Step 5: Collaboration among Plans and Providers. Successful care coordination among diverse entities serving our members is built on front-line relationships and team-based care. Nurses and social workers form direct connections with their counterparts in other plans. This helps reduce duplication of services and helps the plan optimize its ability to help the member based on their primary diagnoses and provider needs. For instance, a dually-eligible individual with SMI receiving Assertive Community Treatment (ACT) services, which are only covered by Medicaid, is best served having their care coordination guided by the Medicaid plan rather than the Medicare plan that would not have a relationship with the ACT provider and would be more disconnected from the member's day in and day out care needs. However, a member in a nursing facility with complex physical needs being managed by their Medicare plan would be better served having care coordination guided by their Medicare plan which has the relationship with the facility. In these cases, when one plan or the other can clearly become the member's care coordination home, it is incumbent on the primary plan to keep the other parties informed of critical changes or barriers. Our experience has taught us that peer-to-peer discussion of complex cases is critical to ensuring a dual-eligible member receives high quality coordinated care. In Tennessee, for example, WellCare's Medicare Advantage plan has established monthly meetings between the Medicaid plans and the Dual Special Needs Plans to discuss member case issues. For members in Medicare fee-for-service, our Care Managers would directly engage the member's providers and others in the Interdisciplinary Care Team to discuss and collaborate on a care plan.

Additionally, our systems are built to provide streamlined processes for providers working between plans including promoting data sharing agreements that allow us to cross over claims seamlessly and fraud, waste and abuse and Coordination of Benefits protocols to ensure Medicaid remains the payer of last resort and providers aren't double billing.

Leveraging Providers to further Enhance Coordination Efforts

In addition to direct coordination between care managers from different plans, WellCare recognizes that many providers in Nebraska have taken ever-increasing responsibility for care coordination through their efforts as Patient-Centered Medical Homes (PCMH). Our plan to help support and enhance the PCMH model includes recognition of the role PCMHs can play in navigating between members' Medicare and Medicaid plans.

SECTION IV.L CARE MANAGEMENT

63. Describe the process for care coordination for members who are Tribal members or are otherwise eligible for care through Indian Health Services. *(Page limit 1 page)*

SUPPORTING TRIBAL MEMBERS: WELLCARE'S PROCESS FOR SPECIALIZED CARE COORDINATION

WellCare is adept at tailoring our care management model to meet specific and unique needs of diverse populations. Through connections with the Nebraska Urban Indian Health Coalition, we had the opportunity to meet with representatives from clinics from the Omaha, Santee Sioux, Ponca and Winnebago tribes. We also met with ABD and dually-eligible tribal members in focus groups. Recognizing that our Native American members have very specific and protected rights and 638 tribal clinics/Indian Health Services fall under strong federal guidelines, we have built our Tribal Care Management strategy to strengthen and supplement existing programs. This strategy, based on those meetings with members and providers, includes the following priorities:

- **Development of specific policies and procedures for working with Tribal Clinics:** These policies will highlight the importance of supplementing rather than duplicating the efforts of the Tribal Clinics and coordinating care for our shared members. Two ways we will support the clinics is through data sharing and the use of our CommUnity Assistance Line for referrals to social services.
- **Integrating the Tribal Network Liaison into our functional structure**: The liaison will report through provider services, but will work closely with clinical and quality staff members on behalf of Native American members through our already integrated operational structure.
- **Developing specific expertise among our field-based care managers:** We will look for opportunities to supplement our care management team with qualified Native Americans, and we will build specific training across all of our field-based care managers related to working with the 638 tribal clinics and Indian Health Services. We will make sure that all of our care management processes are sensitive to the culture, value and beliefs of the tribal community in relation to their engagement and acceptance of our assistance. We understand that inclusion of family members and other support systems are essential to the process.
- **Connecting Community Advocates with the Tribal Clinics to supplement Wellness activities:** We were very impressed with the many activities the tribes are undertaking to improve wellness of their patients and we would like to support those programs. The Omaha's efforts, for example, to develop a robust nutrition education for patients with diabetes (including a full kitchen to train on healthy cooking) is perfectly aligned to programs we are executing across the country through our award-winning Health*Connections* model.
- **Supporting existing and emerging capacity Integration within the Tribal Clinics**: The tribal clinics in Nebraska are advanced among many primary care provider groups in terms of co-locating and integrating behavioral health into their practices. This is an effort WellCare would like to build upon. For example, we can expand on the effort by the Santee Sioux to provide telepsychiatry services for their patients.
- **Ensuring Tribal Representation on key Committees**: Key to our strategy to ensuring our tribal members are getting what they need and that our Tribal Care Management program is effective is making sure we have a way to get structured and consistent feedback from the tribal clinics. To help in that effort, WellCare will commit to ensuring regular tribal representation on key committees such as the Clinical Advisory Committee, Member Advisory Committee or Provider Advisory Committee.

SECTION IV.L CARE MANAGEMENT

64. Describe how the MCO will coordinate service planning, service delivery, and post-discharge care among discharge planners (including State psychiatric hospitals) and home health and other service providers. Include the MCO's approach to care management for youth discharged from residential care. Explain how the MCO will monitor the post-discharge care of members who receive services in remote areas. *(Page limit 4 pages)*

SETTING MEMBERS UP FOR SUCCESS: COORDINATION OF SERVICE PLANNING, SERVICE DELIVERY AND POST-DISCHARGE CARE

WellCare embraces a fully integrated proactive approach to discharge planning that empowers members and caregivers to take charge of their own wellness and recovery. Our discharge planning processes focus on providing the full continuum of supports needed to reduce unnecessary readmissions to the hospital or trips to the emergency room.

To ensure optimal transition for a member following discharge from an institutional setting, we conduct an evaluation of the member's medical, behavioral health and social needs during an initial screening conducted within 24 hours of notification of a member's admission. Based on this assessment, we identify services, supplies and community resources needed to facilitate a seamless and safe discharge transition.

Discharge planning is a collaborative and cooperative effort between the member, the attending physician, facility discharge planner, and WellCare's concurrent review nurse and/or licensed behavioral health professional, ancillary providers and community resources. The services provided through our comprehensive discharge plan may include:

- Link to their primary care provider (PCP) and specific specialists
- Durable medical equipment
- Transfers to an appropriate step-down facility (i.e., skilled nursing facility)
- Home health care
- Medication management
- Physical, occupational or speech therapy
- Social and community-based services
- Outpatient Behavioral health services

WellCare trains dedicated associates on the process of discharge planning and assigns them to a Transition Care Coordinator Team to ensure focus on effective discharge planning and follow-up. Transition Care Coordinators work under WellCare's five fundamental principles (See **Figure 14**) of effective discharge planning: access, integration, person-centeredness, teamwork and data-informed coordination.

Figure 14

THE FOUNDATIONS OF WELLCARE'S DISCHARGE PLANNING PROCESSES	
Access	One of the most consistent predictors of success post-discharge is access to quality community-based services. Whether that's rehabilitation services for a stroke victim, in-home care for a transplant patient, or an array of outpatient and home-based services for individuals with Serious Mental Illness (SMI), WellCare takes seriously our responsibility to ensure members have access to the services and providers they need to be successful in their own personal recovery. We know that currently in Nebraska, natural patterns of care often drive people back to urban centers including those in border states, for follow-up, which can present unique transportation and other access challenges. To help combat these challenges, our discharge planning process includes a full review of geographic barriers the member and caregiver may face, an inventory of available healthcare and community resources and the deployment of a Remote Access Discharge Plan that could use a combination of consultative services, telehealth and telemonitoring, as well as our field-based case management services built within communities across the state.

The Foundations of WellCare's Discharge Planning Processes	
Integration	WellCare offers fully integrated programs and services, so discharge planning naturally is done as an integrated plan considering the member's behavioral, physical and psychosocial needs. Discharge planning nurses and social workers work together along with our CommUnity Advocates to identify needs within the healthcare continuum for the member post discharge as well as social needs that could range from access to housing or home modification resources to supported employment resources for members exiting a state psychiatric hospital or other long-term facility.
Person-Centeredness	A critical part of effective discharge planning is ensuring members and caregivers are fully engaged in the plan. The principles of recovery-focused care planning seen in behavioral health care apply equally to physical health care needs, and our integrated approach helps ensure person-centered planning regardless of member condition. Our Transition Coordinators facilitate person-centered planning by partnering with facility discharge planners to engage members to discuss the plan throughout the concurrent review process. Having member sign-off and engagement is written into our discharge processes. And for members with high acuity needs who may need Catastrophic Case Rounds, such as transplant patients and SMI patients exiting long-term care, we will deploy field-based case managers or peers, as appropriate, to work directly with patients.
Teamwork	Discharge planning is a core responsibility of every contracted facility in our network but it's not one we expect them to do in a silo. Our Transition Care Coordination associates within our Utilization Management team partner with facilities, PCPs, specialists, caregivers, members, social workers, community resources and state agencies as appropriate to develop interdisciplinary care teams to ensure a member's discharge considers all the potential barriers to success and engages all resources to mitigate those barriers. One successful strategy we have used in other states to incent providers to conduct effective discharge planning is our "Gold Card" program. "Gold Card" hospitals are designated based on their outcomes particularly around follow-up after hospitalization, average length of stay and/or readmission rates. Facilities that perform well receive "Gold Card" status for a period of time. These facilities are exempt from the concurrent review process and handle all aspects of discharge planning. We'd like to introduce something similar for our Nebraska program once enough data is available to identify the appropriate facilities and metrics to use.
Data-informed Coordination	We monitor discharge plans for compliance and build in interventions when data shows gaps in care. So when our data shows, for instance, a failure to keep an aftercare appointment or fill critical prescriptions, care coordinators can do the appropriate follow-up to help members get back on track with their plan.

The Interdisciplinary Team: Coordinating Among Discharge Planners and Providers

The first step to ensuring seamless coordination among providers and discharge planners is identification of members in need of more complex discharge planning based on their acuity of risk for readmission post-discharge if not provided the right supports. WellCare employs a screening tool that is completed by one of our utilization management nurses at the time of admission. This tool is tailored to specific populations such as adult, pediatric and maternity and to conditions such as neo-natal intensive care or behavioral health. Based on the risk score for the member, we deploy discharge supports, which could range from telephonic support and planning of facility-based discharge efforts to deploying field-based care managers into the facility to work directly with members, caregivers and the varying levels of service providers. Ideally, with permission from higher volume providers, we would place a concurrent review nurse in the facility to help facilitate these efforts and seamlessly pass the most complex cases to our field-based care management staff so we can conduct home safety evaluations as needed and the member is supported once he or she leaves the hospital.

For members receiving transplant services, we automatically deploy our Catastrophic Case Rounds at least 15 days of the transplant to begin planning for a successful discharge. Catastrophic Case Rounds

include an interdisciplinary care team of social services, field case management, behavioral health clinicians and the medical director. During these rounds, risks and barriers are identified and strategies developed for mitigation of those risks. A successful example of WellCare's discharge planning innovations can be found below.

SUCCESSFUL DISCHARGE PLANNING

A Success Story from WellCare's Affiliate in Hawaii, known as 'Ohana

WellCare's affiliate in Hawaii implemented a program called After Hospital Outreach Programs (AHOP). This program is based on a partnership between WellCare and several high volume hospitals to decrease hospital readmissions. The first diagnosis piloted for this program was Congestive Heart Failure (CHF) one of the most common diagnoses for readmission with WellCare's membership. In order to strengthen our ability to reach our members, WellCare also partnered with the state Office of Aging (OOA) to offer a similar support program. The OOA team provided outreach to a member for up to six months to ensure a safe discharge and prevent readmissions. We alert the OOA of any high-risk pending discharges so they may include our membership in their program. In these cases WellCare is able to use a health coach to perform an in-hospital visit to introduce the program and perform a home visit within three-to-five days of discharge from the hospital and follow-up calls. *Preliminary first data for the program shows 47 referrals for CHF, Diabetes, Asthma and CAD with 28 enrolled in the program. Of these members, only 3 had a readmission.*

WELLCARE'S APPROACH FOR MEMBERS DISCHARGING FROM STATE PSYCHIATRIC HOSPITALS

This same basic model of Catastrophic Case Round used for transplant patients will be deployed for SMI members being discharged from a state psychiatric hospital. Case Rounds will focus first and foremost in meeting basic needs of the patients. Some key elements of our strategy are outlined below.

Evidenced-Based Community Services: Our Transition Care Coordinators specially trained in behavioral health will coordinate with the Regional Behavioral Authority that serves the community to which the member is being discharged to facilitate the best options of locally-based recovery-focused community services. Many members coming from longer-term care may benefit, for instance, from Assertive Community Treatment (ACT) to help them transition to the community setting. For members transitioning to Omaha, Lincoln and the Tri-Cities area where ACT teams are currently operating, we will evaluate members to see if they meet criteria and can benefit from those services. In those cases where a member enters the ACT program, the ACT team will take a lead role in coordinating the discharge in consultation with the member, the WellCare team, the discharge facility and other health professionals as needed and appropriate.

Access to Social Service Planning: Care coordinators engage our CommUnity Advocates and CommUnity Assistance Line to help find resources to mitigate barriers to a successful transition to the community. For instance, we often find members discharging from psychiatric hospitals face unique challenges with housing support. Our unique cataloging of social service providers allows us to find resources in communities across the state where members may be moving. We also work with members to set their own recovery and wellness goals as part of the discharge planning process and identify community-based services that can be engaged prior to discharge to help ease the transition for members.

Medication Adherence: Members get assistance with understanding their medications and WellCare associates can help members through medication reconciliation and compliance. Helping to ensure our SMI members take their medicines as prescribed is a critical step to keeping them from an unnecessary emergency room visit after they discharge.

Peer Support Specialist Transition Program: To enhance our hospital discharge services, WellCare of Nebraska will implement a Peer Support Specialist Discharge Planning Program in partnership with the Regional Behavioral Health Authorities and others. We know in our meetings with the Nebraska Association of Behavioral Health Organizations (NABHO) that there are opportunities to expand the use

of peers to serve our SMI members. In our program, the primary role of a Peer Support Specialist is to offer support in navigating community-based care and acting as a mentor by offering hope and strength while achieving recovery. The Peer Support Specialist works to develop a trusting relationship with the member while offering encouragement to continue compliance with treatment. Peer Support Specialists will be part of the member's coordinating treatment team.

WellCare's approach for children discharging from Residential Treatment

WellCare intends to deploy a Foster Care Care Management Team in Nebraska modeled after our Kentucky affiliate's highly successful program. As it relates to discharge planning, our systems will identify members in our specialized care management program so utilization management nurses and transition care coordinators will work with specially-trained care managers to ensure the specialized needs of foster children with Serious Emotional Disturbances exiting residential treatment are addressed.

The basics of our Foster Care Care Management program is assessing every child's needs and working with individual providers to build a trauma-informed, community-based package of services to meet those needs. With MLTC's addition of strong community-based options like Multi-Systemic Therapy, WellCare is eager to see those services grow in communities across the state to provide discharge planners more options. We welcome the opportunity to work with MLTC, the Division of Children & Family Services, the Division of Behavioral Health and the other selected MCOs to build a statewide strategy to support the growth of these mid-level community based services that are key to ensuring children leaving residential treatment have a full continuum of services available to help them succeed in the community.

Continued Follow-up and Monitoring of Discharge Plan, particularly for members in Remote Areas

WellCare's Transition Care Coordinator Team follows up with members and uses personal calls or visits along with claims mining to confirm appointments are kept. All members with a discharge plan will receive welcome home contact. Members with more acute needs will receive in-person welcome home visits to make sure the discharge plan is well understood and the services are in place to make for a successful transition to home. Our care gap reporting also empowers Primary Care Providers (PCPs) to play an important role in reaching individuals in remote areas for follow-up after discharge. We share data with PCPs on readmission rates, and help them understand through our Clinical HEDIS Practice Advisors (CHPAs) program, steps they can take to improve follow-up with their patients.

We are placing Welcome Rooms in areas across the state and will be hiring staff living in the communities where our members live. These direct contacts will help us ensure members in remote areas of the state have access to field-based care management when they need it. Additionally, in more remote frontier areas of the state, telephonic support will be supplemented with support identified through community resources as well as telemonitoring if appropriate.

Value-Add: Deploying the Discharge Model for Post-Incarceration

WellCare has been closely following Nebraska's discussions about the need for stronger coordination of care for members being released from the correctional system. Knowing that a large number of these members exiting incarceration are in need of coordinated behavioral health services, WellCare would like to work with the Department of Corrections, the Division of Behavioral Health, the Regional Behavioral Health Authorities and MLTC to deploy our discharge planning model with effective early identification of members in need of such coordination, continuous planning as payer sources transition from corrections to Medicaid, and technical support on trauma-informed care that best serves members with complex and co-morbid behavioral health conditions.

SECTION IV.L CARE MANAGEMENT

65. Describe how the MCO will use data and evidence-based decision support tools, both within its organization and in working with providers and stakeholders, to maximize care coordination for members, improve outcomes, and create cost efficiencies. Discuss how these tools and data and systems will be integrated to implement outcome- and value-oriented payment models. Describe the MCO's experience and specific results. *(Page limit 5 pages)*

USING DATA AND EVIDENCE-BASED DECISION SUPPORT TOOLS

WellCare is, fundamentally, a data-driven organization using a broad array of decision support tools internally and with provider and stakeholders to drive appropriate engagement of care management protocols and a wide set of data points to drive improved health outcomes and create cost efficiencies.

A sampling of the decision-support tools and data sets we use include:

- Predictive modeling for provider, member and health care system behavior based on utilization and quality data
- Chronic Illness and Disability Payment System (CDPS) model used to stratify members based on risk and acuity scoring
- Health Risk Assessments
- Care Gap Reporting
- Heat Mapping of Care Gaps
- HEDIS performance metrics
- Retrospective Review Reports
- Retrospective Drug Utilization Review (rDUR) Reports
- Pharmacy Tool Box
- Clinical Practice Guidelines
- Utilization Reports (Acute, Emergency Department, Pharmacy, Residential, Outpatient)
- Health*Connections* Referral Tracking
- Public Health Reporting and Heat Mapping
- Outcomes/Performance Reporting of Social Services Network
- Readmission Risk Assessment (i.e. Lace tool)
- Medical Record Review
- Grievance and Appeals Trends Reporting
- STARS® SOLUTIONS Analytical Tools to identify outliers and trends for fraud, waste and abuse (FWA) monitoring
- Member satisfaction scores
- Provider satisfaction scores
- Performance Improvement Project metrics and monitoring
- Behavioral and Clinical Risk Stratification Tools including CAGE, PHQ-9 and SPF-12
- Pregnancy Risk Assessment for all pregnant members

Using Data and Decision Support Tools within WellCare to Maximize Care Coordination

Once a member is enrolled in WellCare, we use a proprietary scoring algorithm on all active members to identify care management needs. Each member is assigned a score based on several components. In addition to being assigned a score, the members are also flagged when specific conditions exist that are likely to be positively impacted by care management. The scoring of members is based on three primary drivers: clinical severity, utilization and cost, as described below. Each driver is a separate process that is performed on each member based on a rolling 12-months of medical and pharmacy claim history.

- **Clinical severity:** This portion is based on the Chronic Illness and Disability Payment System (CDPS) model, a diagnostic classification system developed by the University of California, San Diego. This Statistical Analysis System model classifies every diagnosis code on a claim and assigns a score based on the severity of the diagnosis. The CDPS model also examines pharmacy utilization as a component of risk scoring. We use this model as a way to classify members by risk of adverse outcomes.

- **Utilization:** This portion of the model uses a number of utilization indicators and applies a weighted score based on input from the clinical services team. The metrics tracked are hospital admissions, emergency room visits, PCP visits, specialty visits, acute admissions, home health visits, and rehabilitation visits.
- **Cost:** The cost portion scores each member based on his or her relative, normalized PMPM as compared to the other members within the program. The cost component looks at inpatient, outpatient, and professional costs.

Additionally, we use a number of behavioral and clinical risk stratification tools and data including CAGE, PHQ-9 and SPF-12 to identify members with behavioral health co-morbid needs to make a decision about the primary care management program they should be assigned to – behavioral or physical health.

Using Data and Decision Support Tools within WellCare to Improve Outcomes

The overarching goal of our Care Management program is to improve our members' health outcomes, enhance their quality of life and ultimately reduce their need for more restrictive and costly acute health services. Below is a sampling of tools we use internally to drive improved outcomes.

Over and Under Utilization Monitoring: Our Medical Economics team routinely produces and analyzes utilization reports that use authorization, claim, and encounter data to allow us to systematically identify and address emerging trends or changes in utilization. The reports include, but are not limited to, admits per thousand by type (medical/surgical, deliveries, NICU, psychiatric), days per thousand by type, C-section rate, NICU average length of stay, catastrophic rate, readmission rate, and emergency department usage by provider, member, hospital and diagnosis. The team compares results to established goals as well as benchmarks or targets. Data analysis includes statistical models that identify patterns of inappropriate ER use, office visit up-coding, and improper billing patterns. Our State Medical Directors contact outlier providers to address specific issues identified and review clinical guidelines, where applicable. The utilization data is reported to the Utilization Management Committee where they discuss trends and recommendations for broad action.

Examining Pharmacy Utilization: Our retrospective drug utilization reviews (rDURs) are designed to identify patterns of fraud, abuse, gross overuse or inappropriate or medically unnecessary care among physicians, pharmacists, and members associated with specific drugs or groups of drugs. WellCare performs rDUR projects throughout the year to improve the quality of health services provided to our members. ***One example is related to a pattern of under-utilization of chronic inhaled corticosteroid (ICS) inhalers among members using short-acting beta agonist (SABA) inhalers. Our pharmacy team implemented provider-directed interventions aimed at improving the use of ICS inhalers consistent with evidence-based guidelines. Post-intervention, more than 8 percent of members identified in the initial measurement had a claim for an ICS inhaler, suggesting the intervention was effective.***

Examining Trends with Adherence to Guidelines: We regularly evaluate utilization of recommended preventive services, chronic disease management services and acute care. We systematically mine membership data to identify trends in adherence to recommendations. Annually, in accordance with our medical record review policy, our Quality Improvement department conducts medical record reviews on a random sample of charts from primary care providers. Our medical record audit assesses physician compliance with recommended preventive health and clinical practice guidelines. We also assess and trend provider compliance with guidelines through annual administrative data and medical record reviews for HEDIS. An example of successful application of this method can be found below.

WellCare Experience and Specific Results

Improving Follow-up Rates for children prescribed adhd medication

Our use of data and decision support tools to examine trends in adherence to clinical guidelines has allowed us to make improvements in the care provided to our members. For example, in Georgia, we identified opportunities to improve follow-up care for children prescribed ADHD medication. By implementing formal guidelines, conducting ongoing, targeted provider and member outreach, and monitoring adherence, ***we increased the percentage of members who had one follow-up visit with the prescribing authority during the 30-day initiation phase from 39.39 percent in 2013 to 48.92 percent in 2015.***

Using Data and Evidence-Based Decision Support Tools to Work with Providers

Our provider partners play a critical role in helping us maximize care coordination, improve outcomes and create efficiencies, so we use a number of tools and data sets directly with providers to highlight individual opportunities by member and by their practices as whole. Some of those tools and data sets include, but are not limited to:

- HEDIS Care Gaps, Quality and Segmentation Reports
- Clinical Practice Guidelines
- Provider Portal Tool
- Medical Record Review Tools
- Utilization Reports (i.e. Emergency Department and Acute Care)

HEDIS Care Gaps and Segmentation reports are generated monthly using available claims and encounter data to monitor provider performance and identify areas of improvement. The reports identify members in specific Provider Groups, IPA's and by individual physicians' level who have gaps in preventive and/or chronic condition care so the gaps can be addressed. WellCare's Clinical HEDIS Practice Advisors (CHPAs) and Provider Relations (PR) Representatives use the care gap reports to help provide education and outreach to provider offices in an effort to ensure members are receiving the preventive and chronic care services they need and are missing. ***Recently, we expanded our care gap reporting tools to include heat mapping of care gaps so we can identify geographic trends in care gaps and target the efforts of our CHPAs based on area needs.***

Medical Record Reviews are used to a review contracted practitioner office medical records utilizing criteria based upon government sponsored contractual requirements and federal and state regulations. The medical record review is conducted to assess the quality of care delivered and documented. The process includes, but may not be limited to, evaluation of adherence to Early Periodic Screening, Diagnostic and Treatment (EPSDT) or Child Health Check-up Visits (CHCUP) requirements, provisions for continuity of care, adult preventive care rendered, identification of quality of care events, treatment for members with special health care needs, compliance with regulatory reporting requirements, and compliance with coding practices.

Provider Profiles are self-management tools providers can use, as well as tools WellCare CHPAs and PRs use to walk providers through their relative quality, utilization, care gap, administrative and cost data. In order to enhance the support we offer our providers, WellCare is building expanded Provider Profile reports that will include a greater emphasis on episodic, condition-specific reports. The reports will integrate clinical, administrative (e.g. pharmacy, behavioral health, and medical claims) and between clinical and administrative data to identify rates of gaps in care delivery, the average cost of care by episode, and measures of cost and quality performance.

Data and Evidence-Based Decision Support Tools to Inform Value-Based Purchasing

Our value-based purchasing (VBP) philosophy is focused on aligning incentive payments with quality outcomes. In identifying performance measure and initiatives used in VBP arrangements, we look at:

- Performance measures established by state partners
- Population health priorities for the members we serve
- Data analytics that identify prevalent conditions, areas of greatest need, and areas of potential impact

We have found that 10 to 12 performance measures delivers an effective value-based purchasing program so we prioritize the measures used to ensure we focus on those areas with the greatest need and opportunity for improvement. For our Nebraska program, our incentives will vary based on the specific provider and the membership they serve. Our value-based purchasing incentives will be informed by MLTC's priorities as well as our own data analytics. Some of the key measures we anticipate targeting are shown in **Figure 15**, by provider type.

Figure 15

Provider Type	Sample Incentives
PCPs	➢ Childhood immunizations ➢ Well-child visit in first 15 months of life ➢ Immunizations for adolescents ➢ Developmental screening in the first 3 years of life ➢ Well-child visits in the 3rd through 6th years of life ➢ Adolescent well-care visit ➢ Cervical cancer screening ➢ Chlamydia screening in women ➢ Flu vaccinations for adults age 18 and older ➢ Screening for clinical depression and follow-up plan ➢ Adult body mass index assessment ➢ Medical assistance with smoking and tobacco use cessation
Behavioral Health Home	➢ Follow-up after hospitalization for mental illness ➢ Adherence to antipsychotics for individuals with schizophrenia
Obstetricians	➢ 6 or more prenatal visits before delivery ➢ Postpartum visit within 6 weeks of delivery ➢ Evidence of pre-delivery pertussis vaccination ➢ Completion of required screening tool by end of the second trimester
Specialists	➢ Use of spirometry testing in assessment and diagnosis of COPD ➢ Pharmacology management of COPD exacerbation
Hospitals and Health Systems	➢ All-cause readmissions ➢ Timely transmission of transition record

Data and Evidence-Based Decision Support Tools Working with Stakeholders

WellCare's approach to using data and evidence-based decisions support tools to engage with stakeholders, advocacy groups and the social safety net at-large is built into our one-of-a-kind proprietary Health***Connections*** Model. WellCare's **Advocacy and CommUnity-Based Programs** department maintains the technical systems to capture access and use of social services by members and their families at the transactional level. In addition the team assembles community-based, public health data on which to identify health trends that could impact our membership. And, using the social service referral data, we identify potential gaps in social service availability to pilot community-based solutions for filling those gaps for our members, the families and the communities-at-large. The primary focus of this team is to create greater transparency of the social safety net and its positive impact on health outcomes.

An example of the use of data to drive stakeholder engagement and our CommUnity Advocacy priorities is the use of public health data to identify risk patterns for our members.

Figure 16

Food Insecurity

The United States Department of Agriculture (2014) estimates that one in five children and one in seven adults in Nebraska face food insecurity. The Nebraska Food Bank Association reports that low-income families in Nebraska must choose between buying food and paying bills. See **Figure 16** for limited access by county.

WellCare attacked the issue of food insecurity head on by creating a Healthy Food Access Initiative. By aligning all the community engagement strategies around the topic of healthy food access, WellCare accomplished the following in 2014 across 12 different states:

CommUnity Activities

- Hosted or participated in 803 total activities related to nutrition and healthy food access reaching nearly 600,000 people
- Collaborated with more than 18,000 community stakeholders related to nutrition and healthy food resources

Social Service Utilization Support

- Referred more than 800 people to more than 1,400 local, community-based nutrition and healthy food resources
- Bridged more than 50 gaps in needed nutrition and healthy food resources

CommUnity Health Investment Program

- Launched seven healthy food access programs in three states to increase participation in WIC/SNAP by doubling benefits at Farmers Markets
- Increased access and purchase of healthy food options by 85 percent among more than 65,000 participants

WELLCARE'S EXPERIENCE AND SPECIFIC RESULTS IN USING DATA AND DECISION SUPPORT TOOLS

New York Quality Medicaid Improvement: In calendar year 2012, 72 percent of the New York Medicaid QHP HEDIS® measures were at or below the 50th percentile. A Root Cause Barriers Analysis, focused on measure and county specific intervention activities, was conducted, and an integrated team approach was developed and care gap closure targets in areas with high volumes of open care gaps were prioritized. The field-based Quality and Provider Relations team drove change by engaging, educating and influencing providers through a collaborative, face-to-face and telephonic outreach. These teams collected, summarized and trended provider performance data to identify and strategize opportunities for provider improvement. ***Because of this activity, in 2014 WellCare of New York was ranked in the top quartile of plans; up from 11th out of 16 the previous year. The net results were that 70 percent of the practices were at or above the 75th percentile and 35 percent of the practices were at the 90th percentile for the HEDIS® Prevention Scores. Additionally, 71 percent of the practices were at or above the 75th percentile and 42 percent of the practices were at the 90th percentile for the HEDIS® Treatment Scores.***

SECTION IV.L CARE MANAGEMENT

66. Provide a proposed plan for coordinating efforts for members who may be involved in multiple State programs, including those enrolled in HCBS waivers. Describe how the MCO will deploy care management activities under this RFP in a manner that will not duplicate the activities provided under HCBS waivers and will facilitate sharing of information across DHHS-administered programs. *(Page limit 3 pages)*

PROPOSED PLAN FOR COORDINATING FOR MEMBERS INVOLVED IN MULTIPLE STATE PROGRAMS

As a health care company focused on serving members in Medicaid and Medicare for more than 20 years, WellCare works with individuals with complex needs including those in Home and Community-Based Services (HCBS) waiver programs, dual-eligibles, individuals with developmental disabilities, the aged, blind and disabled population, children with special health needs and children in foster care. These populations often have multiple physical health, behavioral health and social services needs that require a diverse set of solutions to serve, which is one reason we deploy a flexible care management model that is grounded in core person-centered, data-driven, interdisciplinary care principles but can be adjusted to respond to individual situations.

Our proposed plan for coordinating for members involved in multiple state programs including HCBS waiver programs in Nebraska includes several key features:

- Tagging of members in these programs through our Medical Management Platform, which provides any staff member engaged with the member a full view of that member's profile
- Specific policies, procedures and work flows designed for working collaboratively with agencies or waiver care coordination programs
- Specific training for care management on these programs in Nebraska, including internal process and workflows for joint service/care planning
- Designating WellCare of Nebraska points of contact for various agencies involved in formal care coordination for our members
- Use of a clinical liaison position to provide support and training to waiver care coordinators rather than direct care management to members who have existing care coordinators
- Meetings with organizations involved in HCBS waiver care coordination to develop defined delineation of responsibility and cadence of touchpoints and involvement
- Development of data-sharing protocols and defined timelines to ensure we both receive important information about a member's condition timely so appropriate interventions can be made
- Development of joint protocols for communication with members to minimize confusion

Specific Policies, Procedures and Workflows and Training of Staff on Joint Service Planning

WellCare's Care Model is ideally designed for working across multiple state and waiver programs, as we already engage in integrated care planning as part of our core programming. The Interdisciplinary Care Team (ICT) is a foundational feature of our care model. This team, centered on the member and his or her caregiver, consists of WellCare care management staff, primary care providers (PCP), specialists and, notably, representatives from other support or state programs in which the member may be engaged. Our care model is flexible enough that we can facilitate the ICT process or participate in the process if it is facilitated through the member's involvement in existing care coordination activities.

We will base the development of specific policies, procedures and work plans for working with members already engaged in care coordination through other programs on the ICT concept, and staff training will incorporate specifics on Nebraska's waiver programs and our engagement in it. Our processes will be developed with input from stakeholders including agencies doing waiver services coordination and our

policies, procedures and work flows will be distributed to MLTC for approval. WellCare will also support and can help inform a multi-payer solutions working across Medicaid Managed Care Organizations in Nebraska to develop single referral forms and/or other common processes to mitigate agencies having to navigate multiple processes and forms.

Designation of Points of Contact and Clinical Liaisons

We will designate points of contact within our WellCare of Nebraska staff for outside agencies doing care coordination for our members. Our protocols will have specific turn-around times for response by the designated point of contact as well as policies for documentation and follow-up.

We also believe in partnering with existing care coordination programs on fostering proven care management principles, and support them through assessment, planning and monitoring, particularly through data sharing. We are introducing in Nebraska the concept of a clinical care liaison, which provides support to existing care coordination programs rather than direct care management to members. This is model will provide an integrated program, particularly with behavioral health members and Independent Practice Associations (IPA). Many of the Community Mental Health Centers we work with already have some level of care coordination services for members with Serious Mental Illness (SMI). Because of this experience, we work with the CMHCs to support their efforts through training and data sharing, while also ensuring members don't face multiple care managers and multiple care plans. As more providers form IPAs or become Patient Centered Medical Homes or Integrated Health Homes, WellCare continues to flex our care management programs to support provider-led care coordination as it is available for members and as it meets the full spectrum of their needs.

DEPLOYING CARE MANAGEMENT WITHOUT DUPLICATING ACTIVITIES

We are basing our Nebraska strategy to avoid duplication of services for members in HCBS waiver programs on successful programs deployed in our Hawaii affiliate, 'Ohana, which serves individuals with developmental disabilities, Aged, Blind and Disabled (ABD) population, as well as those involved with various state programs. 'Ohana routinely works with Hawaii's Adult Mental Health Division, Child and Adolescent Mental Health Division, Department of Education, Department of Health and Public Health Nurses on individual cases. Additionally, 'Ohana manages multiple state programs for Hawaii that cross over through various waivers and multiple programs that has required them to develop specific plans to coordinate care without duplication.

Lessons learned from 'Ohana have informed our plan for deploying care management activities for members already engaged in some level of care coordination through other agencies:

- A clear delineation of responsibilities should be outlined at a programmatic level and specifically reinforced in each individual care plan effort
- Open communication with direct access between care coordinators is critical to implementation
- Formal processes must be in place around member engagement to mitigate member confusion
- Because different sets of benefits and services are available through different programs, a clearly defined division of services that can be easily communicated to members so they understand who is responsible for which services
- Collaboration must also occur at the program level to ensure that both organizations have aligned their level of expectations

Collaboration at Work: An Example from WellCare's 'Ohana Plan

In Hawaii, when one of 'Ohana's programs (managing care for members with Developmental Disabilities) first went live in 2009, they experienced some confusion on how to work with Developmental Disability department case managers. Through a process of joint meetings and ongoing touch points used to this day, 'Ohana staff members lay out the difference in "primary" responsibilities

between service coordinators and care managers. They used the same processes to help define responsibilities with another program they manage known as the Community Care Services (CCS) program, which focuses, in part, on members with Serious Mental Illness.

'Ohana's Service Coordination team works collaboratively with the CCS program's Care Management team. We have procedures in place that set expectations for service coordinators to work in partnership with both CCS program staff and BH community case managers (BHCCMs). The first step is to determine which 'Ohana members are enrolled in the CCS program. We achieve this by flagging members identified as CCS members with an identifier in their clinical record. 'Ohana service coordinators are trained to look for this identifier, as coordination with BHCCMs is necessary for successful service planning.

Figure 18

'Ohana Service Coordinators' Collaboration With CCS

While BHCCMs are considered the "primary" case managers for members, we believe the collaboration with our service coordinators provides for truly integrated medical and BH care and better health outcomes. As depicted in **Figure 18** the touch points for this joint collaboration are:

- Assessment and treatment planning
- Sharing service plans
- Coordination of primary and BH care
- Maintenance of Medicaid eligibility
- Housing placement and maintenance
- Participation in ICT meetings for members with complex comorbid disorders
- Discharge planning and post-hospital follow-up
- Promotion of medical screenings for early detection of side effects from long-term use of psychiatric medications

Data Sharing: They Key to Collaborative Care Coordination

WellCare recognizes the need to share data with our joint collaborator programs to drive intervention on behalf of members in as real-time as possible. We will provide data such as PCP visits, care gap reports, emergency department utilization, acute admission and other requested clinical data requested through the joint service planning/interdisciplinary care team process.

Additionally, we would like to work with agencies to receive data and information and make it part of the member's record within our Medical Management Platform (MMP) system to give a more robust and clear picture of each member's needs, interventions and experience with the health care and social services systems.

SECTION IV.L CARE MANAGEMENT

67. Describe the MCO's outreach program to encourage women to seek prenatal services during their first trimester of pregnancy and how the MCO will implement required health risk screening and follow up, when applicable, for pregnant members. *(Page limit 2 pages)*

MEETING MEMBERS WHERE THEY ARE: WELLCARE'S PRENATAL OUTREACH PROGRAMS

WellCare recognizes that reaching a mom-to-be in her first trimester gives us the best chance to help her have a healthy pregnancy and positive birth outcome. This is why we place a premium on identifying pregnant members early, connecting with them and empowering and educating them.

Experience Matters

More than 54,000 people have attended a WellCare Baby Shower or other maternal education event.

WellCare and our affiliates across the country have extensive experience in building Prenatal Care Management Programs, including for women with complex medical needs or co-morbid behavioral health conditions. Our Nebraska Prenatal Care Management Program will be modeled after our successful program in Georgia where we manage an average of 27,000 deliveries annually.

Key to our success is the early identification and prioritization of our most vulnerable pregnant members. At the early prenatal level the effort is focused on:

- Increasing the number of pregnant women identified in the earliest possible timeframe
- Offering education and information on available resources, health and wellness topics including smoking cessation and access to medical, behavioral and social services
- Ensuring and facilitating access to quality health care including connection to prenatal OB services
- Incentives for meeting healthy milestones in their pregnancy care

Identifying Pregnant Members through Health Risk Screening and Follow-up

Each new member in WellCare's Heritage Health plan will receive an initial Health Risk Screening (HRS), which, among other things, assesses a member's pregnancy status. Because of our focus on serving members in government-sponsored healthcare programs, we deploy multiple methods for reaching members to conduct the HRS, which includes:

- Telephonically through the initial Welcome Call
- By mail, in the Welcome Packet
- On the Internet at WellCare.com/Nebraska

WellCare's prenatal program uses a multifaceted approach to identify existing members who become pregnant, including:

- Provider notifications and referrals
- Self-referrals
- Claims-based identification
- Health risk assessments
- State-based referral files (when available)

Once identified, either through the welcome process, health risk screening process or any of the methods identified above, members are then flagged for prenatal services including, but not limited to, a number of interventions based on individual need and risk factors for a high-risk pregnancy or poor birth outcome. Members triggered as pregnant will receive a pregnancy-specific risk assessment to determine if they meet evidenced-informed criteria for care management services. Those identified as low risk will get, at a

minimum, a call mid-pregnancy and postpartum to check in and ensure no change in their level of need. Those found at high-risk will receive the full array of complex care management service with a registered nurse specially trained in high-risk pregnancies.

Results Matter

In our Missouri Care affiliate, efforts to support women with high-risk pregnancies reduced NICU days by 30 percent in one year alone.

Innovative Strategies to Encourage Prenatal and Postpartum Care Services

WellCare will deploy several strategies to encourage our Heritage Health members to obtain health care services that reinforce our prenatal program goals, help eliminate barriers to care and optimize compliance with scheduled prenatal visits and return for postpartum checkups including:

- **Free community baby showers** are open to expectant and new mothers, plus one guest. Nationwide, we have conducted 1,865 baby showers or other prenatal education community events since 2013, focusing on providing moms with critical heath care information for themselves and their babies. Members also receive a gift basket, an opportunity to participate in a raffle and refreshments. The community baby showers also connect moms with organizations that can help address the social issues, such as the Women Infants and Children (WIC) program.
- **Educational materials** including the Mommy & Baby Matters and Journey through Pregnancy booklets are issued to all members and our website offers additional educational materials.

- **Incentive programs** reward members for healthy behaviors by promoting member and caregiver education and empowerment, while eliminating barriers so they may be active, informed participants in the health care process. Our Maternity Education and Reward Program (MERP) provides basic prenatal, postpartum and new born care educational materials to all of its pregnant and newly delivered Medicaid members, and rewards them for compliance with doctor and wellness visits with gifts such as a stroller or play yard.
- **Provider partnerships** are very important to encouraging pregnant women to seek prenatal and postpartum care services. WellCare rewards desired practices through pay-for-quality incentives and conducts provider outreach letters alerting the provider of patients who need necessary care. In one of our affiliates, we have launched a P4Q program raising rates for Medicaid deliveries to the average commercial rate in the market as long as providers hit several key milestones such as prenatal visits as well as outcomes targets including mitigating preterm births and long NICU stays.
- **WellCare's CommUnity advocates** collaborate with our social workers to identify and procure resources such as housing and food supports to help stabilize a member's socio-economic barriers so that she is able to place focus on her health and the health of her baby.
- **Member self-service** offers member-initiated support and services that have the convenience of being accessible anytime to support their questions on selecting a provider or transportation. This includes the Nurse Line, which is available 24 hours a day, seven days a week, with personalized help to set up doctor visits and schedule transportation. ***This also includes Text4Baby – a free mobile information service, which is an educational program of the National Healthy Mothers, Healthy Babies Coalition.***

IV.M Quality Management

SECTION IV.M QUALITY MANAGEMENT

68. Provide a description of the MCO's proposed QAPI program. Include the following in the description:

- The proposed structure, and policies and procedures that explain the accountability of each organizational unit.
- The program's infrastructure, including coordination with subcontractors and corporate entities, if applicable.
- Proposed QAPIC membership and committee responsibilities.
- How the MCO will comply with and support MLTC's quality strategy.
- How focus areas will be selected, including how data will be used in the selection process.
- The proposed QAPI work plan, including planned initiatives

(Page limit 10 pages)

BUILDING A CULTURE OF QUALITY ACROSS THE OPERATIONS

WellCare's core mission is to provide for high-quality care that improves our members' well-being as well as enhance population health outcomes for the communities we serve. To achieve this goal, WellCare has adopted a culture of quality that is integrated into every element of our operations. We provide a broad range of well-established programs for service and clinical quality that meet rigorous requirements for consumer protection and program performance by partnering with members, providers, community-based organizations, and state and local agencies to provide for holistic, person-centered, evidence-informed and evidence-based high-quality health care. These efforts are supported by our comprehensive, systematic, data-driven quality assurance and performance improvement (QAPI) Program as further described in the sections below.

Quality Improvement Objectives

Our quality strategy focuses on six fundamental attributes we expect within our systems of care:

- **Safe:** We monitor and evaluate our health care delivery systems with an aim of connecting members to care which is helpful and not harmful.
- **Effective:** We update our clinical practice guidelines (CPGs) and audit our provider network's adherence so everyone remains aware and utilizes current scientific, evidence-informed practices.
- **Person-Centered:** We maintain systems that are designed to connect our members to culturally, socially and linguistically appropriate medical, dental and behavioral health care. It is important that our members are empowered to play an active role in health care decision-making.
- **Timely:** We aim to reduce unintended delays and we monitor our network by tracking the accessibility, availability and promptness of medical care.
- **Efficient:** We seek to reduce waste within our system by creating value, monitoring health outcomes relative to cost and minimizing errors. Using the Plan Do Study Act (PDSA) approach, we identify and implement strategies to improve quality, appropriateness and accessibility of member health care.
- **Equitable:** We establish safeguards to assure that our members, regardless of race, age, ethnicity, primary language, geographic residence, or socioeconomic status, receive the highest level of quality care.

Through this response, we will describe how we structure the QAPI Program and how we integrate the key quality objectives into our operation, providing support across the board for members and providers to improve health outcomes. This includes details of our quality infrastructure and accountability, QAPI

processes, collaboration with the Department of Health and Human Services (DHHS), Division of Medicaid & Long-Term Care (MLTC) Quality Strategy and the comprehensive use of data to design, implement and evaluate all of our programs.

WELLCARE'S QUALITY STRUCTURE: LAYING THE FOUNDATION FOR A HIGH-QUALITY PROGRAM

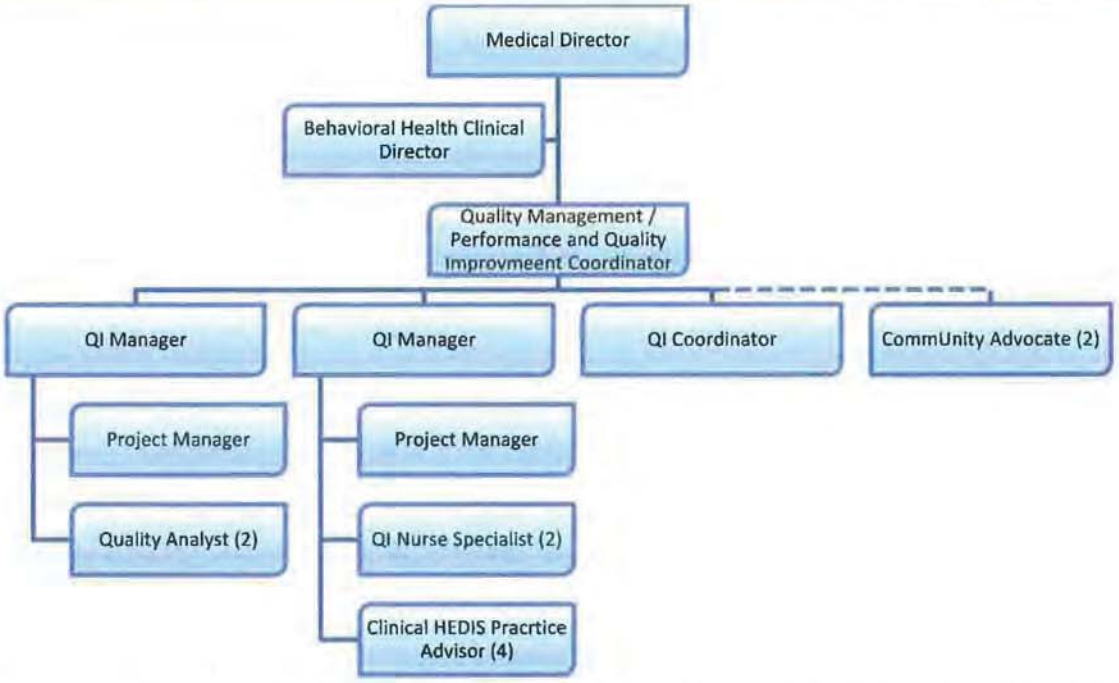
WellCare devotes significant resources to QAPI activities. Led by our Chief Medical Director of Quality, WellCare's corporate quality department supports national program design, data collection, data analysis (e.g. run charts, heat maps), and reporting functions for all of our affiliate plans. WellCare will also locate an in-state Quality team with robust staffing to monitor multiple areas of clinical and service performance, prioritize problem areas for resolution, design strategies for change, collaborate with state and local partners, implement improvement activities, support providers toward those improvements and measure the success of interventions. The local team will be fully supported by the power of WellCare's corporate infrastructure which provides for the medical economics, data informatics, analysis and reporting necessary for any QAPI Program to be successful.

Locally-Based Quality Activities Drive our Quality Improvement Programs

All of our Nebraska QAPI activities will be overseen by WellCare of Nebraska's medical director in coordination with our Nebraska-based behavioral health clinical director and quality management/performance and quality improvement coordinator as illustrated in our model staffing chart shown in **Figure 1**. Quality improvement activities are separate from, but integrated with utilization management and case management activities.

Figure 1

Quality Assessment and Performance Improvement Staffing and Organization



Quality Department Functions: The Quality department staff will collaborate with associates across departments to evaluate quality of care and to identify opportunities for improvement. ***WellCare has an integrated model of resources supporting the QAPI Program, including behavioral health.*** These resources include associates crossing all functional areas of the organization, including, but not limited to, the executive team, disease management, data analytics, provider relations, network development,

compliance, grievance and appeals, utilization management, case management and community outreach.

The Quality department infrastructure roles and responsibilities support WellCare's goals for a program of continuous improvement as outlined below:

- The **medical director** will be a full-time position and will be a practicing and licensed physician in good standing in Nebraska. The medical director will have key responsibilities as the leading medical and clinical voice of the program. Among these critical roles is oversight of all aspects of the QAPI program, including: acting to continuously improve the overall effectiveness of the QAPI Program; overseeing appropriateness and effectiveness of clinical care provided by WellCare; developing and maintaining CPGs along with the Clinical Advisory Committee in collaboration with WellCare's corporate Medical Policy Committee; educating and overseeing adherence of the CPGs by the clinical staff and network providers; conducting and overseeing clinical QAPI committees and reviewing findings; analyzing, verifying and attesting to all clinical data and reports submitted to MLTC; leading the Quality Assurance and Performance Improvement Committee (QAPIC); and participating via telephone or in person (at MLTC's discretion) at every Quality meeting with MLTC and other system partners, and as requested by MLTC.
- The **behavioral health clinical director** will be a practicing licensed psychiatrist or psychologist who reports to the medical director and has the responsibility for the following QAPI initiatives from a behavioral health perspective. The BH clinical director will oversee the implementation of the behavioral health aspects of the QAPI Program; monitor and identify opportunities for improvement of the overall effectiveness of the QAPI Program; oversee appropriateness and effectiveness of behavioral health care provided by WellCare; and participating on the QAPIC to ensure behavioral health quality initiatives are fully integrated into the spectrum of the QAPI Program
- The **quality management/ performance and quality improvement coordinator** will be responsible for providing leadership and direction to the Quality department to ensure that WellCare quality objectives are met. The coordinator will develop, coordinate, and implement WellCare quality strategies and interventions, including the collection of relevant and meaningful indicators for monitoring and evaluating the quality and appropriateness of care/ service across the continuum. After completing the prior year's QAPI Program Evaluation, the coordinator will work with the interdepartmental leadership team to develop the QAPI Program Description and QAPI Work Plan. The quality management/ performance and quality improvement coordinator will also serve as MLTC's contact person for quality performance measures. In that role, the coordinator will focus organizational efforts on the improvement of clinical quality performance measures, utilize data to develop intervention strategies to improve outcomes, develop and implement performance improvement projects, both internally and across Heritage Health MCOs, and report quality improvement and performance outcomes to MLTC. The coordinator will collaborate with Nebraska-based and corporate supports to ensure Nebraska has necessary analytics and reporting to meet state requirements as well as the needs of the QAPI Program in general.
- **Quality improvement managers** will oversee Clinical HEDIS® Practice Advisors (CHPAs) and/or other QAPI staff members.
- **Quality improvement nurse specialists** will be responsible for coordinating the review of quality of care issues with the medical director and generating the Patient Safety report. The QI nurse specialists will review data from medical record audits for CPG compliance. In addition, the specialists will complete QI analyses to support performance measures for NCQA accreditation.
- **Quality improvement project managers** will be responsible for being the subject matter experts for standardized quality performance measures, such as HEDIS®, and project management of the medical record reviews. In addition, the position will perform HEDIS®-related tasks, such as monitoring HEDIS® through Performance Improvement Projects (PIPs).
- **Quality improvement analysts** will manage medical record reviews and are the subject matter

experts for conducting ambulatory medical record review to assess the quality of care delivered and documented. The analysts also evaluate and review and analyze data for EPSDT reporting. The QI analysts will also develop PIPs, including participation in the statewide PIP.

- The **Quality improvement coordinator** will be responsible for organizing activities within the QI department. A major responsibility of the QI coordinator includes coordinating the QAPIC and Utilization Management Medical Committee (UMC).
- **Clinical HEDIS® practice advisors (CHPAs)** will be registered Nebraska nurses who visit high-volume providers to discuss HEDIS® criteria. During these visits, the CHPAs will conduct provider medical record abstraction. Through these efforts, the CHPAs will determine root cause or barriers prohibiting HEDIS® services from being captured in claims/encounter data, as well as educate providers on ways to capitalize on routine visits by completing well child checks, immunizations as applicable and preventive screenings during the member's appointment.
- **CommUnity advocates:** CommUnity advocates work with community partners to find innovative, community-based programs that use evidence-based practice guidelines to which we refer our members. CommUnity advocates connect with social service agencies to establish a contractual relationship through which track members referred to services for outcomes reporting. They also work with quality improvement teams to leverage community programs to support quality-related activities.

Policies and Procedures

WellCare QAPI infrastructure is supported by written policies and procedures that guide our implementation of all QAPI activities, including frequency of data analysis, performance measures, EQRO requirements, accreditation, medical record reviews, HEDIS reporting and HEDIS database maintenance. Detailed reports include data analysis and results regarding the effectiveness of the QAPI program and follow the requirements outlined in our policies and procedures, are presented to governance committees (described below) for review and feedback. WellCare's QAPI adheres to polices surrounding the QI program and provider involvement.

QUALITY PROGRAM'S INFRASTRUCTURE: COORDINATION WITH SUBCONTRACTORS AND CORPORATE ENTITIES

Oversight of Subcontractors

WellCare delegates certain operational functions to qualified subcontractors, including our pharmacy benefits manager and chart abstraction vendor. (WellCare manages behavioral health services internally.) While we do work with subcontractors, ***we retain oversight over all quality responsibilities***. We follow the NCQA Health Plan standards on delegation as it relates to QAPI functions. Our subcontractor oversight teams evaluate each delegate's capacity to perform any contracted activities prior to the delegation initiation, including reviewing the delegate's policies and procedures to make sure they follow our accreditation standards and are not in conflict with our policies. We perform an initial file review to determine their ability to perform the functions according to our standards and practices. Annually, we perform a file audit on all delegated entities to ensure the delegated entities continue to be in compliance with contractual, regulatory and accreditation requirements, with a special emphasis on quality requirements. When performance deviates from our established performance standards, subcontractors are required to implement corrective actions. WellCare monitors completion of corrective actions to ensure deficiencies have been successfully remediated.

Our QAPI committee structure includes a Delegation Oversight Committee (DOC) which has ultimate responsibility for all oversight activities for those functions we have delegated such as pharmacy. The DOC coordinates and oversees all delegated activities ensuring that delegated entities adhere to contractual, regulatory and accreditation requirements. The DOC is chaired by the senior director of corporate audit and oversight and will report to the QAPIC at least quarterly. Additionally, our systems

allow for data from our subcontractors to be seamlessly integrated into our QAPI Program so analyses can inform improvement activities across the spectrum of all services.

Collaboration with our Corporate Entities

WellCare has established a corporate team structure to support data collection, data analysis, and reporting functions for all of its subsidiary plans. The multidisciplinary team, led by WellCare's Chief Medical Director of Quality, is composed of analysts, developers, data administrators, and informatics experts who know our systems, understand the data within the systems, and have the experience to report the data in a manner that supports the analytics required to effectively manage care for our Nebraska members. The various roles of the WellCare quality corporate support team include:

- The **Quality Analytics** department, which is responsible for analysis related to all aspects of quality, retrospective analysis and trend analysis from a quality improvement perspective. The department uses a variety of data sets, including NCQA certified quality-measure reporting software that calculates performance measures using a combination of administrative and clinical (chart review) data sources. Performance, including adherence to clinical practice guidelines, is compared against state and national benchmarks (when available) and past performance. Data can be analyzed at multiple levels including provider, provider type, and geographic areas. the This skilled group of individuals is comprised of a team that has decades of health care analytics reporting experience providing data retrieval, management, and mining, report writing and graphics (e.g. run charts and heat maps), and statistical analysis.
- The **Medical Economics** department, which is responsible for analysis related to all aspects of quality, predictive modeling, retrospective analysis, under- and overutilization, and trend analysis from a financial perspective. This team is able to pull data stored within our Data Management Solution to develop reports, studies, analyses and ad hoc requests using tools such as SAS® and Cognos. The team uses information available in standard claims fields including but not limited to CPT, diagnosis (primary, secondary, etc.), DRG, specialty type, provider Type, provider, facility, member, member Type, bill type, denials, appeals, and authorizations. The data allow us to analyze utilization rates such as number of days, admissions, visits, and length of stay; unit cost, including cost per visit and per day; per member per month costs by cost categories (inpatient, outpatient); and claims payments against state Medicaid and Medicare rates. The analyses are used to help us understand our operations in order to make ongoing improvements.
- The **Operational Reporting** team, which includes experienced developers who are adept at operationalizing key regulatory, quality, and performance reporting such as call center statistics, complaints, appeals, member retention, completion of health risk screenings, and pharmacy benefit manager performance. The primary focus of this group is to develop reports that are run automatically on a periodic (e.g., hourly, daily, weekly, monthly, quarterly, annually, or other) basis and are used either for regulatory purposes or for real-time monitoring of program elements.
- The **Advocacy and CommUnity-Based Programs** department maintains the technical systems to capture access and use of social services by members and their families at the transactional level. (Use of a HIPAA-compliant Business Associates Agreement allows for specific referrals and rigorous evaluation of outcomes.). In addition the team assembles community-based, public health data on which to identify health trends that could impact our membership. Using the social service referral data, we can identify potential gaps in social service availability to pilot community-based solutions for filling those gaps for our members, the families and the communities-at-large. The primary focus of this team is to create greater transparency of the social safety net and its positive impact on health outcomes.

Performance Improvement Committee: Ensuring Appropriate Accountability for Quality Assurance

WellCare uses a comprehensive QAPI committee structure to ensure participation of multiple voices into the process as well as structured and robust oversight of QAPI activities and the quality of our program as a whole.

WellCare of Nebraska Board of Directors

The WellCare of Nebraska Board of Directors (the Board) is the governing body of WellCare of Nebraska and has overall accountability and responsibility for the quality of care and services rendered to our members. The Board supports and has final authority over the general oversight and strategic direction of our QAPI Program. The Board provides strategic direction to the QAPI Program including the objective and systematic monitoring of the quality, appropriateness, accessibility, and availability of health care and services provided to our members. Its responsibilities include: ensuring that the QAPI Program is incorporated into WellCare's operations at all levels and has the resources necessary to achieve the highest quality outcomes for our members; reviewing and providing feedback on the activities of the QAPI Program; and, performing an annual review and approval of the QAPI Program Description, QAPI Work Plan and QAPI Annual Evaluation used to oversee the effectiveness of the QAPI Program and ensure members receive appropriate, cost-effective, high-quality care. The Board will delegate responsibility for QAPI activities including monitoring and evaluating outcomes, overall effectiveness of the QAPI Program, and initiating corrective action plans when appropriate to WellCare of Nebraska's QAPIC. The Board meets a minimum of quarterly to review and assess the QAPI Program.

Quality Assurance and Performance Improvement Committee (QAPIC)

The QAPIC is the centralized body responsible for integrating quality initiatives throughout the organization and overseeing the QAPI Program. The QAPIC will report directly to the Board.

Membership

Members of WellCare of Nebraska's executive leadership team will be members of the QAPIC and help ensure that the QAPI Program complies with NCQA and MLTC standards. In addition to our executive leadership, WellCare's QAPIC will include members, member representatives, providers, and other community stakeholders, so we can hear first-hand their experiences and ideas for ensuring continuous quality improvement and implementing QAPI strategies that will lead to improved health outcomes in Nebraska. Our QAPIC membership will include our: medical director (chairperson), behavioral health clinical director, quality management /performance and quality improvement coordinator, medical management coordinator, member services manager, provider services manager, family members/guardians of children or youth who are Medicaid members, adult Medicaid members, and network providers, including PCPs, specialists, pharmacists, and providers knowledgeable about disability, mental health and substance use disorder treatment of children, adolescents, and adults in the State. The provider representatives will have experience caring for the Medicaid population, including a variety of ages and races/ethnicities, and rural and urban populations. WellCare will provide training, participation stipends, and reimbursement for travel, child care, or other reasonable participation costs for

QAPIC Membership

WellCare's QAPIC will include members, member representatives, providers, and other community stakeholders, so we can hear first-hand their experiences and ideas for ensuring continuous quality improvement and implementing QAPI strategies that will lead to improved health outcomes in Nebraska.

members or their family members. Participation stipends will only be provided if the individuals are not otherwise paid for their participation as staff of an advocacy or other organization.

Responsibilities

Under the guidance of WellCare of Nebraska's medical director, the QAPIC will be responsible for the following activities: coordinating the quality monitoring and improvement activities outlined in our annual QAPI Program Description and the QAPI Work Plan; reviewing and approving WellCare's QAPI Program Description, Work Plan, and Program Evaluation prior to submission to MLTC; reviewing the Cultural Competency Plan; requiring WellCare to study and evaluate issues that MLTC or the QAPIC may identify; establishing annual performance targets; reviewing and approving all member and provider surveys prior to their submission to MLTC; defining the role, goals, and guidelines for the QAPIC, set agendas, and produce meeting summaries; and annually, and as requested, provide data (with staff support from our medical director and quality management/ performance and quality improvement coordinator) to MLTC's Quality Committee. WellCare will also incorporate recommendations from all staff and QAPI committees, the results of PIPs, other studies, improvement goals, and other interventions into the QAPI Program, the QAPI Program Description, the QAPI Work Plan, and the QAPI Program Evaluation.

Quality Assessment Performance Improvement (QAPI) Related Committees

WellCare's QAPIC will be supported by a number of WellCare of Nebraska committees as outlined in **Figure 2**, who will report, at least quarterly, to the QAPIC a summary of their QAPI-related work, recommendations, needs and activities.

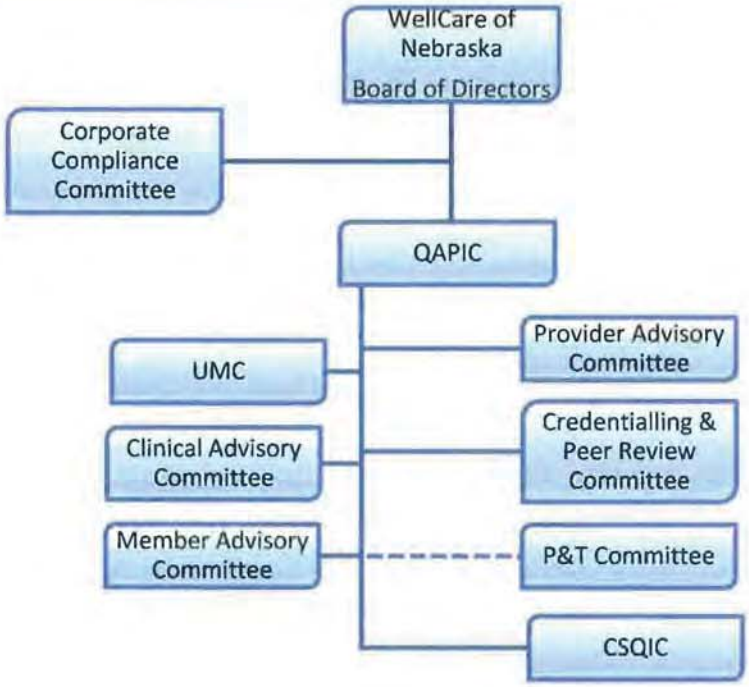
- **Clinical Advisory Committee:** WellCare will convene a Clinical Advisory Committee comprised of an expert panel of Nebraska-based clinicians representing a cross-section of providers in the fields of physical health, behavioral health and pharmacy to help us ensure members receive the right care, at the right time and in the right setting. Participants will be clinicians who care for children, adolescents and adults across a variety of ages and races/ethnicities and have an awareness of differences between rural and urban populations. These clinicians will help us improve quality of care and access to services to meet Nebraska's goals for Heritage Health.
- **Member Advisory Committee:** WellCare's Member Advisory Committee will be a forum for gathering feedback from members, member representatives, providers, and community advocates that reflect the geographic, cultural and racial diversity of WellCare's population and the communities we serve. Among other responsibilities, committee members will be invited to discuss the quality of their customer experiences with WellCare and their health care providers. Committee members will help identify root causes of barriers to receiving care as well as strategies for overcoming barriers.
- **Provider Advisory Committee:** WellCare will establish a Nebraska Provider Advisory Committee (PAC) with representation from the major provider organizations in Nebraska, individual providers, behavioral health, pharmacy providers, hospitals, and providers who primarily serve individuals with disabilities. It is our intent to work collaboratively with our PAC and established provider organizations as we create network development and management strategies and procedures.
- **Utilization Management Committee** WellCare's Utilization Management Committee (UMC) will be a subcommittee of the QAPIC and will be responsible for promoting the delivery of quality clinical services for our members and assuring efficient and appropriate utilization of health care services. Our UMC, chaired by our local medical director, will be responsible for the day-to-day operation and organization of the UM function including standards or practice, practice guidelines, prior authorization rules, review criteria (including the consistent application of), health care trends, and cost of care.
- **Corporate Compliance Committee:** WellCare of Nebraska's Corporate Compliance Committee, a committee of the WellCare of Nebraska Board of Directors, will assist the Board in overseeing

WellCare of Nebraska's regulatory compliance program, policies and procedures, including compliance with federal and state laws, rules and regulations, and compliance with WellCare's code of conduct and business ethics and related policies by employees, officers, directors and other agents of, and those providing services for WellCare of Nebraska.

- **Credentialing and Peer Review Committee:** The QAPIC will delegate credentialing and re-credentialing oversight and approval authority to the Credentialing and Peer Review Committee. The committee is chaired the medical director and includes voting provider representatives as well as cross-departmental representation from WellCare of Nebraska and corporate entities. This committee is also responsible for peer review of provider quality of care/service and conduct issues.
- **Customer Service Quality Improvement Committee (CSQIC):** The Customer Service Quality Improvement Committee (CSQIC) functions as a multidisciplinary task force to identify opportunities for improvement in customer service. The CSQIC reviews data on call metrics such as average speed of answer, abandonment rates and first call resolutions for both member and provider calls. In addition to the customer service call metrics, the CSQIC also reviews data relevant to member and provider complaints and appeals to ensure that individual member and provider issues are addressed, resolutions are appropriate and timely, the process is compliant with regulatory standards and issues are referred for system response through the QAPI process. The focus of the CSQIC is on the systemic analysis of access and quality of service provided to members.
- **Pharmacy and Therapeutics Committee (P&T):** The Pharmacy and Therapeutics (P&T) Committee will promote the appropriate use of high quality and cost-effective pharmaceuticals for members and ensure compliance with appropriate standards and state and federal regulations, including coverage for all therapeutic classes of drugs covered by the Nebraska Medicaid pharmacy benefit and the Nebraska Medicaid preferred drug list (PDL).

Figure 2

QAPI Related Committees



SUPPORTING MLTC'S QUALITY STRATEGY

WellCare will support and comply with the MLTC Quality Strategy and seek to improve the health and wellness of Medicaid clients by increasing their access to comprehensive health services in a cost-effective manner. WellCare will partner with MLTC to implement strategies such as reducing non-emergent use of the emergency department (ED) through increased access to care, improving birth outcomes through prenatal, postnatal, and inter-pregnancy care, improving outcomes through coordination and integration of prevention-focused physical and behavioral health services delivered in community-based settings, and improving food security. Through participation and active engagement on MLTC's QM Committee, participation in statewide PIP efforts, comprehensive and consistent reporting of Heritage Health performance measures, and implementation of our proposed valued added services and programs, we are confident we can bring our experience and record of partnership, collaboration, and innovation to help MLTC meet the goals of its Quality Strategy.

Participation on MLTC Quality Management Committee and Sub-Committees

WellCare of Nebraska, through representation by our medical director will participate on the MLTC Quality Management Committee. Our medical director, and as appropriate, our behavioral health clinical director and our quality management/ performance and quality improvement coordinator, will participate on any associated subcommittees as requested by MLTC.

Participation on Joint PIP(s)

WellCare will support MLTC's efforts and initiatives to improve health outcomes and quality of life for all Heritage Health Members through collaboration and alignment on joint PIP(s) with MLTC and other system partners. Our clinical and executive leadership will actively participate and support collaborative working groups that include MLTC and MCO representatives to ensure alignment across interventions, data collection and analysis, and evaluation.

Alignment of WellCare QAPI Program with MLTC Quality Strategy

Our QAPI Work Plan will include key focus areas from MLTC's Quality Strategy. We will also work collaboratively with MLTC staff to address and ensure implementation of all elements of the MLTC Quality Strategy and our QAPI Program, including, but not limited to: monitoring and evaluating our service delivery system and provider network and QAPI processes; implementing action plans and activities to correct deficiencies or increase the quality of care provided to members; initiating PIPs to address trends identified through monitoring activities, reviews of complaints and allegations of abuse, provider profiling, utilization management reviews, etc.; monitoring our compliance with federal, state, and MLTC requirements; ensuring our executive and management staff participate in QAPI processes; ensuring that the development and implementation of QAPI activities include provider participation and information provided by members, their families and guardians; identifying WellCare of Nebraska's best practices, lessons learned, and other QAPI findings.

Performance Reporting

Consistent with the reporting requirements described Section IV.M.6 and Attachment 7 of the Nebraska Heritage Health RFP, WellCare will report Healthcare Effectiveness Data and Information Set (HEDIS®) measures, CHIPRA Quality Measures required by CMS, Consumer Assessment of Healthcare Providers and Systems (CAHPS®) measures, ACA Adult Quality Measures as defined by CMS, and any other measures as determined by MLTC. WellCare will report results of measuring and assessing outcomes and quality and will incorporate these performance indicators into its PIPs. To the extent possible, WellCare will report results publicly on our website immediately after being accepted by the QAPIC and approved by MLTC.

Value Added Services

WellCare proposes a suite of value added services that are tailored to specifically address Nebraska's

population-specific needs and health outcome goals. We believe these value added services will deliver meaningful, lasting improvements for our members thereby delivering value to our Providers and MLTC. WellCare will collect data annually to identify its progress towards success as well as opportunities for ongoing process and quality improvement. As determined through our evaluation efforts, WellCare will consider additions, deletions, or modifications to our value-added services during the contract period to further MLTC's Quality Strategy. We will submit such changes for approval to MLTC a minimum of 45 calendar days prior to implementation.

SELECTING FOCUS AREAS

Among each of WellCare's affiliate health plans, our QAPI Programs are designed to be comprehensive, systematic, and continuous quality assessment and improvement programs that use an internal analysis process to select areas of focus. In alignment with MLTC's Quality Strategy, WellCare's Nebraska-based and corporate QAPI-related teams, including Medical Economics, Medical Informatics, and our Advocacy and CommUnity-Based Programs department, will analyze available internal and external data to identify QAPI focus areas. Data sources will include, at a minimum, the following: claims and encounters, authorizations, call center statistics, appeals and grievances, medical record reviews, care plans, HEDIS measures, CAHPS measures, case management audits, disease management audits, and provider satisfaction surveys. Consistent with our practice in other states, WellCare will also utilize census, environmental, economic, social and clinical/health care data for the community and combines it with data regarding our membership.

WellCare uses the Plan-Do-Study-Act (PDSA) method of continuous quality improvement throughout the organization. Under the PDSA approach multiple indicators of quality of care and service are reviewed and analyzed against benchmarks of quality clinical care and service delivery. When variations are noted, root cause analysis, action plans and re-measurement occur to ensure progress toward established goals. Continuous Quality Improvement (CQI) processes will be used to develop the QAPI Program Description, Work Plan and Program Evaluation.

We will incorporate recommendations from all staff and WellCare committees, the results of PIPs, other studies, improvement goals, and other interventions into the QAPI Program Description, the QAPI Work Plan, and the QAPI Program Evaluation. Once approved by our QAPIC, WellCare will annual submit our QAPI Program Description, Work Plan and Program Evaluation to MLTC.

WellCare of Nebraska will also collaborate with MLTC's contracted EQRO to develop studies, surveys, and other analytic activities to assess the quality of care and services provided to members and to identify opportunities for improvement. To facilitate this process, WellCare of Nebraska will supply data, as requested by MLTC or its EQRO.

PROPOSED QAPI WORK PLAN AND PLANNED INITIATIVES

See **Attachment 68_Proposed QAPI Work Plan** for a copy of WellCare's proposed QAPI Work Plan and planned initiatives.

WellCare of Nebraska Executive Summary – 2017 QI Work Plan

WellCare of Nebraska quality improvement activities and performance measures will be reviewed, evaluated, and revised annually as outlined in the 2017 QI Program Description. This evaluation includes trended data (where available) and analyses of impact on clinical care and service delivery. Strengths, weaknesses, barriers and opportunities for improvement will be considered during the process to assess the overall effectiveness of the Quality program in improving care and services provided to WellCare members.

The [insert QI staff] , and other applicable departments, will annually perform the evaluation of all work plan metrics and compile an annual QI Evaluation document of the findings.

For Example: Changes in the work plan from 2016 to 2017:

FOR EXAMPLE:

- The following sections have been added in to 2016 plan: Behavioral Health, Timely Access for Appointments, Community Engagement, Adequacy was expanded.

Key focus areas in the 2017 QI work plan:

FOR EXAMPLE:

- Member and Provider Satisfaction (CAHPS) interventions
- HEDIS interventions for various measures
- Timely Access for Appointment metrics and monitoring
- Appeals and Grievance data will be included once available
- Patient Safety initiatives: Quality of Care, Hospital Patient Safety...
- High Risk Pregnancy Program goals and interventions
- Process Improvement Projects (PIPs)

SECTION IV.M QUALITY MANAGEMENT

69. Describe how the MCO will measure and track the outcome of individual quality improvement interventions over time. (*Page limit 3 pages)*

MEASURING QUALITY IMPROVEMENT INTERVENTIONS

In 2014, WellCare began piloting a new methodology to measure and track the outcome of individual quality improvement interventions over time. The methodology is based on the ***Model for Improvement*** developed by the Associates in Process Improvement. It uses rapid-cycle improvement which requires a collaborative approach with cross-functional interdepartmental teams that also include network providers and external community experts. This change in approach has been well received and effective. As a result, we have begun adopting the ***Model for Improvement*** as our change process throughout the organization, both for formal performance improvement projects (PIPs) as well as other quality improvement interventions.

Quality Improvement Intervention Process

WellCare's rapid cycle quality improvement process is broken into four phases: **identify**, **design**, **implement/test** and **evaluate**. Each of the four phases is briefly described below:

- **Identify:** During the *Identify* phase, we pinpoint the health outcome or area we are trying to improve and the barriers to improvement. We study current data trends and relevant research to support the quality improvement topic selection utilizing national, state, local, and historical WellCare data and industry knowledge.
- **Design:** During the *Design* phase, we select interventions that will directly affect our ability to achieve the quality improvement goals. The team, which includes one or more quality improvement data analysts, chooses a data collection methodology that will enable us to test interventions and evaluate outcomes. We establish baseline data and determine a benchmark.
- **Implement/Test:** We first implement the interventions on a small scale using pilot sites. As part of the *Implement* phase process, we develop a measurement plan and use a rapid cycle Plan-Do-Study-Act (PDSA) process, collecting data on a biweekly, semi-monthly, or monthly basis, as appropriate. Using a run chart, we plot and monitor progress on outcomes, process and balance measures (which help determine if there are unintended consequences) over a designated period of time compared to our baseline.
- **Evaluate:** At the conclusion of the quality improvement interventions, the team identifies and summarizes key findings, determines if there was meaningful improvement, identifies and compares successful and unsuccessful interventions, lessons learned and outcomes. The team determines whether further testing is needed or if the pilot should be scaled up.

Quality Measurement Infrastructure

Measurement of WellCare's quality improvement interventions is backed by a robust data collection and analytic infrastructure comprised of data managers and quality improvement analysts who collect and analyze the impact of quality improvement interventions over time using a variety of cost, utilization, and quality measurement databases. These personnel are described below.

Corporate Quality Measurement Staff

WellCare has established a corporate team structure to support data collection, data analysis, and reporting functions for all of its subsidiary plans. The multidisciplinary team, led by WellCare's Vice President for Population Outcomes, is composed of analysts, developers, data administrators, and informatics experts who know our systems, understand the data within the systems, and have the

experience to report the data in a manner that supports the analytics required to effectively manage care for our Nebraska members. The various roles of the WellCare quality corporate support team include:

- The **Quality Analytics** department is responsible for analysis related to all aspects of quality, predictive modeling, retrospective analysis and trend analysis from a QI perspective. This skilled group of individuals has decades of health care analytics reporting experience providing data retrieval, management, and mining, report writing and graphics, and statistical analysis.
- The **Medical Economics** department is responsible for analysis related to all aspects of quality, predictive modeling, retrospective analysis, and trend analysis from a cost and utilization perspective. This team is able to pull data to develop reports, studies, analyses and ad hoc requests using tools such as SAS® and Cognos. The team uses information available in standard claims fields including but not limited to CPT, diagnosis (primary, secondary, etc.), DRG, specialty type, provider type, provider, facility, member, member type, bill type, denials, appeals, and authorizations.
- The **Operational Reporting** team, which includes experienced developers who are adept at operationalizing key regulatory, quality, and performance reporting. The primary focus of this group is to develop reports that are run automatically on a periodic (weekly, monthly, quarterly, annually, or other) basis and are used either for regulatory purposes or for real-time monitoring.
- The **Advocacy and CommUnity-Based Programs** department maintains the technical systems to capture access and use of social services by members and their families at the transactional level. In addition, the team assembles community-based, public health data on which to identify health trends that could impact our membership. And, using the social service referral data, identifies potential gaps in social service availability to pilot community-based solutions for filling those gaps.

WellCare of Nebraska Quality Measurement Staff

In addition to the corporate resources we use to measure and evaluate quality improvement interventions, WellCare of Nebraska's Quality department will include a quality management/ performance and quality improvement coordinator who will develop, coordinate, and implement WellCare quality strategies and interventions, including the collection of relevant and meaningful indicators for monitoring and evaluating the quality and appropriateness of care/ service across the continuum. Additional staff will include quality improvement analysts, project managers, and nurse specialists.

Measuring Quality Improvement: Data Sources

WellCare's quality measurement staff has access to a number of data sources that allow us to effectively track and monitor progress in meeting our quality improvement goals. Quality improvement teams use reports from these data sources to monitor quality improvement interventions. These data sets include:

- **HEDIS Data:** WellCare uses a NCQA HEDIS®-certified vendor to calculate HEDIS® and HEDIS®-like measures on a monthly and annual basis. WellCare's **Quality Analytics** team creates excel based reports that show the current performance rates in comparison to benchmarks.
- **CAHPS Data:** WellCare uses a NCQA-certified CAHPS vendor that identifies a random sample of our membership and conducts both the CAHPS Medicaid Adult Survey and the Medicaid Child Surveys on an annual basis. The QI Department assesses the data, compares it to prior year performance, evaluates how it is performing against peers, identifies key drivers and barriers to improvement and develops interventions to improve the members' experience of care.
- **Claims and Encounter Data:** Claims and encounter data are analyzed regularly to identify the health care needs of the population by identifying the diagnostic categories that are the most prevalent, broken down by demographic data, including race and ethnicity. This data is used to identify gaps in care, as well as over and under-utilization.
- **Authorization Data**: A monthly report summarizing authorization data is used to monitor utilization trends for inpatient services including birth/NICU, behavioral health, medical, surgical, and

observation. We utilize this to identify trends across individual and groups of providers. This helps us monitor adherence to clinical practice guidelines and identify emerging patterns of care.

- **Call Center and Appeal and Grievance Data:** One of the most important ways that we are able to identify areas for quality is through our call center, complaint reporting and appeal and grievance procedures. Complaint and appeal information for both members and providers is used to produce quarterly and ad hoc reports which include aggregate totals and trend analyses.
- **Medical Record Review Data:** Annual medical and behavioral health record reviews are conducted to measure compliance with general medical record keeping practices, confidentiality of member data, adherence to certain preventive care guidelines and coordination and continuity of care.
- **Care Plan Data:** WellCare is in the process of building a customized enhanced platform which will include a comprehensive 360-degree view incorporating key clinical, financial, legal, and lifestyle data that are unique to the individual member. These data will be aggregated in order to assist in real-time quality improvement and enhanced provider engagement.
- **Community Assessment and Feedback:** WellCare utilizes census, environmental, economic, social and clinical/health care data for the community and combines it with data regarding our membership.
- **Case Management and Disease Management Audits:** Compliance reviewers conduct monthly case audits for each case manager and communicates the findings and trends to case management leadership. Audit findings support analysis of quality improvement interventions
- **Provider Satisfaction Surveys:** We collect provider feedback through annual provider satisfaction surveys. We analyze the survey results to identify, monitor, and track quality improvement opportunities and interventions.
- **Pharmacy Data:** Pharmacy data is analyzed to identify trends that assess the current state of our pharmacy program. The data analysis is used to identify prescriber outliers, evaluate Member outcomes, determine areas requiring prescriber outreach or education, and identifying classes where generic usage can be increased.

Monitoring Outcomes: Clinical and Executive Review of Quality Improvement Interventions

Findings from our Quality Assessment and Performance Improvement (QAPI) interventions for Heritage Health members will be reported to clinical and executive leadership including WellCare of Nebraska's medical director, Quality Assessment and Performance Improvement Committee (QAPIC) and other (QAPI)-related committees. The QAPIC directs and reviews WellCare's quality improvement and utilization management activities, and has the authority to create and provide direction to work groups, committees, and departments within the health plan to assess, investigate, and take action related to the health care services received by members.

SECTION IV.M QUALITY MANAGEMENT

70. Describe experience in using results of performance measures, member satisfaction surveys, and other data to drive improvements and positive affect the health care status of members. Provide examples of changes implemented to improve the program and members' health outcomes. *(Page limit 5 pages)*

IMPROVING THE HEALTH CARE STATUS OF MEMBERS BY USING DATA TO DRIVE IMPROVEMENTS

WellCare provides a broad range of well-established programs for service and clinical quality that meet rigorous requirements for consumer protection and program performance by partnering with members, providers, community-based organizations, and state and local agencies to provide for integrated, person-centered, evidence-informed and high-quality health care. These efforts are supported by our comprehensive quality assurance and performance improvement (QAPI) Program. As part of our continuous quality improvement strategy, WellCare uses the results of HEDIS®, HEDIS®-like and state performance measures, member satisfaction surveys, and data from operational and clinical areas to drive improvements and positively affect the health care status of members. Quality improvement teams use reports from a variety of data sources to monitor and measure quality improvement interventions. Below, we highlight examples of WellCare's experience implementing changes to improve programmatic and member health outcomes.

Healthcare Effectiveness Data and Information Set

WellCare has more than 15 years of experience using an NCQA HEDIS®-certified vendor to calculate HEDIS® and HEDIS®-like performance measures on a monthly and annual basis. Our Quality Analytics department, a corporate unit that supports all of our state health plan affiliates, uses NCQA certified quality-measure reporting software that calculates measures using administrative data sources. The Quality Analytics department creates excel based reports that show the current performance rates in comparison to benchmarks. For state specific measures, the department populates state-required reporting templates to assist in quality improvement efforts.

In order to drive improvements on the frontline of where care is delivered, WellCare creates Provider Care Gap reports that address HEDIS® care gaps for each of our high volume primary care providers (PCP). The report includes the PCP's compliance rate for HEDIS® measures that can be impacted by a PCP at the provider level. The report identifies members with a gap in care, such as a missed immunizations, lead screenings or well-child visits. Our local Provider Relations (PR) representatives and Clinical HEDIS® Practice Advisors (CHPAs) meet onsite with these high-volume network providers that care for 80 percent of the membership in a given market and their office teams to deliver and review the Provider Care Gap reports. CHPA's and PR representatives provide education on HEDIS® measures and closing member care gaps and identify opportunities and strategies for improving the quality of member care and reducing costs. They review the Provider Care Gap reports with the PCP to identify areas of excellence and opportunities for improvement, as measured by HEDIS®, as compared to their peers as well as state and national benchmarks if available. In addition to regular on-site assistance for these providers, we offer ad hoc assistance via email or conference calls to strategize solutions to complex clinical issues and work towards resolution of deficiencies. We track the success of our interactions with the providers in closing gaps in member care by reviewing the data every month to determine compliant HEDIS® measures.

Example 1: Antidepressant Medication Management

As part of WellCare's ongoing HEDIS® monitoring efforts, our Quality Analytics department reported that the results for two adult antidepressant medication management measures among our affiliate state health plans in Georgia and Kentucky were underperforming. The HEDIS® measure is defined as the percentage of members 18 years of age and older who were treated with antidepressant medication, had a

diagnosis of major depression and who remained on an antidepressant medication treatment; two rates are reported:

- **Effective Acute Phase Treatment:** The percentage of members who remained on an antidepressant medication for at least 84 days (12 weeks).
- **Effective Continuation Phase Treatment:** The percentage of members who remained on an antidepressant medication for at least 180 days (6 months)

In order to drive improvements and positively affect the health care status of our Medicaid members in Georgia and Kentucky, WellCare implemented a letter campaign to members and providers to serve as reminders. Letters were mailed to our members who had been prescribed a new antidepressant medication that advised them to follow up with their physician. At the same time, we mailed letters to the physician of record advising that their members have recently begun a new medication and has not yet had the follow up required. A list of members assigned to the provider was attached for follow up. In 2014, we mailed nearly 6,000 letters to members and providers in Georgia and over 17,000 letters in Kentucky.

Once the intervention was in place, we continued to monitor performance on the two antidepressant medication treatment measures. Across both measures in Georgia and Kentucky, we found results as shown in **Figure 3**.

Figure 3

Results of Member and Provider Letter Campaign for Antidepressant Medicaid Management			
Measure	**Baseline Performance (CY2013)**	**Performance (CY2014)**	**%-Point Improvement Over Baseline**
Georgia			
Effective Acute Phase Treatment	44.15%	46.92%	2.77
Effective Continuation Phase Treatment	29.43%	30.37%	0.94
Kentucky			
Effective Acute Phase Treatment	49.86%	52.29%	2.43
Effective Continuation Phase Treatment	33.53%	37.61%	4.08

Example 2: Patient Care Advocate Program

WellCare of Florida (Staywell), piloted a Patient Care Advocate (PCA) Program in 2013. The program is designed to improve the health and well-being of members and close care gaps. The PCA, a WellCare employee, is embedded in a large pediatric practice that cares for approximately 20,000 children and adolescents who are WellCare members. The PCA meets with members prior to and after appointments for discussion of any gaps in care. The PCA schedules follow up appointments and assists with any barriers identified (e.g., transportation). Prior to the follow up appointment, the PCA calls members to remind them of the follow up and determine if any barriers exist in making it to the appointment. On an ongoing basis, the PCA monitors whether any identified care gaps are closed and works with members to determine the case and address any scheduling or transportation barriers. The PCA meets weekly with the PCPs and the administrator of the practice to discuss relationship and advocacy objectives. To assess the efficacy of the program, WellCare tracks the practice's monthly HEDIS® rates, monthly care gaps closed, and annual final HEDIS® rates.

Figure 4 summarizes HEDIS® rates for Pediatric Associates, Inc. in Miami, an Independent Practice Association (IPA) that implemented the PCA Program in 2014. Baseline data for 2013 is provided for comparison purposes.

Figure 4

Results of Member and Provider Letter Campaign for ADHD Follow Up Care			
Measure	Baseline Performance (CY2013)	Performance (CY2014)	%-Point Improvement Over Baseline
ADHD Initiation Phase - Visit	37.80%	54.08%	16.28
Adolescent Immunizations	85.59%	85.82%	0.23
Asthma Controller Medication	91.53%	98.51%	6.98
Chlamydia Testing	33.70%	46.98%	13.28
Child/Adolescent Access 25 months – 6 years	78.10%	79.30%	1.20
Well Child Visit 3 – 6 years	39.88%	43.15%	3.27

Example 3: ADHD Medication Follow Up for Children

In the course of the annual quality improvement evaluation process where quality improvement activities, interventions and HEDIS® measure data and metrics are analyzed, WellCare's quality improvement departments or staff identified the need for a clinical practice guideline for the treatment of Children and Adolescents' ages 4-18 with ADHD. There were no standard guidelines posted for WellCare affiliate state health plans to reference for determining appropriate treatment. In response, WellCare drafted guidelines for ADHD treatment based on available evidence based literature and input from clinical experts. In 2011, the guidelines were approved by WellCare's Medical Policy Committee, a corporate review body, and were approved by the respective Medicaid state-based utilization management committees. The policy is reviewed annually and modified based on further evidence-based practices and clinical opinion, including guidance from the American Pediatric Association.

In order to monitor changes in members' health outcomes, HEDIS® measures are monitored monthly and reported quarterly to committees and annually to NCQA. The follow up care for children prescribed ADHD medication measure, which calculates the percentage of children newly prescribed attention-deficit/hyperactivity disorder (ADHD) medication who had at least three follow up care visits within a 10-month period, one of which was within 30 days of when the first ADHD medication was dispensed was monitored. Two rates are reported:

- **Initiation Phase:** The percentage of members 6–12 years of age with an ambulatory prescription dispensed for ADHD medication, who had one follow up visit with practitioner with prescribing authority during the 30-day Initiation Phase.
- **Continuation and Maintenance (C&M) Phase:** The percentage of members 6–12 years of age with an ambulatory prescription dispensed for ADHD medication, who remained on the medication for at least 210 days and who, in addition to the visit in the Initiation Phase, had at least two follow up visits with a practitioner within 270 days (9 months) after the Initiation Phase ended

In order to drive improvements in these performance measures, WellCare implemented a letter campaign to members and providers to serve as reminders of follow up. An ADHD member letter was mailed to the parent or caregiver of identified members' ages 6-12 that has been prescribed a new medication (Initiation Phase) and advised them to follow up with their physician within 30 days. The letter also included important information on behavioral health and support services. At the same time, letters were mailed to the physician of record advising that their members had recently begun a new medication and had not yet had the 30 day follow up required. A list of members assigned to the provider was attached to the letter for follow up.

Once the intervention was in place, we continued to monitor performance on the two ADHD medication follow up measures. Across both measures in Kentucky, where nearly 4,500 letters were mailed, we

found strong results as shown in **Figure 5**.

Figure 5

Results of Member and Provider Letter Campaign for ADHD Follow Up Care			
Measure	Baseline Performance (CY2012)	Performance (CY2014)	%-Point Improvement Over Baseline
Kentucky			
Initiation Phase Treatment	50.0%	61.5%	11.5%
Continuation Phase Treatment	20.0%	69.6%	49.6%

Member Satisfaction Surveys: Consumer Assessment of Healthcare Providers and Systems

The results of member satisfaction surveys have proved to be an invaluable tool for WellCare to evaluate the access and quality of care and services provided to our members and identify opportunities for improvement. WellCare uses an NCQA-certified Consumer Assessment of Healthcare Providers and Systems (CAHPS®) vendor that identifies a statistically valid random sample of our Medicaid and CHIP membership and annually conducts Adult and Child CAHPS® surveys. Our vendor compiles the results, analyzes the data and provides WellCare and its affiliate health plans with a comparison of our performance against national and state benchmark standards. WellCare uses the data to evaluate how the plan is performing, identify key drivers and barriers to improvement, and develop interventions to improve the members' experience of care with their providers and WellCare.

Example 4: Improving WellCare of Illinois Member Satisfaction

Below are example initiatives from WellCare's Illinois affiliate health plan. **Figure 6** shows several CAHPS® Adult and Child measures which did not meet WellCare's goals for member satisfaction. As a result, WellCare conducted a barrier analysis and implemented a variety of initiatives:

- Called new members at 30 and 60 days post-enrollment to ensure they are happy with WellCare
- Improved processes that allow members to change their PCP
- Developed and distributed a CAHPS® quick reference guide to providers
- Sent post card mailings to members that addressed access and availability concerns
- Distributed CAHPS®-like surveys at health fairs to help members understand the purpose
- Changed customer service team processes to ensure members were happy with their experience
- Published articles in the provider newsletter addressing ways to improve member satisfaction scores

Figure 6

WellCare of Illinois Medicaid Member Satisfaction Improvements				
Measure	Survey	Baseline Performance 02/14-05/14	Performance 02/15-05/15	%-Point Improvement Over Baseline
Getting Needed Care composite	Adult	69.8%	73.5%	3.7
Health Plan Rating	Adult	38.8%	58.1%	19.3
Getting Care Quickly	Child	74.8%	78.3%	3.5
How Well Doctors Communicate	Child	89.3%	93.8%	4.5

Cost and Utilization Data

WellCare also analyzes measures of inpatient, outpatient, emergency department utilization and costs, which can be rolled up and compared across physicians or at the physician group level. Our Medical Economics department supports analysis and monitoring for all of our affiliate state health plans.

Example 5: Integrated Care Management for Members with Severe Mental Illness (SMI) and Chronic Medical Conditions

In 2013, WellCare of Kentucky piloted an initiative to improve health outcomes and quality of care for adult members with a Severe Mental Illness (SMI) and five additional chronic medical conditions, including asthma, COPD, diabetes, hypertension/heart disease and AIDS. The goal of the program was to make a positive impact on members' utilization of the emergency department, hospital admissions and readmissions, frequency of PCP/psychiatrist visits and medication adherence by implementing face-to-face integrated case management using a clinical dyad consisting of a nurse case manager and a social worker case manager. The clinical dyads participating in the pilot received core case management training (motivational interviewing, case management safety and documentation) as well as condition specific training (schizophrenia, bipolar disorder, anxiety, depression, suicide assessment/prevention, substance use disorder, asthma, COPD, diabetes, hypertension/heart disease and obesity). The clinical dyad continued to work with members and their families, treating providers and identified social support systems via face to face visits to coordinate needed care and assist the member to remain stable in the community. The pilot consisted of 43 members who actively participated. Interventions occurred between May and October 2013. The results of the pilot are listed in **Figure 7**.

Figure 7

Results of Member and Provider Letter Campaign for ADHD Follow Up Care	
Measure	**% Change From Baseline**
Total Medical Expenses	31%
Emergency Department Visits	10%
Inpatient Expenses	66%
Outpatient Expenses	24%
Professional Expenses	11%
Baseline Member claims data measured: 2/1/2012 – 4/30/2013 *Pilot program results data measured: 5/1/2013 – 10/31/2013*	

SECTION IV.M QUALITY MANAGEMENT

71. Describe how the MCO will assess the quality and appropriateness of care furnished to members with special health care needs, members with co-occurring physical and behavioral health concerns, and dual-eligible members. *(Page limit 3 pages)*

ASSESSING QUALITY AND APPROPRIATENESS OF CARE FURNISHED TO VULNERABLE POPULATIONS

WellCare assesses the quality and appropriateness of care furnished to all members through our comprehensive, systematic, and data-driven quality assurance and performance improvement (QAPI) Program. Our QAPI Program reviews the entire range of services including those provided to members with special health care needs, members with co-occurring physical and behavioral health concerns and dual-eligible members. Evaluation and monitoring activities cover the quality and appropriateness of the physical, behavioral, pharmacy and social services that our members need. Our QAPI Program builds upon WellCare's holistic and member-centric model of care which coordinates and integrates prevention-focused physical, behavioral, pharmacy, and social support services.

METHODS FOR ASSESSING QUALITY OF CARE

Health Care Effectiveness Data and Information Set (HEDIS®) Measurement

WellCare uses a National Committee for Quality Assurance (NCQA) certified vendor to calculate Healthcare Effectiveness Data and Information Set (HEDIS®) data and HEDIS®-like measures on a monthly and annual basis using a combination of administrative and clinical (chart review) data sources. Using eligibility file, encounter data and utilization data, our Quality Analytics department is able to stratify the data by population cohorts, including members with special health care needs, members with co-occurring physical and behavioral health concerns, and dual-eligible members. This will provide us the ability to monitor HEDIS performance for these populations and design, develop, and implement quality improvement interventions tailored to their needs.

Record Review

Annual medical and behavioral health record reviews are conducted to measure compliance with general medical record keeping practices, confidentiality of member data, adherence to certain preventive care guidelines and coordination and continuity of care. The review process identifies areas of record documentation and management that may be improved and provides feedback to the provider. Those who do not achieve a passing score are required to create and implement a corrective action plan. WellCare monitors completion of the corrective action plan and re-audits the provider to ensure deficiencies have been successfully remediated. Providers who are non-cooperative with auditing, have serious identified issues with delivery or documentation of care, or fail to make improvement following interventions or corrective action plans will be referred to the WellCare of Nebraska medical director, Network Management and/or UM leadership for appropriate intervention and resolution.

Case Management and Disease Management Audits

WellCare's Health Services Compliance team conducts monthly case audits for each WellCare case manager and disease management nurse. Findings and trends are communicated to Case Management (CM) and Disease Management (DM) leadership. Management analyzes the audit findings to provide coaching opportunities for the department and the individual case managers and disease management nurses. Health Services will collaborate with our Nebraska Quality department to address any quality of care issues and improve CM and DM for our members. In addition, our internal training/auditing staff supplements these audits using an extensive process which ensures that CM/DM timeliness, documentation, and activities are in compliance with our internal policies and procedures, our accrediting bodies and our contracts. These audits are used to educate audited case managers and CM/DM teams,

including when find cases that were managed well and had optimal outcomes.

Provider Credentialing

WellCare sets credentialing and re-credentialing criteria for provider network participation in compliance with applicable local, state, and federal requirements. WellCare follows NCQA guidelines for recredentialing as well respective state and federal contract requirements for credentialing. Performance information is a key component of the provider re-credentialing process, which evaluates, among other elements, the provider's quality of patient care, clinical performance, and utilization of resources. We use information from a variety of sources, including the provider application, primary source verification, medical record review audits, and relevant findings from provider profiling. Providers that fail to meet established standards, have instances of poor quality, or are non-compliant with contractual, state, or federal regulations will be reviewed by the WellCare of Nebraska Credentialing and Peer Review Committee, with avenues of recourse including corrective actions, sanctions or provider termination.

Community Assessment and Feedback

WellCare uses a system of care approach to quality measurement focusing on the health of the population to improve quality outcomes for our individual members. In doing so, WellCare utilizes census, environmental, economic, social and clinical/health care data for the community and combines it with data regarding our membership. Using a five-step process, WellCare reviews the analysis with a cross-functional team to collaboratively design outreach efforts in critical areas that will improve the quality of care and the quality of life of our members, their families and the community-at-large.

Unique Quality of Care Considerations for Vulnerable Populations

Members with Special Health Care Needs

Individuals with special health care needs (SHCNs) are defined as individuals of any age with mental disability, physical disability, or other circumstances that place their health and ability to fully function in society at risk, requiring individualized health care approaches. WellCare will utilize Medicaid historical claims data (if available) to identify members who meet our guidelines for SHCN determination. These guidelines will be submitted in writing to MLTC for approval prior to their proposed implementation. These groups may include, but are not limited to: adults with high risk pregnancies; chronic conditions; cancer; multiple morbidities; behavioral health conditions; substance abuse; social conditions such as homelessness and limited language capabilities; adults with polypharmacy; emergency department overutilization; hospital readmissions within 30 days; children with chronic conditions; children who take medication for any behavioral/medical condition that has lasted, or is expected to last, at least twelve months; children who need or receive treatment or counseling for an emotional, developmental, or behavioral problem that has lasted or is expected to last at least twelve months; and children who need or receive speech therapy, occupational therapy, and/or physical therapy for a medical condition that has lasted or is expected to last at least twelve months.

Heritage Health members with SHCN will be stratified into our Care Management Risk Level 4 category and assigned a field-based care manager. Once enrolled in Care Management Risk Level 4, the member will have an assigned field-based care manager who will be actively involved in assessment, care planning, and coordination with the member's care team to prevent gaps in care, ensure that necessary services are available and in place to address immediate medical, mental health and/or behavioral needs, and serve a primary care planning point of contact for the member and his or her family. Once the critical event or disease process has been stabilized, the member may be discharged from our Care Management Risk Level 4 program (if all goals are met) or may be referred to one of our less intensive care management programs to ensure the member continues to receive access to quality and appropriate care.

Members with Co-occurring Physical and Behavioral Health Concerns

Members with co-occurring physical and behavioral health conditions are at risk for increased

hospitalizations and increased cost of care. WellCare has developed evidence-based utilization review criteria to guide both providers and concurrent reviewers to the most appropriate level of care. We minimize prior authorization requirements for most outpatient, community-based services for behavioral health and co-morbid conditions. We also continually monitor best practices and improvements in management of co-occurring conditions, and we regularly modify our criteria and guidelines to reflect these changes.

WellCare's integrated case and disease management model demonstrates our commitment to identify our members in the community, reach them where they live, understand how they prefer to engage with the health care system, facilitate their access to care, and help them when they need us. Our person-centered approach is flexible, strength-focused, family and support system-connected, continuously and reliably responsive to individual member needs, and configured to a range of available quality community resources (e.g., housing, transportation, work-relevant education, health services, recreational and spiritual resources). Case managers regularly interact with members to validate effective linkages and coordination between all providers and services as well as monitor transitions between member stratification levels including supporting our member's social service needs. We also work closely with key behavioral health and medical providers who have an interest in developing or who already have a provider based integrated, person centered model of care. Our large provider systems that have integrated health homes or medical /behavioral co-location are utilized to serve our most complex members.

Dual-eligible Members

WellCare serves 2.4 million Medicaid members and more than 350,000 Medicare Advantage members across 16 states, so the unique challenge of serving dually-eligible individuals has become a regular part of doing business for us. Among our members are those in the Dual Special Needs Populations, Fully Integrated Dual Advantage (FIDA) Aged, Blind and Disabled (ABD), Foster Children, Adults with Serious Mental Illness and Children with Serious Emotional Disturbances, individuals with Developmental Disabilities and those receiving Home and Community-Based Waiver Services (HCBS) and Long Term Supports and Services (LTSS). Because of the broad range of entities that provide coverage and services to these diverse populations, we have developed informal and formal processes for coordinating care across different payers and care coordination entities. And because we have Medicare Advantage programs as well as Medicaid programs, we have developed these processes based on best practices from both sides to ensure a seamless process for members.

Through these coordination efforts with providers and Medicare Advantage plans as well as a systematic process for coordination of benefits, we are able to monitor care provided to members who are dually eligible. Dually eligible members are flagged in our system as such, and our care managers and member services representatives can monitor for concerns about appropriateness of care.

USING DATA TO IMPROVE WELLCARE'S QUALITY OF CARE FOR VULNERABLE POPULATIONS

All of the information regarding the quality of care we provide to vulnerable populations will flow into our Nebraska-specific Quality Assessment and Performance Improvement (QAPI) governance and reporting structure, which will be overseen by our Quality Assurance and Performance Improvement Committee (QAPIC). The QAPIC reviews detailed reports include data analysis and results regarding the effectiveness of WellCare's quality of care for members with special health care needs, members with co-occurring physical and behavioral health concerns, and dual-eligible members. The QAPIC will direct and review WellCare's QAPI and utilization management activities and will have the authority to create and provide direction to work groups, committees, and departments within WellCare to assess, investigate, and take action related to the health care services received by members.

SECTION IV.M QUALITY MANAGEMENT

72. Describe the MCO's process for soliciting feedback and recommendations from key stakeholders, members, and families/caregivers, and using the feedback to improve the MCO's quality of care. *(Page limit 2 pages)*

SOLICITING FEEDBACK FROM STAKEHOLDERS TO IMPROVE QUALITY OF CARE

WellCare seeks to improve the quality of care delivered to our members by undertaking varied and innovative strategies to effectively solicit feedback and recommendations from key stakeholders, including members, families/caregivers, providers, representatives from the Department of Health and Human Services (DHHS), Division of Medicaid & Long-Term Care (MLTC) and representatives of community based organizations (CBOs) who advocate for the health and well-being of our members. Our efforts to gather feedback and recommendations from this diverse group of stakeholders will include a blend of outreach and informational activities, as described below:

- **Advisory Committees**
  - **Member Advisory Committee:** WellCare's Member Advisory Committee (MAC) will be a forum for gathering feedback from members, member representatives, providers, and community advocates that reflect the geographic, cultural and racial diversity of WellCare's population and the communities we serve. Among other responsibilities, committee participants will be invited to discuss the quality of their customer experiences with WellCare and their health care providers. Committee members will help identify root causes of barriers to receiving care as well as strategies for overcoming barriers. WellCare has effectively used the feedback from MACs to improve quality of care and plan operations. ***For example, feedback from our Hawaii MAC resulted in development of a breast cancer screening program (called "Mammo Me, Mammo You") that addressed cultural sensitivities, educated members, and resulted in significant improvement of breast cancer screening rates between 2011 and 2013.***
  - **Clinical Advisory Committee:** WellCare will convene a Clinical Advisory Committee comprised of an expert panel of Nebraska-based clinicians representing a cross-section of providers in the fields of physical health, behavioral health and pharmacy to help us ensure members receive the right care, at the right time and in the right setting. Participants will be clinicians who care for children, adolescents and adults across a variety of ages and races/ethnicities and have an awareness of differences between rural and urban populations. These clinicians will help us improve quality of care and access to services to meet Nebraska's goals for Heritage Health.
  - **Provider Advisory Committee:** WellCare will establish a Provider Advisory Committee with representation from the major provider organizations in Nebraska, individual providers, behavioral health, pharmacy providers, hospitals, and providers who primarily serve individuals with disabilities.
  - **Health*Connections* Councils:** WellCare has historically received feedback from advocates and community-based organizations (CBO) through our Health*Connections* Councils, which are community-focused planning councils that focus on issues affecting the social safety net and its viability and sustainability. We plan to implement our Health*Connections* Councils in Nebraska.
- **Satisfaction Surveys**
  - **Member Satisfaction Surveys:** WellCare uses an NCQA-certified Consumer Assessment of Healthcare Providers and Systems (CAHPS®) vendor that identifies a statistically valid random sample of our Medicaid and CHIP membership and annually conducts Adult and Child CAHPS surveys. The results of member satisfaction surveys have proved to be an invaluable tool for WellCare to evaluate the access and quality of care and services provided to our members and

identify opportunities for improvement.

- **Provider Satisfaction Surveys:** In order to better understand and remain well-informed about our valued provider network, we conduct annual provider satisfaction surveys. The survey concentrates on a variety of subjects, including call center/member services, provider relations, continuity/coordination of care, provider network, utilization and quality management, finance issues, pharmacy and drug benefits, and overall satisfaction and loyalty.

- **Community Outreach and Feedback:** WellCare uses a system of care approach to quality improvement that focuses on the health of the population to improve quality outcomes for our individual members. We tailor local outreach and engagement strategies based on member, provider and community partner feedback as well as research findings. This approach facilitates the cultural relevance of our efforts and ensures we address the needs of the community, including our members and their families. ***For example, between September and November of 2015, WellCare Community Relations associates already met with over 20 CBOs around the state to identify health, social, cultural and economic needs of the communities and members we will serve in Nebraska.***
- **Member and Provider Newsletters:** WellCare will produce and disseminate quarterly member- and provider-specific newsletters which will include a wealth of general and Nebraska-specific information, including how to contact WellCare to provide feedback on quality of care concerns.
- **Provider Engagement:** All of our participating providers will have access to a field-based provider relations representative who is assigned to their county and is available to conduct face-to-face visits—even on short notice—about any type of issues, such as a member's need to see a specialist quickly, the status of a prior authorization or a filed claim and correct coding for HEDIS ® measures.
- **Member Grievances and Appeals:** Complaints and grievances are closely monitored with regard to access and availability of care. When issues are identified, our Provider Relations department intervenes to re-educate the provider on their contractual obligation to adhere to standards; corrective action plans are developed if indicated.
- **Tribal Liaison:** WellCare will designate a local tribal liaison as a single point of contact to work with the Indian Health Service, tribal entities, and WellCare staff on American Indian issues and concerns.
- **Collaboration with MLTC:** WellCare of Nebraska, through representation by our medical director will participate on the MLTC Quality Management Committee. Our medical director, and as appropriate, our behavioral health clinical director and our quality management/ performance and quality improvement coordinator, will participate on any associated subcommittees.

USING STAKEHOLDER FEEDBACK TO IMPROVE WELLCARE'S QUALITY OF CARE

All of the information regarding quality of care that we gather through these outreach efforts will flow into our Quality Assessment and Performance Improvement (QAPI) governance and reporting structure, which will be overseen by our Quality Assurance and Performance Improvement Committee (QAPIC). The QAPIC reviews detailed reports including data analysis and results regarding the effectiveness of WellCare's quality of care. Clinical, member, and provider advisory committees will report, at least quarterly, to the QAPIC a summary of their QAPI-related work, recommendations, needs and activities. The QAPIC will direct and review WellCare's QAPI and utilization management activities and will have the authority to create and provide direction to work groups, committees, and departments within WellCare to assess, investigate, and take action related to the health care services received by members. It is charged with incorporating stakeholder feedback into our QAPI Program and Work Plan.

SECTION IV.M QUALITY MANAGEMENT

73. Describe the MCO's proposed methodology to identify, design, implement, and evaluate PIPs. Provide examples of PIPs conducted by the MCO, and how operations improved because of their results. Discuss how the MCO will collaborate with MLTC and other MCOs to conduct statewide PIPs. *(Page limit 3 pages)*

WELLCARE'S PROPOSED METHODOLOGY TO IDENTIFY, DESIGN, IMPLEMENT AND EVALUATE PIPS

In 2014, WellCare began piloting a new performance improvement project (PIP) methodology based on the ***Model for Improvement*** developed by the Associates in Process Improvement. This methodology uses rapid-cycle improvements that require a collaborative approach with cross-functional interdepartmental teams that also include network providers and external community experts. This change in approach has been well received and effective. As a result, we have begun adopting the ***Model for Improvement*** as our change process throughout the organization. WellCare's rapid cycle PIP process is broken into four phases: **identify**, **design**, **implement/test** and **evaluate**. The full process typically takes 12 to 18 months.

Identify Phase

During the *Identify* phase, we pinpoint the health outcome or area we are trying to improve and the barriers to improvement. We study current data trends and relevant research to support the quality improvement topic selection utilizing national, state, local, and historical WellCare data and industry knowledge. Data sources, such as HEDIS® and HEDIS®-like measures, member satisfaction survey data, claims and encounter data, grievance and appeal data, pharmacy data, etc., are compiled and analyzed to identify opportunities for improvement. Based on research and geographic heat-mapping (if possible), we seek to identify the members most likely to benefit from an evidence-based or best practice intervention and the likelihood of improvement based on research. We identify the types of care or services that can potentially be improved, the provider type(s) involved, and the location(s) for intervention efforts. Our PIP Steering Committee, which will be led by our medical director and report to our Quality Assessment and Performance Improvement Committee (QAPIC), will assemble an appropriate PIP team based on the topic addressed and the expertise required for success. In all cases, we include senior executives, interdisciplinary clinical staff, analytic and evaluation staff, and external partners such as providers, professional organizations, members and community based organizations depending on the scope and goals of the initiative. The PIP team develops a Global/SMART Aim goal (Specific, Measurable, Attainable, Relevant and Time-bound) that specifically identifies the study population, the desired end-state and engages in a collaborative brainstorming to identify the key drivers and root causes that influence the accomplishment of the SMART Aim. We use the combined experience and knowledge of the PIP team along with historical data and a literature review to develop a key driver diagram (KDD).

Design Phase

During the *Design* phase, our goal is to select interventions that will directly affect our ability to achieve the SMART Aim goal. To do so, the PIP team maps the current process to determine where opportunities for failure exist. Failure mode recognition includes identifying any steps in the process where there are no known procedures, existing processes that are not functioning as well as they could, or steps that do not add value. Using this systematic approach, we identify the area(s) most likely to benefit from interventions while impacting the SMART Aim. The PIP team uses WellCare's historical data and experience to decide upon the values to give to the failure effects, failure causes and priority of each step to determine a score. A Pareto Diagram is completed as a graphical display to identify the top 20 percent of factors that are leading to 80 percent of the problems and interventions are developed to target those

factors. The PIP team also chooses a data collection methodology that will enable us to answer the SMART Aim question, test interventions, and evaluate outcomes. The data collection methodology in a rapid cycle PIP must be simple, focused and provide enough data to know when improvement is occurring. We ensure that the data collected are valid and reliable by developing a data collection tool that identifies the data elements to be collected and their source, responsible team member for collecting each data element, how each data element will be collected and the frequency of collection. We establish baseline data by analyzing historical plan information to determine the benchmark for the SMART Aim question. Prior to implementation, all of PIPs will be reviewed to ensure they meet all relevant CMS requirements and are approved by MLTC.

Implement/Test Phase

We first implement the interventions on a small scale using pilot sites using a rapid cycle Plan-Do-Study-Act (PDSA) process which involves collecting data on a biweekly, semi-monthly, or monthly basis, as appropriate. If multiple interventions are implemented, each intervention is monitored sequentially, so we can determine which interventions were effective. Using a run chart, we plot and monitor progress on outcomes, process and balance measures (which help determine if there are unintended consequences) over a designated period of time as we initiate each intervention compared to our baseline and a control group (non-pilot sites).

Evaluate Phase

At the conclusion of the PIP, the PIP team identifies and summarizes key findings, determines if there was meaningful improvement, identifies and compares successful and unsuccessful interventions, lessons learned and the outcomes of the PIP. The PIP team evaluates whether the improvement can be sustained over time or if further work is needed. The PIP team determines whether further testing is needed or if the pilot should be scaled up. WellCare will submit to MLTC the results of its PIPs in its annual QAPI Program Evaluation. Next steps are also addressed in our QAPI Program Description and Work Plan.

EXAMPLES

As a national health plan, WellCare has implemented a variety of PIPs, which are informed by the collection, reporting, and analysis of administrative and clinical data. Below are just two examples of PIPs that WellCare has recently initiated that have yielded improvement in operations and quality of care for populations comparable to Heritage Health.

WellCare of Georgia: ADHD Medication Follow-Up for Children, Ages 6-12

In 2014, WellCare of Georgia conducted a PIP by partnering with three high-volume primary care providers (PCPs) to improve follow-up care for members, ages 6-12, with newly prescribed ADHD medications. The goal of the PIP was to increase treatment in order to achieve the state's benchmarks of 52.8 percent for the initiation phase and 63.1 percent for the continuation phase by December 31, 2014. Multiple operational interventions were implemented. WellCare's Quality Improvement (QI) department outreached to members via phone within seven days of initial filling of prescription in order to encourage members to attend a follow-up visit within 30 days of the initial fill. In addition, a cross-functional pharmacy and behavioral health team from WellCare conducted over 50 face-to-face visits with high-volume/ low-performing PCPs and behavioral health (BH) providers to educate them on the importance of follow-up visits. WellCare's QI BH project manager began sending lists of non-compliant members to low- performing providers in 2014 in order to determine the reasons for the lack of compliance. WellCare achieved improvements over baseline performance across both measures as shown in **Figure 8.**

Figure 8

WellCare of Georgia: ADHD Medication Follow-Up for Children					
Measure	Baseline Performance (CY2011)	Performance (CY2012)	Performance (CY2013)	Performance (CY2014)	%-Point Improvement Over Baseline
Initiation Phase Treatment	39.97%	39.39%	41.12%	48.92%	8.95
Continuation Phase Treatment	54.55%	53.10%	54.18%	63.78%	9.23

'Ohana Health Plan of Hawaii: Diabetes Care for ABD Population, Ages 18-75

WellCare's Hawaii affiliate, 'Ohana Health Plan, serves only aged, blind, or disabled Medicaid members, all of whom are considered special needs. The PIP focused on improving measures of diabetes care and included a variety of interventions over three years including development of a care gap program, so care managers could follow up and educate members and assist them with scheduling appointment with their doctor, implementation of a pay for performance quality incentive program for providers, and outreach to providers including distribution of HEDIS tool kits, and care gap reports. Improvement results are shown in **Figure 9**.

Figure 9

'Ohana Health Plan of Hawaii: Diabetes Care for ABD Population				
Measure	Baseline Performance (02/09-12/09)	Performance (CY2013)	Performance (CY2014)	%-Point Improvement Over Baseline
HbA1c testing	83.2%	88.1%	87.93%	4.73
LDL cholesterol	79.01%	83.32%	N/A*	4.31
Diabetic Retinal Exam	43.4%	63.5%	60.58%	17.18
(*) Not applicable: Measure discontinued by NCQA.				

Statewide PIP Collaboration

WellCare will support MLTC's efforts and initiatives to improve health outcomes and quality of life for all Heritage Health Members through collaboration and alignment on statewide PIPs with MLTC and other system partners. Under the leadership of our medical director, we will engage and actively participate and support collaborative working groups that include MLTC and MCO representatives to ensure alignment across interventions, data collection and analysis, and evaluation. As requested by MLTC, our medical director will participate (at MLTC's discretion) at every Quality meeting with MLTC and other system partners. We will include the statewide PIP in our annual QAPI Work Plan and Evaluation.

SECTION IV.M QUALITY MANAGEMENT

74. Discuss the MCO's approaches to annual member satisfaction surveys. Provide relevant examples of how the MCO has utilized survey results to implement quality improvements in similar programs and how these changes have improved outcomes. *(Page limit 1 page)*

WELLCARE'S APPROACH TO ANNUAL MEMBER SATISFACTION SURVEYS

WellCare uses an NCQA-certified Consumer Assessment of Healthcare Providers and Systems (CAHPS®) vendor that identifies a statistically valid random sample of our Medicaid and CHIP membership and annually conducts Adult and Child CAHPS surveys. We will add a collection of supplemental CAHPS items for children with chronic conditions. Samples of members 18 years of age and older and caregivers/family members of children and youth are included in all member surveys. Our vendor compiles the results, analyzes the data and provides WellCare and its affiliate health plans with a comparison of our performance against national and state benchmark standards. With oversight from our Quality Assessment and Performance Improvement Committee (QAPIC) and medical director, WellCare will use the data to evaluate how the plan is performing, identify key drivers and barriers to improvement, and develop interventions to improve Heritage Health members' experience of care with their providers and WellCare. Annually, we will submit Adult and Child CAHPS survey results and action plans derived from these results to MLTC and separate the data and results by Medicaid and CHIP populations. In addition, WellCare convenes an ongoing company-wide CAHPS work group to identify, collaborate and execute best-practice initiatives to improve members' health care and health plan experiences.

USING SURVEY RESULTS TO IMPLEMENT QUALITY IMPROVEMENTS AND IMPROVE OUTCOMES

Below are example initiatives from WellCare's Illinois affiliate health plan. **Figure 10** shows several CAHPS® Adult and Child measures which did not meet WellCare's goals for member satisfaction. As a result, WellCare conducted a barrier analysis and implemented a variety of initiatives:

- Called new members at 30 and 60 days post-enrollment to address any concerns and questions with their experience with WellCare
- Improved processes that allow members to change their PCP
- Developed and distributed a CAHPS® quick reference guide to providers
- Sent post card mailings to members that addressed access and availability concerns
- Distributed CAHPS®-like surveys at health fairs to help members understand the purpose
- Changed customer service team processes to ensure members were satisfied with their experience
- Published articles in the provider newsletter addressing ways to improve member satisfaction scores

Figure 10

EXAMPLES: ILLINOIS MEDICAID				
Measure	**Survey**	**Baseline Performance 02/14-05/14**	**Follow-up Performance 02/15-05/15**	**Percentage Point Change**
Getting Needed Care composite	Adult	69.8%	73.5%	3.7
Health Plan Rating	Adult	38.8%	58.1%	19.3
Getting Care Quickly	Child	74.8%	78.3%	3.5
How Well Doctors Communicate	Child	89.3%	93.8%	4.5

SECTION IV.M QUALITY MANAGEMENT

75. Discuss the MCO's experience with submitting HEDIS measures. Indicate whether the measures were reported for a State Medicaid, CHIP, or commercial product line. *(Page limit 1 page)*

SUBMITTING HEDIS MEASURE DATA

WellCare has over 15 years of experience submitting Healthcare Effectiveness Data and Information Set (HEDIS®) data covering our Medicaid and CHIP members to the National Committee for Quality Assurance (NCQA), CMS, and state Medicaid agencies. Our **Quality Analytics (QA)** department, a corporate unit that supports all of our state health plan affiliates, uses NCQA certified quality-measure reporting software that calculates measures using a combination of administrative and clinical (chart review) data sources and populates NCQA's Interactive Data Submission System (IDSS) templates. Once data submission files are populated, our QA department does an additional check to ensure that the information from our HEDIS software application was correctly uploaded into the system and the required measures are populated. For state specific measures, QA populates state-required reporting templates. To ensure state reporting templates are correctly populated, another team performs a secondary check of the rates and counts.

WellCare's QA team sends all NCQA IDSS files and state templates to the respective Quality department at each of our state health plan affiliates for review prior to final submission. If patient-level data files are required, QA works with WellCare's IT department to ensure that those have been uploaded timely to CMS. The Quality department for each of our state health plan affiliates is typically responsible for HEDIS data submission to their respective state Medicaid agency with support from QA. We perform a final compliance check to ensure all required deliverables are generated for each entity that receives our HEDIS data submissions. **Figure 11** summaries our experience reporting HEDIS measures for Medicaid and CHIP product lines. (Note: WellCare does not have any commercial product lines.)

Figure 11

WELLCARE HEDIS REPORTING
Product Line Experience

State	Plan Type	Enrollment	Start Year*	Number of Reportable Measures to State Agency
Florida	Medicaid (TANF, ABD), CHIP	752,000	1998	221
Georgia	Medicaid (TANF), CHIP	589,000	2008	78
Hawaii	Medicaid (TANF, ABD), Behavioral Health	48,000	2009	211
Illinois	Medicaid (TANF)	173,000	2005	78
Kentucky	Medicaid (TANF, ABD), CHIP	436,000	2013	84
Missouri	Medicaid (TANF)	107,000	2013	255
New Jersey	Medicaid (TANF, ABD, MLTSS)	60,000	2014	59
New York	Medicaid (TANF), CHIP	113,000	1994	105
South Carolina	Medicaid (TANF, ABD)	62,000	2014	62

**Start Year indicates the first year in which WellCare began submitting HEDIS data for the product line.*

SECTION IV.M QUALITY MANAGEMENT

76. Provide the MCO's vision for the MCO's Clinical Advisory Committee. Discuss how the requirements of the RFP will be met. *(Page limit 2 pages)*

WELLCARE'S CLINICAL ADVISORY COMMITTEE

WellCare's vision for our Heritage Health Clinical Advisory Committee reflects our commitment to developing strong local partnerships with Nebraska-based clinical experts who are experienced and knowledgeable about the health care needs and barriers to access among our members. With help from local clinical experts, we will design, develop, and implement effective and appropriate practice guidelines and policies and procedures that reflect the needs of our members and drive improved health outcomes. Specifically, we will convene an expert panel of **Nebraska-based clinicians representing a cross-section of providers in the fields of physical health, behavioral health and pharmacy** to help us ensure members receive the right care, at the right time and in the right setting.

Our Clinical Advisory Committee will provide rigorous peer review and feedback on proposed practice guidelines and our Care Management (CM) and Utilization Management (UM) policies and procedures. In doing so, we envision an engaged and active Clinical Advisory Committee who will help us improve quality of care and access to services to meet Nebraska's goals for Heritage Health, such as reducing non-emergency use of the emergency department, improving birth outcomes, and integrating prevention-focused physical and behavioral health services. To this end, we will outreach to state advocacy groups, community outreach groups, social services programs and provider associations in identifying a diverse array of clinicians to serve on the committee, including primary care and specialist physicians, nurse practitioners, pharmacists, psychologists, social workers and substance use disorder specialists. We will search for individuals who are familiar with the standards and practices of treatment across urban, rural, and frontier areas of Nebraska, including diseases and chronic conditions common in the Heritage Health population, conditions affecting aged, blind, and disabled members, and mental health and/or substance use disorder treatment for adults, children and adolescents.

Clinical Advisory Committee Responsibilities

Reporting to our Quality Assessment and Performance Improvement Committee (QAPIC), the Clinical Advisory Committee will provide input into all WellCare policies, procedures, and practices associated with CM and UM functions, including clinical and practice guidelines and UM criteria to ensure that they reflect up-to-date standards consistent with research, requirements for evidence-based practices, and community practice standards in Nebraska and consistent with the Department of Health and Human Services (DHHS), Division of Medicaid & Long-Term Care (MLTC) requirements. The Clinical Advisory Committee will be responsible for the following:

- **Practice Guidelines:** Our Clinical Advisory Committee will be an important review body to help WellCare ensure that our practice guidelines are based on valid and reliable clinical evidence or a consensus of health care professionals in a particular field. Prior to adoption by WellCare, we will ask our Clinical Advisory Committee to review and approve WellCare's initial practice guidelines and criteria as well as all significant changes to the guidelines thereafter.
- **Authorization Procedures:** WellCare will develop service authorization procedures with the input, review, and approval of the Clinical Advisory Committee. These procedures will be submitted to MLTC for review and approval, a minimum of 60 calendar days prior to the contract's start date.
- **Care Management Policies and Procedures:** With the input, review, and approval of the Clinical Advisory Committee, WellCare will annually review and update, as necessary, our CM policies and procedures. Once they are approved by the Clinical Advisory Committee, we will submit any proposed changes to MLTC for review and approval a minimum of 60 calendar days prior to intended

implementation.

- **QAPIC Reporting:** At least quarterly, the Clinical Practice Committee will report to the QAPIC and provide a summary of its work, concerns, recommendations, and activities.

Representation on the Clinical Advisory Committee

WellCare's Clinical Advisory Committee will be comprised of WellCare of Nebraska's medical director and individuals who care for children, adolescents and adults in Nebraska across a variety of ages and races/ethnicities, have an awareness of differences between urban, rural, and frontier populations and represent pharmacists, physical health providers, and behavioral health providers. Potential participants may be nominated by members of our Care Management department or providers can nominate themselves or peers. Information about the Clinical Advisory Committee will be available on WellCare's provider portal, in the provider handbook and in the provider newsletter. Providers may submit their nomination online or send an email to their provider relations representative to express interest in serving or to nominate another provider. Each nomination will be considered by the Utilization Management Committee (UMC). Every quarter, the UMC will review nominations for additions to the Clinical Advisory Committee as needed. The criteria considered will include provider geographic location (i.e. urban, rural, frontier), provider type (including pharmacists, physical health providers and behavioral health providers) and volume of WellCare membership in the provider's practice. The UMC will vote to accept or reject the nomination, and the nominee will be notified of the result by his or her provider relations representative. Participants will be time-limited up to two years but may reapply.

Clinical Advisory Committee Plan

WellCare will develop a Clinical Advisory Committee Plan that describes the committee's authority, scope, membership, staff support, and meeting frequency. We will submit our draft Clinical Advisory Committee Plan to MLTC for approval a minimum of 60 calendar days in advance of the committee's establishment.

Meeting Location, Frequency and Reporting

WellCare's Clinical Advisory Committee will meet quarterly. All committee participants will be reimbursed for time and travel costs. The locations of all meetings will be held in accessible facilities and refreshments will be provided. Additionally, we will invite participants to attend via webcast or by a toll-free teleconference line if that is their preference. Interpretation services will be available and we will make accommodations for individuals with communication support needs. Meeting minutes will be documented and reviewed/approved by committee members at the next meeting. Once approved, WellCare will provide copies of committee minutes to MLTC.

Collaboration with Behavioral Health Providers in Developing Guidelines

Example: WellCare of Kentucky

During 2013, providers from the WellCare of Kentucky's Behavioral Health Clinical Advisory Council participated with WellCare's Behavioral Health leadership team to develop a Clinical Care Guideline for the treatment of juvenile sexual offenders in Kentucky. As a result of network provider feedback, WellCare of Kentucky determined that applying evidenced-based national guidelines to the treatment of sexually reactive children for a sub-acute residential program in Kentucky was not effective. Ultimately, the project committee successfully developed an evidenced-based clinical care guideline to be used for initial and concurrent reviews to determine the medical necessity of residential treatment for youthful sexually reactive members. The guideline was approved by the Kentucky Department for Medicaid Services and the Kentucky Department for Behavioral Health, Developmental and Intellectual Disabilities.

SECTION IV.M QUALITY MANAGEMENT

77. Describe the MCO's practice of profiling the quality of care delivered by PCPs, specialists, and hospitals, including the methodology for determining which and how many providers will be profiled.

- Submit sample quality reports.
- Describe the rationale for selected the measures that are gathered/reported.
- Describe the proposed frequency of profiling activities.

(Page limit 3 pages, excluding sample quality reports)

PROVIDER PROFILING: IMPROVING OUTCOMES THROUGH ANALYTICS AND TECHNICAL ASSISTANCE

Provider quality of care measures are meant to collectively make care safe, timely, effective, affordable, and member-centered. To that end, WellCare uses provider profiling reports to increase provider awareness of performance, motivate providers to achieve measurable goals, identify best practices and improvement opportunities for providers, and facilitate collaboration in the development of clinical improvement initiatives. In doing so, we select measures that are based on nationally accepted measure sets, are recognized as clinically important, and are grounded in empirical evidence that demonstrates the measure provides stable and reliable information. We leverage our locally based provider relations representatives and our Clinical HEDIS® Practice Advisors (CHPAs) who routinely meet with providers to deliver profile reports and provide education and technical assistance in identifying opportunities and strategies for improving the quality of member care and reducing costs.

In the following response, we describe our experience and planned approach for profiling the quality of care delivered by Heritage Health primary care providers (PCPs), specialists and hospitals, including the methodology for determining which and how many providers will be profiled, the rationale for selected measures, and the proposed frequency of profiling activities. Additionally, we have included **Attachment 77a_FL Care Gap Report Example** and **Attachment 77b_OH Care Gap Report Example** to provide examples of quality reports we currently use.

Primary Care Providers

WellCare profiles PCPs by assessing their quality, cost and utilization performance. A Provider Profile that addresses HEDIS care gaps is prepared for each of our PCPs that care for a high volume of our membership in a state. Our local provider relations representatives and Clinical HEDIS® Practice Advisors (CHPAs) meet onsite with these high-volume network providers and their office teams, to deliver and review the Provider Profile reports and provide education and HEDIS technical assistance in identifying opportunities and strategies for improving the quality of member care and reducing costs. They review the Provider Profile with the PCP to identify areas of excellence and opportunities for improvement, as measured by HEDIS®, as compared to their peers as well as state and national benchmarks if available. Reports also include measures of inpatient, outpatient, emergency department utilization and costs, which can be rolled up and compared across physicians or at the physician group level. A report includes the PCP's compliance rate for HEDIS® measures that can be impacted by a PCP at the provider level. The report identifies members with a gap in care, such as a missed immunization or well-child visit. We provide regular on-site assistance to these providers, and ad hoc assistance via email or conference calls to strategize solutions to complex clinical issues and work towards resolution of HEDIS® deficiencies. We track the success of our interactions with the providers in closing gaps in member care by reviewing the data every month to determine compliant HEDIS® measures.

In order to enhance the support we offer our providers, WellCare is working to automate production and expand functionality of our Provider Profiles. We are building new reporting tools that will increase

utility and improved efficiency. Our expanded Provider Profile reports will include a greater emphasis on episodic, condition-specific reports. Episodic reporting will allow us to measure efficiency and effectiveness within a specified period of time, including gaps in care. The reports will integrate clinical and administrative (e.g. pharmacy, behavioral health, and medical claims) data to identify rates of gaps in care delivery, the average cost of care by episode, and measures of cost and quality performance.

WellCare's Quality Assessment and Performance Improvement Committee (QAPIC) will select Provider Profile measures to align with the Department of Health and Human Services (DHHS), Division of Medicaid & Long-Term Care (MLTC) Quality Strategy, including the PCP-influenced performance measures included in Attachment 7 of the Heritage Health MCO Request for Proposals (RFP). WellCare will also place a priority on selecting Provider Profile measures that are tied to our QAPI Program, performance improvement projects (PIPs), and other measures of cost, efficiency, and utilization of services such as non-emergent use of the emergency department, inpatient physical and behavioral health admissions and readmissions, and ambulatory care sensitive admissions.

Specialist Providers

Working in partnership with WellCare's Medical Economic department, several of WellCare's state health plans have experience developing and distributing risk-adjusted specialist Provider Profiles that analyze utilization rates such as visits, unit cost, and claims payments against state Medicaid and Medicare rates. The analyses are used to help specialists and our associates understand our operations and utilization patterns in order to address variation. The new tools that we are building to support PCP profiling, including quality and efficiency episodic reports, will also support our specialist providers. The output will allow specialists to compare practice patterns to determine if their efficiency is above or below specialty peers.

A Provider Profile will be prepared for WellCare's Heritage Health specialist providers that provide a significant proportion of visits within a given specialty per year. WellCare's QAPIC will select specialty specific measures based on MLTC's Quality Strategy, our QAPI Program, and planned PIPs.

Quality measures will be determined based on the extent to which the specialist has influence over performance on the measure. For example, obstetricians will receive provider profiles that include measures such as: live births weighing less than 2,500 grams (LBW), frequency of ongoing prenatal care (FPC), timeliness of prenatal Care (PPC), and behavioral health risk assessment (for Pregnant Women) (BHRA).

Hospitals

WellCare will develop Provider Profiles that are specific to Heritage Health hospitals in our network that serve a significant percentage of our inpatient admissions or outpatient visits. WellCare's QAPIC select profile measures based on MLTC's Quality Strategy, our QAPI goals, and each hospital's specific service lines. Hospital Provider Profiles may include such measures as inpatient mortality, ambulatory care sensitive admissions, readmissions, non-emergent use of the emergency department, follow-up after hospitalization by a PCP, follow-up after hospital for mental illness, and in-hospital complications and adverse events following surgeries, procedures, and childbirth. These data will provide a mix of insights about care within the hospital as well as insight into the community health care system and services outside the hospital setting.

Figure 12 summarizes WellCare's proposed approach to profiling the quality of care delivered by PCPs, specialists, and hospitals in Nebraska.

Figure 12

WellCare of Nebraska: Proposed Approach to Provider Profiling			
Profiling Reports			
Proposed Approach	**PCPs**	**Specialists**	**Hospitals**
Methodology for determining which and how many providers will be profiled	PCPs that care for a high volume of WellCare's Heritage Health membership	Specialists that provide a significant percent of WellCare visits within a given specialty per year	Hospitals that care for a significant percent of our inpatient admissions or outpatient visits
Rationale for selected measures	Based on MLTC Quality Strategy, measures included Attachment 7 of the Heritage Health MCO, WellCare QAPI Program, and PIPs	Based on MLTC Quality Strategy, measures included Attachment 7 of the Heritage Health MCO, WellCare QAPI Program, PIPs, and specialty specific quality of care measures	Based on MLTC Quality Strategy, WellCare QAPI Program, PIPs, and hospital-specific service lines
Proposed frequency of profiling activities	HEDIS reports: Monthly Episodic reports: At least every 6 months	HEDIS reports: Monthly Episodic reports: At least every 6 months	At least annually

Sample Quality Reports

See **Attachment 77a_FL Care Gap Report Example** and **Attachment 77b_OH Care Gap Report Example** for samples of WellCare's existing quality reports.

SECTION IV.M QUALITY MANAGEMENT

78. How will the MCO use the Member Advisory Committee to improve quality of care and direct quality and operational changes? What representation does the MCO plan to have on each committee (e.g., stakeholder types, from what geographic areas)? How will the MCO identify participants of the Member Advisory Committees? Provide examples from other states where the MCO has collaborated with members for program improvement. *(Page limit 5 pages)*

WellCare seeks to improve the health of our members and promote a patient-centered delivery system by building effective partnerships with the people we serve as well as our provider network and state and local advocates. We will leverage our experience convening member and provider advisory groups in other states to effectively solicit a diverse array of member and stakeholder feedback through a Nebraska-based Member Advisory Committee (MAC). The committee will provide a regular forum for our associates to learn about member needs, satisfaction, and quality of care. The feedback will drive our quality improvement strategies and provide an interactive venue to collaborate on enhancements to our programs and processes and create responsive changes that help us to better serve our Heritage Health members.

USING WELLCARE'S MEMBER ADVISORY COMMITTEE TO IMPROVE QUALITY AND OPERATIONS

Role of the Member Advisory Committee: Engagement

WellCare's Member Advisory Committee will be a forum for gathering feedback from members, members' representatives, providers, and advocates that reflect the diversity of WellCare's population and the communities we serve. The committee will be accountable to WellCare of Nebraska's Board of Directors and will serve as an important feedback loop for our Quality Assurance and Performance Improvement Committee (QAPIC), which has oversight of our quality improvement goals, Quality Assessment and Performance Improvement (QAPI) Work Plan, improvement projects, performance targets, and evaluation. Specifically, the Member Advisory Committee will provide input into the following areas:

- **Planning and Delivery of Services:** Committee members will be invited to discuss the quality of their customer experiences with WellCare and health care providers and help us identify root causes of barriers to receiving care as well as potential strategies for overcoming barriers. We will present the committee with data to show where and how members access care help us identify any gaps. We will also seek feedback on our efforts to coordinate and integrate prevention-focused physical and behavioral health services.
- **Quality Management and Quality Improvement Activities:** The Member Advisory Committee will discuss and provide feedback on the results of Consumer Assessment of Health Care Provider and Systems Survey (CAHPS®). They will also help us develop appropriate quality improvement projects and interventions.
- **Program Monitoring and Evaluation:** The committee will help us design, develop, and interpret the results of our program monitoring and evaluation efforts. Reports and documentation will be made available prior to the meetings, so participants can review and engage in productive dialog.
- **Member, Family and Provider Education**: WellCare will use the Member Advisory Committee to review and seek feedback on our outreach materials and processes, including our Member Handbook, website, member portal, newsletters, social media and other communication tools. We will seek input to ensure our materials are culturally competent, understandable and fully accessible, and address our members' health education and literacy needs and concerns.
- **Community Collaboration**: Participants will provide input and feedback on how we collaborate and communicate with community organizations regarding services and benefits.

Input we gather from the Member Advisory Committee will be invaluable in helping us shape improvements to programs, operations and quality of service. The committee's ideas and perspectives will be used to inform member outreach efforts, coordination with Heritage Health carve-out benefits, and other health and social services that require coordination improvements and have an impact on members' health and well-being. Feedback and suggestions from the Member Advisory Committee will be incorporated into our programs and policies through the QAPIC. The QAPIC directs and reviews WellCare's QAPI and Utilization Management activities, and has the authority to create and provide direction to work groups, committees, and departments within the health plan to assess, investigate, and take action related to the health care services received by members.

Information and insights gathered from the Member Advisory Committee will also be shared with members and providers through our website, member and provider newsletters and other forms of communication including our digital media strategies (i.e. Facebook, Twitter).

Member Advisory Committee Plan

Each year, WellCare will develop and implement a Member Advisory Committee Plan that describes the meeting schedule and the draft goals of the committee. Goals will include soliciting and understanding members' perspectives about improving the planning and delivery of services, quality of care, member satisfaction, member education and outreach, and community collaboration. We will submit our draft Member Advisory Committee Plan to MLTC for approval a minimum of 60 calendar days before the contract start date and annually thereafter.

Meeting Location and Frequency

WellCare's Member Advisory Committee will meet quarterly at rotating locations around Nebraska. We have implemented this rotating model in other states where participants often need to travel long distances to attend. This helps distribute the time commitment associated with travel. All MAC participants will be reimbursed for any travel costs. The locations of all meetings will be held in accessible facilities and refreshments will be provided. We will also offer transportation and attendant care services for members and members' representatives, if needed. Additionally, we will invite participants to attend via webcast or by a toll-free teleconference line if that is their preference. We will assist participants identify Internet access and webcast equipment by partnering with a local library, community action agency, or other community based organizations that may be able to provide the service. As necessary, we will also equip our geographically dispersed Welcome Rooms, which can also serve as convenient webcast sites. Interpretation services will be available and we will make accommodations for individuals with communication support needs.

Record Keeping and Reporting

Meeting minutes will be documented, reviewed and approved by committee participants at the next meeting. WellCare will report to MLTC on the activities of our MAC semi-annually. Our report will include the membership of the committee (name, address, and organization represented), a description of orientation and ongoing training activities for committee participants, and information about committee meetings, including the date, time, location, meeting attendees, and minutes from each meeting. WellCare will copy MLTC on all correspondence to the committee, including agendas and committee minutes. Minutes will include action items, status updates, and outcomes of the committee's initiatives.

REPRESENTATION ON MEMBER ADVISORY COMMITTEE

WellCare's Member Advisory Committee will include members, members' representatives, providers, and advocates that reflect WellCare's population and communities served. Our member selection process will focus on identifying a diversity of member perspectives, including members who live in different geographies (e.g. urban, rural, frontier), come from different cultural, ethnic, or tribal backgrounds, and who have varying levels of experience as WellCare members. We will seek representation from

transition-aged foster children, consumers with behavioral health conditions, members who are aged, blind or disabled, caregivers, and guardians of children with special health care needs. Committee membership is active for a period of one calendar year and is a voluntary duty. All MAC representatives receive a free gift for attending, which is typically a nominal gift card to a local restaurant.

IDENTIFYING MEMBER ADVISORY COMMITTEE PARTICIPANTS

WellCare will implement different strategies to identify Member Advisory Committee participants depending on whether we seek individuals who represent members and members' representatives, providers, or advocates. These processes are described below:

Members and Members' Representatives

Members and members' representatives will be chosen to participate on the MAC through a nomination and selection process. Potential MAC participants can be nominated by WellCare associates who interact most with members, including our case managers, member outreach personnel and community relations teams. Members may also be nominated by providers and advocates. We have recently expanded our MAC nomination process by educating members and members' representatives about the committee and encouraging self-nomination for members who would like to serve. We also use robust communication strategies that will include our website, member materials, internal communications and community events so staff can nominate members. Our Member Services staff will outreach to underserved groups representing the geographic, cultural, and racial diversity of our membership. We will outreach to state advocacy groups, community outreach groups, social services programs and provider associations in identifying a diverse array of participants to serve on the committee.

WellCare's MAC application will be available on our website, in the Member Handbook and at community events. Members and members' representatives can request an application by calling Member Services or they can request one from their case manager. Individuals who wish to participate on the MAC will complete an application and submit it by mail, fax, or online to our Member Outreach team. Applications are reviewed by the Member Advisory Oversight Committee, an internal cross-departmental committee, and selected participants are notified by telephone or mail that they have been selected to participate in the MAC.

Providers

Provider participants that will serve on the MAC will also be chosen through a nomination and selection process. Potential provider participants can be nominated by members of our Provider Relations team or providers can nominate themselves or peers. Information about the MAC will be available on WellCare's provider portal, in the Provider Handbook and in the Provider Newsletter. Providers may email their provider relations representative to express interest in serving on the MAC or to nominate another provider. The Provider Service team will also be able to refer interested providers to their provider relations representatives.

Each nomination will be considered by an internal, cross- departmental committee that includes our medical director, Network Management leadership, a quality representative, a health services representative and a behavioral health representative. Every quarter, the committee will review nominations for additions to the MAC as needed. The criteria considered will include provider geographic location (i.e. urban, rural, frontier), provider type (emphasis on primary care providers (PCPs) and pediatricians), and volume of WellCare membership in the provider's practice. The committee will vote to accept or reject the nomination, and the nominee will be notified of the result by his or her provider relations representative.

Advocates

WellCare has historically received feedback from advocates and community-based organizations (CBO) through our Health*Connections* Councils, which are community-focused planning councils that focus on

issues affecting the social safety net and its viability and sustainability. While we plan to implement our Health*Connections* Councils in Nebraska, we are expanding our MAC model to include advocates and CBO representatives. We will select advocates and CBO representatives who do not contract with us to provide covered services, but who are important to the health and well-being of our members. CBO organizations that we expect may participate on MAC include the Crisis Center, which has provided advocacy to the survivors of domestic violence and sexual assault for over thirty years in Central Nebraska, the Nebraska Children and Families Foundation, Community Action Agencies, Appleseed, and Voices for Children in Nebraska. CBO representatives who wish to participate in the MAC complete an application and submit it via fax, mail, or online to the Member Outreach team. The applications are reviewed by an internal committee and CBO representatives are notified by telephone or mail writing that they have been selected to participate in the MAC.

Participant Orientation and Training

WellCare of Nebraska will provide an orientation and ongoing training for Member Advisory Committee members so that they have sufficient information and understanding of the managed care program to fulfill their responsibilities.

EXAMPLES FROM OTHER STATES

WellCare's affiliate plans in other states have effectively used the feedback from Member Advisory Committees to improve quality of care and plan operations.

Hawai'i: 'Ohana Health Plan

Our affiliate in Hawai'i, 'Ohana Health Plan, used feedback from its MAC to design a program to increase breast cancer screenings. Cultural sensitivities and discomfort had made it difficult for many women to seek out mammograms, and the MAC feedback brought that to light. The resulting "Mammo Me, Mammo You" Program to Increase Breast Cancer Screenings is operated in partnership with Queen's Medical Center's Women's Health Center. The purpose of the program is to educate members on the importance of breast cancer screenings, alleviate any fears they may have, and assist in scheduling a mammogram. One day a month is designated at Queen's Medical Center Women's Health Center for 'Ohana members to come in and receive education on breast cancer screenings, instruction on how to perform self-exams, and have a mammogram performed in a relaxing atmosphere. Initial success of this initiative led 'Ohana to perform further data analysis on member demographics to identify the area of the state with the largest volume of members with breast cancer screening care gaps and to expand the program. 'Ohana's HEDIS® rate for the Breast Cancer Screening measure subsequently increased, showing significant improvement between 2011 and 2013.

WellCare's Proactive Outreach

"After meeting with WellCare and learning more about how the organization supports its members, their families and the community-at-large, I would like to extend Nebraska Children and Families Foundation's support for WellCare's bid submission."

Jennifer Thielen
Associate Vice President of Strategic Partnerships
Nebraska Children and Families Foundation

WellCare of Georgia

WellCare of Georgia and the state's Department of Community Health (DCH) share the priority of increasing primary care services to improve health outcomes and decrease emergency department utilization. In 2014, WellCare asked MAC representatives how it could better educate members about the importance of a PCP and establishing a medical home. The members recommended WellCare conduct member orientations to educate members on:

- The roles, responsibilities and benefits of a medical home
- The role of a PCP

- How to get the most out of their coverage

In response, WellCare developed a strategy to implement member orientations throughout Georgia. We developed a presentation that addresses the topics suggested by the MAC and use our Community Outreach team to facilitate the orientation sessions for members. Community Outreach and Member Retention staff coordinate and facilitate local sessions in locations throughout the state. We assess effectiveness of the education by conducting exit surveys and compiling real-time feedback. We also asked our Georgia members what more we could do to encourage them to receive necessary preventive services. Giving gift cards to members who receive the recommended services was a very popular recommendation. As a result, we developed our Healthy Rewards Program, and conducted a pilot of the program in 2014. Based on the success of the pilot, we are re-launching the Healthy Rewards Program, and will reward members who complete specific preventive health, wellness and engagement milestones with a Healthy Rewards reloadable debit card. Members will receive the debit card upon completion of their health risk assessment, a PCP visit within their first 90 days of enrollment, and key screenings and immunizations.

SECTION IV.M QUALITY MANAGEMENT

79. Describe the information the MCO will provide to members and providers about the QAPI program. *(Page limit 2 pages)*

ENGAGING MEMBERS AND PROVIDERS ON WELLCARE'S QAPI PROGRAM

WellCare seeks to improve the health of our members by engaging members and providers in achieving the goals of our Quality Assessment and Performance Improvement (QAPI) Program. To achieve this goal, WellCare pursues proactive education, outreach, follow-up, and incentives delivered through a variety of channels targeting members and providers. These engagement efforts drive our quality improvement strategies and provide opportunities for members and providers to help us continually improve and refine our QAPI efforts in response to changing needs, as further described below:

Communicating QAPI Information to Members

WellCare employs multiple mechanisms specifically designed to help members understand our QAPI Program and empower them to navigate the health care system and improve their health. Member education regarding our QAPI Program begins when the member joins WellCare and continues for as long as she or he is enrolled with us. It extends beyond the distribution of required information to include both broad-based and targeted outreach campaigns, as described below:

- **Welcome Call:** All new members, including reinstated members, are automatically scheduled for a welcome call within 15 business days of the date we send a welcome packet. The welcome call is our first opportunity to engage and educate members on our QAPI-related goals. The calls include a health risk screening (HRS) to identify health conditions, pregnancy, or the need for care coordination services. Before completion of the HRS, the member is given the opportunity to be transferred to a Member Service associate to discuss any health issues of concern or to have any other questions answered.
- **Member Newsletter:** Our quarterly newsletters educate members on a variety of health, wellness, benefits and requirements of the plan including helpful suggestions for self-care, stress management, and brief screening tools for problems such as depression or substance use disorders. WellCare uses its newsletters as an outreach tool to inform members of our ongoing QAPI goals, efforts, and performance improvement projects.
- **Member Handbook:** Our new member packet contains information on a variety of QAPI-related topics including information about preventive health guidelines and recommended screenings, diagnostic and immunization schedules.
- **Healthy Rewards:** WellCare's Healthy Rewards Program rewards members who complete specific preventive health, wellness and engagement milestones with a reloadable Healthy Rewards debit card. Specific Healthy Rewards activities and services with incentives are an outgrowth of our QAPI Program. The Healthy Rewards debit card is credited with dollars upon completion of specific activities and services. Members receive information on our Healthy Rewards Program through the Welcome Call and Member Handbook.
- **Digital Media:** We also outreach to our members through our secure member web portal, Facebook, Twitter and YouTube. Through these channels, we regularly communicate information regarding QAPI Program efforts and ways to empower members in their own health outcomes.
- **Welcome Rooms:** Our Welcome Rooms, strategically located in neighborhoods and communities where members live, work, and frequent, are equipped to function as outreach centers and walk-in member service hubs. Here members and families can meet face-to-face with a WellCare associate and receive personalized attention to their needs. Ongoing QAPI education will be available through monthly classes. At least one daytime and one evening class will be held per month. Our welcome

rooms will provide an ideal opportunity for members to learn more about the Heritage Health Plan and receive information on important health topics.

- **Mobile Device Application:** Our mobile application for smartphones and mobile devices, "MyWellCare," provides friendly, timely alerts when members are due for wellness services or checkups. The application enables us to send messages to members about important, time relevant QAPI-related items – like reminders about flu shots and wellness visits.
- **Health Fairs:** WellCare's Community Relations staff will attend and participate in health-focused events to share information, resources and education concerning a variety of QAPI health topics such as diabetes management, back-to-school health, the importance of physical activity and general overall health and well-being.
- **EPSDT Periodicity Letters:** Early and Periodic, Screening, Diagnostic, and Treatment (EPSDT) periodicity letters will be mailed to children from birth to age 21 on their birthday month with a reminder of age appropriate preventive care services.

Communicating QAPI Information to Providers

Upon joining our network, WellCare's providers and their office staff are educated about our QAPI Program and their roles and responsibilities with respect to access and quality of care standards. We also provide ongoing provider education and training, including 60 days prior to the start of any new program, PIP, or service. Most training includes a review of provider responsibilities and the provider requirements regarding supervision and coordination of care for members. Outreach efforts include the following:

- **Provider Newsletter:** We will distribute a Nebraska-specific quarterly newsletter to participating providers addressing a wide variety of QAPI topics, including annual QAPI goals, measures, and performance improvement projects.
- **Provider Manual:** Our provider manual is available in hard copy, digital and web-based formats. We update it annually to include a description of our QAPI Program, quality of care measures, and performance improvement projects.
- **Provider Website/Portal:** Our secured environment for the provider website, requiring login and password credentials, gives our providers an opportunity to access various easy-to-use tools to obtain QAPI-related information, clinical practice guidelines, and perform day-to-day tasks. It includes member-level information about specific screenings, immunizations and overdue services. It also includes an Interactive HEDIS Online Portal Training module to facilitate provider education.
- **Clinical HEDIS Practice Advisors:** Our Nebraska-based Clinical HEDIS Practice Advisors (CHPAs) are dedicated staff who delivers education and consultation to providers and provider practice sites on a number of QAPI preventive and chronic health management measures including immunizations and well-child/well-care checks. They assist provider offices with barrier analysis and developing strategies to improve compliance within the practice.
- **Provider Care Gap Reports:** Provider Care Gaps Reports are an internal web based tool that can be used by associates to help identify member gaps in care. Clinical HEDIS Practice Advisors (CHPAs) and Provider Relations (PR) Representatives use the care gap reports to help provide education and outreach to provider offices in an effort to ensure members are receiving the preventive services they need. Provider Care Gaps Reports have been in use at WellCare since 2007 for provider educational purposes. Providers can use the care gap reports shared with them by WellCare associates in conjunction with the provider portal to identify and close individual member care gaps.

SECTION IV.N UTILIZATION MANAGEMENT

80. Describe the MCO's approach to utilization management, including

- Innovations and automation the MCO will use for its UM program.
- Accountability for developing, implementing, and monitoring compliance with utilization policies and procedures, and consistent application of criteria by individual clinical reviewers.
- Mechanisms to detect and document over- and under-utilization of medical services.
- Processes and resources used to develop and regularly review utilization review criteria.
- How the MCO will use its UM Committee to support UM activities.

(Page limit 5 pages)

HELPING MEMBERS GET THE MOST APPROPRIATE CARE: WELLCARE'S APPROACH TO UTILIZATION MANAGEMENT

WellCare's extensive conversations in Nebraska have made clear that the State is serious about changing health care for the better for Nebraskans. The effort through Legislative Resolution (LR) 22/422 illustrates the State's forward-thinking approach to health care transformation and the eight building blocks emerging from the LR22/422 work group provide a useful roadmap for Medicaid managed care organizations like WellCare. As a managed care organization with more than 20 years of experience providing utilization management (UM) services for Medicaid enrollees, we are confident in our ability to advance the State's priorities and support achievement of the eight building blocks.

Our UM program is designed to serve Medicaid members across a variety of program categories and reflects Medicaid members' unique circumstances, often including a highly-complex and diverse combination of medical, behavioral, and socio-economic needs. Our UM activities have several key components, including, but not limited to the following areas:

- Evaluation of medical necessity of health care services according to established criteria and practice guidelines to ensure that the right amount of services are provided to members when they need them
- A focus on individual and system outliers to assess if individual members are meeting their health care goals and if service utilization across the system is meeting the goals for delivery of community-based services
- Compliance with Federal utilization control requirements, including the certification of need and recertification of need for continued inpatient settings, including psychiatric residential treatment facilities, and as described in 42 CFR 438
- Requirements for inpatient hospital providers to comply with Federal requirements regarding UM plans, UM committees, plans of care, and medical care evaluation studies, as described in 42 CFR 44, 455 and 456
- Strict processes to ensure our program does not structure compensation to individuals or entities that conduct UM activities to provide incentives for the individual or entity to deny, limit, or discontinue medically necessary services to any member, as described in 42 CFR 210(e)
- Active monitoring of Federal and State Medicaid regulations for updates and changes
- Monitoring of all UM activities for compliance with Federal and State Medicaid regulations

Our fully integrated member-centered UM program assesses needs on a case-by-case basis to ensure every member has the opportunity to receive the most effective and appropriate services in the least restrictive settings of their choice. Serving millions of Medicaid members across the country, we have built our UM framework on six guiding principles (outlined below) that are integrated within and

reinforced throughout our systems, processes, policies and staffing.

- **Effective:** The criteria and processes by which we evaluate requests for services are based on current scientific, evidenced-based guidelines with proven results in improving clinical outcomes
- **Safe:** We manage and coordinate utilization of services with an aim of connecting members to care which is helpful and not harmful
- **Timely:** We aim to prevent unintended delays, and we monitor our staff and processes to ensure accessibility and promptness consistent with our members' health needs
- **Efficient:** We seek to reduce waste by creating value, monitoring health outcomes relative to cost, and minimizing errors. We also continually apply process improvement methodologies
- **Equitable:** We establish safeguards to assure that our members, regardless of diagnosis, race, age, ethnicity, primary language or socioeconomic status, receive appropriate, high quality care
- **Person-Centered:** We connect members with culturally, socially and linguistically-appropriate physical and behavioral health care that empowers health care decision-making accountability

INNOVATIONS AND AUTOMATION: THE FOUNDATIONS OF WELLCARE'S UM PROGRAM

Our UM programs feature an array of innovations and automation, each reinforcing one or more of the pillars identified above. Highlights from our UM program include:

- **WellCare's Medical Management Platform (MMP):** Our MMP is a fully-integrated system that supports the evaluation of medical and behavioral service requests to ensure they are appropriate and medically necessary. As a person-centered platform, it enables care integration and continuity of care among all places of service and levels of care and provides a 360-degree view of our members including member demographics, provider assignments, care gaps, actual cost of care, and medical, behavioral health, pharmacy and lab utilization. Our MMP features automatic data integration from our web-based authorization tool and enables us to:
  - Maintain a comprehensive health record for all medical, behavioral and pharmacy claims
  - Create and maintain comprehensive discharge plans, including extending the discharge plan to key providers and care managers, where applicable
  - Manage authorizations and utilization
  - Support safe, efficient transition of members across levels of care
- **WellCare's Proprietary Drug Evaluation Review (DER) Workflow System:** WellCare has made significant investments in pharmacy prior authorization technology and processes, including our proprietary, role- and task-based Drug Evaluation Review (DER) workflow system. The systems and processes allow us to track and process DER requests, including prior authorizations and formulary exceptions, in a timely manner and in accordance with contract requirements.
- **WellCare's Gold Card Program:** We are evolving our UM program toward a shared-decision support model with our contracted providers. Using objective clinical quality and cost data, we identify providers delivering high-quality care and effective treatment planning and apply a special designation that allows them to follow modified UM protocols for their WellCare patients. This model empowers providers to self-manage while ensuring quality of care for our members, driving efficiencies in our UM program, and providing for a more focused review of providers not meeting quality and utilization goals.
- **WellCare's Provider Portal:** Our web-based, user-friendly Provider Portal enables access to data, information and systems thereby reducing the administrative burden on providers and their office staff. Providers can access our interactive Authorization Look-Up Tool, submit authorization requests online, access clinical practice and clinical coverage guidelines, view provider-specific utilization reports and access relevant administration forms, among other functions.
- **Health*Connections*:** Our award-winning, proprietary model, Health*Connections*, aims to improve the

health and vitality of our members and communities by supporting the social safety net of community resources that help our members solve for social determinants of health. The model identifies available social safety net providers across the state (such as housing assistance or food banks), assesses existing and potential gaps in the social safety net network, targets supports – financial and technical – based on measured needs identified by and in partnership with local communities, makes those resources available to members and tracks outcomes of those services. The model includes a catalogue of community-based programs and services plus mechanisms to connect members to these resources along with community planning councils and a granting program.

Accountability for Developing, Implementing and Monitoring Compliance with Utilization Policies and Procedures, and Consistent Application of Criteria by Individual Clinical Reviewers

Accountability for ensuring appropriate and consistent application of criteria begins upon employment. Upon hire, all clinical services staff responsible for medical necessity reviews complete a two week orientation followed by four weeks of classroom-based, instructor-led training. Orientation and training includes an overview of the Medicaid program, social determinants of health, an organization and department overview, education on department terminology, training on application of the varying clinical guidelines described above, benefit coverage, modules on care management resources and processes, grievance and administrative review training, HEDIS® care gap education, and all of the WellCare management information systems they will leverage, including the MMP as well as the authorization process, both expedited and standard. We include InterQual Training Modules in our training curriculum. All materials associated with this module are certified for InterQual training and the training is facilitated by InterQual Certified Instructors, of which we have nine in-house. Following the six week orientation and training, associates undergo preceptor training for up to 80 days depending on their previous work experience, performance in training, and demonstrated proficiency. Ongoing education is provided regularly to maintain and improve skills and competency in performing job functions.

Following training, newly hired UM associates are subject to routine compliance assessments to ensure appropriate review completion, including timeliness, case notes, evaluation criteria, and notifications. Additionally, we perform ongoing audits of clinical documentation and review decisions of all UM staff throughout the year to ensure accurate and consistent application of clinical criteria. As training and education are ongoing processes, WellCare provides its clinical reviewers with scheduled case studies to review and complete throughout the year. These case reviews reinforce our commitment to inter-rater reliability to proactively track and monitor decision making that is both consistent and evidence-based.

Our commitment to ensuring consistent application of criteria is further demonstrated through our independent Clinical Service Compliance (CSC) unit within Quality Management. The CSC monitors UM staff performance in meeting contractual requirements and member needs in medical necessity reviews. Each month the CSC team of licensed, clinical staff (i.e., registered nurses, licensed practical nurses, licensed clinical social workers) review a random sample of medical and behavioral health UM files for contractual standards such as turnaround times, member and provider notifications, and notification letter content. The reviewer assesses member experience and outcomes by evaluating important elements of needs assessment, discharge planning, member engagement, care coordination, and follow up for goal achievement. UM teams who are responsible for identifying opportunities for improvement and taking action receive summary reports, including staff training and coaching.

WellCare also conducts online inter-rater reliability (IRR) testing, using a commercially-available IRR product, for all clinical review staff involved in utilization decisions. The staff completes the interactive assessment through a variety of case scenarios for their respective areas of focus (i.e., behavioral health, durable medical equipment) and must assess if the services are to be approved or denied. All tested must achieve at least 85 percent on their IRR assessment. Those scoring less than 85percent undergo training, coaching, and additional oversight until they achieve desired performance expectations. Continued poor

performance results in additional disciplinary action including termination of employment. ***In 2014, our utilization management staff achieved an average score of 94.6 percent on their annual IRR testing. Our medical directors had an average score of 96 percent for the same time frame.***

Detecting and Documenting Over- and Under-Utilization of Medical Services

Using our rigorous retrospective review process we systematically and objectively examine trends, issues, and problems in utilization across physical health, behavioral health, and pharmacy services with the goal of improving health outcomes, increasing access to comprehensive health services, enhancing quality of care and reducing the rate of costly and avoidable care. The following represent key activities designed to identify and address potential over- and under-utilization of medical services.

- **Examining Utilization Management and Cost-of-Care Trends:** Each month, our Medical Economics team produces and analyzes a variety of utilization reports that use authorization, claim and encounter data to systematically identify and address emerging trends or changes in utilization patterns. The reports include, but are not limited to, admits per thousand by type (medical/surgical, deliveries, NICU, psychiatric), days per thousand by type, C-section rate, NICU average length of stay, catastrophic rate, readmit rate, and emergency department usage by provider, member, hospital and diagnosis. Our State Medical Directors, or their designee, contact outlier providers to address the specific issues identified and review clinical guidelines. The utilization data is reported to the Utilization Management Committee (UMC) where they discuss trends and potential interventions.
- **Examining Pharmacy Utilization and Quality of Care Trends:** Our retrospective drug utilization reviews (rDURs) are executed with routine examination of claims data and other records, through computerized drug claims processing and information retrieval systems to assess the clinical quality of prescribing and dispensing of our formulary medications. Our rDURs identify patterns of fraud, abuse, gross overuse or inappropriate or medically unnecessary care among physicians, pharmacists, and members associated with specific drugs or groups of drugs. For example, our Pharmacy team identified a pattern of under-utilization of chronic inhaled corticosteroid (ICS) inhalers among members using short-acting beta agonist (SABA) inhalers. The team implemented provider-directed interventions aimed at improving the use of ICS inhalers consistent with clinical guidelines. ***Post-intervention, more than 8 percent of members identified in the initial measurement had a claim for an ICS inhaler, suggesting the intervention was effective in improving prescribing patterns.***
- **Pharmacy Network Improvement and Pharmacy Toolbox Reports Detect Inappropriate Use of Services:** Our proprietary Pharmacy Network Improvement Program reports identify potential over and under-utilization opportunities so that we can reinforce clinical guidelines and cost-effective therapeutic options. Similarly, on a monthly basis our Pharmacy team uses these reports to monitor and measure prescribing patterns and usage for a variety of pharmacy-related measures. The reports display utilization, drug evaluation review, and physician data by state.
- **Examining Trends with Adherence to Guidelines:** We regularly evaluate utilization of recommended preventive services, chronic disease management services, and acute care. We systematically mine membership data to identify trends in adherence to recommendations. Provider performance reporting and provider profiling is also reported via the Provider Portal.
- **Focused Medical Record Review Audits:** Annually our Quality Improvement department conducts medical record reviews on a random sample of charts from primary care providers. This audit assesses physician compliance with recommendations from preventive health and clinical practice guidelines. We also assess and trend provider compliance with guidelines through annual administrative data and medical record reviews for HEDIS. Areas of under- and over-utilization with related quality issues are referred to the Medical Director for the peer review process.

WellCare's Processes and Resources to Develop and Review Utilization Review Criteria

By applying actionable, evidence-based review criteria, we enable better health outcomes and optimize

UM decisions, support appropriate care, manage medical costs and foster appropriate use of resources. Our collection of criteria includes

- InterQual® Guidelines
- Behavioral Health Guidelines
- Pharmacy Guidelines
- eviCore® Guidelines
- Apollo Guidelines
- Hayes Health Technology
- Medicare Coverage Determinations
- Preventive Health Guidelines
- Clinical Coverage Guidelines

We maintain a formal process for developing and reviewing criteria that includes a systematic needs assessment, development and adoption, implementation and dissemination, as well as monitoring. WellCare's Medical Policy (MPC) and Pharmacy and Therapeutics (P&T) Committees are responsible for developing, implementing, and maintaining review criteria. MPC and P&T routinely analyze a variety of data sources including UM data (authorizations, denials, new technologies and medications, and new drug indications) to identify the need for criteria. They also use feedback and requests from our staff and contracted physicians, providers, and pharmacists as a method of identifying a need for criteria.

Once a need is identified, MPC and P&T each evaluate available criteria. If available and appropriate, our preferred approach is to adopt nationally-recognized criteria as this prevents providers from receiving conflicting information. If criteria do not exist or are insufficient, MPC or P&T commission the development of criteria or review guidelines.

Review criteria and guidelines are subject to intense review by our staff and by the respective MPC or P&T Committee. Once approved, the guidelines are submitted to our local UMC for review and approval. UMC is a multidisciplinary committee comprised of network providers.

WellCare's UM Committee: Supporting our UM Activities

WellCare's UMC is a subcommittee of the Quality Assurance and Performance Improvement Committee (QAPIC) and is responsible for promoting the delivery of quality clinical services for our members and assuring efficient and appropriate utilization of health care services. Our UMC, chaired by our local Medical Director, is responsible for the day-to-day operation and organization of the UM function including standards or practice, practice guidelines, prior authorization rules, review criteria (including the consistent application of), health care trends, and cost of care. Our UMC is a vital avenue through which network providers offer recommendations regarding our UM processes and performance improvement. **Figure 1** below describes UMC composition and functions.

Figure 1

UTILIZATION MANAGEMENT COMMITTEE		
▸ Medical Director (Chairperson) ▸ Network Physicians (Family Practice, OBGYN, Pediatrics) ▸ Provider Relations ▸ Utilization Management	▸ Specialty Provider (General Surgery, Cardiology, Pulmonology, Psychiatry, Endocrinology, Orthopedics, Neonatology) ▸ Member Services ▸ Pharmacy Services	▸ Provider Services ▸ Care Management ▸ Quality Improvement ▸ Claims ▸ Administrative Assistant
Activities and Functions		
▸ Annually reviews and evaluates the performance of the UM program ▸ Facilitates communication with network providers regarding the UM program and UM issues ▸ Provides oversight of grievances and the Appeals Committee and its processes ▸ Annually reviews and approves implementation of objective review criteria and guidelines ▸ Annually reviews and approves of the UM work plan and submission of same to the QAPIC ▸ Monitors provider requests for services authorizations ▸ Monitors medical appropriateness and medical necessity of services provided to members ▸ Reviews effectiveness of UM review process; makes changes to process as needed ▸ Ensures UM policies and procedures conform to industry standards		

SECTION IV.N UTILIZATION MANAGEMENT

81. Describe the process the MCO will have in place to determine appropriate practice guidelines (including for behavioral health), notify providers of new practice guidelines, and monitor implementation of those guidelines. *(Page limit 2 pages)*

WELLCARE'S GUIDELINES DRIVE CONSISTENCY IN CLINICAL DECISION-MAKING, IMPROVED HEALTH OUTCOMES, AND REDUCED BURDEN OF DISEASE

WellCare's practice guidelines eliminate uncertainty about practice standards by identifying and documenting diagnostic, treatment, and preventive services that work best for members in various circumstances. Our guidelines are based on valid and reliable clinical evidence or a consensus of health care professionals, providing for uniform, population health recommendations, while considering the needs of our members, including children with serious emotional disorders and adults with serious and persistent mental illness. Our collection of practice guidelines are developed in accordance with 42 CFR 438.236(b)-(d) and includes:

WellCare's Extensive Library of Practice Guidelines

WellCare has implemented more than 540 practice guidelines for behavioral health, physical health, and pharmacy services.

- **14 behavioral health guidelines** for conditions ranging from Attention Deficit and Hyperactivity Disorder (ADHD) to Bipolar Disorder to Schizophrenia
- **29 physical health guidelines** for conditions ranging from asthma to sickle cell disease
- **More than 300 pharmacy guidelines**
- **More than 200 clinical coverage guidelines** for medical necessity of procedures and technologies

Our guidelines are a cornerstone of our physical, behavioral, and pharmacy clinical service operations informing and influencing our utilization and care management activities, member and provider education, and service coverage among others. Given their importance, we maintain a formal process for determining the need for practice guidelines, notifying providers of the guidelines, and monitoring implementation. Our framework includes a systematic needs assessment, development and adoption, implementation and dissemination, and monitoring.

Our Systematic Process to Determine the Need for Clinical Guidelines

WellCare's Medical Policy (MPC) and Pharmacy and Therapeutics (P&T) Committees are responsible for identifying the need for behavioral and physical guidelines and pharmacy guidelines, respectively, as well as for developing, implementing and maintaining these guidelines. MPC and P&T routinely analyze utilization management data including authorizations, denials, and readmissions and clinical outcomes data to identify the need for guidelines. In addition to the data analysis, the Committees monitor new technologies, new drugs, new drug indications, and new treatment modalities to identify the need for guidelines. Lastly, MPC and P&T also use feedback and requests from our staff and our contracted physicians, health care providers, and pharmacists as a method of identifying a need for guidelines.

Our Approach to Developing and Implementing Valid, Reliable Clinical Guidelines

Once a need is identified, MPC and P&T, respectively, evaluate available guidelines and criteria in consultation with participating health care professionals. If available and appropriate, our preferred approach is to adopt nationally-recognized guidelines as this prevents providers from receiving conflicting information. If, however, guidelines do not exist or are insufficient, MPC or P&T develop internal guidelines and decision tools. In our affiliate Medicaid plans, we have had success collaborating with other managed care organizations and the State Medicaid agencies in the development of guidelines.

Once guidelines are drafted, we subject them to extensive review, first, internally by our specialized staff and then through our MPC and P&T Committees. Once approved, the guidelines are submitted to our local Utilization Management Committee (UMC) for review and approval. Through UMC, providers actively participate in the review and approval of our guidelines and criteria. In addition, WellCare commits to submitting guidelines to our Nebraska Clinical Advisory Committee. Like the UMC, P&T is comprised of independent practicing physicians and pharmacists. Once approved and implemented, existing guidelines are regularly reviewed in accordance with the specific guideline policies and review schedule, or as frequently as necessary given changes from professional societies and oversight bodies.

Our Multi-faceted Approach to Inform and Educate Providers of Clinical Guidelines

Implementation of new guidelines must include the use of multiple strategies of education and outreach, and providers must be given technical assistance and resources to successfully implement the guidelines. The tactics we use include distributing guidelines through our provider portal and reinforcing with affected providers through authorization decisions and patient-centered care plans. Other tactics include integration of guidelines into our clinical systems and processes, staff training, provider orientations where we review available guidelines and online resources, changing utilization management protocols (i.e., prior authorization, limits on service, step therapy), changes in reimbursement, provider incentives, and concurrent feedback through clinical staff and Medical Directors.

Monitoring Implementation of Guidelines to Drive Transformation of Clinical Practice

WellCare has significant experience monitoring provider practice patterns to ensure providers adhere to practice guideline recommendations. Annually, our Quality Improvement department conducts medical record audits on a random sample of charts from primary care providers to assess provider adherence with practice guidelines. Additionally, we assess provider adherence with guidelines through annual administrative data and medical record reviews for HEDIS. Results of these audits, along with the resulting corrective action plans are reported through the Quality Assurance and Performance Improvement Committee and UMC.

WellCare's Pharmacy Toolbox Reports and Pharmacy Network Improvement Program (NIP) reports are also used to monitor implementation of guidelines. Our Toolbox Reports identify negative trends among prescribers across 12 clinical categories including Hepatitis C, ADHD, and others, and identify specific prescribers for education and training. These reports are used by our local Medical and Pharmacy Directors during one-on-one meetings with prescribers and are distributed through our Provider Portal. Our NIP Reports are designed to identify prescribers based on pharmacy utilization and cost trends as well as quality care gaps related to medication prescribing and adherence. Our local Pharmacy Directors use these prescribing reports to modify prescribing behaviors by promoting quality evidence-based drug therapy and best practices through face-to-face as well as telephonic communication with our providers.

DRIVING IMPROVED CLINICAL PRACTICE

A Success Story from WellCare's Georgia Affiliate

In Georgia, we identified significant opportunities to improve follow-up care for children prescribed ADHD medication for both the initiation and continuation phases. By implementing formal guidelines and conducting ongoing, targeted provider and member outreach, we have consistently increased the percentage of members who had one follow-up visit with the prescribing authority during the 30-day initiation phase from 39.39 percent in 2013 to 48.92 percent in 2015. Similarly, we increased the percentage of members of the same age group who, in addition to the visit in the initiation phase, had at least two follow-up visits with a practitioner within 270 days after the initiation phase ended from 53.10 percent in 2013 to 63.78 percent in 2015. Our affiliate plan in Kentucky produced similar improvements during the same timeframe. Our Kentucky plan increased the percent of members with an initial visit from 50 percent in 2013 to 61.49 percent in 2015 as well as the percent with the follow up visits from 20 percent in 2013 to 69.62 percent in 2015.

SECTION IV.N UTILIZATION MANAGEMENT

82. As one of the largest payers in Nebraska, MLTC has an important role to play to move the health care system to a more cost-effective model that improves outcomes. Provide specific initiatives the MCO will pursue to deal with "waste" in the existing system and improve outcomes. Provide specific information regarding the initiatives that will be pursued to improve quality and enhance cost containment (including the stakeholders involved, the timelines, and the desired outcomes). *(Page limit 4 pages)*

UNMATCHED EXPERIENCE IMPROVING HEALTH OUTCOMES AND COST IN MEDICAID

Today, we serve 2.4 million Medicaid members in nine states across 53 Medicaid, LTSS, and related products for eligibility groups including home and community-based services waiver, Foster Care, Children's Health Insurance Programs, Temporary Assistance to Needy Families, supplemental security income, and long-term services and supports. As an organization dedicated solely to improving the health and lives of members enrolled in government programs with a focus on low income and underserved participants, our technical expertise in product development, administrative processing, utilization management (UM), care management, and information technology systems is strong and focused precisely on optimizing health outcomes and eliminating waste. We are confident there is no managed care organization better positioned to help the State move the health care system to a more cost-effective model that improves outcomes than WellCare of Nebraska.

Figure 2

EXAMPLES OF INITIATIVES TO ELIMINATE WASTE
Preventing Inappropriate Use of Services
➢ **Emergency Department Diversion Program**
➢ **24-Hour Behavioral Crisis Hotline**
➢ **Pharmacy Network Improvement Program & Toolbox**
➢ **Medication Therapy Management Program**
➢ **Suboxone Utilization Review**
➢ Medical Cost Reviews
➢ Hospital Observation Stays
➢ Pharmacy Lock-In
➢ Focused Homeless Initiative
➢ Cobalt Therapeutics
➢ Healthy Rewards
➢ Prenatal Care Management
➢ Diabetes Telemonitoring
➢ Special Investigations Unit (SIU)
Eliminating Waste Related to Administrative Processes
➢ **Gold Card Program**
➢ Provider Portal
➢ Member Portal
➢ MyWellCare Mobile App
Preventing Waste Due to Mistakes and Defects
➢ **Pharmacy Prior Authorization Technology**
➢ Medication Reconciliation Pre-Hospital Discharge

PROPOSED INITIATIVES TO IMPROVE QUALITY AND ENHANCE COST CONTAINMENT FOR NEBRASKA

Healthcare "waste" can be widespread and varied ranging from inappropriate use of services – both over- and under-utilization – to delays, duplication of services, over-processing, mistakes and defects, and others. Our comprehensive UM program including our UM structure, prior authorization protocols, concurrent review and discharge planning processes, retrospective reviews, clinical guidelines and review criteria, and technology and automation are all designed to eliminate "waste" in the health care delivery system. As demonstrated in **Figure 2**, we have an extensive set of programs and initiatives to eliminate waste that we propose to implement upon contract award. Those in bold are further showcased below.

Preventing Inappropriate Use of Services

The issue of inappropriate use of health care services is complex, requiring a multi-disciplinary and multi-pronged approach. Upon contract award, we will implement a variety of initiatives that seek to substantially improve members' use of services improving health and well-being while optimizing health

care costs. A sample of these initiatives follows (**Figure 3**).

Figure 3

EMERGENCY DEPARTMENT DIVERSION PROGRAM	
Description	Our emergency department (ED) diversion program reduces ED expenditures by allowing us to identify and intervene with members who unnecessarily or frequently and inappropriately use ED services. Using sophisticated data analytics, we identify members in need of support. We then engage them in our Care Management program, where we conduct a comprehensive assessment to determine underlying issues and contributing factors. Based on the results of the individual assessment, we connect members to the most appropriate, cost-effective services and resources for their needs. Throughout, we communicate with the member regularly, encouraging PCP visits and relationships and provide follow-up and re-education as necessary.
Stakeholders Involved	Members, providers, WellCare's Care Management team.
Timelines	Our emergency department (ED) diversion program will be operational upon the effective date of the contract. Process related results will be available monthly while outcomes results will be available at the end of the first year and annually thereafter.
Desired Outcomes	Our desired outcomes are to reduce the incidence of inappropriate use of ED services.
24-HOUR BEHAVIORAL CRISIS HOTLINE	
Description	WellCare provides members with a 24-hour behavioral health crisis line. Should a member contact the 24/7 Behavioral Health Crisis Line, the call will be answered by a specially-trained, non-clinician, within established time frames for call handling. For true crisis calls, a behavioral health clinician immediately joins the call to assess, support and manage the situation for the most timely and effective outcome for the member. Crisis calls are triaged, and the appropriate intervention arranged based on the member's needs. The crisis call encounter is documented in our Medical Management Platform so that we may conduct follow up and further engage the member in programs and services, including care management, if appropriate.
Stakeholders Involved	Members, members' families and/or caregivers, WellCare, WellCare's subcontractor .
Timelines	This program will be operational upon the effective date of the contract. Utilization data will be available monthly while outcomes results will be available at the end of the first year and annually thereafter.
Desired Outcomes	Our desired outcomes are to provide members and caregivers with access to immediate support in the event of a crisis and reduce the incidence of ED use for crisis situations.
PHARMACY NETWORK IMPROVEMENT PROGRAM & TOOLBOX	
Description	Our Pharmacy Network Improvement Program and Pharmacy Toolbox will identify potential over and under-utilization opportunities so we can reinforce clinical guidelines and cost-effective therapeutic options. Similarly, on a monthly basis our Pharmacy team will use reports to monitor and measure prescribing patterns and usage for a variety of pharmacy-related measures.
Stakeholders Involved	Pharmacies, pharmacists, prescribers, WellCare's pharmacy team.
Timelines	This program will be operational upon the effective date of the contract. Process-related activity will be available monthly while outcomes will be reported at the end of the first year and annually, thereafter.
Desired Outcomes	Our desired outcomes are to reduce inappropriate use of medications (i.e., psychotropics), improve medication adherence, and optimize pharmacy-related costs.

MEDICATION THERAPY MANAGEMENT (MTM) PROGRAM	
Description	Our comprehensive MTM program features: ➢ Psychotropic Medications Program ➢ Core Safety and Monitoring Program ➢ Medication Adherence Program ➢ Gaps in Care Program ➢ Polypharmacy Program ➢ ADHD Medication in Children Program
Stakeholders Involved	Members, prescribers, WellCare's Pharmacy and MTM teams.
Timelines	This program will be operational upon the effective date of the contract with monthly activity reporting available and clinical outcomes reported at the end of the first year and annually, thereafter.
Desired Outcomes	Our desired outcomes are to reduce inappropriate use of medications (i.e., psychotropics), improve medication adherence, and optimize pharmacy-related costs.
SUBOXONE UTILIZATION REVIEW	
Description	Having observed a potential for a high rate of abuse of the heroin addiction treatment product, Suboxone, we implemented Suboxone Utilization Review and implemented a formulary change to cover Zubsolv. Zubsolv has less buprenorphine than Suboxone with the same clinical indications and outcomes. Additionally, a tablet additive makes the buprenorphine in the SL tablet more highly absorbed. The presence of menthol in the tablet formulation makes the product more palatable, but less likely to be abused through injection or "snorting". Zubsolv is also less recognizable on the streets and less likely to be a target for diversion. At the same time we introduced Zubsolv to the formulary, we tightened our Drug Evaluation Review (DER) criteria to include requirements for tapering and shortened the length of the DER if the tapering was not being documented. Through these efforts we successfully reduced the average pharmacy claims per day for Suboxone by 40 percent in one year with savings equal to over $1,600,000 annually. By implementing this policy in Nebraska, we will improve medication adherence and deliver better clinical efficacy for substance use disorder as we have done in our affiliate Medicaid plans.
Stakeholders Involved	Members with substance use disorder being treated with Suboxone, prescribers, pharmacies, WellCare's Pharmacy team
Timelines	This initiative will be operational upon the effective date of the contract with monthly activity reporting available and clinical outcomes reported at the end of the first year and annually, thereafter.
Desired Outcomes	Optimize the use of Suboxone-alternative for treatment of substance use disorder

Eliminating Waste Related to Administrative Processes

Waste can occur within well-intended administrative processes through non-value added work and over-processing. WellCare routinely evaluates administrative processes to reduce or eliminate non-value added activities reducing administrative costs and improving quality. An example of a program designed to eliminate waste due to administrative processes is our Gold Card Program. Program details follow (**Figure 4**):

Figure 4

GOLD CARD PROGRAM	
Description	Our Gold Card Program, a shared-UM decision support program, will use objective clinical quality and cost data to identify facilities consistently delivering high-quality and cost-effective care and effective treatment planning. These facilities will then receive a special designation which will allow them to follow modified UM protocols for their WellCare patients. Specifically, facilities will obtain approval for inpatient admissions but will not be required to request concurrent review for medical necessity. The facility is expected, however, to inform us of discharge plans as well as interact on care coordination, care management activities, or other such activities. No days will be denied for lack of medical necessity once the admission is authorized.
Stakeholders Involved	Adult inpatient mental health facilities and WellCare's UM staff
Timelines	The program will begin nine months after the contract effective date so as to accrue six months of data (allowing for a 3-month claims lag) to analyze patient volume, quality, and average length of stay. The program will continue with quarterly evaluations.
Desired Outcomes	Our desired outcomes are to drive efficiencies in our UM program by eliminating "over-processing," deploy critical personnel resources in a highly-focused manner, to facilities not meeting quality and utilization goals, and enhance facility's experience with WellCare and foster a truly collaborative relationship by offering a greater degree of autonomy in UM decision-making.

Preventing Waste due to Mistakes and Defects

Many of WellCare's systems and processes are designed to reduce the risk of human error, detect issues before they occur, and make the health care environment more efficient. Our systems and processes reduce the risk of harm to our members, drive efficiencies and consistency, and, ultimately improve the experience for our members and providers. An example of systems and processes we will deploy to eliminate waste due to mistakes, delays, and defects is our Drug Evaluation Review, our terminology for pharmacy-related prior authorization and workflow system (**Figure 5**).

Figure 5

PHARMACY PRIOR AUTHORIZATION TECHNOLOGY	
Description	WellCare has made significant investments in pharmacy prior authorization technology, including our proprietary, role- and task-based drug evaluation review (DER) workflow system. Our DER system features built-in self-checking and process steps to support immediate detection and prevent issues and delays. ➢ Intelligent routing ➢ Color-coded alerts ➢ Integrated Decision Rules
Stakeholders Involved	Pharmacies, pharmacists, prescribers, members filling prescriptions, and WellCare pharmacy staff.
Timelines	This technology will be operational upon the effective date of the contract.
Desired Outcomes	Our desired outcomes are to provide timely, accurate, consistent pharmacy prior authorizations.

SECTION IV.N UTILIZATION MANAGEMENT

83. Describe the MCO's proposed approach to prior authorization, including:

- The data sources and processes to determine which services require prior authorization, and how often these requirements will be reevaluated. Describe what will be considered in the reevaluation of need for current prior authorization requirements.
- The proposed prior authorization processes for members requiring services from non-participating providers and expedited prior authorization.
- The role of the Clinical Advisory Committee in developing service authorization procedures.
- The MCO's process for notifying providers either verbally or in writing, and the member in writing, of denials or decisions to authorize services in amount duration or scope that is less than requested.

(Page limit 4 pages)

WellCare's Approach to Prior Authorization

WellCare views prior authorization (PA) as an important Utilization Management (UM) tool that ensures members receive the most appropriate services to meet their unique needs, in the least restrictive settings of their choice. Our philosophy is to structure our PA program to actively engage providers with WellCare so that our members receive the best care possible. Our PA program includes prospective review of select services to be rendered to ensure they are appropriate, consistent with standards of care, and are being provided in the most appropriate setting. While PA is an important tool serving many needs, **we never require prior authorization for emergency medical or post-stabilization services or crisis stabilization services.**

WellCare and our subcontractors delegated utilization management functions have in place, and follow, written policies and procedures for processing requests for initial and continuing authorizations of services. Furthermore, we have processes to ensure consistent application of review criteria for authorization decisions and consultation with the requesting provider, when appropriate. Our PA program features highly-skilled professionals, use of nationally-recognized, evidenced-based criteria, industry-leading technology, well-documented policies and procedures, and strong clinical oversight. **Over the past two years, we have conducted 1,875,287 prior authorization reviews. On average, these reviews have been completed in two days.**

Standard Prior Authorization Procedures for Medical and Behavioral Health Services

PA requests for medical and behavioral services may be initiated by a member, a member's appointed representative with member's written consent, or provider via phone, fax, mail or the Provider Portal. Those received via the Provider Portal are automatically routed into our Medical Management Platform (MMP) whereas those received by phone, fax, or mail are manually entered. All requests, regardless of submission method, are date and time stamped to ensure they are addressed within 14 calendar days after receiving the request or as expeditiously as the member's health requires.

Upon receipt, our intake team initiates the authorization in our MMP and routes the request, via MMP, to the designated review staff, who examine the member's clinical information provided. In addition, the staff also has available all information about the member within MMP including prior inpatient stays, pharmacy claims, case notes, and care plans.

Once the member's information has been reviewed, the staff evaluates the request against nationally-recognized, established criteria including InterQual®, Hayes, our proprietary evidence-based Clinical Coverage Guidelines, and others, to assess the medical necessity of the requested services. The criteria is applied to assess the appropriateness of the request and to provide authorization. If determined to be

medically necessary and appropriate, the reviewer completes documentation in MMP and notifies the provider of the authorization by phone or fax. If the reviewer cannot approve the services requested based on the information received and applicable criteria, the request is routed, via MMP, to a Medical Director for secondary review. This ensures that decisions to deny a service authorization request or to authorize a service in an amount, duration, or scope that is less than requested, is made by a practitioner with the necessary credentials and experience, and who has appropriate clinical expertise in treating the member's condition or disease. If the Medical Director approves the request, it is returned to the reviewer to complete the documentation and notification as previously described. If the Medical Director does not approve the request or it is reduced, suspended, or terminated, the reviewer completes the documentation in MMP and informs the provider verbally or by fax of the reason for the decision and offers the opportunity to discuss the adverse determination with the Medical Director. If the decision remains unfavorable, we mail the required written notice of adverse action to the member, requesting provider, and the member's primary care provider. The notice, which complies with the requirements of 42 CFR 438.404, includes the reason for the adverse action and information pertinent to the action including provider appeal rights.

Standard Prior Authorization Procedures for Pharmacy Services

As with PA requests for medical and behavioral services, pharmacy Drug Evaluation Review (DER) requests, WellCare's process for medication-related prior authorization, may be initiated by a member, a member's appointed representative with member's written consent, or a member's prescribing physician and may be submitted via fax, web, phone or mail. Those received via web or fax are automatically routed into our proprietary DER workflow system for processing, while those received by phone or mail are manually entered.

Upon receipt, an intake coordinator opens the DER documenting details of the request including member demographic data. The system utilizes the demographic data to confirm member eligibility real-time. If the drug is an injectable or narcotic medication, the coordinator identifies that which automatically routes the DER request to technicians who are skilled in processing DERs for these types of medications. This flagging also triggers the DER for pharmacist review later in the process. Once the intake coordinator completes the initial data entry, he or she submits the DER to the queue to be processed by a pharmacy technician.

DERs are automatically assigned from the central queue to each technician's queue when logged into the system and is processed based on program and drug type. To process the DER, the technician validates member eligibility for prescription coverage. They then confirm that the requested drug is in Medispan and properly listed with the FDA. The system then automatically checks its archives for possible duplicate requests (i.e., same member, drug name, and drug strength) received within the previous 30 days. If a duplicate is found, the technician follows protocols for duplicate DERs. If no duplicates are found, they process the request. An initial evaluation is made to approve or deny based on the information in the DER and in the member's prescription profile using pharmacy operations tools (i.e., state-specific Provider manuals, national clinical guidelines, excluded medication lists). If the decision is to approve, the technician enters information into the pharmacy benefit manager's (PBM) claim system to allow the claim to adjudicate properly. If the decision is to deny, they document the diagnoses written on the DER, the quantity requested, the appropriate denial reason code, and any other relevant information and documentation. If approved and the medication does not require pharmacist review, the system generates a Drug Utilization Review (DUR) form containing the approval date range and reason and automatically faxes the form to the prescriber and pharmacy, if the pharmacy has requested notification. If, however, the request has been denied or approved pending clinical pharmacist review, the request is routed to the pharmacist queue.

Upon receipt, the pharmacist reviews all information provided. If they disagree with the denial decision, the request is returned to the technician, including the rationale. The technician adjusts the request and

processes the approval. If the pharmacist agrees with the denial, and it does not require Medical Director review, the system creates a DUR form and automatically faxes it to the prescriber and the pharmacy, if notification has been requested. Otherwise, the request is routed to a Medical Director for review where he/she can uphold the denial or overturn the decision, routing it back to the technician for processing.

Determining Which Services Require Authorization: A Thoughtful Approach

In collaboration with our contracted practitioners, our Medical Policy (MPC) and Pharmacy & Therapeutics (P&T) Committees establish and maintain our PA requirements. The Committees structure our PA rules to ensure alignment to standards of care, to enable the delivery of care by providers, to support members' navigation through the health care delivery system, and to prevent the risk of over-utilization of services.

The Committees use a variety of data sources to evaluate our PA rules and determine where to add, remove, or change PA requirements. Data reviewed and analyzed include:

- State and Federal requirements
- Benefit structure
- Market fee schedules
- Requirements for emerging technologies and medication
- CPT code-level utilization and claim data
- Approval and adverse determination data
- Quality performance measures

Upon contract award, we will enhance our approach to determine which services require authorization by extending the review to our Nebraska Clinical Advisory Committee (CAC). We also acknowledge that our prior authorization procedures must be submitted to MLTC for review and approval a minimum of 60 calendar days prior to the contract's start date.

Services from Non-Participating Providers: Doing What is Best for Members

Requests for services from non-participating providers demand special attention. Upon receipt of a request for services where the provider is non-participating, our Utilization Management (UM) staff reviews the request to determine if there is a participating provider who may be able to care for our member. The use of participating providers is vitally important to us for member safety. As part of our credentialing process, we have verified the provider is trained, qualified, and licensed, is eligible to participate in Medicaid and Medicare, carries appropriate liability insurance, and has passed appropriate quality checks and site visits. In addition, given the depth and breadth of provider data available to us through our clinical systems, using participating providers also allows us to direct members to high-quality providers known to produce good health outcomes. Upon review, if an alternate participating provider is identified, our UM staff contacts the provider's office to confirm the provider's availability. Once confirmed, the UM staff works with the member and the provider to safely transition the member in-network issuing the authorization and providing the authorization number and the dates of service.

While this method is our preferred approach to facilitating access to care, there are circumstances where it is in the member's best interest to authorize services with a non-participating provider especially, in cases where there is limited availability of highly-specialized providers or providers who have experience caring for members with special needs. In these instances, our UM staff reviews State and Federal databases to ensure the provider is eligible to provide care. Once validated, the staff negotiates a single-case agreement with the provider.

Expediting Requests for Prior Authorizationto not Jeopardize members' Health

WellCare offers expedited reviews for prior authorizations in situations when standard review could seriously jeopardize the member's life, health, or ability to attain, maintain, or regain maximum function. Providers and members may request an expedited review. In addition to provider and member requests for expedited service authorization decisions, our staff are specially trained to evaluate standard requests.

They may determine that a member's clinical circumstances necessitate expedited review and flag the request accordingly. **In 2014 and 2015 we conducted over 26,000 and 34,000 expedited reviews, respectively, completing them, on average, in one day.**

Expedited DER Requests

In 2014, WellCare's average time to process expedited DER requests was less than 20 hours.

CLINICAL ADVISORY COMMITTEE: DEVELOPING SERVICE AUTHORIZATION PROCEDURES

WellCare's vision for our Heritage Health Clinical Advisory Committee (CAC) is to convene an expert panel of Nebraska-based clinicians in the fields of physical health, behavioral health and pharmacy to provide peer review and feedback on proposed practice guidelines and our Care Management (CM) and Utilization Management (UM) policies and procedures. To that end, and in compliance with all requirements of the this RFP, our Nebraska CAC will be comprised of clinicians who are familiar with standards and practices of treatment, including diseases and chronic conditions common in the Heritage Health population and mental health and/or substance use disorder treatment for.

WELLCARE'S PROCESS FOR NOTIFYING MEMBERS AND PROVIDERS OF DENIALS

Timely UM reviews are critical for patient safety and a positive member experience. Our UM processes are designed to 1) promote timely decision-making and notifications and 2) support members and providers through adverse actions.

WellCare's Process for Notifying Providers of Denials Verbally or in Writing

Upon review, if a request for medical or behavioral services is denied, reduced, suspended or terminated, our UM staff immediately notify the requesting provider via phone or fax. The provider is given a clear description of the reason for the denial, alternative treatment options, and important information pertinent to the action, including the provider appeal rights. Similarly, if the denial is for pharmacy services, we generate the drug utilization review (DUR) form which is immediately faxed to the prescriber and the pharmacy, if the pharmacy has requested notification. The DUR includes a clear description of the reason for the denial, any preferred alternatives, and other information pertinent to the action. All communication with the provider is noted in MMP or our DER system and the notification is retained for future reference.

WellCare's Proces for Notifying Members, in Writing, of Denials or Decisions to Authorize Services in Amount, Duration, or Scope That is Less than Requested

For all notices of action relating to adverse actions, we generate a written notice of action letter as soon as the decision is made and mail it to the member, requesting provider, and the member's primary care provider. The notice is mailed within 14 calendar days of receipt of the request if it is a standard review or within 72-hours for expedited requests. As with provider notifications above, the written notices are documented and retained within our MMP or DER system. In all cases, the notice explains

- The action WellCare has taken or proposes to take as well as the reason for the action
- The guidelines used as a basis for the decision and information about how to obtain a copy
- The right to appeal the decision and instructions for doing so including member's requirement to exhaust internal appeals before engaging in a State fair hearing
- Instructions for how to expedite the review as well as information about how to continue the benefit while under review and the potential obligation to pay under certain circumstances

SECTION IV.N UTILIZATION MANAGEMENT

84. Provide a listing of services for which the MCO will require prior authorization and describe how the MCO will communicate this information, as well as the results of authorization decisions, to providers and members. *(Page limit 2 pages excluding the listing of services)*

PROPOSED LIST OF SERVICES FOR WHICH PRIOR AUTHORIZATION WILL BE REQUIRED

Prior authorization is an effective method for ensuring the efficient use of covered services. Our prior authorization procedures comply with the Mental Health Parity and Addiction Equity Act (MHPAEA). Per our policy, **we do not require prior authorization for emergency medical and post-stabilization services or for crisis stabilization services.** The proposed list of services for which prior authorization will be required is available in the attached list (**Attachment 84a_Proposed List of Services for which Prior Authorization will be Required**).

COMMUNICATING PRIOR AUTHORIZATION REQUIREMENTS TO MEMBERS AND PROVIDERS

WellCare transparently communicates prior authorization requirements to members and providers through a varierty of print, digital media, telephone, face-to-face, and written channels.

Communicating Prior Authorization Requirements to Members

WellCare uses a variety of channels to communicate with members about the services available to them and which require prior authorization including:

- **Member Handbook:** Our member handbook provides comprehensive information about covered services. It features easy-to-read descriptions of prior authorization requirements.
- **Member Portal:** Our portal provides members with access to critical information 24-hours a day, everyday, including valuable information about covered services, which require authorization, timeframes for review, who can request authorization, and important phone numbers.
- **Member Services:** We encourage members to call for questions related to their health care coverage, including which services require prior authorization. Our trained associates provide detailed information and can instruct members on where to locate the information in their materials.
- **Welcome Centers:** Our Welcome Centers in Lincoln, Omaha, Kearney, Scottsbluff, and Norfolk will be staffed by a team of specialists who will provide local access to service and support. They will assist members in understanding covered services, including which ones require authorization.

Communincating Prior Authorization Requirements to Providers

We provide our providers with access to a variety of easy-to-use reference materials, tools, and communications as it pertains to prior authorization rules. These include:

- **Provider Manual:** Our Provider Manual Provides information about prior authorization including instructions for how to obtain authorization for services.
- **Provider Quick Reference Guide (QRG):** The QRG features detailed information about covered procedures and services, if authorization is required, how to request authorization, and any special processing instructions. In addition, the QRG, includes detail about the information needed to obtain authorizations including a place of service code reference tool.
- **Provider Portal:** Offers providers the convenience of exchanging health care service information directly with WellCare. The provider portal, which is offered at no cost, features a wealth of information and tools including our proprietary authorization look up tool. Additionally, providers can seamlessly transistion to requesting authorizations and check status
- **Web-based Provider Authorization Look Up Tool:** Our proprietary web-based authorization look

up tool allows providers to quickly check if prior authorization is required and, if so, under what conditions. By simply entering a valid CPT-code, our embedded business logic checks prior authorization rules and renders information about about the service including a description and requirements by place of service.

- **Provider Services, Pharmacy Support, and UM Staff:** Our associates are well-trained in assisting providers in understanding what services require authorization and how to obtain approval.
- **Specific provider notices when prior authorization rules change:** When prior authorization rules are modified, WellCare sends providers advance notification of the changes.
- **Provider Orientations:** WellCare's New Provider Orientation Training includes a comprehensive overview of our UM program including prior authorization procedures and rerquirements.

Communicating Results of Authorization Decisions to Providers and Members

Our UM processes are designed to provide timely communication to providers and members.

Communicating Results of Authorization Decisions to Providers

All requests for medical and behavioral health services submitted to Wellcare are date and time stamped when received. The reviewer completes the determination as expeditiously as the member's health requires, but no later than 14 calendar days after receiving the request. If the final determination is approval the reviewer notifies the requesting provider of the approval via telephone or facsimile. If the determination is unfavorable, the request is routed to a Medical Director for review. If the Medical Director's final determination is unfavorable (i.e., denied, reduced, suspended, or terminated), the reviewer immediately notifies the requesting provider of the denial via telephone or facsimile. The provider notification includes a clear explanation of the reason for the denial, any preferred alternative treatments, and important information pertinent to the action including provider appeal rights. The fax notification includes the UM department's contact information to allow providers the opportunity to discuss the adverse determination. For all adverse determinations, the provider also receive a copy of the written notice of action letter.

Upon receipt of a request for drug evaluation review (DER) we systematically date and time stamp the request. This information is used to engage our DER system's alert feature. All pending requests are systematically color-coded based on approaching deadlines. Upon review, if the request is approved, we generate a fax which is sent immediately to the prescriber and the pharmacy. If the request is denied, we generate a drug utilization review (DUR) form which is immediately faxed to the prescriber and the pharmacy, if the pharmacy requested to be notified. The DUR includes a clear description of the reason for the denial, any preferred alternatives, and other information pertinent to the action.

