subjects subcontractors to formal audits to ensure continued compliance with contract provisions. Our delegation scheduling report is an automatic report produced daily. It identifies those subcontractors due for an annual oversight audit based on their last audit date. The report is routed to the appropriate audit coordinator's queue where he or she then sends the audit notification and tools to the subcontractor and schedules the audit. Once again our subcontractors are invited to complete a self-assessment. Once completed, the questionnaire and supporting documentation are routed to the delegation auditor for review. The delegation auditor then reviews the results of the questionnaire and performs a "virtual" onsite review of systems and processes using webinar capabilities. WellCare reserves the right to complete a full onsite audit for the annual review if warranted based on the subcontractor's performance.

Our Delegation Oversight Systems and Tools Support Compliance with State Medicaid Program Standards and Prevailing Local and National Medical Standards

Our Delegation Oversight team uses a set of proprietary, interactive audit tools to address the respective activities that are being delegated, as applicable. These tools are based on NCQA, state and federal requirements and are reviewed annually to ensure key regulatory requirements are being evaluated. Our audit tools are integrated with our compliance system maintaining document integrity and consistency. Furthermore, through the integration with our compliance system, we can invite subcontractors to complete documentation and assessments and route such activities in a highly trackable and auditable fashion. The following is a list of the comprehensive audit tools available:

- Business Continuity/Disaster Recovery (Global)
- Case Management
- Claims Processing
- Compliance, FWA, HIPAA, Incident Reporting (Global)
- Credentialing (including recredentialing)
- Member and Provider Service
- Disease Management
- Network Management
- Non-Emergency Transportation
- Pharmacy
- Provider Appeals
- Utilization Management

Our Delegation Oversight team uses C360 for a number of delegation-related activities including housing of audit tools, completion of audit questionnaires, document retention, and housing of corrective action plans. C360, a software-as-service solution, is the most widely used compliance, risk and governance solution in the health care industry. It features a collection of configurable modules as well as built in workflow and intelligent routing capability. In addition to C360, our delegation oversight team houses executed, written delegation agreements in a secure, shared repository.

Our Multi-Disciplinary Delegation Oversight Committee Governs Subcontractor Activities and Performance within Required Timeframes

WellCare's Delegation Oversight Committee is ultimately responsible for ensuring the quality of care, service, and compliance provided to WellCare members and providers by our subcontractors. The Delegation Oversight Committee provides continuous oversight of subcontractors' programs and performance through the regular review of data, reports, audit results, and corrective action plans. The Committee has the authority to revoke delegation or terminate services, if necessary. The Committee reports to the Quality Assurance and Performance Improvement and Utilization Management Committees as well as Corporate Compliance Committee and the Regulatory Compliance Committee of the Board of Directors. The Delegation Oversight Committee is comprised of representatives from Compliance, Clinical Services, Customer Service, Claims, Quality, Legal (non-voting member), Regulatory Affairs, Regional Markets, Finance, and Internal Audit (non-voting member).

SECTION IV.L CARE MANAGEMENT

58. Provide a comprehensive discussion of the MCO's care management program, including:

- Coordination of services using person-centered strategies.
- Interventions focused on the whole person.
- Management of co-morbidities.
- Incorporation of best practices for behavioral health.
- Member engagement in self-management strategies.
- Social determinants of health, including risk and protective factors for behavioral health concerns.
- Identification and tracking of members whose clinical conditions or social factors place them at an increased risk for circumstances necessitating a higher level of care management services.

Provide case studies and experience from other states illustrating the MCO's ability to successfully address community differences in its care management approach.

(No page limit)

INTEGRATED, LOCAL, PERSON-CENTERED AND COLLABORATIVE: WELLCARE'S CARE MANAGEMENT PROGRAM

WellCare has developed our model of care around the principle that members have the best opportunity to reach their optimal health, wellness and recovery when they are served in partnership with high quality, financially aligned networks and have access to tailored care management services locally in their communities. Our care model is fully integrated to meet the physical, behavioral, pharmacy and psychosocial needs of our members with a special emphasis on social determinants of health, and is guided by data driven care management principles with interdisciplinary care teams (ICTs) to navigate the spectrum of clinical and social needs of our population.

WellCare's Care Management Program was built based on 20 years of experience working with members served through government-sponsored health care programs. Because we know that one size does not fit all, we built our care model on a modular architecture that is tailored to each individual state in which we operate with culturally-sensitive bolt-on programs to meet the unique needs of diverse populations and geographies. WellCare believes in establishing a foundation for each of our affiliates using evidence-based clinical guidelines and disease and wellness programs to drive high quality care for our members in their communities.

At the core of our model is a clinical philosophy of shared responsibility between the member, the provider and WellCare, where all participants drive toward improved outcomes. When the WellCare team developed our care model and tailored it specifically for our Heritage Health members, they did so first and foremost with an empathic view of the member. To forward this person-centered approach, our processes are built to assist members in understanding their overall health status, offering multiple channels for member engagement and embracing the empowerment of self-directed care.

A Nebraska Touch: Molding the Care Management Program for our Heritage Health Members

WellCare's care model is perfectly suited to meet the needs of Nebraska's enhanced vision for Medicaid modernization with certain key features including:

- **Field-Based Care Management Support:** With the addition of the aged, blind and disabled (ABD) and dually-eligible membership, we see a significant need to connect with people in their homes and communities to help them achieve improved health outcomes. To that end, we offer field-based care

managers, social workers and care coordinators to serve our highest risk members supplemented by telephonic outreach and support. These care managers will be located throughout the state to help reach individuals in remote, rural and frontier areas as well as the urban centers.

- **Integrated and Interdisciplinary Care Teams:** For the integration of behavioral health and pharmacy services to be meaningful, truly integrated care should be part of any solution. WellCare offers an integrated approach with behavioral health management conducted in house and behavioral health care managers working side-by-side with physical health care management teams.
- **Access to Social Services and Supports:** As more members with complex needs are folded into the program and more complex needs are covered, success is dependent on helping members navigate "the 80 percent of health care that happens outside the doctor's office." That's why WellCare offers an industry-leading proprietary approach to developing a social service network, referring members to those services, tracking outcomes and connecting with communities to support improved access to social safety net programs that help our members mitigate barriers to care.

A key feature of WellCare's Care Management Program is establishing specific concentrations on "super utilizers," members whose impactable conditions require additional attention for positive outcomes. These are often members with multiple complex and chronic conditions, often found in the ABD and dually eligible populations. Additionally, women identified with potentially high-risk pregnancies are routinely provided care management services through a sub-contracted entity as a base part of our care management approach.

In addition to deploying our base care management program which is ideal for ABD members, women with high-risk pregnancies, individuals with special health care needs and dual eligibles, WellCare has spent months meeting with stakeholders – members, providers, advocates and community organizations across the state – to align our programs and models to the needs of Nebraskans. Based on these meetings and an in-depth view of public health and other available data, we've identified opportunities to tailor the Care Management Program to place additional concentration on populations with very unique and specific needs. These include:

- Foster children, particularly those in out-of-home or residential placement
- Children with serious emotional disturbance (SED)
- Adults with serious mental illness (SMI)
- Native Americans being served in 638 Tribal Clinics

Additionally, WellCare has developed bolt-on strategies to support members who may be receiving care coordination because of their status in a home and community based services (HCBS) waiver or their connection to a patient-centered medical home (PCMH) without duplicating those services.

MEMBER STORY

Field-Based Care Management In Action: Why the Personal Touch Matters

A series of strokes left a 32-year-old member of our Florida affiliate, Staywell, with severe contractures and minimal verbal skills. She was confined to her bed because of mobility issues and needed help with daily living activities. She also has asthma, hypertension and vision problems. Care management was called to assist in getting physical therapy. Because Staywell uses a field management model of care, care manager Theresa visited the home to meet with the family. When she arrived, she found that the member's needs went beyond physical therapy. The member's rigid muscles and joints prevented her from being able to use a standard wheelchair because she was unable to sit. Her family was using a stretcher to move her, which limited her ability to get to medical appointments, and her overall health suffered. The lack of mobility was also impacting her quality of life. "She had to lie in bed all day. She couldn't come out and be with the family, or sit and watch TV. We were dealing with a lot of isolation," Theresa said. Theresa noticed a Hoyer lift in the apartment, but neither the mother nor the home health aide knew how to use it to move the member. Theresa also noticed the member did not have a special air mattress to reduce her risk of pressure wounds. Theresa worked with the member's social worker to get a physical therapist to come to

MEMBER STORY

Field-Based Care Management In Action: Why the Personal Touch Matters

the home to provide therapy and educate the mother and home health aide in using the lift and customized wheelchair to enable the member to spend time with the family in other parts of the home and to enjoy the outdoors. Theresa also assisted in obtaining needed referrals and appointments with a pulmonologist, cardiologist, podiatrist, dentist and ophthalmologist to address the member's other health needs. She attended the primary care appointment with the member and her mother to ensure they were able to understand the doctor's instructions and to help coordinate care to ensure the proper specialists were in place. ***Our care manager was instrumental in helping to wrap services around this member and her mother to allow the member to continue to live at home.***

THE WELLCARE CARE MANAGEMENT PROGRAM AT WORK: A CONTINUOUS PROCESS

WellCare's Care Management Program is a continuous process of stratification, assessing member needs and goals, development of individualized care plans, implementation of care plans and monitoring compliance and efficacy as seen in **Figure 1**. This process is supported by a highly trained staff of care management professionals that includes nurses, social workers and care coordinators from a variety of backgrounds and with a diverse set of expertise. Those professionals are supported by our integrated medical and pharmacy leadership.

Figure 1

Identification and tracking of members whose clinical conditions or social factors place them at an increased risk for circumstances necessitating a higher level of care management services

All active members are assigned a score, based on a proprietary scoring algorithm that places them into four levels of care management need. In addition to being assigned a score, the members are flagged when specific conditions exist that are likely to be positively impacted by care management. In the first 30 days of a member's enrollment, this score is derived from a combination of initial health risk screening data, pharmacy utilization data and hospital discharge data. After 30-60 days of enrollment, and on a rolling annual basis, the score is refined with any historic medical and pharmacy claims data that has been captured. The scoring of members is based on three primary drivers: clinical severity, utilization, and cost as described below.

- **Clinical severity:** This portion is based on the Chronic Illness and Disability Payment System (CDPS) model, a diagnostic classification system developed by the University of California, San Diego. This Statistical Analysis System model classifies every diagnosis code on a claim and assigns a score based on the severity of the diagnosis. The CDPS model also examines pharmacy utilization as a component of risk scoring.
- **Utilization:** This portion of the model uses a number of utilization indicators and applies a weighted score based on input from the clinical services team. The metrics tracked are hospital admissions, emergency room visits, PCP visits, specialty visits, acute admissions, home health visits, and rehabilitation visits.

- **Cost:** The cost portion scores each member based on his or her relative, normalized per member per month (PMPM) cost as compared to the other members within the program. The cost component looks at inpatient, outpatient and professional costs.

Identifying Members Eligible for Care Management Programs through Other Channels

Data mining and risk stratification are effectives way to identify members with the greatest need for care management. We will also rely on non-claims-based data identification methods including referrals and event triggers (e.g., transitioning into a new care management organization, discharge from an inpatient facility, crisis call). These non-claims-based methods are outlined in **Figure 2**.