Communicating Results of Authorization Decisions to Members

As services are approved, we notify providers in a timely manner so they can proceed with notifying and caring for the member. For all adverse actions, we generate a written notice of action letter as soon as the decision is made and mail it to the member or member's representative and provider(s). The notice is mailed within 14 calendar days of receiving the request if it is a standard review or within 72-hours for expedited requests. In all cases, the notice explains:

- The action WellCare has taken or proposes to take along with the reason for the action
- The guidelines used as a basis for the decision and information about obtaining a copy
- The right to appeal or grieve the decision and instructions for doing so including the member's requirement to exhaust internal appeals before engaging in a State fair hearing
- Instructions on expediting the review as well as information about how to continue the benefit while under review and the potential obligation to pay under certain circumstances

PROPOSED LIST OF SERVICES FOR WHICH PRIOR AUTHORIZATION WILL BE REQUIRED	
WellCare of Nebraska	
Physical Health Services	**Prior Authorization Required**
Emergency Medical and Post-Stabilization Services	No
Inpatient hospital services, including transitional hospital services and transplant services	Yes
Outpatient hospital services	Select
Ambulatory surgical center (ASC) services	Select
Physician services, including services provided by nurse practitioners, certified nurse midwives, and physician assistants, and clinic-administered injections/medications, and anesthesia services including those provided by a certified registered nurse anesthetist	No
Services provided in federally-qualified health centers (FQHCs) and rural health clinics (RHCs)	No
Services provided in Indian Health Service (IHS) facilities	No
Clinical and anatomical laboratory services, including the administration of blood draws completed in the physician's office or an outpatient clinic for a behavioral health diagnosis	Select
Radiology services	Select
Health Check (EPSDT) services	No
Home health services	Yes
Private duty nursing services	Yes
Therapy services (Physical & Occupational therapy, Speech pathology & audiology)	Yes
Durable medical equipment and medical supplies, including hearing aids, orthotics, prosthetics, and nutritional supplements	Select
Podiatry services	Select
Chiropractic services	No
Vision services	No
Free standing birth center services	Select
Hospice services, except when provided in a nursing facility	No
Skilled/rehabilitative and transitional nursing facility services	Yes
Emergency ambulance services	No
Non-emergency ambulance transportation	Yes
Transplant services	Yes
Pharmacy services	Select
Family planning services	No
Dialysis services	No
Prenatal and Maternity Care Services	Select
Hysterectomies and Sterilizations	Select
Medical Services for Special Populations	Select

PROPOSED LIST OF SERVICES FOR WHICH PRIOR AUTHORIZATION WILL BE REQUIRED	
WellCare of Nebraska	
Behavioral Health Services	**Prior Authorization Required**
Services for individuals age 20 and under, unless otherwise indicated Crisis stabilization services (includes treatment crisis intervention)	No
Inpatient psychiatric hospital (acute and sub-acute)	Yes
Psychiatric residential treatment facility (age 19 and under)	Yes
Outpatient assessment and treatment: - Partial hospitalization - Day treatment - Intensive outpatient - Medication management - Outpatient therapy (individual, family, or group) - Injectable psychotropic medications - Substance use disorder treatment - Psychological evaluation and testing - Initial diagnostic interviews - Sex offender risk assessment - Community treatment aide (CTA) services - Comprehensive child and adolescent assessment (CCAA) - CCAA addendum - Hospital observation room services (up to 23 hours & 59 minutes in duration) - Parent child interaction therapy - Child-parent psychotherapy - Applied behavioral analysis - Multi-systemic therapy - Functional family therapy	Select
Rehabilitation services - Day treatment/intensive outpatient - CTA services - Professional resource family care - Therapeutic group home	Yes
Services for adults age 21 and over Crisis stabilization services (includes treatment crisis intervention)	No
Inpatient psychiatric hospital services (acute and sub-acute)	Yes
Outpatient assessment and treatment: - Partial hospitalization - Social detoxification - Day treatment	Select

PROPOSED LIST OF SERVICES FOR WHICH PRIOR AUTHORIZATION WILL BE REQUIRED	
WellCare of Nebraska	
Behavioral Health Services	**Prior Authorization Required**
– Intensive outpatient – Medication management – Outpatient therapy (individual, family, or group) – Injectable psychotropic medications – Substance use disorder treatment – Psychological evaluation and testing – Electroconvulsive therapy – Initial diagnostic interviews – Ambulatory detoxification – In-home psychiatric nursing	
Rehabilitation services – Dual-disorder residential – Intermediate residential (SUD) – Short-term residential – Halfway house – Therapeutic community (SUD only) – Community support – Psychiatric residential rehabilitation – Secure residential rehabilitation – Assertive community treatment (ACT) and Alternative (Alt) ACT – Community support – Day rehabilitation	Yes

SECTION IV.N UTILIZATION MANAGEMENT

85. Describe how the MCO will ensure members receive written and timely notice of action relating to adverse actions taken by the MCO. *(Page limit 1 page)*

WELLCARE'S PROCESS FOR ENSURING MEMBERS RECEIVE WRITTEN AND TIMELY NOTICE OF ACTION RELATING TO ADVERSE ACTIONS

Anytime we determine a request for services is to be denied, reduced, or suspended, we send a written notice of action. Notices for medical and behavioral services are generated as soon as the final decision is made, and they are mailed within 14 calendar days of receipt of the request for standard reviews or within 72-hours for expedited requests. Once a final determination that a request will be denied, reduced, suspended, or terminated, the reviewer completes the documentation in our Medical Management Platform (MMP) and prepares notices for the member, the requesting provider, and the primary care provider. Our notices comply with the requirements of 42 CFR 438.404 and include the reason for the adverse action, information pertinent to the action, and appeal rights including the right to continue benefits while under appeal. Draft notices are immediately routed, via MMP, to our Utilization Management (UM) quality team where they are to be reviewed. The quality auditor reviews each letter for completeness, accuracy, and readability giving first priority to those notices for expedited reviews. Upon completion of the review, notices are batched and transmitted to our print vendor two times a day. Upon receipt of the files, our print vendor provides us with written, electronic acknowledgment to ensure files or records are not missed.

For pharmacy, ensuring timely notice of action relating to adverse actions begins upon receipt of a request for drug evaluation review (DER). Requests are systematically date and time stamped which engages our DER system's alert feature. This feature color-codes pending requests based on approaching deadlines. DERs due to be completed within four hours are indicated in yellow, while those due within an hour are indicated in red. All pharmacy-related adverse determinations are transmitted to our print vendor through our enterprise correspondence tracking system. The print vendor provides written, electronic acknowledgement of receipt. As an added measure, our print vendor also provides confirmation that the notices have mailed by supplying the actual postmark date, which is also stored in our correspondence tracking system. This is our last measure to ensure timely notification.

Managing the Notice of Action Letters to be Sent

Our UM quality team managers routinely monitor the queues of adverse determination notices to be prepared and sent. Each morning the manager reviews the Exception Report. This report shows all requests for authorization including the date received, the date reviewed, the authorization status, and the date the notice was processed. Our manager uses this reporting to identify pending notices so they can be appropriately triaged.

Direct Communication with Providers Helps Ensure Members Receive Timely Notice

For those medical and behavioral reviews that result in an adverse action (i.e., denied, reduced, suspended, or terminated), prior to sending the written notice of action, our staff immediately notifies the requesting provider of the denial via fax and telephone, if necessary. Our staff inform the provider of the reason for the denial, offer any preferred alternatives, and information pertinent to the action including the right to a peer-to-peer discussion with a medical director and provider appeal rights. For pharmacy-related adverse actions, we generate the drug utilization review (DUR) form which is immediately faxed to the prescriber and the pharmacy, if the pharmacy has requested notification. The DUR includes a clear description of the reason for the denial, any preferred alternatives, and other information pertinent to the action. We believe our efforts to immediately notify the provider and provide written notification, hensure the best determinations and communications for our members.

SECTION IV.N UTILIZATION MANAGEMENT

86. Describe the MCO's process for conducting concurrent reviews for inpatient services. *(Page limit 2 pages)*

WELLCARE'S PROCESS FOR CONDUCTING CONCURRENT REVIEW FOR INPATIENT SERVICES

Concurrent review is an essential component of our Utilization Management (UM) program as well as an integral part of our Care Management (CM) program. Our concurrent review staff evaluates, monitors, and supports individual WellCare members when they have been admitted to any one of our nearly 1,000 contracted hospitals, psychiatric facilities, psychiatric residential treatment facilities, rehabilitation centers, and nursing facilities. **More than fifty percent of our concurrent review staff are onsite at contracted facilities providing individualized, person-centered support to our members. Our NICU and behavioral health concurrent review professionals provide even further specialized, high-touch services to especially vulnerable populations**. Our concurrent review program is aligned to the Institute for Healthcare Improvement's Triple Aim framework to improve patient care experience, improve population health, and reduce health care costs.

Improving Health, Experience, and Cost Begins Upon Admission

Quality inpatient care occurs when services are appropriate and members are appropriately supported, which is why we believe it is vitally important to initiate concurrent review upon notification of an admission. Upon notification that a member has been admitted to a facility, our intake team initiates the authorization in our Medical Management Platform (MMP) and then routes the admission, via MMP, to the designated concurrent review staff for that facility. The concurrent review professional carefully reviews the member's clinical information contacting the facility directly if additional information is missing or needed to support the review. In addition to reviewing the clinical information related to the member's current admission, the concurrent review staff also has available all information about the member within MMP including prior inpatient stays, pharmacy claims, case notes, and care plans. As our universal health record for medical, behavioral, pharmacy, and care management activity, our MMP allows our concurrent review staff to complete a comprehensive review of the member's history, needs, and circumstances which then informs our concurrent review, discharge planning, and post-discharge activities.

Evaluating Admissions for Appropriateness

Once the member's current and historical clinical information has been reviewed, the concurrent review professional evaluates the member's current inpatient stay for medical necessity to ensure that the services are medically appropriate and

- Necessary to meet the basic health needs of the member
- Rendered in the most cost-efficient manner and type of setting appropriate for the delivery of the covered service
- Consistent in type, frequency, and duration of treatment with scientifically-based guidelines of national medical, research, or health care coverage organizations or governmental agencies
- Consistent with the diagnosis of the condition
- Required for means other than convenience of the client or his/her physician
- No more intrusive or restrictive than necessary to provide a proper balance of safety, effectiveness, and efficiency
- Of demonstrated value
- No more intensive level of service than can be safely provided

Using commercially-available, nationally-recognized, internally approved criteria such as InterQual®, American Society of Addiction Medicine (ASAM) criteria, and our proprietary evidence-based Clinical Coverage Guidelines, we assess quality of care and the appropriate level of care for continued stay taking into consideration the member's individual needs. We make concurrent review decisions within one calendar day from receipt of request and have provisions for multiple day approvals when the episode of care is reasonably expected to last more than one day, based on medical necessity.

If the concurrent review professional determines the member's stay is medically necessary and appropriate, he/she completes documentation in MMP and notifies the facility of the authorization. Subsequent reviews are scheduled based on the severity of the member's illness, intensity of services rendered, complexity of the member's treatment plan, and discharge planning activity. If the concurrent review professional cannot approve the inpatient services requested based on the information received and applicable medical necessity criteria, the request is routed, via MMP, to a designated Medical Director for secondary review. Our Medical Directors review each case individually and render a decision based on a combination of the information provided, clinical judgement, and in consideration of the best interests of the member and his/her health care needs. If the Medical Director approves the request, it is returned to concurrent review professional to complete the documentation and notification as previously described. If the Medical Director does not approve the request, the concurrent review staff completes the documentation in MMP and informs the facility verbally or by fax. We offer the attending physician the opportunity for a peer-to-peer discussion with the Medical Director. If, based on the peer-to-peer discussion, the request is approved, we update MMP and notify the facility accordingly. If the discussion does not change the adverse determination, we inform the attending provider of his/her right to initiate an appeal and provide instructions.

Ensuring Quality Care Through the Member's Inpatient Stay and Supporting Safe, Timely Transition Through Discharge Planning

After the stay is authorized, our staff focuses on ensuring a safe transition out of the inpatient facility through effective inpatient oversight and comprehensive discharge planning. Our concurrent review staff provides highly-individualized, person-centered support to our members through a mix of onsite, telephonic, or faxed clinical review and communication with the health care professionals involved in the member's care. In Nebraska, we will use the mix of onsite, telephonic, and faxed review and communication with the 67 critical access hospitals and other facilities. In facilities where we staff onsite concurrent review professionals, our staff will be at the member's bedside for the initial screening. Our experience has demonstrated the significant value of face-to-face contact with the member or caregiver in allowing for a more comprehensive identification of and planning for discharge-related needs. The concurrent review professional oversees the member's inpatient stay and develops the discharge plan, which is provided to the member's care manager who ensures a smooth transition post-discharge. The coordination between concurrent review and care management staff provides seamless coordination of care across settings.

Discharge Planning

We take a synergistic approach to working with our facilities' discharge staff in order to provide our members' safe transition and to prevent the risk of readmission. By working collaboratively with the facilities, we reduce duplication of work in identifying and addressing the collective set of medical, behavioral, and social issues that may require post-inpatient intervention. Our member-centric discharge planning process involves the attending physician, facility discharge planner, our concurrent review professional, the member and his/her caregivers, ancillary providers, care managers, when appropriate, and community resources. In doing so, we facilitate delivery of the most appropriate services for the member and empower the member and caregivers to have a voice in health care decision-making and discharge plan development. Once drafted, discharge plans are reviewed and adjusted as needed with each subsequent clinical review.

SECTION IV.N UTILIZATION MANAGEMENT

87. Describe the MCO's process for conducting retrospective reviews to examine trends, issues, and problems in utilization. *(Page limit 2 pages)*

CONDUCTING RETROSPECTIVE REVIEWS TO EXAMINE TRENDS AND PROBLEMS IN UTILIZATION

WellCare's retrospective review process supplements our procedures to prospectively and concurrently drive appropriate use of services. Our process for conducting retrospective reviews includes systems to identify, collect, and analyze utilization patterns of all network providers, written policies and procedures, methods and resources to focus on individual and system outliers, peer review, processes to monitor and report over- and under-utilization of services at all levels of care, capabilities to evaluate trends by race, ethnicity, gender, and age, and processes for claim denials through retrospective review that ensure that claims are denied individually and denials are subjected to due process before payment is withheld or repaid. Our policies and methods are explicitly designed to improve health outcomes, increase access to comprehensive health services, enhance quality of care, and reduce the rate of costly and avoidable care.

Each month, our teams of state-based and national analytics professionals produce a comprehensive set of reports across a variety of health care utilization categories. These reports allow our teams to analyze utilization relative to historical trends, goals, benchmarks, and our affiliate Medicaid plans in other states. The data is presented at various levels including state, region (if applicable), provider group, individual provider, and member, where appropriate. Following completion of our data analysis, our relevant experts throughout the organization develop and implement interventions specific to the observed data trends and the State's unique needs and circumstances.

Examining Utilization Management and Cost of Care Trends

Our Medical Economics team routinely produces and analyzes utilization reports that use authorization, claim, and encounter data to allow us to systematically identify and address emerging trends or changes in utilization. The reports include, but are not limited to, admits per thousand by type (medical/surgical, deliveries, NICU, psychiatric), days per thousand by type, C-section rate, NICU average length of stay, catastrophic rate, readmission rate, and emergency department usage by provider, member, hospital and diagnosis.

The team compares results to established goals as well as benchmarks or targets. Data analysis includes statistical models that identify patterns of inappropriate ER use, office visit up-coding, and improper billing patterns. Our State Medical Directors contact outlier providers to address specific issues identified and review clinical guidelines, where applicable. The utilization data is reported to the Utilization Management Committee where they discuss trends and recommendations for broad action.

In addition, each month our Medical Economics department facilitates state-specific Medical Cost Review meetings where a multi-disciplinary team reviews state-specific trends related to financials, medical cost and utilization, emergency department utilization, audit recovery, contracting, utilization management, and pharmacy network improvement. The analysis includes critical insights and observations from our affiliate Medicaid plans, which often allows us to proactively identify potential trends. Once the data is analyzed the team identifies areas for improvement along with interventions. Status of follow ups and trends are monitored at subsequent meetings to ensure timely completion and effectiveness in driving change. This process is replicated annually providing a retrospective review of the full year allowing us to prepare for emerging or predicted trends and planned activities.

Examining Pharmacy Utilization and Quality of Care Trends

Our retrospective drug utilization reviews (rDURs) are executed with routine examination of claims data and other records, through computerized drug claims processing and information retrieval systems to

assess the clinical quality of prescribing and dispensing of our formulary medications. Our rDURs are designed to identify patterns of fraud, abuse, gross overuse or inappropriate or medically unnecessary care among physicians, pharmacists, and members associated with specific drugs or groups of drugs. WellCare performs rDUR projects throughout the year to improve the quality of health services provided to our members. One example is related to a pattern of under-utilization of chronic inhaled corticosteroid (ICS) inhalers among members using short-acting beta agonist (SABA) inhalers. Our pharmacy team implemented provider-directed interventions aimed at improving the use of ICS inhalers consistent with evidence-based guidelines. Post-intervention, more than 8 percent of members identified in the initial measurement had a claim for an ICS inhaler, suggesting the intervention was effective. Our proprietary Pharmacy Toolbox reports are central to our pharmacy retrospective reviews. On a monthly basis, our Pharmacy team uses our Pharmacy Toolbox to monitor and measure prescribing patterns and usage for a variety of pharmacy-related measures. Our Pharmacy Toolbox reports display utilization, drug evaluation review, and physician data by state for each month as well as year-to-date.

Examining Trends with Adherence to Guidelines

We regularly evaluate utilization of recommended preventive services, chronic disease management services, and acute care. We systematically mine membership data to identify trends in adherence to recommendations. Annually, in accordance with our medical record review policy, our Quality Improvement department conducts medical record reviews on a random sample of charts from primary care providers. Our medical record audit assesses physician compliance with recommended preventive health and clinical practice guidelines. We also assess and trend provider compliance with guidelines through annual administrative data and medical record reviews for HEDIS.

Our efforts to examine trends in adherence to guidelines have allowed us to make improvements in the care provided to our members. For example, in Georgia, we identified significant opportunities to improve follow-up care for children prescribed ADHD medication for both the initiation and continuation phases. By implementing formal guidelines, conducting ongoing, targeted provider and member outreach, and monitoring adherence, we have consistently increased the percentage of members who had one follow-up visit with the prescribing authority during the 30-day initiation phase from 39.39 percent in 2013 to 48.92 percent in 2015. Similarly, we increased the percentage of members of the same age group who, in addition to the visit in the initiation phase, had at least two follow-up visits with a practitioner within 270 days after the initiation phase ended from 53.10 percent in 2013 to 63.78 percent in 2015. Our affiliate plan in Kentucky produced similar improvements during the same timeframe. Our Kentucky plan increased the percent of members with an initial visit from 50 percent in 2013 to 61.49 percent in 2015 as well as the percent with the follow up visits from 20 percent in 2013 to 69.62 percent in 2015.

Examining Trends for Potential Fraud, Waste and Abuse

Our Special Investigations Unit (SIU) uses General Dynamics STARS® SOLUTIONS analytical tool to analyze medical and pharmacy claims and generate outlier and trending reports focused on peer-to-peer comparisons.

IMPROVING HOW WE EXAMINE TRENDS, ISSUES, AND PROBLEMS IN UTILIZATION

WellCare is continuously investing in our medical management platform and predictive models. With respect to our data analytics and predictive modeling, we are planning to increase the frequency by which the predictive model is run to weekly to identify higher risk members more quickly. We are also implementing the use of lifestyle data, such as Experian, to increase sensitivity and specificity of predictive model and risk stratification. In addition, we are continuously evaluating automated business rules to generate case management referrals from pre-determined procedure codes captured at the time of authorization to enable immediate identification of members potentially in need of case management as the population health needs evolve.

SECTION IV.N UTILIZATION MANAGEMENT

88. Describe the initiatives the MCO will implement to control unnecessary ED utilization, avoidable hospitalizations, and hospital readmissions.

- Discuss how the MCO will ensure that care is provided in the most appropriate and cost effective setting
- Include strategies that address access to primary care services through patient centeredness principles; the use of urgent care centers and retail clinics; and interventions targeted to super-utilizers, such as patients with asthma, diabetes, chronic pain, and/or behavioral health conditions

(Page limit 6 pages)

ENSURING APPROPRIATE USE OF SERVICES WHILE ADDRESSING UNMET HEALTH NEEDS

WellCare has developed utilization management (UM) policies and processes to prospectively and concurrently evaluate utilization to ensure care is provided in the most appropriate and cost-effective setting. Our comprehensive surveillance systems allow us to quickly identify when there may be inappropriate use or over-use which may be attributed to broader issues related to access or underlying health or psychosocial issues. Through early identification and intervention, we control unnecessary emergency department (ED) use, hospitalizations, and readmissions. Our overall approach ensures care is appropriate and in the most cost-effective setting and provides the enhanced benefit of improving care and lowering healthcare-related costs. Our approach features:

- Targeted initiatives and value-added benefits and services to control unnecessary ED utilization, avoidable hospitalizations and readmissions
- Policies and processes that ensure care is provided in the most appropriate and cost-effective setting
- Strategies that address access to primary care services through patient-centeredness principles
- Strategies that address the use of urgent care centers and retail clinics
- Quality and care management strategies (including field-based care management) to address super-utilizers, particularly those with chronic and co-morbid conditions

CONTROLLING UNNECESSARY ED UTILIZATION, AVOIDABLE HOSPITALIZATIONS, AND READMITS

We offer a number of targeted interventions to improve members' continuity of care, health outcomes, and quality of life while improving use of services and related costs. Some of these initiatives include, but are not limited to:

- 24-Hour Nurse Advice Line
- Providers Who Offer Extended Office Hours
- Care gap monitoring and reporting, including mapping of care gaps to identify geographic trends in care gaps
- Use of Hospital Observation Stays
- Comprehensive Discharge Planning
- Promotion of patient-centered care through the use of the Patient-Centered Medical Home (PCMH) and Integrated Health Home models

24-Hour Nurse Advice Line

Since data shows us that members sometime us the emergency department for routine care, we offer a 24-hour nurse line. Members are able to access our nurse line at any time through our dedicated toll-free member services line. Our 24-hour nurse line team uses a nationally recognized triage decision-making tool to assist the member in deciding whether to see their doctor, go to an urgent care center, or seek

immediate emergency care. Nurses who answer the nurse line are able to assist the member in making an appointment with their PCP when appropriate as well as locating the closest urgent care center. Our nurse line plays a pivotal role in our program by directing members to the most appropriate site for care and, in return, lowering the cost of care. Nurse line staff includes Spanish-speaking nurses, and interpreter services are available for other languages.

Providers Who Offer Extended Office Hours

WellCare's network development strategy includes recruiting provider offices who offer extended office hours including evenings and weekends. Additionally, our PCMH Implementation plan has incentives for providers who meet certain PCMH standards, including offering after-hours.

Figure 6

We go beyond contracting with providers who offer extended hours, working diligently to make it easy for members to find these providers. Our Member Services associates can easily assist members but we empower members and promote self-management by offering self-service as well. Our provider directories feature provider office hours and we have implemented an easy-to-use index dedicated to finding providers who offer extended hours, as demonstrated in **Figure 6**.

Use of Hospital Observation Stays

One of the initiatives we have implemented to prevent avoidable admissions is the use of hospital observation stays. Upon review of a request for an inpatient confinement, our staff carefully evaluates the member's clinical circumstances and their health care needs. If the circumstances do not meet medical necessity criteria, our staff outreach to the facility to determine if there is additional clinical information. If there is not additional information but it appears to be in the member's best interest to remain at the facility, our staff will consult with the facility to suggest the physician orders for an observation stay. Once the updated physician order is received, the request is processed for an observation stay as opposed to an inpatient admission.

Comprehensive Discharge Planning

We have designed our discharge planning process to provide early identification of all medical, behavioral, and social issues that may require post-inpatient intervention inclusive of transportation, home health, medication needs and others. Our member-centric discharge planning process involves the attending physician, facility discharge planner, our concurrent review professional, the member and his/her caregivers, ancillary providers, care managers, when appropriate, and community resources. Once drafted, discharge plans are reviewed and adjusted as needed with each subsequent clinical review prior to the member's discharge from the facility. In instances where a member who is enrolled in our care management program is admitted to an inpatient facility, our concurrent review staff immediately notifies the member's care manager.

We continue to promote increased support for discharge planning as a critical component to reducing readmission rates. Some strategies we have launched recently include an assessment at the time of admission to identify members most likely to readmit based on algorithms considering their conditions and past utilization history. Those identified at risk are provided additional discharge supports that can include in-hospital visits by a WellCare care manager to arrange for appropriate discharge

Care Gap Monitoring and Reporting

One way to help members prevent unnecessary utilization of more restrictive levels of care is to ensure they have a positive and ongoing preventive relationship with their PCP. To foster these relationships, we have built a disciplined approach to monitoring for care gaps, working with members to close care gaps and reporting care gaps to providers to support their efforts to close those gaps. We offer in-person support to our PCPs to review care gap reports and make reports available online in a secure provider portal. We continue to enhance these efforts and two of our newest initiatives includes mapping of care gap reports to identify geographic trends as well as pro-active member outreach when care gaps are identified to walk them through the gap and facilitate a three-way call with their PCP office to set an appointment to close the identified gap.

Promotion of Patient-Centered Care through PCMH Model

Members in medical homes tend to have closer connections with their primary care providers, which helps them meet their health care needs in the least restrictive and cost-effective settings. Because of this, we support MLTC's effort to grow the number of PCMH-designated practices in Nebraska and have offered a number of strategies to promote this effort including technical support, incentive-based payment structure, collaboration on care coordination and data information sharing.

Ensuring Care is Provided in the Most Appropriate and Cost-Effective Setting

WellCare's UM protocols, including those for inpatient stays, coupled with our nationally-recognized clinical review criteria and our concurrent review program help ensure care is provided to our members in the most appropriate and cost-effective settings.

WellCare's Prior Authorization Rules Help Ensure Admissions are Appropriate

Prior authorization is an effective way to help ensure care is provided in the most appropriate and cost-effective setting. While WellCare does not require prior authorization for emergency and post-stabilization services or crisis stabilization services, authorizations are required for inpatient confinements including:

- Elective inpatient
- Acute inpatient
- Skilled nursing
- Behavioral health
- Rehabilitation/residential
- Long-term/sub-acute care

Concurrent Review and Review Criteria Reduce Avoidable Hospital Days and Readmissions

Concurrent review is an essential component of our UM program as well as an integral part of our Care Management (CM) program. Upon notification that a member has been admitted to a facility, our intake team initiates the authorization and routes the admission to the designated concurrent review staff for that facility. The concurrent review professional carefully reviews the member's clinical information contacting the facility if additional information is needed. In addition to reviewing the clinical information related to the member's current admission, the concurrent review staff also has available all information about the member within our clinical systems including prior inpatient stays, pharmacy claims, case notes, and care plans.

From there, our concurrent review staff provides highly-individualized, person-centered support to our members through a mix of onsite, telephonic, or faxed clinical review and communication with the attending physician, facility clinical staff, care coordinator, and any other health care professionals involved in the member's care. In facilities where we staff onsite concurrent review professionals, our staff will be at the member's bedside for the initial screening, which is completed during the admissions review. Our experience has demonstrated the significant value of face-to-face contact with the member and family member or caregiver in allowing for a more comprehensive identification of and planning for discharge-related needs. Our onsite staff also provide patient and family education, care planning,

medication review, identification of community resources, and coordination of follow-up care and non-emergency transportation, if necessary. Our staff also leverages our proprietary Health*Connections* model, which helps connect members to social services including financial, food, education and utility assistance, transportation, disability and homeless services.

ADDRESSING ACCESS TO PRIMARY CARE SERVICES

WellCare uses a multi-faceted approach to promote and facilitate patient-centered primary care. Our approaches are tailored based on where providers are starting from in terms of their capacity for patient-centeredness. Generally, the layers of support we offer, based on provider need, include:

- Clinical practice support and training through our clinical HEDIS practice advisers (CHPAs), medical director, pharmacy director, behavioral health manager, quality management coordinator, medical management coordinator, care managers, disease mangers, and utilization managers as well as the ongoing support of our provider services representatives, operations account representatives, and CommUnity advocates
- Sharing of data and analytics including:
  - Quality dashboard with HEDIS scores, care gap reports, and quality trends
  - Measures of provider efficiency such as use of electronic funds and electronic data interchange
- Information technology (IT) infrastructure such as assistance with health information exchange (HIE) connectivity and electronic health record (EHR) support
- Care managers who educate members and partner with providers to ensure appropriate medically-necessary services are delivered to the member
- Disease managers who provide health education and chronic disease health coaching to members
- CommUnity Assistance Line offering connections to community resources to help address social barriers and needs through our award-winning proprietary Health*Connections* model
- Member incentives and education programs to support healthy behaviors, member empowerment and member engagement in their own health care
- Centralized telephonic outreach program with outreach specialists who contact members with identified care gaps and initiate a three-way call with the member's provider to help set-up an appointment to close the care gap
- Member engagement unit that outreaches to members about recent emergency department visits to reconnect them to their PCP and conducts discharge follow-up
- Integrated system of care focused on the collaboration of behavioral health providers with PCPs, service providers, hospitals and consumer/peer providers

Additional strategies we will deploy in Nebraska to promote access to primary care include:

- **Creating Access to Medical and Health Homes:** Upon contract award, WellCare will implement our Nebraska Patient Centered Medical Home (PCMH) program. In addition to aligning members with provider practices that have attained PCMH recognition, WellCare of Nebraska will increase the number of smaller provider practices attaining PCMH recognition. Our PCMH program provides a spectrum of resources to interested providers, from educational sessions about PCMH concepts, to coaching assistance in helping interpret PCMH recognition requirements and reviewing documentation for a successful recognition. This program facilitates awareness of the PCMH recognition program and helps providers decide if they are ready to pursue PCMH recognition.
- **Rewarding Members for Establishing a Relationship with Their Primary Care Provider:** WellCare's Healthy Rewards Program encourages personal responsibility by rewarding members who complete specific preventive health, wellness and engagement milestones with a reloadable

Healthy Rewards debit card. The Healthy Rewards debit card is credited with dollars upon completion of specific activities and services, including an initial visit with their primary care provider within the first 90 days of their enrollment, which is important in creating a positive relationship with their provider.

- **Enabling Care Through a Telehealth Program:** Telehealth provides a tangible, impactful way to expand access to care for members in areas that have few providers or in instances where a member has difficulty traveling to be seen. Among its many benefits, telehealth increases access to specialty care for patients in rural and frontier areas, decreases travel time and saves money for patients and caretakers. To that end, we will promote telehealth services in Nebraska through three primary avenues:
  - Developing reimbursement methodologies to make it worthwhile for providers to use existing technologies to conduct telehealth such as reimbursement for the hosting site
  - Helping support, through grant funds, the development of new telehealth sites in remote areas where such services don't currently exist
  - Providing for the technology to support direct provider to member care using telehealth technologies, such as Cobalt Therapeutics, an online tool for members to access Cognitive Behavioral therapy and self-management tools; or through our relationship with American Well, a telehealth company that provides a network of available providers online 24/7.

Strategies to Promote the Use of Urgent Care Centers and Retail Clinics

As part of our network development efforts, we will work diligently to include urgent care centers and retail clinics in our network. As we do in our affiliate Medicaid plans, we will make it easy for members to locate participating centers in our printed provider directories, through our Find-a-Provider tool on the Member Portal and through our MyWellCare mobile application. WellCare of Nebraska members will be able to download our MyWellCare application to their Apple or Android device to have easy access to a number of important plan details including our Find-a-Provider tool and Quick Care (urgent care locator). Additionally, the 24-hour nurse line will refer members to urgent care centers if the clinical guidelines drive toward that solution for members after hours.

Strategies to Address Super-Utilizers Including Members with Asthma, Diabetes, Chronic Pain, and Behavioral Health Conditions

Tracking utilization and intervening with Care Management

The key to addressing "super-utilizers" with multiple chronic conditions is found in our care management model. All members are stratified based on their utilization patters and health conditions. Those with the most acute needs are further assessed and placed into various levels of care management, up to and including, in-person field-based care management where dedicated and specially trained staff meet members in their homes, nursing facilities, rehab facilities or wherever they are to develop a care plan with the primary goals of improved health outcomes and enhanced quality of life, which naturally lead to less utilization of unnecessary hospital and emergency department services.

As part of our processes, we regularly track members' utilization and identify outliers who need additional interventions. WellCare's Medical Directors conduct regular clinical rounds for members where data shows them as outside of norms. Our concurrent review nurses and behavioral health professionals, care managers, pharmacy staff and others as needed participate in the meetings. The team discusses members' cases including those whose length of stay is greater than 14 days, NICU babies, those with complex medical needs, those with frequent admissions, and those with barriers to discharge, and seeks to find interventions to help maintain them in their homes and communities.

Disease Management Programming

The WellCare Disease Management Program is designed to be complimentary and supportive to our

members. A member may be referred directly to the Disease Management Program or referred upon completion of the short-term or Complex Case Management Programs. The Disease Management Program staff has full view of the member's assessments, case notes and health care claims to deliver education, guidance and support for the primary chronic condition for which a member may need additional support. The six key chronic conditions that are addressed in the Disease Management Program are:

- Asthma
- Coronary Artery Disease,
- Congestive Heart Failure
- Diabetes and
- Hypertension
- Chronic Obstructive Pulmonary Disease

Disease Management Program members are offered supportive disease specific educational materials written in easy to understand language for better management of their condition. Upon completion of the Disease Management Program, the member is offered supplemental condition specific mailings twice a year via mail as long as desired.

Strategies to Address Members with Behavioral Health Conditions

In addition to our targeted care management program for members with Severe Mental Illness or Serious Emotional Disturbance, we will offer a variety of interventions including:

- ***24-Hour Behavioral Health Crisis Line:*** WellCare will provide members with access to a 24-hour behavioral health crisis line. Should a member contact the 24/7 Behavioral Health Crisis Line, the call will be answered by a specially trained, non-clinician, within established time frames for call handling. If the call is a true crisis call, a behavioral health clinician will immediately join the call to assess, support and manage the situation for the most timely and effective outcome for the member in need.
- ***Homeless Outreach:*** WellCare will collaborate with local community based organizations to create additional services such as behavioral health assessments, parenting support, group therapy, nutritional education and medical access that impact retention rates and wait times of homeless community members. The focus of the interventions will be on increasing the longevity of stabilization and evaluating the impact of health outcomes.
- ***Cobalt Therapeutics:*** WellCare provides free, confidential online cognitive behavioral therapy through the COBALT Therapeutics Program. COBALT is a web-based program that offers a portfolio of behavioral health self-management tools for a variety of conditions. The use of COBALT has been shown effective in engaging members in appropriate self-care by reducing self-destructive cognitive and behavioral patterns caused by depression, anxiety, insomnia and substance use.

SECTION IV.N UTILIZATION MANAGEMENT

89. Describe the MCO's proposed MTM program, including a description of the inclusion criteria that the MCO proposes to use. Also, include any vendor(s) that will be subcontracted by the MCO to perform or support MTM services. Provide a detailed description of tools the MCO will use to ensure the active engagement of the retail pharmacies in the MTM program. *(Page limit 4 pages)*

IMPROVING POPULATION HEALTH THROUGH OUR MEDICATION THERAPY MANAGEMENT PROGRAM

For over 20 years, WellCare has been entrusted to ensure safe and effective medication use among our Medicaid members. Developed in cooperation with licensed and practicing pharmacists and physicians, our medication therapy management (MTM) program, The Healthy Living Program, is designed to proactively identify members who may be at risk of experiencing potential drug therapy problems, such as side effects, and help prevent these problems from occurring. Through a proven combination of person-centered interventions targeted at prescribers, pharmacists, members, and other health care professionals, we help members live healthier, feel better, and take active control of their health.

WellCare offers a variety of programs to meet the needs of our diverse Medicaid members. Each of these programs is designed to meet specific programs goals and objectives but our general framework includes:

- Adoption of nationally-recognized clinical guidelines
- Use of evidence- and outcomes-based care processes
- Personal consultation with pharmacists and prescribers
- Targeted member education about potential drug therapy problems and medication safety
- Access to online health and medication resources through our member portal
- Access to our 24 hour nurse help line, where members can ask questions about prescription and over-the-counter medications, herbal supplements, and/or health conditions

Advancing the Care of our Members Through Improved Medication Use

In 2014, we successfully decreased antipsychotic polypharmacy over 62 percent through our Antipsychotic Medication Therapy Management Program in our affiliate Medicaid plan in Florida.

WELLCARE'S PROPOSED MTM PROGRAM FOR NEBRASKA HERITAGE HEALTH MEMBERS

Medicaid beneficiaries, especially those with disabilities, are more likely to have chronic conditions. When not properly cared for and managed, these members experience higher utilization of emergency and acute care facilities and higher rates of hospitalization. While medication is a cost-effective way to manage many chronic conditions, three out of four people with chronic conditions are not on optimal therapy. Upon contract award, we will implement an MTM program in Nebraska. Our program will be based on our experience with MTM programs as well as our existing framework but modified to meet the needs of Nebraska Heritage Health members. Our MTM program will feature the following components:

- **Psychotropic Medications Program:** This program provides targeted provider outreach and education regarding members who may be chronic over-utilizers of multiple antipsychotics as well as those with inappropriate use of antipsychotics based on age or diagnosis.
- **Core Safety and Monitoring Program (Medications at Risk of Abuse):** This program provides active, continuous identification of potential fraud, waste, and abuse through retrospective review of and stratification of questionable utilization profiles. Usage information is sent directly to prescribers with case referral to our special investigations unit for follow up.

- **Medication Adherence Program:** This program provides individualized, tailored provider messages to promote optimal adherence for members with any one of eleven targeted prevalent and costly medical conditions.
- **Gaps in Care Program:** This program targets physicians of members diagnosed with any one of six designated chronic conditions that are best managed with combination therapy providing timely physician alerts to help ensure members are on all necessary medications.
- **Polypharmacy Program:** This program uses clinical pharmacists to identify members who are high utilizers of medications, including dual eligibles, and provides clinical pharmacy intervention in order to prevent and/or resolves drug therapy problems related to appropriate medication use, indication, safety, effectiveness and compliance.
- **ADHD Medication in Children Program:** This program targets members receiving ADHD medications and their physicians to ensure appropriate medication use and follow up in accordance with nationally-recognized, evidence-based guidelines for ADHD.
- **Medication Reconciliation:** Through this medication therapy management program, our clinical pharmacists and concurrent review professionals work with members who are hospitalized and reconcile their medications as a part of our approach to comprehensive discharge planning.

Helping Children Prescribed ADHD Medications

Through an effective combination of provider education, clinical support tools, and member engagement, our affiliate Medicaid plan in Kentucky improved management of members prescribed ADHD medications by nearly 4 % points in two years.

Inclusion Criteria for Our MTM Program: Identifying Members with Complex Medication Regimens

As outlined in **Figure 7** below, each MTM program features a specific set of inclusion criteria based on the program's focus. Once the inclusion criteria is defined, we implement scheduled queries to automatically mine our pharmacy and medical claims data to identify members who qualify for our MTM programs.

Figure 7

CRITERIA FOR INCLUSION IN WELLCARE'S MTM PROGRAM	
Program	**Critreia**
Psychotropic Medications Program	Enrolled with WellCare at least 90 calendar days with more than two prescriptions for antipsychotic medications within a 90 day period OR two or more prescriptions for antipsychotics medications related to dementia, OR two or more prescriptions for antipsychotic medications for members greater than 65 years of age
Core Safety and Monitoring Program (Medications at Risk of Abuse)	Uses a proprietary algorithm to identify members with suspicious behavior patterns including high number of controlled substance claims, multiple prescribers of controlled substances, prescriptions filled at multiple pharmacies, excessive utilization, geographic distribution of controlled substance prescribers and pharmacies, or high total claim costs
Medication Adherence Program	Members diagnosed with behavioral health conditions (i.e., depression, schizophrenia), benign prostatic hypertrophy, breast cancer, coronary artery disease, diabetes, heart failure, high cholesterol, hypertension, steoporosis, Parkinson's disease, or respiratory diseases (i.e., asthma)

Gaps in Care Program	Members diagnosed with coronary artery disease, diabetes, heart failure, osteoporosis, respiratory diseases, or rheumatoid arthritis
Polypharmacy Program	Enrolled with WellCare with prescriptions for ten or more chronic medications over a 90 day period
ADHD Medication in Children Program	Members 3 to 18 years of age who have been dispensed an ADHD medication including CNS stimulants alpha-2 receptor agonists, and miscellaneous ADHD medications
Medication Reconciliation	Members who are hospitalized who are at high-risk for post-discharge complications due to their medication profile

The above MTM programs include coordination among WellCare, the member, the pharmacist, and the prescriber using various means of communication and education. Our outreach is designed to enhance members' understanding of their prescriptions and engage them in education about their medication and efforts to improve their compliance with their prescribed medication regimens. Our outreach also educates members about how to effectively communicate their preferences and needs with their prescribers to promote shared decision-making, which empowers members to have greater personal responsibility for their health care.

Our MTM program features robust data collection and analysis of pharmacy-related health and health care delivery data for WellCare members so we may continually measure progress of our programs and, more importantly, the health outcomes of those we serve. This will be expanded to include Nebraska. We objectively evaluate the effectiveness of our interventions in their ability to achieve desired outcomes. This critical analysis allows us to identify opportunities to improve our program design and thereby increase performance outcomes and, overall, improve of our MTM model of care. WellCare commits to submitting an annual report to the Department of Health and Human Services (DHHS), Division of Medicaid & Long-Term Care's (MLTC) that describes our MTM program activities, the relative effectiveness of our MTM program's efforts over the reporting period, and our activities planned for the next reporting period.

WellCare's Use of Subcontractors to Supplement our MTM Programs and Services

Guided by Exceptional Leadership

Our Senior Director, Pharmacy Clinical Programs who oversees our MTM program is one of only 845 Board Certified Psychiatric Pharmacists in the world and serves on a national MTM Technical Expert panel.

Our MTM program is managed internally by our specially-trained, highly-qualified pharmacy team, which includes our Chief Pharmacy Officer, Director of MTM Services, and Pharmacy Managers. **Over 80 percent of WellCare's MTM clinical pharmacists have successfully completed the American Pharmacists Association's certification training program for Delivering Medication Therapy Management Services.** This innovative and interactive certificate training program explores the pharmacist's role in providing MTM services and teaches pharmacists the essential skills necessary to become a successful MTM practitioner. The certificate training program enhances pharmacists' clinical expertise in evaluating complicated medication regimens, identifying medication-related problems, and making recommendations to patients, caregivers, and health care professionals. In addition to having pharmacists certified in MTM services, our MTM staff includes a Board Certified Pharmacotherapy Specialist and a Board Certified Psychiatric Pharmacist. Board certification through the Board of Pharmacy Specialties is recognized as the gold standard for determining which pharmacists are qualified to contribute at advanced practice levels. Our team also includes two Clinical Geriatric Practitioners. Geriatric pharmacists are specially trained to focus on the total patient, looking at all of the diseases and all of the medicines to evaluate appropriateness of drug therapy. The geriatric pharmacist is also trained to know that the elderly are subject to conditions, such as falls, delirium, and cognitive impairment and drug therapy must be

evaluated with respect to the potential for medications to cause or worsen "geriatric syndromes." WellCare will use our pharmacy benefit manager to supplement our MTM programs and services including the Core Safety and Monitoring, Gaps in Care, and Medication Adherence Programs.

WELLCARE'S TOOLS TO ENGAGE RETAIL PHARMACIES IN IMPROVING MEDICATION USE IN OUR MEMBERS WITH COMPLEX MEDICATION REGIMENS

We use a variety of tools to engage our retail pharmacies in improving medication use in our members with complex medication regimens. Consistent with existing best practices, our pharmacy claims processing system assesses each active drug regimen for members in terms of ingredient duplication, therapeutic duplication, drug/drug interactions, drug/age contraindications, drug/gender limitations, drug/pregnancy contraindications, drug/disease contraindications, over- and under-utilization, incorrect dosage or duration of drug treatment, clinical abuse or misuse, and other clinically-appropriate evaluations. By applying prospective drug utilization criteria we engage pharmacies at the point of sale (POS) using National Council for Prescription Drug Programs (NCPDP) telecommunications standards to message the pharmacy network about preferred alternative medication(s), quantity limits, and use of generics whenever available and therapeutically appropriate.

In addition, we engage retail pharmacies through real-time screening and application of our DUR criteria, to identify potential adverse drug events for every prescription adjudicated. The system monitors prescription claims for potential problems against pharmacy and medical information and returns an alert, when appropriate, via the online POS claims adjudication system. Examples of edits include therapeutic dose (monitoring medications' total daily dose based upon FDA maximum daily dosing limits), drug-drug interaction screening (monitoring members' prescription history for interaction between two drugs), and duplicate therapy screening (monitoring for duplication of same medication classes). When a potential conflict is identified, an interventional message is delivered to the pharmacy real-time to engage them. Alerts include:

- **Messaging:** Alerts to network pharmacy during prescription processing to inform the pharmacist of a potential drug conflict.
- **Soft Messaging:** Our override-able alerts to the network pharmacy at the POS. Pharmacists are required to review the potential medication conflict, take action, and enter standard NCPDP conflict, intervention, and outcome codes for prescription adjudication.
- **Hard Messaging:** Does not allow an override at the POS; the pharmacist contacts us to provide appropriate information to receive override.

In addition to the above tools, WellCare will use EQuIPP (Electronic Quality Improvement Platform for Plans and Pharmacies) to ensure active engagement through retail pharmacies in our MTM program. EQuIPP is a web-based, performance information management platform that makes unbiased, benchmarked performance data available to both health plans and community pharmacy organizations. EQuIPP allows us to better understand the impact that our pharmacy providers have on the quality of care delivered to our members by packaging benchmarked performance information, based on accepted quality measures, in user-friendly dashboards within the EQuIPP platform. The state-of-the-art EQuIPP solution, brings a level of standardization to the measurement of the quality of medication use, and makes this information accessible and easy to understand. By doing so, EQuIPP facilitates an environment where WellCare and our contracted pharmacies can engage in strategic relationships to address improvements in the quality of medication use for our members. And because EQuIPP is a web-based solution, our contracted pharmacies will not need to invest in any special hardware, software, or resources other than internet access, which they would already have in place, making for ease of implementation.

SECTION IV.N UTILIZATION MANAGEMENT

90. Describe the MCO's DUR program including prospective and retrospective DUR activities. Include a description of:

- Prescriber and pharmacy education programs.
- Collaboration with MLTC's DUR.
- How DUR results will be used to inform MTM education and outreach.

(Page limit 3 pages)

WELLCARE'S DRUG UTILIZATION MANAGEMENT PROGRAM ENSURES APPROPRIATE MEDICATION DECISION-MAKING AND POSITIVE HEALTH OUTCOMES

WellCare's Drug Utilization Review (DUR) program provides members with the best quality prescription drug benefit at the lowest possible cost while ensuring members are given appropriate access to medically-necessary drugs in a timely manner. Our program, which is under the direction of our DUR Committee and our Pharmacy and Therapeutics (P&T) Committee, features a comprehensive review of our members' pharmacy data prospectively, concurrently, and retrospectively to dispensing to ensure appropriate medication decision-making and positive health outcomes. Our DUR programs include corrective action, prescriber feedback and further evaluations. We acknowledge our requirement to submit guidelines for our DUR program to the Department of Health and Human Services (DHHS), Division of Medicaid & Long-Term Care's (MLTC) for review and approval at least 60 calendar days prior to the contract's start date as well as any intended implementation of changes.

WellCare's Prospective Drug Utilization Review Activities Deliver Cost-Effective Utilization

Our pharmacy benefit manager's (PBMs) pharmacy claims system provides a central electronic repository for capturing, storing, and updating prospective DUR data. Consistent with existing best practices, the claims processing system assesses each active drug regimen of members in terms of ingredient duplication, therapeutic duplication, drug/drug interactions, drug/age contraindications, drug/gender limitations, drug/pregnancy contraindications, drug/disease contraindications, over- and under-utilization, incorrect dosage or duration of drug treatment, clinical abuse or misuse, and other clinically-appropriate evaluations. Our prospective drug utilization activities include, but are not limited to, step therapy, quantity limits, prior authorization, and generic utilization.

Figure 8

As noted in **Figure 8** our PBM implements our prospective drug utilization management tools at the point of sale (POS) for our 70,000 contracted pharmacies nationwide by using National Council for Prescription Drug Programs (NCPDP) telecommunications standards to message the pharmacy network about

- Preferred alternative medication(s)
- Quantity limits
- Use of generics whenever available and therapeutically appropriate

WellCare's Concurrent Drug Utilization Review Activities Reasonably and Appropriately Reduce Health Care Costs

Our PBM maintains a profile of each member's medication history, consisting of all pharmacy claims submitted to them by any pharmacy provider. Through real-time screening and application of our DUR criteria, our PBM identifies potential adverse drug events for every prescription adjudicated. The system monitors prescription claims for potential problems against pharmacy and medical information and

returns an alert, when appropriate, via the online POS claims adjudication system. Examples of edits include therapeutic dose (monitoring medications' total daily dose based upon FDA maximum daily dosing limits), drug-drug interaction screening (monitoring members' prescription history for interaction between two drugs), and duplicate therapy screening (monitoring for duplication of same medication classes). When a potential conflict is identified, an interventional message is delivered to the pharmacy real-time to alert them. Alerts include:

- **Messaging:** Alerts to network pharmacy during prescription processing to inform the pharmacist of a potential drug conflict.
- **Soft Messaging:** Our override-able alerts to the network pharmacy at the POS. Pharmacists are required to review the potential medication conflict, take action, and enter standard NCPDP conflict, intervention, and outcome codes for prescription adjudication.
- **Hard Messaging:** Does not allow an override at the POS; the pharmacist contacts us to provide appropriate information to receive override.

Each month we receive summary and detail reports from concurrent review DUR activity. The data is evaluated by our DUR Committee. Annually, our DUR Committee reviews each class of DUR edits for trends and potential program enhancements.

Driving Clinical Quality Through our Retrospective Drug Utilization Review Activities

Our retrospective DURs (rDURs) are executed with routine examination of claims data and other records, through computerized drug claims processing and information retrieval systems to assess the clinical quality of prescribing and dispensing of our formulary medications. Our rDUR criteria are designed to identify patterns of fraud, abuse, gross overuse or inappropriate or medically unnecessary care among physicians, pharmacists, and members associated with specific drugs or groups of drugs. WellCare performs retrospective DUR projects throughout the year to improve the quality of health services provided to our members. We acknowledge MLTC's requirement to perform, at a minimum, one rDUR intervention each quarter. Based on our historical activity, we will exceed that requirement. For example in 2014, we performed seven rDURs, examples included *Evaluation of Potentially Significant Drug Interactions in Members Taking Sofosbuvir* and *Duplication of Therapy of Acetylcholinesterase Inhibitors*. In 2016, we are enhancing our rDUR to include Retrospective Safety Review within 72 hours. Through this program clinical pharmacists will review flagged claims within 72 hours of adjudication sending alerts to prescribers requesting a response. In severe cases, the clinical pharmacist will call the pharmacy or prescriber directly.

Prescriber and Pharmacy Educational Intervention Program

Our Pharmacy Network Improvement Program (NIP) targets physicians and provides education on pharmacy utilization and cost trends as well as quality care gaps related to medication prescribing and adherence. Our local Pharmacy Directors use physician prescribing reports, evidence-based drug therapy, face-to-face visits, and telephonic communication to modify prescribing behaviors with the intent to improve the quality of care for our members in the most cost-effective manner. A physician's pharmacy cost per member per month (PMPM), prescriptions per member per month (SPMPM), generic dispensing rate (GDR) as well as targeted high-cost, non-formulary and utilization of non-first-line agents are evaluated against the state or region-specific benchmarks and discussed in-depth with the physician in an open dialogue format. We educate physician on key pharmacy resources such as the preferred drug list, prior authorization, and our web-based drug search tool. The State Pharmacy Directors also provide on-going follow up and assistance on any prior authorization or adjudication issues or questions.

We use an academic detailing framework to conduct interactive physician education providing unbiased, non-commercial, evidence-based information about medications and other therapeutic decisions. It is usually provided to clinicians one-on-one in their own offices. The approach is structured to provide practitioners with neutral, rigorous information to optimize their clinical decision-making. Detailers

provide clinical outreach education information interactively to health care providers in one-on-one settings. This education synthesizes up-to-date evidence about comparative efficacy, safety, and cost-effectiveness of commonly used therapies or medical practices. Communication techniques include using principles of social marketing to gain commitment to behavior change. This academically-based "detailing" represents a useful and cost-effective way to improve the quality of drug-therapy decisions and reduce unnecessary expenditures. Each of our Directors, State Pharmacy, completes at least 25 visits per month often to multi-prescriber offices.

WellCare manages a robust Pharmacy Lock-In program for those members whose pharmacy utilization patterns are excessive and inappropriate. The program is designed to provide controls over which pharmacy the members can access and provide appropriate referrals to case management, thereby improving quality and safety of care, providing continuity of medical care, minimizing duplicate therapy or excessive drug quantities, and reducing unnecessary or inappropriate physician, pharmacy, and/or emergency room services. There are several ways in which we identify members as potential candidates for the Lock-In program including rDUR of pharmacy claims data, physician referral, and pharmacist referral. Once a member has been identified as potentially benefiting from our Pharmacy Lock-In program, we conduct an analysis of pharmacy claims data to determine the appropriateness of pharmacy utilization. If the patterns are appropriate and medically-justified, no further action is taken. If, however, the patterns demonstrate inappropriate utilization, interventions are initiated. Interventions include enrolling the member in a pharmacy or physician lock-in program, physician outreach, member outreach, and member referral to care management.

WellCare's Commitment to Collaborating with MLTCs DUR

As part of our commitment to ongoing collaboration with MLTC's DUR, on a quarterly basis we will submit documentation needed to support preparation of MLTC's annual CMS DUR report. We will also nominate a non-voting staff member to attend the Nebraska Drug Utilization Review Board meetings. We acknowledge that we must obtain MLTC's written approval of our nominee. WellCare will leverage our engagement in the DUR Board meetings as vehicle to provide input into MLTC's DUR as well as to identify directives or ideas that can implemented by WellCare.

Using Results of Reviews to Inform MTM Education and Outreach Needs

WellCare maintains highly integrated DUR and Medication Therapy Management (MTM) programs. Our Sr. Director of Clinical Programs oversees our MTM program and is a voting member of our DUR Committee. Our DUR Committee identifies opportunities to improve medication utilization by assessing a combination of claims- and outcomes-based data. The DUR Committee, including our MTM staff, identifies specific ways they can apply pharmacy claims data to identify members at risk of experiencing potential drug therapy problems (i.e., side effects, drug interactions). Our MTM team then designs programs based on inputs from the DUR Committee and begins engaging members, physicians, and pharmacists in population health-based interventions. The MTM team provides process and outcomes reporting back to the DUR Committee to measure program effectiveness. In addition, certain DUR projects may include recommendations for outreach by our MTM team, outside of their standard medication review processes. For example, based on a DUR on a therapeutic class or disease state, we may identify areas of more appropriate drug therapy. If the DUR committee approves outreach to physicians and/or members based on this drug utilization review, the MTM team implements the initiative again providing process and outcomes reporting to the DUR Committee.

SECTION IV.N UTILIZATION MANAGEMENT

91. Describe the MCO's proposed psychotropic drug oversight program to ensure appropriate utilization, including a description of the inclusion criteria that the MCO proposes to use to monitor the appropriate use of psychotropic medications. Provide a detailed description of:

- Tools to monitor and measure psychotropic prescribing patterns and usage.
- Processes to actively engage retail pharmacies and pharmacists in the oversight program.
- Plans for prescriber and pharmacy interventions that reduce unsupported atypical antipsychotic prescribing and prescribing of multiple medications to the same member.
- Processes to ensure that psychotropic medications prescribed to children are being used appropriately and for the indicated diagnosis.

(Page limit 4 pages)

Experience and Expertise in Overseeing the Use of Psychotropic Medications

WellCare serves nearly 281,000 members on psychotropic medications, representing 12 percent of our Medicaid membership nationally and over 25 percent of our Medicaid members with prescriptions. As a fully-integrated medical, behavioral, and pharmacy services managed care organization, we offer significant experience and expertise serving those diagnosed with mental health conditions and in ensuring appropriate use of psychotropic medications. We also serve a significant role in preventing misuse of these often powerful drugs.

Our comprehensive psychotropic drug oversight program uses evidence- and outcomes-based processes to ensure appropriate utilization across a variety of medications including antipsychotics, antidepressants, and medications for the treatment of Attention Deficit Hyperactivity Disorder (ADHD). Our program is under the direction of our Pharmacy & Therapeutics (P&T) Committee, which includes a psychiatrist in its membership, and is executed through our local managed care operations teams, our national in-house behavioral health care management and pharmacy teams, and our pharmacy benefit manager (PBM).

Expanding Our Psychotropic Drug Oversight Program to Meet Nebraska's Needs

Upon contract award, we will implement a comprehensive psychotropic drug oversight program. Our program will be based on our existing framework and best practices and modified to meet the specific needs of Nebraska's Heritage Health members. The program, based on nationally-recognized guidelines including the U.S. Food and Drug Administration (FDA) and Micromedex, will feature training and education, ongoing data collection, and real-time surveillance systems to identify high-risk cases including those potentially over-reliant on psychotropic medications, including children and adolescents in foster care. Our comprehensive program will offer an array of member and provider interventions aimed at improving healthcare quality and reducing costs. Components of our program will include:

Advancing the Care of our Members Through Improved Medication Use

In 2014, in our affiliate Medicaid plan in Florida, we reduced antipsychotic polypharmacy over 62 percent through our Antipsychotic Medication Program.

- **Children Dispensed ADHD Medication:** This program targets members receiving ADHD medications and their physicians to ensure appropriate medication use and follow up in accordance with nationally-recognized, evidence-based guidelines for ADHD.
- **Medication Adherence Program:** This program provides individualized, tailored provider outreach

to promote optimal adherence for members diagnosed with one of eleven targeted prevalent and costly medical conditions including those diagnosed with depression or schizophrenia.

- **Members Prescribed Psychotropic Medications:** This program provides targeted provider outreach and education regarding members who are chronic over-utilizers of multiple antipsychotics as well as those with inappropriate use of antipsychotics based on age or diagnosis.

Under our program, we will require prior authorizations and additional edits for psychotropic drugs prescribed to youth, at a minimum, following MLTC guidelines as provided in the RFP. We will also ensure a review of the prior authorization request by a State-licensed child and adolescent psychiatrist, when indicated. Through our program, we will manage the prescribing of psychoactive medications to members age 20 and under by:

- Measuring psychopharmacology usage and prescribing patterns
- Monitoring the use of, and the claims related to, psychopharmacology to identify target populations (e.g., age subsets) for proposed interventions
- Preparing member-specific profiles of medication use to inform our interventions with prescribers
- Developing prescriber and pharmacy interventions that reduce unsupported atypical antipsychotic prescribing and prescribing of multiple medications to the same member

As part of our implementation, we will continue to oversee, monitor, and assist with the management of our PBM's activities related to the use of mental health drugs for children, including the establishment of prior authorization criteria, clinical appropriateness of use, and step therapy requirements for the use of stimulants and antipsychotics for all enrolled members under age 18. This will include maintenance of point of service (POS) system edits as outlined in Attachment 8 of the RFP.

We will submit reports to MLTC detailing approvals and denials of psychotropic medication requests for youth. Our reports will use the eligibility categories provided to us via the enrollment files and will be submitted as specified in the RFP. As we do in our affiliate Medicaid plans, we will actively participate and collaborate with inter-agency workgroups and initiatives, when requested by MLTC. We will provide recommendations for how MLTC can influence regulatory and legislative changes or redesign healthcare to improve the quality of care and costs associated with the use of psychotropic medications.

Proposed Inclusion Criteria to Monitor Appropriate Use of Psychotropic Medications

As outlined in **Figure 9** below, each component of our psychotropic drug oversight program features specific inclusion criteria based on the program's focus. Using the defined criteria, we implement the specifications within our real-time surveillance systems to mine pharmacy and medical claims data to identify members, pharmacies, and prescribers to target through our program.

Figure 9

Criteria for Inclusion in WellCare's Psychotropic Drug Oversight Program	
Program Component	**Criteria**
ADHD Medication in Children Program	Members three to 18 years of age who have been dispensed an ADHD medication defined as CNS stimulants, alpha-2 receptor agonists, and miscellaneous ADHD medications
Medication Adherence	Members diagnosed with depression and schizophrenia
Psychotropic Medications Program	Members with more than two prescriptions for antipsychotic medications within a 90 day period OR two or more prescriptions for antipsychotics medications related to dementia, OR two or more prescriptions for antipsychotic medications for members greater than 65 years of age

WellCare's Tools to Monitor & Measure Prescribing Patterns and Usage

Our proprietary Pharmacy Toolbox is central to our psychotropic drug surveillance efforts. Each month our Pharmacy team uses our Pharmacy Toolbox to monitor and measure prescribing patterns and usage for a variety of pharmacy-related measures including psychotropic medications. As represented in **Figure 10**, our Toolbox reports display utilization, drug evaluation review, and physician data by state for each month as well as year-to-date including

Figure 10

- **Atypical Antipsychotics for Members Under Ten:** Detailed reporting for members under ten years of age prescribed Atypical Antipsychotics (excluding those diagnosed with Autism)
- **Pediatric Prescribing of ADHD Meds:** Detailed reporting for members under 17 years of age using ADHD medications
- **Polypharmacy of Behavioral Health Medications:** Detailed reporting of members who have two or more different antipsychotic medications

Engaging Retail Pharmacies and Pharmacists in Our Psychotropic Drug Oversight Program

Our PBM maintains a profile of each member's medication history, consisting of all pharmacy claims submitted to them by any pharmacy provider. Through real-time surveillance, our PBM identifies potential issues for every prescription adjudicated. The system monitors prescription claims for potential problems against pharmacy and medical information and embedded logic and returns an alert, when appropriate, via the online point-of-service (POS) claims adjudication system to any one of our 70,000 contracted Medicaid pharmacies. When a potential issue is identified, a message is delivered to the pharmacy and pharmacist real-time to alert them. Alerts include:

- **Messaging:** Alerts to network pharmacy during prescription processing to inform the pharmacist of a potential drug conflict
- **Soft Messaging:** Our override-able alerts to the network pharmacy at the POS. Pharmacists are required to review the potential medication conflict, take action, and enter standard NCPDP conflict, intervention, and outcome codes for prescription adjudication
- **Hard Messaging:** Does not allow an override at the POS; the pharmacist contacts us to provide appropriate information to receive override

Plans for Prescriber and Pharmacy Interventions to Reduce Unsupported Atypical Antipsychotic Prescribing and Prescribing of Multiple Medications to the Same Member

The FDA has approved antipsychotics of both classes (FGA and SGA) for the treatment of schizophrenia and bipolar disorder. More recently, some atypical antipsychotics have been approved for indications in major depressive disorder and autism spectrum disorders. Prescribing of the atypicals (SGA) has expanded beyond the approved indications, but their effectiveness, benefits, and adverse effects in off-label uses are not well understood. Additionally, robust evidence is lacking for the effectiveness of antipsychotic polypharmacy. Moreover, significant concerns exist fueled by the fact that most reasons are not justified or supported by data, and there are potential downsides to combining antipsychotics such as high total dosage, increased acute and long-term side effects, drug interactions, increased cost and risk of mortality, as well as increased risk of non-adherence.

Given this, WellCare will apply a variety of population health-based interventions to reduce unsupported atypical antipsychotic prescribing and prevent multiple medications to the same member including the aforementioned POS and

- **Behavioral Health Clinical Practice Guidelines:** WellCare has 14 behavioral health clinical guidelines including Antipsychotic Medication Use in Children & Adolescent, which specifically addresses the use of atypical antipsychotic prescribing in children. These guidelines reinforce the recommendations of leading authorities including the American Academy of Pediatrics and the American Academy of Child and Adolescent Psychiatry. These guidelines are reviewed with targeted providers and available for general use via our Provider Portal.
- **Pharmacy Toolbox Reports:** The aforementioned Pharmacy Toolbox reports identify negative trends among prescribers, including antipsychotic polypharmacy as represented in **Figure 11**, and identify specific prescribers for education and training. These reports are used by our local Medical and Pharmacy Directors during one-on-one meetings with prescribers and they are distributed via our Provider Portal.

Figure 11

- **Pharmacy Network Improvement Program (NIP):** Our NIP program is designed to perform targeted prescriber education on pharmacy utilization and cost trends as well as quality care gaps related to medication prescribing and adherence. Our local Pharmacy Directors use prescribing reports to modify prescribing behaviors with the intent to improve the quality of care for our members in the most cost effective manner by promoting quality evidence-based drug therapy and best practices through face-to-face as well as telephonic communication with all of our providers. By applying an academic detailing framework, we conduct interactive educational outreach to prescribers to provide unbiased, non-commercial, evidence-based information about medications and other therapeutic decisions, with the goal of improving patient care. During these sessions we deliver current evidence about comparative efficacy, safety, and cost-effectiveness of commonly used therapies or medical practices and use techniques, include using principles of social marketing, to gain commitment to behavior change.
- **Behavioral Health Homes**: A component of responsibility for Behavioral Health Homes (BHH) is the monitoring of psychotropic medications for their assigned members. For those members whose treatment is being rendered in a BHH, we will provide reports concerning prescribing profiles and monitor their adherence to reducing inappropriate prescribing practices.
- **Targeted Prescriber Outreach:** Targeted written and telephonic outreach to physicians to ensure appropriate medication use and follow up in accordance with nationally-recognized, evidence-based guidelines.

Ensuring Appropriate Use of Psychotropic Medications in Children

In our affiliate Medicaid plan in Hawaii, we implemented rules associated with use of psychotropic medications in children. When a prescription is being filled for a defined set of medications, the system evaluates the prescription against the member's age. If the medication is not indicated, we immediately return a message to the pharmacy indicating so. As an added measure of oversight, when the age rules are satisfied, we require validation against specific ICD-10 codes to ensure the prescription is appropriate for the diagnosis. **As a result of implementing these edits in Hawaii, we have prevented inappropriate use of psychotropic medications for nearly ten percent of members equating to nearly $840,000 in savings annually.** Given our success, we will implement similar measures for Nebraska Heritage Health members so that when a prescription is attempted to be filled for a child or adolescent, there are controls in place based on age and diagnosis. The use of hard messaging will require direct interaction with WellCare in order to adjudicate the claim thereby allowing us to ensure appropriate use for children.

SECTION IV.N UTILIZATION MANAGEMENT

92. Describe the MCO's methodology to assess disparities in treatment among races and ethnic groups and correct those disparities. *(Page limit 2 pages)*

WORKING EVERY DAY TO REDUCE HEALTH DISPARITIES FOR 2.4 MILLION WELLCARE MEDICAID MEMBERS AND THE COMMUNITIES WE SERVE NATIONALLY

WellCare supports the Department of Health and Human Services' (DHHS) Office of Health Disparities & Health Equity (OHDHE) goal to "improve health outcomes of Nebraska's culturally diverse populations with a vision of health equity for all Nebraskans." We have been entrusted to serve 2.4 million Medicaid members nationally and we work tirelessly every day to reduce the burden of societal hardship they face as well as the inequalities seen in preventive health, chronic diseases, behavioral health, and health outcomes.

Through meetings with local providers, community leaders, and individuals in both the family and aged, blind and disabled programs in Nebraska, we understand the significant health challenges facing Nebraska. These challenges, specifically among racial ethnic minorities, Native Americans, and refugees and immigrants, are well-documented in the Nebraska Health Disparities Report produced by OHDHE (**Figure 12**). The following examples demonstrate the significant opportunities to promote health equality among all Nebraskans:

Figure 12

- Nebraska's African American community saw higher rates of infant mortality than the rest of the nation
- Heart disease remains a large problem in the Nebraskan African American and American Indian communities
- Twenty percent of Nebraskan African Americans and Hispanics report they were unable to see a doctor because of cost
- Only about 50 percent of American Indian women received first trimester prenatal care in 2006-2010
- The prevalence of diabetes is increasing with 14 percent of Hispanics diagnosed with diabetes and 13 percent of African Americans and American Indians populations, respectively

Our Methodology to Assess and Correct Health Disparities Among Races and Ethnic Groups

We applaud OHDHE's efforts to be the centralized source for information relevant to the health of minorities in Nebraska. As reflected in our approach and the examples that follow, we are poised to address the specific issues facing Nebraska Heritage Health members experiencing health disparities.

- For our initial assessment of health disparities, we will use the findings from Nebraska Health Disparities Report produced by OHDHE in 2015.
- Using this data, our Quality Improvement and Community Advocacy teams will identify the types and sources of disparities that exist among different cultural groups, including but not limited to racial ethnic minorities and the disabled community, as well as the factors that are influencing health outcomes.
- The findings and recommendations will be presented to our Utilization Management Committee, which will include participating community providers, for input and guidance.
- Multi-disciplinary workgroups comprised of Quality Improvement, Utilization Management, Care Management, Community Advocacy, our Tribal Liaison, and Network Management will design and implement targeted interventions aimed at members, physicians, other health care providers, community-based organizations, and others to eliminate barriers and close identified gaps.

- These teams will continue to work together, along with our Utilization Management (UMC) and Quality Assurance and Performance Improvement Committees (QAPIC) to continually assess the effectiveness of our interventions and ensure we successfully eliminate health disparities creating health equality for all Nebraskans. When race, ethnicity, and cultural variables are available in our systems, our team will apply these additional variables to reports to study trends.

In 2016 we will be enhancing our member identification and stratification criteria to include a number of lifestyle and cultural factors which will further enhance our ability to identify and intervene on factors contributing to health disparities.

Concurrent with the above ongoing activity, we will

- Promote and provide cultural competency training and conduct annual network reviews to ensure cultural diversity statewide, including nationality and language
- Collaborate with public health partners to develop and promote programs and best practices to achieve health equity
- Work in partnership with key stakeholders including local and regional health agencies, other state agencies, tribal entities, faith and community-based organizations to provide training, grants, community-based health activities

Community-Focused Activities to Target Cultural and Racial Disparities

WellCare of Nebraska engages in condition-specific activities in the local community that address cultural and racial disparities in healthcare access. Our approach is highly localized. For example, using the data from the 2010 Road to Health Report produced by the Nebraska Department of Health and Human Services, WellCare of Nebraska identified target locations to engage with our communities to expand the reach of our diabetes related efforts (Refer to **Figure 13** below).

Figure 13

Using this approach across other markets, WellCare has reached 3.9 million stakeholders through nearly 14,000 community activities since November 2011. More than 10 percent of these activities focused on cultures at-risk for the target condition, like diabetes, with the goal to assist members in their local community.

In Georgia, for example, our team is working with a housing complex in Chatham County with a high concentration African Americans with a diabetes diagnosis, many of whom are WellCare members. In partnership with the local Area Agency on Aging, the local chapter of the American Diabetes Association, the Lions Club and others, we are hosting a series of diabetes days, providing education, conducting care management services, A1C testing and more. Through this initiative, WellCare anticipates reaching nearly 300 people.

SECTION IV.O PROGRAM INTEGRITY

93. Describe the MCO's approach for meeting the Program Integrity requirements described in the RFP, including but not limited to a compliance plan for the prevention, detection, reporting, and implementation of corrective actions for suspected cases of FWA and erroneous payments. Include best practices the MCO has utilized in other states. (*Page limit 4 pages*

VALUING TAXPAYER DOLLARS: THE WELLCARE APPROACH TO PROGRAM INTEGRITY

With more than 20 years of experience solely focused on serving people receiving government-funded health benefits, WellCare has developed a robust set of advanced processes to protect taxpayer dollars. The process begins with establishing a strong administrative structure at the local level focused on program integrity efforts and supplemented by the strength of WellCare's teams across our affiliates and corporate partners dedicated to detecting, investigating and reporting on Fraud, Waste and Abuse (FWA) as well as preventing and recouping any erroneous payments.

A Program Integrity Process that Nets Results

In 2014, WellCare's SIU worked more than 2,300 leads and recovered $4.6 million. From January 1, 2015 through October 31, 2015, the SIU worked more than 2,100 leads and recovered $4 million with another $2 million pending recovery.

WellCare of Nebraska's on-site Program Integrity Officer will report directly to our local Chief Executive Officer and have on-site investigate staff as well as the full support of WellCare's Special Investigation's Unit (SIU). Additionally, we integrate our program integrity activities across all functional areas, so our Program Integrity staff members are supported by clinical, pharmacy and medical staff members, associates conducting quality management activities, member and provider services representatives, claims and coding professionals, auditors and those involved in compliance and regulatory affairs.

WellCare's SIU reports to the Vice President, Corporate Compliance Investigations, who in turn reports to the Chief Compliance Officer (CCO). The SIU maintains written policies and procedures, and adheres to standards of conduct that articulate WellCare's commitment to comply with all applicable federal and individual state standards. The SIU maintains training and education materials specific to FWA, in support of the overall Company Compliance Program, and assists in providing training to employees, business partners, and downstream entities. The SIU promotes the immediate reporting of suspected incidents of FWA by maintaining lines of communication to enable employees, members, providers, business associates and downstream entities to report FWA.

The SIU employs a team of knowledgeable professionals dedicated to detecting, investigating, preventing and remedying FWA. The SIU team includes investigators who collaborate with medical coding auditors and a clinical nurse in order to resolve allegations of FWA on the part of providers or members. The SIU's senior data analyst proactively identifies possible cases of FWA utilizing statistical analysis and data mining software. The SIU also employs business analysts and information case administrators, all of whom assist with case referrals, the case management system, the SIU anti-fraud hotline, respond to requests from government partners, and support the SIU's regulatory reporting responsibilities.

PREVENTING AND DETECTING FWA: WELLCARE'S APPROACH

The SIU uses a multi-faceted approach to combat suspected or potential FWA. This includes a combination of mining data to spot inconsistencies, application of various levels of pre and post-claim edits, leveraging of clinical expertise to identify and confirm unusual trends, follow-up on internal and

external referrals, use of a broad set of investigative tools and skills, and the deployment of education and awareness training program to maximize referrals. **Figure 1** outlines our technologies and strategies for FWA prevention and detection.

The first and most critical step to preventing FWA is provider and member education, where both providers and members are exposed to the basics of what constitutes fraudulent, wasteful or abusive activities as well as how to report and reporting protections. FWA is a topic in our handbooks, on our website, in various training materials and periodically in newsletters and other outreach methods.

Figure 1

WellCare's Technologies and Strategies for FWA Prevention and Detection	
Fraud and Abuse Hotline	The Compliance Department actively promotes timely reporting of suspected incidents of FWA by maintaining lines of communication to enable employees, providers, members, business associates and downstream entities to report FWA anonymously and confidentially to the Compliance Department via the referral mailbox or by calling the SIU hotline at 1-866-678-8355. Our website and manuals also contains information for members, providers and the general public on how to report suspected or known FWA.
Data Mining	The SIU uses data mining technologies to proactively identify potential FWA: ➢ The SIU employs a senior data analyst to conduct targeted claims queries, leveraging the Statistical Analysis System® data network to identify members and providers with suspicious activity or unusual patterns of behavior that might indicate FWA. ➢ We use an FWA analytics library to produce ad hoc reports for the identification and investigation of FWA. These reports include but are not limited to visit trend analysis, provider up-code checker, and hospital stay with no professional services, bell curve analysis and abnormal provider utilization. ➢ The SIU uses COGNOS® business intelligence software to produce a Physician Trend Report by specialty. This report enables the SIU to identify aberrant spikes or trends. When this analysis identifies a provider with suspicious activity, it generates a more detailed set of reports, allowing investigators to view the entire billing and claims history for that provider. ➢ The SIU recently implemented the General Dynamics STARS SOLUTIONS as a new FWA Analytical Tool that provides predictive models and algorithms that identify aberrant patterns and outliers. These outliers are prioritized and forwarded to investigators with the outcome of increased identification of FWA.
Claims System Edits	Claims system edits are designed to detect and prevent potential FWA. These edits include, but are not limited to reviews for: ➢ Member eligibility ➢ Medically unlikely services based on gender or age ➢ Non-covered services ➢ Invalid procedure codes ➢ Duplication of services ➢ Unbundling of services ➢ Frequency of services ➢ Diagnosis matches
Medical Management Activities	Medical Management activities (e.g., prior authorization, concurrent review, discharge planning, retrospective review and Provider profiling) include: 1) verifying Member eligibility; 2) reviewing the medical necessity of the service; 3) determining the appropriateness of the service being authorized; 4) verifying that the service is covered; and 5) referring Members to appropriate Providers. When the prior authorization process identifies FWA, the prior authorization will be denied, a notice of action will be sent to the Member and Provider, and a report will be sent to the SIU. Our SIU reviews, trends, and reports findings to regulators as necessary. In addition, medical management reports allow the SIU department to have multiple points of data to review and

WellCare's Technologies and Strategies for FWA Prevention and Detection	
	verify unusual patterns that may indicate potential fraud and abuse. Any unusual incident is documented and reported as outlined by WellCare policies and procedures.
Provider Services and Quality Improvement Personnel	Provider Services and Quality Improvement personnel are trained to be aware of possible and questionable indicators of FWA so that issues can be identified during routine office visits or medical record reviews. These employees report suspected FWA activities through the SIU for review and further action.
Provider Credentialing	Provider Credentialing prevents contracting with Providers previously found guilty of FWA. We validate the credentials of network Providers as part of initial contacting and we re-credential in accordance with NCQA criteria, and state and federal regulations. As part of this process, we collect and evaluate information about Providers on a monthly basis from a variety of sources (e.g., National Practitioners Data Bank, OIG list of Excluded Individuals or Entities, and applicable state professional licensure boards).
Statistically Valid Random Samples (SVRS) and Audits	WellCare's SIU conducts Statistically Valid Random Samples (SRVS) and audits on a routine basis. These procedures identify and detect inappropriate claims and potential FWA billing.
SIRIS	As a member of the National Health Care Anti-Fraud Association® (NHCAA), WellCare has access to SIRIS, the NHCAA information-sharing website that includes regular postings of information about potential Provider FWA activities by more than 100 insurance companies nationwide. SIU investigators use SIRIS as part of the due diligence they perform in their investigations.

Rooting out Waste, Improving Member Outcomes and Protecting Health Resources

Having observed a potential for a high rate of abuse of the heroin addiction treatment product, Suboxone, we implemented Suboxone Utilization Review and implemented a formulary change to cover Zubsolv. Zubsolv has less buprenorphine than Suboxone with same clinical indications and outcomes. Additionally, a tablet additive makes the buprenorphine in the SL tablet more highly absorbed. The presence of menthol in the tablet formulation makes the product more palatable, but less likely to be abused through injection or "snorting". Zubsolv is also less recognizable on the streets and less likely to be a target for diversion. At the same time we introduced Zubsolv to the formulary, we tightened DER criteria to include requirements for tapering and shortened the length of the DER if tapering was not being documented. ***Through these efforts we successfully reduced the average pharmacy claims per day for Suboxone 40 percent in one year which the savings equate to over $1,600,000 annually.***

Investigating, Confirming and Reporting FWA and Implementing Corrective Actions

Once a potential case of FWA is detected either through a referral or the array of analytical tools we use, WellCare's SIU will pursue investigative actions that may include data analysis, public record reviews, provider onsite audits, interviews and clinical reviews. All suspected cases of FWA will be reported to NMPI as part of our written FWA and erroneous payments compliance plan.

If the potential FWA concerns a member, the inquiry may initially focus on pulling claims data and reviewing it to identify potential FWA, such as inappropriate utilization or card sharing. Following this preliminary analysis, additional investigative steps will be taken which may include obtaining provider records that will be reviewed to identify additional indications of FWA, consulting with experts regarding medical necessity, and interviewing the subjects of the investigation.

The SIU timely reports suspected FWA. Once a determination has been made that FWA has occurred, appropriate remedial action will be pursued. For example, if the FWA concerns a member's drug abuse or doctor/pharmacy shopping, the member may be placed in an approved "lock-in program," which monitors the member's access to medications to help the member in addressing his or her drug dependency.

If the potential FWA involves a provider, the inquiry may initially focus on pulling claims data and reviewing it to identify potential FWA. The provider's records will be requested and obtained for analysis. WellCare of Nebraska's provider agreements will contain language requiring providers to comply with record requests. The review may include engaging medical experts and clinicians to assess medical necessity and review of claims to identify up-coding. These investigative efforts are supplemented by interviews, public records reviews and similar investigative efforts to get as complete and accurate understanding of the issue as possible. Once a determination has been made that a provider has engaged in FWA, remedial actions will be identified, which may include payment suspension, recovery of an overpayment, termination of the provider and referral to law enforcement for prosecution.

Throughout the process, NMPI and MFPAU will be engaged as appropriate and required in WellCare's agreements with MLTC. This includes formal reporting of all tips every two weeks, immediate reporting of allegations being investigated and formal monthly reporting in the format prescribed by MLTC.

Developing a Written FWA and Erroneous Payments Compliance Plan

WellCare will leverage the array of existing FWA plans we have from various states and lines of business as well as corporate expertise in fighting FWA to build a specific Nebraska *FWA and Erroneous Payments Compliance Plan* to meet all the requirements outlined in Section O.8 of the Project Description and Scope of Work of this RFP. In addition to complying with all of the state standards, we routinely incorporate the 2008 "CMS Performance Standards for Referrals of Suspected Fraud from a Single State Agency to a Medicaid Fraud Control Unit" into our Program Integrity plans.

The plan, which will be finalized and presented to DHS at least 45 days prior to contract start date and by each December 31 thereafter, also will detail the manner in which incidents of FWA are detected including specific steps taken to combat fraud, waste and abuse and timelines for identifying, acting upon and reporting FWA as outlined above. All changes to the plan will be submitted to MLTC for approval at least 30 days prior to implementation.

Best Practices from Other States

The processes outlined throughout this response are taken from our best practices and lessons learned from across our affiliate health plans. Below are two examples (**Figure 2**) from WellCare's Georgia operation showing two different types of FWA behaviors identified and corrected.

Figure 2

FWA: Investigation of Referral Results in Termination and Repayment
WellCare of Georgia received a referral alleging that a provider was providing tutoring services and billing it as counseling. As part of the investigation, we researched the provider's website, which indicated that the provider offered free tutoring, among several other services. The investigator conducted patient interviews with four members for whom the provider submitted bills. All four stated the provider gave assistance with school work and denied that their children received counseling. The investigators confirmed the allegations through record review. The extrapolated overpayment was $256,959, and we collected $141,946.50. The provider was also terminated from the network.
FWA: Data Mining Identifies Aberrant Billing
Using data mining, WellCare's SIU identified a Georgia physician as billing excessively for balloon sinus dilation. The provider routinely billed the procedure for all three sinus regions. The physician billed these procedures for 35 patients in the past year compared to only six patients for the next highest provider in the claims data. We pulled a statistically valid random sample of medical records. Our review determined that none of the balloon sinuplasty procedures were medically necessary. We had an outside specialist review a sample and the outside specialist concurred that the services were not medically necessary. The identified extrapolated overpayment was $297,665.91, and we collected $170,000. In addition, the provider was placed on a corrective action plan.

SECTION IV.O PROGRAM INTEGRITY

94. Describe how the MCO currently works with other entities that investigate and prosecute provider and member fraud, waste, and abuse. How will the MCO apply methods in Nebraska? (*Page limit 2 pages)*

PARTNERING WITH STATE AND FEDERAL REGULATORS TO INVESTIGATE AND PROSECUTE FWA

In each state in which we operate a Medicaid Managed Care plan, we have established relationships with both the Medicaid program integrity units and the Medicaid fraud units within the offices of the attorney general to ensure our efforts are done in full alignment and so we can supplement their investigative efforts to stop fraudulent and abusive activities.

Figure 3

BUILDING FWA PARTNERSHIPS ACROSS AGENCIES

WellCare's Experience in Working with Other Entities

	Jan. 1-Dec. 31, 2014	Jan. 1-Oct. 31, 2015
Referrals to State Regulators, including MFCUs, Medicaid Program Integrity units, OIG, etc	666	806
Requests for Information completed and sent to law enforcement and regulatory Agencies	844	1,245

Additionally, we work with other health plans and with federal regulators as needed depending on the scope and severity of the suspected fraud or abuse (**Figure 3**). This can include sharing data from individual cases or collaborating on best practices to mitigate waste in the system. In some affiliates, for example, we meet regularly with the state and other health plans to discuss opportunities to work together and identify waste or abuse in the system and new approaches to addressing FWA.

We find these partnerships crucial because every entity can have complimentary approaches, resources and information that strengthen each of our individual efforts. The forms these relationships take can differ based on different state contractual and reporting requirements, but generally follow similar patterns. The interactions with other states can be broken into a few main areas:

- Formal reporting requirements
- Sharing of records, data and other investigative information
- Regular meetings and opportunities for collaboration
- Formal and informal contacts among investigate staff members

Every state has different reporting requirements and different requirements around MCO interaction with the corresponding state investigative units. Our Georgia affiliate, for example, alerts the Georgia Department of Community Health Office of Inspector General on all cases of suspected fraud or abuse when WellCare determines further action is required. All of our investigative material is forwarded to the Georgia Medicaid Fraud Control Unit upon request.

In addition to individual reporting of suspected F&A, our SIU routinely submits a variety of reports to DCH:

- Fraud and Abuse and Pharmacy Lock-In reports provided to DCH ensure all cases of suspected F&A are reported in a timely manner. These reports include all information required by DCH and communicated through the DCH Requirements Analysis Documents (RADs).
- GA Quarterly FWA Report.
- GA Quarterly Behavioral Health Report.
- GA Department of Insurance (DOI) Reporting.

- Quarterly case status reports to the DCH-OIG office for discussion during joint CMO/DCH OIG/MFCU face-to-face information sharing meetings.
- Reports of all Program Integrity settlement agreements entered into with Providers within seven business days of the settlement.

WellCare's affiliate in Missouri, known as Missouri Care, has developed similar working relationships with their state investigators. There, our SIU follows the state's pre-defined Fraud, Waste, and Abuse Policy in reporting fraud and abuse complaints, investigation findings, and violations to the following entities:

- MO HealthNet Program Integrity Unit
- Missouri Care's Board of Directors, Health Plan Administrator and various committees
- Missouri's Medicaid Fraud Control Unit as appropriate
- Center for Medicare & Medicaid Services (CMS)

Missouri Care also provides a fraud and abuse activity report on a quarterly basis and an annual summary report to MO HealthNet. Additionally, the State Program Integrity team meets with Missouri Care's Compliance and Regulatory staff quarterly to exchange information, collaborate on suspected fraud and abuse activities, and identify opportunities for improving our processes for preventing, reducing, detecting, correcting, and reporting suspected or known fraud and abuse.

Applying WellCare's Methods to Work across Entities to Fight FWA in Nebraska

WellCare looks forward to developing close working relationships with the Nebraska Medicaid Program Integrity (NMPI) staff as well as the Medicaid Fraud and Patient Abuse Unit (MFPAU) within the Nebraska Attorney General's office to fight fraud and abuse in Nebraska's Medicaid program and preserve precious tax dollars for members who need them.

We will take the best practices learned working with state and federal entities for 30 years as noted in the examples above to drive our Nebraska efforts in line with the contractual and regulatory requirements for reporting FWA and recovery of any dollars expended because of fraudulent or abusive behaviors. Some of these efforts include:

- Immediately reporting to NMPI any suspicious or knowledge of fraud
- Sharing all data and information as requested to further an investigation
- Cooperating fully in any investigation or prosecution of FWA activities by any duly authorized government agency
- Provide NMPI and MFPAU unfettered and timely access to or copies of any records maintained by the WellCare or our providers to assist in any investigation or prosecution
- Ensure all of our subcontractors also work collaboratively and cooperatively with any investigation or prosecution of FWA
- Provide MFPAU staff with access to any of our business locations to help further their investigative efforts as needed and upon request
- Ensure MFPAU is aware of any hearings or reviews of our decisions and that MFPAU staff can attend any such hearings

Additionally, we believe a model similar to the one in Missouri where the Nebraska Program Integrity Officer meets regularly with NMPI and MFPAU investigators would be very helpful in further solidifying collaboration and information on shared cases.

SECTION IV.O PROGRAM INTEGRITY

95. Currently, how does the MCO educate members and providers to prevent fraud, waste, abuse, and erroneous payments? How will the MCO apply methods in Nebraska? *(Page limit 3 pages)*

PREVENTING FRAUD, WASTE, ABUSE AND ERRONEOUS PAYMENTS THROUGH MEMBER AND PROVIDER EDUCATION AND EMPOWERMENT

WellCare weaves education about Fraud, Waste and Abuse (FWA) into our initial and ongoing communications with both providers and members because we know that the best line of defense to prevent erroneous payments is to ensure members and providers know how to avoid irregular behaviors, as well as to empower them to detect and report suspicious activity.

This process begins with our employees, who serve on the front lines working with providers and members every day. Every employee of WellCare undergoes extensive compliance training (including specific FWA training) within 30 days of being hired and annually thereafter so they can respond to potential cases of FWA and can pass important information on to providers and members through both formal and informal means. Associates in reimbursement-related functions also receive supplemental FWA specific training, which must be completed within 30 days of hire and annually.

WellCare's Special Investigative Unit (SIU) helps develop and maintain all FWA training. Topics of training include:

- Pharmacy Related Abuse Red Flags Training
  - Does the prescription look altered or possibly forged?
  - Have you filled numerous identical prescriptions for this beneficiary, possibly from different doctors?
  - Is the person receiving the service/picking up the prescription the actual beneficiary (identity theft)?
  - Is the prescription appropriate based on beneficiary's other prescriptions?
  - Are drugs being diverted (drugs meant for nursing homes, hospice, etc. being sent elsewhere)?
- Provider Related Abuse Red Flags Training
  - Does the provider write for diverse drugs or primarily only for controlled substances?
  - Is the provider's treatment appropriate for the member's health condition (medically necessary)?
  - Is the provider writing for a higher quantity than medically necessary for the condition?
  - Is the provider performing unnecessary services for the member?
  - Does the provider bill the sponsor for services not provided?

Additional red flags identified through various sources, including the Medicare Parts C and D FWA training developed by the Centers for Medicare & Medicaid Services are also incorporated in WellCare's FWA training. Additional topics covered include:

- State and federal laws and regulations related to FWA
- An associate's affirmative duty to report suspected FWA
- Federal and state laws and the Company's policy prohibiting retaliation against an associate who in good faith reports a compliance or FWA-related concern
- The means of reporting suspected or actual FWA
- Empowering members to avoid and fight fraud, waste and abuse

We have learned through the years of working with Medicaid and Medicare enrollees that some of the best referrals come from members who are often the first ones to become aware of fraudulent, wasteful or abusive behaviors. And, while estimates say that less than 25 percent of health care fraud is committed by members, we also know that members need to be reminded of the importance of not sharing cards or participating in other fraudulent and abusive activities.

Figure 4

To that end, WellCare uses several tools to continue to educate members about FWA – both how to recognize and report FWA, as well as reminders of what constitutes FWA activities by members.

This is done from the very beginning in the member welcome packet, through the member handbook and member website (**Figure 4**). Members also receive ongoing education through member services, community outreach and our newsletters. Our member handbooks and website, describe the definition of fraud, waste, and abuse and gives clear examples and explanations on how this is tracked and monitored by WellCare.

Information shared with members includes:

- An explanation of what constitutes fraud, waste and abuse
- Examples of FWA behaviors to look out for
- Clear instructions for reporting potential FWA including an explanation that there are never repercussions for reporting FWA

Finally, members are involved in FWA detection and prevention through random service verification. WellCare's verification of services reporting consists of contacting a statistically significant sample of members who have received services each quarter. The sample size for each quarter is about 600 members, and generally reflects a mix service types. All findings made through service verification will be reported to the Nebraska Medicaid Program Integrity (NMPI) quarterly.

Educating Providers on their Responsibilities Regarding Fraud and Abuse

Our provider services personnel, provider manual, and website educate providers on WellCare's FWA Plan including providers' respective responsibilities, the responsibilities of others, the definition of fraud and abuse, and how and where to report suspected or known fraud and abuse.

Within 30 days of contracting with a provider, WellCare's Provider Services personnel schedule an orientation with each contracted provider to review contract requirements. This orientation includes an overview of FWA and specific examples of provider fraud, such as upcoding, billing for services not

provided, and submitting false encounter data. Ongoing communications with providers include information on appropriate claims submission requirements, coding updates, electronic claims transactions and electronic fund transfers. WellCare network providers can view or download the most up-to-date version of the Provider Manual and information on how to locate regular fraud and abuse updates on our website. Some examples of content include:

- Details around WellCare's commitment to compliance including HIPAA requirements
- Standard Code of Conduct for providers in preventing, identifying, and reporting compliance violations
- Prevention, identification, and reporting of known or suspected fraud and abuse including the availability of the following:
  - Corrective action guidelines
  - Deficit Reduction Act of 2005 and Federal False Claim Act provisions
  - Confidentiality and non-retaliation protections

Periodic articles on fraud and abuse are published in monthly provider newsletters, providing additional examples of behaviors to watch for and emphasizing the responsibility of providers in preventing, detecting, and reporting potential suspected and known fraud and abuse.

Additionally, our local Medical Directors, as well as our Clinical HEDIS Practice Advisors (CHPAs) play a key and continuous role in ongoing training and education of providers about wasteful and abusive practices. Armed with data from an array of sources, our clinical and medical teams sit down with providers to discuss Clinical Practice Guidelines when utilization patterns and clinical quality data shows outlier aberrations from those guidelines. We also educate on medical necessity criteria to help ensure appropriate use of health care resources.

Under our hybrid pharmacy program, integrated and in-house pharmacy staff use data from Drug Utilization Review and such programs as Lock-In to meet with high volume providers to discuss appropriate, evidence-based and guideline driven prescribing practices to, not only prevent waste or abuse, but drive improved member outcomes.

Deploying WellCare's Robust FWA Educational Efforts in Nebraska

Our Nebraska-based Program Integrity Office and dedicated investigative staff will partner across functional areas, including member and provider services as well as with our WellCare training and SIU staffs to ensure both the content and distribution of FWA training materials meet the unique needs of Nebraska members and providers.

We will use traditional models of education and outreach as outlined above within Nebraska, and partner with NMPI to distribute tailored messages as requested as well. We will also use Nebraska-specific results from data mining efforts where there are identified trends of concern to shape educational messages distributed any of the following methods:

- New member and provider orientation
- Member and provider newsletters or alerts
- Website updates
- Member and provider mailings
- Providing standard information in each of our Nebraska Welcome Rooms, offices and at community events

SECTION IV.O PROGRAM INTEGRITY

96. Describe the MCO's method and process for capturing TPL and payment information from its claims system. Explain how the MCO will use this information.

(Page limit 3 pages)

ANOTHER LINE OF DEFENSE: WELLCARE'S METHOD AND PROCESS FOR CAPTURING TPL

Properly coordinating benefits and Third-Party Liability (TPL) is a critical step in ensuring there are no erroneous, wasteful and duplicate payments. WellCare recognizes that Medicaid is the "payer of last resort" and has built detailed processes for ensuring TPL payment information is captured and used appropriately.

The coordination of benefits (COB) process, also known as cost avoidance process, begins by adding other health insurance coverage information to the member's record in the WellCare claims system. The other coverage details include: carrier name, policy number, group number, subscriber name, subscriber identification number, effective dates and termination dates.

The other health insurance information is collected through a variety of sources including State eligibility files (834 HIPAA transactions), State TPL files, provider claims with an explanation of payment (EOP) attachment, the member himself/herself as part of initial enrollment activities and as a routine follow-up question during member telephone contacts.

TPL and Cost Avoidance at Work

In one of our affiliate programs, WellCare of Kentucky, the following amounts were avoided and recovered through proper application of TPL Avoidance Processes.

- Inpatient: $26,547,428
- Professional: $15,242,571
- Pharmacy: $1,133,034

Total: $42, 923,033

Added to the amount of $1,919,098 identified through recovery pursuit, **WellCare of Kentucky saw a total of $44,832,141 in cost avoidance and recovery in one year.**

WellCare systematically uploads Medicare coverage details from State 834 files to the member's COB History tables in the WellCare Claim System without additional validation. All other sources of COB information mentioned above are validated via 270 transaction or outbound phone call to the other insurance carrier.

WellCare also takes a proactive approach to identifying other sources of primary insurance coverage utilizing a set of vendors who specialize in TPL identification. These vendors hold data share agreements with commercial insurers to identify Medicaid members with medical and/or pharmacy coverage. WellCare sends weekly or monthly HIPAA-compliant claims and eligibility data feeds to the TPL identification vendors to evaluate and determine if any members have other coverage through a commercial source. The vendors return a data feed containing other insurance information in a date-sensitive and HIPAA-compliant format which is used to update the members' COB History tables in the WellCare Claim System.

Additionally, WellCare uses a vendor to identify claims with accident-related diagnoses (e.g., sprains, fractures and head and back injuries) that represent potential worker's compensation benefit cases or other subrogation opportunities. The vendor also attempts to identify treatment for incidents such as car accidents, injuries on someone else's property, work-related injuries, animal bites and other accidents.

WellCare sends monthly medical and pharmacy claims and eligibility data feeds to the subrogation vendor for members in all of WellCare's programs. WellCare also sends referrals involving paid claims

when they believe the member may have been involved in an accident. The vendor investigates all referrals and all potential cases that have more than $250 in paid claims by sending a State-approved letter and questionnaire to WellCare members.

Avoiding Future Claim Payment

If other primary insurance information is loaded in the WellCare Claim System for a member, then newly received claims will be systematically held for manual review.

If the date of service on the claim falls within the coverage period of the other primary insurance policy and no primary EOP is attached, a Remittance Advice will be sent to the provider along with a corresponding Other Insurance Information letter that advises the provider that other primary insurance exists and should be billed first. The Other Insurance Information letter contains the necessary other insurance information required (i.e., carrier name, carrier address, policy number, group number, subscriber name) for the provider to submit the claim for payment.

If the date of service on the claims falls within the coverage period of the other primary insurance policy and a primary EOP was attached, the claim will be processed by the WellCare claim processors by considering the primary payment and paying the remaining coinsurance, deductibles, etc.

Cost Avoidance Exceptions—Pay and Chase Activities

WellCare will process claims in accordance with any and all cost avoidance exceptions. If a cost avoidance exception exists on a claim or if other primary insurance information is loaded into the claim system after claim payment, then previously paid claims will be reviewed systematically for overpayments. WellCare identifies overpayments in a weekly script to ensure that providers are notified in a timely fashion.

Post-Payment Recovery

WellCare uses two methods for recouping erroneous overpaid claims: Direct Provider Recovery and Carrier Billing.

Direct Provider Recovery

If the enrollee's state allows for direct provider recovery, then identified overpaid medical claim(s) that have a date of service within the last 10 months will be marked for internal recovery efforts. Internal recovery efforts begin with a letter to the provider advising them that a primary insurer was responsible for the claim payment and that a refund or recoupment (where contractually allowed) is necessary to satisfy the overpayment. The letter will provide the necessary other insurance information required for the provider to re-bill the claim to the primary insurer.

Carrier Billing

WellCare utilizes an outside vendor to submit bills to health insurance carriers when commercial, Medicare Advantage or Tricare coverage is primary to WellCare. This method is used if an identified overpaid claim falls into one of these categories:

- The enrollee's state does not allow for direct provider recovery
- Claim was paid due to cost avoidance exception rule
- The date of service on the claim is greater than 10 months from overpayment identification date
- The paid amount on the claim is lower than the internal recovery effort threshold

The recovery vendor receives monthly HIPAA-compliant claim data feeds to evaluate for overpayment recovery. Recoveries from primary carriers are refunded to WellCare on a monthly basis and posted to the enrollee's claim history.

Identified overpayments are tracked in a Recovery Database for reporting and collection. Overpayments

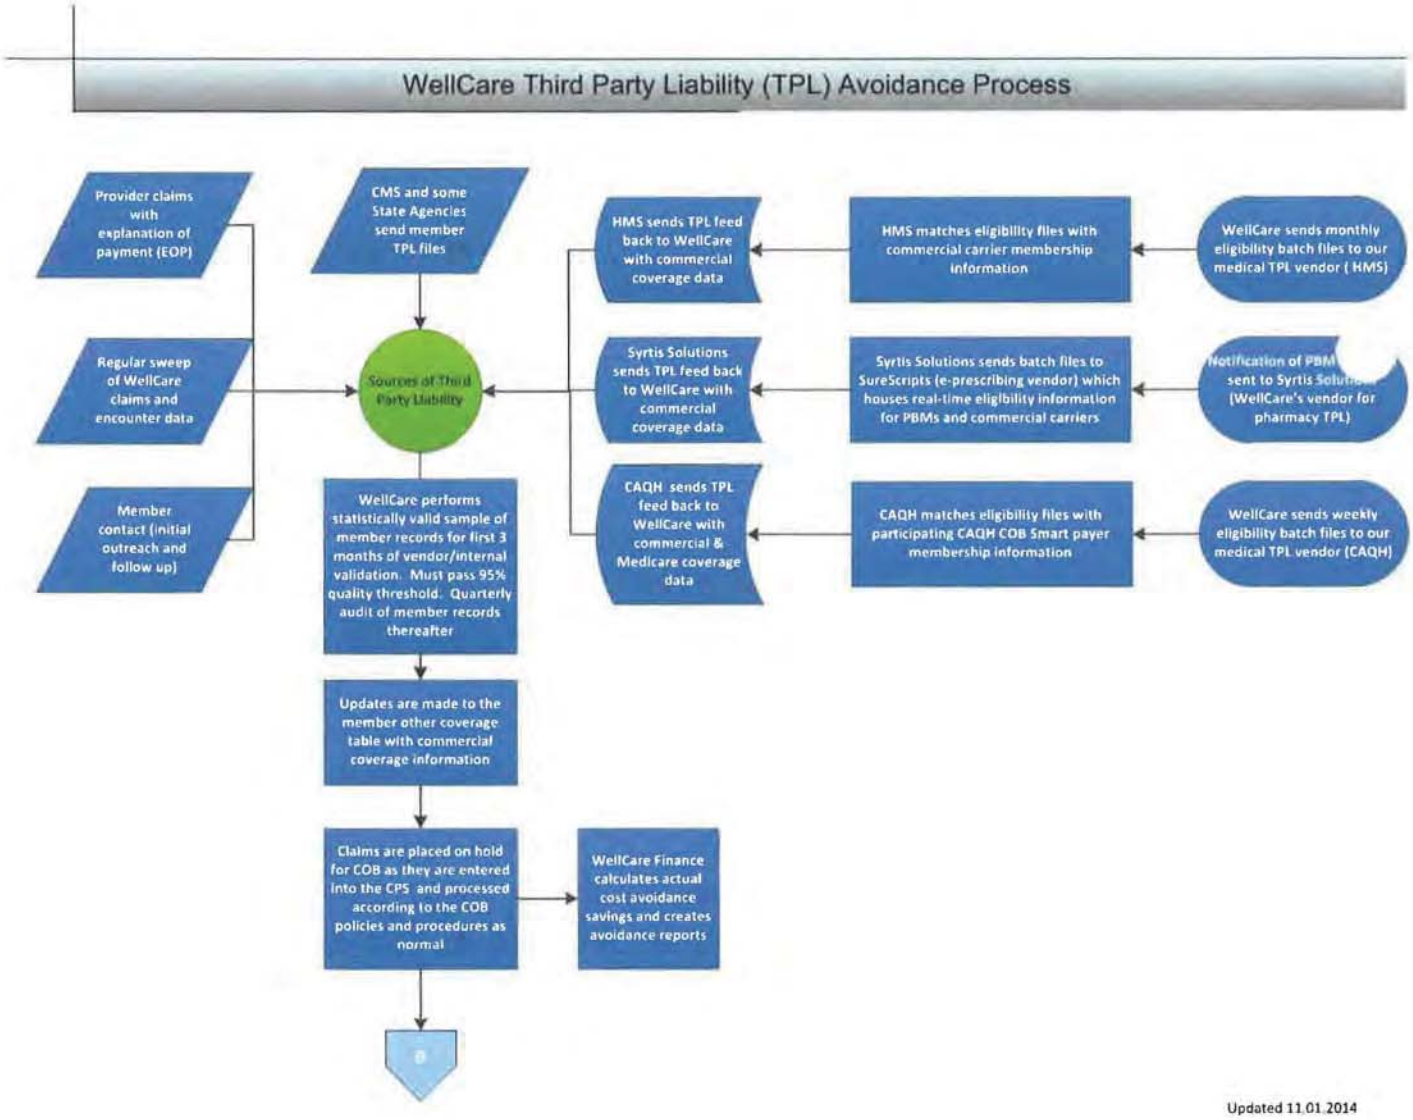
recoveries are applied to the member's claim history in WellCare's Claim Processing System and will flow through to Encounter Data.

MAINTAINING TPL DATA AND REPORTING TPL DATA TO STATE

WellCare maintains a robust database of TPL information directly within the Claims Processing System outlined in (**Figure 5**). Valid TPL coverages are updated on the members' eligibility records in the Claims Processing System, making them accessible for claims processing and viewable by Care Management and Customer Service staff. Providers and Members can contact the Customer Service department to provide new TPL information or to request an update to existing TPL information.

WellCare will generate TPL avoidance and collections reports in any format and timeframe designated by the state of Nebraska.

Figure 5



SECTION IV.Q PROVIDER REIMBURSEMENT

97. Provide a detailed description of the MCO's approach to implementing a value-based purchasing model with providers. Include at a minimum the MCO's:

- Philosophy regarding value-based purchasing and risk-sharing agreements and evidence of effective use in Nebraska or other markets
- Approach to identifying initiatives and performance measures on which to focus, proposed engagement strategies to encourage provider participation, incentives the MCO will use, and methodology and timing for determining if providers have met requirements
- Plan for entering into value-based purchasing agreements with 30% of its provider network by December 31, 2019.
- Discussion of best practices and lessons learned.

(Page limit 6 pages)

PHILOSOPHY REGARDING VALUE-BASED PURCHASING AND RISK-SHARING AGREEMENTS AND EVIDENCE OF EFFECTIVE USE

WellCare views value-based purchasing (VBP) and risk-sharing agreements as an important part of our quality strategy to improve health outcomes and quality of care while reducing the rate of costly and avoidable care. Our approach to value-based purchasing and risk-sharing arrangements includes the following key principles:

- Alignment with our quality program and clinical outcome goals
- Targeting of both broad range of clinical performance measures and provider types to ensure that a broad cross section of members are impacted
- Achievement of quality measures before financial efficiency incentives are earned because financial efficiency alone does not promote our quality strategy
- Creation of sustainable, successful partnerships by ensuring that these payment arrangements and incentives are tailored to each group

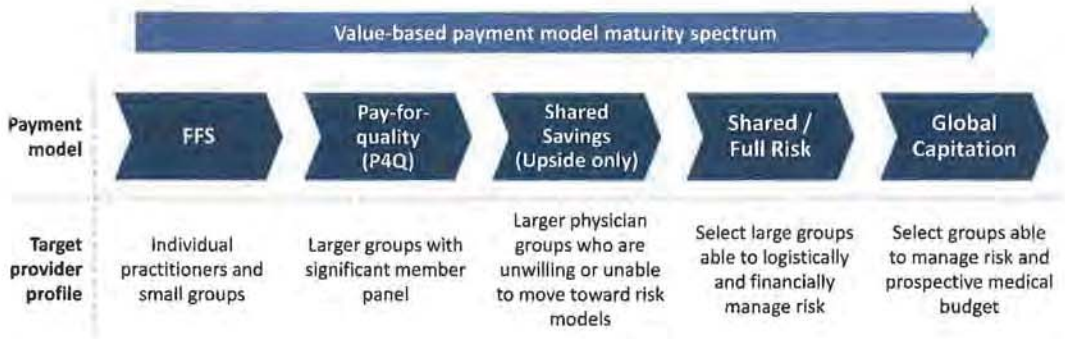
Meeting Providers Where They Are: WellCare's Value-based Payment Continuum

Our value-based purchasing programs drive quality, cost-efficiency and member outcomes. As such, they are a strategic component of our network development and provider services functions. Our field-based provider services representatives, medical director and network leadership work closely with our network providers to assess their level of maturity, target providers based on willingness and capacity, and identify those providers who are ready to move to the next stage in advanced value-based reimbursement relationships.

As shown in **Figure 1** (on the next page), WellCare views value-based payments as a continuum. From basic fee-for-service (FFS) or capitation with quality bonuses, to shared savings, to full risk models, to global capitation, we are prepared to work with providers regardless of where they sit on the payment continuum. As you move from left to right there is an expectation that providers are more experienced and comfortable with value-based payment designs including more complex arrangements which introduce financial risk.

Nebraska represents a perfect example of this continuum in motion with providers at every level, including some larger providers who are beginning to take on risk-based arrangements, and several in the middle with opportunities to benefit from shared savings or upside-only bonus payments for closing care gaps and improving health outcomes. Payer and provider partnerships on the commercial health plan side in various segments of the state have paved the way for innovative VBP solutions from Medicaid plans.

Figure 1



To facilitate provider migration along the value based payment continuum and enhance each provider's chance for success in the program, we offer tools such as:

- Data analytics and information sharing supports including quality dashboards with HEDIS scores, care gap reports, and quality trends
- Information technology infrastructure such as assistance with health information exchange connectivity and electronic health record support
- Clinical practice support and training through our clinical HEDIS practice advisors (CHPAs), medical director, pharmacy director, behavioral health managers, care managers, and disease managers, among others
- Incremental payment bonuses to non-PCMH practices with a minimum panel size who adopt electronic health records (EHRs)
- Medical director and network leadership meetings with providers interested in full risk and global capitation as well as a formal assessment to determine the provider's capacity to assume risk. Assessment includes review of provider operations and infrastructure, size of the membership pool, and historical claims data to ensure that the size and risk burden of the patient population is considered in the funding arrangement

Evidence of Effective Use

Our effective use of value-based purchasing is demonstrated by the fact that more than half of our Medicaid members are currently impacted by value-based purchasing quality incentive programs. For 2014 performance, we distributed $10 million of quality bonus payments to nearly 400 Medicaid provider groups, averaging $25,000 per group. For 2015 performance, we expect to distribute approximately $11 million of quality bonus payments to our Medicaid provider network.

We constantly expand our value-based purchasing offerings based on the needs of our members and the priorities of our state partners. For example, in Missouri, where behavioral health integration is a critical priority for our state partners, we have started offering community mental health centers (CMCHs) incentive payments for high standards of performance on follow-up after hospitalization rates.

WellCare continually evaluates our value-based purchasing arrangements for effectiveness and alignment with quality measures. As an example, we recently restructured a provider contract with a large group serving approximately 20,000 of our Medicaid members to align incentives around improved health outcomes. This organization has been an important partner for many years and, while performing well from an efficiency standpoint under our gain sharing program, was not meeting our expectations on the quality front. We restructured the arrangement to include minimum quality standards that must be met in order for the group to realize any efficiency surplus. We also included bonus provisions for the achievement of high levels of quality performance for their assigned members.

Additionally, our partnership with Children's Mercy Pediatric Care Network (CMPCN) in Missouri provides another example of effective use. Under this risk-based agreement, covering approximately 25,000 Medicaid members, CMPCN is paid a percentage of member premiums to provide comprehensive medical management functions for our members, including utilization management, care management and disease management. We maintain oversight of the program and meet regularly with CMPCN leadership and providers to discuss performance and areas for improvement.

Another example of successful collaboration through a VBP arrangement is with The Children's Care Network, Inc. in Georgia. Our collaboration with this physician-led, subsidiary corporation of Children's Healthcare of Atlanta, is an example of where we are using value-based purchasing to align incentives to drive quality and efficiency of care achievements to improve health outcomes for Medicaid children in Georgia. The Children's Care Network, Georgia's only clinically integrated pediatric network, is managing care for approximately 77,500 WellCare Medicaid members. Under the agreement, WellCare provides incentive payments to The Children's Care Network for quality-based improvements in certain Healthcare Effectiveness Data and Information Set (HEDIS) measures related to important dimensions of care and service.

The Children's Care Network

Identifying Initiatives, Proposed Engagement Strategy, Incentives, Methodology and Timing

In identifying performance measure and initiatives used in VBP arrangements, we look at:

- Performance measures established by state partners
- Population health priorities for the members we serve
- Data analytics that identify prevalent conditions, areas of greatest need, and areas of potential impact

Starting with these measures ensures a common definition of success between WellCare, our providers, and our state partners. We have found that 10 to 12 performance measures delivers an effective value-based purchasing program so we prioritize the measures used to ensure we focus on those areas with the greatest need and opportunity for improvement.

We then identify the specific provider types that are best positioned to impact these measures, and design programs to reward strong performance and improvement. Thus far, our primary areas of focus have been preventive care and the management of chronic conditions. While we offer many different programs across our Medicaid markets, most can be categorized into two core frameworks:

- **Pay for Quality (P4Q):** Offers PCPs a per member per month (PMPM) bonus for achieving specified quality of care targets which are usually based on HEDIS measures. These bonus opportunities are generally offered to the largest primary care practices representing at least 50 percent of the membership in a given market or having at least 500 WellCare Medicaid members.
- **Gain / Risk Sharing with Quality Standards:** Larger provider organizations, including PCP groups and health systems, who meet the criteria and display a willingness to participant in shared savings, are offered the opportunity to earn a portion of the savings achieved when they meet specified quality and cost efficiency performance targets.

In addition to the programs described above, WellCare will also incorporate the following, more specialized components into our Heritage Health program value-based purchasing strategy.

- **Behavioral Health Homes:** We will establish behavioral health homes with qualified CMHCs, federally qualified health centers (FQHCs), and other behavioral health and substance use providers who are able to deliver integrated services and adhere to the principles of a behavioral health home. Behavioral health providers will be offered a contractual PMPM fee to fund physical and behavioral health care coordination activities for qualified members. Performance bonuses will be included for

the achievement of specified clinical outcome targets.

- **Obstetrician / Healthy Pregnancy Incentive:** We will offer an obstetrician enhanced payment similar to that piloted in our South Carolina affiliate. Obstetricians have the ability to earn an enhanced payment per delivery (that matches the prevailing commercial rate in the market) based on the satisfaction of specific criteria including prenatal care, postpartum visits, evidence of a pre-delivery pertussis vaccination, and completion of a screening tool by the end of the second trimester.
- **Specialists:** We will offer value-based purchasing programs tied to quality measures to select identified specialists based on their role in managing impactable conditions for members with complex needs.
- **Hospitals and Health Systems:** We will partner with select hospitals and integrated health systems, including the establishment of accountable care organization (ACO) models, such as the partnership we have in place in Missouri with CMPCN. Several organizations we met with, including Children's Hospital in Omaha, expressed interest when we met with them in a VBO arrangement for Heritage Health members and, we are eager to work with Nebraska providers to find the right individualized solutions to drive improved health outcomes.

Participation and Engagement Strategies

Our strategies to encourage participation and engagement in our VBP programs are led by direct dialogue between providers and our local team. Provider organizations are educated about our value-based programs through the combined efforts of our medical director, network leadership, provider services representatives, and practice advisors as part of our initial and ongoing network development activities. In addition to broad based communication such as mailings, our provider handbook, website and newsletters, we engage directly with providers through on-site visits, statewide regional information summits, statewide orientation sessions, provider forums and targeted education.

To increase participation and engagement we focus on the following strategies:

- **Provider Understanding of the Program:** Broad based education activities using all available avenues to help provider groups understand how the program works and how they are being evaluated and rewarded.
- **Keep it Simple:** Our value-based programs use targets that are easy to understand and to measure. We have found that when programs are too mathematically complicated, providers lose interest in participating or participate in a less than optimal manner.
- **Realistic Chance of Success:** Provider groups must believe they have a realistic change of receiving a reward. While we typically aspire to strictly reward the highest levels of performance, we have found that for certain groups in certain markets (particularly rural or frontier), this is not a current reality. Our programs focus on both absolute performance and improvement to ensure all providers have a meaningful motivator.
- **WellCare Support:** Providers want to know that their success is not based on solely on their individual efforts, but that WellCare is contributing resources and programs to help them be successful. Key areas of WellCare support for these programs include:
  - Member outreach programs, including appointment scheduling assistance
  - Data, reporting and analytics including status reports so providers know how they are doing under the incentive program and areas to focus on
  - CommUnity Advocacy program designed to connect members with key social services to help meet socioeconomic needs that can be as important as clinical barriers to care

We view our CommUnity Advocacy program as a unique differentiator for WellCare and our value-based purchasing programs. WellCare's ability to connect members to community support structures for things such as bill payments, transportation, housing assistance, and snow removal, can often make the difference for a member receiving a needed service or properly managing a chronic condition.

Incentives

As described above, our incentives will vary based on the specific provider and the membership they serve. Our value-based purchasing incentives will be informed by the Request for Proposal (RFP) Attachment 7 – Performance Measures as well as our own data analytics. Some of the key measures we anticipate targeting are shown in **Figure 2**, by provider type.

Figure 2

Provider Type	Sample Incentives
PCPs	➢ Childhood immunizations ➢ Well-child visit in first 15 months of life ➢ Immunizations for adolescents ➢ Developmental screening in the first 3 years of life ➢ Well-child visits in the 3rd through 6th years of life ➢ Adolescent well-care visit ➢ Cervical cancer screening ➢ Chlamydia screening in women ➢ Flu vaccinations for adults age 18 and older ➢ Screening for clinical depression and follow-up plan ➢ Adult body mass index assessment ➢ Medical assistance with smoking and tobacco use cessation
Behavioral Health Home	➢ Follow-up after hospitalization for mental illness ➢ Adherence to antipsychotics for individuals with schizophrenia
Obstetricians	➢ 6 or more prenatal visits before delivery ➢ Postpartum visit within 6 weeks of delivery ➢ Evidence of pre-delivery pertussis vaccination ➢ Completion of required screening tool by end of the second trimester
Specialists	➢ Use of spirometry testing in assessment and diagnosis of COPD ➢ Pharmacology management of COPD exacerbation
Hospitals and Health Systems	➢ All-cause readmissions ➢ Timely transmission of transition record

Methodologies and Timing

Our methodologies for determining whether providers have met value-based purchasing program requirements are clearly spelled out in a set of program documents which include:

- What is being measured
- How is it being measured
- What the targets are
- When bonuses are paid

Our value-based purchasing policies and procedures ensure each of these considerations is thoroughly addressed, including any required review and approval by our state partners. Most of our quality-based incentive programs use HEDIS and other performance metrics and include such components as:

- Defined set of performance measures with specific performance targets based on NCQA national Medicaid percentiles
- Evaluation of provider-level results versus the performance targets at the end of the performance period with bonus payments to providers meeting or exceeding performance targets
- Bonuses on a measure-specific basis – typically expressed as a defined dollar amount multiplied by the total number of HEDIS compliant members for that measure
- Average NCQA percentile approach that computes an NCQA performance percentile for each

measure (e.g. 50th, 75th), and then averages those across all 10 – 12 performance measures
- Absolute threshold for receiving a bonus such as average percentile at or above 60th, as appropriate
- Rewards for improvement over prior year results such as 30th percentile improving to 40th

Plan for Entering into VBP Agreements with 30 Percent of Network

To achieve this MLTC's standard of 30 percent of the network in VBP arrangements by December 31, 2019, we will use the following contracting mechanisms:

- **PCP Pay for Quality:** PMPM bonus to those PCPs who achieve quality of care targets tied to MLTC population health priorities such as HEDIS measures
- **Gain/Risk Sharing:** Gain/risk sharing based on cost efficiency and quality performance targets for large provider organizations, including PCP groups and health systems
- **Behavioral Health Homes:** PMPM fee to fund integrated care coordination and performance bonuses for clinical outcome targets for qualified CMHCs, FQHCs, and other behavioral and substance use providers
- **Obstetricians:** Enhanced payment per delivery when established quality standards are met including prenatal visits, screening, postpartum care, and pertussis vaccination
- **Specialists:** Value-based purchasing programs tied to quality measures for identified specialists, such as cardiologists
- **Hospitals and Health Systems:** Partnerships with select hospitals and integrated health systems, including the establishment of ACO models.

Discussion of Best Practices and Lesson's Learned

Our extensive experience in designing and executing value-based purchasing programs informs our perspective on best practices and lessons learned as shown in **Figure 3**.

Figure 3

Lessons Learned	Best Practices
Practices in rural, frontier, or inner city areas often lack resources and technology infrastructure and are frustrated by unachievable goals.	**Ensure Success is Achievable:** Incorporate rewards for improvement into program design, even if from a low starting point.
Providers will not engage in programs that are too mathematically complex or too difficult to understand.	**Keep it Simple:** Target performance measures that are easy to understand and measure.
If providers do not understand what is being rewarded or how they are evaluated, they have a low chance of success.	**Educate, Educate**: Communicate details of value-based program consistently and comprehensively to providers through all provider facing associates
Practices must invest resources to be successful under value-based programs with incentive payments the return on investment. Predictable programs help them make decisions to implement the infrastructure required for success.	**Make it Predictable:** Thoughtfully design improvements to minimize year-over-year changes.
Not all value-based programs are suitable for each provider practice. Pushing a practice into a reimbursement structure that is not right for them is not sustainable in the long-run.	**Meet the Provider Where They Are:** Meet the provider where they are on the continuum of value-based arrangements.
Value-based programs focused on cost efficiency only do not support quality outcomes.	**Always Include Quality Standards:** Incorporate minimum quality standards below which surpluses are not distributed and upside multipliers for strong quality performance.

SECTION IV.Q PROVIDER REIMBURSEMENT

98. Provide a description of the MCO's proposed MAC program, including methods for setting MAC prices, criteria used to select covered MAC drugs, process for resolving disputes regarding the MAC value, how the MCO will evaluate its MAC program, and any other program components the MCO considers important for achieving the State's NMMCP goals. Describe the MCO's experience with establishing MAC programs in other states, and highlight strengths and challenges. *(Page limit 6 pages)*

DESCRIPTION OF OUR MAC PROGRAM: A FOCUS ON FAIRNESS AND ACCURACY

Our maximum allowable charge (MAC) program is administered by our pharmacy benefit manager (PBM), CVS Caremark. This generic pricing program combines broad coverage with competitive rates for generic products and promotes generic utilization. Generic products represented on the MAC drug list for our generic pricing program are established at a generic class level to set a consistent price regardless of manufacturer. CVS Caremark accomplishes this by continually surveying the market for price changes, performing timely and regular updates to the generic pricing program, and validating product availability through pharmacy and wholesaler communications. This generic pricing program is monitored based on utilization, and prices will be adjusted to meet MLTC requirements. Our PBM maintains a proprietary MAC list as a standard offering of MAC drugs applicable to the Heritage Health plan.

Our PBM program supports transparency and fairness to pharmacies while at the same time promoting the appropriate use of the right drug at the right time. In an effort to better service our pharmacy network partners, network pharmacies have access to MAC pricing through our PBM's secure portal. ***MAC pricing is reviewed and updated to their website weekly.***

METHODS FOR SETTING MAC PRICES

Our PBM will use an analytical process to establish a Heritage Health MAC for generics and multi-source brand products. The analytical process involves a review of marketplace dynamics, product availability, and different pricing sources. Pricing sources may include Medi-Span (or any other similar nationally recognized reference), wholesalers, MAC lists published by our PBM and MAC pricing information provided by retail pharmacies as part of payment disputes. MAC prices are subject to change weekly based on marketplace trends and dynamics. New bioequivalent generic products will be added to the MAC list for our generic pricing program not more than 30 days after they are readily available from more than two generic vendors.

Our PBM regularly updates the prescription drug pricing standard it uses to reimburse network pharmacies based on the cost of the drug. These updates occur on January 1 of each contract year and weekly thereafter. Our PBM ensures that its contracts and written arrangements with pharmacies or other provider include provisions for regularly updating the prescription drug pricing standard used to reimburse network pharmacies as applicable. The pricing standard and frequency of updates is also posted in the PBMs provider handbook. Pharmacy contracts also indicate the source used for making such pricing updates.

Network pharmacies access MAC pricing through our PBM's secure portal. MAC pricing is reviewed and updated to their website weekly and pharmacies may go to the website at any time to obtain MAC pricing. Our PBM and pharmacy contracts address regular pricing updates. Our internal processes ensure that fee schedules tied to any drug pricing standard are updated within these prescribed timeframes, and that all claims are adjudicated in accordance with appropriately updated fee schedules.

We eliminate products from the MAC list or modify MAC rates in a timely fashion, consistent with pricing changes in the marketplace. MAC pricing is reviewed and updated based on market changes a minimum of weekly for both price increases and decreases.

There is typically one unit MAC price across all package sizes and national drug codes (NDCs) for each generic product. However, there may be some instances where a generic product may have multiple MAC prices if pricing is established at a package size or NDC level. The industry-wide NCPDP D.0 standard for multi-ingredient compounds is required for compound claims, and we support this functionality. This functionality will provide for determining an allowable ingredient cost for each NDC using lesser of logic—comparing the average wholesale price (AWP) discount, MAC (if applicable), and the submitted ingredient cost for each individual component in the recipe. We demonstrate savings from the MAC pricing in our generic pricing program by comparing the MAC to the AWP or the usual and customary price submitted by the pharmacy.

CRITERIA USED TO SELECT COVERED MAC DRUGS

WellCare will follow the Nebraska Medicaid preferred drug list (PDL). Any changes to the PDL will be determined by the Nebraska Pharmacy and Therapeutics committee and implemented by WellCare. Medi-Span will provide the criteria for MAC list/rates.

WellCare will provide a MAC file to the MLTC PDL contractor a minimum of quarterly, or as requested by MLTC, in the file format defined by MLTC. MAC pricing will not apply to the name-branded product, if the name-branded product was approved to be dispensed as medically necessary. This will require a drug evaluation review or prior authorization. We will also develop a Nebraska specific policy and procedure that meets state and federal requirements for providing brand-name products when the prescriber appropriately determines and documents that the brand-name product is medically necessary.

To determine whether a product is eligible for a MAC price in our generic pricing program, we consider several factors including bioequivalence, number of vendors in the marketplace, and availability of the product. Claims volume is also taken into consideration.

The vast majority of drugs on the MAC list applicable to the Heritage Health plan are A-rated with the exception of a few unrated generics. New A-rated generic drugs will be added to the MAC list for the PBM generic pricing program applicable to the Heritage Health plan not more than 30 days after the date on which they are readily available from more than two vendors.

Products that do not meet our MAC criteria may be excluded from the MAC list applicable to the Heritage Health plan. This may include generics with exclusivity or limited availability, non A-rated products, and low claim volume generics.

PROCESS FOR RESOLVING DISPUTES REGARDING THE MAC VALUE

CVS Caremark has an established process to ensure that MAC pricing is appropriate and not routinely below the wholesale price available to state pharmacists. Their administrative appeals process allows a dispensing provider to contest a listed MAC rate, which includes the following:

- Responding to the provider within seven calendar days
- Taking steps to determine if the MAC price is appropriate given the current state market condition
- When updates are warranted, retroactive changes to the date of service with adjustments effective for all pharmacy providers in the network

Submission of a paid claim by the pharmacy is required for this process. The provider must notify the PBM within the period required by applicable law and provide the following information: date of fill, prescription number, NDC number, drug strength, dosage form, member ID number, and pharmacy NCPDP and NPI number.

Chain and affiliation (PSAO) pharmacies submit MAC paid claim appeals through their respective chain or PSAO headquarters, which then submits appropriate data to the PBM. Independent pharmacies (those which are not affiliated with a PSAO for contracting purposes) submit MAC paid claim appeals through

the pharmacy help desk at 1-800-364-6331.

The review process includes a verification of pricing and product availability through sources of information such as wholesalers, manufacturers, retail pharmacies and Medi-Span. Adjustments are made if appropriate and feedback is provided back to the pharmacy. Evaluation is made to determine the pricing has been appropriately defined and is not routinely below acquisition cost.

HOW WELLCARE WILL EVALUATE ITS MAC PROGRAM

The MAC list and associated pricing for the Heritage Health plan is reviewed continuously and updates made as often as weekly based on marketplace trends and dynamics and MLTC requirements. Our PBM monitors the MAC list for appropriateness by continually surveying the marketplace for price changes and performing timely and regular updates to the MAC list. Supply issues are validated through information obtained from wholesalers, manufacturers, retail pharmacies, and Medi-Span.

WellCare receives a monthly MAC list from our PBM that includes evidence of all changes occurring from the prior month, including additions, deletions and adjustments. There is also data supplied relating to MAC changes resulting from MAC appeals. These files are reviewed by our pharmacy analytics and management ream. This team evaluates the claim performance to ensure the generic effective rate and to validate pharmacy generic reimbursement rates are aligned to expected performance. Any outliers in this review are addressed through the PBM account management team. This review takes place monthly.

WellCare performs an onsite audit at the PBM on an annual basis to monitor the PBM's performance and ensure contracted services are performed in compliance with WellCare's policies, state and federal regulations. The focus of the audit is on claim adjudication to ensure pharmacy claims are paid at the appropriate MAC unit price reported to us from the PBM as well as pharmacy network management.

The PBM must provide all WellCare-requested policies and procedures, as well as all relevant processes, workflows, examples, explanations, contracting logs any other supporting documentation regarding the following audit elements:

- Drug Utilization Review
- Transition
- Claims Data
  - Coordination of Benefits
  - Timely Pharmacy Payments
  - Disputed Claims
  - Overpayments and Underpayments
  - Claim reversals
  - Record Maintenance
  - HIPAA Compliance
  - Catastrophic Recovery
  - Claims Payment Report
- Claim Adjudication System
- Provider Relations
  - Pharmacy Access Standards
  - NCPDP File Updates
  - Pharmacy Contracting
  - Monitoring OIG Exclusion List
  - Fraud Waste and Abuse (FWA)
  - Third Party Pharmacy Audits

WellCare also conducts weekly auditing and validation of the PBM invoices to ensure that charges

accurately correspond to pharmacy member utilization.

OTHER PROGRAM COMPONENTS IMPORTANT FOR ACHIEVING STATE'S NMMCP GOALS

Generally, unit MAC prices are uniform across all package sizes and NDCs for each MAC product. Therefore, repackaging NDCs with manipulated AWP's would be subject to the same MAC pricing logic as any other NDC within the generic drug class.

Our MAC list is typically managed based upon generic product identifier level classifications. There are some instances where MAC pricing is assigned at a package size or NDC level.

MAC reimbursement is communicated to the network pharmacies through the daily online adjudication process and through the secure provider portal. All network pharmacies can submit any MAC inquiries directly to our PBM for research and follow up.

MCO EXPERIENCE ESTABLISHING MAC PROGRAMS IN OTHER STATES

WellCare has extensive experience serving the pharmacy needs of Medicaid members across eight states. Additionally, WellCare has developed a full complement of expertise in three major areas of government-sponsored health care; Medicaid, Medicare Advantage and Medicare Prescription Part D plans.

CVS Caremark is an industry leader that currently serves more than 2,000 clients who provide benefits for 71 million individuals across commercial, Medicaid, and Medicare lines of business. As a leader in the PBM market, they employ a team of industry experts knowledgeable in both the generic manufacturing and retail pharmacy industries to provide competitive generic pricing while encouraging generic utilization. The use of MAC prices in the CVS Caremark PBM's generic pricing program was introduced in 1988.

Strengths and Challenges

WellCare's pharmacy operation is a unique hybrid model with a number of critical functions performed in-house by WellCare personnel coupled with the activities of a PBM performed by CVS Caremark. Under our hybrid model, our corporate pharmacy resources are responsible for prior authorization determinations, appeals, PDL development and management, claims testing, Pharmacy and Therapeutics Committee, quality improvement, retrospective drug utilization reviews, rebate management, and member and provider communications. Our PBM partner processes the pharmacy claims point-of-sale, contracts and remits the pharmacy network, performs phone, desk, and on-site audits, coordinates transition of care, answers after-hours provider calls and provides explanations of benefits.

SECTION IV.Q PROVIDER REIMBURSEMENT

99. Describe the MCO's approach to ensuring that out-of-network prior authorization and payment issues are resolved expeditiously in instances when the MCO is unable to provide necessary services to a member within its network. *(Page limit 2 pages)*

ENSURING RESOLUTION OF OUT-OF-NETWORK PRIOR AUTHORIZATION AND PAYMENT ISSUES

WellCare's goal is a robust, comprehensive and expansive statewide provider network to serve the health care needs of our Heritage Health members. We will consistently monitor and augment our provider network to deliver the highest level of care and service to our members. In circumstances when we do not have a participating provider accessible to a member, we coordinate care for medically necessary covered services through an out-of-network provider to ensure adequate and timely coverage. No prior authorization is required for emergency services. Covered emergency and post-stabilization services performed by out-of-network providers will be reimbursed at 100 percent of the Medicaid rate in effect on the date of service.

For non-emergency services, our process includes:

- Verifying the service is not available in network
- Verifying the provider has no sanctions and is not on the HHS Office of Inspector General Cumulative Sanctions Report
- Initiating a prior authorization in our core processing system
- Establishing a single case agreement with the out-of-network provider
- Assisting with member transportation issues

Coordination of Care

To maintain continuity of a member's care, the member's PCP coordinates referrals for out-of-network specialty care. Often a referring provider reaches out to his or her assigned provider services representative for assistance in obtaining referrals to out-of-network specialists if a member's need for treatment cannot be met through a contracted provider. The representative attempts communication with the out-of-network provider if a relationship is not already established, and coordinates with our utilization management and member outreach or case management teams, as needed, to ensure that the member is involved in the medical decision-making process. If the out-of-network provider agrees to see the member, our utilization management team enters an authorization for service and a network development representative initiates a single case agreement (SCA) to ensure proper payment. The process includes assurance the out-of-network provider is loaded correctly along with the necessary procedure codes to ensure timely payment.

By the Numbers: Rapid Response

95% of Single Case Agreements are completed within 72 hours of the request

Timeliness

Our network management department completes 95 percent of SCAs within 72 hours of the request. If the SCA is of an urgent nature, we complete it the same day. We request claims and encounter data for all out-of-network services and process them in accordance with the same standards as in network claims and encounters. In 2015, we processed 96.75 percent of all clean claims within 14 calendar days of receipt.

Coordination of Payment

In establishing an SCA, our network management department will negotiate payment to the provider in a financially responsible manner that is consistent with MLTC guidelines to ensure delivery of care to the

member. During the first 90 calendar days of program start, payment will be at 100 percent of the Medicaid fee-for-service rate to support continuity of care.

As part of the negotiation process, out-of-network providers agree to a payment arrangement that ensures that the cost to the member is no greater than it would be if the covered service was furnished by a provider contracted within our network. This agreement makes clear that out-of-network providers cannot balance bill a member.

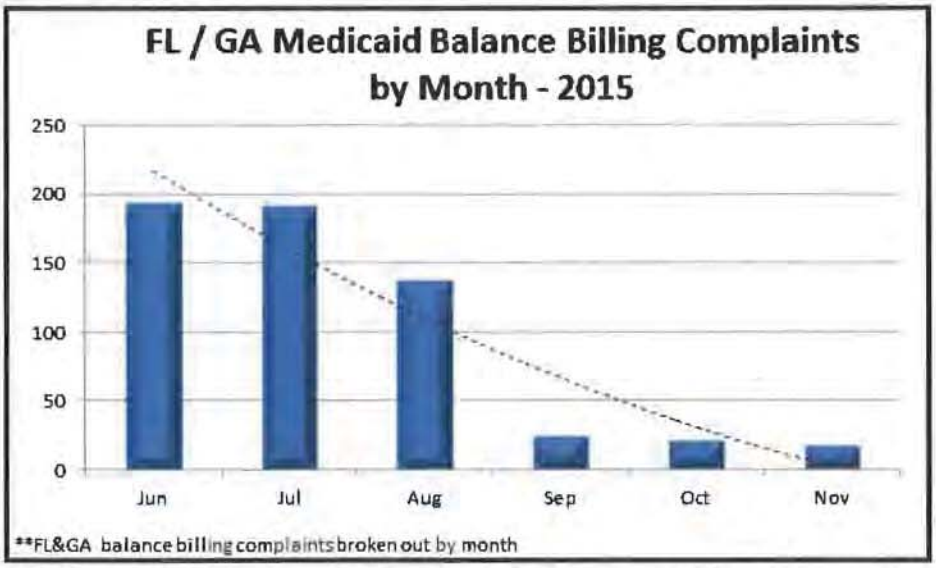
Family Planning

Members have the freedom to receive family planning services and related supplies from appropriate Medicaid providers outside of our provider network without restrictions and without referral. The out-of-network provider submitting a claim for family planning services will be reimbursed at no less than the Medicaid rate in effect on the date of service. To ensure continuity and coordination of a member's total care we encourage members to receive family planning services from in network providers through all avenues of member education including the member handbook, newsletters, member services, care managers, and member outreach.

Oversight Process to Ensure Prompt Resolution of Issues

We closely monitor out-of-network claim payments to assure prompt resolution of any issues that might arise. One of the key payment issues we have found with out-of-network providers is balance billing. We addressed this by establishing an outbound call unit to work directly with provider offices when a member calls regarding a balance billing issue. Our member services associate takes the information and a call is initiated to the provider's office to educate them on the prohibition against balance billing and work with them to identify the root cause and underlying issues. This new program began August 2015 as a pilot for our Florida and Georgia plans. Since that time the team has received positive feedback from providers about the proactive approach we are taking to resolving provider concerns and has mitigated 99 percent of all calls related to balance billing.

Figure 4



Our outbound call program was rolled out to the remainder of our Medicaid plans in October and will be in place at time of program implementation for the Heritage Health Plan. See **Figure 4** for a pilot program performance results.

SECTION IV.Q PROVIDER REIMBURSEMENT

100. Describe the MCO's proposed process for the annual year-end cost settlement process with critical access hospitals. *(Page limit 1 page)*

ANNUAL YEAR-END COST SETTLEMENT WITH CRITICAL ACCESS HOSPITALS

WellCare has extensive expertise in contracting and reimbursing critical access hospitals, including the cost settlement process. In compliance with 471 NAC 10-010.03F and 10.010.06A, WellCare will make critical access hospital inpatient payments using interim per-diem rates calculated by MLTC with an annual year-end cost settlement. We will reimburse outpatient critical access hospital services based on a cost-to-charge calculated by MLTC with an annual year-end settlement. For the purposes of this RFP, critical access hospitals are those listed on Attachment 16, or as amended by MLTC.

Proposed process

WellCare proposes the following process for annual year-end cost settlement process with critical access hospitals.

- To accommodate the Medicaid cost reporting requirements for Nebraska critical access hospitals, WellCare will provide a paid claims report to each facility and MLTC 120 days after the end of each hospital's fiscal year. Generally, 120 days is the typical timeframe needed to produce a paid claims report to accommodate 90 days claims runout.
- The paid claims report will contain both inpatient claims and outpatient claims with service dates occurring during the hospital's fiscal year and paid from the first day of the fiscal year through at least 90 days after the end of the fiscal year. The paid claims report will be provided to the hospital within 120 days of the hospital's fiscal year. Another updated report will be provided 14 months after the fiscal year ends.
- The paid claims listing will contain both covered and non-covered charges identified by cost center using revenue codes. Payments made by WellCare will be listed along with any third party liability payments and member cost sharing. For inpatient claims, both the discharges and days will be included on the report.
- Once WellCare receives the final Medicaid cost report from the Department of Health and Human Services (DHHS) Financial Services, the cost to charge ratio for each cost center will be applied to the covered charges to calculate reasonable cost of services for each cost center. The reasonable cost for each cost center will be compared to WellCare payments plus any member cost sharing amounts to determine whether any additional payment is owed to the critical access hospital or due back to WellCare. Third party liability (TPL) claims and any services that are not reimbursed on a cost basis, such as flat triage fees or outpatient services paid on a fee schedule, will be excluded from the settlement calculations.
- The settlement calculations will be communicated to the hospital for final reconciliation.

SECTION IV.R SYSTEMS AND TECHNICAL REQUIREMENTS

101. Provide a general system description that details how each component of the MCO's health information system will support the major functional areas of NMMCP. Include a systems diagram that highlights each system component, including subcontractor components, and the interfacing or supporting systems used to ensure compliance with RFP requirements.

Describe how the MCO's system will share information between Nebraska's systems and its own system to avoid duplication of effort. Identify any requirements that cannot be met without custom modifications or updates to the MCO's systems. If modifications or updates or updates are required, describe them and the MCO's plan for completion prior to program operations. *(Page limit 12 pages, not including the systems diagram)*

DEPLOYING AN INFRASTRUCTURE THAT IS INTEGRATED, ADAPTABLE AND MEMBER-CENTERED: WELLCARE'S APPROACH TO INFORMATION SYSTEMS

WellCare's single-instance, fully integrated management information system (IMIS) platform, which is fully scalable and flexible, is used today to collect, analyze, integrate and report data in support of our entire operating book of business serving 3.7 million members, including Medicare Advantage in 15 states, contracts in nine Medicaid states, Part D operations in 33 regions (49 states and the District of Columbia), and two Health Insurance Exchange markets. We plan to leverage this IMIS application suite to support all aspects of the Heritage Health program including but not limited to; enrollment; care management; utilization; claims adjudication and payment; grievance and appeals; disenrollment. Our systems provide the business capabilities to meet all requirements as outlined in *Section R. Systems and Technical Requirements* of the program description and scope of work of this Request for Proposal (RFP), and we are committed to meeting the needs of MLTC, our Heritage Health members and providers through continued investment and enhancement of our technology platforms. We acknowledge that reporting formats will be determined by MLTC post contract award.

WellCare's IMIS suite supports all the aspects of our processing requirements, including those specified in the *Section R. Systems and Technical Requirements* of the RFP, and consists of applications that:

- Provide a stable, secure and standard technical architecture
- Focus on the care and Utilization Management, needs and preferences of the individual members
- Support the establishment of an available, accessible and adequate provider network
- Are built on a base platform that efficiently completes routine functions such as Enrollment & Disenrollment Processing, Claims and Encounter Processing and Financial Management
- Incorporate robust complaint, Grievance, Appeals and Dispute processing
- Utilize a Data Management Solutions to collect, assembles and make available in a meaningful way the information needed to support reporting, analytics and data exploration

Our applications support accessibility by separating the user interface, process workflow, application functionality and data management functions into clear, distinct layers that allow for the delivery of functionality to members, providers and internal users through multiple channels. The IMIS is designed and built to leverage configuration changes by business users that permit them to modify, enhance and improve the behaviors and functionality of the applications without application code changes. Our IMIS suite of applications also interact with one another through defined functional enterprise services while implementing "publish and subscribe" methods to ensure updates and changes in data or activities are known to all applications. The system diagram (see **Figure 1** on page 13) outlines the key system applications that will be used to support our Nebraska operation.

SUPPORTING THE MAJOR FUNCTIONAL AREAS OF NMMCP

The flexibility, structure and focus of our application environment aligns with the emphasis that both WellCare and MLTC places on the holistic management, delivery and support of individual, personalized care. In **Figure 2** on page 14, WellCare outlines the ten key application components of the IMIS, which are described below:

Digital Solutions

WellCare leverages technology to facilitate our interactions with members, providers and government partners to provide multiple methods of effective and efficient communications and facilitate cost effective health care transactions. Key Components of our Digital Solutions include:

- **Corporate Website:** WellCare's corporate website is accessible to all users without the need for login credentials. Examples of information available from the corporate website includes: information on WellCare's Medicaid health plans, links to WellCare's MLTC's website(s), WellCare corporate history and contact information, and WellCare's corporate values and goals. Additionally, all public website locations on WellCare include the ability to search for and find providers.
- **Member Web Portal**: WellCare's web portal for members (including caregivers supporting individuals) are designed to enable interactions with Members, provide access to information and complete routine transactions. The portal provides access to information such as Pharmacy preferred drug lists, over-the-counter OTC benefit information, a searchable Member Handbook, a Formulary lookup, Health and Wellness materials, accessing interpreter services, and other member materials. Members are able to complete transactions such as provider searches, PCP selection and changes, and requesting materials, including ID Cards. The site also features a member messaging (including communications delivery and Contact Us features) and communications history. WellCare also utilizes the site to improve member awareness by including reminder information for Medicaid redeterminations and informing members about Care Gaps.
- **"MyWellCare" Member Mobile Application:** Our MyWellCare mobile application for members is available for Apple and Android smartphone devices. The application is designed to make it easy for members to interact with WellCare when and how they want. Key features include: Find-a-Provider, Quick Care (Urgent and Hospital Emergency service locator), Contact Us, ID Card, Wellness Services (Care Gap) notifications and alerts when a member is due for a check-up.
- **Provider Web Portals:** WellCare's web portal for providers enables access to various materials and tools to obtain information and perform day-today tasks. Our provider portal includes information such as a Searchable Provider Handbook, Member Benefits, and the Appeals and Grievance process. The portal also facilitates transactions including; allowing providers to request and receive prior authorizations, Searchable Provider Directory, Request and Receive Prior Authorization of Services, support for Claims Submission/Corrections/Status Inquiry, Membership Verifications (including Eligibility, Co-payments), a member roster for PCPs and the ability to submit questions.
- **Government Partner Web Portal:** Our Government partner portal was initially dedicated to providing State agencies access to reports and performance information including weekly, monthly, quarterly, annual and ad hoc reports, quality and performance reports. This portal is a supplement to, and not a replacement for, standard file transfer (FTP) and other communication channels.
- **Interactive Voice Recognition** (IVR): Our IVR enables members and providers to gain access to the information they seek and to perform routine transactions in an automated manner. The provision of claim status information, requesting an ID card and even ordering OTC supplies are frequently used services provided through the IVR.

Provider Management

WellCare's provider management applications support the essential functions of identifying, credentialing, contracting with and maintaining healthy and productive relationships with a broad network

of providers and community agencies. Each step in our provider management process includes data and quality review to ensure that WellCare is continually able to provide an accurate, current, and up-to-date provider directory to our members and providers. Examples include an address verification processes to verify that physical and mailing addresses are accurate and usable for correspondence, GeoAccess® verification and even the provision of driving directions. The provider management application supports the requirements outlined in Section *R.8 Provider Enrollment* of the RFP, including:

- Maintenance of audit trails.
- Retention of key data elements (including NPI, provider affiliations, office hours, languages spoken, disability accommodations).
- Provider contractual arrangements, including linkages of individual providers to groups.
- Individual providers from contractually-delegated providers including pharmacy, vision, transportation, and other providers.
- Credentialing functions including data capture and automated alerts, including system generated letters delivered through the member and provider communications module, when licenses are expiring. WellCare's credentialing application (Cactus) includes automated interfaces to multiple sources, although many state licensing and medical boards do not support electronic interfaces and require manual validations.
- Network Integrity capabilities including the ability to monitor and ensure compliance with geographic access requirements. This automatic process provides monthly validation against multiple exclusion sources to ensure no excluded individuals are included in the network or otherwise paid by WellCare.

WellCare will provide a weekly provider file in the format and including the content specified by MLTC. We will utilize the provider type and specialty codes specified by MLTC in the communication and exchange of provider data with MLTC.

A unique aspect of WellCare's provider applications is the support for community providers through the **Health*Connections* databases**. At the core of the Health*Connections* model is the concept that the social service network is a vital component of the healthcare delivery system. With this in mind, WellCare uses traditional public health methods to research and catalogue available community-based programs, activities and services that comprise the social safety net. WellCare CommUnity Liaisons load the network into a centralized CommUnity Command Center that is accessed by member-facing and community-facing representatives to search for available services and record the referral in a social service electronic health record (SSEHR). This SSEHR maintains information for each caller on all referrals and their disposition. WellCare then uses several to profile the network at a macro- and a micro-level: service area, breadth and scope of services offered, strength of funding sources, and consumer feedback (quality). This information is then overlaid with population, referral, network gap and census data to compare availability with need.

Care Management

Our Medical Management Platform (MMP) application is utilized to support the care management and utilization management functions of our member populations, and our Drug Enhancement Request (DER) application performs formulary utilization management functions to ensure members receive the appropriate treatment. The MMP supports our assessment, stratification, planning and care coordination functions for all phases of Utilization (UM), Care Management (CM) and Disease Management (DM). MMP provides the foundation for the development of a customized care management and care coordination system to provide person-centered care management and care coordination services to our members. It is a person-centered platform that enhances care integration among all places and levels of care, and it optimizes continuity of care. MMP supports both online (connected) and off-line modes. This means that when our clinicians and care managers are in the field, they have access to MMP functionality in support of our members. The MMP supports the capture of information from Health Assessments,

Predictive Modeling and Risk Stratification sources to identify and reach out to members that are in need of or would benefit from Case and Disease Management planning. The MMP also provides the support for critical care management staff activities such as Care Coordination and Oversight, Service Plan Development and Goals Tracking. The application provides care management staff with insights into data such as Immunizations, Care Gaps, claims, and other data through a comprehensive member 360 view. Utilization Management is also supported by the MMP and incorporates automated integration with clinical guidelines to help ensure patient safety and the best health outcomes. The DER application is similarly utilized to support the evaluation of requests for formulary enhancements and includes integration with review criteria. Both the MMP and the DER applications automatically update the claim adjudication system with approved service requests.

Claims and Encounters

WellCare's Core Processing System (CPS) is the hub of our Information Systems suite. The CPS is designed to apply benefits, clinical edits, provider contract and pricing, data validations and service code verifications (including NCCI edits), and authorization rules to claims in a real-time processing environment. This capability allows WellCare to meet or exceed the timeliness and accuracy standards identified in the RFP. Encounter submissions, including claims (medical, pharmacy and ancillary) from delegated vendors are all processed through the Encounter Processing System which ensures completeness through validation against Cash Disbursement Journals, as well as compliance with state companion guides for encounter submissions, and management and resubmission of any submission rejections. We successfully transmit encounter data in 13 versions of Encounter formats (837I/P/D, NCPDP, PACDR, APAC, etc.) for 22 lines of business. WellCare currently submits six million encounters per month.

Enrollment and Eligibility

WellCare is successfully processing an average of over 8.4 million enrollment and disenrollment transactions per month from daily and monthly 834 files from nine Medicaid states in 2015 (January 1,2015 through October 30,2015). WellCare's Enrollment and Eligibility System (EES), further described in the response to Question 104, will meet the obligations for processing enrollment outlined in *Section R.5 Eligibility and Enrollment Data Exchange of* the RFP, including the receipt and processing of enrollment files within 24 hours of receipt, transmitting to MLTC, in the formats and methods specified by MLTC, change of member address and telephone number, the ability to identify member's by their Medicaid ID, and execution of validations to identify and resolve potential duplicate records in coordination with MLTC and as specified by MLTC. WellCare's EES application supports multiple edits and validation on the incoming 834 data during the processing stages including comparisons to existing records using names, Medicaid or other IDs, and date of birth to prevent loading duplicate records. Because the EES application performs all validations (including potential duplicates), tracks each member separately, and requires manual confirmations prior to loading, WellCare is not only able to ensure accurate system updates but also support notification and interaction with MLTC for duplicate or other potential member data issues. WellCare will submit monthly member Data Conflict Reports in accordance with MLTC defined guidelines and formats.

Complaints

Our complaints module, which is used to support Appeals and Grievances, is directly integrated with the CareConnects customer service application, supports a notice of action process and an expedited resolution process. This single solution assists coordinators in capturing all data and information necessary to ensure prompt review and follow up of submissions. It also supports a notice of action process and an expedited resolution process. In 2014, these processes were found to be 100 percent compliant with National Committee for Quality Assurance (NCQA) standards.

Member and Provider Communications

WellCare's Corporate Communications Module (CCM) serves as the communications hub for the

effective distribution of communications to members and providers. This platform is used to meet the requirements for member and provider material distribution, including distribution of materials according to the recipient's delivery preference (USPS, email notification and delivery to web portal) and the member's language preferences. The CCM indexes and makes accessible the communication history with members and supports interactions with the web, CAREConnects, MMP, and other applications to provide access to relevant communications efficiently and effectively. Included as part of the CCM is the ability to utilize templates to format communications and combine (mail merge) data into communications that are consistently formatted with State-approved communication formats.

Member and Provider Services

WellCare's CAREConnects application, our member and provider service solution, is a rule-based contact management system. CAREConnects is the single user interface and navigation tool used by WellCare's member services and provider services staff. The CAREConnects solution improves the quality of call handling, ensures consistency of services, facilitates first call resolution, reduces handle time and allows us to more effectively assist members and providers. It aids in the identification of training needs thereby increasing its effectiveness, which in turn, increases associate effectiveness. These benefits result from application's guiding member and provider service representative's interactions through scripted wording. Scripts increase quality and accuracy, and using workflows for each type of interaction scenario automates many of the actions to be taken, and provides real-time access to member, provider, claims, and authorization information.

Financial Applications

The basic financial management of accounts payable (AP), accounts receivable (AR) and general ledger (GL) activities are supported through WellCare's Oracle® financial applications. The financial applications serve as the system of record for revenue and expense transactions and the generation of corporate financial statement information.

Quality Applications

Our quality applications are predominantly data and analytics driven solutions that meet formal regulatory reporting needs and are primary examples of how we leverage data sources to integrate information into our daily operations. The quality applications support effective care management processes. They are also used to support Healthcare Effectiveness Data and Information Set® (HEDIS) reporting, which utilizes data from all available sources, including non-operational sources, to generate data and information. This information is compiled completely, and these sets of data extracts are loaded into our HEDIS application to ensure that HEDIS scores are accurate and consider the comprehensive set of information available. The Early Periodic Screening, Diagnosis, and Treatment (EPSDT) program is supported through the use of member demographic information, claims, encounter and other utilization data to match against EPSDT and periodicity schedules which then determines those members who are in need of services. From HEDIS and EPSDT processing, we identify Care Gaps information which is available to care managers, providers and members. WellCare is also actively enhancing its provider profiles capabilities, which extract multiples types and sources of data and generates as output a Data Mart that is accessible for reporting, analysis and display on the secured provider web portal.

Our Care Gaps approach is structured and designed to provide maximum benefits to our members.

Our Integrated Design Focused on Member Outcome

Our Quality application is focused on identifying the basic care services members should obtain and creates Care Gaps for those services. In addition to traditional methods such as member letters, WellCare

makes these Care Gaps visible to members on the member portal and the Mobile App. We also make these Care Gaps visible to our providers on the provider portal. The Care Management application not only provides care coordinators with access to Care Gaps, it highlights them. Our customer service agents are notified through the CAREConnects application when a member has Care Gaps in an effort to help them schedule appointments.

SHARING INFORMATION BETWEEN MLTC AND OUR SYSTEM WHILE AVOIDING DUPLICATION

WellCare coordinates system activities and information exchanges with Medicaid states to ensure timely, accurate and efficient processes and exchanges of information that avoid duplication of efforts. As an example, WellCare recognizes that the state (or its Enrollment Broker) is the source of truth for enrollment and eligibility information. WellCare's EES application is designed to efficiently process information received from the State and align our enrollment database to the information from the State. In markets where the functionality is supported, WellCare provides a reconciliation file to the State to ensure valid processing results. During the processing of 834 Enrollment files, should a member's PCP selection be communicated, we will utilize that information to assign members to their chosen PCP. WellCare also has implemented other system integrations with Medicaid states to improve efficiency and eliminate redundancy. A primary example is the creation of an interface to receive Authorization Requests directly from a State web portal. This allows providers to have a single interface for use across all MCOs and eliminates the creation of multiple portals. Another example is our support for a Common Verification Organization, operated by the State which serves as a single source for credentialing of providers in the State. This streamlines provider credentialing by multiple MCOs. WellCare is supports and has actively participated in such integrations.

We will utilize the formats prescribed by the State of Nebraska for the exchange of enrollment (834s), capitation payments (820), provider data (proprietary) and encounter submissions (837, NCPDP) and make payments to providers using EFT transactions.

WellCare is the only known MCO to send participants to the annual HIE Users group meeting in Park City Utah.

As part of our commitment to government sponsored health care initiatives, WellCare has been actively engaged in working with our State partners on a Healthcare Information Technology (HIT) strategy since 2012 when we prepared to integrate with the Kentucky HIE. Our care model is *"the right care at the right time, in the right setting."* To that end, making good data available to our care managers is of primary importance. HIT helps us by integrating data from a wide variety of sources and providing data on a wider scope than is possible for an individual managed care organization. HIT often provides information more quickly. WellCare has been and will continue to be an active participant in the HIT community. During the *Health Information Exchange Users Group (HUG)* conference (September 28 -30, 2015) WellCare was the only known MCO to send participants to the annual HIE users group meeting in Park City Utah. We are now preparing to work with any interested HIEs to find mutually beneficial solutions for our common problems. The Nebraska Health Information Initiative, NeHII, requested that WellCare provide input to their annual strategy meeting. WellCare firmly believes in promoting the use and adoption of State HIEs as a benefit to the industry, and we actively promote adoption by our contracted provider network as well.

Access to Systems Information

WellCare will provide a dedicated Government Partner Portal to MLTC for the placement and delivery of required weekly, monthly, quarterly and annual reports, and ad hoc reports. We are already in the process of enhancing this portal with additional self-service capabilities which will include access to member claims and other system information in a transparent and user friendly manner. We are making this enhancement to support the request for access to live systems identified in section *R.1c Systems and*

Technical Requirements of the RFP, while continuing to ensure compliance with privacy and security concerns for all our constituents and reducing training and complexity for our government partners. Nebraska authorized users will be provided access to WellCare system information through our secure portal, in accordance with the security requirements outlined in *Section R.9 Information Security and Access Management* of the RFP.

Process for ensuring Quality, Accuracy and Completeness of reporting

WellCare's corporate emphasis and culture of compliance is demonstrated by the manner in which our system designs, software development lifecycle, and regulatory report submission processes focus on ensuring quality, accuracy and completeness of reporting.

Our enterprise Data Management Solution provides the Information Technology (IT) infrastructure to support our integrated system of care and gives WellCare a central repository of all our data. This centralized platform provides an one-stop shop to maintain compliance with MLTC's reporting requirements. Because of this structure, the data management solution is able to provide our staff access to any and all relevant member information including assessments, physical and behavioral health services, pharmacy, lab/imaging test results, care management activities, integrated care plans and service plans. We have a successful record of complying with the reporting requirements of governmental agencies in 49 states and the District of Columbia. These reports are developed in accordance with contract requirements and state and federal reporting guidelines and are automated to ensure accuracy and timely delivery. We use a formal compliance tracking tool to monitor reporting requirements and track completion. This tool sends automated messages to alert report preparers prior to reporting due dates and records submission for reporting of timeliness metrics.

As outlined in more detail in the response to Question 102, WellCare supports all standard data exchange formats, including those for collecting service information from providers, as outlined in *Section R.1b. Systems and Technical Requirements* of the RFP. WellCare publishes standard Companion Guides on its website. In addition WellCare's operations units dedicate a team to monitoring and working with providers to effectively implement data exchanges, including working with paper submitters to implement standard electronic interfaces.

Report Methodology

WellCare follows the (Refer to **Figure 3**) software development life cycle for report development as noted in the table below.

Figure 3

Planning Phase	During the planning phase, we gather and document all specifications and instructions required for each regulatory reporting submission. This includes the identification of the inter-disciplinary team responsible for the implementation of the infrastructure to facilitate the generation and submission of all deliverables. These planning efforts are documented in the Legal Integrated Online Network Solution (LIONS), which is used to monitor our reporting submissions. IT report preparers conduct data collection sessions with different functional area owners within the organization to map the data elements in our systems to the data that is required in the reports. Our IT associates also document the business process and the data transformation process that is needed to fulfill the reporting needs. The functional areas may include, but are not limited to, enrollment, claims, encounters, grievances and appeals. The requirements are approved by the data source providers prior to starting the design phase.

Requirement Phase	During the requirement phase, the IT report preparer with the assistance of a cross-functional team that consists of the business report owner, functional process owners and other IT system owners, completes the Business Requirement Document.
Design Phase	During the design phase, the IT report preparer designs the report structure and the technology platform. The report is also finalized during the design phase.
Construct Phase	During the construct phase, the reports are developed based on the approved requirements and design. Developers review and validate that the report is functional through the unit testing of the code. Unit test results are documented before the reports are handed over to the Quality Assurance (QA) team for additional testing.
Scheduling and Review	During the scheduling and review phase, the report creation process is automated, and reports are scheduled to run for review and approval by the functional area owners before they are due for submission. We have the capability to submit the reports either through a secure FTP, secure email or any other process as defined by the state.
Maintenance	During the maintenance phase, the reports are periodically reviewed to ensure accuracy and completeness of the information being provided.

Process of Reviewing Reports

Our reports are categorized as **fully automated or partially automated.** As part of the system development lifecycle we test fully automated reports for accuracy prior to being put into production. Partially automated reports have a component that is automated but require some human intervention (review, analysis, additional comments in narrative form, etc.) before they are considered complete.

Legal Integrated Online Network Solution (LIONS)

We use the Legal Integrated Online Network Solution (LIONS) application to manage the internal review and validation of regulatory reports. LIONS is an internally developed web-based application designed to effectively control, track and monitor regulatory reports, ad hoc submissions and other deliverables. The Regulatory Affairs department, in conjunction with corporate Compliance, maintains this application and ensures it is updated. The LIONS application stores all report deliverables including the report type, frequency, report requirement and specifications, regulatory agency, due dates, reminder features, responsible parties, submission method and associated fines or liquidated damages. Concurrently with the configuration of LIONS, the management team within the Regulatory Affairs department assembles a regulatory reporting work group that works on the individual planning and implementation of each regulatory report. This work group is comprised of professionals from the IT department, subject matter experts from business units and other interested parties.

LIONS is an internally developed web-based application designed to effectively control, track and monitor regulatory reports, ad hoc submissions and other deliverables.

Our reporting policy defines specific roles and includes an attestation process for all required reports. As each report is defined in our compliance tracking tool, the following roles are defined (**Figure 4**).

Figure 4

Data Source Provider	➢ Individual with direct knowledge of the data used in report ➢ Responsible for specific data sources and data supplied to the report preparer
IT Preparer	➢ Associate within the IT department ➢ Works with report preparer, data source provider and regulatory owner ➢ Establishes report control document and requirements document
Regulatory Owner	➢ Associate responsible for defining the report specifications ➢ Measures compliance based on regulatory and contractual requirements ➢ Clarifies reporting requirements with state or federal regulatory agency, as needed
Report Preparer	➢ Compiles final report ➢ Certifies the report prior to submission or required sign off

Ad Hoc Reporting

WellCare will comply with requests for ad hoc reports from government partners through coordination with a Request Manager (typically either our Nebraska-based Compliance Liason or Information Management and Systems Director). All requests will be immediately logged in our tracking application and forwarded to our Regulatory Reporting team for discussion. All reasonable attempts will be made to meet or exceed the requested MLTC timelines. Our experience indicates that on occasion, the nature and complexity of the request may not be feasible within a five-day or other requested timeframe. In such cases, WellCare's Request Manager will notify MLTC of the challenge and the most aggressive, viable timeframe for delivery.

Resource Availability and System Changes

Service Desk requirements, as outlined and required in *Section R.3.1 Resource Availability and System Changes,* are included in the response to question 103, which addresses the timelines, support methods, and tracking requirements identified in the RFP.

Systems Policies and Procedures

WellCare's corporate compliance department oversees and maintains a repository of all corporate policies and procedures. Included in this repository are topics outlined in *Section R.3b Resource Availability and System Changes*, including, but not limited to, policies that address security and IT operations:

- C13IS.01.011.ST-001 – WellCare Information Security Standard
- C13IS.01.011 – Information Security Policy
- IT.001-PR-111 – IT Job Operations Management Procedure

WellCare's corporate training department coordinates the development and review of training materials for end users, incorporating both system and job function training to ensure that end users are educated on the use of IT Systems. WellCare's C2TR-001 Corporate Training Requirements policy is the primary policy governing training activities, including governance of training materials. We also make available to web users Help functions and documentation to assist users in site access and navigation.

System Changes

With respect to the requirements established in RFP *Section R.3c System Changes*, WellCare has implemented formal processes for the identification, development, testing, and promotion of system changes and maintenance as required, including changes for federal or State mandated formats, actions, or operational activities, such as those supporting the Encounter Submission process.

WellCare's release management process is designed to ensure stability in the production environment

while enabling timely delivery of needed functionality into production. We acknowledge our responsibility to notify MLTC at least 90 calendar days prior to the installation or implementation of minor software and hardware upgrades, modifications, or replacements. This also includes notifying MLTC prior to the installation or implementation of major software and hardware upgrades, modifications or upgrades (including, but not limited to, claims processing, eligibility and enrollment processing, service authorization management, provider enrollment and data management, conversions of core transaction management systems). Our current practice is to publish the release schedule for a calendar year in advance of the start of the year. WellCare's 2016 release schedule was published in December 2015.

Each upgrade or system change will be documented in a release plan that includes a timeline, milestones, and adequate testing to be completed before implementation. We acknowledge our responsibility to provide such plans to MLTC, when requested, in the timeframe and manner specified by the MLTC. Our Intake process is initiated upon the issuance of new or revised requirements from the state, CMS, or other regulatory agencies as well as during the annual planning process. An Intake Request is generated and used to track any change request throughout the entire life cycle. Intake Requests are routed to the appropriate WellCare executive for review, clarification, and prioritization. Regulatory and contractual changes receive the highest priority. Once changes are approved, the request is initially scoped and sized. As appropriate, architectural impact, business requirements, and functional specification documents are created for the request. The Intake Request is then scheduled through the release planning process. The release planning process assigns target release dates, ensures related changes are coordinated, and establishes the lifecycle delivery dates for each stage of development.

WellCare establishes the Information Management and Systems Director, identified as key personnel in the RFP, as the primary liaison to Government Partners such as the MLTC for all IT activities. The Information Management and Systems Director will coordinate with the project management office to communicate corrections, target deployment dates and provide any requirements or analysis information as appropriate. He/She is also accountable for the reporting of system availability or performance issues, status and resolution updates as outlined in *Section R.3 (e-g, k) Resource Availability and System Changes* of the RFP. WellCare's change management policies and procedures ensure that changes to production environments are documented and approved. WellCare's release schedule establishes timelines for deployments and enhancements, and changes involving outages are planned for non-production hours. The Information Management and Systems Director will coordinate any variances from this schedule with the MLTC. He/She will also work with the Project Management office to coordinate testing activities with the MLTC as appropriate.

Systems Refresh Plan

We will continue to invest in the development and enhancement of the IMIS platform to ensure ongoing compliance with federal and MLTC-specific requirements, to enhance our internal efficiency and, most importantly, to better serve the individual needs of our members and our provider community. Our business units plan for enhancements to our system annually through a Capital Planning Process, taking into account industry trends, needs of the MLTC, enterprise best practices and feedback obtained from members and providers. The Key Production System matrix included in the Systems Overview diagram (Figure 4) outlines the platforms and versions of hardware in use and is maintained on an ongoing basis. WellCare will ensure that vendor supported versions of third party solutions is maintained.

Other Electronic Data Exchange

WellCare currently leverages technologies, such as our website, mobile application and social media, to distribute critical member information and interact with our members. We have launched and funded a new strategic initiative to implement additional uses of technology that will further enhance member communication and engagement. Over 2015 and 2016, we will deploy the following three components of our innovation initiative (**Figure 5**).

Figure 5

OUR INNOVATION INITIATIVE
➢ We will leverage scanning and indexing technologies to better store, retrieve and disseminate inbound Members faxes and emails. This enhancement will result in the creation of a member communication record that will include inbound member communications. All of our member-facing teams will be able to provide an enhanced, more coordinated level of service by being able to quickly access all communications from members.
➢ The second component, scheduled for release in 2016, also focuses on using technology to make correspondence available to our member and member-facing staff. This component focuses on retaining and associating WellCare initiated outbound correspondence to the member communication record. The member will access the member communication record via our secure member portal to review correspondence sent by WellCare to the member. Members who supply an email address and specify email as their communication preference will receive an email notification of new correspondence being available in the member portal and will retrieve their correspondence via their secure account on the portal. This approach provides an effective alternative to surface mail and protects member privacy.
➢ In 2016, we will implement text notifications that a new correspondence has been generated and is available via the member portal. In the same release we will deploy chat capability on our secure member portal.

Electronic Messaging

WellCare will establish a continuously available electronic mail communication link (email system) to facilitate communication with MLTC, based on its installed version of Microsoft Office. As a normal course of operations, WellCare establishes a secure FTP site with government partners for the exchange of data files and can communicate using a secure virtual private network (VPN) while complying with national standards for submitting protected health information (PHI) electronically. WellCare also provides for reports and other forms of content exchange a password-protected government partner portal.

Records Retention

WellCare's C13RIM.001 Records and Information Management Policy governs the maintenance and retention of records in WellCare data systems. WellCare has reviewed, acknowledges, and will comply with the retention requirements outlined in *Section R.13 Record Retention* of the RFP.

ENHANCEMENTS TO OUR SYSTEM TO MEET THE REQUIREMENTS

Requirements specifically outlined in the RPF that have been identified as needed for future development, and will be developed upon Contract award are as follows:

Full Participation in NeHII: WellCare has independently initiated corporate activity and integrations with other states to support participation in Health Information Initiatives. Upon award and the receipt of appropriate operating guidelines, we will implement requirements on an agreed upon timeline to support direct NeHII integration.

Regulatory Reporting & Submissions: Reporting formats will be determined by MLTC post contract award as noted in the RFP. As a result in our response WellCare has provided significant detail around the report generation and certification processes to demonstrate that we fully understand and support these obligations. While we produce a large number of regulatory reports in support of our nine Medicaid states, we fully anticipate additional development efforts to implement the specific reporting and formatting requirements as defined by MLTC.

In addition, we continually invest in the development of and enhancement of this platform to ensure we comply with the requirements of MLTC to enhance our internal efficiency and, most importantly, to better serve the individual needs of our members, government partners, and provider community. Prior to

and independent of the issuance of this RFP, WellCare initiated multiple internal system and solution activities which contribute to functionalities identified in this response. These activities include:

- Key strategic functions including our web portal (for all constituents)
- An innovative Medical Management Platform (MMP)
- Enhancements to our Data Management Solution platform, including predictive modeling, reporting and analytics
- Enhancements to the Provider Management Platform
- Installation of a robust correspondence platform (including support for a broad array of member preferences)

Beyond the system activities discussed above, WellCare has noted initiatives within the RFP that will result in our engaging in new creative solutions that enable us to effectively meet our Members' needs in a holistic and comprehensive manner. Key enhancements to our operations based on these initiatives are scheduled for completion in 2016 and include:

- **Enrollment and Eligibility System (EES) Enhancements:** Our EES is being modified to support the optional selection of a Behavioral Health Home. These changes will include capturing member permission to share behavioral health information with the PCP, separate member correspondence confirming Behavioral Health Home changes and notifications of PCP changes to Behavioral Health providers.
- **Expanded Access to Community and Safety Net Provider Information:** We currently collect and make available to Care Management and our other users vast amounts of information on Community and Social Safety Net Providers to assist our members. We will be extending access to this information to providers-specifically Behavioral Health providers in Nebraska.
- **Government Partner Portal Enhancement**: We are making modifications to the portal application which includes the ability to submit Service Tickets, and access WellCare system information. We would solicit other suggestions or recommendations from MLTC on opportunities to make this portal even more beneficial.
- **Enhanced Medical Management Platform:** WellCare is already in the process of developing and deploying an enhanced MMP which will improve the use and efficiency of the application. While the current platform meets or exceeds the requirements outlined in this RFP, completion will further extend and expand the functional capabilities of our Medical Management platform.
- **Web Portal Project:** Similarly, WellCare's web portal project will be extended to expose additional member care gaps (including EPSDT and immunization services) to providers, and we will be making this functionality available to all appropriate providers as well as members as part of, or in advance of, the effective date of the planned contract. Moderate additional content and functionality will be added to this portal to ensure compliance with the requirements as outlined in Question 49 of our response "provider website".

SECTION IV.R SYSTEMS AND TECHNICAL REQUIREMENTS

102. Provide a description of how the MCO will comply with applicable Federal (including but not limited to HIPAA) standards for information exchange, and ensure adequate system access management and information accessibility. Affirm the MCO's use of HIPAA-compliant files and transaction standards. Include the process for resolving discrepancies between member eligibility files and the MCO's internal membership records, including differences in members' addresses. (*Page limit 3 pages)*

HIPAA COMPLIANCE MANAGEMENT

WellCare is fully compliant with the requirements of the 1996 Health Insurance Portability and Accountability Act (HIPAA) Title II Act-Administrative Simplification Standards including the applicable portions of 45 CFR 160, 162, and 164. We will take a proactive approach to meeting the standards for MLTC as outlined in *Section R.2 Systems and Technical Requirements, HIPAA Standards and Code Sets* of the RFP, as they relate to information exchange and the controls needed to ensure adequate system access management and information accessibility. We are currently in compliance with these requirements and will monitor these standards to ensure timely implementation of any changes.

Our Chief Compliance Officer oversees the implementation of and compliance with all current and future HIPAA standards. We actively promote compliance with the requirements of this section through multiple ongoing activities including:

- Maintaining policies and procedures describing the types of information to be safeguarded and the proper release of protected health information (PHI). These policies, including HIPAA Privacy, HIPAA Transactions and Information Security Policies, define and document our commitment to understanding and enforcing these standards.
- Creating and requiring the completion of annual training on Security, Privacy, Fraud Waste and Abuse, and HIPAA compliance by all associates and subcontractors is a condition of continued employment. All new hires are also required to complete this training within their first 30 days of hire. The administration and completion of this training is independently executed by our corporate training department.
- Associates also attend mandatory general compliance training designed to instill our core values and ethics. We maintain corporate policies that address system access management and information accessibility at the corporate level. In addition to the aforementioned programs, our Information Security Council meets regularly with key leaders to communicate and govern the information security risks throughout the organization.

Our electronic email encryption software for HIPAA security purposes will be compatible with that used by the state of Nebraska.

HIPAA Standards for Information Exchange

WellCare complies with the transaction standards rule 45 CFR Part 162 [CMS-0009-F] published on January 16, 2009. This rule mandates the use of the Accredited Standards Committee X12 (X12) version 5010 for health care, supporting the X12 version 5010 for health care transaction standards in the following table (**Figure 6**):

Figure 6

HEALTH CARE TRANSACTION STANDARDS

➢ Enrollment ▪ 834 Benefit Enrollment and Maintenance	➢ Authorization Requests ▪ 278 Authorization Request

We use the Edifecs XEngine application to apply the appropriate 5010 Workgroup for Electronic Data Interchange (WEDI) Strategic National Implementation Process (SNIP) edits, inclusive of Level 1 through Level 7 edits, to all inbound and outbound transactions using the formats in the Health Care Transactions Standards table (above).

HIPAA Standards for Identifiers

WellCare captures and validates National Provider Identifier (NPI) information about providers against the National Plan and Provider Enumeration System (NPPES), a database of registered providers who have an NPI. This information is downloaded from the CMS website on a monthly basis. All providers to whom payments are made, and are not considered Atypical providers, are required to have an NPI to be credentialed or established as a provider. WellCare captures the NPI as part of the data about providers in its system of record. Other identifiers outlined in 45 CFR 160, 162, and 164 are not yet finalized or implemented, including the National Health Plan Identifier. We continue to monitor the status of CMS documentation and guidance, and we have reviewed the impact and changes required to implement the current draft requirements. These requirements are included in our 2016 Capital Plan approved funding.

HIPAA Standards for Information Exchange (Code Sets)

Our systems adhere to the standard code sets using a documented set of policies and procedures. Through a coordinated effort across our Compliance, Regulatory Affairs, Operations and IT organizations, updates to the standard code sets are identified in a timely manner and loaded into our systems. Our systems then use these standard code sets (**Figure 7**) for operational processing.

Figure 7

STANDARD CODE SETS	
Logical Observation Identifier Names & Codes (LOINC)	National Drug Code (NDC)
Health Care Financing Administration Common Procedural Coding System (HCPCS)	National Council for Prescription Drug Programs (NCPDP)
Current Procedural Terminology (CPT) Codes	International Classification of Diseases (ICD-9. ICD-10)
Diagnosis Related Group (DRG)	American Dental Association Current Dental Terminology (CDT-4)
Claim Adjustment Reason Codes	CMS HIPAA Remittance Remarks Codes
Home Infusion EDI Coalition (HEIC) Product Codes	National Correct Coding Initiative (NCCI) Codes

System Access Management

Protecting the security of members' confidential information is one of the guiding principles of

WellCare's Information Technology (IT) function. Our sophisticated, multi-layered approach to access and security provides a safe, stable environment for members' PHI. Our Information Security Policy requires all information systems to operate within the legal, contractual and regulatory requirements that affect WellCare, including but not limited to HIPAA, HITECH, Sarbanes Oxley, Payment Card Industry Data Security Standard (PCI-DSS), and the various state security and privacy requirements.

All system and application access is controlled via least rights, role-based security including hierarchical access levels as described in *R.9a-b Systems and Technical Requirements, Information Security and Access Management* of the RFP. Management determines authority levels for each role. The use of role-based security restricts access to information on a "need to know, least privilege" basis based on the individual user's profile. These hierarchical roles limit users to inquiry privileges only for all functions and activities where their role does not include the management, maintenance, or recording of transactions and data. Where data extracts, government partner portal or other reporting mechanisms (which also apply these security concepts) are not sufficient to meet access needs, WellCare can collaborate with MLTC and other Federal and State agencies to grant access from appropriate locations for an appropriate duration of time. All access to WellCare's infrastructure through external connectivity requires two-factor authentication, currently implemented using the Symantec VIP solution.

Member Eligibility File Reconciliation

Our Enrollment Eligibility System (EES) is designed to receive, process and update enrollment data daily (as discussed in detail in Question 104). The system uses the transmitted information through 834 files including monthly roster and termination files. The EES application tracks and reconciles each individual transaction from receipt through membership update. Each transaction received on the 834 files is compared to our Core Processing System (CPS) member tables. The information is generated and executed, ensuring that our member information accurately reflects active membership. Our member data is also reconciled on a monthly basis with capitation payment reports to ensure that payments (by rate cell) tie to our membership records.

WellCare's EES application supports the maintenance of multiple address-type records, including the original information submitted by the State or its enrollment broker. Using the data in the EES system WellCare will report member and phone number changes and identify the differences between member-reported data and MLTC data. WellCare members and users will be able to update separate home and mailing address types for delivery of correspondence and HIPAA validation. In other markets, WellCare has submitted monthly member data conflict reports. These reports include data conflicts that may affect a member's eligibility, including but not limited to name changes, date of birth, duplicate records, social security number or gender. WellCare also designates staff to coordinate with the Enrollment and Revenue Reconciliation teams to communicate all membership discrepancy types (including name, out-of-service-area address, date of birth, category of eligibility, cap payments, etc).

SECTION IV.R SYSTEMS AND TECHNICAL REQUIREMENTS

103. Describe the MCO's approach to monitoring system availability issues and the resolution process. Provide a description of the MCO's system help desk. Include the MCO's process for ensuring that recurring problems, not specific to system unavailability, are identified and reported to MCO management within one business day of recognition and are promptly corrected. *(Page limit 2 pages)*

APPROACH TO MONITORING ISSUES AND RESOLUTION

WellCare's mature set of IT operations procedures and technologies are designed to monitor and resolve system issues in compliance with Service Level Agreements (SLAs) established with WellCare system owners and key external stakeholders (e.g. CMS, state Medicaid agencies). We maintain a formal System Problem Resolution Plan and Escalation Procedure that applies to all WellCare IT systems and services and meets the requirements as outlined in *Section R System and Technical Requirements* of the RFP. It is designed to handle all production incidents other than disaster scenarios and includes proper escalation steps should an incident evolve into a disaster scenario. The main objectives of our plan are to:

- Identify, record and classify service requests and incidents, and assign a priority according to business criticality and service agreements
- Identify and record incident symptoms, determine possible causes and allocate for resolution
- Document, apply and test the identified solutions or workarounds and perform recovery actions to restore the IT-related service
- Verify satisfactory incident resolution and/or request fulfilment and close
- Analyze root cause and implement appropriate changes to mitigate future occurrences of the issue

WellCare uses a combination of automated monitoring and operations tools as well as Infrastructure and IT Operations staff. They support a dedicated help desk accountable for the continuous monitoring of system performance, identification and troubleshooting of system issues, monitoring data exchange activities, coordinating corrective actions for failed records or transactions, and supporting internal and external systems users and IT staff.

System Availability Performance

Through October 20, 2015, we reported the following availability metrics for the year*:

- Overall System availability: 99.92%
- Claims Processing System (Xcelys) 99.95%
- Member/Provider service application (CAREConnects): 99.87%
- Website: 99.52%

*Additional metrics are tracked. These are a subset.

The ultimate objective of WellCare's stable architecture, redundant infrastructure and problem management procedures is to ensure our ability to meet the SLAs identified in RFP *Section R.10*. This includes continuous availability of confirmation of MCO enrollment (CME) electronic claims management (ECM), and self-service member and provider services functions, data transfers with all organizations and partners including MLTC, and internal systems outside scheduled maintenance periods. Upon discovering a system issue flagged from an automated internal alert, the user initiates a service desk ticket, and the severity of the issue is assessed immediately.

- Level 1 (system outage with targeted resolution within 8 hours) tickets immediately initiate a response and resolution process. The rapid resolution process involves using conference bridges with

relevant expertise (SWAT calls) to continuously work on issues until resolution. Email updates are sent to all impacted users as well as IT Management every hour until the issue is resolved.

- Level 1 and Level 2 (significant business impact) tickets require a complete root cause analysis review to define the reason for the incident and methods of preventing any reoccurrence.
- Level 2, Level 3 (limited impact) and Level 4 (enhancement) tickets are reviewed and associated changes are prioritized accordingly.

System Help Desk

We have automated monitoring and alerts on all production systems. Additionally, WellCare's IT Operations staff members monitor production systems (including transfer of files to/from states) with continuous on-site support 24 hours per day, 7 days per week. Our end user help desk is staffed Monday to Saturday from 7:00 am to 7:00 pm central time. Immediate, on call support is available for any critical or urgent issue occurring outside of regular hours.

WellCare's end user help desk is staffed Monday through Friday from 6:00 am to 8:00 pm central time to log, support and serve as a point of contact for resolution of IT issues reported by WellCare associates. Our state partners can submit a help desk request via a 24x7 partner portal application or by contacting their Point of Contact within WellCare who can contact the help desk via multiple methods including toll-free phone, email or by logging into the help desk ticketing system. For issues submitted between 8:00 pm to 6:00 am, the help desk will respond by 9:00 am the next day. If the issue is urgent (e.g. there appears to be no connectivity to WellCare systems), the state's Point of Contact can call an on-call number, and they will receive a response within 30 minutes. All issues, requests and incidents are recorded and tracked in WellCare's Computer Associates (CA) Information Technology Service Management (ITSM) application. CA's ITSM provides email notification to the submitting user whenever updates are made to the ticket. For example, users will receive a notice that a technician has resolved the issue. If the issue is email-related, the help desk will contact the user via phone.

Notification Procedures

The Information Management and Systems Director, identified as key personnel in the RFP, will serve as the primary liaison to the MLTC for all IT activities. This individual will receive automated notifications and communications from help desk and command center staff. Communication accountabilities for this role will include:

- Notification of any disaster scenarios, including recovery status within 72 hours
- Notification within 60 minutes of any system issues affecting data exchanges with MLTC
- Notification within 15 minutes of any report distribution delays or outages of either online or critical system functions
- Hourly updates to MLTC on the status and resolution progress for outage events
- Providing MLTC written documentation of availability events including root cause research and any necessary corrective actions

Escalation Procedure

If a state partner believes an issue is not being addressed in a satisfactory manner, they can reach out to their Point of Contact within WellCare, who will initially escalate the issue with WellCare's Problem Management team, and if necessary, WellCare's Vice-President of Infrastructure.

SECTION IV.R SYSTEMS AND TECHNICAL REQUIREMENTS

104. Provide a description of the MCO's eligibility and enrollment database. Include a description of how the MCO will:

- Complete updates within the timeframes specified in the contract.
- Identify members across multiple populations and systems.
- Monitor, track, and resolve any discrepancies between the enrollment files and the MCO's system (e.g., duplication of records and information mismatches).

(Page limit 2 pages)

ELIGIBILITY AND ENROLLMENT DATABASE

WellCare's Enrollment and Eligibility System (EES) as depicted in **Figure 8** on the following page is able to process daily 834 enrollment files within 24 hours of receipt as specified in *Section R.5 Systems and Technical Requirements, Eligibility and Enrollment Data Exchange*. EES is used to receive, process and update enrollment data daily using the information transmitted by the State through 834 files delivered on the frequency specified by the State, including monthly roster and termination files.

Updating within the timeframes

The EES application tracks and reconciles each individual transaction from receipt through membership update. Our member eligibility processes recognize the State as the source of truth for member eligibility history (with beginning and ending dates) and demographic data, such as name and date of birth, including storing and tracking all data by the state Medicaid ID. As a result, each transaction received on the 834 file is compared to our Core Processing System (CPS) member tables. Updated transactions needed to align our member tables with the information provided are generated and executed, ensuring that member information accurately reflects active membership, within the 24 hours service level agreement as specified in the RFP. A complete history of eligibility information is maintained for each member including effective and termination dates.

By the Numbers: Excellence in Action

In 2014, we processed an average of 8.4 million Medicaid 834 transactions per month.

Identifying Members across Multiple Populations

During the processing of the 834 file from the State's enrollment broker, WellCare will utilize the associated rating factors, categories and demographic information such as county when appropriate, and map each eligibility to a Benefit Plan Code. This benefit plan code is unique to each population and allows WellCare to clearly define the benefits and services members are entitled to.

Identifying Members across Multiple Systems

An advantage of WellCare's single-instance application architecture is that all WellCare platforms utilize the same unique identifier for a member. All delegated vendors, such as pharmacy benefit manager (PBM)s are required to use this number (and the associated Benefit Plan Codes) as well. This approach eliminates the potential for mapping and translation issues aross platforms and vendors.

Monitoring and Resolving Discrepancies

WellCare's EES application supports multiple edits and validation on the incoming 834 data during the processing stages. In addition, we reconcile the 820 payment files and its membership records on a monthly basis. As a result of these processes, WellCare has been able to identify duplicate records and

report this information to other State agencies.

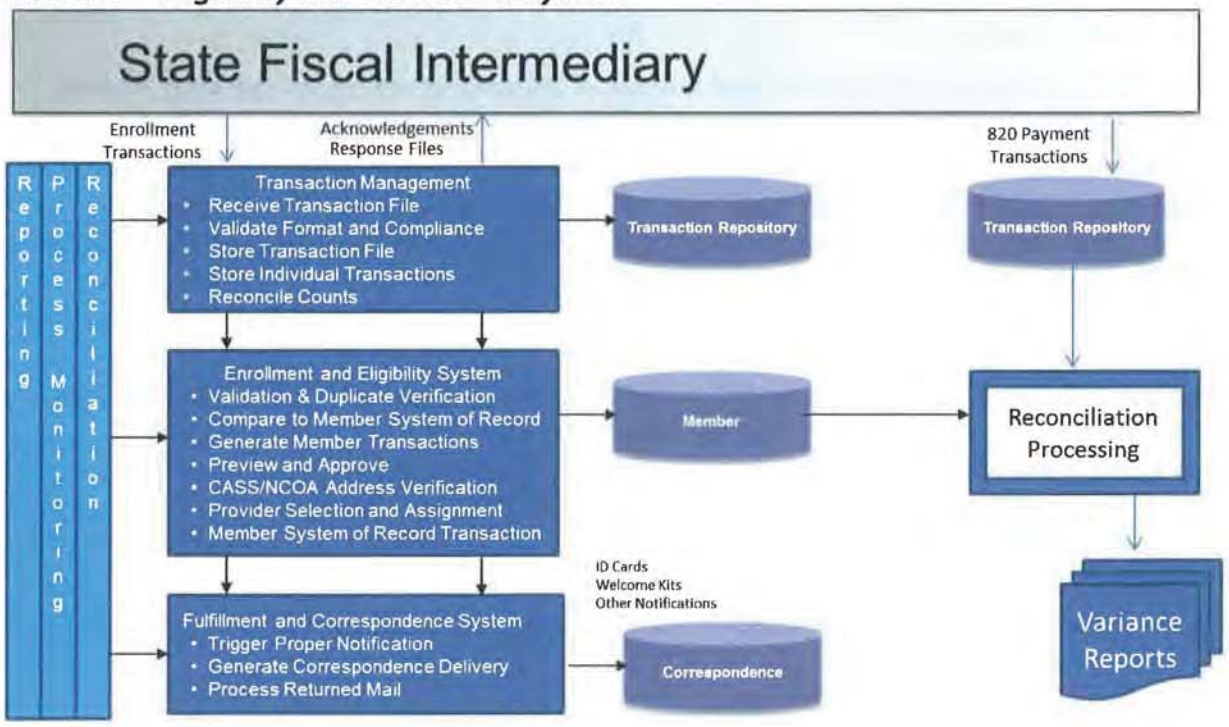
WellCare will submit monthly Member Data Conflict Reports. These reports include data conflicts that may affect members' eligibility for MLTC including but not limited to name changes, date of birth, duplicate records, social security number or gender.We will designate staff to coordinate with the Enrollment and Revenue Reconciliation teams to communicate all membership discrepancy types (including name, out-of-service-area address, date of birth, category of eligibility, cap payments, etc.).

Reporting Address Changes

WellCare's EES application supports the maintenance of multiple address-type records, including the original information submitted by the State or its enrollment broker. Using the data in the EES system WellCare can report member address and phone number changes and identify the differences between member-reported data and the State data.

Figure 8

WellCare – Eligibility and Enrollment System



SECTION IV.R SYSTEMS AND TECHNICAL REQUIREMENTS

105. Provide a description of the MCO's information security management functions. Include a description of proposed access restrictions for various hierarchical levels, controls for managing information integrity, audit trails, and physical safeguards of data processing facilities. *(Page limit 3 pages)*

INFORMATION SECURITY MANAGEMENT

Information Security is of paramount important to us; therefore, we have instituted an Information Security department. The Information Security department reviews all relevant guidance and ensures compliance as it works with the IT department. The head of Information Security reports directly to our Compliance Officer. Most of our Security and Privacy policies and procedures enterprise-wide are actually authored by the Information Security department, including for topics such as records retention. The purpose of this department is to manage privacy and security in accordance with the Health Insurance Portability and Accountability Act (HIPAA) as modified by the Health Information Technology for Economic and Clinical Health (HITECH) Act set forth by the United States Department of Health and Human Services (HHS).

To provide additional oversight for this vital function of information security management, we have established an Information Security and Privacy Officer whose major responsibilities include:

- Development, implementation and management of WellCare's Information Security, Privacy, and Records and Information Management (RIM) Compliance Program and governance process
- Oversight of development and monitoring of Information Security, Privacy and RIM compliance policies and procedures
- Development and monitoring of Information Security, Privacy and RIM compliance education and training programs
- Development and implementation of effective lines of Information Security, Privacy and RIM Compliance Program communications and reporting mechanisms
- Development and implementation of appropriate oversight committees and/or procedures to enforce sanctions and disciplinary actions for violations of Information Security, Privacy and RIM regulations or policies
- Monitoring and auditing for ongoing compliance including risk assessments and penetration testing
- Investigation of reported and detected non-compliance incidents and development of corrective action initiatives

WellCare's Information Security policies include, but are not limited to:

- Antivirus, antispam and malware policies
- Malicious code incident prevention
- Computer security incident management, incident response and incident reporting
- Appropriate use and monitoring, appropriate use of information technology resources, electronic communications accountability and privacy in the workplace
- A corporate Risk Management Program that monitors, assesses and reviews information technology (IT) and security on an annual basis
- Mandatory security awareness training for our employees within 30 days of recruitment and annually thereafter
- A Disaster Recovery and Business Continuity Plan based on a Business Impact Assessment (BIA)
- A password policy that incorporates the requirements for password implementation (including Strong

Password Use, Password Authentication, and Third-Party Security Requirements) for access to all systems and external parties

Access Restrictions

As described in *R.9a-b Information Security and Access Management* of the SOW, the use of role-based security restricts access to information on a "need to know, least privilege" basis based on the individual user's profile. These hierarchical roles limit users to inquiry privileges only for functions and activities where their role does not include the management, maintenance, or recording of transactions and data. Management determines authority levels for each role. Regulatory report, data extracts and the government partner portal access functions are WellCare's primary method of supporting transparency and MLTC's access to date. Where these mechanisms (which also apply these security concepts) are not sufficient to meet access needs, WellCare will collaborate with MLTC and other federal and state agencies to grant appropriate access from appropriate locations for an appropriate duration of time. All access to WellCare's infrastructure through external connectivity requires two-factor authentication, currently implemented using the Symantec VIP solution.

Managing Information Integrity

As mentioned above, WellCare's Information Security officer is responsible for monitoring and auditing for ongoing compliance including risk assessments and penetration testing. Our servers, workstations and networking systems are continuously monitored using industry-standard intrusion protection technologies. WellCare also leverages a 3rd party firm that specializes in information security to conduct a comprehensive penetration test once a year. Results of the tests are reviewed by IT infrastructure management and by the Information Security team, and changes are made accordingly.

WellCare's multiple technical solutions support the management of information integrity, including

- The implementation of the Health Information Trust Alliance (HITRUST) Common Security Framework (CSF) across all aspects of IT applications and operations
- The use of secure FTP sites for the transfer of files (PHI data in Transmission) with any submitting or receiving entity. WellCare supports privacy and encryption using SSH certificates or username/password, SSL, and, as an alternative, PGP encryption
- The use of HTTPS along with required login and password verification for members and providers prior to display and access to PHI on our web portals
- The implementation of security controls including; storage-level encryption for portable data storage, Network Access Control, Intrusion Detection, advanced persistent threat protection, web proxies and other solutions to protect PHI data at rest.

The table below (**Figure 9**) shows the specific technologies leveraged by WellCare.

Figure 9

Infrastructure and Security	➢ Firewall ➢ Alerting ➢ Virus Scanning ➢ Core Switches ➢ Scheduler ➢ Network Access Control ➢ Intrusion Prevention	Firewall	Cisco ASA 55xx-X, Palo Alto 50xx	ASA 9.2,6.0.8	N/A
		Core Switches	Cisco Nexus 7010	NXOS 5.2(9)	N/A
		SCOM	VMWare ESX – Cisco UCS Blades	Windows 2008/2012	MS SQL 2008 R2
		Alerting (Network)	SolarWinds Orion	11.0.1	N/A
		Network Access	Cisco NAC	4.9.4, 1.3	N/A

	(IPS) - Web & Spam Filtering - Incident Monitoring - Antivirus and Malware	Control	34xx, Cisco ISE

		Email Filtering (Spam)	Cisco IronPort	Cisco	N/A
		Web Filtering	BlueCoat 99xx	6.5.4.4	N/A
		Load Balancing	Cisco ACE 4710, F5 BigIP	A3(2.6), 11.6.0	N/A
		WAN Optimization	Riverbed Steelhead	8.0.4	N/A
		Data Loss Prevention	Symantec DLP	12.01	N/A
		AutoSys	VMWare ESX – Cisco UCS/IBM Power 795	Windows/AIX 7.1	Oracle 11g EE
		Incident Monitoring	VMWare ESX – Cisco UCS	RHEL 5	MS SQL 2008 R2

Managing Audit trails

WellCare's application architecture builds into the base applications comprehensive, automated edits and audits to ensure that all data is valid, whether received from external sources or entered directly into our applications. All processes that integrate data from external sources create a unique tracking number for each incoming transaction to support end-to-end balancing and reconciliation. All errors are tracked (and reportable by type, frequency, source and other critical factors), and audit trails are maintained throughout the process to allow for the reconstruction of processing events. Applications that support direct data entry validate the information as it is input. Applications track and reconcile each individual transaction including the account that made the change from receipt, through membership update, including the user or process that created or modified the information. Data, specifically financial transactions, that have been executed, which are considered "final" require separate transactions and are not able to be updated.

Physical safeguards

WellCare's data processing facility is managed by a tier 1 data center vendor, CenturyLink. The facility includes fire and flood sensors as well as a robust fire suppression system. Physical security measures include access cards, biometric devices and a man trap as an anti-tailgating measure in the data center lobby. All equipment is physically secured within locked cages with dedicated intra cage video surveillance. More details about CenturyLink's capabilities can be found at http://www.centurylink.com/business/enterprise/resources/products/tp1-tampa-fl.html.

All corporate and remote WellCare staffing locations require company issued employee badges to gain access to the facilities. Any network or computer equipment locations are isolated and are further restricted to authorized individuals. All locations include appropriate monitoring, alarm and arresting capabilities for electrical, smoke and fire conditions.

SECTION IV.R SYSTEMS AND TECHNICAL REQUIREMENTS

106. Describe the MCO's business continuity, contingency, and recovery planning. Attach a copy of the MCO's plan, or summarize how the plan addresses the following aspects of emergency preparedness and disaster recovery:

1. Operational and system redundancy in place to reduce the risk of down-time.
2. System and operational back-up sites.
3. Contingency and recovery planning including resumption of operations.
4. Prioritized business functions for resumption of operations and responsible key personnel.
5. Employee and supplier preparedness, including a plan for training and communication to employees and suppliers and identified responsibilities of key personnel, in the event communications are unavailable.
6. Approach to provider preparedness for continuity of member care and assurance of payment for services rendered in good faith.
7. Testing approach and regular schedule to improve and update the plan over time.

(Page limit 3 pages, excluding sample plan)

BUSINESS CONTINUITY, CONTINGENCY AND RECOVERY PLANNING

WellCare has infrastructure and business operations designed to continuously support our members and providers and ensure system availability with minimal disruption of services at all times, regardless of extraordinary events. Our business continuity, emergency preparedness and disaster recovery plans address events outside of our control. We test these plans regularly both at the corporate and local level. The plans are updated at least annually, and we collaborate with our government partners as needed. These plans, coupled with WellCare's robust infrastructure, ensure system availability with minimal disruption of services at all times regardless of extraordinary events.

WellCare's Focus on Excellence

During the 2015 DR test, all 15 core systems tested were recovered successfully and approximately 50% faster than the required recovery time objectives.

Attached are WellCare's comprehensive Emergency Preparedness Plan, Disaster Recovery Plan (DRP) and Business Continuity Plan (BCP), which addresses both infrastructure and business operations and meets the requirements outlined in *Sections R.10 through R.12* of the RFP. **(Attachment 106a_Business Continuity Plan, Attachment 106b_Disaster Recovery Plan, Attachment 106c_ Emergency Preparedness Plan)**

The BCP and DRP address events including, but not limited to the following:

- Extended power outage
- Extended network outage (LAN/WAN)
- Severe data corruption
- Security threats
- Environmental disruptions
- Localized disasters

Operational and System Stability – Reducing the Risk of Down-Time

WellCare's operations, infrastructure and communications environments provide multiple levels of preventive measures to ensure system availability, data integrity and business continuity like: (1) WellCare's use of a Class 1 secure data center with built in power and communications redundancy is the starting point for our enterprise system architecture. (2) We also implement redundancy in power and communications to critical processing and operations locations including Uninterruptable Power Supplies and Diesel generators. (3) Our use of virtualization for application and infrastructure components, along with the installation of redundancy in hardware and communications components, contributes to

significant reduction of risk due to outages.

System and Operational Back-Up Sites

WellCare routinely completes incremental backups and weekly full backups of applications and systems. These tape backups are stored at a secure off-site vendor location (currently contracted through Iron Mountain) external to any WellCare data center or office location. WellCare's Data Center recovery site is contracted through SunGuard Availability Services and is located in Secaucus, NJ. If needed, WellCare's operations will leverage and move to its multiple office locations across the United States.

Contingency and Recovery Planning

In the event of catastrophic system failure, our Data Center Recovery plan is initiated to protect our data and transactions. The execution of this plan provides restoration of applications and data and, as a result of the multiple connectivity options, allows for the resumption of normal business operations. If we experienced a system interruption or isolated failure, the system would automatically fail over to redundant equipment or IT would roll back the application to a prior recovery point. In the event of an emergency, WellCare would leverage all corporate resources for communication and business continuity, such as work load shifting to other WellCare locations, including corporate. Every department at WellCare has a detailed Business Continuity Plan (BCP) to ensure continuity of services to our members and providers (i.e. Customer Service, Claims, Pharmacy, Care Management, Enrollment, etc.)

Prioritized Business Functions: WellCare's DRP identify operations and infrastructure capabilities by Tier, defining the priority and sequence of recovery.

- **Tier 0 – Foundational**: Basic Infrastructure components (Telephones, Desktop Apps, Email, Wellcare.com, etc.)
- **Tier 1 – Mission Critical:** Ability to support critical interactions with members and providers and support for receiving transactions from external parties (Claims, UM, DM, CM, Customer Service). Includes components to recover Tier 2 Applications.
- **Tier 2 – Critical:** Full processing capabilities of critical, time-sensitive business functions including Claims, Grievances & Appeals, Enrollment. Include components to recover Tier 3 Applications.
- **Tier 3 – Important:** Establishes capability to resume operations and availability of all enterprise capabilities, meet any regulatory commitment with <72 hour obligations.
- **Tier 4 – Non-critical:** Remaining departmental, non-time-sensitive or non-critical applications.

Identified key personnel

We will identify key personnel to ensure business continuity and a quick recovery of the Business Unit. The attached BCP provides an example of the Georgia Business Unit Recovery Team. We would develop a similar team for Nebraska; these associates would be the first responders and responsible for the execution of any recovery activities for Nebraska.

Employee and Supplier Preparedness

All WellCare associates are provided Emergency Preparedness Training upon hire and at least annually thereafter. The training focuses on ensuring associates safety and the protection of and continuity of care for our members during a disaster. Our associate training emphasizes the protection of **"Three Ps"** when responding to any emergency: **People, PHI (Protected Health Information) and Production.**

Communication to Employees and Suppliers

Each department has detailed business continuity plans that address communications with suppliers in the event of an emergency as well as identifying the Business Unit Recovery Team and their roles and responsibilities during an emergency situation. In case of any safety incidents within our offices or work sites, our associates are notified by a safety coordinator or by alarms within the building. When a safety

incident becomes an emergency, or a natural disaster occurs, there are several different ways that associates can gather information, including the Emergency Hotline: 1-866-473-9135, WellCare Link myHR Portal/HR Service Center (https://portal.adp.com), emails, call trees, and the SmartNotice Emergency Notification System, which is used to communicate emergency information to associates through the use of their personal and WellCare phone(s) and email(s).

Provider Preparedness – We Ensure Continuity of Care

WellCare providers are updated before, during and after an event via the WellCare website(s) and normal channels of communications. In the event of an emergency, WellCare would leverage all corporate resources for communication and business continuity, such as work load shifting to other WellCare locations, including Corporate.

Community Engagement Strategies

In addition to ensuring the safety and wellbeing of our members, their families and our employees, WellCare designed a community-focused strategy that works in parallel with the American Red Cross. WellCare sponsored the American Red Cross to conduct "Ready When the Time Comes" emergency response training for 45 WellCare associates from across the company.

Being there in times of Need: WellCare Disaster Response

In February 2013, WellCare responded to a tornado that touched down in Adairsville, Georgia using its three-point community approach. While no members were injured, WellCare of Georgia worked closely with the locally deployed team of the American Red Cross to assist in the impacted community. Through this effort, WellCare invested more than 200 volunteer hours to assist in the recovery of residents in Adairsville including representatives from several different departments like case management, provider relations and so on.

Testing Approach

We employ two strategies to test our Corporate EPP:

- Annual table-top exercises are used to evaluate plans and identify possible gaps for remediation
- Annual systems recovery testing before the start of the Atlantic hurricane season

Improving and updating the plan

Our 2015 system recovery test was completed during the week of February 16, 2015. Testing results are documented and presented to the EPC and the EP Steering Committee. In addition, our Internal Audit department audits the annual testing process and has not noted any significant issues. On an ongoing basis, and specifically after each test execution, WellCare examines its BCP and DRP for opportunities to implement improvements and to identify needed capital investments for inclusion in future budgets. Our IT and EPC teams will use these test results to further refine and improve data center recovery capabilities.

Revision History

Revision	Release Date	Author	Changes in progress
0.01	11/25/2008	W. Greg Brooks	Working Copy – created from individual functional area business continuity documents
0.02	11/25/2008	W. Greg Brooks	Complete Draft Document Framework prior to functional area review
0.03	1/13/2009	W. Greg Brooks	Added Regulatory Reference Table
0.04	3/30/2009	Denise Malecki	Combined revised Corporate BCP with sections written for a proposed Corporate DRP
0.05	10/5/2009	W. Greg Brooks	Refreshed document for 2009
1.0	5/26/2010	William McKinney	Reworked entire document.
1.2	7/28/2010	William McKinney	Updated EPC membership in Appendix C to reflect changes in sales and marketing and pharmacy EPC membership.
1.3	9/30/2010	William McKinney	Updated EPC membership in Appendix C. Added additional beneficiary and pandemic content. Updated training requirements. Removed Mike Cotton from steering team list. Added new approvals.
1.4	10/22/2010	Steven Tate	Updated EPC membership in Appendix C. Updated Steering Team in App D (removed Rex Adams, added Larry Anderson, and changed Walt Cooper title and role).
2.0	4/28/11	Steven Tate	Updated for 2011, including: addition of EPC Charter ratified 1/21/11; allowance of EPP approval by functional VP or Area Leader; embedded PDFs of approved Corp EPP and EPC charter.
2.1	8/1/11	Steven Tate	Updated appendix: steering team, EPC representatives, and emergency planning location 1.

Revision	Release Date	Author	Changes in progress
2.2	11/23/11	Steven Tate	Updated appendix and TOC: EPC representatives; added state RA contacts.
3.0	1/27/12	Steven Tate	Updated appendix and TOC: EPC representatives; received Exec Sponsor sign-off on 2012 version.
3.1	5/22/2012	Steven Tate	Updated appendix and TOC: EPC representatives, Steering Team, RA contacts; added glossary from Area EPP template; update section 2.2.

PURPOSE

The purpose of the Corporate Emergency Preparedness Plan is to ensure WellCare Health Plans, Inc. is prepared to provide services to our members and providers in an emergency situation. Processes and procedures have been developed to support both business continuity as well as disaster recovery to restore full operations after an event. This WellCare Corporate Emergency Preparedness Plan (EPP) provides the strategic Corporate Business Continuity Plan (BCP) and Disaster Recovery Plan (DRP) for WellCare Health Plans, Inc., herein referred to as "WellCare".

The BCP facets of this plan identify WellCare's strategic capabilities for ensuring the continuity of member and provider services in response to an emergency event. The DRP portion of this plan is designed to provide immediate response and subsequent recovery from an emergency event. An emergency event is an unplanned business interruption, man-made or natural, including but not limited to inclement weather, declared emergencies, systems failures/disruption, loss of utility services, building evacuations, fire, etc.

The combination of the BCP and the DRP shall be herein referred to as an Emergency Preparedness Plan (EPP).

WellCare's priorities and primary objectives are:

- **People**: Ensure WellCare's associates have been trained on the proper response to emergency situations and are out of harm's way in the event of an emergency.
- **PHI** (Protected Health Information): Ensure WellCare has taken appropriate measures to protect PHI during emergency situations.
- **Production**: Ensure WellCare has steps in place to prioritize and continue production activities ensuring members have access to care.

WellCare believes that the priorities above are embodied within the Corporate EPP and appropriate to provide safety and well-being for WellCare associates while still providing prompt and appropriate responses to both anticipated and unanticipated emergency events.

1.1 Associated Plans and Subordination

This document governs WellCare's Corporate EPP and includes elements common across business functions. This document does not account for the entirety of WellCare's EPP. Instead, this document is a 'parent' document to accompany the business area EPPs. A business "area" generally consists of multiple departments and/or divisions reporting to a WellCare vice president or area leader. The business area EPPs contain detailed disaster recovery and business continuity plans for that business function.

The Corporate EPP makes every effort to be aligned with existing WellCare policies and procedures, contractual requirements, and federal, state, and local laws. In the case of any conflict, the Corporate EPP shall be considered subordinate to these other documents, requirements, and/or regulations.

In addition, the Corporate EPP is subordinate to Federal, state and/or local plans during a disaster declaration by those authorities. WellCare will cooperate with state, county and city emergency officials as well as other responders in the development of emergency response plans and participate in multi-jurisdictional emergency planning exercises as required.

1.2 EPP Scope and Assumptions

The scope of the Corporate EPP includes WellCare's corporate campus in Tampa and various field offices within the contiguous 48 states and Hawaii. The Corporate EPP shall be updated annually by the Emergency Preparedness Committee (EPC) to include new regions and plans that are added to the scope of WellCare's operations.

The scope of the Corporate EPP does not include business continuity or disaster recovery of WellCare's medical and administrative vendors. Review of emergency planning for such vendors shall be managed through pre-implementation and annual delegation audits in addition to other normal vendor management venues.

The scope of the Corporate EPP does not include WellCare's response to emergency situations and disaster declarations impacting WellCare's membership where such emergencies do not also impact one or more of WellCare's field offices or the corporate campus except as outlined in sections 1.3 and 1.4 below. Such emergency situations shall be handled as outlined in functional policies, procedures, and/or step actions.

The Corporate EPP is designed to create a state of readiness that will provide a structured response to both anticipated (e.g., storm closure) and unanticipated (e.g., immediate building evacuation) emergencies as well as other external incidents that potentially could cause business interruption (e.g., loss of electrical service).

The Corporate EPP is based upon the following assumptions. Additional assumptions present in the business area EPPs are outlined within those documents.

- Business recovery is performed in accordance with the procedures that have been set forth within this plan and subordinate documentation
- Plan review, maintenance and updates are performed on an annual basis by the EPC to ensure accuracy and a viable state of readiness
- Sufficient alternate sites that are pre-designated as backup facilities are unaffected and prepared to support recovery of business functions
- Organizations external to WellCare, such as customers, vendors, government agencies, and others will be reasonably cooperative during the business recovery period
- Business recovery awareness and training programs have been implemented and exercised annually
- Qualified personnel in sufficient quantities are available to perform business recovery responsibilities

- Adequate communication channels and contact information are available for executive decision making and associate communication
- Required funding, equipment, and supply requirements will be reviewed and approved in a timely manner

1.3 Beneficiary Emergencies

WellCare's corporate policies and procedures allow WellCare to respond to the increased volume of claims and beneficiary interactions associated with emergency situations. WellCare policies relax medical management requirements, such as prior authorization and prescription refill limitations, where necessary and appropriate.

In the event of a localized public health emergency, WellCare will work with the appropriate state and Federal agencies to conduct outreach in an attempt to contact members and determine which members may meet criteria for additional assistance with special medical needs and/or transportation. Where necessary and appropriate, WellCare will conduct claims reviews in an attempt to determine members with special needs during an emergency event.

1.4 Corporate Pandemic Disease Response

WellCare considers a pandemic to be an anticipated event for which some planning and preparation is likely. As such, much of the response to a pandemic would be handled using the Corporate EPP for anticipated emergencies.

During a pandemic, in addition to the normal responsibilities outlined in the Corporate EPP, the Fleet and Facilities Department will provide physical security and emergency support to affected areas. The Fleet and Facilities Department will coordinate all services for sanitization and health quality restoration. This group will make a prognosis for occupancy of each company facility affected by an outbreak. Additionally, Fleet and Facilities will coordinate risk reduction and avoidance activities as well as emergency response with property management and local emergency response authorities.

In the case of a mass vaccination campaign initiated by a state or Federal agency, WellCare will make its facilities available as requested and appropriate.

1.5 Emergency Preparedness Governance

WellCare's Emergency Preparedness Committee (EPC) is the governing body responsible for maintaining WellCare's Corporate EPP. The mission of WellCare's EPC is to provide the guidance and support that facilitates the development and implementation of all area EPPs. The EPC charter is included as Appendix A of this document.

The Emergency Preparedness Lead (EPL) shall preside over all meetings of the EPC at which he or she is present and shall act as the chief liaison between the EPC and the Emergency Preparedness Executive Sponsor (EPES) and the Emergency Preparedness Steering Committee (EPS). The EP Lead shall be responsible for maintaining the Corporate EPP, facilitating the activities of the EPC and its representatives, and otherwise serving as a central point of contact for WellCare's emergency preparedness and business continuity activities. The

EP Lead shall appoint a backup to preside over meetings when the Lead is unable to attend and otherwise act in the stead of the Lead as needed. The EP Lead may appoint an EPC secretary who shall give notice of all EPC meetings, prepare agendas, record and maintain and distribute minutes, and maintain the WellCare Emergency Preparedness SharePoint site.

Escalation from the EPC shall be via the EP Lead to the Emergency Preparedness Executive Sponsor. The EP Executive Sponsor provides guidance to the EP Lead and the EPC, as well as acts as the chief liaison to the EP Steering Committee. The EP Steering Committee is comprised of WellCare executive leadership and the EP Executive Sponsor serves as its Lead. The EP Steering Committee is responsible for declaring and managing an emergency situation.

The EPC shall convene at least quarterly to review the status of WellCare's emergency planning activities, report updates by area, and/or assign tasks necessary to improve WellCare's Corporate EPP. Additional EPC meetings shall be convened as necessary to review possible emergency situations and make the determination when/if to escalate situations for formal emergency declaration.

The EPC and EP Steering Committee members are maintained on the Emergency Preparedness SharePoint site at:

http://wellcareportal.wellcare.com/CorporateCompliance/EmergencyPreparedness/Pages/default.aspx

1.6 Approval and Distribution

The Corporate EPP is a confidential document maintained by the EP Lead and governed by the EPC. The business area EPPs are confidential documents maintained by the associated departments under the guidance of the EPC. The Corporate EPP and its components are available to all EPC and EPC members and are made available to WellCare associates on a "need to know" basis. Members of the EPC may access and maintain the Corporate EPP, business area EPPs and all associated documents on the Emergency Preparedness SharePoint site at:

http://wellcareportal.wellcare.com/CorporateCompliance/EmergencyPreparedness/Pages/default.aspx

The EP Lead is responsible for ensuring all EPP documentation is reviewed and updated annually. The EP Executive Sponsor and the EP Lead are responsible for updating and approving the Corporate EPP. The EPC Charter may be amended only after a two-thirds vote of the EPC membership followed by approval by the EP Lead and EP Executive Sponsor. All business area EPPs shall be reviewed and updated by the business area EPC representative and approved by the associated vice president or area leader as well as the EP Lead.

It shall be the responsibility of WellCare's various regulatory affairs personnel (state and CMS) to collect and submit appropriate, applicable portions of the Corporate EPP and associated WellCare policies and procedures upon request by state and Federal agencies. It is also the responsibility of these regulatory affairs personnel to provide the EP Lead with timely notification of document and information requests.

1.7 Contractual and Regulatory Compliance

WellCare is a nation-wide company servicing members in multiple states with health plans that must comply with the respective Federal and state regulatory requirements. Different governing agencies may have specific business continuity requirements which dictate the activities of WellCare. In all cases, WellCare's objective is to abide by all contractual and regulatory mandates and maintain service continuity and sustainability.

In addition to compliance with HIPAA contingency plan governing standards (Health Insurance Portability and Accountability Act of 1996 (HIPAA) Security Standards for the Protection of Electronic Protected Health Information; 45 CFR Part 160 and Part 164, subparts A and C), the primary universal requirement throughout WellCare's contracts is the prompt notification to CMS, state agencies, and other regulating bodies in the event of an emergency impacting WellCare's ability to perform services. Such notice shall be the responsibility of the corporate Compliance Department (CMS and other Federal agencies), Legal Department, and regional regulatory affairs departments (state agencies).

1.8 Associate Awareness and Training Activities

The EPC shall provide general emergency planning awareness training to all associates at least once per calendar year. Specific area EPP training shall be the responsibility of the area EPC representatives and provided to associates as appropriate.

1.9 Plan Testing

WellCare employs two strategies for testing of its Corporate EPP. First, annual table-top exercises are used to evaluate plans and identify possible gaps for remediation. In addition to the table-top exercises, WellCare shall conduct annual systems recovery testing prior to the start of the Atlantic hurricane season. The result of the testing shall be documented and presented to WellCare's Internal Audit Department, the EPC and the EP Steering Committee.

EMERGENCY DECLARATION

1.10 Identification, Assessment, and Activation

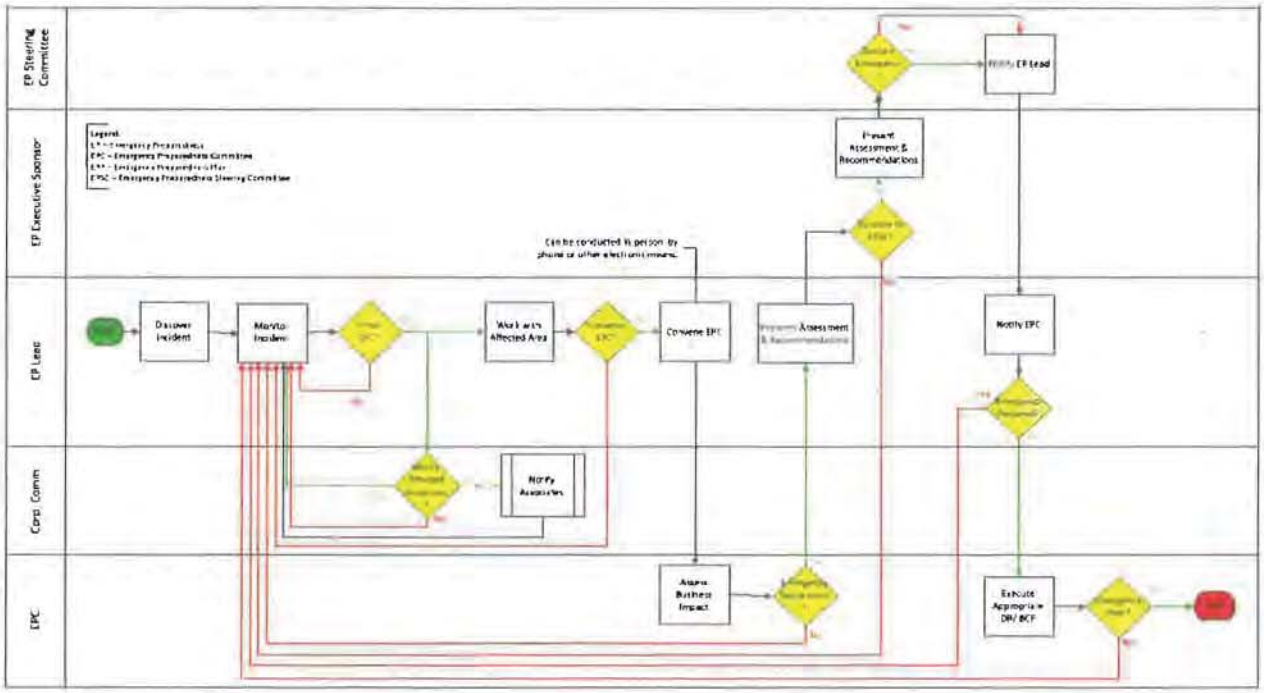
Upon discovery of a major incident that could potentially interrupt WellCare's business, the EP Lead alerts (and if necessary, convenes) the EPC and updates the EP Executive Sponsor as appropriate. Within four hours, the EPC assesses the incident's impact to business operations and develops recovery recommendation(s) as necessary. In the event the EPC recommends the declaration of an emergency, the EP Lead presents the assessment and recommendation to the EP Executive Sponsor for a decision regarding escalation to the EP Steering Committee and possible declaration of an emergency.

The EP Steering Committee shall be responsible for the declaration of an emergency and for making any associated decisions necessary before EPPs can be initiated. The EP Steering Committee includes the Senior Management Team and the CEO of WellCare Health Plans, Inc.

EP Steering Committee decisions shall be put to a simple majority vote of members present. The EP Executive Sponsor shall serve as the tie-breaker for any votes. Once convened by the

EP Executive Sponsor, the EP Steering Committee members present shall be deemed sufficient for all decision making even if the members present do not represent a quorum of the EP Steering Committee.

Once approved by the EP Steering Committee, the decision to declare an emergency is then communicated by the EP Lead to the EPC who then communicates to the appropriate business areas. Emergency response and business continuity activities go into effect immediately. Depending on the nature and scope of the emergency, the Corporate Communications team may also distribute one or more associate announcements and/or update the associate emergency hotline message.



Meetings of the EPC and / or EP Steering Committee may be conducted in person, via telephone, or via other electronic communication channels as necessary for timely communication and decision-making. The EP Lead shall be responsible for communicating the location and time of EPC and EP Steering Committee meetings in the event of an emergency. Emergency meeting locations and the conference bridge are identified in Appendix C of this document.

1.11 Associate Expectations

All associates, regardless of level, are responsible for checking the WellCare Emergency Hotline at (866) 473-9135 and returning to work when requested or immediately at the conclusion of the emergency.

All associates should check work voicemail twice daily during an emergency, call the WellCare Emergency Hotline twice daily during an emergency, and be available by phone in the event that supervisors or other WellCare personnel need to convey critical information. WellCare

associates also are expected to monitor local TV and radio stations in the event of a regional emergency.

All associates shall report to the primary or alternative work location as directed by supervisors or other WellCare management via the WellCare Emergency Hotline or other individual contact (e.g., phone, email).

In addition to the inbound communication outlined above, WellCare shall use phone trees and the Emergency Notification System to communicate with associates. As a result, it is critical that all associates maintain up-to-date contact information in the Human Resources portal including personal addresses, home phone numbers, personal cell phone numbers, and alternative email addresses.

All managers are responsible for downloading a current organizational contact report from the Human Resources portal on a regular basis and immediately preceding an anticipated emergency.

1.12 Associate Communications

All associates are updated before, during and after an event via the Emergency Hotline, WellCare Link, the Emergency Notification System and departmental call trees. When possible, associates are notified of emergency events in advance. Associate communications include actions the associate should take before, during and after an event, as well as how to receive on-going updates.

1.13 Member & Provider Communications & Continuity

WellCare members and providers are updated before, during and after an event via the WellCare website(s) and normal channels of communications. The business areas responsible for normal day to day member & provider communications are also responsible for communications in an emergency event. These procedures are outlined in their EPP documentation.

Processes necessary to maintain services with WellCare members and providers are outlined in the appropriate business area EPPs. These plans describe how member and provider services will be maintained during an emergency event.

APPENDIX A: EPC CHARTER

1.1 Purpose

WellCare Health Plans, Inc. and its subsidiaries (collectively "WellCare" or the "Company") are committed to developing and implementing comprehensive, compliant business continuity and disaster recovery plans (collectively "emergency preparedness plans" or "EPPs") that protect associates and ensure the survival of the Company. To that end, WellCare has established an Emergency Preparedness Committee (the "EPC") to collaborate on and coordinate enterprise-wide emergency preparedness issues and matters. The primary duties and responsibilities of the EPC are set forth below.

The EPC shall provide planning and guidance to allow the Company to respond to business disruptions by:

- Safeguarding associates' lives and Company property
- Making operational and financial assessments and decisions
- Quickly recovering and resuming operations
- Protecting all of the organization's records and data
- Maintaining regulatory compliance
- Allowing members access to uninterrupted services

1.2 Duties and Responsibilities

The responsibility of the EPC is to ensure each critical functional area within the Company develops a contingency plan that achieves the following:

- Identifies necessary resources to enact the contingency plan
- Provides for the safety and well-being of the people on the impacted premise at the time of the disaster
- Continues critical business operations
- Outlines contingency and backup processes and procedures
- Minimizes immediate damage and loss
- Facilitates effective coordination of recovery tasks
- Calls for regular updating of the functional plans
- Aligns with the other functional area contingency plans
- Aligns with the Company information systems disaster recovery capabilities

The EPC shall be responsible for monitoring situations and incidents that could lead to the declaration of an emergency and keeping Company associates and senior management briefed on such situations as necessary. Additionally, the EPC shall be responsible for providing recommendations to the Company's executive management team via the EP Steering Committee regarding the declaration of an emergency and any associated decision-making.

1.3 EPC Oversight

EPC Members shall be appointed by the business area leaders and shall include representation from every area of the Company. The EP Lead shall be appointed by the EP Executive Sponsor. The EP Steering Committee and the EP Executive Sponsor shall be appointed by the CEO. The EP Steering Committee may include, but is not limited to, the Senior Management Team. Oversight of the EPC shall be by the EP Steering Committee via the EP Lead and the EP Executive Sponsor. It shall be the responsibility of the EP Steering Committee, in consultation with the CEO, to make emergency declarations and other critical decisions.

Escalation from the EPC shall be via the EP Lead to the Emergency Preparedness Executive Sponsor. The EP Executive Sponsor provides guidance to the EP Lead and the EPC as well as acts as the chief liaison to the EP Steering Committee. The EP Steering Committee is comprised of WellCare executive leadership and the EP Executive Sponsor serves as its Lead.

1.4 EPC Membership and Meetings

The Emergency Preparedness Lead shall preside over all meetings of the EPC at which he or she is present and shall act as the chief liaison between the EPC and the EP Executive Sponsor and the EP Steering Committee. The EP Lead shall be responsible for maintaining the Corporate EPP, facilitating the activities of the EPC and its representatives, and otherwise serving as a central point of contact for WellCare's emergency preparedness activities. The EP Lead shall appoint a backup to preside over meetings the Lead is unable to attend and otherwise act in the stead of the Lead as needed. The EP Lead may appoint an EPC secretary who shall give notice of all EPC meetings, prepare agendas, record, maintain and distribute minutes, and maintain the WellCare Emergency Preparedness SharePoint site.

The EPC shall convene at least quarterly to review the status of WellCare's emergency planning activities, report updates by area, and/or assign tasks necessary to improve WellCare's Corporate EPP. Additional EPC meetings shall be convened as necessary to review possible emergency situations and make the determination when/if to escalate situations for formal emergency declaration.

1.5 Amendments

This Charter may be amended only after a two-thirds vote of the EPC membership followed by approval by the EP Lead and EP Executive Sponsor.

APPENDIX B: GLOSSARY OF COMMON TERMS AND ACRONYMS

Term	Definition
Activation (or Plan Activation)	When all or a portion of an EPP has been put into motion.
Alert	Notification that an incident with potential for disaster has occurred- stand by for possible activation of recovery plan.
Alternate Site	A location, other than the normal facility, used to process data and/or conduct critical business functions in case of an actual declared disaster.
Anticipated Event	An emergency event, such as a hurricane, that has some advanced warning, which provides an opportunity for "response" and planning prior to the actual event as well as after the event.
Area (or Business Area)	Multiple WellCare departments and/or divisions reporting to a WellCare vice president or area leader.
Assumptions	Basic, pre-determined conditions that will be in place if an incident occurs.
Business Continuity Plan (BCP)	Documentation of WellCare's strategic capabilities for ensuring the continuity of member, provider, and vendor services in response to man-made or natural disasters and other emergency situations.
Business Function	A working group performing a common activity. Each major business function should be represented in a Team.
Corporate Emergency Preparedness Plan (Corporate EPP)	The strategic Corporate Business Continuity Plan (BCP) and Disaster Recovery Plan (DRP) for WellCare Health Plans, Inc., herein referred to as WellCare, includes elements common across business functions. This document does not account for the entirety of WellCare's EPP. Instead, this document is a 'parent' document to several area EPPs.
Damage Assessment	The process of assessing damage following an incident to computer hardware, vital records, office facilities, etc., and determining what can be salvaged or restored and what must be replaced.
Disaster Declaration (or Emergency Declaration)	An official decision by the EP Steering Team to activate the WellCare Corporate EPP.
Disaster (also see Emergency Event)	Any event that prevents or creates an inability by an organization or business function from performing critical work within an acceptable timeframe for some future period of time. An event is classified as a "disaster" only after an official declaration has been made.
Disaster Recovery Plan (DRP)	Documentation of WellCare's immediate response and subsequent recovery from an unplanned business interruption within WellCare, such as loss of utility service, building evacuation, or a catastrophic event such as a major

Term	Definition
	fire or hurricane.
Emergency Management Team (EMT)	Area group that provides overall coordination of response and recovery support activities. Once an incident occurs, the EMT determines which response and recovery actions should be invoked based on the severity of the incident. EMT will provide centralized support and/or leadership to affected business functions.
Emergency Event	Whenever an event interrupts normal operations and it is reasonably anticipated that the interruption will last a significant amount of time. (also see "Disaster")
Emergency Preparedness Committee (EPC)	The governing body responsible for maintaining WellCare's Corporate EPP. The mission of WellCare's EPC is to provide the guidance and support that facilitates the development and implementation of all area EPPs
Emergency Preparedness Plan (EPP)	The combination of a business area's BCP and DRP.
EPC Representative	An associate that serves as point person for a WellCare business area and is responsible for communicating EPC actions and decisions to their respective area leadership and/or EMT.
EP Steering Committee	A group of WellCare leadership responsible for making emergency declarations and other critical decisions escalated by the EPC.
Information Technology (IT)	Business area that provides overall management and coordination of response and recovery support activities pertaining to essential information systems.
Interruption	Any event, whether anticipated (i.e., public service strike) or unanticipated (i.e., blackout), that disrupts the normal course of business operations.
Protected Health Information (PHI)	Confidential member health information that WellCare must protect during emergency situations as stringently as it does during normal operating conditions.
Recovery (or Business Recovery)	The ability to respond to an interruption in services by implementing a Disaster Recovery Plan to restore an organization's critical business functions. Also, the phase of the EPP plan that occurs after the emergency response is performed.
Recovery Procedures	Actions necessary to respond to an incident and eventually restore critical operations.
Response (or Emergency	Activities that go into effect immediately following an emergency event (if unanticipated), or immediately following indication of an anticipated event.

Term	Definition
Response)	This phase usually concludes after damage assessment concludes.
Restoration (or Emergency Restoration)	The planning process and activities for the restoration of normal operations at the primary (normal) business site.
Unanticipated Event	An emergency event that occurs without any advanced warning, such as a fire or utilities failure, so all business "response" and planning occurs after the actual event.
WellCare Corporate EPP	The aggregation of the Corporate EPP, the IT Infrastructure Disaster Recovery Plan and all WellCare business area BCPs.
WellCare Health Plans (WellCare)	General reference to the collection of government-paid health plans under the control of Comprehensive Health Management Inc.

APPENDIX C: EPC MEETING LOCATIONS AND CONFERENCE BRIDGE

In the event of an unanticipated emergency during which the EP Lead is unable to communicate meeting times and locations, the EP Steering Team shall immediately convene at the Tampa headquarters at the locations listed below. If the Tampa headquarters is not accessible, the EP Steering Committee shall convene at the first accessible alternative location listed below.

This conference bridge will be opened for those that are not able to attend in person:

Conference Bridge: (877) 848-7030
Participant Code: 9571545
Host Code : 2831

Emergency Planning Location 1	Renaissance 1
	Executive Board Room, 3rd Floor

Emergency Planning Location 3	Harborview Plaza
	Florida Sales
	3031 N. Rocky Point Dr., West Suite 600
	Tampa, FL 33607

SECTION IV.S CLAIMS MANAGEMENT

107. Describe the MCO's strategies for ensuring its claim processing is ready at the time of contract implementation, to ensure timely accurate claims processing. Include the MCO's strategy for identifying problem areas, and how the MCO will ensure rapid response. *(Page limit 2 pages)*

ENSURING A FULLY DEVELOPED CLAIMS PROCESSING SYSTEM FOR NEBRASKA ON DAY1

WellCare's claims payment process for all medical and behavioral health claims is integrated within the same IT platform. Our claims process workflow is built with multiple reconciliation points throughout the lifecycle of the claims process. WellCare has performance metrics that include accuracy and timeliness of claim payments. The performance metrics also include a process for tracking the development and implementation of process improvements to claim payments. Through daily performance monitoring supported by accurate reporting tools, and effective technology; WellCare has demonstrated consistent improvement in claims processing turnaround times year-over-year. We keep records of these activities and can provide documentation to federal regulators and MLTC upon request.

BUILDING OUR CLAIMS STRATEGY FOR HERITAGE HEALTH

WellCare has a well-defined strategy which we will deploy for the claim payment process and ensure it is ready at the time of Nebraska's contract implementation. Our readiness plan initiates with the release of the RFP. We analyze the RFP on three broad categories:

- What processes are new to our existing claims readiness
- What modifications are required to the existing process
- What requirements are new for which solutions need to be developed

Based on this analysis, we develop a comprehensive project plan that includes our configuration, benefits, claims, EDI operations, IT, front-end, coding and fee schedule teams. Our Enterprise Project Management Office (ePMO) market initiatives team gets involved for developing a comprehensive project plan. The Claims team organizes weekly status meeting to measure the progress against the project plan.

For Nebraska, we will develop a customized process that will support Nebraska-specific regulations and will involve rigorous process initiation involving end-to-end testing, modular-unit testing and provider contract adjudication testing.

Identifying Problem Areas

A critical component of continuous claims process improvement is our auditing function. We perform claims audits in accordance with all applicable rules and regulations. The audit program is designed to minimize risk by increasing the accuracy of claims processing through performance feedback and root cause analysis. This program identifies deficiencies and works to resolve them for improved claims processing and payment. A dedicated claims audit team is responsible for reporting the financial accuracy of claim payments. This internal control activity supports early detection and corrective action of potential financial risk. Our independent registered accounting firm, Deloitte & Touche LLP, internal audit team and the senior management of WellCare monitor the findings. The objectives of the claims audit team are to provide reports that assist in effectively trending payment accuracy, identify payment and financial accuracy measures for root cause analysis, and to request and monitor corrective actions.

Rapid Resolution

WellCare will audit 100 percent of Nebraska provider claims for accuracy prior to releasing the claims during the initial go-live period. This will be accomplished by systematically reviewing claims during the adjudication process for quality audit review prior to releasing for payment. This will ensure accurate and

timely payments, identification of issues and enables root cause and/or resolution to occur prior to the claims release for payment or denial, if appropriate. Daily claims review sessions with a cross-functional team comprised of the following departments will occur for all areas to approve/sign-off on the pricing and benefit applications.

- Claims
- Configuration
- Benefits
- Fee Schedule
- Quality Audit
- Local health plan
- IT
- EDI-Operations
- Front End

The intense review by this cross-functional team accelerates the issue identification and resolution process. Rapid resolution occurs since all potential risks are identified, documented and tracked via an issues log, and actions are taken through resolution. If an issue is identified through this review we will work to fix the problem prior to payment to avoid an incorrect payment or denial. The review will allow proactive outreach to providers with high denial rates for education by the provider engagement team with a designated onsite resource if required. If a problem will result in a delay of payment for providers, we will directly outreach to the impacted provider(s) to discuss payment options available and come to a mutual agreement on timeframe and method of payment. This process will be gradually be removed by provider types. We then transition to our normal state of day-to-day monitoring when the desired outcomes are confirmed and realized for the claims to begin auto-adjudicating to the highest extent possible.

Our day-to-day management activities focus on monitoring daily performance and inventory. Our claims operations team alongside the areas above will review a variety of reports daily that will help us understand the current inventory of claims, at what stage of processing they are in, and whether we need to take action to course correct, such that we are on track to continue to meet and exceed service level agreements with providers and with MLTC.

This team also hosts a cross-functional meeting with members from other teams that impact the claims processing function to provide insight into what those teams are experiencing. This cross-functional meeting is held three times a week, and includes staff from our Information Technology (IT) team, which is responsible for systems operations and maintenance; our front-end team, who manages claims intake; our strategic operations team; and our EDI-operations team which manages provider connectivity. This cross-functional team assesses the entire claims work flow.

SECTION IV.S CLAIMS MANAGEMENT

108. Describe the MCO's methodology for ensuring that claims payment accuracy standards will be achieved. At a minimum, address:

- The process for auditing claims samples.
- Documentation of the results of these audits.
- The processes for implementing any necessary corrective actions resulting from the audit.

(Page limit 3 pages)

WELLCARE'S METHODOLOGY FOR ENSURING ACCURATE, TIMELY CLAIMS PAYMENT

WellCare uses a number of proven approaches and methodologies to monitor claims processing throughout the entire claims life cycle. Our claims process workflow is highly controlled with monitoring, reconciliation and intervention points embedded along the way. On a daily basis, our Claims Command team vigilantly monitors claims inventory in the various phases of the workflow through performance metrics including, but not limited to month-to-date turnaround time, auto-adjudication rates, and production outputs. Any deviations or activities that may affect claims output for our providers and members is transparently shared with our service personnel, regional counterparts and providers.

By the Numbers: Processes in Action

In 2015 (through November), WellCare processed 96.75% of all clean claims within 14 calendar days of receipt.

We actively encourage the use of electronic transactions whenever possible, supporting all industry standard transactions and formats. The key components of our Claims and Encounter Processing solution, which apply to all service types including participating and non-participating providers (inpatient, outpatient, pharmacy, vision, etc.) include: intake and validation, adjudication and clinical edits, provider payment, encounter submission, daily report of pre-adjudicated shadow claims, and provider filing limit. Claims operations metrics are reported and reviewed by management on a daily basis to include payment accuracy, prompt pay results and auto-adjudication percentage.

WellCare will measure and utilize existing performance guarantees in accordance with the Nebraska RFP; 90 percent of all clean claims within 15 business days of receipt, 99 percent of all clean claims within 60 calendar days of the date of receipt. Our staffing model takes into consideration these metrics so that all state requirements are satisfied.

PROCESS OF AUDITING CLAIMS

A critical component of continuous claims process improvement is our **auditing function**. We perform claims audits in accordance with all applicable rules and regulations. The audit program is designed to minimize risk by increasing the accuracy of claims processing through performance feedback and root cause analysis. This program identifies deficiencies and works to resolve them for improved claims processing and payment. A dedicated Claims Audit team is responsible for reporting the financial accuracy of medical claim payments. This internal control activity supports early detection and corrective action of potential financial risk. Our independent registered accounting firm (Deloitte & Touche, LLP), Internal audit team and senior management of WellCare monitor the findings. The objectives of the Claims Audit team are to provide reports that assist in effectively trending payment accuracy, to identify payment and financial accuracy measures for root cause analysis, and to request and monitor corrective actions.

The following types of audits are performed by the WellCare Claims Audit team:

- **Sarbanes-Oxley Compliance Audit (SCA):** The SCA process is designed to ensure the system logic complies with state and federal guidelines, designated contracts, changes approved by management (in the form of business decisions) and department processes and procedures and the SCA process also ensures that decision documents are approved within our compliance guidelines and that all items are implemented appropriately.
- **User Compliance Audit (UCA):** UCA's are conducted to identify opportunities to improve financial accuracy through the clarification of training and desk procedures and staff training as well as associate performance management.
- **Targeted Compliance Audit (TCA):** TCA's are performed on new operating activities or areas of concern.
- **High Dollar:** This audit is a pre-payment review on claims with a net paid amount of over $50,000 and is performed to minimize the financial risk on high dollar claims by validating the payment amount before the claim adjudicates.
- **Delegated Entity (DE):** The DE audit works directly with the Delegation and Oversight team to ensure payment accuracy for our delegated vendors. We monitor compliance with applicable standards in accordance with federal and state requirements. WellCare has established the Delegation Oversight Committee (DOC) to be responsible for functions that we delegate to third parties. The DOC must ensure appropriate performance measures are in place to ensure we can accurately assess whether delegated entities are in compliance with federal and state requirements.

Documenting Results

At WellCare, we have multiple methods for monitoring performance and ensuring transparency. These include Operation dashboards, Reports sent to Senior Management and the comprehensive scorecards generated for individual markets.

Accuracy goal for compliance audits

WellCare achieved 99% financial dollar accuracy and 97 % claim payment accuracy in claims payment audits.

In an effort to assist the operational units with the management of identified claims risk, the Claims Audit department uses an application to record mitigation plans. Payment errors are logged and tracked in the centralized audit tool called the **Audit Workbench** to ensure corrective actions and mitigation plans have been provided. A report of all affected claims is also created and tracked to verify that appropriate action was taken on all impacted claims.

This application is used by all areas of operations in tracking the root cause and mitigation plan for claim payment errors identified through our audit processes. The application includes a module for generating control reports to identify the final disposition and corrective action of the error.

The process used to record the error disposition and action plan within the application is as follows:

- The Claims Audit team enters payment errors daily.
- The operational unit responsible enters the root cause and mitigation plan for each error.
- The overall dollar amount and claims volume resulting from the error are entered to determine the impact and track the correction of the erroneous payments. Each mitigation plan explains the process of updating or adjusting the correct claim payments in WellCare's system, and if necessary, the Payment Recovery Team will issue a work order ticket to collect any erroneous payments.
- Errors will remain open until the mitigation plan has been completed and all necessary claim

adjustments have been made.

Claims Audit associates validate that risk mitigation plans are complete which are important elements in completing corrective actions. All of this activity is captured in the Audit Workbench tool. Depending on the severity of the risks, a mitigation process is planned. Once the risks are identified, weekly meetings are held by the Claims Audit and Operations teams to review the status of necessary actions. The pending risks are presented to area management or senior management for mitigation. Finally our IT department completes a monthly report that tracks mitigation plan action log activities and open items.

Overall the audit results can lead to adjustment of claims, root cause determination and corrective action plans. The action plan and the claims to be adjusted are monitored through the Open Action Log and adjustment reports.

Corrective actions

Our Claims Audit department is a key control to mitigating claims financial risk in coordination with Internal Audit. Quarterly, a risk area summary report is reviewed by the Risk Champion (the area leader is champions the mitigation plan) to ensure that WellCare's Enterprise Risk Management (ERM) plan is up to date. The ERM report shows that in our risk assessment management plan each risk event has a representative risk mitigation activity, key performance indicators and acceptable range or target to measure success.

The Claims Audit department, in its monthly executive performance report, will rely on corrective action management reports to document and direct corrective actions. The errors are identified in the dashboard which is shared with Operations and Executive teams monthly as it relates to identified claims accuracy errors controlled through an Audit Tool. The log of claim errors that have mitigation plans on file and those that have yet to be completed is also shared with the Executive team.

SECTION IV.S CLAIMS MANAGEMENT

109. Describe in detail how the MCO will verify that services were actually provided including:

- Minimum sampling criteria to ensure a representative sample.
- How results of monitoring will be reported to the State quarterly.

(Page limit 3 pages)

WELLCARE'S PROCESS OF SAMPLING AND MONITORING VERIFICATION OF SERVICES

As part of our robust efforts to root out Fraud, Waste and Abuse, WellCare has developed a broad range of tools including a verification of services (VOS) process we use to validate that services billed and paid for were actually provided. Through this verification process we will send a notice to a random sampling of members each month that would contain billed claim information specific to the member.

We will implement the VOS process upon approval by the State of Nebraska. This process encompasses sending a notice that will include a cover letter that explains the document, required actions for the member, and a summary of the services to be verified. The notice also informs the member that he/she should contact our Special Investigations Unit (SIU) hotline if he or she has any questions.

The hotline is manned by the SIU personnel. The SIU will investigate member reports, and when a member report indicates potential fraud or abuse, WellCare will report the information to the State and the Office of Attorney General (OIG) on its standard form for reporting suspected fraud and abuse in compliance with the Contract.

SAMPLING CRITERIA

Sampling will be done on three categories of payments for both professional claims as well as three categories of institutional claims. This will include all provider types (or specialties) including behavioral health, pharmacy, and unique claims from FQHC's, RHC's and tribal clinics.

The sample size will be no less than two percent of claims per month and divided according to the breakdown listed below as referred in the table below.

Professional Claims: There are three categories of professional claims as shown in **Figure 1** below. The categories are determined by the distribution of the claims data for the prior five months.

Figure 1

CATEGORY	DESCRIPTION	SAMPLE SIZE
1	Paid amount >= $500	The larger of the statistical sample size with 95% confidence level and 10% of precision or 20% of the member count.
2	Paid amount >= $100 and < $500	The larger of the statistical sample size with 95% confidence level and 10% of precision or 10% of the member count.
3	Paid amount >= $50 and < $100	The statistical sample size with 95% confidence level and 10% of precision.
Paid Amount is the total amount within a one-month period for each member.		

Institutional Claims: The three categories (as shown in **Figure 2**) of institutional claims are determined by the distribution of the claims data for the prior five months.

Figure 2

CATEGORY	DESCRIPTION	SAMPLE SIZE
1	Paid amount >= $5,000	The larger of the statistical sample size with 95% confidence level and 10% of precision or 20% of the member count.
2	Paid amount >= $1,000 and < $5,000	The larger of the statistical sample size with 95% confidence level and 10% of precision or 10% of the member count.
3	Paid amount >= $100 and < $1,000	The statistical sample size with 95% confidence level and 10% of precision.
Paid Amount is the total amount within a one-month period for each member.		

Monitoring

The SIU is our dedicated team responsible for monitoring, detection, prevention, investigation, reporting, correction, and deterrence of fraudulent claims. The SIU is a vital component of our Compliance department and maintains written policies, procedures, and standards of conduct that drive WellCare's actions to monitor and detect fraud. We have established SIU as part of a comprehensive anti-fraud program designed to prevent, detect, investigate, resolve, correct and report incidents of suspected fraud, waste and abuse (FWA). We will take necessary actions to comply with the erroneous payment requirements as outlined in this RFP.

The SIU commences an inquiry within 14 days of a suspected matter of FWA being reported to the SIU. Once received, the matter is entered into the secure case management data base. The entry is preliminarily triaged by the intake team to confirm that the matter concerns potential FWA. If the SIU determines that further investigation is warranted, the SIU completes due diligence and, where appropriate, refers the matter to the appropriate authorities as potential FWA. The SIU methodology is multi-faceted and uses a collaborative approach to identify and pursue potential cases of FWA.

These methods include:

- Operating an education and awareness training program to maximize employee, business partner, and downstream entity referrals to develop tips regarding possible FWA
- Investigating referrals from any source, including employees, business partners, law enforcement agencies and providers
- Utilizing a combination of data mining analytic tools, clinical expertise, and investigative knowledge to identify potential FWA
- Establishing baseline data to enhance efforts to recognize unusual trends or changes in utilization patterns

The SIU also uses business intelligence software to produce a Physician Trend Report by specialty. This report enables the SIU to identify aberrant spikes or trends. When this analysis identifies a provider with suspicious activity, a more detailed set of reports is generated, which allows investigators to view the entire billing and claims history for that provider. Additionally, as part of their due diligence SIU investigators use the Special Investigation Resource and Intelligence System (the National Health Care Anti-Fraud Association information-sharing website that includes regular postings of information about potential provider FWA activities by more than 100 insurance companies nationwide).

Reporting

For Nebraska, our SIU will send quarterly reports to MLTC which encompasses the following:

- Number of claims extracted per month
- Number of responses received from members through the hotline
- SIU's course of action
- Final determination

In addition to the individual reporting of suspected claims, we will routinely submit the following reports to MLTC:

- Fraud and Abuse and Pharmacy Lock-In reports to ensure all cases of suspected FWA are reported in a timely manner.
- Quarterly Behavioral Health Report
- Reports of all program integrity settlement agreements entered into with providers within seven business days of the settlement

SECTION IV.S CLAIMS MANAGEMENT

110. Describe the drug reference database used in pharmacy claims processing, and the update schedule, including term dates, obsolete dates, and rebate status. *(Page limit 2 pages)*

WELLCARE'S DRUG REFERENCE DATABASE

WellCare has extensive experience managing the pharmacy needs of our members. Currently, we are serving the pharmacy needs of 2.4 million Medicaid members across nine states. ***Annually, we manage more than 200,000 pharmacy prior authorizations across all of our Medicaid plans with nearly 100 percent resolved within 24 hours where required.*** WellCare's pharmacy program seeks to steward pharmacy resources without delaying care, improve member outcomes, improve access and support and engage our members and providers. Our goals are safety, efficacy and efficiency. Using the Nebraska Medicaid Preferred Drug List (PDL), WellCare will provide formulary coverage, at a minimum, for all classes of drugs including over-the counter (OTC), to the same extent they are covered by the Nebraska Medicaid Fee-For-Service (FFS) pharmacy benefit. Our Director of Pharmacy for Nebraska will work collaboratively with our corporate pharmacy department to coordinate the necessary clinical services and to ensure appropriate pharmacy benefit design, decision-making criteria, and formulary exceptions are followed based on Nebraska PDL and Utilization Management (UM) criteria.

WellCare's pharmacy operation is a unique hybrid model with a number of critical pharmacy benefit management functions performed in-house by WellCare personnel, coupled with the activities of a pharmacy benefits manager (PBM). Beginning in 2015, we utilized CVS/Caremark as our Pharmacy Benefits Manager (PBM).Under our hybrid model, our corporate pharmacy resources are responsible for prior authorization determinations, appeals, formulary and management, claims testing, Pharmacy and Therapeutics (P&T) Committee activities, quality improvement, retrospective drug utilization reviews, rebate management, and members and provider communications.

For Nebraska our PBM, CVS/Caremark, will manage the pharmacy benefits for our Heritage Health members. CVS/Caremark has a well-defined database, MediSpan, which it uses for pharmacy claims processing, updating schedules, term dates, obsolete dates and rebate status. MediSpan sends and loads a daily drug file into CVS/Caremark's test and production environment. The CVS /Caremark operations team then reviews the daily drug file in the staging and production environment by confirming that the files were loaded and that the necessary reports are available. Finally, CVS/Caremark operations logs the records as accepted or rejected and corrects any rejected records. Beginning October 1st, 2015, WellCare also maintains its own MediSpan database for processing all operational functions, prior authorizations and ensures proper coordination with the PBM.

Updating Schedules, Obsolete Dates and Rebate Dates

Any updates to the drug file are performed daily through the MediSpan database and the CVS/Caremark plan configuration is designed to prevent payment of claims submitted by pharmacies after the manufacturer term date, obsolete date or rebate eligible product date.

CVS/Caremark processes daily drug files from MediSpan to update Average Wholesale Price (AWP) unit and package pricing (data) on a daily basis, (Tuesday through Saturday). To deliver and load the daily drug file into the (staging) environment, MediSpan does the following:

- Provides to CVS/Caremark a daily drug file containing AWP unit and package price. This file is used to maintain and update the CVS/Caremark's price data.
- The daily file is available from MediSpan Monday through Friday. CVS/Caremark's FTP tool, transfers the file from the MediSpan server to CVS/Caremark server Monday through Friday evening. The automatic load of the files happens Tuesday - Saturday beginning 2 AM.

- When the file load is complete, it sends multiple automated e-mails to CVS/Caremark's Clinical Operations and Support Benefits teams indicating that:
  - The Daily Drug File on *<yyyy/mm/dd>* is loaded on day, month, date and time with no rejected records in all four price types.
  - Load reports and specialty pricing reports are available for review once the load is completed
- CVS/Caremark Operations reviews the file.
- If a daily file is not sent for any reason, CVS/Caremark follows up with MediSpan to resolve the problem. Once the file is received, it is manually loaded to ensure all the processing environments (i.e., staging and production) are up to date.
- Logs records as loaded or rejected with the corresponding date in the row assigned to STAGING in the daily load report file located on the department shared drive.

MediSpan Benefits the State, Providers and our Members

MediSpan is becoming a standard for claims processing due to its increasing usage among the major PBM's and MCO's. Using the same database in our internal operations as well as by our PBM ensures a seamless operation to our members, providers and pharmacies. The claims process is updated on a daily basis and allows the State to have accurate data and avoid any underpayment or overpayment.

SECTION IV.S CLAIMS MANAGEMENT

111. Describe how the State Medicaid PDL will be integrated into the MCO pharmacy claims system. *(Page limit 2 pages)*

INTEGRATION OF NEBRASKA MEDICAID PDL INTO WELLCARE CLAIMS SYSTEM

WellCare's pharmacy department has a long history of managing state Preferred Drug Lists (PDL)'s. As recently as 2014, we implemented the State of Florida's Medicaid Preferred Drug List for our Florida Medicaid business. The PDL clearly communicates the parameters of coverage, details about our coverage, and outlines our prior authorization requirements.

We will use the Nebraska PDL as developed by MLTC with input from our Medicaid Pharmacy and Therapeutics (P&T) Committee to inform prescribers of the most cost-effective drug therapies. This will include utilization management, enforcement of prior authorization criteria, quantity limits, and days' supply limitations designated by the Nebraska PDL. WellCare and CVS/Caremark will complete a validation and approval process for integrating the PDL into WellCare's PDL.

WellCare will provide our PBM, CVS/Caremark, with the approved Preferred Drug List (PDL), full National Drug Code (NDC) list and Utilization Management (prior authorization criteria, quantity limits, age limits and step therapy edit) files from the State of Nebraska. These files will be used for implementation and changes to the State's specific plan designs and clinical programs.

WellCare will work with CVS/Caremark to create a PDL coding grid which will outline the messaging for each claim scenario, categories excluded from the benefit, and all other state specific requirements. We will work with the PBM to ensure that the approved changes to the PDL are submitted to the CVS/Caremark benefits for system coding within the States required turnaround time. All updates will be tested for accuracy prior to implementation in order to achieve accurate adjudication of the medication claim at the point of service.

The Nebraska PDL will be sent via the WellCare formulary team for uploading into the PBM system. However those medications that are not included on the Nebraska state PDL, but must be covered under the Affordable Care Act, WellCare will send the list to our PBM via the use of Form F. Form F will also be used for any changes made due to P&T meetings, FDA changes and Micromedix changes. Refer to **Figure 3** below.

Figure 3

CHANGES TO THE PDL WITH THE GENERATION OF FORM F
The Clinical Pharmacy Formulary Manager reviews the Form F
➢ The Clinical Pharmacy Formulary Manager changes the Form F status in SharePoint to (FC Name)-Reconsideration ➢ Notifies the Formulary Coordinator via email to make the necessary change(s) ➢ Makes the requested change(s), changes the Form F status in SharePoint back to (FC Name)-Complete and notifies the Clinical Pharmacy Formulary Manager via email ➢ Reviews the Form F for accuracy
The Clinical Pharmacy Formulary Manager reviews Form F
➢ Approves Form F by initialing each line in the spreadsheet and electronically signing the document ➢ Changes the Form F status to (Manager Name)-Complete ➢ Notifies the Director via email that Form F is ready for final review and signature
The Clinical Pharmacy Director reviews Form F
➢ Review Form F and sign-off by placing initials on each line

- Approves Form F by electronically signing and protecting the document
- Changes Form F status to (Director Name)-Complete and notifies the Formulary Coordinator via email that Form F has been approved

The WCG Formulary Coordinator

- Ensures that the all rows and columns in the Form F spreadsheet are viewable and none are hidden
- Verifies that each line has the Manager's and Director's initials, and both have electronically signed the document
- Forward the Director's email of approval with the Form F attached to PBM for programming

The PBM Account Manager

- Completes an Add/Change (A/C) form for each line of business for programming purposes
- Assigns a Track/Case number along with an effective date for each Add/Change form
- Includes the Track/Case numbers and effective dates on the PBM Weekly Activity Log which is emailed to WCG Formulary Services at the beginning of each week

The WCG Formulary Coordinator

- Compares the documentation on the Weekly Activity Log with the programming requests on Form F to ensure consistency
- Documents the Track/Case numbers and effective dates on Form F in SharePoint and takes note of the effective dates for QA testing
- Confirms the accuracy of the programming changes by running test claims for each line on Form F
- Resubmits any programming errors on the Error Log to PBM via email weekly

WellCare will conduct comprehensive PDL testing prior to go-live on January 1, 2017 to ensure an accurate integration into the PBM claims system. The testing will include PDL and non-PDL medications for members in and out of transition and testing of all utilization management edits. In addition, paid and rejected claims will be monitored post go-live to ensure an accurate integration into the PBM claims system.

SECTION IV.S CLAIMS MANAGEMENT

112. Describe the MCO's approach for ensuring encounter data is submitted accurately and timely to MLTC, consistent with required formats. Include in the response how the MCO proposes to monitor data completeness and manage the non-submission of encounter data by a provider or subcontractor. *(Page limit 5 pages)*

WELLCARE'S APPROACH TO ENCOUNTER DATA SUBMISSIONS

WellCare has a comprehensive and robust end to end encounter management solution. Our Encounters department complies with the encounter submission requirements such as formatting as outlined in *Section S. Claims Management* of the SOW. We process, on average, 3.6 million encounters monthly using a single encounters processing system. Our Encounters department is located in Tampa, Florida and will serve MLTC, our Nebraska provider network and Heritage Health members. We ensure that the medical and pharmacy data submitted is in the appropriate format and is a true reflection of all services and payments made. Following regulatory guidelines and procedures, our experienced associates drive and execute change to ensure timely, accurate, and complete encounter data.

By the Numbers: A Case Study

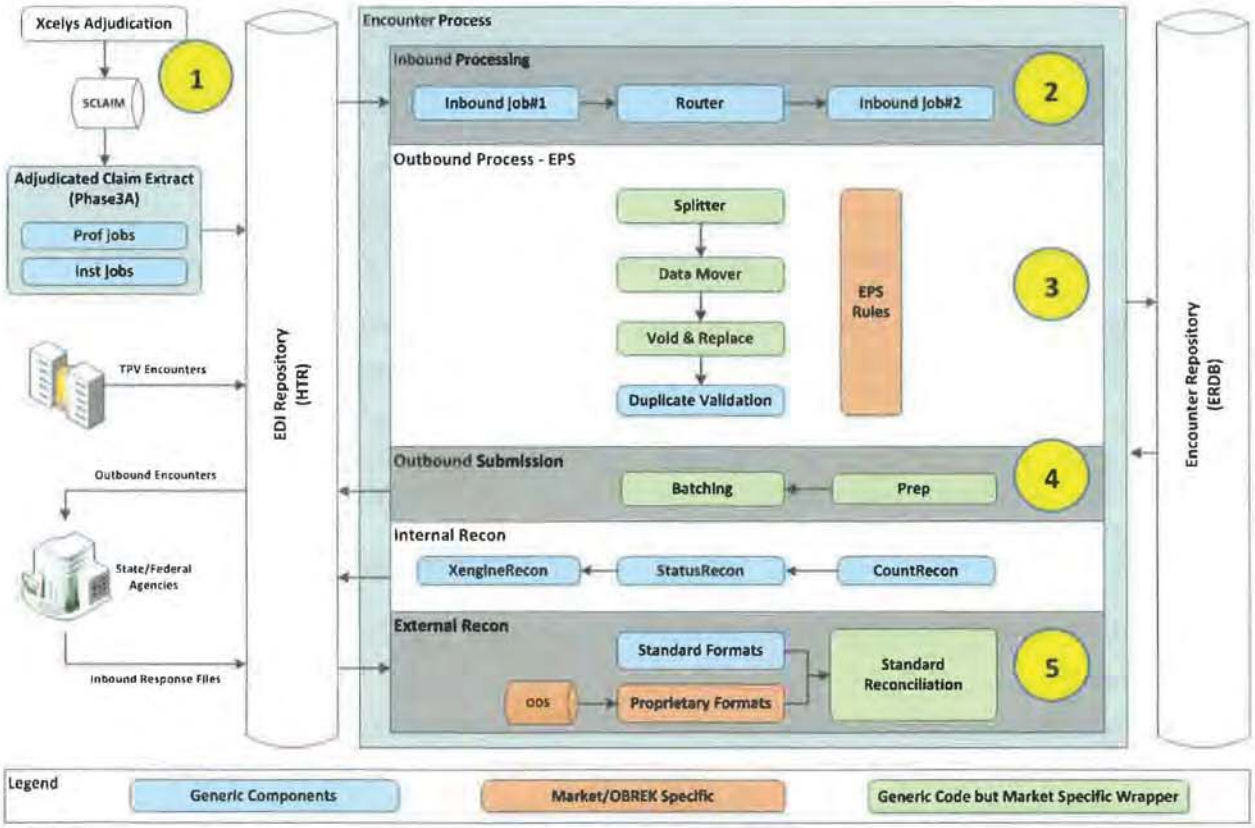
In Georgia, on average, we process 525,000 encounters per month with an acceptance rate of 99.36%.

Process overview

The WellCare encounters team creates encounters in 13 different formats for our 22 lines of business. Our encounters process (refer to **Figure 4**) can be broken out into five key areas:

- Adjudicated claims are extracted and data validation is performed.
- Inbound processing uses the extracted data from our claims adjudication system and extracts data from our subcontractor's encounter data.
- Outbound processing applies specific logic and edits, including claims splitting and service line roll up and will use them based on Nebraska specific requirements.
- Encounter data is batched and submitted. We also apply outbound Strategic National Implementation Process (SNIP) edits to validate transaction integrity prior to submission.
- Reconciliation is the final element which includes processing of response files. For Nebraska, we will design it to ensure previous versions of an encounter are at a final disposition prior to submitting a Void or Replacement transaction.

Figure 4



The Nebraska Encounter Operations Team: Experience and Expertise

WellCare is already equipped with an array of experienced encounter data team members who will be responsible for setting up the submission and reconciliation processes in Nebraska. These individuals are dedicated to the project through go-live. Upon contract award, WellCare will begin to search for Encounter Data Coordinators who will support the submission and reconciliation process in Nebraska. These individuals will be responsible for ensuring encounter data is complete, accurate and timely. They will also work closely to answer questions and perform testing during the pre-go live phase. Responsibilities will also include post go-live submissions and remediation of any issues that may arise.

WellCare's Encounter Inter-Disciplinary Team (EIDT)

Having a coordinated, collaborative group focusing on making sure encounter data is the accurate reflection of all services and payments is a strategic advantage at WellCare. The EIDT, internally called the Claims to Encounters End to End Steering Committee, is focused on implementing the strategy and resolving issues related to encounter data. The team consists of representatives along the entire claims to encounter value chain. We meet regularly to review and approve enhancements to our edit logic. For Nebraska, we will also work closely with the Heritage Health provider relations department to ensure all changes are communicated to our provider and subcontractor network.

Aligning Claims and Inbound Encounter Data Edits with Nebraska Edits

WellCare will apply a set of standard edits to our inbound claims and encounter data. In addition, WellCare will implement Nebraska specific data requirements and request a list of edits from MLTC.

Generally our work is completed to configure our editing tools to ensure proper alignment. We publish

837 claims companion guides and communicate necessary edits to our provider community. All editing and communication takes place prior to our go-live date. One of our key levers to ensure compliance with encounter data requirements is to have embedded specific contract language which will require subcontractors to submit data within 90 days. We then use provider scorecards to measure and report on this service level agreement.

Encounter Data Testing with Subcontractors

We use subcontractors for vision, and other ancillary benefits, and the subcontractors are required to submit encounter data in the 837 format. Each subcontractor undergoes onboarding, training, and data testing. We also configure reporting to show compliance with our quality and timeliness standards. For Nebraska, WellCare will receive this data from each subcontractor in compliance with MLTC data requirements and will complete all onboarding and testing prior to go-live.

Encounter Data Submissions

WellCare reviews the State specific companion guides, memoranda and other materials regarding submission requirements. During the UAT period we have some level of encounter data testing, and we work to create test data, submit test files and resolve issues. This process includes developing duplicate, void and replace, and other logic in order to be compliant with our submissions. In Nebraska we will meet all the required submission requirements in time for go-live.

Data Reconciliation Processes

To create our automated reconciliation process, we review all encounter data response file specifications. We work internally to load response files into our Data Warehouse and reconcile the responses with our encounter data submissions. We tag each encounter as "Accepted" or "Rejected" in order to build reporting and remediation plans.

Collaboration with MLTC management and technical staff

We are committed to working with our state partners as we work through a variety of policy and operational issues. This collaboration extends to encounter data collection and validation; we create a shared understanding of data quality standards and reporting on our Service Level Agreements. We also believe having a forum for resolving problems will create shared goals, and clear lines of communication. We welcome both formal and information communication paths in individual plan meetings and joint meetings with all plans. In our past experience, weekly meetings with our state partners are critically important initially to share policy, data submission requirements, file submission and reporting schedules and data rejections.

ENCOUNTER PROCESSING OVERSIGHT AND MONITORING TO ENSURE DATA COMPLETENESS

WellCare has also built comprehensive end to end reporting to provide immediate visibility to system, data and provider issues which affords the appropriate department to remediate quickly thereby guaranteeing a successful submission. There are multiple reports created to provide a holistic accounting of each and every encounter received, processed, submitted and reconciled from the Medicaid agency including:

- **Service Level (SLA) Reporting:** The SLA report tracks the timeliness, completeness and quality measures. They are created monthly and their intent is to provide visibility to those encounters that are nearing or outside of the SLA. The Encounter Data Coordinators work on these reports and remediate encounter data ensuring our agreements are met.
- **Cash Disbursement Journal (CDJ) Reconciliation:** The CDJ Reconciliation is a measure of completeness which compares paid encounters accepted by the Medicaid agency as a percentage of total dollars paid by WellCare for FFS and pharmacy providers on a rolling 12 month period. It is created monthly and reviewed by Encounters and Finance area leadership as a critical reporting tool.

Goals are established to achieve improvements year over year and variances require explanation.

- **Global Remediate Report (GRR):** The GRR is a measure of completeness to monitor encounters processing and to identify potential issues requiring further research and/or corrective action.
- **Standardized Work Plan Remediation:** WellCare has implemented a standardized remediation process which includes regular reporting feeding automatically into a standard work plan used as the primary driver for encounter remediation. The work plan provides a holistic view of all open items, issues and challenges for a particular state enabling the encounters team to remediate quickly thereby meeting state defined SLAs. These work plans are refreshed weekly and ensure current and accurate reporting is available to management and leadership teams. The standard work plan provides visibility to all open items across claim types based on total encounter inventory. Items are prioritized based on overall impact and risk to meeting specific service levels. It also provides tracking for all open items within cross-functional areas outside encounters including open questions with the state where there is a response dependency before moving forward on remediation steps. Finally, it provides a summary level of our current submission status and any gaps that may exist between it and the defined state SLAs.
- **Quarterly State Communications**: The quarterly state communication (also known as "quarterly letter") is developed to highlight current accomplishments, issues and to identify assistance MCOs may need with encounter data submission. These notifications are meant to summarize key items that are currently being worked on and provide the level of transparency needed in order to make our data submission successful.

WellCare's Success in the Monitoring Process

For Illinois, our Encounters Operations team, in conjunction with other cross-functional partners, recently worked with a local IPA in Kane County to bring them into compliance completeness and accuracy service level agreements. We utilized the Provider Scorecard to provide feedback about encounter data submission lacking quality and consistency. We tracked more than 9,600 encounters totaling $1.3 million. We reviewed specific errors with them and worked, over a period of three weeks, to have corrected encounter data submitted and the entire backlog resubmitted before the State's deadline. We resolved 97% of the IPA's encounters data error. WellCare continues utilizing the Scorecards monthly to ensure consistent submissions from this and every contractor that sends us data.

WellCare ensures complete and timely encounter data from our subcontractors using several methods described below:

- **Contract Language**: WellCare's contracts have specific language detailing the requirement for encounter data submissions. The subcontractor submits encounters in a HIPAA compliant 837 transaction format. Encounter transactions are required to meet standard rules set by the SNIP edits as well as comply with all state and federal validation guidelines. Any encounter that does not meet these requirements must be reviewed, adjusted and resubmitted by the subcontractor within thirty days of the initial notification of rejection. WellCare provides HIPAA standard response files as well as custom reports which are reviewed by the contractor. Our subcontractor submits 100 percent (as tracked by CDJ/ 835) within 90 days from date of service, of all encounters to us with an overall acceptance rate of no less than 95 percent or as superseded by specific state or CMS Service Level Agreement. This scoring will be monitored monthly and measured as an aggregate of 12 months using the Encounter Scorecard Monthly reports. Penalties for not complying with the contract will result in damages; these will be included in contracts. An example of this type of penalty is having the contractor refund WellCare an amount of one percent of our annual capitation payments made to Contractor if the 95 percent yearly acceptance rate is not met.

- **Provider Scorecard:** A key inspection tool for contract compliance is the provider scorecard. The scorecard tracks submission frequency and volume, compliance and accuracy of provider submissions by subcontractor. It reports the number of encounters submitted by the contractor by month, the number passing WellCare's front end quality edits, and the number accepted by the Medicaid agency. These counts are reported for each provider and contractor and are used by management, the ancillary department and the market to manage contractor activity and to target visits and education.
- **Contractor Education:** Upon creation and dissemination of the provider scorecards, we schedule targeted education sessions. This education goal is to ensure quality submissions and teach contractors how to correct errors with their encounter data. We handle education telephonically.
- **Contract Enforcement:** WellCare utilizes the contract to enforce encounter data timeliness, completeness and accuracy if necessary. For Nebraska, we will develop Corrective Action plans and track adherence to the plan until the Contractor comes into compliance. Financial penalties will be incurred if encounter data acceptance levels are not met.

Pharmacy Encounter Data from the PBM

WellCare will utilize our PBM to develop the encounter data submission and reconcile the response files. The PBM and WellCare have a shared responsibility to correct any errors and to ensure all Nebraska Service Level agreements are met. There is specific contract language which requires accurate and timely submissions. Currently, the PBM supports D.0, Post Adjudication 4.2, and Post Adjudication 4.4; however, we will develop any type of file submission type as required by Nebraska (standard NCPDP or Proprietary). Upon contract award, WellCare and the PBM will develop specific requirements for the Nebraska submission, create test files, and work to create an extensive set of test scenarios. This test cycle will be essential for having accurate data submissions once the submission is fully in production. WellCare will utilize a Reporting package developed by the PBM to ensure accurate, timely, and complete submissions. There will be dedicated subject matters experts within our team who will specialize in pharmacy data and will support the Nebraska pharmacy submissions on a go-forward basis.

SECTION IV.S CLAIMS MANAGEMENT

113. Describe the MCO's proposed processes for coordination of benefits for dually-eligible members. *(Page limit 2 pages)*

Our coordination of benefits (COB) policies and procedures ensure that we are the payer of last resort in situations where members have Medicare as their primary insurance. Our robust claims processing instructions demonstrate our ability to process claims in accordance with state and federal rules and meets the requirements as outlined in *Section S.17 Coordination of Benefits for Dually-Eligible Members* of the scope of work. We also have established policies and procedures for processing claims where third party liability (TPL) coverage exists to ensure that claim payment does not exceed the Medicaid or contracted allowed amount less the other carrier payment amount.

Our innovative methods assist auto-adjudication of COB claims and increase the accuracy and payment turnaround time with processing COB claims by removing manual intervention. WellCare understands the intricacies of processing dual eligible/cross-over claims and has processes in place to identify non-covered Medicare services/providers. This system allows us to accurately process claims as primary without requiring additional burden on the provider having to bill Medicare to receive a denial prior to submitting the claim to WellCare.

OUR PROCESS OF COORDINATION OF BENEFITS

The coordination of benefits (COB) process begins by adding other primary health insurance (such as Medicare) coverage information to the member's record in the Core Processing System (CPS). The other coverage details include the following: carrier name (if member is covered under a Medicare Advantage plan), HICN (or policy number), coverage type (Part A only, Part B only or Parts A&B), effective dates, and termination dates.

WellCare systematically uploads Medicare coverage details from the State's 834 files to the member's COB history tables in our claims system without additional validation. WellCare's COB team also runs a daily process to ensure that any member enrolled in a dual plan code has the proper Medicare COB segment in the Claims Process System (CPS). This daily process will capture any missing Medicare coverage information that may not have been sent to us in the State's 834 files. The COB team can obtain the missing Medicare coverage information directly from the Medicare CMS MARx web portal.

Coordination of Benefits Shared With Our PBM

WellCare has a well-defined process of coordinating benefits with our PBM, CVS Caremark. The pharmacy claims are adjudicated online, in real-time, and submitted electronically to our PBM. Our PBM recognizes the member's other prescription drug coverage in order to coordinate prescription benefits between the different entities. When a secondary claim is submitted by the dispensing pharmacy, the PBM identifies the amount paid by the primary third-party payor and recalculates the amount owed. Any remaining balance owed is paid by the secondary payor, or the payor of last resort. In this case, WellCare's Medicaid line of business would be the payor of last resort.

As a Medicaid contractor, WellCare takes the responsibility for identifying and pursuing TPL for its Medicaid membership. Best efforts are made by WellCare to identify and coordinate with all third parties whom members may have a claim for payment or reimbursement for services. These third parties may include Medicare, any other group health insurance, any coverage under governmental programs, and any coverage required to be provided for by state law.

WellCare performs cost avoidance and third party liability identification activities under well-defined policies and procedures that conform to all federal and state requirements. For Nebraska Medicaid we will apply our same process and criteria for coordination of benefits to the dually eligible members.

IV.T Reporting and Deliverables

SECTION IV.T REPORTING AND DELIVERABLES

114. Provide an example of dashboards that the MCO will use to track MCO performance for MCO leadership and the QAPI Committee.

WELLCARE'S DASHBOARDS TO TRACK PERFORMANCE

WellCare leadership uses an array of tools to help us monitor and track performance of a vast array of operational, clinical, financial and system performance metrics to ensure we are meeting and exceeding our obligations to our customers, as well as the expectations of our Board of Directors and executive leadership. We look at these metrics in dashboard and long report form and review data at the aggregate, local and line of business level to gain a clear understanding of individual strengths and challenges. In addition to internal use of our various dashboards and reports, we are well versed in customizing dashboards for individual state partners to meet the unique needs of each Medicaid agency with which we work. We have included in the body of this response or as an attachment a sampling of dashboards we use for tracking performance. We are highlighting here four examples of these reports, each demonstrating different capabilities and different audiences. The four samples used for this response include:

- Claims Payment Metrics
- Call Center Performance
- Quality Improvement Committee Reporting
- Local Health Plan Dashboard

Claims dashboards

WellCare maintains a Claims Command Center (CCC) to facilitate the management of claims inventory workload while ensuring greater predictability and optimal resource utilization from claim receipt-to-payment. The CCC monitors, tracks and measures claims data performance on a daily basis, which includes incoming receipts, inventory aging and numerous metrics reports. The team works to identify trends, variances and forecast work-on-hand throughout the claims processing flow utilizing our workflow management tools. A vital aspect of the CCC is to monitor end-to end claims tracking, reconciliation and acknowledgement of claims in transit.

WellCare utilizes data on a consistent basis through our monitoring tools as leading indicators to improve accuracy and provider satisfaction:

- Top Denials by provider including dollars and volume - Enables proactive communication to providers to reduce denials
- Top Reasons for suspended claims - Provides WellCare the mechanism to conduct analysis on improving auto adjudication rate, which has a positive impact on accuracy and timely payment
- Daily monitoring of inventory as compared to prompt pay statues
- Identify top providers with highest rejection rates – EDI team partners with providers to educate

This claim operation metrics are available to senior management on a daily basis to include payment accuracy, prompt pay results, auto-adjudication percentage and EDI rate. The Claims Payment Timeliness Summary is used to monitor and evaluate WellCare's performance in comparison to contractual prompt pay requirements.

Figure 1 in the following page shows a sample of the claims scorecard dashboard.

Contact Center dashboards

The heart of the contact center operation is our Command Center, which provides real-time monitoring of service levels of more than 200 different skills and call types and coordinates action to achieve service level targets. The Command Center features numerous screens that display data and trends including calls in each queue, length of time callers have been waiting to speak to a member services representative and number of member services representatives available to assist callers. The Command Center produces real time data as well as data over time for leadership to track and trend and ensure we are meeting our requirements, and provide a rapid corrective action should a metric fall out of line with requirements. . **Figure 2** in the following page shows a sample of the metrics tracked in our contact center dashboard.

Quality Improvement Dashboards

One of the ways we enhance our member's health and quality of life is through our comprehensive, systematic and continuous Quality Improvement Program. At WellCare, we have a well-defined QI program that reflects a continuous quality improvement (CQI) philosophy and mode of action. Continuous quality improvement processes identified in the QI program description, work plan and annual evaluation are approved by the applicable committees and conducted to accomplish identified goals. The QI program description defines program structure, accountabilities, scope, responsibilities, and available resources.

The annual QI work plan identifies specific activities and projects to be undertaken by the plan and the performance measures to be evaluated throughout the year. Work plan activities align with contractual, accreditation and/or regulatory requirements and identify measurements to accomplish goals. The annual QI evaluation describes the level of success achieved in realizing set clinical and service performance goals through quantitative and qualitative analysis and prior years trending as appropriate. The annual evaluation describes the overall effectiveness of the QI program by including:

- A description of ongoing and completed QI activities and projects;
- Trended clinical care and service performance measures as well as the desired outcomes and progress toward achieving goals;
- An analysis of accomplishments in the quality of clinical care and service; and
- Current opportunities for improvement with recommendations for interventions

An example of a template for the QI meeting is attached as **Attachment 114a_Sample QIC Meeting Presentation.** Each Medicaid market has a quarterly QI committee meeting and the metrics are reported through the committee structure.

The attached sample health plan dashboard (**Attachment 114b_Sample Health Plan Dashboard**) is

representative of metrics that are tracked and trended at the health plan level.

Additionally, WellCare also conducts Quarterly Business Reviews (QBRs) with all of the senior management team and several other leaders from across the organization. In these QBR's the team reviews progress on key corporate initiatives, including topics like compliance, care management, quality (QAPIs) and operations for effectiveness and efficiency. This is also includes reviewing for overall profitability, areas of concern, and progress on agreements made with the government partners. In case any area of opportunity is identified, the QBR ensures an executive owner is assigned to that opportunity.

SAMPLE

* Actual reflects prior year baseline; see appendix for more detail

Medical Cost Management Notes:

Medicaid Admits/K Targets are still being finalized at this time

ER visits are heavily weighted with IBNR in early months due to claim lag

Admits/K, 30-day readmit rate and auto approval based on auth data using admit date

Unit Cost facility actuals based on Oct'13-Sep'14 claims data (pulled Nov 2014)

Unit Cost Provider actuals based on Jan - Dec '14 clams data (pulled Jan 2015)

Admits per 1000 calculations are based on 365 days

ER visitsper 1000 calculations are based on 12 months

Auth types:

DAA auth type - INP (exclude birth and NICU)

Admits auth type - 'INP','SNF','BRH','BHI','BHD','BHR','LTA','LTC','INR','BHS'

30-day re-admit auth type -INP (include birth and NICU)

Items highlighted in orange are an annualized projection

APPENDIX

SAMPLE

Financial		
Metric	Freq	Notes
Member Months	M	Cumulative membership
Premium PMPM	M	Premium per member per month; Excluding premium taxes and Excluding ACA Medicaid revenue
Net Premium ($000)	M	Excluding premium taxes and Excluding ACA Medicaid revenue
Total Medical PMPM	M	Medical cost per member per month
Rx cost PMPM	M	Prescription drug cost per member per month
MBR %	M	Medical benefits ratio excluding premium taxes and ACA Medicaid revenue
RAPS $	M	Incremental revenue attributable to accurate capture of members' complete health status
% Encounter Data accepted	M	Percent of paid claims accepted by the State/CMS divided by total paid claims

Membership/Sales		
Metric	Freq	Notes
Membership	M	Number of member[illegible]d
Cost / sale	M	Acquisition c[illegible]per [illegible]roll[illegible]
Disenrollment rate	M	Per[illegible]ntage o[illegible]mbe[illegible]enroll[illegible]
CCP Prod/BC	M	Nu[illegible] of sa[illegible]s [illegible]odu[illegible]d per W2 agent
W2 sales	M	Num[illegible]er [illegible]e[illegible]ollm[illegible]nts through the W2 channel
1099 sales	M	[illegible]umb[illegible] of [illegible]ollments through the 1099 channel
DTC sales	M	[illegible]mbe[illegible] of enrollments through the "Direct to Consumer" channel
Market Share (Medicaid only)	M	December market share will be used as the 2015 budget

SAMPLE

People		
Metric	Freq	Notes
Undesirable Turnover	M	Excludes DM and PM performance ratings (includes CE,FE, ME and no rating), Attrition count includes Voluntary and Pending reason codes
90 Day Turnover	M	Associates terminated in first 90 days of employment with any reason code
HiPer Retention	M	Percentage of associates rated CE or FE, as part of the 2014 Annual Review process, remaining at the end of 2015. The metric takes the count of all HiPers remaining at the end of the reporting period and divides by the total HiPers (as determined in the 2014 Annual Review process). For example if we have 100 HiPers and 2 quit this month next month we will report 98/100 = 98% HiPer retention.
AOS - Company Overall	A	Aggregate results of Company Overall theme within the AOS survey. Made up of the following questions; - I am proud to tell people I work for WellCare. - I have confidence in the future of WellCare. - I am NOT considering leaving WellCare within the next 12 months. - I have a high level of satisfaction with WellCare at the present time

AOS - Engagement	A	Aggregate results of Engagement theme within the AOS survey. Made up of the following questions: - Associates are encouraged to participate in making decisions that affect their work. - I love what I am doing at WellCare. - I feel appreciated and valued. - I can adjust my work schedule and/or work arrangements to meet my needs. - I have a great balance between work and my personal life. - We have great teamwork-people pull together. - My manager stands up and supports me. - My goals / performance expectations are clear and know what it takes to be successful here. - My job capitalizes on my strengths and capabilities. - I would recommend WellCare to a friend as a good place to work.

Medical Cost Management		
Metric	Freq	Notes
Total Admits/K (Auths)	M	The Medicaid Inpatient budget includes MedSurg, Birth, NICU, BH, SNF, LTC, Other; The Medicare Inpatient budget includes MedSurg, BH, SNF, LTC, Other; Budget is based on best possible estimation of auth equivalent of Actuary claims utilization targets
ER Visits / K	M	ER Visits including IBNR; claims based more recent periods will include a majority of IBNR due to claim lag
30 Day Readmit Rate	M	This target was set overall (product level on limitation defined as including MedSurg/Births/NICU and allocated down to LOB level
% Auto Approved (In Patient/MedSurg)	M	Global Target by Care (specific target
Unit Cost Facility	Q	% of Medicaid Base on most recent contract analysis date: DOS 10/01/2013 and 9/30/2014;There is not an established target at this time, needs to be developed
Unit Cost Provider	Q	Based on most recent contract analysis date: DOS 1/1/2014 - 9/30/2014; There is not an established target at this time, needs to be developed
% Trgt Members in CM	M	Managed: Member has an Assessment and Care Plan during the program duration
Market MEI ($000) Savings	A	Savings incurred by Market Investment on Medical Expense Initiative net of service fund
Corporate MEI ($000) Savings	M	Savings incurred by Corporate Investment on Medical Expense Initiative net of service fund

Quality Medicaid		
Metric	Freq	Notes
HEDIS composite	A	Average Percentile for LTI Measures a. Baseline on the 10 LTI measures identified in the market. The measures will vary by state. b. Based on reported measures (hybrid, if applicable) that have a benchmarked published in the Quality Compass for the applicable reporting year. c. The Current Budget YTD represents HEDIS 2014 final rates and 2014 Quality Compass thresholds for 2017 LTI Measures. d. The Actual YTD will be available in fall 2015 based on HEDIS 2015 and 2015 Quality Compass; Current score to be used until 2015 score is available
CAHPS	A	Percentage of Accreditation CAHPS measures at or above the 50th percentile. a. Based on latest Accreditation Standards b. The Current Budget YTD is based on CAHPS 2014 and 2014 Benchmarks and Thresholds c. The YTD Actual will be available in fall 2015 based on CAHPS 2015 and 2015 Benchmarks and Thresholds; Current score to be used until 2015 score is available

SAMPLE

% of Mbrs aligned to HPP	A	% of Members in a LOB (e.g. Florida Medicare) assigned to a practice designated as "High Performing". High Performing status is determined by a combination of Quality and Cost Efficiency performance. Quality performance is based on a composite of practice-level HEDIS measures (Administrative data only), converted to a 1 – 5 scale. Cost Efficiency performance is based on practice-level MBR%. Practices are assigned a letter grade (A – D) for each of Quality and Cost Efficiency, which are then averaged (equally weighted) to determine an Overall Grade. In cases of one degree of separation, the Quality Grade breaks the tie. Practices with Overall Grades of A or B are considered to be "High Performing"
% of SF payments linked to Quality Perf	Q	% of 2014 Shared Savings (Service Fund) bonus paid to providers that are explicitly linked to Quality performance standards. [Note: Denominator will also include administrative PMPM payments not related to specific Administrative services, such as Credentialing]
High Performance Network (HPN) score	Q	Composite score assessing the overall performance of a State's provider network on a 1 – 5 rating scale (separate ratings for Medicare and Medicaid). Based on a weighted average roll-up of 14 distinct measures across the areas of Access & Availability, Quality, and Operational efficiency
Geo Access Score	Q	% of county/specialty combinations that are passing the access standard
HPP Action Plan Progress	Q	% of members assigned to on-track Practice-level HPP Action Plans as a % of total Target improvement in % of Members Aligned to HPPs KPI. [Note: Intent is to ensure that (1) sufficient Practice-level Action Plans are underway to achieve % of Members Aligned to HPP KPI and (2) these Action Plans are on-track]

SAMPLE

Regulatory / Compliance		
Metric	Freq	Notes
Compliance Score	Q	Market Compliance Oversight Quarterly Performance Report (the "Quarterly Performance Report") assesses each Market's adherence with the Compliance Program through the monitoring of: • Structure: Program oversight; standards, policies and procedures; reporting mechanisms; compliance training and education; and communication and awareness strategy • Process: Assessment, identification and prioritization of compliance risks; prevention, detection and monitoring of key risk areas; response and correction of key risk areas; external regulatory and internal policy implementation; corrective action and internal action plans; and enforcement and disciplinary Guidelines • Outcomes: Compliance audit results; regulatory compliance results, e.g., notices, fines, and penalties); regulatory reporting; privacy and security; delegated entity compliance; and Associate Opinion Survey – Ethics and Compliance
Timeliness of reporting	M	Report submitted on time to regulator and loaded into LIONS
# of non compliant report events	M	Report past due, submitted late to regulator or not loaded into LIONS

SECTION IV.T REPORTING AND DELIVERABLES

115. Provide examples of the following reports:

- Member Grievance System
- Performance Improvement Projects
- Care Management

How will the MCO use required reports in its day to day management and operations?

OUR REPORTS AND USAGE IN DAILY OPERATIONS AND MANAGEMENT

WellCare has a long history of ensuring accuracy and completeness of all reports with our government partners. We will build on our successful record of complying with the reporting requirements of multiple governmental agencies at both state and federal level. WellCare has reviewed and acknowledged the requirements as outlined in *Section T- Reporting and Deliverables* of the Request for Proposals. Reports will be developed in accordance with MLTC requirements and state and federal reporting guidelines. Our timeframe of the report submission supports the requirements outlined in *Attachment 38 – Revised Reporting Requirements.* We will maintain a Nebraska-specific reporting policy to submit required reports and submissions timely and in the appropriate format as prescribed by MLTC. We also have local staff members who have dedicated responsibility to ensure reports are submitted on time and in the proper formats.

WellCare Reporting Capabilities

- Industry leading process to ensure accuracy and compliance
- Flexibility to provide reports on demand

Member Grievance System Reporting

WellCare uses data from grievances to evaluate trends and develop insights that can be applied to operational improvements (or to help measure the effectiveness of improvement activities that have been implemented). Our grievance database and, our internal, proprietary applications, support the grievance process by tracking member and provider grievances from receipt to resolution. This affords us the means to address not only issues affecting individual member satisfaction, but to identify potential trends in the delivery system as a whole, permitting WellCare staff to take prompt, corrective steps to minimize risks to performance standards.

All grievances captured in the databases are categorized to help easily identify trends and opportunities for improvement. Through the databases, we use routine and ad hoc reports to monitor activity, identify trends, and evaluate opportunities to improve service or quality. Management reports are produced on a daily basis to evaluate staff performance, state compliance of all timeframes for acknowledgment and resolution are met, and aging of open cases. Using this data, we continuously assess resources and caseloads to minimize risk to performance standards. On a monthly basis, we evaluate the number of grievances received, the percent resolved within required timeframes and the nature of the requests. Data is aggregated on a quarterly basis to identify trends. For example, reviewing our top grievance category drivers, allows us to develop insights into how we can improve member and provider satisfaction by improving communications and/or process'. Ad hoc reports are produced to evaluate potential opportunities for improvement such as provider-specific trends or outliers. As opportunities are identified, we initiate an in-depth review of the process and develop action plans with the necessary departments who can address needed changes. Action plans are shared with the Utilization Management Committee

(UMC) and Quality Improvement Committees (QIC) as appropriate. Reports of activities of the grievance department are also presented in the Customer Service Quality Improvement Workgroup (CSQIW).

Our QIC provides general direction and oversight for member grievance surveys and provides recommendations for improvement, requesting corrective action and providing approval where necessary and appropriate. An example of our Member Grievance report is attached in **Attachment 115a_Member Grievance Report.**

The Member Grievance Report provides a summary of the following (as depicted in **Figure 3**):

- The number, type, and resolution of member grievances
- Percent of grivances resolved within the required timeframe
- Trends or problem areas and activities to improve member satisfaction
- The member grievance category driver for a particular quarter. For example, in the second quarter of 2015, we observed the following categories in our Kentucky plan:
  - Billing/Claims (297) – Member dissatisfaction with participating providers billing for services not covered by the plan
  - Physician (35) - Issues regarding rude treatment from the participating provider, specialist, and/or staff, appointment availability, difficulty obtaining medical records, etc.
  - Health Plan (48) - Member dissatisfaction with the plan's processes or the plan's staff

Figure 3

Quarter	Grievances Received	Grievances Closed	% Closed within Compliance
Q2 2014	444	512	100%
Q3 2014	406	442	99.3%
Q4 2014	347	332	99%
Q1 2015	474	421	99%
Q2 2015	446	484	99%

Performance Improvement Projects Reporting

Annually, WellCare will conduct population and demographic studies in Nebraska to identify high utilization diagnostic categories, high risk conditions, opportunities to improve coordination of medical care across settings or transitions of care, collaboration between medical care and behavioral healthcare, or areas of potential health care disparities within the population. This study will be presented to the Quality Improvement (QI) team to analyze and determine relevant and meaningful opportunities within the population. The recommendations of the QI team will be presented to the UMC and/or QIC for approval and oversight.

Once the QI committees have identified areas of opportunity, monitoring of the specific quality indicator will occur through measurement based on scientific methodology. Performance improvement projects shall address the following elements:

- A correctly identified study population
- Valid sampling techniques (if not using entire eligible population)
- Accurate/complete data collection

- Appropriate improvement strategies
- Data analysis and interpretation
- Identification and prioritization of opportunities for improvement
- Reported improvements (if any) and
- Sustained improvement over time (if any).

Results of the Performance Improvement Projects will be presented to the QI team, with the analysis and recommendation of further action to be taken presented to the UMC and the QIC. Root cause, barrier analysis and recommendations for changes and/or modifications of methodology will be solicited at these meetings. The workgroup will also be responsible for assessing whether activities are being completed in a timely basis or if a revision in interventional methodologies is required.

The action plans for interventions will be developed by the QI team and presented to the UMC and the QIC for discussion and feedback. The general topic of discussion includes:

- Development of interventional methodologies
- Tracking and trending results over time
- Root cause and barrier analysis
- Results will be presented to all quality committees, and interventions will be re-evaluated and opportunities for continued improvement will be identified.
- Results will be sent to appropriate regulating bodies as required.

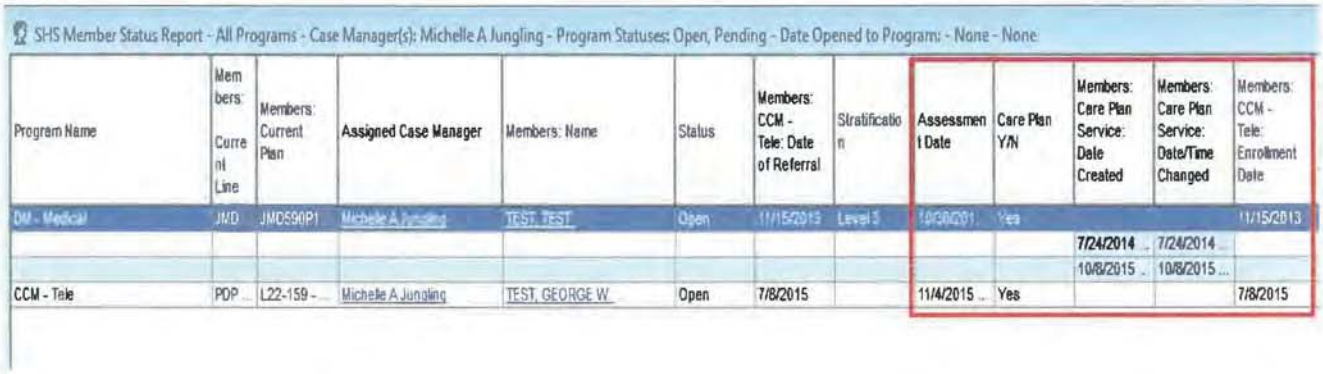
Performance Improvement Projects (PIPs) are WellCare's key tools for achieving the goals outlined in our quality strategy. We conduct PIPs to assess and improve the quality of a targeted area of clinical or non-clinical care or services provided to members. PIP reports provide the framework for monitoring, measuring, and improving the delivery of health care for members in day to day operations. Once interventions, improvement strategies, and ongoing initiatives have been implemented in response to a PIP, they become part of the daily Quality improvement process.

An example of PIPs report is attached in **Attachment 115b_PIPs Report.**

Care Management Reporting

WellCare utilizes reporting to measure effectiveness of programs, productivity and member outcomes. Records are reviewed regularly to ensure compliance with various requirements such as member outreach, updating of care plan, and staffing ratios (as shown in Figure 2). Managers are able to identify training gaps or needs through review of this documentation; ensuring members are progressing towards care plan goals. In addition to reviewing daily caseload reports, clinical leadership and our health services training specialist generate monthly and quarterly reports to monitor performance, including but not limited to the number of assessments and care plans completed within required timelines, case file and clinical documentation. Our Medical Management Platform (MMP) allows for real-time reporting; providing managers reports such as caseload ratios, overdue assessments, contact frequency and care plan completion/updates. Reports may be at the individual case manager level, rolled-up by manager or aggregated for the entire department for senior leadership.

Figure 4: Member Status Report



SHS Member Status Report - All Programs - Case Manager(s): Michelle A Jungling - Program Statuses: Open, Pending - Date Opened to Program: - None - None

Quarterly reports include member satisfaction with the care management program, readmission rates and number of members enrolled in care management programs. This information is then analyzed and brought to the QIC and the Chief Medical Officer for discussion of the effectiveness of past initiatives and creation of any new processes needed to improve outcomes.

An example of the Care Management report is attached in **Attachment 115c_Care Management Report.**

A. Member and Provider Satisfaction
ii. Grievances

WellCare

Member Grievances Q2

Goals:

- Report the number, type, and resolution of member grievance
- Resolve 95% of grievances within compliance
- Identify trends or problem areas and implement activities to improve member satisfaction

Quarter	Grievances Received	Grievances Closed	% Closed within Compliance
Q2 2014	444	512	100%
Q3 2014	406	442	99.3%
Q4 2014	347	332	99%
Q1 2015	474	421	99%
Q2 2015	446	484	99%

A. Member and Provider Satisfaction
ii. Grievances

The top 3 member grievance category drivers for Q2 2015 were:

Category	Definition/Example
Billing/Claims (297)	Member's dissatisfaction with Par Providers billing for services not covered by the Plan
Physician (35)	Issues regarding rude treatment from the participating provider, specialist, and/or staff, appointment availability, difficulty obtaining medical records, etc.
Health Plan (48)	Member's dissatisfaction with the Plan's processes or the Plan's staff

Barriers include:

- Providers not reviewing eligibility
- Members providing incorrect insurance information or not providing insurance information to providers
- Members not reviewing their plan materials
- Inconsistent information given to members by the Plan

A. Member & Provider Satisfaction
ii. Grievances

WellCare

Provider Grievance Goals:

- Report the number, type, and resolution of provider grievances
- Resolve 95% of grievances within compliance
- Identify trends or problem areas and implement activities to improve provider satisfaction

Quarter	Provider Grievances Received
Q2 2014	2
Q3 2014	7
Q4 2014	2
Q1 2015	0
Q2 2015	2

B. Quality of Care Issues

Goals:

- Monitor the number of QOC cases received for investigation, cases resolved, and implemented provider corrective action.
- Monitor QOC cases by provider and diagnosis to identify trends and implement activities to decrease trends as appropriate.

Abstract

This section should be approximately 1-2 pages in length. The Abstract should be completed only for the Final Report.

[Provide an abstract of the PIP highlighting the project topic and objectives, briefly describe the methodology and interventions, and summarize results and major conclusions of the project.][2]

1. Project Topic / Rationale / Aims

[Provide title of the project; rationale for the project, aim(s), objective(s), study question(s), baseline and/or benchmark data, and goal for improvement.]

2. Methodology

[Describe the population, study indicators, sampling method, baseline and remeasurement periods, and data collection procedures.]

3. Interventions

[Describe the interventions and interventions target(s). This section may include interim results gleaned from using a PDSA method, if applicable.]

4. Results

[Specify number of cases in the project, baseline and remeasurement rates for project indicators, and statistical test results if applicable.]

5. Conclusions

[Address whether the project objectives were met, any corresponding explanations, a synthesis of the major project findings, any major project limitations, barriers, financial impact and next steps.]

[2] Delete instructions in brackets [ ] when fields are completed.

Project Topic

Provide a general description of the project topic that is clearly stated and relevant to the enrolled population.

1. Describe Project Topic

The project topic for this collaborative Performance Improvement Project (PIP), chosen by the Kentucky Department for Medicaid Services (DMS), is Antipsychotic Medication Use in Children and Adolescents. A recent national study, examining the relationship of mental health diagnosis and treatment with second generation antipsychotics over time in Medicaid-enrolled children, found a 62 percent increase from 2002 to 2007 in the prescribing of atypical antipsychotics.[1]

2. Rationale for Topic Selection

The project topic that DMS has chosen for this collaborative PIP is Antipsychotic Medication Use in Children and Adolescents. Recent studies suggest not only an increase in the frequency of prescribing antipsychotic medications in youth, but also an increase in duration of use.[2] One study, conducted by Cooper et al. (2006) reported an increase of antipsychotic prescriptions from 8.6 per 1,000 children in 1996 to 39.4 per 1,000 children in 2002.[3] Additionally, data collected in 2007 suggest that an average of 8.9 percent of youth, across 16 state Medicaid programs, were prescribed doses of antipsychotic medication exceeding the recommended doses, despite the lack of evidence suggesting that higher doses are associated with better response.[4,5]

According to a recent systematic review, conducted by Toteja et al. (2013), approximately 9.6 percent of youth were prescribed multiple concurrent antipsychotics even though evidenced-based practice guidelines caution against the use of multiple concurrent antipsychotics in children.[6,7,8] Evidence suggests that the use of antipsychotics in children can increase the child's risk for certain serious health complications, including weight gain, diabetes, liver toxicity, and cardiac arrhythmias, just to name a few.[9,10,11,12] As such, the American Academy of Child and Adolescent Psychiatry (AACAP) recommends psychosocial care as the first-line of treatment, prior to the initiation of an antipsychotic, particularly in the absence of an FDA indication for use of an antipsychotic.[13] Additionally, follow-up care is identified as one of the core principles of prescribing by the AACAP, including the development of a plan by the prescriber to monitor the patient, short and long term.[13] However, despite these evidence-based standards of care, one study indicated that nearly a third of Medicaid-enrolled children and youth, who were prescribed an antipsychotic, did not receive concurrent psychosocial therapy.[14]

Analysis of WellCare of Kentucky data for Calendar Year (CY) 2013 indicates that there were 214,906 Medicaid members, ages zero to seventeen. Of those members, 14.54 percent (n=31,256 of 214,906) had at least one behavioral health diagnosis, and 1.95 percent (n=4,188 of 214,906) had at least one prescription for an antipsychotic medication. Data within each of these categories is further stratified by age, sex, race, Medicaid Line of Business, and Region (Please see Table 1).

Table 1: 2013 Demographic Stratifications within Categories: Overall Medicaid Members Ages 0-17, Members with ≥ 1 Behavioral Health (BH) Diagnosis (Dx), Members with ≥ 1 Antipsychotic (AP) Prescription (Rx)

Stratified rates of Antipsychotic Use in proportion to the total overall Medicaid population, ages 0-17, are presented in Table 2. According to this data, antipsychotic medication use rates increased with age and male Medicaid recipients (ages 0-17) were more than twice as likely as female recipients to be prescribed an antipsychotic medication (2.61 percent vs. 1.24 percent). Antipsychotic use rates varied between races, with the largest proportion identified as "Unknown". Members enrolled in the KAB (Kentucky Aged, Blind, and Disabled) Medicaid Line of Business had the highest rate of use at 12.93 percent, followed closely by KHK foster care members at 12.47 percent, and lastly by traditional Medicaid recipients (KMD) with a 0.95 percent rate of use.

Regional rates varied among members, with members in Region Two representing the greatest proportion of members with an antipsychotic prescription, relative to the general overall population, at 3.03 percent. (Please see Appendix A for a complete listing of counties in each region and a corresponding map of Kentucky regions).

Table 2: 2013 Stratified Antipsychotic Use Rates in Proportion to the Overall Population

Prevalence rates for behavioral health (BH) diagnoses in proportion to the total overall Medicaid population, ages 0-17, are presented in Table 3. According to this data, rates of BH diagnosis increased with age and male Medicaid recipients (ages 0-17) were more likely than female recipients to receive at least one behavioral health diagnosis in 2013 (17.37 percent vs. 11.54 percent). Prevalence of BH diagnosis varied between races, with the largest proportion identified

as "Unknown". Members enrolled in the KAB (Kentucky Aged, Blind, and Disabled) Medicaid Line of Business had the highest rate of BH diagnosis at 48.73 percent, followed by KHK foster care members at 41.57 percent, and lastly by traditional Medicaid recipients (KMD) with an 11.61 percent rate of diagnosis. Regional rates varied among members, with members in Region Two representing the greatest proportion of members with a BH diagnosis, relative to the general overall population, at 16.34 percent. (Please see Appendix A for a complete listing of counties in each region and a corresponding map of Kentucky regions).

Table 3: 2013 Behavioral Health Diagnoses Prevalence Rates in Proportion to the Overall Population

WellCare of Kentucky further assessed data for 2013 for the prevalence of antipsychotic prescriptions amongst members who had a least one behavioral health diagnosis in the measurement year (Table 4). Additionally, data was assessed for the proportion of members who were prescribed an antipsychotic medication but did not have a behavioral health diagnosis in the same year. According to this data, there were 31,265 members, ages 0-17, who had at least one behavioral health diagnosis in 2013. Of those members, 3,997 (12.79 percent) were prescribed at least one antipsychotic medication in the same year. Conversely, there were 4,188 total members with at least one antipsychotic prescription in 2013. Of those members, 197 (4.56 percent) did not have a behavioral health diagnosis, according to claims data, at any time in the same year.

Table 4: Prevalence of Behavioral Health Diagnosis Among Members with an Antipsychotic Prescription

	Members 0-17 with BH Dx	%
Members with AP Rx	3997	12.79%
Members without AP Rx	27259	87.21%
Total	31265	100%
	Members 0-17 with AP Rx	%
Members with BH Dx	3997	95.44%
Members without BH Dx	197	4.56%
Total	4188	100%

WellCare of Kentucky conducted additional analysis of CY 2013 pharmacy data regarding prescriber practices. This data was based on paid claims for filled antipsychotic medication prescriptions in the CY for members, ages 0-17. Data was filtered, based on max fill date for prescriptions by members, associated with unique prescribers. Therefore, if the prescriber varied from month to month for a single medication per member, this was reflected in the data. Max fill date is defined as the most recent fill date for a unique Antipsychotic Medication in the CY. Data (Table 5) is stratified by Provider Type and Provider Specialty. Provider Types and Specialties were determined via the KY State File Roster of Providers.

Table 5: 2013 Prescriber Types and Specialties for Antipsychotic Medications for Members ages 0-17.

	Frequency of Prescriber Type/Specialty	%
Physician	**5294**	**78.01%**
Psychiatrist	2379	35.06%

3. Aim Statement, Objectives, Study Question and Goal

WellCare of Kentucky aims to improve safe and judicious antipsychotic use in children and adolescents.

This project is designed to answer the following questions:

- Do robust interventions aimed at improving Plan, provider, and member performance decrease the percentage of children and adolescents one to 17 years of age who were on two or more antipsychotic medications?
- Do robust interventions aimed at improving Plan, provider, and member performance increase the percentage of children and adolescents one to 17 years of age who had a new prescription for an antipsychotic medication and had documentation of psychosocial care as first-line treatment?
- Do robust interventions aimed at improving Plan, provider, and member performance increase the percentage of children and adolescents one to 17 years of age who had a new prescription for an antipsychotic medication and had metabolic monitoring?
- Do robust interventions aimed at improving Plan, provider, and member performance decrease the percentage of children and adolescents zero to 17 years of age who were on antipsychotic medication and who received two or more antipsychotic medication prescriptions with higher-than-recommended doses?
- Do robust interventions aimed at improving Plan, provider, and member performance increase the percentage of children and adolescents zero to 17 years of age who had a new prescription for an antipsychotic medication and had one or more follow-up visits with a prescriber?
- Do robust interventions aimed at improving Plan, provider, and member performance increase the percentage of children and adolescents zero to 17 years of age who had a new prescription for an antipsychotic medication and had baseline metabolic screening?

This project seeks to achieve the following objectives:

- Decrease HEDIS® rates for Use of Multiple Concurrent Antipsychotics in Children and Adolescents to 6.0 percent over a three year time period.
- Increase HEDIS® rates for Use of First-Line Psychosocial Care for Children and Adolescents on Antipsychotics to 48.2 percent over a three year period.
- Increase HEDIS® rates for Metabolic Monitoring for Children and Adolescents on Antipsychotics to 18.5 percent over a three year period.
- Decrease rates for Use of Higher-Than-Recommended Doses of Antipsychotics in Children and Adolescents to 7.9 percent over a three year time period.
- Increase rates for Follow-up Visit for Children and Adolescents on Antipsychotics to 72.8 percent over a three year period.
- Increase rates for Metabolic Screening for Children and Adolescents Newly on Antipsychotics to 6.0 percent over a three year period.

HEDIS® 2015 Technical Specifications will be used to measure baseline data for the following measures: Use of Multiple Concurrent Antipsychotics in Children and Adolescents (APC), Use of First-Line Psychosocial Care for Children and Adolescents on Antipsychotics (APP), and Metabolic Monitoring for Children and Adolescents on Antipsychotics (APM). Data for the following three measures will be collected according to the technical specifications outlined in the "Draft Document for HEDIS 2015 Public Comment": Use of Higher-Than-Recommended Doses of Antipsychotics in Children and Adolescents, Follow-up Visit for Children and Adolescents on Antipsychotics, Metabolic Screening for Children and Adolescents Newly on Antipsychotics. Performance targets for all measures were determined based on NCQA field testing data for each measure, and are detailed in the "Gaps in Care" sections for each Measure Work-Up, also included in the "Draft

Document for HEDIS 2015 Public Comment". Goals may be revised based on baseline rates so that meaningful improvement over baseline rates is targeted.

Methodology

The methodology section describes how the data for the project are obtained.

1. Performance Indicators

The following measures will be utilized to measure performance for this project:

1. Decrease HEDIS rate for Use of Multiple Concurrent Antipsychotics in Children and Adolescents (APC)

   Data for this measure will be collected according to HEDIS® 2015 Technical Specifications for *Use of Multiple Concurrent Antipsychotics in Children and Adolescents (APC)* (Appendix B) and will include the calculation of the following rate:

   The percentage of children and adolescents, 1-17 years of age who were on two or more concurrent antipsychotic medications.

2. Increase HEDIS rate for Use of First-Line Psychosocial Care for Children and Adolescents on Antipsychotics (APP)

   Data for this measure will be collected according to HEDIS® 2015 Technical Specifications for *Use of First-Line Psychosocial Care for Children and Adolescents on Antipsychotics (APP)* (Appendix B) and will include the calculation of the following rate:

   The percentage of children and adolescents 1-17 years of age who had a new prescription for an antipsychotic medication and had documentation of psychosocial care as first-line treatment.

3. Increase HEDIS rate for Metabolic Monitoring for Children and Adolescents on Antipsychotics (APM).

   Data for this measure will be collected according to HEDIS® 2015 Technical Specifications for *Metabolic Monitoring for Children and Adolescents on Antipsychotics (APM)* (Appendix B) and will include the calculation of the following rate:

   The percentage of children and adolescents 1-17 years of age who had two or more antipsychotic prescriptions and had metabolic testing.

   *Please see Appendix B for the complete HEDIS® 2015 Technical Specifications for these measures.

4. Decrease the rate for the Use of Higher-Than-Recommended Doses of Antipsychotics in Children and Adolescents, as defined by the "Draft Document for HEDIS 2015 Public Comment":

   Data for this measure will be collected according to the technical specifications outlined in the "Draft Document for HEDIS 2015 Public Comment" for *Use of Higher-Than-Recommended Doses of Antipsychotics in Children and Adolescents* (Appendix C) and will include the calculation of the following rate:

The percentage of children and adolescents 0-17 years of age who were on antipsychotic medication and who received two or more antipsychotic medication prescriptions with higher-than-recommended doses.

5. Increase the rate for Follow-up Visit for Children and Adolescents on Antipsychotics, as defined by the "Draft Document for HEDIS 2015 Public Comment":

   Data for this measure will be collected according to the technical specifications outlined in the "Draft Document for HEDIS 2015 Public Comment" for *Follow-up Visit for Children and Adolescents on Antipsychotics* (Appendix C) and will include the calculation of the following rate:

   The percentage of children and adolescents 0-17 years of age who had a new prescription for an antipsychotic medication and had one or more follow-up visits with a prescriber.

6. Increase the rate for Metabolic Screening for Children and Adolescents Newly on Antipsychotics, as defined by the "Draft Document for HEDIS 2015 Public Comment":

   Data for this measure will be collected according to the technical specifications outlined in the "Draft Document for HEDIS 2015 Public Comment" for *Metabolic Screening for Children and Adolescents Newly on Antipsychotics* (Appendix C) and will include the calculation of the following rate:

   The percentage of children and adolescents 0-17 years of age who had a new prescription for and antipsychotic medication and had baseline metabolic screening.

   *Please see Appendix C for the complete "Draft Document for HEDIS 2015 Public Comment" technical specifications for these measures.

Performance targets for all measures (Table 6) were determined based on NCQA field testing data for each measure, and are detailed in the "Gaps in Care" sections for each Measure Work-Up, also included in the "Draft Document for HEDIS 2015 Public Comment". Goals may be revised based on baseline rates so that meaningful improvement over baseline rates is targeted.

Table 6: Project Rates and Performance Targets

Performance Measure	Baseline Rate	Interim Rate	Final Rate	Performance Target
1. Use of Multiple Concurrent Antipsychotics in Children and Adolescents (APC)	1.31%			6.0%
2. Use of First-Line Psychosocial Care for Children and Adolescents on Antipsychotics (APP)	65.33%			48.2%
3. Metabolic Monitoring for Children and Adolescents on Antipsychotics (APM)	24.98%			18.5%
4. Use of Higher-Than-Recommended Doses of Antipsychotics in Children and Adolescents	22.79%			7.9%
5. Follow-up Visit for Children and Adolescents on Antipsychotics	78.28%			72.8%
6. Metabolic Screening for Children and Adolescents Newly on Antipsychotics	0.33%			6.0%

2. Procedures

All six performance measures are specified for administrative data collection. For Indicators 1-3, sampling methodology will be utilized as defined by HEDIS® Technical Specifications (Appendix B). HEDIS® results for these indicators (1-3) will be reviewed and audited by the Plan's contracted HEDIS® auditor.

Indicators 4-6 will be measured according to specifications outlined in the "Draft Document for HEDIS 2015 Public Comment" (Appendix C). Data will be extracted via administrative claims by the Plan's Medical Informatics Department.

3. Member Confidentiality

All HIPAA Confidentiality processes and procedures are in place and will be utilized to protect member confidentiality.

4. Timeline

Baseline Measurement Period: HEDIS 2015, CY 2014

Intervention Period: CY 2015

Interim Measurement Period: HEDIS 2016, CY 2015

Intervention Period: CY 2016

Final Measurement Period: HEDIS 2017, CY 2016

Interventions / Changes for Improvement

Interventions should be targeted to the study aim and should be reasonable and practical to implement given plan population and resources.

*Through the direction and collaboration with DMS, additional interventions will be identified once baseline rates have been assessed.

1. Barrier Analyses

Category of Barrier[1]	Target Group[2]	Description of Barrier	Method of Identification[3]
Lack of Provider knowledge of and access to clinical guidelines and treatment standards for the use of antipsychotics in children and adolescents	Providers	Providers lack knowledge of current guidelines and standards of care regarding the treatment of children and adolescents with antipsychotic medications.	Health Plan Focus Group convened to review Plan data, conduct barrier analysis, and develop associated interventions. Focus Group consisted of the following Plan staff members: Medical Director, Behavioral Health Medical Director, Senior Director of Behavior Health Product Operations, Pharmacy Director, Manager of Foster Care & Adoptions, QI Manager, and QI Project Manager.
Lack of effective coordination of care between Psychiatrists, General Practitioners and/or Pediatricians, and BH Clinicians.	Providers	Lack of coordination of care exists between Providers. According to the AACAP Practice Parameters for the use of atypical antipsychotics in children and adolescents, careful diagnostic assessment with attention to comorbid medical conditions in addition to the development of a *multi-disciplinary plan*, is recommended. It is necessary that all providers	Health Plan Focus Group and Literature Review. (Please see cited studies in corresponding intervention section.)

		involved in the member's care have timely and ongoing communication regarding the member's needs and progress, in addition to an awareness of each participant's role in the member's treatment.	
Lack of access to Psychiatrists.	Members and Providers	CMHCs report that psychiatrists are currently overburdened due to a shortage of psychiatric prescribers. CMHCs report that it may take longer than intended for members to get appointments with psychiatrists due to this shortage. Consequently, members are often seeking consultation with general practitioners/pediatricians as an alternative. While general practitioners/pediatricians might be in a position to perform brief initial screenings and ongoing metabolic monitoring, referrals should be made to psychiatric providers and clinicians for a thorough evaluation and ongoing psychosocial care.	Work Group meeting, involving leadership representatives from nine Community Mental Health Centers (CMHCs) located throughout the state of KY.
Lack of member and caregiver information regarding safe use of antipsychotic medications and appropriate assessment and treatment of children's behavioral/emotional problems	Members	Members and caregivers often lack current information about psychotropic medications and appropriate assessment and treatment of children's behavioral/emotional problems. Lack of information and knowledge on the part of members and caregivers can result in a decreased ability to actively participate in decision-making regarding the child's treatment and plan of care.	Focus Group convened to review Plan data, conduct barrier analysis, and develop associated interventions. Focus Group consisted of the following Plan staff members: Medical Director, Behavioral Health Medical Director, Senior Director of Behavior Health Product Operations, Pharmacy Director, Manager of Foster Care & Adoptions, QI Manager, and QI

			Project Manager.
Lack of Plan processes to identify and address safety concerns regarding antipsychotic medication use in children and adolescents	Health Plan	The Health Plan lacks current tracking systems for identification of safety issues, including prescribing patterns, regarding antipsychotic medication use in children and adolescents.	Focus Group convened to review Plan data, conduct barrier analysis, and develop associated interventions. Focus Group consisted of the following Plan staff members: Medical Director, Behavioral Health Medical Director, Senior Director of Behavior Health Product Operations, Pharmacy Director, Manager of Foster Care & Adoptions, QI Manager, and QI Project Manager.

[1] Lack of knowledge, Lack of Access, Lack of Time, etc.
[2] Provider barrier, member barrier, health plan barrier, etc.
[3] How the barrier was identified: focus group, interview, provider or member committee, observation, etc.

2. Interventions Planned and Implemented

Complete the sections in the table below, and add more rows as needed.

Timeframe	Description of intervention	Target Group	Barriers addressed	Status (as of 9/1/15)
First Quarter 2015	The Plan will develop a Clinical Practice Guideline (CPG) for use of atypical antipsychotics in children and adolescents. The CPG will be based on the Practice Parameter for the use of Atypical Antipsychotic Medications in Children and Adolescents, developed by the American Academy of Child and Adolescent Psychiatry (AACAP) and will be made available to providers as a resource via the Plan's Provider Website. In a 2011 9-State Study conducted by the Medicaid Medical Directors Learning	Providers	Lack of Provider knowledge of and access to clinical guidelines and treatment standards for the use of antipsychotics in children and adolescents	Modified and Implemented—In development

	Network (MMDLN), states that published guidelines on safe dosing of AP medications reported improvements in rates from a prior 16-State Study, published in 2010.[15] The AACAP Practice Parameter details 38 comprehensive recommendations regarding the use of atypical AP use in children and adolescents.			
First Quarter 2015	A comprehensive "Assessment, Screening, and Monitoring Tool", based upon recommendations included in the AACAP Practice Parameters, will be developed by The Health Plan. This tool will be made available to providers as a resource via the Plan's Provider Website. In a study published in 2011 in the Journal of the Canadian Academy of Child and Adolescent Psychiatry, community and hospital-based healthcare professionals were surveyed about the barriers associated with metabolic monitoring for youth treated with second-generation atypical antipsychotics.[16] Results from that study, based on reports from both mental health and medical providers indicated that staff were uncertain about team members' responsibility in metabolic monitoring, had limited access to appropriate equipment/tools, and low confidence in interpreting results. Based on these findings, the authors	Providers	Lack of effective coordination of care between Psychiatrists, General Practitioners and/or Pediatricians, and BH Clinicians.	Implemented

	developed a "Metabolic Monitoring Tool" to aid providers with overcoming these barriers. WellCare of Kentucky is proposing to develop a more comprehensive tool to not only include metabolic screenings, but also to assist with other important practice parameters related to overall coordination of care for the member.			
Second Quarter 2015 through Fourth Quarter 2015	Informational/educational mailings will be targeted to Providers/Prescribers. Individual providers will be identified for the mailings based on data indicating that a new prescription for an antipsychotic medication for a child, aged 0-17, was filled in the previous month. Mailings will include information on how to access the AACAP Practice Parameters via the Plan's website, in addition to the "Assessment, Screening, and Monitoring Tool". In a 2011 9-State Study conducted by the Medicaid Medical Directors Learning Network (MMDLN), states that implemented mailings and reports to providers experienced some improvement in trends relating to AP use in children.	Providers	Lack of Provider knowledge of and access to clinical guidelines and treatment standards for the use of antipsychotics in children and adolescents	Implemented—Modified to include all prescribers regardless of provider specialty type.
Second Quarter 2015	An informational/educational article for members and caregivers regarding appropriate assessment, treatment, and follow-up care for children's emotional and behavioral	Members	Lack of member and caregiver information regarding safe use of antipsychotic medications and appropriate assessment and treatment of children's behavioral	Implemented

	issues will be made available as a resource via the Plan's member newsletter. A 2010 study, conducted by Tufts Clinical And Translational Science Institute examined the status of policies and guidelines for psychotropic medication oversight across 47 states.[17] One challenge identified by states in this study was related to the involvement of parents and youth in treatment decision-making. In order to address this issue, certain states "provided ongoing information to youth and families about diagnoses, effective treatment options, and managing care throughout life", in order to aid in their ability to more actively participate in the child's treatment. WellCare of Kentucky is proposing education targeted to members and caregivers not only via the newsletter but also in form of targeted mailings, as described in the intervention below.		and emotional problems.	
Second Quarter 2015 through Fourth Quarter 2015	Informational/educational mailings will be targeted to households of members, ages 0-17, identified as "newly prescribed" an antipsychotic medication in the previous month. Members will be identified as "newly" prescribed an antipsychotic if there was at least a 120-day (4-month) negative AP medication history prior to the AP prescription fill date. The mailings will	Members	Lack of member/parent/guardian information regarding safe use of antipsychotic medications and appropriate assessment and treatment of children's behavioral and emotional problems	Implemented

	include information regarding appropriate assessment, treatment, and follow-up care for children taking antipsychotic medications.			
First Quarter 2015 through Fourth Quarter 2015	The Plan will collect/review data on a monthly basis regarding prescribing practices for AP medications in children ages 0-17. The Plan will assess frequency of prescribing by Provider Type/Specialty and will monitor outliers, such as prescriptions to children ages 5 and under, in prescribing patterns. Data will be presented quarterly to a work group, comprised of Plan staff, and interventions will be determined as needed. When outliers are identified, information will be forwarded to the Plan's Quality of Care (QOC) Department for further review by the QOC Nurse and the Behavioral Health Medical Director, as necessary. Multiple studies, including the MMDLN 16-state (2010) and 9-state (2011) studies, as wells as the 47-state Tufts Study (2010), examined the use of "red flag" monitoring systems, implemented by states, to assess "outliers" related to AP Prescribing patterns and use among children and adolescents. WellCare of Kentucky proposes to implement a system of reviewing and responding to such outliers upon further, careful review of Plan	Health Plan	Lack of Plan processes to identify and address safety concerns regarding antipsychotic medication use in children and adolescents	Implemented

	data, including data related to performance measures for this project.			
First Quarter 2015--Review	The Plan is currently continuing to assess this identified barrier, related to current shortages of psychiatrists in Kentucky. The Plan will evaluate current resources in order to identify potential interventions, such as the ability to provide psychiatric consultations or second opinions to general practitioners/pediatricians when needed regarding screening, diagnosis, referral, and treatment options (including medication management). According to the 16-state MMDLN study (2010), states such as Massachusetts and Washington, implemented programs to provide telephonic consultations and support to pediatricians by specialists in child psychiatry. In the MMDLN subsequent 9-state follow-up study (2011), it is reported that states who implemented these programs saw as much as a 60% decrease in rates relating to AP use in children. Additionally, according to the Tufts (2010) multi-state study, some other states developed tele-psychiatry programs to address shortages of specialists in rural areas. WellCare of Kentucky is proposing to evaluate Plan resources and feasibility for implementation of	Members and Providers	Lack of access to Psychiatrists.	Reviewed and not approved for implementation at this time.

	similar programs.			
First Quarter 2015--Review	The Plan is currently evaluating additional potential interventions aimed at improving Provider education, such as the ability/resources to coordinate an educational conference/summit regarding best practices related to screening, assessment, diagnosis, and treatment of behavioral health disorders in children. A series of eight webinars, made possible by the Center for Health Care Strategies (June 2013 to October 2014), were presented on the topics of Psychotropic Medications and Foster Care.[18] Although the webinars had a strong tailoring toward the foster-care sub-populations with regard to overall psychotropic medication use, certain practices and recommendations are applicable to any Medicaid-eligible population of youth being treated with psychotropic medications. Webinars included Red Flag and Response Systems; Telephonic Consultation Models; Improving Psychotropic Medication Oversight; Facilitating Cross-System Data Sharing; Trauma-informed Screening, Assessment, and Treatment for Children and Youth in Child Welfare Systems; Use & Financing of Non-Pharmacologic Evidenced-based Practices as Alternatives to	Providers	Lack of Provider knowledge of and access to clinical guidelines and treatment standards for the use of antipsychotics in children and adolescents	Reviewed and not approved for implementation at this time

	Psychotropic Medications; Quality of Care Measures; and Models of Agency Consent. While the details and recommendations outlined in each webinar are too numerous to account here, WellCare of Kentucky would like to examine the feasibility of implementing a similar compendium of educational resources for Providers and other Health Care Professionals in the state of Kentucky.			

3. Process Measures

Intervention Name/Description	Related Process Measure
Informational/educational mailings will be targeted to Prescribers/Providers on a monthly basis. Individual providers will be identified for the mailings based on data indicating that a new prescription for an antipsychotic medication for a child, aged 0-17, was filled in the previous month. Mailings will include information on how to access the AACAP Practice Parameters via the Plan's website, in addition to the "Assessment, Screening, and Monitoring Tool".	The Plan will track the total number of Providers identified for mailings each month and the total number of Providers outreached via mailing each month, as well as total # of returned mailings due to incorrect provider addresses each month.
Informational/educational mailings will be targeted to households of members, ages 0-17, identified as "newly prescribed" an antipsychotic medication in the previous month. Members will be identified as "newly" prescribed an antipsychotic if there was at least a 120-day (4-month) negative AP medication history prior to the AP prescription fill date. The mailings will include information regarding appropriate assessment, treatment, and follow-up care for children taking antipsychotic medications.	The Plan will track the total number of member households identified for mailings each month and the total number of member households outreached via mailing each month, as well as total # of returned mailings due to incorrect member addresses each month.
The Plan will collect/review data on a monthly basis regarding prescribing practices for AP medications in children ages 0-17. The Plan will assess frequency of prescribing by Provider Type and will monitor outliers, such as prescriptions to children under age 5, in prescribing patterns. Data will be presented quarterly to a work group, comprised of Plan staff, and interventions will be determined as	The Plan will collect data on the following: Total number of AP Prescriptions filled each month, including Member name, DOB, demographics (address, region, LOB, race, sex), AP Prescription Name, AP Class, AP Dose, AP fill date, Prescriber name, Prescriber Type and Specialty, Prescriber Address/Contact Information.

needed. When outliers are identified, information will be forwarded to the Plan's Quality of Care (QOC) Department for further review by the QOC Nurse and the Behavioral Health Medical Director, as necessary.	Outliers may be determined based on the following, and may be modified as needed pending further evaluation of Plan data: AP Prescriptions for Members ages 0-5 and AP Prescriptions by non-psychiatric provider types. The Plan will track the following regarding QOC referrals: Total number of outliers Identified, reasons identified as outliers (see above), total number of cases referred to QOC for review, and QOC review dispositions.

4. PDSA (Plan-Do-Study-Act) Project Phases

[If a PDSA method was performed, provide information regarding the interim phases of the project; i.e., (1) the objective and plan to test for change, (2) the action carried out (including documenting problems or unexpected observations), (3) the results or knowledge gained, and (4) the actions that were taken as a result of the cycle (e.g., modifications made based on what was learned). Discuss any changes or tailoring of interventions and rationale for doing so. Process measures that led to modifications in your interventions should be presented here.]

1. **Objective/Plan**

2. **Action**

3. **Results**

4. **Modified Actions and Rationale**

Results

The results section should quantify project findings related to each study question and project indicators. **Do not** interpret the results in this section.

Analysis of WellCare of Kentucky data for Calendar Year (CY) 2014 indicates that there were 219,691 Medicaid members, ages zero to seventeen. Of those members, 15.74 percent (n=34,571of 219,691) had at least one behavioral health diagnosis, and 1.60 percent (n=3,522 of 219,691) had at least one prescription for an antipsychotic medication. Data within each of these categories is further stratified by age, sex, race, Medicaid Line of Business, and Region (Please see Table 1).

WellCare of Kentucky further assessed data for 2014 for the prevalence of antipsychotic prescriptions amongst members who had a least one behavioral health diagnosis in the measurement year (Table 4). Additionally, data was assessed for the proportion of members who were prescribed an antipsychotic medication but did not have a behavioral health diagnosis in the same year.

Table 4: 2014 Prevalence of Behavioral Health Diagnosis Among Members with an Antipsychotic Prescription

	Members 0-17 with BH Dx	%
Members with AP Rx	3444	9.96%
Members without AP Rx	31127	90.04%
Total	34571	100%
	Members 0-17 with AP Rx	%
Members with BH Dx	3444	97.79%
Members without BH Dx	78	2.21%
Total	3522	100%

WellCare of Kentucky conducted additional analysis of CY 2014 pharmacy data regarding prescriber practices. This data was based on paid claims for filled antipsychotic medication prescriptions in the CY for members, ages 0-17. Data was filtered, based on max fill date for prescriptions by members, associated with unique prescribers. Therefore, if the prescriber varied from month to month for a single medication per member, this was reflected in the data. Max fill date is defined as the most recent fill date for a unique Antipsychotic Medication in the CY. Data (Table 5) is stratified by Provider Type and Provider Specialty. Provider Types and Specialties were determined via the KY State File Roster of Providers.

Table 5: 2014 Prescriber Types and Specialties for Antipsychotic Medications for Members ages 0-17.

Discussion

The discussion section is for explanation and interpretation of the results.

1. Discussion of Results

Analysis of WellCare of Kentucky data for CY 2014 indicates that there were 219,691 Medicaid members, ages zero to seventeen. Of those members, 15.74 percent had at least one behavioral health diagnosis, and 1.60 percent filled at least one prescription for an antipsychotic medication. For all pediatric members with a behavioral health diagnosis (n=34,571), 9.96 percent were treated with at least one antipsychotic medication in the same year. Data further indicate that of the 3,522 pediatric members with at least one antipsychotic prescription, 97.79% also had a corresponding behavioral health diagnosis; 2.21 percent did not.

According to this data, rates of BH diagnosis increased with age and male Medicaid recipients (ages 0-17) were more likely than female recipients to receive at least one behavioral health diagnosis in 2014 (18.66 percent vs. 12.65 percent). Prevalence of BH diagnosis varied between races, with the largest proportion identified as "Unknown". Members enrolled in the KAB (Kentucky Aged, Blind, and Disabled) Medicaid Line of Business (LOB) had the highest rate of BH diagnosis at 52.67 percent, followed by KHK foster care members at 45.84 percent, and lastly by traditional Medicaid recipients (KMD) with a 12.79 percent rate of diagnosis. Regional rates varied among members, with members in Region Two representing the greatest proportion of members with a BH diagnosis, relative to the general overall population, at 17.61 percent.

Further analysis of CY 2014 data indicate that antipsychotic medication use rates increased with age and male Medicaid recipients (ages 0-17) were nearly twice as likely as female recipients to be prescribed an antipsychotic medication (2.09 percent vs. 1.09 percent). Antipsychotic use rates varied between races, with the largest proportion identified as "Unknown". Members enrolled in the KHK (foster care) Medicaid Line of Business had the highest rate of use at 11.91 percent, followed closely by KAB (Kentucky Aged, Blind, or Disabled) members at 11.63 percent, and lastly by traditional Medicaid recipients (KMD) with a 0.74 percent rate of use. Regional rates varied among members, with members in Region Two representing the greatest proportion of members with an antipsychotic prescription, relative to the general overall population, at 2.46 percent.

WellCare of Kentucky conducted additional analysis of CY 2014 pharmacy data to evaluate trends in prescriber practices for pediatric antipsychotic prescriptions. According to this data, 77.47 percent of prescriptions were written by a physician, 20.93 percent were written by an advanced registered nurse practitioner, and 1.60 percent by a physician assistant. Of the 8,437 antipsychotic prescriptions included in this data, 36.04% were written by a psychiatrist and 0.53 percent by a psychiatric nurse practitioner. All other prescriptions for a pediatric antipsychotic medication were written by a non-psychiatric provider specialty type at 63.42%.

Baseline data were collected and evaluated for six performance measures for this project. HEDIS 2015 data indicate that 1.31 percent of members, ages 1-17, received two or more concurrent antipsychotic medications. This rate exceeded the initial goal rate of 6.0 percent, since a lower rate indicates better performance for this measure.

HEDIS 2015 data indicate that 65.33 percent of pediatric members, ages 1-17, who had a new prescription for an antipsychotic medication also had documentation of psychosocial care as first-line treatment. This rate also exceeded the initial performance target of 48.2 percent.

HEDIS 2015 data further indicate that 24.98 percent of members, ages 1-17, who had two or more antipsychotic prescriptions, also received metabolic testing during the measurement year. This rate exceeded the initial goal rate of 18.5 percent.

Administrative claims data for CY 2014, collected according to the specifications outlined in the "Draft Document for HEDIS 2015 Public Comment, were evaluated for the final three performance measures for this project. This data indicated a baseline rate of 22.79 percent for pediatric members, ages 0-17, who were on antipsychotic medication and who received two or more antipsychotic prescriptions with higher-than-recommended doses. This rate did not meet the initial goal rate of 7.9 percent, since a lower rate indicated better performance for this measure.

Baseline data for CY 2014 also indicate that 75.28 percent of members, ages 0-17, who had a new prescription for an antipsychotic medication, also had one or more follow up visits with a prescriber within thirty days following the index prescription start date. This rate exceeded the initial goal rate of 72.8 percent.

Lastly, baseline data for CY 2014 indicate that 0.33 percent of members, ages 0-17, who had a new prescription for an antipsychotic medication, also had a baseline metabolic screening within ninety days prior to the prescription start date to fifteen days after the prescription start date. This rate did not meet the initial goal rate of 6.0%.

The Plan has begun implementation of several interventions associated with this project, aimed at improving the care of pediatric members being treated with antipsychotic medications. The Plan began development of a Clinical Practice Guideline (CPG) for use of atypical antipsychotics in children and adolescents. The CPG is based on the Practice Parameter for the use of Atypical Antipsychotic Medications in Children and Adolescents, developed by the American Academy of Child and Adolescent Psychiatry (AACAP) and will be made available to providers as a resource. The CPG is currently in draft form and is pending approval by the Plan's Medical Policy Committee (MPC), the Plan's Pharmacy Committee, and the Utilization Management Committee (UMAC).

The Plan also developed a comprehensive "Assessment, Screening, and Monitoring Tool", based upon recommendations included in the AACAP Practice Parameter. This tool has been made available to providers as a resource via the Plan's provider website.

The Plan initiated informational/educational mailings in the second quarter 2015 to households of members, ages 0-17, identified as newly prescribed an antipsychotic medication. The mailings include information regarding appropriate assessment, treatment, and follow-up care for children taking an antipsychotic (please see Appendix D for the letter template). The Plan will report the number of member mailings generated in CY 2015 in the interim report for this project.

The Plan initiated informational/educational mailing to providers in the third quarter 2015. These mailings are targeted to providers based on data indicating that a new prescription for an antipsychotic medication was initiated in the previous month for a pediatric member (please see Appendix E for the letter template). The Plan will report the number of provider mailings generated in CY 2015 in the interim report for this project.

The Plan began collecting and reviewing monthly data in the first quarter 2015 regarding prescribing practices for pediatric antipsychotic prescriptions. The Plan assesses the frequency of prescriptions by provider types and monitors outliers, such as prescriptions to children, ages five and under. As outliers are identified, information is then forwarded to the Plan's Quality of Care (QOC) department for further review by the QOC nurse and the Plan's Behavioral Medical Director. The Plan will report these metrics for CY 2015 in the interim report for this project.

2. Limitations

No limitations have been identified at this time.

3. Member Participation

All pediatric members, ages zero to seventeen, who were treated with an antipsychotic medication during the measurement year, were eligible for interventions associated with this project.

4. Financial Impact

Financial impact is undetermined at this time.

Next Steps

In this final section, discuss ideas for taking your project experience and findings to the next step.

1. Lessons Learned

[Describe what was learned from the project, topics/areas for further study, and whether findings can be extrapolated to other members or systems.]

2. Dissemination of Findings

[Address how the results and conclusions have been/will be made available to members, providers or other interested parties and the methods used to make the findings available, such as via the member/provider newsletters, meetings/presentations, and/or website posting. Identify future goals for disseminating the project's key findings and lessons learned.]

3. System-level Changes Made and/or Planned

[Describe how the findings will be used, actions that will be taken to sustain improvement, and plans to spread successful interventions to other organizational processes, as applicable.]

Appendix B: HEDIS® 2015 Technical Specifications for Safe and Judicious Antipsychotic Use in Children and Adolescents

Use of Multiple Concurrent Antipsychotics in Children and Adolescents (APC)

SUMMARY OF CHANGES TO HEDIS 2015

First-year measure.

Description

The percentage of children and adolescents 1–17 years of age who were on two or more concurrent antipsychotic medications.

Note: *A lower rate indicates better performance.*

Eligible Population

Product lines	Commercial, Medicaid (report each product line separately).
Ages	1–17 years as of December 31 of the measurement year. Report three age stratifications and a total rate: 1–5 years. 6–11 years. 12–17 years. Total. The total is the sum of the age stratifications.
Continuous enrollment	The measurement year.
Allowable gap	No more than one gap in continuous enrollment of up to 45 days during the measurement year. To determine continuous enrollment for a Medicaid beneficiary for whom enrollment is verified monthly, the member may not have more than a 1-month gap in coverage (i.e., a member whose coverage lapses for 2 months [60 days] is not considered continuously enrolled).
Anchor date	December 31 of the measurement year.
Benefit	Medical and pharmacy.
Event/diagnosis	Members with 90 days of continuous antipsychotic medication treatment during the measurement year. Use the steps below to determine the eligible population.
Step 1	Identify members in the specified age range who were dispensed an antipsychotic medication (Table APC-A) during the measurement year.
Step 2	Calculate continuous enrollment. The member must be continuously enrolled during the measurement year.
Step 3	For each member, identify all antipsychotic medication dispensing events (prescriptions) during the measurement year.

Step 4 Identify start and end dates for drug events. Drug events are defined separately by drug using the Drug ID field in the NDC list.

For each drug ID, sort dispensing events chronologically by dispense date. If there is more than one prescription for the same medication dispensed on the same day, use only the prescription with the longest days supply in the calculation.

Starting with the first prescription in the measurement year determine if there is a second dispense date with the same Drug ID.

If there is no second dispensing event with the same Drug ID, the start date is the first prescription's dispense date and the end date is the start date plus the days supply minus one. For example, a January 1 prescription with a 30 days supply has an end date of January 30.

If there is a second dispensing event with the same Drug ID, determine if there are gap days (a 32-day gap is allowed). Calculate the number of days between (but not including) the first prescription's dispense date and the second prescription's dispense date. If the number of days is less than or equal to the first prescription's days supply plus 32 days, the gap is less than or equal to 32 days and is allowed. The start date is the first prescription's dispense date and the end date is the second prescription's dispense date plus days supply minus one. Continue assessing all subsequent dispensing events with allowable gaps for the same Drug ID and adjust end dates as needed.

For example, a member has two dispensing events with the same Drug ID. The first is on July 1, with a 30 days supply. The second is on September 1, with a 30 days supply. The number of days between (but not including) the dispense dates is 61 (July 2–August 31).The gap is allowed because 61 is less than the first prescription's days supply plus 32 days (30 + 32 = 62). The start date is July 1 and the end date is September 30.

If there is a second dispensing event with the same Drug ID and there is a gap that exceeds the allowable gap, assign an end date for this drug event and follow the beginning of step 4 for the remaining dispensing events. A member can have multiple start and end dates per Drug ID during the measurement year.

Continue assessing each dispensed prescription for each Drug ID until all dispensing events are exhausted. If a dispensing event goes beyond December 31 of the measurement year, assign the end date as December 31.

Step 5 For each member, identify those with ≥90 consecutive treatment days.

For each member, using the start and end dates from all drug events identified in step 4 (which may include events for the same or different medications and may include events with allowable gaps), determine all calendar days covered by at least one antipsychotic medication. If there were ≥90 consecutive calendar days, include the member in the measure.

Table APC-A. Antipsychotic Medications

Description	Prescription		
First Generation Antipsychotic Medications	Chlorpromazine HCL Fluphenazine HCL Fluphenazine decanoate Fluphenazine enanthate Haloperidol Haloperidol decanoate	Haloperidol lactate Loxapine HCL Loxapine succinate Molindone HCL Perphenazine Pimozide	Promazine HCL Thioridazine HCL Thiothixene Thiothixene HCL Trifluoperazine HCL • Triflupromazine HCL
Second Generation Antipsychotic Medications	Aripiprazole Clozapine Iloperidone Olanzapine	Olanzapine pamoate Paliperidone Paliperidone palmitate Quetiapine fumarate	Risperidone Risperidone microspheres Ziprasidone HCL Ziprasidone mesylate

Note: *NCQA will post a comprehensive list of medications and NDC codes to www.ncqa.org by November 3, 2014.*

Administrative Specification

Denominator The eligible population.

Numerator Members on two or more concurrent antipsychotic medications for at least 90 consecutive days during the measurement year. Use the steps below to determine the numerator.

Step 1 For each member, by Drug ID, identify all drug events, start dates and end dates (identified in step 4 of the event/diagnosis criteria used to identify the eligible population [denominator]).

Step 2 Identify concurrent antipsychotic medication treatment events as follows.

For each member, identify the first day during the measurement year where the member was being treated with two or more different antipsychotic medications (use the Drug ID to identify different drugs); this is the concurrent antipsychotic medication treatment event start date.

Beginning with (and including) the start date, identify the number of consecutive days where the member remains on two or more different antipsychotic medications. If the number of days ≥90 days, the member is numerator compliant.

If the number of consecutive days on multiple antipsychotic medications is <90 days, identify the end date and identify the next day during the measurement year where the member was being treated with two or more different antipsychotic medications. If the number of days between the end date and the next start date is ≤15 days, include the days in the concurrent antipsychotic medication treatment event (*concurrent antipsychotic medication treatment events* allow for a 15-day gap).

If the number of days between the end date and the next start date exceeds 15 days, end the event; using the new start date, continue to assess for concurrent antipsychotic medication treatment events.

Continue this process until the number of concurrent antipsychotic medication treatment days is ≥90 consecutive days (i.e., the member is numerator compliant) or until the measurement year is exhausted (i.e., no concurrent antipsychotic medication treatment events were identified during the measurement year).

Data Elements for Reporting

Organizations that submit HEDIS data to NCQA must provide the following data elements.

Table APC-1/2: Data Elements for Use of Multiple Concurrent Antipsychotics in Children and Adolescents

	Administrative
Measurement year	✓
Data collection methodology (Administrative)	✓
Eligible population	For each age stratification and total
Numerator events by administrative data	For each age stratification and total
Reported rate	For each age stratification and total
Lower 95% confidence interval	For each age stratification and total
Upper 95% confidence interval	For each age stratification and total

Use of First-Line Psychosocial Care for Children and Adolescents on Antipsychotics (APP)

SUMMARY OF CHANGES TO HEDIS 2015

First-year measure.

Description

The percentage of children and adolescents 1–17 years of age who had a new prescription for an antipsychotic medication and had documentation of psychosocial care as first-line treatment.

Definitions

Intake Period	January 1 through December 1 of the measurement year.
IPSD	Index Prescription Start Date. The earliest prescription dispensing date for an antipsychotic medication where the date is in the Intake Period and there is a Negative Medication History.
Negative Medication History	A period of 120 days (4 months) prior to the IPSD when the member had no antipsychotic medications dispensed for either new or refill prescriptions.

Eligible Population

Product lines	Commercial, Medicaid (report each product line separately).
Ages	1–17 years as of December 31 of the measurement year. Report three age stratifications and a total rate: 1–5 years. 6–11 years. 12–17 years. Total. The total is the sum of the age stratifications.
Continuous enrollment	120 days (4 months) prior to the IPSD through 30 days after the IPSD.
Allowable gap	None.
Anchor date	IPSD.
Benefit	Medical, mental health, pharmacy.
Event	Follow the steps below to identify the eligible population.
Step 1	Identify all members in the specified age range who were dispensed an antipsychotic medication (Table APP–A) during the Intake Period.
Step 2	Test for Negative Medication History. For each member identified in step 1, test each antipsychotic prescription for a Negative Medication History. The IPSD is the dispensing date of the earliest antipsychotic prescription in the Intake Period with a Negative Medication History.

Step 3 Calculate continuous enrollment. Members must be continuously enrolled for 120 days (4 months) prior to the IPSD through 30 days after the IPSD.

Step 4: Required exclusions Exclude members for whom first-line antipsychotic medications may be clinically appropriate. Any of the following during the measurement year meet criteria:

At least one acute inpatient encounter with a diagnosis of schizophrenia, bipolar disorder or other psychotic disorder during the measurement year. Any of the following code combinations meet criteria:

BH Stand Alone Acute Inpatient Value Set ***with*** Schizophrenia Value Set.

BH Stand Alone Acute Inpatient Value Set ***with*** Bipolar Disorder Value Set.

BH Stand Alone Acute Inpatient Value Set ***with*** Other Psychotic Disorders Value Set.

BH Acute Inpatient Value Set ***with*** BH Acute Inpatient POS Value Set ***and*** Schizophrenia Value Set.

BH Acute Inpatient Value Set ***with*** BH Acute Inpatient POS Value Set ***and*** Bipolar Disorder Value Set.

BH Acute Inpatient Value Set ***with*** BH Acute Inpatient POS Value Set ***and*** Other Psychotic Disorders Value Set.

At least two visits in an outpatient, intensive outpatient or partial hospitalization setting, on different dates of service, with a diagnosis of schizophrenia, bipolar disorder or other psychotic disorder during the measurement year. Any of the following code combinations meet criteria:

BH Stand Alone Outpatient/PH/IOP Value Set ***with*** Schizophrenia Value Set.

BH Outpatient/PH/IOP Value Set ***with*** BH Outpatient/PH/IOP POS Value Set ***and*** Schizophrenia Value Set.

BH Stand Alone Outpatient/PH/IOP Value Set ***with*** Bipolar Disorder Value Set.

BH Outpatient/PH/IOP Value Set ***with*** BH Outpatient/PH/IOP POS Value Set ***and*** Bipolar Disorder Value Set.

BH Stand Alone Outpatient/PH/IOP Value Set ***with*** Other Psychotic Disorders Value Set.

BH Outpatient/PH/IOP Value Set ***with*** BH Outpatient/PH/IOP POS Value Set ***and*** Other Psychotic Disorders Value Set.

Table APP-A. Antipsychotic Medications

Description	Prescription		
First-generation antipsychotic medications	Chlorpromazine HCL	Molindone HCL	Promazine HCL
	Fluphenazine HCL	Perphenazine	Thioridazine HCL
	Fluphenazine decanoate	Pimozide	Thiothixene
	Fluphenazine enanthate	Haloperidol lactate	Thiothixene HCL
	Haloperidol	Loxapine HCL	Trifluoperazine HCL
	Haloperidol decanoate	Loxapine succinate	Trifluprom azine HCL
Second-generation antipsychotic medications	Aripiprazole	Olanzapine pamoate	Risperidone
	Clozapine	Paliperidone	Risperidone microspheres
	Iloperidone	Paliperidone palmitate	Ziprasidone HCL
	Olanzapine	Quetiapine fumarate	Ziprasidone mesylate
Combinations	Olanzapine-fluoxetine HCL (Symbyax)	Perphenazine-amitriptyline HCL (Etrafon, Triavil [various])	

Note: *NCQA will post a comprehensive list of medications and NDC codes to www.ncqa.org by November 3, 2014.*

Administrative Specification

Denominator The eligible population.

Numerator Documentation of psychosocial care (Psychosocial Care Value Set) in the 121-day period from 90 days prior to the IPSD through 30 days after the IPSD.

Data Elements for Reporting

Organizations that submit HEDIS data to NCQA must provide the following data elements.

Table APP-1/2: Data Elements Access to Psychosocial Care for Children and Adolescents on Antipsychotics

	Administrative
Measurement year	✓
Data collection methodology (Administrative)	✓
Eligible population	For each age stratification and total
Number of required exclusions	For each age stratification and total
Numerator events by administrative data	For each age stratification and total

Upper 95% confidence interval	For each age stratification and total

Metabolic Monitoring for Children and Adolescents on Antipsychotics (APM)

SUMMARY OF CHANGES TO HEDIS 2015

First-year measure.

Description

The percentage of children and adolescents 1–17 years of age who had two or more antipsychotic prescriptions and had metabolic testing.

Eligible Population

Product lines	Commercial, Medicaid (report each product line separately).
Ages	1–17 years as of December 31 of the measurement year. Report three age stratifications and a total rate: 1–5 years. 6–11 years. 12–17 years. Total. The total is the sum of the age stratifications.
Continuous enrollment	The measurement year.
Allowable gap	No more than one gap in enrollment of up to 45 days during the measurement year.
Anchor date	December 31 of the measurement year.
Benefit	Medical and pharmacy.
Event/diagnosis	At least two antipsychotic medication dispensing events (Table APM-A) of the same or different medications, on different dates of service during the measurement year.

Table APM-A. Antipsychotic Medications

Description	Prescription		
First-generation antipsychotic medications	Chlorpromazine HCL Fluphenazine HCL Fluphenazine decanoate Fluphenazine enanthate Haloperidol Haloperidol decanoate	Haloperidol lactate Loxapine HCL Loxapine succinate Molindone HCL Perphenazine Pimozide	Promazine HCL Thioridazine HCL Thiothixene Thiothixene HCL Trifluoperazine HCL Triflupromazine HCL
Second generation antipsychotic medications	Aripiprazole Clozapine Iloperidone Olanzapine	Olanzapine pamoate Paliperidone Paliperidone palmitate Quetiapine fumarate	Risperidone Risperidone microspheres Ziprasidone HCL Ziprasidone mesylate
Combinations	Olanzapine-fluoxetine HCL (Symbyax)	Perphenazine-amitriptyline HCL (Etrafon, Triavil [various])	

Note: *NCQA will post a comprehensive list of medications and NDC codes to www.ncqa.org by November 3, 2014.*

Administrative Specification

Denominator The eligible population.

Numerator Both of the following during the measurement year.

- At least one test for blood glucose (Glucose Tests Value Set) or HbA1c (HbA1c Tests Value Set).
- At least one test for LDL-C (LDL-C Tests Value Set) or cholesterol (Cholesterol Tests Other Than LDL Value Set).

Data Elements for Reporting

Organizations that submit HEDIS data to NCQA must provide the following data elements.

Table APM-1/2: Data Elements for Metabolic Monitoring for Children and Adolescents on Antipsychotics

	Administrative
Measurement year	✓
Data collection methodology (Administrative)	✓
Eligible population	For each age stratification and total
Numerator events by administrative data	For each age stratification and total
Reported rate	For each age stratification and total
Lower 95% confidence interval	For each age stratification and total
Upper 95% confidence interval	For each age stratification and total

Appendix C: Draft Document for HEDIS 2015 Public Comment Technical Specifications (for Performance Indicators 4-6)

Use of Higher-Than-Recommended Doses of Antipsychotics in Children and Adolescents

Description

The percentage of children and adolescents 0–17 years of age who were on antipsychotic medication and who received two or more antipsychotic medication prescriptions with higher-than-recommended doses.

Note: *A lower rate indicates better performance.*

Eligible Population

Product lines: Commercial, Medicaid (report each product line separately).

Ages: 0–17 years by December 31 of the measurement year. Report four age stratifications and a total rate:

- 0–5 years.
- 6–11 years.
- 12–17 years.
- Total

The total is the sum of the age stratifications.

Continuous enrollment: 90 days or more.

Allowable gap: None.

Anchor date: December 31 of the measurement year.

Benefit: Medical and pharmacy.

Event/diagnosis: At least two antipsychotic medication dispensing events (Table XXX-A) on different dates of service during the measurement year.

Administrative Specification

Denominator: The eligible population.

Numerator: Received two or more prescriptions for an antipsychotic medication in the measurement year with higher than recommended doses.

Higher-than-recommended dose is a dispensed antipsychotic that meets "average daily dose" criteria in Table XXX-A.

Note: For medications in Table XXX-A, identify different drugs using the Drug ID field located in the NDC list on NCQA's Web site (www.ncqa.org).

Table XXX-A. Antipsychotic Medication Dose Maximums

Antipsychotic	Average Daily Dose Criteria for <13 years	Average Daily Dose Criteria for 13–17 years
Aripiprazole	>15 mg/day	30 mg/day
Asenapine maleate	>20 mg/day	>20 mg/day
Chlorpromazine hcl	>500 mg/day	>800 mg/day
Clozapine	>300 mg/day	>600 mg/day
Fluphenazine hcl	>10 mg/day	>10 mg/day
Haloperidol	>6 mg/day	>10.5 mg/day
Iloperidone	>24 mg/day	>24 mg/day
Loxapine	>100 mg/day	>100 mg/day
Lurisadone	>80 mg/day	>80 mg/day
Olanzapine	>12.5 mg/day	>20 mg/day
Paliperidone	>15 mg/day	>15 mg/day
Perphenazine	>6 mg/day	>64 mg/day
Pimozide	>10 mg/day	>10 mg/day
Quetiapine fumarate	>300 mg/day	>600 mg/day
Risperidone	>3 mg/day	>6 mg/day
Thioridazine hcl	>120 mg/day	>210 mg/day
Thiothixene	>20 mg/day	>20 mg/day
Ziprasidone hcl	>160 mg/day	>160 mg/day

Data Elements for Reporting

Organizations that submit HEDIS data to NCQA must provide the following data elements.

Table XXX-1/2: Data Elements for Use of Higher than Recommended Doses of Antipsychotics in Children and Adolescents

	Administrative
Measurement year	X
Data collection methodology (Administrative)	X
Eligible population	For each age stratification and total
Numerator events by administrative data	For each age stratification and total
Reported rate	For each age stratification and total

Upper 95% confidence interval	For each age stratification and total

Follow-up Visit for Children and Adolescents on Antipsychotics

Description

The percentage of children and adolescents 0–17 years of age who had a new prescription for an antipsychotic medication and had one or more follow-up visits with a prescriber.

Definitions

Intake Period: The 12-month window starting March 1 of the year prior to the measurement year and ending February 28 of the measurement year.

New Episode: The member must have a 120-day (4-month) Negative Medication History on or before the IPSD.

Negative Medication History: A period of 120 days (4 months) prior to the IPSD when the member had no antipsychotic medications dispensed for either new or refill prescriptions.

IPSD: Index Prescription Start Date. The earliest prescription dispensing date for an antipsychotic medication where the date is in the Intake Period and there is a Negative Medication History.

Eligible Population

Product lines: Commercial, Medicaid (report each product line separately).

Ages: 0 years as of March 1 of the year prior to the measurement year to 17 years as of February 28 of the measurement year. Report four age stratifications and a total rate:

- 0–5 years.
- 6–11 years.
- 12–17 years.
- Total.

The total is the sum of the age stratifications.

Continuous enrollment: Members must be continuously enrolled in the organization for 120 days (4 months) prior to the IPSD through 30 days after the IPSD.

Allowable gap: None

Anchor date: None

Benefit: Medical and pharmacy.

Event: Follow the steps below to identify the eligible population.

Step 1: Identify all children and adolescents in the specified age range who were dispensed an antipsychotic medication (Table XXX-A) during the 12-month Intake Period.

Step 2: Test for Negative Medication History. For each member identified in step 1, test each antipsychotic prescription for a Negative Medication History. The IPSD is the dispensing date of the earliest antipsychotic prescription in the Intake Period with a Negative Medication History.

Step 3: Calculate continuous enrollment. Members must be continuously enrolled for 120 days (4 months) prior to the IPSD through 30 days after the IPSD.

Step 4 Required exclusions: Exclude members who had an acute inpatient encounter for mental health or chemical dependency during the 30 days after the IPSD. An acute inpatient encounter in combination with any of the following meets criteria:

- A principal mental health diagnosis (Mental Health Diagnosis Value Set).
- A principal diagnosis of chemical dependency (Chemical Dependency Value Set).

Administrative Specification

Denominator: The eligible population.

Numerator: One or more follow-up visits with a practitioner with prescribing authority, within 30 days after the IPSD.

An outpatient, intensive outpatient or partial hospitalization follow-up visit with a practitioner with prescribing authority, within 30 days after the IPSD. Any of the following code combinations billed by a practitioner with prescribing authority meet criteria:

- ADD Stand Alone Visits Value Set.
- ADD Visits Group 1 Value Set with ADD POS Group 1 Value Set.
- ADD Visits Group 2 Value Set with ADD POS Group 2 Value Set.

Note: Do not count a visit on the IPSD as the follow-up visit.

Table XXX-A. Antipsychotic Medications

First Generation Antipsychotic Medications	Second Generation Antipsychotic Medications
Chlorpromazine hcl	Aripiprazole
Fluphenazine hcl	Clozapine
Fluphenazine decanoate	Iloperidone
Fluphenazine enanthate	Olanzapine
Haloperidol	Olanzapine pamoate
Haloperidol decanoate	Paliperidone
Haloperidol lactate	Paliperidone palmitate
Loxapine hcl	Quetiapine fumarate
Loxapine succinate	Risperidone
Molindone hcl	Risperidone microspheres
Perphenazine	Ziprasidone hcl
Pimozide	Ziprasidone mesylate

Promazine hcl	
Thioridazine hcl	
Thiothixene	
Thiothixene hcl	**Combinations**
Trifluoperazine hcl	Olanzapine-fluoxetine hcl (Symbyax)
Triflupromazine hcl	Perphenazine-amitriptyline hcl (Etrafon, Triavil [various])

Exclusions: None

Metabolic Screening for Children and Adolescents Newly on Antipsychotics

Description

The percentage of children and adolescents 0-17 years of age who had a new prescription for an antipsychotic medication and had baseline metabolic screening.

Definitions

IPSD: Index Prescription Start Date. The earliest prescription dispensing date for an antipsychotic medication where the date is in the Intake Period and there is a Negative Medication History.

Intake Period: The 12-month window starting March 1 of the year prior to the measurement year and ending February 28 of the measurement year.

Negative Medication History: A period of 120 days (4 months) prior to the IPSD when the member had no antipsychotic medications dispensed for either new or refill prescriptions.

Eligible Population

Product lines: Commercial, Medicaid (report each product line separately).

Ages: 0 years as of March 1 of the year prior to the measurement year to 17 years as of February 28 of the measurement year. Report four age stratifications and a total rate:

- 0–5 years.
- 6–11 years.
- 12–17 years.
- Total.

The total is the sum of the age stratifications.

Continuous enrollment: Members must be continuously enrolled in the organization for 120 days (4 months) prior to the IPSD through 30 days after the IPSD.

Allowable gap: None.

Anchor date: December 31 of the measurement year.

Benefit: Medical and pharmacy.

Event/diagnosis: Follow the steps below to identify the eligible population.

Step 1: Identify all children and adolescents in the specified age range who were dispensed an antipsychotic medication (Table XXX-A) during the 12-month Intake Period.

Step 2: Test for Negative Medication History. For each member identified in step 1, test each antipsychotic prescription for a Negative Medication History.

Step 3: Determine the IPSD. The IPSD is the dispensing date of the earliest antipsychotic prescription in the Intake Period with a Negative Medication History.

Step 4: Calculate continuous enrollment. Members must be continuously enrolled for 120 days (4 months) prior to the IPSD through 30 days after the IPSD.

Administrative Specification

Denominator: The eligible population.

Numerator: Both of the following within 90 days prior to 15 days after the IPSD.

- At least one test for blood glucose (Glucose Tests Value Set) or HbA1c (HbA1c Tests Value Set).
- At least one test for LDL-C (LDL-C Tests Value Set) or cholesterol (Cholesterol Tests Other Than LDL Value Set).

<Head of Household Full Name>
<Address Line 1>
<Address Line 2>
<City>, <State> <ZIP>

<Date>

Dear Parent/Guardian of <Minor Full Name>:

You and your child are valued members. Together with your doctors, we want to ensure that your family always gets the best health care possible.

We understand your child may have started a type of medication. It is called an antipsychotic medication. It is most often used to treat certain behavioral health conditions. Each step of treatment for such a condition is very important. Your child's doctors and other providers will work together to manage this care closely.

What steps should you take for your child?

The first step in this type of treatment is a full assessment. Your doctor will need to perform certain tests, sometimes called "metabolic" screening. These tests include a Blood Glucose test and a Cholesterol Test. These tests are very important. Have them done before starting the medication. Then continue the tests throughout the course of care. Please contact your child's doctor at the following number if you are unsure if your child has had these tests or if you need to schedule an appointment for these tests:

Dr. <Provider_Last_Name> at <Provider_Phone_number>

Your child's doctor will need to see your child **within 30 days** of starting the medication. This is to make sure the medication is working properly. Also remember to keep the appointments with your child's doctors. Finally, it is also very important that your child see a mental health provider, sometimes called a therapist. He or she will work with your child and family to address your child's symptoms. Please schedule an appointment with a therapist as soon as possible if your child has not seen one already.

Questions? Need help with appointments?

If you need help in finding a mental health provider/doctor or with scheduling any appointments, WellCare can help. Please call Customer Service at **1-877-389-9457** (TTY **1-877-247-6272**). We are here for you Monday–Friday, 7 a.m. to 7 p.m. Eastern Time.

WellCare of Kentucky also has a Behavioral Health Crisis Hotline that can answer your behavioral health questions or concerns. Please call **1-855-661-6973** (TTY **1-877-247-6272**). There is no charge for this. You can call any time, day or night.

Sincerely,

WellCare of Kentucky

Appendix E: Educational Provider Mailing Letter Template

<Rx_Provider_FirstName> <Rx_Provider_LastName>
<Address Line 1>
<Address Line 2>
<City>, <State> <ZIP>

<Date>

Dear <Rx_Provider_FirstName> <Rx_Provider_LastName>,

WellCare of Kentucky is undertaking a statewide initiative focused on improving the care of pediatric members who are being treated with an antipsychotic medication. A review of our records indicates that your patient, <Member_FirstName> <Member_LastName> (DOB: <MM/DD/YYYY>), recently filled a new prescription for an antipsychotic medication.

WellCare Health Plans supports the position paper of the American Academy of Child and Adolescent Psychiatry (AACAP) entitled, "Practice Parameter for the Use of Atypical Antipsychotic Medications in Children and Adolescents." The full AACAP Practice Parameter, including clinical evidence base and recommendations, can be accessed at the AACAP website via the following link:
www.aacap.org/App_Themes/AACAP/docs/practice_parameters/Atypical_Antipsychotic_Medications_Web.pdf

Additionally, an "Assessment, Screening and Monitoring Tool for Pediatric Members Prescribed an Atypical Antipsychotic Medication" is available for our providers as a resource. It can be accessed at the following site:
kentucky.wellcare.com/WCAssets/kentucky/assets/KY_CAID_PRO_AntipsychoticAssessmentTool_02_2015.pdf

WellCare of Kentucky values quality, coordination and continuity of care for all members. We encourage you to review the full AACAP practice parameter and download a copy of the WellCare tool to assist you in managing your pediatric patient's treatment with an antipsychotic medication. If you would like more information regarding this initiative, please feel free to contact Cheryl Herre, Quality Improvement Project Manager, at **1-502-253-5191** or via email at **Cheryl.Herre@wellcare.com**.

Sincerely,

WellCare of Kentucky

SECTION IV.X TRANSITION AND IMPLEMENTATION

116. Describe how the MCO will coordinate the initial transition of individuals in the follow situations to ensure continuity of care:

- From another MCO.
- From FFS , including specific approaches for the aged and disabled populations who are new to managed care.

Include processes for engaging existing providers in the transition.

(Page limit 5 pages)

WELLCARE'S MEMBER FIRST PHILOSOPHY: TRANSITIONS AND CONTINUITY OF CARE

WellCare is a leader in helping members transition from other MCOs and the Fee-for-Service (FFS) Medicaid system, particularly for individuals with complex conditions. We view transition of care as a continuous process where we aim to improve health care quality, mitigate complications, eliminate unnecessary costs, and improve member satisfaction through identification, engagement, assessment, and care coordination.

Our documented, well-established, proven process for facilitating the seamless transition during initial enrollment that we will use in Nebraska is based on NCQA standards for Continuity and Coordination of Medical Care. We will develop a specific Heritage Health Member Transition Policy, which will be based on similar policies in use in other states including ones that have been externally validated by NCQA.

Setting the Standard for Proper Transitions

One WellCare affiliate, Missouri Care, developed a transition of care form that became the basis of the Missouri HealthNet Division transition of care form now used by all Medicaid MCOs in the state.

Our transition of care activities support a variety of diagnoses including pregnancy and behavioral health-related conditions and specifically assist members with more challenging needs, including their non-clinical needs, and including those members in the Aged, Blind and Disabled (ABD) as well as Foster Care populations. In Nebraska, we are particularly sensitive to both of these populations as well as members living in rural and frontier communities who have not had a diversity of plans prior to the implementation of Heritage Health. The following is a high-level summary of the processes we use to ensure continuity of care for members:

Identify Members in Need of Transition Support

We provide for the timely identification of members in need of transition of care support through a variety of channels including special flags in the state's 834 eligibility file, state notification, transferring health plan notification, customer service, welcome calls, enrollee self-referral, care giver referral, and provider referral.

During the initial implementation in Nebraska, we will work closely with MLTC to ensure members are appropriately flagged for transition support. Additionally, our member onboarding and welcome processes described in the Member Services section of this response will include identification of members with higher touch care management needs such as children in residential care or recently transitioned from residential care, to assist with transition needs.

Transitioning from another MCO: WellCare of Nebraska is eager to work with other MCOs in the state to have a consistent and streamlined process for identifying members in need of extra transition care.

Transitioning from FFS: Many ABD members will need additional help during transition and identifying those who need the most coordination is an important step to ensure members don't fall through the cracks. WellCare of Nebraska would like to work with MLTC to use claims data in the FFS system to identify members most in need of transition care management services, including examining pharmacy data since large numbers of medications can be an indicator of specialized care management needs. During implementation meetings across the state, we'll also provide tools for members, providers and advocates to refer to transition care if there is a particular concern about making sure a member new to Managed Care is identified and engaged early.

Reach & Engage Members to Streamline the Transition Process

Once a member is identified, a care manager attempts to outreach the member and the member's primary provider to inform them of their new contacts with the health plan, confirm the member's current health care/service needs, and provide support and assistance to the member during this transition of care process. Care management staff will identify any possible barriers that would prevent a successful transition, including, but not limited to initiating processes for a member if he or she is receiving services from a provider not contracted with WellCare, following up with home health agencies or DME providers if needed so there is no interruption of services. Care management staff will also complete an assessment to determine if there are any new or urgent health care needs. If it is determined that the member needs assistance with coordination of care, the care manager will work with all involved parties, including providers, specialists, previous care managers, and other organizations that the member may be receiving services from through waiver programs or school based services to make the transition as successful as possible.

WellCare of Nebraska's model to place field-based care managers, as well as welcome rooms, in communities across the state is also an important tool to ensuring we can reach and engage members identified as being in need of transition services. Additionally, WellCare's Health*Connections* model serves as another arm of support for members who may not be reached through traditional means. Our relationships with social safety net providers across the state and Nebraska CommUnity Advocacy team gives us additional outlets to engage members in ways that are culturally competent to meet their unique needs. In addition, WellCare leverages the relationships with our community partners that we establish through the Health*Connections* Model to share important updates about the Heritage Health program that learn from the state.

Transitioning from another MCO: We would encourage MCOs to work together in the best interest of the member to share contact information and any nuances around challenges reaching members and their caregivers. For all members and their caregivers, WellCare helps members resolve social barriers as well during and after their transition in to Managed Care.

Transitioning from FFS: When we met with members in Nebraska's ABD population, most of whom were dually eligible for Medicare and Medicaid, it was clear that members need to be engaged in ways that meet them where they are, so they can fully understand the benefits and services available to them under their health plans. For those with Behavioral Health needs, for instance, we will use peers to help engage harder to reach and engage members. For all members and their caregivers, WellCare helps members resolve social barriers as well during and after their transition in to Managed Care.

Assess and Coordinate for Specific Member Needs

Once it is determined that a member is transitioning, the care management staff notifies the member, providers and the receiving managed care organization, if applicable. A transition of care form is completed by care management staff and sent to all parties. The form includes member's diagnoses, medications if known and any additional information that will be helpful to transition the member. If a member is enrolled in care management, the care manager attempts to make contact with the member via phone to discuss transition processes. If a member has any urgent needs that will require assistance from

the receiving health plan, the care manager will attempt to contact the care manager to assist with the transition in order to limit any interruptions of care. ***These assessment processes remain stable regardless of where the member transitions from.***

Transitioning Pharmacy for Members

WellCare Pharmacy believes that continuity of care, especially during a transition period from FFS or another MCO is critical to maintaining the health and well-being of our members. WellCare will follow MLTC requirements and continue to transition a member on their medication for up to 90 days. Thereby allowing the member and their provider adequate time to either request a Drug Exception Review (DER), prior authorization, to continue their current treatment for as long as it is medically necessary or to switch to a medication that is on the Nebraska Medicaid PDL. Once historical data is made available to WellCare, this information would be used along with information provided by the prescriber to make the decision on the DER. WellCare pharmacy is dedicated to providing the right medication to our members throughout the transition period and beyond.

Engaging Technology to Share Information and Ensure Seamless Transitions

WellCare has extensive experience working with different states on unique formats for sharing information to aid in transitions. The information we receive from another MCO or other payer relinquishing a member is typically claims history data used for the purpose of identifying members enrolled in a case management program. We also solicit care plans and treating provider's contact information from the previous payer. We have systems that accommodate obtaining Health Risk Assessment information via an 834 enrollment file.

In Nebraska, we have identified an opportunity to enhance the effort to share information that could be particularly beneficial for members transitioning into and out of different health plans. We believe the Nebraska Health Information Initiative (NeHII) can play a valuable role in the transition of care by offering access to clinical records. NeHII currently holds or accesses records from a large and growing share of the hospitals and providers in Nebraska. WellCare was invited to provide input to the NeHII Strategic Planning meeting on October 2, 2105 where we encouraged NeHII to allow and encourage MCOs to provide information to the network. This additional information would further smooth a member's transition, not only between or to MCOs, but between providers and health homes as well. This information, in machine-readable form, would not only aid care managers and providers but could be used in Population Health management programs to ensure the right treatment is available at the right time.

Additionally, on an ongoing basis, WellCare plans to leverage our proprietary Health*Connections* Model through which we monitor social service access and use maintained at a member-level in a social service electronic health record. Anticipated uses of the data from the Health*Connections* Model includes the transition of members into different care settings, effective social service network planning to ensure the availability of services when needed, deeper population health management, and more.

Coordinating Care and Engaging Existing Providers in the Transition

Our highly trained care managers coordinate with the member's prior health plan, if applicable, and work diligently to maintain existing care plans which include continuation of prescheduled services, including those with out of network providers. The care management staff determines any transition of care needs, such as a member who is receiving home health services or equipment from a DME provider. The care management staff attempt to notify these providers and assist with the authorization process if needed so that there is no interruption in services that the member may be receiving. Additionally, care management engages the member's existing PCP, whether it's a contracted provider or not, to ensure they are aware of and are involved in any changes to the member's care plan. Care managers work to ensure minimal to no disruption in the care plan unless requested by the member, caregiver, PCP or other provider and it is

agreed that the change is in the member's best interest.

Our transition of care policies provides for continuation of and payment for prescheduled health services. WellCare knows that enrollees in transition have existing prior authorizations from either the incumbent health plan or the fee-for-service program. To enable a seamless transition, we cover the cost of continuation of medically necessary services, without any form of prior approval and without regard to whether such services are being provided by in-network or out of network providers for 90 days or up until transition to an in-network provider is safely completed.

This is particularly important for our pregnant members transitioning over to ensure they remain connected to pre-natal services. In addition to enabling pregnant members to receive services from their prenatal care provider, WellCare recognizes the criticality of medical and behavioral health co-existing conditions, especially as it pertains to pregnant members with behavioral health and/or substance abuse issues, as well as with social issues. Our transition of care policy and procedures will also allow pregnant members to continue to receive services from their behavioral health and/or substance abuse treatment provider, without any form of prior authorization, until the birth of the child, the cessation of pregnancy, or loss of eligibility.

SUCCESSFUL TRANSITIONS

A Success Story from WellCare's Missouri Care Affiliate

In September 2012, a 17-month-old female enrolled in the Missouri Care health plan. The member was a twin who was born late-preterm at 34+ weeks and unknowingly exposed to RSV, after which she developed significant problems due to prolonged resuscitation efforts in the emergency department. As a result, the member now has developmental delays, feeding difficulties, breathing issues and possible heart complications. The member's mother, outreached to care management prior to the member's eligibility effective date. A care manager was assigned and immediately began working with the mother towards a smooth transition. At the time of initial contact the family was living in the Kansas City area using providers to meet their needs. The member was admitted to the hospital in Kansas City right before her first birthday with increased respiratory effort & fluid build-up. She was transferred to St. Louis to be seen by a pediatric cardiology specialist the day after her 1st birthday. She remained hospitalized for a little over 2 months while efforts were made to stabilize her condition & decrease her medication needs. During her hospital stay care management worked with the member's mom, management and hospital staff to meet the family's lodging and meal needs, as the travel distance between home and the hospital exceeded the 120 mile limit, and to develop a discharge plan. Prior to the member being discharged, care management worked with the member's mom to identify a high-risk pediatrician nearby for ease of follow-up. The care manager also worked with prior authorization and utilization management teams to make sure continuity of care was maintained by having visits for out-of-network providers approved prior to visits.

SECTION IV.Z CLAIMS MANAGEMENT AND PROCESSING

117. Provide a detailed description of the MCO's approach to implementing the necessary functionality to support FFS claims processing.

WELLCARE'S APPROACH TO SUPPORT FEE-FOR-SERVICE CLAIMS PROCESSING

WellCare plans to leverage decades of experience and technical expertise in claims processing, data management and IT systems and infrastructure to support the state's fee-for-service (FFS) claims processing needs. WellCare has been successfully operating in nine Medicaid programs in addition to our Medicare Advantage and Part D products. The Nebraska claims broker services will be operated as a separate line of business (LOB), and we are confident that our robust process will meet all the requirements as outlined in *Section Z Claims Management and Processing* of the SOW.

WellCare understands that we must maintain the same functionality for FFS claims that is required for our managed care claims as described in *Section S. Claims Management* of this RFP. The following paragraphs discuss in detail our existing functionalities that we use for managed care claims and plan to leverage for FFS claims processing or claims broker services.

In our strategy to implement the necessary functionality to support FFS claims processing, we will approach the claims broker service once MTLC identifies the formal transition date with the same standards of rigor and project management governance, as well as long-term operational support as we use to manage the risk business. We have already developed a draft implementation plan, and are prepared to collaborate with MLTC, other health plans, the enrollment broker and the state's FFS providers to develop a smooth process for transitioning services to a claims broker.

Claims Processing

The mission of our claims department is to serve our members and providers through consistent, prompt and accurate payment of claims. Through daily monitoring coupled with our integrated tools and technology, WellCare has demonstrated continuous improvement in the claims processing system. Our claims department conducts numerous independent audits to identify opportunities to eliminate defects on a pre-payment and post-payment basis. These include targeted audits, peer reviews, hospital audits, external department audits and pre-payment high dollar audits.

Our claims team monitors the claims activity performance on a daily basis through workflow management tools, such as Claims Processing Report (CPR) to manage inventory and turnaround time reports. This ensures that claims are processed in accordance with all applicable regulatory timeframes. All claims received pass through a series of Strategic National Implementation Process (SNIP) edits to ensure accurate adjudication of benefits and payment. The claims which successfully pass these edits are loaded to our Core Processing System (CPS) for final adjudication and payment.

WellCare understands, acknowledges and will comply with the HIPAA national standards related to FFS claims processing including, but not limited to, electronic transactions standards for MLTC. With this robust, centralized, integrated system we will monitor and manage the claims intake and processing flow, including a complete, daily end-to-end reconciliation process for our FFS claims.

Claims Dispute Management

We have policies and procedures that allow providers to submit a request for adjustment to previously denied or underpaid claims. The claims payment dispute process is designed to address claim denials/ payments for issues related to a claim denial for timely filing, pricing, coding or billing related issue not tied to medical necessity, and to dispute the amount paid on a claim. Providers can call, email or mail their claim disputes. WellCare will address and close any disputed claims within 30 business days. The claim dispute will be documented, acknowledged and entered into our dispute inventory to be completed.

Provider Services

WellCare's provider experience has enhanced over the years and we will continue this effort in Nebraska for FFS claims. As mentioned in *Section J. Provider Services*, we will operate a dedicated toll-free provider services telephone line. This line will be available to our providers at all times for inquiries regarding authorizations, member eligibility, demographic changes, claims status, benefits, questions, concerns or complaints. The provider services telephone line will be staffed by highly trained associates with broad-based experience handling provider calls specific to Nebraska. Our provider service line will be manned Monday through Friday from 7:00 a.m. –8:00 p.m. central time, except for state holidays, to address non-emergency provider issues, and anytime for non-routine prior authorization requests and emergent provider and pharmacy issues. Clinical pharmacists will be available Monday through Friday 8:00 a.m.-8:00 p.m. central time for clinical questions and prior authorization processing.

Our secure provider portal allows providers to process authorizations 24/7. All our provider notifications, bulletins, newsletters, FAQs and other pertinent information will be available to providers participating in the FFS program. All our communication efforts will be specific to the claims broker services, branded as such and clearly and distinctly separate from the risk business.

Member Services

WellCare recognizes that the State will retain responsibility for enrollment of and communication with members in the FFS program, and the FFS claims broker services are to be focused on the claims-related aspects of *Section Z Claims Management and Processing* of the SOW. However, WellCare is prepared to respond to any member services needs that arise through our work as the FFS claims broker and welcomes conversations with MLTC about the division of roles through this project.

Payment to Providers

As stated in the SOW, WellCare will pay the FFS claims at a fee schedule rate as set by MLTC and on a schedule and frequency agreed upon with MLTC.

Remittance Advice

WellCare generates remittances electronically using 835 files. These transactions are submitted to our vendor (PaySpan) for execution. Completed transactions are returned for tracking, reconciliation and final payment verification. Providers unable or unwilling to utilize electronic formats are accommodated by PaySpan with paper documents produced from these electronic transactions or the ability to download remittance advices directly from their web portal.

Prior Authorization

Prior authorization is the process of obtaining approval from WellCare in advance of providing a covered service. Our Utilization Management (UM) uses prior authorization to help ensure: 1) the efficient use of covered services; 2) that members receive the most appropriate level of care; and 3) that care is delivered within the most appropriate setting. UM does not require prior authorization for emergency services and urgent care center services. WellCare will leverage our standard PA process for services paid as FFS in accordance with the Nebraska Medicaid policy. WellCare's FFS claims will be paid or denied with FFS authorization policies.

Grievance and Appeals

WellCare's Medicaid grievance system complies with Federal and State regulatory requirements and includes processes to receive, process, and report on member grievances and appeals. Our internal review process, which provides one level of appeal, allows members and providers to present new or additional information about the member's health so we may evaluate previously denied, reduced, or suspended services. As required, our grievance system includes access to the State's fair hearing system allowing members and providers at any time to appeal WellCare's decision to uphold the denial.

Our fully-functioning grievance and appeals system that we use for our risk business will be in place as a separate and distinct function for the FFS business.

Third Party Liability and Recovery

Our claims broker service will develop and maintain a process to identify and capture information regarding other insurance sources (TPL) for the FFS members. We will perform cost avoidance and third party liability collection activities under well-defined policies and procedures that conform to federal and state of Nebraska requirements. The coordination of benefits, or cost avoidance process begins with updating member records to include information on other insurance. This is utilized during claims payment as we send monthly claims and eligibility data feeds to our vendors to evaluate and determine if any members have other coverage through a commercial source. Once the analysis is completed, the vendor sends a return file containing other insurance information for use in updating our member eligibility files. We send the TPL files (new or updated) to the State.

Our Audit and Recovery department creates monthly reports that contain claim avoidance information for any member where a primary payer is responsible. We report COB savings or cost avoidance for claims in two categories: 1) claim is denied payment for primary insurance carrier explanation of payment; or 2) claim is paid as secondary by WellCare as primary insurance carrier explanation of payment was attached by provider.

Drug Rebates

WellCare intends to leverage our unique hybrid pharmacy model with a number of critical pharmacy benefit management functions performed in-house by WellCare personnel, coupled with the activities of a pharmacy benefits manager (PBM), for providing the state of Nebraska pharmacy claims information. Using the Nebraska Medicaid Preferred Drug List (PDL), WellCare will provide formulary coverage, at a minimum, for all classes of drugs including over-the counter (OTC), to the same extent they are covered by the Nebraska Medicaid Fee-For-Service (FFS) pharmacy benefit. We use a well-defined database MediSpan for pharmacy claims processing, updating schedules, term dates, obsolete dates and rebate status.

SECTION IV.Z CLAIMS MANAGEMENT AND PROCESSING

118. Describe the level of effort necessary to support Nebraska program and policy changes, including but not limited to new covered services, prior authorization requirements, or additional populations.

WELLCARE'S PROCESS OF HANDLING CHANGES IN POLICY AND PROCEDURE FROM MLTC

WellCare understands that to be successful in Nebraska with the claims broker line of business (LOB), we must have a thorough knowledge of the existing program and policies, monitor for identified changes in the policies and programs and maintain a comparative analysis of the changes to the existing programs and policies. Our level of effort is dependent on the amount of change required.

Any program change is managed by WellCare's Enterprise Project Management Office (ePMO) Market Initiatives team who assists in coordinating efforts as well as documenting and tracking milestone dates to ensure updates are made on-time. The ePMO's involvement begins early on with the selection of a senior project manager who monitors the RFP process to determine any significant changes to "People, Processes and Technology" associated with the assumptive requirements of the contract based on the RFP. Our PMP-certified, professional project managers leverage ePMO-developed, best-practice "Playbooks" that reflect years of industry experience and aggregate lessons learned across numerous contract implementations.

The project manager develops a high-level scope document, Microsoft® Project work plan, resource plan, organizational chart, budget and risk document. The project manager introduces these artifacts with the broader team at the project kick off meeting and continually refines them as the project progresses into later stages. The process is underscored by a cadence of regularly scheduled internal Steering Committee, Work Group, Status, Issue/Risk and Change Control meetings. The goals of successful management of any project or change include, but are not limited to, ensuring the following:

- Effective communication
- Timely project delivery
- Issue resolution
- Scope control
- Escalation to appropriate parties when necessary.

New Covered Service

Any change in covered services is managed by our Product Development and Strategy department (Product). Product drives the initiative to ensure that the claims system is appropriately updated and configurations of all related rules are in place so claims for the new process are processed effectively. We also have the ability to work with MLTC to assist with any communications and required notifications to providers and/or members as needed.

Prior Authorization

Once Utilization Management (UM) or prior authorization leadership is informed or notified, the task of updating the authorization look-up tool, the Quick Reference Guides, policies/procedures and step actions are completed by specially-trained project analysts. Where prior authorization is required, we have project management process to configure our systems to reflect the requirement through to clams editing. The associates are then informed of the changes and any needed training is completed prior to the implementation of the changes.

Additional Populations

In situations where additional populations will be added to the Nebraska Medicaid FFS program, the main

strategy of WellCare will be to ensure we have resources to manage the additional influx. Our systems are designed with flexibility for bolt-on programs and populations without a complete redesign. Rather, we would use our change/project management process to configure for new populations in collaboration with MLTC and the enrollment broker to align benefits and services to the population need.

SECTION IV.Z CLAIMS MANAGEMENT AND PROCESSING

119. Describe how the MCO will maintain a distinction between FFS and managed care processing rules, claims transactions, providers, members and prior authorizations within the system.

WELLCARE'S INTEGRATED MANAGEMENT INFORMATION SYSTEM

WellCare's single-instance, fully integrated IMIS platform is scalable and flexible. It is used to collect, analyze, integrate and report data in support our entire operating book of business covering more than 3.7 million members for various lines of business and health plan operations, including Medicare Advantage in 15 States, Medicaid contracts in nine States, Part D operations in 33 Regions (49 states and the District of Columbia), and two Health Insurance Exchange markets. WellCare will leverage IMIS suite to support all the aspects of our processing requirements for both distinct lines of business (LOBs), including those specified in the *Section S. Claims Management* of the SOW.

Because we use this single-instance platform to support a large number of diverse government contracts, we have designed it to ensure it easily supports the addition of LOBs. The general structure and components of our systems architecture is detailed in **Figure 1**.

Through the use of a distinct LOB to represent each unique contract with a government agency, the IMIS enables each individual contract to maintain different rules for claims processing (including pricing and adjudication rules), separate and distinct benefit packages, unique provider contracts and directories, separate membership rosters, unique prior authorization rules and all other forms of operating rules. The IMIS suite is designed and built to leverage configuration changes by business users which permit them to modify, enhance and improve the behaviors and functionality of the applications. As a result, these operating rules are configurable by LOB and do not require software deployments, enabling rapid, secure, and effective administration of multiple government contracts in a single instance solution.

Leveraging the Architecture and Design of WellCare's IMIS System

Our integrated platform is capable of creating a clear distinction between FFS and managed care processing rules, claims transactions, providers, members and prior authorizations within the system. There are several advantages of leveraging our IMIS, which includes but is not limited to:

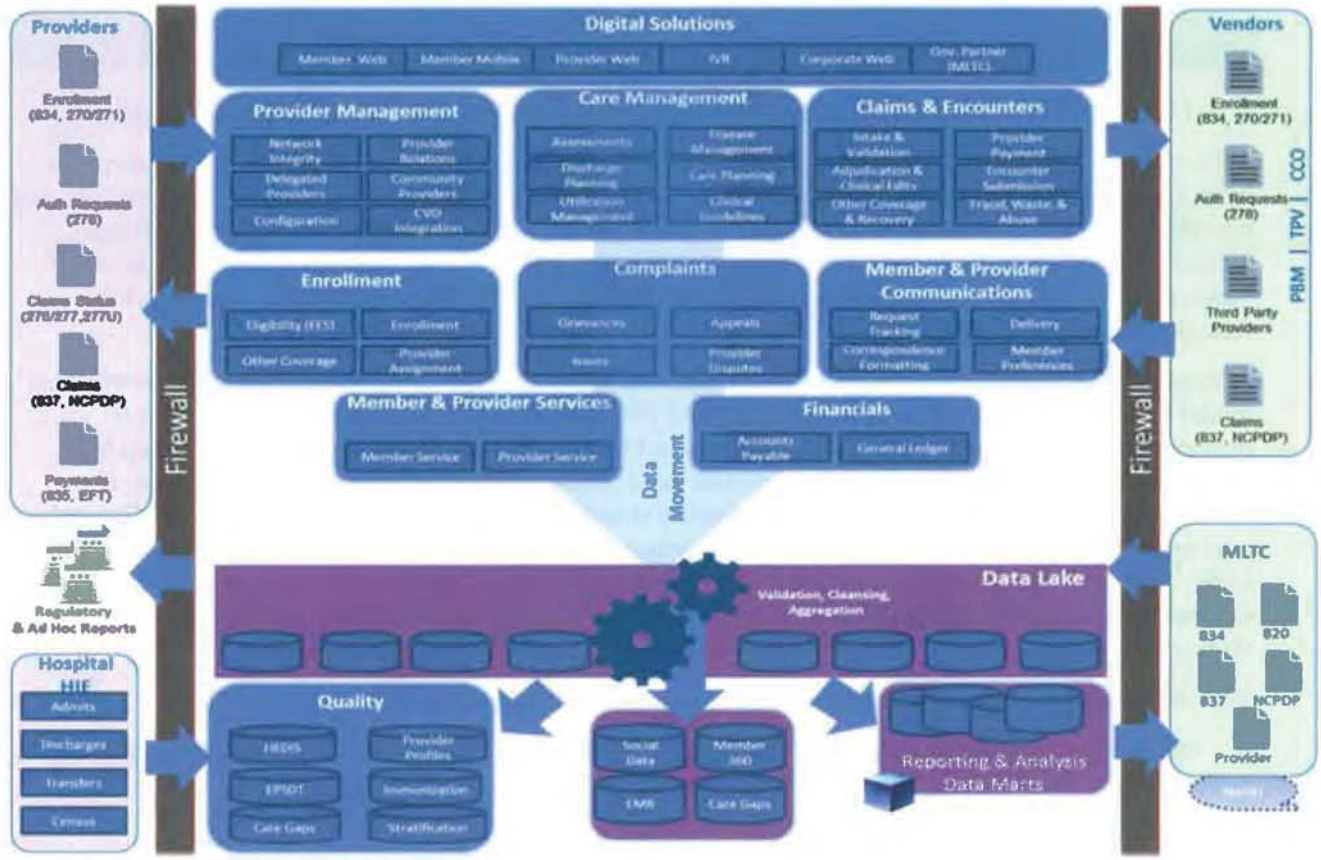
- The Line of Business (LOB) implements the concept of separate, distinct contractual arrangements.
- The support and implementation of the claims management requirements will be established by creating a new LOB in our IMS specifically dedicated to the FFS claims broker services.
- Using this capability, the system will maintain distinct processing rules, benefit structures, provider contracts, and member eligibility that are unique to the FFS claim management LOB.
- All the claims, authorizations, provider payments and all other transactions performed will be within that claims management LOB and distinct from all other lines of business.
- All existing applications and functionality are available to support the FFS contract without new development, while allowing for customizations of items such as logos, ID Cards, and Handbooks

Having a Unique Brand Name

WellCare also associates a distinct brand name and logo to each unique LOB, with the result being that all external communications will have a distinct brand name and logo which helps in preventing confusion

for members and providers. The requirement to provide separation and maintain uniqueness between the Heritage Health and FFS claims processing contract presents no unique issues or concerns to WellCare.

Figure 1



SECTION IV.Z CLAIMS MANAGEMENT AND PROCESSING

120. Provide an explanation of the MCO's plan and approach for business operations to support the FFS volume vs. the risk-based volume. Will the plan have separate or joint business operations units for some or all processes?

WELLCARE'S APPROACH TO BUSINESS OPERATIONS TO SUPPORT CLAIMS BROKER SERVICES

After reviewing *Section Z Claims Management and Processing* of the RFP, WellCare has developed a hybrid approach to support the fee-for-service (FFS) line of business for Nebraska MLTC. Generally, our operational approach is to establish a distinct Line of Business (LOB) for Nebraska's Claims Broker services and treat it as if we were developing a new health plan or LOB, but with some of the same accountabilities to ensure a streamlined process for MLTC to work with us from the perspective of relationships and accountability.

Because of our experience serving both Medicaid and Medicare members, we have experience with this model in states where we have both Medicaid and Medicare plans. While they are unique lines of business and have distinct operations to ensure one LOB doesn't get lost in the other, leadership has accountability for both LOBs to ensure the state does not develop unnecessary silos. To support the operations, we will leverage our existing corporate shared services structures and allocated staff members who have the expertise and experience to best manage the specific requirements of the Claims Broker LOB. To support leadership, we will hire a local liaison for the Claims Broker business who will provide dedicated local support and provide that local separation between the risk-based business and the Claims Broker business.

To achieve the necessary operational distinctions, we would take the following critical steps:

- Manage the operational support for the each LOB along functional structures (e.g. claims, provider services, utilization management, etc.)
- Segregate the data and unique operational rules to match the needs of each contract
- Train staff members in the functional areas on the contract-specific items and activities

As discussed in Q119 in detail, our single-instance, integrated, enterprise IMIS as the core Information Technology (IT) platform will support both the risk-based and FFS contracts, using a separate Line of Business (LOB) for the two contracts. All operational areas, such as claims processing and customer service, would also be implemented in the same functional areas for both risk based and FFS processing.

Though it will be built in our existing infrastructure, separate and unique operating rules will be implemented to support the uniqueness of the FFS contract. For example, the allocated customer service staff would use WellCare's CareConnects application, with call scripts tailored to this new LOB, for each of the risk based and FFS contracts.

SECTION IV.Z CLAIMS MANAGEMENT AND PROCESSING

121. Provide an explanation of the significant risks associated with the implementation and ongoing operation of claims broker services, and provide mitigation strategies for those risks.

IDENTIFYING POTENTIAL RISKS IN OPERATION OF CLAIMS BROKER SERVICES.

WellCare has carefully considered the potential risks associated with having one of multiple MCOs operate as a claims broker for the remaining fee-for-service (FFS) Medicaid business. We will collaborate with MLTC to take necessary steps for mitigating any issues.

The primary risk associated with having a single entity process both risk-based and FFS contract is the potential for member and provider confusion. We understand that a possible risk would be for providers who operate in both the FFS and the managed care environment and would require them to have a distinct understanding of when to submit the claims to a MCO and to the claims broker.

MITIGATION

WellCare's strategy for mitigating this risk is also inherent in our approach to implementation, with a unique Line of Business (LOB) being established for each of the two contracts. We are offering an integrated, scalable and flexible system to meet the requirements of the claims broker business. Our integrated system will uniquely brand all operations for each of the risk-based and FFS contracts. Any external communications will have a distinct brand name and logo which help in preventing confusion for members and providers. This will help in separating and maintaining uniqueness between the risk-based and FFS claims.

Mitigating Provider Confusion

We believe the greatest risk to the claims broker service will be provider confusion. Some providers will work within both systems and will need robust educational outreach to understand WellCare's role in each. In collaboration with MLTC, We will use the same strategies we deploy for implementing new plans to partner with MLTC to conduct thorough outreach to mitigate this confusion.

Provider Network Preparation for Claims Broker Services

We would recommend partnering with MLTC to invite all providers to attend statewide orientation sessions, and we will offer the same curriculum through multiple delivery modalities including classroom training, online, and video training, to educate as many providers about our FFS members and their distinction with our managed care members.

Our FFS Provider Support Approach During Go Live

WellCare will also use best practices from other WellCare implementations to facilitate the smooth transition of members into the claims broker services plan. At program go-live and continuing for the first four weeks beyond implementation, a team of associates will be available in a Command Center environment to respond immediately to provider questions and facilitate the prompt resolution of any issues.

Additionally, we will use a number of proven strategies for ongoing communications and support of providers including some of the following in **Figure 2**.

Figure 2

PROVIDER SERVICES INFRASTRUCTURE	
Infrastructure	**Activity**
Integrated Contact Center	WellCare will operate an integrated provider services contact center with a unique brand to respond to the needs of our FFS providers. A dedicated toll-free line will be available to our providers for inquiries regarding authorizations, member eligibility, demographic changes, claims status, benefits, questions, concerns or complaints.
Provider website	As an important communication tool, our Nebraska provider website will be branded uniquely to inform, educate and communicate with providers about the FFS claims and WellCare. It will also offer important resources and tools for providers including tools for claim submission, claim status check, prior authorization submission and online training modules.
Collaborating with MLTC	We plan to work with MLTC on leveraging existing provider communication tools the state agency uses to make sure providers are kept up-to-date on ongoing operations of the claims broker services.

SECTION IV.Z CLAIMS MANAGEMENT AND PROCESSING

122. Provide a timeline for implementation of claims broker functionality, including the number of months that it will take to pay FFS claims.

WellCare fully understands the required timeframe as outlined in *Section Z Claims Management and Processing* of the SOW. In preparation for the readiness review process, we will develop and maintain a detailed implementation plan with the understanding that it is subject to MLTC's approval. This plan will detail tasks, staff responsibilities, timelines, milestones and other processes which will ensure that contracted services begin at the agreed upon date. Our proposed implementation plan is outlined in **Figure 3.**

Staffing structure

WellCare will hire a local liaison staff for the FFS claims in order to avoid any risk-based business.

Task schedule

Key leaders from across our organization have reviewed this new requirement, and have decided to establish claims brokers service as a new LOB in WellCare. Our schedule includes a thoughtful approach to all aspects of services and operations, including recruiting and training internal staff, management of subcontractors, updates to all IT systems, updates to all processes and procedures, enhancements to member and provider outreach programs and materials, and successful completion of readiness reviews.

Figure 3

Task	Months	Start Date	Finish Date
Respond to and submit Nebraska Medicaid RFP	2.48	10/22/15	1/5/16
Analyze RFP responses to determine business requirements, identify IT deliverables and cost estimate, and obtain capital budget approval	5.78	9/12/16	3/6/17
Set Up Project Management Office for the Nebraska Medicaid initiative	5.78	9/12/16	3/6/17
Conduct readiness reviews with MLTC	0.52	10/16/17	10/31/17
Milestone: Operations	13.06	4/3/17	5/4/18
Create BMLs	1.77	9/7/17	10/30/17
Create Benefit Shells	3.10	7/14/17	10/16/17
Create Timely Filing Rules	4.60	7/14/17	11/30/17
Create Benefits configuration based on BML	2.30	9/22/17	11/30/17
Create/Update Authorization screens	2.30	9/22/17	11/30/17
Perform Unit Testing	2.48	10/1/17	12/15/17
Move configuration in test to Production	1.68	11/2/17	12/22/17
Fee Schedules	3.35	9/1/17	12/11/17
Master file updates (DRG)	3.00	9/1/17	11/30/17
Configure & Load Pricing packages (test & production)	3.35	9/21/17	12/31/17
Configure providers in test & production	0.81	12/7/17	12/31/17

Task	Months	Start Date	Finish Date
Configure Pricing Grids	3.06	9/14/17	12/15/17
Post Go Live validation	4.13	1/1/18	5/4/18
Readiness review prep (Claims)	1.77	9/29/17	11/20/17
Update/Create SATs	2.06	9/29/17	11/30/17
Identify staffing requirements	2.43	8/3/17	10/15/17
Create/Update Claims correspondence	3.60	8/3/17	11/20/17
Implement member EOB process	2.75	9/15/17	12/7/17
COB and claims processing	1.97	9/1/17	10/30/17
Establish Failure to Pay (FTP) process (if applicable)	1.97	9/1/17	10/30/17
Establish check run & A/P cycle	1.06	10/30/17	12/1/17
Transition of Care	1.19	10/30/17	12/5/17
EDI Configuration (X-Engine, CIS, Legacy)	4.00	9/1/17	12/31/17
Compliance (policies and procedures)	3.00	7/3/17	10/2/17
End-to End Claims Testing (45 – 60 days prior to go live)	2.16	10/26/17	12/30/17
Perform Legal tasks (vendor and provider agreements and amendments)	6.00	4/3/17	10/2/17
Update subcontractor agreements and systems	6.00	4/3/17	10/2/17
Perform pharmacy formulary updates and update pharmacy operations	1.03	7/28/17	8/28/17
Milestone: Communications	5.06	5/1/17	10/2/17
Develop and execute communication plan	1.03	5/1/17	6/1/17
Update / develop member and provider materials (claims correspondence, NoA letter, etc.)	4.06	6/1/17	10/2/17
Update member and provider portals	3.00	7/3/17	10/2/17
Update CareConnects and call center scripts	3.00	7/3/17	10/2/17
Milestone: Financial	5.94	7/3/17	12/31/17
Update audit and recovery processes and systems	3.00	7/3/17	10/2/17
Perform financial tasks	5.00	8/1/17	12/31/17
Milestone: Regulatory and Reporting	7.97	5/1/17	12/29/17
Update reports based on MLTC report requirements	1.03	5/1/17	6/1/17
Update encounter methodology, update systems, and test	4.06	6/1/17	10/2/17
Update policies and procedures	4.06	6/1/17	10/2/17
Update organizational staff, processes and systems	4.06	6/1/17	10/2/17
Update Appeals and Grievances processes and systems	4.06	6/1/17	10/2/17
Update quality and analytics reporting	6.03	6/1/17	12/1/17
Perform corporate compliance tasks (contract breakdown, Pre-Go Live assessment, Fraud and Abuse activities)	2.90	10/2/17	12/29/17
Develop training for operational staff	1.65	11/1/17	12/20/17
Provide inquiry access to MLTC and train staff	1.94	11/1/17	12/29/17
Milestone: IT	11.03	2/1/17	1/1/18

Task	Months	Start Date	Finish Date
Document requirements	2.10	2/1/17	4/3/17
Document functional system details	2.10	3/1/17	5/1/17

2. Provider Contract Template - Submit provider contract template as described in Section IV.I - Provider Network.

Please see Provider Contract Template attached herein.

PARTICIPATING PROVIDER AGREEMENT

THIS PARTICIPATING PROVIDER AGREEMENT ("**Agreement**") is made and entered into by and between WellCare of Nebraska, Inc. ("**Health Plan**") and [Insert Name of Contracted Provider] ("**Contracted Provider**"). Health Plan and Contracted Provider are sometimes referred to together as the "**Parties**" and individually as a "**Party**".

WHEREAS, Health Plan issues (or is pursuing a license allowing it to issue) health benefit plans and seeks to include health care providers in one or more provider networks for such plans; and

WHEREAS, Contracted Provider provides or arranges for the provision of health care items and services to the general public by health care providers employed by or subcontracted with Contracted Provider; and

WHEREAS, Health Plan and Contracted Provider desire to enter into this Agreement whereby Contracted Provider will provide or arrange for the provision of health care items and services to Health Plan's health benefit plan enrollees in exchange for payments from Health Plan, all subject to and in accordance with the terms and conditions of this Agreement;

NOW THEREFORE, the Parties agree as follows:

1. Construction.

1.1. The base part of this Agreement is designed for use with a variety of providers and Benefit Plans. Provisions specific to particular providers and Benefit Plans are included in Attachments to the Agreement.

1.2. The following rules of construction apply to this Agreement: (a) the word "**include**", "**including**" or a variant thereof shall be deemed to be without limitation; (b) the word "**or**" is not exclusive; (c) the word "**day**" means calendar day unless otherwise specified; (d) the term "**business day**" means Monday through Friday, except Federal holidays; (e) all words used in this Agreement will be construed to be of such gender or number as the circumstances require; (f) references to specific statutes, regulations, rules or forms, such as CMS 1500 and UB-04 forms, include subsequent amendments or successors to them; and (g) references to a government department or agency include any successor departments or agencies.

2. Definitions. In addition to terms defined elsewhere in this Agreement, the following capitalized terms when used in this Agreement shall have the meanings set forth below. If an identical term is defined in a Program Attachment, the definition in the Program Attachment shall control with respect to Benefit Plans governed by the Program Attachment.

2.1. "**Affiliate**" means, with respect to a particular entity, another entity that directly, or indirectly through one or more intermediaries, controls, is controlled by or is under common control with, the entity. An entity "**controls**" an entity in which it has the power to vote, directly or indirectly, 50 percent or more of the voting interests in such entity or in the case of a partnership if it is a general partner, or the power to direct or cause direction of management and policies of such entity, whether through the ownership of voting shares, by contract or otherwise.

2.2. "**Benefit Plan**" means a health benefit policy or other health benefit contract or coverage document (a) issued by Health Plan or (b) administered by Health Plan pursuant to a Government

Contract. Benefit Plans and their designs are subject to change periodically.

2.3. "**Carve Out Agreement**" means an agreement between Health Plan and a third party Participating Provider whereby the third party assumes financial responsibility for or may provide certain management services related to particular Covered Services. Examples of possible Carve Out Agreements include agreements for radiology, laboratory, dental, vision, or hearing services.

2.4. "**Clean Claim**" means a claim for Covered Services that is (i) received timely by Health Plan, (ii) is on a completed, legible CMS 1500 form or UB 04 form, or electronic equivalent, (iii) is true, complete, accurate, and includes all necessary supporting documentation, (iv) includes all relevant information necessary to comply with Laws and Program Requirements and to determine payor liability, (v) is not subject to coordination of benefits, and (vi) is not under review for Medical Necessity. A Clean Claim does not include a claim from a Provider who is under investigation for fraud or abuse.

2.5. "**Credentialing Criteria**" means Health Plan's criteria for the credentialing or re-credentialing of Providers.

2.6. "**Covered Services**" means Medically Necessary health care items and services covered under a Benefit Plan.

2.7. "**DHHS**" means the U.S. Department of Health and Human Services, including its agency the Centers for Medicare and Medicaid Services ("**CMS**") and its Office of Inspector General ("**OIG**").

2.8. "**Effective Date**" means the date this Agreement becomes effective as determined by Health Plan and set forth on the signature page of this Agreement. Federal law prohibits Health Plan from contracting with individuals or entities that are barred from participation in Federal Health Care Programs. Accordingly, the Effective Date is subject to Health Plan's completion of credentialing and determination that Contracted Provider meets the Credentialing Criteria.

2.9. "**Emergency Services**" shall be as defined in the applicable Program Attachment.

2.10. "**Encounter Data**" means encounter information, data and reports for Covered Services provided to a Member that meets the requirements for Clean Claims.

2.11. "**Federal Health Care Program**" means a Federal health care program as defined in section 1128B(f) of the Social Security Act, and includes Medicare, Medicaid, and CHIP.

2.12. "**Government Contract**" means a contract between Health Plan and a Governmental Authority or government authorized entity for Health Plan to provide health benefits coverage for Federal Health Care Program beneficiaries.

2.13. "**Governmental Authority**" means the United States of America, the States, or any department or agency thereof having jurisdiction over Health Plan, a Provider or their respective Affiliates, employees, subcontractors or agents.

2.14. "**Ineligible Person**" means an individual or entity who (a) is currently excluded, debarred, suspended or otherwise ineligible to participate in (i) Federal Health Care Programs, as may be identified in the List of Excluded Individuals/Entities maintained by the OIG, or (ii) Federal procurement or non-procurement programs, as may be identified in the System for Award Management maintained by the General Services Administration, (b) has been convicted of a criminal offense subject to OIG's

mandatory exclusion authority for Federal Health Care Programs described in section 1128(a) of the Social Security Act, but has not yet been excluded, debarred or otherwise declared ineligible to participate in such programs, or (c) is currently excluded, debarred, suspended or otherwise ineligible to participate in State medical assistance programs, including Medicaid or CHIP, or State procurement or non-procurement programs as determined by a State Governmental Authority.

2.15. "**Laws**" means any and all applicable laws, rules, regulations, statutes, orders, standards, guidance and instructions of any Governmental Authority, as adopted, amended, or issued from time to time, including (a) the Social Security Act, including Titles XVIII ("**Medicare**"), XIX ("**Medicaid**") and XXI (State Children's Health Insurance Program or "**CHIP**"), (b) the Health Insurance Portability and Accountability Act of 1996 ("**HIPAA**"), (c) Federal and State privacy laws other than HIPAA, (d) Federal and State laws regarding patients' advance directives, (e) State laws and regulations governing the business of insurance, (f) State laws and regulations governing third party administrators or utilization review agents, and (g) State laws and regulations governing the provision of health care services.

2.16. "**Medically Necessary**" or "**Medical Necessity**" shall be as defined in the applicable Program Attachment.

2.17. "**Member**" means an individual properly enrolled in a Benefit Plan and eligible to receive Covered Services at the time such services are rendered.

2.18. "**Member Expenses**" means copayments, coinsurance, deductibles, or other cost share amounts, if any, that a Member is required to pay for Covered Services under a Benefit Plan.

2.19. "**Non-Contracted Services**" means Covered Services that are (a) subject to Carve Out Agreements and not approved by Health Plan in advance as further described in this Agreement, or (b) provided by an Ineligible Person.

2.20. "**Overpayment**" means the payments a Provider receives from Health Plan or its Affiliates to which the Provider is not entitled, including payments (a) for items and services that are not Covered Services, (b) paid in error, (c) resulting from enrollment errors, (d) resulting from claims payment errors, data entry errors or incorrectly submitted claims, or (e) for claims paid when Health Plan was the secondary payor and the Provider should have been reimbursed by the primary payor. An Overpayment also includes any payment Health Plan makes to satisfy an obligation of a Provider, including refunds of improperly collected Member Expenses to a Member or reimbursement to subcontracted Providers.

2.21. "**Participating Provider**" means an individual or entity that has entered into an agreement with Health Plan or a Health Plan contractor to provide or arrange for the provision of Covered Services to Members.

2.22. "**Principal**" means a person with a direct or indirect ownership interest of five percent or more in Provider.

2.23. "**Program**" means (a) a Federal Health Care Program, or (b) a commercial insurance program, including a program created under Laws regarding commercial health insurance exchanges.

2.24. "**Program Attachment**" means an attachment to this Agreement describing the terms of a Provider's participation in Health Plan's provider network for a Program.

2.25. "**Program Requirements**" means the requirements of Governmental Authorities

governing a Provider's participation in Health Plan's provider network and rendering Covered Services to Members pursuant to a Benefit Plan, including where applicable the requirements of a Government Contract, which include those terms set forth in a Program Attachment.

2.26. "**Provider**" means (a) Contracted Provider or (b) other individual or entity that is employed, or directly or indirectly subcontracted by Contracted Provider to provide or arrange for the provision of Covered Services to Members under this Agreement.

2.27. "**Provider Manual**" means, collectively, Health Plan's provider manuals, quick reference guides, WellCare Companion Guide, and educational materials setting forth Health Plan's requirements, rules, policies and procedures applicable to Participating Providers, as adopted or amended by Health Plan from time to time. The Provider Manual is available on Health Plan's website.

2.28. "**State**" means any of the 50 United States, the District of Columbia or a U.S. territory.

2.29. "**WellCare**" means WellCare Health Plans, Inc., an Affiliate of Health Plan.

2.30. "**WellCare Companion Guide**" means the transaction guide that sets forth data requirements and electronic transaction requirements for Clean Claims and Encounter Data submitted to Health Plan or its Affiliates, as amended from time to time. The WellCare Companion Guide is part of the Provider Manual.