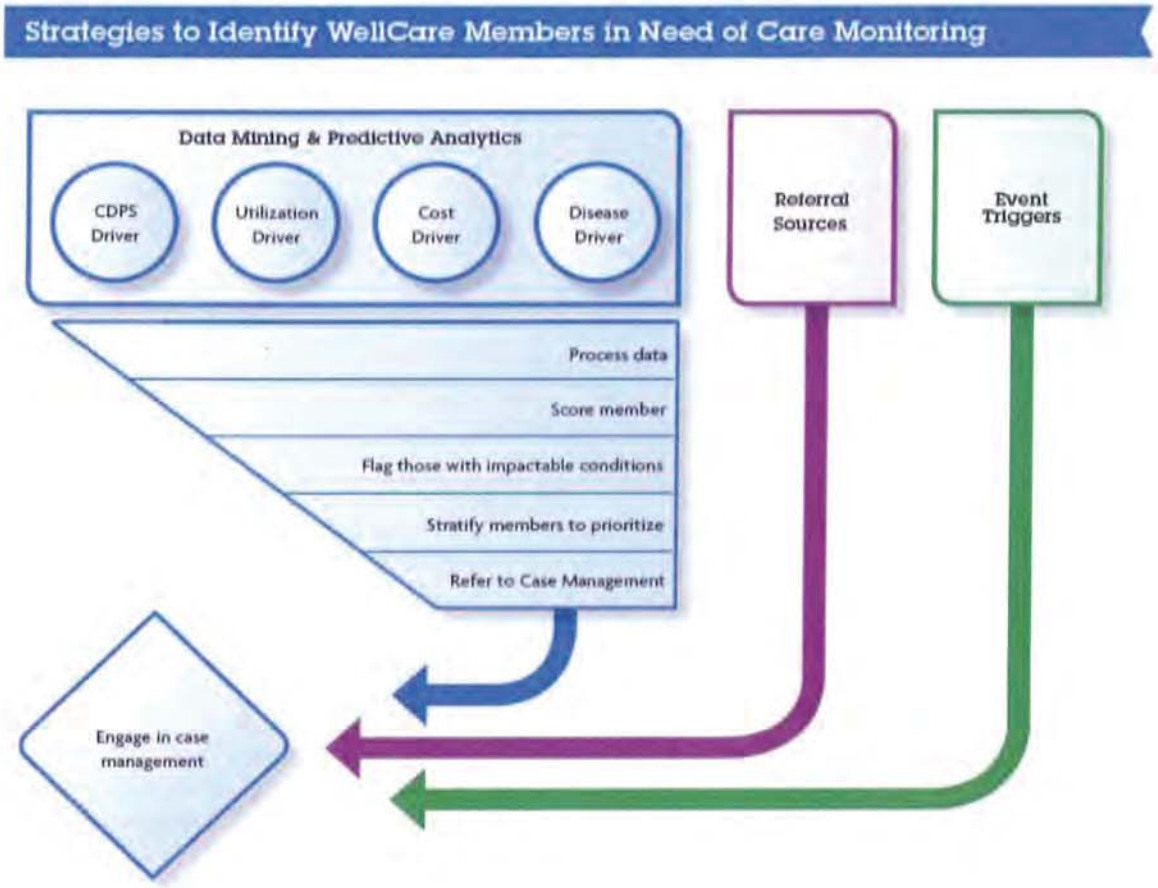
Figure 2

NON-CLAIMS BASED IDENTIFICATION SOURCES
Referral Sources
State-provided special needs codes on the 834 enrollment file
State-provided reports (i.e., lead file, special health care needs file)
Member or caregiver requests
Providers
Prior authorization
Discharge and retrospective review
Disease management
Community program referrals (No wrong door e.g. AAA, ARC, day care centers)
Nurse Line and Crisis Line
CommUnity Assistance Line
Event Triggers
Transition of care initiated by another care management organization
Member completion of health risk screening – initially or annually (results from survey)
Other
WellCare reports (i.e., frequent emergency room utilizers, pharmacy usage)

In addition to the components above, algorithms are used to identify specific impactable conditions, such as pregnancy, depression, asthma, coronary artery disease, congestive heart failure, chronic obstructive pulmonary disorder, diabetes, hypertension, AIDS/HIV and children with special needs. The condition-specific model stratifies the results for each member into a clinical risk group based on diagnosis, procedures, and pharmacy claims information. Those in the higher clinical risk groups are referred to care management for further evaluation.

In cases where we don't have claims history, we use an initial health risk screening (conducted by telephone during member welcome calls and included in the member welcome packet) to identify urgent and special health care needs and place members in risk levels. The full continuum of identification strategies are demonstrated in **Figure 3**.

Figure 3



Through these various techniques, every member is placed into one of four care management levels. Those in the higher clinical risk groups are referred to care management for further evaluation. Each level is described below:

- **Care Management Level 4:** Members in Level 4 are our highest risk and most complex members. These members are often catastrophic, high-risk, and high-cost and require special assistance to negotiate health and social services systems. These members require the highest level of care management intensity. Care management of these members is field-based with care managers meeting members in their communities. The care manager assesses the member's health and develops a care plan aimed at stabilizing the member. The care manager contacts the member frequently, at least once a week, and actively assists with transition of care, appointments, referrals, transportation, forms and other paperwork and engages with various health and social service providers. Because of the clinical profile, the care manager reviews and revises the member's care plan at least every two weeks or more frequently as needed.
- **Care Management Level 3**: These members have moderately high complexity. The care manager assesses the member's health and develops a care plan aimed at reducing their risk level. Care management is often telephonic but face-to-face interactions also occur. The care manager contacts the member at least once every two weeks and assists with referrals, transportation, and community-based services. The care manager reviews and revises the member's care plan at least every three weeks or as the member's health status changes.

- **Care Management Level 2**: These members are moderately complex. The member needs a moderately low level of interventions; therefore, care management outreach is telephonic. The care manager assesses the member's health and develops a care plan aimed at maintaining or reducing his or her risk level. The care manager assists with referrals, transportation and community-based services. The care manager reviews and revises the care plan at least once a month or as the member's health status or goals change.
- **Care Management Level 1**: These are our members with the least complexity and lowest risk. These members are stable and have only a few interventions on their care plans. The member requires only periodic support and monitoring; therefore care management outreach is telephonic. The care manager assesses the member's health and ensures that the member has information about public assistance programs for health and social services which would benefit the member and to which the member may be entitled. The care manager contacts the member at least once a month to assess status and progress against goals. The care manager updates the member's care plan monthly or as the member's health status or circumstances change.

Focusing on the whole person to understand and fully assess individual needs and goals

Once stratified, members are assigned to a care manager to match their needs. We offer a variety of care management supports depending on individual risk levels, including field based or telephonic care managers. Based on the additional assessment, outlined below, we also have sub-specialties within those care manager teams for behavioral health. For members in the lower risk levels, we have telephonic teams that focus on impactable chronic conditions, sometimes referred to as disease managers. In Nebraska, children in foster care will have access to Foster Care Care Managers (FCCM).

Care managers connect with the member to complete a comprehensive Health Risk Assessment (HRA) of the member's medical, behavioral, socio-economic, psychological, environmental and functional needs within 30 days of assignment to a risk level. The assessment is critical for the care manager to assess and gather information related to the current or proposed care plan

The goal of this stage is to optimize health and well-being for each enrolled member by:

- Assessing the member's total functional capacity, health status and behavioral health over time through the comprehensive HRA
- Supporting informed health care consumerism and the member's ability to self-manage
- Identifying urgent and short-term needs to accelerate access to needed services and care
- Providing individualized health education to assist the member set and meet health and personal goals
- Evaluating the member's environment and natural support network
- Identifying social barriers and linking members to corresponding social safety net services
- Identifying the member's support structure and engagement with providers
- Assessing member placement and ability to live in the least restrictive setting of their choice
- Assessing palliative care needs and end of life care planning, as needed

Additionally, because WellCare is an integrated plan, we have developed additional assessment opportunities to make sure we are assessing for behavioral health conditions and reacting appropriately based on a member needs. To that end, we use the following validated screens as part of the comprehensive assessment process and throughout our Care Management Program to identify and assess a member's mental health and substance use conditions:

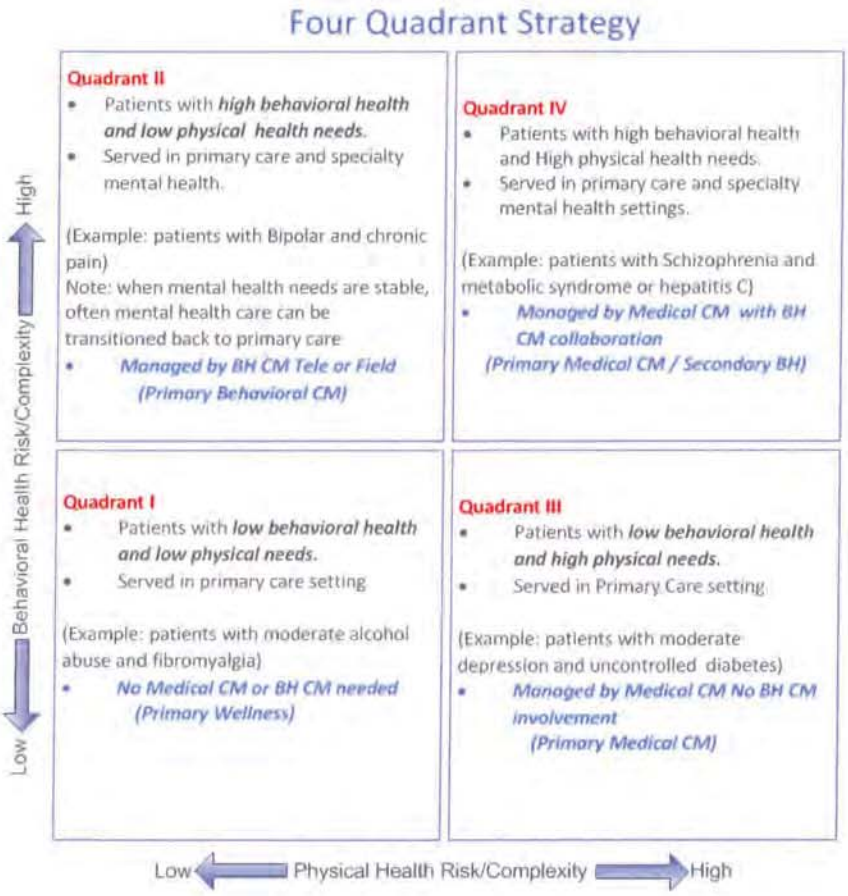
- CAGE/CAGE AID (Drug and alcohol use screening tool for individuals 16+)
- CRAFFT (Screens for high-risk alcohol and other drug disorders for individuals ages 12 to 21)

- PHQ-9 (Depression screening tool for individuals age 13+)
- Edinburgh Postnatal Depression Scale (EPDS)

For each of these screens, we have trigger points at which members are referred immediately for behavioral health care management. If members are identified as experiencing a serious mental health crisis, our care managers will immediately implement our crisis call protocol to ensure member safety and further crisis assessment.

Our care management team also uses a four quadrant model to appropriately assess the best approach to care management based on the Federal Substance Abuse and Mental Health Services Administration's (SAMHSA) Four Quadrant model. **Figure 4** represents our model, which connects individuals to care management based on the member's needs at any point in time in his or her path to recovery and resiliency. The level of care management is assigned based on the results of the comprehensive assessment and the condition currently driving the primary needs of the member.

Figure 4



Engagement of the Member by the Interdisciplinary Care Team

At-risk members with behavioral health needs fall into either Quadrant II or Quadrant IV. Members assigned to these quadrants receive integrated care management as described below.

- **High Behavioral Health Needs/High Physical Health Needs:** Members in Quadrant IV receive field-based care management. The physical health care manager (nurse) is the primary care manager supported in collaboration with the behavioral health case manager. The individual is served in both primary care and specialty mental health settings, with the goal being to provide the most integrated care possible.

- **High Behavioral Health Needs/Low Physical Health Needs:** Members in Quadrant II receive either telephonic or field-based care management from an interdisciplinary care team. The behavioral health care manager is the primary care manager supported by a physical health care manager, disease management associate, community advocate, outreach associate, and associates from the utilization management team who regularly support the care management team through grand rounds, alert of member admissions, assistance with discharge planning and participation in ICT meetings if there are services that need to be created and authorized.

Care management assignment is not static. The member's needs change throughout his/her enrollment in care management, and when a behavioral health issue is the driver of change, the behavioral health care manager will lead the team to drive solutions that are most responsive to the individual member's current and critical needs.

Person-Centered and Culturally Competent: The heart of the care plan development phase

Based on the comprehensive assessment, the care manager will work with the member to develop an individualized care plan according to his or her needs. With input from the member or caregiver and the Interdisciplinary Care Team (ICT), an individualized care plan will be developed with prioritized goals and actionable interventions.

WellCare's information technology (IT) system provides care managers with evidence-informed tools to populate standardized goals based on the member's condition. These tools guide the process while care managers customize goals and service plans based in individual needs of the member as part of our person-centered planning process. Care managers also examine historical data and care gaps to inform the care plan and ensure members are getting the preventive and follow-up care called for in the Clinical Practice Guidelines to manage their conditions.