3. Scope.

3.1. Non-Contracted Services are outside the scope of this Agreement.

3.2. Providers may freely communicate with Members about their treatment regardless of benefit coverage limitations. Health Plan does not dictate or control clinical decisions respecting a Member's medical treatment or care. Medical care is the responsibility of the treating Provider regardless of any coverage determination by Health Plan. Nothing in this Agreement shall be interpreted to permit interference by Health Plan with communications between a Provider and a Member regarding the Member's medical condition or available treatment options.

3.3. This is not an exclusive agreement for either Party, and there is no guarantee (a) Health Plan will participate in any particular Program, or (b) any particular Benefit Plan will remain in effect.

3.4. Subject to Laws and Program Requirements, Health Plan reserves the right to create distinct provider networks for a Benefit Plan, and to determine Provider participation in such networks.

3.5. Subject to Laws and Program Requirements, Health Plan reserves the right to approve any Provider's participation under this Agreement, or to terminate or suspend any Provider from participation under this Agreement or one or more particular Benefit Plans. Health Plan is not obligated to refer or assign a minimum number of Members to or maintain a minimum number of Members with a Provider.

4. Provider Responsibilities.

4.1. Principals. Contracted Provider shall comply with requirements for disclosure of ownership and control, business transactions, and information for persons convicted of crimes against Federal Health Care Programs as described in section 1124 of the Social Security Act, 42 CFR part 420 subpart C (Program Integrity: Medicare) and 42 CFR part 455 subpart B (Program Integrity: Medicaid).

Contracted Provider represents that it has provided Health Plan with the information listed on the Attachment titled "Information for Contracted Provider / Principals" for itself and all of its Principals as of the Effective Date. Contracted Provider shall notify Health Plan of any change in the information within 30 days of such change.

4.2. Providers. Contracted Provider shall provide Health Plan with the information listed on the Attachment titled "Information for Providers" for itself and the Providers as of the Effective Date, in a form and format acceptable to Health Plan. Contracted Provider shall provide notice to Health Plan of any change in the information for itself and the Providers within 30 days of the change. When Contracted Provider terminates a Provider, other than for cause, Contracted Provider will give Health Plan at least 90 days prior written notice of the termination.

4.2.1. Employed Providers. Contracted Provider shall maintain and enforce binding internal policies and procedures or agreements with its employed Providers that are consistent with and require adherence to this Agreement. Contracted Provider shall provide Health Plan with such information requested by Health Plan, or as required by a Governmental Authority or accreditation body, necessary to verify the employment of its employed Providers.

4.2.2. Subcontracted Providers. If Contracted Provider, such as an independent practice association, physician hospital organization or physician group, uses subcontracted Providers:

(a) Contracted Provider shall maintain and enforce written agreements with its subcontracted Providers that are consistent with and require adherence to this Agreement. Upon Health Plan's request, Contracted Provider shall provide Health Plan with copies of entire agreements between itself or other Providers and the subcontracted Providers. The compensation terms in such agreements may be redacted unless required by Governmental Authorities. In no event shall an agreement between or among Providers supersede this Agreement respecting matters covered by this Agreement. Notwithstanding anything to the contrary in any such agreement, this Agreement shall control over the terms of any such agreement in all respects as to matters covered by this Agreement.

(b) Upon Health Plan's request, Contracted Provider shall provide Health Plan with a duly executed Opt In Agreement in the form set forth on the Attachment titled "Form of Opt-In Agreement" from each subcontracted Provider. Each executed Opt In Agreement shall be made a part of and incorporated into this Agreement, and Contracted Provider accepts the appointment in the Opt In Agreement to act on the subcontracted Provider's behalf. If Health Plan requests and does not receive a duly executed Opt In Agreement for a proposed subcontracted provider, Health Plan shall not approve the proposed subcontracted provider or its employed providers as Providers under this Agreement. Contracted Provider waives any non-compete provisions in its agreements with subcontracted Providers to the extent that, if enforced, would prohibit a subcontracted Provider from contracting directly with Health Plan pursuant to the Opt-In Agreement.

(c) Subcontracted Providers shall maintain and enforce binding internal policies and procedures or agreements with their employed Providers that are consistent with and require adherence to this Agreement. Subcontracted Providers shall provide Health Plan with such information requested by Health Plan, or as required by a Governmental Authority or accreditation body, necessary to verify the employment of their employed Providers.

(d) Any obligation of Contracted Provider in this Agreement shall apply to subcontracted Providers to the same extent that it applies to Contracted Provider. Contracted Provider shall require the timely and faithful performance of this Agreement by subcontracted Providers.

4.2.3. Credentialing. All Providers must meet the Credentialing Criteria. Subject to Laws and Program Requirements, (a) Health Plan conducts credentialing of providers before they begin providing Covered Services and re-credentialing from time to time thereafter as required for Health Plan's compliance with Laws, Program Requirements and accreditation standards, and Providers shall consent to and cooperate with such credentialing/re-credentialing, which may include site reviews, and (b) until successful completion of credentialing of a provider by Health Plan, (i) the provider shall not be added as a Participating Provider under this Agreement, and (ii) the provision of, and payment for, Health Plan authorized Covered Services to Members by the provider shall be subject to Health Plan's policies and procedures for non-participating providers.

4.3. Covered Services. Providers shall provide Covered Services to Members, subject to and in accordance with the terms of this Agreement.

4.3.1. Standards. Providers shall provide Covered Services in accordance with Laws and generally accepted standards of medical practice, including nationally recognized clinical protocols and guidelines where available. Providers shall ensure that Covered Services are available to Members on a 24 hour/day, 7 day/week basis, except Providers who do not provide Emergency Services shall ensure that Covered Services are available to Members in accordance with standard operating hours for each Provider location and shall maintain an after-hours phone service for individuals to seek instructions in the event of an emergency.

4.3.2. Eligibility. Except for Emergency Services, Providers shall verify Member eligibility in accordance with the Provider Manual before providing Covered Services to a Member. Health Plan provides member eligibility information through Health Plan's provider website and other means. For Emergency Services, Providers shall verify Member eligibility no later than the next business day after the Member is stabilized or the Provider learning the individual may be a Member, whichever is later. Members' eligibility status is subject to retroactive disenrollment, and Health Plan may, unless prohibited by Laws and Program Requirements, recoup payments for items or services provided to such individuals after the effective date of disenrollment even if such items and services were authorized by Health Plan.

4.3.3. Prior Authorization. Except for Emergency Services or where prior authorization is not required by the Provider Manual, Providers shall obtain prior authorization for Covered Services in accordance with the Provider Manual. Except where not permitted by Laws or Program Requirements, Health Plan may deny payment for Covered Services where a Provider fails to meet Health Plan's requirements for prior authorization.

4.3.4. Referrals. Providers shall not refer Members to other health care providers, including other Participating Providers, for Covered Services without the approval of Health Plan, except (a) in case of Emergency Services, (b) when Member self-referral is permitted by the Benefit Plan, or (c) as permitted by the Provider Manual. When making a referral to another health care provider, a Provider shall furnish the other provider complete information on treatment procedures and diagnostic tests performed prior to such referral, which may include providing copies of the medical records.

4.3.5. Non-Covered Services. Before a Provider provides items or services to a Member that are not Covered Services, Provider shall (a) inform the Member of the specific items or services that are not Covered Services and that they will not be paid for by Health Plan, and (b) obtain the Member's written agreement to pay for such specific items or services after being so advised. Provider may contact Health Plan to determine if an item or service is a Covered Service.

4.3.6. Carve Out Agreements. While a Carve Out Agreement is in effect, Covered Services subject to the Carve Out Agreement shall be Non-Contracted Services and are not within the scope of this Agreement, except for (a) Emergency Services, or (b) Covered Services authorized by Health Plan in advance in accordance with the Provider Manual, in which cases the terms and conditions of this Agreement, including compensation, shall apply. Health Plan shall notify Contracted Provider of Carve Out Agreements through the Provider Manual or other notice. Upon expiration or termination of a Carve Out Agreement, Provider shall provide the Covered Services to Members that were subject to the Carve Out Agreement, subject to and in accordance with the terms of this Agreement, including compensation.

4.4. Claims and Encounter Data / EDI.

4.4.1. Clean Claims. Providers shall electronically prepare and submit Clean Claims to Health Plan within _____ days or such other time period required by Laws or Program Requirements, of the date of a Covered Service or the date of discharge from an inpatient facility, as the case may be. Unless prohibited by Laws and Program Requirements, Health Plan may deny payment for any claims that fail to meet Health Plan's submission requirements for Clean Claims or that are received after the time limit in this Agreement for filing Clean Claims.

4.4.2. Additional Reports. If Health Plan requests additional information, data, or reports from a Provider regarding Covered Services provided to Members for risk adjustment data validation or other administrative purposes, even if Health Plan has paid claims or accepted Encounter Data related to the Covered Services, the Provider shall provide the information, data or reports as requested by Health Plan.

4.4.3. NPI Numbers / Taxonomy Codes. Payment of compensation for Covered Services is conditioned on Providers including their NPI numbers and Provider taxonomy codes on claims or encounter data submitted under this Agreement, and Health Plan may deny payment for Covered Services where a Provider fails to meet these requirements.

4.4.4. Electronic Transaction Requirements. Provider shall submit all claims and encounter data to Health Plan electronically. Providers shall (a) follow the requirements for electronic data interchange in accordance with the current HIPAA Administrative Simplification transaction standards and WellCare Companion Guide, and (b) submit all claims and encounter data either through a clearinghouse used by Health Plan or directly to Health Plan in accordance with the WellCare Companion Guide.

4.4.5. EFT / Remittance Advice. If a Provider is able to accept payments and remittance advice electronically, (a) the Provider shall register and complete the forms for electronic funds transfer and electronic remittance advice no later than 60 days following Health Plan's confirmation of Provider's status as participating, and (b) Health Plan shall make all payments and remittance advice to the Provider electronically. If a Provider is not able to accept payments and remittance advice electronically, the Provider shall make good faith efforts to be able to accept electronic funds transfer and electronic remittance within 24 months of the Effective Date.

4.4.6. Coordination of Benefits. Health Plan shall coordinate payment for Covered Services in accordance with the terms of a Member's Benefit Plan and Laws. Providers shall provide Health Plan with explanations of benefits and other documents and information in their possession regarding insurance covering a Member that is primary to the Member's Benefit Plan. Providers shall bill primary insurers for items and services they provide to a Member before they submit claims for the same

items or services to Health Plan. If Health Plan is not the primary payor for Covered Services provided to a Member, then when not prohibited by Laws or Program Requirements, Health Plan's payment to Provider for such services shall not exceed the compensation in this Agreement less amounts payable by the primary payor or payors, less Member Expenses. Unless prohibited by Laws and Program Requirements, Health Plan may recoup payments for items or services provided to a Member where other insurers are determined to be responsible for such items and services.

4.4.7. Subrogation. Providers shall cooperate and assist Health Plan with its subrogation efforts.

4.4.8. No payment made by Health Plan under this Agreement is intended as a financial incentive or inducement to reduce, limit or withhold Covered Services required by Members.

4.5. Member Protections.

4.5.1. Providers shall not discriminate in their treatment of Members based on Members' health status, source of payment, cost of treatment, participation in Benefit Plans, race, ethnicity, national origin, religion, gender, age, mental or physical disability, sexual orientation, or genetic information.

4.5.2. In no event including nonpayment by Health Plan, Health Plan's insolvency or breach of the this Agreement, shall a Provider bill, charge, collect a deposit from, seek compensation, remuneration or reimbursement from, or have any recourse against any Member or persons (other than Health Plan) acting on the Member's behalf, for amounts that are the legal obligation of Health Plan. This provision (a) shall survive termination or expiration of this Agreement regardless of the cause giving rise to termination or expiration, (b) shall be construed for the benefit of Members, (c) does not prohibit collection of Member Expenses where lawfully permitted or required, and (d) supersedes any oral or written agreement to the contrary now existing or hereafter entered into between a Provider and Members or persons acting on their behalf.

4.5.3. Regardless of any denial of a claim or reduction in payment to a Provider by Health Plan, in no event will a Member be responsible for payment for any Covered Services other than Member Expenses. However, Members shall not be responsible for Member Expenses where collection of Member Expenses is prohibited by Laws, Program Requirements, or this Agreement. If payment of an amount sought in a claim is denied or reduced by Health Plan, the Provider shall adjust Member Expenses accordingly.

4.5.4. Except where collection of Member Expenses is prohibited by Laws, Program Requirements, or this Agreement, a Provider shall (a) collect Member Expenses directly from the Member, and (b) not waive, discount or rebate any such amounts except as permitted by and in accordance with Laws and Program Requirements regarding prohibited inducements to Federal Health Care Program beneficiaries.

4.5.5. Providers shall not bill Members for any items or services, such as missed appointments or administrative fees, where such billing is prohibited by Laws or Program Requirements.

4.6. Provider Manual. The Provider Manual supplements and is made a part of and incorporated into this Agreement, and Providers shall comply with the Provider Manual. Health Plan may amend the Provider Manual from time to time upon notice to Provider by posting to Health Plan's provider website, email or other means of notice permitted by this Agreement, provided that in the case of

material revisions to the Provider Manual, Health Plan shall provide notice in accordance with the provisions of this Agreement regarding written notice. Changes to the Provider Manual shall become effective 15 days after such posting or notice, or such other time period required for Health Plan to comply with Laws, Program Requirements or accreditation standards. Providers shall have and maintain systems necessary for access to Health Plan's provider website, and check for revisions to the Provider Manual from time to time.

4.7. Quality Improvement. Providers shall comply with Health Plan's quality improvement programs, including those designed to improve quality measure outcomes in the then current Healthcare Effectiveness Data and Information Set (HEDIS) or other quality or outcome measures. Health Plan may audit Providers periodically and upon request Providers shall provide Records to Health Plan for HEDIS or other quality reasons and risk management purposes, including Records that will enable Health Plan to perform a thorough assessment of the overall care being provided to Members.

4.8. Utilization Management. Providers shall cooperate and participate in Health Plan's utilization review and case management programs. Health Plan's utilization review/case management programs may include provisions for (a) verification of eligibility and prior authorization for Covered Services, (b) concurrent and retrospective reviews, (c) requirements regarding referrals to third party Participating Providers, and (d) corrective action plans.

4.9. Member Grievances / Appeals. Providers shall comply with the Provider Manual, Laws and Program Requirements regarding Member grievances and appeals, including by providing information, records or documents requested by Health Plan and participating in the grievance/appeal process.

4.10. Compliance. In performing this Agreement, Providers shall comply with all Laws and Program Requirements. Providers shall (a) cooperate with Health Plan with respect to Health Plan's compliance with Laws and Program Requirements, including downstream requirements that are inherent to Health Plan's responsibilities under Laws or Program Requirements, and (b) not knowingly take any action contrary to Health Plan's obligations under Laws or Program Requirements.

4.10.1. Privacy / HIPAA. Providers shall maintain Member information and medical records in accordance with Laws, including Federal and State Laws related to privacy and confidentiality of Member information and medical records, including HIPAA, and shall use and disclose such information or records only in accordance with Laws and Program Requirements.

4.10.2. Fraud, Waste and Abuse. Providers shall comply with Laws designed to prevent or ameliorate fraud, waste, and abuse, including applicable provisions of Federal criminal law, the False Claims Act (31 USC §§ 3729 et. seq.), and the anti-kickback statute (section 1128B(b) of the Social Security Act).

4.10.3. Compliance Program / Reporting. OIG publishes compliance program guidance for health care firms available at http://oig.hhs.gov/fraud/complianceguidance.asp. Contracted Provider shall, and shall require its employees and its subcontractors and their employees to, comply with Health Plan compliance program requirements, including Health Plan's compliance training requirements, and to report to Health Plan any suspected fraud, waste, or abuse or criminal acts by Health Plan, Contracted Provider, other Providers, their respective employees or subcontractors, or by Members. Reports may be made anonymously through the WellCare fraud hotline at (866) 678-8355. Also, if DHHS publishes compliance program requirements that providers must follow as a condition of participation in Federal Health Care Programs, Contracted Provider shall, and shall require its subcontractors to, comply with

such requirements.

4.10.4. Accreditation. Providers shall comply with policies and procedures required for Health Plan to obtain or maintain its accreditation from accreditation bodies, including the National Committee for Quality Assurance or Utilization Review Accreditation Commission.

4.10.5. Acknowledgement of Federal Funding. Claims, data and other information submitted to Health Plan pursuant to this Agreement may be used, directly or indirectly, for purposes of obtaining payments from Federal or State governments under Federal Health Care Programs, and payments that Providers receive under this Agreement may be, in whole or in part, from Federal funds.

(a) Providers shall, upon request of Health Plan, certify, based on its best knowledge, information and belief, that all data and other information directly or indirectly reported or submitted to Health Plan pursuant to this Agreement is accurate, complete and truthful.

(b) Providers shall not claim payment in any form, directly or indirectly, from a Federal Health Care Program for items or services covered under this Agreement, except for wrap around payments made directly by Governmental Authorities to certain qualified providers, such as Federally qualified health centers ("**FQHCs**") or rural health clinics ("**RHCs**") where applicable.

(c) If a Governmental Authority imposes a reduction to the Federal or State funds Health Plan receives under a Government Contract, Health Plan may adjust its payments to Provider by an equivalent or comparable amount. Such adjustment shall be effective concurrent with the effective dates such reductions are imposed upon Health Plan.

4.10.6. Ineligible Persons. Contracted Provider warrants and represents as of the Effective Date and throughout the term of the Agreement and the duration of post expiration or termination transition activities described in this Agreement, that none of it, its Principals or any individual or entity it employs or has contracted with to carry out its part of this Agreement is an Ineligible Person.

4.10.7. Compliance Audit. Health Plan shall be entitled to audit Providers with respect to compliance issues, including their compliance programs, and require them to address compliance issues through education, counseling or corrective action plans. Providers shall cooperate with Health Plan with respect to any such audit, including by providing Health Plan with Records and site access within such time frames as requested by Health Plan.

4.10.8. Fines / Penalties. The following applies if Provider is capitated or Health Plan has delegated activities to Provider pursuant to a separate delegation addendum: Provider shall reimburse Health Plan for any fines, penalties or costs of corrective actions required of Health Plan by Governmental Authorities caused by Provider's failure to comply with Laws or Program Requirements, including failure to submit accurate encounters on a timely basis or to properly perform delegated functions.

4.11. Licensure. Providers shall secure and maintain all necessary licenses, certificates, permits, registrations, consents, approvals and authorizations that must be obtained by them to perform their obligations under this Agreement. As required by Program Requirements, Providers shall meet the conditions of participation and be enrolled in applicable Federal Health Care Programs (including for dual eligible special needs plan Members, both Medicare and Medicaid) and have all accreditations necessary to meet such conditions of participation.

4.12. Insurance. Contracted Provider and its subcontracted Providers shall secure and maintain for themselves and their employees, commercial general liability and professional liability (malpractice) insurance or self-insurance coverage for claims arising out of events occurring during the term of this Agreement and any post expiration or termination activities under this Agreement, in amounts required to meet Credentialing Criteria, and worker's compensation insurance as required by State Laws. Contracted Provider and its subcontracted Providers shall, upon request of Health Plan, provide Health Plan with certificates of insurance or other evidence of coverage reflecting satisfaction of the foregoing requirements of this paragraph. Contracted Provider and the subcontracted Providers shall provide at least 30 days prior notice to Health Plan in advance of any material modification, cancellation or termination of their insurance.

4.13. Proprietary Information. In connection with this Agreement, Health Plan or its Affiliates may disclose to Providers, directly or indirectly, certain information that Health Plan or its Affiliate have taken reasonable measures to maintain as confidential and which derives independent economic value from not being generally known or readily ascertainable by the public (**"Proprietary Information"**). Proprietary Information includes Member lists, the compensation provisions of this Agreement, and other information relating to Health Plan's or its Affiliates' business that is not generally available to the public. Contracted Provider shall, and shall require its subcontractors to, hold in confidence and not disclose any Proprietary Information and not use Proprietary Information except (a) as expressly permitted under this Agreement, or (b) as required by Laws or legal or regulatory process. Contracted Provider shall, and shall require its subcontractors to, provide Health Plan with prior notice of any such disclosure required by Laws or legal or regulatory process so that Health Plan can seek an appropriate protective order. Contracted Provider shall, and shall require its subcontractors to, disclose Proprietary Information only in order to perform their obligations under this Agreement, and only to persons who have agreed to maintain the confidentiality of the Proprietary Information. The requirements of this Agreement regarding Proprietary Information shall survive expiration or termination of this Agreement.

4.14. Required Notices. In addition to any other notices required under this Agreement, Contracted Provider shall notify Health Plan within five business days of Contracted Provider's knowledge, or when Contracted Provider should have known, of any event that could reasonably be expected to impair the ability of a Provider to comply with the obligations of this Agreement, including any of the following: (a) an occurrence that causes any of the representations and warranties in this Agreement made by or on behalf of a Provider to be inaccurate, (b) a Provider fails to maintain insurance as required by this Agreement, (c) a Provider's license, certification or accreditation expires or is suspended, revoked, conditioned or otherwise restricted, (d) a Provider is excluded, suspended or debarred from, or sanctioned under a Federal Health Care Program, (e) a disciplinary action is initiated by a Governmental Authority against a Provider, (f) where applicable, a Provider's hospital privileges are suspended, limited, revoked or terminated, (g) a Provider is under investigation for fraud or a felony, or (h) a Provider enters into a settlement related to any of the foregoing.

5. Health Plan Responsibilities.

5.1. ID Cards. Health Plan shall issue identification cards to Members and instruct them to present their cards to providers when seeking health care items and services.

5.2. Claims Processing. Health Plan shall pay or deny Clean Claims within the time period set forth in Attachment C. Health Plan uses claims editing software programs to assist it in determining proper coding for provider claim reimbursement. Such software programs use industry standard coding criteria and incorporate guidelines established by CMS such as the National Correct Coding Initiative and the National Physician Fee Schedule Database, the AMA and Specialty Society correct coding guidelines,

and state specific regulations (collectively, "Coding Authorities"). These software programs may result in claim edits for specific procedure code combinations.

5.3. Compensation. Compensation shall be as set forth in Attachment C. Providers shall accept such compensation (plus wrap around payments from Governmental Authorities to qualified providers such as FQHCs or RHCs where applicable) as payment in full for Covered Services rendered to Members and all other activities of Providers under this Agreement. Items and services constituting "**never events**" as described in the Provider Manual shall not be paid. Health Plan shall not pay for Non-Contracted Services.

5.4. Medical Record Review. Health Plan shall be entitled to perform concurrent or retrospective reviews of medical records for utilization management purposes or to verify that items and services billed to or paid for by Health Plan were provided and billed correctly in accordance with this Agreement and the Provider Manual, or were Covered Services (including that such items and services were Medically Necessary).

5.5. Overpayments. Overpayment recovery shall be in accordance with Health Plan's Provider Manual and Providers shall refund Overpayments to Health Plan within 30 days (or such other timeframe as required by Laws or Program Requirements) of the Provider's receipt of notice from Health Plan of such Overpayments ("Notice Period") or Provider's knowledge of such Overpayment. This section regarding Overpayments shall survive expiration or termination of this Agreement. Health Plan shall not seek repayment of an Overpayment from a Provider beyond the time period set forth in Health Plan's Provider Manual, unless a longer time is required or permitted by Laws or Program Requirements. Notwithstanding anything to the contrary herein, there shall be no deadline within which Health Plan may seek recovery of an Overpayment in a case of fraud.

5.5.1 Unless prohibited by Laws or Program Requirements, Contracted Provider, for itself and the Providers, authorizes Health Plan to offset Overpayments against any future payments due to Provider.

5.5.2 Except for offsets related to changes in Member eligibility, which shall not require notice prior to deducting Overpayments, Health Plan shall notify Providers that an offset against future payments will occur unless the Provider (a) refunds such amounts within the Notice Period, or (b) provides Health Plan with a written explanation of why the Overpayments should not be refunded along with any supporting documentation. If the Provider does not respond within the Notice Period, Health Plan shall deduct Overpayments from future payments.

5.5.3 If Provider disputes Overpayments within the Notice Period, Health Plan shall review the Provider's explanation and supporting documentation. Health Plan shall notify Provider of its decision to either uphold or overturn its initial determination that the payment at issue was an Overpayment. If Health Plan upholds its decision, the Overpayment will be offset against future payments unless prohibited by Law or Program Requirements.

5.6. Suspension of Payment. If DHHS suspends payments to a Provider while Governmental Authorities investigate a credible allegation of fraud (as determined by DHHS), then Health Plan may suspend the Provider and payments for Covered Services provided by the Provider during the period of the DHHS suspension of payments.

5.7. Health Plan Designees. With regard to administering Benefit Plans, Health Plan may delegate administrative functions to third parties, and Provider shall cooperate with such third parties to

the same extent Provider is required to cooperate with Health Plan.

6. Records, Access & Audits.

6.1. Maintenance. Contracted Provider shall, and shall cause its Providers and subcontractors to, maintain operational, financial and administrative records, contracts, books, files, data, information, and other documentation related to the Covered Services provided to Members, claims filed, quality and cost outcomes, quality measurements and initiatives, and other services and activities conducted under this Agreement (collectively, "**Records**"). Contracted Provider shall ensure that such Records are kept in accordance with Laws, Program Requirements, generally accepted accounting principles (as applicable), and prudent record keeping practices and are sufficient to enable Health Plan to enforce its rights under this Agreement, including this section, and to determine whether Contracted Provider and its subcontractors and their respective employees are performing or have performed Contracted Provider's obligations in accordance with this Agreement, Laws and Program Requirements. Contracted Provider shall, and shall cause its subcontractors to, maintain such Records for the time period set forth in the applicable Program Attachment governing the Benefit Plan. Records that are under review or audit shall be retained until the completion of such review or audit if that date is later than the time frame indicated above.

6.2. Access & Audit. Health Plan shall have the right to monitor, inspect, evaluate and audit Contracted Provider, Providers, and their subcontractors. In connection with any monitoring, inspection, evaluation or audit, Contracted Provider shall, and shall cause Providers and its subcontractors to, provide Health Plan with access to all Records, personnel, physical facilities, equipment and other information necessary for Health Plan or its auditors to conduct the audit. Within [three][five] business days of Health Plan's written request for Records, or such shorter time period required for Health Plan to comply with requests of Governmental Authorities, Contracted Provider shall, and shall cause its subcontractors to, collect, compile, and prepare all such Records and furnish such Records to Health Plan in a format reasonably requested by Health Plan. Copies of such Records shall be at no cost to Health Plan.

6.3. The requirements of this Agreement regarding Records, access and audit shall survive expiration or termination of this Agreement.

7. Term and Termination.

7.1. Term. The term of this Agreement shall begin on the Effective Date and continue for a period of one year, and thereafter shall renew for successive periods of one year each unless a Party provides notice of nonrenewal to the other at least [90] [Hospital: 180] days before the end of the then current (initial or renewal) term, unless and until the Agreement is terminated in accordance with the terms and conditions of the Agreement, including those in a Program Attachment.

7.2. Termination.

7.2.1. Termination for Convenience. Either Party may terminate this Agreement, in whole or with respect to any particular Program, Benefit Plan, or Covered Service, at any time for any reason or no reason upon [90] [Hospital: 180] days prior notice to the other. Health Plan may terminate this Agreement as to any particular Provider at any time for any reason or no reason upon [90] [Hospital: 180] days prior notice to Contracted Provider.

7.2.2. Termination for Cause.

(a) A Party may terminate this Agreement for material breach by the other

Party of any of the terms or provisions of this Agreement by providing the other Party at least 90 days prior notice specifying the nature of the material breach. During the first 60 days of the notice period, the breaching Party may cure the breach to the reasonable satisfaction of the non-breaching Party.

(b) Health Plan may terminate this Agreement as to a particular Provider for a material failure by the Provider to comply with any of the terms or provisions of this Agreement by providing Contracted Provider at least 90 days prior notice specifying the nature of the material failure. During the first 60 days of the notice period, the affected Provider may cure the material failure to the reasonable satisfaction of Health Plan.

7.2.3. Immediate Termination. Health Plan may terminate this Agreement in its entirety, or with respect to a particular Provider, upon immediate notice to Contracted Provider upon the occurrence of any of the following: (a) termination is necessary for health and safety of Members, (b) a Provider suffers the loss, suspension or restriction of a license from a Governmental Authority or accreditation from an accreditation body required to carry out its obligations under this Agreement, including meeting the conditions of participation in applicable Programs, (c)(1) Contracted Provider becomes an Ineligible Person or voluntarily withdraws from participation in applicable Programs, or (2) another Provider becomes an Ineligible Person or voluntarily withdraws from participation in applicable Programs, and is not immediately terminated by Contracted Provider, (d) a Governmental Authority orders Health Plan to terminate the Agreement, (e) Health Plan reasonably determines or a Governmental Authority determines or advises that a Provider is engaging or has engaged in fraud or abuse, or has submitted a false claim, (f) a Provider fails to meet Credentialing Criteria, (g) a Provider fails to maintain insurance as required by this Agreement, (h) a Provider undergoes a change of control that is not acceptable to Health Plan, or (i) a Provider becomes insolvent, is adjudicated as bankrupt, has its business come into possession or control of any trustee in bankruptcy, has a receiver appointed for it, or makes a general assignment for the benefit of its creditors.

7.2.4. Transition of Care. To ensure that a transition is undertaken in an orderly manner that maximizes Member safety and continuity of care, upon expiration or termination of this Agreement for any reason except for immediate termination, Providers shall (a) continue providing Covered Services to Members through (1) the lesser of the period of active treatment for a chronic or acute medical condition or up to 90 days, (2) the postpartum period for Members in their second or third trimester of pregnancy, or (3) such longer period required by Laws or Program Requirements, and (b) cooperate with Health Plan for the transition of Members to other Participating Providers. The terms and conditions of this Agreement shall apply to any such post expiration or termination activities, provided that if a Provider is capitated, Health Plan shall pay the Provider for such Covered Services at 100 percent of Health Plan's then current rate schedule for the applicable Benefit Plans. The transition of care provisions in this Agreement shall survive expiration or termination of this Agreement.

7.2.5. Notification to Members. Upon expiration or termination of this Agreement, Health Plan will communicate such expiration or termination to Members as required by and in accordance with Laws and Program Requirements. Providers shall obtain Health Plan's prior written approval of Provider communications to Members regarding the expiration or termination of this Agreement. The foregoing sentence shall not prevent a Provider from engaging in communications with his patient regarding the patient's health.

8. Dispute Resolution.

8.1. Provider Administrative Review and Appeals. Where applicable, a Provider shall exhaust all Health Plan's review and appeal rights in accordance with the Provider Manual before seeking

any other remedy. Where required by Laws or Program Requirements, administrative reviews and appeals shall be subject to and resolved in accordance with administrative law.

8.2. Except as prohibited by State Laws, all claims and disputes between Health Plan and a Provider related to this Agreement must be submitted to arbitration within one year of the act or omission giving rise to the claim or dispute, except for claims based on fraud, which must be brought within the State statute of limitation governing fraud claims. The failure to initiate arbitration within the foregoing time period will constitute waiver of such claims and disputes.

8.3. Negotiation. Before a Party initiates arbitration regarding a claim or dispute under this Agreement, the Parties shall meet and confer in good faith to seek resolution of the claim or dispute. If a Party desires to initiate the procedures under this section, the Party shall give notice (a "**Dispute Initiation Notice**") to the other providing a brief description of the nature of the dispute, explaining the initiating Party's claim or position in connection with the dispute, including relevant documentation, and naming an individual with authority to settle the dispute on such Party's behalf. Within 20 days after receipt of a Dispute Initiation Notice, the receiving Party shall give a written reply (a "**Dispute Reply**") to the initiating Party providing a brief description of the receiving Party's position in connection with the dispute, including relevant documentation, and naming an individual with the authority to settle the dispute on behalf of the receiving Party. The Parties shall promptly make an investigation of the dispute, and commence discussions concerning resolution of the dispute within 20 days after the date of the Dispute Reply. If a dispute has not been resolved within 30 days after the Parties have commenced discussions regarding the dispute, either Party may submit the dispute to arbitration subject to the terms and conditions herein.

8.4. Arbitration. Except as barred or excepted by this Agreement, all claims and disputes between the Parties shall be resolved by binding arbitration in _____, _____. The arbitration shall be conducted through the American Arbitration Association ("**AAA**") pursuant to the AAA Commercial Arbitration Rules then in effect, subject to the following: Arbitration shall be commenced by completing and filing with AAA a Demand for Arbitration form in accordance with the Commercial Arbitration Rules setting forth a description of the dispute, the amount involved and the remedy sought, and sending notice of the demand to the opposing Party. The arbitration shall be held before a single arbitrator, unless the amount in dispute is more than $10 million, in which case it will be held before a panel of three arbitrators. In a case with a single arbitrator, the Parties shall select the arbitrator by agreement within 30 days of the date the Demand for Arbitration is filed, and if the Parties are unable to agree on the selection of an arbitrator within such time, AAA shall select an independent arbitrator. In the case of a panel, within 30 days of the date the Demand for Arbitration is filed each Party shall select an arbitrator, and the two arbitrators shall select the third arbitrator, and if the two arbitrators are unable to agree on the selection of a third arbitrator within such time, AAA shall select an independent third arbitrator. The arbitrator or panel may not certify a class or conduct class based arbitration. The decision of the arbitrator or panel shall be final and binding on the Parties. The award of the arbitrator or panel may be confirmed or enforced in any court having jurisdiction. Each Party shall assume its own costs related to the arbitration, including costs of subpoenas, depositions, transcripts, witness fees, and attorneys' fees. The compensation and expenses of the arbitrator and administrative fees or costs of the arbitration shall be borne equally by the Parties.

9. Miscellaneous.

9.1. Governing Law / Venue. This Agreement shall be governed by and construed and enforced in accordance with the laws of the State of _____, except where Federal law applies, without regard to principles of conflict of laws. Each of the Parties hereby agrees and consents to

be subject to the exclusive jurisdiction and venue of the appropriate State or Federal court located in _____, _____, in any suit, action, or proceeding seeking to enforce any provision of, or based on any matter arising out of or in connection with, this Agreement.

9.2. Waiver of Jury Trial. Each Party hereby irrevocably and unconditionally waives, to the fullest extent it may legally and effectively do so, trial by jury in any suit, action or proceeding arising hereunder.

9.3. Equitable Relief. Notwithstanding anything in this Agreement, either Party may bring court proceedings to seek an injunction or other equitable relief to enforce any right, duty or obligation under this Agreement.

9.4. Independent Contractors. The Parties are independent contractors. This Agreement shall not be deemed to create a partnership or joint venture, or an employment or agency relationship between the Parties. Neither Party has the right or authority to assume or create any obligation or responsibility on behalf of the other. Neither Party is liable for the acts of the other.

9.5. No Steering. For the term of this Agreement and for one year thereafter, Providers shall not engage in steering or otherwise directly or indirectly solicit any Member to join a competing health plan or induce any Member to cease doing business with Health Plan.

9.6. No Offshore Contracting. No work related to this Agreement may be performed outside of the United States without Health Plan's prior written consent.

9.7. The following applies to State plans: Contracted Provider shall not, and shall require Providers and their subcontractors not to, make any payments for items or services provided under a State plan to financial institutions or entities such as provider bank accounts or business agents located outside of the States. Further Contracted Provider shall not, and shall require its Providers and their subcontractors not to, make payments to telemedicine providers located outside of the States, or payments to pharmacies located outside of the States. Any such funds paid may be recovered by Health Plan or a State Governmental Authority with applicable jurisdiction over a plan.

9.8. Notices. Except for non-material revisions to the Provider Manual, all notices required or permitted under this Agreement must be in writing and sent by (a) hand delivery, (b) U.S. certified mail, postage prepaid, return receipt requested, (c) overnight delivery service providing proof of receipt, (d) facsimile, or (e) regular U.S. mail, first-class postage prepaid, to the addresses of the Parties as set forth on the signature page. Each Party may designate by notice any future or different addresses to which notices will be sent. Notices will be deemed delivered upon receipt or refusal to accept delivery, except for regular U.S. mail, which shall be deemed delivered seven days after the date of mailing. Notice to Contracted Provider shall constitute notice to all Providers. Routine day to day operational communications between the Parties are not notices in accordance with this section.

9.9. Incorporation of Laws / Program Requirements / Accreditation Standards. All terms and conditions of this Agreement are subject to Laws, Program Requirements, and accreditation standards. Any term, condition or provision now or hereafter required to be included in the Agreement by Laws, Program Requirements, or accreditation standards shall be deemed incorporated herein and binding upon and enforceable against the Parties, regardless of whether or not the term, condition or provision is expressly stated in this Agreement. Health Plan may amend this Agreement upon notice to Contracted Provider to comply with Laws, Program Requirements, or accreditation standards, and such amendment shall be effective upon receipt.

9.10. Amendment. Except as otherwise set forth in this Agreement, any amendments to this Agreement shall be in writing and signed by both Parties. However, Health Plan may amend this Agreement upon 30 days prior notice to Contracted Provider, and if Contracted Provider objects to the amendment, Contracted Provider shall notify Health Plan of the objection within the 30 day notice period, and Health Plan may terminate this Agreement for convenience in accordance with this Agreement.

9.11. Third Parties. Except as otherwise provided in this Agreement, this Agreement is not a third party beneficiary contract and no provision of this Agreement is intended to create or may be construed to create any third party beneficiary rights in any third party, including any Member.

9.12. Assignment. Contracted Provider may not assign, delegate or transfer this Agreement, in whole or in part, without the prior written consent of Health Plan. Health Plan may assign this Agreement, in whole or in part, to any purchaser of the assets or successor to the operations of Health Plan or its Affiliate. As used in this section, the term "**assign**" or "**assignment**" includes a change of control of a Party by merger, consolidation, transfer, or the sale of the majority or controlling stock or other ownership interest in such Party.

9.13. Name, Symbol and Service Mark. The Parties shall not use each other's name, symbol, logo, or service mark for any purpose without the prior written approval of the other. However, (a) Providers may include Health Plan's or Benefit Plan names in listings of health plans the providers participate in, and (b) Health Plan may use information about Providers in information or publications identifying Participating Providers or as required by Laws or Program Requirements. Providers shall provide comparable treatment to Health Plan as provided to other managed care organizations with respect to marketing or the display of cards, plaques or other logos provided by Health Plan to identify Participating Providers to Members.

9.14. Other Agreements. If a Provider participates as a Participating Provider under more than one agreement with Health Plan for a particular Program, Health Plan will compensate the Provider for Covered Services it provides to Members of Benefit Plans in that Program under the agreement selected by Health Plan.

9.15. Health Plan Affiliates. If a Provider renders covered services to a member of a benefit plan issued or administered by a Health Plan Affiliate, the Health Plan Affiliate may pay for such covered services, and the Provider shall accept, the applicable out of network rates paid by the Health Plan Affiliate for the member's benefit plan. A list of Health Plan Affiliates is available in the Provider Manual or on Health Plan's provider website. There shall be no joint liability between or among Health Plan and its Affiliates.

9.16. Force Majeure. The Parties shall have and maintain disaster recovery plans in accordance with high industry standards. However, if either Party's performance under this Agreement is prevented, hindered or delayed by reason of any cause beyond the Party's reasonable control that cannot be overcome by reasonable diligence, including war, acts of terrorism, civil disorders, labor disputes (other than strikes within such Party's own labor force), governmental acts, epidemics, quarantines, embargoes, fires, earthquakes, storms, or acts of God, such Party shall be excused from performance to the extent that it is prevented, hindered or delayed thereby, during the continuances of such cause; and such Party's obligations hereunder shall be excused so long as and to the extent that such cause prevents or delays performance. If a Provider is unable to perform under this Agreement due to an event as described in this paragraph, Health Plan may take whatever action is reasonable and necessary under the circumstances to ensure its compliance with Laws and Program Requirements and equitably adjust payments to the Provider until the Provider resumes its performance under this Agreement.

9.17. Severability. When possible, each provision of this Agreement shall be interpreted in such manner as to be effective, valid and enforceable under Laws. If any provision of this Agreement is held to be prohibited by, or invalid or unenforceable under Laws, such provision shall be ineffective only to the express extent of such prohibition, unenforceability or invalidity, without invalidating the remainder of this Agreement.

9.18. Waiver. No waiver shall be effective unless in writing and signed by the waiving Party. A waiver by a Party of a breach or failure to perform this Agreement shall not constitute a waiver of any subsequent breach or failure.

9.19. Entire Agreement. This Agreement, including the Attachments each of which are made a part of and incorporated into this Agreement, the Provider Manual and any addenda or amendments comprises the complete agreement between the Parties and supersedes all previous agreements and understandings (whether verbal or in writing) related to the subject matter of this Agreement.

9.20. Headings. The various headings of this Agreement are provided for convenience only and shall not affect the meaning or interpretation of this Agreement or any provision of it.

9.21. Interpretation. Both Parties have had the opportunity to review this Agreement with legal counsel, and any ambiguity found in this Agreement shall not be construed in a Party's favor on the basis that the other Party drafted the provision containing the ambiguity.

9.22. Survival. Any provision of this Agreement, including an Attachment, that requires or reasonably contemplates the performance or existence of obligations by a Party after expiration or termination of this Agreement shall survive such expiration or termination regardless of the reason for expiration or termination.

9.23. Rights Cumulative. Except as set forth herein, all rights and remedies of a Party in this Agreement are cumulative, and in addition to all legal rights and remedies available to such Party.

9.24. Counterparts / Electronic Signature. This Agreement may be executed in any number of counterparts. The exchange of copies of this Agreement and of signature pages by facsimile transmission or electronic mail shall constitute effective execution and delivery of this Agreement as to the parties and may be used in lieu of the original Agreement for all purposes.

9.25. Warranties and Representations. Each Party warrants and represents, as of the Effective Date and continuously thereafter throughout the entire term of this Agreement and during the post expiration or termination transition period described herein, as follows:

9.25.1. The Party is a corporation or other legally recognized entity duly incorporated or organized, validly existing and in good standing under the laws of the State in which it is incorporated, organized or operating and it has the authority to transact business in each State in which it operates.

9.25.2. The Party has the corporate or company power and legal authority to, and has taken all necessary corporate or other action on its part to, authorize the execution and delivery of this Agreement and the performance of its obligations hereunder.

9.25.3. This Agreement has been duly executed and delivered by the Party, and constitutes a legal, valid, and binding agreement that is enforceable against such Party in accordance with its terms, except as limited by applicable bankruptcy, reorganization, moratorium and similar Laws affecting the enforcement of creditors' rights.

9.25.4. The execution and delivery of this Agreement and the performance of the Party's obligations hereunder do not (a) conflict with or violate any provision of the Party's organizational documents or Laws, or (b) conflict with, or constitute a default under, any contractual obligation of the Party.

The following Attachments are incorporated into and made a part of this Agreement:
Attachment A - Provider Specific Requirements/Covered Services/Information
Attachment B - Program Attachments
Attachment C - Compensation

(See following attachments)

DRAFT

ATTACHMENT A-1
PROVIDER SPECIFIC REQUIREMENTS / COVERED SERVICES
(PHYSICIAN/IPA/PHYSICIAN GROUP/NP/FQHC/RHC/BEHAVIORAL HEALTH SERVICES)

1. Additional Definitions.

   a. "**Assigned Member**" means a Member who selects or is assigned by Health Plan to a Primary Care Provider or (if required by Laws or Program Requirements) an allied health care practitioner supervised by a Physician, as the Member's Primary Care Provider.

   b. "**Covering Provider**" means a Provider who provides health care items and services to another Provider's patients when the other Provider is not available.

   c. "**Nurse Practitioner**" means a Provider who is licensed as a nurse practitioner and certified in advanced or specialized nursing practice, in accordance with applicable state Laws.

   d. "**Physician**" means a Provider who is a doctor of medicine or osteopathy.

   e. "**Primary Care Provider**" means a Physician, Nurse Practitioner, certified nurse midwife, physician assistant, or other duly licensed Provider who spends the majority of his/her clinical time providing Primary Care Services to patients, and may include a Provider in the practice of family medicine, general medicine, internal medicine or pediatrics, or obstetrics and gynecology.

   f. "**Primary Care Services**" means health care items or services available from Primary Care Provider within the scope of their medical or professional licenses or certifications, and shall include primary care items and services required by the Provider Manual or Program Requirements, which may include (i) assuring the timeliness of urgent, emergent, sick and preventive care to Members; (ii) conducting initial health assessments of new Members when such assessments are Covered Services under the applicable Benefit Plan; (iii) informing Members of specific health care needs that require follow up; (iv) instructing Members on measures they may take to promote their own health; (v) providing the coordination necessary for the referral of Members to specialists; or (vi) monitoring and follow-up of care provided by other providers for diagnosis and treatment.

   g. "**Specialty Provider**" means a Provider who provides Specialty Services.

   h. "**Specialty Services**" means health care items and services within the scope of a particular medical specialty.

2. Subject to and in accordance with the terms of this Agreement, applicable Laws, and Program Requirements, Contracted Provider shall provide or arrange for the provision of all Covered Services available from Providers that are within the scope of their medical or professional licenses or certifications.

3. If Contracted Provider employs or subcontracts with Providers to provide Covered Services, Contracted Provider shall be responsible to ensure that (a) Primary Care Providers render Primary Care Services to Members, including their Assigned Members, and (b) Specialty Providers provide Specialty Services to Members upon appropriate referral. If a Provider provides Covered Services that are subject to a Carve-Out Agreement, such services shall be Non-Contracted Services.

4. If a Provider provides or arranges for the provision of Primary Care Services to Assigned Members:

   a. The Provider shall have primary responsibility for arranging and coordinating the overall health care of Assigned Members, including (i) the provision of Primary Care Services from Primary Care Provider and appropriate referral to other Participating Providers, or if a Participating Provider is unavailable to any health care provider upon authorization of Health Plan, and (ii) managing and coordinating the performance of administrative functions relating to the delivery of Covered Services to Assigned Members.

   b. The Provider shall ensure Primary Care Provider make all reasonable efforts to (i) establish satisfactory provider-patient relationships with their Assigned Members and (ii) instruct their Assigned Members on measures they may take to promote their own health.

5. If a Provider provides or arranges for the provision of Specialty Services, the Provider shall ensure that Specialty Provider (i) care for common medical conditions in their medical specialty, (ii) provide consultation summaries or appropriate periodic progress notes to the Member's Primary Care Provider on a timely basis, after a referral or routinely scheduled consultative visit, and (iii) notify the Member's Primary Care Provider when scheduling a hospital admission or other procedure requiring the Primary Care Provider's approval.

6. Except for Emergency Services, when a Member requires a hospital admission by a Primary Care Provider or other Provider that the Primary Care Provider has referred a Member to, the Primary Care Provider shall, or shall arrange for the other Provider to, secure authorization for such admission from Health Plan prior to the admission. Providers shall seek further authorization for any extension of the initial length of stay approved for the Member in accordance with the Provider Manual.

7. Subject to Laws and Program Requirements regarding provider to patient ratios, a Provider shall accept Members as patients as long as the Provider is accepting new patients. Contracted Provider shall give Health Plan 60 days' prior notice in advance of any circumstance where a Provider is not available to accept Members as patients.

ATTACHMENT A-1
PROVIDER SPECIFIC REQUIREMENTS / COVERED SERVICES
(MEDICAL FACILITY)

Subject to and in accordance with the terms of this Agreement, applicable Laws, and Program Requirements, Contracted Provider shall provide or arrange for the provision of all Covered Services that are facility based health care items or services available from the Providers that are within the scope of their medical or professional licenses or certifications.

- Billing office contact person

ATTACHMENT A-4
FORM OF OPT IN AGREEMENT
(SUBCONTRACTED PROVIDER)

THIS OPT IN AGREEMENT ("**Opt In Agreement**") is made by and between Health Plan and the subcontracted Provider identified below ("**Subcontractor**").

WHEREAS, Health Plan and [Name of Contracted Provider] ("**Contracted Provider**") are Parties to the Participating Provider Agreement (as now or hereafter amended, the "**PPA**"); and

WHEREAS, Subcontractor is a subcontracted Provider under the PPA and will receive substantial benefits from the PPA;

NOW, THEREFORE, in consideration of those benefits and Health Plan entering into the PPA and this Opt In Agreement, Subcontractor agrees to the following:

1. Subcontractor has reviewed the PPA. The PPA is made a part of and incorporated into this Opt In Agreement. Capitalized terms not defined in this Opt In Agreement have the same definition as given in the PPA.

2. Subcontractor agrees to the terms and conditions of the PPA. Wherever in the PPA an action is required to be taken by Contracted Provider or a Provider, Subcontractor agrees to perform such action. Wherever in the PPA any representation or warranty is made by Contracted Provider or a Provider, Subcontractor agrees to comply with such representation or warranty.

3. Any obligation of Subcontractor in this Opt In Agreement or the PPA shall apply to Subcontractor's Providers to the same extent that it applies to Subcontractor. Subcontractor shall maintain and enforce internal policies and procedures or written agreements with its employed Providers that are consistent with and require adherence to the terms and conditions of this Opt In Agreement and the PPA. Subcontractor has the authority to bind its subcontracted Providers to this Opt In Agreement and PPA, and shall require the timely and faithful performance of this Opt In Agreement and the PPA by its subcontracted Providers.

4. Subcontractor hereby grants to Contracted Provider a power of attorney, coupled with an interest, to represent and bind Subcontractor in connection with all matters related to the PPA and this Opt In Agreement including granting any waivers of any of the terms of the PPA and this Opt In Agreement, and entering into any amendments or modifications of the PPA or this Opt In Agreement.

5. Subcontractor shall not assign any of its rights or delegate any of its duties or obligations under this Opt In Agreement or the PPA, in whole or in part, without the prior written consent of Health Plan.

6. If the PPA is terminated for any reason or Contracted Provider goes out of business, ceases operations or becomes insolvent, then Subcontractor: (a) for at least six months, shall continue to provide Covered Services to Members, subject to and in accordance with the terms and conditions of the PPA and this Opt In Agreement, (b) shall accept compensation from Health Plan for such Covered Services at the fee for service rates set forth in the PPA for the applicable Benefit Plans or, if the PPA does not include fee for service rates, at 100 percent of Health Plan's then current fee for service rates for the applicable Benefit Plans, and (c) after six months, may terminate its continuing participation under the PPA and this Opt-In Agreement upon 90 days prior notice to Health Plan.

7. In no event including nonpayment by Health Plan, Health Plan's insolvency or breach of the PPA or

this Opt In Agreement, shall Subcontractor bill, charge, collect a deposit from, seek compensation, remuneration or reimbursement from, or have any recourse against any Member or persons other than Health Plan acting on any Member's behalf, for amounts that are the legal obligation of Health Plan. This provision (a) shall be construed for the benefit of Members, (b) does not prohibit collection of Member Expenses where lawfully permitted or required, and (c) supersedes any oral or written agreement to the contrary now existing or hereafter entered into between Subcontractor and Members or persons acting on their behalf.

8. This Opt In Agreement shall be governed by and construed and enforced in accordance with the laws of the State of Nebraska, except where Federal law applies, without regard to principles of conflict of laws.

9. Any dispute with respect to this Opt In Agreement or the PPA or Subcontractor's performance under this Opt In Agreement or PPA shall be subject to and resolved in accordance with the dispute resolution procedures in the PPA.

10. Subcontractor warrants and represents the Providers listed on the attached schedule are included in and subject to this Opt In Agreement and Subcontractor has the power and legal authority to, and has taken all necessary corporate or other action to, authorize the execution and delivery of this Opt In Agreement and the performance of its obligations hereunder and in accordance with the PPA.

The undersigned Subcontractor, with the intent to be legally bound, hereby agrees and accepts the terms of this Opt In Agreement by signing below.

ATTACHMENT B-1
NEBRASKA MEDICAID AND CHIP
PROGRAMS ATTACHMENT

1. Participation in Nebraska Contract. Subject to and in accordance with the terms of the Agreement, including this Attachment, Contracted Provider agrees to participate in Health Plan's provider networks and render Covered Services to Members pursuant to the Benefit Plan offered or administered by Health Plan for the Programs in accordance with the Nebraska Contract.

2. Compensation. Compensation for Covered Services provided to Members of Benefit Plans under the Nebraska Contract is set forth in Attachment C.

3. Additional Definitions. The following definitions shall be incorporated into the Agreement. Capitalized terms used and not otherwise defined in this Agreement shall have the meanings set forth in the Agreement or, if not defined in the Agreement, in the Nebraska Contract or under Nebraska law:

   a. "**Department**" means the Nebraska Department of Health and Human Services.

   b. "**Emergency Medical Condition**" means a physical or behavioral condition manifesting itself by acute symptoms of sufficient severity (including, but not limited to severe pain) that a prudent layperson, who possesses an average knowledge of medicine and health, could reasonably expect the absence of immediate medical attention to result in the following: (i) placing the health of the individual (or with respect to a pregnant woman, the health of the woman or her unborn child) in serious jeopardy; or (ii) serious impairment to bodily functions; or (iii) serious dysfunction of any bodily organ or part.

   c. "**Emergency Services**" means covered inpatient and outpatient services that are as follows: (i) furnished by a provider that is qualified to furnish these services under Title 42 CFR; or (ii) needed to evaluate or stabilize an Emergency Medical Condition.

   d. **"MLTC"** means the **M**edicaid and **L**ong-**T**erm **C**are division of the Nebraska Department of Health and Human Services.

   e. "**Medically Necessary**" or "**Medical Necessity**" means those Covered Services and supplies that are, under the terms and conditions of the Nebraska Contract, determined through Health Plan utilization management to be: (1)Necessary to meet the basic health needs of the Member; (2)Rendered in the most cost-efficient manner and type of setting appropriate for the delivery of the covered service; (3)Consistent in type, frequency and duration of treatment with scientifically-based guidelines of national medical, research or health care coverage organizations or governmental agencies; (4) Consistent with the diagnosis of the condition; (5) Required for means other than the convenience of the Member, the Member's physician or other provider; and (6) No more intrusive or restrictive than necessary to provide a proper balance of safety, effectiveness and efficiency; (7) Of demonstrated value; and (8) No more intensive level of Covered Services than can be safely provided.

   f. "**Member**" means an individual or Covered Person enrolled in a Benefit Plan issued by Health Plan pursuant to the Nebraska Contract.

g. **"Nebraska Contract"** or **"NE Contract"** means the Contract between the DHHS and Health Plan, and includes, without limitation, the collective documentation, exhibits, schedules, amendments, and addendums containing the terms, conditions and requirements to implement the Benefit Plan such as the General Terms, Special Terms (SOW) and Special Contract Attachments. The Nebraska Contract is a Government Contract as defined in the Agreement.

h. **"Nebraska Medicaid Program" (NE Medicaid or Medicaid)** means health care services to eligible elderly and disabled individuals and eligible low-income pregnant women, children and parents. NE Medicaid also includes the Children's Health Insurance Program and home and community-based services for individuals qualified for Medicaid waivers. NE Medicaid is administered by the Division of Medicaid and Long Term Care (MLTC) of the Nebraska Department of Health and Human Services.

i. **"Nebraska Medical Assistance Program"** means Nebraska Medicaid

j. **"Patient-centered medical home" (PCMH)** means a community-based primary care setting that provides and coordinates high quality, planned, family-centered, health promotion, acute illness care, and chronic condition management.

k. **"Post-Stabilization Care Services"** means, in accordance with 42 C.F.R. § 438.114(a), Covered Services, related to an Emergency Medical Condition, that are provided after a Member is stabilized in order to maintain, improve or resolve the Member's stabilized condition.

l. **"State"** means the state of Nebraska or its designated regulatory agencies.

m. **"Subcontractor"** means any organization or person who provides a function or service for the Health Plan specifically related to securing or fulfilling the Health Plan's obligations under the terms of a contract. A subcontractor does not include a provider unless the provider is responsible for services other than those that could be covered by a provider agreement.

n. **"Value-Based Contract"** means payment and contractual arrangements with providers that include two (2) components: (i) provisions that introduce contractual accountabilities for improvements in defined service, outcome, cost or quality metrics and (ii) payment methodologies that align their financial and contractual incentives with those of the Health Plan through mechanisms that include, but are not limited to, performance bonuses, capitation, shared savings arrangements, etc.

4. Cumulative Provisions. All provisions of the Agreement and this Attachment are cumulative. All provisions shall be given effect when possible. If there is inconsistent or contrary language between this Attachment and any other part of the Agreement, the provisions of this Attachment shall prevail with respect to the Program described in this Attachment. Any obligation of Contracted Provider in this Attachment shall apply to Providers. Contracted Provider agrees to include the terms and conditions contained herein in its contracts with Providers. This Attachment may be updated as required by the Nebraska Contract, DHHS or other Governmental Authority.

5. Value-Based Contracts. Contracted Provider agrees that all applicable terms and conditions in the Nebraska Contract, any incorporated documents, and all applicable State and federal laws, as amended, including, without limitation 42 C.F.R. § 434.6, govern Contracted Provider's duties and responsibilities with regard to the provision of services to Members. **[NE Contract § IV.Q.6.c.]**

6. Emergency Services. Providers shall not be required to seek prior authorization for Emergency Services before the Member has been stabilized. Once a Member who receives Emergency Services is stabilized, the Provider shall seek prior authorization for Post-Stabilization Care Services for the Members specified in 42 CFR 438.114(e) and 42 CFR 422.113(c)(2). **[NE Contract § IV.E.14.b.]**

7. Covered Population. The covered population includes Health Plan's Members covered under the Nebraska Contract.

8. Unique Identifier. Providers who are physicians shall have a unique identifier in compliance with 42 USC § 1396u-2(d)(4).

9. NPI. All Providers that submit claims to Health Plan shall have a national provider identifier (NPI) number; this requirement shall be consistent with 45 C.F.R. § 162.410. The NPI number(s) must be the same NPI number(s) used for enrollment in the Nebraska Medicaid program. **[NE Contract § IV.S.4.h.]**

10. Cultural Competency. Providers are required to deliver services in a culturally competent manner to all members, including those with limited English proficiency or diverse cultural and ethnic backgrounds and provide for interpreters in accordance with 42 CFR 438.206(c)(2). **[NE Contract § IV.I.1.k.]**

11. American Indian Health Protections. In compliance with Section 5006(a) of the American Recovery and Reinvestment Act (ARRA) of 2009, any American Indian who is eligible to receive, is currently receiving or has ever received an item or service furnished by an American Indian health care provider or through referral is exempt from all copayments, cost sharing or similar charges. **[NE Contract § IV.F.1.b. (iii)]**

12. Mainstreaming of Members. To ensure mainstreaming of Nebraska Medicaid members, the Provider must take affirmative action so that members are provided covered services without regard to payer source, race, color, creed, gender, religion, age, national origin (to include those with limited English proficiency), ancestry, marital status, sexual-orientation, genetic information, or physical or mental illnesses. The Provider must take into account a member's literacy and culture when addressing members and their concerns, and must take reasonable steps to ensure subcontractors do the same. Examples of prohibited practices include, but are not limited to, the following, in accordance with 42 CFR 438.6(f): (i) denying or not providing a member any covered service or access to an available facility; (ii) providing to a member any medically necessary covered service that is different, or is provided in a different manner or at a different time from that provided to other members, other public or private patients or the public at large, except where medically necessary; (iii) subjecting a member to segregation or separate treatment in any manner related to the receipt of any covered service; or restricting a member in any way in his/her enjoyment of any advantage or privilege enjoyed by others receiving any covered service; and (iv) assigning times or places for the provision of services on the basis of the race, color, creed, religion, age, gender, national origin, ancestry, marital status, sexual orientation, income status, Medicaid membership, or physical or mental illnesses of the participants to be served. **[NE Contract § IV.I.3.a.]**

13. Deficit Reduction Act. In accordance with Section 6032 of the Deficit Reduction Act of 2005 ("DRA"), Contracted Provider shall, and shall require the other Providers to, comply with Health Plan's Fraud and Abuse Prevention Policy, as revised from time to time by Health Plan, and as otherwise may be required under the Nebraska Contract.

14. Compliance with Laws. The parties must comply with all applicable Federal and State laws and regulations including Title VI of the Civil Rights Act of 1964; Title IX of the Education Amendments of 1972 (regarding educational programs and activities); the Age Discrimination Act of 1975; the Rehabilitation Act of 1973; and the Americans with Disabilities Act. **[NE Contract § IV.C.2.a.]**

15. Physician Incentive Plan Programs. The Parties shall comply with the requirements of the Physician Incentive Plan (PIP) regulations contained in 42 C.F.R. § 438.6(h), 42 C.F.R. §§ 422.208 and 422.210. No specific payment will be made directly or indirectly as an inducement to reduce or limit Medically Necessary services furnished to a Member. Contracted Provider shall provide any physician incentive plan information in an accurate and timely manner to Health Plan in the format requested by Health Plan. As applicable, Contracted Provider agrees to incorporate the requirements of the PIP regulations and this provision into its agreements with any persons/entities for the provision of services under this Agreement. **[42 C.F.R. 417.479, 422.208, 210] [NE Contract § IV.Q.7.]**

16. Maintenance of Records. Contracted Provider shall maintain an adequate medical record system which includes a complete medical record for each Member in accordance with State laws and regulations. In addition, Contracted Provider will maintain a medical records system which maintains inactive medical records. Contracted Provider must document all medical services that the Member receives in accordance with all applicable laws and consistent with utilization control requirements in 42 C.F.R. § 456. Contracted Provider must maintain Members' medical records in a detailed and comprehensive manner that conforms to good professional medical practice, permits effective professional medical review and medical audit processes and facilitates an accurate system for follow-up treatment. Contracted Provider will maintain methods and procedures that guarantee each Member the right to request and receive a copy of his or her medical records. Medical records must be legible, signed, dated and maintained in accordance will all applicable Laws. The Provider must have online retrieval and access to documents and files for six (6) years in live systems and ten (10) years in archival systems, for audit and reporting purposes. The Provider must provide 48-hour turnaround or shorter for requests for access to information that is six (6) years old, and 72-hour turnaround or shorter for requests for access to information in machine readable form, that is between six (6) and ten (10) years old. If an audit or administrative, civil, or criminal investigation or prosecution is in progress; or audit findings or administrative, civil, or criminal investigations or prosecutions are unresolved; then, information must be kept in electronic form until all tasks or proceedings are completed. **[NE Contract § IV.R.13.]**

17. Response to Record Requests. Contracted Provider shall furnish duly authorized and identified agents or representatives of the State and federal governments, including but not limited to, the MLTC, the Secretary of the Department of Health and Human Services ("DHHS"), the DHHS Office of the Inspector General ("OIG"), or the Nebraska Medicaid Program Integrity Unit ("NMPI"), Medicaid Fraud and Patient Abuse Unit ("MFPAU")and Health Plan with such information as they may request regarding payments claimed for Medicaid services. The Contracted Provider must timely provide copies of the requested records within ten (10) business to the agency, the agency's designee (including Health Plan) or MFCU from the date of the request, unless the agency or MFCU sets, at its sole discretion, a period greater than 10 days. If such original documentation is not made available as requested, Contracted Provider, must provide transportation, lodging and subsistence at no cost, for all State and/or Federal representatives to carry out their audit functions at the principal office of Contracted Provider (or Contracted Provider's other locations, as applicable). Additionally, Contracted Provider agrees to grant the MLTC, DHHS, OIC, MFCU and/or Health Plan access during regular business hours to examine health service and financial records related to a health service

billed to the program. The MLTC will notify Health Plan no less than twenty-four (24) hours before obtaining access to a health service or financial record. **[42 C.F.R. 434.6, 438.6]**

18. Confidentiality of Member Records. Contracted Provider agrees in accordance with 42 C.F.R. § 438.224, that all Member medical records, as well as any other health information that contains individually identifiable health information, is used and disclosed in accordance with the privacy requirements set forth in HIPAA, including confidentiality of family planning services. Contracted Provider further agrees to protect and maintain the confidentiality of mental health information and to release mental health information only as allowed and to release substance use disorder information only in compliance with policies set forth in 42 C.F.R. Part 2 and other applicable State and federal law and regulations. Contracted Provider agrees to notify Health Plan within one (1) day upon discovery of a non-HIPAA –related breach.

19. Business Transaction Disclosures. Contracted Provider shall provide full disclosure of significant business transactions as set forth in 42 C.F.R. § 455.105. Contracted Provider shall submit, within thirty (30) calendar days of a request made by MLTC, federal DHHS or Health Plan, full and complete information about: (i) the ownership of any subcontractor with whom the Contracted Provider has had business transactions totaling more than $25,000 during the twelve (12) month period ending on the date of the request; and (ii) any significant business transactions between the Contracted Provider and any wholly owned supplier, or between the Contracted Provider and any subcontractor, during the five (5) year period ending on the date of the request. In addition, Contracted Provider agrees to provide these disclosures to Health Plan at any time, upon Health Plan's request within the time requested by Health Plan in order for Health Plan to meet its requirements under the Nebraska Contract. **[NE Contract § IV.T.3.]**

20. Ownership Disclosures. Contracted Provider shall make full disclosure of ownership, management and control information for the Contracted Provider, any subcontracting entities or Providers as required by 42 C.F.R. §§ 455.100 through 455.106. This information shall be delivered to Health Plan upon execution of this Agreement, and to Health Plan or MLTC within thirty (30) calendar days after any change in ownership. In addition, Contracted Provider agrees to provide these disclosures to Health Plan at any time, upon Health Plan's request within the time requested by Health Plan in order for Health Plan to meet its requirements under the Nebraska Contract. **[NE Contract § IV.T.2.]**

21. Cost Sharing and Member Liability. Contracted Provider, and/or its assignee or subcontractor, hereby agrees that in no event, including, but not limited to nonpayment by the State to Health Plan or nonpayment by Health Plan, Health Plan's insolvency or breach of this Agreement, shall Contracted Provider, or its assignee or subcontractor, bill, charge, collect a deposit from, seek compensation, remuneration or reimbursement from, or have any recourse against a Member or persons, other than the Health Plan, acting on their behalf for services provided pursuant to this Agreement. This provision shall not prohibit collection of supplemental charges or copayments on Health Plan's behalf made in accordance with the terms of the agreement between Health Plan and Members. In compliance with 42 U.S.C. § 1396u-2(b)(6), Contracted Provider shall not bill Members for Covered Services any amount greater than would be owed in the entity provided the services directly (i.e., no balance billing by Providers). Contracted Provider, or its assignee or subcontractor, further agrees that (1) this provision shall survive the termination of this Agreement regardless of the cause giving rise to termination and shall be construed to be for the benefit of the Member and that (2) this provision supersedes any oral or written contrary agreement now existing or hereafter entered into between Provider and Members or persons acting on their behalf. **[NE Contract § IV.C.16.]**

22. Continuation of Benefits. Continuation of benefits shall be in accordance with Nebraska laws and the Nebraska Contract. Upon the termination of the Agreement, except if the termination is for cause by Health Plan, Contracted Provider agrees to continue to provide care for non-pregnant Members who are undergoing a course of treatment for ninety (90) days, or if sooner, upon completion of the prescribed treatment plan. Contracted Provider agrees to continue to provide care to pregnant Members in their second or third trimester of pregnancy through postpartum care related to the child birth and delivery, which shall also include the post-partum visit. **[NE Contract § IV.S.17.c.]**

23. Provider Preventable Conditions. No payment will be made for provider-preventable conditions, as identified by the Nebraska Contract, or applicable federal or State law, as any may be amended. Contracted Provider agrees to comply with the reporting requirements of 42 C.F.R. § 447.26(d) as a condition of payment. **[42 C.F.R. 434.6] [NE Contract § IV.Q.12.]**

24. Coordination of Benefits. Contracted Provider must coordinate benefits in accordance with 42 CFR 433.135, et seq., and agrees not to pursue collection from the member but to identify third party liability coverage, including without limitation, Medicare and long-term care insurance as applicable, and except as allowed in 468 NAC Chapter 4-002 and 471 NAC Chapter 3-004, seek such third party liability payment before submitting claims to Health Plan. **[NE Contract § IV.S.15.a.(v. and xi.)]**

25. Claim Submission. Contracted Provider shall submit Clean Claims, which do not involve a third party payer, promptly. Upon termination or expiration of the Agreement, Contracted Providers shall supply all information necessary for reimbursement of any outstanding medical claims. **[42 C.F.R. 434.6]**

26. Nondiscrimination. Health Plan will not discriminate for the participation, reimbursement or indemnification of Providers acting within the scope their license solely on the basis of that license or certification and will not discriminate against Providers who serve high-risk populations or specialize in conditions that require costly treatment. **[42 C.F.R. 438.12, 42 C.F.R. 438.214] [NE Contract § IV.I.2.b.]**

27. FQHCs/RHCs. If Contracted Provider is an FQHC or RHC, this Agreement provides for reimbursement for the FQHC/RHC at the Prospective Payment System (PPS) rate in effect on the date of service for each encounter in accordance with 471 NAC Chapters 29 and 34. **[NE Contract § IV.Q.9.**

28. Timely Access. Contracted Provider must meet the Nebraska Contract timely access to care and services standards. Contracted Provider must meet the hours of operation and appointment time requirements set forth in the Nebraska Contract and Health Plan's Provider Manual. Contracted Provider agrees to maintain hours of operation for Members no less than hours of operation offered to commercial enrollees or comparable to other Medicaid fee-for-service enrollees. Contracted Provider shall be available to Members twenty-four (24) hours a day, seven (7) days a week as required by the Nebraska Contract and Contracted Provider acknowledges that Health Plan shall implement corrective actions for Providers identified through the audit as failing to meet this standard. **[NE Contract § IV.I.1.g.]**

29. Newborn Enrollment Notification. If Contracted Provider is a hospital, Contracted Provider agrees to report births of Members to the Health Plan within 24 hours of the birth. **[NE Contract § IV.B.4.d.]**

30. Provider-Patient Relationship. Subject to the limitations described in 42 CFR 438.102(a)(2), Health Plan agrees that it will not prohibit or otherwise restrict Contracted Provider from advising or

advocating on behalf of a Member who isa patient of the Provider, regardless of whether benefits for such care or treatment are provided under the contracts, regarding: (i) the Member's health status; (ii) medical, behavioral health, or long-term care treatment options, including any alternative treatment that may be self-administered; (iii) any information the Member needs in order to decide among all relevant treatment options; (iv) the risks, benefits and consequences of treatment or non-treatment; or (v) the Member's right to participate in decisions regarding his or her health care, including the right to refuse treatment, and to express preferences about future treatment decisions. **[NE Contract § IV.J.7.]**

31. Patient-Centered Medical Homes. Health Plan agrees to promote and facilitate the capacity of its provider to provide patient-centered care by using systematic, patient-centered medical home (PCMH) management processes and health information technology to deliver improved quality of care, health outcomes, and patient compliance and satisfaction. Patients must be cared for by a physician who leads a medical team that coordinates all aspects of the preventive, acute and chronic needs of members, using best available evidence and appropriate technology. **[NE Contract § IV.I.7.]**

32. Excluded Persons. Contracted Provider agrees that it will not execute any agreement with an individual or entity that has been excluded from participation in the Medicare, Medicaid, and/or CHIP Programs pursuant to Sections 1128 or 1156 of the Social Security Act or who are otherwise not in good standing with a State's Medicaid program or the Medicare program. Contracted Provider agrees to disclose the identity of any person excluded or who may be excluded to Health Plan immediately upon Contracted Provider's knowledge. Contracted Provider shall disclose the identity of any person described in 42 C.F.R. § 1001.1001(a)(1). Health Plan must abide by any direction provided by the DHHS regarding whether or not to permit a Provider for participation in Health Plan's network. If any person who has ownership or control interest in Contracted Provider, or who is an agent or managing employee of Contracted Provider, has been convicted of a criminal offense related to that person's involvement in any program established under Medicare, Medicaid, or the Title XXI Services program, or if DHHS or Health Plan determines that Provider did not fully and accurately make any disclosure required pursuant to 42 C.F.R. § 1001.1001(a)(1), then Health Plan shall not permit the Provider into the provider network.

33. Laboratory Services. If Contracted Provider is an entity that provides laboratory services, it agrees to comply with the provisions of the Clinical Laboratory Improvement Amendments of 1988 (CLIA), Public Law 100-578, and implementing federal regulations published at 42 C.F.R. Part 493, Subpart A, as amended. Verification of CLIA licensure (including the CLIA Identification number) or Certificate of Waiver during the provider registration process is required. Payment shall not be afforded for services provided by an enrolled Medicaid provider supplying laboratory services that fails to meet these requirements. For the purposes of this rule, laboratory services are defined as services to examine human specimens for the diagnosis, prevention or treatment of any disease or impairment of, or assessment of, the health of human beings. **[NE Contract § IV.I.9.]**

34. Obligation to Suspend Payment to Providers. Health Plan, in compliance with 42 C.F.R. § 455.23 and the Nebraska Contract, shall suspend payments to a provider when there is credible allegation of fraud. NMPI will determine whether to suspend payments or if an exception is appropriate. Health Plan will comply with the applicable provisions of 42 C.F.R. § 455.23 and the Nebraska Contract when implementing this provision. **[NE Contract § IV.8.b.xvi]**

35. Termination of Providers. Health Plan shall comply with all requirements for provider disenrollment and termination as required by 42 C.F.R. § 455.416.

36. Enroll In State Medicaid Program. All Providers participating under this Agreement must first enroll with State Medicaid. **[NE Contract § IV.I.13.a.]**

37. Certification Regarding Lobbying. Contracted Provider certifies that no federal appropriated funds have been paid or will be paid on behalf of the Contracted Provider or any subcontractor or Provider to any person for influencing or attempting to influence an officer or employee of any federal agency, a Member of the Congress, an officer or employee of the Congress, or an employee of a Member of Congress in connection with the awarding of any federal contract, the making of any federal grant, the making of any federal loan, the entering into of any cooperative agreement, or the extension, continuation, renewal, amendment, or modification of any federal contract, grant loan, or cooperative agreement. If any funds other than federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any federal agency, a Member of the Congress, an officer or employee of the Congress, or an employee of a Member of Congress in connection with the Nebraska Contract, grant loan, or cooperative agreement, Contracted Provider shall complete and submit Standard Form-LLL, "Disclosure Form to Report Lobbying," in accordance with its instructions. **[45 CFR § 3]**

38. Additional Requirements for Home and Community-Based Service (HCBS) Providers. If Contracted Provider and/or any Providers participate in Health Plan's HCBS Program ("HCBS Provider"), they shall ensure non-institutional Long Term Services and Support are provided in settings that comport with the CMS home and community-based setting requirements as defined in regulations at 42 C.F.R. § 441.301(c)(4) and 42 C.F.R. § 441.710(a). In accordance with 42 C.F.R. § 441.301(b)(1), Contracted Provider shall ensure that waiver services are not furnished to individuals who are inpatient in a hospital, nursing facility, institution for mental diseases, or IDF/ID.

ATTACHMENT C
COMPENSATION

(See following attachments)

DRAFT

ATTACHMENT C-[#]
NEBRASKA MEDICAID AND CHP COMPENSATION
(FEE FOR SERVICE)

1. The compensation rates set forth in this Attachment apply for Benefit Plans under Nebraska Contracts. Compensation shall be subject to and in accordance with the terms and conditions of the Agreement, including this Attachment.

2. Compensation. Fee for service compensation for Covered Services provided to Members shall be the lesser of the Provider's usual and customary billed charges or the following, less Member Expenses, if any:

[TO BE NEGOTIATED WITH PROVIDER]

3. Health Plan shall process claims and pay or deny a Clean Claim within the time period required by applicable Laws or the Nebraska Contract. The date of receipt is the date the Health Plan receives the Clean Claim as indicated by its data stamp on the claim. The date of payment is the date of the electronic funds transfer, check or other form of payment.

4. Health Plan may adjust claim payments due to coordination of benefits or subrogation.

5. Health Plan implements and prospectively applies Department's changes to its Nebraska Medicaid fee schedules as of the later of (i) the effective date of the change, or (ii) 45 days from the date the Department publishes the change on its website. Health Plan will not retrospectively apply rate changes to claims that have already been paid.

6. Health Plan may update code numbers or delete retired codes without notice or amendment to this Agreement as such are revised or implemented by the Department from time to time. Where applicable, such as for value added benefits covered by a Benefit Plan, Health Plan will determine rates for items and services that are not included in the Department's payment system or fee schedule published on the its website.

7. The amount of compensation paid is based on the treating Provider's licensure and Health Plan's credentialing requirements for that discipline, not on the Provider's academic credentials. For example, a Provider who is a licensed clinical social worker (LCSW) will be paid at the rate for LCSWs, regardless of whether the LCSW has an advanced degree.

Please see Network Development Plan attached herein.

WellCare
Health Plans

WellCare of Nebraska Network Development Plan

SECTION 1: GOALS AND STRATEGY OF NETWORK DEVELOPMENT

WellCare's extensive experience with the development of high-performing provider networks for government-sponsored healthcare programs provides us with the needed background and understanding of the specific health, geographic, cultural needs and preferences of the Nebraska Medicaid population that we will serve. Our network development and engagement strategy makes covered services available to the members of the Heritage Health program, through a committed network of primary care providers (PCPs), specialists, hospitals, Indian health services/tribal 638/urban Indian health (I/T/U) providers, urgent care facilities, federally qualified health centers (FQHCs), rural health clinics (RHCs), public health facilities, allied health care professionals, ancillary providers, behavioral health providers, and pharmacies.

The goal and approach of our network development strategy is to meet our members' needs by partnering with a diverse network of providers that represent a range of specialties and services and bring the most value to our members within each geographic region.

For over a year we have deployed WellCare leaders to meet with key stakeholders across Nebraska, laying the groundwork to prepare for network development in all areas of the state. We have met with hospitals, physicians, behavioral health specialists and social safety net providers. We have also focused on engaging with FQHCs, RHCs, and the state's medical, hospital, and health care associations because safety providers and the affiliations that currently exist are critical to building a comprehensive system of care to address Nebraska's needs. Our association meetings included meetings with Nebraska Hospital Association, Nebraska Medical Association, Leading Edge Nebraska, Nebraska Health Care Association, Nebraska Pharmacists Association, Health Care Association of Nebraska, Children and Family Coalition of Nebraska, Southeast Regional Provider Association ACO and tribal representatives. These efforts ensure that WellCare is prepared to fully execute our network development strategy to meet the state's expectations and do so by meeting the specific needs and challenges of local areas in Nebraska through the information gathered and relationships WellCare has built. WellCare is fully prepared to begin executing on our network development plan upon contract award.

As an example of our track record in building effective provider networks, upon being awarded a contract for Kentucky's Medicaid managed care program in late April 2011, we were required to build a fully accessible provider network in roughly ninety days in preparation for readiness review and a September 2011 implementation. Because WellCare had been actively engaged in building relationships with key providers and health systems for several months prior to being awarded the contract, as we have done in Nebraska, we were prepared to effectively execute on our network development strategy. Our success in launching a strong provider network in Kentucky contributed to supporting the state achieve its goal of implementing its program on schedule while ensuring that members received adequate access to services.

SECTION 2: Development of Network

WellCare of Nebraska understands the network requirements of the Heritage Health program contract. WellCare has combined the requirements with the expected membership and conducted geo-analytics to determine the network targets. In developing our networks we apply the necessary resources to actively recruit and maintain a network that offers our members a broad array of high-performing providers who deliver the scope of preventive, primary and specialty services, along with behavioral, pharmacy, and social services and supports. Our fundamental network development strategy is to:

- Determine expected enrollment
- Accurately determine precise network requirements to meet time, distance and appointment availability standards

- Target providers critical to meeting those standards and providing a comprehensive scope of services
- Expand our core network to encompass as many qualified participants as possible allowing both member choice and increased access to care

We employ a five-phase approach to network development and management, moving from early analysis of the market and membership needs to targeted recruitment, contracting, training and retention activities as described our network development and contracting continuum.

Our expected member enrollment is outlined in the table below.

Rating Region 1 (East)	Rating Region 2 (West)	Total
58,325	17,834	76,159

By segmenting the marketplace, adding the required time and distance standards and the required and essential providers, then layering the expected utilization, a targeted list of providers was created for our network. The targets are as follows:

- Providers currently providing physical, behavioral health and pharmacy services to Nebraska Medicaid members will be extended offers to contract
- Two largest hospital systems in Nebraska along with critical access hospitals, as described in Attachment 16
- Three largest provider groups collectively with over 1000 physicians, 150 large provider groups and small and individual providers throughout the state
- Independent urgent care centers
- FQHCs and RHCs throughout the state
- The complete Magellan behavioral health network
- Major behavior health facilities across the state
- Advanced practice nurses and physician assistants throughout the state
- Any willing pharmacy that accepts the terms and conditions of the contract
- All I/T/U providers
- WellCare national ancillary targets such as vision providers
- Providers in contiguous states to address specialty shortages and local referral patterns

Execution of the Strategy and Tactics

WellCare recruitment resources and tools will be located in the Nebraska marketplace. WellCare will deploy a large team of local resources to support face-to-face encounters with institutions, physicians and other providers. These resources will be supplemented by our national network development team which includes specialists in institutional, group practice, and ancillary contracting and legal experts in contract development. Our pharmacy benefit manager (PBM) also brings experienced staff to the network development process. Our network recruitment center will be staffed by a team of contract specialists who actively collect executed contracts, process mailings, answer inbound calls, make outbound follow up calls, gather and record required documentation, and assist providers with all aspects of contracting and credentialing.

We review and monitor daily and weekly target reports to determine the completion of the network and to identify necessary network adjustments.

WellCare Health Plans

Key Network Development Plan Activities & Milestones

WELLCARE OF NEBRASKA NETWORK DEVELOPMENT PLAN	
Month	**Goals and Tasks**
August 2015	➢ Research current delivery systems ➢ Identify key provider types for eligible populations ➢ Initiate relationships with key systems
November 2015	➢ Research patterns of care and current gap analysis; what populations are underserved and why? ➢ Build out relationships with key providers, professional societies and advocacy groups ➢ Initiate development of provider list based on specialty types and network access parameters
December 2015	➢ Develop Letter of Intent for interim use, if appropriate ➢ Conduct analysis of competitor networks and waiver provider network ➢ Analyze state fee-for-service file ➢ Obtain advocate feedback ➢ Review providers that have initiated a request to participate in the network ➢ Further develop provider list, identifying PCPs, behavioral health providers, specialists, FQHCs, RHCs, urgent care centers, laboratories, pharmacies, I/T/U providers, hospitals and other provider types for recruitment ➢ Preparation work on contract templates for PCP, specialty, ancillary and provider agreements ➢ Professional society visits, gather input from provider community on transformative partnerships. What has not worked and why
February 2016	➢ Provider Mailing #1: Distribute corporate overview to key health systems and provider groups ➢ Establish web and telephonic methods for provider questions and answers on network participation ➢ Develop network access strategies for rural/frontier/underserved areas. Examples might include telehealth, mobile delivery, clinic incentives, etc. ➢ Build out range of reimbursement options for fee for service, shared savings and value-based purchasing
March 2016	➢ Ancillary contract negotiation underway with national vendors (vision, 24/7 nurse line) ➢ Provider Mailing #2: Offer to contract letter to all providers on current list, including instructions on how to request a contract ➢ Create and secure approval for a workflow flyer to accompany all provider contracts, demonstrating the steps for provider credentialing and configuration ➢ Create email inbox for provider contract requests and/or questions and answers, establish frequently asked question workflow and publication method
April 2016	Initiate negotiations/redlines with key hospitals, facilities, IPAs and complex providers Inventory management established for incoming provider contracts, including data integrity audit Provider Mailing #3: Filter mailing list against in-house inventory, then drop PCP/specialist contracts via USPS Round One: Regional Provider Information Summits –Informational and open question and answer (Q&A) forums for all Nebraska and border-state providers
May 2016	➢ Post Nebraska Provider Q&A link on WellCare of Nebraska home page ➢ Filter mailing list against in-house inventory, then drop PCP/specialist contracts via USPS

	➢ Ground game: Initiate outbound call campaign to schedule network development visits and promote Q&A interface ➢ Round Two: Regional Provider Information Summits – Informational and open Q&A forums for all Nebraska and border-state providers
June 2016	➢ M-W-F Checkpoints: Weekly gap analysis review each Monday morning, with Wednesday p.m. and Friday p.m. progress reports ➢ All inbound contracts and credentialing applications audited for complete information (signatures, W9, etc.) before provider load form (PLF) created ➢ PLF exceptions for missing/inaccurate information under a 72-hour turnaround. Flat file load template disseminated as appropriate ➢ County-by-county blitz visits to non-respondents, daily debrief and determination of barriers and remediation strategies
September 2016	➢ Access-compliant network contracts in house and in credentialing/configuration workflow for directory production and January 1, 2017 implementation. ➢ Submit our provider network to MLTC at least 90 calendar days prior to contract start date.
October 2016	➢ Submit documentation to MLTC 45 days prior to implementation on any services or provider types that do not meet MLTC standards due to lack of providers in the area.

In developing our network we will

- Offer female members direct access to a woman's health specialist for routine and preventive care
- Offer direct access to specialists in special situations including members who meet special health care needs criteria
- Ensure a provider network that includes sufficient numbers of providers with experience and expertise in:
  - Co-occurring mental health and substance use disorders/developmental disabilities
  - Serious and persistent mental illness
  - Severe emotional disturbance among children and adolescents
  - Sex-offending behaviors, eating disorders, co-occurring serious mental illness, and common chronic physical illness
- Contract with providers who demonstrate a commitment to the behavioral health principles of care defined in the Request for Proposal (RFP) Section IV.L, Care Management, including rehabilitation and recovery and focus on recovery-oriented, trauma informed services and trauma-specific treatment programs
- Cooperate with the Department of Health and Human Services Division of Behavioral Health and state behavioral health regions as we establish our network

SECTION 3: Ongoing Network Management – Including network adequacy, identifying and resolving barriers and network gaps

Once the initial network is completed, assessing the adequacy of our provider network is a continuous process. The staff uses numerous tools and data sets to identify potential gaps and the need for expansion activities. Our ongoing activities allow us to identify opportunities as they arise to proactively respond with enhancement strategies. A key element to our overall Network Development Plan is the ongoing management and assessment of our network of providers at a regional and county level.

The comprehensive, ongoing monitoring and development of our provider network allows us to maintain and work to exceed member satisfaction, access to care and to comply with the Heritage Health program requirements. Analysis includes:

- **GeoAccess Reports:** On a monthly basis, these reports evaluate that time and distance standards are

being adequately met at the provider level to meet the needs of members in each county. GeoAccess results are the key element reviewed at a quarterly meeting and an actionable plan results from the analysis.

- **Quality Dashboard:** On a monthly basis, we measure HEDIS results at the provider or group level. Quality trends and care gap quality improvement data is shared with providers during regularly scheduled meetings with providers, our field quality team and our provider services specialists.
- **Provider Efficiency:** On a monthly basis, we will review member cost of care with our key provider groups to identify providers with utilization levels that are outside of a normal range of bell curve utilization. We also review key statistics at a provider level, including their use of electronic funds transfer and electronic data interchange for administrative efficiency.
- **Appointment Availability:** When recruiting providers for our network, we validate that they have capacity and are able to make appointment times available to members on a timely basis. We engage a third-party vendor to conduct an annual study of appointment availability using a statistically valid sample of PCP and specialist practices. Average appointment times are evaluated to ensure that offices are in compliance with the access standards as defined in the contract.
- **Out Of Network Monitoring:** On a monthly basis, out-of-network utilization reports are reviewed by health services and the network teams.
- **Open/Closed Panels:** Primary care closed panels are measured and reported to provider services.

Our network development standards are detailed in the table below.

WELLCARE NEBRASKA NETWORK DEVELOPMENT APPOINTMENT AVAILABILITY ACCESS STANDARDS	
Provider Type	**Standard**
Emergency Services	Available immediately upon presentation 24/7. Emergent behavioral health needs referred within one hour or two hours in designated rural areas
Urgent care	Same day by PCP or as arranged by MCO
Non-urgent, sick care	Within 72 hours or sooner if the member's medical condition deteriorates
Family planning	Within 7 calendar days
Non-urgent, preventive	Within 4 weeks
PCPs	1 physician practice, office hours of at least 20 hours a week 2 or more physician practice, office hours of at least 30 hours a week
High volume specialists*	Routine: 30 calendar days of referral
Other specialists	Consultation available within 1 month of referral or as clinically indicated
Laboratory and x-ray	Routine: 3 weeks Urgent: 48 hours (or as clinically indicated)
Maternity care	1st trimester: 14 calendar days; 2nd trimester: 7 calendar days; 3rd trimester: 3 calendar days; High-risk: 3 calendar days of identification
WELLCARE NEBRASKA NETWORK DEVELOPMENT GEOGRAPHIC ACCESS STANDARDS	
Provider Type	**Standard**
PCPs	2 PCPs in 30 miles urban; 1 PCP in 45 miles rural; 1 PCP in 60 miles frontier PCPs include: - Physicians specializing in general practice, family practice, internal medicine, pediatrics

	or obstetrics/gynecology (OB/GYN) ➢ Advanced practice nurses and physician assistants when practicing within the scope and requirements of their license
Behavioral health inpatient and residential	Rural and frontier: Sufficient locations to allow members to travel and return home within a single day or alternative plans for accessing comparable levels of care if no inpatient available within that standard
Behavioral health outpatient	Urban: Adequate choice with 30 miles Rural: Minimum of 2 providers within 45 miles Frontier: Minimum of 2 providers within 60 miles Rural and Frontier: Use of telehealth if no providers in county
High volume specialists*	1 provider within 90 miles
FQHCs and RHCs	Contract with all FQHCs and RHCs in Nebraska Notify MLTC if contract cannot be reached
Urgent care centers	Good faith effort to contract with urgent care centers in Nebraska Maximize availability of urgent care services to members Maintain documentation detailing the efforts
Pharmacists	Urban: 1 retail pharmacy within 5 miles of 90% of members Rural: 1 retail pharmacy within 15 miles of 70% of members Frontier: 1 retail pharmacy within 60 miles of 70% of members
Hospitals	Contract with a sufficient number of hospitals to ensure that transport time will not exceed 30 minutes, except in rural areas where access time may be greater Critical access hospitals as defined by Attachment 16, other Nebraska and contiguous hospitals
Indian Health Services/Tribal 638/Urban Indian Health	Extend contracts to all Sufficient number to ensure timely access to services for American Indian members
Contiguous states	Extend contracts to providers in contiguous states to address local referral patterns

*Includes cardiology, neurology, hematology/oncology, OB/GYNs and orthopedics specialties

In the event that we discover that there are gaps in the network or barriers to care that require network remediation, WellCare of Nebraska employs the following solutions:

- **Leverage Provider Partnerships:** Our network development team and provider services teams encourage partner network providers to extend hours and reach to expand access during initial contracting and ongoing conversations with the network.
- **Closed Panel Management:** The providers identified with closed panels are specifically contacted by provider services to determine if they are closed panel because their practice is at full capacity and are closed to all payers, or if there is an issue with WellCare that can be resolved.
- **Telehealth:** WellCare will partner with providers, groups of providers, and the Nebraska Statewide Telehealth Network (NSTN) to extend health care resources to those in need using video technology. NSTN is a collaboration of over 110 sites, including hospitals, health departments, mental health centers, provider offices and rural health clinics. This includes clinical consultation, support groups, education and training and connectivity for administrative meetings among professionals.
- **Transportation:** Recognizing transportation as one of the biggest barriers to health care in Nebraska, we will facilitate coordination of transportation for members to improve access to care. We will use warm transfers and assist members in making appointments with the transportation vendor. In

addition, we track all referrals to non-benefited services including transportation.

- **Out-of-Network Utilization:** As needed, we will develop relationships with non-participating providers to allow us to work with them on a case-by-case basis to secure member access to the appropriate level of medically necessary care. Typically, we arrange care with out of network providers by executing single case agreements that authorize care for a specific member. In limited instances we will seek to establish a permanent non-participating agreement with high-impact providers who do not wish to contract. We will always seek to contract with any high-quality provider that has out of network utilization.

SECTION 4: Provider Training & Support

Initial and ongoing provider training and support is foundational to our network development and management plan, as well as provider retention. WellCare's provider services staff delivers training and answers provider questions related to training content. We employ a blended training delivery model that includes classroom, provider's office, web courses, & real-time interactive web meetings. The following provider training modules support compliance, improve provider performance and quality, and enhance provider satisfaction.

- How to register with our Provider Portal
- How to Request an Authorization
- How to File a Claim
- How to submit a corrected claim
- How to Submit Encounters when a service is rendered that is not tied to payment
- Understanding Explanation of Payments Documents and Files, using the Provider Portal
- Electronic Funds Transfer (EFT) and Electronic Remittance Advices for Claims Payments
- How to File an Appeal if a claim is denied , focusing on the process and timeframes
- Member Enrollment and Eligibility Verification
- Member Engagement Strategies
- Completing Health Risk Assessment and Comprehensive Assessments
- Benefits Overview
- Cultural /Linguistic/Social Needs of Members/Cultural Competency
- Heritage Health Program and Contract requirements
- EPSDT Requirements and Processes
- Identification & Reporting of Abuse, Neglect, and Exploitation of Children & Vulnerable Adults
- Education on Care Management/Disease Management/Wellness programs
- Utilization Management Criteria
- Complaints and Grievances
- Pharmacy Processes and Resources
- Health Information Exchange (HIE)/Electronic Health Record (EHR)
- HEDIS & Other Quality Goals & Tools
- Coding/Medical Records

ATTACHMENT 5

4. Key Staff Resume's - As possible, submit resumes of proposed key staff as described in Section IV.X - Transition and Implementation.

Please see resumes attached herein of the key staff members WellCare is committing to have in place to participate in the transition coordination/collaboration process as described in Section IV.X. These positions include the following:

- Chief Executive Officer: Lauralie M. Rubel
- Chief Operating Officer: William Keena
- Medical Director/Chief Medical Officer: Dr. James Howatt
- Behavioral Health Clinical Director: Dr. Michael Orlosky
- Member Services Manager: Paul Hineman
- Provider Services Manager: Drew Hobby
- Information Management and Systems Director: Robert Klopotek
- Quality Management Coordinator: Dr. Richard Petrucci
- Case Management Administrator: Marcia Lelis Welch

LAURALIE M. RUBEL

Career History

WellCare Health Plans, Inc. Tampa, FL

State Plan President (August 2015 to Present)

- Plan leader for WellCare's Medicaid expansion into Iowa, inclusive of member-centered strategy, operational implementation, infrastructure and plan performance.

Vice President, Market Development (February 2015 to August 2015)

- Leads business expansion and new market growth through effective planning, collaboration and efficient stewardship.

Vice President, Business Training (September 2013 – February 2015)

- Executive leadership and accountability for associate training in Operations, Sales, Health Services and Network Management/Provider Relations.

Vice President, Market Initiatives (January 2013 – September 2013)

- Acquisition integration and business development.
- Network and communications liaison between seller, acquired entity and WellCare.
- Onboarding support to new associates.
- Business process assessment and improvement.

Vice President, Provider Strategy (July 2011 – January 2013)

- Development and execution of provider strategy in South Carolina, Kentucky, Louisiana, Georgia and Texas to encompass quality improvement, member and provider satisfaction, new business development, and expansion/re-procurement network strategy.

Market Chief Operating Officer (July 2009 – June 2010)

- Promotion to Market COO over Atlanta and North Georgia, inclusive of P&L management of 325,000 covered Medicaid lives in 53 counties.

Senior Market Director (May 2008 – July 2009)

- Promotion to full P&L responsibility for Atlanta Medicaid and Medicare business segments.
- Responsible for medical cost reduction strategy development and implementation.
- Network development, provider relations and compliance.

- SG&A control and policy development for contracting, quality and health improvement initiatives.

UHS – Pruitt Corporation, Atlanta, GA

Vice President of Care Management (October 2010 – July 2011)

WILLIAM KEENA

Career History

WellCare Health Plans, Inc. Tampa, FL

Vice President, Integrated Solutions (September 2015 – Present)

- Executive leader accountable for oversight and execution of acquisition integration activities. Serves as a trusted resource in business planning, organizational planning, financial performance and initiatives related to integration activities. Role may provide interim executive leadership for new growth or acquired businesses until permanent leadership is established.

Acclaris, Tampa, FL

Chief Operating Officer (July 2013 – June 2015)

- Led the transformation of the company operations that prepared the company for a strategic acquisition at triple the company's prior value which occurred in May of 2015.
- Stabilized and improved company operations enabling scalability, client growth and transformation to a consumerism model.
- Improved turnaround times of processes such as customer inquiry tickets by more than 30%. Increased overall corporate productivity by 34% by reducing costs and improving quality (To over 99.5% Financial).
- Increased Client loyalty (Net Promoter Score) from -48 to +3.2 during this time. Led company Operations and Information Technology areas across all six US and India locations. Responsible for service and relationships with all clients including Bank of America, Fidelity Investments, Xerox and Highmark Blue Cross/Blue Shield. Led the redesign and replacement of the data center hardware and network, from data storage to the fax servers. Personally oversaw each phase of the project and migration to the new infrastructure.
- P & L responsibility on 10% of the corporate revenue in the business process outsourcing line of business, personally sold $520,000 in new business (23% growth) in 2014 with excellent (>50%) margins.

VALA Consulting/CACI

Independent Consultant (July 2008 – June 2013)

- Created and operated an independent consulting business. The largest opportunity was at CACI, a contractor to the US military. While at CACI ran a key program and grew it from 4.18 million in annual revenue to over 17 million.
- Led multiple software development teams across six sites with 155 direct reports. Projects included creating a ground up next generation supply/logistics system for the US Navy and Marines (Single Supply Baseline) using open source tools.

- Functional lead and Subject Matter Expert on a suite of projects to upgrade the systems and processes at a California based Medicaid/Medicare Health plan.

AMERIGROUP Corporation Virginia Beach, VA

Executive Vice President, Support Operations (May 2006 – June 2008)

- Spearheaded the turnaround of Operations to ensure that significant compliance and encounter submission issues were addressed while simultaneously managing significant growth (700,000 new members) and a system conversion.
- Reduced IBNR (Incurred but not reserved) exposure by 99.9% for prior periods.
- Eliminated backlog and restored DOI (Department of Insurance) compliance in key states such as Texas. These efforts increased the stock price from $17 to $34 in less than two years. Led the claims, encounters, front end operations, credentialing, contract configuration and three National Service Centers (Virginia, Florida and Tennessee), plus the Clinical Call Center (Provider services area), and other Operations departments.
- Budget of over 100M, 1500+ associates.
- Member of the Executive Team.

Academic Background

University of Connecticut
- Bachelor of Arts, Magna Cum Laude

MICHAEL J. ORLOSKY, M.D., M.M.M., C.P.E.

Career History

WellCare Health Plans, Inc. Tampa, FL

Vice President, Behavioral Health (2014 to Present)

- Responsible for all WellCare markets for the performance of Behavioral Health operations including medical expense, quality, and provider management.
- Developed curriculum for Integrated Care Management training.
- Provided direction and design for on-boarding training for all clinical staff for WellCare.
- Developed Behavioral Health model of care for the enterprise.

Senior Medical Director, Florida Market (2013 - 2014)

- Assisted with the Managed Medical Assistance Intent to Negotiate presentations to AHCA, with WellCare winning 8 of 11 Florida regions.
- Created clinical model and program strategy for Patient-Centered Medical Homes.
- Facilitated the development of a Behavioral Health PCMH with Lakeside and a shared savings pharmacy program.
- Established relationships with key provider groups and facilities.

Health New England

Medical Director (2011 - 2013)

- Responsible for the medical and case management activities related to managed medical operations for Commercial, Medicaid, and Medicare lines of business.
- Served as Medical Director for HNE's Medicare Advantage line of business, which was awarded 5 STAR status by CMS in 2012 and 2013.
- HNE's Commercial HMO ranked 11th Nationally by NCQA.
- HNE's Medicare Advantage program ranked 26th Nationally by NCQA.
- Responsible for implementing Risk Adjustment program for HNE's Medicare Advantage Beneficiaries.
- Assisted with CMS Best Practice Review with HNE Management.
- Speaker at various Medicare Advantage conferences related to achieving 5 STAR status.
- Developed and implemented Patient-Centered Medical Homes.
- Developed and implemented Bundled Payment programs for orthopedic procedures.
- Served on the Board of Directors for Massachusetts Health Quality Partners.
- Headed the Medical Technology Assessment Committee (MTAC) for HNE.
- Interface with physician providers to create new systems of health care delivery (ACO and Full Risk PCMHs).

ValueOptions North Carolina Service Center

Interim Medical Director (2010 - 2011)

- Served as interim medical director for North Carolina office performing utilization review activities and supervision of clinical staff.

Human Capital Specialists

Executive Vice President and Chief Operating Officer (2009 - 2010)

- Responsible for the development and implementation of consulting services for Human Capital Specialists with focus on health care opportunities that offer:
  - Improved quality and operational results
  - Six sigma strategies for process improvements
  - Financial turnaround
  - Change management
  - Expert training, information, and implementation skills
- Led the integration of 8,000,000 behavioral health covered lives for a large, multi-state Blue Cross Blue Shield Health Plan.

WellPoint, Inc., North Haven, CT

East Regional Vice President of Behavioral Operations (2006 - 2009)
Executive Medical Director, Northeast Division (2003 – 2006)

- Drove the operational performance of the 7th, 16th, and 20th nationally ranked Health Plans as published in US News and World Report (2008).
- Led the expansion of Behavioral Health Operations from a single state (CT) and 23 staff, to a regional operation with 7.6 million enrollees in Connecticut, Maine, New Hampshire, New York, Virginia, and Georgia.
- Managed and led the reorganization of 160 Associates in three offices (Atlanta, Richmond, and North Haven), with an annual operating budget of over $95 million and revenue of $600 million.
- Delivered operating gain that exceeded budget every year.
- Improved associate engagement and manager effectiveness measures to Best in Class levels.
- Succeeded at full accreditation from URAC and NCQA and created a HEDIS improvement strategy that was published in a national quality journal.

Clinical Experience

Medical Director, 5SB Unit, Mercy F. Hospital, Darby, PA (1998 – 1999)

- Lead several multidisciplinary teams to re-engineer the treatment process of seriously mentally ill patients in an intensive, managed-care environment.
- Established and monitored quality outcomes through the institution of control charts and data measurements.

- Developed programs with Delaware County Mental Health to address the displacement of psychiatric patients due to the closing of Haverford State Hospital.

Director, Apogee, Inc., King of Prussia, PA (1996 – 1998)

- Served as Director of Comprehensive Mental Health Services. Member of Northeast Regional Directors. Served on Apogee's National Committee of Clinical Quality. Responsible for Budgeting and Strategic Planning. Redesigned the Performance Appraisal System for Clinicians in 112 Clinics.

Academic Background

Tulane University's School of Public Health and Tropical Medicine, New Orleans, LA (1998 – 1999)

- M.M.M, Master's Degree in Medical Management

The Waltham Hospital (PGY-1), and Massachusetts General Hospital (PGY-2 through PGY-4), Boston, MA M.M.M, Master's Degree in Medical Management (1978 – 1982)

- Psychiatric Residency

College of Medicine, University of South Florida, Tampa, FL (1975 – 1978)

- Doctor of Medicine (M.D.)

The John's Hopkins University, Baltimore Maryland (1972 – 1975)

PAUL HINEMAN

Career History

WellCare Health Plans, Inc. Tampa, FL

Vice President, Channel Communication Services (2015 to Present)

- Provide strategic direction, policy, operational planning and execution across all internal/external Customer Service operations. Provide strategic direction, consistency and oversight for member and provider channel communications, including establishing/maintaining positive relations between the Company and its key constituents to advance business objectives.
- Leads teams responsible for collaborating with business partners and executive leadership to drive and enhance the company's business objectives through strategic, compliance-based and transactional communications initiatives across a variety of communications channels.
- Leads the development and implementation of channel communications-related policies and process improvements for realized cost savings and overall volume efficiencies,
- Strategizes, leads and coordinates vendor procurement; manages vendor relationships in relation to maintaining service level agreements for member/provider communication/processing functions.

Nielsen, Oldsmar, FL

Vice President, Florida Operations Leader (2011)

Senior Vice President, US Call Center Operations (2012 – 2015)

- Accountable for the strategic direction of four US based Market Research call centers and two third party vendors internationally consisting of 2,200 part time and full time associates supporting Operations, Training, Quality and Work Force Management departments. Leveraged predictive dialers to initiate over 100MM dials and completed over 6MM surveys and recruitment calls annually.
- Led initial integration for 1.3B Arbitron acquisition representing the Data Acquisition department which consisted of both field and call centers totaling 1,000 impacted employees. Process required consistent collaboration with key business owners and stakeholders including frequent engagement with the COO.
- Integrated six Call Centers and three Lines of Business due to a large acquisition late 2013
- Budgetary savings as a result of the integrations and subsequent consolidation in excess of 15% or 8MM through first 18 months primary through site consolidation and labor efficiencies.
- Led integration efforts on new CATI and Dialer solutions for improved quality and efficiency through improvements in contacts, dialing efficiency and agent usability.

WellCare Health Plans, Inc., Tampa, FL

Vice President, Customer Service Operations (2009 – 2011)

- Provided the strategic direction of internal and external customer service groups that supported multiple products under the Medicare and Medicaid lines of business. Ensured Training, Quality, Productivity, and Compliance standards were met through effective communication, training, and planning.
- Led Customer Service process improvement initiatives focused on new member enrollment and intake activities.
- Drove efforts to enhance the Member's experience at our two Philippines sites through improved on line help tools, training enhancements and use of analytics from 3rd party quality vendor.
- Provided direction to consolidate site locations for Medicare product lines with increased concentration at near shore site in the Dominican Republic with savings of 20%+ for this LOB.
- Coordinated the launch of the customer service function for the newest market, Hawaii.

Senior Director, Customer Service Operations (2008 – 2009)

- Provided strategic direction of external customer service groups that supports multiple product lines under the Medicare line of business.
- Led efforts to enhance and promote usage of an external website for self-service functionality for both Providers and Members with increases over 150% in under 12 months.
- Established process improvement initiatives for call center functions derived from analysis on first call resolution and a third party customer satisfaction survey process.
- Provided support to launch two vendors sites in the Philippines in efforts to reduce costs by as much as 40% for two Medicare product lines.
- Contracted with 3rd party Quality vendor to provide independent quality review to provide analytics on compliance and quality standards.
- Achieved recertification for call center excellence from JD Power in 2008.

Director, Customer Service (2005 – 2008)

- Led the coordination and set up of the customer service function for the new national Medicare Part D product, Prescription Drug Plan, responsible for generating over one billion in revenue by 2008. Successfully managed the launch of five call centers to support this product in under 90 days.
- Established vendor contracts, telecom and IT set up, product training, policies and procedures, and support team for call centers in less than 90 days.
- Achieved 15% reduction in 25MM call center budget over the first 8 months of 2006.
- Improved productivity in the call centers through the implementation of a new User Interface for the call center staff that reduced Average Handle Time by 32% over seven months.
- Implemented a post-call satisfaction survey and maintained 82%+ satisfaction rates since launch of the product.
- Managed numerous on-going and proactive outbound call campaigns to improve customer satisfaction and retention.
- Provided strategic direction and oversight for the customer service function for both Medicare and Medicaid product lines within an internal and outsourced environment.
- Achieved JD Power certification for call center excellence in 2007.

DREW HOBBY

Career History

WellCare Health Plans, Inc. Tampa, FL

Vice President, Business Development (April 2015 – Present)

Vice President, Field Network Management (March 2014 – April 2015)

- Lead organization responsible for hospital contracting, physician contracting, risk provider contracting, provider relations, behavioral health and provider solutions across the state of Florida.
- Responsible for development and execution of organization's network contracting and management strategy.
- Partner with internal resources to analyze cost data, medical trends, and quality results to deliver network that meets strategic priorities of market.
- Provide strategic negotiation assistance to team specifically around rate evaluation and contractual language. Constantly monitor regulatory landscape, proactively evaluate contractual feasibility, and partner with other departments (legal, government affairs, configuration, finance, and legal) to ensure ability to implement accordingly.

Senior Director, Product Operations – Florida Healthy Kids (January 2012 – March 2014)

- Responsible for P&L ownership of WellCare's Florida Healthy Kids (SCHIP) product.
- Led the program design, RFP response, and negotiations of statewide RFP.
- Obtained largest award and successfully expanded county footprint from 18 to 65 (out of 67) counties.
- Expanded top line revenue by over 30% in year one.
- Led the successful implementation of a large scale roll-out across 48 counties with varying degrees of experience with managed care.
- Led WellCare of Florida's Exchange offering including network build and other strategic product offering components.

Senior Director, Medicaid Expansion (April 2011 – January 2012)

- Identified, pursued, and won new Medicaid business for the organization
- Worked with existing market leaders or business development team to understand local regulator's Medicaid program needs, design WellCare's response, and help lead response to RFI/RFP requests

KPMG, LLP

Senior Manager/Director, Advisory (March 2003 – March 2006; August 2007 - March 2011)

- Service Line Leadership – Led the "North Florida" service line (Tampa, Orlando, and Jacksonville) for Information Risk Management within external audit clients. Led team responsible for managing over 500 engagements per year
- Revenue Generation and Management – Responsible for selling advisory services (through new client generation, revenue expansion, and new service offerings) throughout Tampa/Orlando/Jacksonville, the Southeast, and HealthCare and Technology companies across the United States
- Engagement Management – Responsible for managing multi-million dollar engagements at 15 to 20 clients per year. Ultimate engagement management responsibility including delivery of contracted services, ensuring client satisfaction, execution within approved budgets, and project quality
- Industry Focus – Primary focus within the healthcare (providers and payors) and technology (software, hardware, IT services, technology distribution, and IT staffing augmentation) industries

WellCare Health Plans, Tampa, FL

Finance Corporate Development Manager (March 2006 – July 2007)

- Served as finance corporate development manager for one of the leading providers of government sponsored health plans. Responsible for the successful delivery of strategic and cross-functional projects in role as lead project manager on strategic projects for Chief Financial Officer.

JDH Consulting

Independent Consultant (November 2001 – February 2003)

- Provided customer service consulting services to Fortune 1000 companies. Scope of engagements included review of insourcing/outsourcing model, operating model re-design, and process improvement opportunities within call center arena. Re-designed call script process for leading handheld technology company that resulted in multi-million dollar savings (annualized).

Intel Corporation

Business Analyst (June 2000 – October 2001)

- Performed analysis of Intel's financial processes as well as the computer systems used to support accounting and finance functions. Responsible for the review of business requirements and the configuration of systems around respective processes. Conduit between programmer analysts and management in the design and day-to-day operations of financial software and systems.

ROBERT D. KLOPOTEK

Career History

WellCare Health Plans, Inc., Tampa, FL

Vice President, Information Systems (October 2005 – Present)

- Initial accountability (and successful launch) for all IT aspects of WellCare's national PDP plan, providing solutions for both internal and government partner challenges.
- Assumed responsibility for stabilizing Medicaid enrollment processes for 3 new, large Medicaid plans.
- Successfully led the design, development, and implementation of enterprise-wide Enrollment intake and Correspondence Tracking capabilities supporting both Medicaid and Medicare.
- Corporate Accountability for conducting Regulatory Steering Committee to ensure timely and accurate transition of regulatory changes to system solutions. Includes oversight and delivery for associated projects, ranging from annual AEP and CMS releases to Medicaid Reporting and NPI deployment.
- Assumed responsibility for a large collection of home-grown, surround applications in Delphi. Reduced operating costs and improved productivity by documenting requirements, retiring several applications by eliminating redundancy, and migrating to C#/Oracle during major system upgrade.
- Accountable for all aspects of Core Platform application support. Accomplishments include stabilizing platform and eliminating outages, successfully completing two major upgrades during 3-day weekends without business disruption, and successfully negotiating long-term vendor contract that provides dedicated vendor staff and long-term platform stability at a very affordable cost per member.
- Responsible for primary interactions with operational and product development business units. Approach became the model for the corporate IT Single Point of Contact (SPOC) process.
- Assumed responsibility for operations area and transformed the focus "from IT Operations to Production Control". Includes negotiation, monitoring, and delivery of business-meaningful SLAs as well as 24x7 monitoring of business operations and functions, with playbooks and escalation procedures to ensure effective business outcomes.
- Continually maintain focus on recruitment and staffing activities, placing emphasis on balanced, honest feedback that provides actionable improvement and growth information, a recruitment process that brings in only quality additions, and continuous knowledge transition. Demonstrated through 5 years as IT instructor for internal "Essentials of Managed Care" program, serving as advisor to USF Graduate Student program (2012) student project, and high annual Associate Opinion Survey scores.
- Transitioned to accountability as Chief Architect of WellCare (2014), accountable for Enterprise Architecture and management of Solution Architects to ensure development of robust, scalable applications in support of our government partners.

Amisys Synertech, Inc., Harrisburg, PA

Vice President, Product Engineering (ASI) (October 2003 – October 2005)

- Reporting to CTO, responsible for activities of all software development staff of >70 FTEs and contractors. Primary activities were the successful development and support, in an ASP arrangement, of CDH solutions for 3 early entrants (Lumenos, Definity, HMI) in a 6 month period as well as the migration of the AMISYS application from proprietary HP 3000 to Java/Oracle platform. Both solutions continue to be utilized and generate revenue.
- Continued maintenance and support for all ASP products and solutions, including "HSII", "QMACS", "Pathways Managed Care" platforms and application code.
- Technology platforms supported included MUMPS, Visual Basic/.Net and SQL Server, C++ and Sybase, COBOL and Turbo Image (HP3000), Java/J2EE and Oracle, and web technologies such as JSP, HTML, and Struts Framework.
- Led development and implementation of process improvement and BPM solutions utilizing Microsoft BizTalk to improve claims processing productivity and reduce operational costs.

Chief Information Officer (March 2001 – October 2003)

- Successfully provided and managed all infrastructure and IT components of ASP business operations, running multiple server platforms and operating systems (Compaq Proliant/Windows and HP/HP-UX; also Linux, Sun/Solaris, and HP 3000). Exceeded contractual 99.5% availability standards with actual average of >99.9%.
- Accountable for budget, availability, vendor selection and management functions of delivering seamless implementation and support for all infrastructure components, ranging from network and telecom (internal network, dial up, frame relay, and wireless internet), connectivity (including Citrix and VPN), security (Intrusion Detection, Firewalls, Virus scanning) and data center facilities.
- Led and managed 24x7x365 operations area responsible for tens-of-thousands of weekly job process and file transmission activities. Implemented and met business-driven SLAs for these operations.
- Responsible for all Business Process Outsourcing and Software Development Functions in Pick/Unidata, MUMPS, Oracle and SQL Server along with Lotus Domino, Sybase, and Turbo Image.
- Responsible for IT Policy and Governance including topics such as IT Security and Password, HIPAA, and Change Management policies and leadership and oversight of Corporate Technology Committee.
- Accountable for development, annual testing, and revision of Data Center recovery plan, demonstrating the ability to meet the contractually-obligated 72 hour recovery time objective.
- Led service desk area for >1000 internal users and >2000 external users supporting all application and infrastructure services, managing to aggressive response time and resolution SLAs.

Director, Managed Care Software Development (1996-2001)

- Oversight of software development and maintenance for flagship software offerings. Accountable for budget and delivery obligations of >50 FTEs and contractors supporting

multiple software solutions ("HSII", "QMACS", and "Tingley) and corresponding custom software on multiple technology platforms (including MUMPS, Visual Basic/.Net and SQL Server, Java and Oracle).
- Successfully led the development and implementation of Medicare Part C solutions for new and existing clients in 9 months, including all CMS transactions and formats.
- Supported the Advanced Systems group charged with migrating MUMPS application and code generation tools to object-oriented, Java-based solution.
- Successfully developed and executed skills transition plan of MUMPS and Pick developers to newer technologies, including VB, SQL Server, and object-oriented approaches.
- Leadership and responsibility for EDI and clearinghouse interactions and data file mapping (including HIPAA Transactions) utilizing BizTalk, EZ-Map, and Mercator.

Manager, Software Development (1992-1996)

- Design and Management responsibilities for specified application modules, including new development and maintenance, with accountability for >20 FTEs and contractors.
- Through various restructurings, assumed responsibility for development teams supporting all application modules, including systems and tools functions, improving system design and cohesion.
- Designed, led, and helped develop "Pre-enrollment" module to support individual and Medicaid Market in 3 months, expanding customer market opportunity and reducing operational expense.
- Designed and developed a provider Capitation module that included Fully-Capitated and Episode-of-Care based reimbursement and risk sharing solution in 6 months.

Career History

WellCare Health Plans, Inc., Tampa, FL

Vice President, Clinical Services (April 2014 – Present)

- Directs the plan's health services function which may include pre-authorization, concurrent review, complex case management, quality improvement, credentialing, health and wellness and disease management.
- Oversight of the overall coordination, implementation and monitoring of activities to yield quality driven, compliant, efficient and cost-effective results.

Aetna/CoventryCares of Kentucky, Louisville, KY

Vice President, Health Services (August 2012 – April 2014)

- Direct report to the Chief Medical Officer to meet targets for inpatient bed days, meeting Medical Loss Ratio targets and increasing quality of care for members, developing and adhering to the budget for the Health Services Department and oversight of the corporate case management programs, and for developing programs specific to the needs of the Kentucky population.

Select Health of South Carolina, Charleston, SC

Regional Clinical Lead for the Southern Region (February 2012 – August 2012)

- The parent company, AmeriHealth Mercy, expanded into additional states creating the need to expand the scope of the then current clinical lead position in South Carolina. Responsible for oversight and development of the Utilization Management, Case Management, Maternal Child Case Management, Rapid Response Unit and the Appeals Department for all 3 states, including developing the budget for all three states. A total of 380,000 Medicaid/SCHIP members were managed between the plans.

Senior Director, Medical Services (September 2008 – February 2012)

- Responsible for designing and implementing policies and procedures for our UM, CM and DM departments, which contributed to their obtaining their initial NCQA accreditation, budgetary oversight, monitoring of under and over utilization and development of productivity standards. Areas of responsibility included Case Management, Disease Management, Maternal Child Case Management, Utilization Management, Provider Appeals and Delegated Onsite activities for external vendors for Behavioral Health and High Tech Imaging for a 170,000 member Medicaid Program, in addition to managing the new SCHIP membership in South Carolina.

Health Integrated, Tampa, Florida

Senior Director, Behavioral Health Utilization Management and Case Management (January 2008 - June 2008)

- Areas of responsibility included Behavioral Health Utilization Management and Case Management for a combination of Commercial, Medicaid and Medicare Advantage members.

BlueCross BlueShield of Tennessee, Chattanooga, TN

Director/Senior Manager for Medical Management (October 2006 – November 2007)

- Responsible for the continued development of the Medicaid (BlueCare) line of business for 600,000 members; development of the Medical Management platform for the newly assigned SCHIP members; and the development of two commercial products to offer to Tennessee's low-income uninsured and the uninsurable populations (Cover Tennessee).

- Senior Managers and Managers over Utilization Management, Disease Management, Case Management, Care Coordination, Member Outreach, Member Appeals, Provider Appeals, Retrospective and Pre-existing Reviews, Systems and Education, and the Senior Manager who coordinated Behavioral Health Services with the State's Behavioral Health Organization reported to this position. Responsible for developing the budgets for all 4 lines of business for the Medical Management areas.

Senior Manager, Commercial Medical Management Division (2005 – 2006)

- Responsible for oversight and continued development of the Utilization Management, Case Management, Catastrophic Case Management, Care Coordination, Transplant Case Management, High Risk OB Case Management areas, including managing the Federal Employees (FEP) medical management department, for a total of 1.6 million lives. Responsible for the budget for this department's Medical Management Division and meeting medical management targets.

- Three highlights during this period were our department's development of a DVT prevention program, an end-stage support program (HOPE), which focused on Hospice, Oncology, Palliative Care and End State Disease, and participation in the design, development and implementation of Custom Care Solutions, a programmed designed to meet the needs of one of our large municipal accounts with high cost members to reward members for participation in the case management program, with a focus on referring members to best-practice practitioners.

Senior Manager, Medical Management (1999-2005)

- During this period all of the medical management departments at BlueCross Blue Shield of Tennessee were combined into one department, with management being divided into East

and West. This position was responsible for providing direction and management for the eastern part of Tennessee, which included Commercial and Medicaid lines of business. In addition, the Eastern Division managed Security Blue, an HMO Medicare Product which was just available to members residing in one geographical section of the eastern part of the state. 1.4 million lives were managed for the eastern part of the state.

Manager, Clinical Services, Medicaid Division (1997 – 1999)

- Manager for all of the medical management staff who worked in the areas of Utilization Management, Case Management, Provider Appeals, Member Outreach, and Demand Management (our internal 24/7 Nurse Line) for a membership of 600,000. During 1996/1997 the Case Management and Demand Management departments were created for the Medicaid population. The Utilization Management function for Medicaid was transitioned from the Commercial side.

ADDENDUM TWELVE

Date: December 30, 2015

To: All Bidders

From: Michelle Thompson/Teresa Fleming, Buyers
AS Materiel State Purchasing Bureau

RE: Addendum for Request for Proposal Number 5151 Z1
to be opened January 5, 2016 at 2:00 p.m. Central Time

The State does not anticipate posting additional amendments and/or addendums.

This addendum will become part of the proposal and should be acknowledged with the Request for Proposal.

Attachment 40 - Updated MLR and Risk Corridor Examples

Example 1. MCO pays money back to State under MLR and risk corridor

Earned Revenue for MLR/Risk Corridor		
Gross Capitation Payment	$	105.54
HIT	$	3.69
Hold-Back	$	1.53
Performance Penalty	$	0.25
Net Capitation Payment for MLR/Risk Corridor	$	100.06
MMs		1,000
Earned Revenue for MLR/Risk Corridor	**$**	**100,065**

MLR Example		
Earned Revenue (Total Capitation Payments less hold-back, performance penalty, and HIT)	$	100,065
Claims Incurred	$	75,000
Estimated IBNR	$	2,000
Medical Incentive Bonus	$	1,000
Reinsurance Premiums Less Recoveries	$	-
Activities that Improve Health Care Quality	$	3,000
Less Related-Party Medical Margin	$	(500)
Total Medical Expenses (Net Qualified Medical Expenses)	$	80,500
Net Qualified Medical Expenses divided by Earned Revenue		80.4%
Minimum MLR %		85.0%
Percentage below MLR		4.6%
MLR Reconciliation Payment	**$**	**(4,555)**

Risk Corridor Example		
Earned Revenue (Total Capitation Payments less hold-back, performance penalty, and HIT)	$	100,065
MLR Rebate	$	(4,555)
Claims Incurred	$	75,000
Estimated IBNR	$	2,000
Medical Incentive Bonus	$	1,000
Reinsurance Premiums Less Recoveries	$	-
Less Related-Party Medical Margin	$	(500)
Total Medical Expenses (Net Qualified Medical Expenses)	$	77,500
Total Activities that Improve Health Care Quality	$	3,000
Allowed Activities that Improve Health Care Quality	$	3,000
Total Incurred Administration (Excluding HIT, hold-back, performance penalty, and QI)	$	7,000
Total Allowed Administration (Excluding HIT, hold-back, performance penalty, and QI)	$	7,000
Total Administration (QI and non-QI)	$	10,000
Profit/(Loss)	$	8,010
Risk Corridor Profit/(Loss) Share	**$**	**(5,008)**

Example 2. State pays money back to MCO under risk corridor

Earned Revenue for MLR/Risk Corridor		
Gross Capitation Payment	$	105.54
HIT	$	3.69
Hold-Back	$	1.53
Performance Penalty	$	0.25
Net Capitation Payment for MLR/Risk Corridor	$	100.06
MMs		1,000
Earned Revenue for MLR/Risk Corridor	**$**	**100,065**

MLR Example		
Earned Revenue (Total Capitation Payments less hold-back, performance penalty, and HIT)	$	100,065
Claims Incurred	$	105,000
Estimated IBNR	$	2,000
Medical Incentive Bonus	$	1,000
Reinsurance Premiums Less Recoveries	$	-
Activities that Improve Health Care Quality	$	3,000
Less Related-Party Medical Margin	$	(500)
Total Medical Expenses (Net Qualified Medical Expenses)	$	110,500
Net Qualified Medical Expenses divided by Earned Revenue		110.4%
Minimum MLR %		85.0%
Percentage below MLR		0.0%
MLR Reconciliation Payment	**$**	**-**

Risk Corridor Example		
Earned Revenue (Total Capitation Payments less hold-back, performance penalty, and HIT)	$	100,065
MLR Rebate	$	-
Claims Incurred	$	105,000
Estimated IBNR	$	2,000
Medical Incentive Bonus	$	1,000
Reinsurance Premiums Less Recoveries	$	-
Less Related-Party Medical Margin	$	(500)
Total Medical Expenses (Net Qualified Medical Expenses)	$	107,500
Total Activities that Improve Health Care Quality	$	3,000
Allowed Activities that Improve Health Care Quality	$	3,000
Total Incurred Administration (Excluding HIT, hold-back, performance penalty, and QI)	$	7,000
Total Allowed Administration (Excluding HIT, hold-back, performance penalty, and QI)	$	7,000
Total Administration (QI and non-QI)	$	10,000
Profit/(Loss)	$	(17,435)
Risk Corridor Profit/(Loss) Share	**$**	**14,433**

Example 3. Administrative expenses exceed admin cap

Earned Revenue for MLR/Risk Corridor		
Gross Capitation Payment	$	105.54
HIT	$	3.69
Hold-Back	$	1.53
Performance Penalty	$	0.25
Net Capitation Payment for MLR/Risk Corridor	$	100.06
MMs		1,000
Earned Revenue for MLR/Risk Corridor	**$**	**100,065**

MLR Example		
Earned Revenue (Total Capitation Payments less hold-back, performance penalty, and HIT)	$	100,065
Claims Incurred	$	105,000
Estimated IBNR	$	2,000
Medical Incentive Bonus	$	1,000
Reinsurance Premiums Less Recoveries	$	-
Activities that Improve Health Care Quality	$	4,000
Less Related-Party Medical Margin	$	(500)
Total Medical Expenses (Net Qualified Medical Expenses)	$	111,500
Net Qualified Medical Expenses divided by Earned Revenue		111.4%
Minimum MLR %		85.0%
Percentage below MLR		0.0%
MLR Reconciliation Payment	**$**	**-**

Risk Corridor Example		
Earned Revenue (Total Capitation Payments less hold-back, performance penalty, and HIT)	$	100,065
MLR Rebate	$	-
Claims Incurred	$	105,000
Estimated IBNR	$	2,000
Medical Incentive Bonus	$	1,000
Reinsurance Premiums Less Recoveries	$	-
Less Related-Party Medical Margin	$	(500)
Total Medical Expenses (Net Qualified Medical Expenses)	$	107,500
Total Activities that Improve Health Care Quality	$	4,000
Allowed Activities that Improve Health Care Quality	$	3,002
Total Incurred Administration (Excluding HIT, hold-back, performance penalty, and QI)	$	12,000
Total Allowed Administration (Excluding HIT, hold-back, performance penalty, and QI)	$	7,005
Total Administration (QI and non-QI)	$	10,006
Profit/(Loss)	$	(17,442)
Risk Corridor Profit/(Loss) Share	**$**	**14,440**

Addendum 11 – Additional Revisions to RFP

Document	Section	Change From:	Change to:
RFP	IV.H.4.b	The member or provider may file an appeal within 90 calendar days from the date on the MCO's Notice of Action.	The member or provider may file an MCO-level appeal within a timeframe that is not less than 20 calendar days and not more than 90 calendar calendar days from the date on the MCO's Notice of Action.
RFP	IV.H.7.c	The member or the member's representative (if any) may request a state fair hearing within 90 calendar days from the date of the MCO Notice of Action.	The member or the member's representative (if any) may request a state fair hearing within a timeframe that is not less than 20 calendar days and not more than 90 calendar days from the date of the MCO's notice of resolution.
Addendum 6	Q. 112	See Attachment 21: "Non-Medical Load Assumptions" which identifies the Non-Medical Load components used at each end of the rate range by COA and region.	See Attachment 21: "Non-Medical Load Assumptions" which identifies the Non-Medical Load components used at each end of the rate range by COA and region. Currently, the 0.25% State Performance Penalty is loaded in to the rate as an at-risk incentive. When final rates are developed in early 2016, the 0.25% will be treated as a withhold and handled identically to the 1.5% Quality Performance Program. It will no longer be a component of non-medical loading.
Addendum 7	Q. 227	The MLTC Quality Performance hold-back is not factored into the risk corridor or the Minimum MLR. The MLTC Quality Performance hold-back is factored in to the Administrative Cap. It is required to be factored in to the administrative cap so that if an MCO earns the entire hold-back they will remain beneath the administrative caps required by statute. The State Performance Penalty is included in the minimum MLR, risk corridor, and the Administrative Cap.	The MLTC Quality Performance hold-back and the State Performance Penalty (SPP) are not factored into the risk corridor or the Minimum MLR. The MLTC Quality Performance hold-back and SPP are factored in to the Administrative Cap. It is required to be factored in to the administrative cap so that if an MCO earns the entire hold-back they will remain beneath the administrative caps required by statute.
Addendum 7	Q. 230	In terms of the actuarial certification, only the MLTC Quality Performance hold-back is considered a withhold.	Yes, both the MLTC Quality Performance hold-back and State Performance Penalties will be considered withholds in the actuarial certification.

Addendum 7	Q. 249	See Attachment 21: "Non-Medical Load Assumptions". NML is based on the experience of current Managed Care Entities.	See Attachment 21: "Non-Medical Load Assumptions". NML is based on the experience of current Managed Care Entities. Currently, the 0.25% State Performance Penalty is loaded in to the rate as an at-risk incentive. When final rates are developed in early 2016, the 0.25% will be treated as a withhold and handled identically to the 1.5% Quality Performance Program. It will no longer be a component of non-medical loading.
Addendum 7	Q. 254	The rates shown in the "Medical PMPM" columns of Attachment 11 are gross MLTC hold-back (1.5%) and net State Performance Penalties (0.25%). The rates shown in the "Developed Rate" and "Total Rate" columns of Attachment 11 are gross MLTC hold-back (1.5%) and gross State Performance Penalties (0.25%). The State Performance Penalties is considered a component of non-medical load and is added in along with other administrative funding.	The rates shown in the "Medical PMPM" columns of Attachment 11 are gross MLTC hold-back (1.5%) and net State Performance Penalties (0.25%). The rates shown in the "Developed Rate" and "Total Rate" columns of Attachment 11 are gross MLTC hold-back (1.5%) and gross State Performance Penalties (0.25%). The State Performance Penalties was originally considered a component of non-medical load and was added in along with other administrative funding. When final rates are developed in early 2016, the 0.25% will be treated as a withhold and handled identically to the 1.5% Quality Performance Program. It will no longer be a component of non-medical loading.
Addendum 7	Q. 341	See response to Question #33.	Yes, both the MLTC Quality Performance Program and the State Performance Penalty are excluded from the revenue calculation of the risk corridor. Please see Attachment 40 for an example of the exclusion.

Addendum 9	Q. 67	This information will be posted to the procurement website no later than December 24, 2015.	The risk corridor calculation formula in Section IV.P.9.c is amended as follows: “Risk corridor profit/loss = qualifying revenue -MLR rebate -Net qualified medical expenses calculated for the risk corridor -Total allowed administration calculated for the administrative cap” This indicates that activities to improve health care quality may be considered a medical expense for the MLR calculation but will be considered an administrative expense for the risk corridor calculation. Activities to improve healthcare quality should be reported under the total allowed administration calculated for the administrative cap, under the risk corridor calculation. Please see Attachment 40.
Addendum 9	Q. 68	This information will be posted to the procurement website no later than December 24, 2015.	1. The UNMC portion of the revenue and expenses will be included in the MLR and Risk Corridor calculations. 2. The earned revenue used in the MLR and Risk Corridor calculations should exclude the QPP hold-back. As such, both the earned and unearned portions of the 1.5% hold-back are excluded from the calculations. 3. The earned and unearned portion of the 0.25% Performance Penalty are excluded from the risk corridor and MLR calculations. Please see Attachment 40.
Addendum 9	Q. 69	This information will be posted to the procurement website no later than December 24, 2015.	Please see Attachment 40.
Addendum 9	Q. 70	This information will be posted to the procurement website no later than December 24, 2015.	Please see Attachment 40.

Addendum 9	Q. 72	All items on this list will be considered in the rate certification in the Spring of 2016. In addition to the items on this list, the Maternity case rate will be revisited to capture pharmacy and behavioral health costs. Additionally, the State's actuaries anticipate using additional runout from FFS data and current Managed Care entities. No changes to the base period are anticipated.	All items on this list are aspects of rate setting that will be revisited in the Spring. In addition to the items on this list, the Maternity case rate will be revisited to capture pharmacy and behavioral health costs. Additionally, Optumas anticipates using additional runout from FFS data and current Managed Care entities. As part of receiving the updated data extracts the rate setting process will be revisited, but at this time it is not anticipated that a new base period will be used. Currently, the 0.25% State Performance Penalty is loaded in to the rate as an at-risk incentive. When final rates are developed in early 2016, the 0.25% will be treated as a withhold and handled identically to the 1.5% Quality Performance Program. It will no longer be a component of non-medical loading.
Addendum 9	Q. 74	This information will be posted to the procurement site no later than December 24, 2015.	1) and 2): Hepatitis C expenditures occur in two aid categories in Rating Region 1 and two categories in Rating Region 2. In Rating Region 1, the AABD 21+ M&F cohort has a Hepatitis C PMPM of $18.55 and a non-Hepatitis C PMPM of $356.37. The Family 21+ M&F cohort has a Hepatitis C PMPM of $1.22 and a non-Hepatitis C PMPM of $76.12. In Rating Region 2 the AABD 21+ M&F cohort has a Hepatitis C PMPM of $25.14 and a non-Hepatitis C PMPM of $439.50, and the Non-Dual Waiver cohort has a Hepatitis C PMPM of $17.66 and a non-Hepatitis C PMPM of $360.20. 3) This information is not available.

Attachment 39
Revised Access Standards

Appointment Availability Access Standards

1. Emergency services must be available immediately upon presentation at the service delivery site, 24 hours a day, seven days a week. Members with emergent behavioral health needs must be referred to services within one hour generally and within two hours in designated rural areas.

2. Urgent care must be available the same day and be provided by the PCP or as arranged by the MCO.

3. Non-urgent sick care must be available within 72 hours, or sooner if the member's medical condition(s) deteriorate into an urgent or emergent situation.

4. Family planning services must be available within seven calendar days.

5. Non-urgent, preventive care must be available within 4 weeks.

6. PCPs who have a one-physician practice must have office hours of at least 20 hours per week. Practices with two or more physicians must have office hours of at least 30 hours per week.

7. For high volume specialty care, routine appointments must be available within 30 calendar days of referral. High volume specialists include cardiologists, neurologists, hematologists/oncologists, OB/GYNs, and orthopedic physicians. For other specialty care, consultation must be available within one month of referral or as clinically indicated.

8. Laboratory and x-ray services must be available within three weeks for routine appointments and 48 hours (or as clinically indicated) for urgent care.

9. Maternity care must be available within 14 calendar days of request during the first trimester, within seven calendar days of request during the second trimester, and within three calendar days of request during the third trimester. For high-risk pregnancies, the member must be seen within three calendar days of identification of high risk by the MCO or maternity care provider, or immediately if an emergency exists.

Geographic Access Standards

1. The MCO must, at a minimum, contract with two PCPs within 30 miles of the personal residences of members in urban counties; one PCP within 45 miles of the personal residences of members in rural counties; and one PCP within 60 miles of the personal residences of members in frontier counties.

2. The MCO must, at a minimum, contract with one high volume specialist within 90 miles of personal residences of members. High volume specialties include cardiology, neurology, hematology/oncology, obstetrics/gynecology, and orthopedics.

3. The MCO must secure participation in its pharmacy network of a sufficient number of pharmacies that dispense drugs directly to members (other than by mail order) to ensure convenient access to covered drugs.

    a. In urban counties, a network retail pharmacy must be available within five miles of 90% of members' personal residences.

    b. In rural counties, a network retail pharmacy must be available within 15 miles of 70% of members' personal residences.

    c. In frontier counties, a network retail pharmacy must be available within 60 miles of 70% of members' personal residences.

4. The MCO must, at a minimum, contract with behavioral health inpatient and residential service providers with sufficient locations to allow members to travel by car or other transit provider and return home within a single day in rural and frontier areas. If it is determined by MLTC that no inpatient providers are available within the access requirements, the MCO must develop alternative plans for accessing comparable levels of care, instead of these services, subject to approval by MLTC.

5. The MCO must, at a minimum, contract with an adequate number of behavioral health outpatient assessment and treatment providers to meet the needs of its members and offer a choice of providers. The MCO must provide adequate choice within 30 miles of members' personal residences in urban areas; a minimum of two providers within 45 miles of members' personal residences in rural counties, and a minimum of two providers within 60 miles of members' personal residences in frontier counties. If the rural or frontier requirements cannot be met because of a lack of behavioral health providers in those counties, the MCO must utilize telehealth options.

6. The classification of counties according to urban, rural, and frontier status is included as Attachment 3, with classifications based upon data from the most recent U.S. Census.

7. The MCO must contract with a sufficient number of hospitals to ensure that transport time will be the usual and customary, not to exceed 30 minutes, except in rural areas where access time may be greater. If greater, the standard needs to be the community standard for accessing care, and exceptions must be justified and documented to the State on the basis of community standards.

Monthly Deliverables	Due on the 15th day of the following calendar month unless otherwise noted in the RFP or agreed to in writing by the MCO and MLTC.
Quarterly Deliverables	Due 45 calendar days after the end of the most recent quarter unless otherwise noted in the RFP or agreed to in writing by the MCO and MLTC.
Semi-Annual Deliverables	Due as specified in this attachment.
Annual Deliverables	Reports, files, and other deliverables due annually must be submitted within 30 calendar days following the 12th month of the contract year, except those reports that are specifically exempted from the 30-calendar day deadline by this RFP or by written agreement between MLTC and the MCO.
Ad Hoc Deliverables	Ad hoc reports must be submitted within five business days from the date of request, unless otherwise specified by MLTC.

If a due date falls on a weekend or State-recognized holiday, the deliverable is due the next business day. All reports must be submitted in an MLTC provided template or in a format approved by MLTC.

Monthly Deliverables	Description	Due Date
Claims Processing and Timely Payment of Claims	Summary data on claims payment activity and reasons for claims denials, per reporting requirements provided by MLTC. Include the disposition of every adjudicated and adjusted claim for each claim type.	15th day of the following calendar month
Provider Termination	All provider terminations by category and termination cause.	15th day of the following calendar month
Third Party Resource	All instances in which a TPR was identified for a member as described in Section IV.P - MCO Reimbursement.	15th day of the following calendar month
Claims Payment Accuracy	Claims payment accuracy percentages as described in Section IV.S - Claims Management.	15th day of the following calendar month
Member Grievance System (Grievance)	Summary of new grievances, resolved grievances, and status of unresolved grievances. This report is required monthly for the first six months after the contract start date and will then be required quarterly.	15th day of the following calendar month for the first six months, then 45 calendar days following the most recent quarter

Member Grievance System (Appeals)	Summary of new appeals, completed appeals, and status of each ongoing appeal. This report is required monthly for the first six months after the contract start date and will then be required quarterly.	15th day of the following calendar month for the first six months, then 45 calendar days following the most recent quarter
Member Grievance System (Expedited Appeals)	Summary of new expedited appeals, completed expedited appeals, and status of each ongoing expedited appeal. This report is required monthly for the first six months after the contract start date and will then be required quarterly.	15th day of the following calendar month for the first six months, then 45 calendar days following the most recent quarter
Member Grievance System (State Fair Hearings)	Summary of new state fair hearings, concluded state fair hearings, and status of each ongoing state fair hearing. This report is required monthly for the first six months after the contract start date and will then be required quarterly.	15th day of the following calendar month for the first six months, then 45 calendar days following the most recent quarter
Provider Grievance System (Grievances)	Summary of new grievances, resolved grievances, and status of unresolved grievances. This report is required monthly for the first six months after the contract start date and will then be required quarterly.	15th day of the following calendar month for the first six months, then 45 calendar days following the most recent quarter
Provider Grievance System (Appeals)	Summary of new appeals, completed appeals, and status of each ongoing appeal. This report is required monthly for the first six months after the contract start date and will then be required quarterly.	15th day of the following calendar month for the first six months, then 45 calendar days following the most recent quarter
Provider Grievance System (State Fair Hearings)	Summary of new state fair hearings, concluded state fair hearings, and status of each ongoing state fair hearing. This report is required monthly for the first six months after the contract start date and will then be required quarterly.	15th day of the following calendar month for the first six months, then 45 calendar days following the most recent quarter
New Referrals of Potential Fraud, Waste, Abuse and Erroneous Payments	Summary of new referrals as described in Section IV.O - Program Integrity.	Second Friday of the following calendar month

All Referrals of Fraud, Waste, Abuse, and Erroneous Payments Under Review by the MCO	Summary of all referrals as described in Section IV.O - Program Integrity.	Second Friday of the following calendar month
Overpayments Identified and Collected	Summary of overpayments as described in Section IV.O - Program Integrity.	Second Friday of the following calendar month
Provider Who Have Left the MCO Network	Summary of provider network departures as described in Section IV.O - Program Integrity.	Second Friday of the following calendar month
Miscellaneous Fraud Prevention Efforts	Summary of the MCO's fraud prevention efforts as described in Section IV.O - Program Integrity.	Second Friday of the following calendar month
Pharmacy Prior Authorizations	Prior authorizations summary, including clinical and technical prior authorizations, peer review, and peer to peer consultation statistics.	15th day of the following calendar month
Pharmacy Technical and Clinical Call Center	Performance summary for call center metrics, pharmacy services, prior authorization request turnaround time, and training issues.	15th day of the following calendar month
Pharmacy Claims Processing	Summary data and analysis on pharmacy claims processing including: generic analysis (will be detailed by MLTC), MAC priced medications, claims adjudication system availability and payment statistics, number of prescriptions dispensed by public retail pharmacies (mail order pharmacies and specialty pharmacies included but delineated), total members utilizing pharmacy claims system, and total membership.	15th day of the following calendar month
Psychotropic Medications for Youth	Summary of prior authorization and utilization relating to clinical edits.	15th day of the following calendar month
PDL Load	Data documenting that the PDL file was received and loaded weekly.	15th day of the following calendar month
Behavioral Health Residential Wait List	Summary data, by member, of the number of days before a member is accepted into a program and, by member, the number of days before the member is admitted to the program.	15th day of the following calendar month
Out of State Placement	Summary data of the number of members placed in out of state residential treatment.	15th day of the following calendar month
Eligible and Number Authorized	Summary data documenting by cohort the number of members eligible for and receiving behavioral health services.	15th day of the following calendar month

Welcome Calls	Results of welcome calls to new members as described in Section IV.F - Members Services and Education.	15th day of the following calendar month
Hospice	Data summarizing hospice admissions.	15th day of the following calendar month
Medically Necessary State Wards in Residential Treatment	Data summarizing the number of state wards deemed "medically necessary" who are in residential treatment.	15th day of the following calendar month
Claims Adjudicated	Data summarizing claims adjudicated to finalization in the previous calendar month as described in Section IV.O - Program Integrity.	Second Friday of the following calendar month
Member/Provider Call Center	Data summarizing MCO member/provider call center performance, including call abandonment rate and average speed to answer.	15th day of the following calendar month
Quarterly Deliverables	**Description**	**Due Date**
Member Grievance System (Grievance)	Summary of new grievances, resolved grievances, and status of unresolved grievances. This report is required monthly for the first six months after the contract start date and will then be required quarterly.	45 calendar days following the most recent quarter
Member Grievance System (Appeals)	Summary of new appeals, completed appeals, and status of each ongoing appeal. This report is required monthly for the first six months after the contract start date and will then be required quarterly.	45 calendar days following the most recent quarter
Member Grievance System (Expedited Appeals)	Summary of new expedited appeals, completed expedited appeals, and status of each ongoing expedited appeal. This report is required monthly for the first six months after the contract start date and will then be required quarterly.	45 calendar days following the most recent quarter
Member Grievance System (State Fair Hearings)	Summary of new state fair hearings, concluded state fair hearings, and status of each ongoing state fair hearing. This report is required monthly for the first six months after the contract start date and will then be required quarterly.	45 calendar days following the most recent quarter
Provider Grievance System (Grievances)	Summary of new grievances, resolved grievances, and status of unresolved grievances. This report is required monthly for the first six months after the contract start date and will then be required quarterly.	45 calendar days following the most recent quarter

Provider Grievance System (Appeals)	Summary of new appeals, completed appeals, and status of each ongoing appeal. This report is required monthly for the first six months after the contract start date and will then be required quarterly.	45 calendar days following the most recent quarter
Provider Grievance System (State Fair Hearings)	Summary of new state fair hearings, concluded state fair hearings, and status of each ongoing state fair hearing. This report is required monthly for the first six months after the contract start date and will then be required quarterly.	45 calendar days following the most recent quarter
Drug Utilization Management Retrospective Educational Intervention Project	Project update in a format approved by MLTC.	45 calendar days following the most recent quarter
Prospective DUR Statistics	DUR statistics to support preparation of MLTC's annual CMS DUR report.	45 calendar days following the most recent quarter
Pharmacy Financial Report	Summary data on committed pharmacy dollars, pharmacy total claims dollars, MCO supplemental rebate dollars, and MAC savings.	45 calendar days following the most recent quarter
Pharmacy Utilization Management	Data summarizing pharmacy utilization management categories including, but not limited to: quantity limits, prior authorization, step therapy, dose optimization, MAC, top 100 drugs, and top 50 drug categories listed by expenditures and claim count.	45 calendar days following the most recent quarter
PDL Compliance	Data documenting accuracy in dispensing medications in PDL categories.	45 calendar days following the most recent quarter
Care Management Report	Summary data and metric results as determined by MLTC.	45 calendar days following the most recent quarter
Enrollment and Disenrollment Report	Summary of disenrollments as described in Section IV.B - Eligibility and Enrollment.	45 calendar days following the most recent quarter

Out of Network Referrals	Data and analysis summarizing out of network provider authorizations.	45 calendar days following the most recent quarter
Provider Network Access	Summary data and metrics on network access as determined by MLTC and described in Attachment 2 - Access Standards.	45 calendar days following the most recent quarter
Provider Network Adequacy	Summary data and metrics demonstrating network adequacy as determined by MLTC and described in Attachment 2 - Access Standards.	45 calendar days following the most recent quarter
Provider Network Cultural Competency Access	Summary data and metrics on cultural competency access as determined by MLTC.	45 calendar days following the most recent quarter
Provider Network PCP Access	Summary data and metrics on PCP access as determined by MLTC and described in Attachment 2 - Access Standards.	45 calendar days following the most recent quarter
Provider Credentialing	Data and metrics summarizing the number of providers credentialed by licensure type, their location, and the status of pending credentials.	45 calendar days following the most recent quarter
Quality Oversight Committee	Committee activity summary as described in Section IV.M - Quality Management.	45 calendar days following the most recent quarter
Service Verification Detail	Data detailing service verifications as described in Section IV.S - Claims Management and Section IV.O - Program Integrity.	45 calendar days following the most recent quarter
Service Verification Summary	Service verification summary as described in Section X - Claims Management and Section IV.O - Program Integrity.	45 calendar days following the most recent quarter
Utilization Management - Authorization	Summary data and metric results as determined by MLTC.	45 calendar days following the most recent quarter

Utilization Management - Claims	Summary data and metric results as determined by MLTC.	45 calendar days following the most recent quarter
Quality Performance	Summary data and metric results as determined by MLTC.	45 calendar days following the most recent quarter
Restraint and Seclusion	Data summarized, by behavioral health provider, on the number of incidents of restraint or seclusion by program type and location.	45 calendar days following the most recent quarter
Contracted Residential Beds	Summary data on the number of behavioral health-related residential beds available state-wide.	45 calendar days following the most recent quarter
Critical Incident Reporting	Summary data on the number of critical incident reports by behavioral health facility and location.	45 calendar days following the most recent quarter
Quarterly Financial Reporting	Data and analysis summarizing financial results as determined by MLTC and as described in Section IV.T - Reporting and Deliverables.	45 calendar days following the most recent quarter
30 day Ambulatory/Inpatient Readmission Rates	Summary data on the number of individuals readmitted to the emergency room 30 or more days post the prior admission.	45 calendar days following the most recent quarter
7 and 30 Day Ambulatory Follow-up Following Residential Discharge	Summary data on the number of individuals presenting to the emergency room 30 days after discharge from Acute Psych or SUD.	45 calendar days following the most recent quarter
Admissions and Readmits to Psych Inpatient	Data summarizing the number of admissions and readmits to psych inpatient, including Psychiatric Residential Treatment Facilities and Therapeutic Group Homes.	45 calendar days following the most recent quarter
Value-Added Services	Summary of value added services as agreed upon by the MCO and MLTC.	45 calendar days following the most recent quarter

Indian Health Services	Data and metrics summarizing Indian Health Service delivery.	45 calendar days following the most recent quarter
Medication Therapy Management	Data and analysis that summarizes MTM program activities, the effectiveness of the program over the reporting period, and the objectives and implementation plan for the next reporting period.	45 calendar days following the most recent quarter
Subrogation	Data summarizing new and ongoing instances of subrogation.	45 calendar days following the most recent quarter
Top Ten Diagnoses by Service Category	Data summarizing the top ten diagnoses by service category.	45 calendar days following the most recent quarter
Semi-Annual Deliverables	**Description**	**Due Date**
Member Advisory Committee Report	Narrative of the activities of the MCO's Member Advisory Committee as described in Section IV.M - Quality Management.	June 30 and December 31
Paid Claims Audit	Results of error rate measurement data processing, medical necessity, and provider documentation audit of a statistically valid random sample of paid claims as described in Section IV.O - Program Integrity.	June 30 and December 31
Annual Deliverables	**Description**	**Due Date**
Quality Management Program Description and Work Plan	Discussion of the MCO's quality goals, initiatives and work plan as described in Section IV.M – Quality Management.	30 calendar days following the 12th month of the contract year
Quality Management Program Evaluation	Data and analysis summarizing the results of the annual quality work plan as described in Section IV.M - Quality.	30 calendar days following the 12th month of the contract year
Member Satisfaction Survey	Data and analysis summarizing results of the annual member satisfaction survey.	30 calendar days following the 12th month of the contract year

Deficiency CAP Reports (All Provider Types)	Results and status of all corrective action plans by provider type.	30 calendar days following the 12th month of the contract year
Direct Medical Education/Indirect Medical Education Verification	For the state fiscal year, financial information on direct and indirect medical costs as required by MLTC in accordance with 471 NAC.	Due date to be provided prior to contract start
Performance Improvement Projects	Data summarizing annual results of each new and ongoing PIP.	30 calendar days following the 12th month of the contract year
HEDIS Report	HEDIS results.	June 30
CHIPRA Quality Measures	CHIPRA performance measure results.	45 calendar days following the 12th month of the contract year
Adult Core Measures	Adult Core Measures results.	45 calendar days following the 12th month of the contract year
Provider Survey	Data and analysis summarizing results of the annual provider satisfaction survey. The provider satisfaction survey tool and methodology must be submitted to MLTC for approval at least 90 days prior to its administration.	30 calendar days following the 12th month of the contract year
Facility Satisfaction Survey	Data and analysis summarizing results of the annual facility provider satisfaction survey.	30 calendar days following the 12th month of the contract year
Annual Financial Reporting	Data and analysis summarizing financial results as determined by MLTC and as described in Section IV.T - Reporting and Deliverables.	30 calendar days following the 12th month of the contract year

Fraud, Waste, Abuse, and Erroneous Payments Annual Plan	Compliance plan addressing requirements outlined in Section IV.O - Program Integrity.	Last day of the contract year
Annual Program Integrity Confirmation	Signed form acknowledging responsibilities related to the receipt of State and federal funds as described in Section IV.O - Program Integrity.	December 31
Department of Insurance Financial Report	Copy of annual audited financial statement submitted to the Nebraska Department of Insurance.	June 1
Network Development Plan	Details of the MCO's network, including GeoAccess reports, and a discussion of any provider network gaps and the MCO's remediation plans, as described in Section IV.I – Provider Network Requirements.	November 1
Utilization Management Program Review	Data and analysis summarizing the MCO's annual evaluation of its UM program.	30 calendar days following the 12th month of the contract year
Legislative Reports	**Description**	**Due Date**
LB 1063 - Children's Health and Treatment Act	Data and Geo Access reports related to youth Medicaid mental health authorization requests (all children ages 0-19) and Medicaid mental health authorization requests (all age groups reported by ages 0-18 years, 19-64 years, and 65+ years)	Quarterly reports submitted to Nebraska Legislature on January 1, April 1, July 1, and October 1 by MLTC.
LB 1160 Legislative Report	Number of state wards receiving behavioral health services as of September 1 immediately preceding the date of the current report; percentage of children denied Medicaid reimbursed services and the level of placement requested; and children in residential treatment.	Upon DHHS request.

Attachment 32, Nebraska Medicaid Eligible Providers removed due to confidential information

2,160 pages

Addendum 10 – Additional Revisions to RFP

Document	Section	Change From:	Change to:
RFP	IV.D.3.j	All additional required staff in this section must be located in the State with the exception of claims and encounter processing staff and certain care management staff.	All additional required staff in this section must be located in the State with the exception of claims and encounter processing staff, customer service representatives staffing the toll-free call center, and certain care management staff.
RFP	IV.E.14.a.iii	The MCO must not deny payment for treatment obtained when a member had an emergency medical condition as defined in 42 CFR 438.114(a).	The MCO must not deny payment for treatment obtained when a member had an emergency medical condition as defined in 42 CFR 438.114(c)(1)(ii)(A).
RFP	IV.I.12.d	Add new section	The MCO is prohibited from explicitly or implicitly communicating to potential network providers that the provider may face a lower reimbursement rate or any other financial or operational sanction should that provider choose not to sign a letter of intent with the MCO prior to the deadline for Heritage Health Proposals included in Addendum 8.
RFP	IV.N.4.d.vii	Use a licensed child and adolescent psychiatrist to review prior authorization requests for psychotropic medication use in youth as described under Section IV.D Staffing Requirements of this RFP.	Use a State-licensed child and adolescent psychiatrist to review prior authorization requests for psychotropic medication use in youth as described under Section IV.D Staffing Requirements of this RFP.
RFP	IV.N.10.a	Utilize prior authorizations and additional edits for psychotropic drugs prescribed to youth, at a minimum, following MLTC guidelines as provided in Attachment 8 – PBM Claims Processing Edits for the Nebraska Medicaid Psychotropic Drugs and Youth Initiative. If appropriate, the MCO must ensure a review of the prior authorization request by a State-licensed child and adolescent psychiatrist.	Utilize prior authorizations and additional edits for psychotropic drugs prescribed to youth, at a minimum, following MLTC guidelines as provided in Attachment 8. The MCO must ensure a review of the prior authorization request by a State-licensed child and adolescent psychiatrist.

RFP	IV.N.11.b	Restricted services are a mechanism for restricting Medicaid recipients to a specific physician and/or a specific pharmacy provider. The restricted services mechanism cannot prohibit the recipient from receiving services from providers who offer services other than physician and pharmacy benefits.	Restricted services are a mechanism for restricting Medicaid recipients to a specific hospital, primary care provider, prescribing provider, and/or a specific pharmacy provider in accordance with 471 NAC 2-004. The restricted services mechanism cannot prohibit the recipient from receiving services that meet the exceptions contained in 471 NAC 2-004.04.
RFP	IV.P.9.c	Risk corridor profit/loss = qualifying revenue - MLR rebate - Net qualified medical expenses calculated for the MLR - Total allowed administration calculated for the administrative cap.	Risk corridor profit/loss = qualifying revenue - MLR rebate - Net qualified medical expenses calculated for the risk corridor - Total allowed administration calculated for the administrative cap.
RFP	IV.Q.9.f	Add new section	If a MCO enters into a contract for the provision of services with a FQHC or RHC, the MCO shall provide payment that is not less than the level and amount of payment which the MCO would make for the services if the services were furnished by a provider which is not a FQHC or RHC.
RFP	Glossary of Terms	**Administrative expense rate:** The percentage of qualifying revenue a MCO may spend on administrative expenses. Administrative expense rate equals the costs that would have been incurred in the contract year in the absence of any related-party relationship.	**Administrative expense rate:** The percentage of qualifying revenue a MCO may spend on administrative expenses. Administrative expense rate equals the costs that were incurred in the contract year. These costs are subject to review to verify that the administrative services were actually provided and that the costs included for these services is reasonable. In the event the MCO paid any amounts for administrative services to a related party, only those administrative costs actually incurred by the related party in connection with the administration of this contract will be included in such costs.

RFP	Glossary of Terms	**Patient-centered medical home (PCMH):** The Center for Medical Home Improvement defines PCMH as a community-based primary care setting that provides and coordinates high quality, planned, family-centered, health promotion, acute illness care, and chronic condition management.	**Patient-centered medical home (PCMH):** A health care delivery model in which a patient establishes an ongoing relationship with a primary care practice team to provide comprehensive, accessible, and continuous evidence-based primary and preventative care, and to coordinate the patient's health care needs across the health care system in order to improve quality, safety, access and health outcomes in a cost effective manner.
RFP	Glossary of Terms	**Related-party administrative expense:** Fees paid by a MCO, or any of its subsidiaries, to a related party such as a parent organization. Such fees are not considered in the calculation of administrative expense under this contract.	**Related-party administrative expense:** Fees paid by a MCO, or any of its subsidiaries, to a related party such as a parent organization such as flat monthly administration fees. Such fees are not considered in the calculation of administrative expense under this contract. Related-party administrative expense does not include amounts paid to a related-party for administrative costs actually incurred by the related party in connection with the administration of the contract.
Addendum 6	Question 69	MLTC will provide this answer in the second round of questions for this RFP.	No, Nebraska State-licensure is not required for all prior authorization and concurrent review staff. The prior authorization and concurrent review functions must meet the requirements of IV.D.3.a and IV.D.3.B regarding additional required staff. Nebraska State licensure is required for peer-to-peer consultations on prior authorizations and for adolescent psychiatrist review of prior authorization requests for psychotropic medication use in youth. Please see the amended IV.N.4.d.vii in this addendum.

Addendum 7	Question 247	As nearly all Medicaid eligible individuals will be included in Heritage Health, the State does not currently have an exact figure by county for the number of individuals that will continue to receive core benefits and services through the fee-for-service program. This information will be posted to the procurement website as part of the second round of questions and answers.	Please see Attachment 33.
Addendum 7	Question 313	The State is reviewing this question further. This information will be posted to the procurement website as part of the second round of questions and answers.	Please see revised definitions for **Administrative expense rate** and **Related-party administrative expense** in this Addendum.
Addendum 7	Question 332	A list of Medicaid-eligible providers will be posted on the procurement website as soon as it is available. This information will be posted to the procurement website as part of the second round of questions and answers.	Please see Attachment 32.
Attachment 4		As amended by Addendum 3: Revisions to RFP: Core Competency 1: Facilitate ongoing patient relationship with a primary care provider in a physician-directed team.	Core Competency 1: Facilitate ongoing patient relationship with a primary care practice team.
Attachment 8	Table 2. Antidepressant High Dose Limit	Generic Name: citalopram Recommended Max: 40mg/day	Generic Name: citalopram Recommended Max: 4-18 yrs – 40mg/day

ADDENDUM NINE
QUESTIONS and ANSWERS

Date: December 17, 2015

To: All Bidders

From: Michelle Thompson/Teresa Fleming, Buyers
AS Materiel State Purchasing Bureau

RE: Addendum for Request for Proposal Number 5151 Z1
to be opened January 5, 2016 at 2:00 p.m. Central Time

Questions and Answers

Following are the questions submitted and answers provided for the above mentioned Request for Proposal. The questions and answers are to be considered as part of the Request for Proposal. It is the Bidder's responsibility to check the State Purchasing Bureau website for all addenda or amendments.

Question Number	RFP Section Reference	RFP Page Number	Question	State Response
1.			Considering that the Coalition for Community Pharmacy Action (CCPA)'s independent study of the cost to dispense based on 2013 data found the national cost of dispensing to be $10.55 and the cost of dispensing in Nebraska to be $10.62, what specific methodology was cited in "discussions with the state and research of other states" (per answers to various Question 37 and others in Round 1) to justify dispensing fees of $2.50 for chains and $4.45 for independents with less than six stores?	Please see response to Addendum 6, Question #37.
2.			What specific data-driven rationale and/or empirical research was cited in "discussions with the state and research of other states" (per answers to various Question 37 and others in Round 1) to justify differentiating dispensing fees for chain vs. independent pharmacies?	Please see response to Addendum 6, Question #37 for independent and non-independent pharmacy assumptions. For the purpose of capitation rate development for Heritage Health, the State's actuaries used the experience of another Midwestern state on its transition to a managed pharmacy benefit. This state experienced a significant drop in dispensing fees, below the fee used in the development of Heritage Health rates. This, along with discussion with Nebraska's pharmacy team served as the basis for adjusting non-independent pharmacy expenditures downward to account for lower dispensing fees.
3.			How will the Department ensure that pharmacies that do not fall under the category of an "independent pharmacy" will be paid dispensing fees	For nearly all other Heritage Health services, no rate floor exists. Reimbursement for pharmacy must consider both ingredient and dispensing fee components. Recognizing the unique nature of the pharmacy program MLTC has provided additional protections for pharmacy services, including

			that adequately cover their cost of dispensing?	requirements regarding timely updates to ingredient cost reimbursement and MAC transparency within the contract, as well as the minimum dispensing fee for smaller independent pharmacies. It is also important to note that network adequacy requirements exist to ensure that MCOs contract with a sufficient number of pharmacies based on their membership. MLTC will continue to evaluate these policies to ensure that recipients maintain adequate access to pharmacy services.
4.			Considering that when using cost as a determining factor for classifying specialty drugs, there is an increased risk that either some drugs will be inaccurately classified as specialty drugs, or others that are truly specialty drugs, will be inaccurately excluded, is the Department able to further revise the definition of the term "Specialty Drug" in the RFP?	The State does not intend to revise this term. Please see the Glossary of Terms for the definition of the term "Specialty Drug".
5.			Can you refer me to particular policymakers dedicated to the pharmacy-related provisions of the RFP?	Pharmacy-related provisions of the RFP were developed in conjunction with the MLTC Pharmacy Unit. Final decisions were made by MLTC leadership, including the Director and Deputy Directors. The MLTC organizational chart can be found at: http://dhhs.ne.gov/Org%20Charts/MLTC.pdf
6.	ATTACHEMENT 2 ACCESS STANDARDS		When looking at availability of Providers across both Regions we offer for your consideration as an indicator of access ONE PCP FTE per 10,000 population. This will ensure a more accurate picture as to the actual numbers of practicing and available Providers.	Access standards are set forth in Attachment 2.

7.	ATTACHEMENT 5 POLICIES, PROCEDURES AND PLANS		It is our understanding that "Letters of Intent" are not required as a part of the bidder's proposal. Is this true? If bidders make this request how should a provider respond?	A letter of intent from bidder(s) is not a requirement of the RFP. Please see Addendum 10.
8.	RFP SECTION Q PROJECT DESCRIPTION AND SCOPE	PAGE 149 PROVIDER REIMBURSEMENT	Will current Medicaid Rates be used to set the base rate for Provider Reimbursement? There is no mention or direction as to what will set the base rate for reimbursement. How will those base rates be determined if the Medicaid Rates are not used?	The MCO may negotiate rates with its network providers, except as otherwise provided for in the RFP. The following sections of the RFP provide specific provider reimbursement requirements: IV.E.16 Family Planning Services IV.Q.4 Indian Health Protections IV.Q.5 Psychiatric Residential Treatment Facilities IV.Q.8. Payment to Out-of-Network Providers IV.Q.9 Reimbursement to FQHCs and RHCs IV.Q.14 Emergency Medical and Post-Stabilization Services IV.Q.16 Pharmacy Reimbursement
9.	Attachment 6/Attachment 19	N/A	Please clarify if the state is requesting samples of all reports in Attachment 6? Or only the 3 listed in Attachment 19, Question 115?	Bidders are required to provide examples of the reports listed in Attachment 19, Question 115. Bidders are not required to provide samples of reports listed in Attachment 6 unless otherwise required in the RFP, Attachments or Addendums.
10.	3. Technical Approach (b)	198	Please clarify if additional attachments allowed (in response to Attachment 19 questions)?	Attachments that are not specifically requested may not be considered in the evaluation process.
11.	Attachment 6	Pg 10	Please clarify if the reference to Section IV.O is a scrivener error? IV.O is not Provider Network.	Attachment 6 is hereby amended and superseded by Attachment 38. Please see Attachment 38.
12.	Attachment 2		Will MLTC be providing access standards for hospitals (non- behavioral health)?	Attachment 2 is hereby amended and superseded by Attachment 39. Please see Attachment 39.

13.	Attachment 6	Pg 1	If MLTC will require bidders to submit templates of all reports outlined in Attachment 6, will the MLTC template or MLTC approved format be provided to bidders for RFP submital?	Please see the response to Question #9 above.
14.	Attachment 2	Pg 2	Will zip code classification be allowed to demonstrate pharmacy access?	Pharmacy access must be demonstrated in accordance with Attachments 2 and 3.
15.	IV.D.3.a Additional Required Staff	50	Does the following requirement: "Prior authorization staff must include a State-licensed registered nurse or physician's assistant." apply to Pharmacy Prior Authorizations?	Please see Addendum 10.
16.	IV.D.3.j Additional Required Staff	51	We are prepared to locate Member Services functions locally in Nebraska as required on p. 50-51 of the RFP. For clarification, are Member Services functions required to be located in Nebraska inclusive of Customer Service Representatives who staff our toll-free call center?	Customer service representatives staffing the toll-free call center are not required to be located in the State. Please see Addendum 10.
17.	IV.E.11.c Nebraska Medicaid Preferred Drug List	59	Can the State provide the MLTC guidelines for off-label drug use or point to URL?	Guidelines are in accordance with Social Security Act 1927.[42 U.S.C 1396r-8] (g). https://www.ssa.gov/OP_Home/ssact/title19/1927.htm
18.	IV.E.11.c.ii Nebraska Medicaid Preferred Drug List	59	Can the State provide a current copy of the national drug code (NDC) file delegating the preferred or non-preferred status of each NDC?	Current PDL listing by therapeutic drug class can be found at: https://nebraska.fhsc.com/downloads/PDL/NE_PDL.pdf

19.	IV.E.11.c.iii and c.v Nebraska Medicaid Preferred Drug List	59	On c.v. the timeframe appears to conflict with above 1 day requirement stated on c.iii: "The MCO must implement Pharmacy and Therapeutics Committee-reviewed PDL changes posted to the MLTC PDL website on the first day after the 30 calendar day public notice posting of such changes". Please provide further clarification.	The State will provide a biannual PDL file following review by the Pharmacy and Therapeutics Committee, as well as a weekly file with changes to the PDL. With respect to requirements for the weekly file, please see the response to Question #24-Addendum 6. Section IV.E.11.c.v refers to the biannual PDL file.
20.	IV.E.29 Excluded Services	67	Please clarify if state psychiatric hospitals fall under the definition of institutional care and whether services offered to Members in these institutions will be paid by MLTC on a FFS basis. In the event that a member enrolled in an MCO is admitted to a State psychiatric hospital, would the member be disenrolled from the MCO?	Services provided in State psychiatric hospitals are not excluded services per Section IV.E.29. A member would not be disenrolled as a result of an admission to a State psychiatric hospital. Per Section 1905(a) of the Social Security Act, federal financial participation is not available for Medicaid services provided to any individual under age 65 who is a patient in an institution for mental disease (IMD) unless the payment is for inpatient psychiatric services for individuals under age 21. Under this exclusion, no Medicaid payment can be made for services provided either in or outside the facility for IMD patients in this age group. Per Public Law 100-360, an IMD is defined as a hospital, nursing facility, or other institution of more than 16 beds that is primarily engaged in provided diagnosis, treatment, or care of persons with mental diseases, including medical attention, nursing care, and related services. The IMD exclusion applies only to institutions with at least 17 beds.
21.	IV.F. 14.d. Member Education	82	Please provide further clarity on Member Education Activities in Provider Offices, and, particularly, how these activities differ from Provider Marketing guidelines outlined in Section G(6)(f). For example, does the restriction against conducting member education in provider offices	The State hereby amends the RFP to remove Section IV.F.14.d on page 82. Providers may display MCO-provided health education materials consistent with the guidelines included in IV.G.6.f.ii. Providers may display MCO marketing materials consistent with requirements in IV.G.6.f.iii.

			apply only to non-existing members of the MCO? In addition, is MCO staff allowed to provide leave-behind branded educational materials (i.e. brochures, flyers) for the provider staff to display in the provider office?	
22.	IV.J.5.e Provider Outreach, Education, and Training	107	Can the State provide clarification regarding its expectations of the provider advisory committee to "create network development and management strategies and procedures"?	The State anticipates that the provider advisory committee will provide MCOs with feedback on policies and procedures that will aid in addressing provider issues including but not limited to: service authorization, credentialing, care coordination, and claims adjudication. The MCO would consult with the provider advisory committee before making major decisions on policy changes regarding its network strategy whenever feasible, and would actively solicit feedback from the group on strategies to improve the administrative experience of network providers.
23.	IV.J.5.e Provider Outreach, Education, and Training	107	Can the behavioral health subcommittee be incorporated within the provider advisory committee (i.e. and not as a separate committee)?	The Behavioral Health Provider Advisory Committee may be considered a subcommittee of the Provider Advisory Committee so long as the Behavioral Health Provider Advisory Committee is comprised of behavioral health providers and providers knowledgeable about behavioral health related issues.
24.	IV.N.11.e.iv.a Restricted Services	132	RESTRICTED SERVICES (aka Pharmacy Lock-in): Assigning a care manager to review, document, and manage the clinical or organizational needs of a member enrolled in restricted services. What if a member does not agree to Care Management, is this mandatory on the member?	Any member identified for care management activities must be offered care management services. In the case of an individual declining care management, the MCO must document this in the member's record. The MCO must still assign a care manager. The State requires the MCO to provide its proposed policies and procedures for applicable care management activities and any plan for ongoing communication with members who refuse care management.
25.	IV.N.11.e.i Restricted Services	132	"The MCO must be able to implement in it's claims system a restricted services	The State will provide information available in its MMIS for restricted services for each individual enrolled with a

			status for a member and have the ability to communicate this status to MLTC and other MCOs". Please clarify the Party that is sharing lock-in information when a member joins a plan: (A) Is it MLTC sending info on a FFS member only joining the plan? OR (B) Is it MLTC sending both FFS and/or another MCO member joining the plan? If the answer is "A", then is there any requirement for a member who transfers to another MCO? How would this occur?	MCO, including the type of restriction (any combination of pharmacy, primary care provider or hospital). This includes both individuals who have been fee for service and individuals who have been enrolled with another MCO. Restricted services transfer information occurs at the same time as the enrollment transfer and is reported in the supplemental enrollment file.
26.	IV.O.6.f Program Integrity – The MCO and MFPAU	136	The RFP states that "The MCO must subrogate to MFPAU any and all claims it has or may have, related to Nebraska Medicaid, against pharmaceutical companies, retailers, providers, or other subcontractors, medical device makers, or durable medical equipment manufacturers in the marketing or pricing of their products." Is the intent of this clause to encompass any and all potential subrogation claims, including but not limited to, claims where the MCO may be a member of a class action?	Yes, that is the intent of this requirement. Section IV.0.6.f is hereby amended as follows: “The MCO must subrogate to DHHS any and all claims it has or may have, related to Nebraska Medicaid, against pharmaceutical companies, retailers, providers, or other subcontractors, medical device makers, or durable medical equipment manufacturers in the marketing or pricing of their products."
27.	IV.Q.16.a Pharmacy Reimbursement	153	Can the State provide a list of independent pharmacies from MLTC with corresponding	The State cannot provide a list at this time. The State will provide this information to the awarded MCOs.

			pharmacy NPI? (defined as those with ownership of six (6) or fewer pharmacies), unless otherwise agreed between the MCO and the pharmacy provider?	
28.	IV.Q.16.c Pharmacy Reimbursement	153	"The MCO must maintain in each paid claim record which methodology was used to determine final payment amounts, i.e. state maximum allowable cost, national average drug acquisition cost, or the submitted usual and customary charge." Please confirm that these are examples only and that we can reimburse at Wholesale Acquisition Cost (WAC) or Average Wholesale Price (AWP) methodology.	The MCO must calculate dispensing fees, administration fees, and any other fee payment amounts as approved by the State. A MCO must maintain in each paid claim record which methodology was used to determine final payment amounts. The approved methodologies include: State maximum allowable cost, national average drug acquisition cost or the submitted usual and customary charge. The State will allow other standard national drug pricing.
29.	IV.Q.17.f.iii Maximum Allowable Cost Program	153	"If an update is warranted, the MCO must make the change retroactive to the date of service and make the adjustment effective for all pharmacy providers in the network." Does this requirement apply even if a pharmacy did not contest the MAC price?	If reimbursement rates are contested and as a result, are increased, this retroactive adjustment must be posted on the MCO's public website and available for all network pharmacies to reprocess claims retroactively.
30.	IV.S.4.h.ii Provider Identifier	166	"The MCO must deny prescriptions written by prescribers who are not enrolled with Nebraska Medicaid." What about members traveling out of state in emergency situations? What about Rx's written in hospital Emergency	Please see Provider Bulletin 12-36: http://dhhs.ne.gov/medicaid/Documents/pb1236.pdf The State will provide a weekly Medicaid-enrolled provider file.

			departments? Please describe how an MCO can regularly receive an up-to-date listing of Medicaid providers so that this requirement can be met.	
31.	IV.X.7.b Transitioning from the MLTC FFS Pharmacy Program to the MCO Pharmacy Program	189	"The MCO must load to its pharmacy claims processing system the current prior authorization records from MLTC or its designee prior to the contract start date." Can the State provide a sample file layout and data dictionary to ensure all of the necessary elements are included (i.e. authorization start and end dates)? Would the MCO obtain all FFS Pharmacy claims information for members transferring from FFS? If a member is in a FFS Lock-in Program and transfers to the Plan, will the MCO get this information in the data file? Is the MCO expected to continue the lock-in?	The State is not able to provide a sample file layout and data dictionary as the State does not have this information. The fields may be developed in the spring with MMIS and shared with MCOs during readiness review. The State will provide the needed data to meet this requirement. The State will provide historical pharmacy claims available in its information system for each individual enrolled with the MCO, including fee-for-service claims. The State will also provide information on restricted services for each individual enrolled with the MCO, including the type of restriction (any combination of: pharmacy, hospital, or primary care provider). MCOs are required to use this information to continue restricted services. The MCO's restricted services policies and program must be in compliance with requirements in Section IV.N.11 Restricted Services, including but not limited to implementing a restriction program consistent with the provisions of 471 NAC 2. Per Attachment 5, the MCO must submit its proposed policies and procedures for approval of restricted services 45 days prior to the contract start date. This proposal must also include a procedure that verifies enrollees in a restricted status are able to access services provided by only approved providers by the contract start date.
32.	Capitation Rate Development - General	Attachments 20 and 23	The capitation rate development in Attachment shows annualized gross medical per member per month trends by rate cohort. Attachment 23 shows annualized medical expense trends by category of service (COS) by category of aid (COA). Please show a cross-walk of how trends by COA	No, the same COS trends were not applied to all rate cohorts within a given COA. Trend assumptions by COS and detailed rating cohort will be provided in early 2016. Please see Attachment 36 for a crosswalk of the rating cohorts into the broad COAs.

			and COS may be reconciled to develop and cross-check the final projected medical expense. Were the same COS trends applied to all rate cohorts within any given COA?	
33.	Capitation Rate Development - General	Attachments 20 and 23	Please show the separate cost and utilization components of the medical expense trends for COA and COS.	As outlined in the “NE – Heritage Health Second Bidder’s Conference Presentation – Optumas”, utilization trend and unit cost will be provided to awarded MCOs when the final rates are developed in early 2016.
34.	Amendment 6 Question #79	P.27 in the Amendment	Please provide further clarification the Amendment six answer to question 79: "MCOs may negotiate supplemental rebates for medications outside of the State’s PDL. MCOs are prohibited from negotiating supplemental rebates for any medications listed in the State’s PDL."Do the restriction on negotiating Supplemental rebates for PDL Drugs apply only to "Preferred Drugs"? or to both Preferred and Non-Preferred PDL Drugs?	Covered outpatient drugs include drugs on the Nebraska Medicaid PDL (preferred and non-preferred) and drugs not on the PDL. The PDL consists of drugs within multiple therapeutic drug classes. The MCO may not negotiate supplemental rebates for preferred or non-preferred drugs within the PDL therapeutic drug classes covered by the Nebraska Medicaid PDL.
35.	Amendment 6 Question #37	P. 15 in the Amendment	Please provide further clarification to Amendment six, response to question 37, which specifies a $2.50 dispensing fee to "Non-independent" pharmacies. Is this a mandatory minimum dispensing fee or can we apply lower dispensing fee reimbursement to pharmacies that may already be	The $2.50 dispensing fee was assumed for non-independent pharmacies for capitation rate development. While there is not a mandatory minimum dispensing fee reimbursement to non-independent pharmacies, the MCO and its PBM must receive active agreement from the pharmacy for participation in the Medicaid network, even if they have an existing contract for non-Medicaid services. Please see Section IV.I.8.b in the RFP.

			contracted with the PBM?	
36.	Amendment 6 Question #210	P. 68 in the Amendment	Answer to Question 210 states: "RFP 5151 Z1 only applies to the MLTC Division." Please confirm that in the event the Legislature were to move responsibility for children in the juvenile justice system back to the Department that MCOs will be responsible only for the same Medicaid costs for these members as when they were under the jurisdiction of the Probation Office.	The MCO will be responsible for the services in the benefits package for Medicaid eligible clients enrolled in the health plan. This responsibility would not be impacted by potential administrative changes regarding the juvenile justice system.
37.	Attachment 19		Please provide the State's definition of an "affiliate", as that term is used in the RFP.	For the purpose of this RFP requirement, an affiliate is considered any person, firm, corporation (including, without limitation, service corporation and professional corporation), partnership (including, without limitation, general partnership, limited partnership and limited liability partnership), limited liability company, joint venture, business trust, association or other entity or organization that now or in the future directly or indirectly controls, is controlled by, or is under common control with the MCO.
38.	Response to Q &A #301, Attachment 6, Reporting Requirements, and Section IV.T, Reporting and Deliverables.	178	When we originally read and interpreted the RFP Section IV.T and Attachment 6 around the audit requirements, we interpreted the combination of the sections that follow to mean that the annual financial audit conducted of the contracted insurer for purposes of the Nebraska Department of Insurance requirement, which does include obtaining management letters and any	See Attachment 38.

			applicable audit recommendations, would be acceptable for the audit requirement and timeline from the following example: For the contract year ended 12/31/2017, the submission of audited financial statement could be submitted on June 1, 2018, consistent with the audit timing filing with the Nebraska Department of Insurance. However, after reading the response to #301 we are questioning our prior conclusion and requesting further clarification. Upon reading the response to #301, which confirms the Nebraska Department of Insurance filing date (from p.10 of Attach 6) has been amended to read June 1, the response also states that "the deadline for the Audited Financial Statement is 30 calendar days following the 12th month of the contract year". We respectfully request clarification if this response is intentional, and if the Audited Financial Statement (from p.9 of Attach 6) is intended to be the same or different audit requirement? If 30 days after the 12th month of the contract year is intended to mean January 30, 2018 submission of an audited financial statement for	

			the contract year ended 12/31/2017, we respectfully request that be reconsidered as that is a very unusual and aggressive timeline that is unlikely feasible under normal business circumstances. Typically, the full 45 day reporting period is utilized (for example, the time period associated with the quarterly financial reporting required per p.7 of Attachment 6), and there is typically a longer period for preparation of annual financial statements, such as an additional 15 days for a total of 60 days. Then, when there is an audit requirement, there is additional time that is required to allow for the external auditing firm to conduct its fieldwork, testwork, quality control, and audit report issuance processes. For the statutory financial statement audit, this period is three months from the date the statement subject to audit has been prepared (e.g., 2017 contract year financials prepared by the entity by March 1 and then audited by the external audit firm during March-April, and finished in May to allow for the issuance of the audit report by June 1). We respectfully request clarification whether there is a	

			single audit requirement and if the deadline is submission of the audited statutory financial statement, management letter, and any audit recommendations by June 1. Our recommendation is for a single audit financial statement audit requirement that already exists for purposes of the Nebraska Department of Insurance.	
39.	Q	150	Under a value-based provider contract, will the State make allowances for provision of services for which no current encounterable procedure code exists? For example, if the provider/MCO identifies and addresses a member need that likely leads to better health outcomes, but that service is not a covered benefit, is there a mechanism such that the MCO is not "penalized" in the minimum MLR requirement?	A qualifying expense for purposes of the MLR calculation must fall under the categories listed in Attachment 15 – Medical Loss Ratio Requirements. Value-based contracting is an evolving concept and MLTC will review policy decisions based on future CMS guidance.
40.	Q	150	In a value-based provider contract, will the value of the contract be included in the MLR requirement, or the encountered services only?	Only encountered services will be included for purposes of the MLR calculation. Value-based contracting is an evolving concept and MLTC will review policy decisions based on future CMS guidance.
41.	5151Z1 Addendum Seven for Questions and Answers - 221-382	N/A	Please clarify if the vision data includes medical/surgical vision expenditures or merely routine exams, hardware, etc.?	Vision data includes medical/surgical vision expenditures in addition to routine eye exams, hardware, etc.
42.	5151Z1 Addendum	Q. 101	The answer to this question	The 0.25% State Performance Penalty is not a component

	Six for Questions and Answers - 1-220		refers to the answer to question 33, which does not address the State Performance Penalty. Please confirm that amounts both earned and unearned of the State Performance Penalty are factored into the Administrative Cap calculation, in a similar fashion to the QPP holdback.	of the 10% Administrative Cap calculation.
43.	5151Z1 Addendum Six for Questions and Answers - 1-220	Q. 158	Please describe how the savings estimates for the Dual population were developed. What was the benchmark state(s) and what was the data source used to determine that level of savings on a Dual population (where the MCOs are not primary in managing members' care) in the first year of a new program.	Savings estimates for the Dual population are based on the prevalence of Behavioral Health services and anticipated changes in Physical Health experience when the two services are delivered under an integrated program. Duals frequently have a high need for Behavioral Health services, and the databooks provided in Attachment 10-C confirm this for the Heritage Health Dual population. When the care for these Dual enrollees is integrated under one delivery system, it is anticipated that better outcomes for Physical Health needs will occur, leading to a reduction in Physical Health utilization.
44.	5151Z1 Addendum Seven for Questions and Answers - 221-382	Q. 217 and Q. 265	In the answer to these questions, it is stated that all costs within the window are included in the delivery kick payment. However, there are no values included for behavioral health services or pharmacy. Please explain why this would be the case.	These costs are currently not included in the supplemental maternity payment, but are included in the standard rating cohort in which the member resides absent of a delivery event. Behavioral health and pharmacy costs will be included in the supplemental maternity payment in Heritage Health contracts.
45.	5151Z1 Addendum Seven for Questions and Answers - 221-382	Q. 221	The answer to this question states "The UNMC amount built into the capitation rates will remain the same throughout the <u>entire contract period</u>." Please clarify that this is a typo, and that this portion of the capitation rates will be recalculated each year	The answer to Addendum 7, Question # 221 is amended as follows: The application of risk scores will not begin until the second contract period, 1/1/18-12/31/18. The State and its contracted actuary will work together in determining the best risk adjustment methodology to use at that time. The Minimum MLR will be in effect beginning on the contract start date and will be calculated on an annual basis between

			as part of the rate development and certification process.	6-9 months after the end of the contract year. Although the MLR will be settled annually, as mentioned in Attachment 15 "the MCO must calculate the MLR and submit it to MLTC quarterly". The 85% Minimum MLR requirement will be calculate as an aggregate of Regions 1 and 2 and will be calculated across all categories of aid. The risk corridor will be in effect beginning on the contract start date and will be calculated at the end of each contract period between 6-9 months after the end of the contract year. The risk corridor calculation will be an aggregate of Regions 1 and 2 across all categories of aid. The administrative cap requirement is built into the capitation rates on a prospective basis. The contracted actuary ensured that the amount of non-medical load built into the rates meets the administrative cap requirement. **UNMC amounts are revisited each rate cycle, which is typically every 12 months.** The contracted actuary developed the UNMC Supplemental PMPM by COA, COS, and Rating Region. MLTC Quality Performance Program and Performance Penalities are effective Year 1 and calculated annually on a 6 – 9 month lag for program end total. Attachment 26:"MLR and Risk Corridor Examples" contains an illustrative example of this scenario. Please see Section IV.P.9.d-e.
46.	5151Z1 Addendum Seven for Questions and Answers - 221-382	Q. 221	Please clarify whether or not the revenue and medical expenses for each of the calculations in this question includes UNMC supplemental payments, and if not, why not, especially since MCOs are at risk for these amounts.	All calculations listed in the response to Addendum 7, Question #221 will be applicable to the UNMC portion of the rate development.
47.	5151Z1 Addendum Seven for Questions and Answers - 221-382	Q. 231 and 232	Please confirm that, as stated in the Second Pre-Proposal Conference, once the MCOs are selected, the quality metrics are finalized, Optumas will perform an analysis to ensure that paid rates, including the portion of all withholds that is expected to	This is confirmed.

			be reasonably achievable by MCOs, fall within the actuarially sound rate range.	
48.	5151Z1 Addendum Seven for Questions and Answers - 221-382	Q. 240	Regarding Critical Access Hospitals: a. Please split out cost settlement (i.e., amounts paid above Medicaid) in the base data. b. Please share the list of adjustments (e.g., trend) and the values that were applied to these settlement amounts when developing the rates in Attachment 11.	The base data contains $8.3 million dollars in Critical Access Hospital settlement payments made outside of the claim/encounter payment system for FY14 and $8.1 million for FY15. The Critical Access Hospital settlements are added into the base data. As such, all rate adjustments outlined in Attachment 22 are applicable to the Critical Access Hospital portion of the capitation rate.
49.	5151Z1 Addendum Seven for Questions and Answers - 221-382	Q. 243	Regarding FQHCs and RHCs: a. Please provide the 1/1/16 APM payment schedules. b. Please clarify that under the new APM methodology effective 1/1/16, the FQHCs and RHCs will no longer cost settle with the state since the APM will reflect full payment to these facilities.	The 1/1/16 APM payment schedules are not currently available for public release. The State does not cost settle with FQHCs and/or RHCs.
50.	5151Z1 Addendum Seven for Questions and Answers - 221-382	Q. 244	Please confirm whether or not historical encounter/FFS data for physical and behavioral health services (i.e., non-pharmacy) under the contract, will be provided to plans upon member assignment.	Please see response to Addendum 7, Question #244.
51.	5151Z1 Addendum Seven for Questions and Answers - 221-382	Q. 245	Please clarify whether or not claims broker services will be needed for all services paid though fee for service (even for those members in managed care) in addition to	The Claims Broker will potentially handle all FFS claims. This could include Long-term Services and Supports related claims as those services are not currently included in the Heritage Health program. However, this will be dependent on final timing of CBS implementation and other program decisions regarding LTSS.

			all populations receiving benefits through fee for service. (For example, will long term services and supports be included for those managed care members receiving those services through fee for service?)	
52.	5151Z1 Addendum Seven for Questions and Answers - 221-382	Q. 254	In the answer to this question, it is stated that "The rates shown in the "Medical PMPM" columns of Attachment 11 are gross MLTC hold-back" but our calculations (based on the data and assumptions provided by Optumas) do not show that the QPP hold-back of 1.5% has explicitly been added into the rates. Please clarify how the QPP hold-back of 1.5% of premium is added to the rates.	Rates are developed based on reported base data, not capitation payments. Since rates are developed using reported experience, there is no need to add in an additional 1.5%. When the rates are finalized, the State's actuaries will remove the withhold consistent with CMS guidance.
53.	5151Z1 Addendum Seven for Questions and Answers - 221-382	Q. 254	Please confirm the value to which the 1.5% is applied to calculate the amount to be deposited into the reinvestment accounts: does this amount include NML? UNMC Supplemental payments? Or is it just 1.5% of the Medical PMPM?	The 1.5% hold back referenced in Section IV.P.10 and required by Neb. Rev. Stat. §71-831 (Attachment 13) is 1.5% of the capitation payment.
54.	5151Z1 Addendum Seven for Questions and Answers - 221-382	Q. 257	The answer to this question refers to a different question that does not address the definitions of related parties. Please confirm that all references to related parties for each of the admin cap, risk corridor, and MLR calculation	The response to Addendum 7, Question #257 is hereby amended to read: "See response to Question #53." References to related parties in the RFP refer to the same definition of related parties contained in the Glossary of Terms.

			refer to the same definition of related parties.	
55.	5151Z1 Addendum Seven for Questions and Answers - 221-382	Q. 259	Please summarize the values of both adjustments made to the rates for copays: a. Reduction embedded in base data to reflect amounts actually collected by providers over the base years. b. Reduction made during rate development process to reflect additional amounts not collected, but representative of all copays (mandatory and voluntary) being collected.	The reduction embedded in the base data reflecting amounts collected by current MCOs is not available. The amount paid by the MCOs is used as the basis for rate development, so the collected copays are not itemized. The adjustment to account for uncollected copays is a 0.02% reduction to the rates for traditional Physical Health managed populations, a 0.03% reduction for the LTSS populations, and no change for the Dual population.
56.	5151Z1 Addendum Seven for Questions and Answers - 221-382	Q. 261	Please provide a detailed list of all of the adjustments made to the encounter data (e.g., CAH settlements, PCP shared risk agreements) that are added in to the base data to reconcile to MCO financial statements.	Please see Attachments 34 and 35 for a complete list of program changes necessary to get from base data shown in Attachment 10 to the final rates shown in Attachment 11.
57.	5151Z1 Addendum Seven for Questions and Answers - 221-382	Q. 265	Please clarify that deliveries with a qualifying procedure code which resulted in a stillbirth were not considered to be "qualifying delivery events" and please also confirm how the term stillbirth is defined, including weeks gestation.	The response to Addendum 7, Question #265 is hereby amended and superseded with the following: A qualifying delivery procedure code must be found on an encounter in order for the maternity experience to be captured in the rates. ~~Currently the State does not pay a supplemental payment for stillbirths, so those expenses are not in the supplemental payment and remain in the regular monthly capitation rate.~~ **The State pays a supplemental payment for live birth events and only those expenses are in the supplemental payment.** When a qualifying delivery event is found in the data, the contracted actuary captures all other expenses for that member in the five months prior to delivery date and the two months post-delivery. All of these expenses are re-categorized from the member's original aid category to the Maternity aid category.

				The maternity cell separately captures maternity-related services for all populations, dating back 5 months from the date of delivery (5 months prenatal) and going forward 2 months after the delivery (2 months post-partum). Prenatal costs for delivery occurring within the first five months of the base data period, and postpartum costs for deliveries occurring within two months of the end of the base data period could be understated in the base data. As a result, an adjustment has been made to reflect the missing prenatal and postpartum services for deliveries occurring on the left and right tails of the base data. The contracted actuary reviewed the average per-member-per-delivery costs for delivery events occurring between December 2013 and April 2015 (step one) and compared these costs with the per-member-per-delivery costs for deliveries occurring July-November 2013 and May-June 2012 (step two). The differential between the deliveries identified in step one and step two was used to adjust costs observed in step two. The overall impact of this is an upward adjustment to the Maternity cell of 1.8%. Maternity experience split by service type can be found in Attachment 10-A and Attachment 10-B by viewing the Maternity aid category. Please note that for this aid category member months are actually deliveries, as the denominator for the supplemental payment is a delivery event, not a covered month. Physician, facility, prenatal, postpartum, and delivery costs can not be independently itemized.
58.	5151Z1 Addendum Seven for Questions and Answers - 221-382	Q. 265	Please provide each of the following **by rate cell and region:** 1) A count of qualifying deliveries during the base period 2) The associated dollars removed from the rate cell due to these deliveries Also, to the extent that the total deliveries and dollars removed do not add up to the	Please see Attachment 37.

			total dollars and deliveries used for the maternity kick payment for each of the two regions, please provide a reconciliation to explain the discrepancy.	
59.	5151Z1 Addendum Seven for Questions and Answers - 221-382	Q. 270	The answer to this question refers to Attachment 22 and Attachment 20. Please provide 1) a crosswalk that shows how the descriptions in Attachment 22 (narrative) align to the adjustments in Attachment 20 or elsewhere. 2) a new attachment that breaks out each of these impacts as requested, including breaking out the impacts into their COS and COA specific components, ideally also breaking the impacts out between any values included within the base data and applied between Attachment 10 and Attachment 11, and also indicating whether the changes are unit cost changes or utilization changes.	Please see Attachments 34 and 35.
60.	5151Z1 Addendum Seven for Questions and Answers - 221-382	Q. 272	Please confirm that the rates have not been reduced for MCO-collected supplemental Rx rebates. These are typically reflected in MCOs' financial statements and if data was adjusted to match these statements, reductions	Rates have not been reduced by rebates. The existing managed care program does not include pharmacy and therefore comments surrounding reported rebates are irrelevant to this rate cycle.

			for rebates could be embedded in the base data.	
61.	5151Z1 Addendum Seven for Questions and Answers - 221-382	Q. 313	We know the state indicated that this question would be answered in the second round of questions, but just want to include this question here to ensure that it is not overlooked.	Please see Addendum 10.
62.	Addendum Three: Revisions to the RFP	1	Questions regarding the Auto-Assignment Algorithm 1) How long is the initial Heritage Health enrollment period? 2) After the initial Heritage Health enrollment period ends, will the auto assignment algorithm take into consideration the enrollee's previous MCO assignment? 3) What steps would be taken to ensure that MCOs who contracted with the state prior to the contract period do not get a disproportionate share of members, or a significantly different mix of members than entering plans?	The initial Heritage Health enrollment period will begin October 1, 2016 and end December 16, 2016. Medicaid-covered individuals who have not made a Heritage Health plan choice on December 16 or whose Medicaid eligibility determination is made between December 17 and 31 will be auto-assigned to a Heritage Health plan. The auto-assignment algorithm will not take into consideration previous MCO assignment except in cases where the member is automatically reenrolled in his or her previous MCO because he or she loses Medicaid eligibility for a period of 2 months or less per 42 CFR § 438.56(g) as referenced in IV.B.7.c.ii.b). Per IV.B.3.e, "After consideration of provider-recipient relationships, the methodology will assign recipients equitably among MCOs, excluding those subject to an intermediate sanction." Per IV.B.3.f.iii, "If a MCO's membership is comprised of 40% or more of total statewide enrollment at the end of any quarter, that plan will be removed from the auto-assignment round robin process for the following quarter but members can continue to pro-actively select that plan."
63.	Attachment 21	N/A	Please confirm that the values in this exhibit are shown as a percent of the rate exclusive of the UNMC supplemental payment	Non-medical load will apply to the UNMC portion of the rate when rates are finalized in early 2016.
64.	Attachment 21	N/A	Since the UNMC	Please see the response to Question #63 above.

			Supplemental payments represent increased reimbursement that the MCOs are responsible for and at risk for, why are these not included in the rate development (Att. 11) as a medical costs, so that NML is applied to the amounts as well? We believe the NML percentages should be of revenue inclusive of the UNMC supplemental payments.	
65.	Attachment 22	p. 3	A number of program changes, both historical and anticipated, are described in the narrative. This is very helpful, and we are requesting that additional columns be added in the tables to the right of these descriptions to indicate the impact on the rates, and where that impact can be found (populations, services, base data, policy change factors, etc.) with additional exhibits as appropriate to describe particularly complex adjustments.	Please see Attachment 35.
66.	Attachment 23	N/A	Thank you for providing this additional detail for trends by COA and COS. Please also extend the exhibit to show the trends used for each of the four LTC categories, the Katie Beckett members, and Duals.	Katie Beckett is considered AABD for trend setting purposes. LTC categories and Duals used the same assumptions as the AABD population.
67.	Attachment 26	Example 1	In each of the risk corridor and	This information will be posted to the procurement

			MLR calculations, the qualified medical expenses are shown in the same way, including the activities that improve healthcare quality. Based on the glossary (p. xiii) this amount is defined differently for each of the two calculations, such that activities that improve healthcare quality are not included in net qualified medical expense for the risk corridor.	website no later than December 24, 2015.
68.	Attachment 26	Example 1 and Example 2	Please revise the examples to show how each of the following components of revenue would be handled within these examples: 1) UNMC payments 2) Hold-back (earned and unearned) 3) State Performance Penalty (earned and unearned)	This information will be posted to the procurement website no later than December 24, 2015.
69.	Attachment 26	Example 1 Risk Corridor	Please provide additional detail regarding the $8,000 shown as "Total Allowed Administration." In particular, we would expect that no more than $7,000 of this number (7% of revenue) would be for activities not categorized directly to improve healthcare quality, which would leave $1,000 for activities that do improve healthcare quality. Additionally, we would expect this value to be shown in the line labeled "activities that	This information will be posted to the procurement website no later than December 24, 2015.

			improve healthcare quality"	
70.	Attachment 26	Example 1 Risk Corridor	Please provide another example where the amount spent on admin expenses is higher than the total allowed	This information will be posted to the procurement website no later than December 24, 2015.
71.	Attachments 10-11	N/A	Please provide a detailed crosswalk that defines the logic used to determine the categories of service used in this development, using CPT codes, place of service information, or any other information needed to determine the categories of service. Please also ensure that this detailed crosswalk includes logic for services that are excluded under the contract, in particular, long term services and supports.	As the detailed category of service logic is specific to the data elements reported in the encounter data for each of the current managed care entities, the State cannot provide this information as it is proprietary information.
72.	Attachments 10-11	N/A	Please confirm/edit/add to the following list of rate items expected to be reviewed in Spring 2016. a. HEP-C b. Retroactive Enrollment c. UNMC supplemental payments d. CAHs cost settlement amounts e. Provider rate changes (e.g., FQHC) f. Health Insurer Fee/Tax g. Program changes such as ASD, DD h. Foster care behavioral health experience i. Updated trends	All items on this list will be considered in the rate certification in the Spring of 2016. In addition to the items on this list, the Maternity case rate will be revisited to capture pharmacy and behavioral health costs. Additionally, the State's actuaries anticipate using additional runout from FFS data and current Managed Care entities. No changes to the base period are anticipated.

73.	Attachments 10-11	N/A	What are the drivers in the pmpm increases seen in the behavioral health component of the ABD populations? Is it new benefits, acuity, member mix? In particular, we saw PMPMs for these services in the range of $70 between 2009 and 2011, and these services are now upwards of $100.	The historical ABD population for behavioral health managed care is spread across the AABD populations in Attachments 10-A and 10-B, the Dual population in Attachment 10-C, and the LTSS population in Attachment 10-D. The average behavioral health PMPM weighted on the membership of each of these populations is consistent with the $70 quoted in the question.
74.	Attachments 10-11	N/A	Please provide additional breakouts in the category of service lines in all of Attachment 10's to split out utilization and unit cost for each of the following: 1) Pharmacy Expenditures - Hepatitis C 2) Pharmacy Expenditures - Non-Hepatitis C 3) For each inpatient and outpatient category, please split into hospital type: Critical Access Hospital, out-of-state hospital, other	This information will be posted to the procurement site no later than December 24, 2015.
75.	Attachment 11	Lower Bound of Rates	Please confirm the following conveyed at the pre-proposal conference. The rates in Attachment 11 include all of the following items at the stated values: a) Non-QI admin at 7%, b) QPP at 1.5%, c) QI admin at 3%, d) Perf Guar at 0.25%, and e) profit, risk and contingencies at 2%	Slide 15 of the "NE Heritage Health Bidder's Conference Rate Presentation (Optumas)" itemizes the components of the non-medical load. Please see Attachment 21 for the breakout of the non-medical load components by cohort. The 1.5% QPP is a withhold from the rates, so it is not added in as a component of non-medical load. Rather, it is withheld from the non-medical load rates.

76.	5151Z1 Addendum Seven for Questions and Answers - 221-382	Q262	Please describe what adjustments have been built into the rates to account for Hep C treatment. Given the number and costly drugs recently available in addition to recent news from CMS about utilizing these benefits, we would like a better understanding of what is included in the rates.	Hepatitis C drug utilization in Nebraska has historically been low. However, the higher pharmacy trend is meant to reflect potential increase in both average unit cost and utilization related to breakthrough therapies.
77.	5151Z1 Addendum Seven for Questions and Answers - 221-382	Q262	Please provide the state's current policy re: when Hep C drugs are allowed to be used for member treatment. Also, please provide a description of how the policy will change in Nebraska.	Current clinical criteria may be found at https://nebraska.fhsc.com/Downloads/NEcriteria_Sovaldi-201409.pdf. A current prior authorization request form may be found at https://nebraska.fhsc.com/Downloads/NEfaxform_HepatitisC-201507.pdf. Clinical criteria and prior authorization forms are reviewed and updated annually and as determined by the State.
78.	5151Z1 Addendum Six for Questions and Answers - 1-220	Q200	Please provide a count these special populations - by region, rate cell, etc.	This level of detail is not available.
79.	5151Z1 Addendum Six for Questions and Answers - 1-220	Q200	How are MCOs expected to identify these people? Is pharmacy data expected to be adequate for the identification of these members?	Pharmacy data will be provided to bolster any additional mechanisms a MCO has to assess a member for SHCN. Furthermore, per IV.E.22.d and IV.E.22.e, PCPs must notify the MCO of members who meet SHCN criteria and members may also self-identify to either the enrollment broker or the MCO that they have SHCNs.
80.	Attachment 6	Attachment 6, p. 9	Attachment 6 of the contract states HEDIS results are due "45 calendar days following the 12th month of the contract year". NCQA requires HEDIS rates be submitted by June 15th following the measurement year. For	Please see Attachment 38.

			example HEDIS rates for measurement year 2017 would be submitted in June of 2018. Will the state consider changing the due date for HEDIS reporting to align with NCQA timeframes?	
81.	IV.L.4.e.viii Care Management	115	What is the state's definition of "group visits" in this requirement? For example, is this intent for this to be interdisciplinary care team meetings with representatives of the member's unique care team? Are these support groups, i.e. classes/resources in the community? Are these groups facilitated by a provider (e.g. a PCP) on condition self-management?	Group visits include members of the interdisciplinary care team and members of the specialty treatment team as well as members and their families and additional local social and community services supports as necessary.
82.	IV. Project Description and Scope of Work, E. Covered Services, 11. Pharmacy Section, C. Nebraska Medicaid Preferred Drug List	59	After review of the state's PDL, it is noted that the drugs listed on Attachment 8 do not appear to be included in the current PDL posted on the state's website. Does the state have a separate behavioral health preferred drug list that the MCO will be required to implement?	Drugs listed on Attachment 8 are not included in the current PDL posted on the State's website. Attachment 8, which contains required edits for the pharmacy claims system to promote safe prescribing practices for mental health drugs used in children, is unrelated to the PDL. The State does not have a separate preferred drug list for antidepressants, antipsychotics and anticonvulsants.
83.	Z. FFS Claims Management and Processing	191-195	The RFP makes reference to many of the responsibilities of the MCO is awarded the FFS Claims Management and Processing duties. We would like to confirm whether the State will continue to be responsible for managing enrollment processing and	The MCO awarded the FSS Claims Broker contract will only be responsible for the claims-related activities outlined in Section IV.Z. The State, or its designated agent, will continue to oversee program responsibilities including enrollment and member communication for Medicaid-eligible individuals excluded from Heritage Health.

			development of the 834 file to all the MCOs, development of ID cards (including replacement cards) for Fee for Service members, and mailing and development of all member materials and newsletters for Fee for Service members.	
84.	Z. FFS Claims Management and Processing	191-195	In order to meet the requirements for claims processing against duplicates, etc. will the MCO that is chosen to be the FFS Claims broker receive claims history, eligibility history, and prior authorization history for both medical and pharmacy claims. If so, how far back will the claims data go?	MLTC will work with the MCO awarded the Claims Broker contract to provide the MCO with sufficient data to allow the MCO to meet the requirements outlined in Section IV.Z. Per IV.Z.3, the implementation of the Claims Broker role is targeted for the second year of the contract to allow sufficient time for MLTC to coordinate on all aspects of the transition with the awarded MCO.
85.	Z. FFS Claims Management and Processing	191-195	Will the state close out any open grievances & appeals or provider claims disputes, open TPL recoveries, complete all claims prior to the date of service that the claims broker implementation date that are active (or have a date of service) prior to the effective date of the FFS claims management contract with the MCO?	All activities outlined in the question will be handled by MLTC for dates of services or claims paid on dates prior to the effective date of the FFS claims management contract. Per IV.Z.3, the implementation of the Claims Broker role is targeted for the second year of the contract to allow sufficient time for MLTC to coordinate on all aspects of the transition with the awarded MCO.
86.	Z. FFS Claims Management, Section 12 Provider Services	194	Will the State continue to enroll Providers and assign the State Medicaid number to all Nebraska providers? Will the state continue to process all Nebraska Medicaid	The State or its designated agent will continue to enroll providers and assign State Medicaid provider numbers to approved providers.

			Provider additions, demographic changes, etc., or will this be the responsibility of the MCO who is awarded the FFS claims management contract?	
87.	Z. FFS Claims Management	191-195	Will the MCO who is selected to serve as the claims broker be responsible for processing dental and non emergent transportation claims?	The MCO awarded the FSS Claims Broker contract will be responsible for processing dental and non-emergency transportation claims if those benefits remain in the FFS program. However, dental services are currently scheduled to be included in a capitated dental benefit manager procurement that is expected to go-live in mid-2017. MLTC continues to evaluate administration of non-emergent transportation benefits.
88.	Attachment 23	557	Please provide a breakout of the assumed trend by utilization and unit cost.	As outlined in the "NE - Heritage Health Second Bidder's Conference Presentation - Optumas", utilization trend and unit cost trend will be provided in early 2016.
89.	Attachment 21	Page 3	For the dual population, what level of managed care is currently being assumed for the members that are currently enrolled in Medicare? What is the basis for this assumption?	The level of Medicare Advantage penetration in the Heritage Health Dual population is not known. Savings estimates for the Dual population are based on the prevalence of Behavioral Health services and anticipated changes in Physical Health experience when the two services are delivered under an integrated program. Duals frequently have a high need for Behavioral Health services, and the databooks provided in Attachment 10-C confirm this for the Heritage Health Dual population. When the care for these Dual enrollees is integrated under one delivery system, it is anticipated that better outcomes for Physical Health needs will occur, leading to a reduction in Physical Health utilization.
90.	Attachment 20	Attachment 20	For pharmacy, how were high cost hepatitis C drugs considered in the base data? Additionally, what considerations were made with regard to these drugs in setting the pharmacy trend? How does FY 14 prescription drug costs compare to FY 15	Please see the response to Question #76 above. Pharmacy costs by year will be provided to awarded MCOs in early 2016.

			costs by region and rate cell?	
91.	Attachment 21	4	Can you provide a summary of the most up to date analysis on the impact of the AP to APR DRG change? When was this analysis completed? Has the recent increase in high dollar inpatient NICUs been factored into this analysis?	Please refer to Attachment 22 for a thorough description of the analysis of the change from AP to APR DRG. This analysis was conducted in the Fall of 2015. NICUs expenditures are included in the base data and were reviewed for the DRG conversion analysis. The AP to APR DRG conversion increased expenses for the maternity case rate.
92.	Addendum Eight - Revised Schedule of Events	Page 1 (Addendum 8)	Will the agency release a revised "Request for Proposal For Contractual Services Form" to reflect the new "Opening Date and Time"?	No, the State will not release a revised “Request for Proposal For Contractual Services Form”.
93.	Attachment 2	1	What are the network access standards for vision, hearing, durable medical equipment , laboratory serves, home health, skilled nursing facilities, hospice, ambulatory surgical center, respite, physical therpay, occuapationa therory, speech therapy, if any?	Please see Attachment 2 for all current network standards.
94.	Addendum 3, RFP § IV(E)(29)(h)	1	Addendum 3 adds the following sentence as new section IV.E.29.h: Non-emergency transportation (except as indicated in Section IV.E.8.a) - Does this mean that non-emergency transportation is excluded (carved out for the State to manage) and MCOs are not required to provide member transportation?	Non-emergency transportation is excluded (“carved out”), with the exception of non-emergency ambulance transportation, which is included (“carved in”).
95.	Attachment 6 -	7	We would like to request	Critical incidents for the purpose of Critical Incident

	Quarterly Deliverables		further clarification regarding the Critical Incident Reporting requirement referenced in Attachment 6, in particular: • How does Nebraska define "critical incident"? • In some states, critical incident reporting relates only to members in long-term care. Is this also the case in Nebraska? • Please confirm that MCOs are only required to collect critical incident reports from behavioral health facilities.	Reporting per Attachment 6 include the following when they occur while the member is in the care of a behavioral health inpatient, residential or crisis stabilization unit: • Suicide attempt • Suicide death • Non-suicide death • Unexpected death • Homicide • Homicide attempt • Allegation of abuse/neglect (physical) • Allegation of abuse (psychological) • Fire setting or property damage • Medication error resulting in requiring medical intervention • Adverse drug reaction • Unauthorized leave • Accidental injury with significant medical intervention • Emergency medical treatment resulting from injury, medication error, or adverse medication reaction • Use of restraints or seclusion requiring significant medical intervention • Unusual, unexpected illness or disease • Other serious occurrence, including sexual contact between peers or peers and staff which member is under treatment The RFP requires critical incident reporting related to behavioral health providers only.
96.	RFP § IV (B)(2)(d) and RFP § IV (B)(5)(c)	33 & 36	Please confirm how much time the MCO is required to allow members to choose a PCP. RFP § IV(B)(2)(d) indicates 15 days and RFP § IV(B)(5)(c) indicates 10 days.	Members have 15 days to elect a MCO and may elect PCP within this timeframe. After MCO assignment, members have an additional ten days to elect a PCP. The MCO may elect to auto-assign the member as early as the 11th day, but must auto assign the member to a PCP within one month of the enrollment date.
97.	RFP § IV (I)(14)(b)	100	This provision requires that all providers be credentialed	There is no required credentialing timeframe prior to the contract start date.

			within 30 calendar days upon receipt of a completed credentialing application. Please confirm that the 30-day credentialing timeframe applies only after the Contract goes live.	
98.	RFP § IV(M)(1)(b)	118	We understand MLTC's quality strategy has been submitted to CMS for approval. Can MLTC a draft of the submitted quality strategy for preliminary review?	The MLTC Quality Strategy is currently under revision to come into compliance with proposed managed care regulation changes.
99.	RFP § IV(O)(17)	141	Following up on Round 1 Q&A #156, please confirm that the MCO will not be required to consult with NMPI and MFPAU in connection with recouping overpayments due to TPL, retroactive reductions to state fee schedules, members that were retrospectively disenrolled by the state and similar situations.	Please see the response to Addendum 6, Question #156.
100.	RFP § IV(Q)(6)(b)	150	The State indicated in response to Question 103 of the first round of questions that the 30% and 50% of the provider network measure includes all providers in the network. Would this include ancillary services such as laboratories, pharmacies, DME, radiologists, therapy services, etc.?	Please see the response to Addendum 6, Question #102. All providers in the network including ancillary services will be considered in the denominator.
101.	RFP § V(A)(2)(h)	197	We wanted to follow up on Question 174 from the first	The budget refers to the contract value. Please provide original contract value projections and actual contract value.

			round of Q&A. The State indicated that the originally scheduled budget and actual budget mean the project budget and the actual budget. What type of information would this be in the case of a capitated contract? Payment is made on a pmpm basis; by its structure the rate is simply the rate. Would the amount received by the MCO annually be the responsive information?	
102.	RFP § IV(Q)(11)	152	Will the UNMC payments be a fixed dollar amount each month, or will they vary based on the actual plan utilization with UNMC?	The UNMC payment is a fixed dollar amount.
103.	RFP § IV(Q)(11)	152	Given that the state has now advised that the UNMC payments will not be a pass-through and will instead be part of the at-risk capitation payment, will the UNMC portion of the capitation rate be removed when developing the capitation rate risk adjustments in year 2? If the UNMC payment is a fixed dollar amount, it is not actuarially sound to risk adjust these.	Risk adjustment factors will be applied to the aggregate rate, inclusive of UNMC.
104.	RFP § IV(P)(10) and IV(P)(11)	146-147	Given that the state has now advised that the UNMC payments will not be a pass-through and will instead be part of the at-risk capitation payment, will the UNMC	Non-medical load, the QPP Withhold, and the State Performance Penalty will apply to the UNMC portion of the rate.

			portion of the capitation rate be removed when calculating the QPP Withhold and the State Performance Penalty amounts? If the UNMC payment is a fixed dollar amount that must be paid out, it is not actuarially sound to reduce the amounts by the withhold and penalty amounts.	
105.	RFP Section IV.Z	191	Regarding the Procurement of FFS Claims Management and Processing services, can the State share how it will evaluate which MCO will be awarded this business? EG: what would the award criteria be?	Please see the response to Addendum 7, Question # 278.
106.	RFP Section IV.S.10	169	Does the State have documentation that it could make available to bidders on the Encounter Submission process? For example: should we assume that the HIPAA 837 I&P Companion Guides on the Nebraska Medicaid website are not only for Provider submissions for FFS Medicaid - but are also for MCO's to submit encounter data? In addition, does the State have any information it could share on the format of ancillary encounter submission file formats (e.g. error files returned from the State, acknowledgement files, provider file submissions)?	The posted HIPAA 5010 837I and 837P Companion Guides apply for both FFS and Encounter submissions, and contain only requirements that clarify state-specific usage of the standard transaction documented in the respective ASC X12 TR3 Implementation Guides. Exceptions where requirements differ in the companion guides for FFS and Encounter are identified as “Chargeable” for FFS submissions and “Reporting” for Encounter submissions. The State returns HIPAA 837 file acknowledgements via HIPAA 5010 999/TA1 Transactions. Encounter submission results are also sent via HIPAA 5010 277Claim Acknowledgement Transaction. In addition, a month-to-date error summary and acceptance percentage report is sent in a proprietary format.

107.	Attachments 30 & 31, and Question & Answer #304 (11.19.15) RFP Section IV.B.12	Attachment 30 Attachment 31 Q/A Part 2, page 34 IV.B.12, page	The NE Medicaid 5010 Companion Guide for 834 transactions (published 3/12/13) is very short and only specifies sender and receiver IDs. Our question: although the monthly enrollment file as specified in Attachment 30 is not an 834 format, does MLTC's 834 eligibility file contain the same *data elements* as the monthly enrollment file as specified in Attachment 30?	The posted HIPAA 5010 834 Companion Guide contains only requirements that clarify state-specific usage of the standard transaction documented in the ASC X12 TR3 Implementation Guide. The Nebraska Medicaid Managed Care Client Eligibility Data Supplemental Enrollment File in Attachment 30 is a proprietary supplement to the HIPAA 5010 834 Benefit Enrollment and Maintenance Transaction which contains additional data that cannot be reported in the 834 transaction. There is limited data element duplication in the 834 and the supplemental files to enable the MCO to tie the data in the two files for each client.
108.	RFP Section IV.S.10.x RFP Section IV.P.13	IV.S.10.x: p.171 IV.P.13: p.148	Regarding this sentence: *Control totals will also be reviewed and verified. Additionally, the MCO must reconcile all encounter data submitted to the State to control totals and to the MCO's MLR reports and supply this reconciliation to MLTC with each MLR report submission as specified in Attachment 6 – Reporting Requirements*. We cannot find information in Attachment 6 that relates to MLR reports or reconciliation of encounter data to MLR reports. Does MLTC have additional information that is intended for inclusion in Attachment 6?	Quarterly and annual financial reporting requirements included in Attachment 6 reference Section IV.T – Reporting and Deliverables. IV.T.5 contains a list of required reports including IV.T.5.v – Medical loss ratio calculation.
109.	RFP Section IV.R.13.a	161	Regarding this sentence: *The MCO must have online retrieval and access to documents and files for six (6)*	MLTC will develop a policy in coordination with awarded MCOs in regards to the final disposition of claims with a once-in-a-lifetime indicator.

			years in live systems and ten (10) years in archival systems, for audit and reporting purposes. The claims for services that have a once-in-a-life-time indicator (i.e., appendix removal, hysterectomy) must remain in the current/active claims history for claims editing and are not to be archived or purged. Does the second sentence override the first sentence? Specifically: how long must the MCO maintain "once-in-a-life-time" claims online - greater than 10 years? Wouldn't MLTC be better served to require MCO's to turn over such claims data to MLTC after 10 years?	

This addendum will become part of the proposal and should be acknowledged with the Request for Proposal.

ADDENDUM EIGHT
REVISED SCHEDULE OF EVENTS

Date: November 20, 2015

To: All Bidders

From: Michelle Thompson/Teresa Fleming, Buyers
AS Materiel State Purchasing Bureau

RE: Addendum for Request for Proposal Number 5151Z1
to be opened December 22, 2015 at 2:00 p.m. Central Time

NEW Opening Date: January 5, 2016 at 2:00 p.m. Central Time

	ACTIVITY	DATE/TIME
8	Last day to submit Second Round written questions	~~November 23, 2015~~ **November 30, 2015**
9	State responds to Second Round of written questions through Request for Proposal "Addendum" and/or "Amendment" to be posted to the Internet at: http://das.nebraska.gov/materiel/purchasing.html	~~December 7, 2015~~ **December 18, 2015**
10	Proposal opening Location: State Purchasing Bureau 1526 K Street, Suite 130 Lincoln, NE 68508	~~December 22, 2015~~ **January 5, 2016** 2:00 PM Central Time
11	Review for conformance of mandatory requirements	~~December 22, 2015~~ **January 5, 2016**
12	Evaluation period	~~January 6, 2016 –~~ ~~January 22, 2016~~ **January 12, 2016 –** **January 29, 2016**
13	"Oral Interviews/Presentations and/or Demonstrations" (if required)	TBD
14	Post "Letter of Intent to Contract" to Internet at: http://das.nebraska.gov/materiel/purchasing.html	~~January 29, 2016~~ **February 5, 2016**

	ACTIVITY	DATE/TIME
15	Contract finalization period	~~January 29, 2016 –~~ ~~February 29, 2016~~ **February 5, 2016 – March 15, 2016**
16	Contract award	~~March 1, 2016~~ **March 15, 2016**
17	Contractor start date	January 1, 2017

This addendum will become part of the proposal and should be acknowledged with the Request for Proposal.

DOCUMENT SUMMARY

This document describes the Nebraska Medicaid Managed Care Program record layout used by the State of Nebraska to send information regarding unborn clients to the health plans.

This file will be sent daily and monthly. It will include unborn clients that have either the mom or a sibling enrolled with the health plan.

The file characteristics are:

a. Record length = 500

b. The first record in the file must be a header record

c. The last record in the file must be a trailer record.

d. All date fields must be in **YYYY**MMDD format.

NEBRASKA MEDICAID MANAGED CARE

UNBORN FILE DATA

Document B: Health Plan Unborn File Data Descriptive Notes

NOTES FOR HEALTH PLAN UNBORN HEADER DATA RECORD - "H" RECORD

Field HHH Nebraska Managed Care Unborn Header Record

Field Name: NMC-UNBORN-HDR
Purpose: This is the Unborn Header Data Record.
Valid Values: Follow.

Field H01 Header Action Type

Field Name: NMC-HDR-ACTION-TYPE PIC X
Purpose: This field contains the record type identifier.
REQUIRED: YES
Valid Values: The only valid value for this field is a 'H'.

Field H02 Header Date/Time Stamp

Field Name: NMC-HDR-DATE-STAMP

NMC-HDR-SYSTEM-DATE	
NMC-HDR-SYSTEM-YEAR	PIC 9(04)
NMC-HDR-SYSTEM-MONTH	PIC 9(02)
NMC-HDR-SYSTEM-DAY	PIC 9(02)
NMC-HDR-SYSTEM-TIME	
NMC-HDR-SYSTEM-HOUR	PIC 9(02)
NMC-HDR-SYSTEM-MINUTE	PIC 9(02)
NMC-HDR-SYSTEM-SECOND	PIC 9(02)

Purpose: The header record will contain the system date and time documenting when the file was created.
REQUIRED: YES
Valid Values: Valid date in YYYYMMDD format.
Valid time in 24 hour HHMMSS format

NOTES FOR HEALTH PLAN UNBORN DETAIL DATA RECORD - "D" RECORD

Field DDD Nebraska Managed Care Unborn Detail Record

Field Name: NMC-UNBORN-DET
Purpose: This is the Unborn Detail Data Record.
Valid Values: Follow.

Field D01 Detail Action Type

Field Name: NMC- ACTION-TYPE PIC X.
Purpose: This field contains the record type identifier.
REQUIRED: YES
Valid Values: N = New - First time unborn is being sent to plan
C = Continue - Unborn continues to be assigned to plan
E = End - Pregnancy has ended or unborn is no longer assigned to plan

Field D02 Unborn Medicaid Identification Number

Field Name: NMC-UNBORN-MEDICAID-NBR.
NMC-UNBORN-CASE-NBR PIC 9(09) VALUE 0.
NMC-UNBORN-CASE-ID PIC 9(02) VALUE 0.

Purpose: 11-digit Medicaid number assigned by Health and Human Services to a person who has applied and is eligible for public assistance benefits. This number consists of a Medicaid case number and a client identification number within that case.
REQUIRED: YES
Valid Values: 11-digit Medicaid number.

Field D03 Expected Date of Birth

Field Name: NMC-EXPECTED-DATE-OF-BIRTH.
NMC-EXPECTED-DOB-YEAR PIC X(04).
NMC-EXPECTED-DOB-MONTH PIC X(02).
NMC-EXPECTED-DOB-DAY PIC X(02).

Purpose: This field contains the unborn's expected date of birth.
REQUIRED: YES

Field D04 Mothers Name

Field Name: NMC-MOM-NAME.
NMC-MOM-FNAME PIC X(20).
NMC-MOM-MINIT PIC X.
NMC-MOM-LNAME PIC X(25).
Purpose: This field contains the name of the pregnant mother.
REQUIRED: YES

Field D05 Head of the Household Name

Field Name: NMC-HEAD-OF-HOUSE-NAME
- NMC-HOH-FNAME PIC X(10).
- NMC-HOH-MINIT PIC X.
- NMC-HOH-LNAME PIC X(19).

Purpose: This field contains the case head name associated with the mailing address.
REQUIRED: YES

Field D06 Head of Household Address - Line 1

Field Name: NMC-MAILING-ADDRESS1 PIC X(50)
Purpose: This field contains the first line of the address.
REQUIRED: YES

Field D07 Head of Household Address - Line 2

Field Name: NMC-MAILING-ADDRESS2 PIC X(50)
Purpose: This field contains the second line of the address.
REQUIRED: NO

Field D08 Head of Household Address - Line 3

Field Name: NMC-MAILING-ADDRESS3 PIC X(50)
Purpose: This field contains the third line of the address.
REQUIRED: NO

Field D09 Head of Household City

Field Name: NMC-MAILING-CITY PIC X(25)
Purpose: This field contains the city name.
REQUIRED: YES

Field D10 Head of Household State

Field Name: NMC-MAILING-STATE PIC X(02)
Purpose: This field contains a two-digit state code.
REQUIRED: YES

Field D11 Head of Household Zip Code

Field Name: NMC-MAILING-ZIP-CODE PIC 9(05).
Purpose: This field contains the five-digit postal zip code.
REQUIRED: YES

Field D12 Head of Household Zip 4

Field Name: NMC-MAILING-ZIP-4 PIC 9(04).
Purpose: This field contains the four-digit postal zip code.
REQUIRED: NO

Field D13 XREF Medicaid Identification Number

Field Name: NMC-XREF-MEDICAID-NBR.
NMC-XREF-CASE-NBR PIC 9(09) VALUE 0.
NMC-XREF-CASE-ID PIC 9(02) VALUE 0.

Purpose: Medicaid number of the mom or sibling used to assign the unborn to a plan.
REQUIRED: YES
Valid Values: 11-digit Medicaid number.

Field D14 Fetal Number

Field Name: NMC-FETAL-NBR PIC 9(4)
Purpose: This field contains the number of fetuses of the pregnant mother.
REQUIRED: YES

NOTES FOR HEALTH PLAN UNBORN TRAILER DATA RECORD - "T" RECORD

Field TTT Nebraska Managed Care Unborn Trailer Record

Field Name: NMC-UNBORN-TRL
Purpose: This is the Unborn Trailer Data Record.
Valid Values: Follow.

Field T01 Trailer Action Type

Field Name: NMC-TRL-ACTION-TYPE PIC X
Purpose: This field contains the record type identifier.
REQUIRED: YES
Valid Values: The only valid value for this field is a 'T'.

Field T02 Trailer Date/Time Stamp

Field Name: NMC-TRL-DATE-STAMP

NMC-TRL-SYSTEM-DATE	
NMC-TRL-SYSTEM-YEAR	PIC 9(04)
NMC-TRL-SYSTEM-MONTH	PIC 9(02)
NMC-TRL-SYSTEM-DAY	PIC 9(02)
NMC-TRL-SYSTEM-TIME	
NMC-TRL-SYSTEM-HOUR	PIC 9(02)
NMC-TRL-SYSTEM-MINUTE	PIC 9(02)
NMC-TRL-SYSTEM-SECOND	PIC 9(02)

Purpose: The trailer record will contain the system date and time documenting when the file was created.
REQUIRED: YES
Valid Values: Valid date in YYYYMMDD format.
Valid time in 24-hour HHMMSS format.

Field T03 Total Detail Record

Field Name: NMC-TRL-TOTAL-DETAIL-RECORD PIC 9(07)
Purpose: This field contains an accumulated total count of the records in this batch. A batch is the group of records between the header and the trailer record.
REQUIRED: YES

DOCUMENT SUMMARY

This document describes the Nebraska Medicaid Managed Care Program record layout used by the State of Nebraska to send information regarding Medicaid Managed Care clients enrolled with the health connection vendor(s).

This file will be sent on a monthly basis. It will include all clients who are newly enrolled, clients who were enrolled last month and continue to be enrolled, clients who will transferred into the health plan, and clients who are no longer enrolled with the health plan.

The file characteristics are:

a. EBCDIC format

b. LRECL **=** 1500, RECFM = FB

c. The first record in the file must be a header record

d. The last record in the file must be a trailer record.

e. All date fields must be in YYYYMMDD format.

NEBRASKA MEDICAID MANAGED CARE

CLIENT ELIGIBILITY DATA

Document B: Health Plan Client Eligibility File Data Descriptive Notes

NOTES FOR HEALTH PLAN CLIENT ELIGIBILITY HEADER DATA RECORD - "H" RECORD

Field HHH Nebraska Managed Care Client Eligibility Header Record

Field Name: NMC-MEDICAID-ENROLL-HDR
Purpose: This is the Client Eligibility Header Data Record.
Valid Values: Follow.

Field H01 Header Action Type

Field Name: NMC-HDR-ACTION-TYPE PIC X
Purpose: This field contains the record type identifier.
REQUIRED: YES
Valid Values: The only valid value for this field is a 'H'.

Field H02 Header Date/Time Stamp

Field Name: NMC-HDR-DATE-STAMP

NMC-HDR-SYSTEM-DATE	
NMC-HDR-SYSTEM-YEAR	PIC 9(04)
NMC-HDR-SYSTEM-MONTH	PIC 9(02)
NMC-HDR-SYSTEM-DAY	PIC 9(02)
NMC-HDR-SYSTEM-TIME	
NMC-HDR-SYSTEM-HOUR	PIC 9(02)
NMC-HDR-SYSTEM-MINUTE	PIC 9(02)
NMC-HDR-SYSTEM-SECOND	PIC 9(02)

Purpose: Each header record will contain the system date and time documenting when the file was created.
REQUIRED: YES
Valid Values: Valid date in YYYYMMDD format.
Valid time in 24 hour HHMMSS format

NOTES FOR HEALTH PLAN CLIENT ELIGIBILITY DETAIL DATA RECORD - "D" RECORD

Field DDD Nebraska Managed Care Client Eligibility Detail Record

Field Name: NMC-MEDICAID-ENROLL-DET
Purpose: This is the Client Eligibility Detail Data Record.
Valid Values: Follow.

Field D01 Detail Action Type

Field Name: NMC- ACTION-TYPE PIC X.
Purpose: This field contains the record type identifier.
REQUIRED: YES
Valid Values: X = Client Transfer occurred (same plan)
N = Client is newly eligible/enrolled for managed care
C = Client continues to be enrolled in managed care
D = Disenrolled Client

Field D02 Client Medicaid Identification Number

Field Name: NMC-CLIENT-MEDICAID-NBR.
NMC-MEDICAID-CASE-NBR PIC 9(09) VALUE 0.
NMC-CLIENT-CASE-ID PIC 9(02) VALUE 0.

Purpose: 11 digit Medicaid number assigned by the Health and Human Services to a person who has applied and is eligible for public assistance benefits. This number consists of a Medicaid case number and a client identification number within that case.
REQUIRED: YES
Valid Values: 11 digit Medicaid number.

Field D03 Client Social Security Number

Field Name: NMC-CLIENT-SSN PIC 9(09)
Purpose: This field contains the client's social security number.
REQUIRED: YES
Valid Values: Social security number of client, if a SSN is unknown or does not exist at the time of application, a temporary number which is the Arp number from NFOCUS, with the first digit replace by a '9'. The temporary number will be changed when a valid SSN is received from the SSA.

Field D04 Client Name

Field Name: NMC-CLIENT-NAME.

NMC-CLIENT-FNAME	PIC X(20).
NMC-CLIENT-MIDINIT	PIC X.
NMC-CLIENT-LNAME	PIC X(25).

Purpose: This field contains the client's first name, middle initial, and last name.
REQUIRED: YES

Field D05 Medical Plan Number

Field Name: NMC-MD-PLAN-NUMBER PIC 9(04)
Purpose: This field identifies the Med/Surg plan sending the provider file.
REQUIRED: YES
Valid Values: 2000 = UnitedHealthCare Community Plan
3000 = Aetna Better Health of Nebraska
4000 = Arbor Health Plan

Field D06 Provider Identification Number

Field Name: NMC-PROVIDER-NUMBER

NMC-MD-MEDICAID-PROV-NBR	PIC X(09).
NMC-MD-MEDICAID-PROV SFX	PIC 9(02)

Purpose: This field contains the 11 digit State of Nebraska Medicaid Number that identifies the provider at the location indicated in the record.
REQUIRED: YES
Valid Values: 11 digit Nebraska Medicaid Provider number assigned by Health and Human Services.
NMC-MD-MEDICAID-PROV-NBR must be numeric and greater than 0.
NMC-MD-MEDICAID-PROV-SFX must be 00, or a value greater than 0.

Field D07 Medical Medicaid Provider Terminated

Field Name: NMC-MD-MEDICAID-PROV-TERM PIC X
Purpose: This field contains an indicator of whether or not the provider is terminated with the medical health plan.
REQUIRED: NO
Valid Values: 'Y' or 'N'

Field D08 Vendor Provider Number

Field Name: NMC-VENDOR-PROV-NBR PIC X(15)
Purpose: This field contains the provider vendor identification number, as assigned by the medical health plan.
REQUIRED: NO
Valid Values: Any value other than spaces.

Field D09 Behavioral Health Plan Number

Field Name: NMC-BH-PLAN-NUMBER PIC 9(04)
Purpose: This field contains the BH plan number of the behavioral health plan that the client is enrolled with.
REQUIRED: NO
6000 = Magellan Behavioral Health

Field D10 Cap Rates

Field Name: NMC-CAP-RATES.

NMC-CAP-AMT1	PIC 9(05)V99	Prospective Cap Payment
NMC-CAP-AMT2	PIC 9(05)V99	Current Month Cap Payment
NMC-CAP-AMT3	PIC 9(05)V99	Not Used
NMC-CAP-AMT4	PIC 9(05)V99	Not Used
NMC-CAP-AMT5	PIC 9(05)V99	Not Used
NMC-CAP-AMT6	PIC 9(05)V99	Reinsurance Amount

Purpose: This field contains the amounts used for Capitation payments and calculations.
NMC-CAP-AMT1 contains the Medical / Surgical or behavioral health prospective cap payment.
NMC-CAP-AMT2 contains the cap payment for the clients who were immediately enrolled in current month.

NMC-CAP-AMT3, AMT4, AMT5 are not used.
NMC-CAP-AMT6 *contains the Reinsurance Amount, for reference only*.

REQUIRED: NO

Field D11 DSS Agency Code

Field Name: NMC-DSS-AGENCY-CODE.

NMC-DSS-DISTRICT	PIC 9(02).
NMC-DSS-ADM-OFFICE	PIC 9.
NMC-DSS-WORKER	PIC 9(02).

Purpose: This field contains the HHS office/worker that manages the client's case. Currently the district and administrative office values are used to distinguish medical vs. nonmedical Managed Care coverage areas.

REQUIRED: NO

Valid Values: First three digits a valid DSS agency code, last two a valid DSS worker code.

Field D12 Client Living Arrangement

Field Name: NMC-CLIENT-LIVING-ARRANGE PIC 9(02)

Purpose: This field contains a numeric code describing the client's living arrangements.

REQUIRED: NO

Valid Values:

- 01 - Apartment or House, Single Family House, House Arrest Community Service, Halfway House, House Arrest Work Release, Adoptive Home, Adult Day Home
- 03 - Homeless Shelter for Profit or Non Profit, Room Only, (Dorms, Sororities, Fraternities - Meals Not Provided, Hospital - Acute Hospital Care, Room Only - No Meals Provided, Job Corps, Military, Hospital
- 05 - Public Housing (not responsible for paying heating bills), (Dorms, Sororities, Fraternities - Meals Provided), Battered Women and Children Shelter - Non Profit, Temporary Lodging
- 06 - Public Housing, Pub Hsing - Multi-Fam Hse Not Responsible for Heating & Cooling Bills, Pub Hsing - Multi-Fam Hse Not Responsible for Heating Bills, Pub Hsing - Multi-Fam Hse Not Responsible for Cooling Bills, Multi-Family Dwelling, Adult Day Center, Adult Day Health Center
- 07 - Pub Hsing - Single Fam Hse Responsible for Heating Bills & Cooling Bills, Pub Hsing - Single Fam Hse Responsible for Heating Bills, Pub Hsing - Single Fam Hse Responsible for Cooling Bills, Child Care Center
- 09 - Board and Room, Chemical Dependency Treatment and Rehabilitation Center
- 10 - Licensed Mental Health Center, Licensed Domiciliary Facility, Assisted Living - Waiver
- 12 - Veterans Hospital/Veterans Nursing, Nursing Home/Long Term Care, Nursing Home
- 13 - Institution - Psychiatric Care – IMD, Psych Residential Treatment Facility

14 - Child Caring Agency, Child Caring Agency, Child Placing Agency, Emergency Shelter Center, Family Child Care Home I, Family Child Care Home II
17 - Licensed/Approved Foster Home, Emergency Shelter Foster Home, Foster Home, Foster Home - Agency Based, Foster Home - Child Specific, Foster Home - Relative
18 - Licensed Residential Care Facility, Assisted Living
19 - Licensed Center for Developmentally Disabled
20 - Certified Adult Family Home, Adult Family Home
30 - Group Home For Profit, Group Home - Institution Non-Profit Meals Provided, Boarder - Board And Rooms - Meals Provided, Incarceration, Residential Care, Preschool
32 - Boardinghouse - Commercial - Non-Profit, Boardinghouse - Commercial - For Profit, licensed Drug Treatment Center, Boarding Home
35 - Licensed/Approved Group Home For Children, Disabled Group Home - Non Profit - Meals Provided, Group Home, Group Home for Adults
36 - Institution for Mental Diseases (IMD)
37 - Correctional Facility

Field D13 Client Nationality

Field Name: NMC-CLIENT-NATIONALITY PIC X
Purpose: NOT USED
REQUIRED: NO

Field D14 Pregnancy related services Fee Indicator

Field Name: NMC-PREG-RELATED-SERV-IND PIC X.

Purpose: This field contains an indicator, stating that pregnancy-related services Capitation fee payment was made on behalf of an unborn or newborn child.
REQUIRED: NO

Valid Values: For NMC-PREG-RELATED-SERV-IND
Y - Capitation payment made for pregnancy-related services.
N - No Capitation payment made for pregnancy-related services.

Field D15 NMC Autoassignment Indicator

Field Name: NMC-AUTO-ASSIGN-IND PIC X.
Purpose: This field contains a code indicating if the client was autoassigned to the plan and provider.
REQUIRED: NO

Valid Values: Y - Yes, client was autoassigned.
N - No, client was not autoassigned.

Field D16 Client Cap Gender

Field Name: NMC-CAP-GENDER PIC X
Purpose: This field contains the gender used to determine the cap payment.
REQUIRED: NO
Valid Values: F - Female
M - Male
U - Unborn

Field D17 Special Needs Client Indicator

Field Name: NMC-SPECIAL-NEEDS-IND PIC X
Purpose: This field contains a code to define the special needs of a Client.
REQUIRED: NO
Valid Values: A – Children eighteen years of age and younger receiving SSI benefits
B – Children eighteen years of age and younger in Foster Care
C – Children eighteen years of age and younger receiving Title V services
D – Combined codes of A and B
E – Combined codes of A and C
F – Combined codes of B and C
G – Combined codes of A, B and C

Field D18 Reason for Clients Case Closing

Field Name: NMC-REASON-CLOSE-CODE PIC X(03).
Purpose: This field contains the code indicating why the client's case was closed.

REQUIRED: NO
Valid Values:
200 - Waiver of Enrollment
201 - Not Eligible for Medicaid Benefits
202 - Medicaid Status - Suspended or Closed
203 - Medicare
204 - Share of Cost
205 - Admitted to Long Term Care Facility
206 - Excluded group
207 - Excluded group
210 - Unknown County
211 - Admit to IMD or Correctional Facility
212 - Admit to PACE

Field D19 Lock In Code

Field Name: NMC-LOCK-IN-CODE PIC X
Purpose: This field contains the lock in code for what a client is locked in to.
REQUIRED: NO
Valid Values:
0 = No Lock-in
1 = One Pharmacy
2 = One Primary Practitioner and One Pharmacy
3 = One Primary Practitioner, One Pharmacy and One Hospital
4 = One Prescribing Physician and One Pharmacy
9 = Emergency Medical Services (Provider Number is given a value of 90000049999, and Licensed Doctor number is given a value of 2801 LOCK)

Field D20 Lock In Pharmacy Number

Field Name: NMC-LOCK-IN-PHARMACY PIC X(11)
Purpose: This field contains the 11 digit State of Nebraska Medicaid provider number assigned to a pharmacy.
REQUIRED: NO

Field D21 Lock In Primary Practitioner Number

Field Name: NMC-LOCK-IN-PRIM-PRACT PIC X(11)
Purpose: This field contains the 11 digit State of Nebraska Medicaid provider number assigned to a primary practitioner.
REQUIRED: NO

Field D22 Lock In License (Prescribing Physician Number)

Field Name: NMC-LOCK-IN-LICENSE PIC X(13)
Purpose: This field contains the 13 digit State of Nebraska Medicaid license number assigned to a prescribing physician.
REQUIRED: NO

Field D23 Lock In Hospital

Field Name: NMC-LOCK-IN-OP-HOSP PIC X(11)
Purpose: This field contains the 11 digit State of Nebraska Medicaid provider number assigned to a hospital.
REQUIRED: NO

Field D24 Fetal Number

Field Name: NMC-FETAL-NBR PIC 9(4)
Purpose: This field contains the number of fetuses of the pregnant mother.
REQUIRED: NO

Field D25 Mothers Name

Field Name: NMC-MOM-NAME.
NMC-MOM-FNAME PIC X(20).
NMC-MOM-MNAME PIC X.
NMC-MOM-LNAME PIC X(25).
Purpose: This field contains the name of the pregnant mother if client is an unborn or newborn.
REQUIRED: NO

TPL Information - the first four Current TPL's are sent

Field D26 Carrier Number

Field Name: NMC-CARRIER-NBR
NMC-CARRIER-CODE PIC X(05).
NMC-CARRIER-SEQ-NBR PIC X(03).
Purpose: These fields contain the code and the sequence number assigned to a commercial insurance company or third party administrative office that handles the processing and payment of health and casualty insurance claims.
REQUIRED: NO

Field D27 Carrier Name

Field Name: NMC-CARRIER-NAME PIC X(30).
Purpose: This field contains the name of the commercial insurance company or third party administrative office that handles the processing and payment of health and casualty insurance claims.
REQUIRED: NO

Field D28 Policy Key

Field Name: NMC-POLICY-KEY.
NMC-POLICY-NBR PIC X(20).
NMC-GROUP-NUMBER PIC X(20).
Purpose: These fields contain the policy key, which is the policy, number (the number assigned to clients policy) and the group number (the number given to the group plan that specifies the medical benefits provided through the health insurance plan).
REQUIRED: NO

Field D29 Subscriber Social Security Number

Field Name: NMC-SUBSCRIBER-SSN PIC X(09).
Purpose: This field contains the social security number of the owner of a commercial health insurance policy.
REQUIRED: NO

Field D30 Subscriber Name

Field Name: NMC-SUBSCRIBER-NAME.

	NMC-SUBSCR-FIRST	PIC X(20).
	NMC-SUBSCR-MIDINT	PIC X.
	NMC-SUBSCR-LAST	PIC X(25).

Purpose: These fields contain the name of the owner of a commercial health insurance policy.
REQUIRED: NO

Field D31 Relation Policy Holder

Field Name: NMC-RELATN-POLHLDR PIC X(02)
Purpose: This field contains a code that indicates the relation of the TPL.
REQUIRED: NO

10 - Self
11 - Spouse - policyholder living in the home eligible under another case number
12 - Spouse - policyholder living in home NOT eligible for Medicaid
13 - Spouse - policyholder NOT living in home - not legally separated or divorced
14 - Ex-spouse - policyholder NOT living in home - legally separated or divorced
15 - Friend - policy holder living in the home; may be common law arrangement or other like relationship
20 - Child - (natural or adoptive or step) - policyholder in home but not eligible for Medicaid
21 - Child - (natural or adoptive or step) - policyholder in home and eligible for Medicaid
22 - Child - (step) - policyholder NOT in the home
23 - Child - (natural or adoptive) - policyholder NOT in home (IVD referral)
30 - Foster Child - no legal obligation
31 - Grandchild - natural parent living in the home
32 - Grandchild - natural parent NOT living in the home
50 - Potential adoptive child - adoptive parents financially responsible
51 - Other - legally liable

Field D32 Coverage Code

Field Name: NMC-COVERAGE-CODE PIC X(03)
Purpose: This field contains the code that describes the coverage the client has.
REQUIRED: NO
Valid Values:

101 - MAJOR MEDICAL PLAN WITHOUT DENTAL; INCLUDES RX
120 - HMO PLAN WITHOUT DENTAL; INCLUDES RX
130 - MEDICARE SUPPLEMENT PLAN; EXCLUDES RX
140 - INPATIENT HOSPITAL AND RELATED SERVICES
149 - INPATIENT AND OUTPATIENT HOSPITAL AND RELATED SERVICES
150 - NURSING FACILITY CONFINEMENT PLAN
160 - PPO PLAN WITHOUT DENTAL; INCLUDES RX

Note: coverage is pending as policy has newly been identified and verification has not been received yet from the insurer to completely determine benefits.

201 - STANDARD MAJOR MEDICAL PLAN WITHOUT DENTAL; INCLUDES RX
202 - STANDARD MAJOR MEDICAL PLAN WITH DENTAL; EXCLUDES RX
203 - STANDARD MAJOR MEDICAL PLAN WITH DENTAL; INCLUDES RX
204 -STANDARD MAJOR MEDICAL PLAN WITHOUT DENTAL; EXCLUDES RX
208 -HEALTH INSURANCE FOR PAY & CHASE
301 -PPO OR HMO PLAN WITHOUT DENTAL; INCLUDES RX
302 -PPO OR HMO PLAN WITHOUT DENTAL; EXCLUDES RX
303 -PPO OR HMO PLAN WITH DENTAL; INCLUDES RX
304 -PPO OR HMO PLAN WITH DENTAL; EXCLUDES RX
375 -MEDICARE MANAGE CARE; EXCLUDES RX
401 -MEDICARE SUPPLEMENT TO PART A ONLY; EXCLUDES RX
402 -MEDICARE SUPPLEMENT TO PART B ONLY; EXCLUDES RX
403 - MEDICARE SUPPLEMENT TO PART A & B; EXCLUDES RX

404 -MEDICARE SUPPLEMENT WITH MAJOR MEDICAL; INCLUDES RX
405 -MEDICARE SUPPLEMENT TO PART A & B; EXCLUDES RX & PART B DEDUCTIBL
406 -MEDICARE SUPPLEMENT WITH MAJOR MEDICAL; INCLUDES NURSING HOME & R
407 -MEDICARE CARVE OUT PLAN; INCLUDES RX
500 -CHAMPUS/TRICARE OR CHAMPVA; INCLUDES RX
501 -IN AND OUTPATIENT HOSPITAL, INCLUDING ANCILLARY SERVICES
502 -IN AND OUTPATIENT HOSPITAL, PLUS ANCILLARY CHARGES; DUE TO ACCIDENT
531 -INPATIENT HOSPITAL, INCLUDING ANCILLARY CHARGES
532 -INPATIENT HOSPITAL AND ANCILLARY SERVICES RELATED TO AN ACCIDENT
533 -HOSPITAL INDEMNITY PLAN
534 -HOSPITAL INDEMNITY PLAN RELATED TO AN ACCIDENT
550 -DENTAL BENEFITS COVERAGE
551 - VISION BENEFITS COVERAGE
552 -PRESCRIPTION DRUG COVERAGE
553 -CHAMPUS/TRICARE OR CHAMPVA SUPPLEMENT POLICY
554 -VISION AND DENTAL BENEFITS COVERAGE
558 -PRESCRIPTION DRUG COVERAGE FOR PAY & CHASE
560 -CANCER BENEFITS POLICY
561 -SPECIFIED SERVICE POLICY
562 -DRUG CANCER BENEFITS POLICY
578 -NURSING HOME CONFINEMENT POLICY
600 -LIMITED BENEFITS POLICY

Note: Pay & Chase cases would include uncooperative non-custodial parent problem cases and/or insurance carriers not recognizing Medicaid regulations (requiring Legal Division assistance)that have been identified by TPL staff (all of these claims will edit in MCP165 to set Bypass Code - 'Z').

Field D33 Effective TPL Starting Date

Field Name: NMC-TPL-START-DATE.
NMC-TPL-YEAR-START PIC X(04).
NMC-TPL-MONTH-START PIC X(02).
NMC-TPL-DAY-START PIC X(02).
Purpose: These fields contain the starting date of clients TPL.
REQUIRED: NO

Field D34 Effective TPL Ending Date

Field Name: NMC-TPL-END-DATE.
NMC-TPL-YEAR-END PIC X(04).
NMC-TPL-MONTH-END PIC X(02).
NMC-TPL-DAY-END PIC X(02).
Purpose: These fields contain the ending date of clients TPL.
REQUIRED: NO

Field D35 TPL Total Times

Field Name: NMC-TPL-TOTAL-TIMES PIC 9(02)
Purpose: Indicates how many TPL policies the client has.
REQUIRED: NO

Field D36 Pregnancy Indicator

Field Name: NMC-PREGNANCY-IND PIC X.
Purpose: This field contains a code indicating if the client is known to be pregnant.
REQUIRED: NO

Valid Values: Y - Yes, client is pregnant.
N - No, we have no record of client being pregnant.

Field D37 Expected Date of Birth

Field Name: EXPECTED-DATE-OF-BIRTH.

EXPECTED-DOB-YEAR	PIC X(04).
EXPECTED-DOB-MONTH	PIC X(02).
EXPECTED-DOB-DAY	PIC X(02).

Purpose: This field contains the date the expected date of birth for an unborn child.
REQUIRED: NO

Field D38 Transfer Reason Code

Field Name: NMC-TRANSFER-REASON-CODE PIC X
Purpose: This field contains the code indicating why the client transferred.
REQUIRED: NO
Valid Values: 400 - AUTO ASSIGN-DIFFERENT PCP
401 - AUTO ASSIGN-DIFFERENT PLAN
402 - AUTO ASSIGN-EXISTING RELATIONSHIP W/ANOTHER PCP
404 - ACCESS-PCP WITH HISTORY NOT IN PLAN NETWORK
405 - ACCESS-SPECIALIST(S) WITH HX NOT IN PLAN NETWORK
406 - AUTO REENROLLMENT DURING OPEN ENROLL MONTH
407 - MOVE OUT OF MCO'S SERVICE AREA
410 - ACCESS-DISTANCE

Field D40 Rate Group

Field Name: NMC-RATE-GROUP PIC X(04)
Purpose: This field contains the code for the rate group for the client.
REQUIRED: YES
Valid Values: PHYSICAL HEALTH

AABD - Assistance to the Aged, Blind, Disabled, program grouping
FAM - Family program grouping
WARD - State foster care program grouping
CHIP - Kids Connection program grouping (same as KIDS)
KB - Katie Beckett

BEHAVIORAL HEALTH

BHAG - Behavioral health Aged program grouping
BHBD - Behavioral health Blind and Disabled program grouping
FAM - Family program grouping
WARD - State foster care program grouping
CHIP - Kids Connection program grouping (same as KIDS)
KB - Katie Beckett

Field D41 Client County

Field Name: NMC-CLIENT-COUNTY PIC 9(02)
Purpose: This field contains the numeric code identifying the Nebraska county in which the client resides.
REQUIRED: NO
Valid Values: COUNTY OF RESIDENCE

01 Adams	33 Furnas	65 Nuckolls
02 Antelope	34 Gage	66 Otoe
03 Arthur	35 Garden	67 Pawnee
04 Banner	36 Garfield	68 Perkins
05 Blaine	37 Gosper	69 Phelps
06 Boone	38 Grant	70 Pierce
07 Box Butte	39 Greely	71 Platte
08 Boyd	40 Hall	72 Polk
09 Brown	41 Hamilton	73 Red Willow
10 Buffalo	42 Harlan	74 Richardson
11 Burt	43 Hayes	75 Rock
12 Butler	44 Hitchcock	76 Saline
13 Cass	45 Holt	77 Sarpy
14 Cedar	46 Hooker	78 Saunders
15 Chase	47 Howard	79 Scotts Bluff
16 Cherry	48 Jefferson	80 Seward
17 Cheyenne	49 Johnson	81 Sheridan
18 Clay	50 Kearney	82 Sherman
19 Colfax	51 Keith	83 Sioux
20 Cuming	52 Keya Paha	84 Stanton
21 Custer	53 Kimball	85 Thayer
22 Dakota	54 Knox	86 Thomas

23 Dawes	55 Lancaster	87 Thurston

25 Deuel	57 Logan	89 Washington
26 Dixon	58 Loup	90 Wayne
27 Dodge	59 Madison	91 Webster
28 Douglas	60 McPherson	92 Wheeler
29 Dundy	61 Merrick	93 York
30 Fillmore	62 Morrill	99 Out-of-State
31 Franklin	63 Nance	
32 Frontier	64 Nemaha	

Field D42 Special Program Indicator (SPI) codes

Field Name: NMC-SPI-CODE PIC X(01)
Purpose: This field contains the Special Program Indicator (SPI) codes.
REQUIRED: YES
Valid Values:

SPI Code	Description
A	Waiver Child DD (Prior to Jan 2003, included adult waiver)
B	MR Case Management Recipients
C	AABD Aged and Disabled Waiver Recipients
D	Waiver Children with Autism
E	AABD MA Only Recipients Using The 100% OMB Poverty Level
F	AABD Disabled Child Waiver Of Deeming Parental Income and Resources ('Katie Beckett' Cases)
G	Refugee Resettlement Clients
H	Aliens w/ Limited Medical Coverage
I	Early Intervention
K	CHIP
L	Breast / Cervical Cancer
M	Inmate of Public Institution
N	Not Currently Defined in N-FOCUS (EF Non-Employable)
O	Waiver Adult DD Comprehensive
P	Waiver Adult DD Residential
Q	Waiver Adult DD Day
R	Waiver Adult DD CSP
S	State (Permanent Legal Residents/UNDOC Immigrant Pregnant Women)
T	ADC/MA 12 Months Of Transitional Medical Assistance
U	Not Currently Defined in N-FOCUS (Previous Description: Indiv Exempt From Copayments. This code is only used for a Pregnant Woman Who Is Not Listed Under The Same Case Number As The Unborn)
V	Waiver TBI and Money Follows The Person
W	Waiver Traumatic Brain Injury (Effective Date: Oct. 2000)
X	Waiver A&D and Money Follows The Person
Y	Waiver Child DD and Money Follows The Person

Z	Waiver Adult DD Comprehensive and Money Follows The Person
1	MSP/QMB Medicare Crossover Only
BLANK	Recipient Is Not In A Medicaid Waiver Category

Field D43 Co-Pay Indicator

Field Name:	NMC-COPAY-IND	PIC X(01)
Purpose:	This field contains the Copay Indicator	
REQUIRED:	YES	
Valid Values:	0-INDIVIDUAL NOT SUBJECT TO COPAY	
	1-INDIVIDUAL SUBJECT TO COPAY	

NOTES FOR HEALTH PLAN CLIENT ELIGIBILITY TRAILER DATA RECORD - "T" RECORD

Field TTT Nebraska Managed Care Client Eligibility Trailer Record

Field Name: NMC-MEDICAID-ENROLL-TRL
Purpose: This is the Client Eligibility Trailer Data Record.
Valid Values: Follow.

Field T01 Trailer Action Type

Field Name: NMC-TRL-ACTION-TYPE PIC X
Purpose: This field contains the record type identifier.
REQUIRED: YES
Valid Values: The only valid value for this field is a 'T'.

Field T02 Trailer Date/Time Stamp

Field Name: NMC-TRL-DATE-STAMP
NMC-TRL-SYSTEM-DATE
NMC-TRL-SYSTEM-YEAR PIC 9(04)
NMC-TRL-SYSTEM-MONTH PIC 9(02)

```
                    NMC-TRL-SYSTEM-DAY          PIC 9(02)
               NMC-TRL-SYSTEM-TIME
                    NMC-TRL-SYSTEM-HOUR         PIC 9(02)
                    NMC-TRL-SYSTEM-MINUTE       PIC 9(02)
                    NMC-TRL-SYSTEM-SECOND       PIC 9(02)
```

Purpose: This field identifies the date and time that the plan sent the provider file.
REQUIRED: YES
Valid Values: Valid date in YYYYMMDD format.
Valid time in 24 hour HHMMSS format.

Field T03 Total Detail Records

Field Name: NMC-TRL-TOTAL-DETAIL-RECS PIC 9(07)
Purpose: This field contains an accumulated total count of the records in this batch. A batch is the group of records between the header and the trailer record.
REQUIRED: YES

Field T04 Total Enrolled Clients

Field Name: NMC-TOTAL-ENROLLED-CLIENT PIC 9(07)
Purpose: This field contains an accumulated total count of the clients that were enrolled.
REQUIRED: YES

Field T05 Total Dis-Enrolled Clients

Field Name: NMC-TOTAL-DIS-ENROLL-CLIENT PIC 9(07)
Purpose: This field contains an accumulated total count of the clients that were dis-enrolled.
REQUIRED: YES

Field T06 Total Transferred Clients

Field Name: NMC-TOTAL-TRANSFER-CLIENT PIC 9(07)
Purpose: This field contains an accumulated total count of the clients that were transferred.
REQUIRED: YES

Field T07 Total Capitation Amount 1

Field Name: NMC-TOTAL-CAPS-AMTS-1 PIC 9(07)
Purpose: This field contains an accumulated total count of fees or medical surgical or behavioral health prospective Capitation payments.
REQUIRED: YES

Field T08 Total Capitation Amount 2

Field Name: NMC-TOTAL-CAPS-AMTS-2 PIC 9(07)
Purpose: The field contains the total count of capitation payments for the clients who were immediately enrolled in current month.
REQUIRED: YES

Field T09 Total Capitation Amount 3

Field Name: NMC-TOTAL-CAPS-AMTS-3 PIC 9(07)
Purpose: NOT USED
REQUIRED: YES

Field T10 Total Capitation Amount 4

Field Name: NMC-TOTAL-CAPS-AMTS-4 PIC 9(07)
Purpose: NOT USED
REQUIRED: YES

Field T11 Total Capitation Amount 5

Field Name: NMC-TOTAL-CAPS-AMTS-5 PIC 9(07)
Purpose: NOT USED
REQUIRED: YES

Field T12 Total Capitation Amount 6

Field Name: NMC-TOTAL-CAPS-AMTS-6 PIC 9(07)
Purpose: This field contains an accumulated total count of reinsurance amounts.
REQUIRED: YES

Attachment 26 - MLR and Risk Corridor Examples

Example 1. MCO pays money back to State under MLR and risk corridor

MLR Example		
Earned Revenue (Total Capitation Payments less hold-back and HIT)	$	100,000
Claims Incurred	$	75,000
Estimated IBNR	$	2,000
Medical Incentive Bonus	$	1,000
Reinsurance Premiums Less Recoveries	$	-
Activities that Improve Health Care Quality	$	50
Less Related-Party Medical Margin	$	(500)
Total Medical Expenses (Net Qualified Medical Expenses)	$	77,550
Net Qualified Medical Expenses divided by Earned Revenue		77.6%
Minimum MLR %		85.0%
Percentage below MLR		7.5%
MLR Reconciliation Payment	**$**	**(7,450)**

Risk Corridor Example		
Earned Revenue (Total Capitation Payments less hold-back and HIT)	$	100,000
MLR Rebate	$	(7,450)
Claims Incurred	$	75,000
Estimated IBNR	$	2,000
Medical Incentive Bonus	$	1,000
Reinsurance Premiums Less Recoveries	$	-
Activities that Improve Health Care Quality	$	50
Less Related-Party Medical Margin	$	(500)
Total Medical Expenses (Net Qualified Medical Expenses)	$	77,550
Total Allowed Administration (Excluding HIT)	$	8,000
Profit/(Loss)	$	7,000
Risk Corridor Profit/(Loss) Share	**$**	**(4,000)**

Example 2. State pays money back to MCO under risk corridor

MLR Example		
Earned Revenue (Total Capitation Payments less hold-back and HIT)	$	100,000
Claims Incurred	$	105,000
Estimated IBNR	$	2,000
Medical Incentive Bonus	$	1,000
Reinsurance Premiums Less Recoveries	$	-
Activities that Improve Health Care Quality	$	50
Less Related-Party Medical Margin	$	(500)
Total Medical Expenses (Net Qualified Medical Expenses)	$	107,550
Net Qualified Medical Expenses divided by Earned Revenue		107.6%
Minimum MLR %		85.0%
Percentage below MLR		0.0%
MLR Reconciliation Payment	**$**	**-**

Risk Corridor Example		
Earned Revenue (Total Capitation Payments less hold-back and HIT)	$	100,000
MLR Rebate	$	-
Claims Incurred	$	105,000
Estimated IBNR	$	2,000
Medical Incentive Bonus	$	1,000
Reinsurance Premiums Less Recoveries	$	-
Activities that Improve Health Care Quality	$	50
Less Related-Party Medical Margin	$	(500)
Total Medical Expenses (Net Qualified Medical Expenses)	$	107,550
Total Allowed Administration (Excluding HIT)	$	8,000
Profit/(Loss)	$	(15,550)
Risk Corridor Profit/(Loss) Share	**$**	**12,550**

Heritage Health Rate Development Narrative

Background

The base data and adjustments used for the populations currently enrolled in Physical Health or Behavioral Health managed care were derived using the assumptions in the latest (January 2016 – June 2016) Physical Health and Behavioral Health rate development. For populations not currently enrolled in managed care FFS data was used, and rating adjustments from a comparable population were applied to create the projected rates. Optumas will update the base data and re-evaluate all assumptions when updating the Heritage Health rates in the spring.

Rating Regions

Optumas analyzed the cost differences (inclusive of the new populations and services) across counties and used the results of this analysis as the basis of the rating region recommendation for the Heritage Health program. After discussing the results of the regional analysis with the State, Optumas proposed Rating Region 1 (RR1) and Rating Region 2 (RR2) as outlined on page 142 of the RFP.

Covered Populations/Services

The populations and services that are included in the draft Heritage Health rates are illustrated in the "Heritage Health Pre-Proposal Conference" presentation.

Base Data

For the Physical Health acute care services, Optumas used SFY14 and SFY15 claims data from the existing Physical Health program, paid through September 30th, 2015.

For the Behavioral Health services, Optumas used claims data from the existing Behavioral Health program incurred from September 1st 2013 (the program's inception) through June 30th 2015. The Behavioral Health data for the Foster Care population was unique; Optumas only used SFY15 incurral dates. When analyzing the FY14 and FY15 Foster Care data, FY14 was substantially different than FY15 and Optumas determined that FY15 was the most reasonable basis for predicting future Foster Care expenses. The current managed care entity described the change in Foster Care experience as variance in utilization for PRTF due to a decrease in requests for PRTF. After further discussions, it was determined that the utilization levels inherent in the FY2015 data was more indicative of future utilization patterns. The Behavioral Health data was paid through June 30th 2015.

For the populations and services that are being carved into Managed Care, such as the Pharmacy benefit or the acute care services for the LTSS population, Optumas used SFY14 and SFY15 FFS data, paid through September 30th, 2015.

Figure 1. Data Sources

Hospice Population	Behavioral Health Services	SFY14 and SFY15 encounter data submitted by existing managed care entity
All Populations	Rx and Transplant Services	SFY14 and SFY15 FFS data

IBNR

Optumas analyzed the claim payment lag by category of service through the incurred but not reported (IBNR) analysis. IBNR factors were developed and applied to the base data by category of service and data source. Completion patterns and assumptions for encounter data sets were discussed with current managed care entities to ensure reasonableness. IBNR factors can be found in the accompanying Excel document, titled “IBNR Assumptions by Source”.

Program Changes

The State has implemented several program and policy changes that impacted the service costs that were not reflected in the base data. Optumas considered any prospective program change adjustments necessary to project the base to the contract period. Optumas and the State worked in partnership to determine the impact, shown within Figure 2 below, of the program changes on the projected capitation rate ranges:

Figure 2. Program Changes

Adjustment	Overview
ASD Adjustment	Beginning October 2015, the State is requiring the coverage of applied behavior analysis (ABA) and Behavioral Modification services for children with an Autism Spectrum Disorder (ASD) diagnoses. The State provided Optumas with the prevalence of ASD, which equated to 0.6% of Medicaid children having an ASD diagnosis. Optumas used this prevalence information, coupled with research and discussions with our internal clinician, to arrive at an estimated PMPM impact by cohort. The final Heritage Health rates will incorporate emerging program experience for this adjustment.
DD Adjustment	Beginning October 2015, the State is requiring coverage of ABA and Behavioral Modification services for children with a Developmental Disability (including Intellectual Disability) (DD). The State provided Optumas with the prevalence of DD, which equated to 0.7% of Medicaid children having a Development Disability. Optumas used this prevalence information and discussions with our internal clinician, to arrive at an estimated PMPM impact by cohort. The final Heritage Health rates will incorporate emerging program experience for this adjustment.
Service Delivery Adjustments	NEMT Ambulance – This adjustment represents the addition of NEMT Ambulance services to the Managed Care program. Rx Dispensing Fee Change – This adjustment represents a change in the dispensing fee for non-independent pharmacies, from $4.45 to $2.50. Dual Integrated Care Savings - Individuals dually eligible for Medicaid and Medicare were previously not enrolled in physical health managed care. The non-nursing home level of need duals represent a significant opportunity for care savings. Inpatient utilization was reduced by 10%, Outpatient utilization was reduced by 15%, and Emergency Room utilization rates were reduced by 25%. The aggregate impact of these changes to the healthy dual population is a reduction of 5.4%.
Immediate Enrollment	Beginning February 1, 2014, the State has implemented immediate enrollment in Medicaid managed care for newly eligible members. Enrollment is now effective back to the first day of the month that a health plan is chosen. Previously enrollment was effective the first day of the month following health plan selection. The impact of this program change was calculated by comparing the PMPM cost for members whom were in at least their second month of eligibility for the February to June 2014 time period to the PMPM cost for all members whom were eligible during that

Adjustment	Overview
	period. The difference between these two PMPM costs would estimate the impact of immediate enrollment for those members who had enrolled in the Physical Health managed care program after the policy was implemented. This adjustment is somewhat mitigated because it is inherent in 17 of the 24 months of base data.
APR-DRG	On July 1, 2014 the State of Nebraska moved from using the AP DRG payment methodology to the APR DRG payment methodology for inpatient hospital claims. This change impacts all hospitals that are reimbursed on a DRG basis; this excludes hospitals reimbursed on a per diem basis such as Critical Access Hospitals (CAHs) and rehab facilities. The impact of this change was calculated by first re-pricing all impacted inpatient hospital claims in the SFY14 base data, at the AP DRG version 27 weights and SFY14 hospital rates specific to each hospital. This was done to ensure that the comparison between the AP DRG and APR DRG reimbursement would not be influenced by any contracting or payment differences between the MCO reimbursement and the State AP DRG fee schedule. Optumas then assigned an APR DRG and severity level to all inpatient hospital claims included in the analysis based on version 31 of the grouper. This was done by utilizing software from 3M who developed the APR DRG grouper. These claims were then re-priced using the APR DRG version 31 weights and SFY15 hospital rates. The final impact was calculated by comparing the percentage change from the SFY14 AP DRG re-priced amount to the SFY15 APR DRG re-priced amount for each category of aid and MCO. The transition to the APR DRG payment methodology was intended to be budget neutral at a global level, however it should be recognized that this may break down between health plans and especially between rate cells. The overall results do show that the impact is close to budget neutral in aggregate but does show increases and decreases by rate cell.
FQHC Rate Updates	Optumas calculated and applied an adjustment to account for FQHC APM rate changes. Optumas adjusted the FQHC rates inherent in the encounter data to be commensurate with the FQHC APM rates effective 1/1/16.
Prospective Behavioral Health Provider Increase	Beginning July 2014 and July 2015, the State has implemented a 2.25% provider increase. Optumas applied the 2.25% increase to all Behavioral Health services, with the exception of FQHC and RHC providers. The September-June 2014 data received three and a half 2.25% increases, while the July-June 2015 data received two and a half 2.25% increase.

Adjustment	Overview
PRTF Program Change	Optumas calculated and applied an adjustment to account for cost settlements made outside of the MMIS system to two Psychiatric Residential Treatment Facilities. Optumas adjusted the PRTF rates inherent in the encounter data to be commensurate with these cost settlements.
MST/FFT Carve-In	Effective July of 2016 Multisystematic Therapy (MST) and Functional Family Therapy (FFT) will be covered benefits. Optumas added the anticipated expense for these services into the Heritage Health rates. The expense was projected using provider information, case rates, and anticipated provider caseloads. Optumas developed these assumptions with the help of our internal clinician.
Behavioral Health Copay Adjustment	Beginning January 2014, the State implemented a $2.00 copay for certain services. Since this change was implemented within the base data period, Optumas only needed to adjust September-December 2013 to reflect the copay policy change. The January 2014 – June 2015 base data already reflected the copay implementation, so no adjustment for this time period was necessary.
Physical Health Copay Adjustment	The State currently imposes copays on several Medicaid populations. While MCOs are not required to charge copays, the State reimburses the MCOs as if they did impose copays. The impact of this program change was calculated by adjusting reimbursement as necessary to reflect full collection of copays.
Benefit Limits	The State currently imposes limits on chiropractic visits, rehab visits, hearing aids, and eyeglasses for Medicaid FFS. The impact of this program change was calculated by removing any utilization and corresponding cost from the SFY14-15 base data for any of the services listed above that exceeded the FFS utilization limit.

Trend

Trend factors were applied to estimate the change in utilization rate (frequency of services) and unit cost (pure price change, technology, acuity/intensity, and mix of services) of services over time. These trend factors were used to project the costs from the base period to the future contract period. Trends were developed on an annualized basis and applied by major category of service (COS) (e.g., inpatient, outpatient, etc.) and category of aid (e.g. AABD, Family, etc.). Trend values can be found in the accompanying Excel file, titled “COS and COA Trends”.

Physical Health and Pharmacy trends were applied for a total of 36 months from the midpoint of the July 2013 – June 2015 base (6/30/2014) to the midpoint of the contract period (7/2/2017).

With the exception of Foster Care, Behavioral Health trends were applied for a total of 35 months from the midpoint of the September 2013 – June 2015 base (7/31/2014) to the midpoint of the contract period (7/2/2017). Foster Care trends were applied for a total of 30 months from the midpoint of the July 2014 – June 2015 base (12/30/2014) to the midpoint of the contract period (7/2/2017).

Non-Medical Loading

The non-medical load measures the dollars associated with components such as administration, profit, and quality improvement (QI) and are expressed as a percentage of the capitation rate. Optumas utilized reported administrative and profit levels in the financials submitted by the current managed care entities to develop the non-medical load. Experience in other states and similar programs on both a PMPM and percentage basis were also reviewed to ensure reasonableness.

Nebraska State Statue 78-831 requires all contracts and agreements relating to the medical assistance program governing at-risk managed care service delivery for behavioral health services entered into by the Department on or after July 1, 2012, shall:

> (1) Provide a definition and cap on administrative spending that (a) shall not exceed 7% unless the implementing department includes detailed requirements for tracking administrative spending to ensure (i) that administrative expenditures do not include additional profit and (ii) that any administrative spending is necessary to improve the health status of the population to be served and (b) shall not under any circumstances exceed 10%.

The detailed non-medical loading assumption by each subcategory is included in slide 15 of the rate presentation.

UNMC Supplemental Payment

The University of Nebraska Medical Center (UNMC) providers are reimbursed at commercial fee levels. Since the MCOs contract at levels more commensurate with Medicaid reimbursement, a supplemental payment is required to be paid to UNMC by each MCO to make these providers whole. The State includes this supplemental payment as part of the capitation rates, which is then paid by the MCOs to UNMC.

Optumas received a list of UNMC provider IDs from the State as well as the MCOs. These lists were used to identify claims and services attributed to a UNMC provider. The State also provided the most recent UNMC fee schedules, which were used to calculate the difference between the UNMC fee schedule and the UNMC reimbursement inherent in (a) the FFS data for currently un-managed populations and (b) the MCO encounter data for populations currently enrolled in managed care. The difference between the adjusted reimbursement and the reimbursement reflected in the FFS and encounter data at current utilization levels is the amount paid as a supplemental rate to UNMC.

ADDENDUM SEVEN
QUESTIONS and ANSWERS

Date: November 19, 2015

To: All Bidders

From: Michelle Thompson/Teresa Fleming, Buyers
AS Materiel State Purchasing Bureau

RE: Addendum for Request for Proposal Number 5151Z1
to be opened December 22, 2015 at 2:00 p.m. Central Time

Questions and Answers

Following are the questions submitted and answers provided for the above mentioned Request for Proposal. The questions and answers are to be considered as part of the Request for Proposal. It is the Bidder's responsibility to check the State Purchasing Bureau website for all addenda or amendments.

The following are the responses to Questions 221 – 382 for the first round of questions.

Question Number	RFP Section Reference	RFP Page Number	Question	State Response
221.	IV. P.8-13 MCO Reimbursement	145	"Please provide a few detailed numerical examples to demonstrate the timing and order of calculation of the following adjustments/ limitations to capitation revenue, and how they are applied and interact with each other. In parentheses, we have shown our understanding of some of the specifics of these calculations: 1) Risk Adjustment (begins 7/1/2017, calculated annually? for each rating period? calculated by category of aid and region, for selected categories of aid) 2) Minimum MLR (begins on contract start date?, calculated annually on a six to nine month lag, for program in total) 3) Risk Corridor (begins on contract start date?, calculated annually on a nine month lag, for program in total) 4) MLTC Quality Performance Program (effective contract	The application of risk scores will not begin until the second contract period, 1/1/18-12/31/18. The State and its contracted actuary will work together in determining the best risk adjustment methodology to use at that time. The Minimum MLR will be in effect beginning on the contract start date and will be calculated on an annual basis between 6-9 months after the end of the contract year. Although the MLR will be settled annually, as mentioned in Attachment 15 “the MCO must calculate the MLR and submit it to MLTC quarterly”. The 85% Minimum MLR requirement will be calculate as an aggregate of Regions 1 and 2 and will be calculated across all categories of aid. The risk corridor will be in effect beginning on the contract start date and will be calculated at the end of each contract period between 6-9 months after the end of the contract year. The risk corridor calculation will be an aggregate of Regions 1 and 2 across all categories of aid. The administrative cap requirement is built into the capitation rates on a prospective basis. The contracted actuary ensured that the amount of non-medical load built into the rates meets the administrative cap requirement. The UNMC amount built into the capitation rates will remain the same throughout the entire contract period. The contracted actuary developed the UNMC Supplemental PMPM by COA, COS, and Rating Region. MLTC Quality Performance Program and Performance Penalities are effective Year 1 and calculated annually on a 6 – 9 month lag for program end total. Attachment 26:“MLR and Risk Corridor Examples” contains an illustrative example of this scenario. Please see Section IV.P.9.d-e.

			start date, calculated annually on a six month lag, for program in total) 5) State Performance Penalties (effective in contract year one, with metrics provided before year two, calculated annually 6) Administrative Cap (begins on contract start date?, calculated annually on a nine month lag, for program in total) 7) UNMC Supplemental Payments (begins on contract start date? calculated into the capitation rate on a quarterly basis, separate payments by category of aid and region) In particular, please ensure that these examples illuminate the answers to the questions in parentheses and demonstrate all of the calculations that would result in each of the following situations: 1) MCOs rebate to the state under the MLR, 2) MCOs deposit into the reinvestment accounts under	

			the risk corridor and the MLTC quality program 3) MCOs receive money back from the state under the risk corridor"	
222.	Attachment 15	Attachment 15 and page xiii	Attachment 15, Medical Loss Ratio Requirements, defines Net Qualified Medical Expense (the numerator in the MLR calculation) as follows: the sum of: a. Claims incurred b. Claims incurred but not paid, plus provisions for adverse deviation and loss adjustment expense c. Medical incentive bonuses d. Reinsurance premiums less reinsurance recoveries e. Activities that improve health care quality, per 45 CFR 158.150 f. Less related-party medical margin Whereas, page xiii defines Medical Loss Ratio as: The percentage of qualifying revenue (for the risk corridor and MLR calculations) spent on covered services for	Confirmed. Item 4 under the MLR Calculation section of Attachment 15 defines “allowable QI expenses”.

			members and allowable QI expenses under this contract. For purposes of the MLR calculation, are "allowable QI expenses"" those as defined in the definition of Net Qualified Medical Expense in Attachment 15?"	
223.	Attachment 15	All	Please provide numerical examples of how related party medical margin is to be included in the calculation of Net Qualified Medical Expenses.	If a related party subcontractor was paid premiums of $100 by the MCO and had expenses of $75, an amount of $25 would be deducted from the Net Qualified Medical Expense calculation.
224.	Attachment 15	All	Please provide numerical examples of how affiliate/related party underwriting losses/gains on reinsurance are to be included in the calculation of Net Qualified Medical Expenses, which is defined in Attachment 15 as follows: the sum of: a. Claims incurred b. Claims incurred but not paid, plus provisions for adverse deviation and loss adjustment expense c. Medical incentive bonuses d. Reinsurance premiums less reinsurance recoveries	Yes, these examples are correct.

			e. Activities that improve health care quality, per 45 CFR 158.150 f. Less related-party medical margin For example, if a related party reinsurer was paid reinsurance premiums of $100 by the MCO and had incurred reinsurance underwriting losses of $120 paid to the MCO, would losses of $20 be included as a subtraction in item d. in the calculation above, then added back for positive $20 in item f., since under this scenario the related party reinsurer had an underwriting loss of $20? Conversely, if a related party reinsurer was paid reinsurance premiums of $100 by the MCO and had incurred reinsurance underwriting losses of $75 paid to the MCO, presumably an amount of $25 would be added in item d. of the calculation and an amount of $25 would be deducted in item f. of the calculation. Is this correct?"	

225.	Glossary of Terms	xiv	Within the definition of Non-Quality Improvement Administrative Expenses (definition from glossary pasted below), as it relates to item 1., Direct Administration, please comment as to whether the use of the term ""medical management"" is for costs that do not meet the definition of activities that improve health care quality per 45 CFR 158.150. Said differently, please confirm that costs that meet the definition of improving health care quality per 45 CFR 158.150 are not included in the definition of ""direct administration"" as used in defining Non-Quality Improvement Administrative Expenses. Non-quality improvement (QI) administrative expenses: All non-benefit expenses of operating pursuant to the requirements of this contract, other than medical, prescription drugs, DME, and other benefits for the contract year. Non-benefit, administrative expenses	Costs that meet the definition of improving health care quality per 45 CFR 158.150 are not included in the definition of “direct administration”.

			include: 1. Direct administration: customer service, enrollment, medical management, claims administration, etc. 2. Indirect administration: accounting, actuarial, legal, human resources, etc. 3. Net cost of reinsurance: reinsurance premium less projected reinsurance recoveries. Net cost of related party reinsurance is excluded."	
226.	IV.P.12 and Attachment 15	147 & Attachment 15	Is the definition of "quality improvement" administrative costs that are allowed to be included up to 3% in the determination of the MCO's administrative cap the same definition as "activities that improve health care quality per 45 CFR 158.150" as those are included in the numerator in the calculation of the MLR? We recognize there is the 3% limit for the Administrative Cap and there is not a specified limit for purposes of the MLR; in this question we are inquiring as to the consistency of the definition (not extent) of the	See response to Question # 178.

			quality improvement costs.	
227.	IV. P.8-13 MCO Reimbursement	145	"Please provide an explanation as to why there is different treatment of the MLTC Quality Performance hold-back within each of the following calculations: 1) Minimum MLR (earned holdback not factored into the calculation) 2) Risk Corridor (earned holdback not factored into the calculation) 3) Administrative Cap (earned and forfeited holdback is factored into the calculation) For example, by ""is factored in"" do you mean that these amounts are added back in to the calculation for the Administrative Cap? Similarly, is forfeited holdback factored into the calculation of Minimum MLR and Risk Corridor? Also, please explain how the State Performance Penalties are factored into each of the above calculations."	The MLTC Quality Performance hold-back is not factored into the risk corridor or the Minimum MLR. The MLTC Quality Performance hold-back is factored in to the Administrative Cap. It is required to be factored in to the administrative cap so that if an MCO earns the entire hold-back they will remain beneath the administrative caps required by statute. The State Performance Penalty is included in the minimum MLR, risk corridor, and the Administrative Cap.

228.	IV P.9. Risk Corridor	146	The numerator (profit or loss) in the calculation of the risk corridor is defined, but the denominator is not. Please include a description of the revenue to be included in the denominator of this calculation.	See response to Question #33.
229.	IV P.9. Risk Corridor	146	Please provide a definition of the term "Total allowed administration calculated for the administrative cap" as used in the definition of the risk corridor: does this reflect the full allowance for administration, or the portion of that allowance used by a specific MCO?	“Total allowed administration” as used in the calculation of the risk corridor reflects the portion of allowance used by a specific MCO.
230.	IV. P 10 and 11 MLTC Quality Performance Program and State Performance Penalties	146	In terms of the actuarial certification, are both the MLTC Quality Performance hold-back and State performance penalties considered withholds?	In terms of the actuarial certification, only the MLTC Quality Performance hold-back is considered a withhold.
231.	IV. P 10 and 11 MLTC Quality Performance Program and State Performance Penalties	146	What percentage of the MLTC Quality Performance hold-back does Optumas assume will be earned back (as part of the actuarial certification)?	The contracted actuary has not conducted this analysis for the Heritage Health program.
232.	IV. P 10 and 11 MLTC Quality Performance Program and State	146	What percentage of the State Performance Penalty does Optumas assumed will be	The contracted actuary has not conducted this analysis for the Heritage Health program.

	Performance Penalties		earned (as part of the actuarial certification) - especially given the metrics are not yet available?	
233.	IV. P 11 State Performance Penalties	147	In this section it is stated that this program is effective beginning on the contract start date. However, performance metrics will be provided to MCOs prior to year two of the contract. Can this information be provided earlier in order to allow MCOs to manage to and report on performance relative to these metrics during the first contract year?	As Heritage Health is a new program, the State will use operational and quality reporting required in the first year of the program, including but not limited to measurements found in Attachments 7 and 14, to establish minimum performance metrics for year two of the contract that will be subject to the minimum performance metric penalty required in Neb. Rev. Stat. §71-831.
234.	IV. Q. 3. Provider Reimbursement	149	What assumptions were built into the rates to account for the requirement to pay enhanced payments in accordance with section 1202 of the Affordable Care Act?	The current managed care entities reimburse providers consistent with the requirements of section 1202 of the Affordable Care Act. The rates are built using encounter data from current managed care entities, so the enhanced payment levels commensurate with section 1202 are fully inherent in the base data.
235.	IV. Q. 8. c. Payments to Out-of-Network Providers	149	Please provide additional information regarding out of network providers that can be paid at 90% of the Medicaid rate - are there any provider types excluded from this provision?	IHS provider types are excluded from this requirement set for in the RFP.
236.	IV. Q. Provider Reimbursement	149	Are there any other special reimbursement requirements beyond what is documented	The MCO may negotiate rates with its network providers, except as otherwise provided for in the RFP.

			in this section? For example, are MCOs allowed to contract with providers at values below the Medicaid Fee Schedule?	
237.	IV. Q. Provider Reimbursement	149	What assumptions were built into the rates regarding provider reimbursement requirements and experience under managed care and/or fee for service?	The Heritage Health capitation rates are based on the reimbursement levels underlying the managed care encounter data for services currently provided via managed care and FFS reimbursement levels for services currently provided via FFS.
238.	IV. Q. Provider Reimbursement	149	Where any specific assumptions built into the initial rates to account for the requirement that MCOs enter into value-based purchasing agreements with providers?	No assumptions were built into the initial rates to account for value-based purchasing agreements.
239.	IV. Q. Provider Reimbursement	149	What assumptions were built into the rates to take into account access to care requirements?	No assumptions were built into the rates to take into account access to care requirements. The base data consists of FFS data and data from the current managed care entities. All of these organizations are able to meet access to care requirements, so the data was considered sufficient to account for access requirements.
240.	IV. Q. 10. Critical Access Hospital Contracting and Reimbursement	152	"Please clarify each of the following with regard to Critical Access Hospitals: 1) What assumptions are built into the rates? 2) What protections exist if MCOs experience utilization at these facilities different than that assumed in the rates?	Rates are built using the payments made by current managed care entities to critical access hospitals. This includes both claim payments and supplemental payments made outside of the claims system. Currently no protections exist. Currently, the State does not allow for a settlement process and this is currently under review.

			3) Will the State consider a settlement process with MCOs to ensure that there is no variation in payment between MCOs based on differing utilization of Critical Access Hospitals?"	
241.	IV. Q. 11. University of Nebraska Medical Center (UNMC) Physician/Practitioner Payments	152	"Please clarify each of the following with regard to the UNMC supplemental payments: a) please describe the process of developing the amount to be paid to each provider eligible for these supplemental payments b) please describe the assumptions for the development of the amount built into the rates on a quarterly basis to account for these payments"	To develop the UNMC rate the contracted actuary receives a list of UNMC Provider IDs from the State as well as the current managed care entities. These lists are used to identify claims and services attributed to a UNMC provider. The State also provided the most recent UNMC fee schedules, which were used to calculate the difference between the UNMC fee schedule and the UNMC reimbursement inherent in (a) the FFS data for currently unmanaged populations, and (b) the MCO encounter data for populations currently enrolled in managed care. The difference between the adjusted reimbursement and the reimbursement reflected in the FFS and encounter data at current utilization levels is the amount paid as a supplemental rate to UNMC. The UNMC PMPM amount is provided in Attachment 11. Additionally, UNMC services are concentrated in professional service categories. Lab and Radiology, PCP, EPSDT, Specialist, and Other Practitioner represent 96% of the UNMC utilization. UNMC services are concentrated in Rating Region1; Rating Region 2 has about half as many services provided by UNMC. Statewide, UNMC utilization represents about 3.5% of Lab and Radiology services, about 0.5% of PCP and Other Practitioner utilization, and less than 0.5% of the other service categories.
242.	IV. Q. 11. University of Nebraska Medical Center (UNMC) Physician/Practitioner	152	Since the UNMC amounts built into the rates are estimates, there is the potential for the actual payout	The process outlined in the RFP is the methodology currently approved by CMS so there is not an intention to implement a reconciliation process.

	Payments		to be more or less, which puts the MCOs at risk. If this is intended to be a true pass though (i.e., every dollar received is paid out to providers or paid back to the State)?, there needs to be a reconciliation process so there are not winners and losers. Does DHHS intend to implement a reconciliation process?	
243.	IV. Q. 9. Reimbursement to FQHCs and RHCs	152	"Please provide the following for FQHCs and RHCs: a) a listing of FQHCs and RHCs and the current encounter rates by region b) What payment methodology is embedded in the base data (e.g. encounter rates vs. rates per service)? c) what adjustments were made to the base data to include these provider types in the final rates(e.g., payment methodology changes)? d) please clarify that MCOs pay FHQC and RHC providers similar to other PCPs, clinics, etc."	See Attachments 27 and 28: "FQHC-2015-Rates and "Rural Health Clinic Rates Effective 07012015" respectively. The base data prior to adjustment contains reimbursement at each FQHC's PPS rate. FQHCs receive the PPS rate for each patient encounter. These rates are traditionally been updated annually; however, effective January 2016, the State is moving to a re-based APM payment. To account for the impact the reimbursement change will have on the Heritage Health capitation rates, the contracted actuary identified all FQHC utilization in the base data and priced it at the new APM rate. The pricing was done separately for the FY14 and FY15 base data sets, and the resulting impact was blended together consistent with the overall rate development. MCOs are expected to pay FQHC and RHC providers at the designated per visit rate.
244.	IV. T. 4. Encounter	177	Will historical data be	Historical pharmacy data will be provided to MCOs upon member assignment.

	Data		provided to MCOs upon member assignment, to assist with care management and other operational requirements?	
245.	IV.Z. Claims Broker Services	192	"A description of the annual calculation of the per claim administrative fee is described in this section. Please provide: a) additional detail regarding the timing of the payment of this fee. b) an estimate or an actual value for the initial amount of this fee upon program implementation. c) Please provide an estimate of the volume of claims that would be expected to be processed by the claims broker MCO."	This information will be provided to the awarded contractor during the implementation timeframe outlined in Section IV.Z.3.
246.	V. Proposal Instructions	196	This section states that "Content requirements for the Technical and Cost Proposal are presented separately in the following subdivisions; format and order" however no additional information is provided regarding a cost proposal. Please provide any additional information regarding any cost proposal	No additional cost proposal information is required.

			information that bidders should provide.	
247.	Attachment 1	All	Please provide a breakout of the members shown in this exhibit into those that would be expected to be covered by the contract, and those who would remain covered under fee for service.	As nearly all Medicaid eligible individuals will be included in Heritage Health, the State does not currently have an exact figure by county for the number of individuals that will continue to receive core benefits and services through the fee-for-service program. This information will be posted to the procurement website as part of the second round of questions and answers.
248.	Attachment 11	All	Please break out the Non-Medical Load (NML) shown in the Optumas Pre-Bidders Conference presentation into the relevant components for each category of aid and each region.	See Response to Question #112.
249.	Attachment 11	All	Please describe the process used to arrive at the varying NML components by category of aid and region, considering both the PMPM values and the percentages.	See Attachment 21: “Non-Medical Load Assumptions”. NML is based on the experience of current Managed Care Entities.
250.	Attachment 11	All	Please confirm that the values shown in this exhibit represent the lower bound of the actuarially sound rate range.	Confirmed.
251.	Attachment 11	All	It was stated that these rates are the lower bound of the range. Has DHHS historically paid the low end of the rate range? If no, at what point in the range have the MCO	MLTC has historically paid the physical health managed care rates at the mid-point range. The behavioral health rates have been variable.

			capitation rates been set?	
252.	Attachment 11	All	Please provide the high and low end range of each assumption and adjustments used to create the high and low end rates.	The rates that have been discussed during the bidder's conference reference the lower bound, thus all assumptions that were shown in the power point reflect the lower bound assumption values. The ranges around the assumptions will not be shared.
253.	Attachment 11	All	It was stated that these rates are the lower bound of the range. When the rates are updated for retroactive eligibility and other changes, is it DHHS' intention to pay at the low end of the range?	While it has not been historical practice for MLTC to pay at the lowest end of the rate range, a final decision will be made in the context of the Department's budget.
254.	Attachment 11	All	"Are the rates shown in this exhibit net or gross of each of the following: a) MLTC hold-back (1.5%) b) State Performance Penalties (0.25%)"	The rates shown in the "Medical PMPM" columns of Attachment 11 are gross MLTC hold-back (1.5%) and net State Performance Penalties (0.25%). The rates shown in the "Developed Rate" and "Total Rate" columns of Attachment 11 are gross MLTC hold-back (1.5%) and gross State Performance Penalties (0.25%). The State Performance Penalties is considered a component of non-medical load and is added in along with other administrative funding.
255.	Attachment 13	All	Based on the wording of this Statute, it appears that these requirements apply to "at-risk managed care service delivery for behavioral health services." Please confirm that this statue applies to the anticipated contract, which covers service delivery for behavioral health and physical health services.	Confirmed.

256.	Attachment 13	All	Each of sections IV.P.10, 11, 12, 14, and attachment 15 which is referenced by section IV.P.13 make a reference to this attachment, but section IV.P.9 does not. Please confirm that section IV.P.9 was written in accordance with paragraph (2) of this attachment, and that this is the only section of the scope of work written to conform to the requirements in this paragraph.	Section IV.P.9 is written in accordance with paragraph two (2) of Attachment 15.
257.	Attachment 13, 15 and IV.P.9 - 14	All	"The concept of revenue for the MCO and related parties is addressed multiple times in multiple calculations. The language is similar but not always consistent in each of these sections. Please define what is meant by this language, providing any instances in which the definition would be different between calculations. For example, the definition of Risk Corridor Calculation on page xvi states that the calculation ignores any forfeited hold-back, and the definition of Qualifying	See response to Question #33.

			Revenue (for the risk corridor calculation) per page xv states that any earned hold-back is not factored into the calculation. If a MCO had $150 of holdback and it was determined the MCO earned $100 of the holdback through the QPP, how much of the $150 holdback is included in the calculation/definition of Qualifying Revenue for the risk corridor? "	
258.	Attachment 15	All	"Please define the term ""Risk Bearing Partners."" In particular, a) please clarify whether providers with whom an MCO has a value-based contract as described in section IV.Q.6 (p. 150) would be included in this definition b) please clarify whether providers with whom an MCO has a contract including an physician incentive plan as described in section IV.Q.6 (p. 150) would be included in this definition"	Providers with whom an MCO has a value-based contract or providers with whom an MCO has a contract including a physician incentive plan as described in Section IV.Q.6 would be included in this definition.
259.	Attachments 10-11	All	Please provide a detailed development of the copayment assumption built into the rates, including the	Allowed copayment amounts are specified at 471 NAC 3-008. Copayments are collected at the discretion of the MCO, but the capitation rates are developed in accordance with 42 CFR 447.56(d). This adjustment is a 0.02% reduction in the total PMPM in each Rating Region.

			actual amounts collected historically by MCOs and by the state under fee for service during the base period, and any adjustments made to arrive at the expected amounts to be collected by MCOs under the contract	
260.	Attachments 10-11	All	At the bidders' conference, it was stated that only FY2015 experience was used to develop the Foster Care rates because PRTF experience in FY2014 was much higher than FY2015. Please explain the reason for the decrease. Was there a policy change?	The current managed care entity described the variance in utilization for PRTF as a decrease in requests for PRTF. It was assumed that the utilization levels inherent in the FY2015 data was more indicative of future utilization patterns.
261.	Attachments 10-11	All	"Regarding the base data: a) Please discuss any issues or concerns related to data collection. b) Does the data book capture all expenses that will be the MCOs' responsibility, even those paid outside of the claims system? c) Please confirm that encounter data represents actual reimbursements by MCOs and were not repriced to 100% of a fee schedule? d) Please provide average	There are no concerns about data collection. Data sources are comprised of FFS data and MCO encounters. Current MCOs are involved in validating the encounter data. The results of this validation confirm that encounter data is not underreported. All payments are captured. Supplemental payments such as CAH settlements and PCP shared risk agreements are added in to the base data. Encounter data represents actual reimbursements by MCOs were not re-priced to 100% of a fee schedule. The level of detail requested in part d of the question is not available.

			payment rates (reflected in the data book) relative to the fee schedule by region, category of aid, and category of service."	
262.	Attachments 10-11	All	"Can the databook be further split by: a) to separate populations and services under managed care versus fee for service during the base period? b) separate out all base data and assumptions for pharmacy by generic, specialty and brand c) by hospital type (e.g., critical access hospital, out-of-state, etc.)? d) drug utilization and unit cost for HEP-C treatments, e) ASD-related benefits."	No populations were under FFS for their Behavioral Health services. Physical Health services were provided under FFS for the following populations: AABD 21+ M&F-WWC; LTSS (Institutional) – Dual; LTSS (Institutional) - Non-Dual; LTSS (Home and Community Based) – Dual; LTSS (Home and Community Based) - Non-Dual; Dual. Pharmacy services were provided via FFS for all populations. This level of detail is contained in the base data books that are attachments to the RFP. This level of detail is not available for part b of the question. The impact of ASD related benefits is itemized in the Pre-Proposal presentation provided by the contracted actuary. Please submit further detail for c and d during the second round of questions.
263.	Attachments 10-11	All	Please provide the IBNP assumptions by region, category of aid, category of service and data type (FFS versus managed care).	See the Attachment 25: "IBNR Assumptions by Source". IBNR factors are shown on a statewide basis because payment patterns do not materially differ between rating regions.
264.	Attachments 10-11	All	Please provide a detailed development of the dispensing fee assumption built into the rates, including	Non-independent pharmacies were assumed to have a $2.50 dispensing fee and independent pharmacies were assumed to have a $4.45 dispensing fee. The independent pharmacy dispensing fee is the State FFS dispensing fee set for independent pharmacies. The $2.50 non-independent pharmacy dispensing fee

			the dispensing fee amounts reflected (classified into independents and non-independents as appropriate) in the base period, and any adjustments made to arrive at the dispensing fee amounts expected under the contract.	is based on discussions with the state and research of other states.
265.	Attachments 10-11	All	"Please provide a narrative describing how the underlying cost data and delivery counts are collected and adjusted in the development of the supplemental delivery payment and the capitation rate for all related categories of aid in order to account for each of the following: 1) limitations on payment (i.e. due to stillbirth or missing inpatient claims) 2) adjustments for maternity time periods that do not fall completely within the base period extended, to ensure that all costs associated with the deliveries shown on that exhibit were included, regardless of when the care was delivered. For example, please confirm that a delivery that occurred a month after the beginning of the experience period or a month	A qualifying delivery procedure code must be found on an encounter in order for the maternity experience to be captured in the rates. Currently the State does not pay a supplemental payment for stillbirths, so those expenses are not in the supplemental payment and remain in the regular monthly capitation rate. When a qualifying delivery event is found in the data, the contracted actuary captures all other expenses for that member in the five months prior to delivery date and the two months post-delivery. All of these expenses are re-categorized from the member's original aid category to the Maternity aid category. The maternity cell separately captures maternity-related services for all populations, dating back 5 months from the date of delivery (5 months prenatal) and going forward 2 months after the delivery (2 months post-partum). Prenatal costs for delivery occurring within the first five months of the base data period, and postpartum costs for deliveries occurring within two months of the end of the base data period could be understated in the base data. As a result, an adjustment has been made to reflect the missing prenatal and postpartum services for deliveries occurring on the left and right tails of the base data. The contracted actuary reviewed the average per-member-per-delivery costs for delivery events occurring between December 2013 and April 2015 (step one) and compared these costs with the per-member-per-delivery costs for deliveries occurring July-November 2013 and May-June 2012 (step two). The differential between the deliveries identified in step one and step two was used to adjust costs observed in step two. The overall impact of this is an upward adjustment to the

			before the end of the experience period would have been removed from both the counts and the claims. Additionally, please provide a breakout of the base data for the maternity supplemental payment using categories of service that reflect the specifics of this payment. In particular, it would be helpful to have the costs split into physician, facility, prenatal, postpartum, and delivery costs, for example."	Maternity cell of 1.8%. Maternity experience split by service type can be found in Attachment 10-A and Attachment 10-B by viewing the Maternity aid category. Please note that for this aid category member months are actually deliveries, as the denominator for the supplemental payment is a delivery event, not a covered month. Physician, facility, prenatal, postpartum, and delivery costs can not be independently itemized.
266.	Attachments 10-11	All	Please confirm that the values shown in the MM's column of the maternity exhibit are actually meant to represent deliveries	Confirmed.
267.	Attachments 10-11	All	Please describe how third party liability/ coordination of benefits are reflected in the data and rates.	Capitation rates are net of any third party payments or member share of cost.
268.	Attachments 10-11	All	Please describe the eligibility conditions for the Katie Beckett 00-18 M&F rate cell.	Medicaid eligibility for children whose parental income in disregarded due to the determination that the child meets hospital level of care. This includes families with a child or children under 18 years old who have one or more of the following: • A ventilator to breathe • A tracheostomy • Need for complex nursing services to be provided at home • Use excessive amounts of medical supplies, equipment,

				and/or therapies
269.	Attachments 10-11	All	All of the values are identical in each of 10-A and 10-B for the Katie Beckett 00-18 M&F Rate cell. Please confirm that this is a statewide rate cell and the counts represent a statewide count.	Confirmed.
270.	Attachments 10-11	All	"Summary detail was provided during the Pre-Proposal conference regarding at least 7 policy changes. However, these changes were grouped into 5 impacts, for which only summary information was shown. Please provide each of the following, with detail down to the level of region, fee for service versus managed care, category of service, unit cost and utilization impact, fiscal year, and any other breakout necessary to understand the change: a) a narrative describing each of the policy changes, including the effective date and the development of the impact of each item, describing each of the data, assumptions and methods used to calculate the impact.	Please see Attachment 22: "Heritage Health Rate Development Narrative". This question appears to be applicable to the Immediate Enrollment adjustment and the Behavioral Health copay adjustment. Immediate enrollment was effective February 2014, so they are inherent in 17 months of the base data and absent from seven months. Beginning January 2014, the State implemented a $2.00 copay for certain Behavioral Health services. The January 2014-June 2015 base data already reflected the copay implementation, so only the September-December 2013 Behavioral Health encounters were adjusted to reflect the copay policy change. The only adjustments included to get the data on a comparable basis as show in the attachments were IBNR, Subcapitation Payments, and Supplemental Payments. IBNR is detailed in Attachment 25: “IBNR Assumptions by Source”. Across both FY14 and FY15 Supplemental Payments are worth $11.2 million on a statewide basis and Subcapitation Expenses are worth $13.8 million on a statewide basis. Subcapitation represents predominantly Vision subcapitated agreements, while Supplemental Payments represents non-claims payments, such as CAH settlements. The value of all adjustments applied to get from Attachments 10-A--10-D is in the "NE Heritage Health Bidder's Conference Rate Presentation (Optumas).” Additionally, see Attachment 20: “COA-level Rate Development”, to see the application of rate adjustment values.

			b) the impact of the policy change further broken out (beyond the breakouts listed above) into 1) how much of the impact of the policy change is already reflected in the base data 2) how much of the impact of the policy change was included as an adjustment to the base data in order to get all of the base data on a comparable basis, as shown in attachments 10-A - 10-D 3) how much of the impact of the policy change was included as an adjustment after the summary of the base data shown in attachments 10-A - 10-D was complete, and before final rates were developed as shown in attachment 11"	
271.	Attachments 10-11	All	"The trends used to develop these rates were shown in the Pre-Proposal Conference Rate Presentation by COA and separately by COS. a) Please confirm that the trend rates shown are per year trends, and, if so, please	Trend rates shown are annual trend rates. Trends are developed and applied by category of service and category of aid. This allows for each detailed trend rate to be compounded for the necessary amount of time depending on the data source. "COS and COA Trends" contains the trends by category of service and major category of aid.

			describe the process of calculating a single trend rate for a category of aid for which different components of the total PMPM are trended for different time periods. b) Please provide these assumptions at the level of detail used in the rate development (i.e., break these trends out by both of these dimensions at one time)."	
272.	Attachments 10-11	All	Please clarify any adjustments made to the pharmacy costs shown in the data book and rates. Specifically, have the expenses been reduced for both federal and supplemental rebates?	The pharmacy amounts in the data book and rates have not been reduced for rebates.
273.	Attachments 10-11	All	Please provide the values of the pharmacy rebates separated by federal and supplemental and by fiscal year, region, and rate cell.	Pharmacy rebates are not included in the capitation rate development. Therefore, this level of detail is not available.
274.	Attachments 10-11	All	Please confirm that there is no premium or provider taxes.	The contracted actuary did not build in premium or provider taxes into the capitation rates.
275.	Attachments 10-11	All	Please provide membership projections by rate cell for CY17 and any later time periods available.	This level of detail is not available.

276.	Attachments 10-11	All	Please provide the definition of units for each category of service shown in the data book.	See Attachment 29: "Unit Definitions for Category of Service".
277.	Attachments 10-11	All	Please clarify whether or not GME expenditures are reflected in the base data or rates. If so, please provide these values separately.	GME expenditures are not included in the base data or the rates.
278.	RFP Section IV.Z	191	Regarding the Procurement of FFS Claims Management and Processing services, can the State share how it will evaluate which MCO will be awarded this business and what the award criteria will be?	See the Evaluation Criteria by clicking on the link below: http://das.nebraska.gov/materiel/purchasing/5151/5151.html
279.	RFP Section IV.S.10	169	Does the State have documentation that it could make available to bidders on the Encounter Submission process? For example: should we assume that the HIPAA 837 I&P Companion Guides on the Nebraska Medicaid website are not only for Provider submissions for FFS Medicaid - but are also for MCO's to submit encounter data? In addition, does the State have any information it could share on the format of ancillary	The 837 I&P Companion Guides on the Nebraska Medicaid website are for both- Provider submissions of claims and for MCO submissions of encounters. The MCO receives the 999 File Acknowledgement, and 277 Claims Acknowledgement Transactions. A Month-To-Date Summary Report is also sent to the MCOs.

			encounter submission file formats (e.g. error files returned from the State, acknowledgement files, provider file submissions)?	
280.	Attachment 7	1	There is an asterisk on page 1 of Attachment 7 next to Comprehensive Diabetes Care: Hemoglobin A1c (HbA1c) Poor Control (>9.0%) (HPC); however there is no explanation of the asterisk. Can the state provide clarification?	The State is hereby amending to remove the astrick on page 1 of Attachment 7.
281.	Attachment 7	2	There is an asterisk on page 2 of Attachment 7 next to Child and Adolescent Major Depressive Disorder, Suicide Risk Assessment (SRA); however there is no explanation of the asterisk. Can the state provide clarification?	The State is hereby amending to remove the astrick on page 2 of Attachment 7.
282.	Attachment 14	n/a	Is the calculation for Claims Processing Timeliness and Pharmacy Claims Processing Timeliness business days or calendar days?	See section IV.S.3.
283.	Summary of bidder's corporate experience	197	The RFP language states that the State will use no more than 3 narrative project descriptions submitted by the bidder during its evaluation of	See the response to Question #44.

			the proposal. For entities that have more than 3 project descriptions to provide, would the State prefer that bidders provide only 3 or all applicable experience?	
284.	Attachment 19	17	Question 97, regarding value-based purchasing, asks bidders to provide evidence of effective use in Nebraska or other markets. Medicaid membership tends to be more medically-complex than Commercial membership. To allow for a more accurate comparison, for evaluation purposes, would the State consider that evidence be limited to only Medicaid experience? Alternatively, would the State consider weighing Medicaid experience differently than commercial?	A bidder should include in its response to Question # 97 a description of the MCO's approach to implementing a value-based purchasing model with Medicaid membership. In its presentation of evidence of effective use in Nebraska or other markets, a bidder should identify whether the applicable membership was Medicaid or commercial.
285.	RFP Section F. Member Services and Education, part 4, Item d	70	The SOW says “The MCO must distribute member materials to each new member within 30 calendar days of enrollment. One of these documents must describe the MCO’s website, the materials that the members can find on the website and how to obtain	See response to Question #144.

			written materials if the member does not have access to the website." On page 80, Item b.1 it says "The MCO must send a welcome packet to new members within ten business days of receiving the new member file." Please clarify the difference between new member materials and the welcome packet?	
286.	II. Procurement Procedures, H.	4	Does the State want extra copies in addition to the one (1) original?	No, the State is only requesting one (1) original of the entire proposal response.
287.	II. Procurement Procedures, H.	4	Is there a specification for font size and style?	See response to Question #56.
288.	II. Procurement Procedures, H.	4	What are the margin and spacing requirements for the final proposal?	There are no such requirements.
289.	II. Procurement Procedures, O.	6	The RFP indicates only top scoring bidders may receive reference checks. Will the bidder be required to supply reference contact information? If so, where should bidder include this information within RFP the response?	The Bidder may provide references within the proposal response. References may be in a separate identified tab within the proposal response.
290.	III. Terms and Conditions, F. 3. a & c	10	Section a. states MCOs must file all contracts of reinsurance or a summary of the plan of self-insurance,	If the MCO chooses to self-insure, the maintenance of reinsurance agreements will not apply.

			however section c. states the MCO must maintain reinsurance agreements throughout the contract period including any extension(s) or renewal(s). If the MCO chooses to self-insure, how do the requirements of 3. c. apply to a self-insured MCO?	
291.	IV. Project Description and Scope of Work, D. 3. j.	51	With respect to "additional staffing requirements," are all prior authorization, concurrent review, and member services staff required to physically work in Nebraska? Which specific care management staff are required to work in Nebraska?	Per Section IV.D.3.j. all additional required staff in Section IV.D.3 must be located in the State with the exception of claims and encounter processing staff and certain care management staff.
292.	F. Member Services and Education, 11.	77-79	Is there currently a Nebraska requirement for all providers to utilize a consistent electronic medical records (EMR) program to aid MCOs in easily obtaining records?	There is no requirement for providers to utilize a consistent electronic medical record program. A provider may select a vendor, if the provider opts to install an electronic medical record in their practice.
293.	F. Member Services and Education, 13. c. iii.	81	What defines an "attempt to contact the member"? Do mailings count in this requirement for 3 attempts?	Attempts may include written correspondence sent via the US Postal Service or documented telephone calls.
294.	F. Member Services and Education, 13. c. iii.	81	The second part of iii. states that if the member has lost or never received a welcome	This is acceptable.

			packet that the MCO must resend it. If the welcome packet was returned to the MCO due to an invalid address and the member is unable to reach, is it acceptable not to resend the packet to the invalid address as long as the member is added to the monthly unable to reach report sent to MLTC?	
295.	M. Quality Management, 1. c.	118	How is "sufficient number of qualified personnel" defined? Is there an expected ratio?	The Bidder should propose the number of qualified personnel to comply with all QM requirements in a timely manner.
296.	M. Quality Management, 4. a.	120	How many child (adult guardians) and adult Medicaid members are required to be in attendance at QAPIC meetings? Is it a specific ratio or percentage of total membership?	The Bidder should propose the number of family members/guardians of children or youth who are Medicaid members and adult Medicaid members to participate in the QAPIC.
297.	IV. Project Description and Scope of Work, P. 5.	144	Is there a separate billing process for Supplemental Delivery payments or is submission of the encounter data evidence of the delivery to generate payment?	See response to Question #99.
298.	IV. Project Description and Scope of Work, P. 7. b. iii	145	Please clarify the reimbursement of the HIPF to the MCO and timing of payments. Will the MCO receive a lump sum	An estimate of HIPF liability will be built prospectively into the capitation rate. After the final tax bill is paid the following year the State will calculate a settlement payment based on the difference between what was paid during CY2017 in the capitation rates and the actual HIPF amount.

			adjustment for reimbursement of HIPF payment?	
299.	IV. Project Description and Scope of Work, P.12. c.	148	If the MCO contracts with a TPA for administrative services at a percentage of revenue, what documentation is the MCO required to provide under section c.?	The MCO must provide documentation to enable the State to support any expenses provided on the quarterly financial report.
300.	IV. Project Description and Scope of Work, Q. 6. b.	150	Please provide details on how the percentage of the value based purchasing agreements will be calculated. Will all provider types be included in this calculation (i.e. practitioner, ancillary, hospital)?	See response to Question #103.
301.	Attachment 6: Reporting Requirements	9-10	The reporting requirements for the Audited Financial Statement and the Department of Insurance Financial Report is 30 calendar days following the 12th month of the contract year • The quarterly filings are not due until 45 calendar days following the end of a quarter • The filing checklist on the Nebraska Department of Insurance website	The deadline for the Audited Financial Statement is 30 calendar days following the 12th month of the contract year. The due date for the Department of Insurance Financial Report in Attachment 6 is hereby amended to read as follows: "June 1".

			shows due dates of 6/1 for audited financial statements, and 3 /1 for annual statement	
302.	Attachment 19: Proposal Statements and Questions, Question 106.	19	"Prioritized business functions for resumption of operations and responsible key personnel" We generally do not share the specific priority of functions nor key personnel at a named person level, rather, we speak to the process for prioritizing functions and reviewing key personnel lists. Would this be acceptable or does it need to be more specific?	This would be acceptable.
303.	Evaluation Criteria	N/A	Can the department please provide a more comprehensive scoring breakdown, specifically relating to scoring for staffing (i.e., will the MCO be evaluated on how many positions are filled at time of RFP submission, or will MCO be evaluated on proposed staffing plan meeting the RFP requirements?	In order to protect the integrity of the evaluation process, the factors that will be scored within the evaluation criteria will not be provided. See the Evaluation Criteria by clicking on the link below: http://das.nebraska.gov/materiel/purchasing/5151/5151.html
304.	RFP, Section IV.B.1.	RFP page 33	Could MLTC provide the file layout/format or data	The 834 transaction is sent to the MCOs to provide eligibility data along with proprietary supplemental and unborn files. Please see Attachment 30: "Supplemental Enrollment File" and

			dictionary of the Eligibility Data being supplied?	Attachment 31: "Unborn File".
305.	RFP, Section IV.I.17.vi.	RFP page 103 and RFP Attachment 5, page 7	Could MLTC elaborate on the specific provisional credentialing requirements for behavioral health providers?	Regulations applicable to licensure of mental health practitioners are available at 172 NAC 94. http://www.sos.ne.gov/rules-and-regs/regsearch/Rules/Health_and_Human_Services_System/Title-172/Chapter-094.pdf
306.	RFP Attachment 2, Access Standards, Geographic Access Standards, #4	RFP Attachment 2, page 2	Could MLTC clarify how the access standard will be measured? For example, will it be measured by the number of miles from the member's personal residence (no greater than X miles) or by the number of hours of travel time by car (no greater than X number of hours)?	Access standards are measured by the number of miles from the member's personal residence as set forth in Attachment 2.
307.	RFP Attachment 4	RFP Attachment 4	At what frequency will MCOs assess medical home providers for continued participation?	See Section IV.I.7.e.
308.	RFP Attachment 19, #45	RFP Attachment 19, page 8	Will MCOs be permitted to query the enrollment data to confirm the provider identification number in order to ensure that providers are enrolled in Medicaid and have a valid identification number?	MMIS will provide the MCOs a file (interface) with current provider information.
309.			It has come to my attention that the most recent Medicaid contractual information is not up to date with the law in	See response to Question #2.

			Nebraska. The antiquated language “”Primary care provider (PCP) A medical professional chosen by or assigned to the member to provide primary care services. Provider types that can be PCPs are doctors of medicine (MDs) or doctors of osteopathic medicine (Dos) from any of the following practice areas: general practice, family practice, internal medicine, pediatrics, and obstetrics/gynecology (OB/GYN). Advanced practice nurses (APNs) and physician assistants may also serve as PCPs when they are practicing under the supervision of a physician who also qualifies as a PCP under this contract and specialize in family practice, internal medicine, pediatrics or obstetrics/gynecology” would prohibit me from continuing to provide care for Medicaid patients in Nebraska as I no longer have a collaborating or supervising physician. This verbiage needs to change immediately to reflect the changed law in Nebraska.	

310.	Glossary of Terms	RFP page xv	"We request two points of clarification relating to the definitions of “Qualifying revenue (for the risk corridor calculation)” and “Qualifying revenue (for the administrative cap calculation)”. (1) Both definitions indicate that qualifying revenue is “[t]he aggregate of revenue earned by an MCO and related parties, including parent and subsidiary companies and risk bearing partners under this contract.” Please confirm that no amounts would be double-counted as revenue based on these definitions. For example, amounts received by MCO as premium and then paid to a related party in order to reimburse that related party for administrative costs would be counted as qualifying revenue only once. (2) Both definitions indicate that qualifying revenue ignores “federal and state	Points one and two are confirmed.

			premium taxes and non-operating income." Please confirm that this includes amounts paid to MCOs to reimburse them for the Health Insurance Providers Fee (see § IV(P)(7) on page 145)."	
311.	Glossary of Terms	RFP page xvi	Please confirm that in the definition of "Risk corridor calculation", the reference to "a contract" should be "this contract". Could the RFP be revised to reflect this?	The definition of "Risk corridor calculation" is hereby amended to read as follows: **Risk corridor calculation:** The computation of a MCO's profit or loss by MLTC's actuary, as a percentage of the aggregate of qualifying revenue for the MCO and related parties, including parent and subsidiary companies and risk-bearing parties under this contract. The calculation ignores revenue taxes, non-operating income, and any forfeited hold-back.
312.	Glossary of Terms	RFP page xvii	"We have two clarification requests related to the definition of "Subcontractor": (1) Please confirm that the reference in the first sentence of the definition to "a contract" should be "this contract". (2) Please confirm that a provider (such as a hospital) that credentials its own staff would not be considered a subcontractor based on such credentialing activities.	1.) See response to Question #311. 2.) Confirmed.

			Could the RFP be revised to reflect these clarifications?"	
313.	Glossary of Terms	RFP pages ix and xvi	"We are concerned that the definitions of “administrative expense rate” and “related-party administrative expense” could be interpreted to mean that actual administrative costs incurred by the MCO and paid to a related party would not be included in the calculation of the MCO’s administrative expense. Could the State revise the RFP clarify that administrative expenses actually incurred will be counted toward administrative expense even when paid to a related party? For example, these definitions could be revised: “Administrative expense rate: The percentage of qualifying revenue a MCO may spend on administrative expenses. Administrative expense rate equals the costs that were incurred in the contract year. In the event the MCO paid any amounts for administrative services to a related party, only those administrative costs actually incurred by the related party	The State is reviewing this question further. This information will be posted to the procurement website as part of the second round of questions and answers.

			in connection with the administration of this contract will be included in such costs." "Related-party administrative expense: Fees paid by a MCO, or any of its subsidiaries, to a related party such as a parent organization such as flat monthly administration fees. Such fees are not considered in the calculation of administrative expense under this contract. Related-party administrative expense does not include amounts paid to a related party for administrative costs actually incurred by the related party in connection with the administration of this contract." "	
314.	Glossary of Terms	xvii	The definition of specialty drug is somewhat restrictive. Can the MCO use its own list of specialty drugs to be dispensed through specialty pharmacies or can ONLY drugs that meet this definition be dispensed through specialty pharmacies?	See response to Question #75.
315.	RFP § II(H)	4	Are there any font or font size requirements applicable to	See the response to Question #56.

			the proposal responses?	
316.	RFP § III(F)(4)	10	"The RFP requires that the MCO maintain Errors and Omissions ("E&O") coverage at $10,000,000 per occurrence and Cyber Liability coverage at $10,000,000 each occurrence. Neither Managed Care E&O coverage nor Cyber Liability coverage is commercially available on an occurrence basis. In connection with another recent RFP, we surveyed 15 insurance carriers and E&O policies are only written on a claims-made basis. The markets stated it could not be changed. Please confirm the State will accept claims made policies for E&O coverage and Cyber Liability coverage. If necessary the MCO could agree to purchase tail coverage if the coverage is moved to a new carrier."	Yes, the State will accept the Cyber and E&O coverages on a claims made basis. The E&O coverage and Cyber Liability coverage is not commercially available on an occurrence basis therefore the claims made basis is acceptable.
317.	RFP § III(GG)	20	This section provides that "State will render payment to Contractor when the terms and conditions of the contract	Capitation rates will be paid prospectively.

			and specifications have been satisfactorily completed on the part of the Contractor as solely determined by the State." Medicaid MCOs are typically paid for services in advance of (or at the beginning of) the month for which the payment is made. Advance payment also seems to be contemplated by RFP § IV(P) generally. Please confirm that MCOs will be paid prospectively.	
318.	RFP § III(II)	21	Please confirm that the provisions of RFP § IV(P)(7), which relate to the reimbursement by the State of the Health Insurance Providers Fee, take precedence over the language of this section.	Confirmed.
319.	RFP § III(NN)	23	Could the State provide more details regarding the submission process related to proprietary information? The instructions state that 1 original proposal should be submitted and proprietary information should be included in a separate package. Does that mean that the original should be a redacted version with the	Either way is acceptable as long as the proprietary information is labeled and in a separate sealed envelope.

			proprietary information removed (and the redacted information provided in a separate envelope)? Or would the State rather receive one complete copy of the proposal and one redacted copy suitable for public posting?	
320.	RFP § IV(A)(1)	30-31	RFP numbering in this section jumps from 1 to 9….was anything omitted as a result?	The jump from IV.A.1 to IV.A.9 was inadvertent. No information was omitted.
321.	RFP § IV(B)(1)(c)	33	The RFP states that Medicaid and CHIP eligibility will be conducted annually. Continuous eligibility in CHIP is limited to six months by statute. Will the annual review amount to continuous eligibility or will reviews continue on a rolling basis if and when DHHS is alerted to a change in family circumstances that could affect eligibility?	Review will be annual unless MLTC is alerted of a change that may affect eligibility.
322.	RFP § IV(B)(3)(f)(iii)	34	This provision provides than an MCO will be removed from the auto assignment algorithm if it has 40% or more of statewide enrollment. In the event the State only awards two contracts, what threshold would be used?	In the event only two contracts are awarded, this provision will be revised to reflect 65% or more statewide enrollment.

323.	RFP § IV(C)(10)(a) and (b)	41-42	Will the State require the MCO to open an Insolvency Bank Account? If yes, how much is the minimum Insolvency amount required by the State? When is it required to be opened and funded?	This will not be required.
324.	RFP § IV(C)(10)(a) and (b)	41-42	Aside from the Insolvency Bank account (if any is required), will the State also require the MCO to open a separate Statutory Deposit Bank Account? If yes, how much is the required statutory deposit amount? When is it required to be opened and funded?	This will not be required.
325.	RFP § IV(C)(14)and RFP § IV(K)(2)	43 and 110	The first section referenced specifies "The MCO must submit all proposed subcontracts for the provision of any services under this RFP to MLTC for prior review and approval a minimum of 120 calendar days prior to their planned implementation." whereas the 2nd section referenced specifies "2. The MCO must submit all subcontracts for the provision of any services under this RFP to MLTC for prior review and approval a	The MCO must submit all subcontracts for the provision of any services under this RFP to MLTC for prior review and approval a minimum of 90 calendar days prior to their planned implementation.

			minimum of 90 calendar days prior to their planned implementation." Can MLTC confirm if the submission must be made at least 90 or 120 days?	
326.	RFP § IV(D)(3)(j)	51	Please clarify the requirement that "[a]ll additional required staff in this section must be located in the State with the exception of claims and encounter processing staff and certain care management staff." We have found that having a mix of in-State and out-of-State personnel is the best way to serve members. For example, we plan to have member services and provider services personnel based in Nebraska to provide in-person services to members and providers. However, we also maintain member and provider call centers elsewhere that also would be available to assist Nebraska members and providers. Likewise, we would have in-State at least one Nebraska-licensed registered nurse or physician's assistant on our prior authorization staff, as	See response to Question #291.

			required, and we would support the prior authorization function through centralized services elsewhere. Please confirm this type of structure is consistent with this requirement.	
327.	RFP § IV(E)(1)(d)	52	"We note that the requirement that services be rendered by providers enrolled as MLTC providers does not apply to emergency services pursuant to § IV(Q)(15) on page 153. Please confirm that this requirement would also not apply to the following services: • Urgent care services performed out of state; • Specialty services unavailable within the MCO's network (for example, a member is referred to a specialty center out of state); and • Value-added services."	Confirmed.
328.	RFP Glossary of terms and § IV(E)(11)(b) - (d)	58-60	Please provide additional clarification regarding the difference between the Contractor's formulary and the preferred drug list ("PDL"). We understand that	See response to Question #75.

			MCOs are required to follow Nebraska's PDL. However, the RFP contemplates a separate MCO formulary (see, in particular, § IV(E)(11)(b)(iv)(a)) which must be approved by MLTC. Does this mean that the MCO can cover more drugs than are on the Nebraska PDL? What types of differences between MCO formularies and the Nebraska PDL does MLTC anticipate?	
329.	RFP § IV(E)(11)(b)(ix)	59	This section states that MCOs are permitted to require prior authorizations under certain circumstances so long as the prescriber and the pharmacy are notified within 1 business day of approval or denial. Please confirm that MCOs are not required to contact the pharmacy with respect to retrospective DUR determinations.	The MCO is not required to contact the pharmacy if an auto-drug look back was performed and payment was denied due to lack of drug-utilization history.
330.	RFP §§ IV(H)(3)(a)(ii) and IV(N)(4)(b)	88 and 127	Section IV(H)(3)(a)(ii) states that "any decision to deny a service authorization request . . . must be made by a health professional who has appropriate clinical expertise in treating the member's	Regardless of reasoning for service authorization denials and limitations, all decisions must be made by a health professional who has appropriate clinical expertise in treating the member's condition or disease.

			condition or disease." Section IV(N)(4)(b) contains similar language. Please confirm that this requirement does not prevent non-clinical MCO personnel from issuing denials and limitations based on administrative criteria not related to medical necessity (for example, request is for an excluded product, request is outside terms of coverage, etc.)	
331.	RFP § IV(I)(4)(e)	96	"Please confirm the following with respect to the requirement that MCO's network include providers currently serving Medicaid members: • The requirement applies only to the MCO's initial network as of the contract start date; • MCO is not required to contract with any provider that does not pass credentialing; and • MCO is not required to contract with any provider that refuses to accept MCO's standard provider agreement applicable to such provider's type and/or specialty."	IV.I.4.e applies only to the MCO's initial network as of the contract start date. A MCO is not required to contract with providers who do not meet credentialing standards that have been approved by MLTC per Section IV.I.14. A MCO is not required to contract with any provider that refuses to accept the MCO's applicable provider agreement; however, all provider agreements must be in accordance with requirements in the RFP.

332.	RFP § IV(I)(4)(j)	96	When does MLTC anticipate making available to MCOs the list of Medicaid eligible providers?	A list of Medicaid-eligible providers will be posted on the procurement website as soon as it is available. This information will be posted to the procurement website as part of the second round of questions and answers.
333.	RFP § IV(I)(8)(e)	99	"This section provides that "[t]he MCO must not incorporate branding of any pharmacy onto member ID cards. However, § IV(F)(9)(h) expressly requires MCO to include on the ID card "[t]he name or identifying trademark of the MCO and the prescription benefit manager." However, in some cases an MCo's PBM might be affiliated with a national pharmacy chain. Given the potential conflict above, please confirm that: • An MCO may elect to include the PBM routing information (BIN/PCN/RxGroup) without including the PBM logo on the card; and/or • The prohibition in § IV(I)(8)(e) will not prohibit MCO from including its PBM	Retail pharmacy branding may not appear on a member ID card. The MCO's contracted PBM branding may appear on a member ID card, but not if it reflects affiliation with a retail pharmacy chain.

			information on the member ID card as contemplated by § IV(F)(9)(h) even if that logo includes pharmacy branding."	
334.	RFP § IV(L)(6)(h)	116	This provision requires that the MCO develop engagement tools to improve engagement with pregnant members and help identify high-risk pregnancies. This type of activity seems to be member education, not member marketing. See, e.g., the definition of "Marketing" in the Glossary of Terms and RFP § IV(G)(1)(b), which states that "[m]arketing is different than member education. Member education is defined as communication with a MCO member for the purpose of retaining the member as a member and improving his/her health status." Why would the activities contemplated in § IV(L)(6)(h) be included in the Marketing Plan? Shouldn't the MCO's plans for pregnant member engagement contemplated in § IV(L)(6)(h) be submitted separate from the Marketing Plan?	Bidders should not address IV.L.6.h in the Marketing Plan. Bidders should address IV.L.6.h in Attachment 19 - Question #35.
335.	RFP § IV(L)(6)(i)	117	Should this provision be	IV.L.6.i is hereby amended to IV.L.6.h.iii.

			numbered § IV(L)(6)(h)(iii)? If not, please clarify this requirement.	
336.	RFP § IV(O)(1)(j)	133	Please confirm that the minimum number of investigators is 1 per 100,000 members or less (as stated in § IV(D)(3)(i)) rather than 1 per 50,000 members or less as stated in this section.	See response to Question #95.
337.	RFP § IV(P)(7)	145	"Please clarify the timing on the HIPF payments in 7.b.iii. using the 2018 HIPF payment as an example. Is either of the following examples correct? Example 1 • An estimated HIPF amount will be included in the capitation rates paid during CY2017. • MCOs will pay the 2018 HIPF based on 2017 revenue in September 2018. • After the MCOs receive their final invoices in September 2018, MLTC will calculate a settlement payment for the difference between what was paid in CY2017 as an estimate and the final HIPF	See response to Question #298.

			amount plus gross up amount for taxes. - OR - Example 2 • MCOs will pay the 2018 HIPF based on 2017 revenue in September 2018. • The State will recalculate the capitation rates payable to the MCO for the balance of CY2018 to include an estimated amount to reimburse the MCO for the 2018 HIPF fee plus an amount for the tax gross-up • After December 31, 2018, MLTC will calculate a settlement payment for the difference between the additional HIPF-related amount paid in capitation rates for the last few months of 2018 and the actual HIPF amount plus gross up amount for taxes."	
338.	RFP § IV(P)(10)	146	Why is the 1.5% MLTC Quality Performance Program amount not explicitly built into the premium capitation rates?	The 1.5% MLTC Quality Performance Program is considered a withhold and is not additional money added to the administrative load component of the rate development.

339.	RFP § IV(P)(10)	146	This section references Attachment 13 - Neb. Rev. Stat. 71-831. Neb. Rev. Stat. 71-831 reads that the requirements outlined in Attachment 13 apply to "at-risk managed care service delivery for behavioral health services". Does this mean that the 1.5% applies only to the behavioral health portion of the premium capitation rate?	The 1.5% MLTC Quality Performance Program applies to the aggregate premium capitation rate.
340.	RFP § IV(P)(10) and (11)	146 and 147	Please explain the interaction between the MLTC Quality Performance Program and the State Performance Penalties. Is the State Performance Penalties a subset of the MLTC Quality Performance Program?	State performance penalties are not a subset of the MLTC Quality Performance Program. Quality Performance Program measures (applicable to the Quality Performance Program) are identified separately from minimum performance metrics (applicable to the State performance penalties).
341.	RFP § IV(P)(10) and (11)	146 and 147	Are the MLTC Quality Performance Program and the State Performance Penalties amounts of 1.5% and 0.25% respectively excluded from revenue in the calculation of the 3% profit risk corridor?	See response to Question #33.
342.	RFP § IV(P)(11)(d)	147	Please confirm that the modifications contemplated by this provision would only occur prior to the year in	Confirmed.

			which the performance metrics would be effective and that no modifications would be made during any year in which the modified metrics would be effective.	
343.	RFP § IV(Q)(3)	149	The enhanced payment under § 1202 of the Affordable Care Act applied to provider payments in 2013 and 2014. Would the State consider deleting this provision to avoid confusion?	The State has elected to continue enhanced payments for primary care services beyond the federal mandate.
344.	RFP § IV(Q)(6)	150	For the purpose of calculating the percentage of providers on a value-based purchasing contract, how does MLTC define provider? Will there be any effort to weight the VBP requirement by membership to ensure that a large enough percentage of members are being seen by providers in a VBP contract?	Provider is defined in the glossary of the RFP. The VBP requirement does not consider weighting by membership.
345.	RFP § IV(Q)(10)	152	Can MCOs and CAHs agree to other settlement terms, such as building any settlement due to or from a CAH into rates going forward?	Any alternative arrangement agreed upon by the MCO and CAH must be in compliance with 471 NAC 10-010.03F.
346.	RFP § IV(Q)(11)	152	With regard to the UNMC supplemental payments, please clarify the final	Amounts built into the capitation rates will not change every quarter as a result of the UNMC supplemental payment.

			sentence: "These payments are calculated into the capitation rate on a quarterly basis." Does this mean the amounts built into the capitation rates will change every quarter?	
347.	RFP § IV(Q)(11)	152	How will MCOs be required to pay the UNMC provider pass-through? Will the MCOs pay each month the per rate cell pass-through amount in the rate multiplied by the members in each rate cell?	471 NAC 18-006.02, Supplemental Payment, describes how supplemental payment amounts are determined. The MCO will make supplemental payments to UNMC related to this contract provision on a quarterly schedule.
348.	RFP § IV(Q)(16) and Optumas Presentation at Bidder's Conference	153	What percent of pharmacies are independent pharmacies and what percent of pharmacy costs are incurred at independent pharmacies?	See response to Question #37.
349.	RFP § IV(Q)(16) and Optumas Presentation at Bidder's Conference	153	What dispensing fee was assumed in the rate development for non-independent pharmacies?	Non-independent pharmacies were assumed to have a $2.50 dispensing fee.
350.	RFP § IV(Q)(16)(a)	153	With respect to pharmacy reimbursement, the RFP states the Dispensing Fee must be consistent with the current Medicaid FFS rate for independents. Are we correct to interpret that the MCOs can manage the national network ingredient cost for all	The current Medicaid FFS rate for independent pharmacies must be provided for the duration of the contract. MCOs may manage and negotiate the network ingredient costs but must provide the dispensing fee in addition to this reimbursement for independent pharmacies, unless an alternative reimbursement arrangement is otherwise agreed to by the pharmacy.

			pharmacy providers (e.g. AWP discount, MAC), as long as the dispensing fee requirement to mirror FFS dispensing fees is in place for independents for 6 month as required?	
351.	RFP § IV(Q)(16)(a)	153	The MCO's dispensing fee reimbursement must be, at a minimum, the current Medicaid FFS rate for independent pharmacies (defined as those with ownership of six (6) or fewer pharmacies), unless otherwise agreed between the MCO and the pharmacy provider. Does this mean that if a pharmacy has accepted alternate rates to participate in a national network we can use that network and those rates? What is the current FFS dispensing fee?	A MCO may not require a pharmacy to agree to rates already established in a separate contract. The MCO must obtain a new agreement, or addendum to existing agreement, from a participating Nebraska Medicaid Pharmacy Provider prior to the start of services under this RFP even if that pharmacy has an existing relationship with that MCO (IV.I.8.b.). The current dispensing fee is $4.45, but is subject to change
352.	RFP § IV(Q)(16)(a)	153	The MCO must calculate dispensing fees, administration fees, and any other fee payment amounts as approved by MLTC. The MCO must maintain in each paid claim record which methodology was used to determine final payment amounts, i.e. state maximum	The MCO must calculate dispensing fees, administration fees, and any other fee payment amounts as approved by MLTC. The MCO must maintain in each paid claim record which methodology was used to determine final payment amounts, with methodologies limited to state maximum allowable cost, national average drug acquisition cost, or the submitted usual and customary charge.

			allowable cost, national average drug acquisition cost, or the submitted usual and customary charge. Are these examples of particular pricing methodologies, or intended to be the only types allowed? Will AWP discount networks be allowed?	
353.	RFP § IV(Q)(17)(c)	153	There is a requirement that the MAC must be available and searchable on the MCO website. There is also a requirement to post the provider manual. Can these requirements be satisfied through the PBMs secure provider portal as MAC/network management is a delegated function of the PBM?	This is acceptable.
354.	RFP § IV(S)(17)	176	"Does Nebraska Medicaid always pick up the patient responsibility"" or are there situations in which Medicaid would not pay the patient responsibility such as Medicare payment exceeds Medicaid amount? If Medicare pays less than the Medicaid amount and the patient responsibility amount	Applicable regulations are available at 471 NAC 3-004.04-05. Medicaid pays the deductible and coinsurance for Medicare-covered services. The amount received from Medicare for Medicare-covered services and other TPR and/or Medicaid for deductible and/or coinsurance shall not exceed Medicare allowable amount. Medicaid payment is the lower of the provider's usual and customary charge or the Medicaid allowable less all third party payment. When a claim is submitted to Medicaid with a payment from a third party resource, the provider is considered paid in full when payment from the third parties and/or Medicaid equals or exceeds the Medicaid allowable amount. The provider may only

			is less than the difference between the primary payment and Medicaid allowed amount, it the patient responsibility amount paid? Are there any situations in which the secondary payment would exceed the patient responsibility e.g. always paying up to the FQHC encounter/PPS rate?" "	bill the client for a Medicaid non-covered service, or Medicaid copayment fees, where applicable, or if the client has received payment from the TPR.
355.	RFP § IV(T)(2)	177	"We have two questions associated with this provision: (1) Is there a particular form or format MLTC wishes MCOs to use when submitting the disclosures under 42 CFR 455.100 – 455.106? In particular, we note that § IV(T)(1)(b) states that the "State will not review a deliverable unless the format and content has been approved in advance." (2) Please confirm that this disclosure may be submitted confidentially and will not be posted publicly. The	Disclosures may be submitted confidentially and will not be posted publicly. Section IV.T.2 is hereby amended as follows: "Federal laws require full disclosure of ownership, management, and control of Medicaid MCOs (42 CFR 455.100-455.106). The MCO must disclose to MLTC this information at contract award, annually thereafter for each contract year, and within 30 calendar days of any change in the MCO's management, ownership or control."

			disclosures required by 42 CFR 455.100 – 455.106 include Social Security Numbers and dates of birth."	
356.	RFP § V(A)(2)(b)	196	"We have two requests for clarification regarding this section: (1) This requirement states that bidders must provide three years of financial statements. Please confirm that, where the bidder is a newly-formed subsidiary of a publicly traded company, three years of financial statements for the publicly-traded parent company will fulfill this requirement. (2) If publicly held, the bidder is required to provide a letter from ""the fiscally responsible representative of the bidder's financial or banking organization"". Please confirm that a bank reference from a bank officer would satisfy this requirement."	"(1) A newly-formed subsidiary of a publicly traded company that has fewer than three years of independently audited financial statements available should provide such statements it does have available and three years such statements for the parent company. (2) The purpose of this requirement is for the State to obtain contact information for the fiscally responsible representative of the bidder's financial or banking organization, not a receive a "letter". Please comply with Section V.A.2.b as written.
357.	RFP § V	196-198	"Please provide additional details regarding the order in which proposal elements	The sections should be included as separate identified tabs within the bidder's proposal response. There is no such requirement for the order of sections.

			should be provided. RFP § II(N) and RFP § V indicate that the following elements should be in the order indicated: • Request for Proposal Form • Section III (Terms and Conditions) • Corporate Overview • Technical Approach (responses to Proposal Statements and Questions in Attachment 19) However, we note that none of RFP § II(N), RFP § V nor Attachment 19 give instructions for the submission of the following documents, each of which is required to be submitted with the proposal: • Form A (Bidder Contact Sheet) (RFP § § II(H), page 4, and III(X), page 16) • Certification of authorization to transact business in the State of Nebraska (RFP § II(P), page 6) • Certificate of insurance coverage (RFP § III(F)(5),	

			page 10) • Proposed deviations from the RFP, if any (RFP § III(R), page 14) • U.S. Citizenship Attestation Form (for individuals and sole proprietorships) (RFP § III(AAA), page 27) • Ownership and control disclosure (RFP § IV(T)(2), page 177) "	
358.	RFP § V(A)(3)	198	Can the MCOs provide supplemental attachments to support the technical approach above and beyond those outlined as required in Attachment 5 and Attachment 19?	See the response to Question #172.
359.	Attachment 15	1	"We request two points of clarification relating to the definition of “Qualifying revenue for the MLR calculation”. (1) Paragraph 3 indicates that qualifying revenue is “[t]he aggregate of revenue earned by an MCO and related parties, including parent and subsidiary companies and risk bearing partners under	See response to Question #310.

			this contract." Please confirm that no amounts would be double-counted as revenue based on this definition. For example, amounts received by MCO as premium and then paid to a related party in order to reimburse that related party for administrative costs would be counted as qualifying revenue only once. (2) Paragraph 3 indicates that qualifying revenue ignores "federal and state premium taxes and non-operating income." Please confirm that this includes amounts paid to MCOs to reimburse them for the Health Insurance Providers Fee (see § IV(P)(7) on page 145)."	
360.	Attachment 15	1	For the purposes of calculating the MLR as described in Attachment 15, is the amount of payback of any profit in excess of 3% added to the numerator in the calculation? That is, does the definition of net qualified medical expense include dollars paid back to the state for profits exceeding 3%?	The MLR reconciliation will be calculated first, and any recoupments/paybacks will be factored into the 3% risk corridor calculation.

			Likewise, if the MCO receives a payment from the state because losses were greater than 3%, is that amount excluded from the numerator in the calculation?	
361.	Attachment 19	5	Question 31 Member Services Are the examples of information that will be available on the website and on portals for members included in the page count?	See response to Question #124.
362.	Attachment 19	5	Question 35 Member Services. The question asks us to "Attach examples" of member education material used with Medicaid or CHIP populations. Are these attachments included in the 10 page count?	See response to Question #125
363.	Attachment 19	5	Question 36, Please confirm that the 3 page limit to this response does not include the required flowcharts.	See response to Question #126.
364.	Attachment 19	8	Question 47, Provider Services: Are the requested sample provider outreach methods included in the 4 page count?	Example provider outreach methods will not be counted in the page limit. See response to Question # 119.
365.	Attachment 19	11	Question 59, This question requires that the bidder submit its proposed template for the health risk	See response to Question #127.

			assessment. Please confirm that this template would not be included in the page limits for this question.	
366.	B Eligibility for Enrollment (4)(a)(i) 7 Disenrollment , C (i)(a) 12 Audit Requirement (18) Moral or Religious Objections Glossary	p. 34 p. 37 p. 42 ix to xviii	If the MC) is not to discriminate on the basis of "religious beliefs" enrollment and provider claims should not be denied for "moral or religious beliefs", or "moral or religious objections" or "moral or religious grounds" or similar formulations and noting "moral" does not appear in the glossary, should not all such language be eliminated from the RFP?	IV.B.4.a.i fulfills federal regulatory requirement 42 CFR 438.6(d) regarding prohibitions against enrollment discrimination. IV.C.i.a fulfills federal regulatory requirement 42 CFR 438.56(d)(2) regarding member disenrollment. IV.C.18 fulfills federal regulatory requirements 1932(b)(3)(B)(i) and 42 CFR 438.102(a)(2) regarding MCO responsibility when it has a moral or religious objection to providing a covered benefit or service.
367.	7 Disenrollment, C (i) (e)	p. 37	If the member may initiate disenrollment for cause under (e) "other reasons including but not limited to poor quality of care or lack of access to providers experienced in dealing with the member's health care needs", should this not these particular requests become, with sanctions a data point analyzed quarterly or otherwise tracked because quality of care and access to experienced providers are the core purpose of this RFP and subsequent contract.	Cause for disenrollment is a federal requirement addressed in CFR 438.56, Disenrollment: Requirements and limitations. MLTC will monitor contracts and apply Liquidated Damages and Intermediate Sanction when contract requirements are not met.

368.	Terms and Conditions S Slip law copy LB605 Sec. 108(2)(a) 4. (c)(ii)	p. 14 p. 48-49 p. 35	Is it not true that LB605 Section 108 (2)(a) "Medical assistance under the medical assistance program shall be suspended rather than cancelled or terminated for a person who is an inmate of a public institution"…. and incarceration is not a cause for disenrollment.	See Addendum 3 – Revisions to the RFP.
369.	Terms and Conditions S 4. (c)(i)(ii)	p. 14 p. 35	Should not "involuntary commitment" be removed as a cause for disenrollment when persons whose disenrollment has not been suspended and who are not in a public institution?	See Addendum 3 – Revisions to the RFP.
370.	Heritage Health Heritage Health	Slide 14, item 3 Slide 19, item 4	If the MCO is to adhere to these program goals and principles of care would not it follow that the 10 components of Recovery below, (commentary included for context), be included as an amendment? NATIONAL CONSENSUS STATEMENT ON MENTAL HEALTH RECOVERY (contd)	Section IV.L.3. addresses the requirements the MCOs must follow for recovery-based care which include the nationally recognized ten components of recovery.

			BACKGROUND Recovery is cited, within Transforming Mental Health Care in America, Federal Action Agenda: First Steps, as the “single most important goal” for the mental health service delivery system. To clearly define recovery, the Substance Abuse and Mental Health Services Administration within the U.S. Department of Health and Human Services and the Interagency Committee on Disability Research in partnership with six other Federal agencies convened the National Consensus Conference on Mental Health Recovery and Mental Health Systems Transformation on December 16-17, 2004. Over 110 expert panelists participated, including mental health consumers, family members, providers, advocates, researchers, academicians, managed care representatives, accreditation organization representatives, State and local public officials, and others. A series of technical papers and	

			reports were commissioned that examined topics such as recovery across the lifespan, definitions of recovery, recovery in cultural contexts, the intersection of mental health and addictions recovery, and the application of recovery at individual, family, community, provider, organizational, and systems levels. The following consensus statement was derived from expert panelist deliberations on the findings. Mental health recovery is a journey of healing and transformation enabling a person with a mental health problem to live a meaningful life in a community of his or her choice while striving to achieve his or her full potential. “THE 10 FUNDAMENTAL COMPONENTS OF RECOVERY • Self-Direction: Consumers lead, control, exercise choice over, and determine their own	

			path of recovery by optimizing autonomy, independence, and control of resources to achieve a self-determined life. By definition, the recovery process must be self-directed by the individual, who defines his or her own life goals and designs a unique path towards those goals. • Individualized and Person-Centered: There are multiple pathways to recovery based on an individual's unique strengths and resiliencies as well as his or her needs, preferences, experiences (including past trauma), and cultural background in all of its diverse representations. Individuals also identify recovery as being an ongoing journey and an end result as well as an overall paradigm for achieving wellness and optimal mental health. • Empowerment: Consumers have the authority to choose from a range of options and to participate in all decisions—including the allocation of resources—that	

			will affect their lives, and are educated and supported in so doing. They have the ability to join with other consumers to collectively and effectively speak for themselves about their needs, wants, desires, and aspirations. Through empowerment, an individual gains control of his or her own destiny and influences the organizational and societal structures in his or her life. • Holistic: Recovery encompasses an individual's whole life, including mind, body, spirit, and community. Recovery embraces all aspects of life, including housing, employment, education, mental health and healthcare treatment and services, complementary and naturalistic services, addictions treatment, spirituality, creativity, social networks, community participation, and family supports as determined by the person. Families, providers, organizations, systems, communities, and	

			society play crucial roles in creating and maintaining meaningful opportunities for consumer access to these supports. • Non-Linear: Recovery is not a step-by-step process but one based on continual growth, occasional setbacks, and learning from experience. Recovery begins with an initial stage of awareness in which a person recognizes that positive change is possible. This awareness enables the consumer to move on to fully engage in the work of recovery. • Strengths-Based: Recovery focuses on valuing and building on the multiple capacities, resiliencies, talents, coping abilities, and inherent worth of individuals. By building on these strengths, consumers leave stymied life roles behind and engage in new life roles (e.g., partner, caregiver, friend, student, or employee). The process of recovery moves forward through interaction with others in supportive,	

			trust-based relationships. • Peer Support: Mutual support—including the sharing of experiential knowledge and skills and social learning—plays an invaluable role in recovery. Consumers encourage and engage other consumers in recovery and provide each other with a sense of belonging, supportive relationships, valued roles, and community. • Respect: Community, systems, and societal acceptance and appreciation of consumers—including protecting their rights and eliminating discrimination and stigma—are crucial in achieving recovery. Self-acceptance and regaining belief in one's self are particularly vital. Respect ensures the inclusion and full participation of consumers in all aspects of their lives. • Responsibility: Consumers have a personal responsibility	

			for their own self-care and journeys of recovery. Taking steps towards their goals may require great courage. Consumers must strive to understand and give meaning to their experiences and identify coping strategies and healing processes to promote their own wellness. • Hope: Recovery provides the essential and motivating message of a better future—that people can and do overcome the barriers and obstacles that confront them. Hope is internalized; but can be fostered by peers, families, friends, providers, and others. Hope is the catalyst of the recovery process. Mental health recovery not only benefits individuals with mental health disabilities by focusing on their abilities to live, work, learn, and fully participate in our society, but also enriches the texture of American community life. America reaps the benefits of the contributions individuals with mental disabilities can make,	

			ultimately becoming a stronger and healthier Nation." The National Consensus Statement on Mental Health Recovery was funded by the U.S. Department of Health and Human Services, Substance Abuse and Mental Health Services Administration, Center for Mental Health Services.	
371.			Definition of Primary-care provider (PCP): ....Advanced practice nurses (APNs)...may also serve as PCPs when they are practicing under the supervision of a physician who also qualifies as a PCP under this contract and specialize in family practice, internal medicine, pediatrics or obstetrics/gynecology. Comments: --Earlier this year, LB 107 removed all statutory requirements for physician supervision of nurse practitioners (NPs) in	See response to Question #2.

			Nebraska. As written, it would seem that the preceding definition is no longer consistent with changes in the law that became effective September 1, 2015. --There is no statutory definition for Advanced Practice Nurses in Nebraska. Nurse practitioners are one of four groups of Advanced Practice Registered Nurses (APRNs) which also include Certified Nurse Midwives (CNMs), Certified Registered Nurse Anesthetists (CRNAs) and Clinical Nurse Specialists (CNSs). --In this definition, it appears that it is intended that both NPs and CNMs qualify as PCPs. Nurse midwives have different statutory requirements for physician oversight of practice. It may be appropriately stated that practice for NPs and CNMs as PCPs must be consistent with requirements for state licensure and statutory provisions within each profession's Practice Act. --Nurse practitioners must be	

			certified in specialty practice to obtain licensure. Those individuals practicing in primary care may be certified in adult, family, pediatric or women's health specialties.	
372.			Primary care services: All health care services and laboratory services customarily furnished by or through a general practitioner, family physician, internal medicine physician, obstetrician/gynecologist, or pediatrician, to the extent the furnishing of those services is legally authorized in the State in which the practitioner furnishes them. Comments: --As written, this definition excludes health care and laboratory services provided by advanced practice nursing providers, i.e., NPs and CNMs who qualify as primary care providers (PCPs) in the preceding section.	See response to Question #2.
373.			Provider requirements for a PCMH. Comments:	See response to Question #2.

			--As written, is it the intention to exclude NPs? This seems an oversight, considering 1. The removal of requirements for physician supervision that occurred with LB 107; 2. Nurse practitioners provide a significant portion of primary care services to rural and underserved populations in the state; and, 3. There is evidence to support NPs as PCMH providers, as well as health care providers with outcomes that meet or exceed those of physicians for equivalent services.	
374.	II. Procurement Procedures, H. Submission of Proposals	2	Please provide instructions on how to include any attachments we'd like to add to support our responses to questions in Attachment 19.	Attachments should be included within the applicable section or as separate identified tab(s) within the bidder's proposal response.
375.	IV. Project Description and Scope of Work O. Program Integrity 13. Monthly Reporting to MLTC iii	139	There appears to be a portion of this requirement missing for iii. Please confirm if this is to remain blank.	MLTC confirms that the requirement for iii. is to remain blank.
376.			Should not Medicaid Rehabilitation Option (MRO) be used liberally for individuals with functional and	The State is not mandating the use of a specific set of criteria for use of the Medicaid Rehabilitation Option.

			neurocognitive deficits, generally diagnosed with severe mental illness (SMI) or severe and persistent mental illness (SPMI), who need rehabilitative assistance with such daily living tasks as household management, communication, finances, transportation and comprehension/planning who need rehabilitation services, (e.g. skills training) and other rehabilitation services through MCO?	
377.	B 4 (c) (a)(i)	p. 34	Why should “disability” not be included in the definition of “MCO must not discriminate”…, as ‘disability” is the norm in non-discrimination clauses and should be included as a matter of equity and with reference to the federal law, Americans with Disabilities Act, ADA?	IV.B.4.a.i fulfills federal regulatory requirement 42 CFR 438.6(d) regarding prohibitions against enrollment discrimination. The prohibition against discrimination on the basis of health history, health status, and need for health care services is inclusive of members with disabilities.
378.	B 4 (c) (a)(i) B 2 (c)	p. 34 p. 33	Will all materials, e.g. member guidebook, plan matrix, provider directory and any program or other materials be made available in alternative formats and publicized in a way that members who need	Yes. The State will address this via the contracted enrollment broker. This is outside the scope of this RFP. However, the enrollment broker services RFP will be bid out at a later date.

			alternative formats know these materials are available and accessible to them?	
379.	Glossary	p. ix	If “advance directives” are used, are they part of an education and publicity program so that individuals are aware of them, create them correctly and include specific behavioral health and medical issues and are individualized for personal needs, such as a pet needing to be fed, flowers watered, etc., recognize that this is a legal document to be stored in a safe place, are assisted in notifying and leaving a copy with all their providers, and are offered whatever assistance the individual needs to have the Advance Directive honored in its entirety, is this available within the scope of this process?	Please see Section IV.F.12 of the RFP.
380.			Will there be an “Ask a Nurse” by whatever name but retaining the function, be created and available cost-free, and publicized to the members within the scope of this process?	See Section IV.F.2 Member Services Call Center.

381.			LB107 was passed and made into law in 2015, eliminating the need for Nurse Practitioners to be supervised by a Physician, yet the definition of Primary Care Provider (PCP) in the RFP references that old system: "Primary care provider (PCP) : A medical professional chosen by or assigned to the member to provide primary care services. Provider types that can be PCPs are doctors of medicine (MDs) or doctors of osteopathic medicine (DOs) from any of the following practice areas: general practice, family practice, internal medicine, pediatrics, and obstetrics/gynecology (OB/GYN). Advanced practice nurses (APNs) and physician assistants may also serve as PCPs when they are practicing under the supervision of a physician who also qualifies as a PCP under this contract and specialize in family practice, internal medicine, pediatrics or obstetrics/gynecology." Additionally, on the	See response to Question #2.

			requirements for the Primary Care Mental Health (PCMH) practice – am I reading it correctly that in order for a practice to qualify, that it must include a physician? Again, NPs in Nebraska can now practice without physician supervision as per LB 107 and are providing significant portions of primary care services particularly in the rural areas of our state. There is substantial research supporting NPs as PCMH providers. I am hopeful this is an oversight in the proposed RFP and that NPs are included in the PCMH definitions.	
382			I wanted to know if Non-Emergency Transportation (NEMT) was going to be included in this procurement, or if it was going to be procured separately.	Please see response to Question #82.

This addendum will become part of the proposal and should be acknowledged with the Request for Proposal.

Byron L. Diamond

RE: Addendum for Request for Proposal Number 5151Z1
to be opened December 22, 2015 at 2:00 p.m. Central Time

Questions and Answers

Following are the questions submitted and answers provided for the above mentioned Request for Proposal. The questions and answers are to be considered as part of the Request for Proposal. It is the Bidder's responsibility to check the State Purchasing Bureau website for all addenda or amendments.

Due to the high volume of the questions, the state is providing the rsponses to questions 1 – 220 at this time. The State will provide responses for the remaining questions at a later date.

Question Number	RFP Section Reference	RFP Page Number	Question	State Response
1.			Our organization is most certainly equipped to do the full-risk physical health managed care program, but we would partner for behavioral and pharmacy. Would this arrangement be acceptable to you?	While the RFP does not prohibit sub-contracting, it does require that MCOs deliver an integrated approach to service delivery and care management.
2.			We have been reviewing the RFP for Medicaid, and it would be very helpful if we could have clarification on the definition of PCMH and also on which provider types can be primary care providers. With the passage of LB 107, NPs no longer have collaborative or supervisory agreements with physicians. So under this definition, NPs would not qualify. NPs offer a great opportunity for patient centered medical homes and also to be defined as a covered primary care provider under Medicaid, which increases the access for this vulnerable population. "Primary care provider (PCP)A medical professional chosen by or assigned to the	See Addendum 3 – Revisions to the RFP.

			member to provide primary care services. Provider types that can be PCPs are doctors of medicine (MDs) or doctors of osteopathic medicine (DOs) from any of the following practice areas: general practice, family practice, internal medicine, pediatrics, and obstetrics/gynecology (OB/GYN).Advanced practice nurses (APNs) and physician assistants may also serve as PCPs when they are practicing under the supervision of a physician who also qualifies as a PCP under this contract and specialize in family practice, internal medicine, pediatrics or obstetrics/gynecology"	
3.			LB 107 was passed into law the last legislative session whereby Nurse Practitioners (NPs) in Nebraska no longer need physician supervision. The law became effective September 1st of this year. If you could explain the inclusion of NP supervision in the RFP (see below) it would be appreciated. It appears that LB 107 would render this	See response to Question #2.

			definition inconsistent with NP practice law: "Primary care provider (PCP) A medical professional chosen by or assigned to the member to provide primary care services. Provider types that can be PCPs are doctors of medicine (MDs) or doctors of osteopathic medicine (DOs) from any of the following practice areas: general practice, family practice, internal medicine, pediatrics, and obstetrics/gynecology (OB/GYN). Advanced practice nurses (APNs) and physician assistants may also serve as PCPs when they are practicing under the supervision of a physician who also qualifies as a PCP under this contract and specialize in family practice, internal medicine, pediatrics or obstetrics/gynecology" Additionally, on the requirements for the PCMH practice – am I reading it correctly that in order for a practice to qualify, that it must include a physician? Again, NPs in Nebraska can now practice without physician	

			supervision as per LB 107 and are providing significant portions of primary care services particularly in the rural areas of our state. There is research supporting NPs as PCMH providers. I am hopeful this is an oversight in the proposed RFP and that NPs are included in the PCMH definitions.	
4.	Section II(H), Submission of Proposals; Section III(NN) Proprietary Information	p. 4; p. 23	Please confirm that the State will await the outcome of any objections, legal challenges, or litigation in connection with a FOIA request to obtain proprietary, confidential, or trade secret information submitted in accordance with the instructions in this section before releasing it.	The State will not contact the bidder before responding to a FOIA request. The State will withhold the appropriately identified copywritten materials and proprietary information as identified by the bidder.
5.	Section II(H), Submission of Proposals; Section III(NN), Proprietary Information	p. 4; p. 23	Please confirm that proprietary or confidential information submitted in accordance with the instructions in Section III of the RFP will not be posted for public viewing even if the State disagrees with a bidder's assertion that the information is protected as confidential, proprietary, or a trade secret.	Appropriately identified copywritten materials and proprietary information will not be posted for public viewing. See the response to Question #4. Per Section III, NN Proprietary Information, “Bidders may not mark their entire Request for Proposal as proprietary.”
6.	Section II(H), Submission of	p. 4; p. 23	Please confirm that "non" should be inserted before the	The following language is hereby amended as follows: IMPORTANT NOTICE: Pursuant to Neb. Rev. Stat. §84-602.02,

	Proposals; Section III(NN), Proprietary Information		word "confidential" so that this statement should read as follows: "The language above should read "All non-proprietary or non-confidential information as defined by Law WILL BE POSTED FOR PUBLIC VIEWING."	all State contracts in effect as of January 1, 2014 will be posted to a public website beginning July 1, 2014. All non-proprietary or non-confidential information as defined by Law WILL BE POSTED FOR PUBLIC VIEWING.
7.	Section III(E), Ownership of Information and Data	8-9	Some Contractors may have license agreements with other companies for the use of certain proprietary computer software programs. Please confirm that the State of Nebraska will not require Contractor or any subcontractor to violate any aspect of license agreements or other contracts they may have with other companies for the use of certain proprietary computer software programs or make any modification to the proprietary software included in such license agreements or other contracts.	This section requires the Contractor to either own the license or obtain a license to utilize the software or other copywritten material the Contractor intends to use to perform under the contract. Any costs associated with license(s) will be the responsibility of the Contractor.
8.	Section III(E), Ownership of Information and Data	pp. 8-9	Please confirm that the State of Nebraska will not publish, duplicate, use, or disclose a Contractor's confidential, proprietary, or trade secret information without giving the	Subject to State law and the posting of contracts, it is the responsibility of the bidder to properly identify proprietary information as defined by the Nebraska State Statutes. See the response to Question #5.

			Contractor advance notice of its intention to do so and awaiting the outcome of any objection, legal challenge, or litigation that may occur as a result of the Contractor defending its position regarding the confidential and proprietary nature of the information to any appropriate State agency, Court of competent jurisdiction, or in any other appropriate venue.	
9.	Section III(E), Ownership of Information and Data	8-9	Please confirm that the intention of the State is not to have the unlimited right to publish, duplicate, use, and disclose Contractor's intellectual property, confidential, and proprietary information, including, but not limited to, inventions, patents, copyrights, trademarks, trade secrets, trade names, operating systems, policies, proprietary aspects of computer systems, proprietary computer software programs, proprietary software computer system design documents or other system documentation, and coding.	See response to Question #8.

10.	Section III(CC), Administration-Contract Termination; Section III(NN), Proprietary Information	19	Please confirm that the deliverables and/or data and documentation contained in the proposal that shall become the property of the State under either of these provisions do not include intellectual property, confidential, or proprietary information used or to be used in connection with work performed on this Contract, including, but not limited to, inventions, patents, copyrights, trademarks, trade secrets, trade names, operating systems, policies, proprietary aspects of computer systems, proprietary computer software programs, proprietary software computer system design documents or other system documentation, and coding and that upon completion or termination of the Contract, Contractor will be able to retain such information for use in connection with work on other current and future Medicaid contracts nationwide.	If a deliverable is created for the State as required by the contract, then the State owns the deliverable.
11.	III.EE.1 Performance Bond	19	Is the $50,000,000 performance for each region or statewide?	The performance bond is statewide per awarded Contractor.

12.	Section III(NN), Proprietary Information	23	If a particular page of a bidder's proposal or exhibit thereto contains proprietary information, but the page in its entirety is not proprietary, should the bidder redact the proprietary information and submit the remainder of the page with its proposal and then include an unredacted copy in a sealed envelope? If this is not the proper procedure, please explain what process bidders should use when submitting proprietary information included on a page that also contains non-proprietary information.	The bidder may submit the redacted version within the technical response and submit the proprietary information in a separate sealed envelope in accordance with Section III. NN Proprietary Information. See the response to Question #5.
13.	Section III(EEE), License/Service or Other Agreements Section V(A)(2)(j), Sub-Contractors Attachment 5	28-29; 198; Attachment 5, p. 2	Since Section V(A)(2)(j) does not require the bidder to submit subcontractor agreements with the subcontractor information to be submitted with the bid and since Attachment 5 states that subcontracts are to be submitted for review and approval 90 days prior to the contract start date, please confirm our understanding that the "service or other such agreements" that must be submitted with the bid under Section III(EEE) if bidders	Yes, Section III (EEE) does not include bidder agreements with subcontractors.

			wish the State to consider them do not include agreements with subcontractors for the performance of a service or function related to the fulfillment of an MCO's obligations under the contract and that therefore subcontract agreements are not subject to any of the requirements in Section III(EEE).	
14.	Section III(EEE), License/Service or Other Agreements; Section IV(I)(12)(b), Provider Outreach and Application Processing;	28-29; 100	Since Section IV(I)12)(b) addresses what must be submitted with the bid with respect to provider templates, please confirm that the "Service or other such agreements" that must be submitted with the bid if bidders want the State to consider them do not include provider agreements and that therefore provider agreements are not subject to the requirements of this provision.	Provider agreements are not subject to the provision set forth in Section III(EEE).
15.	Section III(EEE), License/Service or Other Agreements	7; 28-29	Please confirm that the State will not view the submission of all "license/service or other agreements" as proposed alterations to the Terms and Conditions but only those that actually conflict with or alter	Any terms and conditions, user agreement, or other document or clauses offered or purport to be included as a part of this RFP shall be subordinate to the original RFP. The Bidder shall specify which clauses the Bidder proposes to incorporate into the contract; documents will not be incorporated in their entirety unless the Bidder states the document is proposed in its entirety. For Bidder proposed clauses to be binding, the State

			the State's Terms and Conditions.	must acknowledge and accept the clause in writing.
16.	Section III(EEE), License/Service or Other Agreements	28-29	Since a reading of contract provisions is subjective and open to interpretation and since the State may view a provision in a license/service or other agreement as conflicting with or altering the State's Terms and Conditions, when the bidder did not intend to alter those terms at all, please confirm that if a bidder submits a "license/service or other agreement" with its bid that the State interprets as conflicting with or altering the State's Terms and Conditions, the State will notify the bidder and provide it with an opportunity to cure the alleged conflict or alteration before determining that the license/service or other agreement is a proposed alteration of the Terms and Conditions that may be cause for a rejection of the bidder's proposal.	Subject to the response in Question #15, the State will compare the terms offered by the bidder to the terms of the State.
17.	Section III(EEE), License/Service or Other Agreements	28-29	Please list examples of the types of "license/service or other such agreements" that must be submitted with the bid under this provision.	Examples may include a service level agreement, user agreements, license agreements and bidders supplemental conditions to the State's Terms and Conditions.

18.	IV.A.1.c Description of Current Program	30	Will these 40,000 individuals that are currently in BH managed care but not PH managed care be enrolled with an MCO starting on 1/1/17? What is the cost by category of service on a PMPM basis for this population in FY 14 and FY 15?	Yes, the individuals currently in BH managed care but not currently in PH managed care will be enrolled in an MCO on 1/1/17. These individuals are categorized in the LTSS (Institutional) – Dual, LTSS (Institutional) - Non-Dual, LTSS (Home and Community Based) – Dual, LTSS (Home and Community Based) - Non-Dual, and Dual aid categories. The FY14/FY15 combined expenditures by services category have been provided for these populations as Attachments 10-C and 10-D.
19.	IV.A.10.h Included Populations	32	How far back will retroactive enrollment be allowed? How will DHHS ensure that MCOs that receive a disproportionately higher percentage of these retroactive members are compensated appropriately?	Retroactive enrollment will be no earlier than the contract start date. The MCO will receive a capitation payment for each month of retroactive enrollment.
20.	IV.A.10.h Included Populations	32	Can DHHS add an indicator on the eligibility file that will designate whether a member is a regular enrollee, an immediate enrollee, or a retrospective enrollee? How were these three cohorts taken into account in rate development?	If the EBS or MMIS has access to this information, it can be added to the file. Current rates do not account for retroactive enrollment. Immediate enrollment is inherent in 17 months of the base data. The remaining 7 months are adjusted to account for immediate enrollment. The adjustment value was calculated by comparing the PMPM cost for members whom were in at least their second month of eligibility for the February to June 2014 time period to the PMPM cost for all members whom were eligible during that period. The difference between these two PMPM costs would estimate the impact of immediate enrollment for those members who had enrolled in the managed care program after the policy was implemented. Regular enrollees are fully inherent in the base data.
21.	IV.B.4.d. Eligibility and Enrollment (d)	35	Will all newborns be assigned to the same MCO for multiple births?	The Heritage Health Enrollment Broker will facilitate the assignment of multiple births to the same MCO for continuity of care.
22.	D.3. a. and b, 3. Additional Required	50	Are the MCOs permitted to use independently licensed	Yes.

	Staff		behavioral health practitioners to perform prior authorization and concurrent review?	
23.	IV.E.8.b. Rehabilitation services - iv.i)	57	Please provide the definition for Assertive community treatment (ACT) and Alt ACT.	See http://dhhs.ne.gov/medicaid/documents/act.pdf
24.	IV.E.11. Pharmacy Services - c. Nebraska Medicaid Preferred List	59	Can the timeframe be adjusted to 3 business days, by allowing the extension it would provide for adequate testing and quality processes.	Upon initial receipt of the file, an extension of three business days would be acceptable, but thereafter, the file must be uploaded in one business day.
25.	IV.F.13. Communication with New Members, b.ii.	80	Will the MLTC enrollment file list the "responsible party" for each new member? If not, can you explain what methods should be used to determine who is the "responsible party"	Yes, this information will be provided via the enrollment files.
26.	I. PROVIDER NETWORK REQUIREMENTS, 14. Provider Credentialing and Re-Credentialing	100	Currently the TAT for NE Medicaid is that of 45 days from the date of the receipt of a completed application thru Committee review/decision. For the expansion RFP for physical health, behavioral health and pharmacy, the state has a 30 calendar day TAT. Is the state willing to approve a 45 day TAT from receipt of a completed application to match what is currently in place for the NE Medicaid medical providers?	The 30 day TAT requirement will remain as written in the RFP.

27.	IV.L.4. Basic CM Services, e, viii	115	Does the state expect the MCOs to facilitate the development of group visits or help members participate in the existing group visits?	MCOs must facilitate the development of group visits for members assigned to high risk care management.
28.	IV.L.6.b Special Considerations for Pregnant Members	116	What is considered adequate? Is there a specific ratio the MCOs must adhere to?	There are no specific ratios that are required by the MCOs. Attachment 2 includes provider network access standards.
29.	IV.N.5. Service Authorization for Pharmacy Services	128	Please clarify what is meant in 5.a.iii by "Process Supporting Tables"	"Process supporting tables" references any proprietary table(s), resource table(s) or any other reference guide(s) used in the evaluation of the call center team for determining approval, denial or dose recommendations of medications.
30.	IV.P.2.i Capitation Rate Determination Process, i	143	What is the net rate increase comparing the current managed care rates to the RFP rates on an apples to apples benefit basis -- ignore pharmacy, behavioral health, and LTSS rate cells? What is the trend that was applied? How does this trend compare to the actual managed care trend experience from FY 2014 to FY 2015?	Growth rates for the current managed care rates in physical health from FY2014 to FY2015 are influenced by policy decisions such as immediate enrollment. This is expected to be a one-time impact, as such the assumed growth rates as indicated in the RFP and will commensurate with historical growth rates seen in the program.
31.	IV.P.4. Transplant Services	144	Will there be separate compensation for transplants? Case rate?	Costs associated with transplants are carved into the base data and are included in the capitation rates shown in Attachment 11. There will not be a separate case rates paid for transplants.
32.	IV.P.8.a Risk Adjustment	145	What risk adjustment methodology will be used after the first contract year? We recommend a methodology that is widely used and includes pharmacy	MLTC will work with the Actuaries and the MCOs in determining the best risk adjustment tool for the Heritage Health program.

			encounters such as CDPS + Rx.	
33.	IV.P.9.c Risk Corridor	146	Can you please define the qualifying revenue? Will the qualifying revenue exclude the 1.5% QPP hold back?	See Page xv of the RFP for the definition of qualifying revenue (for the risk corridor calculation). Since the 1.5% QPP hold back is not considered earned income, it will not be included in the risk corridor calculations.
34.	IV.P.11.c. State Performance Penalties	147	Please confirm that the provisions to appeal liquidated damages assessments identified in Section 2.i. on page 184 apply to this provision.	The provisions in Section IV.V.2.i would apply to the liquidated damages listed in Section IV.P.11.c.
35.	6. Value-Based Contracting, c.	150	Please define "risk- sharing".	Risk is defined as the chance or possibility of gain or loss associated with caring for a given population. A MCO awarded under this RFP will be at risk for whatever volume of care is provided to its members. A risk-sharing agreement with a network provider is one in which the MCO transfers some portion of risk to a network provider, such as payment of a fixed rate for which the network provider is to provide or arrange care for an assigned group of members.
36.	IV.Q.15 Payment for Emergency Services	153	Please clarify the definition of a "medical emergency."	The definition of "medical emergency" is synonymous with the definition of "Emergency medical condition", which can be found in the Glossary of Terms on page xi.
37.	IV.Q.16.a Pharmacy Reimbursement	153	What is the average dispensing fee for non-independent pharmacies? What is the percentage of non-independent pharmacies assumed in the rate development? What is the basis for the dispensing fee reduction estimate in the rate	Non-independent pharmacies were assumed to have a $2.50 dispensing fee and independent pharmacies were assumed to have a $4.45 dispensing fee. The independent pharmacy dispensing fee is the State FFS dispensing fee set for independent pharmacies. The $2.50 non-independent pharmacy dispensing fee is based on discussions with the state and research of other states. In Rating Region 1, 85% of prescriptions were filled by non-independent pharmacies. In Rating Region 2, 58% of prescriptions were filled by non-

			development?	independent pharmacies.
38.	IV.Z.1 Claims Broker Services	192	What is the current administrative cost paid on a per claims basis by DHHS? How will the per claim administrative fee paid to the CBS be determined?	Due to the current MMIS system, the State does not have current administrative costs paid on a per claim basis. Please see RFP Section IV.Z.1 for determination of the administrative fee paid to the CBS.
39.	V(A)(2)(e), Relationships with the State	197	Please confirm that for purposes of this question "any dealings with the State" is limited to contracts entered into with the State or other projects or initiatives the bidder, its organization, or any predecessor or party named in the bidder's proposal has worked on with the State in the last five years, and does not include day-to-day contact with State personnel related to existing contract requirements, obligations, or administration.	Section V.A.2.e pertains to contracts entered into between the State and the bidder.
40.	V(A)(2)(g), Contract Performance	197	Please confirm that contracts terminated for default must be reported for bidders and any proposed Sub-Contractor, but information regarding contracts terminated for convenience, non-performance, non-allocation of funds or any other reason, is required of the bidder only,	Per Section V.A.2.g, the bidder must provide if they or any proposed sub-contractor has had a contract terminated for default during the past five (5) years as detailed in this section. The bidder must provide if they have had a contract terminated for convenience, non-performance, non-allocation of funds, or any reason.

			since in the ordinary course of business contracts terminate for reasons other than default every day and requiring this information of each subcontractor could result in inundating the State with volumes of information.	
41.	V(A)(2)(g), Contract Performance	197	To avoid inundating the State with information for lines of business unrelated to the current RFP, please confirm that the State is seeking information regarding terminations of contracts for services related to Medicaid/CHIP programs only.	Per Section V, A, 2, g, “It is mandatory that the bidder submit full details of all termination for default experienced during the past five (5) years, including the other party's name, address, and telephone number. The response to this section must present the bidder’s position on the matter.”
42.	V(A)(2)(h), Summary of Bidder's Corporate Experience	197	Is this question seeking two separate items: (1) a summary matrix; and (2) narrative project descriptions; or, is this question seeking one item (e.g., a summary matrix of bidder's experience in a tabular format to include the information requested in subparts (a)-(e) above)?	The summary matrix should consist of the items listed in subparts a – e.
43.	V(A)(2)(h), Summary of Bidder's Corporate Experience	197	Please confirm that the "summary matrix" sought in this question should be in tabular form and include the information enumerated in subsections (a)-(e).	The summary matrix may be in a tabular form.
44.	V(A(2)(h), Summary of	197	Please confirm that the	The bidder may submit more than three (3) projects, but the State

	Bidder's Corporate Experience		"summary matrix" sought in this question, which bidder is interpreting as a tabular summary of its experience to include the items listed in subsections (a)-(e), can include more than three projects.	will use no more than three (3) narrative project descriptions. The bidders are discouraged from submitting more than three (3) project descriptions.
45.	V(A)(2)(h), Summary of Bidder's Corporate Experience	197	For what time period or "look back period" should bidders report the information requested in this section?	The State does not identify a time period.
46.	V(A)(2)(h), Summary of Bidder's Corporate Experience	197	Please confirm that bidders are permitted to provide more than three (3) narrative project descriptions of other projects and experience from which the State will then choose no more than three (3) on which to evaluate the proposal.	See the response to Question #44.
47.	V(A)(2)(h)(i)(e), V(A)(2)(h)(ii), and V(A)(2)(h)(iii) Summary of Bidder's Corporate Experience	198	Please confirm that the reference to "Sub-Contractors" and "Sub-Contractor(s) experience" refers only to bidders' experience as a subcontractor, as opposed to a primary contractor, on similar projects and that bidders are not required to provide summary matrices and/or narrative project descriptions regarding previous similar projects for	Corporate Experience is the bidder's role as the prime Contractor and/or as the role of the Sub-Contractor.

			each of their proposed subcontractors.	
48.	Attachment 11 – Rates	Attachment 11	In the effort to maintain transparency, can DHHS share the capitation rate calculation sheet that was used to trend the base data and adjust it to the rates in Attachment 11?	See Attachment 20: "COA-level Rate Development" for the step-by-step development of the rates at a COA level.
49.	Attachment 12 - Historical Transplant Cost Distribution Data	Attachment 12	Please provide the transplant data separated by year. Has there been an increase in transplants in recent years versus earlier years? How has this been accounted for? By placing the transplant costs in the capitation rates, how will DHHS avoid underpricing the transplant costs for an MCO that receives a disproportionate share of overall transplants? We recommend a transplant kick payment instead of an adjustment to all members' capitation rates to more equitable compensate MCOs for their incurred costs. We also recommend transplant kicks that vary by type of transplant -- heart, bone marrow, lung, intestine, kidney, or pancreas/kidney.	Transplant costs by year are: $5.4 million in FY10, $4.5 million in FY11, $7.1 million in FY12, $7.6 million in FY13, and $6.0 million in FY14. MLTC does not intend to use a transplant kick payment. Bidders may purchase reinsurance or take other appropriate steps to mitigate the risk of fluctuation in the costs of transplants.
50.	Attachment 19, Proposal Statement	Attachment 19, p.1	Please confirm that the information sought from	The information sought is that related to Medicaid or CHIP contracts.

	and Questions, No. 2		bidders' parent company, affiliates, and subsidiaries in response to Question 2 includes only regulatory actions, monetary or non-monetary sanctions, letters of deficiency, and corrective actions related to Medicaid/CHIP contracts.	
51.	Attachment 19, Proposal Statements and Questions, No. 3	Attachment 19, p.1	Please confirm that the information sought from bidders' parent company, affiliates, and subsidiaries in response to Question 3 includes only investigations related to Medicaid/CHIP business.	See response to Question # 50.
52.			As a business owner this who would like to be able to accept Medicare and Medicaid patients someday, the language of this is limiting and very concerning to me. "Primary care provider (PCP)A medical professional chosen by or assigned to the member to provide primary care services. Provider types that can be PCPs are doctors of medicine (MDs) or doctors of osteopathic medicine (DOs) from any of the following practice areas: general practice, family	See response to Question #2.

			practice, internal medicine, pediatrics, and obstetrics/gynecology (OB/GYN).Advanced practice nurses (APNs) and physician assistants may also serve as PCPs when they are practicing under the supervision of a physician who also qualifies as a PCP under this contract and specialize in family practice, internal medicine, pediatrics or obstetrics/gynecology" I am a Family Practice Nurse Practitioner. I own my own practice and provide care to over 300 patients. As Nebraska law allows, I do not have a supervising physician. I would like to be able to accept both Medicare and Medicaid insurance someday, but as of yet, they are not in agreement with Nebraska law. Thank you for taking this matter into your immediate consideration.	
53.	Glossary - Related-party	xv	The examples provided for "related-party" include "subcontractors to the MCO	Related-party: The parent company of a MCO or an entity partially or wholly owned by the MCO or the MCO's parent company that receives any revenue from the MCO for Medicaid

			performing services under this contract." Please clarify that this would apply only to subcontractors owned, either wholly or partially, by the MCO or its parent company and not to third party subcontractors.	contracted services. Examples of related parties include a clinic wholly or partly owned by a MCO or its parent company that provides services covered by Nebraska Medicaid and subcontractors to the MCO performing services under this contract. Yes, it relates to subcontractors wholly or partially owned by the MCO or its parent company. This does not include independent third party subcontractors.
54.	Request for Proposal for Contractual Services Form; IV.H-Submission of Proposals; IV.NN-Proprietary Information	i, 4, 23	"All non-proprietary or confidential information as defined by Law WILL BE POSTED FOR PUBLIC VIEWING." Should this read, "All non-proprietary or NON-confidential information…?"	See response to Question #6.
55.	II.H Submission of Proposals	4	Please verify that the Bidder must submit only one copy of the original proposal and that an electronic copy of the response is not required.	The bidder must submit one original of the entire proposal response. An electronic copy is not required.
56.	II.H Submission of Proposals	4	Is there a font style and font size that the Bidders must adhere to when responding to this RFP?	There are no such requirements.
57.	II.H Submission of Proposals	4	Is there a specific section in the Binder where the Bidder should attach the additional forms - Form A, Contractual Services Form, and the Confidentiality Sheet - or should they be included in a separate tab(s)?	The Contractual Services Form, Form A, and the Confidentiality Sheet should be included as a separate identified tab within the bidder's proposal response.
58.	III Terms and Conditions	7	"… a bidder may indicate any exceptions to the Terms and	No, a statement recommending terms and conditions that

			Conditions by (1) clearly identifying the term or condition by subsection, and (2) including an explanation for the bidder's inability to comply with such term or condition which includes a statement recommending terms and conditions the bidder would find acceptable. Rejection in whole or in part of the Terms and Conditions may be cause for rejection of a bidder's proposal. Would "a statement recommending terms and conditions the bidder would find acceptable "constitute a "rejection in whole or in part"?	bidder would find acceptable does not constitute a rejection. The bidder should provide alternative(s) for the State's consideration.
59.	III.J Contractor Personnel	12	"Personnel commitments made in the Contractor's proposal shall not be changed without the prior written approval of the State." Please clarify whether this applies to any personnel changes (individual staff, staffing levels due to changes in membership, etc.) or if it can be limited to changes of substance (key personnel, general staffing ratios, etc.).	Per Section III, J Contractor Personnel, "Personnel commitments made in the Contractor's proposal shall not be changed without the prior written approval of the State. Replacement of key personnel, if approved by the State, shall be with personnel of equal or greater ability and qualifications."
60.	III.II Taxes	21	"The State is not required to pay taxes of any kind and assumes no such liability as a	No. The Health Insurer Tax will be incorporated in future rate setting cycles.

			result of this solicitation." Does this provision extend to the Health Insurer Tax enacted through the Affordable Care Act?	
61.	IV. A.1.g.ii Description of Current Program	31	Would pharmacy services have a different start date than physical health services? Please confirm the expected start date for pharmacy services.	The anticipated start date for pharmacy services is January 1, 2017. The State reserves the right to adjust the start date of pharmacy services at its discretion.
62.	IV.4A.1.g.iii Description of Current Program	31	Are Aged, Blind, and Disabled persons, whether dually eligible for Medicaid and Medicare, in a home and community-based services waiver program, or living in an institution, included in managed care only for physical health services and not for behavioral health services or pharmacy services?	All populations included in Heritage Health will have the Heritage Health benefits package, including physical health, behavioral health, and pharmacy services. The ABD population (including those who are dually-eligible, those receiving HCBS services, and those living in ICF/DDs) is included in Heritage Health.
63.	IV.4A.1.g.iii Description of Current Program	31	This population will be included "for managed care physical health services"; will the MCO be responsible only for physical health services and not facility, behavioral health, NEMT or other services?	Section IV.A.1.g.iii is hereby amended as follows: "Inclusion of the Aged, Blind and Disabled populations who are dually eligible for Medicaid and Medicare, in a home and community-based services (HCBS) waiver program, or living in an institution, for integrated physical health, behavioral health, and pharmacy services."
64.	B.4.d.iii Eligibility and Enrollment - MCO	35, 144	Are there any time limits that would apply to enrollment and/or capitation payment	See response to Question #19.

	Enrollment Procedures IV.P.3.b MCO Reimbursement - Capitation Rates and Payment		retroactivity regarding both the enrollment transaction as well as the ensuing capitation payment?	
65.	B.5.g Eligibility and Enrollment - PCP Assignment	36	Please clarify whether it may be possible for a provider to participate with Medicare and not Nebraska Medicaid?	All providers must be Nebraska Medicaid enrolled to participate in or be reimbursed by the MCO.
66.	B.5.g Eligibility and Enrollment - PCP Assignment	36	If a dual eligible member is obtaining services from a non-par PCP, will the plan be required to continue paying for those services at the Medicaid fee schedule?	See Section IV.S.15.a.x. and Section IV.S.17 for requirements related to dual eligible members.
67.	B.6.b Eligibility and Enrollment - MCO Changes	36	Does this mean that, regardless of a member's anniversary date, their open enrollment period would always be in December?	For the duration of the contract, the annual enrollment period will take place in December for all Heritage Health members.
68.	IV.D.3.a & IV.D.3.b Staffing Requirements - Additional Required Staff	50	Are the requirements under section 3a and 3b referring to medical and pharmacy staff or just medical?	Sections 3a and 3b are referring to medical staff.
69.	IV.D.3.a & D.3.bStaffing Requirements - Additional Required Staff	50	Is Nebraska state licensure required for all Prior Authorization staff and concurrent review registered nurses, including Pharmacy?	MLTC will provide this answer in the second round of questions for this RFP.
70.	IV.4E.8.a.xix Covered Services and Benefits - Core Benefits and Services	55	What are the definitions of "skilled services", "rehabilitative services", and "transitional nursing facility services" which must be	These services are defined as those meeting requirements outlined in 42 CFR 409 Subpart D, Requirements for Coverage of Post-hospital SNF Care.

			provided as a minimum benefit package?	
71.	IV.4E.8.a.,IV.4E.28, Iv.4E.29.b & 4E.29.b Covered Services and Benefits - Core Benefits and Services, Medical Transportation Services, and Excluded Services	54-55 66-67	Custodial nursing facility services are listed as excluded services. What core benefits and services are MCOs to provide to members who are residents of nursing homes but are receiving custodial services? For example, are MCOs required to provide emergency and non-emergency ambulance services to such members?	A MCO is to provide all core benefits and services with the exception of those included in the nursing facility per diem. Services included in the nursing facility per diem can be found at 471 NAC 12-009.05 http://www.sos.ne.gov/rules-and-regs/regsearch/Rules/Health_and_Human_Services_System/Title-471/Chapter-12.pdf
72.	IV.4E.8.a, IV.4E.29.e Covered Services and Benefits - Core Benefits and Services and Excluded Services	54-55 66-67	Home and community based services are not included as a part of the core benefits or services. What core benefits and services are MCOs to provide to persons receiving home and community based services?	A MCO is to provide all core benefits and services to persons receiving home and community-based services.
73.	IV.E.11.b.ii Covered Services and Benefits - Pharmacy Services	58	Does this include any changes post 1/1/17? Does this include post P & T formulary changes? Please confirm what is considered a "change".	Any modifications of drug coverage must be submitted for review and approval at minimum 30 days prior to implementation. Notice may be less than 30 days during the first month of implementation.
74.	E.11.b.iv.c Covered Services and Benefits - Pharmacy Services	58	Please confirm that the posting of the MAC list would occur behind a secure channel for providers.	The State confirms that the MCO MAC list is not required to be posted publicly, but the MCO must maintain a website and post current and accurate information, including the MAC pricing, to be available to the State and provider network.

75.	E.11.b.i Covered Services and Benefits - Pharmacy Services	58	The language in this section states that all formulary policies and procedures must be submitted to MLTC for approval, but the RFP states that the MCO must follow the State's PDL. Please clarify as to when this scenario would occur.	See Glossary of Terms for the definitions of PDL and Formulary. The State's PDL is not an all-inclusive list of therapeutic categories. The MCO must cover the medications listed on the State's PDL, but will also need to maintain a formulary that covers medications not listed in the PDL. Refer to the following link for additional information: http://dhhs.ne.gov/medicaid/Pages/med_pharm.aspx
76.	E.11b.iv.a Covered Services and Benefits - Pharmacy Services	58	Please confirm that the MCO formulary would need to be posted on the website, since the MCO is required to follow the State's PDL?	The MCO will be required to post and maintain the most current and accurate MCO formulary on their website. The State PDL must also be posted.
77.	E.11.b.vi Covered Services and Benefits - Pharmacy Services	59	Given that newly available medications may not be available in First Data Bank, they cannot be coded or processed yet at the point of sale, so the MCO may not always be able to fulfill the 10 day requirement. Please clarify any exceptions to this requirement.	The MCO has 10 days to implement coverage after a new drug has been loaded on a National Drug Reference File.
78.	E.11.c.iii Covered Services and Benefits - Pharmacy Services	59	Please provide additional information on the volume of changes expected.	PDL files will be shared with MCOs on a weekly basis. Large-scale PDL possible changes occur biannually in conjunction with P&T meetings.
79.	E.11.c. vi Covered Services and Benefits - Pharmacy Services	59	Please clarify if this provision would prohibit the MCO from negotiating supplemental rebates, in addition to the Medicaid rebates that pharmaceutical companies	MCOs may negotiate supplemental rebates for medications outside of the State's PDL. MCOs are prohibited from negotiating supplemental rebates for any medications listed in the State's PDL.

			are required to provide.	
80.	IV.E.19.a Covered Services and Benefits - Limitations on Abortions	64	Confirm that MLTC Medical Director must also review all approvals for elective abortions prior to determination notification to the requesting provider. If so, (a) how does the plan send, (b) what is required to be sent to the MLTC Med Director and (c) what is the expected turnaround time from the MLTC Med Director? Also, who will provide reviews if the MLTC Med Director is out of the office?	The State is currently establishing this process and will be provided to the awarded contractors.
81.	IV.E.21 Covered Services and Benefits – Transplants	65	Is the MCO required to follow Medicare policies for transplants (i.e. - the RFP states that if Medicare does NOT have a policy the MLTC Medical Director will determine).	The MCO must cover transplants (including donor services) that are medically necessary and defined as non-experimental by Medicare. Per Section IV, E.21, "As required by 471 NAC 18-004.40, the MCO must cover transplant services, including donor services that are medically necessary and defined by Medicare as non-experimental."
82.	IV.E.28.a Covered Services and Benefits - Medical Transportation Services	66	The section states that NEMT is only covered for medical transportation by an ambulance; however, the other NEMT are not listed under Excluded Services IV.E.29, page 66/67. Please clarify.	See Addendum 3-Revisions to the RFP.
83.	IV.E.29	66-67	Eligible populations include	The MCO is responsible to provide all services in the core

	Covered Services and Benefits - Transplants		“Medicaid beneficiaries who participate in a HCBS Waiver program"; however, all HCBS waiver services are excluded from MCO responsibility. Which party will be financially responsible for any HCBS services for waiver-eligible individuals that are assigned to a “wait-list?”	benefits package and any value-added services as approved by the State for its members. This responsibility is not affected by the member’s waiver status.
84.	IV.F.2.b.v, IV.F.2.xi. Member Services and Education - Member Services Call Center	69	Please confirm that the lines on Section IV.F.2.b.v and IV.F.2.xi were left intentionally blank.	The lines were unintentionally left blank. No requirements are missing or intended for these numbers.
85.	IV.H.7.a. and IV.H.7.c Member Services and Education - Access to State Fair Hearings	92	Please clarify if the member is required to exhaust the plan’s internal appeal process prior to submitting a request for a State Fair Hearing?	The member is required to exhaust the plan's internal appeal process prior to submitting a request for a State Fair Hearing.
86.	IV.I.4.i Provider Network Requirements - Establishing the Network	96	"The MCO must strive to improve the ability of its behavioral health provider network to meet all the health needs of members through strengthened collaboration with PCPs, service providers, inpatient hospital providers, and consumer/peer providers.” Will the State allow providers to bill for same-day services for physical health and behavioral health visits when co-located in the same provider office?	Yes.

87.	IV.I.4.i Provider Network Requirements - Establishing the Network	96	Please further clarify what will constitute "collaboration with the DHHS Division of Behavioral Health and State behavioral health regions"	Collaboration will include, but is not limited to, a commitment by the health plan to participate in meetings or on committees that identify barriers and solutions that supports the level of care needed by Medicaid clients and other clients served by the Division of Behavioral Health.
88.	IV.I.13 Provider Network Requirements - Provider Enrollment in Medicaid	100	Please clarify whether a provider who has applied for MLTC enrollment but is not yet enrolled AND is credentialed by the MCO may see patients, or whether the MCO must wait until MLTC enrollment is complete.	MLTC enrollment must be complete in order for a provider to see patients. The MCO has the option to authorize services out of network until the MCO credentialing is complete.
89.	IV.J.3.a.ix Provider Services - Provider Handbook	104	Are the "medical record standards" to be included in the Provider Manual those that are reflected in the RFP (i.e. - applicable to MCOs) or are there separate regulatory requirements for physicians?	The medical records standards are to be included in the Provider Manual and must include all standards set forth in the RFP and all applicable regulatory requirements.
90.	IV.M.11 Quality Management - Member Advisory Committee	124	Please clarify who would be considered a member's representative, for purposes of fulfilling the requirements of the Member Advisory Committee.	See Page xvi in the Glossary of Terms for the definition of Representative.
91.	IV.M.12 Quality Management - Clinical Advisory Committee	124-125	Does the State intend for plan members to participate on this committee as well? There is a reference to "members" but it's unclear whether it is intended to mean members of the	Plan members will not participate in this committee. This reference to member refers to members of the committee.

			committee or members of the plan.	
92.	IV.N.2.f Utilization Management - UM Program Description	126	Please clarify the statement regarding involvement of "actively practicing", board certified physicians in the program to "supervise" ALL review decisions and review denials for medical appropriateness. Is it the intent of MLTC that this section is referencing the physicians that should participate in the Clinical Advisory Committee/UM Committee or actual practicing providers that are reviewing UM decisions?	Active practicing providers must supervise all UM review decisions and review denials for medical appropriateness.
93.	IV.N.11.b Utilization Management - Restricted Services	131	Please confirm the type of restriction program: pharmacy, provider, or both?	See NAC 471 NAC 2-004 for categories of pharmacy and provider restriction. http://www.sos.ne.gov/rules-and-regs/regsearch/Rules/Health_and_Human_Services_System/Title-471/Chapter-02.pdf
94.	IV.O.1.h Program Integrity - General Requirements	133	The RFP states that "The MCO, as well as its subcontractors and providers, whether contracted or non-contracted, must comply with all Federal requirements (42 CFR 455) about disclosure reporting." Please clarify the MCO's responsibility with respect to non-contracted providers.	The MCO's responsibility is the same for both contracted and non-contracted providers.

95.	IV.O.1.j Program Integrity - General Requirements	133	The staffing ratio required under the Program Integrity section is one (1) investigator for every 50,000 or fewer members; however the Staffing Requirements section (IV.D.3.i,p.51) states a ratio of one investigator for every 100,000 members or less. Please clarify which requirement the MCO should abide by.	The MCO is required to comply with the ratio requirement of one (1) investigator for every 50,000 or fewer members as stated in Section IV.O.1.j. Section IV.D.3.i is hereby amended as follows "The MCO must have a minimum of one investigator for every 50,000 members or less."
96.	IV.O.3.a.ii. Program Integrity - Prohibited Affiliations	134-135	The cited section identifies those parties with whom an MCO may not knowingly have a relationship. The listed parties include the following: "An individual or entity who is an affiliate, as defined in the Federal Acquisition Regulation, of: a) A director, officer, or partner of the MCO. b) A person with beneficial ownership of 5% or more of MCO equity. c) A person or entity with an employment, consulting, or other arrangement with the MCO under its contract with the State. " Please confirm that a company, such as a parent or affiliate company, would not	A parent or affiliate company is not considered a person with respect to this requirement.

			be considered a “person” with respect to this requirement.	
97.	IV.O.15.b Program Integrity - Investigative Collaboration	140	Please clarify whether the ten year timeframe for investigation is limited only to that timeframe in which the MCO had a relationship with the applicable member or provider.	The ten year timeframe applies to the MCO and a parent or affiliate company's relationships with a provider.
98.	IV.P.2.e MCO Reimbursement - Capitation Rate Determination Process	142	Categories of eligibility include those individuals receiving LTSS, both institutional and home and community-based services. Please clarify those covered services for these categories of eligibility that the MCO will be responsible for.	The services covered for these individuals are outlined on page 54 of the RFP, Section IV.E.8. This includes physical health services, behavioral health services, and pharmacy services, and excludes NEMT non-ambulance, dental services, and long term services and supports.
99.	IV.P.5.g., IV.P.5.i MCO Reimbursement	144	"The supplemental payment for deliveries is intended to reimburse the MCO for five (5) months of prenatal care, the delivery, and two (2) months of post-partum care.” “The MCO must submit encounter data evidence of the delivery, plus any other inpatient and outpatient services for the maternity care of the member to be eligible to receive a supplemental delivery payment.”	Yes, the supplemental payment will be issued to the MCO in which the mother is enrolled at time of delivery if maternity care (prenatal and/or post-partum care) is rendered by another MCO. The supplemental payment is initiated by the MCO sending maternity care information in the Maternity Care Payment file. In the absence of a hospital inpatient stay the MCO may submit other inpatient or outpatient services for the maternity care of the member to be eligible to receive a supplemental delivery payment.

			Will the supplemental payment be issued to the MCO in which the mother is enrolled at time of delivery if maternity care (prenatal and/or post-partum care) is rendered by another MCO? Does the encounter data for maternity care and the delivery need to be submitted by the same MCO in order to trigger the supplemental delivery payment?	
100.	IV.P.12.a MCO Reimbursement - Administrative Cap	148	"Per Neb. Rev. Stat. §71-831, 68-908, and 71-801 (2012), the MCO's administrative spending must not exceed 7%, except up to an additional 3% is allowed, if the additional amount is for the purpose of quality improvement and approved by MLTC." Please describe the MLTC approval process to determine whether certain administrative spending would qualify for "the purpose of quality improvement." Will there be a mechanism for this approval prior to submission of the RFP response? Additionally, the statutes cited above appear to refer to behavioral health services	Attachment 5 is hereby amended to include a Quality Administrative Expenses proposal for review and approval of quality activities for consideration in the 3% admin cap. The proposal is due 120 days prior to contract start date. The provision related to the Administrative Cap applies to all administrative expenditure.

			only. Does this provision related to the Administrative Cap apply to all administrative expenditures or just those specifically related to behavioral health services?	
101.	IV.P.12.e MCO Reimbursement - Administrative Cap	148	"Hold-back funds, both earned and forfeited, are factored into the administrative cap calculation." Does this include both the holdback associated with the MLTC Quality Performance Program (1.5% of the aggregate of all income and revenue) as well as the State Performance Penalties (0.25% of the aggregate of all income and revenue)?	See response to Question #33.
102.	IV.Q.6.b Provider Reimbursement - Value Based Contracting	150	Please confirm that the 30% and 50% of the provider network measures that relate to Value-Based Contracting, refer to the number of contracts or providers and not the number of members.	30% and 50% of the provider network refers to the number of providers.
103.	IV.Q.6.b Provider Reimbursement - Value Based Contracting	150	Does this include all provider types? How is the denominator determined? Is it practitioners only or does it also include facilities?	The denominator includes all providers within the MCO's network.
104.	IV.Q.10 Provider Reimbursement -	152	Medicare cost reports are not prepared until well after the CAH's fiscal year end. Is the	MCOs are to use the cost report provided by DHHS Financial Services for cost settlement activities with CAHs.

	Critical Access Hospital Contracting and Reimbursement		MCO to use a mechanism other than the Medicare cost report? If the Medicare cost report is to be used, is the MCO to use the “as-filed” cost report, or the cost report that was audited and settled by CMS?	
105.	IV. Q.17.c Provider Reimbursement - Maximum Allowable Cost Program	153	Would the MCO be able to provide the information behind a secured connection on the MCO's website?	See response to Question #74.
106.	IV.R.8.d.iv Systems and Technical Requirements - Provider Enrollment	157	Please specify what, beyond including a provider's NPI, what specific "NPI requirements" must be included in the provider enrollment system?	Any NPI requirement that is transmitted to the MCO through State interface file must be included in the provider enrollment system.
107.	IV.S.15.f.i Third-Party Liability	176	Does the 365 day timeframe apply to overpayment recoveries for any reason, or only circumstances where TPL recoveries have not been successful?	The MCO is expected to recover overpayments for any reason within 365 days. If the MCO is unsuccessful in recovery after 365 days, MLTC may pursue recovery.
108.	IV.T.3.b Reporting and Deliverables - Information Related to Business Transactions	177	Please clarify what will constitute "full and complete information" that must be provided regarding ownership of subcontractors. Also, what would MLTC consider a "significant business transaction" between the MCO and a wholly owned supplier?	Full and complete information includes all information necessary to address disclosure requirements in IV.T.3.b.i and IV.T.3.b.ii. "Significant business transaction" is specified in IV.T.3.c.

109.	V.A.2.j Proposal Submission - Corporate Overview	198	Is there a threshold (percentage of revenue or dollar amount) that would apply to Subcontractors that should be identified for this requirement? Is this requirement limited to Subcontracts for certain services (e.g. care management or coordination services)? Does this requirement exclude providers contracted for participation in the Managed Care Organization's provider network?	Providers are not considered subcontractors. Bidders should address subcontracting in Attachment 19 on Questions #56 and #57.
110.	Attachment 6: Reporting Requirements Provider Grievances	Attachment 6, p.2 of 10	Please clarify that the Provider Grievance System (Appeals and State Fair Hearing) are intended to report the provider filing on the member's behalf only.	The Provider Grievance System reports for Appeals and State Fair Hearings are meant to summarize provider-related appeals and provider-related state fair hearings. Providers acting on behalf of members in appeals and state fair hearing proceedings would be summarized in the Member Grievance System reports.
111.	Attachment 11 – Rates	Attachment 11, Page 1 of 1	What are the dollar values of the transplant costs included in the Medical PMPMs shown in Attachment 11 – Rates?	The dollar value of the transplant costs in the medical PMPMs is $5.5 million in Rating Region 1 and $1.6 million in Rating Region 2.
112.	Attachment 11 – Rates	Attachment 11, Page 1 of 1	Please show the components of the Maternity and Katie Beckett non-medical loads separately by Admin, Quality Improvement, Performance Guarantee and Profit/Risk/Contingency as	See Attachment 21: "Non-Medical Load Assumptions" which identifies the Non-Medical Load components used at each end of the rate range by COA and region.

			shown for the composites in the Optumas Bidders' Conference Rate Presentation page 15.	
113.	Attachment 12 - Historical Transplant Cost Distribution Data	Attachment 12, Page 1 of 1	Are the transplant costs shown in Attachment 12 for the four-year period SFY2010-SFY2014 in total? If so, what are the costs by each SFY? What are the costs by Region?	Transplant costs in Attachment 12 are for the five year period SFY10 to SFY14. Transplant costs by year are: $5.4 million in FY10, $4.5 million in FY11, $7.1 million in FY12, $7.6 million in FY13, and $6.0 million in FY14. Costs by Region are not available.
114.	Attachment 13 Neb. Rev. Stat. 71-831	Attachment 13, p.1 of 1	Please verify that the restrictions contained in this statue apply specifically to behavioral health services and not to the broader scope of services to be provided by the Medicaid Managed Care Organization.	As the statute is currently written, the provisions of the statute would apply to the full scope of services.
115.	Attachment 13 Neb. Rev. Stat. 71-832	Attachment 13, p.1 of 1	"(2) Provide a definition of annual contractor profits and losses and restrict such profits and losses under the contract so that (a) profit shall not exceed three percent per year and (b) losses shall not exceed three percent per year, as a percentage of the aggregate of all income and revenue earned by the contractor and related parties, including parent and subsidy companies and risk-bearing partners, under the contract;" Please verify that the	This restriction is limited to only those revenues derived from this specific contract. The State will determine the compliance review process during readiness review.

			restrictions on profits and losses applies to the contractor and related parties, including parent and subsidy (sic) companies. Please clarify that this restriction is limited to only those revenues derived from this specific contract. How will the State measure or validate compliance with this requirement?	
116.	Attachment 15 - Medical Loss Ratio	Attachment 15, Pages 1 and 2 of 2	Will the 85% Minimum MLR requirement be calculated as an aggregate of Regions 1 and 2 or separately for each region?	The 85% Minimum MLR requirement will be calculated as an aggregate of Regions 1 and 2.
117.	Attachment 15 - Medical Loss Ratio	Attachment 15, Pages 1 and 2 of 2	Will the 85% Minimum MLR be aggregated over all categories of aid or separated for LTSS versus Non-LTSS subgroups?	The 85% Minimum MLR requirement will be calculated as an aggregate of all categories of aid.
118.	General - Capitation Rate Development	N/A	Please provide an example for the calculations flow from base data to final capitation rates, including how adjustments and trends are applied.	All adjustments applied to the base data to develop the final capitation rates have been provided to the bidders as part of the pre-proposal conference presentation. See Attachment 20: “COA-level Rate Development” for the step-by-step application of these adjustment values to the base data. The Effective Trend Days shown in this document represent the effective number of days needed to trend the base data to the contract period given the different base periods for Physical Health, Behavioral Health, and Behavioral Health Foster Care. Trend is applied at a COS-level, with each COS being trended for the appropriate number of days.
119.	Attachment 19	Attachment	For those questions with	Attachments will not count toward the questions' page limits as

	Proposal Statements and Questions	19	page limits, would attachment(s) count towards the question's page limit? Is there a page limit on attachments?	there is not page limits on attachments.
120.	Attachment 19 Proposal Statements and Questions	Attachment 19 p.2 of 21	Please confirm that the correct RFP Section Reference for Question#10 should read "IV.C Business Requirements" (and not IV.B).	The RFP Section Reference for Question #10 is hereby amended as follows: "IV.C Business Requirements."
121.	Attachment 19 Proposal Statements and Questions	Attachment 19 Page 1 of 21	Please confirm that the correct reference for question #5 is Section III. F., not III.G.	The RFP Section Reference for Question #5 is correct as listed. The RFP Section Reference for Question #4 in Attachment 19 is hereby amended as follows: "Section III.F Insurance Requirements".
122.	5151Z1 Evaluation Criteria Attachment	Evaluation Criteria p.2	Please verify that only the “top-scoring bidders” may be invited for oral presentations at the State’s discretion as stated in Section II.G on page 3. If the State opts to proceed with oral presentations, will all “top-scoring bidders” be invited for oral presentations in order to allow for an equitable opportunity among “top-scoring bidders” to earn the 150 points identified in the Evaluation Criteria Attachment?	The State reserves the right to select only the top scoring bidders for oral presentations.
123.	Proposal Statement and Questions	Attachment 19, page 4	Is the work plan requested in this question part of the larger transition/implementation plan, or a stand alone?	The work plan requested should stand alone as a plan for implementation of Pharmacy Services as described in the RFP. It may also be a component of a bidder's larger transition/implementation plan.