WellCare's care managers are trained in evidenced based engagement strategies such as motivational interviewing, which is a goal-directed, person-centered counseling style for eliciting behavioral change by helping individuals explore and resolve ambivalence. Motivational interviewing is applied to a wide range of problem behaviors related to alcohol and substance abuse, as well as health promotion, medical treatment adherence and mental health issues. This method of interaction allows the care manager to engage the member and allows the member to engage in setting realistic and attainable treatment goals.

Through these methods, we incorporate the member's perspective on his or her health, his or her level of health literacy, cultural and faith-based beliefs, and his or her personal goals for health status. In this regard the member's goals are expressed in personal terms, such as, "I want to be able to walk to the park without losing my breath," instead of, "I want to better control my COPD." We seek to frame goals in meaningful statements that fit the person.

The care plan is designed to be culturally appropriate and consistent with the abilities and desires of the member or caregiver. The personalized care plan includes the following:

- Timeframe for re-evaluation
- Resources to be utilized, including the appropriate level of care
- Planning for continuity of care, including transition of care and transfers
- Collaborative approaches to be used, including family participation
- Self-Management Plan
- Development of a schedule for follow-up and communication with members

The care plan process is accessible to members who have disabilities or have limited English proficiency, and reflects the cultural preferences of the member. The care plan is developed in accordance with applicable quality measures and utilization review standards. WellCare provides a copy of the care plan to the member's PCP and other significant providers and gives the member an opportunity to review the care

plan. WellCare is developing a single use URL system that will allow individual member care plans to be available through a secure portal to streamline sharing with providers.

WellCare requires that care managers review care plans as frequently as needed based on the member's clinical conditions, but not less than monthly. The care manager reviews the plan to determine the status of all existing activities/interventions and to ensure actions are completed by the established time frames.

MEMBER STORY

Person-Centered Care Planning at Work

A WellCare of Georgia member would not accept blood or any blood parts (including white blood cells) from another person due to her religious beliefs. Carrying a high-risk pregnancy, the member was in need of an obstetrician, a neurologist and a behavioral health provider who could coordinate complex care needs that included extensive medication lists, effective prenatal care and a healthy pregnancy and delivery, while still honoring her religious preferences. WellCare of Georgia was able to identify an obstetrician who accepted the member and respected her religious preferences. Through an effective partnership between her WellCare care manager and a team of specialists, there was coordination of numerous medications, as well as peer-to-peer consultations between her OB provider, neurologist and psychiatrist. The member's pain and anxiety concerns were respected and effectively addressed. The outcome of everyone's efforts was a healthy, full-term baby boy

IMPLEMENTING THE CARE PLAN

Through regular in-person contact, telephonic contacts and educational support, WellCare care managers build and maintain relationships with members, while continuously assessing the needs, safety and well-being of the members. The goal of WellCare's Care Management Programs is to stay ahead of the member's functional deficit, illness or behavioral health trajectory, to identify issues that can be prevented and improved, to initiate appropriate interventions, and to eliminate or mitigate complications, including the need for preventable emergent care and unnecessary hospitalizations. Medical, behavioral health, custodial and social service resources are optimized to better facilitate care gap closure by accessing local services.

Staffing and training Care Management teams to Carry Out Care Management Functions

Our Care Management teams are staffed to implement care management strategies based on the level of care management they are providing.

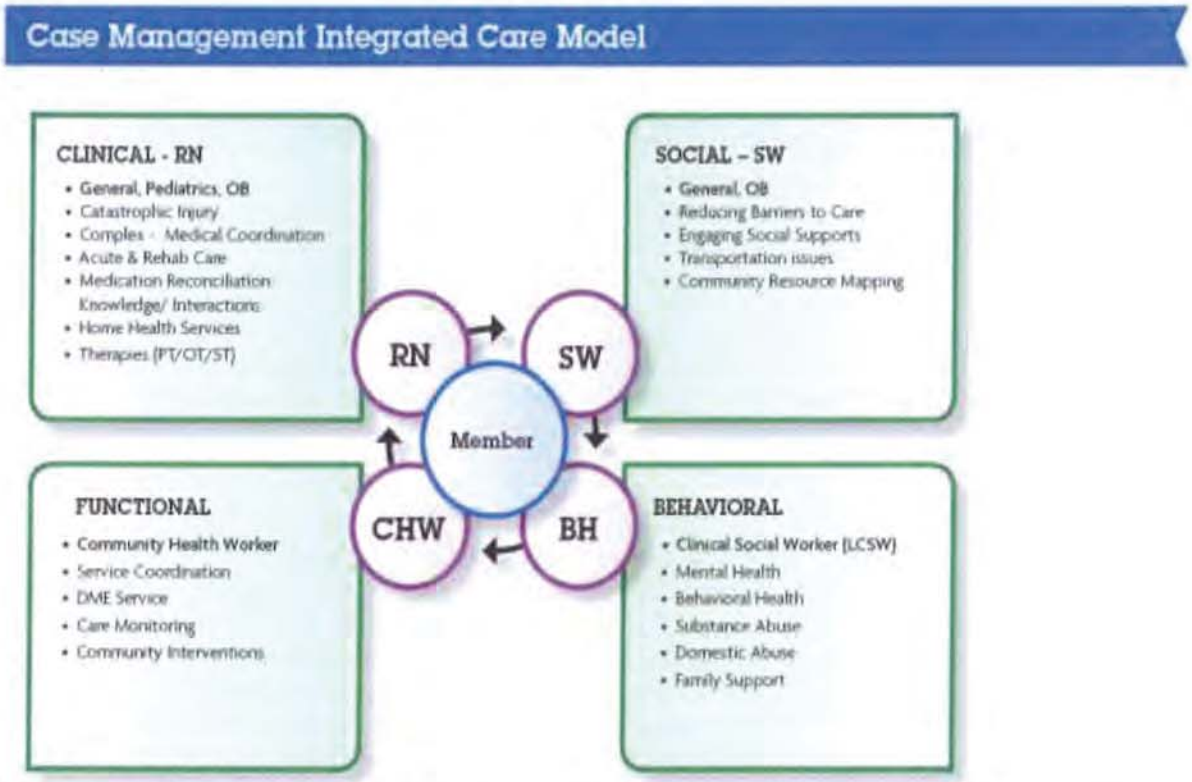
- The Field-Based Short Term Case Management (SCM) Team, which serves the highest acuity members, consists of registered nurses, social workers and care coordinators. The team ratio includes 4 to 5 registered nurses, 1-2 Social Workers and 1-2 Care Coordinators driven by geographic size and need. Each team maintains an average caseload of 30 cases at a time with an average length of time in the program of 60-90 days. The team undergoes an extensive 4-6 week training program.
- The telephonic and complex case management teams for medium risk members include registered nurses, social workers and care coordinators. Caseloads average 30 cases per care manager for short-term management with 60 days average time in program and 60 cases per care manager for Chronic Case Management with 90 days average time in program. The team undergoes an extensive 4-6 week training program.
- The disease management team which serves the lowest risk members and focus on individuals with single chronic conditions includes registered nurses, care coordinators and health coaches. They average 100 cases per care manager with 90 days average length of time in the program. This team undergoes 4 weeks of training.

Management of Co-Morbidities

A key feature of WellCare's approach to care management is implementing plans for members with co-morbid and complex conditions. Our teams at the higher risk levels are specifically trained and structured

to work in an interdisciplinary fashion to support multiple member needs. We have a fully integrated staffing model to help us manage across conditions as shown in **Figure 5.**

Figure 5



The Interdisciplinary Care Team (ICT) also plays a key role in managing members with co-morbid conditions. Behavioral health specialists work alongside their medical and social worker counterparts on our ICTs, which include registered nurses (RN), behavioral health professionals, and other health care professionals. If a member has primary behavioral conditions, the member will be assigned to a behavioral health specialist (for members with a psychiatric diagnosis or substance abuse issue). If there are secondary co-occurring conditions needs, the mental health professional will work with the primary medical case manager to manage the member across the continuum to confirm the member is connected to the necessary services and supports within the member's community. For members with both high behavioral and medical needs, WellCare's model of care can be adapted by having both behavioral and medical care managers co-lead the team.

Incorporation of best practices for behavioral health

We believe that a fundamental best practice for behavioral health is having a truly integrated approach to care management assuring our members receive their medical, behavioral, pharmacy and social services in a seamless, coordinated and complete fashion.

Through our integrated behavioral health program, WellCare served more than 200,000 members in eight Medicaid states in 2014.

Our approach to a recovery-based, trauma-informed model of care means that we consider and involve families and natural supports, enabling members to have every opportunity to live full lives in the communities they live. We understand that sometimes the best outcomes for people are based on the support and engagement of the people around them. Whether

the member is an adult or a child, identifying and including people who support the member at home and in the community is critical. We understand that our members have certain rights to privacy which we honor by obtaining the proper consents when necessary. With proper consents, our treatment planning process includes family members, designated representatives and, in some cases, friends, peers or significant others identified as key individuals that can support the treatment and recovery process for individuals. It is often through working with advocacy organizations that we are able to identify the best strategies to utilize and are able to secure a community-based support system for people who do not have family or anyone else to help them. Our approach is to work with relevant locally-based stakeholders to deliver and guide us with designing our behavioral health care delivery process. We will interface with stakeholders using the following strategies:

- Consult with mental health, disability and substance use advocacy groups
- Learn the local community resources and, through our advocacy and outreach activities provide support and facilitate connectivity between local communities and our health plan
- Work with, and to the extent possible contract with, peer support specialists to manage the needs of SMI members
- Develop a clinical advisory council made up of providers throughout the state that advise and guide us on clinical best practices, assist with addressing provider related issues and problems in the service delivery system
- Employ staff that are individuals in recovery or family members who are qualified to perform duties of our open positions as well as hire peer or family advocates directly on staff to serve in advocacy/support roles

Four programs highlight our engagement approach with families, natural supports, advocacy organizations and network providers.

- **Behavioral Health Homes:** WellCare seeks to build on the strong efforts Nebraska has undertaken to adopt Patient Centered Medical Homes and current pilots for integration to support Behavioral Health Homes (also referred to as Integrated Health Homes (IHH). We have developed a detailed program description, clinical and payment model for these IHH programs and have already had early conversations with providers in Nebraska interested in pursuing integration.
- **Peer Support**: To promote recovery and empower our members with SMI, SED and SUD diagnoses, we will use peer support specialists who are living in recovery and can connect on a personal level with members about their illness and assist them in navigating the system. We will collaborate with and support existing peer support models including integrated health homes, Recovery/Wellness centers, peer crisis services and peer support/counseling services. We strive to employ individuals in recovery to work with our members in CM or member engagement roles.
- **Family Involvement**: Like peer support, natural supports are critical to recovery; therefore, with member consent, our community-based care managers connect with families and caregivers to engage them in the treatment planning process. We will utilize best practices, like family psycho-education, and we will assist families in understanding their family member's illness and how they can support the member on the road to recovery.
- **Telehealth**: WellCare is offering to support and expand telehealth opportunities, particularly for behavioral health, to address shortages throughout the state in access to behavioral health providers. Our strategies support reimbursement methodologies that promote telehealth, grants for technology as needed and supported by data and introduction of direct doctor-to-patient telehealth contact through emerging platforms.

MEMBER STORY

Behavioral Health Interventions Drive Improved Outcomes

A 12- year-old member of WellCare of Georgia had a history of inpatient admissions to an acute psychiatric hospital and crisis management unit. Upon being assigned the case, our care manager contacted the member's mother to engage her in the care management process. In collaboration with the mother, the member, the psychiatric residential treatment facility and a community-based intensive family intervention specialty provider, the WellCare of Georgia care manager developed a transition plan from residential treatment to community based services. The individualized care plan included:

- An intensive in-home family therapy and skills building treatment program that focused on behavioral modification, safety plan and compliance provided by the IFI team
- A safety and participation contract with the member and the mother
- Coordination of medication management with the treating psychiatrist
- Regular scheduled follow-up communication with the care manager

As a result of this intervention, the member engaged in his care, attended appointments and adhered to his medication regimen. After three months in treatment, the member had not been readmitted to an inpatient facility. He was attending school regularly, had passing grades, and was no longer demonstrating explosive behaviors.

MEMBER ENGAGEMENT IN SELF-MANAGEMENT STRATEGIES

Our Care Management Program was built to focus on assisting members in understanding their overall health status and embracing the empowerment of self-directed care. Members in our lower risk levels and those emerging from higher risk levels into maintenance continue to be supported through self-management strategies.

A member may be referred directly to the Disease Management Program or referred upon completion of higher levels of care management. The Disease Management Program staff has full view of the member's assessments, case notes and health care claims to deliver education, guidance and support for the primary chronic condition for which a member may need additional support. The six key chronic conditions that are addressed in the Disease Management Program are:

- Asthma
- Coronary Artery Disease
- Chronic Obstructive Pulmonary Disease
- Congestive Heart Failure
- Diabetes
- Hypertension

Members in the Disease Management Program are offered supportive disease specific educational materials from our vendor partner, Krames, written in easy to understand language for better management of their conditions. Upon completion of the Disease Management Program, the member is offered supplemental condition specific mailings twice a year via mail as long as desired.

Additionally, we offer a number of programs to give members tools to direct their own care outside the formal care management program. Some of those include:

- The Healthy Behaviors Rewards Program offers wellness incentives such as gym memberships or smoking cessation incentives.
- The Succeed Snapshot is a web-based health screening available online that members can take in the comfort of their own homes and at their own pace.
- Cobalt Therapeutic Intervention is a web-based program for members with behavioral health needs to access counseling services online to drive their own recovery as they see fit.
- Health Coaching Program is available to support members who desire to address weight management or smoking cessation. These programs are designed to be offered as a unique program or in collaboration with Case or Disease Management Program.

- Partnerships with community programs are a core part of our Health*Connections* program. Through these community activities, we support a wide range of community-based health and wellness activities aimed at empowering members to lead healthier lives.
- The 24-Hour Nurse Line is available for members to access a live nurse at any time to discuss any health concerns.
- The 24-Hour Behavioral Health Crisis Line is available for members to access for crisis or other needs.

INTEGRATING SOCIAL DETERMINANTS OF HEALTH

WellCare deploys an industry-leading proprietary approach to connecting members with social services to help address the social determinants of health that impact their health outcomes. This program, known as Health*Connections*, is integrated into our care management program, but also has its own staff to support care managers and to help members navigate social services resources.

Our integrated care management program is based on identifying the needs of our members; outreaching to them where they live; understanding how they prefer to engage with the health care system; facilitating their access to care; and helping them whenever, wherever and however they need us. Our community outreach associates are hired locally and have knowledge of the community including community services and partners. These associates are trained on compliant and effective engagement with prospective enrollees and members. Our community outreach department will support our integrated care management program through dissemination of information and education related to programs offered by the state of Nebraska and community organizations. Specific goals of the community outreach department include educating target audiences about the availability of health care coverage, and providing sufficient information to promote and encourage enrollment and retention within the program.

In Kentucky, we participated or sponsored 713 events and activities in 2014 with nearly 632,000 individual community touches.

Activities designed to achieve our community outreach include:

- Participation and sponsorship of educational events and health fairs
- Dissemination of MLTC-approved outreach materials
- Hosting table top events at approved community venues
- Partnering with organizations that have a primary focus on the well-being of children, families, the elderly and special populations
- Increasing awareness within the provider community to promote referral opportunities into the program
- Providing wellness information through social media, such as Facebook
- Promoting cultural awareness to reduce barriers to program access

In 2014, WellCare participated in or hosted more than 5,000 community activities reaching more than one million community stakeholders. These included peer support groups, children's dental days, car seat safety, healthy food access programs, baby showers, homeless outreach and more. WellCare also reached community stakeholders from diverse cultures and backgrounds including African American (299,000), Asian (221,000), Hispanic (260,000), Native American (13.000), and Native Hawaiian (12,000) cultures as well as many segments within the disability community (195,000) across more than 175 counties in seven different states.

WellCare intends to bring this focused support to the 93 counties and several communities in the state of

Nebraska. To this end, we have met community stakeholders from across the state to identify opportunities for collaboration. Many of these organizations host activities and events within their local communities. In meeting with these partners, we learned about several initiatives that offer opportunities to connect with prospective members, current members and the community-at-large and share information about the Medicaid program changes. WellCare has received letters of support from our community partners including letters from Break the Cycle Crisis Center, Inc. and Nebraska Children and Families.

MEMBER STORY

The Power of Integrating Social Service

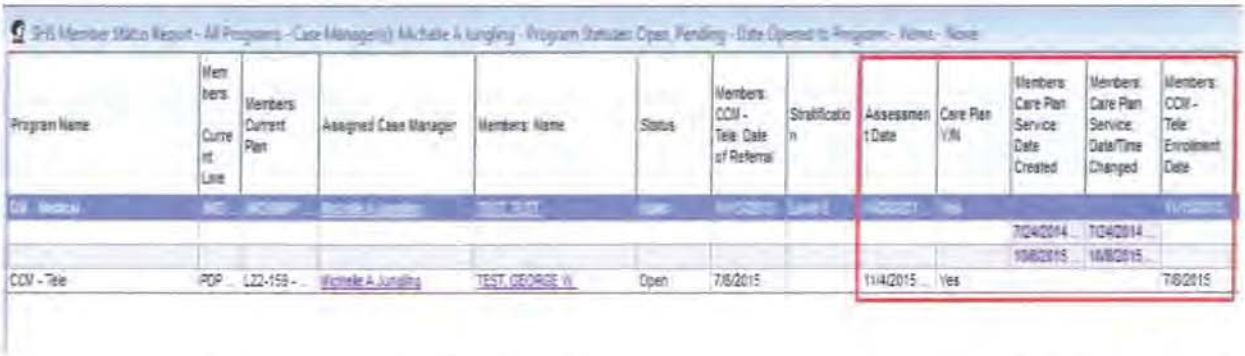
Vivian, a WellCare of Kentucky field service coordinator, was assigned a 63-year-old Medicaid member who had been recently diagnosed with Lewy body dementia. The disease had already caused the member to have difficulty with mobility, incontinence and memory loss. It was also making it very challenging for the daughter to serve as the mother's primary caregiver. With the goal of keeping the member at home, Vivian referred Hospice Care Plus to provide palliative care. She then educated the daughter on what to expect as the disease progresses and provided her with ways to adapt to the member's changing physical and mental capabilities. Additionally, Vivian learned that the daughter did not have a way to check the member's blood pressure, so she ordered her a blood pressure monitor and educated the daughter on the importance of using it daily. She also ordered a bedside commode and incontinence supplies.

Vivian then turned to WellCare's Health*Connections* Referral Tracker (HCRT), which includes a database with more than 9,000 Kentucky-based community organizations that WellCare can refer its members to for social services support. She started with Kentucky Vision and helped the daughter fill out an application for glasses for the mother. The daughter was also given a list of local resources for food and utility assistance, and was provided with local medical transportation assistance to help the member get to her medical appointments. Vivian educated the daughter about additional benefits available to the member, including a behavioral crisis line and a 24-hour nurse line. Through Vivian's efforts, the daughter now has the proper medical equipment, and access to food and financial resources to ensure the member's dignity and safety. Further, palliative care services will assist the member's daughter with the member's care and allow her to transition into hospice when appropriate. These efforts are allowing the member to stay at home with her family for as long as possible.

Monitoring effectiveness of Care Management: The Final Step in the CM Process

WellCare utilizes reporting to measure effectiveness of programs, productivity and member outcomes. Records are reviewed regularly to ensure compliance with various requirements such as member outreach, updating of care plan, and staffing ratios (as shown in **Figure 6**). Managers are able to identify training gaps or needs through review of this documentation; ensuring members are progressing towards care plan goals. In addition to reviewing daily caseload reports, clinical leadership and our health services training specialist generate monthly and quarterly reports to monitor performance, including but not limited to the number of assessments and care plans completed within required timelines, case file and clinical documentation.

Figure 6



Program Name	Members Current Line	Members Current Plan	Assigned Case Manager	Members: Name	Status	Members: CCM - Tele: Date of Referral	Stratification	Assessment Date	Care Plan Y/N	Members: Care Plan Service: Date Created	Members: Care Plan Service: Date/Time Changed	Members: CCM - Tele: Enrollment Date
										7/24/2014	7/24/2014	
										10/8/2015	10/8/2015	
CCM - Tele	PDP	LZZ-159 -	Michelle A Jungling	TEST, GEORGE W	Open	7/6/2015		11/4/2015	Yes			7/6/2015

Quarterly reports include member satisfaction with the care management program, readmission rates and number of members enrolled in care management programs. This information is then analyzed and brought to the QIC and the Chief Medical Officer for discussion of the effectiveness of past initiatives and creation of any new processes needed to improve outcomes.

Our Medical Management Platform (MMP) allows for real-time reporting; providing managers reports such as caseload ratios, overdue assessments, contact frequency and care plan completion/updates. Reports may be at the individual case manager level, rolled-up by manager or aggregated for the entire department for senior leadership. In addition to the ongoing chart audits, care management managers monitor clinical performance through regular one-on-one supervision. Throughout the year, the manager does "ride alongs" with field care managers to monitor not only the assessment process but also the softer skills of interacting positively with our membership. On an ongoing basis, clinical leadership reviews utilization, quality and customer satisfaction and to identify gaps in service, systemic performance issues, noncompliance and member dissatisfaction. Using the information gleaned from these reports, WellCare develops strategies to remediate issues and improve the quality of care for our members.

Getting Results: Case Studies and Experience from Other States

WellCare has been piloting the kind of Field-Based Short Term Care Management we are proposing to bring to Nebraska in four Medicaid markets – Kentucky, Florida, Georgia and Illinois, with Kentucky and Florida being the longest running of those programs. So far, our results show that the investment in improving member's lives and meeting them where they are is paying off.

For Level 4 members in the Kentucky affiliate, we have seen a 31 percent reduction in overall per member per month costs primarily driven by a 48 percent reduction in inpatient care which was offset by small increases in pharmacy costs (utilization) and outpatient care. Similarly, Level 3 members with four or more chronic conditions managed by our Kentucky field team demonstrates a 22.3 percent reduction in per member per month costs driven by a 35.3 percent reduction in in-patient utilization which is offset by increases in outpatient and professional services utilization.

For Level 4 members in the Florida affiliate, we have seen a 37.5 percent reduction in overall per member per month costs. This is primarily driven by a 46 percent reduction in In-Patient Care which offset by small increases in Pharmacy costs (utilization) and outpatient care. Similarly, Level 3 members with four or more chronic conditions managed by our Florida field care management team demonstrate a 38 percent reduction in per member per month costs driven by a 52 percent reduction in inpatient utilization which is offset by increases in outpatient and professional utilization.

Improved member satisfaction

Additionally, members who receive care management services from WellCare are overwhelmingly pleased with the experience as shown in **Figure 7**. For 2014, the following two questions provide an overview of key member satisfaction results:

- Question 1: Overall, were you satisfied with WellCare's care management services you received?
- Question 2: Were you satisfied with the services that your care manager gave you?

Figure 7

WellCare's Member Satisfaction Results					
2014		Q1	Q2	Q3	Q4
Question 1	Total Surveyed	1,138	2,833	4,402	3,830
	% satisfied	97%	97%	97%	97%
Question 2	Total Surveyed	1,128	2,825	4,381	3,797
	% satisfied	98%	98%	98%	98%

Best Practice Example from Other States

In Kentucky, we have implemented a specialized program aimed at keeping children with autism out of institutional care. The WellCare Autism and Developmental Disability Special Case Management Service was developed to directly address a long history of members with autism and other developmental disabilities and their placement in inpatient acute facilities. The members identified for this service had a history of inpatient acute facility placement for three to four years with little access to any community-based placement. At the time of WellCare's involvement, these members were at ages 11, 12 or 13, meaning these members had lived in a facility for almost one-fourth of their life. WellCare was determined to search for alternatives to provide these members with appropriate treatment in the lowest level of care that matched their individual needs. A specialized team of WellCare of Kentucky care managers who are focused on children in foster care partnered with the Department of Community Based Services with the goal of finding treatment and placement options for these members to move them from a primary inpatient acute facility environment (many in out of state facilities) back to homes in the community. Partnering with a therapeutic foster care provider with the right funding flexibility from the state allowed us to increase options for these members. Using Trauma Informed Care models, we were able to connect these children with providers who understand their specific needs.