124.	Proposal Statement and Questions	Attachment 19, page 5	Will the examples of information that will be available on the member website be counted in the 6-page limit?	Examples of information that will be available on the member website will not be counted in the page limit.
125.	Proposal Statement and Questions	Attachment 19, page 5	Will the examples of member education be counted in the 10-page limit?	Examples of member education will not be counted in the page limit.
126.	Proposal Statement and Questions	Attachment 19, page 5	Will the flowchart be counted in the page limit? If not, please consider extending the page limit as three pages to provide a "comprehensive written description" and flow chart are not likely to be sufficient.	The flowchart will not be counted in the page limit.
127.	Proposal Statement and Questions	Attachment 19, page 11	Please confirm that the page limit excludes the proposed health risk assessment template.	The proposed health risk assessment template will not counted in the page limit.
128.	Proposal Statement and Questions	Attachment 19, page 12	Will the proposed QAPI work plan be included in the 10-page limit?	The proposed QAPI work plan will not be counted in the page limit.
129.	Proposal Statement and Questions	Attachment 19, pg 17	How does the state define "30% of its provider network"? 30% of providers? 30% of contracts? 30% of spend? Other?	See response to Question #102.
130.		Attachment 19	Attachment 19 does not contain any questions related	Confirmed.

			to section IV.G Member Marketing of the RFP (pages 82-87). Please confirm that this correct.	
131.	III.	Page 7	Please confirm that rates are applicable for the initial contract term of six months (1/1/17-6/30/17).	The initial contract term will be 12 months, 1/1/17 – 12/31/17. This is consistent with the rates in Attachment 11, which represent a Calendar Year 2017 contract period.
132.	III.F.3.	Page 10	Please provide details regarding the underlying medical claims so that we may comply with III.F.3.d. For example, please provide member-specific annual spend levels for the over-certain attachment points (e.g., 50K, 100K, 150K, 200K).	The details requested in this question are not available.
133.	III.EE	Page 19	The performance bond amount of $50M appears to be for entire program. How will the amount applicable to each bidder be determined?	Each contract awarded from this RFP will require a $50 Million performance bond. See the response to Question #11.
134.	IV.A.1.f.iii	Page 31	Who is the current enrollment broker?	The current enrollment broker is The Medicaid Enrollment Center
135.	IV.A.1.g.ii.	Page 31	This states that the “Inclusion of pharmacy service in the core benefit package and the MCO capitation rate at a date to be determined by MLTC”; however, Attachments 10A-10D appears to have pharmacy included. Do the	Rates provided include pharmacy. See response to Question #61.

			rates provided include pharmacy? What is the timeline for the pharmacy inclusion?	
136.	IV.B.4.b.ii.and iii	Page 35	This section states that the MCO will not be responsible for services rendered to a member prior to the date of enrollment; however, IV.B.4.h. states that the MCO is responsible for member care on the first day of the month in which eligibility was determined. Will there be a limited amount of time that a member's eligibility will be retro'ed onto managed care?	See response to Question #19.
137.	IV.B.4.c	Page 35	Does the MCO have sole authority to manage and report member status changes or will members still be reporting changes directly to ACCESSNebraska? When contradictory information is reported, what information will be used?	The MCO is responsible for providing information to ACCESSNebraska as set forth in Section IV.B.4.c.i of the RFP. The member is responsible for contacting ACCESSNebraska to report all status changes. The ACCESSNebraska will validate the information when reported.
138.	IV.B.5.d & e	Page 36	Item 5.d outlines conditions for PCP auto-assignments (d.i - d.iii). In 5.e the requirement notes that two situations require the MCO to reach out to the member and ask him/her to make an alternate PCP selection,	The first sentence of Section IV.B.5.e is hereby amended as follows: "If either of the two (2) situations set forth in provision IV.B.5.d.ii or IV.B.5.d.iii immediately above occur, the MCO must reach out to the member and ask him/her to make an alternate PCP selection."

			referring to d.i and d.ii; however, the conditions would suggest that this should actually refer to d.ii and d.iii, since those conditions concern members who have made a PCP selection, whereas d.i concerns members who have not made a selection. Please confirm that requirement 5.e should read: "If either of the two (2) situations set forth in provision d.ii or d.iii immediately above occur, the MCO must reach out to the member and ask him/her to make an alternate PCP selection..."	
139.	IV.E.11.b.vi.	Page 59	Will the state make available and be ready to accept new procedure codes and have rates established so that the MCOs can meet this standard?	The State will accept all valid procedure codes and establish rates so that the MCO can meet this standard.
140.	IV.E.11.b.ix.a	Page 59	Does this requirement intend that all appeal rights would need to be available / exercised within one business day?	Member appeal rights are provided in Section IV.H.
141.	IV.E.12.c	Page 61	In instances in which the MCO must authorize a service not included in the State Plan, would the state be	The State's MMIS accepts any valid procedure codes. Any criteria not previously posted for these determinations must be developed and submitted to MLTC for review and approval in accordance with Section IV.N.4.c. of the RFP.

			able to accept all procedure codes not currently utilized and accept all associated rates? Additionally, would the MCO be supported in utilizing Medical Necessity Criteria not previously posted for these determinations?	
142.	IV.E.28.a.	Page 66	Are NEMT included in the contractor's rates? Are the contractors responsible for NEMT?	See response to Question #82.
143.	IV.E.29.d	Page 67	Please confirm that services rendered in school settings would be excluded.	Per Section IV.E.29, school-based services are excluded.
144.	IV.F.4.d and IV.F.13.b.i	Page 70 and page 80	The requirement for distributing new member materials appears to be within 30 calendar days of enrollment (page 70). However, there is further instruction (page 80) to send welcome packets to new members within 10 business days of receiving the new member file. Please clarify the difference in these requirements.	The first sentence of Section IV.4.d is hereby amended as follows: "The MCO must distribute member materials to each new member within ten (10) calendar days of enrollment." Welcome packets are required to be distributed within ten (10) business days of receiving the member file. Please see Section IV.F.13.b for included requirements. New member materials may be other materials not specified in Section IV.F.13.b and must be distributed within 30 calendar days of enrollment.
145.	IV.H.6.i.b.iii	Pg. 92	Assuming all services will be ordered by an authorized provider, is the intention of this language that a continuation of benefits is	See Section IV.H.6.a. for when the MCO must continue a member's benefits.

			required for all appeals?	
146.	IV.I.2.a	Pg. 94	Does this requirement intend to state that the MCO cannot pay providers of different licensing status different rates? Additionally, does this requirement prevent an MCO from restricting the services eligible for reimbursement for licensed providers when service delivery is within the scope of the practitioner's license?	This requirement is not intended to prevent an MCO from negotiating payment rates based on license type. The MCO may not restrict the services eligible for licensed providers when service delivery is within the scope of the practitioner's license.
147.	IV.J.4.c.ii	Pg. 106	Does this requirement mandate that all services must have online authorization request capability?	Online authorization capability is required for the services the MCO identifies as requiring prior authorization.
148.	IV.L.5.f	Pg. 116	As members are typically not eligible for Medicaid care during a State hospital stay (n accordance with IMD regulation), does this language mandate MCOs to coordinate care for members not eligible for managed care or is the intention to enroll members into managed care while still in State hospitals? Does this expectation extend to transition plans for youth transitioning out of State-run PRTF facilities as well?	Section IV.L.5.f requires the MCO to develop, implement, and evaluate written policies and process consistent with existing State policies and procedures regarding continuity of care. This includes collaboration and communication with other providers involved in a member's transition to another level of care, to optimize outcomes and resources while eliminating care fragmentation. The expectation for care coordination and transition planning does include youth transitioning out of a State-run PRTF.

149.	IV.N.6.b	Pg. 129	Does this requirement mandate the use of specific set of Medical Necessity Criteria (clinical guidelines) for continued Inpatient stay specifically?	MLTC is not mandating the use of a specific set of Medical Necessity Criteria.
150.	IV.O.1.e.	Page 133	This section requires the MCO to report any suspicion of fraud to NMPI immediately. Section IV. O.12.b. (Page 138) requires reporting of tips and referrals a minimum of every two weeks. Can you clarify the reporting expectation regarding early suspicion of possible fraud?	The MCO is required to immediately report suspicion of fraud via email and on a template developed by MLTC.
151.	IV.O.1.j	Page 133	Section IV.O.1.j requires a minimum of one investigator for every 50,000 or fewer members. Section IV.D.3.i (Page 51) requires one investigator for every 100,000 members. Please clarify the staffing requirement for investigators.	See response to Question #95.
152.	IV.O.6.e	Page 136	If MFPAU chooses to intervene in an MCO hearing or review of sanctions against a provider, will the MCO be notified of this intervention in writing?	Yes, MFPAU will notify the MCO in writing of intention to intervene.
153.	IV.O.6.e	Page 136	Will MLTC consider placing a reasonable limit on the	MFPAU has the right to intervene in proceeding and suspend until the MFPAU's investigation is complete.

			amount of time the MCO may be required to suspend proceedings, particularly as provider appeals may need to be processed according to specific timeframes to maintain required accreditation?	
154.	IV.O.11.b	Page 139	Will MLTC provide the MCO with any available data regarding recipients' dates of death or dates of incarceration to facilitate the required quarterly audit?	This information will be provided via the member enrollment files.
155.	IV.O.15.b	Page 140	Is the intent of this section that the MCO will investigate cases of suspected fraud for periods of time prior to the current contract?	See response to Question #97.
156.	IV.O.17	Page 141	Section IV.O.17 requires consultation with NMPI and MFPAU prior to recoupment in "these circumstances". Section IV.O.1.f (Page 133) requires the MCO to pursue "all recovery of payments identified as FWA" and other sections require the pursuit of overpayments when TPL is identified. Please provide a definition of the specific circumstances under which NMPI/NMFPAU consultation is required prior to recouping	The first sentence of Section IV.O.17 is hereby amended as follows: "If the MCO thinks that it is appropriate to initiate a recoupment or withholding action against a provider, the MCO must consult with both NMPI and MFPAU to ensure that such action is permissible."

			identified overpayments.	
157.	IV.P.2	Page 142	Please provide enough detail to determine how rates are figured, including each step of the process, from determining base to final rate.	See response the Question #48.
158.	IV.P.2.e.xx.	Page 143	What is the rationale for coordinated care savings and amount of adjustment applied to the rates?	The only program change similar to a coordinated care saving is the service delivery adjustment applied to the dual population. Individuals dually eligible for Medicaid and Medicare were previously not enrolled in physical health managed care. The non-nursing home level of care duals represent a significant opportunity for care savings. Inpatient utilization was reduced by 10%, Outpatient utilization was reduced by 15%, and Emergency Room utilization rates were reduced by 25%. The aggregate impact of these changes to this dual population is a reduction of 5.4%. Outside of the dual population, there are no assumed savings due to coordinated care used in creating rate ranges.
159.	IV.P.2.k.	Page 143	When will the narrative on the capitation rate be available?	See Attachment 22: "Heritage Health Rate Development Narrative", for an overview of the rate setting methodology.
160.	IV.P.5	Page 144	Can you confirm that the maternity supplemental payments made to the MCO will be counted as Qualifying revenue for both the risk corridor calculation and the administrative cap calculation?	Confirmed.
161.	IV.P.5/ Attachment 10	RFP Page 144, Attachment 10 maternity cohort	Can you provide any detail on the rate for the maternity supplemental payments? Also, can you provide any databook information on the number of qualifying births in	The rate for the maternity supplemental payments is shown as the "Maternity" category of aid on the rate exhibits. Similarly, the "member months" for this aid category represent the qualifying deliveries.

			the State?	
162.	IV.P.12	Page 147	Please provide claims volume for the most recent two fiscal years. Identify electronic receipt versus paper.	The State cannot respond to this request without additional information. Submit question with specific claim type information in order to respond to this question. Please submit further detail during the second round of questions.
163.	IV.P.12	Page 147	Please provide call volume, delineated between business hours versus after hours for the two most recent fiscal years.	The State needs additional information on the type of call volume. Please submit further detail during the second round of questions.
164.	IV.P.12	Page 147	What services need prior authorization and what are the volumes related to those services for the two most recent fiscal years.	The State needs additional information on the prior authoirizations for fee for service. Please submit further detail during the second round of questions.
165.	IV.P.12	Page 147	Since the administrative cap calculation includes the hold-back, will it just be calculated as "gross" revenue in each month, or will the hold-back only be included when settled a the end of each fiscal year? If it's only included at the end of the fiscal year, for which fiscal year will it appear in the calculation?	The capitation rates have been developed such that the administrative cap calculation is gross of the 1.5% hold-back, so that to the extent the MCO earns back the entire 1.5% hold-back at the end of the fiscal year, the administrative load provided to the MCO will remain under the required cap. It would be calculated in the fiscal year in which the hold-back occurs.
166.	IV.Q.13	Page 154	This section states that the MCO must reimburse a member for any payments made by the member, for services rendered during a period of retro eligibility. Would this apply to situations	All services that would have been covered by the Medicaid FFS program must be covered by the MCO, retroactive to eligibility. To clarify the process for member reimbursement, IV.Q.13 is hereby amended as follows: "The MCO is responsible for benefits and services in the core benefits package from and including the effective date of a member's Medicaid eligibility. The MCO must reimburse a provider and that provider must

			in which services previously rendered are determined to not be medically necessary?	reimburse a member for payments already made by a member for Medicaid covered services during the retroactive eligibility period. The date of enrollment in a MCO will match the Medicaid eligibility date."
167.	IV.R.1.c	Page 154	Approximately how many MLTC staff will require access to the MCO's systems? Will all staff require the same type of access or will individual staff access vary based on the role of the individual user?	Currently, the State does not have access to the MCOs systems. This will be determined during the readiness review process with awarded MCOs. Access wil vary based on the individual user.
168.	IV.S.3.ii	Page 164	Does this language only extend to the MCOs contracted by the State of Nebraska or would it extend to timely filing processes for other primary payers?	This language would extend to timely filing process for other primary payers.
169.	IV. S.15.b.ii	Page 174	Please clarify if the MCO may choose to pay and chase for the three listed categories of claims or if the MCO is mandated to pay and chase rather than cost avoid in these cases.	The MCO may choose to pay and chase for the three listed categories of claims.
170.	IV. S.15.b.ii.c	Page 175	Will MLTC provide an indicator to the MCO identifying Title IV-D child support individuals to assist in appropriate COB efforts?	Yes, this indicator will be provided via the enrollment files.
171.	A.2.h	Page 197	The instructions note that the State will use no more than three narrative project	See the response to Question #44.

			descriptions during proposal evaluation. Are we limited to describing three similar projects? If not, how will the State select the three to consider in the evaluation?	
172.	V. Proposal Instructions	Pages 196-198	There are several questions where additional information is specifically requested to be attached (e.g., copy of COA, work plans, sample materials). Is it permissible to include attachments that are not specifically requested?	Attachments that are not specifically requested may not be considered in the evaluation process.
173.	A.2.h	Page 197	Can bidders include experience from affiliate organizations/sister companies?	Yes.
174.	A.2.h	Page 197	Please clarify what "budget" information the state would like us to include (e.g., contract value)?	Per Section V.A.2.h.i.e, "Each project description shall identify whether the work was performed as the prime Contractor or as a Sub-Contractor. If a bidder performed as the prime Contractor, the description must provide the originally scheduled completion date and budget, as well as the actual (or currently planned) completion date and actual (or currently planned) budget." The budget as indicated above refers to the project budget verus the actual budget.
175.	N/A	Page 1	The Key Staff Resumes item from Attachment 5 requests that resumes be included in the proposal only for key personnel. However, Item	The State would prefer resumes for key personnel.

			A.2.i Summary of Bidder's Proposed Personnel/Management Approach on page 198 of the RFP requests that resumes be provided for all proposed personnel. Which does the state prefer?	
176.			What are the metric definitions associated with the measures outlined in this attachment?	All measures included in Attachment 7 are nationally recognized quality measures. More information can be found on the Adult Core Set Measures and Child Core Set Measures by visiting the CMS website at www.cms.gov. HEDIS measures can be found on the NCQA website at www.ncqa.org.
177.			For the Rx factors of 6.5% and 6.7%, could the underlying assumptions used be provided? i.e. Inflation, utilization, drug-mix, off-patent, new medications etc.	The State's actuary will conduct these analyses when developing actuarially sound rates in early 2016. At that time, this information will be available.
178.	Item 4	Page 1	Please define QI admin expenses allowed with the additional 3% admin cap and explain how those expenses differ from the expenses allowed in the MLR calculation	The Glossary of Terms is amended to add: **Quality Improvement (QI) Expenses**: These are expenses for the direct interaction of the insurer, providers and the enrollee or the enrollee's representatives (e.g., face-to-face, telephonic, web-based interactions or other means of communication) to improve health outcomes as defined below. This category can include costs for associated activities such as: **1.** Effective case management, Care coordination, and Chronic Disease Management, including: **a.** Patient centered intervention such as: **i.** Making/verifying appointments; **ii.** Medication and care compliance initiatives; **iii.** Arranging and managing transitions from one setting to another (such as hospital discharge to home or to a rehabilitation

				center); **iv.** Programs to support shared decision making with patients, their families and the patient's representatives; **v.** Reminding insured of provider appointment, lab tests or other appropriate contact with specific providers; **vi.** Incorporating feedback from the insured to effectively monitor compliance; **vii.** Providing coaching or other support to encourage compliance with evidence based medicine; **viii.** Activities to identify and encourage evidence based medicine; **ix.** Activities to prevent avoidable hospital admissions; **x.** Education and participation in self-management programs; and **xi.** Medication and care compliance initiatives, such as checking that the insured is following a medically effective prescribed regimen for dealing with the specific disease/condition and incorporating feedback from the insured in the management program to effectively monitor compliance. **b.** Improve patient safety; **c.** Wellness and health promotion activities; **d.** Health Information Technology (HIT) expenses related to Quality Improvement Activities: **i.** Data extraction, analysis and transmission in support of the activities described above; and **ii.** Activities designed to promote sharing of medical records to ensure that all clinical providers and accurate records from all participants in a patient's care. **2.** The following items are broadly excluded as not meeting the definitions above:

				a. All retrospective and concurrent Utilization Review; **b.** Fraud Prevention activities; **c.** The cost of developing and executing provider contracts and fees associated with establishing or managing a provider network; **d.** Provider Credentialing; **e.** Marketing expenses; **f.** All Accreditation Fees; **g.** Costs associated with establishing or maintaining a claims adjudication system; **h.** Costs associated with calculating and administering individual enrollee or employee incentives; and **i.** Any function or activity not expressly listed as approved.
179.	Item 4	Page 1	Can you confirm that if QI expenses are allowed for the numerator MLR calculations, they would then be classified as medical costs and not count towards the 10% administration cap.	The QI expenses allowed for the numerator would count towards the 10% administrative cap per state statute.
180.	Bidders Conference Rate Presentation	All pages	Is cost settlement for PRTF payments to Hastings Regional Center and Lincoln Regional Center included in this program? If so, why is it not included in the rate development?	Yes, the cost settlement for PRTF payments to Hastings Regional Center and Lincoln Regional Center is included in the developed rates. It is included as part of the “Other Policy Changes” in the NE Heritage Health Bidder's Conference Rate Presentation (Optumas) on slide 11 of 20.
181.	Bidders Conference Rate Presentation		Please detail what the service delivery adjustments are and how they were created	Please see the response to Question #158.

182.	Bidders Conference Rate Presentation		Please detail the immediate enrollment policy adjustment. How was this adjustment developed?	The impact of this program change was calculated by comparing the PMPM cost for members whom were in at least their second month of eligibility for the February to June 2014 time period to the PMPM cost for all members whom were eligible during that period. The difference between these two PMPM costs would estimate the impact of immediate enrollment for those members who had enrolled in the managed care program after the policy was implemented.
183.	Bidders Conference Rate Presentation		Please detail all other policy changes (APR-DRG, FQHC APM, BH Provider Increase) – how were these developed?	APR DRG: On July 1, 2014 the State of Nebraska moved from using the AP DRG payment methodology to the APR DRG payment methodology for inpatient hospital claims. This change impacts all hospitals that are reimbursed on a DRG basis; this excludes hospitals reimbursed on a per diem basis such as Critical Access Hospitals (CAHs) and rehab facilities. The impact of this change was calculated by first re-pricing all impacted inpatient hospital claims in the SFY14 base data, at the AP DRG version 27 weights and SFY14 hospital rates specific to each hospital. This was done to ensure that the comparison between the AP DRG and APR DRG reimbursement would not be influenced by any contracting or payment differences between the MCO reimbursement and the State AP DRG fee schedule. The State's actuaries then assigned an APR DRG and severity level to all inpatient hospital claims included in the analysis based on version 31 of the grouper. This was done by utilizing software from 3M who developed the APR DRG grouper. These claims were then re-priced using the APR DRG version 31 weights and SFY15 hospital rates. The final impact was calculated by comparing the percentage change from the SFY14 AP DRG re-priced amount to the SFY15 APR DRG re-priced amount for each category of aid and MCO. The transition to the APR DRG payment methodology was intended to be budget neutral at a global level, however it should be recognized that this may break down between health plans and especially between rate cells. The overall results do show that the

				impact is close to budget neutral in aggregate but does show increases and decreases by rate cell. FQHC APM: Effective 1/1/2016 the State will begin paying Federally Qualified Health Centers (FQHCs) a new Alternative Payment Methodology (APM) rate. To account for the impact this reimbursement change will have on the Heritage Health capitation rates, the State's actuaries identified all FQHC utilization in the base data and priced it at the new APM rate. The pricing was done separately for the FY14 and FY15 base data sets, and the resulting impact was blended together at a 50/50 rate consistent with the overall rate development. BH Provider Increase: The behavioral health provider increase is a legislatively-mandated fee schedule change applicable to behavioral health providers. Recently this change has been a 2.25% increase to behavioral health provider reimbursement, but that has not always been the case and is not guaranteed to continue. For projection to the Heritage Health contract period the State's actuaries assumed the 2.25% annual increase will remain consistent. The provider increase was applied by increasing data to reflect the number of fee schedule changes between the data time period and the contract period. For example, FY14 reimbursement was increased by 2.25% to reflect FY15 reimbursement levels. Then, the combined FY14/FY15 base (already adjusted to be at FY15 legislatively-mandated reimbursement levels) was increased for two more 2.25% fee schedule changes, one effective July 2015 and another anticipated to be effective July 2016. Finally, due to the 12-month calendar year contract period, one-half of the 2.25% program change anticipated to be effective July 2017 was applied.
184.	Bidders Conference Rate Presentation		Were the same trends by Category of service applied to each category of aid? Were unit cost and utilization trends	Attachment 23:"COS and COA Trends" contains the trends by category of service and major category of aid. The trend model used to develop these figures is not available. The development process consisted of reviewing FY13, FY14, and FY15 data by

			created separately? Please provide the trend analysis to support the chosen trend numbers.	month, category of service, and major category of aid. Data was controlled for membership mix by rolling up sub-categories of aid on the most recent month's membership mix to create major categories of aid. Data was also controlled for known policy changes by increasing data prior to the policy change to be consistent with the value after the policy change became effective. Nebraska data was the primary source for trend development, but the State's actuary's national and regional experience was also used to inform trend values. Additional details, such as utilization trend and unit cost trend, will be provided when rates are updated in the spring.
185.	Bidders Conference Rate Presentation		Please provide the detail behind the UNMC PMPM adjustment.	The University of Nebraska Medical Center (UNMC) providers are reimbursed at commercial fee levels. MCOs contract at levels more commensurate with Medicaid reimbursement, a supplemental payment is required to be paid to UNMC by each MCO to make these providers whole. The State includes this supplemental payment as part of the capitation rates, which is then passed through from the MCOs to UNMC. To develop this rate pass-through the State's actuaries receive a list of UNMC Provider IDs from the State as well as the current managed care entities. These lists were used to identify claims and services attributed to a UNMC provider. The State also provided the most recent UNMC fee schedules, which were used to calculate the difference between the UNMC fee schedule and the UNMC reimbursement inherent in (a) the FFS data for currently un-managed populations and (b) the MCO encounter data for populations currently enrolled in managed care. The difference between the adjusted reimbursement and the reimbursement reflected in the FFS and encounter data at current utilization levels is the amount paid as a supplemental rate to UNMC.
186.	Bidders Conference Rate Presentation		Please provide the development of the 2.9% NML for Katie Beckett and	See Response to Question #112.

			Maternity categories. How does this account for the quality initiatives and profit?	
187.	Bidders Conference Rate Presentation		Please provide the build of NMT for each rate cell.	Effective 7/1/2015, the Non-Emergency Transportation-Ambulance service will be provided as part of the managed care contract. This service was not a required benefit under the managed care contract during the duration of the base data period (SFY14-15). While very low utilization was included within some of the base data, historical Nebraska FFS data (SFY08-10) was trended to the contract period and used to supplement the base data. The PMPM added in by cohort and Rating Region for NEMT-Ambulance services can be found in Attachment 24: "NEMT-Ambulance Rates."
188.	Bidders Conference Rate Presentation		Will the retro adjustment be included in the revised rate that will be provided in the spring?	Yes.
189.	I.A.Schedule of Events	1	Given the short time to review the RFP in advance of the first Pre-Proposal Conference, we believe a second bidders' conference would be beneficial and most efficient for all. This will ensure that all bidders have an opportunity to understand the proposal in its entirety and result in the best possible bidding process. Please confirm the State will hold the second conference on 11/19.	See Addendum 2-Revised Schedule of Events.
190.	I.A.Schedule of Events	1	It is our understanding that the Attachment 11 rates are not final. Given the	See section IV.P.2 for a detailed description of the Capitation Rate Determination Process.

			anticipated large rate adjustments that will be made in the Spring, how will the winning MCOs be involved in determining the final rates for 1/1/17-6/30/17?	
191.	III QQ. Prices	24	Please confirm that bidding MCOs will not be required to submit anything, besides QQ, as part of their acceptance of the rates under the contract.	Confirmed. No cost proposal is required.
192.	IV. A.1 b. Program Description	30	This section states: "Nebraska Medicaid currently provides health care coverage for approximately 239,000 individuals each month at an annual cost of approximately $1.8 billion." However, Attachment 11 has an average of 228,000 eligibles that produce $1.1 billion in revenue including the UNMC supplemental payment. Please describe the difference. Are the rates presented in Attachment 11 capturing all of the expenses?	The difference is caused by populations and services excluded from Heritage Health. The rates presented in Attachment 11 are capturing expenses for the included populations and services.
193.	IV. A.1 d. Program Description	30	Please describe all current and anticipated CMS waivers under which this program will operate.	The current managed care program and Heritage Health will operate under State Plan and 1915(b) Waiver authority.
194.	IV.A.11. Excluded	32	This section states that the	The details requested in this question are not available. The members with a share of cost will be contained in the LTSS data

	Populations		following members are excluded: ""Beneficiaries who have excess income or who are required to pay a premium, except those who are continuously eligible due to a share of cost (SOC) obligation to a nursing facility or for HCBS Waiver services."" Therefore, please confirm the following about the members with SOC that are the MCOs' responsibility: a) Please provide a separate databook/amounts for the members who will be the MCOs' responsibility and have SOC by fiscal year, region, and rate cell. b) Please describe all administrative obligations of MCOs with respect to the collection of this share of cost. c) Please describe the manner in which rates are developed with regard to share of cost: is the rate developed in total, with the share of cost flowing through the state to the MCOs? Is the rate developed net of the share of cost obligation? Is	book, but the State's actuaries cannot presently isolate only those members with a share of cost obligation. The share of cost payments are paid to nursing facilities or HCBS providers that are outside of the benefits package of Heritage Health. Rates are developed net of the members' cost share obligation.

			there a settlement of some kind?"	
195.	IV.B.2.f. Member Enrollment/ Assignment	33	"Please clarify the MCOs' responsibility with regards to the retroactive time period: a) Please provide the membership, expenses, and utilization (by region, category of aid and category of service) associated for the total retroactive time period that the MCOs will be responsible for covering. b) Please provide the average length of the retroactive period by category of aid and region. c) Please describe the differences between the retroactive time period and the immediate enrollment. d) Is there a maximum retroactive period that MCOs would be responsible for? e) Is there any limitation on the types of services MCOs would be responsible for retroactive from enrollment date to retroactive eligibility date?"	Please see the response to Question #19 regarding a MCO's responsibility for retroactive time periods. Data analysis will be conducted to determine the cost of retroactive time periods compared to regular enrollment time periods. As discussed during the first pre-proposal conference and stated on the "NE Heritage Health Bidder's Conference Rate Presentation (Optumas)" retroactive time period analyses have not been conducted yet. The State's actuary will conduct these analyses when developing actuarially sound rates in early 2016. At that time, splits in the data as requested in parts a), b), and c) will be available.
196.	IV.B.2.f. Member Enrollment/	33	Please confirm that any retroactive liability will only go	See response to Question #19.

	Assignment		back to 1/1/17. For example, if a health plan is assigned a member on 4/1/17 whose eligibility date is 7/1/16, is the health responsible for claims incurred back to 7/1/16 or 1/1/17?	
197.	IV.B.2.f. Member Enrollment/ Assignment	33	In Optumas' presentation during the Pre-Proposal Conference, it was stated that there is limited credibility for the ABAD members under 1, such that it would be difficult to develop an actuarially sound rate cell for only these members. It was also stated during that meeting that an adjustment would be developed at a later date to capture any additional costs for retroactivity. We feel that the retroactive requirement could be particularly volatile for this population, and therefore, the retroactive adjustment would likely be difficult to calculate and have a significant impact on plan financial stability. Please consider covering retroactive costs for this population under fee for service, rather than making it the responsibility of winning MCOs	During rate development the contracted actuary separates AABD members under 1 from other AABD members. This allows for analysis of the population's spend and credibility. The contracted actuary will continue a similar practice with regards to retroactive enrollment expenses for AABD infants. While it is not anticipated that this population will become credible enough to stand alone for rate setting. The contracted actuary will continue to analyze it and develop rates to mitigate this population's volatility as much as possible.

198.	IV.3. Member Enrollment/ Assignment	34	Please confirm that there are no firm enrollment floors or caps to prevent certain MCOs from having more than or less than a certain percentage of total enrollment.	See Section IV.B.3. regarding the auto-assignment algorithm.
199.	IV.E.7. Telehealth and Telemonitoring Services	54	Please describe where the costs for these services are incorporated into the base data. Also provide the utilization and unit cost assumptions (by region and rate cell) for this service embedded in the capitation rates.	Telehealth services are currently submitted using a procedure code modifier. The claim associated with telehealth services is grouped into service categories based on different service type indicators, such as provider type, place of service, etc. The telehealth services predominantly fall into professional service categories including PCP, Specialist, and Other Practitioner. The contracted actuary does not have summaries for detailed line telehealth services available.
200.	IV.E.22. Medical Services for Special Populations	65	"Please provide the following related to the SHCN population: a) a separate data book (including membership, expenses and utilization by region, rate cell, and category of service) for the SHCN population. b) Please explain why the SHCN population is not included as a separate category of aid c) Please provide the process through which new MCOs (without historical claims data) are expected to identify	This level of detail is not available. The SHCN population is too small and volatile to maintain rating credibility as a separate category of aid. The State's actuary will continue reviewing this population to determine if it becomes credible. Historical pharmacy claims data will be provided.

			these members."	
201.	IV.I.7. Patient-Centeredness/Patient-Centered Medical Homes	97	Please describe where the costs for these services are incorporated into the base data. Please also provide the assumptions associated with these requirement in the development of the capitation rates.	Costs for services provided under a PCMH system are not itemized separately from services provided outside of a PCMH system. The non-medical loading applied to the rate is sufficient to fund health plan administrative efforts necessary to support PCMH programs.
202.	IV. I. 8. c. Pharmacy Network	98	For purposes of the provisions related to specialty pharmacies and specialty drugs, please provide a listing of NDC codes that are considered to be specialty drugs, as well as a description of the process of updating this list.	See response to Question #75.
203.	IV.L.2. Health-Risk Screening/Assessment	112	Please describe where the costs for these services are incorporated into the base data. Please also provide the assumptions built into the rates for this requirement.	The costs are considered in the admin portion of the capitation rates as they are not direct services.
204.	IV. P.2 Capitation Rate Determination Process	142	This section states that capitation rates will be in effect for the initial six month contract period beginning with the program start date. Later, it is stated that MLTC and its actuary will develop actuarially sound capitation rates. Please confirm that the	Section IV.P.2.c is amended to read: “Capitation rates will be in effect for the initial twelve (12) month contract period beginning at the contractor start date.”

			capitation rates shown in attachment 11 will be in effect from 1/1/2017 through 6/30/2017.	
205.	IV. P.2 Capitation Rate Determination Process	142	Please confirm whether the next set of capitation rates will be developed for the period 7/1/2017 through 6/30/2018 or through 12/31/2017.	The next set of capitation rates will be effective for Calendar Year 2018, 1/1/2018 – 12/31/2018.
206.	IV. P.2 Capitation Rate Determination Process	143	Please describe any adjustments made in the initial (1/1/17-6/30/17) capitation rate development to account for breakthrough therapies which have newly gained FDA approval and/ or are expected to gain FDA approval during the rating period.	No adjustments were made for breakthrough therapies. These treatments are reflected in the capitation rate to the extent they were provided in the base data. In addition, the pharmacy trend is higher than historical, in part due to the emergence of breakthrough therapies.
207.	IV. P.2 Capitation Rate Determination Process	143	Please describe any analyses/monitoring expected to be performed to measure and/ or predict the impact of breakthrough therapies which have newly gained FDA approval and/ or are expected to gain FDA approval as part of future rate development processes.	Prior to development of the final rate the State's actuary will reexamine emerging treatments that could be impactful on MCO pharmacy expenses. Historic experience will be adjusted as necessary to appropriately account for the anticipated impact of breakthrough treatments.
208.	IV. P.2 Capitation Rate Determination Process	143	One of the adjustments listed as being considered as part of the rate development is	See response to Question # 158.

			"Coordinated Care Savings." Please clarify these items and their values reflected in the initial rate development. If there are any such adjustments included within the initial rate development, please separate them between those adjustments applied to the existing managed care data and FFS, and further break down by region, category of service, and category of aid for both utilization and unit cost.	
209.	IV. P.2 e. Capitation Rate Determination Process	143	"This section of the RFP states that ""Capitation rates are developed using encounter data, fee-for-service data, and supplementary financial information, from each MCO under contract at the time of this RFP's release, for the eligible populations from State fiscal years 2013, 2014, and 2015." a) Please provide a detailed narrative and numerical exhibits (by fiscal year, data source, and rate cell) to describe the ways in which these multiple data sources were incorporated.	FY2013 data was only used for trend development. FY14 and FY15 data was blended together to create the two-year base data. Supplementary financial statements were used to validate the Managed Care Entity encounter data and to build in supplement, non-claims expense (such as CAH settlement payments). The data sources are used as follows: Physical Health Encounters are used for Physical Health services for populations currently enrolled in Physical Health managed care. Behavioral Health Encounters are used for Behavioral Health services for all populations. Fee-for-service data is used for pharmacy data for all populations and Physical Health services for populations not currently enrolled in Physical Health managed care (e.g. Duals, LTSS, Women with Cancer). More details can be found in Attachment 22: "Heritage Health Rate Development Narrative". Data was not adjusted for underreporting. IBNR adjustment values can be found in Attachment 25: "IBNR Assumptions by Source". Current MCOs were involved in validating the encounter data to ensure it was fully reported and consistent with their financial statements. The IBNR estimates reported on the financial statements were also

			b) Please clarify the values used to adjust each of these data sources for both IBNP and underreporting, and describe how the current MCOs provided input into these estimates. c) Please list and provide values for additional adjustments made to create the base data shown in Attachments 10-A and 10-B. d) Please describe how 2013 data is used to develop the initial rates. e) Please describe how the data was validated/reconciled, the sources used, and the results of the validation/reconciliation. f) Please describe how FY2015 and FY2016 data was adjusted and merged together. g) Please provide detailed information regarding any non-encounter based costs included in the base data such as provider incentives or value based agreements"	used to verify the accuracy of the IBNR adjustments, and these values were discussed with current MCOs. The only adjustments made to the encounter data to create the base data shown in Attachment 10-A and 10-B are IBRN, Supplemental Payments, and Subcapitation Expenses. IBNR is detailed in Attachment 25: "IBNR Assumptions by Source". Across both FY14 and FY15 Supplemental Payments are worth $11.2 million on a statewide basis and Subcapitation Expenses are work $13.8 million on a statewide basis. Subcapitation represents predominantly Vision subcapitated agreements, while Supplemental Payments represent non-claims payments, such as CAH settlements. FY13 data is used only in the development of trend. Current MCOs were involved in validating the encounter data to ensure it was fully reported and consistent with their financial statement. The IBNR estimates reported on the financial statements were also used to verify the accuracy of IBNR adjustments, and these values were discussed with current MCOs. FY16 data was not used. FY15 data was blended with FY14 data to develop the base data. Non-encounter expenditures such as CAH settlements or PCP shared risk agreements are included as part of the Supplemental Payments adjustment described earlier in the question response.
210.	IV. A.1.a	page 30	The RFP states that DHHS is	RFP 5151 Z1 only applies to the MLTC division.

			comprised of 6 divisions. Please describe the process used to capture all of the expenses from each division.	
211.	IV. A.1.a	page 30	The RFP states that DHHS is comprised of 6 divisions. What reconciliation process did DHHS and Optumas use to ensure all expenses were captured from each of these divisions?	See response to Question #210.
212.	IV. A.1.a	page 30	The RFP states that DHHS is comprised of 6 divisions. Please provide the reconciliation used to ensure all expenses were captured from each of these divisions.	See response to Question #210.
213.	IV.P.2. Capitation Rate Determination Process	143	A number of detailed analyses and narratives are described in this section related to the certification of capitation rates. We appreciate that this detail will be provided to MCOs and we understand that the final documents for the initial rate period will not be available until after the contract is awarded. However, in order to understand the development of the rates, we need to have a draft version of all of these documents that would tie out to the rates	See Attachment 22: "Heritage Health Rate Development Narrative", and Attachment 20: "COA-level Rate Development" for additional detail into the rate development process.

			shown in attachment 11, and which would include all adjustments, data, and trends to the level of detail used by the actuary as soon as possible. In particular, a number of disclosure requirements are outlined in the 2016 Medicaid Managed Care Rate Development Guide. Please ensure that your documentation reflects these requirements in order for bidders' to fully understand the rate development.	
214.	IV. P.2 h. Capitation Rate Determination Process	143	"This section states that the annual capitation review will include ""an analysis of any anticipated fee schedule changes or other programmatic changes to the HERITAGE HEALTH."" a) Please confirm that the intent of this analysis is to update rates proactively in advance of anticipated policy changes or fee schedule changes. b) Please provide this analysis, particularly of anticipated fee schedule and other programmatic changes, and how they have been	Capitation rates will be developed inclusive of any known or anticipated policy changes and fee schedule changes. The fee schedule changes built in to these rates include a 2.25% annual increase in reimbursement for Behavioral Health services and a 2% annual increase in reimbursement for Physical Health services. The provider increases are legislatively-mandated fee schedule changes. Recently these changes have been 2.25% and 2.0% for Behavioral Health and Physical Health services respectively, but that has not always been the case and is not guaranteed to continue. For projection to the Heritage Health contract period the contracted actuary assumed the annual increases will remain consistent. The Behavioral Health provider increase was applied by increasing data to reflect the number of fee schedule changes between the data time period and the contract period. For example, FY14 reimbursement was increased by 2.25% to reflect FY15 reimbursement levels. Then, the combined FY14/FY15 base (already adjusted to be at FY15 legislatively-mandated reimbursement levels) was increased for two more 2.25% fee schedule changes, one effective July 2015

			incorporated into this initial rate development. c) Please list and provide historical values and anticipated effective dates of any automatic fee schedule updates."	and another anticipated to be effective July 2016. Finally, due to the 12-month calendar year contract period, one-half of the 2.25% program change anticipated to be effective July 2017 was applied. The Physical Health provider increase was applied as unit cost trend for Physical Health Services. Recently the Behavioral Health fee schedule change has been 2.25% annually and the Physical Health fee schedule change has been 2.0% annually. The current rate development assumes these values will remain in effect until the CY2017 contract period. If the values are changed by future legislative sessions rates will be updated accordingly.
215.	IV P.5. Supplemental Delivery Payments	144	"Questions related to delivery payments: a) Please comment on the decision not to pay a supplemental kick for stillbirths, especially given the fact that the payment covers the mother's prenatal care, postpartum care, and the delivery, which can be the same or higher than a healthy delivery in the event of a stillbirth. b) Please also confirm that the rate was built exactly how the payment policy is outlined."	The supplemental maternity payment rate is established based on MLTC policy.
216.	IV P.5. Supplemental Delivery Payments	144	Please confirm payment of the maternity kick payment when there is no hospital	In the absence of a hospital inpatient stay, the MCO may submit other inpatient or outpatient services for the maternity care of the member to be eligible to receive a supplemental delivery payment. Costs associated with inpatient and outpatient maternity care are

			inpatient stay (e.g., situations when the mother deliveries at a birth center (non-inpatient) or at home), but a baby was delivered. Please also clarify how these types of events were reflected in the data.	included in capitation rate development.
217.	IV P.5. Supplemental Delivery Payments	144	"Please confirm which services are covered by the supplemental delivery payment: a) would all services (e.g., visits for broken leg) provided during the prenatal and postpartum period be covered, or only maternity related costs? b) If all costs are included within the supplemental delivery payment, please explain how the capitation rates for the relevant categories of aid are reduced for this payment. c) If only maternity related costs are included within the supplemental delivery payment, please explain why the exhibit for maternity services includes many of the same services covered by the monthly capitation rate payments (e.g. home health	a) All services b) The delivery window (5 months pre-delivery and 2 months post-delivery) is identified in the claims data. Any medical expense that falls within that window is re-classified from the original category of aid and into the Maternity case rate. c) See a above.

			and vision)."	
218.	IV. P.3 b Capitation Rates And Payment	144	Please describe in greater detail how partial months of enrollment are calculated for capitation payment purposes	Enrollment into managed care is monthly.
219.	IV. P.3 b Capitation Rates And Payment	144	Please confirm that member months are calculated in an identical fashion for the data book, capitation rate development and capitation payment purposes.	Confirmed.
220.	IV. P.8 Risk Adjustment	145	The RFP states: "For subsequent years of the contract, each MCO's proposed base capitation rates will be risk-adjusted based on the MCO's risk score…" Please clarify whether risk adjustment will start on 1/1/18 or 7/1/17.	The risk adjustment tool will be considered for the second contract period, beginning 1/1/18.

This addendum will become part of the proposal and should be acknowledged with the Request for Proposal.

ADDENDUM THREE
REVISIONS TO RFP

Date: November 10, 2015

To: All Bidders

From: Michelle Thompson/Teresa Fleming, Buyers
AS Materiel State Purchasing Bureau

RE: Addendum for Request for Proposal Number 5151Z1
to be opened December 22, 2015 at 2:00 p.m. Central Time

The following is hereby amended as follows:

Document	Section	Change From:	Change to:
RFP	IV.E.29.h	Add new section	Non-emergency transportation (except as indicated in Section IV.E.8.a)
RFP	IV.B.3.e	In accordance with 42 Code of Federal Regulations (CFR) 438.50(f), the automatic assignment methodology will seek to preserve existing provider-recipient relationships and relationships with providers that have traditionally served Medicaid recipients. After consideration of provider-recipient relationships, the methodology will assign recipients equitably among MCOs, excluding those subject to an intermediate sanction. The automatic assignment methodology will not take into consideration the enrollee's previous MCO assignment.	In accordance with 42 Code of Federal Regulations (CFR) 438.50(f), the automatic assignment methodology will seek to preserve existing provider-recipient relationships and relationships with providers that have traditionally served Medicaid recipients. After consideration of provider-recipient relationships, the methodology will assign recipients equitably among MCOs, excluding those subject to an intermediate sanction. The automatic assignment methodology will not take into consideration the enrollee's previous MCO assignment during the initial Heritage Health enrollment period.
RFP	IV.A.11.f	Add new section	Inmates of public institutions.
RFP	IV.B.10.a.iv	Remove section	
RFP	IV.F.10.f	Us of proprietary items that would require use of a specific browser or other interface is not allowed.	Use of proprietary items that would require use of a specific browser or other interface is not allowed.

RFP	IV.C.1.b	On June 1, 2015, the Centers for Medicare & Medicaid Services (CMS) published a Proposed Rule (CMS-2390-P) regarding Medicaid managed care. MLTC anticipates that the finalizing of this proposed rule will affect the contracts awarded as a result of this RFP. The MCO must include in its proposal: i. An analysis of the Proposed Rule that includes the MCO's interpretation of all provisions relevant to the contract requirements. ii. A plan that details the processes and timeline the MCO will implement to ensure compliance with all applicable requirements in the proposed rule on the contract's start date. This plan must take into consideration requirements CMS is placing on states that require MCO cooperation/compliance.	On June 1, 2015, the Centers for Medicare & Medicaid Services (CMS) published a Proposed Rule (CMS-2390-P) regarding Medicaid managed care. MLTC anticipates that the finalizing of this proposed rule will affect the contracts awarded as a result of this RFP. The MCO must submit 90 days prior to the contract start date or 60 days after the Proposed Rule is finalized (whichever is earlier), a plan that details the processes and timeline the MCO will implement to ensure compliance with all applicable requirements in the proposed rule on the contract's start date. This plan must take into consideration requirements CMS is placing on states that require MCO cooperation/compliance.
RFP	Glossary of Terms	**Primary care provider (PCP):** A medical professional chosen by or assigned to the member to provide primary care services. Provider types that can be PCPs are doctors of medicine (MDs) or doctors of osteopathic medicine (DOs) from any of the following practice areas: general practice, family practice, internal medicine, pediatrics, and obstetrics/gynecology (OB/GYN). Advanced practice nurses (APNs) and physician assistants may also serve as PCPs when they are practicing under the supervision of a physician who also qualifies as a PCP under this contract and specialize in family practice, internal medicine, pediatrics or obstetrics/gynecology.	**Primary care provider (PCP):** A medical professional chosen by or assigned to the member to provide primary care services. Provider types practicing within the scope of their respective Practice Acts may be doctors of medicine (MDs), doctors of osteopathic medicine (DOs), nurse practitioners, and physician assistants.
RFP	Glossary of Terms	**Primary care services:** All health care services and laboratory services customarily furnished by or through a general practitioner, family physician, internal medicine physician, obstetrician/gynecologist, or pediatrician, to the extent the furnishing of those services is legally authorized in the State in which the practitioner furnishes them.	**Primary care services:** All health care services and laboratory services customarily furnished by or through primary care provider, to the extent the furnishing of those services is legally authorized in the State in which the practitioner furnishes them.

Attachment 5		**Required with Proposal:** Proposed Rule Implementation Plan **Description:** Plan for complying with new CMS Medicaid managed care rules as described in Section IV.C – Business Requirements **Due Date:** Required with proposal	**90 Days Prior to Contract Start Date:** Proposed Rule Implementation Plan **Description:** Plan that details the processes and timeline the MCO will implement to ensure compliance with all applicable requirements in the proposed rule on the contract's start date. This plan must take into consideration requirements CMS is placing on states that require MCO cooperation/compliance. **Due Date:** 90 days prior to the contract start date or 60 days after the Proposed Rule is finalized (whichever is earlier).
Attachment 4	Core Competency 1	Core Competency 1: Facilitate ongoing patient relationship with physician in a physician-directed team.	Core Competency 1: Facilitate ongoing patient relationship with a primary care provider in a physician-directed team.
Attachment 4	Core Competency 1	6. Practice utilizes medical home team that provides team-based care composed of, but not limited to, the primary care physician(s), care coordinator, and office staff with a structure that values separate but collaborative functions and responsibilities of all members from clerical staff to physician.	6. Practice utilizes medical home team that provides team-based care composed of, but not limited to, the primary care provider(s), care coordinator, and office staff with a structure that values separate but collaborative functions and responsibilities of all members from clerical staff to physician.

This addendum will become part of the proposal and should be acknowledged with the Request for Proposal.

QUESTIONS and ANSWERS

Date: October 23, 2015

To: All Bidders

From: Michelle Thompson/Teresa Fleming, Buyers
AS Materiel State Purchasing Bureau

RE: Addendum for Request for Proposal Number 5151 Z1
to be opened December 22, 2015 at 2:00 p.m. Central Time

Questions and Answers

Following are the questions submitted and answers provided for the above mentioned Request for Proposal. The questions and answers are to be considered as part of the Request for Proposal. It is the Bidder's responsibility to check the State Purchasing Bureau website for all addenda or amendments.

QUESTIONS	ANSWERS
1. Is the Pre-Proposal Conference on Monday for Prospective Bidders only or may stakeholders such as my organization attend as well?	Anyone may attend the pre-proposal conference on Monday, October 26.

This addendum will become part of the proposal and should be acknowledged with the Request for Proposal.

Attachment 19
Proposal Statements and Questions

No.	RFP Section	Statement/Question	Page Limit
1.	Not applicable	If applicable, describe the MCO's proposed risk bearing partnerships/relationships including designated functions of each entity, and how delegated functions will be overseen.	2 pages
2.	Not applicable	Identify and describe any regulatory action or sanction, including both monetary and non-monetary sanctions imposed by any federal or state regulatory entity against the MCO's organization within the last five years. In addition, identify and describe any letter of deficiency issued, as well as any corrective actions required by any federal or state regulatory entity within the last five years that relate to Medicaid and CHIP contracts. Include the organization's parent company, affiliates, and subsidiaries in the response to this question.	Not applicable
3.	Not applicable	State whether or not the MCO is currently, or has been within the past five years, the subject of a criminal or civil investigation by a state or federal agency. If yes, provide an explanation with relevant details and the outcome. If the outcome was against the MCO, provide the corrective action plan or measures taken to prevent such future offenses. Include the organization's parent company, affiliates, and subsidiaries in the response to this question.	Not applicable
4.	III.G. Insurance Requirements	Describe the risk analysis, assumptions, cost estimates and rationale supporting the MCO's proposed reinsurance arrangements. If any reinsurance is provided through related parties, provide a disclosure of the entities and details causing the related party relationship.	2 pages
5.	IV.B Eligibility and Enrollment	Provide a comprehensive discussion of the MCO's approach to maximizing the number of members who have a relationship with a PCP, including: • The strategy the MCO will use initially, and on an ongoing basis, to ensure PCP selection within 30 calendar days. • Examples of successful strategies and lessons learned in encouraging PCP relationships.	2 pages
6.	IV.B Eligibility and Enrollment	Describe the MCO's anticipated process to utilize the eligibility and enrollment files from MLTC or its designee to manage membership. Include the process for resolving discrepancies between these files and internal membership records.	1 page

No.	RFP Section	Statement/Question	Page Limit
7.	IV.B Eligibility and Enrollment	Describe the interventions the MCO will use prior to seeking to disenroll a member who requests disenrollment outside the annual open enrollment period. Provide examples of scenarios in which the MCO has effectively intervened to avert disenrollment of a member or members.	2 pages
8.	IV.B Eligibility and Enrollment	Describe the MCO's process to identify unborn individuals anticipated to begin coverage at the time of birth. Describe the operational process to obtain identifying information when the unborn status changes to newborn.	1 page
9.	IV.B Eligibility and Enrollment	Describe the MCO's approach to working with other MCOs in the event a member changes his/her MCO during ongoing operations of the program. Describe how the MCO will work with other MCOs to ensure a seamless transition and transfer of relevant information.	1 page
10.	IV.B Business Requirements	Describe the approach the MCO will take to ensure compliance with all relevant provisions of Part 438 of Chapter 42 of the CFR, Title 471, 477, and 482 NAC.	Not applicable
11.	IV.C Business Requirements	Describe how the bidder meets the Federal definition of a MCO. Include a copy of the COA from the Department of Insurance.	1 page, excluding copy of COA
12.	IV.C Business Requirements	Describe the MCO's proposed approach for collaboration with other entities and programs, as required in Section IV.C.6.	3 pages
13.	IV.C Business Requirements	Describe if any of the MCO's Medicaid MCOs are accredited by NCQA and, if not currently accredited in Nebraska, how it will attain accreditation for its Nebraska MCO. Please describe any unsuccessful accreditation attempts in other states.	1 page
14.	IV.C Business Requirements	If applicable, describe any restriction of coverage for counseling or referral services the MCO is required to provide because of moral or religious obligation. Describe how the MCO will provide members with access to those services.	1 page
15.	IV.D Staffing Requirements	Describe the organization's number of employees, lines of business, and office locations. Submit an organizational chart showing the structure and lines of responsibility and authority in the company. Include the organization's parent organization, affiliates, and subsidiaries that will support this contract.	3 pages, excluding organizational chart
16.	IV.D Staffing Requirements	Provide an organizational chart for this contract, including but not limited to key staff and additional required staff. Label this "Nebraska Organizational	Not applicable

No.	RFP Section	Statement/Question	Page Limit
		Chart."	
17.	IV.D Staffing Requirements	In table format, indicate the proposed number of FTEs for each key staff and additional required staff for discrete time periods (no longer than 3 month intervals) from contract award through 6 months after the start date of operations and whether or not positions are located in Nebraska. Label this table "Proposed FTEs by Time Period."	Not applicable
18.	IV.D Staffing Requirements	Provide job descriptions (including education and experience qualifications) of employees in key staff positions.	1 page per job description
19.	IV.D Staffing Requirements	Describe how the MCO's administrative structure and practices will support the integration of the delivery of physical health, behavioral health, and pharmacy services.	4 pages
20.	IV.D Staffing Requirements	Describe how the MCO will train staff on issues that affect its members, including: issues related to housing, education, food, physical and sexual abuse, violence, food security; behavioral health risk and protective factors; finding community resources and making referrals to these agencies and other programs; and meeting the needs of the LTSS population, including individuals with developmental disabilities and mental health concerns.	6 pages
21.	IV.D Staffing Requirements	Describe how the MCO will coordinate with the MLTC Dental Benefits Manager, including processes for reciprocal referral for needed services. Include the MCO's plan to identify a dental services liaison.	2 pages
22.	IV.E. Covered Services and Benefits	Provide the MCO's definition of medical necessity. Describe the process for developing and periodically reviewing and revising the definition. Describe the degree to which the definition is consistent with or differs from MLTC's definition of medically necessity per 471 NAC 1-002.02A.	3 pages
23.	IV.E Covered Services and Benefits	Provide a description of the value added services the MCO proposes to offer to members. For each service: • Define and describe the service. • Identify the category or group of members eligible to receive the service if it is not appropriate for all members. • Note any limitations or restrictions that apply to the service. • Identify the types of providers responsible for providing the service. • Propose how and when members and providers will	Not applicable

No.	RFP Section	Statement/Question	Page Limit
		be notified of the service's availability. • Describe how a member may obtain/access the service. • Describe how the MCO will identify the expanded benefit in administrative or encounter data.	
24.	IV.E Covered Services and Benefits	Describe the MCO's approach to member education and outreach regarding EPSDT, including any innovative mechanisms. Address the use of the MCO's system for tracking each member's screening, diagnosis and treatment to ensure services are delivered within the established timeframes.	4 pages
25.	IV.E Covered Services and Benefits	Describe the MCO's plan to utilize telehealth for any services in the benefits package, including how the MCO will incorporate member preference for in-person or telehealth service, how it will be operationalized throughout the state, and how its use relates to the MCO's utilization management strategies.	3 pages
26.	IV.E Covered Services and Benefits	Describe the MCO's experience with an integrated pharmacy benefit in other states and specify the type of plan and enrollment. Provide a preliminary work plan identifying key milestones, tasks, and accountability for implementation of Pharmacy Services as described in the RFP.	3 pages, excluding preliminary work plan
27.	IV.E Covered Services and Benefits	Describe how the MCO will ensure compliance with the Mental Health Parity and Addiction Equity Act, including how the MCO will evaluate and measure its compliance.	3 pages
28.	IV.F Member Services and Education	Describe member services processes including: • Training of customer service staff (both initial and ongoing). • Routing calls to appropriate persons, including escalation. • Making information available to customer service staff (the type of information and how it is provided, e.g. hard copy or on-line search capacity). • Handling calls from members with limited English proficiency and persons who are hearing impaired. • Monitoring and ensuring the quality and accuracy of information provided to members. • Monitoring and ensuring adherence to performance standards. • How MSRs will interact with other organizations including MLTC, other MCOs, and other programs/social service entities (e.g., WIC, housing assistance, and homeless shelters). • After hours procedures.	6 pages
29.	IV.F Member Services	Describe the informational materials the MCO proposes	2 pages

No.	RFP Section	Statement/Question	Page Limit
	and Education	to send to new members.	
30.	IV.F Member Services and Education	Describe the approach the MCO will take to provide members with written material that is easily understood, including alternate formats and other languages. Address how the MCO will ensure that materials are at the appropriate reading level.	2 pages
31.	IV.F Member Services and Education	Provide an overview of the MCO's proposed member website, including how it will satisfy requirements in this RFP. Provide examples of information that will be available on the website and on portals for members.	6 pages
32.	IV.F Member Services and Education	Discuss the MCO's approach to welcoming new members, addressing requirements listed in the RFP. Discuss any proposed alternate methods or plans the MCO would use to effectively welcome members.	3 pages
33.	IV.F Member Services and Education	Detail the strategies the MCO will use to influence member behavior to access health care resources appropriately and adopt healthier lifestyles.	5 pages
34.	IV.F Member Services and Education	Describe the processes the MCO will put in place to ensure the MCO does not restrict the choice of providers from whom the member may receive family planning services and supplies.	1 page
35.	IV.F Member Services and Education	Describe proposed member education content and materials and attach examples used with Medicaid or CHIP populations in other states. Describe innovative methods the MCO has used for member education. Describe how the MCO will provide equitable member education throughout the State. Provide examples and descriptions of how member education will be used to improve service coordination including: • Integration of physical, behavioral health and pharmacy services. • EPSDT compliance. • Appropriate emergency room utilization. • The use of prenatal services. • The use of technological tools, including social media and mobile technology. • Partnership with community-based organizations for education and outreach.	10 pages
36.	IV.H Grievances and Appeals	Provide a flowchart and comprehensive written description of the MCO's member grievance and appeals process, including the approach for meeting the general requirements and plan to: • Ensure individuals who make decisions about grievances and appeals have the appropriate	3 pages

No.	RFP Section	Statement/Question	Page Limit
		expertise and were not involved in any previous level of review. • Ensure an expedited process exists when taking the standard time could seriously jeopardize the member's health. As part of this process, explain how the MCO will determine when the expedited process is necessary. • Use data from the grievance and appeals system to improve the MCO's operational performance.	
37.	IV.H Grievances and Appeals	Describe the approach the MCO will take to provide members with grievance, appeal, and State fair hearing information. Address how the MCO will ensure the grievance and appeals system policies and procedures, and all notices, will be available in the member's primary language and that reasonable assistance will be given to members to file a grievance or appeal.	2 pages
38.	IV.I Provider Network Requirements	Describe the MCO's proposed provider network outreach approach and recruitment strategy. Provide a detailed work plan for developing an adequate network within the timeframe described in Section IV.I. Describe the method the MCO plans to use on an ongoing basis to assess and ensure that MLTC's network standards are maintained, including standards related to: • Distance. • Appointment access. • Cultural competency. • After-hours access. • Inclusion of PCPs. • Inclusion of behavioral health providers. • Inclusion of high volume specialists. • Inclusion of FQHCs and RHCs. • Inclusion of urgent care centers. • Inclusion of pharmacies. • Inclusion of hospitals.	6 pages, excluding plan for developing an adequate network
39.	IV.I Provider Network Requirements	Describe the MCO's required PCP responsibilities and how the MCO will verify PCPs are performing them.	2 pages
40.	IV.I Provider Network Requirements	Describe innovative strategies the MCO's intends to use to identify specialty types for which member access is limited. Describe the MCO's intended initiatives for increasing the number of specialists within those specialty types that participate in the MCO's network. Identify potential challenges the MCO anticipates in ensuring members receive appropriate care for specialties where access concerns exist, and explain how the MCO will mitigate those challenges.	3 pages

No.	RFP Section	Statement/Question	Page Limit
41.	IV.I Provider Network Requirements	Describe the MCO's process for monitoring and ensuring adherence to MLTC's requirements regarding appointment availability and wait times.	2 pages
42.	IV.I Provider Network Requirements	Describe the MCO's approach to promoting and facilitating the capacity of its providers to provide: • Patient-centered care. • Improved health outcomes. • Member compliance. • Member satisfaction. Discuss the MCO's successes with patient-centeredness in other Medicaid programs, what lessons have been learned, and the MCO's planned approach in Nebraska.	3 pages
43.	IV.I Provider Network Requirements	Describe how the MCO's network development plan will establish patient-centered medical homes consistent with the requirements included in Section IV.I Provider Network Requirements. The description must address requirements in the RFP including: • Promoting and facilitating provider capacity to meet PCMH standards. • Maintaining contact with members throughout their interactions with the health care system. • Managing referrals. • Illness and disease prevention. • Encouraging active participation of the member or family/guardian/authorized representative in health care decision-making • Encouraging the use of specialty services and supports. • Providing access to care outside normal business hours. • Facilitating open scheduling and same-day appointments where possible.	5 pages
44.	IV.I Provider Network Requirements	Describe how the MCO would respond to the network termination or loss of a large-scale provider group or health system. Take the following areas into consideration in the response: • Notification to MLTC. • Coordination with the PBM. • The automated systems and membership supports used to assist affected members with provider transitions. • Systems and policies used for continuity of care of members experiencing provider transitions. • Impact if the loss is in a geographic area where other providers of the same provider type are not available and the MCO's response to that impact.	3 pages

No.	RFP Section	Statement/Question	Page Limit
45.	IV.I Provider Network Requirements	Describe the MCO's credentialing and re-credentialing process including: • Ensuring that providers are enrolled in Medicaid and have a valid identification number. • Obtaining information on ownership and control. • Identifying excluded providers and persons convicted of crimes searches. • Using quality and utilization measures in the recredentialing process.	3 pages
46.	IV.I Provider Network Requirements	Explain the process the MCO will put in place to maintain the provider file with detailed information on each provider sufficient to support provider payment, including issuance of IRS 1099 forms, meeting all federal and MLTC reporting requirements, and cross referencing State and Federal identification numbers to ensure excluded providers are identified.	2 pages
47.	IV.J Provider Services	Provide a description of the MCO's provider services program/department and how the MCO intends to partner with the provider community to deliver covered services. Include: • Information available in the provider handbook or other media. • Description of any committees the MCO will form for providers to offer input regarding issues such as the MCO's service delivery, MCO/provider interactions, and potential opportunities/ innovations for improved health outcomes. • Description of how the MCO will develop, establish and maintain its provider advisory committee, with representation as identified in this RFP. • Sample provider outreach methods.	4 pages
48.	IV.J Provider Services	Describe the MCO's Provider Services toll-free telephone line, including: • How the MCO will provide a fully-staffed line between the hours of 7:00 a.m. and 8:00 p.m. CST. Monday through Friday, to address non-emergency issues and how the MCO will provide a clinical pharmacist staffed at all times during the hours of 8:00 a.m. and 8:00 p.m. CST Monday through Friday. • How the MCO will ensure that provider calls are acknowledged and resolved within three business days of receipt. • The location of operations, and if out of state, describe how the MCO will accommodate services for Nebraska. • How the MCO will measure and monitor the	3 pages

No.	RFP Section	Statement/Question	Page Limit
		accuracy of responses provided by call center staff, as well as caller satisfaction.	
49.	IV.J Provider Services	Provide an overview of the MCO's proposed provider website, including examples of information that will be available on the website and on portals for providers. Include proposed resources and tools that will be of use to providers. Please provide a description of technology that will be used to enhance the provider website.	5 pages excluding sample resources, tools and materials
50.	IV.J Provider Services	Describe the MCO's proposed provider education and training program, including: • A description of the training program. • A work plan that outlines education and training activities, including frequency of office visits to conduct activities. • A listing of the types of materials and content the MCO will distribute (include three samples of materials). • How the MCO will evaluate usefulness of educational sessions and utilize feedback to influence future training sessions.	5 pages, excluding sample materials
51.	IV.J Provider Services	Describe the MCO's proposed approach to promoting communication between providers and the MCO. Include a discussion of how the MCO will work with providers to improve administrative efficiencies, and engage providers in developing and monitoring clinical policies and operational issues. Discuss how the provider network liaison will work with the Provider Advisory Committee to respond to provider concerns, develop provider trainings, and enhance MCO-provider communication strategies. Provide examples of how the MCO has successfully collaborated with providers to identify necessary changes and how these changes have been implemented.	2 pages
52.	IV.J Provider Services	Provide a description of the MCO's proposed approach to handling provider complaints. Include intended interaction and correspondence, as well as timeframes in which the MCO will acknowledge and resolve inquiries and grievances. Explain how the MCO will track provider complaints and how the MCO will use this type of information to improve provider services. Include a description of any type of internal reporting the MCO will perform, and how the MCO will use reporting information to influence the activities of the MCO's provider services representatives.	3 pages
53.	IV.J	Describe the MCO's plans and ability to support network providers' "meaningful use" of electronic health records	1 page

No.	RFP Section	Statement/Question	Page Limit
	Provider Services	and current/future Federal IT requirements.	
54.	IV.J Provider Services	Discuss how the MCO will engage and educate PCPs about their role in the provision of behavioral health services and the coordination of co-existing conditions.	2 pages
55.	IV.J Provider Services	Describe the approach the MCO will take to assess provider satisfaction, including tools the MCO plans to use, frequency of assessment, and responsible parties. Provide relevant examples of how the MCO has utilized survey results to implement quality improvements in similar programs and how these changes have improved outcomes.	5 pages
56.	IV.K Subcontracting Requirements	For each subcontractor included in the proposal, provide the organization's role in this project, corporate background, size, resources and details addressing the following: • The date the company was formed, established or created. • Ownership structure (whether public, partnership, subsidiary, or specified other). • Organizational chart. • Total number of employees. • Whether the subcontractor is currently providing services for the MCO in other states and the subcontractor's location.	1 page per subcontracting organization
57.	IV.K Subcontracting Requirements	For subcontracted roles included in the proposal, describe the MCO's process for monitoring and evaluating performance and compliance, including but not limited to how the MCO will: • Ensure receipt of all required data including encounter data. • Ensure that utilization of health care services is at an appropriate level. • Ensure delivery of administrative and health care services at an acceptable or higher level of care to meet all standards required by this RFP. • Ensure adherence to required grievance policies and procedures. • Ensure that subcontracts do not contain terms for reimbursement at rates that are less than the published Medicaid FFS rate in effect on the date of service unless a request has been submitted to and approved by MLTC.	8 pages
58.	IV.L Care Management	Provide a comprehensive discussion of the MCO's care management program, including: • Coordination of services using person-centered strategies.	Not applicable

No.	RFP Section	Statement/Question	Page Limit
		• Interventions focused on the whole person. • Management of co-morbidities. • Incorporation of best practices for behavioral health. • Member engagement in self-management strategies. • Social determinants of health, including risk and protective factors for behavioral health concerns. • Identification and tracking of members whose clinical conditions or social factors place them at an increased risk for circumstances necessitating a higher level of care management services. Provide case studies and experience from other states illustrating the MCO's ability to successfully address community differences in its care management approach.	
59.	IV.L Care Management	Describe the MCO's approach for identifying members in need of care management services, including: • The proposed process for providing a health risk screening to all members upon enrollment to identify and assess members potentially eligible for care management services, including those who have or are likely to experience catastrophic or other high-cost or high-risk conditions. • A description of the algorithms and methodologies the MCO will use to identify members potentially eligible for care management. • The proposed process for conducting health risk assessments for members identified as potentially eligible for care management. Submit the proposed health risk assessment template that the MCO plans to use.	5 pages
60.	IV.L Care Management	Describe the specific types of services members will receive at each risk level. Provide recommendations for additional innovative care management strategies, if any, MLTC may want to consider.	5 pages
61.	IV.L Care Management	Describe how the MCO will assist members to identify and gain access to community resources that provide services the Medicaid program does not cover.	2 pages
62.	IV.L Care Management	Describe the MCO's strategy to address the unique challenges when coordinating care for dual-eligible individuals who receive their services from both Medicare and Medicaid.	2 pages
63.	IV.L Care Management	Describe the process for care coordination for members who are Tribal members or are otherwise eligible for care through Indian Health Services.	1 page
64.	IV.L	Describe how the MCO will coordinate service planning, service delivery, and post-discharge care among	4 pages

No.	RFP Section	Statement/Question	Page Limit
	Care Management	discharge planners (including State psychiatric hospitals) and home health and other service providers. Include the MCO's approach to care management for youth discharged from residential care. Explain how the MCO will monitor the post-discharge care of members who receive services in remote areas.	
65.	IV.L Care Management	Describe how the MCO will use data and evidence-based decision support tools, both within its organization and in working with providers and stakeholders, to maximize care coordination for members, improve outcomes, and create cost efficiencies. Discuss how these tools and data and systems will be integrated to implement outcome- and value-oriented payment models. Describe the MCO's experience and specific results.	5 pages
66.	IV.L Care Management	Provide a proposed plan for coordinating efforts for members who may be involved in multiple State programs, including those enrolled in HCBS waivers. Describe how the MCO will deploy care management activities under this RFP in a manner that will not duplicate the activities provided under HCBS waivers and will facilitate sharing of information across DHHS-administered programs.	3 pages
67.	IV.L Care Management	Describe the MCO's outreach program to encourage women to seek prenatal services during their first trimester of pregnancy and how the MCO will implement required health risk screening and follow up, when applicable, for pregnant members.	2 pages
68.	IV.M Quality Management	Provide a description of the MCO's proposed QAPI program. Include the following in the description: • The proposed structure, and policies and procedures that explain the accountability of each organizational unit. • The program's infrastructure, including coordination with subcontractors and corporate entities, if applicable. • Proposed QAPIC membership and committee responsibilities. • How the MCO will comply with and support MLTC's quality strategy. • How focus areas will be selected, including how data will be used in the selection process. • The proposed QAPI work plan, including planned initiatives.	10 pages
69.	IV.M Quality	Describe how the MCO will measure and track the outcome of individual quality improvement interventions	3 pages

No.	RFP Section	Statement/Question	Page Limit
	Management	over time.	
70.	IV.M Quality Management	Describe experience in using results of performance measures, member satisfaction surveys, and other data to drive improvements and positive affect the health care status of members. Provide examples of changes implemented to improve the program and members' health outcomes.	5 pages
71.	IV.M Quality Management	Describe how the MCO will assess the quality and appropriateness of care furnished to members with special health care needs, members with co-occuring physical and behavioral health concerns, and dual-eligible members.	3 pages
72.	IV.M Quality Management	Describe the MCO's process for soliciting feedback and recommendations from key stakeholders, members, and families/caregivers, and using the feedback to improve the MCO's quality of care.	2 pages
73.	IV.M Quality Management	Describe the MCO's proposed methodology to identify, design, implement, and evaluate PIPs. Provide examples of PIPs conducted by the MCO, and how operations improved because of their results. Discuss how the MCO will collaborate with MLTC and other MCOs to conduct statewide PIPs.	3 pages
74.	IV.M Quality Management	Discuss the MCO's approaches to annual member satisfaction surveys. Provide relevant examples of how the MCO has utilized survey results to implement quality improvements in similar programs and how these changes have improved outcomes.	1 page
75.	IV.M Quality Management	Discuss the MCO's experience with submitting HEDIS measures. Indicate whether the measures were reported for a State Medicaid, CHIP, or commercial product line.	1 page
76.	IV.M Quality Management	Provide the MCO's vision for the MCO's Clinical Advisory Committee. Discuss how the requirements of the RFP will be met.	2 pages
77.	IV.M Quality Management	Describe the MCO's practice of profiling the quality of care delivered by PCPs, specialists, and hospitals, including the methodology for determining which and how many providers will be profiled. • Submit sample quality reports. • Describe the rationale for selected the measures that are gathered/reported. • Describe the proposed frequency of profiling activities.	3 pages, excluding sample quality reports

No.	RFP Section	Statement/Question	Page Limit
78.	IV.M Quality Management	How will the MCO use the Member Advisory Committee to improve quality of care and direct quality and operational changes? What representation does the MCO plan to have on each committee (e.g., stakeholder types, from what geographic areas)? How will the MCO identify participants of the Member Advisory Committees? Provide examples from other states where the MCO has collaborated with members for program improvement.	5 pages
79.	IV.M Quality Management	Describe the information the MCO will provide to members and providers about the QAPI program.	2 pages
80.	IV.N Utilization Management	Describe the MCO's approach to utilization management, including: • Innovations and automation the MCO will use for its UM program. • Accountability for developing, implementing, and monitoring compliance with utilization policies and procedures, and consistent application of criteria by individual clinical reviewers. • Mechanisms to detect and document over- and under-utilization of medical services. • Processes and resources used to develop and regularly review utilization review criteria. • How the MCO will use its UM Committee to support UM activities.	5 pages
81.	IV.N Utilization Management	Describe the process the MCO will have in place to determine appropriate practice guidelines (including for behavioral health), notify providers of new practice guidelines, and monitor implementation of those guidelines.	2 pages
82.	IV.N Utilization Management	As one of the largest payers in Nebraska, MLTC has an important role to play to move the health care system to a more cost-effective model that improves outcomes. Provide specific initiatives the MCO will pursue to deal with "waste" in the existing system and improve outcomes. Provide specific information regarding the initiatives that will be pursued to improve quality and enhance cost containment (including the stakeholders involved, the timelines, and the desired outcomes).	4 pages
83.	IV.N Utilization Management	Describe the MCO's proposed approach to prior authorization, including: • The data sources and processes to determine which services require prior authorization, and how often these requirements will be reevaluated. Describe what will be considered in the reevaluation	4 pages

No.	RFP Section	Statement/Question	Page Limit
		of need for current prior authorization requirements. • The proposed prior authorization processes for members requiring services from non-participating providers and expedited prior authorization. • The role of the Clinical Advisory Committee in developing service authorization procedures. • The MCO's process for notifying providers either verbally or in writing, and the member in writing, of denials or decisions to authorize services in amount duration or scope that is less than requested.	
84.	IV.N Utilization Management	Provide a listing of services for which the MCO will require prior authorization and describe how the MCO will communicate this information, as well as the results of authorization decisions, to providers and members.	2 pages excluding the listing of services
85.	IV.N Utilization Management	Describe how the MCO will ensure members receive written and timely notice of action relating to adverse actions taken by the MCO.	1 page
86.	IV.N Utilization Management	Describe the MCO's process for conducting concurrent reviews for inpatient services.	2 pages
87.	IV.N Utilization Management	Describe the MCO's process for conducting retrospective reviews to examine trends, issues, and problems in utilization.	2 pages
88.	IV.N Utilization Management	Describe the initiatives the MCO will implement to control unnecessary ED utilization, avoidable hospitalizations, and hospital readmissions. Discuss how the MCO will ensure that care is provided in the most appropriate and cost effective setting. Include strategies that address access to primary care services through patient centeredness principles; the use of urgent care centers and retail clinics; and, interventions targeted to super-utilizers, such as patients with asthma, diabetes, chronic pain, and/or behavioral health conditions.	6 pages
89.	IV.N Utilization Management	Describe the MCO's proposed MTM program, including a description of the inclusion criteria that the MCO proposes to use. Also, include any vendor(s) that will be subcontracted by the MCO to perform or support MTM services. Provide a detailed description of tools the MCO will use to ensure the active engagement of the retail pharmacies in the MTM program.	4 pages
90.	IV.N Utilization Management	Describe the MCO's DUR program including prospective and retrospective DUR activities. Include a description of: • Prescriber and pharmacy education programs.	3 pages

No.	RFP Section	Statement/Question	Page Limit
		• Collaboration with MLTC's DUR. • How DUR results will be used to inform MTM education and outreach.	
91.	IV.N Utilization Management	Describe the MCO's proposed psychotropic drug oversight program to ensure appropriate utilization, including a description of the inclusion criteria that the MCO proposes to use to monitor the appropriate use of psychotropic medications. Provide a detailed description of: • Tools to monitor and measure psychotropic prescribing patterns and usage. • Processes to actively engage retail pharmacies and pharmacists in the oversight program. • Plans for prescriber and pharmacy interventions that reduce unsupported atypical antipsychotic prescribing and prescribing of multiple medications to the same member. • Processes to ensure that psychotropic medications prescribed to children are being used appropriately and for the indicated diagnosis.	4 pages
92.	IV.N Utilization Management	Describe the MCO's methodology to assess disparities in treatment among races and ethnic groups and correct those disparities.	2 pages
93.	IV.O Program Integrity	Describe the MCO's approach for meeting the Program Integrity requirements described in the RFP, including but not limited to a compliance plan for the prevention, detection, reporting, and implementation of corrective actions for suspected cases of FWA and erroneous payments. Include best practices the MCO has utilized in other states.	4 pages
94.	IV.O Program Integrity	Describe how the MCO currently works with other entities that investigate and prosecute provider and member fraud, waste, and abuse. How will the MCO apply methods in Nebraska?	2 pages
95.	IV.O Program Integrity	Currently, how does the MCO educate members and providers to prevent fraud, waste, abuse, and erroneous payments? How will the MCO apply methods in Nebraska?	3 pages
96.	IV.O Program Integrity	Describe the MCO's method and process for capturing TPL and payment information from its claims system. Explain how the MCO will use this information.	3 pages
97.	IV.Q Provider Reimbursement	Provide a detailed description of the MCO's approach to implementing a value-based purchasing model with providers. Include at a minimum the MCO's:	6 pages

No.	RFP Section	Statement/Question	Page Limit
		• Philosophy regarding value-based purchasing and risk-sharing agreements and evidence of effective use in Nebraska or other markets • Approach to identifying initiatives and performance measures on which to focus, proposed engagement strategies to encourage provider participation, incentives the MCO will use, and methodology and timing for determining if providers have met requirements • Plan for entering into value-based purchasing agreements with 30% of its provider network by December 31, 2019. • Discussion of best practices and lessons learned.	
98.	IV.Q Provider Reimbursement	Provide a description of the MCO's proposed MAC program, including methods for setting MAC prices, criteria used to select covered MAC drugs, process for resolving disputes regarding the MAC value, how the MCO will evaluate its MAC program, and any other program components the MCO considers important for achieving the State's NMMCP goals. Describe the MCO's experience with establishing MAC programs in other states, and highlight strengths and challenges.	6 pages
99.	IV.Q Provider Reimbursement	Describe the MCO's approach to ensuring that out of network prior authorization and payment issues are resolved expeditiously in instances when the MCO is unable to provide necessary services to a member within its network.	2 pages
100.	IV.Q Provider Reimbursement	Describe the MCO's proposed process for the annual year-end cost settlement process with critical access hospitals.	1 page

No.	RFP Section	Statement/Question	Page Limit
101.	IV.R Systems and Technical Requirements	Provide a general system description that details how each component of the MCO's health information system will support the major functional areas of NMMCP. Include a systems diagram that highlights each system component, including subcontractor components, and the interfacing or supporting systems used to ensure compliance with RFP requirements. Describe how the MCO's system will share information between Nebraska's systems and its own system to avoid duplication of effort. Identify any requirements that cannot be met without custom modifications or updates to the MCO's systems. If modifications or updates or updates are required, describe them and the MCO's plan for completion prior to program operations.	12 pages, not including the systems diagram
102.	IV.R Systems and Technical Requirements	Provide a description of how the MCO will comply with applicable Federal (including but not limited to HIPAA) standards for information exchange, and ensure adequate system access management and information accessibility. Affirm the MCO's use of HIPAA-compliant files and transaction standards. Include the process for resolving discrepancies between member eligibility files and the MCO's internal membership records, including differences in members' addresses.	3 pages
103.	IV.R Systems and Technical Requirements	Describe the MCO's approach to monitoring system availability issues and the resolution process. Provide a description of the MCO's system help desk. Include the MCO's process for ensuring that recurring problems, not specific to system unavailability, are identified and reported to MCO management within one business day of recognition and are promptly corrected.	2 pages
104.	IV.R Systems and Technical Requirements	Provide a description of the MCO's eligibility and enrollment database. Include a description of how the MCO will: • Complete updates within the timeframes specified in the contract. • Identify members across multiple populations and systems. • Monitor, track, and resolve any discrepancies between the enrollment files and the MCO's system (e.g., duplication of records and information mismatches).	2 pages

No.	RFP Section	Statement/Question	Page Limit
105.	IV.R Systems and Technical Requirements	Provide a description of the MCO's information security management functions. Include a description of proposed access restrictions for various hierarchical levels, controls for managing information integrity, audit trails, and physical safeguards of data processing facilities.	3 pages
106.	IV.R Systems and Technical Requirements	Describe the MCO's business continuity, contingency, and recovery planning. Attach a copy of the MCO's plan, or summarize how the plan addresses the following aspects of emergency preparedness and disaster recovery: • Operational and system redundancy in place to reduce the risk of down-time. • System and operational back-up sites. • Contingency and recovery planning including resumption of operations. • Prioritized business functions for resumption of operations and responsible key personnel. • Employee and supplier preparedness, including a plan for training and communication to employees and suppliers and identified responsibilities of key personnel, in the event communications are unavailable. • Approach to provider preparedness for continuity of member care and assurance of payment for services rendered in good faith. • Testing approach and regular schedule to improve and update the plan over time.	3 pages, excluding sample plan
107.	IV.S Claims Management	Describe the MCO's strategies for ensuring its claim processing is ready at the time of contract implementation, to ensure timely accurate claims processing. Include the MCO's strategy for identifying problem areas, and how the MCO will ensure rapid response.	2 pages
108.	IV.S Claims Management	Describe the MCO's methodology for ensuring that claims payment accuracy standards will be achieved. At a minimum, address: • The process for auditing claims samples. • Documentation of the results of these audits. • The processes for implementing any necessary corrective actions resulting from the audit.	3 pages
109.	IV.S Claims	Describe in detail how the MCO will verify that services were actually provided including:	3 pages

No.	RFP Section	Statement/Question	Page Limit
	Management	• Minimum sampling criteria to ensure a representative sample. • How results of monitoring will be reported to the State quarterly.	
110.	IV.S Claims Management	Describe the drug reference database used in pharmacy claims processing, and the update schedule, including term dates, obsolete dates, and rebate status.	2 pages
111.	IV.S Claims Management	Describe how the State Medicaid PDL will be integrated into the MCO pharmacy claims system.	2 pages
112.	IV.S Claims Management	Describe the MCO's approach for ensuring encounter data is submitted accurately and timely to MLTC, consistent with required formats. Include in the response how the MCO proposes to monitor data completeness and manage the non-submission of encounter data by a provider or subcontractor.	5 pages
113.	IV.S Claims Management	Describe the MCO's proposed processes for coordination of benefits for dually-eligible members.	2 pages
114.	IV.T Reporting and Deliverables	Provide an example of dashboards that the MCO will use to track MCO performance for MCO leadership and the QAPI Committee.	Not applicable
115.	IV.T Reporting and Deliverables	Provide examples of the following reports: Member Grievance System Performance Improvement Projects Care Management How will the MCO use required reports in its day to day management and operations?	Not applicable
116.	IV.X Transition and Implementation	Describe how the MCO will coordinate the initial transition of individuals in the follow situations to ensure continuity of care: • From another MCO. • From FFS , including specific approaches for the aged and disabled populations who are new to managed care. Include processes for engaging existing providers in the transition.	5 pages
117.	IV.Z FFS Claims Management and Processing	Provide a detailed description of the MCO's approach to implementing the necessary functionality to support FFS claims processing.	Not applicable

No.	RFP Section	Statement/Question	Page Limit
118.	IV.Z FFS Claims Management and Processing	Describe the level of effort necessary to support Nebraska program and policy changes, including but not limited to new covered services, prior authorization requirements, or additional populations.	Not applicable
119.	IV.Z FFS Claims Management and Processing	Describe how the MCO will maintain a distinction between FFS and managed care processing rules, claims transactions, providers, members and prior authorizations within the system.	Not applicable
120.	IV.Z FFS Claims Management and Processing	Provide an explanation of the MCO's plan and approach for business operations to support the FFS volume vs. the risk-based volume. Will the plan have separate or joint business operations units for some or all processes?	Not applicable
121.	IV.Z FFS Claims Management and Processing	Provide an explanation of the significant risks associated with the implementation and ongoing operation of claims broker services, and provide mitigation strategies for those risks.	Not applicable
122.	IV.Z FFS Claims Management and Processing	Provide a timeline for implementation of claims broker functionality, including the number of months that it will take to pay FFS claims.	Not applicable

Attachment 18 – Liquidated Damages

Failed Deliverable	Penalty
Readiness Review	MLTC will conduct a formal review of the MCO's readiness to implement all required services described in this RFP. Should the MCO fail the review, MLTC may assess damages of $5,000 for each calendar day until such time as MLTC certifies that the MCO has met all readiness requirements.
Date of Implementation	Should the MCO fail to begin full operations on the contract start date, and should MLTC determine that the MCO is responsible for the delay, MLTC may assess damages of $10,000.00 per calendar day for each day beyond the contract start date that the MCO fails to begin full operations.
Network Performance Requirement	The MCO must have a contracted provider network in place and submit the required attestation of network sufficiency 90 calendar days prior to the contract start date. A penalty of $1,000.00 shall be assessed, at MLTC' discretion, per calendar day for each day that the provider network is not adequate to meet the service needs of the covered populations as described in Section X - Provider Network and the attestation of network sufficiency has not been received.
Employment of Key Personnel	The MCO must meet all key personnel requirements specified in Section X of this RFP. MLTC may assess a penalty of $1,000 per day, per position, for each day after the 30 allowed calendar days that a key position remains unfilled by a qualified person approved by MLTC.
Excessive Reversals on Appeal	If the MCO exceeds 10% of member appeals overturned upon final appeal over a 12-month period (January-December or the first twelve months that the contract is in effect), a penalty of $25,000 may be imposed for every additional overturned appeal. This penalty may also be assessed for each occurrence in which the MCO does not provide the medical services or requirements set forth in an administrative decision by MLTC or a state fair hearing.
Ongoing and Ad Hoc Reporting	As detailed in Attachment 6, MLTC may assess a penalty of $1,000 for each calendar day that a report is late, inaccurate, includes less than the required copies, or is not in the approved format.

Encounter Data	$10,000 per calendar day for each day after the due date that the monthly encounter data has not been received in the format and per specifications required by MLTC. $10,000 per calendar day for each day encounter data is received after the due date, for failure to correct and resubmit encounter data that was originally returned to the MCO for correction because submission data was in excess of the 5% error rate threshold, until acceptance of the data. $10,000 per return of re-submission of encounter data that was returned to the MCO, as submission data was in excess of the 5% error rate threshold, for correction and was rejected for the second time. $10,000 per calendar day for inability to reconcile financial statement of medical expenses paid with the total dollars submitted through encounter data for that quarter within 10% for 2017 and 5% for 2018. $10,000 per occurrence of medical record review by MLTC or its designee where the MCO or its provider(s) denotes provision of services which were not submitted in the encounter data regardless of whether or not the provider was paid for the service that was documented.
Claims Processing	90% of all clean claims must be paid within 15 business days of the date of receipt. If not met, subject to $5,000 for the each month that an MCO's claims performance percentages by claim type fall below the performance standard. 99% of all clean claims must be paid within 60 calendar days of the date of receipt. If not met, subject to $5,000 for the each month that an MCO's claims performance percentages by claim type fall below the performance standard.
Pharmacy Claims Processing	90% of all clean claims must be paid within 7 calendar days of the date of receipt. If not met, subject to $5,000 for the each month that an MCO's claims performance percentages by claim type fall below the performance standard. 99% of all clean claims must be paid within 14 calendar days of the date of receipt. If not met, subject to $5,000 for the each month that an MCO's claims performance percentages by claim type fall below the performance standard.
PCP Assignment	$5,000 per calendar day for failure to assign a PCP within one month of the effective date of enrollment until the assignment is made.

Member Services	$5,000 per calendar day for failure to provide member services functions from 8 a.m. to 5 p.m. central time, Monday through Friday, to address nonemergency issues encountered by members, and 24 hours a day, 7 days a week to address emergency issues encountered by members.
Provider Services	$5,000 per calendar day for failure to furnish provider services functions from 7 a.m. to 8 p.m. central time, Monday through Friday, to address nonemergency issues encountered by members, and 24 hours a day, 7 days a week to address emergency issues encountered by members and for failure to handle emergent provider issues on a 24 hours a day, 7 days a week basis.
Intermediate Sanctions	
Per 42 CFR 438.704(b)(1): A maximum of $25,000 for each determination of failure to provide services; misrepresentation or false statements to enrollees, potential enrollees or health care providers; failure to comply with physician incentive plan requirements; marketing violations.	
Per 42 CFR 438.704(b)(2): A maximum of $100,000 for each determination of discrimination; misrepresentation or false statements to CMS or the State or any such action or inaction that the State deems a violation that merits a fine consistent with this section.	
Per 42 CFR 438.704(b)(3): A maximum of $15,000 for each member the State determines was not enrolled because of a discriminatory practice (subject to the $100,000 overall limit above) or any such action or inaction that the State deems a violation that merits a fine consistent with this section.	
Per 42 CFR 438.704(c): A maximum of $25,000 or double the amount of the excess charges, (whichever is greater) for charging premiums or charges in excess of the amounts permitted under the Medicaid program; or any such action or inaction that the State deems a violation that merits a fine consistent with this section. The State must deduct from the penalty the amount of overcharge and return it to the affected enrollee(s).	

Attachment 17
2015 Health Care Acquired Conditions

A HAC can be defied by a single diagnosis code, a combination of a diagnosis code and a surgical procedure, or a combination of a diagnosis code, a surgical procedure, and a principal diagnosis code.

CC: Complications and comorbidities
MCC: Major complications and comorbidities

Foreign Object Retained After Surgery		
(CC)	T81.509A	Unspecified complication of foreign body accidentally left in body following unspecified procedure, initial encounter
(CC)	T81.519A	Adhesions due to foreign body accidentally left in body following unspecified procedure, initial encounter
(CC)	T81.529A	Obstruction due to foreign body accidentally left in body following unspecified procedure, initial encounter
(CC)	T81.539A	Perforation due to foreign body accidentally left in body following unspecified procedure, initial encounter
(CC)	T81.61XA	Aseptic peritonitis due to foreign substance accidentally left during a procedure, initial encounter
(CC)	T81.69XA	Other acute reaction to foreign substance accidentally left during a procedure, initial encounter
Air Embolism	T80.0XXA	Air embolism following infusion, transfusion and therapeutic injection, initial encounter
Blood Incompatibility		
(CC)	T80.30XA	ABO incompatibility reaction due to transfusion of blood or blood products, unspecified, initial encounter
(CC)	T80.319A	ABO incompatibility with hemolytic transfusion reaction, unspecified, initial encounter
(CC)	T80.310A	ABO incompatibility with acute hemolytic transfusion reaction, initial encounter
(CC)	T80.311A	ABO incompatibility with delayed hemolytic transfusion reaction, initial encounter
(CC)	T80.39XA	Other ABO incompatibility reaction due to transfusion of blood or blood products, initial encounter
Pressure Ulcer Stages III & IV		
(MCC)	L89003	Pressure ulcer of unspecified elbow, stage 3

(MCC)	L89004	Pressure ulcer of unspecified elbow, stage 4
(MCC)	L89013	Pressure ulcer of right elbow, stage 3
(MCC)	L89014	Pressure ulcer of right elbow, stage 4
(MCC)	L89023	Pressure ulcer of left elbow, stage 3
(MCC)	L89024	Pressure ulcer of left elbow, stage 4
(MCC)	L89103	Pressure ulcer of unspecified part of back, stage 3
(MCC)	L89104	Pressure ulcer of unspecified part of back, stage 4
(MCC)	L89113	Pressure ulcer of right upper back, stage 3
(MCC)	L89114	Pressure ulcer of right upper back, stage 4
(MCC)	L89123	Pressure ulcer of left upper back, stage 3
(MCC)	L89124	Pressure ulcer of left upper back, stage 4
(MCC)	L89133	Pressure ulcer of right lower back, stage 3
(MCC)	L89134	Pressure ulcer of right lower back, stage 4
(MCC)	L89143	Pressure ulcer of left lower back, stage 3
(MCC)	L89144	Pressure ulcer of left lower back, stage 4
(MCC)	L89153	Pressure ulcer of sacral region, stage 3
(MCC)	L89154	Pressure ulcer of sacral region, stage 4
(MCC)	L89203	Pressure ulcer of unspecified hip, stage 3
(MCC)	L89204	Pressure ulcer of unspecified hip, stage 4
(MCC)	L89213	Pressure ulcer of right hip, stage 3
(MCC)	L89214	Pressure ulcer of right hip, stage 4
(MCC)	L89223	Pressure ulcer of left hip, stage 3
(MCC)	L89224	Pressure ulcer of left hip, stage 4
(MCC)	L89303	Pressure ulcer of unspecified buttock, stage 3
(MCC)	L89304	Pressure ulcer of unspecified buttock, stage 4
(MCC)	L89313	Pressure ulcer of right buttock, stage 3
(MCC)	L89314	Pressure ulcer of right buttock, stage 4
(MCC)	L89323	Pressure ulcer of left buttock, stage 3
(MCC)	L89324	Pressure ulcer of left buttock, stage 4
(MCC)	L8943	Pressure ulcer of contiguous site of back, buttock and hip, stage 3
(MCC)	L8944	Pressure ulcer of contiguous site of back, buttock and hip, stage 4
(MCC)	L89503	Pressure ulcer of unspecified ankle, stage 3

(MCC)	L89504	Pressure ulcer of unspecified ankle, stage 4
(MCC)	L89513	Pressure ulcer of right ankle, stage 3
(MCC)	L89514	Pressure ulcer of right ankle, stage 4
(MCC)	L89523	Pressure ulcer of left ankle, stage 3
(MCC)	L89524	Pressure ulcer of left ankle, stage 4
(MCC)	L89603	Pressure ulcer of unspecified heel, stage 3
(MCC)	L89604	Pressure ulcer of unspecified heel, stage 4
(MCC)	L89613	Pressure ulcer of right heel, stage 3
(MCC)	L89614	Pressure ulcer of right heel, stage 4
(MCC)	L89623	Pressure ulcer of left heel, stage 3
(MCC)	L89624	Pressure ulcer of left heel, stage 4
(MCC)	L89813	Pressure ulcer of head, stage 3
(MCC)	L89814	Pressure ulcer of head, stage 4
(MCC)	L89893	Pressure ulcer of other site, stage 3
(MCC)	L89894	Pressure ulcer of other site, stage 4
(MCC)	L8993	Pressure ulcer of unspecified site, stage 3
(MCC)	L8994	Pressure ulcer of unspecified site, stage 4

Falls and Trauma:

Codes within these ranges on the CC/MCC list:

Fracture	S02.0XXA - T14.8
Dislocation	S03.0XXA - T14.90
Intracranial Injury	S06.0X0A - (S06.890A or S06.899A or S01.90XA)
Crushing Injury	(S07.0XXA or S07.8XXA) - S77.20XA
Burn	T26.50XA - (T30.0 or T30.4)
Other Injuries	(T33.09XA or T34.09XA) - (T73.8XXA or T73.9XXA or T75.89XA)

Catheter-Associated Urinary Tract Infection (UTI)

(CC)	T83.51XA	Infection and inflammatory reaction due to indwelling urinary catheter, initial encounter

Also excludes the following from acting as a CC/MCC:

(CC)	B37.42	Candidal balanitis
(CC)	B37.49	Other urogenital candidiasis

(CC)	N10	Acute tubulo-interstitial nephritis
(MCC)	N10	Acute tubulo-interstitial nephritis
(MCC)	N15.1	Renal and perinephric abscess
(CC)	N28.84	Pyelitis cystica
(CC)	N28.85	Pyeloureteritis cystica
(CC)	N28.86	Ureteritis cystica
(CC)	N12	Tubulo-interstitial nephritis, not specified as acute or chronic
(CC)	N16	Renal tubulo-interstitial disorders in diseases classified elsewhere
(CC)	N30.00	Acute cystitis without hematuria
(CC)	N30.01	Acute cystitis with hematuria
(CC)	N34.0	Urethral abscess
(CC)	N39.0	Urinary tract infection, site not specified
Vascular Catheter-Associated Infection		
(CC)	T80.219A	Unspecified infection due to central venous catheter, initial encounter
(CC)	T80.211A	Bloodstream infection due to central venous catheter, initial encounter
(CC)	T80.212A	Local infection due to central venous catheter, initial encounter
Manifestations of Poor Glycemic Control		
(MCC)	E11.69	Type 2 diabetes mellitus with other specified complication
(MCC)	E10.10	Type 1 diabetes mellitus with ketoacidosis without coma
(MCC)	E11.69	Type 2 diabetes mellitus with other specified complication
(MCC)	E11.65	Type 2 diabetes mellitus with hyperglycemia
(MCC)	E10.10	Type 1 diabetes mellitus with ketoacidosis without coma
(MCC)	E10.65	Type 1 diabetes mellitus with hyperglycemia
(MCC)	E11.00	Type 2 diabetes mellitus with hyperosmolarity without nonketotic hyperglycemic-hyperosmolar coma (NKHHC)
(MCC)	E11.01	Type 2 diabetes mellitus with hyperosmolarity with coma
(MCC)	E10.69	Type 1 diabetes mellitus with other specified complication
(MCC)	E11.00	Type 2 diabetes mellitus with hyperosmolarity without nonketotic hyperglycemic-hyperosmolar coma (NKHHC)
(MCC)	E11.65	Type 2 diabetes mellitus with hyperglycemia
(MCC)	E10.69	Type 1 diabetes mellitus with other specified complication
(MCC)	E10.65	Type 1 diabetes mellitus with hyperglycemia
(CC)	E15	Nondiabetic hypoglycemic coma

(MCC)	E08.10	Diabetes mellitus due to underlying condition with ketoacidosis without coma
(MCC)	E09.10	Drug or chemical induced diabetes mellitus with ketoacidosis without coma
(MCC)	E13.10	Other specified diabetes mellitus with ketoacidosis without coma
(MCC)	E08.10	Diabetes mellitus due to underlying condition with ketoacidosis without coma
(MCC)	E09.10	Drug or chemical induced diabetes mellitus with ketoacidosis without coma with
(MCC)	E08.65	Diabetes mellitus due to underlying condition with hyperglycemia
(MCC)	E08.01	Diabetes mellitus due to underlying condition with hyperosmolarity with coma
(MCC)	E09.01	Drug or chemical induced diabetes mellitus with hyperosmolarity with coma
(MCC)	E13.00	Other specified diabetes mellitus with hyperosmolarity without nonketotic hyperglycemic-hyperosmolar coma (NKHHC)
(MCC)	E08.01	Diabetes mellitus due to underlying condition with hyperosmolarity with coma
(MCC)	E09.01	Drug or chemical induced diabetes mellitus with hyperosmolarity with coma with
(MCC)	E08.65	Diabetes mellitus due to underlying condition with hyperglycemia

Surgical Site Infection, Mediastinitis, Following Coronary Artery Bypass Graft (CABG)

(MCC)	J98.5	Diseases of mediastinum, not elsewhere classified

And one of the following procedure codes:

0210093	Bypass Coronary Artery, One Site from Coronary Artery with Autologous Venous Tissue, Open Approach

Surgical Site Infection Following Bariatric Surgery for Obesity

Principal Diagnosis	E66.01	Morbid (severe) obesity due to excess calories
(CC)	K95.01	Infection due to gastric band procedure
(CC)	K95.81	Infection due to other bariatric procedure
(CC)	K68.11	Postprocedural retroperitoneal abscess
(CC)	T81.4XXA	Infection following a procedure, initial encounter

And one of the following procedure codes:

0D16479	Bypass Stomach to Duodenum with Autologous Tissue Substitute, Percutaneous Endoscopic Approach
0D1647A	Bypass Stomach to Jejunum with Autologous Tissue Substitute, Percutaneous Endoscopic Approach
0D164J9	Bypass Stomach to Duodenum with Synthetic Substitute, Percutaneous Endoscopic Approach

0D164JA	Bypass Stomach to Jejunum with Synthetic Substitute, Percutaneous Endoscopic Approach
0D164K9	Bypass Stomach to Duodenum with Nonautologous Tissue Substitute, Percutaneous Endoscopic Approach
0D164KA	Bypass Stomach to Jejunum with Nonautologous Tissue Substitute, Percutaneous Endoscopic Approach
0D164Z9	Bypass Stomach to Duodenum, Percutaneous Endoscopic Approach
0D164ZA	Bypass Stomach to Jejunum, Percutaneous Endoscopic Approach
0D16079	Bypass Stomach to Duodenum with Autologous Tissue Substitute, Open Approach
0D1607A	Bypass Stomach to Jejunum with Autologous Tissue Substitute, Open Approach
0D160J9	Bypass Stomach to Duodenum with Synthetic Substitute, Open Approach
0D160JA	Bypass Stomach to Jejunum with Synthetic Substitute, Open Approach
0D160K9	Bypass Stomach to Duodenum with Nonautologous Tissue Substitute, Open Approach
0D160KA	Bypass Stomach to Jejunum with Nonautologous Tissue Substitute, Open Approach
0D160Z9	Bypass Stomach to Duodenum, Open Approach
0D160ZA	Bypass Stomach to Jejunum, Open Approach
0D16879	Bypass Stomach to Duodenum with Autologous Tissue Substitute, Via Natural or Artificial Opening Endoscopic
0D1687A	Bypass Stomach to Jejunum with Autologous Tissue Substitute, Via Natural or Artificial Opening Endoscopic
0D168J9	Bypass Stomach to Duodenum with Synthetic Substitute, Via Natural or Artificial Opening Endoscopic
0D168JA	Bypass Stomach to Jejunum with Synthetic Substitute, Via Natural or Artificial Opening Endoscopic
0D168K9	Bypass Stomach to Duodenum with Nonautologous Tissue Substitute, Via Natural or Artificial Opening Endoscopic
0D168KA	Bypass Stomach to Jejunum with Nonautologous Tissue Substitute, Via Natural or Artificial Opening Endoscopic
0D168Z9	Bypass Stomach to Duodenum, Via Natural or Artificial Opening Endoscopic
0D168ZA	Bypass Stomach to Jejunum, Via Natural or Artificial Opening Endoscopic
0DV64CZ	Restriction of Stomach with Extraluminal Device, Percutaneous Endoscopic Approach

Surgical Site Infection Following Cardiac Implantable Electronic Device (CIED)

(CC)	T82.6XXA	Infection and inflammatory reaction due to cardiac valve prosthesis, initial encounter
(CC)	T82.7XXA	Infection and inflammatory reaction due to other cardiac and vascular devices, implants and grafts, initial encounter
(CC)	K68.11	Postprocedural retroperitoneal abscess
(CC)	T81.4XXA	Infection following a procedure, initial encounter

And one of the following procedure codes:

0JH607Z	Insertion of Cardiac Resynchronization Pacemaker Pulse Generator into Chest Subcutaneous Tissue and Fascia, Open Approach
0JH637Z	Insertion of Cardiac Resynchronization Pacemaker Pulse Generator into Chest Subcutaneous Tissue and Fascia, Percutaneous Approach
0JH807Z	Insertion of Cardiac Resynchronization Pacemaker Pulse Generator into Abdomen Subcutaneous Tissue and Fascia, Open Approach
0JH837Z	Insertion of Cardiac Resynchronization Pacemaker Pulse Generator into Abdomen Subcutaneous Tissue and Fascia, Percutaneous Approach
02HK0JZ	Insertion of Pacemaker Lead into Right Ventricle, Open Approach
02HK3JZ	Insertion of Pacemaker Lead into Right Ventricle, Percutaneous Approach
02HK4JZ	Insertion of Pacemaker Lead into Right Ventricle, Percutaneous Endoscopic Approach
02HL0JZ	Insertion of Pacemaker Lead into Left Ventricle, Open Approach
02HL3JZ	Insertion of Pacemaker Lead into Left Ventricle, Percutaneous Approach
02HL4JZ	Insertion of Pacemaker Lead into Left Ventricle, Percutaneous Endoscopic Approach
With:	02H40JZ Insertion of Pacemaker Lead into Coronary Vein, Open Approach
02H43JZ	Insertion of Pacemaker Lead into Coronary Vein, Percutaneous Approach
02H44JZ	Insertion of Pacemaker Lead into Coronary Vein, Percutaneous Endoscopic Approach
With:	02H60JZ Insertion of Pacemaker Lead into Right Atrium, Open Approach
02H63JZ	Insertion of Pacemaker Lead into Right Atrium, Percutaneous Approach
02H64JZ	Insertion of Pacemaker Lead into Right Atrium, Percutaneous Endoscopic Approach
0JH609Z	Insertion of Cardiac Resynchronization Defibrillator Pulse Generator into Chest Subcutaneous Tissue and Fascia, Open Approach
0JH639Z	Insertion of Cardiac Resynchronization Defibrillator Pulse Generator into Chest Subcutaneous Tissue and Fascia, Percutaneous Approach

0JH809Z	Insertion of Cardiac Resynchronization Defibrillator Pulse Generator into Abdomen Subcutaneous Tissue and Fascia, Open Approach
0JH839Z	Insertion of Cardiac Resynchronization Defibrillator Pulse Generator into Abdomen Subcutaneous Tissue and Fascia, Percutaneous Approach
With:	02HK0KZ Insertion of Defibrillator Lead into Right Ventricle, Open Approach
02HK3KZ	Insertion of Defibrillator Lead into Right Ventricle, Percutaneous Approach
02HK4KZ	Insertion of Defibrillator Lead into Right Ventricle, Percutaneous Endoscopic Approach
02HL0KZ	Insertion of Defibrillator Lead into Left Ventricle, Open Approach
02HL3KZ	Insertion of Defibrillator Lead into Left Ventricle, Percutaneous Approach
02HL4KZ	Insertion of Defibrillator Lead into Left Ventricle, Percutaneous Endoscopic Approach
02H43JZ	Insertion of Pacemaker Lead into Coronary Vein, Percutaneous Approach
02H43KZ	Insertion of Defibrillator Lead into Coronary Vein, Percutaneous Approach
02H43MZ	Insertion of Cardiac Lead into Coronary Vein, Percutaneous Approach
Alternatively:	
02H43KZ	Insertion of Defibrillator Lead into Coronary Vein, Percutaneous Approach
02H43MZ	Insertion of Cardiac Lead into Coronary Vein, Percutaneous Approach
With:	02PA0MZ Removal of Cardiac Lead from Heart, Open Approach
02PA3MZ	Removal of Cardiac Lead from Heart, Percutaneous Approach
02PA4MZ	Removal of Cardiac Lead from Heart, Percutaneous Endoscopic Approach
0JH607Z	Insertion of Cardiac Resynchronization Pacemaker Pulse Generator into Chest Subcutaneous Tissue and Fascia, Open Approach
0JH637Z	Insertion of Cardiac Resynchronization Pacemaker Pulse Generator into Chest Subcutaneous Tissue and Fascia, Percutaneous Approach
0JH807Z	Insertion of Cardiac Resynchronization Pacemaker Pulse Generator into Abdomen Subcutaneous Tissue and Fascia, Open Approach
0JH837Z	Insertion of Cardiac Resynchronization Pacemaker Pulse Generator into Abdomen Subcutaneous Tissue and Fascia, Percutaneous Approach
Alternatively:	
0JH607Z	Insertion of Cardiac Resynchronization Pacemaker Pulse Generator into Chest Subcutaneous Tissue and Fascia, Open Approach
0JH637Z	Insertion of Cardiac Resynchronization Pacemaker Pulse Generator into Chest Subcutaneous Tissue and Fascia, Percutaneous Approach

	With:	0JPT0PZ Removal of Cardiac Rhythm Related Device from Trunk Subcutaneous Tissue and Fascia, Open Approach
	0JPT3PZ	Removal of Cardiac Rhythm Related Device from Trunk Subcutaneous Tissue and Fascia, Percutaneous Approach
	0JH609Z	Insertion of Cardiac Resynchronization Defibrillator Pulse Generator into Chest Subcutaneous Tissue and Fascia, Open Approach
	0JH639Z	Insertion of Cardiac Resynchronization Defibrillator Pulse Generator into Chest Subcutaneous Tissue and Fascia, Percutaneous Approach
	0JH809Z	Insertion of Cardiac Resynchronization Defibrillator Pulse Generator into Abdomen Subcutaneous Tissue and Fascia, Open Approach
	0JH839Z	Insertion of Cardiac Resynchronization Defibrillator Pulse Generator into Abdomen Subcutaneous Tissue and Fascia, Percutaneous Approach
Alternatively:		
	0JH609Z	Insertion of Cardiac Resynchronization Defibrillator Pulse Generator into Chest Subcutaneous Tissue and Fascia, Open Approach
	0JH639Z	Insertion of Cardiac Resynchronization Defibrillator Pulse Generator into Chest Subcutaneous Tissue and Fascia, Percutaneous Approach
	With:	0JPT0PZ Removal of Cardiac Rhythm Related Device from Trunk Subcutaneous Tissue and Fascia, Open Approach
	0JPT3PZ	Removal of Cardiac Rhythm Related Device from Trunk Subcutaneous Tissue and Fascia, Percutaneous Approach

Exempt Providers

The table below lists the types of providers that are exempt from POA reporting, per CMS http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalAcqCond/AffectedHospitals.html.

1	Critical Access Hospitals	These providers have a Peer Group 7 in the MMIS and are therefore included in the group of providers that will be defined as exempt from POA reporting.
2	Long Term Care Hospitals	Nebraska has two providers that fall into this category. The providers will be added to the Validate Value table: 1. Select Specialty (100256413-00) 2. Madonna Rehabilitation (100251802-00)
3	Maryland Waiver Hospitals	State/Postal Code = MD **Note**: Maryland is the only State that has a Medicare Waiver. Under this agreement, Medicare reimburses Maryland hospitals according to Healthcare Services Cost Review Commission (HSCRC) rates. Based on a federal waiver from Medicare, the HSCRC sets rates for all payers: private insurance companies, HMOs, Medicare, and Medicaid. This system is referred to as the "all-payer" system because all payers pay for their fair share of hospital costs.
4	Cancer Hospitals	These providers would be added to the Validate Value table as they manually identify themselves. This would most likely occur because the MMIS reported they must submit POA and they respond advising they are POA exempt.
5	Children's Inpatient Facilities	The word 'child' will be queried in the provider names and the identified providers will be added to the Validate Value table.
6	Rural Health Clinics	This provider type does not submit claim types 07 or 10 and therefore will be indirectly excluded from being required to submit POA information.
7	Federally Qualified Health Centers	This provider type does not submit claim types 07 or 10 and therefore will be indirectly excluded from being required to submit POA information.
8	Religious Non-Medical Health Care Institutions	These providers would be added to the Validate Value table as they manually identify themselves. This would most likely occur because the MMIS reported they must submit POA and they respond advising they are POA exempt.
9	Inpatient Psychiatric Hospitals	These providers would be identified by Specialty = 26 and either included in the code as exempt providers or added to the Validate Value table.
10	Inpatient Rehabilitation Facilities	These providers have a Peer Group 5 in the MMIS and are therefore included in the group of providers that will be defined as exempt from POA reporting.

11	VA/Department of Defense Hospitals	These providers are paid from federal funds and do not submit claims to State Medicaid agencies.

Categories and Codes
Exempt from
Diagnosis Present on Admission Requirement
ICD-10-CM Official Guidelines for Coding and Reporting FY 2015

Note: "Diagnosis present on admission" for these code categories are exempt because they represent circumstances regarding the healthcare encounter or factors influencing health status that do not represent a current disease or injury or are always present on admission.

Code categories below are exempt from "diagnosis present on admission."

B90–B94, Sequelae of infectious and parasitic diseases

E64, Sequelae of malnutrition and other nutritional deficiencies

I25.2, Old myocardial infarction

I69, Sequelae of cerebrovascular disease

O09, Supervision of high risk pregnancy

O66.5, Attempted application of vacuum extractor and forceps

O80, Encounter for full-term uncomplicated delivery

O94, Sequelae of complication of pregnancy, childbirth, and the puerperium

P00, Newborn (suspected to be) affected by maternal conditions that may be unrelated to present pregnancy

Q00 – Q99, Congenital malformations, deformations and chromosomal abnormalities

S00-T88.9, Injury, poisoning and certain other consequences of external causes with 7th character representing subsequent encounter or sequela

V00- V09, Pedestrian injured in transport accident

Except V00.81-, Accident with wheelchair (powered)

V00.83-, Accident with motorized mobility scooter

V10-V19, Pedal cycle rider injured in transport accident

V20-V29, Motorcycle rider injured in transport accident

V30-V39, Occupant of three-wheeled motor vehicle injured in transport accident

V40-V49, Car occupant injured in transport accident

V50-V59, Occupant of pick-up truck or van injured in transport accident

V60-V69, Occupant of heavy transport vehicle injured in transport accident

V70-V79, Bus occupant injured in transport accident

V80-V89, Other land transport accidents

V90-V94, Water transport accidents

V95-V97, Air and space transport accidents

V98-V99, Other and unspecified transport accidents

W09, Fall on and from playground equipment

W14, Fall from tree

W15, Fall from cliff

W17.0, Fall into well

W17.1, Fall into storm drain or manhole

W18.01 Striking against sports equipment with subsequent fall

W21, Striking against or struck by sports equipment

W30, Contact with agricultural machinery

W31, Contact with other and unspecified machinery

W32-W34, Accidental handgun discharge and malfunction

W35- W40, Exposure to inanimate mechanical forces

W52, Crushed, pushed or stepped on by crowd or human stampede

W56, Contact with nonvenomous marine animal

W58, Contact with crocodile or alligator

W61, Contact with birds (domestic) (wild)

W62, Contact with nonvenomous amphibians

W89, Exposure to man-made visible and ultraviolet light

X02, Exposure to controlled fire in building or structure

X03, Exposure to controlled fire, not in building or structure

X04, Exposure to ignition of highly flammable material

X52, Prolonged stay in weightless environment

X71, Intentional self-harm by drowning and submersion

Except X71.0-, Intentional self-harm by drowning and submersion while in bath tub

X72, Intentional self-harm by handgun discharge

X73, Intentional self-harm by rifle, shotgun and larger firearm discharge

X74, Intentional self-harm by other and unspecified firearm and gun discharge

X75, Intentional self-harm by explosive material

X76, Intentional self-harm by smoke, fire and flames

X77, Intentional self-harm by steam, hot vapors and hot objects

X81, Intentional self-harm by jumping or lying in front of moving object

X82, Intentional self-harm by crashing of motor vehicle

X83, Intentional self-harm by other specified means

Y03, Assault by crashing of motor vehicle

Y07, Perpetrator of assault, maltreatment and neglect

Y08.8, Assault by strike by sports equipment

Y21, Drowning and submersion, undetermined intent

Y22, Handgun discharge, undetermined intent

Y23, Rifle, shotgun and larger firearm discharge, undetermined intent

Y24, Other and unspecified firearm discharge, undetermined intent

Y30, Falling, jumping or pushed from a high place, undetermined intent

Y32, Assault by crashing of motor vehicle, undetermined intent

Y37, Military operations

Y36, Operations of war

Y92, Place of occurrence of the external cause

Y93, Activity code

Y99, External cause status

Z00, Encounter for general examination without complaint, suspected or reported diagnosis

Z01, Encounter for other special examination without complaint, suspected or reported diagnosis

Z02, Encounter for administrative examination

Z03, Encounter for medical observation for suspected diseases and conditions ruled out

Z08, Encounter for follow-up examination following completed treatment for malignant neoplasm

Z09, Encounter for follow-up examination after completed treatment for conditions other than malignant neoplasm

Z11, Encounter for screening for infectious and parasitic diseases

Z11.8, Encounter for screening for other infectious and parasitic diseases

Z12, Encounter for screening for malignant neoplasms

Z13, Encounter for screening for other diseases and disorders

Z13.4, Encounter for screening for certain developmental disorders in childhood

Z13.5, Encounter for screening for eye and ear disorders

Z13.6, Encounter for screening for cardiovascular disorders

Z13.83, Encounter for screening for respiratory disorder NEC

Z13.89, Encounter for screening for other disorder

Z13.89, Encounter for screening for other disorder

Z14, Genetic carrier

Z15, Genetic susceptibility to disease

Z17, Estrogen receptor status

Z18, Retained foreign body fragments

Z22, Carrier of infectious disease

Z23, Encounter for immunization

Z28, Immunization not carried out and underimmunization status

Z28.3, Underimmunization status

Z30, Encounter for contraceptive management

Z31, Encounter for procreative management

Z34, Encounter for supervision of normal pregnancy

Z36, Encounter for antenatal screening of mother

Z37, Outcome of delivery

Z38, Liveborn infants according to place of birth and type of delivery

Z39, Encounter for maternal postpartum care and examination

Z41, Encounter for procedures for purposes other than remedying health state

Z42, Encounter for plastic and reconstructive surgery following medical procedure or healed injury

Z43, Encounter for attention to artificial openings

Z44, Encounter for fitting and adjustment of external prosthetic device

Z45, Encounter for adjustment and management of implanted device

Z46, Encounter for fitting and adjustment of other devices

Z47.8, Encounter for other orthopedic aftercare

Z49, Encounter for care involving renal dialysis

Z51, Encounter for other aftercare

Z51.5, Encounter for palliative care

Z51.8, Encounter for other specified aftercare

Z52, Donors of organs and tissues

Z59, Problems related to housing and economic circumstances

Z63, Other problems related to primary support group, including family circumstances

Z65, Problems related to other psychosocial circumstances

Z65.8 Other specified problems related to psychosocial circumstances

Z67.1 – Z67.9 Blood type

Z68, Body mass index (BMI)

Z72, Problems related to lifestyle

Z74.01, Bed confinement status

Z76, Persons encountering health services in other circumstances

Z77.110- Z77.128, Environmental pollution and hazards in the physical environment

Z78, Other specified health status

Z79, Long term (current) drug therapy

Z80, Family history of primary malignant neoplasm

Z81, Family history of mental and behavioral disorders

Z82, Family history of certain disabilities and chronic diseases (leading to disablement)

Z83, Family history of other specific disorders

Z84, Family history of other conditions

Z85, Personal history of primary malignant neoplasm

Z86, Personal history of certain other diseases

Z87, Personal history of other diseases and conditions

Z87.828, Personal history of other (healed) physical injury and trauma

Z87.891, Personal history of nicotine dependence

Z88, Allergy status to drugs, medicaments and biological substances

Z89, Acquired absence of limb

Z90.710, Acquired absence of both cervix and uterus

Z91.0, Allergy status, other than to drugs and biological substances

Z91.4, Personal history of psychological trauma, not elsewhere classified

Z91.5, Personal history of self-harm

Z91.8, Other specified risk factors, not elsewhere classified

Z92, Personal history of medical treatment

Z93, Artificial opening status

Z94, Transplanted organ and tissue status

Z95, Presence of cardiac and vascular implants and grafts

Z97, Presence of other devices

Z98, Other postprocedural states

Z99, Dependence on enabling machines and devices, not elsewhere classified

Quality Performance Program Measures – Contract Year One

Base Performance Requirement	Payment Threshold	% of Payment Pool
Claims Processing Timeliness - 15 Days: Process and pay or deny, as appropriate, at least 90% of all clean claims for medical services provided to members within 15 days of the date of receipt. The date of receipt is the date the MCO receives the claim.	95% within 15 days	20%
Pharmacy Claims Processing Timeliness - 7 Days: Process and pay or deny, as appropriate, at least 90% of all clean claims from pharmacy providers for covered services within seven days of receipt. The date of receipt is the date the MCO receives the claim.	95% within 7 days	10%
Encounter Acceptance Rate: 95% of encounters submitted must be accepted by MLTC's Medicaid Management Information System pursuant to MLTC specifications.	98%	20%
Call Abandonment Rate: Less than 5% of calls that reach the Member/Provider 800 lines and are placed in queue but are not answered because the caller hangs up before a representative answers the call. Measured using annual system-generated reports.	<3%	10%
Average Speed to Answer: Calls to Member/Provider lines must be answered on average within 30 seconds. Measured using annual system-generated reports.	30 seconds	10%
Appeal Resolution Timeliness: The MCO must resolve each appeal, and provide notice, as expeditiously as the member's health condition requires, within 45 calendar days from the day the MCO receives the appeal.	95% within 30 days	10%
Grievance Resolution Timeliness: The MCO must dispose of each grievance and provide notice, as expeditiously as the member's health condition requires, within State-established timeframes not to exceed 90 calendar days from the day the MCO receives the grievance.	95% within 60 days	10%
PDL Compliance: The MCO shall dispense medications in PDL categories compliant with Nebraska State PDL Preferred Status at least 92% of the time each quarter.	95%	10%

Timeliness of Prenatal Care

Monthly Deliverables	Due on the 15th day of the following calendar month unless otherwise noted in the RFP or agreed to in writing by the MCO and MLTC.
Quarterly Deliverables	Due 45 calendar days after the end of the most recent quarter unless otherwise noted in the RFP or agreed to in writing by the MCO and MLTC.
Semi-Annual Deliverables	Due as specified in this attachment.
Annual Deliverables	Reports, files, and other deliverables due annually must be submitted within 30 calendar days following the 12th month of the contract year, except those reports that are specifically exempted from the 30-calendar day deadline by this RFP or by written agreement between MLTC and the MCO.
Ad Hoc Deliverables	Ad hoc reports must be submitted within five business days from the date of request, unless otherwise specified by MLTC.

If a due date falls on a weekend or State-recognized holiday, the deliverable is due the next business day. All reports must be submitted in an MLTC provided template or in a format approved by MLTC.

Monthly Deliverables	Description	Due Date
Claims Processing and Timely Payment of Claims	Summary data on claims payment activity and reasons for claims denials, per reporting requirements provided by MLTC. Include the disposition of every adjudicated and adjusted claim for each claim type.	15th day of the following calendar month
Provider Termination	All provider terminations by category and termination cause.	15th day of the following calendar month
Third Party Resource	All instances in which a TPR was identified for a member as described in Section IV.P - MCO Reimbursement.	15th day of the following calendar month
Claims Payment Accuracy	Claims payment accuracy percentages as described in Section IV.S - Claims Management.	15th day of the following calendar month
Member Grievance System (Grievance)	Summary of new grievances, resolved grievances, and status of unresolved grievances. This report is required monthly for the first six months after the contract start date and will then be required quarterly.	15th day of the following calendar month for the first six months, then 45 calendar days following the most recent quarter

Member Grievance System (Appeals)	Summary of new appeals, completed appeals, and status of each ongoing appeal. This report is required monthly for the first six months after the contract start date and will then be required quarterly.	15th day of the following calendar month for the first six months, then 45 calendar days following the most recent quarter
Member Grievance System (Expedited Appeals)	Summary of new expedited appeals, completed expedited appeals, and status of each ongoing expedited appeal. This report is required monthly for the first six months after the contract start date and will then be required quarterly.	15th day of the following calendar month for the first six months, then 45 calendar days following the most recent quarter
Member Grievance System (State Fair Hearings)	Summary of new state fair hearings, concluded state fair hearings, and status of each ongoing state fair hearing. This report is required monthly for the first six months after the contract start date and will then be required quarterly.	15th day of the following calendar month for the first six months, then 45 calendar days following the most recent quarter
Provider Grievance System (Grievances)	Summary of new grievances, resolved grievances, and status of unresolved grievances. This report is required monthly for the first six months after the contract start date and will then be required quarterly.	15th day of the following calendar month for the first six months, then 45 calendar days following the most recent quarter
Provider Grievance System (Appeals)	Summary of new appeals, completed appeals, and status of each ongoing appeal. This report is required monthly for the first six months after the contract start date and will then be required quarterly.	15th day of the following calendar month for the first six months, then 45 calendar days following the most recent quarter
Provider Grievance System (State Fair Hearings)	Summary of new state fair hearings, concluded state fair hearings, and status of each ongoing state fair hearing. This report is required monthly for the first six months after the contract start date and will then be required quarterly.	15th day of the following calendar month for the first six months, then 45 calendar days following the most recent quarter
New Referrals of Potential Fraud, Waste, Abuse and Erroneous Payments	Summary of new referrals as described in Section IV.O - Program Integrity.	Second Friday of the following calendar month

All Referrals of Fraud, Waste, Abuse, and Erroneous Payments Under Review by the MCO	Summary of all referrals as described in Section IV.O - Program Integrity.	Second Friday of the following calendar month
Overpayments Identified and Collected	Summary of overpayments as described in Section IV.O - Program Integrity.	Second Friday of the following calendar month
Provider Who Have Left the MCO Network	Summary of provider network departures as described in Section IV.O - Program Integrity.	Second Friday of the following calendar month
Miscellaneous Fraud Prevention Efforts	Summary of the MCO's fraud prevention efforts as described in Section IV.O - Program Integrity.	Second Friday of the following calendar month
Pharmacy Prior Authorizations	Prior authorizations summary, including clinical and technical prior authorizations, peer review, and peer to peer consultation statistics.	15th day of the following calendar month
Pharmacy Technical and Clinical Call Center	Performance summary for call center metrics, pharmacy services, prior authorization request turnaround time, and training issues.	15th day of the following calendar month
Pharmacy Claims Processing	Summary data and analysis on pharmacy claims processing including: generic analysis (will be detailed by MLTC), MAC priced medications, claims adjudication system availability and payment statistics, number of prescriptions dispensed by public retail pharmacies (mail order pharmacies and specialty pharmacies included but delineated), total members utilizing pharmacy claims system, and total membership.	15th day of the following calendar month
Psychotropic Medications for Youth	Summary of prior authorization and utilization relating to clinical edits.	15th day of the following calendar month
PDL Load	Data documenting that the PDL file was received and loaded weekly.	15th day of the following calendar month
Behavioral Health Residential Wait List	Summary data, by member, of the number of days before a member is accepted into a program and, by member, the number of days before the member is admitted to the program.	15th day of the following calendar month
Out of State Placement	Summary data of the number of members placed in out of state residential treatment.	15th day of the following calendar month
Eligible and Number Authorized	Summary data documenting by cohort the number of members eligible for and receiving behavioral health services.	15th day of the following calendar month

Welcome Calls	Results of welcome calls to new members as described in Section IV.F - Members Services and Education.	15th day of the following calendar month
Hospice	Data summarizing hospice admissions.	15th day of the following calendar month
Medically Necessary State Wards in Residential Treatment	Data summarizing the number of state wards deemed "medically necessary" who are in residential treatment.	15th day of the following calendar month
Claims Adjudicated	Data summarizing claims adjudicated to finalization in the previous calendar month as described in Section IV.O - Program Integrity.	Second Friday of the following calendar month
Member/Provider Call Center	Data summarizing MCO member/provider call center performance, including call abandonment rate and average speed to answer.	15th day of the following calendar month
Quarterly Deliverables	**Description**	**Due Date**
Member Grievance System (Grievance)	Summary of new grievances, resolved grievances, and status of unresolved grievances. This report is required monthly for the first six months after the contract start date and will then be required quarterly.	45 calendar days following the most recent quarter
Member Grievance System (Appeals)	Summary of new appeals, completed appeals, and status of each ongoing appeal. This report is required monthly for the first six months after the contract start date and will then be required quarterly.	45 calendar days following the most recent quarter
Member Grievance System (Expedited Appeals)	Summary of new expedited appeals, completed expedited appeals, and status of each ongoing expedited appeal. This report is required monthly for the first six months after the contract start date and will then be required quarterly.	45 calendar days following the most recent quarter
Member Grievance System (State Fair Hearings)	Summary of new state fair hearings, concluded state fair hearings, and status of each ongoing state fair hearing. This report is required monthly for the first six months after the contract start date and will then be required quarterly.	45 calendar days following the most recent quarter
Provider Grievance System (Grievances)	Summary of new grievances, resolved grievances, and status of unresolved grievances. This report is required monthly for the first six months after the contract start date and will then be required quarterly.	45 calendar days following the most recent quarter

Provider Grievance System (Appeals)	Summary of new appeals, completed appeals, and status of each ongoing appeal. This report is required monthly for the first six months after the contract start date and will then be required quarterly.	45 calendar days following the most recent quarter
Provider Grievance System (State Fair Hearings)	Summary of new state fair hearings, concluded state fair hearings, and status of each ongoing state fair hearing. This report is required monthly for the first six months after the contract start date and will then be required quarterly.	45 calendar days following the most recent quarter
Drug Utilization Management Retrospective Educational Intervention Project	Project update in a format approved by MLTC.	45 calendar days following the most recent quarter
Prospective DUR Statistics	DUR statistics to support preparation of MLTC's annual CMS DUR report.	45 calendar days following the most recent quarter
Pharmacy Financial Report	Summary data on committed pharmacy dollars, pharmacy total claims dollars, MCO supplemental rebate dollars, and MAC savings.	45 calendar days following the most recent quarter
Pharmacy Utilization Management	Data summarizing pharmacy utilization management categories including, but not limited to: quantity limits, prior authorization, step therapy, dose optimization, MAC, top 100 drugs, and top 50 drug categories listed by expenditures and claim count.	45 calendar days following the most recent quarter
PDL Compliance	Data documenting accuracy in dispensing medications in PDL categories.	45 calendar days following the most recent quarter
Care Management Report	Summary data and metric results as determined by MLTC.	45 calendar days following the most recent quarter
Enrollment and Disenrollment Report	Summary of disenrollments as described in Section IV.B - Eligibility and Enrollment.	45 calendar days following the most recent quarter

Out of Network Referrals	Data and analysis summarizing out of network provider authorizations.	45 calendar days following the most recent quarter
Provider Network Access	Summary data and metrics on network access as determined by MLTC and described in Attachment 2 - Access Standards.	45 calendar days following the most recent quarter
Provider Network Adequacy	Summary data and metrics demonstrating network adequacy as determined by MLTC and described in Attachment 2 - Access Standards.	45 calendar days following the most recent quarter
Provider Network Cultural Competency Access	Summary data and metrics on cultural competency access as determined by MLTC.	45 calendar days following the most recent quarter
Provider Network PCP Access	Summary data and metrics on PCP access as determined by MLTC and described in Attachment 2 - Access Standards.	45 calendar days following the most recent quarter
Provider Credentialing	Data and metrics summarizing the number of providers credentialed by licensure type, their location, and the status of pending credentials.	45 calendar days following the most recent quarter
Quality Oversight Committee	Committee activity summary as described in Section IV.M - Quality Management.	45 calendar days following the most recent quarter
Service Verification Detail	Data detailing service verifications as described in Section IV.S - Claims Management and Section IV.O - Program Integrity.	45 calendar days following the most recent quarter
Service Verification Summary	Service verification summary as described in Section X - Claims Management and Section IV.O - Program Integrity.	45 calendar days following the most recent quarter
Utilization Management - Authorization	Summary data and metric results as determined by MLTC.	45 calendar days following the most recent quarter

Utilization Management - Claims	Summary data and metric results as determined by MLTC.	45 calendar days following the most recent quarter
Quality Performance	Summary data and metric results as determined by MLTC.	45 calendar days following the most recent quarter
Restraint and Seclusion	Data summarized, by behavioral health provider, on the number of incidents of restraint or seclusion by program type and location.	45 calendar days following the most recent quarter
Contracted Residential Beds	Summary data on the number of behavioral health-related residential beds available state-wide.	45 calendar days following the most recent quarter
Critical Incident Reporting	Summary data on the number of critical incident reports by behavioral health facility and location.	45 calendar days following the most recent quarter
Quarterly Financial Reporting	Data and analysis summarizing financial results as determined by MLTC and as described in Section IV.T - Reporting and Deliverables.	45 calendar days following the most recent quarter
30 day Ambulatory/Inpatient Readmission Rates	Summary data on the number of individuals readmitted to the emergency room 30 or more days post the prior admission.	45 calendar days following the most recent quarter
7 and 30 Day Ambulatory Follow-up Following Residential Discharge	Summary data on the number of individuals presenting to the emergency room 30 days after discharge from Acute Psych or SUD.	45 calendar days following the most recent quarter
Admissions and Readmits to Psych Inpatient	Data summarizing the number of admissions and readmits to psych inpatient, including Psychiatric Residential Treatment Facilities and Therapeutic Group Homes.	45 calendar days following the most recent quarter
Value-Added Services	Summary of value added services as agreed upon by the MCO and MLTC.	45 calendar days following the most recent quarter

Indian Health Services	Data and metrics summarizing Indian Health Service delivery.	45 calendar days following the most recent quarter
Medication Therapy Management	Data and analysis that summarizes MTM program activities, the effectiveness of the program over the reporting period, and the objectives and implementation plan for the next reporting period.	45 calendar days following the most recent quarter
Subrogation	Data summarizing new and ongoing instances of subrogation.	45 calendar days following the most recent quarter
Top Ten Diagnoses by Service Category	Data summarizing the top ten diagnoses by service category.	45 calendar days following the most recent quarter
Semi-Annual Deliverables	**Description**	**Due Date**
Member Advisory Committee Report	Narrative of the activities of the MCO's Member Advisory Committee as described in Section IV.M - Quality Management.	June 30 and December 31
Paid Claims Audit	Results of error rate measurement data processing, medical necessity, and provider documentation audit of a statistically valid random sample of paid claims as described in Section IV.O - Program Integrity.	June 30 and December 31
Annual Deliverables	**Description**	**Due Date**
Quality Management Program Description and Work Plan	Discussion of the MCO's quality goals, initiatives and work plan as described in Section IV.M – Quality Management.	30 calendar days following the 12th month of the contract year
Quality Management Program Evaluation	Data and analysis summarizing the results of the annual quality work plan as described in Section IV.M - Quality.	30 calendar days following the 12th month of the contract year
Member Satisfaction Survey	Data and analysis summarizing results of the annual member satisfaction survey.	30 calendar days following the 12th month of the contract year

Deficiency CAP Reports (All Provider Types)	Results and status of all corrective action plans by provider type.	30 calendar days following the 12th month of the contract year
Direct Medical Education/Indirect Medical Education Verification	For the state fiscal year, financial information on direct and indirect medical costs as required by MLTC in accordance with 471 NAC.	Due date to be provided prior to contract start
Performance Improvement Projects	Data summarizing annual results of each new and ongoing PIP.	30 calendar days following the 12th month of the contract year
HEDIS Report	HEDIS results.	45 calendar days following the 12th month of the contract year
CHIPRA Quality Measures	CHIPRA performance measure results.	45 calendar days following the 12th month of the contract year
Adult Core Measures	Adult Core Measures results.	45 calendar days following the 12th month of the contract year
Provider Survey	Data and analysis summarizing results of the annual provider satisfaction survey. The provider satisfaction survey tool and methodology must be submitted to MLTC for approval at least 90 days prior to its administration.	30 calendar days following the 12th month of the contract year
Facility Satisfaction Survey	Data and analysis summarizing results of the annual facility provider satisfaction survey.	30 calendar days following the 12th month of the contract year
Audited Financial Statement	Independent annual financial audit as detailed in Section IV.T - Reporting and Deliverables.	30 calendar days following the 12th month of the contract year
Annual Financial Reporting	Data and analysis summarizing financial results as determined by MLTC and as described in Section IV.T - Reporting and Deliverables.	30 calendar days following the 12th month of the contract year

Fraud, Waste, Abuse, and Erroneous Payments Annual Plan	Compliance plan addressing requirements outlined in Section IV.O - Program Integrity.	Last day of the contract year
Annual Program Integrity Confirmation	Signed form acknowledging responsibilities related to the receipt of State and federal funds as described in Section IV.O - Program Integrity.	December 31
Department of Insurance Financial Report	Copy of annual audited financial statement submitted to the Nebraska Department of Insurance.	30 calendar days following the 12th month of the contract year
Network Development Plan	Details of the MCO's network, including GeoAccess reports, and a discussion of any provider network gaps and the MCO's remediation plans, as described in Section IV.O - Provider Network.	November 1
Utilization Management Program Review	Data and analysis summarizing the MCO's annual evaluation of its UM program.	30 calendar days following the 12th month of the contract year
Legislative Reports	**Description**	**Due Date**
LB 1063 - Children's Health and Treatment Act	Data and Geo Access reports related to youth Medicaid mental health authorization requests (all children ages 0-19) and Medicaid mental health authorization requests (all age groups reported by ages 0-18 years, 19-64 years, and 65+ years)	Quarterly reports submitted to Nebraska Legislature on January 1, April 1, July 1, and October 1 by MLTC.
LB 1160 Legislative Report	Number of state wards receiving behavioral health services as of September 1 immediately preceding the date of the current report; percentage of children denied Medicaid reimbursed services and the level of placement requested; and children in residential treatment.	Upon DHHS request.

Required with Proposal	Description	Due Date
Proposed Rule Implementation Plan	Plan for complying with new CMS Medicaid managed care rules as described in Section IV.C - Business Requirements.	Required with proposal
Provider Contract Template	Submit provider contract template as described in Section IV.I - Provider Network.	Required with proposal
Network Development Plan	Submit plan for developing an adequate provider network within the timeframe described in Section IV.I - Provider Network.	Required with proposal
Key Staff Resumes	As possible, submit resumes of proposed key staff as described in Section IV.X - Transition and Implementation.	Required with proposal
Preliminary Implementation Plan	Submit preliminary implementation plan as described in Section IV.X - Transition and Implementation.	Required with proposal
Draft Member Handbook	Submit a draft copy of the member handbook as described in Section IV.F – Member Services and Education.	Required with proposal
Contract Award Period	**Description**	**Due Date**
Implementation Plan	Submit contract implementation plan as described in Section IV.X - Transition and Implementation.	30 calendar days after contract award
Pharmacy Transition Plan	Submit plan for transitioning from the MLTC FFS program to the MCO pharmacy plan as described in Section IV.X - Transition and Implementation.	30 calendar days after contract award
120 Days Prior to Contract Start Date	**Description**	**Due Date**
Member Handbook	Submit member handbook for approval as described in Section IV.J - Provider Services.	120 days prior to contract start date

Marketing Plan	Submit plan detailing proposed marketing activities and materials as described in Section IV.G - Member Marketing.	120 days prior to contract start date
Welcome Packet Contents	Submit welcome packet materials as described in Section IV.F - Member Services and Education	120 days prior to contract start date
Welcome Call Script	Submit script for member welcome calls as described in Section IV.F - Member Services and Education.	120 days prior to contract start date
Member Education Plan	Submit member education plan as described in Section IV.F - Member Services and Education.	120 days prior to contract start date
Enrollment Broker	Submit policies and procedures for receiving file submissions from the Enrollment Broker as described in Section IV.B - Eligibility and Enrollment.	120 days prior to contract start date
90 Days Prior to Contract Start Date	**Description**	**Due Date**
Provider Network List	Submit list of all network providers via the provider enrollment file as described in Section IV.I - Provider Network.	90 days prior to contract start date
Provider Network Sufficiency Attestation	Submit data and analysis attesting to the sufficiency of the MCOs network as described in Section IV.I - Provider Network.	90 days prior to contract start date
Subcontracts	Submit all subcontracts for the provision of any services for prior review and approval as described in Section IV.K - Subcontracting.	90 days prior to contract start date
MCO Provider Website	As detailed in Section IV.J - Provider Services, the MCO's provider website is considered marketing material and must be submitted for review and approval.	90 days prior to contract start date

Provider Training Handbook and Training Schedule	Submit a copy of the provider training handbook and training schedule as described in Section IV.J - Provider Services	90 days prior to contract start date
Provider Handbook	Submit provider handbook for approval as described in Section IV.J - Provider Services	90 days prior to contract start date
Pharmacy Claims	Submit policies and procedures for pharmacy claims as described in Section IV.S - Claims Management	90 days prior to contract start date
Pharmacy Pricing Rules and Algorithms	Submit pricing rules and algorithms for pharmacy claims as Section IV.S - Claims Management.	90 days prior to contract start date
MAC Pricing	Submit policies and procedures for MAC pricing as described in Section IV.S - Claims Management.	90 days prior to contract start date
Care Management Program	Submit program description, policies and procedures for Care Management as described in Section IV.L - Care Management.	90 days prior to contract start date
Continuity of Care	Submit policies and procedures for continuity of care as described in Section IV.L - Care Management.	90 days prior to contract start date
HCBS Coordination	Submit policies and procedures for coordinating with HCBS case managers as described in Section IV.L - Case Management.	90 days prior to contract start date
Pharmacy Coverage Policies and Procedures	Submit pharmacy coverage policies and procedures as described in Section IV.E - Covered Services and Benefits.	90 days prior to contract start date
Extemporaneously Compound Drugs	Submit policies for extemporaneously compound drugs as described in Section IV.E - Covered Services and Benefits.	90 days prior to contract start date
Formulary	Submit formulary for review as described in Section IV.E - Covered Services and Benefits.	90 days prior to contract start date

OTC Drug List	Submit list of covered OTC drugs as described in Section IV.E - Covered Services and Benefits.	90 days prior to contract start date
60 Days Prior to Contract Start Date	**Description**	**Due Date**
QAPI Committee Description	Submit a description and detail the composition of the QAPI Committee (QAPIC) as described in Section IV.M - Quality Management.	60 days prior to contract start date
QM Program Description and Goals	Submit overview of QM program as described in Section IV.M - Quality Management	60 days prior to contract start date
Remedial Action Policy and Procedures	Submit procedures for remedial action to address deficiencies as described in Section IV.M - Quality Management.	60 days prior to contract start date
Corrective Action Triggers	Submit description of deficiencies that require corrective action as described in Section IV.M - Quality Management.	60 days prior to contract start date
Corrective Action Monitoring	Submit policies and procedures for evaluating corrective actions.	60 days prior to contract start date
Provider Review	Submit procedures for provider review.	60 days prior to contract start date
SHCN Care Quality Assessment	Submit procedures for assessing the quality and appropriateness of care furnished to members with SHCNs.	60 days prior to contract start date
Clinical Advisory Committee	Submit plan for the development of the Clinical Advisory Committee as described in Section IV.M - Quality Management.	60 days prior to contract start date
Member Advisory Committee	Submit plan for the development of the Member Advisory Committee including meetings schedule and objectives s described in Section IV.M - Quality Management.	60 days prior to contract start date

Tribal Members Coordination	Submit policies and procedures for coordination and collaboration with qualified members as described in Section IV.L - Care Management.	60 days prior to contract start date
Coordination with Division of Family Services	Submit policies and procedures for coordinating with the DHHS Division of Children and Family Services as described in Section IV.L - Care Management.	60 days prior to contract start date
Health Risk Assessment Algorithms and Methodologies	Submit proposed methodology and algorithms for health risk assessment as described in Section IV.L - Care Management.	60 days prior to contract start date
PBM Independence Assurance	Submit procedures and assurances regarding PBM independence as described in Section IV.L - Care Management.	60 days prior to contract start date
PBM Oversight Plan	Submit plan for monitoring PBM performance as described in Section IV.S - Claims Management.	60 days prior to contract start date
Claims Dispute Process	Submit policies and procedures for addressing claims disputes as described in Section IV.S - Claims Management.	60 days prior to contract start date
Physician Incentive Plan Contract Templates	Submit contract templates for Physician Incentive Plan participants as described in Section IV.Q - Provider Reimbursement.	60 days prior to contract start date
Service Authorization	Submit policies and procedures for service authorization as described in Section IV.N - Utilization Management.	60 days prior to contract start date
Retrospective UR Functions	Submit policies for retrospective UR functions as described in Section IV.N - Utilization Management.	60 days prior to contract start date
Utilization Management Program Description	Submit UM program description as described in Section IV.N - Utilization Management.	60 days prior to contract start date

Drug Utilization Review Program Guidelines	Submit guidelines for DUR program as described in Section IV.N - Utilization Management.	60 days prior to contract start date
Clinical Criteria for Drug Prior Authorization	Submit criteria for drug prior authorization as described in Section IV.N - Utilization Management.	60 days prior to contract start date
Grievances and Appeals	Submit policies and procedures for the handling of member/provider grievances and appeals as described in Section IV.H - Grievances and Appeals.	60 days prior to contract start date
45 Days Prior to Contract Start Date	**Description**	**Due Date**
Amount, Duration, and Scope Policies	Submit amount, duration and scope policies as described in Section IV.E - Covered Services and Benefits.	45 days prior to contract start date
Lab Services Authorization Policies	Submit policies for lab services authorization as described in Section IV.E - Covered Services and Benefits.	45 days prior to contract start date
Value-Added Services	Provide a description of the expanded services/benefits the MCO will provided as described in Section IV.E - Covered Services and Benefits	45 days prior to contract start date
Provider Complaint System	Submit policies and procedures detailing the MCO's provider complaint system as described in Section IV.J - Provider Services.	45 days prior to contract start date
Provider Directory Template	Submit templates for the provider directory as described in Section IV.E - Members Services and Education.	45 days prior to contract start date
Human Resources and Staffing Plan	Submit a plan detailing how the MCO will obtain and maintain appropriate staffing levels as described in Section IV.D - Staffing.	45 days prior to contract start date

Key Staff List	Submit the names, resumes and contact info for all key staff as described in Section IV.D - Staffing	45 days prior to contract start date
Credentialing/Recredentialing	Submit policies and procedures for credentialing and recredentialing providers as described in Section IV.I - Provider Network.	45 days prior to contract start date
Provisional Credentialing for Behavioral Health	Submit policies and procedures for the provisional credentialing of behavioral health providers.	45 days prior to contract start date
Network - Communication of Change	Submit procedures for communicating contractual and/or program changes to providers.	45 days prior to contract start date
Network Compliance	Submit procedures for ensuring provider compliance with State and MCO policies as described in Section IV.I - Provider Network.	45 days prior to contract start date
Network Service	Submit procedures for evaluating the quality of services provided by the network.	45 days prior to contract start date
Network Insufficiency	Submit policies and procedures for arranging for medically necessary services in the event of temporary network insufficiency as described in Section IV.I - Provider Network.	45 days prior to contract start date
Network Monitoring	Submit procedures for monitoring the adequacy, accessibility and availability of network providers as described in Section IV.I - Provider Network.	45 days prior to contract start date
Specialty Drug List	Submit list of specialty drugs as described in Section IV.I - Provider Network.	45 days prior to contract start date
Compliance Plan	Submit fraud, waste, abuse and erroneous payments compliance plan as described in Section IV.O - Program Integrity.	45 days prior to contract start date

Fraud, Waste, Abuse and Erroneous Payments	Submit fraud, waste, abuse and erroneous payments policies as described in Section IV.O - Program Integrity.	45 days prior to contract start date
Advance Directives	Submit policies and procedures for Advance Directives as described in Section IV.F - Member Services and Education	45 days prior to contract start date
Timely Access	Submit policies and procedures for the monitoring of timely access requirements as described in Attachment 2 - Access Standards.	45 days prior to contract start date
Selection and Retention of Providers	Submit policies for the selection and retention of providers as described in Section IV.I - Provider Network.	45 days prior to contract start date
Member Privacy	Submit policies and procedures for protecting member privacy	45 days prior to contract start date
PCP Assignment	Submit policies and procedures for PCP assignment as described in Section IV.B - Eligibility and Enrollment.	45 days prior to contract start date
Second Opinions	Submit policies and procedures regarding ensuring member access to a second opinion.	45 days prior to contract start date
Restricted Services	Submit policies and procedures for restricted services as described in Section IV.N - Utilization Management	45 days prior to contract start date
30 Days Prior to Contract Start Date	**Description**	**Due Date**
Subcontractor Evaluation	Submit copies of subcontractor evaluations as described in Section IV.C - Business Requirements.	30 days prior to contract start date
Third Party Liability	Submit procedures for identifying TPL and administrating payment as described in Section IV.P - MCO Reimbursement.	30 days prior to contract start date

Provider Preventable Conditions	Submit procedures for precluding payment to providers for provider preventable conditions as required in Section IV.P - Provider Reimbursement.	30 days prior to contract start date
Clinical Practice Guidelines	Submit clinical practice guidelines developed in accordance with requirements in Section IV.N - Utilization Management.	30 days prior to contract start date
Emergency Medical and Post-Stabilization Services.	Submit policies and procedures for emergency medical and post-stabilization services as described in Section IV.E - Covered Services and Benefits.	30 days prior to contract start date
Family Planning Services	Submit policies and procedures for family planning services as described in Section IV.E - Covered Services and Benefits.	30 days prior to contract start date
Indian Health Protections	Submit policies and procedures for Indian health protections as described in Section IV.F - Members Services and Education.	30 days prior to contract start date
Direct Access to Women's Health Specialists	Submit policies and procedures for guaranteeing female members direct access to women's health specialists as described in Section IV.I - Provider Network.	30 days prior to contract start date
EPSDT Services	Submit policies and procedures for EPSDT services as described in Section IV.E - Covered Services and Benefits.	30 days prior to contract start date
Staffing	Submit policies and procedures for staffing as described in Section IV.D - Staffing.	30 days prior to contract start date
Maintenance of Medical Records	Submit policies and procedures for the maintenance of medical records as described in Section IV.E - Member Services and Education.	30 days prior to contract start date

Medical Record Confidentiality	Submit policies and procedures regarding maintaining the confidentiality of member medical records.	30 days prior to contract start date
Transportation	Submit policies for transportation as described in Section IV.E - Covered Services and Benefits.	30 days prior to contract start date
Dual Eligibles	Submit policies and procedures for addressing needs of dual eligible members.	30 days prior to contract start date
Member Calls	Submit policies and procedures for managing member calls as described in Section IV.F - Member Services and Education.	30 days prior to contract start date
Referrals	Submit policies and procedures on referrals for specialty care and other benefits not provided by the member's PCP.	30 days prior to contract start date
Brand Name Products	Submit policies and procedures for brand name products as described in Section IV.Q - Provider Reimbursement.	30 days prior to contract start date
After Contract Start Date	**Description**	**Due Date**
PCMH Implementation Plan	Submit plan for PCMH implementation as described in Section IV.I - Provider Network.	90 days after contract start date
Value-Based Contracting Plan	Submit plan for implementing value-based purchasing agreements as described in Section IV.Q - Provider Reimbursement.	Due by December 17, 2017

Attachment 4
Patient-Centered Medical Home Standards

Core Competency 1: Facilitate ongoing patient relationship with physician in a physician-directed team.

1. Practice utilizes written plan for patient communication including accommodations for hearing and visually-impaired individuals and English as a second language patients.

2. Practice utilizes written materials for patients that explain the features and essential information related to the medical home; materials are published in primary language(s) of the community.

3. Practice utilizes patient-centered care planning (includes patient's goals, values, and priorities) to engage patients in their care. Practice plan can include a written after visit summary outlining future care plan and given to patient at every visit.

4. Practice utilizes reminder/notification system for health care services such as appointments, preventive care, preparation information for upcoming visits, follow-up with patients regarding periodic tests or screening, and for missed appointments.

5. Practice provides patient education and self-management tools and support for patients, families, and caregivers.

6. Practice utilizes medical home team that provides team-based care composed of, but not limited to, the primary care physician(s), care coordinator, and office staff with a structure that values separate but collaborative functions and responsibilities of all members from clerical staff to physician.

7. Practice creates and uses a written plan for the implementation of the medical home including a description of work flow for team members.

Core Competency 2: **Coordinate continuous patient-centered care across the health care system.**

1. Practice utilizes written protocol with hospital(s) outlining referral and follow-up care coordination, and admission and discharge notifications.

2. Practice provides care coordination and supports family participation in care including providing connections to community resources.

3. Practice utilizes a system to maintain and review a list of patient's medications.

4. Practice team tracks diagnostic tests and provides written and verbal follow-up on results with patient, plus follows up after referrals, specialist care, and other consultations.

5. Practice utilizes a patient registry.

6. Practice team defines and identifies high-risk patients in the practice who will benefit from care planning and provides a care plan to these individuals.

7. Practice team provides and coordinates Early and Periodic Screening, Diagnostic, and Treatment (EPSDT) services.

8. Practice team provides transitional care plan for patients transferring to another physician or medical provider.

9. Clinical data is organized in a paper or electronic format for each individual patient.

10. Practice utilizes a system to organize and track and improve the care of high risk and special needs patients.

Core Competency 3: Provide for patient accessibility to the services of the medical home.

1. Patient has on-call access to the medical home team 24 hours/day, 7 days/week.

2. Practice offers appointments outside traditional business hours of Monday – Friday, 9 a.m. to 5 p.m.

3. Practice utilizes a system to respond promptly to prescription refill requests and other patient inquiries.

4. Practice provides day-of-call appointments.

5. Practice utilizes written practice standards for patient access.

Core Competency 4: Foster efficiency of care by reducing unnecessary health care spending, reducing waste, and improving cost-effective use of health care services.

1. Practice implements interventions to reduce unnecessary care or preventable utilization that increases cost without improving health.

2. Practice establishes at least 2 out of 3 of the following waste reduction initiatives: generic medication utilization, reducing avoidable ER visits or reducing hospital readmissions.

Core Competency 5: Engage in a quality improvement process with a focus on patient experience, patient health, and cost-effectiveness of services.

1. Practice has established a quality improvement team that, at a minimum, includes one or more clinicians who deliver services within the medical home;

one or more care coordinators; one or more patient representatives; and if a clinic, one or more representatives from administration/management.

2. Practice develops a formal plan to measure effectiveness of care management.

3. Practice develops an operational quality improvement plan for the practice with at least one focus area.

4. Practice utilizes a patient survey to assess their experience of care and sets a schedule for utilization (may be developed or provided by the MCO).

5. Practice identifies one or more patient health outcomes to improve through a clinical quality improvement program using evidence-based guidelines.

Attachment 2
Access Standards

Appointment Availability Access Standards

1. Emergency services must be available immediately upon presentation at the service delivery site, 24 hours a day, seven days a week. Members with emergent behavioral health needs must be referred to services within one hour generally and within two hours in designated rural areas.

2. Urgent care must be available the same day and be provided by the PCP or as arranged by the MCO.

3. Non-urgent sick care must be available within 72 hours, or sooner if the member's medical condition(s) deteriorate into an urgent or emergent situation.

4. Family planning services must be available within seven calendar days.

5. Non-urgent, preventive care must be available within 4 weeks.

6. PCPs who have a one-physician practice must have office hours of at least 20 hours per week. Practices with two or more physicians must have office hours of at least 30 hours per week.

7. For high volume specialty care, routine appointments must be available within 30 calendar days of referral. High volume specialists include cardiologists, neurologists, hematologists/oncologists, OB/GYNs, and orthopedic physicians. For other specialty care, consultation must be available within one month of referral or as clinically indicated.

8. Laboratory and x-ray services must be available within three weeks for routine appointments and 48 hours (or as clinically indicated) for urgent care.

9. Maternity care must be available within 14 calendar days of request during the first trimester, within seven calendar days of request during the second trimester, and within three calendar days of request during the third trimester. For high-risk pregnancies, the member must be seen within three calendar days of identification of high risk by the MCO or maternity care provider, or immediately if an emergency exists.

Geographic Access Standards

1. The MCO must, at a minimum, contract with two PCPs within 30 miles of the personal residences of members in urban counties; one PCP within 45 miles of the personal residences of members in rural counties; and one PCP within 60 miles of the personal residences of members in frontier counties.

2. The MCO must, at a minimum, contract with one high volume specialist within 90 miles of personal residences of members. High volume specialties include cardiology, neurology, hematology/oncology, obstetrics/gynecology, and orthopedics.

3. The MCO must secure participation in its pharmacy network of a sufficient number of pharmacies that dispense drugs directly to members (other than by mail order) to ensure convenient access to covered drugs.

    a. In urban counties, a network retail pharmacy must be available within five miles of 90% of members' personal residences.

    b. In rural counties, a network retail pharmacy must be available within 15 miles of 70% of members' personal residences.

    c. In frontier counties, a network retail pharmacy must be available within 60 miles of 70% of members' personal residences.

4. The MCO must, at a minimum, contract with behavioral health inpatient and residential service providers with sufficient locations to allow members to travel by car or other transit provider and return home within a single day in rural and frontier areas. If it is determined by MLTC that no inpatient providers are available within the access requirements, the MCO must develop alternative plans for accessing comparable levels of care, instead of these services, subject to approval by MLTC.

5. The MCO must, at a minimum, contract with an adequate number of behavioral health outpatient assessment and treatment providers to meet the needs of its members and offer a choice of providers. The MCO must provide adequate choice within 30 miles of members' personal residences in urban areas; a minimum of two providers within 45 miles of members' personal residences in rural counties, and a minimum of two providers within 60 miles of members' personal residences in frontier counties. If the rural or frontier requirements cannot be met because of a lack of behavioral health providers in those counties, the MCO must utilize telehealth options.

6. The classification of counties according to urban, rural, and frontier status is included as Attachment 3, with classifications based upon data from the most recent U.S. Census.

Attachment 1 redacted

State of Nebraska (State Purchasing Bureau)

REQUEST FOR PROPOSAL FOR CONTRACTUAL SERVICES FORM

RETURN TO:

SOLICITATION NUMBER	RELEASE DATE
RFP 5151 Z1	**October 21, 2015**
OPENING DATE AND TIME	PROCUREMENT CONTACT
December 22, 2015 2:00 p.m. Central Time	**Michelle Thompson / Teresa Fleming**

This form is part of the specification package and must be signed in ink and returned, along with proposal documents, by the opening date and time specified.

PLEASE READ CAREFULLY!

SCOPE OF SERVICE

The State of Nebraska, Administrative Services (AS), Materiel Division, State Purchasing Bureau, is issuing this Request for Proposal, RFP Number 5151 Z1 for the purpose of selecting a qualified contractor to provide full-risk, capitated Medicaid managed care program for physical health, behavioral health, and pharmacy services.

The State of Nebraska intends to award a minimum of two (2) and a maximum of three (3) MCO contracts for the scope of work as described in Section IV. A. Program Description through Y. Termination of MCO Contract. One of the awarded contracts will also include the scope of work as described in Section IV. Z. FFS Claims Management and Processing.

Written questions for the first round of questions are due no later than November 2, 2015. Written questions for the second round of questions are due no later than November 23, 2015. Questions should be submitted via e-mail to as.materielpurchasing@nebraska.gov or may be sent by facsimile to (402) 471-2089.

The First Pre-Proposal Conference will be held on October 26, 2015 from 1:00 PM – 5:00 PM CST at Nebraska State Office Building, 301 Centennial Mall South, Lower Level, Conference Room A, Lincoln, Nebraska 68508. Bidders may call into the First Pre-Proposal Conference by utilizing the conference access number: (888) 820-1398 and attendee code: 8559164#.

The Second Pre-Proposal Conference will be held at the discretion of the State. If conducted, information will be provided at a later date.

Bidder should submit one (1) original of the entire proposal. Proposals must be submitted by the proposal due date and time.

PROPOSALS MUST MEET THE REQUIREMENTS OUTLINED IN THIS REQUEST FOR PROPOSAL TO BE CONSIDERED VALID. PROPOSALS WILL BE REJECTED IF NOT IN COMPLIANCE WITH THESE REQUIREMENTS.

1. Sealed proposals must be received in State Purchasing Bureau by the date and time of proposal opening per the schedule of events. No late proposals will be accepted. No electronic, e-mail, fax, voice, or telephone proposals will be accepted.
2. This form "REQUEST FOR PROPOSAL FOR CONTRACTUAL SERVICES" MUST be manually signed, in ink, and returned by the proposal opening date and time along with bidder's proposal and any other requirements as specified in the Request for Proposal in order for a bidder's proposal to be evaluated.
3. It is the responsibility of the bidder to check the website for all information relevant to this solicitation to include addenda and/or amendments issued prior to the opening date. Website address is as follows: http://das.nebraska.gov/materiel/purchasing.html

IMPORTANT NOTICE: Pursuant to Neb. Rev. Stat. §84-602.02, all State contracts in effect as of January 1, 2014 will be posted to a public website beginning July 1, 2014. All non-proprietary or confidential information as defined by Law **WILL BE POSTED FOR PUBLIC VIEWING**.

Contractor hereby grants permission to the State of Nebraska and/or its agencies to reprint or republish any and all copyrighted documents related to Contractor's response to this Request for Proposal, and any and all figures, illustrations, photographs, charts, and other supplementary material on a website accessible by the public pursuant to Neb. Rev. Stat. §84-602.02. This waiver does not apply to proprietary information properly submitted in a separate sealed, package clearly marked "Proprietary."

Contractor represents and warrants that the contents of this response to Request for Proposal and all figures, illustrations, photographs, charts, and other supplementary material herein are original and do not libel anyone or infringe upon any patent, copyright, proprietary right, or any other right whatsoever of any other party. Contractor represents and warrants that Contractor has full power and authority to execute this Copyright Release and to grant the State of Nebraska and/or its agencies the right granted herein.

Contractor agrees to indemnify, defend, and hold harmless the State of Nebraska and/or its agencies against any and all claims, suits, and/or judgments, including costs, expenses, damages, and reasonable legal fees based upon and arising from Contractor's violation of the rights of others and/or by reason of a breach of any of the foregoing warranties.

BIDDER MUST COMPLETE THE FOLLOWING

By signing this Request for Proposal for Contractual Services form, the bidder guarantees compliance with the provisions stated in this Request for Proposal, agrees to the terms and conditions unless otherwise agreed to (see Section III) and certifies that bidder maintains a drug free work place environment.

Per Nebraska's Transparency in Government Procurement Act, Neb. Rev Stat §73-603 DAS is required to collect statistical information regarding the number of contracts awarded to Nebraska Contractors. This information is for statistical purposes only and will not be considered for contract award purposes.

_____ **NEBRASKA CONTRACTOR AFFIDAVIT**: Bidder hereby attests that bidder is a Nebraska Contractor. "Nebraska Contractor" shall mean any bidder who has maintained a bona fide place of business and at least one employee within this state for at least the six (6) months immediately preceding the posting date of this RFP.

_____ I hereby certify that I am a **Resident disabled veteran or business located in a designated enterprise zone** in accordance with Neb. Rev. Stat. §73-107 and wish to have preference, if applicable, considered in the award of this contract.

TTY/TDD: Teletypewriter and telecommunications device for the deaf

UM: Utilization management

UR: Utilization review

VPN: Virtual private network

WIC: Special Supplemental Nutrition Program for Women, Infants, and Children

GLOSSARY OF TERMS

ACCESSNebraska: The State service delivery system for public benefits, accessible through a toll-free telephone number and website.

Action: Defined in this RFP as the:

9. Denial or limited authorization of a requested service, including the type or level of service.
10. Reduction, suspension, or termination of a previously authorized service.
11. Denial, in whole or in part, of payment for a service.
12. Failure of a MCO to act within timeframes provided in this RFP or as directed by the State.
13. Failure of a MCO to process grievances, appeals, or expedited appeals within required timeframes.

Addendum: Something to be added or deleted to an existing document; a supplement.

Adjudicate: To pay or deny a claim.

Adjustment: Modification to an adjudicated claim.

Administrative cap: The upper limit of the rate a MCO may spend on administrative expenses.

Administrative expense rate: The percentage of qualifying revenue a MCO may spend on administrative expenses. Administrative expense rate equals the costs that would have been incurred in the contract year in the absence of any related-party relationship.

Advance directive: A written instruction, such as a living will or durable power of attorney for health care, recognized under state law (whether statutory or as recognized by the courts of the state), relating to the provision of health care when the individual is incapacitated.

Agency: Any state agency, board, or commission other than the University of Nebraska, the Nebraska State colleges, the courts, the Legislature, or any other office or agency established by the Nebraska Constitution.

Agent/Representative: A person authorized to act on behalf of another.

Allowable quality improvement expense: A MCO's expenditure on qualified quality improvement activities described in Attachment 15 - Medical Loss Ratio Requirements of this RFP.

Amend: To alter or change by adding, subtracting, or substituting.

Amendment: A written correction or alteration to a document.

Appeal: A request for review of an action.

Appropriation: Legislative authorization to expend public funds for a specific purpose. Money set apart for a specific use.

Auto assignment: The process by which an enrollee, who does not select a MCO or PCP within a predetermined length of time during enrollment activities is automatically assigned to a MCO and PCP.

Award: All purchases, leases, or contracts which are based on competitive proposals will be awarded according to the provisions in the Request for Proposal. The State reserves the right to reject any or all proposals, wholly or in part, or to award to multiple bidders in whole or in part. The State reserves the right to waive any deviations or errors that are not material, do not invalidate the legitimacy of a proposal, and do not improve a bidder's competitive position. All awards will be made in a manner deemed in the best interest of the State.

Best and Final Offer: In a competitive bid, the final offer submitted which contains the bidder's (vendor's) most favorable terms for price.

Bid/Proposal: An offer submitted by a vendor in a response to a RFP.

Bidder: A vendor who submits an offer bid in response to a RFP.

Business: Any corporation, partnership, individual, sole proprietorship, joint-stock company, joint venture, or any other private legal entity.

Business Day: Any weekday, except State-recognized holidays.

Calendar Day: Every day shown on the calendar including Saturdays, Sundays, and State/Federal holidays.
Cancellation: To call off or revoke a purchase order without expectation of conducting or performing it at a later time.

Capitation payment: A monthly payment by the State to a MCO on behalf of each member of a MCO for the provision of covered services under the contract. Payment is made regardless of whether any particular member receives services during the period covered by the payment.

Care management: A collaborative process of assessment, planning, facilitation, coordination, and advocacy for options and services that the MCO must conduct to meet an individual's health needs, through communication and provision of available resources to promote quality, cost-effective outcomes.

Children's Health Insurance Program (CHIP): Nebraska's CHIP program is a combination Medicaid CHIP state with a Medicaid CHIP expansion program under Title XXI called "Kid's Connection". Kid's Connection provides health care coverage to targeted low-income uninsured children, from birth through age 18, in families with incomes at or below 200 percent of the federal poverty level. The separate CHIP program established July 19, 2012 provides Medicaid coverage for the unborn children of pregnant women who are otherwise not Medicaid eligible.

Choice counseling: The provision of information about available MCO's and unbiased decision support for selection of an MCO by the enrollment broker for Medicaid enrollees.

Clean claim: A claim, received by a MCO for adjudication, that requires no further information, adjustment, or alteration by the provider of the services, or by a third party, in order to be processed and paid by the MCO. It does not include a claim from a provider who is under investigation for fraud or abuse, or a claim under review for medical necessity.

Claim: A bill for services, a line item of service, or all services for one member within a bill.

Cold-call marketing: Any unsolicited personal contact by a MCO with a potential enrollee for the purpose of marketing.

Collusion: An agreement or cooperation between two or more persons or entities to accomplish a fraudulent, deceitful, or unlawful purpose.

Commodities: Any equipment, material, supply or goods; anything movable or tangible that is provided or sold.

Competition: The effort or action of two or more commercial interests to obtain the same business from third parties.

Complaint: See grievance.

Confidential Information: Unless otherwise defined below, "Confidential Information" shall also mean proprietary trade secrets, academic and scientific research work that is in progress and unpublished, and other information that if released would give advantage to business competitors and serve no public purpose (see Neb. Rev. Stat. §84-712.05(3)). In accordance with Nebraska Attorney General Opinions 92068 and 97033, proof that information is proprietary requires identification of specific, named competitor(s) who would be advantaged by release of the information and the specific advantage the competitor(s) would receive.

Contract: An agreement between two or more parties creating obligations that are enforceable or otherwise recognizable at law; the writing that sets forth such an agreement.

Contract Administration: The management of the contract which includes and is not limited to; contract signing, contract amendments and any necessary legal actions.

Contract Management: The management of day to day activities at the agency which includes and is not limited to ensuring deliverables are received, specifications are met, handling meetings and making payments to the Contractor.

Contract Period: The duration of a contract.

Contractor: Any individual or entity having a contract to furnish commodities or services.

Copyright: A property right in an original work of authorship fixed in any tangible medium of expression, giving the holder the exclusive right to reproduce, adapt and distribute the work.

Core benefits and services: The minimum package of services to which a member is entitled under the Nebraska Medicaid State Plan and that must be provided by a MCO to members enrolled in the MCO.

Customer Service: The process of ensuring customer satisfaction by providing assistance and advice about those products

or services provided by the Contractor.

Default: The omission or failure to perform a contractual duty.

Deviation: Any proposed change(s) or alteration(s) to either the terms and conditions or deliverables within the scope of a written solicitation or contract.

Disenroll: See Disenrollment, below.

Disenrollment: A change in the status of a member from being enrolled with a specific MCO to being enrolled with a different MCO, or a change from being considered mandatory for participation in managed care to being ineligible for participation in managed care.

Dispensing fee: The fee paid by a MCO to reimburse the overhead and labor expense incurred by pharmacy providers, and the professional services provided by a pharmacist when dispensing a prescription.

Documentation: The user manuals and any other materials in any form or medium customarily provided by the contractor to the users of the licensed software that will provide the State with sufficient information to operate, diagnose, and maintain the licensed software properly, safely, and efficiently.

Drug encounter: Submission by a MCO of prescriptions billed by a pharmacy or medical professionals.

Earned hold-back: The portion of the hold-back a MCO may keep based upon MLTC's determination of the MCO's results compared with identified performance measures.

Emergency medical condition: A medical condition manifesting itself by acute symptoms of sufficient severity (including severe pain) that a prudent layperson, who possesses an average knowledge of health and medicine, could reasonably expect the absence of immediate medical attention to result in the following: (1) placing the health of the individual (or, with respect to a pregnant woman, the health of the woman or her unborn child) in serious jeopardy; (2) serious impairment to bodily functions; or, (3) serious dysfunction of any bodily organ or part.

Emergency services: Covered inpatient and outpatient services that are either furnished by a provider that is qualified to furnish these services under Title 42 CFR, or the services needed to evaluate or stabilize an emergency medical condition.

Encounter data: Line-level utilization and expenditure data for services furnished to members through a MCO.

Enrollee: An individual entitled to benefits under Title XIX or Title XXI of the Social Security Act and under the rules for participation in the Nebraska Medical Assistance Program.

Enrollment: The process of an enrollee selecting a MCO.

Enrollment broker: The State's contracted entity for choice counseling and enrollment activities.

Enrollment file: A proprietary data file provided by the State to a MCO. It is the basis for monthly payments to the MCO.

Evaluation: The process of examining an offer after opening to determine the vendor's responsibility, responsiveness to requirements, and to ascertain other characteristics of the offer that relate to determination of the successful award.

Evaluation Committee: Committee(s) appointed by the requesting agency that advises and assists the procuring office in the evaluation of bids/proposals.

Extension: Continuance of a contract for a specified duration by agreement of the parties beyond the original Contract Period. Not to be confused with "renewal period".

Family planning services: Covered services for family planning include initial physical examination and health history, annual and follow-up visits, laboratory services, prescribing and supplying contraceptive supplies and devices, counseling services, and prescribing medication for specific treatment.

Federally qualified MCO: An MCO that CMS has determined is a qualified MCO under Section 1310(d) of the Public Health Services Act.

Fee-for-service: A method of provider reimbursement based on payments for each service rendered.

Forfeited hold-back: The portion of the hold-back a MCO must forfeit, based upon MLTC's determination of the MCO's results compared with identified performance measures. Forfeited hold-back may also be referred to as unearned hold-back.

Formulary: A list maintained by a MCO giving details of medications payable by the MCO's health plan.

Foreign Corporation: A foreign corporation that was organized and chartered under the laws of another state, government, or country.

Generally accepted actuarial principles: The common set of actuarial standards, as determined by the American Academy of Actuaries.

Grievance: A written or verbal expression of dissatisfaction about any matter other than an action.

Health care professional: A physician or any of the following: a podiatrist, optometrist, chiropractor, psychologist, dentist, physician's assistant, physical or occupational therapist, therapist assistant, speech-language pathologist, audiologist, registered or practical nurse (including nurse practitioner, clinical nurse specialist, certified registered nurse anesthetist, and certified nurse midwife), licensed and certified social worker, registered respiratory therapist, and certified respiratory therapy technician.

Health insurance providers fee: As required by Section 9010 of the Patient Protection and Affordable Care Act (ACA), the fee imposed on each covered entity engaged in the business of providing health insurance for United States health risks.

Health risk screening: A health questionnaire, used to provide individuals with an evaluation of their health risks and quality of life.

Health risk assessment: A more detailed assessment for those members who have been deemed to potentially qualify for care management services. The health risk assessment is used to collect information on a member's health status that includes, but is not limited to, member demographics, personal and family medical history, and lifestyle.

Hold-back: The portion of the MCO's revenue that the MCO must reserve in the reinvestment holding account and may potentially earn based upon MLTC's determination of the MCO's results on identified performance measures.

Hold-back account: The account a MCO must establish for the purpose of reserving the hold-back.

Information system(s): A combination of computing and telecommunications hardware and software that is used in: (a) the capture, storage, manipulation, movement, control, display, interchange and/or transmission of information, i.e., structured data that may include digitized audio and video and documents, as well as non-digitized audio and video; and/or (b) the processing of information and non-digitized audio and video for purposes of enabling or facilitating a business process or related transaction.

Insolvency: A financial condition that exists when an entity is unable to pay its debts as they become due in the usual course of business, or when the liabilities of the entity exceed its assets.

Late Bid/Proposal: An offer received after the Opening Date and Time.

Liquidated damages: Damages that may be assessed whenever a MCO, its providers, and/or subcontractor fail to achieve certain performance standards and other items defined in this contract.

Long-term services and supports: Specific Medicaid-covered services including intermediate care facility services for individuals with developmental disabilities, any institutional long-term care or nursing facility services at a custodial level of care, services provided via a Home and Community Based Waiver program, Targeted Case Management, or Medicaid State Plan Personal Assistance Services.

Managed Care Organization (MCO): A private entity that contracts with MLTC to provide benefits and services to Nebraska Medicaid enrollees in exchange for a monthly prepaid capitated amount per member. The entity is regulated by the Nebraska Department of Insurance with respect to licensure and financial solvency, and with respect to its products and services offered pursuant to the HERITAGE HEALTH is regulated by the Nebraska Department of Health and Human Services.

Mandatory/Must: Required, compulsory, or obligatory.

Marketing: Any communication from a MCO to a Medicaid enrollee who is not enrolled in that entity that can reasonably be interpreted as intended to influence the enrollee to enroll in that particular MCO or either to not enroll in or to disenroll from another MCO.

Marketing materials: Materials that are produced in any medium, by or on behalf of the MCO, and can reasonably be interpreted as intended to market to potential enrollees.
May: Discretionary, permitted; used to express possibility.

Meaningful use: Using certified electronic health records technology in a meaningful way, as established in the Health Information Technology for Economic and Clinical Health Act.

Medicaid fraud: Fraud is defined by Federal law (42 CFR 455.2) as "an intentional deception or misrepresentation made by a person with the knowledge that the deception could result in some unauthorized benefit to himself or some other person. It includes any act that constitutes fraud under applicable Federal or State law."

Medical incentive bonuses: Payments made by a MCO to providers and other unrelated risk sharing entities to share savings.

Medical loss ratio (MLR): The percentage of qualifying revenue (for the risk corridor and MLR calculations) spent on covered services for members and allowable QI expenses under this contract.

Medical necessity: Health care services and supplies that are medically appropriate and:
1. Necessary to meet the basic health needs of the member.
2. Rendered in the most cost-efficient manner and type of setting appropriate for the delivery of the covered service.
3. Consistent in type, frequency, and duration of treatment with scientifically-based guidelines of national medical, research, or health care coverage organizations or governmental agencies.
4. Consistent with the diagnosis of the condition.
5. Required for means other than convenience of the client or his/her physician.
6. No more intrusive or restrictive than necessary to provide a proper balance of safety, effectiveness, and efficiency.
7. Of demonstrated value.
8. No more intensive level of service than can be safely provided.

Member: A Medicaid enrollee who is currently enrolled with a specific MCO.

Module (see System): A collection of routines and data structures that perform a specific function of software.

Must: See mandatory/must.

National Drug Code (NDC): The universal product identifier for human drugs.

Nebraska Medicaid Program (NE Medicaid or Medicaid): NE Medicaid provides health care services to eligible elderly and disabled individuals and eligible low-income pregnant women, children and parents. NE Medicaid also includes the Children's Health Insurance Program and home and community-based services for individuals qualified for Medicaid waivers NE Medicaid is administered by the Division of Medicaid and Long Term Care (MLTC) of the Nebraska Department of Health and Human Services (DHHS).

Net qualified medical expense (for the medical loss ratio): The sum of:
1. Claims incurred
2. Claims incurred but not paid, plus provisions for adverse deviation and loss adjustment expense
3. Medical incentive bonuses
4. Reinsurance premiums less reinsurance recoveries
5. Activities that improve health care quality, per 45 CFR 158.150
6. Less related-party medical margin

Net qualified medical expense (for the risk corridor): The sum of:
1. Claims incurred
2. Claims incurred but not paid, plus provisions for adverse deviation and loss adjustment expense
3. Medical incentive bonuses
4. Reinsurance premiums less reinsurance recoveries
5. Less related-party medical margin

Non-quality improvement (QI) administrative expenses: All non-benefit expenses of operating pursuant to the requirements of this contract, other than medical, prescription drugs, DME, and other benefits for the contract year. Non-benefit, administrative expenses include:

1. Direct administration: customer service, enrollment, medical management, claims administration, etc.
2. Indirect administration: accounting, actuarial, legal, human resources, etc.
3. Net cost of reinsurance: reinsurance premium less projected reinsurance recoveries. Net cost of related party reinsurance is excluded.

Non-QI administrative expense rate: Non-QI Administrative Expenses divided by Qualifying Revenue.

Open Market Purchase: Authorization may be given to an agency to purchase items above direct purchase authority due to the unique nature, price, quantity, location of the agency, or time limitations by the AS Materiel Division, State Purchasing Bureau.

Opening Date and Time: Specified date and time for the public opening of received, labeled, and sealed formal proposals.

Outsourcing: The contracting out of a business process which an organization may have previously performed internally or has a new need for, to an independent organization from which the process is purchased back.
Patient-centered medical home (PCMH): The Center for Medical Home Improvement defines PCMH as a community-based primary care setting that provides and coordinates high quality, planned, family-centered, health promotion, acute illness care, and chronic condition management.

Patient centeredness: Health care that establishes a partnership among practitioners, patients, and their families (when appropriate) to ensure that decisions respect patients' wants, needs, and preferences, and that patients have the education and support they need to make decisions and participate in their own care. Patient centeredness focuses on the patient, not the illness, and is supported by good provider-patient relations.

Peer review: A process of evaluating work completed by practitioners in the same professional field.

Performance Bond: An insurance agreement, accompanied by a monetary commitment, by which a third party (the surety) accepts liability and guarantees that a Contractor fulfills any and all obligations under a contract.

Post stabilization care services: Covered services, related to an emergency medical condition, that are provided after an enrollee/member is stabilized in order to maintain the stabilized condition, or under the circumstances described in 42 CFR 438.114(e), to improve or resolve the enrollee's/member's condition.

Provider-preventable condition: Preventable healthcare-acquired or other provider-preventable conditions and events identified by MLTC for non-payment, such as but not limited to, bed pressure ulcers or decubitus ulcers; or events such as surgical or invasive procedures performed on the wrong body part or wrong patient, or the wrong surgical procedure performed on a patient.

Potential enrollee: A Medicaid recipient who is subject to mandatory enrollment with an HMO, but is not yet a member of a specific MCO.

Practitioner: A Medicaid enrolled provider who is licensed, registered, or certified by MLTC to practice in the State.

Pre-Bid/Pre-Proposal Conference: A meeting scheduled for the purpose of clarifying a written solicitation and related expectations.

Prepaid inpatient health plan (PIHP): As defined by 44 NAC Sections 4701 to 4727, and 42 CFR 438.2, a PIHP is and entity that:
1. Provides medical services to enrollees under contract with MLTC on the basis of prepaid capitation payments or other payment arrangements that do not use Medicaid State Plan payment rates.
2. Provides, arranges for, or otherwise has responsibility for, the provision of any inpatient hospital or institutional services for its enrollees, and does not have a comprehensive risk contract.

Preferred drug list (PDL): A list maintained by MLTC, in partnership with the State Pharmaceutical and Therapeutics Committee, that indicates whether drugs are preferred or non-preferred by the State and therefore also by the MCO under the terms of this RFP.

Primary care provider (PCP): A medical professional chosen by or assigned to the member to provide primary care services. Provider types that can be PCPs are doctors of medicine (MDs) or doctors of osteopathic medicine (DOs) from any of the following practice areas: general practice, family practice, internal medicine, pediatrics, and obstetrics/gynecology (OB/GYN). Advanced practice nurses (APNs) and physician assistants may also serve as PCPs when they are practicing under the supervision of a physician who also qualifies as a PCP under this contract and specialize in family practice, internal medicine, pediatrics or obstetrics/gynecology.

Primary care services: All health care services and laboratory services customarily furnished by or through a general practitioner, family physician, internal medicine physician, obstetrician/gynecologist, or pediatrician, to the extent the furnishing of those services is legally authorized in the State in which the practitioner furnishes them.

Product: Something that is distributed commercially for use or consumption and that is usually (1) tangible personal property, (2) the result of fabrication or processing, and (3) an item that has passed through a chain of commercial distribution before ultimate use or consumption.

Project: The total scheme, program, or method worked out for the accomplishment of an objective, including all documentation, commodities, and services to be provided under a contract.

Proposal: See Bid/Proposal.

Proprietary Information: Proprietary information is defined as trade secrets, academic and scientific research work which is in progress and unpublished, and other information that if released would give advantage to business competitors and serve no public purpose (see Neb. Rev. Stat. §84-712.05(3)). In accordance with Attorney General Opinions 92068 and 97033, proof that information is proprietary requires identification of specific, named competitor(s) who would be advantaged by release of the information and the specific advantage the competitor(s) would receive.

Protest: A complaint about a governmental action or decision related to an Invitation to Bid or resultant contract, brought by a vendor who has timely submitted a bid response in connection with the award in question, to AS Materiel Division or another designated agency with the intention of achieving a remedial result.

Provider: Any individual or entity furnishing Medicaid services under an agreement with the Medicaid agency under the FFS model, or for the managed care program, any individual or entity who/that is engaged in the delivery of health care services and is legally authorized to do so by the State in which it delivers the services.

Public Proposal Opening: The process of opening correctly submitted offers at the time and place specified in the written solicitation and in the presence of anyone who wished to attend.

Qualifying revenue (for the risk corridor calculation): The aggregate of revenue earned by a MCO and related parties, including parent and subsidy companies and risk bearing partners under this contract, including capitation payments and ignoring federal and state premium taxes and non-operating income. Any earned hold-back is not factored into the calculation.

Qualifying revenue (for the administrative cap calculation): The aggregate of revenue earned by the MCO and related parties, including parent and subsidy companies and risk bearing partners under this contract, including capitation payments and ignoring federal and state premium taxes and non-operating income. The hold-back (earned and forfeited) is factored into the calculation.

Quality improvement (QI) administrative rate: Equals the QI Expenses divided by Qualifying Revenue.

Quality management: The continuous process of assuring appropriate, timely, accessible, available, and medically necessary delivery of services. Maintaining established guidelines and standards reflective of the current state of physical and behavioral health knowledge.

Readiness review: MLTC's assessment of the MCO's ability to fulfill the RFP requirements. Such review may include but not be limited to review of proper licensure, operational protocols, MCO standards, and MCO systems. This review may be done as a desk review, on-site review, or combination and may include interviews with pertinent MCO personnel.

Re-enrollment: The process by which the State automatically re-assigns a member who is disenrolled solely because he or she loses Medicaid eligibility, when a loss of eligibility does not exceed two months, into the same MCO.

Reinsurance: An insurance product, also known as stop-loss insurance, risk control, or excess insurance, which provides protection against catastrophic or unpredictable losses. An MCO may purchase reinsurance to protect itself against part or all of the losses incurred in the process of honoring the claims of members.

Reinvestment account: The account a MCO must establish for any profits in excess of the contracted amount, performance contingencies imposed by MLTC, and any unearned hold-back funds, pursuant to Neb. Rev. Stat. §71-831-.

Related-party: The parent company of a MCO or an entity partially or wholly owned by the MCO or the MCO's parent company that receives any revenue from the MCO for Medicaid contracted services. Examples of related parties include a clinic wholly or partly owned by a MCO or its parent company that provides services covered by Nebraska Medicaid and subcontractors to the MCO performing services under this contract.

Related-party administrative expense: Fees paid by a MCO, or any of its subsidiaries, to a related party such as a parent organization. Such fees are not considered in the calculation of administrative expense under this contract.

Related-party administrative margin: Related-party administrative expense divided by qualifying revenue.

Related party medical margin: The difference between medical costs incurred, including a related-party relationship and those incurred in the absence of a related-party arrangement. An arrangement whereby a MCO pays a related party a sub-capitation. For example, because Medicaid medical expenses must reflect the costs that would have been incurred in the absence of any related-party relationship, the circumstance in which a MCO pays any related party a sub-capitation would necessitate calculation of the related party medical margin.

Release Date: The date of public release of the written solicitation to seek offers

Renewal Period: An optional contract period subsequent to the original contract period, for a specified duration, and with previously agreed-to terms and conditions. Not to be confused with an extension.

Representative: Includes an agent, an officer of a corporation or association, a trustee, executor or administrator of an estate, or any other person legally empowered to act for another.

Request for Proposal (RFP): A written solicitation utilized for obtaining competitive offers.

Responsible bidder: A bidder who has the capability in all respects to perform fully and lawfully all requirements with integrity and reliability to ensure good faith performance.

Responsive bidder: A bidder who has submitted a bid which conforms to all requirements of the solicitation document.

Restricted services: A method used by the State to limit the medical services of a client who has been determined to be abusing or inappropriately utilizing services provided by HERITAGE HEALTH.

Risk contract: A contract under which the contractor: (1) assumes risk for the cost of the services covered under the contract; and (2) incurs loss if the cost of furnishing the services exceeds the payments under the contract.

Risk corridor: A risk sharing mechanism in which the State a MCO share in both profits and losses under a contract outside of a predetermined threshold amount, so that after an initial corridor in which the MCO is responsible for all losses or retains all profits, the State contributes a portion toward any additional losses and receives a portion of any additional profits.

Risk corridor calculation: The computation of a MCO's profit or loss by MLTC's actuary, as a percentage of the aggregate of qualifying revenue for the MCO and related parties, including parent and subsidiary companies and risk-bearing parties under a contract. The calculation ignores revenue taxes, non-operating income, and any forfeited hold-back.

Risk Corridor payment: Payment made by MLTC to a MCO to compensate the MCO for losses greater than 3%, as determined by the risk corridor calculation.

SCRIPT: A standard promulgated by the National Council for Prescription Drug Programs (NCPDP) for the electronic transmittal of prescription information in the United States.

Shall/Will/Must: An order/command; mandatory.

Should: Expected; suggested, but not necessarily mandatory.

Social determinants of health: Conditions in the environments in which people are born, live, learn, work, play, and age that affect a wide range of health, functioning, and quality-of-life outcomes and risks.

Solvency: The minimum standard of financial health for a MCO, where assets exceed liabilities and timely payment requirements can be met.

Software License: Legal instrument with or without printed material that governs the use or redistribution of licensed software.

Solicitation: The process of notifying prospective bidders that the State wishes to receive proposals for furnishing services. The process may consist of public advertising, posting notices, or mailing RFPs or a RFP announcement letter to prospective bidders.

Specialty drug: A drug not typically available at community retail pharmacies or under limited distribution per manufacturer/FDA; or which has a minimum of two (2) of the following characteristics:

1. Requires inventory management controls, including but not limited to, unique storage specifications, short shelf life, and special handling.
2. Must be administered, infused, or injected by a health care professional.
3. Is indicated primarily for the treatment or prevention of:
    a. A complex or chronic medical condition, defined as a physical, behavioral, or developmental condition that may have no known cure, is progressive, or can be debilitating or fatal if left untreated or under-treated, such as, but not limited to, multiple sclerosis, hepatitis C, cancer, or rheumatoid arthritis.
    b. A rare medical condition, defined as any disease or condition that typically affects fewer than 200,000 people in the United States.
4. The total monthly cost is $10,000 or more.

Specifications: The detailed statement, especially of the measurements, quality, materials, and functional characteristics, or other items to be provided under a contract.

State: The State of Nebraska or Nebraska, as the context may require.

State fair hearing: A request by a member or physician to appeal a decision made by a MCO, addressed to the State.

State share: A portion of funds originally contributed by the State, rather than the Federal government, to the operation of the Medicaid program.

Subcontractor: Any organization or person who provides a function or service for a MCO specifically related to securing or fulfilling the MCO's obligations under the terms of a contract. A subcontractor does not include a provider unless the provider is responsible for services other than those that could be covered by a provider agreement.

System (see Module): Any collection or aggregation of two (2) or more Modules that is designed to function, or is represented by the Contractor as functioning or being capable of functioning, as an entity.

Termination: Occurs when either party, pursuant to a power created by agreement or law, puts an end to the contract prior to the stated expiration date. Any obligation that may still be executory for either party is discharged, but any right based on prior breach or performance survives.

Third-party resource: Any individual, entity, or program that is or may be liable to pay all or part of the cost of any medical services furnished to a member.

Trade Secret: Information, including, but not limited to, a drawing, formula, pattern, compilation, program, device, method, technique, code, or process that (a) derives independent economic value, actual or potential, from not being known to, and not being ascertainable by proper means by, other persons who can obtain economic value from its disclosure or use; and (b) is the subject of efforts that are reasonable under the circumstances to maintain its secrecy (see Neb. Rev. Stat. §87-502(4)).

Trademark: A word, phrase, logo, or other graphic symbol used by a manufacturer or vendor to distinguish its product from those of others, registered with the U.S. Patent and Trademark Office.

Upgrade: Any change that improves or alters the basic function of a product of service.

Value-added services: Those services a MCO provides in addition to a service covered under this contract because the MCO has determined that the health status and quality of life for the member is expected to be the same or better using the value-added health service as it would be using the covered service.

Vendor: An individual or entity lawfully conducting business in the State of Nebraska, or licensed to do so, who seeks to provide goods or services under the terms of a written solicitation.

Vendor Performance Report: A report issued to a Contractor by the State Purchasing Bureau when products or services delivered or performed fail to meet the terms of the purchase order, contract, and/or specifications, as reported to State Purchasing Bureau by the agency. The State Purchasing Bureau shall contact the Contractor regarding any such report. The vendor performance report will become a part of the permanent record for the Contractor. The State may require a vendor to cure. Two reports or more may be cause for immediate termination, at the sole discretion of the State, which right is not waived by any particular instance in which it is not exercised.

Waiver of enrollment: A change in the status of a member from being considered mandatory for participation in managed care to being ineligible for participation in managed care.

Will: See Shall/Will/Must

I. SCOPE OF THE REQUEST FOR PROPOSAL

The State of Nebraska, Administrative Services (AS), Materiel Division, State Purchasing Bureau (hereafter known as State Purchasing Bureau), is issuing this Request for Proposal, RFP Number 5151 Z1 for the purpose of selecting a qualified Contractor to provide full-risk, capitated Medicaid managed care program for physical health, behavioral health, and pharmacy services. Any resulting contract is not an exclusive contract to furnish the services provided for in this Request for Proposal, and does not preclude the purchase of similar services from other sources.

A contract resulting from this Request for Proposal will be issued approximately for a period of five (5) years effective the date of award. The contract has the option to be renewed for two (2) additional one (1) year periods as mutually agreed upon by all parties. The State reserves the right to extend the period of this contract beyond the termination date when mutually agreeable to the Contractor and the State of Nebraska.

ALL INFORMATION PERTINENT TO THIS REQUEST FOR PROPOSAL CAN BE FOUND ON THE INTERNET AT: http://das.nebraska.gov/materiel/purchasing.html

A. SCHEDULE OF EVENTS

The State expects to adhere to the tentative procurement schedule shown below. It should be noted, however, that some dates are approximate and subject to change.

	ACTIVITY	DATE/TIME
1.	Release Request for Proposal	October 21, 2015
2.	Last day to submit "Notification of Intent to Attend Pre-Proposal Conference"	October 23, 2015
3.	First Pre-Proposal Conference Location: Nebraska State Office Building 301 Centennial Mall South Lower Level, Conference Room A Lincoln, NE 68508 Call-in information for those unable to be present is as follows: Conference Access Number: (888) 820-1398 Attendee Code: 8559164#	October 26, 2015 1:00 – 5:00 PM Central Time
4.	Last day to submit First Round of written questions	November 2, 2015
5.	State responds to First Round of written questions through Request for Proposal "Addendum" and/or "Amendment" to be posted to the Internet at: http://das.nebraska.gov/materiel/purchasing.html	November 16, 2015
6.	Second Pre-Proposal Conference (if needed) Location: Lincoln, NE *Room and specific time to be announced at a later date. This will be held at the option of the state.*	November 19, 2015
7.	Last day to submit Second Round written questions	November 23, 2015
8.	State responds to Second Round of written questions through Request for Proposal "Addendum" and/or "Amendment" to be posted to the Internet at: http://das.nebraska.gov/materiel/purchasing.html	December 7, 2015
9.	Proposal opening Location: State Purchasing Bureau 1526 K Street, Suite 130 Lincoln, NE 68508	December 22, 2015 2:00 PM Central Time
10.	Review for conformance of mandatory requirements	December 22, 2015
11.	Evaluation period	January 6, 2016 – January 22, 2016
12.	"Oral Interviews/Presentations and/or Demonstrations" (if required)	TBD
13.	Post "Letter of Intent to Contract" to Internet at: http://das.nebraska.gov/materiel/purchasing.html	January 29, 2016
14.	Contract finalization period	January 29, 2016 – February 29, 2016
15.	Contract award	March 1, 2016
16.	Contractor start date	January 1, 2017

II. PROCUREMENT PROCEDURES

A. PROCURING OFFICE AND CONTACT PERSON

Procurement responsibilities related to this Request for Proposal reside with the State Purchasing Bureau. The point of contact for the procurement is as follows:

Name: Michelle Thompson / Teresa Fleming
Agency: State Purchasing Bureau
Address: 1526 K Street, Suite 130
Lincoln, NE 68508

Telephone: 402-471-6500
Facsimile: 402-471-2089
E-Mail: as.materielpurchasing@nebraska.gov

B. GENERAL INFORMATION

The Request for Proposal is designed to solicit proposals from qualified vendors who will be responsible for providing full-risk, capitated Medicaid managed care program for physical health, behavioral health, and pharmacy services. Proposals that do not conform to the mandatory items as indicated in the Request for Proposal will not be considered.

Proposals shall conform to all instructions, conditions, and requirements included in the Request for Proposal. Prospective bidders are expected to carefully examine all documentation, schedules, and requirements stipulated in this Request for Proposal, and respond to each requirement in the format prescribed.

A fixed-price contract will be awarded as a result of this proposal. In addition to the provisions of this Request for Proposal and the awarded proposal, which shall be incorporated by reference in the contract, any additional clauses or provisions required by the terms and conditions will be included as an amendment to the contract.

C. CUSTOMER SERVICE

In addition to any specified service requirements contained in this agreement, the Contractor agrees and understands that satisfactory customer service is required. Contractor will develop or provide technology and business procedures designed to enhance the level of customer satisfaction and to provide the customer appropriate information given their situation. Contractor, its employees, Sub-Contractors, and agents must be accountable, responsive, reliable, patient, and have well-developed communication skills as set forth by the customer service industry's best practices and processes.

D. COMMUNICATION WITH STATE STAFF AND EVALUATORS

From the date the Request for Proposal is issued until a determination is announced regarding the selection of the Contractor, contact regarding this project between potential Contractors and individuals employed by the State is restricted to only written communication with the staff designated above as the point of contact for this Request for Proposal. Bidders shall not have any communication with, or attempt to communicate with or influence in any way, any evaluator involved in this RFP.

Once a Contractor is preliminarily selected, as documented in the intent to contract, that Contractor is restricted from communicating with State staff until a contract is signed. Violation of this condition may be considered sufficient cause to reject a Contractor's proposal and/or selection irrespective of any other condition.

The following exceptions to these restrictions are permitted:

1. written communication with the person(s) designated as the point(s) of contact for this Request for Proposal or procurement;
2. contacts made pursuant to any pre-existing contracts or obligations;
3. State staff and/or Contractor staff present at the Pre-Proposal Conference when recognized by the State Purchasing Bureau staff facilitating the meeting for the purpose of addressing questions; and
4. State-requested presentations, key personnel interviews, clarification sessions or discussions to finalize a contract.

Violations of these conditions may be considered sufficient cause to reject a bidder's proposal and/or selection irrespective of any other condition. No individual member of the State, employee of the State, or member of the Evaluation Committee is empowered to make binding statements regarding this Request for Proposal. The buyer will issue any clarifications or opinions regarding this Request for Proposal in writing.

E. WRITTEN QUESTIONS AND ANSWERS

Any explanation desired by a bidder regarding the meaning or interpretation of any Request for Proposal provision must be submitted in writing to the State Purchasing Bureau and clearly marked "RFP Number 5151 Z1; Medicaid Managed Care Program Questions". It is preferred that questions be sent via e-mail to as.materielpurchasing@nebraska.gov Questions may also be sent by facsimile to 402-471-2089, but must include a cover sheet clearly indicating that the transmission is to the attention of Michelle Thompson / Teresa Fleming, showing the total number of pages transmitted, and clearly marked "RFP Number 5151 Z1; Medicaid Managed Care Program Questions".

It is recommended that Bidders submit questions sequentially numbered, include the RFP reference and page number using the following format.

Question Number	RFP Section Reference	RFP Page Number	Question

Written answers will be provided through an addendum to be posted on the Internet at http://das.nebraska.gov/materiel/purchasing.html on or before the date shown in the Schedule of Events.

F. PRE-PROPOSAL CONFERENCE

A pre-proposal conference will be held on the date, time, and location shown in the Schedule of Events. Bidders will have an opportunity to ask questions at the conference to assist in the clarification and understanding of the Request for Proposal requirements. The State will make every reasonable attempt to answer those questions before the end of the conference. Bidders attending the pre-proposal meeting may submit further questions in writing for questions which the bidder requires an official written response as shown in the Schedule of Events.

Written answers to written questions along with a list of conference attendees will be provided through an addendum to be posted on the Internet at http://das.nebraska.gov/materiel/purchasing.html on or before the date shown in the Schedule of Events. Verbal responses provided during the pre-proposal meeting shall not be binding on the State of Nebraska.

1. NOTIFICATION OF INTENT TO ATTEND PRE-PROPOSAL CONFERENCE

Notification of attendance should be submitted to the State Purchasing Bureau via e-mail (as.materielpurchasing@nebraska.gov), facsimile (402-471-2089), hand delivery or US mail by the date shown in the Schedule of Events. Potential bidders should utilize the "Notification of Intent to Attend Pre-Proposal Conference" (see Form B) that accompanies this document to the contact person shown on the cover page of the Request for Proposal Form. This form should be filled out in its entirety and returned no later than the date shown in the Schedule of Events.

G. ORAL INTERVIEWS/PRESENTATIONS AND/OR DEMONSTRATIONS

The Evaluation Committee(s) may conclude after the completion of the Technical Proposal evaluation that oral interviews/presentations and/or demonstrations are required in order to determine the successful bidder. All bidders may not have an opportunity to interview/present and/or give demonstrations; the State reserves the right to select only the top scoring bidders to present/give oral interviews in its sole discretion. The scores from the oral interviews/presentations and/or demonstrations will be added to the scores from the Technical Proposals. The presentation process will allow the bidders to demonstrate their proposal offering, explaining and/or clarifying any unusual or significant elements related to their proposals. Bidders' key personnel may be requested to participate in a structured interview to determine their understanding of the requirements of this proposal, their authority and reporting relationships within their firm, and their management style and philosophy. Bidders shall not be allowed to alter or amend their proposals. Only representatives of the State and the presenting bidders will be permitted to attend the oral interviews/presentations and/or demonstrations.

Once the oral interviews/presentations and/or demonstrations have been completed the State reserves the right to make a contract award without any further discussion with the bidders regarding the proposals received.

Detailed notes of oral interviews/presentations and/or demonstrations may be recorded and supplemental information (such as briefing charts, et cetera) may be accepted; however, such supplemental information shall not be considered an amendment to a bidders' proposal. Additional written information gathered in this manner shall not constitute replacement of proposal contents.

Any cost incidental to the oral interviews/presentations and/or demonstrations shall be borne entirely by the bidder and will not be compensated by the State.

H. SUBMISSION OF PROPOSALS

The following describes the requirements related to proposal submission, proposal handling, and review by the State.

To facilitate the proposal evaluation process, one (1) original of the entire proposal should be submitted. Proposals must be submitted by the proposal due date and time. **A separate sheet must be provided that clearly states which sections have been submitted as proprietary or have copyrighted materials**. All proprietary information the bidder wishes the State to withhold must be submitted in accordance with the instructions outlined in Section III, Proprietary Information. Proposal responses should include the completed Form A, Bidder Contact Sheet. Proposals must reference the Request for Proposal number and be sent to the specified address. Please note that the address label should appear as specified in Section II part A on the face of each container or bidder's bid response packet. Rejected late proposals will be returned to the bidder unopened, if requested, at bidder's expense. If a recipient phone number is required for delivery purposes, 402-471-6500 should be used. The Request for Proposal number must be included in all correspondence.

Emphasis should be concentrated on conformance to the Request for Proposal instructions, responsiveness to requirements, completeness, and clarity of content. If the bidder's proposal is presented in such a fashion that makes evaluation difficult or overly time consuming, it is likely that the proposal will be rejected.

IMPORTANT NOTICE: Pursuant to Neb. Rev. Stat. §84-602.02, all State contracts in effect as of January 1, 2014 will be posted to a public website beginning July 1, 2014. All non-proprietary or confidential information as defined by Law **WILL BE POSTED FOR PUBLIC VIEWING**.

The Technical Proposal should be presented in separate sections (loose-leaf binders are preferred) on standard 8 ½" x 11" paper, except that charts, diagrams and the like may be on fold-outs which, when folded, fit into the 8 ½" by 11" format. Pages may be consecutively numbered for the entire proposal, or may be numbered consecutively within sections. Figures and tables must be numbered consecutively within sections. Figures and tables must be numbered and referenced in the text by that number. They should be placed as close as possible to the referencing text. The State has proposed page limitations as set forth in Attachment 19 – Proposal Statements and Questions.

I. PROPOSAL OPENING

The sealed proposals will be publicly opened and the bidding entities announced on the date, time, and location shown in the Schedule of Events. Proposals will be available for viewing by those present at the proposal opening. Vendors may also contact the State to schedule an appointment for viewing proposals after the Intent to Award has been posted to the website.

J. LATE PROPOSALS

Proposals received after the time and date of the proposal opening will be considered late proposals. Rejected late proposals will be returned to the bidder unopened, if requested, at bidder's expense. The State is not responsible for proposals that are late or lost due to mail service inadequacies, traffic, or any other reason(s).

K. REJECTION OF PROPOSALS

The State reserves the right to reject any or all proposals, wholly or in part, or to award to multiple bidders in whole or in part. The State reserves the right to waive any deviations or errors that are not material, do not invalidate the legitimacy of the proposal and do not improve the bidder's competitive position. All awards will be made in a manner deemed in the best interest of the State.

L. EVALUATION OF PROPOSALS

All responses to this Request for Proposal which fulfill all mandatory requirements will be evaluated. Each category will have a maximum possible point potential. The State will conduct a fair, impartial, and comprehensive evaluation of all proposals in accordance with the criteria set forth below. The State may elect to use a third-party to conduct credit checks as part of the corporate overview evaluation. Areas that will be addressed and scored during the evaluation include:

1. Corporate Overview shall include but is not limited to:
- **a.** the ability, capacity, and skill of the bidder to deliver and implement the system or project that meets the requirements of the Request for Proposal;
- **b.** the character, integrity, reputation, judgment, experience, and efficiency of the bidder;
- **c.** whether the bidder can perform the contract within the specified time frame;
- **d.** the quality of bidder performance on prior contracts;
- **e.** such other information that may be secured and that has a bearing on the decision to award the contract; and

2. Technical Approach.

Neb. Rev. Stat. §73-107 allows for a preference for a resident disabled veteran or business located in a designated enterprise zone. When a state contract is to be awarded to the lowest responsible bidder, a resident disabled veteran or a business located in a designated enterprise zone under the Enterprise Zone Act shall be allowed a preference over any other resident or nonresident bidder, if all other factors are equal.

Resident disabled veterans means any person (a) who resides in the State of Nebraska, who served in the United States Armed Forces, including any reserve component or the National Guard, who was discharged or otherwise separated with a characterization of honorable or general (under honorable conditions), and who possesses a disability rating letter issued by the United States Department of Veterans Affairs establishing a service-connected disability or a disability determination from the United States Department of Defense and (b)(i) who owns and controls a business or, in the case of a publicly owned business, more than fifty percent of the stock is owned by one or more persons described in subdivision (a) of this subsection and (ii) the management and daily business operations of the business are controlled by one or more persons described in subdivision(a) of this subsection. Any contract entered into without compliance with this section shall be null and void.

Therefore, if a resident disabled veteran or business located in a designated enterprise zone submits a bid in accordance with Neb. Rev. Stat. §73-107 and has so indicated on the RFP cover page under "Bidder must complete the following" requesting priority/preference to be considered in the award of this contract, the following will need to be submitted by the vendor within ten (10) business days of request:

a. Documentation from the United States Armed Forces confirming service;
b. Documentation of discharge or otherwise separated characterization of honorable or general (under honorable conditions);
c. Disability rating letter issued by the United States Department of Veterans Affairs establishing a service-connected disability or a disability determination from the United States Department of Defense; and
d. Documentation which shows ownership and control of a business or, in the case of a publicly owned business, more than fifty percent of the stock is owned by one or more persons described in subdivision (a) of this subsection; and the management and daily business operations of the business are controlled by one or more persons described in subdivision (a) of this subsection.

Failure to submit the requested documentation within ten (10) business days of notice will disqualify the bidder from consideration of the preference.

Evaluation criteria will become public information at the time of the Request for Proposal opening. Evaluation criteria and a list of respondents will be posted to the State Purchasing Bureau website at http://das.nebraska.gov/materiel/purchasing.html Evaluation criteria will not be released prior to the proposal opening.

M. EVALUATION COMMITTEE

Proposals will be independently evaluated by members of the Evaluation Committee(s). The Evaluation Committee(s) will consist of staff with the appropriate expertise to conduct such proposal evaluations. Names of the members of the Evaluation Committee(s) will not be published.

Prior to award, bidders are advised that only the point of contact indicated on the front cover of this Request for Proposal For Contractual Services Form can clarify issues or render any opinion regarding this Request for Proposal. No individual member of the State, employee of the State, or member of the Evaluation Committee(s) is empowered to make binding statements regarding this Request for Proposal.

Any contact, or attempted contact, with an evaluator that is involved with this RFP may result in the rejection of this proposal and further administrative actions may be taken.

N. MANDATORY REQUIREMENTS

The proposals will first be examined to determine if all mandatory requirements listed below have been addressed to warrant further evaluation. Proposals not meeting mandatory requirements will be excluded from further evaluation. The mandatory requirement items are as follows:

1. Request for Proposal For Contractual Services form, signed in ink;
2. Section III Terms and Conditions;
3. Corporate Overview; and
4. Technical Approach.

O. REFERENCE CHECKS

The State reserves the right to check any reference(s), regardless of the source of the reference information, including but not limited to, those that are identified by the company in the proposal, those indicated through the explicitly specified contacts, those that are identified during the review of the proposal, or those that result from communication with other entities involved with similar projects. The State may use a third-party to conduct reference checks.

Information to be requested and evaluated from references may include, but is not limited to, some or all of the following: financial stability of the company, project description and background, job performed, functional and technical abilities, communication skills and timeliness, cost and schedule estimates and accuracy, problems (poor quality deliverables, contract disputes, work stoppages, et cetera), overall performance, and whether or not the reference would rehire the firm or individual. Only top scoring bidders may receive reference checks, and negative references may eliminate bidders from consideration for award.

P. SECRETARY OF STATE/TAX COMMISSIONER REGISTRATION REQUIREMENTS

All bidders should be authorized to transact business in the State of Nebraska. All bidders are expected to comply with all Nebraska Secretary of State Registration requirements. It is the responsibility of the bidder to comply with any registration requirements pertaining to types of business entities (e.g. person, partnership, foreign or domestic limited liability company, association, or foreign or domestic corporation or other type of business entity). The bidder who is the recipient of an Intent to Award will be required to certify that it has so complied and produce a true and exact copy of its current (within ninety (90) calendar days), valid Certificate of Good Standing or Letter of Good Standing; or in the case of a sole proprietorship, provide written documentation of sole proprietorship. This must be accomplished prior to the award of the contract. Construction Contractors are expected to meet all applicable requirements of the Nebraska Contractor Registration Act and provide a current, valid certificate of registration. Further, all bidders shall comply with any and all other applicable Nebraska statutes regarding transacting business in the State of Nebraska. Bidders should submit the above certification(s) with their bid.

If a bank is registered with the Office of Comptroller of Currency, it is not required to register with the State. However, the Office of Comptroller of Currency does have a certificate of good standing/registration. The bank could provide that for verification. (Optional)

Q. VIOLATION OF TERMS AND CONDITIONS

Violation of the terms and conditions contained in this Request for Proposal or any resultant contract, at any time before or after the award, shall be grounds for action by the State which may include, but is not limited to, the following:

1. Rejection of a bidder's proposal;
2. Suspension of the bidder from further bidding with the State for the period of time relative to the seriousness of the violation, such period to be within the sole discretion of the State.

III. TERMS AND CONDITIONS

By signing the "Request for Proposal for Contractual Services" form, the bidder guarantees compliance with the provisions stated in this Request for Proposal, agrees to the Terms and Conditions unless otherwise agreed to, and certifies bidder maintains a drug free work place environment.

Bidders are expected to closely read the Terms and Conditions and provide a binding signature of intent to comply with the Terms and Conditions; provided, however, a bidder may indicate any exceptions to the Terms and Conditions by (1) clearly identifying the term or condition by subsection, and (2) including an explanation for the bidder's inability to comply with such term or condition which includes a statement recommending terms and conditions the bidder would find acceptable. Rejection in whole or in part of the Terms and Conditions may be cause for rejection of a bidder's proposal. **Bidders must include completed Section III with their proposal response**.

A. GENERAL

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

The contract resulting from this Request for Proposal shall incorporate the following documents:

1. Amendment to Contract Award with the most recent dated amendment having the highest priority;
2. Contract Award and any attached Addenda;
3. The Request for Proposal form and the Contractor's Proposal, signed in ink
4. Amendments to RFP and any Questions and Answers; and
5. The original RFP document and any Addenda.

These documents constitute the entirety of the contract.

Unless otherwise specifically stated in a contract amendment, in case of any conflict between the incorporated documents, the documents shall govern in the following order of preference with number one (1) receiving preference over all other documents and with each lower numbered document having preference over any higher numbered document: 1) Amendment to Contract Award with the most recent dated amendment having the highest priority, 2) Contract Award and any attached Addenda, 3) the signed Request for Proposal form and the Contractor's Proposal, 4) Amendments to RFP and any Questions and Answers, 5) the original RFP document and any Addenda.

Any ambiguity in any provision of this contract which shall be discovered after its execution shall be resolved in accordance with the rules of contract interpretation as established in the State of Nebraska.

Once proposals are opened they become the property of the State of Nebraska and will not be returned.

B. AWARD

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

All purchases, leases, or contracts which are based on competitive proposals will be awarded according to the provisions in the Request for Proposal. The State reserves the right to reject any or all proposals, in whole or in part, or to award to multiple bidders in whole or in part, and at its discretion, may withdraw or amend the Request for Proposal at any time. The State reserves the right to waive any deviations or errors that are not material, do not invalidate the legitimacy of the proposal, and do not improve the bidder's competitive position. All awards will be made in a manner deemed in the best interest of the State. The Request for Proposal does not commit the State to

award a contract. If, in the opinion of the State, revisions or amendments will require substantive changes in proposals, the due date may be extended.
By submitting a proposal in response to this Request for Proposal, the bidder grants to the State the right to contact or arrange a visit in person with any or all of the bidder's clients.

Once intent to award decision has been determined, it will be posted to the Internet at:
http://das.nebraska.gov/materiel/purchasing.html

Protest procedure is available on the Internet at:
http://das.nebraska.gov/materiel/purchase_bureau/docs/vendors/protest/ProtestGrievanceProcedureForVendors.pdf

Any protests must be filed by a vendor within ten (10) business days after the intent to award decision is posted to the Internet.

C. COMPLIANCE WITH CIVIL RIGHTS LAWS AND EQUAL OPPORTUNITY EMPLOYMENT / NONDISCRIMINATION

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

The Contractor shall comply with all applicable local, state, and federal statutes and regulations regarding civil rights laws and equal opportunity employment. The Nebraska Fair Employment Practice Act prohibits Contractors of the State of Nebraska, and their Sub-Contractors, from discriminating against any employee or applicant for employment, with respect to hire, tenure, terms, conditions, compensation, or privileges of employment because of race, color, religion, sex, disability, marital status, or national origin (Neb. Rev. Stat. §48-1101 to 48-1125). The Contractor guarantees compliance with the Nebraska Fair Employment Practice Act, and breach of this provision shall be regarded as a material breach of contract. The Contractor shall insert a similar provision in all sub-contracts for services to be covered by any contract resulting from this Request for Proposal.

D. PERMITS, REGULATIONS, LAWS

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

The Contractor shall procure and pay for all permits, licenses, and approvals necessary for the execution of the contract. The Contractor shall comply with all applicable local, state, and federal laws, ordinances, rules, orders, and regulations.

E. OWNERSHIP OF INFORMATION AND DATA

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

The State of Nebraska shall have the unlimited right to publish, duplicate, use, and disclose all information and data developed or derived by the Contractor pursuant to this contract.

The Contractor must guarantee that it has the full legal right to the materials, supplies, equipment, and other rights or titles (e.g. rights to licenses transfer or assign deliverables) necessary to execute this contract. The contract price shall, without exception, include compensation for all royalties and costs arising from patents, trademarks, and copyrights that are in any way involved in the contract. It shall be the responsibility of the Contractor to pay for all royalties and costs, and the State must be held harmless from any such claims.

F. INSURANCE REQUIREMENTS

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

The Contractor shall not commence work under this contract until all the insurance required hereunder has been obtained and such insurance has been approved by the State. The Contractor shall maintain all required insurance for the life of this contract and shall ensure that the State Purchasing Bureau has the most current certificate of insurance throughout the life of this contract. If Contractor will be utilizing any Sub-Contractors, the Contractor is responsible for obtaining the certificate(s) of insurance required herein under from any and all Sub-Contractor(s). The Contractor is also responsible for ensuring Sub-Contractor(s) maintain the insurance required until completion of the contract requirements. The Contractor shall not allow any Sub-Contractor to commence work on any Sub-Contract until all similar insurance required of the Sub-Contractor has been obtained and approved by the Contractor. Approval of the insurance by the State shall not limit, relieve, or decrease the liability of the Contractor hereunder.

If by the terms of any insurance a mandatory deductible is required, or if the Contractor elects to increase the mandatory deductible amount, the Contractor shall be responsible for payment of the amount of the deductible in the event of a paid claim.

1. WORKERS' COMPENSATION INSURANCE

The Contractor shall take out and maintain during the life of this contract the statutory Workers' Compensation and Employer's Liability Insurance for all of the contactors' employees to be engaged in work on the project under this contract and, in case any such work is sublet, the Contractor shall require the Sub-Contractor similarly to provide Worker's Compensation and Employer's Liability Insurance for all of the Sub-Contractor's employees to be engaged in such work. This policy shall be written to meet the statutory requirements for the state in which the work is to be performed, including Occupational Disease. This policy shall include a waiver of subrogation in favor of the State. The amounts of such insurance shall not be less than the limits stated hereinafter.

2. COMMERCIAL GENERAL LIABILITY INSURANCE AND COMMERCIAL AUTOMOBILE LIABILITY INSURANCE

The Contractor shall take out and maintain during the life of this contract such Commercial General Liability Insurance and Commercial Automobile Liability Insurance as shall protect Contractor and any Sub-Contractor performing work covered by this contract from claims for damages for bodily injury, including death, as well as from claims for property damage, which may arise from operations under this contract, whether such operation be by the Contractor or by any Sub-Contractor or by anyone directly or indirectly employed by either of them, and the amounts of such insurance shall not be less than limits stated hereinafter.

The Commercial General Liability Insurance shall be written on an occurrence basis, and provide Premises/Operations, Products/Completed Operations, Independent Contractors, Personal Injury, and Contractual Liability coverage. The policy shall include the State, and others as required by the contract documents, as Additional Insured(s). This policy shall be primary, and any insurance or self-insurance carried by the State shall be considered excess and non-contributory. The Commercial Automobile Liability Insurance shall be written to cover all Owned, Non-owned, and Hired vehicles.

3. REINSURANCE

a. The MCO must file all contracts of reinsurance, or a summary of the plan of self-insurance.

b. All reinsurance agreements or summaries of plans of self-insurance must be filed with MLTC and must remain in full force and effect for a minimum of 30 calendar days following written notice by registered mail of cancellation by either party. Pursuant to the Health Maintenance Organization Act, Neb. Rev. Stat. §44-3292 et seq. and other relevant laws.

c. The MCO must maintain reinsurance agreements throughout the contract period, including any extension(s) or renewal(s). The MCO must provide prior notification to MLTC of its intent to purchase or modify reinsurance protection for any members enrolled in the MCO.

d. The MCO must provide to MLTC the risk analyses, assumptions, cost estimates, and rationales supporting its proposed reinsurance arrangements for prior approval. If any reinsurance is provided through related parties, disclosure of the entities and details causing the related-party relationship must be specifically disclosed.

4. INSURANCE COVERAGE AMOUNTS REQUIRED

a. WORKERS' COMPENSATION AND EMPLOYER'S LIABILITY

Coverage A	Statutory
Coverage B	
Bodily Injury by Accident	$100,000 each accident
Bodily Injury by Disease	$500,000 policy limit
Bodily Injury by Disease	$100,000 each employee

b. COMMERCIAL GENERAL LIABILITY

General Aggregate	$2,000,000
Products/Completed Operations Aggregate	$2,000,000
Personal/Advertising Injury	$1,000,000 any one person
Bodily Injury/Property Damage	$1,000,000 per occurrence
Fire Damage	$50,000 any one fire
Medical Payments	$5,000 any one person

c. COMMERCIAL AUTOMOBILE LIABILITY

Bodily Injury/Property Damage $1,000,000 combined single limit

d. UMBRELLA/EXCESS LIABILITY

Over Primary Insurance $5,000,000 per occurrence

e. ERRORS AND OMISSIONS $10,000,000, per occurrence

f. CYBER LIABILITY

Breach of Privacy, Security Breach, Denial of Service, Remediation, Fines and Penalties
$10,000,000 each occurrence / aggregate

g. SUBROGRATION WAIVER

"Waiver of Subrogation on the Worker's Compensation in favor of the State of Nebraska."

h. LIABILITY WAIVER

"The State of Nebraska, Certificate holder, is an additionally insured, primary & noncontributory on the General Liability."

5. EVIDENCE OF COVERAGE

The Contractor should furnish the State, with their proposal response, a certificate of insurance coverage complying with the above requirements to the attention of the Buyer at 402-471-2089 (fax)

Administrative Services
State Purchasing Bureau
1526 K Street, Suite 130
Lincoln, NE 68508

These certificates or the cover sheet shall reference the RFP number, and the certificates shall include the name of the company, policy numbers, effective dates, dates of expiration, and amounts and types of coverage afforded. If the State is damaged by the failure of the Contractor to maintain such insurance, then the Contractor shall be responsible for all reasonable costs properly attributable thereto.

Notice of cancellation of any required insurance policy must be submitted to Administrative Services State Purchasing Bureau when issued and a new coverage binder shall be submitted immediately to ensure no break in coverage.

G. COOPERATION WITH OTHER CONTRACTORS

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

The State may already have in place or choose to award supplemental contracts for work related to this Request for Proposal, or any portion thereof.

9. The State reserves the right to award the contract jointly between two or more potential Contractors, if such an arrangement is in the best interest of the State.

10. The Contractor shall agree to cooperate with such other Contractors, and shall not commit or permit any act which may interfere with the performance of work by any other Contractor.

H. INDEPENDENT CONTRACTOR

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

It is agreed that nothing contained herein is intended or should be construed in any manner as creating or establishing the relationship of partners between the parties hereto. The Contractor represents that it has, or will secure at its own expense, all personnel required to perform the services under the contract. The Contractor's employees and other persons engaged in work or services required by the contractor under the contract shall have no contractual relationship with the State; they shall not be considered employees of the State.

All claims on behalf of any person arising out of employment or alleged employment (including without limit claims of discrimination against the Contractor, its officers, or its agents) shall in no way be the responsibility of the State. The Contractor will hold the State harmless from any and all such claims. Such personnel or other persons shall not require nor be entitled to any compensation, rights, or benefits from the State including without limit, tenure rights, medical and hospital care, sick and vacation leave, severance pay, or retirement benefits.

I. CONTRACTOR RESPONSIBILITY

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

The Contractor is solely responsible for fulfilling the contract, with responsibility for all services offered and products to be delivered as stated in the Request for Proposal, the Contractor's proposal, and the resulting contract. The Contractor shall be the sole point of contact regarding all contractual matters.

If the Contractor intends to utilize any Sub-Contractor's services, the Sub-Contractor's level of effort, tasks, and time allocation must be clearly defined in the Contractor's proposal. The Contractor shall agree that it will not utilize any Sub-Contractors not specifically included in its proposal in the performance of the contract without the prior written authorization of the State. Following execution of the contract, the Contractor shall proceed diligently with all services and shall perform such services with qualified personnel in accordance with the contract.

J. CONTRACTOR PERSONNEL

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

The Contractor warrants that all persons assigned to the project shall be employees of the Contractor or specified Sub-Contractors, and shall be fully qualified to perform the work required herein. Personnel employed by the Contractor to fulfill the terms of the contract shall remain under the sole direction and control of the Contractor. The Contractor shall include a similar provision in any contract with any Sub-Contractor selected to perform work on the project.

Personnel commitments made in the Contractor's proposal shall not be changed without the prior written approval of the State. Replacement of key personnel, if approved by the State, shall be with personnel of equal or greater ability and qualifications.

The State reserves the right to require the Contractor to reassign or remove from the project any Contractor or Sub-Contractor employee.

In respect to its employees, the Contractor agrees to be responsible for the following:

9. any and all employment taxes and/or other payroll withholding;
10. any and all vehicles used by the Contractor's employees, including all insurance required by state law;
11. damages incurred by Contractor's employees within the scope of their duties under the contract;
12. maintaining workers' compensation and health insurance and submitting any reports on such insurance to the extent required by governing State law; and
13. determining the hours to be worked and the duties to be performed by the Contractor's employees.

K. STATE OF NEBRASKA PERSONNEL RECRUITMENT PROHIBITION

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

The Contractor shall not, at any time, recruit or employ any State employee or agent who has worked on the Request for Proposal or project, or who had any influence on decisions affecting the Request for Proposal or project for a period of two years after the contract implementation date.

L. CONFLICT OF INTEREST

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

By submitting a proposal, bidder certifies that there does not now exist any relationship between the bidder and any person or entity which is or gives the appearance of a conflict of interest related to this Request for Proposal or project.

The bidder certifies that it shall not take any action or acquire any interest, either directly or indirectly, which will conflict in any manner or degree with the performance of its services hereunder or which creates an actual or appearance of conflict of interest.

The bidder certifies that it will not employ any individual known by bidder to have a conflict of interest.

M. PROPOSAL PREPARATION COSTS

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

The State shall not incur any liability for any costs incurred by bidders in replying to this Request for Proposal, in the demonstrations and/or oral presentations, or in any other activity related to bidding on this Request for Proposal.

N. ERRORS AND OMISSIONS

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

The bidder shall not take advantage of any errors and/or omissions in this Request for Proposal or resulting contract. The bidder must promptly notify the State of any errors and/or omissions that are discovered.

O. BEGINNING OF WORK

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

The bidder shall not commence any billable work until a valid contract has been fully executed by the State and the successful Contractor. The Contractor will be notified in writing when work may begin.

P. ASSIGNMENT BY THE STATE

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

The State shall have the right to assign or transfer the contract or any of its interests herein to any agency, board, commission, or political subdivision of the State of Nebraska. There shall be no charge to the State for any assignment hereunder.

Q. ASSIGNMENT BY THE CONTRACTOR

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

The Contractor may not assign, voluntarily or involuntarily, the contract or any of its rights or obligations hereunder (including without limitation rights and duties of performance) to any third party, without the prior written consent of the State, which will not be unreasonably withheld.

R. DEVIATIONS FROM THE REQUEST FOR PROPOSAL

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

The requirements contained in the Request for Proposal become a part of the terms and conditions of the contract resulting from this Request for Proposal. Any deviations from the Request for Proposal must be clearly defined by the bidder in its proposal and, if accepted by the State, will become part of the contract. Any specifically defined deviations must not be in conflict with the basic nature of the Request for Proposal, mandatory requirements, or applicable state or federal laws or statutes. "Deviation", for the purposes of this RFP, means any proposed changes or alterations to either the contractual language or deliverables within the scope of this RFP. The State discourages deviations and reserves the right to reject proposed deviations.

S. GOVERNING LAW

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

The contract shall be governed in all respects by the laws and statutes of the State of Nebraska. Any legal proceedings against the State of Nebraska regarding this Request for Proposal or any resultant contract shall be brought in the State of Nebraska administrative or judicial forums as defined by State law. The Contractor must be in compliance with all Nebraska statutory and regulatory law.

T. ATTORNEY'S FEES

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

In the event of any litigation, appeal, or other legal action to enforce any provision of the contract, the Contractor agrees to pay all expenses of such action, as permitted by law, including attorney's fees and costs, if the State is the prevailing party.

U. ADVERTISING

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

The Contractor agrees not to refer to the contract award in advertising in such a manner as to state or imply that the company or its services are endorsed or preferred by the State. News releases pertaining to the project shall not be issued without prior written approval from the State.

V. STATE PROPERTY

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

The Contractor shall be responsible for the proper care and custody of any State-owned property which is furnished for the Contractor's use during the performance of the contract. The Contractor shall reimburse the State for any loss or damage of such property; normal wear and tear is expected.

W. SITE RULES AND REGULATIONS

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

The Contractor shall use its best efforts to ensure that its employees, agents, and Sub-Contractors comply with site rules and regulations while on State premises. If the Contractor must perform on-site work outside of the daily operational hours set forth by the State, it must make arrangements with the State to ensure access to the facility and the equipment has been arranged. No additional payment will be made by the State on the basis of lack of access, unless the State fails to provide access as agreed to between the State and the Contractor.

X. NOTIFICATION

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

During the bid process, all communication between the State and a bidder shall be between the bidder's representative clearly noted in its proposal and the buyer noted in Section II.A. Procuring Office and Contact Person, of this RFP. After the award of the contract, all notices under the contract shall be deemed duly given upon delivery to the staff designated as the point of contact for this Request for Proposal, in person, or upon delivery by U.S. Mail, facsimile, or e-mail. Each bidder should provide in its proposal the name, title, and complete address of its designee to receive notices.

1. Except as otherwise expressly specified herein, all notices, requests, or other communications shall be in writing and shall be deemed to have been given if delivered personally or mailed, by U.S. Mail, postage prepaid, return receipt requested, to the parties at their respective addresses set forth above, or at such other addresses as may be specified in writing by either of the parties. All notices, requests, or communications shall be deemed effective upon personal delivery or three (3) calendar days following deposit in the mail.

2. Whenever the Contractor encounters any difficulty which is delaying or threatens to delay its timely performance under the contract, the Contractor shall immediately give notice thereof in writing to the State reciting all relevant information with respect thereto. Such notice shall not in any way constitute a basis for an extension of the delivery schedule or be construed as a waiver by the State of any of its rights or remedies to which it is entitled by law or equity or pursuant to the provisions of the contract. Failure to give such notice, however, may be grounds for denial of any request for an extension of the delivery schedule because of such delay.

Either party may change its address for notification purposes by giving notice of the change, and setting forth the new address and an effective date.

For the duration of the contract, all communication between Contractor and the State regarding the contract shall take place between the Contractor and individuals specified by the State in writing. Communication about the contract between Contractor and individuals not designated as points of contact by the State is strictly forbidden.

Y. EARLY TERMINATION

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

The contract may be terminated as follows:

1. The State and the Contractor, by mutual written agreement, may terminate the contract at any time.

2. The State, in its sole discretion, may terminate the contract for any reason upon thirty (30) calendar day's written notice to the Contractor.

3. Pursuant to 42 CFR §438.708 the State may enroll that Contractor's members in other MCOs or provide their benefits through other options included in the Medicaid State Plan if the State, at its sole discretion, determines that the Contractor has failed to carry out the substantive terms of the contract, or meet applicable requirements in Sections 1932, 1903(m) or 1905(t) of the Social Security Act.

4. Such termination shall not relieve the Contractor of warranty or other service obligations incurred under the terms of the contract. In the event of termination the Contractor shall be entitled to payment, determined on a pro rata basis, for products or services satisfactorily performed or provided.

5. The State will provide the Contractor with a timely written Notice of Intent to Terminate (Notice) that states the nature and basis of the penalty or sanction and pre-termination hearing rights.

6. The Contractor may, at the discretion of the State, be allowed to correct the deficiencies within the thirty (30) calendar day notice period, unless other provisions in this Section demand otherwise, prior to the issuance of a Notice of Termination.

7. In accordance with 42 CFR §438.710, the State will conduct a pre-termination hearing upon the request of the MCO as outlined in the Notice to provide MCO the opportunity to contest the nature and basis of the sanction.

a. The request must be submitted in writing to the State prior to the determined date of termination stated in the Notice.

b. The MCO shall receive a written notice of the outcome of the pre-termination hearing, if applicable, indicating decision reversal or affirmation.

8. The State will notify Medicaid members enrolled in the MCO in writing, consistent with 42 CFR §438.710 and §438.722, of the affirming termination decision and of their options for receiving Medicaid services and to disenroll immediately.

9. The State may terminate the contract immediately for the following reasons:

a. if directed to do so by statute;

b. Contractor has made an assignment for the benefit of creditors, has admitted in writing its inability to pay debts as they mature, or has ceased operating in the normal course of business;

c. a trustee or receiver of the Contractor or of any substantial part of the Contractor's assets has been appointed by a court;

d. fraud, misappropriation, embezzlement, malfeasance, misfeasance, or illegal conduct pertaining to performance under the contract by its Contractor, its employees, officers, directors, or shareholders;

e. an involuntary proceeding has been commenced by any party against the Contractor under any one of the chapters of Title 11 of the United States Code and (i) the proceeding has been pending for a minimum of sixty (60) calendar days; or (ii) the Contractor has consented, either expressly or by operation of law, to the entry of an order for relief; or (iii) the Contractor has been decreed or adjudged a debtor;

f. a voluntary petition has been filed by the Contractor under any of the chapters of Title 11 of the United States Code;

g. Contractor intentionally discloses confidential information;

h. Contractor has or announces it will discontinue support of the deliverable;

i. second or subsequent documented "vendor performance report" form deemed acceptable by the State Purchasing Bureau; or

j. Contractor engaged in collusion or actions which could have provided Contractor an unfair advantage in obtaining this contract.

Z. FUNDING OUT CLAUSE OR LOSS OF APPROPRIATIONS

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

The State may terminate the contract, in whole or in part, in the event funding is no longer available. The State's obligation to pay amounts due for fiscal years following the current fiscal year is contingent upon legislative appropriation of funds for the contract. Should said funds not be appropriated, the State may terminate the contract with respect to those payments for the fiscal years for which such funds are not appropriated. The State will give the Contractor written notice thirty (30) calendar days prior to the effective date of any termination, and advise the Contractor of the location (address and room number) of any related equipment. All obligations of the State to make payments after the termination date will cease and all interest of the State in any related equipment will terminate. The Contractor shall be entitled to receive just and equitable compensation for any authorized work which has been satisfactorily completed as of the termination date. In no event shall the Contractor be paid for a loss of anticipated profit.

AA. BREACH BY CONTRACTOR

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

The State may terminate the contract, in whole or in part, if the Contractor fails to perform its obligations under the contract in a timely and proper manner. The State may, by providing a written notice of default to the Contractor, allow the Contractor to cure a failure or breach of contract within a period of thirty (30) calendar days (or longer at State's discretion considering the gravity and nature of the default). Said notice shall be delivered by Certified Mail, Return Receipt Requested, or in person with proof of delivery. Allowing the Contractor time to cure a failure or breach of contract does not waive the State's right to immediately terminate the contract for the same or different contract breach which may occur at a different time. In case of default of the Contractor, the State may contract the service from other sources and hold the Contractor responsible for any excess cost occasioned thereby.

BB. ASSURANCES BEFORE BREACH

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

If any document or deliverable required pursuant to the contract does not fulfill the requirements of the Request for Proposal/resulting contract, upon written notice from the State, the Contractor shall deliver assurances in the form of additional Contractor resources at no additional cost to the project in order to complete the deliverable, and to ensure that other project schedules will not be adversely affected.

CC. ADMINISTRATION – CONTRACT TERMINATION

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

1. Contractor must provide confirmation that upon contract termination all deliverables prepared in accordance with this agreement shall become the property of the State of Nebraska; subject to the ownership provision (section E) contained herein, and is provided to the State of Nebraska at no additional cost to the State.

2. Contractor must provide confirmation that in the event of contract termination, all records that are the property of the State will be returned to the State within thirty (30) calendar days. Notwithstanding the above, Contractor may retain one copy of any information as required to comply with applicable work product documentation standards or as are automatically retained in the course of Contractor's routine back up procedures.

DD. PENALTY

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

The State has the option to invoke penalties as described in Section IV Project Description and Scope of Work.

EE. PERFORMANCE BOND

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

The Contractor shall obtain and maintain a performance bond, rated a minimum of A by A.M. Best Company, of a standard commercial scope from a surety company or companies holding a certificate of authority to transact surety business in the state. The Contractor shall not leverage the bond as collateral for debt or create other creditors using the bond as security. The Contractor shall be in breach of this contract if it fails to maintain or renew the performance bond as required by this contract.

1. The Contractor shall obtain a performance bond in an amount equal to $50,000,000.00. The bond will guarantee that the selected contractor will faithfully perform all requirements, terms and conditions of the contract. Failure to comply shall be grounds for forfeiture of the bond as liquidated damages. Amount of forfeiture will be determined by the agency based on loss to the State. The bond will be returned when the service has been satisfactorily completed as solely determined by the State, after termination or expiration of the contract.

2. The Contractor agrees that if it is declared to be in default of any term of this contract, MLTC may elect to, in addition to any other remedies it may have under this contract, obtain payment under the performance bond for the following:

a. Making funds available through a consensus proceeding in the appropriate court for payment to subcontracted providers and non-contracted health care providers for reimbursement due to

nonpayment of claims by Contractor, in the event of a breach of Contractor's obligation under this contract;

b. Reimbursing MLTC for any payments made by MLTC on behalf of the Contractor;

c. Reimbursing MLTC for any extraordinary administrative expenses incurred by a breach of Contractor's obligations under this contract, including, expenses incurred after termination of this contract by MLTC;

d. Making any payments or expenditures deemed necessary to MLTC, in its sole discretion, incurred by MLTC in the direct operation of the contract pursuant to the terms of this contract and to reimburse MLTC for any extraordinary administrative expenses incurred in connection with the direct operation of the Contractor; and

e. The Contractor shall reimburse MLTC for expenses exceeding the performance bond amount.

FF. FORCE MAJEURE

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

Neither party shall be liable for any costs or damages resulting from its inability to perform any of its obligations under the contract due to a natural disaster, or other similar event outside the control and not the fault of the affected party ("Force Majeure Event"). A Force Majeure Event shall not constitute a breach of the contract. The party so affected shall immediately give notice to the other party of the Force Majeure Event. The State may grant relief from performance of the contract if the Contractor is prevented from performance by a Force Majeure Event. The burden of proof for the need for such relief shall rest upon the Contractor. To obtain release based on a Force Majeure Event, the Contractor shall file a written request for such relief with the State Purchasing Bureau. Labor disputes with the impacted party's own employees will not be considered a Force Majeure Event and will not suspend performance requirements under the contract.

GG. PAYMENT

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

State will render payment to Contractor when the terms and conditions of the contract and specifications have been satisfactorily completed on the part of the Contractor as solely determined by the State. Payment will be made by the responsible agency in compliance with the State of Nebraska Prompt Payment Act (See Neb. Rev. Stat. §81-2401 through 81-2408). The State may require the Contractor to accept payment by electronic means such as ACH deposit. In no event shall the State be responsible or liable to pay for any services provided by the Contractor prior to the Effective Date, and the Contractor hereby waives any claim or cause of action for any such services.

HH. RIGHT TO AUDIT

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

Contractor shall establish and maintain a reasonable accounting system that enables the State to readily audit contract. The State and its authorized representatives shall have the right to audit, to examine, and to make copies of or extracts from all financial and related records (in whatever form they may be kept, whether written, electronic, or other) relating to or pertaining to this contract kept by or under the control of the Contractor, including, but not

limited to those kept by the Contractor, its employees, agents, assigns, successors, and Sub-Contractors. Such records shall include, but not be limited to, accounting records, written policies and procedures; all paid vouchers including those for out-of-pocket expenses; other reimbursement supported by invoices; ledgers; cancelled checks; deposit slips; bank statements; journals; original estimates; estimating work sheets; contract amendments and change order files; back charge logs and supporting documentation; insurance documents; payroll documents; timesheets; memoranda; and correspondence.

Contractor shall, at all times during the term of this contract and for a period of ten (10) years after the completion of this contract, maintain such records, together with such supporting or underlying documents and materials. The Contractor shall at any time requested by the State, whether during or after completion of this contract and at Contractor's own expense make such records available for inspection and audit (including copies and extracts of records as required) by the State. Such records shall be made available to the State during normal business hours at the Contractor's office or place of business. In the event that no such location is available, then the financial records, together with the supporting or underlying documents and records, shall be made available for audit at a time and location that is convenient for the State. Contractor shall ensure the State has these rights with Contractor's assigns, successors, and Sub-Contractors, and the obligations of these rights shall be explicitly included in any subcontracts or agreements formed between the Contractor and any Sub-Contractors to the extent that those sub-contracts or agreements relate to fulfillment of the Contractor's obligations to the State.

Costs of any audits conducted under the authority of this right to audit and not addressed elsewhere will be borne by the State unless certain exemption criteria are met. If the audit identifies overpricing or overcharges (of any nature) by the Contractor to the State in excess of one-half of one percent (.5%) of the total contract billings, the Contractor shall reimburse the State for the total costs of the audit. If the audit discovers substantive findings related to fraud, misrepresentation, or non-performance, the Contractor shall reimburse the State for total costs of audit. Any adjustments and/or payments that must be made as a result of any such audit or inspection of the Contractor's invoices and/or records shall be made within a reasonable amount of time (not to exceed 90 days) from presentation of the State's findings to Contractor.

II. TAXES

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

The State is not required to pay taxes of any kind and assumes no such liability as a result of this solicitation. Any property tax payable on the Contractor's equipment which may be installed in a state-owned facility is the responsibility of the Contractor.

JJ. INSPECTION AND APPROVAL

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

Final inspection and approval of all work required under the contract shall be performed by the designated State officials. The State and/or its authorized representatives shall have the right to enter any premises where the Contractor or Sub-Contractor duties under the contract are being performed, and to inspect, monitor or otherwise evaluate the work being performed. All inspections and evaluations shall be at reasonable times and in a manner that will not unreasonably delay work.

KK. CHANGES IN SCOPE/CHANGE ORDERS

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

The State may, upon the written agreement of Contractor, make changes to the contract within the general scope of the RFP. The State may, at any time work is in progress, by written agreement, make alterations in the terms of work as shown in the specifications, require the Contractor to make corrections, decrease the quantity of work, or make such other changes as the State may find necessary or desirable. The Contractor shall not claim forfeiture of contract by reasons of such changes by the State. Changes in work and the amount of compensation to be paid to the Contractor shall be determined in accordance with applicable unit prices if any, or a pro-rated value.

Corrections of any deliverable, service or performance of work required pursuant to the contract shall not be deemed a modification. Changes or additions to the contract beyond the scope of the RFP are not permitted; however, that this RFP must meet all applicable federal legal requirements and regulations, including Medicaid laws, rules and regulations, and any future amendments to this RFP that are required to bring Nebraska in compliance with federal Medicaid law shall be deemed part of the scope of the requested bid.

LL. SEVERABILITY

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

If any term or condition of the contract is declared by a court of competent jurisdiction to be illegal or in conflict with any law, the validity of the remaining terms and conditions shall not be affected, and the rights and obligations of the parties shall be construed and enforced as if the contract did not contain the particular provision held to be invalid.

MM. CONFIDENTIALITY

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

All materials and information provided by the State or acquired by the Contractor on behalf of the State shall be regarded as confidential information. All materials and information provided by the State or acquired by the Contractor on behalf of the State shall be handled in accordance with federal and state law, and ethical standards. The Contractor must ensure the confidentiality of such materials or information. Should said confidentiality be breached by a Contractor; Contractor shall notify the State immediately of said breach and take immediate corrective action.

It is incumbent upon the Contractor to inform its officers and employees of the penalties for improper disclosure imposed by the Privacy Act of 1974, 5 U.S.C. 552a. Specifically, 5 U.S.C. 552a (i)(1), which is made applicable to Contractors by 5 U.S.C. 552a (m)(1), provides that any officer or employee of a Contractor, who by virtue of his/her employment or official position has possession of or access to agency records which contain individually identifiable information, the disclosure of which is prohibited by the Privacy Act or regulations established thereunder, and who knowing that disclosure of the specific material is prohibited, willfully discloses the material in any manner to any person or agency not entitled to receive it, shall be guilty of a misdemeanor and fined not more than $5,000.

NN. PROPRIETARY INFORMATION

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

Data contained in the proposal and all documentation provided therein, become the property of the State of Nebraska and the data becomes public information upon opening the proposal. If the bidder wishes to have any information withheld from the public, such information must fall within the definition of proprietary information contained within Nebraska's public record statutes. **All proprietary information the bidder wishes the State to withhold must be submitted in a sealed package, which is separate from the remainder of the proposal, and provide supporting documents showing why such documents should be marked proprietary.** The separate package must be clearly marked PROPRIETARY on the outside of the package. **Bidders may not mark their entire Request for Proposal as proprietary.** Failure of the bidder to follow the instructions for submitting proprietary and copyrighted information may result in the information being viewed by other bidders and the public. Proprietary information is defined as trade secrets, academic and scientific research work which is in progress and unpublished, and other information which if released would give advantage to business competitors and serve no public purpose (see Neb. Rev. Stat. §84-712.05(3)). In accordance with Attorney General Opinions 92068 and 97033, bidders submitting information as proprietary may be required to prove specific, named competitor(s) who would be advantaged by release of the information and the specific advantage the competitor(s) would receive. Although every effort will be made to withhold information that is properly submitted as proprietary and meets the State's definition of proprietary information, the State is under no obligation to maintain the confidentiality of proprietary information and accepts no liability for the release of such information.

IMPORTANT NOTICE: Pursuant to Neb. Rev. Stat. §84-602.02, all State contracts in effect as of January 1, 2014 will be posted to a public website beginning July 1, 2014. All non-proprietary or confidential information as defined by Law **WILL BE POSTED FOR PUBLIC VIEWING**.

OO. CERTIFICATION OF INDEPENDENT PRICE DETERMINATION/COLLUSIVE BIDDING

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

By submission of this proposal, the bidder certifies that it is the party making the foregoing proposal and that the proposal is not made in the interest of, or on behalf of, any undisclosed person, partnership, company, association, organization, or corporation; that the proposal is genuine and not collusive or sham; that the bidder has not directly or indirectly induced or solicited any other bidder to put in a false or sham proposal, and has not directly or indirectly colluded, conspired, connived, or agreed with any bidder or anyone else to put in a sham proposal, or that anyone shall refrain from bidding; that the bidder has not in any manner, directly or indirectly, sought by agreement, communication, or conference with anyone to fix the proposal price of the bidder or any other bidder, or to fix any overhead, profit, or cost element of the proposal price, or of that of any other bidder, or to secure any advantage against the public body awarding the contract of anyone interested in the proposed contract; that all statements contained in the proposal are true; and further that the bidder has not, directly or indirectly, submitted the proposal price or any breakdown thereof, or the contents thereof, or divulged information or data relative thereto, or paid, and will not pay, any fee to any corporation, partnership, company association, organization, proposal depository, or to any member or agent thereof to effectuate a collusive or sham proposal.

PP. STATEMENT OF NON-COLLUSION

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

The proposal shall be arrived at by the bidder independently and be submitted without collusion with, and without any direct or indirect agreement, understanding or planned common course of action with, any person; firm; corporation; bidder; Contractor of materials, supplies, equipment or services described in this RFP. Bidder shall not collude with, or attempt to collude with, any state officials, employees or agents; or evaluators or any person involved in this RFP. The bidder shall not take any action in the restraint of free competition or designed to limit independent bidding or to create an unfair advantage.

Should it be determined that collusion occurred, the State reserves the right to reject a bid or terminate the contract and impose further administrative sanctions.

QQ. PRICES

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

Price information is provided under Section IV.P MCO Reimbursement.

RR. BEST AND FINAL OFFER

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

The State will compile the final scores for all parts of each proposal. The award may be granted to the highest scoring responsive and responsible bidder. Alternatively, the highest scoring bidder or bidders may be requested to submit best and final offers. If best and final offers are requested by the State and submitted by the bidder, they will be evaluated (using the stated criteria), scored, and ranked by the Evaluation Committee. The award will then be granted to the highest scoring bidder. However, a bidder should provide its best offer in its original proposal. Bidders should not expect that the State will request a best and final offer.

SS. ETHICS IN PUBLIC CONTRACTING

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

No bidder shall pay or offer to pay, either directly or indirectly, any fee, commission compensation, gift, gratuity, or anything of value to any State officer, legislator, employee or evaluator based on the understanding that the receiving person's vote, actions, or judgment will be influenced thereby. No bidder shall give any item of value to any employee of the State Purchasing Bureau or any evaluator.

Bidders shall be prohibited from utilizing the services of lobbyists, attorneys, political activists, or consultants to secure the contract. It is the intent of this provision to assure that the prohibition of state contact during the procurement process is not subverted through the use of lobbyists, attorneys, political activists, or consultants. It is the intent of the State that the process of evaluation of proposals and award of the contract be completed without external influence. It is not the intent of this section to prohibit bidders from seeking professional advice, for example consulting legal counsel, regarding terms and conditions of this Request for Proposal or the format or content of their proposal.

If the bidder is found to be in non-compliance with this section of the Request for Proposal, they may forfeit the contract if awarded to them or be disqualified from the selection process.

In compliance with the Byrd Anti-Lobbying Amendment, contractors who apply or bid shall file the required certification that each tier will not use federal funds to pay a person or employee or organization for influencing or attempting to influence an officer or employee of any federal agency, a member of Congress, officer or employee of Congress, or an employee of a member of Congress in connection with obtaining any federal contract, grant or any other award covered by 31 U.S.C. §1352. Each tier shall also disclose any lobbying with nonfederal funds that takes place in connection with obtaining any federal award. Such disclosures are forwarded from tier-to-tier up to the recipient (45 CFR §3).

TT. INDEMNIFICATION

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

1. GENERAL

The Contractor agrees to defend, indemnify, hold, and save harmless the State and its employees, volunteers, agents, and its elected and appointed officials ("the indemnified parties") from and against any and all claims, liens, demands, damages, liability, actions, causes of action, losses, judgments, costs, and expenses of every nature, including investigation costs and expenses, settlement costs, and attorney fees and expenses ("the claims"), sustained or asserted against the State, arising out of, resulting from, or attributable to the willful misconduct, negligence, error, or omission of the Contractor, its employees, Sub-Contractors, consultants, representatives, and agents, except to the extent such Contractor liability is attenuated by any action of the State which directly and proximately contributed to the claims.

2. INTELLECTUAL PROPERTY

The Contractor agrees it will, at its sole cost and expense, defend, indemnify, and hold harmless the indemnified parties from and against any and all claims, to the extent such claims arise out of, result from, or are attributable to, the actual or alleged infringement or misappropriation of any patent, copyright, trade secret, trademark, or confidential information of any third party by the Contractor or its employees, Sub-Contractors, consultants, representatives, and agents; provided, however, the State gives the Contractor prompt notice in writing of the claim. The Contractor may not settle any infringement claim that will affect the State's use of the Licensed Software without the State's prior written consent, which consent may be withheld for any reason.

If a judgment or settlement is obtained or reasonably anticipated against the State's use of any intellectual property for which the Contractor has indemnified the State, the Contractor shall, at the Contractor's sole cost and expense, promptly modify the item or items which were determined to be infringing, acquire a license or licenses on the State's behalf to provide the necessary rights to the State to eliminate the infringement, or provide the State with a non-infringing substitute that provides the State the same functionality. At the State's election, the actual or anticipated judgment may be treated as a breach of warranty by the Contractor, and the State may receive the remedies provided under this RFP.

3. PERSONNEL

The Contractor shall, at its expense, indemnify and hold harmless the indemnified parties from and against any claim with respect to withholding taxes, worker's compensation, employee benefits, or any other claim, demand, liability, damage, or loss of any nature relating to any of the personnel provided by the Contractor.

UU. NEBRASKA TECHNOLOGY ACCESS STANDARDS

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

Contractor shall review the Nebraska Technology Access Standards, found at http://nitc.nebraska.gov/standards/2-201.html and ensure that products and/or services provided under the contract are in compliance or will comply with the applicable standards. In the event such standards change during the Contractor's performance, the State may create an amendment to the contract to request the contract comply with the changed standard at a cost mutually acceptable to the parties.

VV. ANTITRUST

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

The Contractor hereby assigns to the State any and all claims for overcharges as to goods and/or services provided in connection with this contract resulting from antitrust violations which arise under antitrust laws of the United States and the antitrust laws of the State.

WW. DISASTER RECOVERY/BACK UP PLAN

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

The Contractor shall have a disaster recovery and back-up plan, of which a copy should be provided to the State, which includes, but is not limited to equipment, personnel, facilities, and transportation, in order to continue services as specified under the specifications in the contract in the event of a disaster.

XX. TIME IS OF THE ESSENCE

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

Time is of the essence in this contract. The acceptance of late performance with or without objection or reservation by the State shall not waive any rights of the State nor constitute a waiver of the requirement of timely performance of any obligations on the part of the Contractor remaining to be performed.

YY. RECYCLING

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

Preference will be given to items which are manufactured or produced from recycled material or which can be readily reused or recycled after their normal use as per Neb. Rev. Stat. §81-15,159.

ZZ. POLICY

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

Contractor certifies it maintains a drug free work place environment to ensure worker safety and workplace integrity. Contractor agrees to provide a copy of its drug free workplace policy at any time upon request by the State.

AAA. EMPLOYEE WORK ELIGIBILITY STATUS

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

The Contractor is required and hereby agrees to use a federal immigration verification system to determine the work eligibility status of employees physically performing services within the State of Nebraska. A federal immigration verification system means the electronic verification of the work authorization program authorized by the Illegal Immigration Reform and Immigrant Responsibility Act of 1996, 8 U.S.C. 1324a, known as the E-Verify Program, or an equivalent federal program designated by the United States Department of Homeland Security or other federal agency authorized to verify the work eligibility status of an employee.

If the Contractor is an individual or sole proprietorship, the following applies:

1. The Contractor must complete the United States Citizenship Attestation Form, available on the Department of Administrative Services website at http://das.nebraska.gov/materiel/purchasing.html

The completed United States Attestation Form should be submitted with the Request for Proposal response.

2. If the Contractor indicates on such attestation form that he or she is a qualified alien, the Contractor agrees to provide the US Citizenship and Immigration Services documentation required to verify the Contractor's lawful presence in the United States using the Systematic Alien Verification for Entitlements (SAVE) Program.

3. The Contractor understands and agrees that lawful presence in the United States is required and the Contractor may be disqualified or the contract terminated if such lawful presence cannot be verified as required by Neb. Rev. Stat. §4-108.

BBB. CERTIFICATION REGARDING DEBARMENT, SUSPENSION AND INELIGIBILITY

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

The Contractor, by signature to this RFP, certifies that the Contractor is not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded by any federal department or agency from participating in transactions (debarred). The Contractor also agrees to include the above requirements in any and all sub-contracts into which it enters. The Contractor shall immediately notify the Department if, during the term of this contract, Contractor becomes debarred. The Department may immediately terminate this contract by providing Contractor written notice if Contractor becomes debarred during the term of this contract.

Contractor, by signature to this RFP, certifies that Contractor has not had a contract with the State of Nebraska terminated early by the State of Nebraska. If Contractor has had a contract terminated early by the State of Nebraska, Contractor must provide the contract number, along with an explanation of why the contract was terminated early. Prior early termination may be cause for rejecting the proposal.

CCC. OFFICE OF PUBLIC COUNSEL

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

If it provides, under the terms of this contract and on behalf of the State of Nebraska, health and human services to individuals; service delivery; service coordination; or case management, Contractor shall submit to the jurisdiction of the Office of Public Counsel, pursuant to Neb. Rev. Stat. §§ 81-8,240 et seq. This section shall survive the termination of this contract and shall not apply if Contractor is a long-term care facility subject to the Long-Term Care Ombudsman Act, Neb. Rev. Stat. §§ 81-2237 et seq.

DDD. LONG-TERM CARE OMBUDSMAN

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

If it is a long-term care facility subject to the Long-Term Care Ombudsman Act, Neb. Rev. Stat. §§ 81-2237 et seq., Contractor shall comply with the Act. This section shall survive the termination of this contract.

EEE. LICENSE/SERVICE OR OTHER AGREEMENTS

Accept (Initial)	Reject (Initial)	Reject & Provide Alternative within RFP Response (Initial)	NOTES/COMMENTS:

Any License/Service or other such agreements which the bidder may want the State to consider must be submitted with the bid. Any License/Service or other such agreements submitted to the State post bid opening may result in

the bid being rejected in its entirety. Any such agreement, if agreed to by the State, will be considered an addendum to the contract. Any terms and conditions contained in any such accepted agreement (addendum) must not conflict with or alter the State's Terms and Conditions (Terms and Conditions) as contained in the RFP and finalized in the contract. In the event of any conflict between the Terms and Conditions and any addendum the Terms and Conditions will prevail.

The State reserves the right to reject any submitted addendum and considers the submission of any such addendum to be a proposed alteration of the Terms and Conditions.

This clause does not apply to any third party license or service agreements.

IV. PROJECT DESCRIPTION AND SCOPE OF WORK

The bidder should provide the following information in response to this Request for Proposal.

A. PROGRAM DESCRIPTION

1. Description of Current Program

a. The State of Nebraska's Medicaid program is administered by the Department of Health and Human Services (DHHS), Division of Medicaid & Long-Term Care (MLTC). DHHS is comprised of six (6) divisions:

i. The Division of Behavioral Health provides funding, oversight, and technical assistance to the six (6) local behavioral health regions. The regions contract with local programs to provide public inpatient, outpatient, emergency community mental health, and substance use disorder services.

ii. The Division of Children and Family Services administers child welfare, adult protective services, economic support programs, and the youth rehabilitation and treatment centers.

iii. The Division of Developmental Disabilities administers publicly-funded community-based disability services. The Division also operates several sites that provide services for individuals with developmental disabilities.

iv. MLTC administers the Medicaid program, which provides health care services to eligible elderly and disabled individuals, and low income pregnant women, children, and parents. The Division also administers non-institutional home and community-based services for qualified individuals, the aged, adults and children with disabilities, and infants and toddlers with special needs.

v. The Division of Public Health is responsible for preventive and community health programs and services. It also regulates and licenses health-related professionals, health care facilities, and services.

vi. The Division of Veterans' Homes oversees the State Veterans' Homes located in Bellevue, Norfolk, Grand Island and Scottsbluff.

b. Nebraska Medicaid currently provides health care coverage for approximately 239,000 individuals each month at an annual cost of approximately $1.8 billion. Attachment 1 – Medicaid Enrollees by County, State FY 2015 summarizes the number of Medicaid enrollees by county.

c. Heritage Health, implemented in July 1995, includes approximately 189,000 individuals enrolled in physical health managed care and approximately 229,000 individuals enrolled in behavioral health managed care. Those individuals who are enrolled in behavioral health managed care, but not physical health managed care, receive their physical health services from the Nebraska Medical Assistance Program under a fee-for-service (FFS) reimbursement model.

d. Heritage Health is authorized under section 1932 of the Social Security Act, which permits a state to operate a managed care program through its Medicaid State Plan. Additionally, Nebraska operates a 1915(b) waiver in order to require special needs children and Native Americans to participate in the managed care program. The 1915(b) waiver permits Nebraska Medicaid to operate the behavioral health managed care program.

e. Heritage Health currently includes:

i. Physical health managed care provided, through risk-comprehensive contracts that are fully-capitated and require the contracted entity to be a MCO or health insuring organization. "Comprehensive" means that the contracted entity is at financial risk to provide all the services in the core benefits package.

ii. Behavioral health managed care provided through a risk contract which is not comprehensive, but is fully-capitated, and requires that the managed care entity be a prepaid inpatient health plan (PIHP).

iii. Physical health managed care currently provided through:

a) Two (2) MCO networks in Cass, Dodge, Douglas, Gage, Lancaster, Otoe, Sarpy, Saunders, Seward, and Washington counties.

b) Two (2) MCO networks in Adams, Antelope, Arthur, Banner, Blaine, Boone, Box Butte, Boyd, Brown, Buffalo, Burt, Butler, Cedar, Chase, Cherry, Cheyenne, Clay, Colfax, Cuming, Custer, Dakota, Dawes, Dawson, Deuel, Dixon, Dundy, Fillmore, Franklin, Frontier, Furnas, Garden, Garfield, Gosper, Grant, Greeley, Hall, Hamilton, Harlan, Hayes, Hitchcock, Holt, Hooker, Howard, Jefferson, Johnson, Kearney, Keith, Keya Paha, Kimball, Knox, Lincoln, Logan, Loup, Madison, McPherson, Merrick, Morrill, Nance, Nemaha, Nuckolls, Pawnee, Perkins, Phelps, Pierce, Platte, Polk, Red Willow, Richardson, Rock, Saline, Scotts Bluff, Sheridan, Sherman, Sioux, Stanton, Thayer, Thomas, Thurston, Valley, Wayne, Webster, Wheeler, and York counties.

iv. Behavioral health managed care provided through one statewide PIHP network.

f. MLTC currently contracts with vendors to perform the following services for the Heritage Health:

i. physical health managed care services
ii. behavioral health managed care services
iii. enrollment broker services
iv. external quality review services
v. actuarial services
vi. pharmacy benefit management services

g. With implementation of this contract, notable changes in the managed care program will include:

i. Integration of physical and behavioral health managed care through a minimum of two (2) and a maximum of three (3) MCO contracts for all 93 counties in the State of Nebraska.

ii. Inclusion of pharmacy services in the core benefit package and the MCO capitation rate, at a date to be determined by MLTC.

iii. Inclusion of the Aged, Blind and Disabled populations who are dually eligible for Medicaid and Medicare, in a home and community-based services (HCBS) waiver program, or living in an institution, for managed care physical health services.

iv. Expansion of enrollment broker services to complete the process of member enrollment.

9. Purpose of the Request for Proposal

a. Managed care was implemented in Nebraska to improve the health and wellness of Medicaid clients by increasing their access to comprehensive health services in a cost-effective manner. As behavioral health services are added to the physical health delivery system, additional goals for all members include decreased reliance on emergency and inpatient levels of care by providing clients with evidence-based care options that emphasize early intervention and community-based treatment. MLTC also anticipates that integrated physical and behavioral health managed care will achieve the following outcomes:

i. Improved health outcomes
ii. Enhanced integration of services and quality of care
iii. Emphasis on person-centered care, including enhanced preventive and care management (CM) services
iv. Reduced rate of costly and avoidable care
v. Improved financially sustainable system

b. MLTC intends to award a minimum of two (2) and a maximum of three (3) MCO contracts through this procurement process which will provide integrated managed care health services statewide for all 93 counties in the State.

10. Included Populations

Medicaid populations who are mandated to participate in the Nebraska Medicaid managed care program include:

a. Families, children, and pregnant women eligible for Medicaid under Section 1931 of the Social Security Act or related coverage groups.

b. Children, adults, and related populations who are eligible for Medicaid due to blindness or disability.

c. Medicaid beneficiaries who are age 65 or older and not members of the blind/disabled population or members of the Section 1931 adult population.

d. Low-income children who are eligible to participate in Medicaid in Nebraska through Title XXI, the Children's Health Insurance Program (CHIP).

e. Medicaid beneficiaries who are receiving foster care or subsidized adoption assistance (Title IV-E), are in foster care, or are otherwise in an out-of-home placement.

f. Medicaid beneficiaries who participate in a HCBS Waiver program. This includes adults with intellectual disabilities or related conditions; children with intellectual disabilities and their families, aged persons, and adults and children with disabilities; members receiving targeted case management through the DHHS Division of Developmental Disabilities; Traumatic Brain Injury Waiver participants; and any other group covered by the State's 1915(c) waiver of the Social Security Act.

g. Women who are eligible for Medicaid through the Breast and Cervical Cancer Prevention and Treatment Act of 2000 (Every Woman Matters).

h. Medicaid beneficiaries for the period of retroactive eligibility, when mandatory enrollment for managed care has been determined.

i. Members eligible during a period of presumptive eligibility.

11. Excluded Populations

Within the groups identified above, the following categories of beneficiaries are excluded from managed care:

a. Aliens who are eligible for Medicaid for an emergency condition only.

b. Beneficiaries who have excess income or who are required to pay a premium, except those who are continuously eligible due to a share of cost obligation to a nursing facility or for HCBS Waiver services.

c. Beneficiaries who have received a disenrollment or waiver of enrollment.

d. Participants in the Program for All-Inclusive Care for the Elderly.

e. Beneficiaries with Medicare coverage where Medicaid only pays co-insurance and deductibles.

12. Changes to Population Groups and Services

MLTC may add, delete, or otherwise modify included and excluded population groups and services. If changed, the contract will be amended, and the MCO given as much advance notice as reasonably possible.

B. ELIGIBILITY AND ENROLLMENT

1. Eligibility

a. DHHS administers and manages eligibility for Medicaid and economic assistance programs through ACCESSNebraska. Individuals can apply for Medicaid benefits on the ACCESSNebraska website (ACCESSNebraska.ne.gov), over the telephone with dedicated Medicaid eligibility customer service staff, or by visiting designated local offices.

b. Regulations covering eligibility for Nebraska Medicaid are available in Title 477 of the Nebraska Administrative Code.

c. Renewals of Medicaid and CHIP eligibility are conducted annually.

2. Member Enrollment/Assignment

a. The MCO must comply with all enrollment and disenrollment procedures described in this section of the RFP.

b. The MCO and all its staff and subcontractors must have an understanding of the Medicaid population and the enrollment process. The MCO must work cooperatively with MLTC to resolve issues relating to enrollee participation and the enrollment process.

c. The State maintains responsibility for the enrollment of members into MCOs through a contractual arrangement with its enrollment broker. The State or its enrollment broker provides enrollees with access to a member guidebook, plan matrix, and provider directory to assist each enrollee in choosing a MCO plan and a PCP. The enrollment broker provides impartial choice counseling to assist each enrollee in choosing an MCO.

d. Enrollees are requested to enroll with a MCO plan and select a PCP within 15 calendar days of receipt of the MCO enrollment outreach letter, which is sent by either MLTC or its enrollment broker.

e. The enrollment broker is the only entity, other than MLTC, authorized to assist a Medicaid enrollee in the selection of a MCO. The enrollment broker is responsible for notifying all managed care enrollees and MCO members of their enrollment and disenrollment rights and responsibilities within the timeframe specified in this section.

f. Potential enrollees determined mandatory for managed care will be immediately enrolled in managed care after the required choice period, retroactive to the first day of the first month of the member's eligibility for Medicaid.

g. The MCO must have the technological capability and resources to interface with the State's and the enrollment broker's systems as necessary to support all aspects of the enrollment and disenrollment processes.

h. The MCO's eligibility system must show the member's effective date with the MCO as the first day of the month in which the member is determined Medicaid eligible. For example, if the State's eligibility file indicates the member was determined Medicaid eligible on 3/2/2015, and assigned to the MCO on 3/11/2015, the MCO's eligibility system must reflect an eligibility and enrollment date of 3/1/2015.

i. For current Heritage Health members at the time of the effective date of this contract, the annual enrollment choice period will be aligned with the contract start date. For example, if a member was determined Medicaid eligible retroactive to November 1, 2016, the MCO enrollment date will be the contractor start date.

j. MLTC and its enrollment broker shall make every effort to ensure that Medicaid eligible individuals who are excluded from managed care are not enrolled in a MCO. To ensure that such individuals are not assigned to a MCO, the MCO must work with MLTC or its enrollment broker to identify these individuals. The MCO must also notify MLTC if it learns that a member is no longer Medicaid eligible.

k. The State will automatically re-enroll a member who is disenrolled solely because he or she loses Medicaid eligibility, when a loss of eligibility does not exceed two months, into the same MCO (and assign the individual to the same PCP).

3. Auto-Assignment Algorithm

a. Prior to the contract start date, all current Heritage Health members and enrollees will be allowed an open enrollment period to select a MCO and choose a PCP. Current MCO members who do not select a MCO during that time frame will be assigned automatically to one as of the effective date of this contract.

b. Auto-assignment algorithms and decisions are at the sole discretion of MLTC and all MCOs must abide by the auto-assignment decisions.

c. The enrollment broker will auto-assign enrollees who do not select a specific MCO.

d. When an enrollee cannot be enrolled into his/her requested MCO because of a MLTC-imposed sanction or for another reason, the enrollee will be auto-assigned to another MCO.

e. In accordance with 42 Code of Federal Regulations (CFR) 438.50(f), the automatic assignment methodology will seek to preserve existing provider-recipient relationships and relationships with providers that have traditionally served Medicaid recipients. After consideration of provider-recipient relationships, the methodology will assign recipients equitably among MCOs, excluding those subject to an intermediate sanction. The automatic assignment methodology will not take into consideration the enrollee's previous MCO assignment.

f. The automatic assignment methodology is based on the following considerations:

i. If an enrollee has immediate family or household members enrolled in a MCO, the enrollee will be enrolled in that MCO.

ii. If the member's PCP is not currently in-network, the enrollment broker will use a round robin method to determine the MCO assignment that maximizes the preservation of existing provider relationships.

iii. If a MCO's membership is comprised of 40% or more of total statewide enrollment at the end of any quarter, that plan will be removed from the auto-assignment round robin process for the following quarter but members can continue to pro-actively select that plan.

iv. In addition, the MCO's quality measures may be factored into the algorithm for auto-assignment, at the discretion of MLTC.

v. Auto-assignment will attempt to balance enrollment among the MCOs, but is not guaranteed.

4. MCO Enrollment Procedures

a. Acceptance of All Eligible Individuals

i. The MCO must accept all eligible individuals who select it or are assigned to it. The MCO must not discriminate against MCO members on the basis of their health history, health status, need for health care services, or adverse change in health status; or on the basis of age, religious belief, gender, sexual orientation, ethnicity, or language needs.

ii. This applies to enrollment, re-enrollment, or disenrollment from the MCO. The MCO may be subject to monetary penalties and other sanctions if it is determined by MLTC that the MCO has requested disenrollment for any of these reasons.

iii. The MCO must accept enrollees in the order in which they are assigned without restriction, up to the enrollment capacity limits set by MLTC.

b. Effective Date of Enrollment

i. The effective date of enrollment in the MCO is the date provided on the outbound ANSI ASC X12 834 electronic transaction initiated by MLTC or the enrollment broker. In general, a member's effective date of enrollment in a MCO is the first day of the month of the member's eligibility for Medicaid.

ii. Because individuals can be retroactively eligible for Medicaid, and the effective date of initial enrollment in a MCO is the effective date of eligibility, the effective date of enrollment may occur prior to the MCO being notified of the individual's enrollment.

iii. The MCO is not liable for the cost of any covered services provided to a Medicaid enrollee prior to the effective date of enrollment, but is responsible for the cost of covered services obtained on or after the effective date of enrollment.

c. Change in Status

i. The MCO must notify via ACCESSNebraska any changes in contact information or living arrangements for families or individual members within five (5) business days of identification, including changes in mailing address, residential address, email address, and telephone number, in a manner and format required by MLTC.

ii. The MCO must initiate a request for disenrollment through the enrollment broker for other known changes in status, including but not limited to, death or, entry into involuntary custody or incarceration.

d. Newborn Enrollment

i. Once the State eligibility system is updated with a record of a live birth, the newborn will be immediately enrolled in either the mother's or an eligible sibling's MCO. The mother's MCO supersedes any sibling's, in the event that the mother and any sibling are enrolled in different MCOs.

ii. The MCO must contact members who are pregnant a minimum of 60 calendar days prior to the expected delivery date to encourage mothers to choose a PCP for their newborns. In the event that a pregnant member does not select a PCP, the MCO must give the member a minimum of 14 days after the birth to select a PCP prior to the MCO assigning one.

iii. A newborn may be inadvertently enrolled in a MCO different from its mother. When this situation is identified, MLTC will immediately:

a) Disenroll the newborn from the incorrect MCO.

b) Enroll the newborn in the same MCO as its mother with the same effective date.

c) Recoup any payments made to the incorrect MCO for the newborn.

d) Make payments to the correct MCO for the period of coverage.

iv. The MCO in which the newborn is correctly enrolled is responsible for the coverage of and payment for covered services provided to the newborn for the full period of eligibility. The MCO in which the newborn was incorrectly enrolled has no liability for the coverage of or payment for any services during the period in which the newborn was incorrectly assigned. MLTC is only liable for the capitation payment to the correct MCO.

v. The MCO is responsible for ensuring that hospital providers report births of members to the MCO within 24 hours of the birth. If the member makes a PCP selection during the hospital stay and one was not already identified, the MCO is responsible for ensuring the hospital provider reports this information to the MCO.

5. PCP Assignment

a. At initial enrollment, if an enrollee selects a MCO and a PCP, the assignment of the PCP will be included on the enrollment file sent to the MCO.

b. If no PCP selection is indicated on the enrollment file, the MCO must:

i. Contact the member within ten (10) business days of receiving the enrollment file to assist the member in selecting a PCP.

ii. Inform the member that each family member has the right to choose his/her own PCP, explaining the advantages of selecting the same PCP for all family members, as appropriate.

c. Members who do not choose a PCP within ten (10) days of enrollment with a MCO must be auto-assigned one by the MCO within one (1) month of the enrollment date, in compliance with 42 CFR 438.50(f).

d. The MCO is responsible for developing a PCP auto-assignment methodology in collaboration with the State to assign a member to a PCP when the member:

i. Does not make a PCP selection.

ii. Selects a PCP within the MCO's network that has reached his/her maximum physician/patient ratio or has a closed panel.

iii. Selects a PCP within the MCO's network that has restrictions or limitations (e.g., pediatric practice only).

e. If either of the two (2) situations set forth in provision d.i or d.ii immediately above occur, the MCO must reach out to the member and ask him/her to make an alternate PCP selection. If the MCO cannot reach the member after three (3) attempts or the member does not wish to choose a different PCP, only then may the MCO auto-assign the member to a PCP.

f. If appropriate, assignment must be made to a PCP with whom the member had a historical provider relationship. If there is no historical PCP relationship, the member must be assigned to a provider who is the PCP for an immediate family member in the MCO. If there is no family or historical relationship, members must be auto-assigned a PCP using an algorithm developed by the MCO based on the age and sex of the member and geographic proximity.

g. If a member is a dual eligible individual, the MCO must not require him/her to choose a new PCP through the MCO, and must not prevent the member from receiving primary care services from the member's existing Medicare PCP.

h. The MCO must report all PCP assignments to either MLTC or the enrollment broker at a frequency defined by MLTC. Currently, the system interface is completed on a monthly basis. Future system interfaces may be required to be completed on a daily basis.

i. The MCO must have written policies and procedures for PCP assignment. These policies and procedures must be approved in advance of their implementation by MLTC.

6. MCO Changes

a. Each member will be given 90 calendar days from the effective date of MCO enrollment (or the postmark date of the member's notification of enrollment with the MCO, whichever is later) in which he or she may change to another MCO for any reason.

b. After the initial 90 calendar day period, Medicaid members will be locked into their MCO selection until the next annual open enrollment period. The annual open enrollment period will be aligned with the contract start date.

7. Disenrollment

a. Disenrollment is any action taken by MLTC or its designee to remove a Medicaid MCO member from the MCO following the receipt and approval of a written request for disenrollment or a determination made by MLTC or its designee that the member is no longer eligible for Medicaid or the HERITAGE HEALTH.

b. The enrollment broker is the single point of contact with the MCO member regarding notification of disenrollment.

c. A member may initiate a request for disenrollment from a MCO as follows:

i. For cause, at any time, under the following circumstances:

a) The MCO does not, because of moral or religious objections, cover the service the member seeks.

b) The member needs related services to be performed at the same time, and not all the related services are available with the MCO, and the member's PCP or another provider determines that receiving the services separately would subject the member to unnecessary risk.

c) The contract between the MCO and MLTC is terminated.

d) Lack of access to MCO benefits and services covered under the contract.

e) Other reasons, including but not limited to, poor quality of care, or lack of access to providers experienced in dealing with the member's health care needs.

ii. Without cause for the following reasons:

a) Once a year during the member's annual enrollment choice period.

b) Upon automatic re-enrollment under 42 CFR 438.56(g), if a temporary loss of Medicaid eligibility caused the member to miss the annual enrollment choice opportunity.

c) If MLTC imposes the intermediate sanction provisions specified in 42 CFR 438.702(a) (3) on the MCO.

iii. The member (or his or her representative) must submit a written request of disenrollment with cause to the enrollment broker for action by MLTC.

iv. If the member's request for disenrollment is denied, the member can appeal the decision through the State's fair hearing process.

8. MCO-Initiated Disenrollment

a. The MCO may not request disenrollment because of a member's health diagnosis; adverse change in health status; utilization of medical services; diminished medical capacity; pre-existing medical condition; refusal of medical care or diagnostic testing; uncooperative or disruptive behavior resulting from his or her special needs, unless it seriously impairs the MCO's ability to furnish services to the member or other MCO members; or, the member attempts to exercise his/her rights under the MCO's grievance system, or attempts to exercise her/her right to change, for cause, the PCP that he/she chose or was assigned. (42 CFR 438.56(b)(2)).

b. The following are the only reasons for which the MCO may request disenrollment of a member:

i. The MCO has sufficient documentation to establish fraud, forgery, or evidence of unauthorized use/abuse of services by the member, including circumstances in which the member misuses or loans the member's ID card to another person to obtain services. If this occurs, the MCO must report it to MLTC.

ii. The member's behavior is disruptive, unruly, abusive, or uncooperative to the extent that enrollment in the MCO seriously impairs the organization's ability to furnish services to either the member or other members.

c. The MCO must not request disenrollment for reasons other than those stated in this RFP. In accordance with 42 CFR 438.56(b)(3), MLTC will ensure that the MCO is not requesting disenrollment for other reasons by reviewing the MCO disenrollment requests submitted to the enrollment broker and the quarterly disenrollment reports submitted by the MCO to MLTC.

d. The MCO must take reasonable measures, as determined by the State, to correct member behavior prior to requesting disenrollment. Reasonable measures may include providing education and counseling regarding the offensive acts or behaviors.

e. When the MCO requests a member disenrollment, it must notify the member in writing of this request, the reason for the request, and the date of anticipated disenrollment.

f. The MCO must submit disenrollment requests to the enrollment broker that should include, at a minimum, the member's name, ID number, detailed reasons for requesting the disenrollment, and a description of the measures taken to correct member behavior prior to requesting disenrollment. The MCO must send notification of the disenrollment request to the member at the same time the request is made to the enrollment broker. The MCO must include documentation with the disenrollment request, as indicated in 482 NAC 000-03.

g. The MCO must not submit a disenrollment request for an effective date earlier than 45 calendar days after the event that prompted the disenrollment request. The MCO must ensure that disenrollment documents are maintained in an identifiable member record.

h. All requests will be reviewed on a case-by-case basis and decisions are at the sole discretion of MLTC or its designee. All decisions are final and not subject to the State's dispute resolution process.

i. The enrollment broker will provide written notice of disenrollment to the member and request the member to choose a new MCO. The notice will include a statement that if the member disagrees with the decision to disenroll the member from the MCO, the member has the right to file an appeal directly to the State through the fair hearing process.

j. Until the member is disenrolled by the enrollment broker, the MCO is responsible for the provision of all benefits and services to the member.

9. Disenrollment Effective Date

a. The effective date of disenrollment will be no later than the first day of the second month following the calendar month in which the request for disenrollment is filed.

b. If MLTC fails to make a disenrollment determination by the first day of the second month following the month in which the request for disenrollment was filed, the disenrollment is considered approved.

c. The MCO, the enrollment broker, and MLTC must reconcile enrollment/disenrollment issues at the end of each month utilizing an agreed upon written procedure.

10. MLTC-Initiated Disenrollment

a. MLTC or the enrollment broker will notify the MCO of the member's disenrollment for the following reasons:

i. Member is no longer Medicaid eligible.

ii. Member's death.

iii. Member's intentional submission of fraudulent information.

iv. Member becomes an inmate in a public institution.

v. Member moves out-of-state.

vi. A disenrollment decision is made by a hearing officer or court of law.

11. Enrollment and Disenrollment Updates

a. MLTC's enrollment broker will notify each MCO at specified times each month of the Medicaid eligible individuals that are enrolled, re-enrolled, or disenrolled from the MCO for the following month. The MCO will receive this notification through the ASC X12N 834 Benefit Enrollment and Maintenance electronic transaction.

b. MLTC will use its best efforts to ensure that the MCO receives timely and accurate enrollment and disenrollment information. In the event of discrepancies or irresolvable differences between MLTC and the MCO regarding enrollment, disenrollment, or termination, MLTC's decision is final.

12. Daily Updates

The enrollment broker will provide updates to the MCO daily via electronic media (ASC X12N 834 Benefit Enrollment and Maintenance transaction) of members newly enrolled with the MCO. The MCO must have written policies and procedures for receiving these updates, incorporating them into its management information system, and ensuring this information is available to its providers. Policies and procedures must be provided to MLTC for review and approval a minimum of 60 calendar days prior to the contract start date.

13. Weekly Reconciliation

a. The MCO is responsible for weekly reconciliation of the enrollment/disenrollment file received from the enrollment broker.

b. The MCO must provide written notification to the enrollment broker of any data inconsistencies within ten (10) calendar days of receipt of the file.

c. The MCO will receive a monthly electronic file (ASC X12N 820 transaction) from MLTC listing all members for whom the MCO received a capitation payment and the amount received. The MCO is responsible for reconciling this file against its internal records. It is the MCO's responsibility to notify MLTC of any discrepancies within three (3) months of file receipt. Lack of compliance with reconciliation requirements may result in the withholding of a portion of future monthly payments or other liquidated damages as defined in Section IV.V Contract Non-Compliance of the RFP.

C. BUSINESS REQUIREMENTS

1. Regulation and Guidance

a. The MCO must abide by all relevant provisions found in 42 CFR, Part 438, Managed Care; Title 471 Nebraska Administrative Code (NAC) Nebraska Medical Assistance Program Services; Title 477 NAC, Medicaid Eligibility; and Title 482 NAC, Nebraska Medicaid Managed Care.

b. On June 1, 2015, the Centers for Medicare & Medicaid Services (CMS) published a Proposed Rule (CMS-2390-P) regarding Medicaid managed care. MLTC anticipates that the finalizing of this proposed rule will affect the contracts awarded as a result of this RFP. The MCO must include in its proposal:

i. An analysis of the Proposed Rule that includes the MCO's interpretation of all provisions relevant to the contract requirements.

ii. A plan that details the processes and timeline the MCO will implement to ensure compliance with all applicable requirements in the proposed rule on the contract's start date. This plan must take into consideration requirements CMS is placing on states that require MCO cooperation/compliance.

The Proposed Rule can be reviewed at:
https://www.federalregister.gov/articles/2015/06/01/2015-12965/medicaid-and-childrens-health-insurance-program-chip-programs-medicaid-managed-care-chip-delivered

2. Compliance with State and Federal Laws and Regulations

a. All contracts that result from this RFP must comply with all applicable Federal and State laws and regulations including Title VI of the Civil Rights Act of 1964; Title IX of the Education Amendments of 1972 (regarding educational programs and activities); the Age Discrimination Act of 1975; the Rehabilitation Act of 1973; and the Americans with Disabilities Act. The MCO must comply with any other applicable Federal and State laws (such as Title VI of the Civil Rights Act of 1964, etc.) and 45 CFR parts 160 and 164 (the Health Insurance Portability and Accountability Act [HIPAA] privacy rule).

b. The MCO must comply with any applicable Federal and State laws that pertain to member rights and ensure that its staff and affiliated providers also do this when furnishing services to members.

3. Managed Care Organization Licensure

The MCO must have a Certificate of Authority (COA) to transact the business of health insurance in Nebraska as a health maintenance organization (HMO) by the contract start date. If the MCO is not licensed as required by the Nebraska Department of Insurance (DOI) at the time of proposal submittal, the MCO must attest that the appropriate licensure will be obtained prior to executing a contract with MLTC.

4. Accreditation

a. The MCO must attain health plan accreditation from the National Committee for Quality Assurance (NCQA). If the MCO is not currently accredited by NCQA, the MCO must attain NCQA accreditation within 18 months of the contract award.

b. The MCO's application for accreditation must be submitted as soon after the contract's start date as allowed by NCQA. The MCO must provide MLTC with a copy of all correspondence between the MCO and NCQA regarding the application process, the accreditation requirements, and the MCO's progress toward accreditation.

c. Achievement of provisional accreditation status will require a corrective action plan (CAP) within 30 calendar days of receipt of the final report from NCQA. Any failure to obtain full NCQA accreditation and to maintain the accreditation thereafter will be considered a breach of the contract and may result in contract termination at the sole discretion of the State.

5. Business Location

The MCO must establish and maintain a business office or work site within the State, staffed with the primary contract personnel and managers responsible for the services provided under the contract. The MCO is responsible for all costs related to securing and maintaining the facility for start-up and ongoing operations, including, but not limited to, hardware and software acquisition and maintenance, leasehold improvements, utilities, telephone service, office equipment, supplies, janitorial services, security, storage, transportation, document shredders, and insurance. If any activities are approved by MLTC to be performed offsite, then the MCO must provide toll-free communications with MLTC staff to conduct those business operations. The MCO must provide meeting space to MLTC as requested when onsite at the MCO's location.

6. Cooperation with Other Entities and Programs

a. The MCO must develop processes and procedures and designate points of contact for collaboration with other entities and programs that serve members including but not limited to:

i. Division of Behavioral Health funded programs.

ii. Division of Children and Family Services funded programs that support the safety, permanency, and well-being of children in the care and custody of the State.

iii. Division of Developmental Disabilities programs that involve rehabilitative and habilitative services for persons with developmental disabilities.

iv. The Nebraska Department of Education Early Development Network.

v. Community agencies including but not limited to the Area Agencies on Aging and League of Human Dignity Waiver Offices.

vi. The Office of Probation.

vii. Other programs and initiatives within MLTC related to primary care and behavioral health integration/coordination and pharmacy management.

b. The MCO must collaborate with these entities and programs when serving members and identifying and responding to members' behavioral and physical health needs. It must address and attempt to resolve any coordination of care issues with other MCOs and other State agencies and their contractors, tribes, and other community providers as expeditiously as possible.

c. The MCO must also collaborate with these entities and programs and its network providers regarding planning initiatives and system transformation.

7. Service Orientation, Interoperability, and Data Exchange

The State's Medicaid program is undergoing significant modernization across many projects. In alignment with CMS-MITA guidance, key objectives shared by all MLTC projects include high levels of capability/maturity with respect to service orientation, interoperability, and data exchange. MLTC expects the MCO to transmit and receive data in compliance with all applicable Federal (including but not limited to HIPAA), and State standards and mandates, both currently and in the future. The MCO must work with MLTC to develop and support an effective data exchange between the MCO and all stakeholders involved in the Medicaid program, including MLTC. The MCO shall also provide to MLTC at its request reports via electronic data exchanges to support enhanced analytics and report drill-down capabilities.

8. Participation in the Nebraska Health Information Initiative

The MCO is required to attempt to enter into a participation agreement with the Nebraska Health Information Initiative (NeHII). NeHII is a non-profit organization that includes health care providers, payers, and the State. NeHII's purpose is to achieve health care transformation through the creation of a secure, web-based health information exchange to serve the State. Should the MCO be unable to reach a mutually agreeable arrangement for participation in NeHII within one year of the contract start date, it must notify MLTC.

More information on NeHII can be found at www.nehii.org.

9. Participation in the MLTC Committees

The MCO is required to participate in MLTC committees including, but not limited to, the Administrative Simplification Committee, the Behavioral Health Integration Advisory Committee, and the Quality Assurance Performance Improvement Committee. The Administrative Simplification Committee will include State, MCO, and provider representation, and seek to identify and implement common processes and forms for use by MCOs. The Committee's goal is to reduce administrative burden for MCOs and providers in areas that may include, but not be limited to credentialing/re-credentialing, prior authorization, and grievances and appeals. The Behavioral Health Integration Advisory Committee will include representatives from the DHHS Division of Behavioral Health, MLTC, behavioral health and primary care providers, and MCOs. The Advisory Committee's objective will be to identify and address areas of opportunity or concern regarding the integration of behavioral health and physical health services. A description of the Quality Assurance Performance Improvement Committee is found in Section IV.M Quality Management.

10. Financial Viability/Solvency Requirements

a. Insolvency

The MCO must provide that its Medicaid members are not held liable for:

i. The MCO's debts in the event of the MCO's insolvency.

ii. The cost of covered services provided to the member, for which MLTC does not pay the MCO.

iii. The cost of covered services provided to the member, for which MLTC or the MCO does not pay the individual or health care provider that furnishes the services under a contractual, referral, or other arrangement.

iv. Payments for covered services furnished under a contract, referral, or other arrangement to the extent that those payments are in excess of the amount that the member would owe if the MCO provided the services directly.

b. Solvency

Each non-federally-qualified HMO must provide adequate assurances that Medicaid enrollees will not be liable for the entity's debt if the entity becomes insolvent.

c. Continue Services During Insolvency

The MCO must continue to cover services for members for the duration of time for which payment has been made, as well as for inpatient admissions up until discharge.

11. Merger, Reorganization, and Change of Ownership

a. A proposed merger, reorganization, or change in ownership of the MCO requires prior approval of MLTC and will require a contract amendment. MLTC may terminate this contract pursuant to Section III Terms and Conditions. If the MCO does not obtain prior approval or MLTC determines that a merger, reorganization, or change in ownership is not in the best interest of the State, MLTC may offer open enrollment to the members assigned to the MCO. MLTC will not permit one organization to own or manage more than one contract within the same program.

b. The MCO must submit notification to MLTC of a merger, reorganization, or change of ownership a minimum of 180 days prior to its proposed effective date. The MCO must also submit a detailed merger, reorganization, or transition plan to MLTC for review a minimum of 90 calendar days prior to the effective date of the proposed change. The purpose of the plan's review is to ensure uninterrupted services to members, evaluate the new entity's ability to maintain and support the contract requirements, and ensure that services to members are not diminished. In addition, the MCO must provide adequate assurances to MLTC that the major components of its organization and programs are not adversely affected by such merger, reorganization, or change in ownership.

12. Audit Requirements

a. The MCO must:

i. Maintain books, records, documents, and other evidence pertaining to services rendered, equipment, staff, financial records, health records, and the administrative costs and expenses incurred pursuant to this contract as well as medical information relating to members as required for purposes of audit; or administrative, civil, or criminal investigations or prosecution per all retention requirements of this RFP. The MCO must ensure that this provision also applies to subcontractors, providers, or other entities providing goods or services under this contract. The MCO must provide MLTC with adequate assurances of its compliance with the immediately preceding sentence.

ii. Establish and maintain an internal audit function responsible for providing an independent review and evaluation of the MCO's accuracy of financial recordkeeping, the reliability and integrity of information, the adequacy of internal controls, and compliance with applicable laws, policies, procedures, and regulations. The MCO's internal audit function must perform audits to ensure the economical and efficient use of resources by all of its departments to accomplish the objectives and goals of each department. Further, the MCO's internal audit department is responsible for performing the claims payment accuracy tests described in Section IV.S Claims Management.

b. Audit Business Transaction

i. The MCO must obtain an audit of its business transactions from a licensed certified public accountant (CPA), including but not limited to, the financial transactions made under this contract.

ii. No later than December 1 of each year, the MCO must submit a copy of the fully executed engagement letter with the CPA to MLTC.

iii. No later than June 1 of each year, the MCO must submit a full and complete copy of the audit report to MLTC.

c. MLTC and CMS may inspect and audit any records of the MCO or its subcontractors. There is no restriction on the right of MLTC or the Federal government to conduct whatever inspections and audits are necessary to assure quality, appropriateness, or timeliness of services, and reasonableness of costs.

13. Access to Records

The MCO must allow Federal agencies to require changes, remedies, changed conditions, access and records retention, suspension of work, and other clauses approved by the Office of Federal Procurement Policy. In addition, the US Department of Health and Human Services (DHHS) awarding agencies, the Federal DHHS Inspector General, the US Comptroller General, or any of their duly authorized representatives, have the right of timely and unrestricted access to any books, documents, papers, or other records of the MCO that are pertinent to the contract, in order to make audits, examinations, excerpts, transcripts, and copies of such documents.

14. Compliance

The MCO is responsible for compliance with all contract requirements, regardless of whether the MCO enters into a subcontract to delegate performance of the contract requirements. The MCO must submit all proposed subcontracts for the provision of any services under this RFP to MLTC for prior review and approval a minimum of 120 calendar days prior to their planned implementation. Prior to selecting a subcontractor, the MCO must evaluate the prospective subcontractor's ability to perform the activities to be delegated a minimum of 90 calendar days prior to the planned contract start date. MLTC reserves the right to participate in these evaluations, and the MCO must submit a copy of its findings to MLTC a minimum of 30 calendar days prior to the contract's start date. The MCO must monitor and formally review a subcontractor's performance on an ongoing basis.

15. Confidentiality

The MCO must establish and implement procedures consistent with the confidentiality requirements in 45 CFR Parts 160 and 164 for health records and any other health and enrollment information that identifies a particular member, as well as any and all other applicable provisions of privacy law.

16. Protections Against Liability

Providers may not bill members any amount greater than would be owed if the MCO provided the services directly (i.e., no balance billing by providers is permitted).

17. Data Certification

Data submitted by the MCO to MLTC must be certified as required by 42 CFR 438.606:

a. The data that must be certified includes, but is not limited to, all documents specified by MLTC, enrollment information, encounter data, and other information contained in contracts and proposals. The certification must attest, based on best knowledge, information, and belief, to the accuracy, completeness, and truthfulness of the documents and data. The MCO must submit this certification concurrently with the certified data and documents.

b. Data and documents the MCO submits to MLTC must be certified by the MCO Chief Executive Officer, the MCO Chief Financial Officer, or an individual who has been delegated authority to sign for, and who reports directly to, the MCO Chief Executive Officer or Chief Financial Officer.

18. Moral or Religious Objections

a. A MCO that would otherwise be required to provide, reimburse for, or provide coverage of, a counseling or referral service is not required to do so if the MCO objects to the service on moral or religious grounds.

b. If the MCO elects to not provide, reimburse for, or provide coverage of a counseling or referral service because of an objection on moral or religious grounds, it must furnish this information to MLTC with its proposal to this RFP or whenever it adopts the policy during the term of the contract. The information provided must be consistent with the requirements of 42 CFR 438.10. The MCO's members and potential members must be informed of this policy before and during enrollment and within 90 calendar days after adopting the policy with respect to any particular service.

c. If the MCO elects to not provide, reimburse for, or provide coverage of a counseling or referral service, the MCO must inform the member where and how to access the covered service.

D. STAFFING REQUIREMENTS

1. General Requirements

a. The MCO must have in place organizational, operational, managerial, and administrative systems capable of fulfilling all contract requirements. The MCO must be staffed by qualified persons in numbers appropriate to the MCO's enrollment.

b. For the purposes of this contract, the MCO must not employ or contract with any individual who has been debarred, suspended, or otherwise lawfully prohibited from participating in any public procurement activity or from participating in non-procurement activities under regulations issued under Executive Order 12549 or under guidelines implementing Executive Order 12549 [42 CFR 438.610(a) and (b), 42 CFR 1001.1901(b), and 42 CFR 1003.102(a)(2)]. The MCO must screen all employees and subcontractors to determine whether any of them have been excluded from participation in federal health care programs. The Federal DHHS Office of Inspector General website, which can be searched by the name of any individual, can be accessed at: https://oig.hhs.gov/exclusions/index.asp.

c. The MCO must employ sufficient staff and utilize appropriate resources to achieve contractual compliance. The MCO's resource allocation must be adequate to achieve required outcomes in all functional areas within the organization. Adequacy will be evaluated based on outcomes and compliance with contractual and MLTC policy requirements, including the requirement for providing culturally competent services. If the MCO does not achieve the desired outcomes or maintain compliance with contractual obligations, additional monitoring and regulatory action may be employed by MLTC, including but not limited to, requiring the MCO to hire additional staff and application of monetary penalties as specified in this RFP.

d. The MCO must perform criminal background checks on all employees of the MCO and subcontractor staff assigned to, or proposed to be assigned to, any aspect of this contract and who have access to electronic protected health information on Medicaid applicants and recipients. The MCO must, upon request, provide MLTC with a satisfactory criminal background check or an attestation that a satisfactory criminal background check has been completed for these MCO staff or subcontractor staff.

e. The MCO will be responsible for any additional costs associated with on-site audits or other oversight activities that result when required systems are located outside of the State.

f. The MCO must remove or reassign, upon written request from MLTC, any MCO employee or subcontractor's employee that MLTC deems at its sole discretion to be unacceptable. The MCO must hold MLTC harmless for actions taken as a result hereto.

2. Key Staff Positions

a. The MCO must comply with minimum key staffing requirements in Table 1 listed below.

i. For each key staff position marked with an asterisk in the table, the staff member must be based in the State.

ii. All positions listed in the table must be full-time, i.e. a minimum of 40 hours per week, with the exception of the Business Continuity Planning and Emergency Coordinator, which shall be an additional duty assignment.

b. An individual staff member may not occupy more than two (2) key staff positions listed below unless prior approval is obtained from MLTC. Exceptions include the Chief Executive Officer (CEO) and Medical Director (MD), who may only hold one (1) position.

c. A minimum of 45 calendar days prior to the contract start date, the MCO must submit to MLTC for review and approval a Human Resources and Staffing Plan. This plan must describe how the MCO will obtain and maintain the staffing level needed to accomplish the duties outlined in this RFP. The MCO is required to recruit, hire, train, supervise, and, if necessary, terminate, such professional and support personnel as are necessary to carry out the terms of this contract. All staff must have experience and expertise in working with the populations served by the Medicaid program.

d. The MCO must provide to MLTC, in writing, a list of all officers and members of the MCO's Board of Directors. This information must be provided to MLTC prior to the contract's start date. The MCO must notify MLTC, in writing, within ten (10) business days of any change to its officers or Board members.

e. The MCO must submit to MLTC the names, resumes, and contact information for all key staff listed below a minimum of 30 calendar days prior to the contract's start date.

f. In the event of a change of any key staff at any point during the contract's duration, the MCO must notify MLTC in writing within two business days of the change. The name of the interim contact person shall be included with this notification.

g. The MCO must replace any key staff member with a person of equivalent experience, knowledge, and talent. The name and resume of the new employee must be submitted to MLTC as soon as the new hire is made, along with a revised organizational chart complete with key staff time allocation to the MLTC contract.

h. Replacement of the CEO or MD requires prior written approval from MLTC. This approval will not be unreasonably withheld, provided a suitable candidate is proposed.

i. In addition to the key staff requirements, the MCO must have full-time clinical and support staff to conduct daily business in an efficient and effective manner. This includes, but is not limited to, administration; accounting and finance; fraud and abuse; utilization management; quality management and improvement; and, member services, education, and outreach, grievances and appeals, provider services, claims processing, and reporting.

Table 1. Key Staff

Title	Minimum Duties
Chief Executive Officer (CEO)*	The CEO must work full-time on this contract, a minimum of 40 hours per week. The CEO is responsible for: 1. Providing overall direction and prioritization for the MCO. 2. Developing and carrying out leadership strategies. 3. Ensuring that policies and contractual requirements are followed. 4. Providing operational oversight to ensure that goals are met. 5. Developing and implementing integration models that ensure coordination with system partners.

Title	Minimum Duties
Medical Director/Chief Medical Officer*	The Medical Director must be a currently practicing physician, with an unrestricted license in the State to practice medicine. The Medical Director must have a minimum of three (3) years of training in a medical specialty and five (5) years of experience providing clinical services. The Medical Director must devote a minimum of 40 hours per week to the MCO's operations to ensure timely medical decisions, including after-hours consultation as needed. The Medical Director must be board certified in his/her specialty, and be actively involved in all major clinical, utilization management and quality management decisions of the MCO. When the Medical Director is unavailable, the MCO must have a physician staff person or subcontractor to provide competent medical direction at any time. The Medical Director is responsible for: 1. Developing, implementing, and interpreting medical policies and procedures. Duties may include, but are not limited to: service authorizations, claims review, discharge planning, credentialing, referral management, and medical review of grievances and appeals. 2. Administrating the medical management activities of the MCO. 3. Participating via telephone or in person (at MLTC's discretion) at every Quality meeting with MLTC and other system partners, and as requested by MLTC. 4. Leading the Utilization Management, Quality Assessment and Performance Improvement, Credentialing, and Provider Advisory committees.
Behavioral Health Clinical Director	The Behavioral Health Clinical Director must be a currently practicing psychiatrist or psychologist with an unrestricted license in the State. The Behavioral Health Clinical Director must have a minimum of five years of combined clinical experience in mental health and substance use disorder services and be knowledgeable about primary care/behavioral health integration. This individual must oversee and be responsible for all behavioral health activities within the MCO and take an active role in the MCO's medical management team, and in clinical and policy decisions. The Behavioral Health Clinical Director is responsible for: 1. Providing clinical case management consultations and clinical guidance for contracted PCPs treating behavioral health-related concerns not requiring referral to behavioral health specialists. 2. Developing comprehensive care management programs for youth and adults with behavioral health concerns, typically treated by PCPs, such as ADHD and depression; 3. Developing targeted education and training for the MCO's PCPs that commonly encounter behavioral health issues.
Behavioral Health Manager*	The Behavioral Health Manager must be a Nebraska licensed behavioral health professional, such as a psychologist, psychiatrist, social worker, psychiatric nurse, marriage and family therapist, or mental health counselor. The responsibilities of the Behavioral Health Manager include, but are not limited to: 1. Ensuring that the MCO's behavioral health operations, providers, and any subcontractors are in compliance with the terms of this contract. 2. Coordinating all areas of the MCO, including quality management, utilization management, network development and management, provider services, member outreach and education, member services, contract compliance, and reporting.
Chief Operating Officer (COO)*	The COO is responsible for: 1. Managing the day-to-day operations of the MCO's departments, staff, and functions to ensure that performance measures and MLTC and Federal requirements are met. 2. May serve as the primary contact with MLTC for all MCO operational issues.
Chief Financial Officer (CFO)*	The CFO is responsible for overseeing all financial-related supervision of activities implemented by the MCO, including all audit activities, accounting systems, financial reporting, and budgeting.

Title	Minimum Duties
Program Integrity Officer*	The Program Integrity Officer must have experience in health care and/or risk management and report directly to the CEO. The Program Integrity Officer is responsible for: 1. Overseeing all activities required by State and Federal rules and regulations related to the monitoring and enforcement of the fraud, waste, abuse, (FWA) and erroneous payment compliance program. 2. Developing/overseeing methods to prevent and detect potential FWA and erroneous payments. 3. Developing policies and procedures, investigating unusual incidents, and designing/implementing any corrective action plans. 4. Reviewing records and referring suspected member FWA to MLTC and other duly authorized enforcement agencies. 5. Managing the MCO's Special Investigations Unit to communicate with the State's Medicaid Fraud Control Unit.
Grievance System Manager*	The Grievance System Manager is responsible for: 1. Managing/adjudicating member grievances, appeals, and requests for fair hearing. 2. Managing/adjudicating provider grievances and appeals.
Business Continuity Planning and Emergency Coordinator	The Business Continuity Planning and Emergency Coordinator is responsible for: 1. Ensuring continuity of benefits and services for members who may experience evacuation to other areas of the State, or out-of-state, during disasters. 2. Managing and overseeing the MCO's emergency management plan.
Contract Compliance Coordinator*	The Contract Compliance Coordinator will be the primary contact with MLTC on all MCO contract compliance issues. This individual is responsible for: 1. Coordinating the preparation and execution of contract requirements. 2. Coordinating the tracking and submission of all contract deliverables. 3. Answering inquiries from MLTC. 4. Coordinating/performing random and periodic audits and ad hoc visits.
Quality Management (QM) Coordinator*	The QM Coordinator must be a State-licensed registered nurse, physician, or physician's assistant; a Certified Professional in Health Care Quality (CPHQ), certified by the National Association for Health Care Quality, or certified in Health Care Quality and Management (CHCQM) by the American Board of Quality Assurance and Utilization Review Providers. This position must be committed to this contract on a full-time basis (a minimum of 40 hours per week). The QM Coordinator must have quality management and improvement experience as described in 42 CFR 438.200 - 438.242. This individual is responsible for: 1. Ensuring systemic and individual quality of care. 2. Identifying and implementing process improvements. 3. Integrating quality throughout the organization. 4. Ensuring a network of credentialed providers. 5. Resolving, tracking, and trending quality of care grievances. 6. Serving as a member of the Quality Assurance Performance Improvement Committee and member/ad hoc member of other quality related committees.
Performance and Quality Improvement Coordinator*	The Performance and Quality Improvement Coordinator must, at minimum, be a CPHQ or CHCQM or have comparable experience and education in data and outcomes measurement as described in 42 CFR 438.200 - 438.242. The Performance and Quality Improvement Coordinator serves as MLTC's contact person for quality performance measures. Primary responsibilities include: 1. Focusing organizational efforts on the improvement of clinical quality performance measures. 2. Utilizing data to develop intervention strategies to improve outcomes. 3. Developing and implementing performance improvement projects, both internal and across MCOs. 4. Reporting quality improvement and performance outcomes to MLTC.

Title	Minimum Duties
Maternal Child Health (MCH)/Early and Periodic Screening, Diagnostic, and Treatment (EPSDT) Coordinator*	The MCH/EPSDT Coordinator must be a current, Nebraska-licensed registered nurse, physician, or physician's assistant; have a Master's degree in health services, public health, or health care administration, or other related field; or be a CPHQ or CHCQM. Staffing under this position must be sufficient to meet quality and performance measure goals. The coordinator is responsible for: 1. Designing programs to ensure that all member children receive necessary EPSDT services. 2. Promoting family planning services. 3. Promoting preventive health strategies. 4. Designing programs to ensure that all pregnant members receive maternal and postpartum care. 5. Identifying and coordinating assistance for identified member needs, specific to maternal/child health and EPSDT. 6. Interfacing with community partners.
Medical Management Coordinator*	The Medical Management Coordinator must be a State-licensed registered nurse, physician, or physician's assistant if he/she is required to make medical necessity determinations. If the position is not required to make medical necessity determinations, this individual may have a Master's degree in health services, health care administration, or business administration. The Medical Management Coordinator's responsibilities include: 1. Developing, implementing, and monitoring the provision of care coordination, disease management, and case management functions. 2. Ensuring the adoption and consistent application of appropriate inpatient and outpatient medical necessity criteria. 3. Ensuring the completion of appropriate concurrent review and discharge planning of inpatient stays. 4. Monitoring, analyzing, and implementing appropriate interventions based on utilization data, including the identification and correction of over- or under-utilization of services. 5. Monitoring prior authorization functions and ensuring that decisions are made in a consistent manner, based on clinical criteria, and that all decisions meet timeliness standards.
Provider Services Manager*	The Provider Services Manager is responsible for: 1. Coordinating communications between the MCO and its subcontracted providers. 2. Managing the Provider Services staff. 3. Working collaboratively with the Provider Advisory Committee to establish methodologies for processing and responding to provider concerns. 4. Developing provider trainings in response to identified needs or changes in protocols, processes, and forms. 5. Enhancing MCO-provider communication strategies. 6. Notifying MLTC of correspondence sent to providers for informational and training purposes. 7. Participating in the MLTC Administrative Simplification Committee.
Member Services Manager*	The Member Services Manager is responsible for: 1. Coordinating communications between the MCO and its members. 2. Ensuring there are sufficient member services representatives, including sufficient culturally and linguistically appropriate services, to enable members to receive prompt resolution of their problems or questions and appropriate education about participation in the Medicaid managed care program. 3. Managing the Member Services staff.

Title	Minimum Duties
Claims Administrator	The Claims Administrator is responsible for: 1. Developing, implementing, and administering a comprehensive Nebraska Medicaid Managed Care claims processing system capable of paying claims in accordance with State and Federal requirements and the terms of this contract. 2. Developing cost avoidance processes. 3. Meeting claims processing timelines. 4. Ensuring minimization of claims recoupments. 5. Meeting MLTC encounter reporting requirements.
Provider Claims Educator	This position must be knowledgeable concerning the MCO's Nebraska Medicaid Managed Care grievance, claims processing, and provider services systems and facilitate the exchange of information between these systems and providers. This individual must have a minimum of five (5) years management and supervisory experience in a health care field. The Provider Claims Educator is responsible for: 1. Educating in-network and out-of-network providers on claims submission requirements, coding updates, electronic claims transactions and electronic fund transfers, and available MCO resources, such as provider manuals, websites, provider training materials, and fee schedules. 2. Communicating frequently with providers to ensure the effective exchange of information and to obtain feedback regarding the extent to which providers are informed about appropriate claims submission practices. 3. Identifying trends and guiding the development and implementation of strategies to improve provider satisfaction. 4. Working with the MCO's call center to compile, analyze, and disseminate information from provider calls that indicate a need for education or process improvements.
Case Management Administrator*	The Case Management Administrator should have experience as a case manager with a minimum of five (5) years management or supervisory experience in a health care field. The position is responsible for: 1. Overseeing the MCO’s case management functions. 2. Working with other MCO staff to ensure that members’ case management needs are met. 3. Working with the Medical Director and other medical management staff to ensure that the MCO has case management policies/protocols that comply with Federal and State requirements.
Information Management and Systems Director	The Information Management and Systems Director must have relevant training and a minimum of seven (7) years of experience in information systems, data processing, and data reporting to oversee all MCO information systems functions. The position is responsible for: 1. Establishing and maintaining connectivity with MLTC information systems. 2. Providing necessary and timely data and reports to MLTC.
Encounter Data Quality Coordinator	The Encounter Data Quality Coordinator is responsible for: 1. Organizing and coordinating services and communication between MCO administration and MLTC for the purpose of identifying, monitoring, and resolving encounter data validation and management issues. 2. Serving as the MCO's encounter expert to answer questions, provide recommendations, and participate in problem-solving and decision-making related to encounter data processing and submissions. 3. Analyzing activities related to the processing of encounter data and data validation studies to enhance accuracy and output.
Tribal Network Liaison*	The Tribal Network Liaison is responsible for: 1. Planning and working with Provider Services staff to expand and enhance physical and behavioral health services for American Indian members. 2. Serving as the single point of contact with tribal entities and all MCO staff on American Indian issues and concerns. 3. Advocating for American Indian members with case management and

Title	Minimum Duties
	member services staff.
Pharmacist/Pharmacy Director*	The MCO Pharmacist/Pharmacy Director must be a registered pharmacist with a current State license. The incumbent must have a minimum of three (3) years of experience supporting formularies, designing prior authorization requirements, and working with clinical information. The Pharmacist/Pharmacy Director is responsible for: 1. Overseeing the prescription drug and pharmacy benefits. 2. Leading and coordinating formulary and preferred drug list implementation, evaluation, training, reporting, and problem solving. 3. Consulting on and coordinating pharmacy program changes. 4. Understanding clinical pharmacy and drug product information to support plan benefit design in the point of sale system. 5. Overseeing, monitoring, and assisting with the management of pharmacy benefit manager (PBM) activities. 6. Managing the prospective and retrospective drug utilization review (DUR) activities. 7. Supporting call center prior authorization programs and their development/modification. 8. Attending MLTC Pharmacy and Therapeutics Committee and DUR Board meetings. 9. Meeting with MLTC staff and the MCO's PBM, no less than monthly, to discuss operational status updates, including the call center, POS system, grievances, and prior authorizations; and review performance standards and restricted services grievances and appeals.

3. Additional Required Staff

a. Prior authorization staff must include a State-licensed registered nurse or physician's assistant. Staff must work under the direction of the Medical Director or the Medical Management Coordinator (if this person is a State-licensed registered nurse or physician's assistant) to authorize health care services (in compliance with contract requirements), at any time.

b. Concurrent review staff must include a State-licensed registered nurse or physician's assistant. Staff must work under the direction of the Medical Director or the Medical Management Coordinator (if this person is a State-licensed registered nurse or physician's assistant) to conduct inpatient concurrent reviews.

c. Clerical and support staff to ensure the proper functioning of the MCO's operation.

d. Provider services staff to enable providers to receive prompt resolution of their problems and inquiries and appropriate education about participation in the MCO program. There must be sufficient staff to maintain/enhance the MCO's provider network to meet MLTC's network standards and work with grievances and appeals staff to resolve provider grievances and disputes on a timely basis. The MCO must designate a local individual to serve as a liaison for behavioral health providers.

e. Member services staff to enable members to receive prompt responses and assistance. There must be sufficient member services staff at all times to provide culturally and linguistically appropriate services.

f. Claims processing staff to ensure the timely and accurate processing/adjudication of original claims and resubmissions. The MCO must have a staff of qualified, medically trained and appropriately licensed personnel, consistent with NCQA accreditation standards, whose primary duties are to assist in evaluating claims for medical necessity.

g. Encounter processing staff to ensure the timely and accurate processing and submission to MLTC of encounter data and reports.

h. Care management staff to assess, plan, facilitate, and advocate options and services to meet members' health and social needs. The staff must use communication and available resources to promote quality, cost-effective outcomes. The MCO is required to provide and maintain

appropriate levels of care management staff in the State to ensure adequate local geographical coverage for face-to-face contact with physicians and members as appropriate, and may include additional out-of-state staff providing telephone consultation and support.

i. FWA investigative staff to detect and investigate FWA activities. The staff is responsible for preparing and updating the fraud and abuse compliance plan, conducting MCO employee training and monitoring, investigating a sample of paid claim discrepancies, and responding to provider investigation-related inquiries/issues. Each FWA investigator must have a Bachelor's degree; an Associate's degree plus a minimum of two (2) years' experience as a licensed health care provider or auditor; a minimum of four years' experience as a certified coder or billing specialist; or, a minimum of five (5) years law enforcement, health care oversight, compliance, or auditing experience. The MCO must have a minimum of one investigator for every 100,000 members or less.

j. All additional required staff in this section must be located in the State with the exception of claims and encounter processing staff and certain care management staff.

4. Care Management and Utilization Management Staff Requirements

a. As part of its care management operations, the MCO must employ a multidisciplinary clinical staff, care coordinators, and care managers to arrange, assure delivery of, monitor, and evaluate basic and comprehensive care, treatment, and services to members. The MCO must ensure an adequate ratio of staff to members to perform all care management functions as described in Section IV.L Care Management of the RFP. Sufficient staff must be available to respond at any time to members, their families/caregivers, or other interested parties calling on behalf of a member.

b. The MCO must ensure that only licensed clinical staff operating within the scope of their training and professional licenses make decisions regarding medical necessity.

5. Written Policies, Procedures, and Position Descriptions

a. The MCO must develop and maintain written policies, procedures, and position descriptions for each functional area, consistent in format and style. The MCO must have written guidelines for developing, reviewing and approving all policies, procedures, and job descriptions. All policies and procedures must be reviewed at a minimum on an annual basis to ensure that they reflect current practices. Once the policies are reviewed, they must be dated and signed by the MCO's appropriate manager, coordinator, director, or administrator. Minutes reflecting the review and approval of the policies by the appropriate committee are also acceptable documentation. All medical and quality management policies must be approved and signed by the MCO's Medical Director. Job descriptions must be reviewed a minimum of annually to ensure that they reflect current duties.

b. Based on provider or member feedback, if MLTC determines that a MCO policy or process is inefficient or places an unnecessary burden on the members or providers, the MCO will be required to work with MLTC to change the policy or procedure within a time period specified by MLTC.

6. Staff Training and Meeting Attendance

a. The MCO must ensure that all staff members, including subcontractors, have training, education, experience, and orientation to complete their job responsibilities. MLTC may require additional staffing for a MCO that has substantially failed to maintain compliance with any provision of the contract and/or MLTC policies.

b. The MCO must provide initial and ongoing staff training that includes an overview of MLTC and its policies, the contract, and State and Federal requirements specific to individual job functions. The MCO must ensure that all staff members who have contact with members or providers receive initial and ongoing training with regard to program changes, prior authorization modifications, and the appropriate identification and handling of quality of care/service concerns.

c. The MCO must educate staff concerning their policies and procedures on advance directives in accordance with 42 CFR 422.128.

d. A growing body of evidence points to a correlation between social factors and increased occurrences of specific health conditions and a general decline in health outcomes. All MCO staff must be trained on how social determinants affect members' health and wellness. This training must include, but not be limited to, issues related to housing, education, food, physical and sexual abuse, violence, and risk and protective factors for behavioral health concerns. Staff must also be trained on finding community resources and making referrals to these agencies and other programs that might be helpful to members.

e. The MCO must provide training for staff on the needs of the Long-Term Services and Supports (LTSS) population, including individuals with developmental disabilities and mental health concerns.

f. New and existing prior authorization, provider services, and member services staff must be trained in the geography of the State, as well as the culture and correct pronunciation of cities, towns, and surnames. Appropriate staff must have access to GPS or mapping search engines for the purposes of authorizing services, recommending providers, and transporting members to the most geographically appropriate location.

g. The MCO must provide the appropriate staff representation in meetings or events scheduled by MLTC. All meetings are considered mandatory unless otherwise notified by MLTC.

h. MLTC reserves the right to attend any and all training programs and seminars conducted by the MCO. The MCO must provide MLTC a list of any training dates, times, and locations a minimum of 14 calendar days prior to their occurrence.

E. COVERED SERVICES AND BENEFITS

1. General Provisions

a. The MCO must have available, for members, immediately upon their effective date, at a minimum, those benefits and services specified in the RFP, and as defined in the Nebraska Medicaid State Plan, administrative rules, and MLTC policy and procedures. The MCO must possess the expertise and resources to ensure the delivery of quality health care services to its members in accordance with Nebraska Medicaid program standards and the prevailing local and national medical standards.

b. The MCO must provide a mechanism to reduce inappropriate and duplicative use of health care services, including but not limited to, non-emergent use of hospital emergency rooms.

c. The MCO must ensure the coordination of services it provides with services the member receives from other entities. The MCO must ensure that in the process of coordinating care that each member's privacy is protected in accordance with Federal and State requirements.

d. Services must be rendered by providers that are appropriately licensed or certified, operating within their scopes of practice, and enrolled as a MLTC provider. The MCO must provide the same standard of care for all members, regardless of any member's eligibility category.

e. The MCO must comply with any future legislative and regulatory changes regarding covered services and benefits unless those changes specifically exempt managed care.

2. Amount, Duration and Scope

a. The services offered under the MCO contract must be sufficient in amount, duration, and scope to reasonably be expected to achieve the purpose for which the services are furnished and must be no less than those furnished under FFS Medicaid, as specified in 42 CFR 438.210(a). Upward variances of amount, duration, and scope of these services are allowed.

b. All services covered under this contract must be accessible to MCO members with comparable timeliness, and in a similar amount, duration, and scope as those available to other insured individuals in the same service area.

c. The MCO may not arbitrarily deny or reduce the amount, duration, or scope of a required service solely because of the diagnosis, type of illness, or condition of the member. However, the MCO may place appropriate limits on a service on the basis of criteria such as medical necessity, or for

utilization control, provided the services furnished can reasonably be expected to achieve their purpose. The MCO must provide its policies regarding this section to MLTC for approval a minimum of 45 calendar days prior to their implementation.

3. Behavioral Health Parity

The MCO must comply with the Mental Health Parity and Addiction Equity Act (MHPAEA). This includes, but is not limited to:

a. Ensuring medical management techniques applied to mental health or substance use disorder benefits are comparable to and applied no more strictly than the medical management techniques that are applied to medical and surgical benefits.

b. Ensuring compliance with MHPAEA for any benefits offered by the MCO to members beyond those specified in the Medicaid State Plan.

c. Making the criteria for medical-necessity determinations for mental health or substance use disorder benefits available to any current or potential member, or contracted provider, on request.

d. Providing the reason for any denial of reimbursement or payment with respect to mental health or substance use disorder benefits to members.

e. Providing out-of-network coverage for mental health or substance use disorder benefits when made available for medical and surgical benefits.

4. Medically Necessary Services

a. The MCO must specify what constitutes "medically necessary services" in a manner that is no more restrictive than the State Medicaid program and addresses the extent to which the MCO is responsible for covering services related to the following:

i. The prevention, diagnosis, and treatment of health impairments.

ii. The ability to achieve age-appropriate growth and development.

iii. The ability to attain, maintain, or regain functional capacity.

b. The MCO may not limit services beyond the limitations in the State's Medicaid program.

5. Second Opinions

When requested by the member, the MCO must provide for a second opinion from a qualified health care professional within the network, or arrange for the member to obtain one outside the network, at no cost to the member.

6. Value-Added Services

a. As permitted under 42 CFR 438.6(e), and to the extent consistent with provisions of State law, the MCO may, in its discretion, offer expanded services and benefits to enrollees in addition to those benefits and services specified in this section of the RFP.

b. These expanded services and benefits must, in the judgment of the MCO, be medically appropriate and cost-effective. The expanded services may include health care services that are currently non-covered services by the Medicaid State Plan or which are in excess of the amount, duration, and scope in the Medicaid State Plan.

c. These services/benefits must be specifically defined by the MCO with regard to amount, duration, and scope. MLTC will not provide any additional reimbursement to the MCO for these services or benefits.

d. The MCO must provide to MLTC a description of the expanded services or benefits to be offered by the MCO for approval 45 calendar days prior to implementation. Additions, deletions, or modifications to value-added services made during the contract period must be submitted to MLTC for approval a minimum of 45 calendar days prior to their implementation.

e. The following MLTC priorities may be addressed through value-added services:

i. Reduction in non-emergent use of the emergency department (ED) through increased access to after-hours care, urgent care, same-day appointments, data sharing with physicians and hospitals, member education, and/or other interventions identified by the MCO.

ii. Improved birth outcomes through prenatal, postnatal, and inter-pregnancy care, reduction in early elective deliveries and Cesarean sections, promotion of vaginal birth after Cesarean section, and other interventions identified by the proposer.

iii. Improved outcomes through coordination and integration of prevention-focused physical and behavioral health services delivered in community-based settings.

f. Value-added services are not Medicaid-funded and, as such, are not subject to appeal and fair hearing rights. A denial of these services will not be considered an action for purposes of grievances and appeals. The MCO must send the member a notification letter if a value-added service is not approved.

g. Transportation to obtain these services or benefits is the responsibility of the member or the MCO, at the discretion of the MCO.

7. Telehealth and Telemonitoring Services

a. In-person contact between a health care provider and a patient is not required by Title XIX or XXI of the Social Security Act. The MCO must cover medically necessary telehealth services at a rate comparable to an in-person consultation. The MCO may also reimburse the originating site.

b. Health care providers that provide telehealth must follow all applicable State and Federal regulations governing their practice and the services they provide.

c. All telehealth communications must comply with all applicable Federal and State requirements regarding privacy and security, as well as those related to efficiency, economy, and quality of care.

d. The MCO shall, at a minimum, cover telemonitoring services when the following conditions have been met:

i. The member has been hospitalized two or more times in the last twelve (12) months for conditions related to the disease. This provision is not required for infant apnea monitoring.

ii. The member is cognitively capable of operating the equipment or has a willing and able person to assist in the transmission of the electronic data.

iii. The originating site has space for all program equipment and full transmission capability.

iv. The provider's record contains data that supports the medical necessity of the service, all transmissions, and subsequent review received from the member, and how the data transmitted from the member is used in the continuous development and implementation of the member's plan of care.

8. Core Benefits and Services

The following services represent a minimum benefit package that must be provided by the MCO to its members:

a. Physical Health Services

i. Inpatient hospital services, including transitional hospital services and transplant services.

ii. Outpatient hospital services.

iii. Ambulatory surgical center (ASC) services.

iv. Physician services, including services provided by nurse practitioners, certified nurse midwives, and physician assistants, and clinic-administered injections/medications, and anesthesia services including those provided by a certified registered nurse anesthetist.

v. Services provided in federally-qualified health centers (FQHCs) and rural health clinics (RHCs).

vi. Services provided in Indian Health Service (IHS) facilities.

vii. Clinical and anatomical laboratory services, including the administration of blood draws completed in the physician's office or an outpatient clinic for a behavioral health diagnosis.

viii. Radiology services.

ix. Health Check (EPSDT) services.

x. Home health services.

xi. Private duty nursing services.

xii. Therapy services (physical therapy, occupational therapy, and speech pathology and audiology).

xiii. Durable medical equipment and medical supplies, including hearing aids, orthotics, prosthetics, and nutritional supplements.

xiv. Podiatry services.

xv. Chiropractic services.

xvi. Vision services.

xvii. Free standing birth center services.

xviii. Hospice services, except when provided in a nursing facility.

xix. Skilled/rehabilitative and transitional nursing facility services.

xx. Ambulance services.

xxi. Non-emergency ambulance transportation.

xxii. Transplant services.

xxiii. Pharmacy services.

b. Behavioral Health Services

<u>Services for individuals age 20 and under, unless otherwise indicated:</u>

i. Crisis stabilization services (includes treatment crisis intervention).

ii. Inpatient psychiatric hospital (acute and sub-acute).

iii. Psychiatric residential treatment facility (age 19 and under).

iv. Outpatient assessment and treatment:

a) Partial hospitalization.

b) Day treatment.

c) Intensive outpatient.

d) Medication management.

e) Outpatient therapy (individual, family, or group).

f) Injectable psychotropic medications.

g) Substance use disorder treatment.

h) Psychological evaluation and testing.

i) Initial diagnostic interviews.

j) Sex offender risk assessment.

k) Community treatment aide (CTA) services.

l) Comprehensive child and adolescent assessment (CCAA).

m) CCAA addendum.

n) Hospital observation room services (up to 23 hours and 59 minutes in duration).

o) Parent child interaction therapy.

p) Child-parent psychotherapy.

q) Applied behavioral analysis.

r) Multi-systemic therapy.

s) Functional family therapy.

v. Rehabilitation services

a) Day treatment/intensive outpatient.

b) CTA services.

c) Professional resource family care.

d) Therapeutic group home.

Services for adults age 21 and over:

i. Crisis stabilization services (includes treatment crisis intervention).

ii. Inpatient psychiatric hospital services (acute and sub-acute).

iii. Outpatient assessment and treatment:

a) Partial hospitalization.

b) Social detoxification.

c) Day treatment.

d) Intensive outpatient.

e) Medication management.

f) Outpatient therapy (individual, family, or group).

g) Injectable psychotropic medications.

h) Substance use disorder treatment.

i) Psychological evaluation and testing.

j) Electroconvulsive therapy.

k) Initial diagnostic interviews.

l) Ambulatory detoxification.

m) In-home psychiatric nursing.

iv. Rehabilitation services

a) Dual-disorder residential.

b) Intermediate residential (SUD).

c) Short-term residential.

d) Halfway house.

e) Therapeutic community (SUD only).

f) Community support.

g) Psychiatric residential rehabilitation.

h) Secure residential rehabilitation.

i) Assertive community treatment (ACT) and Alternative (Alt) ACT.

j) Community support.

k) Day rehabilitation.

9. Laboratory and Radiology Services

a. The MCO must provide inpatient and outpatient diagnostic laboratory testing, therapeutic radiology, and radiological services ordered or performed by any network provider.

b. For excluded services, such as dental, the MCO is responsible for laboratory or radiology services that may be required to treat an emergency or provide surgical services.

c. The MCO must provide for clinical lab services and portable (mobile) x-rays for members who are unable to leave their place of residence without special transportation or assistance to obtain PCP-ordered laboratory services and x- rays.

d. The MCO may require service authorization for diagnostic testing and radiological services ordered or performed by any provider for its members.

10. Eye Care and Vision Services

As set forth in the Medicaid State Plan and applicable regulations, the MCO must provide to all members any medically necessary eye care, vision examinations, prescriptive lenses, frames, and treatments. Eye care and vision services are to be performed by a licensed ophthalmologist or optometrist, conforming to accepted methods of screening, and diagnosis and treatment.

11. Pharmacy Services

a. Covered Services

i. The MCO must provide its members with access to outpatient pharmacy services as defined under Section 1927 of the Social Security Act, described in the Medicaid State Plan and further described in this section.

ii. The MCO must provide coverage for all therapeutic classes of drugs covered by the Nebraska Medicaid pharmacy benefit and must follow the Nebraska Medicaid preferred drug list (PDL).

iii. The MCO must provide coverage for all drugs deemed medically necessary for members under the age of 21 years.

iv. The MCO may manage utilization of drugs through procedures that may include, but are not limited to, prior authorization and utilization and clinical edits.

b. Program Requirements

i. All policies and procedures related to the provision of the pharmacy benefit, including the formulary, UR policies, procedures to ensure compliance with the PDL, clinical and utilization edits, provider requirements, subcontracts, pricing, and reimbursement must be submitted to MLTC for written approval a minimum of 60 calendar days prior to the contract start date.

ii. The MCO must submit any proposed pharmacy program or coverage changes to MLTC for review and approval a minimum of 30 calendar days prior to proposed implementation of the change.

iii. The MCO must have procedures in place to provide a 72-hour supply of medication to a member in the event of an emergency situation on the weekends, holidays, or during off-hours.

iv. The MCO must maintain a website and post current and accurate information and documents regarding its pharmacy program. Such information must be current and searchable including, but not limited to the following:

a) The MCO formulary (list of covered medications) and the NE Medicaid PDL.

b) The MCO pharmacy prior authorization requirements.

c) The MCO maximum allowable cost (MAC) pricing.

d) Instructions on how and whom to contact for questions regarding filling a prescription.

e) A provider manual as a guideline for pharmacy claim submission. The manual must include, but is not limited to:

1) Payer sheet

2) Call center hours

3) Paper claim submission requirements

4) Compound prescriptions requirements

5) Prospective DUR response requirements

6) Toll-free call center numbers

v. The MCO formulary may only exclude coverage of drugs or drug categories permitted under Section 1927(d) of the Social Security Act. In addition, the MCO shall include in its formulary any FDA-approved drugs that may allow for clinical improvement or are clinically advantageous for the management of a disease or condition for FDA-approved indications.

vi. The MCO must allow access to all new prescription drugs that are approved by the Food and Drug Administration, distributed by a labeler who participates in the Medicaid Drug Rebate Program, and are medically necessary either by addition of the drugs to the formulary or through prior authorization within ten calendar days from their availability in the marketplace.

vii. The MCO must at a minimum follow MLTC guidelines for off-label drug use.

viii. The MCO must support e-prescribing transactions, including, but not limited to member eligibility, formulary and benefit, and medication history. All transactions and data feeds to support e-prescribing must remain compliant with the National Council for Prescription Drug Programs (NCPDP) and the CMS-defined NCPDP SCRIPT standard version and supporting transactions. The MCO must remain compliant with the most current CMS-defined version of the NCPDP SCRIPT standard. All changes to support updates to the SCRIPT standard are the responsibility of the MCO and must be updated on a timeline to meet CMS-defined implementation dates at no cost to the Nebraska Medicaid program.

ix. The MCO may require prior authorization as a condition of coverage or payment for an outpatient prescription drug or device provided that:

a) The MCO provides a response to the prescriber and pharmacy by telephone, fax, or email indicating approval or denial of the request within one business day of the request; and

b) The MCO complies with the requirements for prior authorization for outpatient prescription drugs in accordance with Section 1927 of the Social Security Act.

x. The MCO must submit its policies and procedures on extemporaneously compounded drugs to MLTC for review and written approval prior to the start date of operations. Any subsequent changes to approved policies must be submitted to MLTC for review and written approval.

xi. The MLTC pharmacy benefit design currently uses the First Data Bank (FDB) drug reference file. MLTC may communicate coverage decisions using the FDB classification system. The MCO must be responsible to determine equivalent benefit designation if the FDB drug reference file is not used by the MCO.

c. Nebraska Medicaid Preferred Drug List

i. The MCO must follow the Nebraska Medicaid PDL. Preferred drugs must be adjudicated as payable without prior authorization, unless they are subject to clinical or utilization edits, as defined by MLTC. The PDL is subject to change on an ongoing basis. Refer to the following link for additional information:
http://dhhs.ne.gov/medicaid/Pages/med_pharm.aspx

ii. The MLTC PDL vendor will provide to the MCO a weekly national drug code (NDC) file delegating the preferred or non-preferred status of each NDC.

iii. The MCO must update the pharmacy claim system within one (1) business day of file receipt of the PDL file.

iv. The MCO must, at the direction of MLTC, perform off-cycle PDL file updates within one (1) business day.

v. The MCO must implement Pharmacy and Therapeutics Committee-reviewed PDL changes posted to the MLTC PDL website on the first day after the 30 calendar day public notice posting of such changes.

vi. The MCO is not authorized to and must not negotiate rebates with manufacturers for pharmaceutical products listed on the PDL. MLTC or its designee will negotiate rebate agreements. Regardless if the MCO or its PBM has an existing rebate agreement with a manufacturer, all Nebraska Medicaid outpatient drug claims, including provider-administered drugs, must be rebateable exclusively to Nebraska Medicaid.

vii. The MCO must nominate a non-voting member to attend the Nebraska Pharmaceutical and Therapeutics Committee's biannual meetings during the term of this contract. Written final approval of nominees is made by MLTC.

d. Contractor Formulary

i. The MCO must cover medications that meet the definition of outpatient pharmacy services eligible for Medicaid coverage as defined under Section 1927 of the Social Security Act.

ii. The MCO must provide coverage for all therapeutic classes of drugs covered by the Nebraska Medicaid pharmacy benefit.

iii. The MCO must submit the formulary for review and approval by MLTC a minimum of 90 calendar days prior to the contract start date.

iv. The MCO must submit all proposed formulary changes, excluding formulary expansion changes, to MLTC for review and written approval prior to the implementation of such changes.

v. The MCO must submit formulary prior authorization and step therapy policies and procedures, and any associated criteria, to MLTC for review and written approval a minimum of 60 calendar days prior to the contract start date. Clinical criteria for prior authorization of drugs require advance written approval of MLTC.

vi. The MCO must update the formulary files at a minimum on a weekly basis.

e. Over-the-Counter (OTC) Coverage

The MCO must, at a minimum, cover the OTC drugs listed in the Medicaid State Plan.

12. EPSDT Services

a. EPSDT is a comprehensive and preventive child health program for members under the age of 21.The EPSDT statute and Federal Medicaid regulations require that states cover all services within the scope of the federal Medicaid program, including services not included in a state's Medicaid State Plan, if necessary, to correct or ameliorate a known medical condition (42 U.S.C. 1396d(r)(5) and the CMS Medicaid State Manual). The program consists of two (2) mutually supportive, operational components: (1) ensuring the availability and accessibility of required health care services; and (2) helping Medicaid members and their parents or guardians effectively use these services. The intent of the EPSDT program is to direct attention to the importance of preventive health services and early detection and treatment of identified problems.

The MCO must provide:

i. Effective outreach/education that informs parents/guardians of the benefits of having their children receive EPSDT screening, diagnosis, and treatment services.

ii. Education to parents/guardians to assist them in making responsible decisions about preventive health care and appropriate utilization of health care services for their children.

iii. Continuing and comprehensive health care beginning with the screening, and continuing through diagnosis and treatment for any conditions identified during screenings.

iv. Assistance to families in making medical appointments and obtaining needed transportation.

v. The monitoring of provided EPSDT services, to ensure that all services are delivered within established time frames.

b. The MCO must have written procedures for EPSDT services in compliance with 42 CFR Part 441 Subpart B, as well as be in compliance with the CMS State Medicaid Manual, Part 5 – EPSDT. These documents outline the requirements for EPSDT, including assurance that all EPSDT

eligible members are notified of EPSDT available services; that necessary screening, diagnostic, and treatment services are available and provided; and that tracking or follow-up occurs to ensure all necessary services are provided to all of the MCO's eligible Medicaid children and young adults.

c. The MCO is required to authorize and provide all medically necessary services (including behavioral health services), whether specified in the Medicaid State Plan or not, except those services that have been identified in this RFP as excluded or prohibited.

d. The MCO is required to ensure the provision of the medical, vision, and hearing screening components and immunizations as specified in the American Academy of Pediatrics periodicity schedule.

e. The MCO must facilitate access to medically necessary behavioral health services recommended during an EPSDT examination when requested by the member or his/her parent/guardian or when the MCO determines that it is necessary or appropriate.

f. The MCO must accurately report, via encounter data submissions, all EPSDT and well-child services, blood lead screening, access to preventive services, and any other services required for MLTC to comply with federally-mandated CMS 416 reporting requirements.

13. Immunizations

a. The MCO must provide to all members under 21 years of age all vaccines and immunizations in accordance with the Advisory Committee on Immunization Practices guidelines.

b. The MCO must ensure that all providers use vaccines available without charge under the Vaccine for Children program. This program provides vaccines to Medicaid children 18 years old and younger. Immunizations should be given in conjunction with EPSDT/well child visits or when other appropriate opportunities occur.

c. MCO providers must report required immunization data to the Nebraska State Immunization Information System, administered by DHHS/Division of Public Health. This requirement must be made a part of any contracts the MCO has with its providers.

14. Emergency Medical and Post-Stabilization Services

The MCO is responsible for coverage and payment of emergency services and post-stabilization care services regardless of whether the provider who/that furnishes the services has a contract with the MCO.

a. Emergency Services

i. The MCO must ensure that emergency services be rendered without the requirement of prior authorization of any kind. If an emergency medical condition exists, the MCO is obligated to pay for the emergency service.

ii. The MCO must not deny payment for treatment obtained when a representative of the MCO instructs the member to seek emergency services.

iii. The MCO must not deny payment for treatment obtained when a member had an emergency medical condition as defined in 42 CFR 438.114(a).

iv. The MCO must not limit what constitutes an emergency medical condition on the basis of lists of diagnoses or symptoms.

v. The MCO must not refuse to cover emergency services based on the emergency room provider, hospital, or fiscal agent not notifying the member's primary care provider, MCO, or applicable State entity of the member's screening and treatment within ten (10) calendar days of presentation for emergency services.

vi. A member who has an emergency medical condition may not be held liable for payment of subsequent screening and treatment needed to diagnose the specific condition or stabilize the patient.

vii. The attending emergency physician, or the provider actually treating the member, is responsible for determining when the member is sufficiently stabilized for transfer or discharge, and that determination is binding on the MCO.

viii. The MCO must reimburse non-contracted providers for emergency services at no less than the Medicaid FFS rate in effect on the date of service.

b. Post-Stabilization Services

i. As specified in 42 CFR 438.114(e) and 42 CFR 422.113(c)(2)(i), (ii) and (iii), the MCO is financially responsible for post-stabilization care services obtained within or outside the MCO that are:

a) Pre-approved by a network provider or other MCO representative.

b) Not pre-approved by a network provider or other MCO representative, but:

1) Administered to maintain the member's stabilized condition within one (1) hour of a request to the MCO for pre-approval of further post-stabilization care services, or

2) Administered to maintain, improve, or resolve the member's stabilized condition, and

i) The MCO did not respond to a request for pre-approval within one (1) hour;

ii) The MCO cannot be reached, or

iii) The MCO representative and the treating physician cannot reach agreement regarding the member's care and a network physician is not available for consultation. In this situation, the MCO must give the treating physician the opportunity to consult with a network physician and the treating physician may continue with care of the patient until a network physician is reached or one of the criteria of 42 CFR 422.133(c)(3) is met.

ii. The MCO's financial responsibility for post-stabilization care services that have not been pre-approved ends when:

a) A plan physician with privileges at the treating hospital assumes responsibility for the member's care.

b) A plan physician assumes responsibility for the member's care through transfer to another place of service.

c) A MCO representative and the treating physician reach an agreement concerning the member's care.

d) The member is discharged.

15. Emergency Ancillary Services Provided at a Hospital

Emergency ancillary services that are provided in a hospital include, but are not limited to, radiology, laboratory, emergency medicine, and anesthesiology. Emergency ancillary services rendered by non-network providers in a hospital setting must be reimbursed at the published Medicaid fee schedule in effect on the date of service.

16. Family Planning Services

a. Family planning services are a mandatory Medicaid benefit. The MCO must not restrict the choice of provider from whom/which the member may receive family planning services and supplies. At a minimum, the MCO must provide coverage for the following family planning services:

i. Comprehensive medical history and physical exam in a frequency per year that meets or exceeds Medicaid limits. This visit includes anticipatory guidance and education related to members' reproductive health/needs.

ii. Contraceptive counseling to assist members in reaching an informed decision (including natural family planning, education follow-up visits, and referrals).

iii. Laboratory tests routinely performed as part of an initial or regular follow-up visit/exam for family planning purposes and management of sexual health.

iv. Drugs for the treatment of lower genital tract and genital skin infections/disorders, and urinary tract infections, when the infection/disorder is identified/diagnosed during a routine/periodic family planning visit. A follow-up visit/encounter for the treatment/drugs must also be covered.

i. Pharmaceutical supplies and devices to prevent conception, including all methods of contraception approved by the Federal Food and Drug Administration.

v. Male and female sterilization procedures provided in accordance with 42 CFR Part 441, Subpart F.

vi. Treatment of major complications from certain family planning procedures such as: treatment of perforated uterus due to intrauterine device insertion; treatment of severe menstrual bleeding caused by a Depo-Provera injection requiring dilation and curettage; or, treatment of surgical or anesthesia-related complications during a sterilization procedure.

b. Services must include diagnostic evaluation, supplies, devices, and related counseling for the purpose of voluntarily preventing or delaying pregnancy, detection and treatment of sexually transmitted infections (STIs), and age-appropriate vaccination for the prevention of human papillomavirus infection and cervical cancer. Prior authorization must not be required for treatment of STIs.

c. MCO members have the freedom to receive family planning services and related supplies from appropriate Medicaid providers outside the MCO's provider network without any restrictions as specified in 42 CFR 431.51(b)(2).

d. The MCO must reimburse non-contracted family planning providers at no less than the FFS rate in effect on the date of service for properly billed claims.

e. The MCO may encourage members to receive family planning services through the MCO's network of providers to ensure continuity and coordination of a member's total care. No additional reimbursements will be made to the MCO for MCO members who elect to receive family planning services outside the MCO's provider network.

f. The MCO should encourage family planning providers to communicate with the member's PCP once any form of medical treatment in undertaken.

g. The MCO must limit coverage for infertility to diagnosis and treatment of medical conditions when infertility is a symptom of a suspected medical problem such as thyroid disease, brain tumor, or hormone dysfunction. The MCO must ensure coverage is not available if the sole purpose of the service is attempting to achieve a pregnancy, per 471 NAC 10-005.

17. Prenatal and Maternity Care Services

a. The MCO must cover routine prenatal care, delivery, six (6) weeks post-partum care, and routine urinalysis.

b. The MCO must cover nurse-midwife services that are medically necessary in accordance with their scopes of practice as defined by the applicable statutes and regulations.

c. Coverage for a hospital stay following a normal vaginal delivery may not be limited to less than 48 hours for both the mother and newborn child. Health coverage for a hospital stay in connection with childbirth following a cesarean section may not be limited to less than 96 hours for both mother and newborn child.

18. Hysterectomies and Sterilizations

a. The MCO must cover the cost of medically necessary hysterectomies as provided in 42 CFR 441.255. Sterilizations must be conducted in accordance with 471 NAC 000-109, 10-005.07, 18-004.06 and Federal regulations at 42 CFR 441.250 – 441.259.

b. A hysterectomy or sterilization will not be covered if performed solely for the purpose of rendering an individual permanently incapable of reproducing. It will also not be covered if there was more than one purpose for it, but the primary purpose was to render the individual permanently incapable of reproducing.

19. Limitations on Abortions

a. The MCO must ensure that abortion services are approved in writing by both the MCO Medical Director and the MLTC Medical Director before the service is rendered to ensure compliance with Federal and State regulations.

b. The MCO must only provide for abortion services in accordance with 42 CFR 441.202 and the Consolidated Appropriations Act of 2008, which stipulate that abortions are covered only in instances where pregnancy is the result of either:

i. An act of rape or incest; or

ii. In the case where a woman suffers from a physical disorder, physical injury, or physical illness, including a life-endangering physical condition caused by or arising from the pregnancy itself, that would, as certified by a physician, place the woman in danger of death unless an abortion is performed.

c. For abortion services performed in accordance with this section, a physician must certify in his/her writing, that, on the basis of his/her professional judgment, the life of the pregnant woman would be endangered if the fetus were carried to term. The provider must attach the certification statement to the claim form that must be retained by the MCO. The certification statement must contain the diagnosis or medical condition that makes the pregnancy life endangering.

d. No other abortions, regardless of funding, can be provided as a benefit under this contract. The MCO must not make payment for any core benefit or service under the contract to a network or non-network provider if any abortion performed hereunder violates Federal regulations (e.g., the Hyde Amendment Codification Act).

20. Speech Pathology and Audiology

The MCO must cover, at a minimum, speech pathology and audiology services when the following criteria are met:

a. The services are ordered by a licensed physician.

b. The services are medically necessary.

c. The services or the condition of the member is/are so complex and sophisticated that only a licensed speech pathologist or audiologist could safely and effectively perform the service.

d.

e. The speech pathology or audiology service meets a minimum of one of the conditions listed at 471 NAC 23-003.01 or 23-003-02.

21. Transplants

The MCO must pay for all covered services associated with transplant care for a member. As required by 471 NAC 18-004.40, the MCO must cover transplant services, including donor services that are medically necessary and defined by Medicare as non-experimental. If Medicare policy does not exist for a certain type of transplant, the MLTC Medical Director will determine whether the transplant is medically necessary and non-experimental. The MCO must cover at a minimum the following transplant types:

a. Heart and lung

b. Lung only

c. Heart only

d. Intestinal and/or multi-visceral

e. Kidney only

f. Pancreas only

g. Kidney and pancreas

h. Liver only

i. Bone marrow/stem cell

22. Medical Services for Special Populations

a. The special health care needs (SHCNs) population is defined as individuals of any age with mental disability, physical disability, or other circumstances that place their health and ability to fully function in society at risk, requiring individualized health care approaches.

b. The MCO must assess each member for SHCN within 90 calendar days of enrollment. The assessments must be completed by appropriate health care professionals. Assessments that determine a course of treatment or regular care monitoring, as appropriate, must result in a referral for care management.

c. The MCO must utilize Medicaid historical claims data (if available) to identify members who meet MCO guidelines for SHCN determination. These guidelines must be approved in writing by MLTC a minimum of 45 calendar days prior to their proposed implementation.

d. MCO PCPs must notify the MCO of those members who meet SHCN criteria as soon as possible after identification.

e. Members may self-identify to either the enrollment broker or the MCO that they have SHCNs. The enrollment broker will provide notification to the MCO of these members.

f. Individualized treatment plans resulting from SHCN assessments must be:

vi. Developed by the member's PCP, with member participation, and in consultation with any specialists caring for the member.

vii. Approved by the MCO in a timely manner, as defined and required by the MCO.

viii. Compliant with applicable QA and UM standards.

g. For members determined to need a course of treatment or regular care monitoring, the MCO must have a mechanism in place to allow members to directly access a specialist (for example, through a standing referral or an approved number of visits) as appropriate for the member's condition and identified needs.

23. Chiropractic Services

a. Chiropractic services coverage is limited to treatment of the spine by manual manipulation (i.e., by use of hands only) and certain spinal x-rays, per 471 NAC 5-002.

b. Unless provided as a value-added service, the MCO must not cover any other diagnostic or therapeutic service or supply provided by a chiropractor or on his/her order including but not limited to laboratory tests, orthopedic devices, physiotherapy, nutritional supplements, EKGs, and acupuncture, as defined in 471 NAC 5-003.

24. Dialysis Services

The MCO must, per NAC 471 18-004, follow Medicare program guidelines for coverage of dialysis.

25. Durable Medical Equipment

a. The MCO must provide coverage and be financially responsible for medically necessary durable medical equipment (DME), prosthetics, orthotics, medical supplies, and assistive devices including, but not limited to, hearing aids.

b. The MCO must, at minimum, provide coverage for DME-related covered services as listed in Chapters 7 and 8 of Title 471 of the Nebraska Administrative Code.

26. Home Health Services

The MCO must cover the following home health agency services:

a. Skilled nursing services provided by a registered professional nurse or a licensed practical nurse.

b. Home health aide services.

c. Physical therapy provided by a licensed physical therapist.

d. Speech therapy provided by a licensed speech pathologist.

e. Occupational therapy provided by a licensed/certified occupational therapist.

27. Hospice Services

a. The MCO must provide a comprehensive package of hospice services to members, including nursing services, physician services, medical social services, counseling services, home health aide/homemaker, medical equipment, medical supplies, drugs and biologicals, physical therapy, occupational therapy, speech language pathology, volunteer services, and pastoral care services.

b. These services must be offered based upon individually assessed needs and choices of terminally ill members and their families for palliative care and support.

28. Medical Transportation Services

a. The MCO must provide emergency and non-emergency medical transportation by ambulance for its members.

b. The MCO may establish its own policy for medical transportation services as long as the MCO ensures members' access to care and the MCO's policy is in compliance with current Nebraska Medicaid guidelines for emergency and non-emergency medical transportation.

29. Excluded Services

Excluded services are those services that members may obtain under the Medicaid State Plan, and for which the MCO is not financially responsible. However, the MCO is responsible for informing members about how to access excluded services, providing all required referrals, and assisting in the scheduling of these services. These services will be paid for by MLTC on a FFS basis. Services include:

a. Dental services.

b. Intermediate care facility services for individuals with developmental disabilities.

c. Any institutional LTC/NF services at a custodial level of care.

d. School-based services.

e. All HCBS waiver services.

f. Targeted Case Management services.

g. Medicaid State Plan Personal Assistance Services.

30. Prohibited Services

a. Prohibited services are those required to treat complications or conditions resulting from non-covered services, services not reasonable and necessary, and services that are experimental and investigational unless approved by the MLTC Director.

b. The MCO is prohibited from paying for an item or service (other than an emergency item or service, not including items or services furnished in an emergency room of a hospital) described in Section 1903(i) of the Social Security Act.

F. MEMBER SERVICES AND EDUCATION

1. Member Rights and Protections

a. Member Rights

i. The MCO must have written policies regarding members' rights that are specified in this section and in compliance with 482 NAC 7-001. At a minimum, each MCO member is guaranteed the right to:

a) Be treated with respect and consideration of his/her dignity and privacy.

b) Receive information about available treatment options and alternatives, presented in a manner appropriate to the member's condition and ability to understand the information.

c) Participate in decisions regarding his/her health care, including the right to refuse treatment. Refusal of treatment is not a reason for which the MCO can request disenrollment of the member from the MCO.

d) Be free from any form of restraint or seclusion used as a means of coercion, discipline, convenience, or retaliation.

e) Request and receive a copy of his/her medical records, and request that they be amended or corrected as specified in 42 CFR 438.100.

f) Obtain available and accessible health care services covered under the contract.

g) Request disenrollment per 42 CFR 438.56.

ii. Each member is free to exercise his/her rights and entitled to a guarantee that the exercise of those rights will not adversely affect the member's treatment by the MCO, its providers, or MLTC.

b. Indian Health Protections

Per Section 5006(d) of the American Recovery and Reinvestment Act of 2009 (ARRA), Public Law 111-5, the MCO must:

i. Permit any American Indian who is enrolled in a MCO and eligible to receive services from a participating Indian tribe, tribal organization, or urban Indian organization (I/T/U) provider, to choose to receive covered services from that I/T/U provider, and if that I/T/U provider participates in the network as a PCP, to choose that I/T/U as his/her PCP, as long as that provider has the capacity to provide the service.

ii. Demonstrate that there are sufficient I/T/U providers in the network to ensure timely access to services available under the contract for Indian members who are eligible to receive services from such providers.

iii. In compliance with Section 5006(a) of the American Recovery and Reinvestment Act, (a) exempt from premiums any Indian who is eligible to receive or has received an item or service furnished by an Indian health care provider or through referral, and (b) exempt from all cost sharing any Indian who is currently receiving or has ever received an item or service furnished by an Indian health care provider or through referral.

iv. Follow required Indian health protections included in Section IV.Q Provider Reimbursement.

c. Notice to Members of Provider Termination

i. The MCO must make a good faith effort to provide affected members with written notice of a provider's termination from the MCO's network. This includes members who receive their primary care from, or were seen on a regular basis by, the terminated provider. When timely notice from the provider is received, the notice to the member must be provided within 15 calendar days of the receipt of the termination notice from the provider.

ii. The MCO must provide notice to a member who has been receiving a prior authorized course of treatment, when the treating provider becomes unavailable. The written notice must be provided within ten (10) calendar days from the date the MCO becomes aware of the change, if the notice is provided in advance.

iii. Failure to provide notice prior to the termination date is allowed when a provider becomes unable to care for members due to illness, a provider dies, the provider moves from the service area and fails to notify the MCO, or when the provider fails credentialing or is displaced as a result of a natural or man-made disaster. Under any of these circumstances, notice must be issued immediately upon the MCO becoming aware of the circumstances.

2. Member Services Call Center

a. The MCO must:

i. Operate a member call center with a toll-free telephone line to respond to members', their families', and their providers' questions, concerns, inquires, and complaints.

ii. Develop member call center line policies and procedures that address staffing; training; hours of operations; access and response standards; transfers/referrals, including case management referrals from any source; monitoring of calls via recording or other means; and compliance with standards in this RFP.

iii. Ensure the call center staff can handle calls from members with limited English proficiency and members with disabilities, including but not limited to members with hearing or speech disabilities.

iv. Ensure the call center is staffed adequately to respond to members' questions, at a minimum from 8:00 am to 5:00 pm, central time, Monday through Friday.

v. Ensure the member call center provides an option to speak with qualified nurses at any time to triage urgent care and emergency calls from members and to facilitate the transfer of calls to a care manager from or on behalf of a member who requires immediate assistance from a care manager.

vi. Ensure that, during normal business hours, call transfers to case managers be made as warm transfers, i.e. when transferring a call, the call center staff provides the person picking up the call with a brief summary of the member's concern and introduces the member.

If call transfer is not possible, the MCO must ensure that a care manager is notified and returns the member's call within 30 minutes and that the care manager has access to the necessary information to resolve the member's issue. The MCO must implement protocols, approved in advance by MLTC, that describe how member calls to the nurse triage/nurse advice line will be handled.

vii. Ensure the member call center is adequately staffed with individuals trained to accurately respond to member questions regarding managed care, including but not limited to, covered services, the Medicaid program, EPSDT, and the MCO's provider network.

viii. Measure and monitor the accuracy of responses and telephone etiquette and take corrective action as necessary to ensure that members are being given correct information in a helpful and polite manner.

b. The MCO must install, operate, and monitor an automated call distribution system for business and non-business hours, including weekends and holidays. This automated system must:

i. Effectively manage all calls received and assign incoming calls to available staff in an efficient manner.

ii. Transfer calls to other telephone lines, as necessary.

iii. Provide detailed reports in a format approved by MLTC, including the quantity, length, and types of calls received; the number of calls transferred or referred; abandonment rate; wait time; busy signal rate; response time; and call volume.

iv. Provide a message that notifies callers that calls may be monitored for QI purposes.

v.

vi. Provide callers with instructions about what to do in case of an emergency.

vii. Include a voice mailbox with adequate capacity.

viii. Measure the number of calls in the queue.

ix. Measure the length of time callers are on hold.

x. Measure the total number of calls and average calls handled per day, week, and month.

xi.

xii. Measure the average hours of use per day.

xiii. Assess the busiest times and days by number of calls.

xiv. Record calls to assess whether member questions are answered accurately and politely.

xv. Provide a backup telephone system that would operate in the event of line trouble, emergency situations including natural disasters, or other problems, so that access to the call center is not disrupted.

xvi. Provide interactive voice response (IVR) options that are user-friendly for members.

c. The MCO must meet the following call center performance standards:

i. Answer 90% of calls within 30 seconds or direct the call to an automatic call pickup system with IVR options.

ii. Ensure that no more than 1% of incoming calls receive a busy signal.

iii. Maintain an average hold time of three (3) minutes or less. Hold time, or wait time, for the purposes of this RFP includes 1) the amount of time a caller waits for a member services representative to assist them after the caller has navigated the IVR system and requested a live person and 2) the amount of time a customer service representative places a caller on hold.

iv. Maintain an abandonment rate of calls of not more than 5%.

v. Return all voice mails no later than the next business day.

d. The MCO must conduct ongoing quality assurance to ensure call center performance standards are met.

e. If MLTC determines that it is necessary to conduct onsite monitoring of the MCO's member call center functions, the MCO is responsible for all reasonable costs incurred by MLTC or its authorized agent(s) related to such monitoring.

3. Oral Interpretation and Written Translation Services

a. In accordance with 42 CFR 438.10(b)(1), MLTC will provide to the MCOs, and on its website, the prevalent non-English languages spoken by members in the State.

b. The MCO must make real-time and culturally and linguistically appropriate oral interpretation services available free of charge to each Medicaid enrollee and member. This applies to all non-English languages, not just those that Nebraska specifically requires. The member must not be charged for interpretation services. The MCO must notify its members that oral interpretation is available for any language, written information is available in Spanish, and how they can access these services. Materials that provide this information must be written in English and Spanish.

c. The MCO must ensure that translation services are provided for all written marketing and member materials in any language that is spoken as a primary language for 4% or more members, or potential members, of the MCO. Within 90 calendar days of notice from MLTC that an additional language is necessary, materials must be translated and made available. No charge can be assessed for these materials to ensure that all members and potential members understand how to access the MCO and use services appropriately as specified in 42 CFR 438.10(c)(4) and (5).

4. Requirements for Member Materials

a. The MCO must comply with the following requirements for all written member materials, regardless of the means of distribution (for example, printed, web, advertising, and direct mail).

b. The MCO must write all member materials in a style and reading level that will accommodate the reading skill of MCO members. In general, the writing should be at no higher than a 6.9 grade level, as determined by the Flesch–Kincaid Readability Test.

c. MLTC reserves the right to require the MCO to submit evidence that written member materials were tested against the 6.9 grade reading-level standard.

d. The MCO must distribute member materials to each new member within 30 calendar days of enrollment. One of these documents must describe the MCO's website, the materials that the members can find on the website and how to obtain written materials if the member does not have access to the website.

e. Written material must be available in alternative formats, communication modes, and in an appropriate manner that considers the special needs of those who, for example, have a visual,

speech, or hearing impairment; physical or developmental disability; or, limited reading proficiency.

f. All members and Medicaid enrollees must be informed that information is available in alternative formats and communication modes, and how to access them. These alternatives must be provided at no expense to each member.

g. The MCO must make its written information available in the prevalent non-English languages in the State. Currently, the prevalent non-English language in the State is Spanish. The MCO must make its written information available in any additional non-English languages identified by MLTC during the duration of the contract.

h. All written materials must be clearly legible with a minimum font size of twelve-point, with the exception of member identification (ID) cards, or as otherwise approved by MLTC.

i. The quality of materials used for printed materials must be, at a minimum, equal to the materials used for printed materials for the MCO's commercial plans, if applicable.

j. The MCO's name, mailing address, (physical location, if different), and toll-free telephone number must be prominently displayed on all marketing materials, including the cover of all multi-page materials.

k. All multi-page written member materials must notify the member that real-time oral interpretation is available for any language at no expense to them, and how to access those services.

l. All written materials related to MCO enrollment and PCP selection must advise members to verify with their usual providers that they are participating providers in the selected MCO and are available to see the member.

m. Marketing materials must be made available by the MCO across the State. Materials may be customized for particular locations or populations within the State.

n. All marketing activities must provide for equitable distribution of materials without bias toward or against any group.

o. Marketing materials must accurately reflect information that is applicable to an average member of the MCO.

p. In all member materials, the MCO must include the date of issue or revision.

q. Copies of all member mailings/materials (print and multimedia) must be provided contemporaneously to MLTC.

5. Member Handbook

a. The MCO must develop, maintain, and post to the member portal of its website a member handbook in both English and Spanish. In addition to the requirements described in this RFP, the handbook must comply with the requirements in 42 CFR 438.10(f)(6).

b. The draft member handbook must be submitted to MLTC for review and approval a minimum of 120 calendar days prior to the contract's start date.

c. The MCO must publish the member handbook on its website in the member portal. It must also have hard copies available and inform members how to obtain a hard copy member handbook if they want it.

d. At a minimum, the MCO must review and update the member handbook annually. The MCO must submit the updated handbook to MLTC for review and approval a minimum of 45 calendar days before it is to be implemented. If the MCO wishes to make changes to the handbook more frequently than annually, the revised language must still be submitted to MLTC a minimum of 45 calendar days prior to proposed implementation.

e. The MCO's updated member handbook must be made available to all members on an annual basis, through its website. When there is a significant change in the Member Handbook, the MCO

must provide members written notice of the change a minimum of 30 calendar days before the effective date of the change, that they may receive a new hard copy if they want it, and the process for requesting it.

f. At a minimum, the member handbook must include:

i. A table of contents.

ii. A general description of basic features of how MCOs operate and information about the MCO in particular.

iii. A description of the Member Services department, what services it can provide, and how member services representatives (MSRs) may be reached for assistance. The member handbook shall provide the toll-free telephone number, fax number, email address, and mailing address of the Member Services department as well as its hours of operation.

iv. A section that stresses the importance of a member notifying Medicaid Eligibility of any change to its family size, mailing address, living arrangement, income, other health insurance, assets, or other situation that might affect ongoing eligibility.

v. Member rights/protections and responsibilities, as specified in 42 CFR 438.100 and this RFP.

vi. Appropriate and inappropriate behavior when seeing a MCO provider. This section must include a statement that the member is responsible for protecting his/her ID cards and that misuse of the card, including loaning, selling, or giving it to another person, could result in loss of the member's Medicaid eligibility and/or legal action.

vii. Instructions on how to request no-cost multi-lingual interpretation and translation services. This information must be included in all versions of the member handbook.

viii. A description of the PCP selection process and the PCP's role as coordinator of services.

ix. The member's right to select a different MCO or change providers within the MCO.

x. Any restrictions on the member's freedom of choice of MCO providers.

xi. A description of the purpose of the Medicaid and MCO ID cards, why both are necessary, and how to use them.

xii. The amount, duration and scope of benefits available to the member under the contract between the MCO and MLTC in sufficient detail to ensure that members understand the benefits for which they are eligible.

xiii. Procedures for obtaining benefits, including authorization requirements.

xiv. The extent to which, and how, members may obtain benefits, including family planning services, from out-of-network providers.

xv. Information about health education and promotion programs, including chronic care management.

xvi. Appropriate utilization of services including not using the ED for non-emergent conditions.

xvii. How to make, change, and cancel medical appointments and the importance of cancelling or rescheduling an appointment, rather than being a "no show".

xviii. Information about a member's right to a free second opinion per 42 CFR 438.206(b)(3) and how to obtain it.

xix. The extent to which, and how, after-hours and emergency coverage are provided, including:

a) What constitutes an emergency medical condition, emergency services, and post-stabilization services, as defined in 42 CFR 438.114(a) and 42 CFR 422.113(c).

b) That prior authorization is not required for emergency services.

c) The process and procedures for obtaining emergency services, including use of the 911-telephone system.

d) That, subject to provisions of 42 CFR Part 438, the member has a right to use any hospital or other setting for emergency care.

xx. The policy about referrals for specialty care and for other benefits not furnished by the member's PCP.

xxi. How to obtain emergency and non-emergency medical transportation.

xxii. Information about the EPSDT program and the importance of children obtaining these services.

xxiii. Information about notifying the MCO if a female member becomes pregnant or gives birth, the importance of early and regular prenatal care, and obtaining prenatal and post-partum care.

xxiv. Information about member copayments. The charging of a copayment is at the discretion of the MCO. If the MCO chooses to ask its providers to charge copayments, this cost-sharing must be in compliance with 42 CFR 447.50 through 447.57, and cannot exceed the amounts specified at 471 NAC 3-008.

xxv. The importance of notifying the MCO immediately if the member files a workers' compensation claim, has a pending personal injury or medical malpractice lawsuit, or has been involved in an accident of any kind.

xxvi. How and where to access any benefits that are available under the Medicaid State Plan that are not covered under the MCO's contract with MLTC, either because the service is carved out or the MCO will not provide the service because of a moral or religious objection.

xxvii. That the member has the right to refuse to undergo any medical service, diagnosis, or treatment or to accept any health service provided by the MCO if the member objects (or in the case of a child, if the parent or guardian objects) on religious grounds.

xxviii. Member grievance, appeal, and state fair hearing procedures and timeframes, as described in 42 CFR 438.400-424 and this RFP, as follows:

a) For grievances and appeals:

1) Definitions of a grievance and an appeal.

2) The right to file a grievance or appeal.

3) The requirements and timeframes for filing a grievance or appeal.

4) The availability of assistance in the filing process.

5) The toll-free number(s) the member can use to file a grievance or an appeal by telephone.

6) The fact that, when requested by a member, benefits can continue if the member files an appeal within the timeframes specified for filing at 477 NAC 10-001. Pursuant to the same regulation, the member should also be notified that the member may be required to pay the

cost of services furnished while the appeal is pending, if the final decision is adverse to the member.

b) For state fair hearing:

1) Definition of a state fair hearing.

2) The right to request a hearing.

3) The requirements and timeframes for requesting a hearing.

4) The availability of assistance to request a fair hearing.

5) The rules on representation at a hearing.

6) The fact that, when requested by a member, benefits can continue if the member files a request for a state fair hearing within the timeframes specified for filing at 477 NAC 10-001. Pursuant to the same regulation, the member should also be notified that the member may be required to pay the cost of services furnished while the appeal is pending, if the final decision is adverse to the member.

xxix. As set forth in 42 CFR 438.6(i)(1) and in this section, a description of advance directives that includes:

a) The State's and MCO's policies about advance directives.

b) Information about where a member can seek assistance in executing an advance directive and to whom copies should be given.

xxx. Information about how members can file a complaint with MLTC or the Division of Public Health about a provider's failure to comply with advance directive requirements.

xxxi. How a member may report suspected provider fraud and abuse, including but not limited to, the MCO's and MLTC's toll-free telephone number and website links created for this purpose.

xxxii. Any additional information that is available upon request, including but not limited to:

a) The structure and operation of the MCO.

b) The MCO's physician incentive plan (42 CFR 438.6(h)).

c) The MCO's service utilization policies.

d) How to report alleged marketing violations to MLTC.

e) Reports of transactions between the MCO and parties in interest (as defined in section 1318(b) of the Public Health Service Act) provided to the State.

xxxiii. A minimum of once a year, the MCO must notify members of the option to receive the Member Handbook and the provider directory in either electronic or paper format.

6. Other Member Notifications

The MCO must also provide the following information to each member:

a. A minimum of annually, the MCO must provide an explanation of a member's disenrollment rights to each member. The notice must be sent no less than 60 calendar days before the start of each enrollment period.

b. A minimum of annually, the MCO will inform all members of their right to request the following information in compliance with 42 CFR 438.10(f)(6) and 42 CFR 438.100(a)(1) and (2).

i. An updated member handbook, at no cost to the member.

ii. An updated provider directory, at no cost to the member.

7. Member Newsletter

a. The MCO must develop and distribute, a minimum of twice a year, a member newsletter. This publication must be available on the member portal and mailed to members on request. Topics covered in the newsletter must be timely and relevant to the member population. Suggested topics to discuss include but are not limited to:

i. Educational information on chronic illnesses and ways to self-manage care.

ii. Behavioral health information.

iii. Reminders of flu shots and other prevention measures at appropriate times.

iv. Medicare Part D issues.

v. Cultural competency issues.

vi. Tobacco cessation information and programs.

vii. HIV/AIDS testing for pregnant women.

viii. Other topics as requested by MLTC.

b. The MCO must submit a draft of the member newsletter to MLTC a minimum of 45 calendar days prior to its intended publication for review and approval.

8. Provider Directory for Members

a. The MCO must develop and maintain a provider directory for its members in three (3) formats:

i. A hard copy directory, when requested, for members, potential members, and the enrollment broker.

ii. A web-based, searchable, online directory for members, potential members, and the general public.

iii. An electronic file of the directory to be submitted and updated weekly to MLTC or its designee, and the enrollment broker.

b. The MCO must submit templates of its provider directory to MLTC a minimum of 45 calendar days prior to the contract start date for MLTC's review and approval.

c. The hard copy directory for members must be updated a minimum of monthly. The web-based version must be updated in real time, and no less often than three (3) business days after notification of any change. Daily updates are preferred, if possible.

d. In accordance with 42 CFR 438.10(f)(6), the provider directory must include, but not be limited to:

i. Names, locations, telephone numbers, specialties, and non-English languages spoken of all current contracted providers (including urgent care clinics, FQHCs, RHCs, labs, radiology providers, behavioral health providers, hospitals, and pharmacies) in the MCO's network. Those PCPs, specialists, and other providers who/that are not accepting new patients must be identified.

ii. Hours of operation, including identification of providers with non-traditional hours (before 8 am, after 5 pm, or any weekend hours).

e. To assist Medicaid enrollees in identifying participating providers for each MCO, the enrollment broker will use the MCO's file. This file will be available on the MCO's website, and should be provided to the enrollment broker in a machine readable file and format. As necessary, the enrollment broker will maintain hard copies of the MCO's directory to share with Medicaid enrollees on request.

9. Member ID Cards

MCO members will be issued a minimum of two separate member ID cards related to their Medicaid eligibility and their enrollment in the Nebraska Medicaid managed care delivery system. MLTC issues an ID card to all Medicaid eligible individuals, including MCO members. This card is not proof of eligibility, but can be used by providers to access the State's electronic eligibility verification systems. These systems contain the most current information available on members, including MCO enrollment. No MCO-specific information is printed on the card. The MCO member may need to show this card to access Medicaid services not included in the MCO benefits and services.

a. The MCO must issue an ID card to each of its members. At a minimum, the card must include:

i. The member's name.

ii. The member's Medicaid ID number.

iii. The enrollment broker's toll-free telephone number.

iv. The MCO's name and address.

v. Instructions on what the member should do in the event of an emergency.

vi. The member's PCP's name and telephone numbers (including the after-hours number, if it is different).

vii. The MCO's toll-free number(s) for Member Services, filing a grievance, and reporting suspected fraud.

c. The MCO may provide the MCO member ID card in a separate mailing from the welcome packet. However, the ID card must be sent no later than ten (10) business days from the date of receipt of the file from MLTC or the enrollment broker that identifies the new member. As part of the welcome packet information, the MCO must explain the purpose of the card and how to use it in tandem with the MLTC-issued card.

d. The card may be issued without the PCP information if no PCP selection has been made as of the date of the card's mailing. Once PCP selection has been made by the member or through auto assignment, the MCO must reissue the card within ten (10) business days of the selection or auto-assignment. As part of the mailing of the reissued card, the MCO must explain the purpose of the new card, the changes between the new and previous card, and that the member should destroy the previous card.

e. The MCO must reissue the MCO ID card to a member within ten calendar days of notice that a member has lost his/her card, had a name or PCP change, or for any other reason that requires a change to the information on the current ID card.

f. If the MCO has knowledge of any MCO member permitting the use of his/her ID card by any other person, the MCO must immediately report this information to the Special Investigation Unit in the Department of Health and Human Services Division of Public Health at (402) 471-9407 (Lincoln and Greater Nebraska) or (402) 595-3789 (Omaha).

g. The MCO must ensure that its subcontractors can identify members in a manner that will not result in discrimination against the members, in order to provide or coordinate the provision of all benefits and services, expanded services, and/or out-of-network services.

h. Pharmacy-Related ID Card Requirements

The MCO must provide, on the member's ID card, prescription billing information that:

vi. Complies with the standards set forth in the National Council for Prescription Drug Programs' Health Care Identification Card Pharmacy and/or Combination ID Card Implementation Guide at the time of issuance of the card.

vii. Includes, at a minimum, the following data elements:

a) The name or identifying trademark of the MCO and the prescription benefit manager.

b) All electronic transaction routing information and any other numbers required by the MCO or its benefit administrator to process a prescription claim electronically.

10. Member Website

a. The MCO must maintain a website that includes a member portal. The member portal must be interactive and accessible using mobile devices, and have the capability for bi-directional communications (i.e., members can submit questions and comments to the MCO and receive responses).

b. The MCO website must include general and up-to-date information about the Nebraska Medicaid program and the MCO. All material to be included on the website must be submitted and approved by MLTC in advance of its intended posting. MLTC will review and approve or request changes as quickly as practical but within 30 calendar days of receipt.

c. The MCO must remain compliant with applicable privacy and security requirements (including but not limited to HIPAA) when providing member eligibility or member identification information on its website.

d. The MCO website should, at a minimum, be in compliance with Section 508 of the Americans with Disabilities Act, and meet all standards the Act sets for people with visual impairments and disabilities that make usability a concern.

e. The MCO website must follow all written marketing guidelines included in Section IV G Member marketing..

f. Us of proprietary items that would require use of a specific browser or other interface is not allowed.

g. The MCO must provide the following information on its website, and such information must be easy to find, navigate among, and be reasonably understandable to all members:

i. The most recent version of the member handbook.

ii. Telephone contact information for the MCO, including the toll free customer service number prominently displayed and a telecommunications device for the deaf (TDD) number.

iii. A searchable list of network providers, with a designation of open or closed panels. This directory must be updated in real time, for changes to the MCO network.

iv. A link to the enrollment broker's website and the enrollment broker's toll free number for questions about enrollment.

v. A link to the Medicaid Eligibility website (http://accessnebraska.ne.gov) for questions about Medicaid eligibility.

vi. Information about how to file grievances and appeals.

11. Medical Records

a. A member's medical record is the property of the provider who generates the record. Medical records include those maintained by PCPs or other providers, as well as but not limited to, those

kept in placement settings such as nursing facilities, assisted living facilities, and other home and community based providers.

b. Each member is entitled to a copy of his or her medical record at no cost.

c. The MCO must have written policies and procedures to maintain the confidentiality of all medical records in compliance with applicable law.

d. he MCO is responsible for ensuring that a medical record (hard copy or electronic) is established when information is received about a member. If the PCP has not yet seen the member, such information may be kept temporarily in an appropriately labeled file, in lieu of establishing a medical record, but must be associated with the member's medical record as soon as one is established.

e. The MCO must ensure the medical record includes, at a minimum, the following:

i. Member-identifying information, including name, member ID number, date of birth, gender, and legal guardianship (if applicable).

ii. Primary language spoken by the member and any translation needs.

iii. Services provided through the MCO, date of service, service site, and name of service provider.

iv. Medical history, diagnoses, treatment prescribed, therapy prescribed, and drugs administered or dispensed, beginning with, at a minimum, the first member visit with or by the MCO.

v. Referrals including follow-up and outcome of referrals.

vi. Documentation of emergency or after-hours encounters and follow-up.

vii. Signed and dated consent forms (as applicable).

viii. Documentation of immunization status.

ix. Documentation of advance directives, as appropriate.

x. Documentation of each visit must include:

a) Date and begin and end times of service.

b) Chief complaint or purpose of the visit.

c) Diagnoses or medical impression.

d) Objective findings.

e) Patient assessment findings.

f) Studies ordered and results of those studies (e.g., laboratory, x-ray, EKG).

g) Medications prescribed.

h) Health education provided.

xi. Name and credentials of the provider rendering services (e.g., MD, DO, OD) and the signature or initials of the provider. Initials of providers must be identified with correlating signatures.

xii. Documentation of EPSDT requirements including but not limited to:

a) Comprehensive health history.

b) Developmental history.

c) Unclothed physical exam.

d) Vision, hearing and dental screening.

e) Immunizations.

f) Lab testing including mandatory lead screening.

g) Health education and anticipatory guidance.

f. The MCO must have written policies and procedures for the maintenance of medical records to ensure that records are documented accurately and in a timely manner, are readily accessible, and permit prompt and systematic retrieval of information. Medical records shall be maintained in a detailed and comprehensive manner, which conforms to professional standards, permits effective medical review and audit processes, and facilitates an adequate system for follow-up treatment.

g. The MCO must have written standards for documentation on medical records for legibility, accuracy and plan of care that comply with applicable law.

h. When a member changes PCPs, his/her medical records or copies of medical records must be forwarded to the new PCP within ten (10) business days from receipt of the request for transfer of the medical records.

i. MLTC is not required to obtain written approval from a member before requesting the member's medical record from the PCP or any other organization or agency. The MCO may obtain a copy of a member's medical records without written approval of the member if the reason for such request is directly related to the administration of the Nebraska Medicaid program.

j. MLTC must be afforded access to all members' medical records, whether electronic or paper, within 20 business days of receipt of the request or more quickly if necessary in MLTC's sole determination.

k. Information related to fraud and abuse may be released. However, HIV-related information may not be disclosed except as provided in State statute, and substance use disorder information shall only be disclosed consistent with Federal and State law, including but not limited to 42 CFR 2.1 et seq.

12. Advance Directives

a. The MCO must maintain written policies and procedures for advance directives, as described in 42 CFR 489.100.

b. The MCO must provide written information to all adult members with respect to:

vi. Their rights under applicable law.

vii. The MCO's policies respecting the implementation of those rights, including a statement of any limitation regarding the implementation of advance directives as a matter of conscience.

c. The MCO is prohibited from conditioning the provision of care or otherwise discriminating against an individual based on whether or not the individual has executed an advance directive.

d. The MCO must inform individuals that complaints concerning noncompliance with advance directive requirements may be filed with MLTC or the DHHS Division of Public Health.

e. Any written information on advance directives must reflect changes in State law as soon as possible, but no later than 90 calendar days after the effective date of a change.

13. Communication with New Members

a. MLTC's enrollment broker is required to send to the MCO a daily electronic transmission file that contains the names, addresses, and telephone numbers of all members newly assigned to the MCO, with an indicator for members who were auto-assigned. The MCO must use this file to identify new members, initiate communication with new members via welcome packet mailings and calls, and assign members to a PCP, if the member has not already chosen one.

b. Welcome Packets

i. The MCO must send a welcome packet to new members within ten business days of receiving the new member file.

ii. The MCO must mail a welcome packet to each new member. When the name of the responsible party for the new member is associated with two or more new members, the MCO is only required to send one welcome packet.

iii. All contents of the welcome packet are considered member materials and, as such, must be submitted for review and approval by MLTC a minimum of 45 calendar days prior to the contract's start date. The materials must comply with the requirements of this RFP and 42 CFR 438.10 (f)(6). The welcome packet must include, at a minimum:

a) A welcome letter with MCO contact information. If the MCO ID card is mailed separately, the welcome letter must also state that the member will receive his/her member ID card separately.

b) Information on how to request a member handbook.

c) The MCO member ID card (if not mailed separately).

d) Notice that the provider directory and Member Handbook are available on the member portal and that the member may request a hardcopy if he/she wants one. Directions for how to obtain hardcopies must be included in this notice.

e) Other information that the MCO wishes to include, such as an EPSDT program periodicity schedule, prenatal care materials, guidance regarding emergency services, availability of community services/resources, and any other materials that might be appropriate for the member.

c. Welcome Calls

i. The MCO must make welcome calls to new members within 15 business days of the date the MCO sends the welcome packet.

ii. A minimum of 45 calendar days prior to the contract's start date, the MCO must develop and submit to MLTC for approval a script to be used during the welcome call to discuss the following information with the member:

a) A brief explanation of the program.

b) A discussion of member confidentiality requirements.

c) The availability of oral interpretation and written translation services and how to obtain them free of charge.

d) The concept of patient-centeredness, including the importance of the member making a first appointment with his or her PCP for preventive care before the member requires care due to an illness or condition. If the member did not already select his/her PCP, the member should be advised that s/he may select a PCP and the MCO must assist with this process, if needed.

e) A determination of whether the member is pregnant, has a chronic condition, faces barriers to accessing care (e.g., transportation needs, mobility limitations)

or any special health care needs. Assistance in making an appointment with the PCP must be offered to all members with any of these issues.

f) Assistance with any needed referrals, including but not limited to, the Special Supplemental Nutrition Program for Women, Infants, and Children (WIC) program.

iii. The MCO must make three (3) attempts to contact the member. If the MCO discovers that the member has lost or has never received the welcome packet, the MCO must resend it.

iv. The MCO must report to MLTC, on a monthly basis, the name, telephone number(s), and Medicaid Recipient ID Number of each member it was unable to contact after three (3) attempts.

v. The MCO may propose to MLTC an alternate method and plan for welcoming members per this section, if anticipated to be more effective. MLTC in its sole discretion may approve this alternate method.

14. Member Education

a. In all its written and verbal communications with its members, the MCO must provide ongoing education about how the member can improve his/her health and wellness. This should include, but not be limited to, the member handbook, the new member welcome packet, the member newsletter, other member mailings, and communication with member services representatives, case managers, and other MCO staff.

b. The MCO is responsible for educating members on the appropriate utilization of ER services, including behavioral health emergencies.

c. A minimum of 45 calendar days prior to the contract start date, the MCO must submit to MLTC for review and approval its proposed member education plan. This plan must include, but not be limited to:

i. The MCO's plans for new member outreach, including welcome packets and welcome calls, as well as ongoing member education.

ii. How the MCO plans to reach out to members in need of care management services.

iii. The MCO's plan to incorporate patient engagement tools such as smartphone-based support programs, mobile applications or text messaging innovations. A smartphone-based support program could include the following features:

a) Mobile applications and/or mobile-friendly content that is accessible across a broad range of electronic devices.

b) Consumer-friendly and engaging content that helps keep patients on-track with key health appointments and screenings.

c) Tools to help stratify users by risk profile and direct the higher risk users to State-based or MCO-based resources.

d) Outreach support to educate patients about the mobile tools.

e) Reporting and analytics to help the State measure the effectiveness of the electronically-based support program.

iv. How the MCO plans to meet the informational needs, relative to member education, for the physical and cultural diversity of the State. This may include, but is not limited to, a description of the provisions for non-English speaking members, interpreter services, and alternate communication mechanisms (such as sign language, Braille, or audio tapes).

v. A list of all subcontractors engaged in marketing or member education activities for the MCO.

d. The MCO may not conduct member education or distribute member education materials in provider offices.

G. MEMBER MARKETING

1. General Guidelines for Marketing

a. Marketing, for the purposes of this RFP, is defined in 42 CFR 438.104(a) as any communication from a MCO to a Medicaid enrollee, who is not enrolled in that MCO, that can reasonably be interpreted to try to influence the Medicaid enrollee to 1) enroll in that particular MCO, or 2) either not enroll in, or dis-enroll from, another MCO.

b. Marketing is different than member education. Member education is defined as communication with a MCO member for the purpose of retaining the member as a member and improving his/her health status.

c. Marketing materials include both verbal presentation and written materials, as well as all types of advertising, public service announcements, printed publications, websites, social media, mobile device applications, broadcasts, and electronic messages designed to increase awareness and interest in the MCO. This includes any information that references the MCO, is intended for general distribution, and is produced in a variety of print, broadcast, or direct marketing media.

d. All marketing activities must be conducted in an orderly, non-disruptive manner and shall not interfere with the privacy of members, Medicaid enrollees, or the general community.

e. All marketing materials and activities must comply with the requirements in 42 CFR 438.10 and the MLTC requirements set forth in this RFP.

f. Under the Nebraska Medicaid managed care program, all direct marketing to Medicaid enrollees or potentially eligible individuals will be performed by MLTC or its designee in accordance with 42 U.S.C. 1396u-2(d)(2)(A) and 42 CFR 438.104.

g. The MCO is responsible for the creation, production, and distribution of its own marketing and member materials. MLTC and its enrollment broker will only be responsible for distributing general material developed and produced by the MCO for inclusion in the enrollment package distributed to Medicaid enrollees. MLTC will determine which materials will be included in the enrollment broker generated packet and which materials will be distributed by the MCO.

h. Activities involving distribution and completion of a MCO enrollment form during the course of enrollment activities is an enrollment function and is the sole responsibility of MLTC's enrollment broker.

i. The MCO must provide assurances to MLTC that marketing, including plans and materials, is accurate and does not mislead, confuse, or defraud members/enrollees or MLTC as specified in 42 U.S.C 1396u-2(d)(2) and 432 CFR 438.104. Marketing materials must not contain any assertion or statement (whether written or verbal) that:

i. The member must enroll in the MCO in order to obtain or not to lose benefits.

ii. That the MCO is endorsed by CMS, the Federal or State government, MLTC, or any similar entity.

j. If a person who provides a testimonial or endorsement for the MCO has a financial interest in the company, this fact must be disclosed in the member/marketing materials.

k. The MCO shall comply with the Office of Minority Health, DHHS' Cultural and Linguistically Appropriate Services Guidelines, which is available at: http://www.minorityhealth.hhs.gov/omh/browse.aspx?lvl=2&lvlid=53, and participate in the State's efforts to promote the delivery of services in a culturally competent manner to all Medicaid enrollees.

l. The MCO must ensure that:

i. Marketing materials are distributed statewide.

ii. The MCO does not seek to influence enrollment in conjunction with the sale or offering of any private insurance.

iii. The MCO does not, directly or indirectly, engage in door-to-door, telephone, or other cold-call marketing activities.

2. Marketing Plan

a. The MCO must develop and implement a plan detailing the marketing activities it will undertake and materials it will create during the contract period, which must incorporate the requirements of this RFP. The detailed, proposed plan must be submitted to MLTC for review and approval a minimum of 45 calendar days prior to the contract start date.

b. The MCO must not begin member marketing activities associated with this contract prior to approval of the marketing plan by MLTC.

c. The plan must include at a minimum:

i. Stated marketing goals and strategies.

ii. A marketing calendar, which begins with the date of the signed contract between MLTC and the MCO, and runs through the first calendar year of providing services to Medicaid members, that addresses all marketing areas, including advertising plans, website development and launch plans, printed materials, material distribution plans (including specific locations), or outreach activities (health fairs, area events, etc.).

iii. A summary of value-added benefits to be used by MLTC to create a plan comparison chart to assist Medicaid enrollees in selecting the MCO that best meets their needs.

iv. Distribution methods and schedules, including media schedules for electronic or print advertising (including date and station or publication).

v. How the MCO plans to meet the informational needs, relative to marketing (for prospective enrollees), of the physical and cultural diversity within the State. This may include but is not limited to: a description of the provisions for non-English speaking prospective enrollees, interpreter services, or alternate communication mechanisms (such as sign language, Braille, audio tapes, etc.).

vi. A list of all subcontractors engaged in marketing activities for the MCO.

vii. A copy of the training curriculum for marketing representatives (internal staff and subcontractors).

viii. The MCO's procedure for monitoring and enforcing compliance with all marketing guidelines, in particular the monitoring of prohibited marketing methods, among internal staff and subcontractors.

ix. Copies of all marketing materials (print and multimedia) that are directed at Medicaid enrollees planned for distribution by the MCO or any of its subcontractors.

x. Copies of marketing materials that are: (1) currently in concept form, but not yet produced, including a detailed description, or (2) samples from other states that will be duplicated in a similar manner for the Nebraska Medicaid managed care population.

xi. Details of proposed marketing activities and events.

xii. Details regarding the basis it uses for awarding bonuses or increasing the salary of marketing representatives or any other employees involved in marketing activities.

xiii. Details about supplying current materials, as well as plans to remove outdated materials, from public areas.

xiv. The MCO's protocols for responding to unsolicited direct contact (verbal or written) from a Medicaid enrollee or potentially eligible individual. This should include circumstances that will:

a) Initiate referral to the enrollment broker.

b) Initiate referral to the Medicaid Eligibility customer service line.

c) Terminate the conversation.

d. Any changes to the marketing plan, included materials or activities, must be submitted to MLTC for review and approval a minimum of 45 calendar days before intended implementation of the marketing activity.

e. The plan shall be updated quarterly and submitted to MLTC for dissemination to the Medical Assistance Advisory Committee for review, in accordance with 42 CFR 431.12.

3. Allowable Marketing Activities

a. The MCO and its subcontractors are permitted to perform the following activities:

i. Distribute general information through mass media (i.e., newspapers, magazines, and other periodicals; radio; television; the internet; public transportation advertising; billboards; and, any other media outlets), in compliance with prohibitions to placement detailed in this RFP.

ii. Make telephone calls and home visits to members currently enrolled in the MCO (member education and outreach), for the purpose of educating them about services offered by or available through the MCO.

iii. Respond to verbal or written requests for information made by Medicaid enrollees, in compliance with the marketing plan approved by MLTC.

iv. Provide promotional giveaways which do not exceed $15.00 in value, to current members; persons not currently members cannot receive promotional giveaways from the MCO.

v. Attend or organize activities that benefit the entire community, such as health fairs or other health education and promotion activities. MLTC must be notified of the activity and details must be provided about the planned marketing activities using the process described in this RFP.

vi. Attend activities at a business only at the invitation of the entity. MLTC must be notified in advance of the activity and details must be provided.

vii. Attend events at the request of MLTC to disseminate or share information about the MCO, its services and outcomes.

viii. Conduct telephone marketing only during incoming calls from Medicaid enrollees. The MCO may return telephone calls to potential members only when requested to do so by the caller. The MCO must utilize the response plan outlined in the marketing plan during these calls, as approved by MLTC.

ix. Send plan-specific materials to Medicaid enrollees only at their request.

b. If there is any instance in which a MCO-allowable activity conflicts with a prohibited activity, the prohibited activity guidance must be followed.

4. Prohibited Marketing Activities

The MCO and its subcontractors are prohibited from engaging in the following activities:

a. Marketing directly to Medicaid enrollees or potentially Medicaid eligible individuals, including persons currently enrolled in Medicaid or other MCOs. Direct marketing includes direct mail advertising; unsolicited email ("spam"); and, door-to-door, telephonic, or other "cold call" marketing techniques.

b. Asserting that the MCO is endorsed by CMS, the Federal or State government, MLTC, or any similar entity.

c. Distributing plans and materials or making any statement (written or verbal) that MLTC determines to be inaccurate, false, confusing, misleading, or intended to defraud members or MLTC. This includes statements that mislead or falsely describe covered services, membership or availability of providers, or qualifications or skills of providers.

d. Portraying competitors or potential competitors in a negative manner.

e. Assisting with enrollment or improperly influencing MCO selection.

f. Inducing or accepting a member's enrollment or disenrollment from any Medicaid enrollee or member not currently enrolled with the MCO;

g. Using the seal of the State of Nebraska, or MLTC's name, logo, or other identifying marks on any materials produced or issued, without the prior written consent of MLTC.

h. Distributing marketing information (written or verbal) that implies that joining MCOs or a particular MCO is the only means of preserving Medicaid coverage, or that MCOs or a particular MCO is the only provider of Medicaid services and the potential enrollee must enroll in the MCO or MCOs to obtain benefits or not lose benefits.

i. Comparing itself to another organization/MCO by use of the other's name.

j. Sponsoring or attending any marketing or community health activities or events without notifying MLTC within the timeframes specified in this RFP.

k. Engaging in any marketing activities, including unsolicited personal contact with a Medicaid enrollee or potentially eligible individual, at an employer-sponsored enrollment event when employee participation is mandated by the employer.

l. Marketing or distributing marketing materials, including member handbooks, or soliciting members in any other manner, inside, at the entrance, or within 100 feet of DHHS local offices without prior approval from MLTC. Medicaid eligibility office staff or approved MLTC agents are the only authorized personnel to distribute such materials.

m. Conducting marketing or distributing marketing materials in hospital ERs, including the ER waiting areas, patient rooms, or treatment areas.

n. Registering or asserting any copyright or releasing any report, graph, chart, picture, or other document relating to services provided under this contract, without the prior written consent of MLTC.

o. Purchasing or otherwise acquiring or using mailing lists of Medicaid eligible individuals from third-party vendors, including providers and state offices.

p. Using raffle tickets, event attendance, or sign-in sheets to develop mailing lists of prospective members.

q. Charging members for good or services distributed at events.

r. Charging members a fee for accessing the MCO website.

s. Influencing enrollment in conjunction with the sale or offering of any private insurance.

t. Using terms that would influence, mislead, or cause potential members to contact the MCO, rather than the MLTC-designated enrollment broker, for enrollment.

u. Referencing the private insurance component of the MCO, if any, in any of its Medicaid MCO enrollee marketing materials.

v. Using terms in marketing materials such as “choose,” “pick,” “join,” etc., unless the marketing materials include the enrollment broker’s contact information.

5. Media Contacts

The MCO must not provide information to the media or give media interviews without the prior consent of MLTC. Any contacts by the media or other entity or individual not directly related to the program must be referred to MLTC.

6. Provider Marketing Guidelines

a. When conducting any form of marketing in a provider’s office, the MCO must obtain and keep on file the written consent of the provider.

b. The MCO shall not require its providers to distribute MCO-prepared marketing communications to their patients.

c. The MCO shall not provide incentives or giveaways to providers to distribute them to MCO members or potential MCO members.

d. The MCO shall not allow providers to solicit enrollment or disenrollment in a MCO, or distribute MCO-specific materials at a marketing activity.

e. The MCO shall not provide printed materials to providers with instructions detailing how to change MCOs to members of other MCOs.

f. The MCO must instruct participating providers regarding the following communication requirements:

i. Participating providers who wish to let their patients know of their affiliations with one or more MCOs must list each MCO with whom they contract.

ii. Participating providers may display and distribute health education materials for all contracted MCOs or they may choose not to display and distribute for any contracted MCOs. Health education materials must adhere to the following guidance:

a) Health education posters cannot be larger than 16 x 24 inches.

b) Children’s books, donated by MCOs, must be in common areas.

c) Materials may include the MCOs name, logo, telephone number and website address.

d) Providers are not required to distribute and/or display all health education materials provided by each MCO with whom they contract. Providers can choose which items to display as long as they distribute items from each contracted MCO and that the distribution and quantity of items displayed are equitable.

iii. Providers may display marketing materials for MCOs provided that appropriate notice is conspicuously and equitably posted, in both size of material and type set, for all MCOs with whom/which the provider has a contract.

iv. Providers may display MCO participation stickers, but if they do they must display stickers for all contracted MCOs or choose not to display stickers for any contracted MCOs.

v. MCO stickers indicating that the provider participates with a particular MCO cannot be larger than 5 x 7 inches and cannot indicate anything more than “the MCO is accepted or welcomed here”.

vi. Providers may inform their patients of the benefits, services, and specialty care services offered through the MCOs in which they participate. However, providers may not recommend one MCO over another, offer patients incentives for selecting one MCO over another, or assist the patient in deciding to select a specific MCO in any way, including but not limited to faxing, using the office phone, or a computer in the office.

vii. On actual termination of a contract with the MCO, a provider who/that has contracts with other MCOs may notify their patients of the change and the impact of the change on the patient, including the date of the contract termination. Providers must continue to see current patients enrolled in the MCO through the termination date, according to all terms and conditions specified in the contract between the provider and the MCO.

viii. MCOs must not produce branded materials instructing members about how to change to a different MCO. They must use MLTC-provided or approved materials and refer members directly to the enrollment broker for needed assistance

H. GRIEVANCES AND APPEALS

1. General Requirements

a. The MCO must have a grievance system for members that meet all Federal and State regulatory requirements, including a grievance process, an appeal process, and access to the State’s fair hearing system. The MCO must distinguish between a grievance, grievance system, and grievance process, as defined below:

i. A grievance is a member’s expression of dissatisfaction with any aspect of care other than the appeal of actions.

ii. The grievance system includes a grievance process, an appeal process, and access to the State’s fair hearing system. Any grievance system requirements apply to all three components of the grievance system, not just to the grievance process.

iii. A grievance process is the procedure for addressing members’ grievances.

b. The MCO must:

i. Give members reasonable assistance in completing forms and other procedural steps, including but not limited to providing interpreter services and toll-free numbers with teletypewriter/telecommunications devices for deaf individuals and interpreter capability.

ii. Acknowledge receipt of each grievance and appeal in writing to the member within ten (10) calendar days of receipt.

iii. Ensure that individuals completing the review of grievances and appeals are not the same individuals involved in previous levels of review or decision-making, nor the subordinate of any such individual. The individual addressing a member’s grievance must be a health care professional with clinical expertise in treating the member’s condition or disease if any of the following apply:

a) The denial of service is based on lack of medical necessity.

b) Because of the member’s medical condition, the grievance requires expedited resolution.

c) The grievance or appeal involves clinical issues.

iv. Take into account all comments, documents, records, and any other information submitted by the member or his/her representative without regard to whether such information was submitted or considered in the initial adverse benefit decision.

v. Provide access to MLTC and/or its designee for any information related to grievances or appeals filed by its members. MLTC will monitor enrollment and termination practices to ensure proper implementation of the MCO's grievance procedures, in compliance with 42 CFR 438.226-228.

2. Complaint and Grievance Processes

a. A member may file a grievance either verbally or in writing. A provider may file a grievance when acting as the member's authorized representative.

b. A member may file a grievance with the MCO or the State at any time.

c. The MCO must address each grievance and provide notice, as expeditiously as the member's health condition requires, within State-established timeframes and not to exceed 90 calendar days from the day on which the MCO receives the grievance.

d. MLTC will establish the method the MCO must use to notify a member of the disposition of a grievance.

3. Service Authorizations and Notices of Action

a. Service Authorization

i. The MCO must provide a definition of service authorization that, at a minimum, includes the member's request for the provision of a service.

ii. The MCO must assure that any decision to deny a service authorization request or to authorize a service in an amount, duration, or scope that is less than requested must be made by a health care professional who has appropriate clinical expertise in treating the member's condition or disease.

b. Notice of Adverse Action

i. The MCO must notify the requesting provider, and give the member written notice, of any decision to deny a service authorization request, or to authorize a service in an amount, duration, or scope that is less than requested. The notice must meet the requirements of 42 CFR 438.404.

ii. The MCO must give the member written notice of any action (not just service authorization actions) within the timeframes required for each type of action. The notice must explain:

a) The action the MCO or its subcontractor has taken or intends to take.

b) The reason(s) for the action.

c) The member's right to receive, on request and free of charge, reasonable access to and copies of all documents, records, and other information relevant to the member's claim for benefits. Such information includes medical-necessity criteria and any processes, strategies, or evidentiary standards used in setting coverage limits.

d) The member's or the provider's right to file an appeal.

e) The member's right to request a State fair hearing.

f) Procedures for exercising a member's rights to appeal or grieve a decision.

g) Circumstances under which expedited resolution is available and how to request it.

h) The member's rights to have benefits continue pending the resolution of an appeal, how to request that benefits be continued, and the circumstances under which the member may be required to pay the cost of these services.

iii. The notice must be in writing and must meet the language and format requirements described in Section IV.F Member Services and Education.

c. Timeframes for Notice of Action

i. The MCO must provide notice to the member a minimum of ten (10) days before the date of action when the action is a termination, suspension, or reduction of previously authorized Medicaid-covered services.

ii. The period of advanced notice required is shortened to five (5) days if probable member fraud has been verified.

iii. The MCO must give notice by the date of the action under the following circumstances:

a) The death of a member.

b) A signed written member statement requesting service termination or giving information requiring termination or reduction of services, if the statement reasonably indicates that the member understands the result of the statement will be a termination or reduction of services.

c) The member's admission to an institution where he or she is ineligible for further services.

d) The member's address is unknown and mail directed to him/her has no forwarding address.

e) The member has been accepted for Medicaid services by another state.

f) The member's physician prescribes the change in the level of medical care.

g) An adverse determination is made with regard to the preadmission screening requirements for nursing facility admissions on or after January 1989.

h) The safety or health of individuals in the facility would be endangered, the resident's health improves sufficiently to allow a more immediate transfer or discharge, an immediate transfer or discharge is required by the resident's urgent medical needs, or a resident has not resided in the nursing facility for 30 calendar days (applies only to adverse actions for nursing facility transfers).

iv. The MCO must provide notice on the date of action when the action is a denial of payment.

v. Standard Service Authorization Denial

vi. The MCO must give notice as expeditiously as the member's health condition requires, and within State-established timeframes, that may not exceed 14 calendar days following receipt of the request for service. The timeframe may be extended up to 14 additional calendar days if the member or the provider requests an extension or the MCO justifies a need for additional information and the reason(s) why the extension is in the member's interest. If the MCO extends the timeframe, the member must be provided written notice of the reason for the decision to extend the timeframe and the right to file an appeal if he or she disagrees with that decision. The MCO must issue and carry out its determination as expeditiously as the member's health condition requires and in any event no later than the date the extension expires.

vii. Expedited Service Authorization Denial

For cases in which a provider indicates or the MCO determines that following the standard timeframe could seriously jeopardize the member's life or health or ability to

attain, maintain, or regain maximum function, the MCO must make an expedited authorization decision and provide notice as expeditiously as the member's health condition requires, and no later than 72 hours after receipt of the request for service. The MCO may extend the time period by up to 14 calendar days if the member requests an extension or if the MCO justifies a need for additional information and the reason(s) why the extension is in the member's interest.

viii. Untimely Service Authorization Decisions

The MCO must provide notice on the date that the timeframes expire when service authorization decisions are not reached within the timeframes for either standard or expedited service authorizations. An untimely service authorization constitutes a denial and, therefore constitutes an adverse action.

4. Appeal Processes

a. A member may file a MCO-level appeal. A provider, acting on behalf of the member and with the member's written consent, may also file an appeal.

b. The member or provider may file an appeal within 90 calendar days from the date on the MCO's Notice of Action.

c. The member or provider may file an appeal either verbally or in writing and must follow a verbal filing with a written signed appeal.

d. The MCO must:

i. Ensure that verbal inquiries seeking to appeal an action are treated as appeals and confirm those inquiries in writing, unless the member or the provider requests expedited resolution.

ii. Ensure that there is only one level of appeal for members.

iii. Provide a reasonable opportunity to present evidence, and allegations of fact or law, in person as well as in writing.

iv. Provide the member and his or her representative (free of charge and sufficiently in advance of the resolution timeframe for appeals) the member's case file, including medical records, other documents and records, and any new or additional evidence considered, relied on, or generated by the MCO (or at the direction of the MCO) in connection with the appeal of the adverse benefit determination.

v. Consider the member, representative, or estate representative of a deceased member as parties to the appeal.

e. The MCO must resolve each appeal, and provide notice, as expeditiously as the member's health condition requires, within 45 calendar days from the day the MCO receives the appeal. The MCO may extend the timeframes by up to 14 calendar days if the member requests the extension or the MCO shows that there is need for additional information and the reason(s) why the delay is in the member's interest. For any extension not requested by the member, the MCO must:

i. Make reasonable efforts to give the member prompt verbal notice of the delay.

ii. Within two (2) calendar days, give the member written notice of the reason for the decision to extend the timeframe and inform the member of the right to file a grievance if s/he or she disagrees with that decision.

iii. Resolve the appeal as expeditiously as the member's health condition requires and no later than the date on which the extension expires.

f. The MCO must provide written notice of disposition, which must include:

i. The results and date of the appeal resolution; and

ii. For decisions not wholly in the member's favor:

a) The right to request a state fair hearing.

b) How to request a state fair hearing.

c) The right to continue to receive benefits pending a hearing.

d) How to request the continuation of benefits.

e) If the MCO action is upheld in a hearing, that the member may be liable for the cost of any continued benefit received while the appeal was pending.

5. Expedited Appeals Process

a. The MCO must establish and maintain an expedited review process for appeals that the MCO determines (at the request of the member or his/her provider) that taking the time for a standard resolution could seriously jeopardize the member's life or health or ability to attain, maintain, or regain maximum function. Expedited appeals must follow all standard appeal regulations for expedited requests, except to the extent that any differences are specifically noted in the regulation for expedited resolution.

b. The member or provider may file an expedited appeal either verbally or in writing. No additional member follow-up is required.

c. The MCO must inform the member of the limited time available for the member to present evidence and allegations of fact or law, in person and/or in writing, in the case of an expedited resolution.

d. The MCO must resolve each expedited appeal and provide notice as expeditiously as the member's health condition requires and in no event longer than 72 hours after the MCO receives the appeal. The MCO may extend the timeframes by up to 14 calendar days if the member requests the extension or the MCO shows that there is need for additional information and the reason(s) why the delay is in the member's interest.

e. For any extension not requested by the member, the MCO must give the member written notice of the reason for the delay.

f. In addition to written notice, the MCO must also make reasonable efforts to provide verbal notice of resolution.

g. The MCO must ensure that no punitive action is taken against a provider who either requests an expedited resolution or supports a member's appeal.

h. If the MCO denies a request for expedited resolution of an appeal, it must:

vi. Transfer the appeal to the standard timeframe of no longer than 30 calendar days from the day the MCO receives the appeal with a possible extension of 14 calendar days.

vii. Make a reasonable effort to give the member prompt verbal notice of the denial and a written notice within two (2) calendar days.

6. Continuation of Benefits

a. The MCO must continue a member's benefits if any one of the following apply:

i. The appeal is filed timely, meaning on or before the later of the following:

a) Ten (10) calendar days after the MCO mailing the Notice of Action; or

b) The intended effective date of the MCO's proposed action.

ii. The appeal involves the termination, suspension, or reduction of a previously authorized course of treatment.

iii. The services were ordered by an authorized provider.

iv. The authorization period has not expired.

v. The member requests an extension of benefits.

b. If the MCO continues or reinstates the member's benefits while the appeal is pending, the benefits must be continued until one of the following occurs:

vi. The member withdraws the appeal.

vii. The member does not request an appeal within ten (10) calendar days from when the MCO mails an adverse MCO decision.

viii. A state fair hearing decision adverse to the member is made.

ix. The authorization expires or authorization service limits are met.

c. The MCO may recover the cost of the continuation of services furnished to the member while the appeal was pending if the final resolution of the appeal upholds the MCO action.

7. Access to State Fair Hearings

a. A member may request a state fair hearing. The provider may also request a state fair hearing if the provider is acting as the member's authorized representative. A member or his/her representative may request a state fair hearing only after receiving notice that the MCO is upholding the adverse benefit determination.

b. If the MCO takes action and the member requests a state fair hearing, the State must grant the member a state fair hearing. The right to a State fair hearing, how to obtain a hearing, and representation rules at a hearing must be explained to the member or the member's representative (if any) by the MCO.

c. The member or the member's representative (if any) may request a state fair hearing within 90 calendar days from the date of the MCO Notice of Action.

d. The parties to the State fair hearing include the MCO, and the member and his/her representative (if any), or (if instead applicable) the representative of a deceased member's estate.

e. The State must ensure that any member dissatisfied with a determination denying a member's request to transfer plans/disenroll is given access to a State fair hearing.

8. Reversed Appeals

a. If the MCO or the state fair hearing process reverses a decision to deny, limit, or delay services that were not furnished while the appeal was pending, the MCO must authorize or provide the disputed services promptly, and as expeditiously as the member's health condition requires, but in no event later than 72 hours from the date the MCO receives notice reversing the determination.

b. The MCO must pay for disputed services if the MCO or State fair hearing decision reverses a decision to deny authorization of services and the member received the disputed services while the appeal was pending.

9. Grievance and Appeal Recordkeeping Requirements

The MCO must maintain records of grievances and appeals. The record of each grievance and appeal must contain, at a minimum, all of the following information:

a. A general description of the reason for the appeal or grievance.

b. The date the grievance or appeal was received.

c. The date of each review or, if applicable, review meeting.

d. Resolution at each level of the appeal or grievance process, as applicable.

e. Date of resolution at each level of the appeal or grievance process, as applicable.

f. Name of the covered person by or for whom the appeal or grievance was filed.

The MCO is required to accurately maintain the record in a manner that is accessible to MLTC and available on request to CMS.

10. Information to Providers and Subcontractors

The MCO must provide the following grievance, appeal, and fair hearing procedures and timeframes to all providers and subcontractors at the time of entering into or renewing a contract:

a. The member's right to a State fair hearing, how to obtain a hearing and representation rules at a hearing.

b. The member's right to file grievances and appeals and the requirements and timeframes for filing them.

c. The availability of assistance in filing grievances or appeals, and participating in State fair hearings.

d. The toll-free number(s) to use to file verbal grievances and appeals.

e. The member's right to request continuation of benefits during an appeal or State fair hearing filing and, if the MCO action is upheld in a hearing, that the member may be liable for the cost of any continued benefits received while the appeal was pending.

f. Any State-determined provider appeal rights to challenge the failure of the organization to cover a service.

11. Reporting of Complaints, Grievances, and Appeals

The MCO is required to submit to MLTC monthly data for the first six (6) months of the contract period, and then submit data quarterly thereafter, as specified by MLTC, about grievances and appeals. MLTC reserves the right to extend the monthly reporting requirement at its sole discretion. This information will be used by MLTC to measure the MCO's performance.

I. PROVIDER NETWORK REQUIREMENTS

1. General Provider Network Requirements

a. The network must be supported by written contracts between the MCO and its providers.

b. The MCO must ensure that network providers offer hours of operation that are no less than the hours of operation offered to commercial members, or comparable Medicaid members if the provider serves only the Medicaid population.

c. There must be sufficient providers for the provision of medically necessary covered services, including emergency medical care, at any time.

d. The MCO must have available non-emergent after-hours physician or primary care services within its network.

e. Network providers must be available within a reasonable distance to members and accessible within an appropriate timeframe to meet the members' medical needs. Standards for distance and

time are fully outlined in Attachment 2 - Access Standards. The MCO must ensure that providers are available within these requirements.

f. The MCO's network providers must comply with all requirements set forth in this RFP.

g. The MCO must take corrective action if it, or its providers, fail to comply with the timely access requirements in this section and Attachment 2 – Access Standards.

h. The MCO must make a good faith effort to contract with urgent care centers in the State to maximize availability of urgent care services to its members. In the event that a contract cannot be obtained, the MCO must maintain documentation detailing the efforts it has made.

i. In order to ensure members have access to a broad range of health care providers, and to limit the potential for disenrollment due to lack of access to providers or services, the MCO must not have a contract arrangement with any provider in which the provider agrees that it will not contract with another MCO, or in which the MCO agrees that it will not contract with another provider. The MCO must not advertise or otherwise hold itself out as having an exclusive relationship with any provider.

j. In all its contracts with health care professionals, the MCO must comply with the requirements specified in 42 CFR 438.214, 438.610, 455.104, 455.105, 455.106, and 1002.3, which include selection and retention of providers, credentialing and re-credentialing requirements, and nondiscrimination.

k. The MCO must require that providers deliver services in a culturally competent manner to all members, including those with limited English proficiency or diverse cultural and ethnic backgrounds, and provide for interpreters in accordance with 42 CFR 438.206(c)(2).

l. The MCO must have adequate capacity within its network to communicate with members in Spanish and other languages, when necessary, as well as with those individuals who are deaf or hearing-impaired.

m. The MCO must consider the ability of providers to ensure physical access, accommodations, and accessible equipment for Medicaid members with physical, developmental, or mental disabilities.

2. Provider Discrimination Prohibition

a. A MCO may not discriminate with respect to participation in the Medicaid program, reimbursement, or indemnification of any provider who/that is acting within the scope of his/her/its license or certification under applicable State law, solely on the basis of that license or certification.

b. MCO provider selection policies and procedures cannot discriminate against particular providers that serve high-risk populations or specialize in conditions that require costly treatment.

c. If a MCO declines to include individual or group providers in its network, it must give the affected providers written notice of the reason for its decision. Federal requirements at 42 CFR 438.12(b) shall not be construed to:

i. Require the MCO to contract with providers beyond the number necessary to meet the needs of its members.

ii. Preclude the MCO from using different reimbursement amounts for different specialties or for different practitioners in the same specialty.

iii. Preclude the MCO from establishing measures that are designed to maintain quality of services and control costs and is consistent with its responsibilities to its members.