The outcomes have been significant. On average, individuals in the custody of the state of Kentucky will change placements 3.2 times per year. Because of this program, some of these members have lived in one home, in the community, for more than a year. These members also have key relationships within their community. In addition to their foster care parent and their service providers, they are now connected with their school, with their church, and within other social groups. Some members have been able to reconnect with family members whom they have not seen for several years.

The costs savings for the state have been significant as well with a 43 percent total decrease in costs for impacted members comparing six months prior to six months after the interventions.

We are basing our Nebraska foster care management approach on the successful structure of this program in Kentucky.

SECTION IV.L CARE MANAGEMENT

59. Describe the MCO's approach for identifying members in need of care management services, including:

- The proposed process for providing a health risk screening to all members upon enrollment to identify and assess members potentially eligible for care management services, including those who have or are likely to experience catastrophic or other high-cost or high-risk conditions.
- A description of the algorithms and methodologies the MCO will use to identify members potentially eligible for care management.
- The proposed process for conducting health risk assessments for members identified as potentially eligible for care management. Submit the proposed health risk assessment template that the MCO plans to use.

(Page limit 5 pages)

WellCare's Approach to Identifying Members in Need of Care Management

The first steps in our integrated, local, person-centered and recovery-focused model of care are appropriate identification and stratification of members who would benefit the most from the various levels of care management services we offer. Identification is conducted using a number of tools, including, but not limited to:

- Data mining and application of algorithms to assign case management based on member experience
- Initial Health Risk Screening
- More in-depth Health Risk Assessment
- Member, provider, agency or other stakeholder referral or request for services
- Internal referral
- Pre-identified special health populations, such as high-risk pregnancies or children in foster care

WellCare's Process for the Initial Health Risk Screening

The initial health risk screening (HRS) provides a snapshot of the member's needs and identifies those with special needs to further define the appropriate level of assessment and intervention. It is an integral component of the clinical assessment process. The initial HRS identifies the member's basic needs and conditions. When coupled with our predictive modeling capability, the HRS provides sophisticated member stratification and assignment to the most appropriate care manager based on condition and identified risk factors. WellCare's process for conducting the initial health risk screening will begin immediately upon enrollment.

All members will receive a hard copy of the written health risk screening in their new member welcome packet which is mailed to the member within 10 days of enrollment. The materials the member will receive will instruct the member on how to complete and return the written health risk screening. The materials will also inform the members that they may complete the survey via the telephone or web and will provide easy-to-follow instructions regarding how to do so. We will also attempt to conduct a health risk screening during the initial welcome call.

The health risk screening call contains specific questions about health conditions and members are prompted to respond yes or no if they have been diagnosed with certain conditions including diabetes, cancer, depression, alcohol and drug use, AIDS, heart failure, and mental health issues. The questions also are designed to identify any urgent or crisis needs to help stratify members for immediate short-term care management services. Members are also asked about other services they receive including physical

therapy, hospice, home health and durable medical equipment such as oxygen or a hospital bed. If the member is female she is asked about pregnancies and whether or not she is currently pregnant. The final section of the assessment focuses on lifestyle choices such as healthy weight, diet, stress management and overall health.

Certain members identified in the 834 enrollment file as having special needs, such as aged, blind and disabled, Foster Care children and waiver services recipients will bypass the HRS and be directly referred to care management for outreach and completion of the more detailed health risk assessment. Care managers will make three attempts to reach the member over different days of the week and different times of day to complete the assessment via telephone or schedule an appointment to meet in person. If the member cannot be reached, a letter will be mailed letting the member know that a WellCare care manager is attempting to reach him or her and asking the member to call us as soon as possible. Concurrently, the care manager will contact the primary care provider of record or any other providers that may be caring for the member in an attempt to get more accurate contact information.

Foster children, as identified in the enrollment files, will automatically be routed to our Foster Care Care Management (FCCM) program. Specialized care managers will work with the Department of Children & Family Services to develop needs assessments for high-risk children to prioritize care management for those with an autism spectrum disorder, severe emotional disturbance or chronic health conditions.

Identifying Pregnant Members

Recognizing the importance of early identification and management of risk factors in pregnancy, we offer a prenatal program which includes risk assessment (to identify pregnant women at risk for complications), education, high risk pregnancy care management services and obstetrical homecare services for high-risk pregnancies. Pregnant women are connected with a flexible assortment of programs designed to promote knowledge, self-empowerment and healthy choices.

Early identification is the most important factor in the success of a prenatal intervention to impact pregnancy health outcomes. The prenatal program uses a multifaceted approach to identify existing members who become pregnant, including provider notifications; self-referrals enhanced by increased member awareness of the program through communication campaigns and early identification of pregnant members via: claims-based identification; health risk assessments; and state-based referral files (when available). The member will be followed through pregnancy and delivery by our pregnancy program with care management contacts based on risk status.

Mitigating barriers to successfully screening for people potentially eligible for care management

With more than 20 years serving Medicaid members, we have identified challenges to getting members screened and have built our models around a number of best practices to mitigate those risks and lessen their impact as shown in **Figure 8.**

Figure 8

WellCare's Initial Health Risk Screening	
Insight	**WellCare's Informed Approach**
Members prefer engaging with risk screenings in different ways.	WellCare's health risk screening program respects member preferences for communications. Our health risk screening program will feature a variety of administration methods allowing members to choose the approach with which they are most familiar and comfortable – via the web, telephone or in writing.
When calling members, you may not reach them on the first attempt.	WellCare will make three attempts to call members to complete the health risk screening telephonically. Call attempts will be made over the course of different days and different times of the day.
Members identified with special needs upon	Members identified with special needs codes in the enrollment file will be sent directly to care management as a care management referral. A care manager will

WellCare's Initial Health Risk Screening	
Insight	**WellCare's Informed Approach**
enrollment need to be triaged to be assessed for care management quickly.	attempt to contact the member via the telephone to schedule time to complete the screening assessment over the phone or in person. If the care manager is unable to contact the member, WellCare will mail a letter to the member advising the member that we are trying to reach him or her and ask the member to contact us as soon as possible. At the same time, we will outreach to the member's primary care provider of record or other providers, if known, in attempt to identify alternative contact information.
Member engagement may improve when there is an incentive for doing so.	As part of our Healthy Rewards program, members who complete their initial health risk screening within their first 90 days of enrollment will receive a reloadable debit card with a nominal fee loaded to their Healthy Rewards account. This program encourages healthy behaviors and empowers members to take responsibility for their health and health care.
Members may be difficult to contact or unable to be reached.	WellCare will use LexisNexis and Equifax data to identify missing telephone numbers or to update incorrect telephone numbers. In addition, research has demonstrated that community health workers (CHWs) are effective "connectors" to the community because they live in the communities in which they work and understand the social context and barriers that prevent members from accessing care. We have validated the effectiveness of CHWs in other states in which we operate Medicaid health plans. These associates work with schools, state agencies, community centers, and other community-based organizations to locate members. We will explore the ability to replicate this model in Nebraska.

Algorithms and Methodologies for Identifying Members Needing Care Management

All active members are assigned a score, based on a proprietary scoring algorithm that places them into four levels of care management need. In addition to being assigned a score, the members are flagged when specific conditions exist that are likely to be positively impacted by care management. In the first 30 days of a member's enrollment, this score is derived from a combination of initial health risk screening data, pharmacy utilization data and hospital discharge data. After 30-60 days of enrollment, and on a rolling annual basis, the score is refined with any historic medical and pharmacy claims data that has been captured. The scoring of members is based on three primary drivers: clinical severity, utilization, and cost as described below.

- **Clinical severity:** This portion is based on the Chronic Illness and Disability Payment System (CDPS) model, a diagnostic classification system developed by the University of California, San Diego. This Statistical Analysis System model classifies every diagnosis code on a claim and assigns a score based on the severity of the diagnosis. The CDPS model also examines pharmacy utilization as a component of risk scoring.
- **Utilization:** This portion of the model uses a number of utilization indicators and applies a weighted score based on input from the clinical services team. The metrics tracked are hospital admissions, emergency room visits, PCP visits, specialty visits, acute admissions, home health visits, and rehabilitation visits.
- **Cost:** The cost portion scores each member based on his or her relative, normalized PMPM as compared to the other members within the program. The cost component looks at inpatient, outpatient, and professional costs.

In addition to the components mentioned above, algorithms are used to identify specific impactable conditions, such as pregnancy, depression, asthma, coronary artery disease, congestive heart failure, chronic obstructive pulmonary disorder, diabetes, hypertension, AIDS/HIV and children with special needs. The condition-specific model stratifies the results for each member into a clinical risk group based

on diagnosis, procedures, and pharmacy claims information. Those in the higher clinical risk groups are referred to care management for further evaluation.

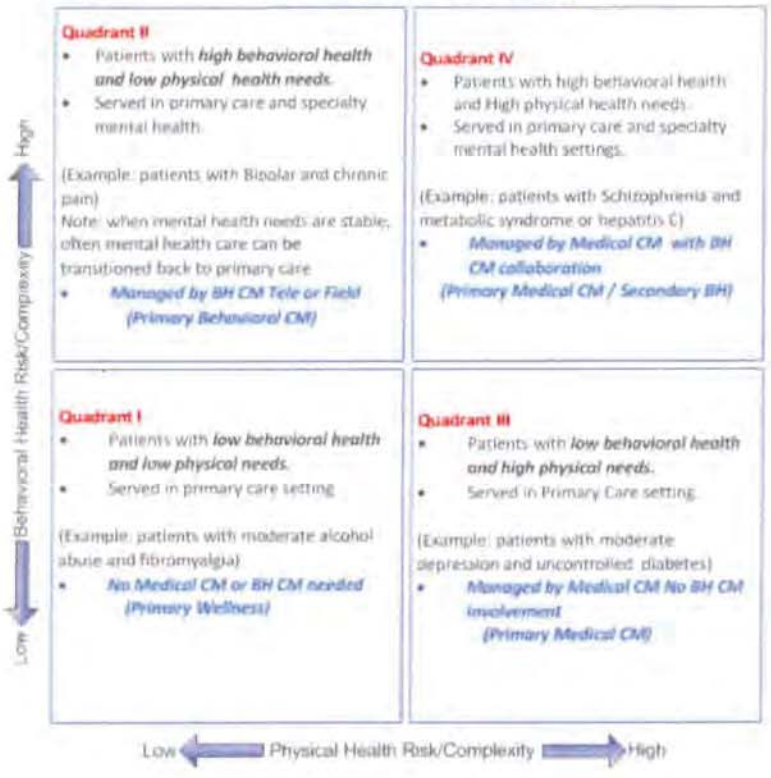
In cases where we don't have claims history, we use the HRS to identify urgent and special health care needs and place members in risk levels. We also supplement the predictive modeling algorithm with the HRS to account for changes that may not be seen in the historical data. Through these various techniques, every member is placed into one of four care management levels, with Risk Level 4 being the most complex and receiving field-based, in-person care management support and Risk Level 1 being the lowest, where a member may need only wellness education and self-management tools.

Another key step in assessing member needs even as they are stratified into risk levels is identifying whether the member has a behavioral health condition that may require a specialized care manager assigned. WellCare includes the following validated screens as part of the comprehensive assessment process and throughout our Care Management Program to identify and assess a member's mental health and substance abuse conditions:

- CAGE/CAGE AID (Drug and alcohol use screening tool for individuals 16+)
- CRAFFT (Screens for high-risk alcohol and other drug disorders for individuals ages 12 to 21)
- PHQ-9 (Depression screening tool for individuals age 13+)
- Edinburgh Postnatal Depression Scale (EPDS)

WellCare uses a four quadrant model (See **Figure 9**) for referral to case management based on the Federal Substance Abuse and Mental Health Services Administration's (SAMHSA) Four Quadrant model. The following chart represents our model, which connects individuals to care management based on the Member's needs at any point in time in his or her path to recovery and resiliency. The level of care management is assigned based on the results of the comprehensive assessment and the condition currently driving the primary needs of the member.

Figure 9 Four Quadrant Strategy



Engagement of the Member by the Interdisciplinary Care Team

At-risk members with behavioral health needs fall into either Quadrant II or Quadrant IV and receive integrated care management as described below.

- **High Behavioral Health Needs/High Physical Health Needs:** Members in Quadrant IV receive field-based case management. The medical care manager (nurse) is the primary care manager supported by collaboration with the behavioral health case manager.

- **High Behavioral Health Needs/Low Physical Health Needs:** Members in Quadrant II receive either telephonic or field-based case management from an interdisciplinary care team. The behavioral health case manager is the primary and is supported by physical health and community outreach specialists.

Continuous Assessment of Member Need and Risk Levels

Health status is dynamic. Therefore, it is important to have a screening program that accounts for the dynamic nature of health and triggers subsequent screenings and interventions to determine if these changes warrant enrollment in care or disease management or additional coordination for health service needs. There are several circumstances that can trigger the need for reassessment including:

- State provided special needs codes on the 834 enrollment file
- State provided reports
- Hospital admission, which includes a scored discharge tool that identifies a member risk of readmission based on historical utilization of services and current condition and trigger care management interventions based on the results
- Identification of under or over utilization of services: Concurrent and retrospective reviews, claims review and monitoring identify patterns of under-, over-, and inappropriate utilization that may indicate a change in member condition
- PCP/provider request: A PCP/provider may identify a change in a member's condition. When this occurs, the PCP may request that the ICT reassess the member's needs and update the care plan and care plan to reflect additional needs
- Member or caregiver request: periodically a member may identify a concern and ask for updates to their care plan. Such a request would trigger a reassessment and care planning
- Change in members functional, medical, social or behavioral health status
- Community program referrals (No wrong door e.g. AAA, ARC, day care centers)
- Referrals stemming from our Nurse Line, Crisis Line, or Community Assistance Line

Through the Comprehensive Health Risk Assessment (HRA) and reassessments, claim reviews, provider notification, member requests and ongoing monitoring, our care managers will conduct subsequent screenings to ensure that the member's health and safety are established.

WellCare's Proposed Process for Conducting Health Risk Assessments

Once a member is assigned to a care manager, the care manager conducts the comprehensive HRA to develop the member's care plan. To do this, the care manager meets with the member to complete an assessment of the member's medical, behavioral, social economic and psychological needs within 30 days of assignment to care management. Depending on the assigned care management level, the assessment with the care manager may take place in person or via telephone. Based on the information gleaned from the comprehensive assessment, the care manager develops a care plan with the member. In addition to outlining needed services, the care plan is used to identify potential barriers, to clarify or determine realistic goals and objectives and to seek alternative options for the member.

See **Attachment 59_HRA** for a copy of the sample HRA template that WellCare of Nebraska is proposing for our Heritage Health members.

DRAFT WellCare of Nebraska Health Risk Assessment Template

Question Number	Question	Answers
1	What's your ethnicity? Choose one.	□ White, Non-Hispanic □ Black or African-America □ Hispanic □ Asian □ Pacific Islander □ Native American Indian or Native Alaskan □ Native Hawaiian □ Multiracial □ Other
2	Have you ever been diagnosed with any of the following? Choose all that apply.	□ Asthma □ Coronary heart disease □ Diabetes □ High blood pressure □ High cholesterol □ None of the above
3	Have you been experiencing any significant pain for more than 3 months?	□ Yes □ No
4	Select the appropriate answer regarding pregnancy:	□ I'm currently pregnant. □ I had a baby within the last 3 months. □ I'm planning on becoming pregnant in the next 6 months. □ I'm not currently pregnant and not planning on becoming pregnant in the next 6 months.
5	How tall are you (to nearest inch, e.g., 6 ft, 00 in)? Feet? Inches?	_#___ (between 3-7) _##__ (between 0-12)
6	What is your waist measurement (to the nearest inch, measured between the lowest ribs and the top of the hips, not your belt size)?	_##__(between 0-999)
7	How much do you weigh (to the nearest pound)?	_##__(between 0-999)

8	Do you know your blood pressure? (The first number (Systolic) should be between 50 and 300, and the second number (Diastolic) should be between 30 and 180.	□ Yes □ Not the exact numbers, but I've been told it's normal. □ Not the exact numbers, but I've been told it's high. □ No, I don't.
	What is the Systolic number (50-300)?	___ (between 50-300)
	What is the Diastolic number (30-180)?	___ (between 30-180)
9	What was your total cholesterol number? (Please enter a number between 60 and 999.)	___ (between 60-999) □ Don't Know
10	What was your HDL cholesterol number? (Please enter a number between 10 and 150).	___ (between 10-150) □ Don't Know
11	What was your LDL cholesterol? (Please enter a number between 5 and 999.)	___ (between 5-999) □ Don't Know
12	What was your triglyceride number? (Please enter a number between 30 and 999.)	___ (between 30-999) □ Don't Know
13	What was your fasting blood sugar level? (Please enter a number between 30 and 999.)	___ (between 30-999) □ Don't know
14	Would you say that in general your health is:	□ Excellent □ Very Good □ Good □ Fair □ Poor
15	On most days, how many servings of grain products do you eat, such as bread, rice, or pasta? (1 serving of grains = 1 ounce)	□ None □ 1-2 servings □ 3-4 servings □ 5 servings □ 6 servings □ 7 servings □ 8 servings □ 9 servings □ 10 servings □ More than 10 servings

16	On most days, how many cups of fruit do you eat?	□ None □ 1 cup □ 1 1/2 cup □ 2 cups □ 2 1/2 cups □ More than 2 1/2 cups
17	On most days, how many cups of vegetables do you eat?	□ None □ 1 cup □ 1 1/2 cup □ 2 cups □ 2 1/2 cups □ 3 cups □ 3 1/2 cups □ 4 cups □ More than 4 cups
18	Do you ever eat what other people would consider an unusually large amount of food?	□ Yes □ No
19	In a typical week, what is the average amount of time you spend doing moderate-intensity physical activity? (You should be able to have a conversation during these activities but will have an increase in heart rate and breathing and light sweating.) Days per week? Minutes per day?	# (between 0-7) #### (between 0-9999)
20	Do you currently use any of the following tobacco products? Choose all that apply.	□ Cigarettes □ Cigars □ Pipe □ Chewing tobacco □ Snuff □ No, I do not currently use any of these items.
21	In the last month, how often have you felt nervous or stressed?	□ Never □ Rarely □ Sometimes □ Fairly often □ Always

22	How often did you feel depressed during the past week?	□ Rarely or none of the time (less than 1 day) □ Some or little of the time (1-2 days) □ Occasionally or a moderate amount of time (3-4 days) □ Most or all of the time (5-7 days)
23	Over the past week, how much sleep did you generally get in each 24-hour period?	
	Hours?	0-13
	Minutes?	00 or 30
24	On average, how often do you have a drink containing alcohol?	□ Never. I do not drink. □ Less than once a month □ Once a month □ 2-3 days a month □ 1-2 days a week □ 3-4 days a week □ Nearly every day
25	How many drinks containing alcohol do you have on a typical day when you are drinking?	## (between 0-50)
26	How often do you use a seatbelt when you drive or ride in a car?	□ Never □ Seldom □ Sometimes □ Nearly always □ Always □ I never drive or ride in a car.
27	During the past 12 months, how many times have you driven a car or other motor vehicle within 2 hours after drinking an alcoholic beverage?	## (between 0-99)
28	When you go outside on a very sunny day for more than 15 minutes, which of the following do you always do? Choose all that apply.	□ Wear protective clothing such as wide-brimmed hats or long sleeve shirts □ Avoid the sun by staying in the shade □ Use sunscreen of SPF 15 or higher

29	During the past 4 weeks, how much did your health problems affect your productivity while you were working? Think about the days you were limited in the amount of kind of work you could do, days you accomplished less than you would like, or days you could not do your work as carefully as usual. If health problems affected your work only a little, choose a low number. Choose a high number if health problems affected your activities a great deal. 0 = Health problems had no effect on my work, 10 = Health problems completely prevented me from working	## (between 0-10)
30	Based on what you shared with us, your health could use some improvement in the following area(s). Which area would you like to work on?	□ Weight management □ Nutrition □ Physical activity □ Stress management □ Alcohol □ Tobacco □ Skin Protection □ Injury prevention □ Depressive symptoms
31	How motivated are you to work on your: (0 = Not at all motivated, 10 = Extremely motivated	
	Weight management	## (between 0-10)
	Physical activity	## (between 0-10)
	Nutrition	## (between 0-10)
	Stress management	## (between 0-10)
	Alcohol use	## (between 0-10)
	Smoking	## (between 0-10)
	Skin protection	## (between 0-10)
	Injury prevention	## (between 0-10)
32	Slightly different question, how confident are you that you can improve your: (0 = Not at all confident, 10 = Extremely confident)	
	Weight management	## (between 0-10)
	Physical activity	## (between 0-10)
	Nutrition	## (between 0-10)

	Stress management	## (between 0-10)
	Alcohol use	## (between 0-10)
	Smoking	## (between 0-10)
	Skin protection	## (between 0-10)
	Injury prevention	## (between 0-10)
33	Do you need any help with hearing?	□ Yes, I need assistance with hearing. □ No, I do not need assistance. If yes, why: □ Deaf □ Hard of Hearing/Permanent Hearing Loss (in one or both ears) □ Tinnitus □ Temporary Hearing Loss (sinus infection or other temporary condition) □ Other (Specify)
34	Do you need any help with seeing? (Please mark yes only if you still have trouble seeing when wearing glasses or contacts)	□ Yes, I need assistance with seeing □ No, I do not need assistance
35	What is your preferred language?	□ English □ Spanish □ Russian □ Chinese □ Bengali □ Urdu □ Creole □ Ilocano □ Korean □ Vietnamese □ Mexican-Spanish □ Other
36	When was your last mammogram?	□ Less than 1 year ago □ 1 to 2 years ago □ More than 2 years ago □ Don't know □ I've never had a mammogram
37	When was your last Pap smear?	□ Less than 1 year ago □ 1 to 3 years ago □ More than 3 years ago □ Don't know □ I've never had a Pap smear.

38	Have you had a colonoscopy within the last 10 years? (This is when a tube is inserted in the rectum to check the large intestine for colon cancer.)	□ Yes □ No □ Don't know
39	Have you had in influenza (flu) vaccine within the last 12 months?	□ Yes □ No □ Don't know
40	Which of the following conditions have you been treated for?	□ Alcohol abuse
		□ Allergies
		□ Alzheimer's / Dementia
		□ Amputation of a leg, foot or toe
		□ Angina
		□ Anxiety
		□ Atrial fibrillation or an Irregular heart rate/rhythm
		□ Asthma
		□ Back pain
		□ Blind/Impaired vision that cannot be corrected
		□ Blood disorders/Anemia
		□ Bipolar disorder
		□ Cancer - Type/Where
		□ Chest pain/Heart Condition
		□ Chronic kidney disease
		□ Chronic fatigue syndrome
		□ Chronic obstructive pulmonary disease (COPD, including chronic bronchitis and emphysema)
		□ Chronic pain
		□ Coronary heart disease
		□ Depression
		□ Diabetes
		□ Eating Disorder (Anorexia, Bulimia)
		□ Fibromyalgia
		□ Gastro esophageal reflux disease (GERD)
		□ Heart attack
		□ Heart failure/Congestive Heart Failure (CHF)
		□ Hepatitis Disease
		□ High blood pressure
		□ High cholesterol
		□ HIV/AIDs

		□ Insomnia
		□ Irritable bowel syndrome
		□ Liver Disease
		□ Migraine
		□ Neuropathy / Loss of Sensation or tingling in feet or hands
		□ None of the above
		□ Obesity
		□ Open Wound that is not healing properly
		□ Organ Transplant
		□ Osteoarthritis
		□ Osteoporosis
		□ Other
		□ PDD also known as Asperger's or autism
		□ Peripheral vascular disease (PVD)
		□ Rheumatoid arthritis
		□ Schizophrenia
		□ Sickle Cell Disease
		□ Stroke or transient ischemic attack (TIA)
		□ Substance abuse
41	Telephonic: May we continue to use this phone number or is there a better number to contact you? Portal/Paper: What is the best phone number to contact you?	□ Yes □ No □ Specify Other number:
42	Are there any cultural or religious beliefs that affect your healthcare?	□ Yes □ No Please explain:
43	What is your marital status?	□ Married □ Divorced □ Separated □ Never Married □ Widowed □ Other (specify)
44	What is your date of birth?	MM/DD/YYYY
45	What is your gender?	□ Female □ Male

46	What is your highest level of education?	□ N/A based on child's age □ Still attending school □ Less than high school graduate □ High School graduate/G.E.D. □ Some college or Associate's Degree □ College graduate □ Graduate Degree
47	What is your current employment status?	□ Full-Time □ Part-Time □ Volunteer Service Hours □ None
48	Which of the following best describes your living situation?	□ Home/Condo/Apt. you own □ Home/Condo/Apt. you rent □ Assisted Living Facility □ Retirement Community □ Senior Housing Nursing Home □ Homeless □ Friend or Relative's home □ Other (Specify):
49	With whom do you live? (Check all that apply)	□ Alone □ Spouse/Significant Other □ Child(ren) □ Grandchild(ren) Parent Sibling □ Other Family Member □ Roommate/Friend □ Other (relationship):
50	Do you have someone such as a family member, friend, paid caregiver or community support program to help you if you become ill?	□ Yes □ No
51	Do you have a primary care doctor?	□ Yes □ No

52	Have you scheduled a visit with your Primary Care Provider (PCP)?	□ Yes □ No
53	Telephonic: If no; Do you need assistance scheduling a visit with your PCP? Portal/Paper: Call phone number on back of ID card for assistance with scheduling an appointment to see your PCP.	
54	Do you have regular and reliable transportation to get to doctor's appointments or clinic visits?	□ Yes □ No
55	Are you receiving any services for physical, occupational, speech therapy, or long term support services?	Select all that apply: □ Physical Therapy □ Occupational Therapy □ Speech Therapy □ Long Term Support Services □ None
56	Do you have difficulty understanding or remembering new information?	□ Yes □ No
57	Are you receiving hospice services?	□ Yes □ No
58	In the past week have you experienced any	□ Lower body muscle weakness or generalized fatigue? □ Pain in your back that affects your mobility or daily activities? □ Loss of balance or unsteadiness when you walk or get up from a chair or bed? □ Dizziness or vertigo when you walk or get up from a chair or bed? □ Forgetfulness, memory loss or confusion?
59	How many prescription medications do you take per day?	□ None □ 1-3 □ 4-6 □ 7-10 □ More than 10 □ Unsure
59	How many non-prescription or over the counter medications do you take per day?	□ None □ 1-3 □ 4-6 □ 7-10 □ More than 10 □ Unsure

60	What are your current medications?	Free text box
61	In the past 6 months, how many times have you stayed overnight in the hospital?	□ 1 □ 2 □ 3 □ 4 or more
62	In the past 6 months, how many times have you visited the emergency room?	□ 1 □ 2 □ 3 □ 4 or more
63	In the past 6 month, how many times have you had surgery?	□ 1 □ 2 □ 3 □ 4 or more
64	In the past month, have you had frequent shortness of breath, chest pain, and/or had swelling of the ankles or feet before getting out of bed in the morning?	Check all that apply - □ Shortness of Breath □ Chest Pain □ Swelling □ None
65	How many times in the past 6 months have you had an episode of fainting, falling or dropping to the ground or lost your balance, slipped or tripped over something that resulted in falling or dropping to the ground?	XX Times
65	Do you have difficulty doing any of the following without help from another person?	□ Taking your medications □ Using the telephone □ Managing your finances □ Doing your housework □ Doing your laundry □ Shopping for groceries □ Transporting yourself/Transportation □ Preparing your meals □ Getting in and out of bed or chair □ Dressing and undressing yourself □ Bathing yourself □ Feeding yourself □ Getting or off the toilet

66	Can you afford the food you need?	□ Yes □ No
67	Do you currently use any of the following medical equipment or devices? Select all that apply or choose none	□ Electric Chair Lift □ Electric Stair Lift □ Electric Cart or Scooter □ Raised Toilet Seat □ Toilet Safety Frame/grab bar □ Bedside Commode □ Urinary Catheter □ Oxygen Equipment □ Grab Bars in Tub or Shower □ Hospital Bed □ Wheelchair □ Walker □ Cane □ Crutches □ Prosthesis/Leg Braces □ Other; Specify □ None
68	Over the last two weeks have you been bothered by:	□ Little interest or pleasure in doing things □ Feeling down, depressed or hopeless □ Are you receiving counseling for depression
69	If you are a new member with WellCare, were you enrolled in Case or Disease Management with your previous healthcare insurance?	□ Yes, Case Management (if yes trigger referral to CM) □ Yes, Disease Management (if yes trigger referral to DM) □ No □ I don't know □ Not applicable
70	Would you be interested in receiving Case Management Services?	□ Yes □ No

SECTION IV.L CARE MANAGEMENT

60. Describe the specific types of services members will receive at each risk level. Provide recommendations for additional innovative care management strategies, if any, MLTC may want to consider. *(Page limit 5 pages)*

WELLCARE'S RISK LEVELS AND SERVICES AT EACH LEVEL: A TAILORED APPROACH

WellCare's risk levels (**Figure 10**) range from one to four with Level 4 signifying the most highly complex patients and Level 1 signifying the lowest need level. WellCare acknowledges that our use of these risk levels must be reviewed and approved by MLTC.

Figure 10

WELLCARE'S CARE COORDINATION PROGRAM	
Risk Stratification Levels	**Stratification Level Description**
Care management Level 4	This level will be for our highest risk and most complex members. These members have catastrophic, high-risk, high-cost needs, and require special assistance negotiating health and social services systems. Level 4 members will include those with intensive special health care needs, complex discharge needs, high risk pregnancy, multiple emergency room visits or frequent hospitalizations or readmissions, catastrophic conditions, and members who are medically fragile including those LTSS members in the community, nursing facility, and ICF/ID. Members stratified as Level 4 will require the highest level of care management intensity.
Care management Level 3	This level denotes our moderately high risk or complex members. They may include, without limitation, children with special health care needs, members with chronic conditions, members with frequent emergency room visits or hospitalizations. Members, who may have a combination of medical, social, and mental health needs, will be assigned a primary care manager who is supported by an interdisciplinary team.
Care management Level 2	This level denotes members with moderately acute and complex needs. These members may require disease management for conditions including but not limited to asthma, controlled diabetes, and hypertension.
Care management Level 1	This level denotes our lowest risk member. They are stable and have only a few interventions on their care plan. They will require only periodic support and monitoring.

WellCare's care management program design contemplates differences between members and member needs over time. It's intensely individualized because we do not believe in a one-size-fits all set of services and care planning for members in our care management program. For instance, a member may be "Level 4" in terms of their risk level, but in reality we may find that they are actually in an effective care management program through agencies like the Area Agencies on Aging or Wraparound/Coordinated System of Care type coordination through the Regional Behavioral Health Authorities. To avoid duplication of efforts, those members will receive different care management supports than those who are wholly unmanaged.

Our program matches the intensity of services we provide to our members' clinical profiles and health needs, which vary member to member and, for a given member, varies over time as shown in **Figure 11**. This level of stratification corresponds to the type and intensity of care management services (i.e., face to face, telephonic or educational material mailings,) offered to help members manage chronic or acute conditions. This stratification allows WellCare to deploy critical care management resources to where member needs and opportunities to impact health outcomes are greatest.

A key component of the services our members with the most complex needs receive is in-home support.

We have found that nothing replaces a nurse or licensed behavioral health professional being in the home, meeting with members face-to-face and with their families and caregivers. We will hire care managers from within the communities in which our members live and they will remain in those communities so those irreplaceable in-home contacts can be made.

Figure 11

WellCare's Care Coordination Program	
Risk Levels	**Description of Services Provided at Each Level**
Care management Level 4	Each Level 4 member will be assigned a care manager who is a registered nurse, licensed clinical social worker, or mental health specialist depending on the member's most significant needs. ***Care management will be in-person/face to face and supplemented with telephonic outreach throughout the members' time in Level 4.*** Care managers will assess their health and develop a care plan aimed at stabilizing the member. The care manager will contact the member frequently, at least once a week, and actively assists with transition of care, appointments, referrals, transportation, forms, paperwork, and marshaling various health and social service providers.
Care management Level 3	Each Level 3 member will be assigned a care manager who is a registered nurse, licensed clinical social worker, or mental health specialist depending on the member's most significant needs. Members, who may have a combination of medical, social, and mental health needs, will be assigned a primary care manager who is supported by an interdisciplinary team. Care managers will assess their health and develop a care plan aimed at reducing risk level. Care management will be primarily telephonic but face to face interactions may occur. The care manager will contact the member and assist with referrals, transportation, and community-based services.
Care management Level 2	Each of these members is assigned to a primary disease manager or health coach who will provide telephonic outreach and personalized education and link members to community-based programs (i.e., such as smoking cessation). Health coaches are appropriately trained for the scope of their roles and have clinical registered nurse oversight for issues escalation if a member has an acute health need that needs to be addressed. Some health coaches have specialized training as diabetes educators, exercise physiologists or nutritionists. Disease management outreach will be telephonic. Disease managers will assess their health and develop a care plan aimed at maintaining or reducing risk level. Their care manager will assists with referrals, transportation, and community-based services.
Care management Level 1	Outreach will be telephonic for any Level 1 Member referred to Care or Disease management. Care managers will assess their health and develop a care plan in concert with the member, his or her providers, and care givers. The care manager will ensure that the member has information about public assistance programs for health and social services which would benefit them and to which they may be entitled. The care manager will contact them at least once a month to assess their status and progress against goals. The care manager will update the member's care plan monthly or as their health status or circumstances change. Level 1 Members who are not referred to Care Management will receive educational literature mailings.

Tailoring Care Management to Meet Member Needs Based on Specific Conditions

Within each care management level, services offered will flex based on special health conditions of individual or groups of members. For instance, members identified with high-risk pregnancies will receive services through our high-risk OB program which includes additional education and outreach, as well as access to our Healthy Rewards programs. Members in foster care will receive additional

interdisciplinary support through our Foster Care Care Management program, and members with transplant needs will receive support through our Catastrophic Case Rounds effort that focuses on effective discharge planning for members with very complex and chronic needs.

WellCare's Pregnancy and High-Risk OB Program

The WellCare Pregnancy Program provides education, guidance and support for all WellCare pregnant members. The intent of the program is to provide helpful tips, tools and information for pregnant members to make healthy choices during pregnancy to achieve the healthiest birth outcome possible.

The program identifies pregnant members through state files, claims and member or provider direct notification. Upon recognition of the pregnancy, an outreach call is placed to all pregnant members to assess the current health status, risk stratify the member based on future risk for preterm birth or pregnancy complications. Pregnancy assessments of the member will be conducted as early in the pregnancy as notification is received, mid-point of pregnancy and finally, upon delivery. The risk assessment touches seek to identify pregnant members facing current or prospective risks in their condition for engagement in the High Risk Obstetrics Program. The High Risk Obstetrics Program assigns a specially trained Obstetrical Registered Nurse to follow the member closely for education and support to navigate their high risk pregnancy journey. These members will be supported through plan and community resources to adhere to the high risk pregnancy plan of care to achieve best birth outcome possible for the member.

All WellCare Pregnancy Program members are offered the following to support their pregnancy journey:

- Assessments throughout pregnancy to assess for high risk factors
- Complimentary book on pregnancy and newborn care
- Infant Immunization Chart (Published by Centers for Disease Control)
- 24/7 Pregnancy Nurse Support line
- WellCare Pregnancy website
- Text 4 Babies (https://www.text4baby.org/)
- Incentives to complete prenatal and postnatal care

Field-based Care Management

Members in the highest risk levels (Level 4 or Level 3 with four or more impactable co-morbid conditions) are provided field-based in-home care management services. The Field-Based Short Term Case Management (SCM) Team consists of registered nurses, social workers and care coordinators. Members receive personal care with home visits, a care plan developed and monitored by an Interdisciplinary Care Team (ICT), assistance navigating the array of benefits and services available to them, direct contact to their assigned care manager, support and education for their caregiver and access to our community outreach associates to help connect to social services resources.

Disease Management for Lower Risk Level Members

The WellCare Disease Management Program is designed to be complimentary and supportive to members in the lower risk levels. A member may be referred directly to the Disease Management Program or referred upon completion of higher levels of care management. The Disease Management Program staff has full view of the member's assessments, case notes and health care claims to deliver education, guidance and support for the primary chronic condition for which a member may need additional support.

The six key chronic conditions that are addressed in the Disease Management Program are:

- Asthma
- Coronary Artery Disease
- Chronic Obstructive Pulmonary Disease

- Congestive Heart Failure
- Diabetes
- Hypertension

Members in the Disease Management Program members are offered supportive disease specific educational materials from our Vendor Partner, Krames, written in easy to understand language for better management of their condition. Upon completion of the Disease Management Program, the member is offered supplemental condition specific mailings twice a year via mail as long as desired.

INNOVATIVE CARE MANAGEMENT STRATEGIES MLTC MAY WANT TO CONSIDER

Implementing Special Needs Codes

Given our experience with the Agency for Health Care Administration (AHCA) in Florida, we suggest that MLTC expand the use of "special codes" to include indicators such as children with special needs, HCBS waiver populations and specific impactable chronic physical (i.e. sickle cell) and behavioral health (i.e. schizophrenia) conditions. Providing this information at the time of enrollment would facilitate transition of care and assist case management staff to prioritize Health Risk Assessments (HRAs) and care manager assignment.

Focused Cross-agency Support for Foster Care Members and Smooth Transitions of Care

Foster Care members will automatically be eligible for WellCare's specialized Foster Care Care Management program, and they will receive different levels of support and coordination depending on their needs assessments. Based on our extensive and successful experience working with this population in Kentucky, we encourage partnerships between WellCare, MLTC, the Division of Children and Family Services, providers, family advocates and the judicial system to ensure a streamlined effort to assess needs and ensure the right levels of care coordination for individualized foster children.

We know that by the time foster children reach us, they often have an array of care plans and assessments. We would encourage initiatives to streamline the sharing of the young person's history to ensure the best and most appropriate care coordination.

For instance, WellCare affiliates in New York and New Jersey established FTP sites to receive assessments for certain members from their Departments of Public Health. The assessment and associated data are automatically loaded into WellCare's Medical Management Platform (MMP) and processed through an intake review and linked to the Member record. Where assessment information indicates the need for care management, a care manager is assigned and the care management process immediately begins, with the assessment information being directly integrated into our plan of care.

SECTION IV.L CARE MANAGEMENT

61. Describe how the MCO will assist members to identify and gain access to community resources that provide services the Medicaid program does not cover. *(Page limit 2 pages)*

HEALTH*CONNECTIONS*: ASSISTING MEMBERS TO GAIN ACCESS TO COMMUNITY RESOURCES

WellCare recognizes that helping our members achieve improved health outcomes and enhanced quality of life requires us helping them to navigate "the 80 percent of healthcare that doesn't happen in a doctor's office." Having exclusively served members in government-sponsored health care programs for more than 20 years, we know first-hand the unique barriers our members face – from food insecurity to unstable housing and a host of other social determinants that undermine our members' ability to optimize their health outcomes. ***In response, WellCare created the proprietary HealthConnections Model to support our members in accessing and using social services to reduce those barriers and to find locally based community health and wellness programs.***

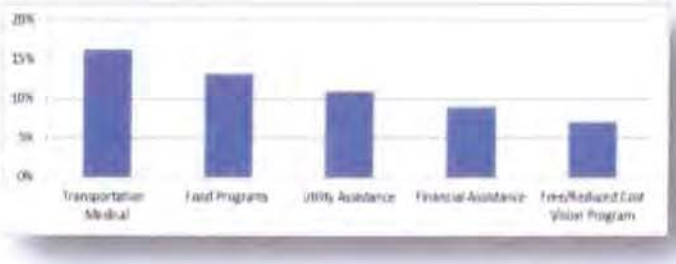
Best-in-Class: Social Services Support
With a social service network of 110,000 organizations, WellCare has referred 8,394 consumers to 6,899 organizations to access 26,614 social services.

At the core of Health*Connections* is the concept that the social service network is a vital component of the healthcare delivery system. With this in mind, WellCare uses traditional public health methods to research and catalogue available community-based programs, activities and services that comprise the social safety net. WellCare CommUnity Liaisons load the network into a centralized CommUnity Command Center that is accessed by member-facing and community-facing representatives who can search for available services and record the referral in a social service electronic health record (SSEHR). This SSEHR maintains information for each caller on all referrals and their disposition. This transactional-level tracking provides tremendous micro- and macro-level data for social service related analysis. ***To date, we have loaded more than 5,000 services into the Nebraska-specific database, which doesn't yet include services loaded from border states, which we know can also benefit Heritage Health members.***

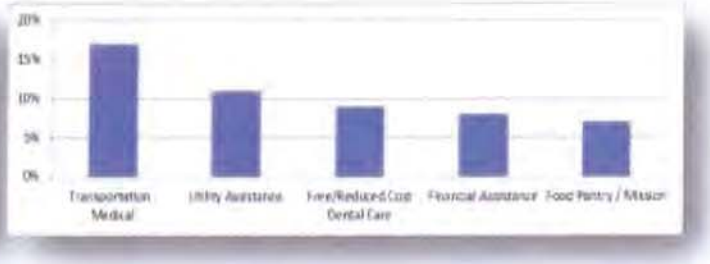
WellCare launched the Health*Connections* model in Kentucky in November 2011. Now operating in 12 states, WellCare has referred nearly 8,400 people to more than 26,000 social services offered through nearly 6,900 organizations. In addition, during this same period, WellCare identified and closed nearly 1,600 social service gaps. The top five referral categories and gaps are identified in **Figure 12**.

Figure 12

Top Five Referrals by Category



Top Five Gaps by Category



The important role of the social safety net provider in the healthcare continuum for individuals enrolled in Medicaid heavily influences how we can engage with our communities. Connecting members to social services represents one piece to the equation. The primary goal of the Health*Connections* Model is to improve the health and vitality of our members and communities by supporting the social safety net and quantifying its impact on health outcomes. WellCare has identified four complementary program elements to help achieve this goal shown in **Figure 13**.

Figure 13

- ***CommUnity Activities*** – Community based health and wellness events leveraging existing programs.
- ***HealthConnections Councils*** – Community planning councils focused on quantifying the breadth and scope of the available social safety net and identifying creative and innovative ways to help support the network together with other community and civic leaders.
- ***Social Service Utilization Support*** – Facilitating member connections to social services and bridging gaps in available community-based programs and services. WellCare care managers, CommUnity Advocates, member services representatives and other associates are trained on accessing our social services database and CommUnity Assistance Line to directly help members in need of specialized social service support.
- ***CommUnity Health Investment Program*** – Strategic philanthropic granting program to support community-based innovation and to pilot potential social service payment models. Our investment program is highly targeted based on very specific data related to our members. We enter into formal business agreements with our partners, which allows us to track services and tie access to social services back to improved health outcomes and enhanced quality of life for our members.

WellCare of Nebraska uses a data-driven process (called the Health*Connections* CommUnity Development Approach) to identify health topics that impact the communities we serve. Using this information, WellCare CommUnity Advocates prepare an action plan and assemble an internal cross functional team to review the data and the proposed plan. Then, with the team's guidance, the CommUnity Advocate implements a community health initiative that engages with public health stakeholders. One consistent topic in all markets is access to healthy foods, and WellCare developed a program that it proposes in all markets including Nebraska.

In Illinois, for example, the local CommUnity Advocacy team partnered with a community-based non-profit and the local farmer's market association to offer a double coupon program for low-income families accessing Supplemental Nutrition Assistance Program (SNAP) benefits when they used their benefit at a local farmers market to buy healthy food options like fruits and vegetables. Called LinkUP Illinois, more than 40 farmer's market now participate with benefits for both the SNAP recipients and to the farmer's market vendors. According to Experimental Station, every $1 of SNAP money spent creates $1.73 for local economies. In total, the program generated nearly $215,000 in increased sales of locally grown, farm fresh foods with fruits and vegetables representing more than half of the total purchases.

SECTION IV.L CARE MANAGEMENT

62. Describe the MCO's strategy to address the unique challenges when coordinating care for dual-eligible individuals who receive their services from both Medicare and Medicaid. *(Page limit 2 pages)*

COLLABORATION AND PARTNERSHIP: THE WELLCARE STRATEGY FOR COORDINATING CARE FOR DUAL-ELIGIBLES

WellCare serves 2.4 million Medicaid members and more than 350,000 Medicare Advantage members across 16 states, so the unique challenge of serving dually-eligible individuals has become a regular part of doing business for us. Among our members are those in the Dual Special Needs Populations, Fully Integrated Dual Advantage (FIDA) Aged, Blind and Disabled (ABD), Foster Children, Adults with Serious Mental Illness and Children with Serious Emotional Disturbances, individuals with Developmental Disabilities and those receiving Home and Community-Based Waiver Services (HCBS) and Long Term Supports and Services (LTSS). Because of the broad range of entities that provide coverage and services to these diverse populations, we have developed informal and formal processes for coordinating care across different payers and care coordination entities. And because we have Medicare Advantage programs as well as Medicaid programs, we have developed these processes based on best practices from both sides to ensure a seamless process for members.

Our goal when working with dually eligible members is to avoid duplication of care coordination services and present a single coordination strategy regardless of who is responsible for the service. Under this model, members with co-morbid and complex conditions receiving most of their physical health, pharmacy and basic behavioral services through their Medicare Advantage plan or through fee-for-service Medicare, but receiving specialty behavioral health or community-based care through a WellCare Medicaid plan, should see only a single care coordination process that is focused on their primary needs and acuities. WellCare will collaborate and partner with any other Care Managers in the member's Interdisciplinary Care Team to ensure timely, unduplicated coordination of services.

WellCare recognizes that for our Heritage Health members, we are responsible for providing medically necessary covered services to members who are also eligible for Medicare if the service is not covered by Medicare. We also understand that we must ensure that services are provided without charge to members who are dually eligible for Medicare and Medicaid, and that we must coordinate with Medicare payers, Medicare Advantage Plans, and Medicare providers as appropriate to coordinate the care and benefits of members who are also eligible for Medicare. We also recognize that not all Medicare members in Nebraska are part of a Medicare Advantage plan, so there is opportunity for increased access to coordinated care for dually eligible members.

Our strategy for facilitating care coordination for dual eligible individuals is multi-faceted:

Step 1: Identification. Using Coordination of Benefits information, our care management platform provides a fully integrated and 360-degree view of a member's coverage and benefits so when a request comes in for a member, our affiliates can quickly identify if the member is Medicare and can identify if they have a Medicare Advantage Plan.

Step 2: Assessment of Need. We seek to fully understand a member's care coordination needs either through screening or a formal Health Risk Assessment. Members enrolled in the Case Management program will complete a comprehensive assessment that will also provide insight into member coordination and educational needs. To avoid repeated requests for medical history or diagnostic tests, we seek to coordinate with the Medicare plans or providers to access this information if an assessment has already been done.

Step 3: Inventory of Benefits and Resources. Our systems clearly outline benefits and services available to members through WellCare, and our care managers are trained on WellCare benefits. Any

benefits outside WellCare may be coordinated through other payers or community based resources. When our members require a benefit that WellCare does not provide, our care managers help navigate the member to the appropriate source, including social services. We know that most of our dual-eligible members have many needs outside of physical and behavioral health care to sustain their overall health and quality of life. For that reason, we ensure our care coordination plans include our Health*Connections* efforts to connect members to needed social services available in their communities. We also know that some of our dually eligible members will be residing in a nursing facility or intermediate care facility. Based on Nebraska's regulations for services covered by the facility payment, we will coordinate with the facility to ensure members have access to services identified through care planning and assessment.

Step 4: Sharing of Data and Information. Across both our Medicaid and Medicare plans, we share member information in accordance with all state and federal privacy rules when requested. This information can include hospital admissions or discharge plans or other plans of care that partner plans can use to help facilitate smooth transitions and follow-ups. In other states we have set up FTP transmission for secure information transfer between plans, as well as with nursing homes and waiver service coordinators at local Area Agencies on Aging as needed, to ensure critical patient information is available to all appropriate parties in a timely manner. In Nebraska, we have already been meeting with the Nebraska Health Information Initiative (NeHII) which we could use to help us even more effectively exchange patient information to ensure seamless care regardless of primary payer or provider.