3. Mainstreaming of Members

a. To ensure mainstreaming of Nebraska Medicaid members, the MCO must take affirmative action so that members are provided covered services without regard to payer source, race, color, creed, gender, religion, age, national origin (to include those with limited English proficiency),

ancestry, marital status, sexual-orientation, genetic information, or physical or mental illnesses. The MCO must take into account a member's literacy and culture when addressing members and their concerns, and must take reasonable steps to ensure subcontractors do the same.

Examples of prohibited practices include, but are not limited to, the following, in accordance with 42 CFR 438.6(f):

i. Denying or not providing a member any covered service or access to an available facility.

ii. Providing to a member any medically necessary covered service that is different, or is provided in a different manner or at a different time from that provided to other members, other public or private patients or the public at large, except where medically necessary.

iii. Subjecting a member to segregation or separate treatment in any manner related to the receipt of any covered service; or restricting a member in any way in his/her enjoyment of any advantage or privilege enjoyed by others receiving any covered service.

iv. Assigning times or places for the provision of services on the basis of the race, color, creed, religion, age, gender, national origin, ancestry, marital status, sexual orientation, income status, Medicaid membership, or physical or mental illnesses of the participants to be served.

b. If the MCO knowingly executes a subcontract with a provider with the intent of allowing or permitting the subcontractor to implement barriers to care (i.e., the terms of the subcontract act to discourage the full utilization of services by some members) the MCO shall be subject to intermediate sanction or contract termination.

c. If the MCO identifies a problem involving discrimination by one of its providers, it must promptly intervene and require a corrective action plan from the provider. Failure to take prompt corrective measures shall subject the MCO to intermediate sanction or contract termination.

4. Establishing the Network

a. The MCO must offer an appropriate range of preventive, primary care, and specialty services adequate for the number of its members. The MCO must submit documentation to MLTC, in a format approved by MLTC, to demonstrate it meets this requirement at contract start date and any time there is a significant change (as defined by the State) in the MCO's operations that impacts services.

b. The MCO's network must include a sufficient number/type of providers to meet MLTC access standards for adequate capacity for adult and pediatric primary care providers (PCPs); high-volume specialties (cardiology, neurology, hematology/ oncology, obstetrics and gynecology, and orthopedic physicians); behavioral health; and, urgent care centers, FQHCs, RHCs, and pharmacies. The MCO must also contract with additional specialties (allergy, dermatology, endocrinology, gastroenterology, general surgery, neonatology, nephrology, neurosurgery, occupational therapy, ophthalmology, otolaryngology, pathology, physical therapy, pulmonology, psychiatry, radiology, reconstructive surgery, rheumatology, urology, and pediatric specialties); hospitals; and additional provider types to meet its members' needs.

c. The MCO must provide an adequate network of (PCPs) to ensure that members have access to all primary care services in the benefits package. All members must be allowed the opportunity to select or change their PCP. Provider types that can serve as PCPs are doctors of medicine (MDs) or doctors of osteopathic medicine (DOs) from any of the following practice areas: general practice, family practice, internal medicine, pediatrics, or obstetrics/gynecology (OB/GYN). Advanced practice nurses (APNs) and physician assistants may also serve as PCPs when they are practicing within the scope and requirements of their license.

d. The MCO must maintain a network of qualified providers that meets appointment availability and geographic access standards defined in Attachment 2 – Access Standards and all requirements in this section. Attachment 3 – Nebraska Counties Classified by Urban/Rural/Frontier Status provides a map of Nebraska counties classified by urban, rural, and frontier status, as this classification is referenced in the access standards.

e. The MCO's network must include providers that are currently serving Medicaid members and will need to be part of the MCO's network to continue to care for these members. In addition, the MCO must make a good faith effort to include providers currently contracted with behavioral health regions in Nebraska.

f. The MCO must provide female members with direct access to a women's health specialist within the network for covered care necessary to provide women's routine and preventive health care services. This is in addition to the member's designated source of primary care, if that source is not a women's health specialist.

g. For members who meet SHCN criteria, the MCO must have a mechanism in place to allow members to directly access a specialist (for example, through a standing referral or an approved number of visits) as appropriate for the member's condition and identified needs.

h. The MCO must ensure that its provider network includes sufficient numbers of network providers with experience and expertise regarding the following behavioral health conditions:

i. Co-occurring mental health and substance use disorders.

ii. Co-occurring mental health and substance use disorders and developmental disabilities.

iii. Serious and persistent mental illness.

iv. Severe emotional disturbance among children and adolescents, including coordinated care for children served by multiple state agencies (e.g., Child Welfare, Probation, Developmental Disabilities, etc.).

v. Sex-offending behaviors.

vi. Eating disorders.

vii. Co-occurring serious mental illness (SMI) and common chronic physical illnesses.

i. The MCO must contract with providers who/that demonstrate a commitment to the behavioral health principles of care defined in Section IV.L Care Management of this RFP, including principles of rehabilitation and recovery from mental illness and substance use disorder; a focus on recovery-oriented, trauma-informed services and trauma-specific treatment (e.g., trauma-focused cognitive behavioral therapy); consumer and family involvement in program management and oversight; a family-driven and strengths-based approach to working with children and their families; cultural and linguistic competency; and training for staff about these principles. In addition, the MCO must collaborate with the DHHS Division of Behavioral Health and State behavioral health regions in establishing its network.

j. The MCO's provider network must be submitted to the State, via the provider enrollment file, a minimum of 90 calendar days prior to the contract's start date. A list of Medicaid eligible providers will be provided by MLTC.

k. If any service or provider type is not available to a member within the mileage radius specified in Attachment 2 – Access Standards, the MCO must submit to MLTC, for approval a minimum of 45 calendar days prior to implementation, verification that the covered services are not available within the required distance.

l. The MCO is not precluded from making arrangements with a provider outside the State for members to receive a higher level of skill or specialty than the level that is available within the State.

5. Contracting with FQHCs and RHCs

A MCO must offer to contract with all FQHCs and RHCs in the State. If a contract cannot be reached between the MCO and a FQHC or RHC, the MCO must notify MLTC.

6. Adequate Capacity

When establishing and maintaining the network, the MCO must consider:

a. Its anticipated Medicaid enrollment.

b. The expected utilization of services, as well as the characteristics and health care needs of specific Medicaid populations enrolled in the MCO.

c. The numbers and types (in terms of training, experience, and specialization) of providers required to furnish the contracted Medicaid services.

d. The numbers of network providers who/that are not accepting new Medicaid patients.

e. The geographic location of providers and members, considering distance, travel time, the mode of transportation ordinarily used by members, and whether the location provides physical access for members with disabilities.

f. Members with special health care needs, including individuals with disabilities. The MCO should identify providers with experience and competency providing primary and other specialty care services to individuals with adult-onset and developmental disabilities.

7. Patient-Centeredness/Patient-Centered Medical Homes

a. The MCO must promote and facilitate the capacity of its providers to provide patient-centered care by using systematic, patient-centered medical home (PCMH) management processes and health information technology to deliver improved quality of care, health outcomes, and patient compliance and satisfaction. Patients must be active participants in their own health and well-being; they must be cared for by a physician who leads a medical team that coordinates all aspects of the preventive, acute, and chronic needs of members, using the best available evidence and appropriate technology. The MCO's implementation of PCMHs must be inclusive of pediatric practices. Minimum standards for Patient Centered Medical Homes are listed in Attachment 4 – Patient-Centered Medical Home Standards.

b. Requirements of a PCMH include:

i. Providing comprehensive, coordinated health care for members and consistent, ongoing contact with members throughout their interactions with the health care system, including but not limited to, electronic contacts and ongoing care coordination and health maintenance tracking.

ii. Providing primary health care services for members and appropriate referral to other health care professionals or health professionals with structured follow-up.

iii. Planning and coordinating activities to prevent illness and disease.

iv. Encouraging active participation by a member and his/her family, guardian, or authorized representative, when appropriate, in health care decision-making and care plan development.

v. Facilitating the partnership between members, their PCP, and when appropriate, the member's family.

vi. Encouraging the use of specialty care services and supports.

vii. Providing enhanced access to care outside normal business hours of operation.

viii. Facilitating open scheduling and same-day appointments where possible.

c. The MCO must strive to improve the ability of its behavioral health provider network to meet all the health needs of members through strengthened collaboration with PCPs, service providers, inpatient hospital providers, and consumer/peer providers.

d. The MCO must manage its behavioral health provider network to integrate with other programs and services members receive to promote their recovery, empowerment, and the use of their and their families' strengths, when appropriate, to achieve members' clinical goals and health outcomes. The MCO must work with its providers to coordinate with the following formal and informal resources and programs:

i. Rehabilitation programs that promote and provide skill-building, community support, supported employment and full competitive employment for members.

ii. Recovery support services.

iii. Natural community supports for members and their families.

iv. Anonymous recovery programs (e.g., 12-step programs) for members and their families.

e. The MCO must describe in its response to the RFP, and provide a final PCMH Implementation Plan within 90 calendar days of the date of this contract that also describes, its methodology for promoting patient centeredness/PCMHs within its provider network. The plan should include, but not be limited to:

i. Provision of technology assistance to assist providers in the implementation of patient centeredness, including, but not limited to, electronic health record funding.

ii. Any payment methodology, such as incentive payments, to PCPs to support this transformation.

iii. Provision of technical assistance to assist the PCP's transformation to PCMH recognition (including education, training tools, and data relevant to member clinical care management).

iv. Facilitation of specialty provider network access and coordination to support patient centeredness.

v. Efforts to increase and support the provision of appropriate basic behavioral services in the primary care setting, as well as coordination of services with specialty behavioral health providers and other community services.

vi. Facilitation of data interchange among PCPs, specialists, laboratories, pharmacies, and other appropriate providers.

vii. A methodology for evaluating the level of provider participation and the health outcomes achieved. MLTC will work with the MCOs to develop a common evaluation methodology. The findings from these evaluations shall be included in the MCO's annual quality evaluation report.

8. Pharmacy Network

a. The MCO must accept into its network any pharmacy or pharmacist participating in the Medicaid program provided the pharmacy or pharmacist is licensed and in good standing with MLTC and accepts the terms and conditions of the contract offered to them by the MCO.

b. The MCO or its contracted PBM must obtain active agreement from a participating pharmacy provider prior to the start of services under this contract for that pharmacist to be considered a network provider, even if that pharmacy has an existing relationship for non-Medicaid services with that MCO or its PBM. The pharmacy provider must agree to the terms of the MCO's PBM contract addendum for the Nebraska Medicaid program.

c. The MCO may contract with specialty pharmacies to the extent the MCO determines is necessary to ensure the adequate availability of specialty drugs. The MCO may limit distribution of specialty drugs to a network of pharmacies that meet reasonable requirements to distribute specialty drugs. The MCO may not exclude a Nebraska pharmacy from participation in its specialty pharmacy network as long as the pharmacy is willing to accept the terms of the MCO's agreement with its specialty pharmacies. If the MCO maintains a list of designated specialty drugs, the MCO must submit it to MLTC for review and written approval a minimum of 45

calendar days prior to its intended implementation. Changes to the specialty drug list must also be reviewed and approved by MLTC. Specialty drugs are defined in the Glossary section of this RFP.

d. The MCO may utilize mail-order pharmacies in its network, but must not require or incentivize members to use a mail-order pharmacy, including through different member copays. Members who opt to use this service must not be charged fees, including postage and handling fees.

e. The MCO must not designate preferred pharmacies within its network or offer incentives to members to use a designated pharmacy. The MCO must not incorporate branding of any pharmacy onto member ID cards.

9. Clinical Laboratory Improvement Amendments Requirements

In compliance with the Clinical Laboratory Improvement Amendments (CLIA) and the requirements of 42 CFR 493, Subpart A, MLTC requires all clinical laboratories to provide verification of CLIA licensure (including the CLIA identification number) or Certificate of Waiver during the provider registration process. Failure to do so will result in either a termination of an active provider identification number or denial of initial registration. These requirements apply to all clinical laboratories. Pass-through billing or other activities conducted with the intent of avoiding these requirements is prohibited. The MCO may not reimburse providers who do not comply with the above requirements.

10. Appointment Availability and Referral Access Standards

a. Nebraska's appointment availability standards are included in Attachment 2 – Access Standards. MLTC will monitor each MCO's compliance with these standards through regular reporting per Attachment 6 – Reporting Requirements. Additionally, walk-in patients with non-urgent needs should be seen if possible or scheduled for an appointment consistent with appointment availability standards.

b. Wait times for scheduled appointments should not routinely exceed 45 minutes, including time spent in the waiting room and the examining room, unless the provider is unavailable or delayed because of an emergency. If a provider is delayed, the member should be notified immediately. If a wait of more than 90 minutes is anticipated, the member should be offered a new appointment.

c. Follow-up to emergency room visits must be available in accordance with the attending provider's discharge instructions.

d. Direct contact with a qualified MCO clinical staff person must be available to members through a toll-free telephone number at any time. The MCO may not require a PCP referral for appointments with behavioral health providers when the behavioral health providers are in the MCO's network.

e. The MCO is responsible for monitoring and assuring provider compliance with appointment availability standards and provision of appropriate after-hour coverage.

f. The MCO must have processes to monitor and reduce the appointment "no-show" rate by provider and service type. As best practices are identified, MLTC may require that they be implemented by the MCOs.

g. The MCO must monitor the practice of placing members who seek any covered services on waiting lists. If the MCO determines that a network provider has established a waiting list and the service is available through another network provider, the MCO must stop referrals to the network provider until such time as the network provider has openings, and take action to refer the member to another appropriate provider. In circumstances in which the member requires residential behavioral health services and is placed on a waiting list, the MCO must require its providers to offer interim services until residential services are available.

11. Geographic Access Standards

a. The MCO must comply with maximum travel times and/or distance requirements per Attachment 2 – Access Standards. Requests for exceptions as a result of prevailing community standards or a lack of available providers must be submitted to MLTC in writing for approval. Such requests should include data on the local provider population available to the non-Medicaid population.

b. If there are gaps in the MCO's provider network, the MCO must develop a provider network availability plan to identify the gaps and describe the remedial action(s) that will be taken to address those gaps. When any gap is identified, the MCO must document its efforts to engage any available providers (three good-faith attempts, for example) and must incorporate the circumstances of, and information to be gained by, this gap into its written plan to ensure adequate provider availability over time.

c. The MCO must establish a program of assertive outreach to rural areas where covered services may be less available than in more urban areas, and must include any gaps in its availability plan. The MCO must monitor utilization across the State to ensure access and availability, consistent with the requirements of the contract and the needs of its members.

12. Provider Outreach and Application Processing

a. The MCO must develop standardized provider application/credentialing forms and provider contracts for use with all providers, and utilize standardized processes.

b. The MCO is required to submit its provider contract template(s) to MLTC with its proposal.

c. The MCO must notify MLTC, a minimum of 15 calendar days in advance, if it decides no longer to accept provider applications for primary care or a certain specialty because member needs and MLTC access standards are being met otherwise. The MCO must also notify MLTC a minimum of 15 calendar days in advance of resuming acceptance of those provider applications.

13. Provider Enrollment in Medicaid

a. The MCO must require that all of its contracted providers enroll with MLTC as an approved service provider. For specific requirements on provider enrollment, refer to the MLTC website at: http://MLTC.ne.gov/medicaid/Pages/med_providerenrollment.aspx.

b. The MCO must begin its credentialing process concurrently with a provider's Medicaid provider enrollment rather than delaying its credentialing process until MLTC has approved a provider's enrollment in Medicaid.

14. Provider Credentialing and Re-Credentialing

a. The MCO is required to establish and implement written policies for the selection and retention of providers, consistent with provider credentialing and re-credentialing requirements of applicable law and to submit these policies to MLTC for approval.

b. The MCO must completely process credentialing applications from all provider types within 30 calendar days of receipt of a completed credentialing application. A completed application includes all necessary documentation and attachments. "Completely process" means that the MCO must:

i. Review, approve, and load approved providers to its provider files in its system and submit the information in the weekly electronic provider file to MLTC or MLTC's designee, or

ii. Deny the application and ensure that the provider is not used by the MCO. A provider whose application is denied must receive written notification of the decision, with a description of his/her/its appeal rights.

c. A provider whose credentialing/re-credentialing application is denied must receive written notification of the decision, with a description of his/her/its appeal rights.

d. If the MCO delegates credentialing to a subcontractor, the MCO must obtain MLTC approval of (a) the subcontractor and (b) the credentialing process, including components delegated to the MCO's subcontractor. The MCO must require that all licensed medical professionals are credentialed in accordance with MLTC's credentialing requirements. MLTC retains final approval of the credentialing subcontractor and process.

e. The MCO must accept provider credentialing information submitted via the Council for Affordable Quality Healthcare system. The MCO must also accept any standardized provider credentialing

form and/or process for applicable providers within 60 calendar days of its development and/or approval by the administrative simplification committee and MLTC.

f. The MCO must utilize the current NCQA Standards and Guidelines for the Accreditation of MCOs for the credentialing and re-credentialing of licensed independent providers and provider groups with whom/which it contracts or employs and who fall within its scope of authority and action.

g. The MCO must re-credential each provider a minimum of every three (3) years, at a minimum, taking into consideration various forms of data, including but not limited to grievances, results of quality reviews, results of member satisfaction surveys, and utilization management information.

h. The MCO must communicate with MLTC, DHHS Division of Behavioral Health, and DHHS Division of Public Health regarding incidents or audits that potentially affect provider licensure for any applicable provider types.

i. As part of its credentialing process, the MCO must require each provider entity to disclose the following information in accordance with 42 CFR 455.104:

i. The name and address of each person with an ownership or controlling interest in the disclosing entity or in any subcontractor in which the disclosing entity has direct or indirect ownership of 5% or more.

ii. Whether any of the persons named is related to another as spouse, parent, child, or sibling.

iii. The name of any other disclosing entity in which a person with an ownership or controlling interest in the disclosing entity also has an ownership or controlling interest. This requirement applies to the extent that the disclosing entity can obtain this information by requesting it in writing from the person. The disclosing entity must:

a) Keep copies of all requests and responses.

b) Make those requests and responses available to MLTC upon request.

c) Advise MLTC when there is no response to a request.

15. Network Administration

a. The MCO must maintain and continually update its network provider database that contains, at a minimum, the following information for each network provider:

i. Network provider name

ii. Contracted services

iii. Site address(es) (street address, city, zip code, region of the State)

iv. Site telephone numbers

v. Site hours of operation

vi. Emergency/after-hours provisions

vii. Professional qualifications and licensing;

viii. Areas of specialty, including specialties related to behavioral health conditions

ix. Cultural and linguistic capabilities

x. Malpractice insurance coverage and malpractice history

xi. Credentialing status

b. The MCO must have the capability to produce a list of network providers, sorted by type of service and by providers' capability to communicate with members in their primary languages. This list must be available to the MCO's clinical staff at all times, and available to network providers and other interested parties upon their request and at no charge. As described in the Member Services section of this RFP, this list must be available on the MCO's website and updated in real time.

16. Network Development Plan

a. The MCO must submit to MLTC a network development plan with its proposal. This plan should demonstrate the MCO's capability of developing a network within the State. While this RFP does not require or promote the solicitation of letters of intent from potential network providers, the MCO shall demonstrate its track record in building networks in the State or other markets, particularly for Medicaid or other public-payer products. The MCO may also describe its efforts to become more familiar and develop relationships with Nebraska providers.

b. From the date of contract award and then every two weeks until the contract effective date, the MCO shall provide updates about its network development activities. This plan must detail the MCO's network status, including GeoAccess reports, and describe any provider network gaps and the MCO's remediation plans.

c. Future network development plans must be submitted by November 1st of each contract year. This document is an assurance of the adequacy and sufficiency of the MCO's provider network. The MCO must also submit, as needed, an updated plan when there has been a significant change in operations that would affect adequate capacity and services. These changes would include, but would not be limited to, changes in services, covered benefits, payments, or eligibility of a new population.

d. The MCO must include in its stated future plans a narrative and statistical analysis consistent with the MLTC assessment methodology. At a minimum, the analysis must be derived from:

i. Quantitative data, including performance of appointment standards/appointment availability, eligibility/enrollment data, utilization data, network inventory, demographic (age/gender/race/ethnicity) data, and the number of single case contracts by service type.

ii. Qualitative data (including outcomes data), when available, including grievance information; concerns reported by eligible or enrolled members; grievances, appeals, and requests for hearings data; member satisfaction survey results; and, prevalent diagnoses.

iii. Status of provider network issues within the prior year that were significant or required corrective action by the MCO, including findings from the MCO's annual operational review.

iv. A summary of network development efforts conducted during the prior year.

v. Plans to correct any current material network gaps and barriers to network development.

vi. Priority areas for network development activities for the following year, goals, action steps, timelines, performance targets, and measurement methodologies for addressing priorities.

vii. The participation of members, family members/caretakers, providers, including State-operated providers, and other community stakeholders in the annual network planning process.

e. The MCO's network development plan must be submitted to MLTC for approval. The MCO must submit periodic progress reports as requested by MLTC.

17. Provider Network Policies and Procedures

a. The MCO must have policies about how it will:

i. Communicate with the network regarding contractual and/or program changes and requirements.

ii. Monitor network compliance with State rules, MLTC policies, and MCO policies, including compliance with all policies and procedures related to the grievance/appeal processes and ensuring a member's care is not compromised during the grievance/appeal processes.

iii. Evaluate the quality of services delivered by the network.

iv. Provide or arrange for medically necessary covered services should the network become temporarily insufficient within the contracted service area.

v. Monitor the adequacy, accessibility, and availability of its provider network to meet the needs of its members, including the provision of care to members with limited proficiency in English.

vi. Process provisional credentials for behavioral health service providers.

vii. Recruit, select, credential, re-credential, and contract with providers in a manner that incorporates quality management, utilization, office audits, and provider profiling.

viii. Provide training for its providers and maintain records of such training.

ix. Educate its provider network regarding appointment time requirements.

x. Track and trend provider inquiries/complaints/requests for information and take systemic action as necessary and appropriate.

b. All policies and procedures must be submitted to MLTC for review and approval a minimum of 45 calendar days prior to intended implementation.

c. The MCO must notify providers and members of impending policy changes a minimum of 45 calendar days prior to implementation.

J. PROVIDER SERVICES

1. Provider Services

The MCO must have a provider services function to provide support and assistance to all its providers. This function must, at a minimum:

a. Be available Monday through Friday from 7:00 am to 8:00 pm (central time) to address non-emergency provider issues and on an anytime basis for non-routine prior authorization requests and emergent provider and pharmacy issues.

b. Have clinical pharmacists available Monday through Friday, 8:00 am to 8:00 pm (central time), for clinical questions and prior authorization processing.

c. Ensure each MCO provider is provided all rights outlined in the MCO's provider handbook.

d. Provide ongoing provider training, respond to provider inquiries, and provide general assistance to providers regarding program operations and requirements.

e. Make regularly scheduled visits to provider sites, as well as ad-hoc visits as appropriate.

2. Provider Toll-Free Telephone Line

a. The MCO must operate a toll-free telephone line to respond to provider questions, comments, inquiries, and complaints. A separate line or menu option must be dedicated to pharmacy and prescription issues, including member copayments, if applicable.

b. The MCO must ensure that provider calls are acknowledged and resolved within three (3) business days of receipt. If the issue cannot be resolved within three (3) business days, the MCO must notify the provider of the expected resolution timeframe, which shall not exceed 30 business days (including referrals from MLTC).

c. The MCO's call center system must have the capability to track provider call management metrics.

d. After normal business hours, the provider services toll-free telephone line must include recorded information regarding normal business hours and instructions about how to verify enrollment for any MCO member with an emergent or urgent medical condition. However, a provider does not have to obtain verification before providing ED services and care.

e. The MCO must measure and monitor the accuracy of responses provided by call center staff and report this monthly to MLTC. Corrective action must be taken by the MCO as necessary to ensure the accuracy of responses by staff.

f. Call center staff must have access to electronic documentation from previous calls made by or on behalf of the member to the MCO's information line(s).

3. Provider Handbook

a. The MCO must submit a provider handbook to MLTC for review and approval a minimum of 90 calendar days prior to the contract start date. The approved handbook must be available on the MCO website within ten (10) calendar days of its approval by MLTC. The MCO may choose not to distribute the handbook by regular mail as long as it provides written notification to providers that it is available online and includes details about how the provider may request a printed copy at no charge to the provider. The provider handbook must include, but is not limited to, the following:

i. Description of the MCO and its corporate entity.

ii. Services and benefits provided by the MCO, including core services and value-added services.

iii. Emergency service responsibilities.

iv. Confidentiality provisions.

v. Process for verifying a member's enrollment in the MCO.

vi. Medical necessity standards as defined by MLTC and the MCO.

vii. Practice guidelines and protocols.

viii. Network provider credentialing process and criteria.

ix. Medical record standards.

x. MLTC's standards for geographic access and appointment availability.

xi. Mainstreaming requirements.

xii. Utilization management requirements, including procedures for service authorizations, concurrent review, extensions of lengths of stay, and retrospective reviews for all covered services.

xiii. Clinical criteria for admission, continued stay, and discharge for each covered service.

xiv. Reporting requirements for serious reportable events and reportable adverse incidents.

xv. Use of MLTC preferred drug list.

xvi. Pharmacy payer sheet.

xvii. Compound prescription requirements.
xviii. Prospective DUR response requirements.

xix. Paper and electronic claims submission protocols and standards, including instructions and all information necessary for a clean and complete claim, along with samples of clean and complete claims.

xx. Policies and procedures detailing the provider complaint system including, but not limited to, specific instructions about how to contact the MCO to file a provider complaint, the timelines allowed for resolution, and the procedure for escalation of unresolved disputes.

xxi. Policies and procedures for the MCO's Grievance System, including information about how the provider may file a grievance or appeal on a member's behalf with written permission.

xxii. Process for appealing payment and service denial decisions.

xxiii. Procedures for using web-based provider services.

xxiv. Call center number(s) and hours.

xxv. Names and contact information of provider services staff.

xxvi. MCO prompt pay requirements.

xxvii. Information regarding the MCO's chronic care and disease management programs, including instruction about making referrals.

xxviii. Quality performance standards and requirements.

xxix. Expectations for PCPs.

xxx. Provider rights and responsibilities.

b. The MCO must:

i. Modify or supplement the provider handbook by distributing periodic notices to network providers.

ii. Review the handbook a minimum of bi-annually and amend it, if necessary, in consultation with MLTC and (as appropriate) its members, their families, providers, and other stakeholders.

iii. Redistribute the amended portions of the handbook to network providers through a clear change process.

4. Provider Website

a. The MCO must have a provider website. It may be developed within the MCO's existing website (such as a portal) to meet these requirements. The MCO must post up-to-date and accurate information and documents to its provider website. MLTC may request that any information be added, removed, or altered that it determines is inaccurate, misleading, or is any way contrary to the objectives of this contract.

b. The MCO provider website must include general and up-to-date information about the MCO as it relates to the Nebraska Medicaid program. All information must be searchable, and include, but is not limited to:

i. MCO provider handbook and all MCO policies and procedures.

ii. MCO-relevant MLTC bulletins.

iii. Limitations on provider marketing.

iv. Information on upcoming provider trainings.

v. Provider training manuals.

vi. Information about the provider and member grievance system.

vii. Information about obtaining prior authorizations and referrals.

viii. MCO formulary (list of covered medications) and the Nebraska PDL.

ix. MCO pharmacy prior authorization requirements.

x. Updated MCO MAC pricing.

xi. Instructions regarding how and whom to contact for questions about filling prescriptions.

xii. Information about how to contact the MCO's Provider Services staff.

xiii. A link to the MLTC website and other related websites.

xiv. A link to the MCO's corporate website.

xv. MLTC-approved formulary changes and prior authorization requirements, clinical criteria, and revisions a minimum of 30 calendar days prior to the effective date of the requirement or revision.

c. The MCO must, in collaboration with MLTC, determine which program content shall be published on the website. The MCO's website must provide web-enabled transactional capabilities. These capabilities must include, but are not limited to:

i. Provider/member inquiries.

ii. Submission of initial authorization and other requests.

iii. Web-based referral search system that will allow MCO and MLTC staff, providers, members, and any other interested persons to locate network providers through an online searchable database. The searchable database must include network providers and facilities with information regarding areas of clinical specialization, race/ethnicity, languages spoken, disciplines, and demographic information.

d. The MCO provider website is considered marketing material, and must be submitted to MLTC for review and approval a minimum of 90 calendar days prior to the contract start date.

e. The MCO must remain compliant with applicable privacy and security requirements (including but not limited to HIPAA) when providing any member eligibility or identification information on the website.

f. The MCO website should, at a minimum, be in compliance with Section 508 of the Americans with Disabilities Act, and meet all standards the Act sets for people with visual impairments and disabilities that make usability an issue.

g. The MCO must ensure that the website is maintained with accurate and current information and is compliant, at all times, with the requirements of this RFP.

5. Provider Outreach, Education, and Training

a. The MCO must provide training to all providers and their staff regarding the requirements of the contract, including limitations on provider marketing, identification of special needs of members (including the LTSS population), and the appropriate utilization of emergency room services, including for behavioral health emergencies. The MCO must make initial training available within 30 calendar days of contracting with a provider.

b. The MCO must also conduct ongoing training throughout the duration of this contract, as deemed necessary by the MCO or MLTC, in order to ensure compliance with program standards and the contract. Training sessions must include, but not be limited to:

vi. Face-to-face and tele- or web-conference training sessions

vii. Recorded provider training sessions on or available from the MCO's website

viii. Training and education for nursing facilities regarding billing procedures for when a member transitions from a skilled to a custodial level of care.

ix. Documentation of training sessions and attendance, available to MLTC on request.

c. The MCO must submit a copy of the provider training handbook and training schedule to MLTC for review and approval a minimum of 90 calendar days prior to the contract start date. Any changes to the handbook must be submitted to MLTC a minimum of 45 calendar days prior to scheduled changes and dissemination of such changes.

d. The MCO must develop and offer specialized initial and ongoing training in billing procedures, service authorization requirements, and other procedures it deems appropriate for network providers who/that have traditionally billed and obtained service authorization primarily from Medicaid or Medicare only or who/that are new to the integrated managed care contracts, including behavioral health providers and pharmacists. MLTC shall be advised of these sessions and appropriate staff shall be allowed to attend at their discretion.

e. The MCO must develop, establish, and maintain a provider advisory committee. The committee must have representation from the major provider organizations in the State, as well as individual providers, including behavioral health and pharmacy providers, as well as providers who primarily serve individuals with disabilities. Whenever feasible, MCO staff shall work collaboratively with the provider advisory committee, as well as established provider organizations, to create network development and management strategies and procedures. In addition, the MCO must establish a behavioral health advisory committee to provide input to the provider advisory committee.

f. The MCO must meet with providers and provider associations on a regular basis and at various locations throughout the State. In addition, the MCO must hold a provider forum no less frequently than quarterly, at various locations across the State. The forums must be facilitated by the MCO's Administrator/CEO or designee. The purpose of the forums is to improve communication between the MCO and its providers. The forums must be open to all providers within the MCO's network. The forums must not be the only venue by which the MCO communicates and participates in a discussion and review of the issues affecting its provider network. Provider forum meeting agendas and minutes must be made available to MLTC on request. The MCO must report information discussed during these meetings and forums to the MCO's executive management and MLTC.

6. Collaboration with Network Providers

a. The MCO must promote ongoing and seamless communication between providers and the MCO. To accomplish this task, the MCO must:

i. In addition to establishing and working collaboratively with the provider advisory committee, include provider representatives in the MCO's committee structure, to give providers a direct voice in developing and monitoring clinical policies and operational issues.

ii. Work with providers to improve administrative efficiencies through the use of the MCO's website, information technology, and other strategies identified through provider meetings and on-site visits.

iii. Provide encryption software on request from a provider to allow the exchange of member data via email.

iv. Provide a monthly newsletter that includes articles covering topics of interest for all provider types. This newsletter must be posted to the MCO's website.

b. The MCO must identify a provider network liaison, who will work collaboratively with the provider advisory committee to establish the process for responding to provider concerns; develop provider trainings in response to identified needs or changes in protocols, processes, and forms; and, enhance MCO-provider communication strategies.

c. Throughout the term of the contract, the MCO must alert providers to modifications in the provider handbook and to changes in provider requirements that are not otherwise communicated by MLTC. To accomplish this task the MCO must:

i. Request and obtain from providers an email address, so they can be alerted to access the MCO's website to download updates to the provider handbook and provider requirements.

ii. Email providers and publish on the MCO's website any policy clarification not otherwise communicated by MLTC.

iii. Post notification of policy and procedural changes on the MCO's website. Advance notification to members and providers of changes that will affect access to or provision of services, or payment of services, is required. The MCO must make a good-faith effort to provide a minimum of 45 calendar days' advance notice of any necessary changes.

7. Provider-Patient Communication/Anti-Gag Clause

a. Subject to the limitations described in 42 CFR 438.102(a)(2), the MCO must not prohibit or otherwise restrict a health care provider, acting within the lawful scope of his/her/its practice, from advising or advocating on behalf of a member, who is a patient of the provider, regardless of whether benefits for such care or treatment are provided under the contract, for the following:

i. The member's health status, medical care, or treatment options, including any alternative treatment that may be self-administered.

ii. Any information the member needs in order to decide among relevant treatment options.

iii. The risks, benefits, and consequences of treatment or non-treatment.

iv. The member's right to participate in decisions regarding his/her health care, including the right to refuse treatment or to express preferences about future treatment decisions.

b. Any MCO that violates the anti-gag provisions set forth in 42 U.S.C. §438.102(a)(1) will be subject to intermediate sanctions.

c. The MCO must comply with the provisions of 42 CFR 438.102(a)(1)(ii) concerning the integrity of professional advice to members, including no interfering with providers' advice to members and information disclosure requirements related to physician incentive plans.

8. Provider Complaint System

a. A provider complaint is any verbal or written expression, originating from a provider and delivered to any employee of the MCO, voicing dissatisfaction with a policy, procedure, payment, or any other communication or action by the MCO.

b. The MCO must establish a provider complaint system to track the receipt and resolution of provider complaints from in-network and out-of-network providers.

c. This system must be capable of identifying and tracking complaints received by telephone, in writing, or in person, on any issue that expresses dissatisfaction with a policy, procedure, or any other communication or action by the MCO.

d. As part of the provider complaint system, the MCO must:

i. Have dedicated provider services staff for providers to contact via telephone, electronic mail, regular mail, and in person, to ask questions, file a provider complaint, and resolve problems.

ii. Identify a key staff person specifically designated to receive and process provider complaints.

iii. Thoroughly investigate each provider complaint using applicable statutory, regulatory, contractual, and provider subcontract provisions, collecting all pertinent facts from all parties and applying the MCO's and MTLC's written policies and procedures.

iv. Ensure that MCO executives with the authority to require corrective action are involved in the provider complaint escalation process. The names, telephone numbers, and email addresses of these individuals must be provided to MLTC within 15 calendar days of contract signing, and within two business days of any changes.

e. The MCO must prepare and implement written policies and procedures that describe its provider complaint system. These policies and procedures must be submitted to MLTC for review and approval a minimum of 45 calendar days prior to the contract's start date. The policies and procedures must include, at a minimum:

i. Allowing providers a minimum of 30 calendar days to file a written complaint, a description of the filing process, and the resolution timeframes.

ii. A description of how providers may file a complaint with the MCO for issues that are MCO-related, and under what circumstances they may file a complaint directly with MLTC for those issues that are not a MCO function.

iii. A description of how provider services staff are trained to distinguish between a provider complaint and a member grievance or appeal for which the provider is acting on the member's behalf.

iv. The process by which providers are allowed to consolidate complaints regarding multiple claims that involve the same or similar payment or coverage issues.

v. The process for thoroughly investigating each complaint and for collecting pertinent facts from all parties during the investigation.

vi. A description of the methods used to ensure that MCO executive staff with the authority to require corrective action are involved in the complaint process, as necessary.

vii. A process for giving providers (or their representatives) the opportunity to present their cases in person.

viii. Identification of specific individuals who have authority to administer the provider complaint process.

ix. A description of the system to capture, track, and report the status and resolution of all provider complaints, including all associated documentation. This system must capture and track all provider complaints, whether received by telephone, in person, or in writing.

f. The MCO must include a description of the provider complaint system in its provider handbook and on its provider website. It must include specific instructions regarding how to contact the MCO's provider services staff and contact information for the MCO staff person who receives and processes provider complaints.

g. The MCO must distribute its policies and procedures to in-network providers at the time of contracting and to out-of-network providers with the remittance advice. The MCO may distribute a summary of these policies and procedures to providers if the summary includes information about how the provider may access the full policies and procedures on the MCO's website. This summary must also detail how the in-network provider can request a hard copy from the MCO at no charge to the provider.

K. SUBCONTRACTING REQUIREMENTS

1. As required by 42 CFR 438.6(1), 438.230(a) and 438.230(b)(1), (2), and (3), the MCO is responsible for oversight of all subcontractors' performance and must be held accountable for any function and responsibility that it delegates to any subcontractor, including, but not limited to:

a. The MCO must evaluate the prospective subcontractor's ability to perform the activities to be delegated.

b. The MCO must ensure that the prospective subcontractor is financially stable, according to the MCO's standards.

c. The MCO must have a written contract between the MCO and the subcontractor that specifies the activities and reporting responsibilities delegated to the subcontractor; it must provide for revoking delegation or imposing other sanctions if the subcontractor's performance is inadequate.

d. The MCO must monitor the subcontractor's performance on an ongoing basis and subject it to formal review according to a periodic schedule consistent with industry standards.

e. If necessary, the MCO must identify deficiencies or areas for improvement, and take corrective action.

2. The MCO must submit all subcontracts for the provision of any services under this RFP to MLTC for prior review and approval a minimum of 90 calendar days prior to their planned implementation. MLTC must have the right to review and approve or disapprove all subcontracts entered into for the provision of any services under this RFP, including but not limited to, the MCO's PBM contract.

3. The MCO must not execute a subcontract with any entity that has been excluded from participation in the Medicare and/or Medicaid program pursuant to Section 1128 of the Social Security Act (42 U.S.C. §1320a-7), or who/which is otherwise barred from participation in the Medicaid or Medicare programs. The MCO must not enter into any relationship with anyone or any entity debarred, suspended, or otherwise excluded from participating in procurement activities under the Federal Acquisition Regulation or from non-procurement activities under regulations issued under Executive Orders.

L. CARE MANAGEMENT

1. General Requirements

a. The MCO must develop a care management program that focuses on collaboration between the MCO and (as appropriate) the member, his/her family, providers, and others providing services to the member, including HCBS service coordinators.

b. The MCO must work with its providers to ensure a patient-centered approach that addresses a member's medical and behavioral health care needs in tandem. Principles that guide this care integration include:

i. The system of care must be accessible and comprehensive, and fully integrate an array of prevention and treatment services for all age groups. It must be designed to be evidence-informed, responsive to changing needs, and built on a foundation of continuous quality improvement.

ii. Mental illness and substance use disorder are health care issues that must be integrated into a comprehensive physical and behavioral healthcare system that includes primary care settings.

iii. Many people suffer from both mental illness and substance use disorder. As care is provided, both illnesses must be understood, identified, and treated as primary conditions.

iv. Relevant clinical information must be accessible to both the primary care and behavioral health providers consistent with Federal and State laws and other applicable standards of medical record confidentiality and the protection of patient privacy.

c. The MCO must assist members in the coordination of services using person-centered strategies, manage co-morbidities, and not focus solely on the member's primary condition.

d. The MCO must incorporate interventions that focus on the whole person and empower the member (in concert with the medical home, any specialists, and other care providers), to effectively manage conditions and prevent complications through adherence to medication regimens; regular monitoring of vital signs; and, an emphasis on a healthful diet, exercise, and other lifestyle choices. CM must engage members in self-management strategies to monitor their disease processes and improve their health, as appropriate.

e. The MCO must identify members who require medium/intensive CM based on their chronic conditions. The MCO must identify and track members whose clinical conditions or social circumstances place them at a higher risk of eventually needing intensive CM services. The proactive engagement of and early intervention with at-risk members may prevent or minimize their eventual need for more intensive CM services.

f. The MCO's CM program must address the social determinants of health and how they may affect members' health and wellness. This requirement includes:

- **i.** Ensuring that all covered services, including mental health or substance use disorder treatment services, appropriate to a member's level of need, are available when and where the member needs them.
- **ii.** Ensuring that all care management staff are familiar with available community resources and will refer members to these resources, such as, but not limited to, housing assistance programs and shelters, food banks/pantries, educational opportunities, and organizations which can assist with and address physical and/or sexual abuse.
- **iii.** Developing, subscribing to, or acquiring a tool accessible to its care management staff that maintains updated information regarding these resources in Nebraska communities within 90 calendar days of the contract start date. The MCO shall make access to this information available to MLTC staff on request.

g. A growing body of evidence points to a correlation between social factors and increased occurrences of specific health conditions and a general decline in health outcomes. All MCO staff must be trained about how social determinates affect members' health and wellness. This training must include, but not be limited to, issues related to housing, education, food, physical and sexual abuse, and violence. Staff must also be trained on finding community resources and making referrals to these agencies and other programs that might be helpful to members.

h. The MCO is required to provide CM separate from, but integrated with, utilization management (UM) and quality improvement (QI) activities. The major components of CM include advocacy, communication, problem-solving, collaboration, and empowerment.

i. As part of the CM system, the MCO must employ care coordinators and care managers to arrange, assure delivery of, monitor, and evaluate basic and comprehensive care, treatment, and services to a member. See staffing requirements in Section IV.D Staffing Requirements.

j. A minimum of 60 calendar days prior to the contract start date, the MCO must provide to MLTC for review and approval a CM program description, policies and procedures, a description of services available at each CM level, member outreach procedures, and flow diagrams.

k. The MCOs must submit policies and procedures specific to care management for individuals who are dually eligible, have adult-onset disabilities, developmental disabilities and/or otherwise receive institutional or community-based long-term supports and services that address the unique needs of these populations.

l. In addition, the MCO must annually review, and update as necessary, with the input, review, and approval of the Clinical Advisory Committee (CAC), the CM policies and procedures. Once they are approved by the CAC, any proposed changes must be submitted to MLTC for review and approval a minimum of 60 calendar days prior to intended implementation. All appropriate staff must be trained about the CM policies and procedures; they must also be shared with providers to promote consistency of care.

2. Health-Risk Screening/Assessment

a. The MCO must provide a health-risk screening to all members on enrollment to identify members in need of CM services.

b. As part of a health risk assessment, the MCO must use a variety of mechanisms to identify members potentially in need of CM services, including those who currently have or are likely to experience catastrophic or other high-cost or high-risk conditions. These mechanisms must include, at a minimum, evaluation of claims data, member self-referral, and physician referral. The MCO must submit the algorithms and methodologies it proposes to use to identify potential CM members to MLTC for review and approval a minimum of 60 calendar days prior to their intended implementation.

c. Health-risk assessments must be developed to collect information such as, but not limited to:

i. Severity of the member's conditions/disease state.

ii. Co-morbidities, or multiple complex health care conditions.

iii. Recent treatment history and current medications.

iv. Long-term services and supports the member currently receives.

v. Demographic and social information (including ethnicity, education, living situation/housing, legal status, employment status, food security).

vi. Activities of daily living (including bathing, dressing, toileting, mobility, and eating).

vii. Instrumental activities of daily living (including medication management, money management, meal preparation, shopping, telephone use, and transportation).

viii. Communication and cognition.

ix. Indirect supports.

x. General health and life goals.

xi. Safety (need for welfare/protection to eliminate harm to self or others).

xii. The member's current treatment providers and care plan, if applicable.

xiii. Behavioral health concerns, including depression, mental illness, suicide risk, and exposure to trauma.

xiv. Substance use, including alcohol.

xv. Interest in receiving CM services.

d. The MCO must assign members to risk stratification levels (low, medium, high), which determines the intensity of intervention levels and follow-up care required for each member. These member assignment levels and their criteria must also be provided to MLTC for review and approval a minimum of 60 calendar days prior to their intended implementation.

e. The MCO must ensure that members who have high costs or potentially high costs, or otherwise qualify, be assigned to the medium or high risk level and receive more intensive CM services.

f. The MCO must assign members with less intensive needs as low risk and provide access to basic CM services.

g. The MCO must conduct ongoing predictive modeling to identify members who may need CM evaluation.

3. Behavioral Health Principles of Care

a. The following behavioral health principles of care must guide the MCO's integrated service delivery system:

i. Services will be part of an overall coordinated system of care that ensures access to mental health (MH) and substance use disorder (SUD) treatment services to improve the overall health of every person served. To the fullest extent possible, services should be provided in the community where the member lives.

ii. Services will provide recovery-based care.

iii. Services will be trauma informed.

iv. Services will be person-centered, consumer and family driven, and age and developmentally appropriate.

v. Medicaid SUD services will be delivered in accordance with the principles of recovery-oriented systems of care.

vi. Members will be able to choose their own provider to the fullest extent possible at all levels of treatment.

vii. Services will provide a resiliency-based system of care for children and their families.

b. The MCO must ensure that "active treatment" is being provided to each member. Active treatment includes implementation of a professionally-developed and supervised individual plan of care, in which the member participates and shows progress.

4. Basic CM Services

a. The MCO must develop and adopt a CM program consistent with existing State policies and procedures to ensure all members who are eligible for CM have access to basic CM services.

b. The MCO's basic CM program must promote empowerment of the person and shared decision making. Examples of basic level CM services the MCO may provide include:

i. Assistance with appointment scheduling and identifying participating providers, when necessary.

ii. Assistance with CM and accessing primary care, behavioral health, preventive and specialty care, as needed.

iii. Coordination of discharge planning with a focus on the seriously mentally ill population.

iv. Coordination that links a member to providers, medical services, or residential, social, community, and other support services, when needed.

v. Continuity of care that includes collaboration and communication with other providers involved in a member's transition to another level of care, to optimize outcomes and resources while eliminating care fragmentation. Continuity of care activities must ensure that the appropriate personnel, including the PCP, are kept informed of the member's treatment needs, changes, progress, or problems. Continuity of care activities must provide processes by which MCO members and network/non-network provider interactions are effective and must identify and address those that are not.

vi. Assistance with identifying and referral to the social supports and community resources that may improve the health and living circumstances of a member, including but not limited to, nutrition, education, housing, legal aid, employment, and issues related to physical or sexual abuse.

vii. Following up with members and providers, which may include regular mailings, newsletters, or face-to-face meetings, as appropriate.

c. The MCO must develop and adopt policies and procedures annually (that have been approved in advance by MLTC) to address the following:

i. A strategy to ensure that all members and/or authorized family members or guardians are involved in care planning, as appropriate.

ii. A method to actively engage members in need of CM who are unresponsive to contact attempts or disengaged from CM.

iii. An approach that uses pharmacy utilization data to tailor CM services.

iv. An approach to encourage participation in CM activities by, and collaboration among, the following providers:

a) PCPs and behavioral health providers. This includes policies that ensure that PCPs refer members to behavioral health specialists when SMI is present or the member identifies as having a SMI.

b) HCBS service coordinators.

c) Community support providers.

v. Procedures and criteria for making referrals to specialists and sub-specialists to ensure that services can be furnished to members promptly and without compromising care. The MCO must (a) provide the coordination necessary for referral of MCO members to specialty providers to determine the need for services outside the MCO network and (b) refer a member to the appropriate service providers.

vi. Results of the identification and assessment of any member with SHCNs to ensure that services and activities are not duplicated and to identify any ongoing special conditions that require a course of treatment or regular care monitoring.

vii. Procedures and criteria for maintaining care plans and referral services when a member changes PCPs.

viii. Documentation of referral services and medically indicated follow-up care in each member's medical record.

ix. Documentation in the member's medical record of all urgent care, emergency encounters, and any medically indicated follow-up care.

x. A process that ensures that when a provider is no longer available through the MCO, the MCO allows members, who are undergoing an active course of treatment, to access services from non-contracted providers for an additional 90 calendar days to ensure continuity of care.

xi. A process that ensures continuity of care for members with SHCNs who are in CM.

d. For members assigned to medium risk care management, the MCO must meet basic care management requirement and:

i. Facilitate relapse prevention plans for members with depression and other high-risk behavioral health conditions and their PCPs (e.g., patient education, extra clinic visits, or follow-up telephone calls).

ii. Partner with provider practices having higher medication adherence rates to identify best practices and leverage tools and education to support practices with lower rates of adherence.

iii. Educate provider office staff about symptoms of exacerbation(s) and how to communicate with patients.

iv. Develop speaking points and triggers for making emergency appointments.

v. Develop specific forms and monitoring tools to support monitoring of conditions, behaviors, risk factors, or unmet needs.

e. For members assigned to high risk care management, the MCO must meet requirements for members assigned to low and medium risk care management and the MCO must develop and adopt policies and procedures (that have been approved in advance by MLTC) for the following:

i. As appropriate, organize the care using a person-centered, inter-disciplinary primary care and specialty treatment team to assist with development and implementation of individual medical care plans, that are in accordance with State QI and UM standards.

ii. Provide list of community resources (for referral).

iii. Plan for coordination and communication with State staff who are responsible for management of HCBS waivers.

iv. Develop a process to engage non-compliant members.

v. Develop a strategy for communication with members and their families, as well as key service and support providers and local social and community service agencies.

vi. Identify providers with special accommodations (e.g., sedation dentistry).

vii. Educate staff about barriers members may experience in making and keeping appointments.

viii. Facilitate group visits to encourage self-management of various physical and behavioral health conditions/diagnoses such as pregnancy, diabetes, or tobacco use.

ix. Communicate on a member-by-member basis on gaps/needs to ensure that a member obtains baseline and periodic medical evaluations from his/her PCP.

f. The MCO must develop, implement, and evaluate written policies and procedures consistent with existing State policies and procedures, regarding continuity of care. These written protocols must be reviewed on an annual basis by the MCO, be updated as needed, and provided to MLTC a minimum of 60 calendar days in advance of intended implementation for review and approval. In particular, the policies and procedures must address the following situations:

i. Members whose treating providers become unable to continue service delivery for any reason.

ii. Member transitions from the children's system to the adult system.

iii. Member transitions to/from IHS or other tribal agencies.

iv. Member discharges from inpatient and residential treatment levels of care, including State psychiatric hospitals.

5. Coordination with Providers and Other CM Programs

a. Members who are aged, blind, or disabled; dual eligible; or who are enrolled in HCBS waiver programs or other State programs are likely to have one or more case or care managers.

b. The MCO must demonstrate an understanding of health care and social service programs and initiatives offered by MLTC and other State agencies, and leverage those programs when appropriate for members receiving medium and intensive CM. Leveraging of existing programs may take the form of subcontracting or highly collaborative partnering, for example, and is intended to take advantage of existing resources and infrastructures to reduce or eliminate duplication of effort. Highly collaborative partnering must include, but is not limited to, crisis response services in coordination with behavioral health system entities.

c. The MCO must attempt to ascertain whether a member has any other case or care managers, and, if so, to engage with them. The MCO must also attempt to ascertain whether a member has

any other identified caregivers in the member's care planning and CM, and, if so, to engage with them.

d. The MCO is responsible for ensuring coordination between its providers and the WIC program. Coordination includes referral of potentially eligible women, infants, and children and providing appropriate medical information to the WIC program.

e. While the MCO must collaborate with other caregivers for overall planning and management, it retains responsibility for ensuring that the member continues to receive appropriate medical services in the most cost-effective manner.

f. The MCO must develop transition plans for persons discharging to the community from State psychiatric hospitals.

6. Special Considerations for Pregnant Members

a. The MCO must ensure that Medicaid members under its care who are pregnant begin receiving care within the first trimester, or within seven (7) days after enrolling in the MCO or notification of the member's pregnancy.

b. The MCO must provide available, accessible, and adequate numbers of PCPs and OB/GYN physicians to provide prenatal services to its female members. A pregnant member must be assured direct access within the MCO's provider network to routine OB/GYN services, and the OB/GYN is required to notify the PCP of his/her provision of such care and coordinate that care with the PCP.

c. The MCO must develop an outreach program to encourage women to seek prenatal services during their first trimester of pregnancy. This outreach program may utilize community and religious organizations and other community groups to develop outreach programs or referral networks, as well as include distribution of brochures and/or periodic articles that emphasize the importance of this care to all members.

d. The MCO must perform or require health providers to perform a risk assessment of all obstetrical patients including a screen for tobacco, alcohol, and substance use and have available, accessible, and adequate maternal fetal medicine specialists for high-risk obstetrical patients requiring further evaluation, consultation, or care and delivery as recommended by the guidelines of the American College of Obstetricians and Gynecologists. A pregnant woman is considered high-risk if one or more risk factors are indicated. The MCO must provide case management for high-risk obstetrical patients including, but not limited to, patients with a history of prior preterm birth.

e. The MCO must screen members for the DHHS Division of Behavioral Health Women's Set Aside program and make referrals to the Division of Behavioral Health (DBH) as appropriate. MLTC will provide screening criteria for the program.

f. The MCO must ensure that the PCP or the OB provides prenatal care in accordance with the guidelines of the American College of Obstetricians and Gynecologists. The MCO must ensure that the PCP or the OB counsels the pregnant member about plans for her child, such as designating the family practitioner or pediatrician who is to perform the newborn exam and choosing a PCP to provide subsequent pediatric care to the child when the child is added to the MCO.

g. Appropriate referrals must also be made to the WIC program for nutritional assistance and other needed community resources. The MCO is responsible for ensuring that coordination occurs between the WIC program and MCO providers. Coordination includes referral of potentially eligible women, infants, and children and reporting appropriate medical information to the WIC program.

h. The MCO must develop and promote patient engagement tools including mobile applications and smartphone-based support to supplement existing pregnancy services. The MCO is required to provide details of its plan in the MCO Marketing Plan submitted to DHHS for approval. Some goals of this program are to:

i. Improve overall engagement in the maternity population and assist women with keeping appointments and educating them about needed health screenings throughout their pregnancy.

ii. Increase the appropriate identification and triage of high-risk pregnancies to evidence-based actions, including connection with maternity case managers or other public health resources.

i. Improve health decisions across the pregnant population based on available State-based and MCO-based programs and services.

j. The MCO must provide care management services to women postpartum who were identified as high risk during their pregnancy or who had an adverse pregnancy outcome, including preterm delivery within 37 weeks. Care management services shall include referral to safety net services for baby care and breastfeeding support.

7. Coordination with HCBS Service Coordinators

a. The MCO must collaborate and coordinate with HCBS case managers in a manner that complements, but does not duplicate, the member's plan of services and supports.

b. The MCO must develop and submit to MLTC for approval (a minimum of 60 calendar days in advance of intended implementation) a policy and procedures for coordination with HCBS case managers. This policy and these procedures must address methods the MCO will use to ensure that coordination services are not duplicated.

8. Coordination with Tribal Organizations

a. The MCO must develop policies for care coordination/collaboration for members who are Tribal members or are eligible for care through IHS or other Tribally-funded health and human services program, including:

i. Identification and appointment of a Tribal Liaison, to work with IHS and the Tribes.

ii. Development of processes and procedures to identify, ensure appropriate access to, and monitor the availability and provision of culturally appropriate care within the MCO's network.

iii. Development of processes and procedures to coordinate eligibility and service delivery with IHS, Tribally-operated facility/ program, and urban Indian clinics (I/T/Us) authorized to provide services pursuant to Public Law 93-638.

iv. Development of methods for regular planning to coordinate on a minimum of a quarterly basis with IHS, 638 providers, Urban Indian Centers, and other involved agencies to coordinate and facilitate health service delivery.

b. All policies and procedures must be submitted to MLTC for review and approvals a minimum of 60 calendar days prior to the contract start date and before new policies are to be implemented.

9. Coordination with the Division of Children and Family Services

The MCO must develop processes and procedures for collaboration with the Division of Children and Family Services for children who are in foster care placement. CM must include collaborating with the child's Children and Family Services Specialist and identifying and responding to a child's health care needs including behavioral health. Policies and procedures must include:

a. A schedule for initial and follow-up health screenings that meet reasonable standards of medical practice.

b. How health needs identified through screenings will be monitored and treated.

c. How medical information will be updated and appropriately shared, which may include the development and implementation of an electronic health record.

d. Steps to ensure continuity of health care services.

e. The oversight of prescription medications.

M. QUALITY MANAGEMENT

1. The MCO must include QM processes in its operations to assess, measure, and improve the quality of care provided to and the health outcomes of its members.

a. The MCO's QM functions must comply with all State and Federal regulatory requirements, as well as those requirements identified in this RFP, any other applicable law, and any resulting contract.

b. The MCO must support and comply with MLTC's Quality Strategy, including all reporting requirements in formats and using data definitions provided by MLTC after contract award. MLTC is in process of revising its Quality Strategy to reflect changes in the managed care delivery system as a result of this RFP. The MCO will be provided with the final Quality Strategy when it is approved by CMS.

c. The MCO must have a sufficient number of qualified personnel to comply with all QM requirements in a timely manner, including external quality review activities.

d. The MCO's QM program must include:

i. A quality assurance and performance improvement (QAPI) program.

ii. Performance improvement projects (PIPs).

iii. Quality performance measurement and evaluation.

iv. Member and provider surveys.

v. MCO accreditation requirements, including a comprehensive provider credentialing and re-credentialing program, as described in Sections IV.C Business Requirements and IV.I Provider Network Requirements of this RFP.

e. The MCO must ensure that the QM unit within the organizational structure is separate and distinct from other units, such as UM and CM. The MCO is expected to integrate QM processes, such as tracking and trending of issues, throughout all areas of the organization.

2. Quality Management Deliverables

The MCO must submit the following QM deliverables to MLTC as described in Attachment 5 – Policies, Procedures and Plans, and Attachment 6 – Reporting Requirements. Any subsequently revised documents must also be submitted to MLTC for review and approval a minimum of 60 calendar days prior to their planned implementation.

a. Description and composition of the QAPI Committee (QAPIC).

b. A written description of the MCO's QM program, including detailed QM goals and objectives, a definition of the scope of the program, accountabilities, and timeframes.

c. A QM work plan and timeline for the coming year that clearly identifies target dates for implementation and completion of all phases of the MCO's QM activities, consistent with the clinical quality performance measures and targets set by MLTC, including, but not limited to:

i. Data collection and analysis.

ii. Evaluation and reporting of findings.

iii. Implementation of improvement actions, where applicable.

iv. Individual accountability for each activity.

d. Procedures for remedial action for deficiencies that are identified.

e. Specific types of problems requiring corrective action.

f. Provisions for monitoring and evaluating the corrective actions to ensure that improvement actions have been effective.

g. Procedures for provider review and feedback about results.

h. Annual QM evaluation that includes:

i. Description of completed and ongoing QM activities.

ii. Identified issues, including tracking of issues over time.

iii. Analysis of and tracking progress about implementation of QM goals and the principles of care, as appropriate, and as defined in this RFP. Measurement of and compliance with these principles must be promoted and enforced through the following strategies, at a minimum:

a) Use of QM findings to improve practices at the MCO and subcontractor levels.

b) Timely reporting of findings and improvement actions taken and their relative effectiveness.

c) Dissemination of findings and improvement actions taken and their relative effectiveness to key stakeholders, committees, members, families/caregivers (as appropriate), and posting on the MCO's website.

d) Performance measure results from performance improvement efforts and activities planned/taken to improve outcomes compared with expected results and findings. The MCO must use an industry-recognized methodology, such as SIX SIGMA or other appropriate method(s), for analyzing data. The MCO must demonstrate inter-rater reliability testing of evaluation, assessment, and UM decisions.

e) An analysis of whether there have been demonstrated improvements in members' health outcomes, the quality of clinical care, quality of service to members, and overall effectiveness of the QM program.

i. Procedures assessing the quality and appropriateness of care furnished to members with SHCNs. The assessment mechanism must use appropriate health care professionals to determine the quality and appropriateness of care.

3. QAPI Program

The MCO's QAPI program, at a minimum, must comply with State and Federal requirements (including 42 CRF 438.204) and UM program requirements described in 42 CFR 456. The QAPI program must:

a. Ensure continuous evaluation of the MCO's operations. The MCO must be able to incorporate relevant variables as defined by MLTC.

b. At a minimum, assess the quality and appropriateness of care furnished to members.

c. Provide for the maintenance of sufficient encounter data to identify each practitioner providing services to members, specifically including the unique physician identifier for each physician.

d. Maintain a health information system that can support the QAPI program. The MCO's information system must support the QAPI process by collecting, analyzing, integrating, and reporting data required by the State's Quality Strategy. All collected data must be available to the MCO and MLTC.

e. Make available to its members and providers information about the QAPI program and a report on the MCO's progress in meeting its goals annually. This information must be submitted for review and approval by MLTC prior to distribution.

f. Solicit feedback and recommendations from key stakeholders, providers, subcontractors, members, and families/caregivers, and use the feedback and recommendations to improve the quality of care and system performance. The MCO must further develop, operationalize, and implement the outcome and quality performance measures with the QAPIC, with appropriate input from, and the participation of, MLTC, members, family members, providers, and other stakeholders.

g. Require that the MCO make available records and other documentation, and ensure subcontractors' participation in and cooperation with, the annual on-site operational review of the MCO and any additional QM reviews. This may include participation in staff interviews and facilitation of member/family/caregiver, provider, and subcontractor interviews.

4. QAPIC

a. The MCO must provide a mechanism for the input and participation of members, families/caretakers, providers, MLTC, and other stakeholders in the monitoring of service quality and determining strategies to improve outcomes.

b. The MCO must form a QAPIC no later than one month following the contract's start date. The MCO's Medical Director must serve as either the chairperson or co-chairperson of the QAPIC.

c. The MCO must include, at a minimum, the following as members of the committee:

i. The MCO's QM Coordinator.

ii. The MCO's Performance and Quality Improvement Coordinator.

iii. The MCO's Medical Management Coordinator.

iv. The MCO's Member Services Manager.

v. The MCO's Provider Services Manager.

vi. Family members/guardians of children or youth who are Medicaid members.

vii. Adult Medicaid members.

viii. Network providers, including PCPs, specialists, pharmacists, and providers knowledgeable about disability, mental health and substance use disorder treatment of children, adolescents, and adults in the State. The provider representatives should have experience caring for the Medicaid population, including a variety of ages and races/ethnicities, and rural and urban populations.

d. The MCO's QAPIC must:

i. Review and approve the MCO's QAPI Program Description, Work Plan, and Program Evaluation prior to submission to MLTC.

ii. Review the Cultural Competency Plan.

iii. Require the MCO to study and evaluate issues that the MLTC or the QAPIC may identify.

iv. Establish annual performance targets.

v. Review and approve all member and provider surveys prior to their submission to MLTC.

vi. Define the role, goals, and guidelines for the QAPIC, set agendas, and produce meeting summaries.

vii. Provide training; participation stipends; and reimbursement for travel, child care, or other reasonable participation costs for members or their family members. Participation stipends should only be provided if the individuals are not otherwise paid for their participation as staff of an advocacy or other organization.

viii. Annually, and as requested, provide data to MLTC's Quality Committee, which meets annually to review data and information relevant to the Quality Strategy. The MCO must incorporate recommendations from all staff and MCO committees, the results of PIPs, other studies, improvement goals, and other interventions into the QAPI Program, the QAPI Program Description, the QAPI Work Plan, and the QAPI Program Evaluation.

e. Additional required committees must include:

i. Clinical Advisory Committee.

ii. Corporate Compliance Committee.

iii. Provider Advisory Committee.

iv. Utilization Management Committee.

v. The additional required committees must report, on a minimum of a quarterly basis, to the QAPIC. The QAPIC must monitor performance as part of its annual QAPI Work Plan and Program Evaluation.

5. Data Collection

a. The MCO must collect performance data and conduct data analysis with the goal of improving members' quality of care. The MCO must document and report to the State its results on performance measures chosen by MLTC to improve quality of care and members' health outcomes.

b. Data analysis must consider the MCO's previous year's performance, and reported rates must clearly identify the numerator and denominator used to calculate each rate. The data analysis must provide, at a minimum, information about quality of care, service utilization, member and provider satisfaction, and grievances and appeals. Data must be collected from administrative systems, medical records, and member and provider surveys. The MCO must also collect data on member and provider characteristics as specified by MLTC, and about services furnished to members through the MCO's encounter data system. The MCO must ensure that data received from providers is accurate and complete by:

i. Verifying the accuracy and timeliness of reported data.

ii. Screening the data for completeness, logicalness, and consistency.

iii. Collecting service information using MLTC-developed templates.

c. The MCO's data analysis process must be able to identify and resolve system issues consistent with a continuous quality improvement approach.

d. The MCO is responsible for collecting valid and reliable data and using qualified staff to report it. Data collected for performance measures and PIPs must be returned by the MCO in a format specified by MLTC, and by the due date specified. Any extension to collect and report data must be made in writing in advance of the initial due date and is subject to approval by MLTC. Failure to follow the data collection and reporting instructions that accompany the data request may result in a penalty being imposed on the MCO per Section IV, V Contract Non-compliance.

6. Quality Performance Measurement and Evaluation

a. The MCO must report specific performance measures, as listed in Attachment 7 – Performance Measures. MLTC may update performance targets, including choosing additional performance measures or removing performance measures from the list of requirements, at any time during the contract period. Performance measures include, but are not limited to, Healthcare Effectiveness Data and Information Set (HEDIS®) measures, CHIPRA Quality Measures required

by CMS, Consumer Assessment of Healthcare Providers and Systems (CAHPS®) measures, ACA Adult Quality Measures as defined by CMS (Section 2701 of the ACA), and any other measures as determined by MLTC.

b. MLTC may utilize a hybrid or other methodology for collecting and reporting performance measure rates, as allowed by NCQA for HEDIS measures or as allowed by other entities for nationally recognized measures. The MCO must collect data from medical records, electronic records, or through approved processes, such as those utilizing a health information exchange. The number of records that the MCO collects will be based on HEDIS, external quality review (EQR), or other sampling guidelines. It may also be affected by the MCO's previous performance rate for the measure being collected. The MCO must provide MLTC on request with its methodology for calculating performance measures.

c. The MCO must show demonstrable and sustained improvement toward meeting MLTC performance targets. MLTC may impose sanctions on an MCO that does not show statistically significant improvement in a measure rate. MLTC may require the MCO to demonstrate that it is allocating increased administrative resources to improve its rate for a particular measure. MLTC also may require a corrective action plan and may sanction any MCO that shows a statistically significant decrease in its rate, even if it meets or exceeds the minimum standard.

d. The MCO must report results of measuring or assessing outcomes and quality, and must incorporate these performance indicators into its PIPs. To the extent possible, results should be posted publicly on the MCO's website immediately after being accepted by the QAPI Committee and approved by MLTC.

e. Any outcomes and performance measure results that are based on a sample of member, family, or provider populations must demonstrate that the samples are representative and statistically valid. Whenever data are available, outcomes and quality indicators should be reported in comparison to past performance and to national benchmarks.

f. The MCO must report to MLTC on a quarterly basis the minutes and disposition of quality program initiatives that were presented to the QAPIC to ensure that all quality initiatives are reviewed at the frequencies outlined in the Quality Management Program Description. The reporting requirements are described in Attachment 6 – Reporting Requirements.

7. Performance Improvement Projects

a. The MCO must conduct a minimum of two clinical and one non-clinical PIPs. A minimum of one (1) clinical issue must address an issue of concern to the MCO's population, which is expected to have a favorable effect on health outcomes and enrollee satisfaction. A second clinical PIP must address a behavioral health concern. PIPs must meet all relevant CMS requirements and be approved by MLTC prior to implementation.

b. The MCO must participate in a minimum of one (1) joint PIP with the other MCOs; the topic will be identified by MLTC.

c. PIPs must be addressed in the MCO's annual QM Program Description, Work Plan, and Program Evaluation. The MCO must report the status and results of each project to MLTC as outlined in the Quality Strategy. PIPs must comply with CMS requirements, including:

i. A clear study topic and question as determined or approved by MLTC.

ii. Clear, defined, and measurable goals and objectives that the MCO can achieve in each year of the project.

iii. A study population.

iv. Measurements of performance using quality indicators that are objective, measurable, clearly defined, and allow tracking of performance over time. The MCO must use a methodology based on accepted research practices to ensure an adequate sample size and statistically valid and reliable data collection practices. The MCO must use measures that are based on current scientific knowledge and clinical experience. Qualitative or quantitative approaches may be used as appropriate.

v. The methodology for evaluation of findings from data collection.

vi. Implementation of system interventions to achieve quality improvement.

vii. A methodology for the evaluation of the effectiveness of the chosen interventions.

viii. Documentation of the data collection methodology used (including sources) and steps taken to ensure the data is valid and reliable.

ix. Planning and initiation of activities for increasing and sustaining improvement.

d. The MCO must submit to MLTC the status or results of its PIPs in its annual QM Program Evaluation. Next steps must also be addressed, as appropriate, in the QM Program Description and Work Plan.

e. The MCO must implement the PIP recommendations on approval by MLTC and the QAPIC.

f. Each PIP must be completed in a reasonable time period to allow the results to guide its quality improvement activities. Information about the success and challenges of PIPs must be also available to MLTC for its annual review of the MCO's quality assessment and performance improvement program [42 CFR 438.240(d)(2)].

g. CMS, in consultation with the State and other stakeholders, may specify additional performance measures and PIPs to be undertaken by the MCO.

h. MLTC reserves the right to request additional reports from the MCO. The MCO will be notified of additional reporting requirements no less than 30 calendar days prior to the due date of a report.

8. Member Satisfaction Surveys

a. The MCO must contract with a vendor that is certified by NCQA to perform CAHPS surveys, including CAHPS Adult surveys and CAHPS Child surveys with children with chronic conditions (CCC) supplemental items.

b. The MCO must use the most current version of CAHPS for Medicaid enrollees. For the CAHPS Child Surveys with CCC supplemental items, the MCO must separately sample the Title XIX (Medicaid) and Title XXI (CHIP) populations and separate data and results when submitting reports to MLTC to fulfill the CHIPRA requirement.

c. Samples of members 18 years of age and older and caregivers/family members of children and youth should be included in all member surveys. Samples should be representative of members and caregivers/family members based on the type of question asked.

d. Each survey must be administered to a statistically valid random sample of members who are enrolled in the MCO at the time of the survey. Analyses must include statistical analysis for targeting improvement efforts and comparison to national and State benchmark standards. Survey results and action plans derived from these results are due 45 calendar days after the end of each contract year. MLTC reserves the right to make CAHPS member survey results public.

e. Survey results and descriptions of the survey process must be reported to MLTC separately for each required CAHPS survey. Upon administration of the CAHPS Child surveys, results for Medicaid children and CHIP children must be reported separately.

9. Provider Satisfaction Surveys

a. The MCO must conduct an annual provider survey to assess providers' satisfaction with provider credentialing, service authorization, MCO staff courtesy and professionalism, network management, appeals, referral assistance, coordination, perceived administrative burden, provider communication, provider education, provider complaints, claims reimbursement, and utilization management processes, including medical reviews and support for PCMH implementation.

b. The provider satisfaction survey tool and methodology must be submitted to MLTC for approval a minimum of 90 calendar days prior to its intended administration. The methodology used by the

MCO must be based on proven survey techniques that ensure an adequate sample size and statistically valid and reliable data collection practices with a confidence interval of a minimum of 95% and scaling that results in a clear positive or negative finding (neutral response categories shall be avoided). The MCO must utilize measures that are based on current scientific knowledge and clinical experience.

c. The MCO must submit an annual provider satisfaction survey report that summarizes the survey methods and findings and provides an analysis of opportunities for improvement and action plans derived from survey results. This report is due 45 calendar days after the end of the each contract year.

10. MLTC Quality Management Committee

The MCO must attend annual meetings of MLTC's QM Committee. The QM Committee meets to review data and information used to develop the Quality Strategy; recommend actions to improve members' quality of care, access, utilization, and satisfaction; and, to review the PIP results and recommend future PIP topics. The QM Committee also reviews MLTC's Quality Strategy and makes recommendations for its improvement.

11. Member Advisory Committee

a. To promote a collaborative effort to enhance the MCO's patient-centered service delivery system, the MCO must establish a Member Advisory Committee that is accountable to the MCO's governing body. Its purpose is to provide input and advice regarding the MCO's program and policies.

b. The MCO's Member Advisory Committee must include members, members' representatives, providers, and advocates that reflect the MCO's population and communities served. The Member Advisory Committee must represent the geographic, cultural, and racial diversity of the MCO's membership.

c. At a minimum, the MCO's Member Advisory Committee must provide input into the MCO's planning and delivery of services; QM/quality improvement activities; program monitoring and evaluation; and, member, family, and provider education.

d. The MCO must provide an orientation and ongoing training for Member Advisory Committee members so that they have sufficient information and understanding of the managed care program to fulfill their responsibilities.

e. The MCO must develop and implement a Member Advisory Committee Plan that describes the meeting schedule and the draft goals of the Committee that must include, but is not limited to, members' perspectives about improving quality of care. This Plan must be submitted to MLTC for approval a minimum of 60 calendar days before the contract start date and annually thereafter.

f. The MCO's Member Advisory Committee must meet a minimum of quarterly, and the MCO must keep written minutes of the meetings. The MCO must pay travel costs for committee members who are members or their representatives.

g. MLTC must be copied on all correspondence to the committee, including agendas and committee minutes.

h. The MCO must report on the activities of the MCO's Member Advisory Committee semi-annually. This report must include the membership of the committee (name, address, and organization represented), a description of any orientation and/or ongoing training activities for committee members, and information about Committee meetings, including the date, time, location, meeting attendees, and minutes from each meeting. These reports must be submitted to MLTC according to the schedule described in Attachment 6 – Reporting Requirements.

12. Clinical Advisory Committee

a. The MCO must develop, establish, and maintain a Clinical Advisory Committee to facilitate regular consultation with experts who are familiar with standards and practices of treatment, including diseases/chronic conditions common in the Medicaid population, disabilities, and mental health and/or substance use disorder treatment for adults, children, and adolescents in the State.

b. The Clinical Advisory Committee must provide input into all policies, procedures, and practices associated with CM and utilization management functions, including clinical and practice guidelines, and utilization management criteria to ensure that they reflect up-to-date standards consistent with research, requirements for evidence-based practices, and community practice standards in the State.

c. The committee must include members who care for children, adolescents and adults in the State across a variety of ages and races/ethnicities, have an awareness of differences between rural and urban populations and represent pharmacists, physical health providers, and behavioral health providers.

d. The committee must review and approve initial practice guidelines. Any significant changes in guidelines must also be reviewed/approved by the Committee prior to adoption by the MCO.

e. The committee must meet on an as-needed basis, but a minimum of twice a year and preferably quarterly.

f. The MCO must submit to MLTC for approval its plan for development of the committee a minimum of 60 calendar days in advance of its establishment. The MCO must also provide copies of the committee's minutes to MLTC.

13. External Quality Review

a. The MCO is subject to annual, external, independent reviews of the quality outcomes of, timeliness of, and access to, services covered under the contract, per 42 CFR 438.350. The EQR is conducted by MLTC's contracted external quality review organization (EQRO) or other designee. The EQR will include, but is not be limited to, annual operational reviews, PIP assessments, encounter data validation, focused studies, and other tasks requested by MLTC.

b. The MCO must provide the necessary information required for these reviews, provide working space and internet access for EQRO staff, and make its staff available for interviews.

N. UTILIZATION MANAGEMENT

1. General Requirements

a. The MCO's UM activities must include the evaluation of medical necessity of health care services according to established criteria and practice guidelines to ensure that the right amount of services are provided to members when they need them. The MCO's UM program must also focus on individual and system outliers to assess if individual members are meeting their health care goals and if service utilization across the system is meeting the goals for delivery of community-based services.

b. The MCO's UM program must comply with Federal utilization control requirements, including the certification of need and recertification of need for continued inpatient settings, including psychiatric residential treatment facilities, and as described in 42 CFR 438.

c. The MCO must require inpatient hospital providers to comply with Federal requirements regarding UM plans, UM committees, plans of care, and medical care evaluation studies, as described in 42 CFR 44, 455 and 456.

d. The MCO must not structure compensation to individuals or entities that conduct UM activities to provide incentives for the individual or entity to deny, limit, or discontinue medically necessary services to any member, as described in 42 CFR 210(e).

e. The MCO must actively monitor Federal and State Medicaid regulations for updates and changes and must monitor all UM activities for compliance with Federal and State Medicaid regulations.

2. UM Program Description

The MCO must have a written UM Program description that outlines its structure and accountability mechanisms. The description must be submitted to MLTC for written approval annually and include, at a minimum:

a. Criteria and procedures for the evaluation of medical necessity of medical services for members.

b. Criteria and procedures for pre-authorization and referral for covered services that include provider and member appeal mechanisms.

c. Mechanisms to detect and document over- and under-utilization of medical services.

d. Mechanisms to assess the quality and appropriateness of care furnished to members with SHCNs.

e. Availability of UM criteria to providers.

f. Involvement of actively practicing, board-certified physicians in the program to supervise all review decisions and review denials for medical appropriateness.

g. Availability of physician reviewers to discuss determinations by telephone with physicians who request them.

h. Evaluation of new medical technologies and new application of existing technologies and criteria for use by contracted providers.

i. A process and procedures to address disparities in health care.

j. A process for identifying and analyzing clinical issues by appropriate clinicians and, when necessary, developing corrective actions to improve services.

k. A description of the MCO's approach to service authorizations, concurrent UR, and retrospective UR. The MCO must submit this description to MLTC for approval no later than 60 calendar days prior to the contract start date, annually thereafter, and prior to any intended revisions. MLTC's approval must be obtained prior to implementation of these policies.

l. Reasonable steps to ensure that network providers prescribe pharmaceuticals in accordance with the policies and instructions provided by MLTC and reflected in the MLTC's Preferred Drug List and other State publications.

m. A process for providing prescribers with members' drug utilization data obtained from MLTC and the Nebraska DUR board to inform prescribing activity. As part of this effort, the MCO must:

i. Work to improve collaboration across prescribers, to reduce conflicting or duplicate prescribing.

ii. Provide reports to PCPs and other network providers about the patterns of prescription utilization by members, in an effort to increase collaboration and reduce inappropriate prescribing patterns.

n. A description of the MCO's annual evaluation of its UM program. This evaluation must be submitted to MLTC annually, no later than 30 calendar days after its completion.

3. Practice Guidelines

a. The MCO must develop practice guidelines, in accordance with 42 CFR 438.236(b), that:

i. Are based on valid and reliable clinical evidence or a consensus of health care professionals in the particular field.

ii. Consider the needs of the MCO's members, including children with serious emotional disorders and adults with serious and persistent mental illness.

iii. Are adopted in consultation with participating health care professionals.

iv. Comply with State and Federal requirements.

v. Are approved in advance by the Clinical Advisory Committee and MLTC.

vi. Are reviewed and updated a minimum of annually, as appropriate.

vii. Are disseminated, by the MCO, to all affected providers and, on request, to members and enrollees (42 CFR 438.236(c).

viii. Are posted to the MCO's website.

ix. Provide a basis for consistent decisions for utilization management, member education, service coverage, and any other areas to which the guidelines apply (42 CFR 438.236(d).

b. The MCO must provide affected network providers with technical assistance and other resources to implement the practice guidelines.

c. The MCO must coordinate the development of clinical practice guidelines with other MLTC MCOs to avoid providers receiving conflicting guidelines from different MCOs.

d. The MCO must monitor the application of practice guidelines annually through peer review processes and collection of performance measures for review by the MCO's QAPIC.

e. Using information acquired through its QM and UM activities, the MCO must recommend to MLTC each year the implementation of practice guidelines, including compliance and outcomes measures and a process to integrate practice guidelines into care management and UR activities.

4. Service Authorization Procedures

a. The MCO and its subcontractors must have in place, and follow, written policies and procedures for processing requests for initial and continuing authorizations of services. The MCO must have processes to ensure consistent application of review criteria for authorization decisions and consultation with the requesting provider, when appropriate.

b. The MCO must ensure that any decision to deny a service authorization request or to authorize a service in an amount, duration, or scope that is less than requested, be made by a practitioner with the necessary credentials and experience, and who has appropriate clinical expertise in treating the member's condition or disease.

c. The MCO must develop service authorization procedures with the input, review, and approval of the Quality of Care Clinical Advisory Committee. These procedures must be submitted to MLTC, for review and approval, a minimum of 60 calendar days prior to the contract's start date.

d. The MCO must:

i. Incorporate the definition of medical necessity for covered services, inclusive of service definitions and levels of care, into MCO documents, where applicable.

ii. Not require service authorization for emergency services.

iii. Place appropriate limits on service delivery (applying criteria, such as clinical guidelines for utilization control), provided the services that are delivered can be reasonably expected to achieve their purpose.

iv. Not arbitrarily deny a required service solely because of the member's diagnosis, type of illness, or condition. This also applies to the MCO's subcontractors.

v. Have in effect mechanisms to ensure consistent application of review criteria for authorization decisions.

vi. Require general notification to participating providers of revisions to the formulary and pharmacy prior authorization requirements.

vii. Use a licensed child and adolescent psychiatrist to review prior authorization requests for psychotropic medication use in youth as described under Section IV.D Staffing Requirements of this RFP.

viii. Have written policies and procedures for prescribers to request peer review and peer-to-peer consultations on prior authorizations. Peer-to-peer review or peer consultation must be conducted by a State-licensed prescriber.

ix. Consult with the requesting network provider, when appropriate.

x. Notify the requesting provider, and give the member written notice, of any decision to deny a service authorization request, or to authorize a service in an amount, duration, or scope that is less than requested. The notice must meet the requirements of 42 CFR 438.404.

xi. For standard authorizations, make a decision and provide notice of any denial or decision to authorize services in an amount, duration, or scope that is less than requested as expeditiously as the member's health condition requires and within the timeframes included in Section IV.H Grievances and Appeals of this RFP.

xii. For expedited service authorizations, make a decision within the timeframes identified in Section IV.H Grievances and Appeals of this RFP, including when the network provider indicates, and the MCO determines, that following the standard timeframe could seriously jeopardize the member's life or health or ability to attain, maintain, or regain maximum function, or would cause a prudent layperson, possessing an average knowledge of medicine and health, reason to believe that his/her condition is of such a nature that failure to obtain immediate medical care could result in serious jeopardy, serious impairment to bodily functions, or serious dysfunction of any bodily organ or part.

5. Service Authorizations for Pharmacy Services

a. The MCO must submit to MLTC, for review and written approval a minimum of 60 calendar days prior to the contract's start date, clinical criteria for all drugs requiring clinical prior authorization, including:

i. Clinical criteria.

ii. Evaluation flow charts.

iii. Process supporting tables.

b. Prior authorization may be used for drugs under the following conditions:

i. When prescribing medically necessary non-formulary or non-preferred (non-PDL) drugs.

ii. When prescribing drugs inconsistent with approved FDA labeling, including behavioral health drugs; or when prescribing is inconsistent with nationally accepted guidelines.

iii. When prescribing brand name medications that have A-rated generic equivalents.

iv. To minimize potential drug over-utilization.

v. To accommodate exceptions to Medicaid drug utilization review standards related to proper maintenance drug therapy.

c. MLTC may, at its discretion, prohibit prior authorization for selected drug products or devices.

d. The MCO must maintain a toll-free telephone number and fax line for providers to submit requests for prior authorization of drugs that are non-preferred or subject to clinical edits. The MCO must allow prescribers and pharmacies to submit prior authorization requests by phone or fax, and through an automated process. If the MCO or its pharmacy benefits manager operates a separate call center for prior authorization requests, it will be subject to the same provider call center standards set forth in Section IV.J Provider Services of this RFP.

e. The MCO may not penalize or charge the prescriber, pharmacy or enrollee in any way for authorization requests and approvals.

f. The MCO must allow submission of pharmacy prior authorization requests through a common written form within 30 calendar days of it being developed and approved by the Administrative Simplification Committee and MLTC.

g. A member receiving a prescription drug that is subject to new or different prior authorization requirements (e.g., new clinical edits, removal from formulary or PDL) shall be permitted to continue to receive that prescription drug if determined to be medically necessary for a minimum of another 60 calendar days. The MCO must determine whether this medical necessity is present in consultation with the prescriber.

h. The MCO is allowed to implement step therapy or fail first protocols to promote utilization of the most cost-effective and clinically appropriate drug therapy. However, if so implemented, the MCO must provide a clear process in writing for a provider to request an override of these restrictions. At a minimum, the MCO must grant the override when the prescriber provides evidence that the preferred treatment method has been or is likely to be ineffective in the treatment of the patient's medical condition or will cause or will likely cause an adverse reaction or other physical harm to the patient.

6. Concurrent Review

a. The MCO must develop a system of concurrent review for inpatient services to monitor the medical necessity of the need for a continued stay. The concurrent review system must include provisions for multiple day approvals when the episode of care is reasonably expected to last more than one (1) day, based on the medical necessity determination.

b. An important feature of concurrent review is the evaluation of each hospital case against established criteria, including national clinical guidelines. The MCO must use published and commercially available criteria for hospital case reviews to facilitate evaluation by UR nurses.

7. Retrospective Utilization Review of Network Providers

a. The MCO must develop and implement retrospective UR functions for examining trends, issues, and problems in utilization, particularly over- and under-utilization that may need to be addressed including:

i. A system to identify utilization patterns of all network providers by significant data elements and established outlier criteria for both inpatient and outpatient services.

ii. A reasonable appeal process that includes: standard communication with reasonable timelines, UR criteria that are clearly communicated and developed with provider and other stakeholder review and input, and opportunities for independent peer provider review of denied claims.

iii. Written policies and procedures through which the prescriber of pharmacy services is able to submit additional information for special consideration and additional review of denied prior authorization requests that do not meet criteria.

iv. Retrospective and peer reviews of a sample of network providers to ensure that the services furnished by network providers were provided to members, were appropriate and medically necessary, and were authorized and billed in accordance with the MCO's requirements.

v. Provider reviews related to Medicaid compliance issues.

vi. Procedures, based on best practices in the industry, which focus resources on individual and system outliers.

vii. Processes (based in part on clinical decision support, claims and outcome data, and medical record audits) for each provider that monitor and report under-and over-utilization of services at all levels of care, including monitoring providers' utilization of services by race, ethnicity, gender, and age.

viii. Processes for claims denied payment through retrospective review that ensure that claims are denied individually (i.e., that each claim denied must be specifically reviewed) and any denials (both those resulting in repayment and those withheld from a future payment) must be subjected to due process before payment is withheld or repaid. In the absence of a fully denied claim, the provider must be paid in good faith.

b. The MCO must monitor for potential off-label drug usage.

c. The MCO must monitor emergency services utilization by provider and member and have routine methods for addressing inappropriate utilization. For UR, the test for appropriateness of the request for emergency services must be whether a prudent layperson would have requested such services. For the purposes of this RFP, a prudent layperson is one who possesses an average knowledge of health and medicine.

d. These policies must be submitted to MLTC for review and approval a minimum of 60 calendar days prior to the contract start date or the policies' intended implementation. The policies must be reviewed by the MCO annually and updated as necessary.

8. Medication Therapy Management

a. The MCO must develop a medication therapy management (MTM) program specific to the needs of its members.

b. The MTM program shall include coordination among the MCO, the member, the pharmacist, and the prescriber using various means of communication and education. It must assist members in understanding their prescriptions and engage them in education about their medication and efforts to improve their compliance with prescribed medication regimens. It must also educate members about how to effectively communicate about their preferences and needs with their prescribers to promote shared decision-making.

c. At a minimum, the MTM program must assess prescribing patterns and treatment plans for psychotropic medications, medications at risk of abuse, and other medications identified by MLTC or the MCO.

d. The MCO must submit an annual report to MLTC that describes its MTM program activities, the relative effectiveness of its efforts over the reporting period, and the MCO's activities planned for the next reporting period.

9. Drug Utilization Review Program

a. The MCO must develop and maintain DUR programs, including prospective and retrospective DUR programs. The guidelines for these programs must be submitted to MLTC for review and approval a minimum of 60 calendar days prior to the contract's start date or intended implementation of any changes. The MCO must:

i. Establish and maintain retrospective DUR exception criteria.

ii. Conduct drug criteria analysis and generate and review member and provider profiles.

iii. Develop a case tracking system and project reports.

iv. Implement prescriber and pharmacy educational intervention program.

v. Conduct prescriber and pharmacy assessment/evaluation of educational intervention program.

vi. Submit an analysis of cost outcomes and an evaluation of the effectiveness of the prescriber and pharmacy educational interventions to members, prescribers, and pharmacies.

vii. Use results of reviews to inform MTM education and outreach needs.

viii. Perform, at a minimum, one (1) retrospective DUR intervention each quarter of the contract year.

ix. Submit quarterly to MLTC the documentation needed to support preparation of MLTC's annual CMS DUR report.

b. The MCO shall nominate a non-voting staff member to attend the Nebraska Drug Utilization Review Board meetings, which occur six (6) times a year, for the term of this contract. The MCO shall obtain MLTC's written approval of the nominee.

10. Psychotropic Drug Oversight

The MCO must:

a. Utilize prior authorizations and additional edits for psychotropic drugs prescribed to youth, at a minimum, following MLTC guidelines as provided in Attachment 8 – PBM Claims Processing Edits for the Nebraska Medicaid Psychotropic Drugs and Youth Initiative. If appropriate, the MCO must ensure a review of the prior authorization request by a State-licensed child and adolescent psychiatrist.

b. Manage the prescribing of psychoactive medications to members age 20 and under by:

i. Measuring psychopharmacology usage and prescribing patterns.

ii. Monitoring the use of, and the claims related to, psychopharmacology to identify target populations (e.g., age subsets) for proposed interventions.

iii. Preparing member-specific profiles of medication use based on pharmacy data to inform MCO interventions with prescribers.

iv. Developing prescriber and pharmacy interventions that reduce unsupported atypical antipsychotic prescribing and prescribing of multiple medications to the same member. The MCO must:

a) Implement these interventions on the approval of MLTC.

b) Report to MLTC the results of the intervention.

c) Support MLTC pharmacy initiatives by promoting and communicating the adoption of clinical policy recommendations to PCPs, and other network providers, including behavioral health providers.

d) In consultation with the DUR board, propose to MLTC additional pharmacy interventions focused on members.

v. Submit reports to MLTC detailing approvals and denials of psychotropic medication requests for youth. The report must utilize the eligibility categories provided to the MCO via the enrollment files for each youth for whom a drug request is made by a prescriber. These reports must be submitted as specified in Attachment 6 – Reporting Requirements.

vi. If requested by MLTC, participate and collaborate with inter-agency workgroups and initiatives.

11. Restricted Services

a. The MCO is required, at a minimum, to implement a restriction program consistent with the provisions of 471 NAC 2 concerning restricted services, also known as restricted services procedures.

b. Restricted services are a mechanism for restricting Medicaid recipients to a specific physician and/or a specific pharmacy provider. The restricted services mechanism cannot prohibit the recipient from receiving services from providers who offer services other than physician and pharmacy benefits.

c. MLTC may request that a member be placed in a restricted services status when it determines that over-utilization, duplication of services, non-compliance, or drug-seeking behavior is suspected of the member.

d. The MCO, through retrospective UR or through the recommendation of a network provider, may also determine that the services available to a member be restricted and communicate these restrictions to MLTC.

e. The MCO must:

i. Be able to implement in its claims system a restricted services status for a member and have the ability to communicate this status to MLTC and other MCOs.

ii. Provide enrollees and providers with advance written notification of the decision to restrict services provided to a member.

iii. Allow members in the restricted services program to change providers for cause.

iv. Conduct the following activities and have in place written policies and procedures, approved by MLTC, for such activities that fall under the care coordination and daily operational aspects of restricted services, including but not limited to:

a) Assigning a care manager to review, document, and manage the clinical or organizational needs of a member enrolled in restricted services.

b) Assigning staff member(s) to communicate and collaborate with MLTC's enrollment broker and Pharmacy Unit on an ongoing basis concerning the coordination and processes for restricted services.

c) Conducting retrospective UR to identify the potential need for restricted services for a member, in addition to requests by network providers for a review of utilization patterns by a member.

d) Maintaining sufficient documentation for all member restricted service recommendations, including but not limited to documentation of over-utilization or duplication of services and documentation from network providers who requested a review by the MCO of a member because of suspected over-utilization of services or duplication of services.

f. The continued need for restricted services for a member must be evaluated by the MCO a minimum of every two years.

g. If a member has a restricted services status and is unable to obtain care or services from his/her restricted services provider(s) due to extenuating services, the MCO must have policies and procedures in place to authorize necessary exceptions.

h. The MCO must submit a monthly report, in a manner and format to be specified by MLTC, of the status of all members participating in a restriction program.

12. Utilization Management Committee

a. The MCO must establish an internal UM Committee that focuses on oversight of clinical service delivery trends across its membership, including evaluating utilization/patterns of care and key utilization indicators. The UM Committee must be chaired or co-chaired by the Medical Director and must report its findings to the QAPIC. The UM Committee must review, at a minimum:

i. The need for and approval of any changes in UM policies, standards, and procedures, including approval and implementation of clinical guidelines, and approving and monitoring the UM program description and work plan.

ii. Grievances and appeals (including expedited appeals and state fair hearings) related to UM activities to determine any needed policy changes.

iii. Information from UM operations relevant to system gaps are identified and shared with provider network staff through this committee.

iv. Results from internal audits of UM (e.g., live call monitoring and documentation reviews), to effect changes in policies and procedures and plan training activities.

O. PROGRAM INTEGRITY

1. General Requirements

a. The MCO must comply with all State and Federal laws and regulations relating to FWA in the Medicaid program, including but not limited to 42 CFR 438.1 – 438.812.

b. The Nebraska Medicaid Program Integrity Unit (NMPI) is the entity within MLTC charged with identifying and investigating allegations of FWA and erroneous payments.

c. The Medicaid Fraud and Patient Abuse Unit (MFPAU), of the Nebraska Attorney General's office, has primary responsibility to investigate and prosecute provider fraud for the Nebraska Medicaid program.

d. The MCO must certify that all statements, reports, and claims, financial and otherwise, are true, accurate, and complete. The MCO must not submit for payment purposes those claims, statements, or reports that it knows, or has reason to know, are not properly prepared or payable pursuant to Federal and State law, applicable regulations, its contract with MLTC, and MLTC policy.

e. The MCO must immediately report to NMPI any suspicion or knowledge of fraud including, but not limited to, the false or fraudulent filings of claims and the acceptance of or failure to return reimbursement for claims known to be fraudulent.

f. The MCO must pursue all recovery of payments identified as FWA or erroneous and reflect the recovery on the claim record. In the event that the MCO does not pursue all recoveries, including third-party liability (TPL), MLTC will pursue them and recoup the money.

g. In accordance with 42 CFR 433 and MLTC policies and procedures, the MCO must report overpayments made by MLTC to the MCO as well as overpayments made by the MCO to a provider or subcontractor.

h. The MCO, as well as its subcontractors and providers, whether contracted or non-contracted, must comply with all Federal requirements (42 CFR 455) about disclosure reporting. All tax-reporting provider entities that bill or receive Nebraska Medicaid funds as a result of this contract must submit routine disclosures in accordance with timeframes specified in 42 CFR 455(B), including at the time of initial contracting, contract renewal, within 45 calendar days of any change to the information on the disclosure form, a minimum of annually, and at any time on request.

i. The MCO must require that all its providers and subcontractors take all the necessary actions to permit the MCO to comply with the FWA and erroneous payments requirements included in this RFP, its contract with MLTC, and State and Federal regulations. To the extent that the MCO delegates oversight responsibilities to a third party, the MCO must require that the third party complies with all provisions of the contract relating to FWA and erroneous payments. Although all providers with whom the MCO contracts are enrolled in the Medicaid program and subject to its regulations, the MCO agrees to require, via contract, that those providers comply with regulations and any enforcement actions directly initiated by MLTC under its regulations, including but not limited to, termination and restitution.

j. The MCO must have a FWA and erroneous payments unit within the organization comprised of experienced staff members. As described in Section IV.D Staffing Requirements, this unit must include a State-based Program Integrity Officer and a minimum of one (1) investigator for every 50,000 or fewer members. The unit's primary purpose is to prevent, detect, investigate, and report suspected FWA and erroneous payments that may be committed by network providers, members, employees, or other third parties with whom/which the MCO contracts.

k. The MCO and its employees must cooperate fully with centralized oversight agencies responsible for FWA and erroneous payments detection and prosecution activities. This cooperation must

include providing access to all necessary case information, computer files, and appropriate staff. In addition, this cooperation may include participating in periodic FWA and erroneous payments training sessions, meetings, and joint reviews of network providers or members. The MCO must participate in the quarterly Nebraska Health Care Fraud Task force meeting by sending one of its dedicated FWA staff.

l. The MCO must cooperate fully in any investigation or prosecution by any duly authorized government agency, whether administrative, civil, or criminal. This cooperation must include providing, on request, information, access to records, and access to interview the MCO's employees and consultants, including but not limited to those with expertise in program administration, medical or pharmaceutical issues, or any other matter related to the investigation.

m. MLTC will not transfer its law enforcement functions to the MCO.

n. When NMPI requests access to or copies of any records or data maintained by the MCO or its providers, the response must be in the form and manner and by the due date requested by NMPI.

o. The MCO must confirm in writing, by completing a form that MLTC will provide during the readiness review and on an annual basis during the duration of the contract that the MCO's Compliance Officer(s) understand all requirements related to the MCO's receipt of State and Federal funds. The MCO must confirm that its officers understand that they are subject to criminal prosecution, civil action, or administration actions for any intentional false statements or other fraudulent conduct related to their contractual obligations.

p. NMPI will seek all appropriate remedies for fraud, abuse and violation of law if it determines that the MCO, a provider, employee, or subcontractor has committed fraud or abuse as defined in this contract, or has otherwise violated applicable law.

2. Policies and Procedures

a. The MCO must have policies and procedures that are designed to prevent, reduce, detect, correct, and report known or suspected FWA and erroneous payments in accordance with State and Federal requirements and its contract with the State. Requirements for these policies and procedures are described in this section.

b. All FWA and erroneous payment policies, and the designation of the compliance officer and committee must be submitted to MLTC for review and approval a minimum of 45 calendar days prior to the contract start date and a minimum of 30 calendar days prior to the intended implementation of any material changes. The MCO's submission of new or revised policies and procedures for review and approval by MLTC will not void any existing policies and procedures that have been approved by MLTC previously. Unless otherwise required by law, the MCO may continue to operate under existing policies and procedures until MLTC approves the new or revised policies for prospective application. The MCO must develop and use a certification process that demonstrates the policies and procedures were reviewed and approved by the MCO's senior management.

c. To remain in compliance with its contract with MLTC, the MCO must comply with current FWA and erroneous payments policies and procedures.

3. Prohibited Affiliations

a. In accordance with 42 CFR 438.610, a MCO may not knowingly have a relationship with and must have a proactive method to prevent the following relationship(s):

i. An individual or entity who/that is debarred, suspended, or otherwise excluded from participating in procurement activities under the Federal Acquisition Regulation or from participating in non-procurement activities under regulations issued under Executive Order No. 12549 or under guidelines implementing Executive Order No. 12549;

ii. An individual or entity who is an affiliate, as defined in the Federal Acquisition Regulation, of:

a) A director, officer, or partner of the MCO.

b) A person with beneficial ownership of 5% or more of MCO equity.

c) A person or entity with an employment, consulting, or other arrangement with the MCO under its contract with the State.

iii. Any individual or entity excluded for cause from participation in any state Medicaid program or the Medicare program.

iv. Any individual or entity listed on the Federal System for Award Management, the Office of Inspector General's List of Excluded Individuals and Entities database, or the Nebraska Medicaid Excluded Providers list.

b. The MCO must conduct a search of the then-current version of these lists monthly to capture exclusions and reinstatements that have occurred since the previous search.

c. When the MCO identifies a relationship with a debarred or excluded individual or entity, it must report it to NMPI within three (3) business days. The MCO must initiate efforts to sever the relationship with the debarred or excluded individual or entity immediately. Any individual or entity that employs or contracts with an excluded provider/individual cannot claim reimbursement from Medicaid for any items or services furnished, authorized, or prescribed by the excluded provider or individual. This prohibition applies even when the Medicaid payment itself is made to another provider who is not excluded. For example, a pharmacy that fills a prescription written by an excluded provider for a Medicaid beneficiary cannot claim reimbursement from Medicaid for that prescription.

d. If MLTC finds the MCO is not in compliance with these requirements, NMPI will notify the Federal DHHS Secretary of noncompliance and may not renew or otherwise extend the duration of the existing contract with the MCO unless the Secretary provides to the State and to the Congress a written statement describing the compelling reasons that support renewing the contract.

4. Excluded Providers

The MCO may not contract with or reimburse providers that are excluded by the Medicare, Medicaid, or Children's Health Insurance Programs (CHIP).

5. Federal Financial Participation

Federal financial participation (FFP) is not available for:

a. Funds paid to providers excluded by the Medicare, Medicaid, or CHIP. The MCO is responsible for the return of any money paid for services provided by an excluded provider.

b. Payments made to a provider or fiscal agent that fails to disclose ownership or control information.

c. Expenditures for services furnished by providers who/that fail to comply with a request made by the Federal DHHS Secretary or MLTC. As applicable, FFP will be denied for expenditures for services furnished beginning the day following the date the information was due to the Federal DHHS Secretary or MLTC and ending on the day before the date the information was supplied.

6. The MCO and MFPAU

a. The MCO and the MCO's subcontractors or providers, whether contracted or non-contracted, must make available to MFPAU, on request or as required by this contract, State or Federal law, any and all administrative, financial, or medical records relating to the delivery of services for which Nebraska Medicaid funds are expended.

b. The MCO must comply promptly with the MFPAU requests for data stored or formulated by the MCO or its subcontractors, including but not limited to, claims data, encounter data, eligibility information, and enrollment data, if MFPAU determines it is necessary to carry out its responsibilities.

c. When responding to a request for data, the MCO must certify that the data supplied to MFPAU is true, accurate, and complete. This data must be supplied without charge and in the form and time frames requested by MFPAU.

d. The MCO must allow MFPAU staff access to its location(s) of business, whether within or outside of the State. Access to the MCO's places of business must be allowed during normal business hours, and also at other times under special circumstances when after-hour admission is required. Special circumstances are at the sole discretion of MFPAU.

e. MFPAU has the right to recover inappropriately expended Medicaid funds directly from participating and non-participating providers, the MCO, its subcontractors, and any third party in the MCO network in criminally and civilly prosecuted cases or settlements. The MCO is not entitled to any part of recovered funds.

f. The MCO must subrogate to MFPAU any and all claims it has or may have, related to Nebraska Medicaid, against pharmaceutical companies, retailers, providers, or other subcontractors, medical device makers, or durable medical equipment manufacturers in the marketing or pricing of their products.

g. In the event that the MCO conducts a hearing or review of its decision to institute interventions or sanctions against a provider, MFPAU must be provided adequate notice of the hearing, and furnished copies, at that time, of any and all pleadings and evidence. MFPAU has the right to intervene in these proceedings. If necessary for MFPAU's investigative purposes, MFPAU may suspend these proceedings until MFPAU's investigation is complete.

h. Regardless of any monetary settlement, payment, intervention, sanction, or other agreement between the MCO and any provider suspected of fraud, MFPAU retains the right to pursue any and all appropriate civil or criminal actions against the provider.

7. National Provider Identifier

The MCO must require each of its contracted physicians to have a national provider identifier. This identifier must be included on the provider file submitted to the State.

8. Compliance Plan

a. The MCO must submit a written FWA and erroneous payments compliance plan to MLTC for review and approval a minimum of 45 calendar days prior to the contract start date, and annually thereafter by December 31st of each year. The initial compliance plan must be approved by MLTC before it can be implemented. Requests for revision(s) to the plan must be submitted in writing to MLTC a minimum of 30 calendar days prior to the requested implementation date of the revision(s). MLTC will respond in writing with approval or questions within 15 calendar days. Revisions must be approved by MLTC prior to their implementation.

b. The FWA and erroneous payments compliance plan must include the following components:

i. Written policies, procedures, and standards of conduct that articulate the MCO's commitment to comply with all applicable State and Federal requirements.

ii. Agreement to report all allegations of fraud to the NMPI. The policies and procedures must designate those staff members responsible for reporting fraud.

iii. The designation of a Program Integrity Officer and compliance committee that is accountable to senior management and must ensure an adequately staffed compliance office.

iv. Discussion of the compensation and qualifications of the staff, who must be adequate in number and training, to effectively monitor the Nebraska Medicaid contract.

v. Effective lines of communication between the Program Integrity Officer and the MCO's employees, providers, and subcontractors, enforced through well-publicized disciplinary guidelines.

vi. Effective training and education for the Program Integrity Officer, MCO employees, and subcontractors.

vii. Detailed information about the False Claims Act and the other provisions described in Section 1902(a)(68)(A) of the Social Security Act. A description of the methodology and standard operating procedures used to prevent, identify, intervene, and investigate FWA and erroneous payments, and to recover overpayments or otherwise sanction providers.

viii. Enforcement of standards through well-publicized guidelines included in member and provider handbooks, trainings, and member and provider newsletters.

ix. A description of the proactive specific controls in place to detect FWA and erroneous payments, including an explanation of the technology used to identify aberrant billing patterns, claims edits, post-processing review of claims, and record reviews.

x. Provision that the MCO's FWA and erroneous payments unit has access to provider records.

xi. Procedures for ongoing monitoring and auditing of MCO systems, including but not limited to, claims processing, billing and financial operations, enrollment functions, member services, provider services, and continuous quality improvement; and the MCO's providers, subcontractors, employees, and any others, as appropriate.

xii. Procedures for timely, complete, and consistent exchange of information and collaboration with NMPI, MFPAU, and MLTC's contracted external quality review organization regarding suspected fraud and abuse.

xiii. Provisions for the confidential reporting of plan violations, such as a hotline to report violations, and a clearly designated individual, such as the Program Integrity Officer, to receive them. Several independent reporting paths must be created for the reporting of fraud so that such reports cannot be diverted by any supervisors or other personnel.

xiv. Protections to ensure that no individual who reports program integrity-related violations or suspected FWA is retaliated against by anyone who is employed by or contracts with the MCO. The MCO must ensure that the identity of individuals reporting violations or suspected violations of the compliance plan must be kept confidential to the extent possible. Anyone who thinks that s/he has been retaliated against may report this violation to MLTC or the Federal DHHS Office of Inspector General.

xv. Provisions for a prompt response to detected offenses and for development of corrective action initiatives related to the contract in accordance with 42 CFR 438.608(b)(7).

xvi. Agreement to and the method the MCO will use to suspend all provider payments when notified by MLTC to suspend payments because of a credible allegation of fraud.

xvii. The method the MCO will use to comply with requests from NMPI or the MFPAU for access to and copies of any records kept by the MCO, computerized data stored by the MCO, or information maintained by MCO providers to which MLTC is authorized to have access.

xviii. The method the MCO will use to prevent payments to international accounts.

9. Employee Education

a. The MCO must comply with Federal law to educate employees about FWA, the compliance plan, and false claims recoveries (Deficit Reduction Act of 2005 – Section 6032). This includes:

i. Evidence of completed, effective education for the Program Integrity Officer and the organization's employees, MCO providers, and members about the compliance plan, FWA, and erroneous payments and how to report any allegations regarding any of them.

ii. Effective lines of communication between the compliance officer and the MCO employees, MCOs, providers, and MLTC and its designee(s).

iii. Established written policies for all employees (including management), and any subcontractor or agent of the entity, that include detailed information about the False Claims Act and the other provisions named in section 1902(a)(68)(A) of the Social Security Act. The MCO must include detailed information about the MCO's policies and procedures for detecting and preventing FWA. The MCO must also include in any employee handbook a specific discussion of the laws described in the written policies, and the whistleblower rights and protections of and for employees.

b. This training must be conducted annually for all employees and within 30 calendar days of employment for new hires.

c. The MCO must require new employees to complete and attest to training within 30 calendar days of hire related to the following in accordance with State and Federal laws:

i. MCO code of conduct training.

ii. Privacy and security (including but not limited to HIPAA).

iii. FWA and erroneous payments.

iv. Procedures for the timely, consistent exchange of information and collaboration with MLTC.

v. Organizational chart, including the Program Integrity Officer and program integrity investigator(s).

vi. Provisions of 42 CFR 438.610 and all relevant State and Federal laws, regulations, policies, procedures and guidance (including CMS' *Guidelines for Constructing a Compliance Program for Medicaid Managed Care Organizations and Prepaid Networks*) issued by MLTC, DHHS, CMS, the Office of Inspector General, including updates and amendments to these documents or any such standards established by the State.

d. The MCO must maintain a toll-free provider compliance hotline number and ensure that the number and an accompanying explanatory statement are distributed to its members and providers through its member and provider handbooks.

e. The MCO must create and disseminate written materials for educating employees, managers, providers, and subcontractors about health care fraud laws, the MCO's policies and procedures for preventing and detecting FWA and the rights of employees to act as whistleblowers. The MCO's education must comply with all requirements of Section 1902(a) (68) of the Social Security Act.

10. Service Verification

a. The MCO must have a method and regularly verify that services have been actually provided. This verification may be conducted by mail, electronic correspondence, or telephone. Sampling criteria may include a representative sample or a targeted sample. The MCO must report the results of this monitoring to NMPI quarterly.

b. The MCO must immediately notify NMPI of any providers who/that are excluded from the MCO network or that leave the network to avoid a for-cause termination.

11. Audit Requirements

a. Twice each year, the MCO must complete an error rate measurement data processing, medical necessity, and provider documentation audit of a statistically valid random sample of paid claims. The MCO must prepare an error rate measurement audit plan and submit it to MLTC for review and approval a minimum of 45 calendar days prior to the audit's planned completion date. The findings of the audit plan must be submitted to NMPI when completed. MLTC may require a corrective action plan based on the audit results.

b. The MCO must also complete quarterly audits to identify:

i. Services paid after the recipient's death or incarceration.

ii. Home-based services, such as prescription drugs, therapies, or medical supplies, received by the patient while that patient is hospitalized, or living in or treated in a setting reimbursed at an all-inclusive rate.

12. Nebraska Medicaid Program Integrity Oversight

a. The MCO must notify NMPI if it identifies patterns of data mining outliers, audit concerns, critical incidences, hotline calls, or other internal and external tips with potential implications about provider billing anomalies and/or the safety of Nebraska Medicaid members (42 CFR 455.15). This notification must be made on a minimum of a quarterly basis, unless circumstances warrant earlier notification. Along with such notification, the MCO must take steps to triage or substantiate these tips and provide timely updates to NMPI.

b. The MCO must report all tips and make all referrals to MLTC, in writing, a minimum of every two (2) weeks. The MCO must include all relevant documentation within this notification.

13. Monthly Reporting to MLTC

a. The MCO must submit the following reports to NMPI in the format, reporting period, and timeframe specified below. The MCO must also have documented policies and processes to collect the information necessary for the following reports:

i. A monthly cumulative report of all new referrals of potential FWA and erroneous payments received by the MCO. The report must be submitted electronically in an Excel spreadsheet that includes the following details: provider name, provider national provider identifier (NPI), Nebraska Medicaid Provider ID number, provider type, provider address, date the referral was received, a summary of the allegations, the previous calendar year's net payments to the provider, the current calendar years to-date net payments to the provider, the MCO staff person assigned to the referral, the source of the referral, the potential amount at risk, and a summary of investigative activities completed since receipt of the referral. The report is due by the second Friday of each month to report the previous month's information, if any.

ii. A monthly update of all previously reported referrals of provider FWA and erroneous payments under review by the MCO. The report must be sent electronically in an Excel spreadsheet and include the details from the new referrals report (described in the previous section) with updates to all investigative activities that have been completed since the receipt of the referral. This report is due by the second Friday of each month to report the previous month's information, if any.

iii.

iv. Monthly reports of claims adjudicated to finalization by the MCO in the previous calendar month. The report must include the number and dollar amount of claims submitted, the amount disallowed and reduced, the amount of payments by other sources, and net payments. This information must be reported by claim type, provider type, and the disallowed or reduced reason. The report must be sent electronically in an Excel spreadsheet. It is due by the second Friday of each month to report the previous month's information, if any.

v. A monthly report of all overpayments identified and collected. The report must be sent electronically in an Excel spreadsheet. It is due by the second Friday of each month to report the previous month's information, if any.

vi. A monthly report of all providers that have left the MCO provider network, including the provider's name, NPI, Medicaid Provider ID number, provider type, address, and reason. The report must be sent electronically in an Excel spreadsheet. It is due by the second Friday of each month to report the previous month's information, if any.

vii. A monthly report of the MCO's efforts to detect and prevent FWA. The report is due by the second Friday of each month to report the previous month's information, if any. The content of the report shall include, but is not limited to:

a) Utilization review activities.

b) Member and provider hotline complaints.

c) MCO QA/QI meeting minutes and reports.

d) All site-visit reports.

14. Collaboration with NMPI and Other MCOs

NMPI will hold regular meetings with all MCOs to review and discuss investigations, compliance, prevention, and other Program Integrity-related activities. These meetings will be attended by the MCO's Program Integrity Officer and CEO or COO. The MCO's Program Integrity Officer will serve as the primary point of contact for all issues related to FWA and erroneous payments.

15. Investigative Collaboration

a. The MCO must cooperate with all appropriate State and Federal agencies, including the MFPAU and the federal DHHS Office of Inspector General, in investigating fraud.

b. Once the MCO discovers potential fraud, it must promptly perform an investigation of all incidents of suspected or confirmed fraud that occurred in the ten years preceding the precipitating event. The MCO must promptly provide the results of any preliminary investigations to NMPI.

c. The MCO must not notify the provider of an investigation when there is a potential credible allegation of fraud.

d. The MCO must cooperate and assist MLTC and any State or Federal agency charged with the duty of identifying, investigating, or prosecuting suspected FWA or erroneous payments. At any time during normal business hours, MLTC, MFPAU, the State Auditor's Office, the Office of the Attorney General, General Accounting Office (GAO), Comptroller General, federal DHHS, or any of their designees, and as often as they deem necessary during the contract period and for a period of six (6) years from the expiration date of the contract (including any contract extensions/renewals), have the right, power, and authority to inspect or otherwise evaluate the quality, appropriateness, and timeliness of services provided under the terms of the contract or any other applicable laws.

e. The MCO and its subcontractors must make all program and financial records and service delivery sites open to the representative or any designees listed immediately above. MLTC, MFPAU, GAO, the State Auditor's Office, the Office of the Attorney General, and/or the designees of any of the above must have timely and reasonable access and have the right, power, and authority to examine and make copies, excerpts, or transcripts from any books, documents, papers, or records that are directly pertinent to a specific program for the purpose of making audits, examinations, excerpts, and transcripts; contact and conduct private interviews with MCO clients, employees, and contractors; and complete on-site reviews of all matters relating to service delivery as specified by the contract. The rights of access in this subsection are not limited to the required retention period, but will last as long as records are retained. The MCO must provide originals or copies (at no charge) of all records and information requested. Requests for information must be compiled in the form and language requested.

f. The MCO's employees and its contractors and their employees must cooperate fully and be available in person for interviews and consultation regarding grand jury proceedings, pre-trial conferences, hearings, trials, and in any other process.

g. The MCO must notify NMPI when it denies a provider credentialing application, disenrolls a provider for program integrity-related reasons, or otherwise limits the ability of a provider to participate in the program, for program integrity reasons.

16. Payment Suspension Due to Credible Allegations of Fraud

a. The MCO must comply with federal laws and regulations (such as 42 CFR 455.23) that require the suspension of Medicaid payments when there is a credible allegation of fraud. NMPI will determine whether payments should be suspended or if an exception is appropriate. NMPI will notify the MCO of payment suspensions and the MCO must then suspend payments. The MCO must ensure that no Nebraska Medicaid dollars are received by a provider whose payments have been suspended or who/that has been terminated by MLTC.

b. In cases involving potential or confirmed risk to patients, NMPI and the MFPAU may allow the MCO to engage in actions that would otherwise be prohibited. Any prior approval will be provided to the MCO in writing, from NMPI and the MFPAU, and will detail the action or actions the MCO may take. The MCO may not take any action against the provider at issue that is not specified by NMPI and the MFPAU.

c. After a credible allegation of fraud, unless prior written approval is obtained from NMPI in coordination with the MFPAU, the MCO must not take any of the following actions:

i. Contact the subject of the investigation concerning any matter related to the investigation.

ii. Institute any interventions, sanctions, or remedial procedures towards the subject of the investigation, including but not limited to hearings, suspension, or termination.

iii. Take any actions to recoup or withhold improperly paid funds already paid or potentially due to the provider.

iv. File any civil action based upon the suspected fraud against the subject of the investigation.

v. Enter into or attempt to negotiate any settlement or agreement regarding the suspected fraud.

vi. Accept any money or other thing of value offered by the subject of the investigation in connection with suspected fraud.

17. Recoupments

If the MCO thinks that it is appropriate to initiate a recoupment or withholding action against a provider under these circumstances, the MCO must consult with both NMPI and the MFPAU to ensure that such action is permissible. In the event that the MCO obtains funds from an action when recoupment or withholding is prohibited, the MCO must return the funds to the provider.

P. MCO REIMBURSEMENT

1. General Requirements

a. MLTC's contracts with MCOs for the HERITAGE HEALTH are full-risk arrangements, with the exception of a risk corridor as required and discussed in this section.

b. The State will make monthly capitation payments to the MCO to cover all services in the contract, except for any mother's costs of obstetrical deliveries, for which MLTC will pay the MCO a supplemental payment, in addition to the monthly capitation payment. Capitation payments will be made prospectively for prospective enrollment and retrospectively to the first day of the member's enrollment, and based on the MCO's electronic enrollment file.

c. The MCO must agree to accept, as payment in full, the capitation rate and supplemental payments established by MLTC pursuant to the contract, and must not seek additional payment from a member or MLTC for any unpaid cost.

d. The MCO must assume 100% liability for any expenditures above the monthly capitation rate.

e. Payment for items or services provided under this contract may not be made to any entity located outside of the United States. The term "United States" means the 50 states, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, the Northern Mariana Islands, and American Samoa.

f. The MCO must have written policies and procedures for receiving and processing payments and adjustments. Any charges or expenses imposed by financial institutions for transfers or related actions must be borne by the MCO.

2. Capitation Rate Determination Process

a. MLTC will develop cost-effective and actuarially sound rates in accordance with generally accepted actuarial principles and CMS rules and regulations, appropriate for the populations covered and the services provided, as described in this RFP.

b. MLTC will not use a competitive bidding process to determine the MCO capitation rates.

c. Capitation rates will be in effect for the initial six (6) month contract period beginning with the program start date.

d. Monthly capitation rates have been established separately for two (2) regions, shown in the map in Attachment 9 – Rating Regions:

i. Rating Region One (1) consists of 41 counties: Antelope, Boone, Burt, Butler, Cass, Cedar, Clay, Colfax, Cuming, Dakota, Dixon, Dodge, Douglas, Fillmore, Gage, Hamilton, Jefferson, Johnson, Knox, Lancaster, Madison, Merrick, Nance, Nemaha, Nuckolls, Otoe, Pawnee, Pierce, Platte, Polk, Richardson, Saline, Sarpy, Saunders, Seward, Stanton, Thayer, Thurston, Washington, Wayne, and York.

ii. Rating Region Two (2) consists of 52 counties: Adams, Arthur, Banner, Blaine, Box Butte, Boyd, Brown, Buffalo, Chase, Cherry, Cheyenne, Custer, Dawes, Dawson, Deuel, Dundy, Franklin, Frontier, Furnas, Garden, Garfield, Gosper, Grant, Greeley, Hall, Harlan, Hayes, Hitchcock, Holt, Hooker, Howard, Kearney, Keith, Keya Paha, Kimball, Lincoln, Logan, Loup, McPherson, Morrill, Perkins, Phelps, Red Willow, Rock, Scotts Bluff, Sheridan, Sherman, Sioux, Thomas, Valley, Webster, and Wheeler.

e. The categories of aid (COA) are:

i. Aged, Blind, and Disabled, ages birth to 20 years, males and females (ABD 00-20 M&F)

ii. Aged, Blind, and Disabled, ages 21 years and older, males and females (ABD 21+ M&F)

iii. Aged, Blind, and Disabled Duals, ages 21 and older, males and females (ABD 21+ Duals M&F)

iv. Aged, Blind, and Disabled, ages 21 years and older, women with cancer (ABD 21+ F-WWC)

v. Children's Health Insurance Program, males and females (CHIP M&F)

vi. Family under 1 year, M&F*

vii. Family 01-05 years, M&F

viii. Family 06-20 years, F

ix. Family 06-20 years, M

x. Family 21 years+, M&F

xi. Foster Care, M&F

xii. Katie Beckett 00-18 years, M&F

xiii. LTSS (Institutional) – Duals

xiv. LTSS (Institutional) – Non-Duals

xv. LTSS (Home and Community Based) – Duals

xvi. LTSS (Home and Community Based) – Non-Duals

*Family Category of Aid - Section 1931 Children and related and Section 1931 Adults and related populations.

Capitation rates are developed using encounter data, fee-for-service data, and supplementary financial information, from each MCO under contract at the time of this RFP's release, for the eligible populations from State fiscal years 2013, 2014, and 2015. Following is a list of adjustments considered in the rate development:

xvii. Utilization trend

xviii. Unit cost trend

xix. Medicaid program changes

xx. Coordinated care savings

xxi. MCO administrative allowance

f. Attachments 10-A – Physical and Behavioral, 10-B – Physical and Behavioral Health Databook, Rating Region 2, 10-C – Dual Databook and 10-D – Long Term Services and Supports Databook include databooks, provided by MLTC's actuary.

g. The MCO must provide any information requested by MLTC to assist in the determination of MCO rates. MLTC will give the MCO reasonable time to respond to the request, and the MCO must fully cooperate. MLTC will make the final determination as to what is considered reasonable.

h. A minimum of annually, MLTC and its actuary will jointly review the information necessary to develop actuarially-sound capitation rates. This review will include an analysis of any anticipated fee schedule changes or other programmatic changes to the HERITAGE HEALTH, claims experience cost reporting information collected from the MCO, Department of Insurance annual statements, various trend data sources, and administrative experience.

i. Any adjusted rates will be actuarially sound and consistent with requirements set forth in 42 CFR 438.6(c). Adjusted rates will require an amendment to the contract, mutually agreeable by both parties.

j. MLTC reserves the right to adjust the capitation rate more frequently than annually as program changes dictate. Circumstances precipitating a rate change include and are not limited to:

i. Changes to benefits and services included in the monthly capitation rates.

ii. Changes in Federal law, Federal regulations, State law, State regulations, State policies, or the Medicaid State Plan.

iii. Changes to Medicaid population groups eligible to enroll in HERITAGE HEALTH.

iv. Legislative appropriations and budgetary constraints.

k. MLTC's actuary will provide, as part of its certification of capitation rates, a narrative that identifies the specific data, assumptions, and methodologies behind the specific payment rates for each rating region. This narrative will address any MCO-specific factors that influence provision of

services to Medicaid members, including but not limited to, reserve contributions and capital costs.

3. Capitation Rates and Payment

a. MLTC will pay the MCO in accordance with the monthly capitation rates specified in Attachment 11 - Rates.

b. The monthly capitation payment is based on member enrollment for the month. This is determined by the total number of Medicaid members assigned to the MCO as of the last working day of the previous month. For age group assignment purposes, age is determined at the beginning of the month for which the payment is intended. The MCO will receive additional payments to cover the cost of services retroactive to the first day of the month of the member's enrollment.

c. The entire monthly capitation payment will be paid during the month of birth, the month of death, and the first month of any incarceration.

4. Transplant Services

The historical cost for transplant services is shown in Attachment 12 – Historical Transplant Cost Distribution Data. The cost for these historical transplants has been added to the base data so that the resulting capitation rates include the costs for these services. The MCO is encouraged to review the information in Attachment 12 – Historical Transplant Cost Distribution Data to assist in making a decision surrounding the appropriate level of reinsurance.

5. Supplemental Delivery Payments

a. In addition to the monthly capitation rate, MLTC will pay MCOs a one-time supplemental lump-sum payment for deliveries.

b. The MCO must pay for all covered services associated with maternity care of a pregnant member.

c. The supplemental delivery payment is intended to cover the care of the pregnant member, not the newborn.

d. When a member is enrolled in the MCO on her date of delivery and the delivery results in a live birth, MLTC will pay the MCO one supplemental maternity payment. The payment will not be prorated.

e. When a member is enrolled in the MCO for part of the pregnancy, but was not enrolled on the date of the delivery, the MCO will not receive the supplemental maternity payment, or any portion thereof.

f. For maternity cases that result in termination of the pregnancy or miscarriage, the MCO is reimbursed through the monthly capitation rate for the member. The MCO will not receive the supplemental delivery payment.

g. The supplemental payment for deliveries is intended to reimburse the MCO for five (5) months of prenatal care, the delivery, and two (2) months of post-partum care.

h. The supplemental payment is generated after documentation of a live birth. A live birth is defined as any birth not resulting in miscarriage, still birth, or any other birth not resulting in life.

i. The MCO must not bill for a supplemental maternity payment until the hospital inpatient delivery is paid by the MCO. The MCO must submit encounter data evidence of the delivery, plus any other inpatient and outpatient services for the maternity care of the member to be eligible to receive a supplemental delivery payment.

j. The MCO must request payment for the supplemental delivery payment no later than twelve months following the date of service for the delivery. Failure to have supporting records, when audited, may result in recoupment of the supplemental delivery payment.

6. Payment Adjustments

a. In the event an erroneous payment is made to the MCO, MLTC will reconcile the error by adjusting the MCO's next monthly capitation payment or future capitation payments on a schedule determined by MLTC.

b. Adjustments to prior capitation payments may occur if it is determined that a member's aid category or eligibility has changed.

c. In cases of a retroactive effective date for Medicare enrollment of a member, the MCO must recoup payments made to its providers. The MCO must initiate recoupments within 60 calendar days of the date the MCO becomes aware of Medicare enrollment. The MCO must instruct the provider to resubmit the claim(s) to Medicare.

d. The MCO must refund payments received from MLTC for a deceased member after the month of death and an incarcerated member the month after entering involuntary custody. MLTC will recoup the payment within 30 calendar days of the date MLTC notifies the MCO of death or incarceration. The MCO must notify MLTC should the MCO become aware of a member's death or incarceration.

7. Health Insurance Providers Fee

a. Pursuant to Section 26 CFR Part 47 (the applicable regulations providing guidance about section 9010 of the Affordable Care Act), the MCO must pay the Health Insurance Providers Fee (HIPF) annually. The full cost of the HIPF includes both the HIPF and the allowance for the federal income tax liability related to the HIPF.

b. MLTC will pay the portion of the HIPF specifically related to the MCO's performance of this contract, with an adjustment for federal and state income tax, as described below:

i. The MCO is required to submit Internal Revenue Service Form 8963, pursuant to the federal regulations referenced immediately above, to MLTC by September 5th of each year.

ii. All documents listed above and any additional data or information requested by MLTC must be submitted with an attestation by the reporting MCO in accordance with the certification requirements specified in Section IV.T Reporting and Deliverables.

iii. Following the determination of the amount to be reimbursed and the federal and state income tax impact related to the HIPF fee, the capitation rate per member per month for each aid category will be reprocessed. The capitation payment will include the prorated HIPF payment through December 31st. After January 1st, MLTC will determine a settlement, approved by MLTC's actuary, showing the amount already paid by the State for its portion of the HIPF tax. If the settlement calculation indicates MLTC owes the MCO, the amount due will be paid in a retroactive capitation payment.

iv. The MCO and MLTC's actuary will each calculate the HIPF, and compare the results. The MCO must provide MLTC with verification of payment to the IRS.

8. Risk Adjustment

a. Risk-adjusted rates will not be considered in the first year of this contract. For subsequent years of the contract, each MCO's proposed base capitation rates will be risk-adjusted based on the MCO's risk score, reflecting the expected health care expenditures associated with its enrolled members relative to the applicable total Medicaid population.

b. To establish risk-adjusted rates, MLTC's actuary will analyze the risk profile of members enrolled in each MCO using a national risk-adjustment model specified by MLTC.

i. Each member will be assigned to risk categories based on his/her age, gender, and disease conditions. This information and the relative cost associated with each risk

category will reflect the anticipated utilization of health care services relative to the overall population.

ii. The relative costs will be developed using State historical data from Medicaid FFS claims and MCO encounter data, as determined appropriate by MLTC's actuary.

c. Risk adjustment will be completed 60 calendar days after the end of each contract year and reviewed semi-annually. Risk adjustment may be completed more than semi-annually if MLTC determines it is warranted.

d. MLTC will provide the MCO with three months advance notice of any major revision to the risk-adjustment methodology. The MCO must provide any input regarding the proposed changes, if at all, within 14 days. MLTC will consider the feedback from the MCOs when making changes to the risk adjustment methodology.

9. Risk Corridor

a. Annual MCO profits or losses must not exceed 3% per year.

b. Profits and losses are calculated by MLTC's actuary as a percentage of the aggregate of all qualifying revenue by the MCO and related parties, including parent and subsidy companies and risk bearing partners under this contract.

c. The risk corridor calculation must be completed within nine months of the end of the contract year based on the formula below. These calculations ignore revenue taxes, non-operating income, and any forfeited hold-back. The earned hold-back from the prior year is not treated as income in the risk corridor calculation.

Risk corridor profit/loss = qualifying revenue
- MLR rebate
- Net qualified medical expenses calculated for the MLR
- Total allowed administration calculated for the administrative cap.

d. If the risk corridor calculation referenced immediately above produces a profit above 3%, the MCO must ensure that the amount over 3% is deposited in the reinvestment account, as described in this section, within nine months of the end of each contract year.

e. The MCO must provide a full financial statement and additional data as requested to MLTC and its actuary to support the risk corridor calculation. MLTC will reimburse the Federal share of the forfeited funds to CMS. The remaining State share of the forfeited funds will be returned to the MCO for deposit back into the reinvestment distribution account.

f. If the risk corridor calculation produces a loss of more than 3%, MLTC will pay the MCO an amount equal to the loss above that amount.

g. There will be no risk corridor payment by either party if the risk corridor calculation produces an amount between a three percent gain and a three percent loss.

h. Regardless of the risk corridor calculation, the MCO is eligible to receive its earned hold-back.

10. MLTC Quality Performance Program

a. The MCO must participate in the MLTC quality performance program (QPP), effective as of contract start date. The MLTC QPP must be implemented in accordance with Neb. Rev. Stat. §71-831 and any successor statutes. Neb. Rev. Stat. 71-831 is provided as Attachment 13 – Neb. Rev. Stat. 71-831.

b. Pursuant to Neb. Rev. Stat. §71-831, the MCO must hold back 1.5% of the aggregate of all income and revenue earned by the MCO and related parties under the contract in a separate account. The hold-back constitutes the maximum amount available to the MCO to earn via the quality performance program.

c. QPP measures for which the MCO is eligible to earn hold-back funds are included in Attachment 14 – Quality Performance Program Measures – Contract Year One.

d. The MCO must report its performance measures that affect the MCO's eligibility to earn hold-back funds monthly, quarterly, and annually.

e. Each year of the contract constitutes a performance year, beginning on the contract start date. MLTC will assess the MCO's performance based on the measures annually and notify the MCO of the amount of the earned hold-back and unearned (forfeited) hold-back. MLTC will make this determination within six (6) months after the end of each contract year.

f. All earned hold-back funds become the property of the MCO.

g. The MCO must deposit unearned (forfeited) hold-back funds into the reinvestment account to be forfeited to MLTC. MLTC will reimburse the Federal share of the forfeited funds to CMS. The remaining State share of the forfeited hold-back funds will be retained by MLTC.

h. No interest will be due to either party on hold-back funds retained by the MCO or returned to MLTC.

i. MLTC reserves the right to modify annually the measures and criteria for earning the hold-back funds. In the event MLTC modifies the measures or criteria, MLTC will provide the MCO 60 calendar days advance written notice. These measures will include operational or administrative measures that reflect MCO business processes and may lead to improved access to and quality of care, CMS Medicaid Adult and Child Core Measure sets, HEDIS measures, and MLTC-identified measures that represent opportunities for improvement as indicated by HERITAGE HEALTH historical performance.

j. Any earned hold-back will not be included in the MCO's income for the year nor considered part of the medical loss ratio (MLR) calculation.

11. State Performance Penalties

a. Pursuant to Neb. Rev. Stat. §71-831, 0.25% of the aggregate of all income and revenue earned by the MCO and related parties under the contract must be at risk as a penalty if the MCO fails to meet minimum performance metrics. MLTC will provide minimum performance metrics to the MCO prior to year two (2) of the contract.

b. The MCO must report its performance on the minimum performance metrics monthly, quarterly, and annually.

c. Each year of the contract constitutes a performance year, beginning on the contract start date. MLTC will assess annually the MCO's performance compared with the minimum performance metrics and notify the MCO of the amount of liquidated damages due to MLTC. MLTC will make this determination within six (6) months after the end of each contract year.

d. MLTC reserves the right to modify the minimum performance metrics and criteria for assessing liquidated damages annually. In the event MLTC modifies the metrics or criteria, MLTC will provide the MCO 60 calendar days advance written notice.

12. Administrative Cap

a. Per Neb. Rev. Stat. §71-831, 68-908, and 71-801 (2012), the MCO's administrative spending must not exceed 7%, except up to an additional 3% is allowed, if the additional amount is for the purpose of quality improvement and approved by MLTC.

b. The MCO's total administrative spending must not under any circumstance exceed 10%. The total allowable administrative expense rate is the lesser of 10% and the total of allowable QI and non-QI administrative expenses, less any related-party administrative margin.

c. With its quarterly financial report, the MCO must provide to MLTC a detailed accounting of administrative expenses, including allowable QI expense.

d. To ensure compliance with the State law, MLTC will calculate the administrative expense rate within nine months of the end of each contract year.

e. Hold-back funds, both earned and forfeited, are factored into the administrative cap calculation.

13. Medical Loss Ratio

The MCO must provide an annual Medical Loss Ratio (MLR) report to MLTC, in a form, manner, and pursuant to a timeline prescribed by MLTC. If the MLR (cost for health care benefits and services and specified quality expenditures) is less than 85%, the MCO must refund MLTC the difference. (See Attachment 15 – Medical Loss Ratio Requirements for the MLR calculation methodology and classification of costs.)

14. Reinvestment Accounts

a. Pursuant to Neb. Rev. Stat. §71-831, the MCO must provide for the reinvestment of profits in excess of the contracted amount, performance contingencies imposed by the department, and any unearned (forfeited) hold-back funds. To this end, the MCO must establish and manage two accounts:

i. A hold-back account, for the purpose of holding funds listed in the QPP. Funds in this account include both the Federal and State share of cost in the State's Medicaid program.

ii. A reinvestment account, for the purpose of holding funds pursuant to Neb. Rev. Stat. §71-831 after the federal share of cost has been returned to MLTC.

b. Both the holding and reinvestment distribution accounts must:

i. Be separate from other accounts required by the contract, or that may be required by State or Federal law.

ii. Have no risk-bearing investments.

iii. Be created and operated in full compliance with the Nebraska Uniform Trust Code (Neb. Rev. Stat. §30-3801 to 30-38110).

c. The MCO must use funds in the reinvestment distribution account in accordance with Neb. Rev. Stat. §71-831 and any successor statutes.

d. The MCO must develop, with input from MLTC and its stakeholders, a plan for expenditure of funds in the reinvestment distribution account, for approval by MLTC. The MCO must submit a report to MLTC describing implementation of the plan and evaluating the impact of an approved plan within 90 calendar days of the end of each contract year.

e. The MCO must ensure that:

i. The annual financial reporting package as describe in this section is submitted by the MCO within six (6) months of the end of each contract year.

ii. Upon written approval of the annual financial reporting package by MLTC, the MCO must transfer to the State all funds held in the reinvestment holding account.

iii. Once the State has reimbursed the federal share, the MCO must accept the remaining State share for re-deposit into the reinvestment distribution account.

f. MLTC will ensure that:

i. The annual financial reporting package, including the MLR rebate calculation, risk corridor calculation, and earned/unearned hold-back calculation is reviewed, and written approval is provided, within 45 calendar days after receipt from the MCO.

ii. All funds deposited into the reinvestment holding account are transferred to the State by the MCO for reconciliation and reimbursement of the Federal share via reporting on CMS Form 64.

iii. The federal share of such dollars is determined and reimbursed to the federal government.

iv. The remaining State share is returned to the MCO for deposit into the reinvestment distribution account, which is managed by the MCO, subject to contractual requirements.

g. The MCO will be held responsible and accountable for the necessary fiduciary duties and functions required to administer the reinvestment holding and reinvestment distribution accounts. Oversight of the financial accounting will be in accordance with the financial management reporting requirements outlined in Section IV.T Reporting and Deliverables of this RFP.

15. Return of Funds

a. All amounts owed by the MCO to MLTC, as identified through routine or investigative reviews of records or audits conducted by MLTC or other State or Federal agencies, are due no later than 30 calendar days following MCO notification, unless otherwise authorized in writing by MLTC. MLTC reserves the right to collect amounts due by withholding and applying all balances due to MLTC from future payments. MLTC reserves the right to collect interest on unpaid balances beginning 30 calendar days from the date of initial notification. Any unpaid balances after the refund is due are subject to interest at the current Federal Reserve Board lending rate or an annualized rate of 10%, whichever is higher.

b. The MCO must reimburse MLTC for any federal disallowances or sanctions imposed on the State as a result of any failure by the MCO to abide by the terms of the contract. The MCO is subject to any additional conditions or restrictions placed on MLTC by the federal DHHS as a result of the disallowance. Instructions for the return of funds would be provided by written notice.

Q. PROVIDER REIMBURSEMENT

1. Reimbursement to In-Network Providers

The MCO must reimburse in-network providers for covered services provided to its members.

2. Provider Rate Increases

The MCO must ensure that any rate increases for providers of services under the State Medical Assistance Act required by legislative appropriation are passed on in their entirety to participating providers.

3. Enhanced Payments for Primary Care Services

In accordance with Section 1202 of the Affordable Care Act, the MCO must have mechanisms in place to reimburse providers for certain evaluation and management services and immunization administration services furnished by a physician with a specialty in family medicine, general internal medicine, or pediatric medicine. These services must be reimbursed at a rate not less than 100% of the Medicare payment rate for these services. The MCO must establish payment rates for these primary care services that are, at a minimum, consistent with the equivalent FFS Medicare rate.

4. Indian Health Protections

a. Per Section 5006(d) of the American Recovery and Reinvestment Act of 2009, Public Law 111-5, the MCO must:

i. Provide I/T/U providers, whether participating in the network or not, payment for covered services provided to Indian members who are eligible to receive services from these providers either:

a) At a rate negotiated between the MCO and the I/T/U provider, or

b) If there is not a negotiated rate, at a rate not less than the level and amount of payment that would be made if the provider were not an I/T/U provider.

ii. Make prompt payment to all I/T/U providers in its network in compliance with Federal regulations regarding payments to practitioners in individual or group practices, per 42 CFR 447.45 and 447.46.

b. Additional required Indian health protections are included in Section IV.F Member Services and Education.

5. Psychiatric Residential Treatment Facilities

The MCO's rate of reimbursement for psychiatric residential treatment facilities must be no less than the published Medicaid FFS rate on the date of service.

6. Value-Based Contracting

a. It is the policy of MLTC that HERITAGE HEALTH should promote added value for members and providers. Value is captured through programs that improve outcomes and lower costs. Contracted providers shall be engaged in the pursuit of improved value. A key mechanism to achieve this is through value-based contracting arrangements. For purposes of this contract, value-based contracts are defined as payment and contractual arrangements with providers that include two components:

i. Provisions that introduce contractual accountabilities for improvements in defined service, outcome, cost or quality metrics, and

ii. Payment methodologies that align their financial and contractual incentives with those of the MCO through mechanisms that include, but are not limited to, performance bonuses, capitation, shared savings arrangements, etc.

b. The MCO must enter into value-based purchasing agreements with 30% of its provider network by the third year of the contract, and 50% of its provider network by the fifth year of the contract.. By the end of the first year of the contract, the MCO must submit to MLTC for its review and approval its plan for implementing value-based purchasing agreements. In its response to this RFP, the MCO shall describe its philosophy regarding value-based purchasing agreements and provide evidence of its effective use in the State or other markets.

c. The MCO must notify MLTC of any risk-sharing agreements it has negotiated with a provider within 15 calendar days of any contract signing with the provider containing this provision. Any provider contract that includes capitation payments must require the submission of encounter data within 90 calendar days of the date of service. As applicable, the provider contracts must comply with the requirements set forth in Section IV.I Provider Network Requirements of this RFP and in compliance with 42 CFR 434.6. The MCO must maintain all provider contracts in compliance with the provisions specified in 42 CFR 438.12 and 42 CFR 438.214, as well as this RFP. MLTC reserves the right to direct the MCO to terminate or modify any provider contract if MLTC determines that the modification or termination is in the best interest of the State.

7. Physician Incentive Plans

a. The MCO's physician incentive plans must meet the requirements of 42 CFR 422.208 and 422.210.

b. A physician incentive plan cannot make a payment, directly or indirectly, to a physician or physician group as an inducement to reduce or limit medically necessary services furnished to a member.

c. The MCO must submit any contract templates that include an incentive plan to MLTC for review and approval a minimum of 60 calendar days prior to their intended use. Any provider incentive plan must receive prior MLTC approval. The MCO must disclose the following information in advance to MLTC:

i. Services furnished by physician/groups that are covered by any incentive plan.

ii. Type of incentive arrangement (e.g., withhold, bonus, or capitation).

iii. Percent of withhold or bonus (if applicable).

iv. Panel size, and if patients are pooled, the method used.

v. If the physician/group is at substantial financial risk, documentation that the physician/group has adequate stop-loss coverage, including the amount and type of stop-loss.

d. If the physician/group is put at substantial financial risk for services not provided by the physician/group, the MCO must ensure adequate stop-loss protection for individual physicians and conduct annual member and provider satisfaction surveys.

e. The MCO must provide the information specified in 42 CFR 422.210(b) regarding its physician incentive plan to any Medicaid member on request.

f. If required to conduct member and provider satisfaction surveys (as described in Sections IV.F Member Services and Education and IV.J Provider Services), survey results must be disclosed to MLTC and, on request, to members.

8. Payments to Out-of-Network Providers

a. If the MCO is unable to provide necessary services to a member within its network, the MCO must adequately and timely arrange for the provision of these services out-of-network. In these circumstances, the MCO must ensure that any prior authorization and payment issues are resolved expeditiously.

b. The MCO must ensure that, if applicable, the cost to the member is no greater than it would have been if the services were furnished within the network.

c. For services that do not meet the definition of emergency services, the MCO is not required, unless otherwise provided for in this contract, to reimburse out-of-network providers at more than 90% of the Medicaid rate in effect on the date of service to providers with whom/which it has made a minimum of three (3) documented attempts to contract.

d. The MCO must pay for covered emergency and post-stabilization services that are furnished by providers that have no arrangements with the MCO for the provision of these services. The MCO must reimburse emergency service providers 100% of the Medicaid rate in effect on the date of service. In compliance with Section 6085 of the Deficit Reduction Act of 2005, this requirement also applies to out-of-network providers.

e. During the initial 90 calendar days of the contract, the MCO must pay out-of-network providers at 100% of the Medicaid FFS rate, to support member continuity of care.

f. The MCO may require prior authorization for out-of network services, unless those services are required to treat an emergency medical condition.

g. MCO members have the freedom to receive family planning services and related supplies from appropriate Medicaid providers outside the MCO's provider network without any restrictions. The out-of-network provider must bill the MCO and be reimbursed at no less than the Medicaid rate in effect on the date of service.

h. MCO members shall be encouraged by the MCO to receive family planning services through the MCO's network of providers to ensure continuity and coordination of a member's total care. No

additional reimbursements will be made to the MCO by MLTC for MCO members who elect to receive family planning services outside the MCO's provider network.

9. Reimbursement to FQHCs and RHCs

a. The MCO must reimburse FQHCs and RHCs in accordance with 471 NAC Chapters 29 and 34.

b. The MCO must not enter into alternative reimbursement arrangements with FQHCs or RHCs, if initiated by the FQHC or RHC, without prior approval from MLTC.

c. If a MCO is unable to contract with an FQHC or RHC within PCP access distance standards provided in Attachment 2 – Access Standards, the MCO is not required to reimburse that FQHC or RHC for out-of-network services without prior approval unless:

i. The medically necessary services are required to treat an emergency medical condition.

ii. FQHC/RHC services are not available through a minimum of one (1) MCO within MLTC's established travel standards.

d. The MCO may stipulate that reimbursement is contingent on receiving a clean claim and all medical information required to update the member's medical record.

e. The MCO must inform members of these rights in its member handbook.

10. Critical Access Hospital Contracting and Reimbursement

Per 471 NAC 10-010.03F and 10.010.06A, the MCO must make all critical access hospital (CAH) inpatient payments utilizing interim per-diem rates calculated by MLTC with an annual year-end cost settlement. The annual year-end cost settlement occurs at the end of each CAH's fiscal year. Outpatient rates are calculated by MLTC on a cost-to-charge basis with an annual year-end settlement. Critical access hospitals are listed in Attachment 16 – Critical Access Hospitals.

11. University of Nebraska Medical Center (UNMC) Physician/Practitioner Payments

In compliance with 471 NAC 18.006.02, the MCO must pass on supplemental payments for services provided by practitioners acting in the capacity of an employee or contractor of the University of Nebraska Medical Center or its affiliated medical practices, UNMC Physicians, and Nebraska Pediatric Practice, Inc. These payments are calculated into the capitation rate on a quarterly basis.

12. Provider-Preventable Conditions, Including Health Care Acquired Conditions

In accordance with Section 2702 of the Affordable Care Act, the MCO must have mechanisms in place to preclude payment to providers for provider-preventable conditions (PPCs) in compliance with 42 CFR 447.26(b). PPCs, including health care acquired conditions (HACs), are those conditions that occur in inpatient hospital settings. MLTC uses the full list of Medicare's HACs, with the exception of deep vein thrombosis/pulmonary embolism following total knee replacement or hip replacement in pediatric and obstetric patients. To ensure member access to care, any reductions in payment to providers must be limited to the added cost resulting from the PPC. The MCO must require provider self-reporting through its claims systems, and track the PPC data and report it to the State via the encounter file. See Attachment 17 – 2015 Health Care Acquired Conditions for a listing of HACs that apply to this provision.

13. Effective Date of Payment for New Members

The MCO is responsible for benefits and services in the core benefits package from and including the effective date of a member's Medicaid eligibility. The MCO must reimburse a member, for payments already made by the member, for Medicaid covered services during the retroactive eligibility period. The date of enrollment in a MCO will match the Medicaid eligibility date.

14. Inappropriate Payment Denials

If the MCO demonstrates a pattern of inappropriately denying or delaying provider payments for covered services, the MCO may be subject to suspension of new enrollments, sanctions, contract cancellation, or refusal to contract in a future time period. This applies not only to situations in which MLTC has ordered payment after appeal but also to situations in which no appeal has been made (i.e., MLTC learns of the documented abuse from other sources.)

15. Payment for Emergency Services

In the event of a medical emergency, the MCO may pay a provider that is not enrolled with MLTC for medically necessary care provided to a member.

16. Pharmacy Reimbursement

a. The MCO's dispensing fee reimbursement must be, at a minimum, the current Medicaid FFS rate for independent pharmacies (defined as those with ownership of six (6) or fewer pharmacies), unless otherwise agreed between the MCO and the pharmacy provider.

b. The MCO and the PBM may not charge pharmacy providers transaction-based or claims-processing fees. The MCO may be subject to sanctions in the event it charges these fees. This applies not only to situations in which MLTC has investigated an appeal, but also to situations in which no appeal has been made (i.e., MLTC learns of the fee from other sources).

c. The MCO must calculate dispensing fees, administration fees, and any other fee payment amounts as approved by MLTC. The MCO must maintain in each paid claim record which methodology was used to determine final payment amounts, i.e. state maximum allowable cost, national average drug acquisition cost, or the submitted usual and customary charge.

17. Maximum Allowable Cost Program

a. The MCO must establish an extensive MAC program in order to promote cost containment when generics are utilized.

b. The MCO must provide a description of its MAC program for review and written approval by MLTC a minimum of 90 calendar days prior to the contract start date.

c. The MCO must establish a process for timely notification of the MAC pricing updates to network pharmacies. It must also provide this information on the MCO's website. The information must be reviewed and updated weekly.

d. Policies and procedures about MAC pricing must be submitted to MLTC for review and approval a minimum of 90 calendar days prior to the contract start date.

e. The MCO must eliminate products from the MAC list or modify MAC rates in a timely fashion, consistent with pricing changes in the marketplace. MAC pricing must be reviewed and updated based on market changes a minimum of weekly for both price increases and decreases.

f. The MCO must have a process in place to ensure that MAC pricing is appropriate and not routinely below the wholesale price available to State pharmacists. The MCO must provide a reasonable administrative appeals process to allow a dispensing provider to contest a listed MAC rate, which includes the following requirements:

i. The MCO or its PBM must respond to a provider who has contested a MAC rate through this procedure within seven calendar days.

ii. The MCO or its PBM must take steps to determine if the MAC price is appropriate given current State market conditions.

iii. If an update is warranted, the MCO must make the change retroactive to the date of service and make the adjustment effective for all pharmacy providers in the network.

g. The MCO must provide a MAC file to the MLTC PDL contractor a minimum of quarterly. The file format will be defined by MLTC before the contract start date.

h. The MCO must override the MAC on PDL products when the name-brand product is preferred over the generic product.

i. The MCO must have a written policy and procedure that meets State and Federal requirements for providing brand-name products when the prescriber appropriately determines and documents that the brand-name product is medically necessary.

R. SYSTEMS AND TECHNICAL REQUIREMENTS

1. General Requirements

a. The MCO must maintain a health information system that collects, analyzes, integrates, and reports data. The system must provide information on areas including, but not limited to, enrollment, care management, utilization, claims adjudication and payment, grievances and appeals, and disenrollments for reasons other than loss of Medicaid eligibility. Reporting formats and other requirements will be determined by MLTC after contract award.

b. The MCO must provide documentation about its health information system that ensures data received from providers is accurate and complete by:

i. Verifying the accuracy and timeliness of reported data.

ii. Screening the data for completeness, logicalness, and consistency.

iii. Collecting service information in standardized formats to the extent feasible and appropriate.

c. The MCO must provide MLTC with live access to all its systems at any time.

2. HIPAA Standards and Code Sets

The MCO must be able to perform the following functions electronically including electronic claims management capabilities:

a. Receive enrollment verification via a HIPAA-compliant 834 format.

b. Receive electronic premium payments remittance advices via a HIPAA-compliant 820 format.

c. Provide enrollment verification in a HIPAA-compliant 270/271 format.

d. Accept prior authorization requests in a HIPAA-compliant 278 format.

e. Allow claims inquiry and response in a HIPAA-compliant 276/277 format.

f. Accept electronic claims transactions in a HIPAA-compliant 837 format.

g. Generate HIPAA-compliant electronic remittance advices in the 835 format.

h. Submit encounter data via the HIPAA-compliant 837 formats.

i. Make claims payments via EFT.

j. Transmit and receive the NCPDP transaction in the current HIPPA compliant format.

3. Resource Availability and Systems Changes

a. Resource Availability

i. The MCO must provide systems help desk (SHD) services for all MCO, MLTC and other State agency staff who may have direct access to MCO systems.

ii. The MCO's SHD must be available via local and toll-free telephone service and via e-mail from 7:00 am to 7:00 pm, central time, Monday through Friday. If requested by MLTC, the MCO must staff the SHD on a Saturday or Sunday.

iii. The MCO's SHD staff must be able to answer user questions regarding MCO system functions and capabilities; report any recurring programmatic and operational problems to appropriate MCO or MLTC staff for follow-up; redirect problems or queries that are not supported by the SHD, as appropriate, via a telephone transfer or other agreed upon methodology; and redirect problems or queries specific to data access authorization to the appropriate MLTC login account administrator.

iv. The MCO must ensure that individuals who place calls to the SHD between the hours of 7:00 pm to 7:00 am, central time, Monday through Friday, are able to leave a message. The SHD must respond to messages by noon of the following business day.

v. The MCO must ensure that recurring problems, not specific to system unavailability, identified by the SHD are documented and reported to MCO management within one business day of recognition so that deficiencies are promptly corrected.

vi. The MCO must have information systems (IS) service management system that provides an automated method to record, track, and report all questions or problems reported to the SHD.

b. Systems Policies and Procedures

i. The MCO must have in place written systems policies and procedures that document all manual and automated processes for its IS, including the safeguarding of all its information.

ii. The MCO must maintain and distribute to all users (including MLTC) distinct systems design and management manuals, user manuals, and quick reference guides.

iii. The MCO must ensure that the systems user manuals contain information about, and instructions for, using applicable systems functions and accessing applicable system data.

iv. The MCO must ensure that all manuals and reference guides are available in printed form and on the MCO's website.

v. The MCO must update the electronic version of these manuals immediately on taking effect, and make printed versions available within ten (10) business days of the update taking effect.

c. System Changes

i. The MCO's systems must conform to future federal and/or MLTC-specific standards for encounter data exchange a minimum of 90 calendar days prior to the standard's effective date, as directed by CMS or MLTC.

ii. If a system update or changes are necessary, the MCO must draft the appropriate revisions to the documentation, and forward them to MLTC for review and approval a minimum of 45 calendar days prior to intended implementation. Upon MLTC approval, the MCO must prepare revisions to the appropriate manuals before implementing the system changes, and must have printed manual revisions made within ten (10) business days of the system revision.

The MCO must notify MLTC of changes to its system a minimum of 90 calendar days prior to the projected date of the change. These changes include major upgrades, modifications, or updates to application or operating software associated with the following core production systems:

a) Claims processing.

b) Eligibility and enrollment processing.

c) Service authorization management.

d) Provider enrollment and data management.

e) Conversions of core transaction management systems.

iii. The MCO must respond to notification from MLTC of IS problems, excluding IS unavailability, in the following timeframes:

a) Within five (5) calendar days of notification from MLTC, the MCO must respond in writing regarding system problems.

b) Within 15 calendar days, the correction must be made or a requirements analysis and specifications document must be provided to MLTC.

c) The MCO must correct the deficiency by an effective date to be determined by MLTC.

d) The MCO's systems must have a system-inherent mechanism for recording any change to a software module or subsystem.

iv. Unless otherwise agreed to in advance by MLTC, the MCO must not schedule systems unavailability to perform system maintenance, repair, or upgrade activities to take place during hours that could compromise or prevent critical business operations.

v. The MCO must work with MLTC on any testing initiative required by MLTC and must provide sufficient system access to allow MLTC staff to participate in the testing activities.

4. Systems Refresh Plan

The MCO must provide to MLTC an annual systems refresh plan. This plan must outline how ISs within the MCO's span of control will be systematically assessed to determine the need to modify, upgrade, or replace application software, operating hardware and software, telecommunications capabilities, or information management policies and procedures in response to changes in business requirements, technology obsolescence, staff turnover, or any other relevant issues. The systems refresh plan must also indicate how the MCO will ensure that the version and/or release level of all IS components (application software, operating hardware, and operating software) are always formally supported by the original equipment manufacturer (OEM), software development firm (SDF), or a third party authorized by the OEM or SDF to support the IS component.

5. Eligibility and Enrollment Data Exchange

The MCO must:

a. Receive, process, and update enrollment files sent daily by MLTC or the enrollment broker.

b. Update its eligibility and enrollment databases within 24 hours of receipt of these files.

c. Transmit to MLTC, in the formats and methods specified by MLTC, member address and telephone number changes.

d. Use the member's Medicaid ID number to identify each member across multiple populations and systems within its span of control.

e. Be able to identify potential duplicate records for a single member and, upon confirmation of this duplicate record by MLTC, resolve the duplication so that the enrollment, service utilization, and member interaction histories of the duplicate records are linked or merged.

6. Other Electronic Data Exchange

a. The MCO's system must scan, house, and retain indexed electronic images of documents used by members and providers to interact with the MCO. These documents must be housed in appropriate database(s) and document management systems to maintain the logical relationships to certain key data such as member identification numbers, provider identification numbers, and claim identification numbers. The MCO must ensure that records associated with a common event, transaction, or member service issue have a common index that will facilitate the search, retrieval, and analysis of related activities, such as interactions with a particular member about a reported problem.

b. The MCO must implement optical character recognition technology that minimizes manual indexing and automates the retrieval of scanned documents.

7. Electronic Messaging

a. The MCO must provide a continuously available electronic mail communication link (email system) to facilitate communication with MLTC. This email system must be capable of attaching and sending documents created using software compatible with MLTC's installed version of Microsoft Office and any subsequent upgrades as adopted.

b. As needed, the MCO must be able to communicate with MLTC over a secure virtual private network (VPN).

c. The MCO must comply with national standards for submitting protected health information (PHI) electronically and must set up a secure email system that is password protected for both sending and receiving any PHI.

8. Provider Enrollment

On the effective date of the MCO contract and weekly thereafter, MLTC will furnish to the MCO a list of Nebraska Medicaid provider types and specialty codes. In order to coordinate provider enrollment records, the MCO must utilize these codes in all provider data communications with MLTC and the enrollment broker. The MCO will provide the following:

a. A weekly provider file to include provider name, address, licensing information, Tax ID, NPI, taxonomy, contract information, and any other data as required by MLTC and in a format specified by MLTC.

b. All relevant provider ownership information as prescribed by MLTC, Federal, or State laws.

c. Performance of all Federal- or State-mandated exclusion background checks on providers (owners and managers). The providers must perform the same checks on all of their employees a minimum of annually.

d. Provider enrollment systems must include, at a minimum, the following functionality:

i. Audit trail and history of changes made to the provider file.

ii. Automated interfaces with all licensing and medical boards.

iii. Automated alerts when provider licenses are nearing expiration.

iv. Retention of NPI requirements.

v. System-generated letters to providers when their licenses are nearing expiration.

vi. Linkages of individual providers to groups.

vii. Credentialing information.

viii. Provider office hours.

ix. Provider languages spoken.

x. Provider disability accommodations.

9. Information Security and Access Management

a. The MCO's systems must utilize an access management function that restricts access to varying hierarchical levels of system functionality and information. The access management function must:

i. Restrict access to information on a "least privilege basis (e.g., users who are permitted inquiry privileges only will not be permitted to modify information).

ii. Restrict access to specific system functions and information based on an individual user profile, including inquiry only capabilities. Global access to all functions must be restricted to specified staff, with approval of MLTC.

iii. Restrict unsuccessful attempts to access system functions to three attempts, with a system function that automatically prevents further access attempts and records those occurrences.

b. The MCO must make system information available to duly authorized representatives of MLTC and other State or Federal agencies to evaluate, through inspections or other means, the quality, appropriateness, and timeliness of services performed.

c. The MCO's systems must contain controls to maintain information integrity. These controls must be in place at all appropriate points of processing. The controls must be tested in periodic and spot audits using a methodology to be developed jointly by MLTC and the MCO.

d. Audit trails must be incorporated into all systems to allow information about source data files and documents to be traced through the processing stages to the point at which the information is finally recorded. The audit trails must:

i. Contain a unique log-on or terminal ID, the date, and time of any create/modify/delete action and, if applicable, the ID of the system job that effected the action.

ii. Have the date and identification "stamp" displayed on any online inquiry.

iii. Have the ability to trace data from the final place of recording back to its source data file or document.

iv. Be supported by listings, transaction reports, update reports, transaction logs, or error logs.

v. Facilitate auditing of individual records as well as batch audits.

vi. Be maintained online for no less than two (2) years and be retrievable within 48 hours.

e. The MCO's systems must have inherent functionality that prevents the alteration of finalized records.

f. The MCO must provide for the physical safeguarding of its data processing facilities and the systems and information housed within those facilities. The MCO must provide MLTC with access to data facilities on request. The physical security provisions must be in effect for the duration of this contract.

g. The MCO must restrict perimeter access to equipment sites, processing areas, and storage areas through a key card or other comparable system, as well as provide accountability control to record access attempts, including attempts of unauthorized access.

h. The MCO must include physical security features designed to safeguard processor site(s) including fire-retardant capabilities, as well as smoke and electrical alarms, monitored by security personnel.

i. The MCO must put in place procedures, measures, and technical security to prohibit unauthorized access to the regions of the data communications network inside the MCO's span of control. This includes but is not limited to ensuring that no provider or member services applications can be directly accessible over the internet and must be appropriately isolated to ensure appropriate access.

j. The MCO must ensure that remote access users of its ISs can only access these systems through two-factor user authentication and by methods including VPN, which must be approved in writing and in advance by the State.

k. The MCO must comply with recognized industry standards governing security of State and Federal automated data processing systems and information processing. At a minimum, the MCO must conduct a security risk assessment and communicate the results in an IS security plan provided prior to the start date of operations. This risk assessment must also be made available to appropriate Federal agencies.

10. Systems Availability, Performance, and Problem Management Requirements

a. The MCO must ensure that critical member and provider Internet and/or telephone-based functions and information, including but not limited to confirmation of MCO enrollment (CME), electronic claims management (ECM), and self-service member and provider services functions are available to the applicable IS users at any time, except during periods of scheduled system unavailability agreed to by the State and the MCO. Unavailability caused by events outside of a MCO's control is outside the scope of this requirement.

b. The MCO must ensure that, at a minimum, all other system functions and information are available to the appropriate system users between the hours of 7:00 am and 7:00 pm, central time, Monday through Friday.

c. The MCO must ensure that the systems and processes within its span of control associated with its data exchanges with the State are available and operational according to specifications and the data exchange schedule.

d. In the event of a declared major failure or disaster, the MCO's eligibility/enrollment and claims processing systems must be back online within 72 hours of the failure or disaster.

e. On discovery of any problem within its span of control that may jeopardize or is jeopardizing the availability and performance of critical systems functions and information, as defined in this section of the contract, including any problems affecting scheduled exchanges of data between the MCO and the State, the MCO must notify MLTC within 60 minutes of such discovery. In its notification the MCO must explain in detail the impact to critical path processes, such as enrollment management and encounter submission processes.

f. When the problem results in delays in report distribution or problems with online access to critical systems functions and information during a business day, the MCO must notify MLTC within 15 minutes of discovery of the problem. This notification will allow the applicable work activities to be rescheduled or handled based on IS unavailability protocols.

g. The MCO must provide a minimum of hourly updates to MLTC on IS unavailability events, including problem resolution. At a minimum these updates must be provided via email or telephone.

h. The MCO must resolve unscheduled IS unavailability and restore services of CME and ECM functions, caused by a failure of systems and telecommunications technologies within the MCO's span of control, within 60 minutes of the official declaration of system unavailability. Unscheduled system unavailability to any other MCO IS functions caused by system and telecommunications technologies within the MCO's span of control must be resolved, and the restoration of services implemented, within eight hours of the official declaration of IS unavailability.

i. Cumulative system unavailability caused by systems or infrastructure technologies within the MCO's span of control must not exceed 12 hours during any continuous 20 business day period.

j. The MCO is not responsible for the availability and performance of systems and infrastructure technologies outside of its span of control.

k. Within five (5) business days of the occurrence of a system availability problem, the MCO must provide MLTC with full written documentation that includes a corrective action plan describing how the MCO will prevent the problem from occurring again.

11. Contingency Plan

a. The MCO, regardless of the architecture of its systems, must develop and be continually ready to implement, a contingency plan to protect the availability, integrity, and security of data during unexpected failures or disasters (either natural or man-made), to continue essential application or IS functions during or immediately following the failure or disaster.

b. Contingency plans must include a disaster recovery plan (DRP) and a business continuity plan (BCP). A DRP is designed to recover systems, networks, workstations, applications, etc., in the event of a disaster. A BCP must focus on restoring the operational function of the organization in the event of a disaster and includes items related to IT, as well as operational items, such as employee notification processes and the procurement of office space, equipment, and supplies needed to do business in emergency mode.

c. The MCO must submit a final contingency plan to MLTC for review and approval no later than 45 calendar days before the contract start date.

d. At a minimum, the contingency plan must address the following scenarios:

vi. The central computer installation and resident software are destroyed or damaged.

vii. System interruption or failures that result from network, operating hardware, software, or operations errors that compromise the integrity of transactions that are active in a live system at the time of the outage.

viii. System interruption or failure that result from network, operating hardware, software, or operations errors that compromise the integrity of data maintained in a live or archival system.

ix. System interruption or failure that result from network, operating hardware, software, or operational errors that do not compromise the integrity of transactions or data maintained in a live or archival system, but prevents access to the system, such as causing unscheduled system unavailability.

x. The plan must specify projected recovery times and data loss for mission-critical systems in the event of a declared disaster.

xi. The MCO must annually test its plan through simulated disasters and lower level failures in order to demonstrate to MLTC that it can restore systems functions on a timely basis. In the event the MCO fails to demonstrate through these tests that it can restore systems functions, the MCO must submit a corrective action plan to MLTC describing how the failure will be resolved within ten business days of the conclusion of the test.

12. Off-site Storage and Remote Back-up

a. The MCO must provide for off-site storage and a remote back-up of operating instructions, procedures, reference files, system documentation, and operational files.

b. The data back-up policy and procedures must include, but not be limited to:

vi. Descriptions of the controls for back-up processing, including how frequently back-ups occur.

vii. Documented back-up procedures.

viii. The location of data that has been backed up (off-site or on-site, as applicable).

ix. Identification and description of what is being backed up as part of the back-up plan.

x. Any change in back-up procedures in relation to the MCO's technology changes.

c. MLTC must be provided with a list of all back-up files to be stored at remote locations and the frequency by which these files are updated.

13. Records Retention

a. The MCO must have online retrieval and access to documents and files for six (6) years in live systems and ten (10) years in archival systems, for audit and reporting purposes. The claims for services that have a once-in-a-life-time indicator (i.e., appendix removal, hysterectomy) must remain in the current/active claims history for claims editing and are not to be archived or purged. Online access to claims processing data must be possible by Medicaid ID number, provider ID number, and/or internal control number). The MCO must provide 48-hour turnaround or shorter for requests for access to information that is six (6) years old, and 72-hour turnaround or shorter for requests for access to information in machine readable form, that is between six (6) and ten (10) years old. If an audit or administrative, civil, or criminal investigation or prosecution is in progress; or audit findings or administrative, civil, or criminal investigations or prosecutions are unresolved; then, information must be kept in electronic form until all tasks or proceedings are completed.

b. The historical encounter data submission must be retained for a period not less than six (6) years, following generally accepted retention guidelines.

S. CLAIMS MANAGEMENT

1. General Requirements

The MCO must develop and maintain claims processes that ensure the correct collection and processing of claims, as well as analyzes, integrates, and reports data. These processes must result in information about service utilization, claims disputes, and appeals that can be used for process and program improvement.

2. Functionality

a. The MCO must maintain an electronic claims management (ECM) system that will:

i. Uniquely identify the attending and billing provider of each service.

ii. Identify the date of receipt of the claim (the date the MCO receives the claim as indicated by the date stamp on the claim).

iii. Identify real-time accurate history with dates of adjudication, results of each claim, such as paid, denied, pended, adjusted, voided, appealed, etc., and follow-up information about disputed claims.

iv. Identify the date of payment, (the date of the check or other form of payment), and the number of the check or EFT.

v. Identify all data elements as required by MLTC for encounter data submission, as described in this RFP.

vi. Have the ability to integrate member claim and diagnosis history for use when adjudicating claims to override edit checks (such as prior authorization), based on the existence of a diagnosis or prior claim history.

vii. Accept submission of paper-based claims and electronic claims by participating providers, and non-participating providers according to the MCO policies as approved by MLTC.

viii. Accept submission of electronic and paper adjustment and void transactions.

ix. Have the capability to pay claims at $0.00.

x. For the purpose of this section, identify means to capture, edit and retain.

b. The ECM capability must function in compliance with the systems and data management requirements specified in Section IV.R Systems and Technical Requirements of this RFP.

c. The MCO must have ECM capability that can handle online submission of individual claims as well as accept and process batches of claims submitted electronically, with the exception of claims that require written documentation to justify payment (e.g., hysterectomy/sterilization consent forms, certification for medical necessity for abortion, etc.).

d. The MCO must support an automated clearinghouse mechanism that allows providers to request and receive EFTs for claims payment.

e. The MCO must support a CAQH/Committee on Operating Rules for Information Exchange compliant interface to the automated clearinghouse that allows providers to request and receive EFTs of claims payments.

f. The MCO's claims processing system must be available at any time, except for scheduled downtime as agreed to by MLTC.

g. The MCO must adhere to national standards and standardized instructions and definitions that are consistent with industry norms. These must include, but are not limited to, HIPAA-based standards and federally-required safeguards, including signature requirements described in Section 112821.1 of the CMS State Medicaid Manual and 42 CFR 455.18 and 455.19.

h. The MCO must include nationally-recognized methodologies to correctly pay claims, including but not limited to:

i. Medicaid Correct Coding Initiative for professional, ambulatory surgical center, and outpatient services.

ii. Multiple procedure/surgical reductions.

iii. Global day evaluation and management bundling standards.

i. The MCO must provide online and telephone-based capabilities to obtain claim processing status information.

j. The MCO must comply at all times with standardized paper billing forms/formats and all future updates.

k. The MCO must not employ off-system or gross adjustments when processing corrections for payment errors, unless the MCO requests and receives prior written approval from MLTC.

l. The MCO agrees that if MLTC presents recommendations concerning claims billing and processing that are consistent with industry norms, the MCO must comply with these recommendations within 90 calendar days.

m. The MCO must not derive financial gain from a provider's use of electronic claims filing functionality and/or services offered by the MCO or a third party.

n. The MCO must assume all costs associated with claims processing, including costs for reprocessing encounters due to errors caused by the MCO, or due to systems within the MCO's span of control.

3. Claims Processing

a. Except for claims from pharmacy providers, the MCO must ensure that all provider claims are processed according to the following timeframes:

i. Within five (5) business days of receipt of a claim, the MCO must provide an initial screening and either reject the claim, or assign a unique control number and enter it into the system for processing and adjudication.

ii. Process and pay or deny, as appropriate, a minimum of 90% of all clean claims for medical services provided to members within 15 business days of the date of receipt. The date of receipt is the date the MCO receives the claim.

iii. Process and pay or deny, as appropriate, a minimum of 99% of all clean claims for medical services provided to members within 60 calendar days of the date of receipt.

iv. Fully adjudicate (pay or deny) all other claims within six (6) months of the date of receipt.

b. For pharmacy providers, the MCO must establish, at a minimum, a weekly payment cycle so that a minimum of 90% of all clean claims from pharmacy providers for covered services are paid within seven calendar days of receipt and 99% of all clean claims are paid within 14 calendar days of receipt, except to the extent providers have agreed to an alternative payment schedule set forth in the provider contract. Any alternative payment schedules must be reported to MLTC within three business days of their implementation.

c. Rejected Claims

i. The MCO may reject claims because of missing or incomplete information. In those circumstances, the original claim must be returned to the provider accompanied by a rejection letter.

ii. A rejected claim should not appear on a remittance advice because it will not have been entered into the MCO's claims processing system.

iii. The rejection letter must indicate why the claim is being returned, including all defects or reasons known at the time the determination is made. The letter must contain, at a minimum, the following information:

a) Member name and Medicaid ID number.

b) Provider ID number.

c) Date of service.

d) Total billed charges.

e) A list of known defects or reasons for rejection.

f) MCO's name.

g) The date the letter was generated.

d. Pended Claims

If a clean claim is received, but additional information is required for adjudication, the MCO may pend the claim and request in writing (notification via e-mail, website/provider portal, or an interim explanation of benefits (EOB) satisfies this requirement) all necessary information so the claim can be adjudicated within established timeframes.

e. Adjustments and Voids

i. Incorrect claims payments must be adjusted or voided electronically.

ii. Only a paid claim may be adjusted or voided.

iii. Incorrect provider numbers or member Medicaid ID numbers cannot be adjusted. The claim must be voided and then resubmitted.

f. Timely Filing Guidelines

i. The MCO must not deny provider claims on the basis of untimely filing for claims that involve coordination of services or subrogation (when the provider is pursuing payment from a third party). In situations of third party benefits, the timeframes for filing a claim must begin on the date that the third party completes resolution of the claim.

ii. The MCO must not deny claims solely for failure to meet timely filing guidelines due to an error by MLTC or its subcontractors. If a provider files erroneously with another MCO but produces documentation verifying that the initial filing of the claim occurred timely, the MCO must process the provider's claim and not deny for failure to meet timely filing guidelines.

iii. For purposes of MCO reporting on payments to providers, an adjustment to a paid claim must not be counted as a claim and electronic claims must be treated as identical to paper claims.

g. Claim System Edits

i. The MCO must perform system edits, including but not limited to:

a) Confirming eligibility and MCO enrollment for each member.

b) Validating member name.

c) Validating unique member identification number.

d) Confirming benefit package variations.

e) Identifying invalid, missing, and/or mismatched NPIs and/or tax identification numbers that could result in improper payments.

f) Performing system edits for valid dates of service, including ensuring that the dates of services are not in the future or outside the member's Medicaid eligibility span.

g) Ensuring that timeliness standards are met.

h) Ensuring data accuracy.

i) Determining medical necessity, as defined by qualified, medically trained, and appropriately licensed personnel, consistent with NCQA accreditation standards, whose primary duties are to assist in evaluating claims for medical necessity.

j) Determining whether a covered service requires prior authorization and if so, whether the MCO gave its approval.

k) Flagging, in an automated manner, a claim as being an actual or possible duplicate and either denying or pending the claim as necessary.

l) Ensuring that the service is covered and eligible for payment.

m) Ensuring that the system approves only those claims received from providers eligible to render services for which the claims were submitted and that the provider has not been excluded from receiving Medicaid payments.

n) Ensuring that the system evaluates claims for services provided to members to ensure that any applicable benefit limits are applied and that over-utilization standards are considered.

ii. The MCO must have the ability to update current procedural terminology (CPT)/Healthcare Common Procedure Coding System (HCPCS), International Classification of Diseases, Tenth Revision (ICD-10-CM), and other codes based on HIPAA standards and move to future versions as required.

iii. In addition to CPT, ICD-10-CM, ICD-10-PCS, and any other national coding standards, the use of applicable HCPCS Level II and Category II CPT codes are mandatory, aiding both the MCO's and MLTC's evaluation of performance measures.

iv. The MCO must perform post-payment review on a sample of claims to ensure services provided were medically necessary and were provided in accordance with State and Federal requirements. This must include, as applicable, a review of provider documentation.

4. Drug Claims Processing

a. Use of a Pharmacy Benefits Manager

i. The MCO must use a PBM to process prescription claims. The PBM must pay claims in accordance with the requirements of this RFP.

ii. The MCO must identify the proposed PBM and the ownership of the proposed PBM in its proposal. Before entering into a subcontract with a PBM, the MCO must obtain MLTC approval. If the PBM is owned wholly or in part by a retail pharmacy provider, chain drug store, or pharmaceutical manufacturer, the MCO must submit a written description of the assurances it would require and procedures it would put in place contractually, such as an independent audit, to prevent patient steering, ensure no conflicts of interest exist, and ensure the confidentiality of proprietary information. These assurances and procedures must be provided to MLTC for review and approval a minimum of 60 calendar days prior to the date pharmacy services begin under the contract.

iii. The MCO must submit a plan for oversight of the PBM's performance prior to the start of the MCO's PBM. The plan must be submitted a minimum of 60 calendar days prior to the PBM's intended contract start date for review and approval by MLTC. The PBM, if approved, must comply with this RFP and all MLTC requirements.

iv. The MCO must not allow its owned or contracted PBM to charge transaction fees to pharmacy network providers.

v. The MCO must oversee, monitor, and assist with the management of PBM activities, related to the use of mental health drugs for children, including the establishment of prior authorization criteria, clinical appropriateness of use, and step therapy requirements for the use of stimulants and antipsychotics for all enrolled members under age 18. This includes ensuring the implementation of point of service (POS) system edits defined in the DHHS Psychotropic Drugs and Youth Initiative as outlined in Attachment 8 – PBM Claims Processing Edits for the Nebraska Medicaid Psychotropic Drugs and Youth Initiative.

b. The MCO must develop and implement a master set of pricing rules and algorithms that will be applied to all pharmacy claims based on business area, and State and Federal requirements and policies. These policies and procedures must be submitted to MLTC for review and approval a minimum of 90 calendar days prior to the contract start date.

c. The MCO must allow pharmacies to fill prescriptions for covered drugs ordered by any Nebraska Medicaid provider regardless of the prescriber's managed care network participation.

d. The claims processing system must edit and validate claim transaction submissions for completeness and accuracy in accordance with National Council for Prescription Drug Programs (NCPDP) standards. The system must have the ability to accommodate existing and future NCPDP standards, including, but not limited to, electronic and paper submission of multiple ingredient compound prescriptions, and partial fills.

e. The MCO claims processing system must, at a minimum, update its NDC file weekly, including all product, packaging, prescription, and pricing information and provide online access to reference file information.

f. The MCO's claims processing system must maintain a history of the pricing schedules and other significant reference data.

g. The MCO's drug claims processing system must be available at any time, except for scheduled downtime as agreed to by MLTC.

h. Provider Identifier

i. The MCO's claims processing system must use prescriber and pharmacy NPIs for claims processing. All prescribing participating providers must have an individual NPI number. This/these must be the same NPI number(s) used for enrollment in the Nebraska Medicaid program.

ii. The MCO must deny prescriptions written by prescribers who are not enrolled with Nebraska Medicaid.

i. Prospective Drug Utilization Review

i. The claims processing system must, at a minimum, establish a central electronic repository for capturing, storing, and updating prospective DUR data.

ii. The claims processing system must assess each active drug regimen of members in terms of ingredient duplication, therapeutic duplication, drug/drug interactions, drug/age contraindications, drug/gender limitations, drug/pregnancy contraindications, drug/disease contraindications, over- and under-utilization, incorrect dosage or duration of drug treatment, clinical abuse or misuse, and other clinically appropriate evaluations.

5. Payments to Providers

a. The MCO must have procedures, approved by MLTC, available to providers in written and electronic form for the acceptance of claim submissions that include:

i. The process for documenting the date of actual receipt of non-electronic claims and the date and time of electronic claims.

ii. The process for reviewing claims for accuracy and acceptability.

iii. The process for preventing the loss of claims.

iv. The process for reviewing claims to determine if they are complete, correct, and payable.

b. At a minimum, the MCO must run one (1) provider payment cycle weekly.

c. The MCO must encourage its providers, as an alternative to the filing of paper claims, to submit and receive claims information through electronic data interchange.

d. The MCO must notify all contracted providers to file claims associated with covered services directly to the MCO or its subcontractors (as applicable), on behalf of Nebraska Medicaid members.

e. The MCO must pay providers interest at an annualized rate of 12%, calculated daily for the full period in which a payable clean claim remains unpaid beyond the 60-day claims processing deadline. Interest owed to the provider must be paid the same day that the claim is adjudicated, and reported on the encounter submission to MLTC or its designee.

6. Remittance Advice

a. The MCO must produce a remittance advice that reflects the MCO's payments or denials to providers. Each remittance advice generated by the MCO to a provider must clearly identify for each claim:

i. Name of the member.

ii. Unique member Medicaid identification number.

iii. Patient claim number or patient account number.

iv. Date of service.

v. Total provider charges.

vi. Member liability, specifying any coinsurance, deductible, copayment, or non-covered amount.

vii. Amount paid by the MCO and/or the amount denied and the HIPAA-compliant reasons for denial.

viii. An attachment to the RA if the claim was denied due to a TPL, including but not be limited to, TPL carrier information such as carrier code, policy number, and mailing address.

ix. A description of provider rights for claims disputes.

b. Adjustments and voids must appear on the RA under "Adjusted or Voided Claims" as either approved or denied.

c. The related remittance advice must be sent with the payment, unless the payment is made by EFT. Any remittance advice related to an EFT must be sent to the provider no later than the date of the EFT.

d. If a claim is partially or totally denied because the provider did not submit required information or documentation with the claim, then the remittance advice must specifically identify all the required information and documentation not submitted. Resubmission of a claim with the necessary information/documentation shall constitute a new claim for purposes of establishing the time frame for claims processing.

e. In compliance with 42 CFR 455.18 and 455.19, the following statement must be included on each remittance advice sent to providers: "I understand that payment and satisfaction of this claim will be from Federal and State funds, and that any false claims, statements, documents, or concealment of material fact, may be prosecuted under applicable Federal and/or State laws."

7. Paid Claims Sampling

a. On a monthly basis, the MCO must conduct service verification surveys including providing members' own individual EOB notices or information to a sample group of members in a manner that complies with 42 CFR 455.20 and 433.116(e). In easily understood language, the required notice must specify:

i. The description of the service furnished.

ii. The name of the provider furnishing the service.

iii. The date on which the service was furnished.

iv. The amount of payment made for the service.

b. The MCO must stratify the sample group to ensure that all provider types (or specialties) and all claim types are proportionally represented in the sample pool from the entire range of services available under the contract. To the extent that the MCO or MLTC considers a particular specialty

(or provider) to warrant closer scrutiny, the MCO may oversample this group. The paid claims sample should be a minimum of 2% of claims per month. The results must be reported to MLTC on a quarterly basis, per the requirements in Attachment 6 – Reporting Requirements.

c. The service verification surveys may be conducted at any point after a claim has been paid, but no more than 45 calendar days after the date of payment. This sampling may be performed by mail, telephonically, or in person (e.g., during case management on-site visits). Concurrent review will be allowed when tied back to a successfully adjudicated claim.

d. The MCO must track any complaints received from members and resolve the complaints according to its established policies and procedures. The resolution may be member education, provider education, or referral to MLTC. The MCO must use the feedback received through this process to modify or enhance the verification of receipt of paid services sampling methodology.

e. Within three business days, results indicating that paid services may not have been received by the member, must be referred to MLTC and the MCO's fraud and abuse department for review.

f. The MCO must report the total number of service verification surveys sent out to members, the total number of surveys completed, the total number of services requested for validation, the number of services validated, and an analysis of interventions related to complaints or other issues, all according to the interval listed in Attachment 6 – Reporting Requirements.

8. Claims Dispute Management

a. The MCO must develop an internal claims dispute process for those claims or group of claims that have been denied or underpaid. The process must be submitted to MLTC for approval a minimum of 60 calendar days prior to the contract start date.

b. The claims dispute process must give providers the option to request binding arbitration for claims that have been denied, underpaid, or bundled, by a private arbitrator who is certified by a nationally-recognized association that provides training and certification in alternative dispute resolution. If the MCO and the provider are unable to agree on an association, the rules of the American Arbitration Association apply. The arbitrator must have experience and expertise in the health care field and must be selected according to the rules of his/her certifying association. Arbitration conducted pursuant to this section shall be binding on all parties. The arbitrator must conduct a hearing and issue a final ruling within 90 calendar days of being selected, unless the MCO and the provider mutually agree to extend this deadline. All costs of arbitration, not including attorneys' fees, must be shared equally by the parties. Each party shall bear its own attorneys' fees, if any.

c. The MCO must systematically capture the status and resolution of all claim disputes, as well as all associated documentation.

d. The MCO must adjudicate each disputed claim to a paid or denied status within 30 business days of receipt.

9. Claims Payment Accuracy

a. On a monthly basis, the MCO must submit claims payment accuracy percentage reports to MLTC, in a format determined by MLTC.

b. The report must be based on an audit conducted by the MCO. The audit must be conducted by an entity or staff independent of claims management. Responsibilities and job requirements for the internal audit staff are outlined in Section IV.D Staffing Requirements of this RFP.

c. The audit must utilize a random sample of all processed or paid claims on initial submission in each month. A statistically-valid sample, with provider and financial stratification, must be selected from the entire population of electronic and paper claims processed or paid on initial submission.

d. The minimum attributes to be tested for each claim selected must include:

i. Claim data is correctly entered into the claims processing system.

ii. The claim is associated with the correct provider.

iii. Proper authorization was obtained for the service.

iv. Member eligibility on the processing date was correctly applied.

v. The allowed payment amount agrees with the contracted rate and the terms of the provider agreement between the MCO and the provider.

vi. Duplicate payment of the same claim did not occur.

vii. The denial reason, if applicable, was applied appropriately.

viii. Copayments were considered and applied if applicable.

ix. Patient liability was correctly identified and applied.

x. Modifier codes were correctly applied.

xi. Other insurance was properly considered and applied if present.

xii. Proper benefit limits were applied.

xiii. Proper coding including bundling and unbundling was applied.

e. The results of testing should be documented, at a minimum, to include:

i. Results of each attribute tested for each claim selected.

ii. The amount of any overpayment or underpayment for claims processed or paid in error.

iii. An explanation of the erroneous processing for each claim processed or paid in error.

iv. A determination of whether any error is the result of keying errors or errors in the configuration or table maintenance of the claims processing system.

v. Documentation that any claims processed or paid in error have been corrected.

f. If the MCO subcontracts for the provision of any covered services and the subcontractor is responsible for processing claims, the MCO must submit a claims payment accuracy percentage report for the claims processed by the subcontractor. The report must be based on an audit conducted in compliance with the requirements of this section of the RFP.

10. Encounter Data

a. The MCO must submit encounter data that meets established MLTC data quality standards. These standards are defined by MLTC to ensure receipt of complete and accurate data for program administration and will be closely monitored and strictly enforced. MLTC will revise and amend these standards as necessary to ensure continuous quality improvement.

b. The MCO must submit encounter data accurately, meeting the standard of 95% correct encounters. The MCO must make an adjustment to encounter claims when the MCO discovers the data is incorrect, no longer valid, or some element of the claim not identified as part of the original claim needs to be changed.

c. The MCO must make changes or corrections to any systems, processes, or data transmission formats as needed to comply with MLTC data quality standards as originally defined or subsequently amended. The MCO must comply with industry-accepted clean claim standards for all encounter data, including submission of complete and accurate data for all fields required on standard billing forms or electronic claim formats to support proper adjudication of a claim.

d. In the event that the MCO denies provider claims for reimbursement due to lack of sufficient or accurate data required for proper adjudication, the MCO must submit all available claims data to MLTC without alteration or omission.

e. When the MCO has entered into capitated reimbursement arrangements with providers, the MCO must require submission of all utilization or encounter data to the same standards of completeness and accuracy, including pricing information, as required for proper adjudication of FFS claims. The MCO must require this submission from providers as a condition of the capitation payment and must make every effort to enforce this contractual provision to ensure timely receipt of complete and accurate data.

f. The MCO must submit all data relevant to the adjudication and payment of claims in sufficient detail, as defined by MLTC, in order to support comprehensive financial reporting and utilization analysis.

g. The MCO must submit encounter data according to standards and formats as defined by MLTC, complying with standard code sets and maintaining integrity with all reference data sources, including provider and member data.

h. All encounter data submissions are subject to systematic data quality edits and audits on submission to verify not only the data content but also the accuracy of claims processing. Any batch submission that contains fatal errors that prevent processing or that does not satisfy defined threshold error rates will be rejected and returned to the MCO for immediate correction. Re-submittals of rejected files, or notification of when the file will be resubmitted, must be completed within one business day of receipt.

i. MLTC will reject or report individual claims or encounters failing certain edits, as deemed appropriate and necessary by MLTC, to ensure accurate processing or encounter data quality, and will return these transactions to the MCO for research and resolution. MLTC will require expeditious action on the part of the MCO to resolve errors or problems associated with these claims or the adjudication of these claims, including any necessary changes or corrections to any systems, processes, or data transmission formats. Generally the MCO must, unless otherwise directed by MLTC, address 90% of reported errors within 30 calendar days and address 99% of reported errors within 60 calendar days. These errors will be considered acceptably addressed when the MCO has either confirmed and corrected the reported issue or disputed the reported issue with supporting information or documentation that substantiates the dispute.

j. MLTC may require resubmission of the transaction with reference to the original in order to document resolution. Failure to promptly research and address reported errors, including submission of and compliance with an acceptable corrective action plan as required, may result in damages and sanctions as described in Section IV.V Contract Non-Compliance.

k. The MCO must collect and submit to MLTC complete and accurate data on member characteristics, provider characteristics, and services furnished to members through an encounter data system, per the State's specifications.

l. The MCO must submit all data relevant to the adjudication and payment of claims in sufficient detail, as defined by the State, to support comprehensive financial reporting and utilization analysis.

m. The MCO must adhere to applicable Federal and MLTC payment rules in the definition and treatment of certain data elements, such as units of service.

n. The NPI is required on all claims and encounter submissions from providers who are eligible for an NPI. The MCO must assist providers to obtain an NPI, if necessary.

o. The MCO must ensure that encounter files contain settled claims, adjustments, denials, and voids, including but not limited to, adjustments necessitated by payment errors, processed during that payment cycle, as well as encounters processed during that payment cycle from providers with whom/which the MCO has a capitation arrangement. The MCO must ensure that the level of detail associated with encounters from providers with whom/which the MCO has a capitation arrangement must be equivalent to the level of detail associated with encounters for which the MCO receives and settles as a FFS claim.

p. The MCO CEO, CFO, or their designee must attest to the truthfulness, accuracy, and completeness of all encounter data submitted.

q. All institutional and professional encounters must be submitted electronically in the standard HIPAA transaction formats, specifically the American National Standards Institute X12N 837. Compliance with all applicable Federal (including but not limited to HIPAA) and State requirements, as amended, is required. MLTC and the MCOs will coordinate the timing of the transition to future HIPAA standard transaction formats, as appropriate.

r. Initially, pharmacy encounter claims must be submitted in the State's current proprietary format. In the future, the MCOs are expected to move to the standard NCPDP transaction format. MLTC and the MCOs will coordinate the timing of the transition to the NCPDP transaction format. Compliance with Federal and State requirements, as amended, is required.

s. The MCO must have the capability to convert all information that enters its claims system via hard copy paper claims to electronic encounter data, for submission into the appropriate HIPAA compliant formats.

t. Encounter records must be submitted so that payment for discrete services that may have been submitted in a single claim can be ascertained.

u. Encounter data must be submitted a minimum of monthly on a date designated by MLTC and include all clean claims adjudicated and/or adjusted by the MCO.

v. Within two (2) business days of the end of a payment cycle, the MCO must generate encounter data files for that payment cycle from its claims management system(s) and/or other sources. If the MCO has more than one (1) payment cycle within the same calendar week, the encounter data files may be merged and submitted within two (2) business days of the end of the last payment cycle during the calendar week.

w. The MCO must submit a weekly claim-level detail file of pharmacy encounters to MLTC that includes individual claim level detail information on each pharmacy claim dispensed to a Medicaid patient, including but not limited to, the total number of metric units; dosage form, strength, and package size; and NDC for each covered outpatient drug dispensed to Medicaid enrollees.

x. The MCO must institute processes to ensure the validity and completeness of the data it submits to MLTC. At its sole discretion, the State will conduct general data validity and completeness audits using industry-accepted statistical sampling methods. Data elements that will be audited include, but are not limited to: member ID, date of service, provider ID (including NPI number and Medicaid ID number), category and sub-category (if applicable) of service, diagnoses codes, procedure codes and modifiers, revenue codes, adherence to hard benefit limits, date of claim processing, and date of claim payment. Control totals will also be reviewed and verified. Additionally, the MCO must reconcile all encounter data submitted to the State to control totals and to the MCO's MLR reports and supply this reconciliation to MLTC with each MLR report submission as specified in Attachment 6 – Reporting Requirements.

11. Drug Rebates

a. Nebraska Medicaid is required to and submits the following claims for rebate per Section 1927 of the Social Security Act:

i. Outpatient pharmacy drugs.

ii. Outpatient hospital drugs.

iii. Provider-administered drugs.

b. Section 1903(m)(2)(A) of the Social Security Act states that any outpatient drugs provided by MCOs are eligible for the rebates authorized under Section 1927 of the Act.

c. The MCO must incorporate the following requirements into its appropriate day-to-day systems and business activities:

i. Include the NDC and the date of payment for all encounter data for provider-administered drugs.

ii. Ensure that the NDC is appropriate for the HCPCS/CPT code based on the drug description, strength, and date of service.

iii. Ensure that the HCPCS/CPT and NDC units reported represent a medically appropriate dosing.

iv. Ensure that the date of service of the claim is not past the CMS-determined termination date of the drug.

v. Ensure the NDC is from a rebate-eligible manufacturer on the date of service of the claim.

d. The MCO must ensure that its pharmacy claims process recognizes claims from 340B pharmacies at the claims level for products purchased through the 340B discount drug program, and must have a system in place to transmit these files to MLTC's proprietary system. The MCO must utilize the NCPDP field designated for this purpose, or may include the 340B instructions in its Provider Handbook.

e. The MCO must disclose all financial terms and arrangements for remuneration of any kind that apply to the MCO and any prescription drug manufacturer or labeler, including, without limitation, formulary management, drug-switch programs, educational support, claims processing, pharmacy network fees, data sales fees, and any other fees. MLTC has the right to audit this information at any time. MLTC agrees to maintain the confidentiality of information disclosed by the MCO pursuant to this section, to the extent that the information is confidential under applicable law.

f. The MCO is not authorized to negotiate rebates with drug companies for PDL products. MLTC or its designee will negotiate rebate agreements. If the MCO or its PBM has an existing rebate agreement with a manufacturer, all Medicaid outpatient drug claims, including drugs administered by medical professionals, must be exempt from these agreements.

g. The MCO must implement a process to timely support MLTC's Medicaid rebate dispute resolution processes. The MCO must assign a single point of contact to research any encounters that are denied on submission to MLTC or identified as a dispute by the manufacturer within 30 calendar days. The MCO must provide an explanation of these disputes to MLTC at the encounter level in a spreadsheet. If claim information is found to be in error, the encounter must be voided within five (5) business days of the determination.

h. The MCO must submit all drug encounters, including retail pharmacy prescription encounters and medical claim encounters for drugs administered by medical professionals, with the exception of inpatient hospital drug encounters, to MLTC. MLTC or its vendor will submit these encounters for federal supplemental pharmacy rebates from manufacturers under the authority of the MLTC Director pursuant to Section 2501 of the ACA.

12. Disputed Drug Encounter Submissions

a. At a minimum, on quarterly basis, MLTC will review the MCO's drug encounter claims and send a file back to the MCO of disputed encounters that were identified through the drug rebate invoicing process, if any.

b. Within 60 calendar days of receipt of a disputed encounter file from MLTC, the MCO must, if needed, correct and resubmit any disputed encounters and send a response file that includes (1) corrected and resubmitted encounters, or (2) a detailed explanation of why the disputed encounters could not be corrected, including documentation of all attempts to correct the disputed encounters at an encounter claim level.

c. In addition to the administrative sanctions in Section IV.V Contract Non-Compliance, failure by the MCO to submit weekly drug encounter claims files and/or a response file to the disputed encounters file within 60 calendar days as detailed immediately above may result in a quarterly offset to the MCO's capitation payment. This offset will equal the value of the rebate assessed for the disputed encounters.

13. Audit Requirements

a. The MCO must ensure that its systems facilitate the auditing of individual claims. Adequate audit trails must be provided throughout the systems. To facilitate claims auditing, the MCO must ensure that the systems follow, at a minimum, the guidelines and objectives of the American Institute of Certified Public Accountants Statement on Standards for Attestation Engagements (SSAE) No. 16, Reporting on Controls at a Service Organization.

b. State Audits

i. The MCO must provide to any State auditor (including the Auditor of Public Accounts), or his/her designee, on written request, files for any specified accounting period for which a valid contract exists, in a file format or audit-defined media required by the auditor. The MCO must provide information necessary to assist the auditor in processing or using the files.

ii. If the auditor's findings point to discrepancies or errors, the MCO must provide a written corrective action plan to MLTC within ten (10) business days of receipt of the audit report.

c. Audit Coordination and Claims Reviews

i. The MCO must coordinate audits with MLTC or its designee and respond within 30 calendar days of a request by MLTC regarding the MCO's review of a specific provider and/or claim(s), and the issue reviewed.

ii. In the event MLTC or its designee identifies a mispayment, the MCO has 30 calendar days from the date of notification of the mispayment to determine if the claim(s) were corrected or adjusted prior to the date of MLTC notification. On receipt of this notification, the MCO must not correct the claims, unless directed to do so by MLTC.

iii. MLTC reserves the right to review any claim paid by the MCO or its designee. The MCO has the right to collect or recoup any overpayments identified by the MCO from providers of service in accordance with existing laws or regulations. However, if an overpayment is identified by the State or its designee one year or later from the date of payment, the MCO will collect and remit the overpayment to MLTC. In the event the MCO does not collect mispayments from the provider within 30 calendar days of notification of the overpayment, the MCO must refund the overpayment to MLTC. Failure by the MCO to collect an overpayment from a provider does not relieve the MCO from remitting the identified overpayment to MLTC.

d. If the MCO performs pharmacy services audits, it must submit to MLTC the policies and procedures of this process for review and written approval. The MCO must not utilize contingency-fee-based pharmacy audits.

14. Claims Processing Reports

a. The MCO will report to MLTC, on a monthly basis, summary data on claims payment activity and reasons for claims denials. The reporting requirements will be provided by MLTC.

b. In concert with its claims payment cycle, the MCO must provide an electronic status report indicating the disposition of every adjudicated and adjusted claim for each claim type submitted by providers seeking payment as well as capitated payments generated and paid by the MCO. The status report must contain appropriate explanatory remarks related to payment or denial of the claim, including but not limited to, TPL data.

15. Third-Party Liability

a. General TPL Information

i. Pursuant to applicable law, the Medicaid program is the payer of last resort. All other available TPL resources must meet their legal obligation to pay claims before the MCO pays for the care of a Medicaid member.

ii. The MCO must exercise full assignment rights as applicable; must make every reasonable effort to determine any TPL to pay for services rendered to members under this contract; and, cost avoid or recover this liability from the third party(ies).

iii. At the request of MLTC, the MCO must demonstrate that reasonable effort has been made to seek, collect, and report TPL, and the MCO's cost avoidance and recovery efforts.

iv. MLTC has the sole responsibility for determining whether or not reasonable efforts have been demonstrated. This determination will consider reasonable industry standards and practices.

v. The MCO must coordinate benefits in accordance with 42 CFR 433.135, et seq., and 471 NAC 3-004 in order to avoid costs and recover payments from liable parties as appropriate. The term "state" means "MCO" for purposes of complying with the Federal regulations referenced in the immediately preceding sentence. However, the MCO must pay and chase claims for which third-party liability is derived from an absent parent whose obligation to pay support is being enforced by the DHHS Division of Children and Family Services.

vi. The MCO may utilize subcontractors to comply with coordination-of-benefit efforts for services provided under this contract. The two methods for coordinating benefits are cost avoidance and post-payment recovery.

vii. TPL is established when the MCO receives confirmation that another party is, by statute, contract, or agreement, legally responsible for the payment of a claim for a health care item or service delivered to a member.

viii. If the probable existence of TPL cannot be established, the MCO must adjudicate the claim. The MCO must recover payments if TPL is later determined to exist.

ix. The MCO must identify the existence of potential TPL to pay for covered services through the use of diagnosis and trauma code editing in accordance with 42 CFR 433.138(e).

x. If a TPL insurer requires the member to pay any co-payments, coinsurance, or deductibles, the MCO is responsible for making these payments even if the services are provided outside of the MCO network.

xi. The MCO, or its subcontractors or providers, must not pursue collection from the member, but directly from the liable third party(ies), except as allowed in 468 NAC Chapter 4-002 and 471 NAC Chapter 3-004.

xii. MLTC may require a MLTC-contracted TPL vendor to review paid claims that are over 90 calendar days old and pursue TPL (excluding subrogation) for those claims that do not indicate recovery amounts in the MCO's encounter data.

xiii. MLTC is solely responsible for estate recovery activities and will retain any and all funds recovered through these activities.

b. Cost Avoidance

i. The MCO must cost-avoid a claim if it establishes the probable existence of TPL at the time the claim is filed.

ii. The MCO may "pay and chase" the full amount allowed under the MCO payment schedule for the claim and then seek reimbursement for any liable TPL if:

a) The claim is for labor and delivery and postpartum care; however, any cost associated with the inpatient hospital stay for labor and delivery and post-partum care must be cost-avoided.

b) The claim is for prenatal care for pregnant women, or preventive pediatric services (including EPSDT).

c) The claim is for a service that is provided to an individual on whose behalf child support enforcement is being carried out by the state Title IV-D child support agency. The MCO must seek recovery of reimbursement within 60 calendar days after the end of the month in which the payment was made.

c. Post-Payment Recovery

i. Post-payment recovery is necessary in cases in which the MCO has not established the probable existence of TPL at the time services were rendered or paid for, or was unable to cost avoid.

ii. The MCO must seek recovery within 60 calendar days after the end of the month it learns of the existence of a liable third party after a claim is paid.

iii. The MCO must have established procedures for recovering post-payments for MLTC's review and approval during the readiness review.

iv. The MCO must void encounters for claims that are recouped in full. For recoupments that are not recouped in full, the MCO must submit adjusted encounters.

v. The MCO must seek reimbursement in accident/trauma-related cases when claims in the aggregate equal or exceed $250, as required by the Medicaid State Plan.

vi. The amount of any recoveries collected by the MCO outside of the claims processing system must be treated by the MCO as offsets to medical expenses for the purposes of reporting.

d. Distribution of TPL Recoveries

i. The MCO may retain up to 100% of its TPL collections if all of the following conditions exist:

a) Total collections received do not exceed the total amount of the MCO financial liability for the member.

b) There are no payments made by MLTC related to FFS claims, reinsurance, or administrative costs (i.e., lien filing, etc.).

c) Such recovery is not prohibited by applicable law.

ii. MLTC will utilize TPL data in calculating future capitation rates.

e. TPL Reporting Requirements

i. The MCO must provide TPL information to MLTC weekly in a format required by MLTC and must cooperate in any manner necessary with MLTC or its cost recovery vendor.

ii. Any money recovered from third parties will be retained by the MCO and reported monthly to MLTC.

iii. The MCO must post all third-party payments to claim level detail by member. The MCO must include the collections and claims information in the encounter data submitted to MLTC, including any retrospective findings via encounter adjustments.

iv. At the request of MLTC, the MCO must provide information not included in encounter data submissions that may be necessary for the administration of TPL activity. This information must be provided within 30 calendar days of MLTC's request. This information may include, but is not limited to, individual medical records to determine liability for the services rendered.

v. The MCO must report members with third party coverage to MLTC on a monthly basis, reporting additions and updates of TPL information in a format and medium specified by MLTC.

vi. The MCO must submit an annual report of all health insurance collections for its members plus copies of any Form 1099s received from insurance companies for that period of time.

f. Right to Conduct Identification and Pursuit of TPL

i. MLTC may pursue recovery if the MCO fails to recover reimbursement from the third party, to the limit of legal liability, 365 days from the date of service of the claim(s).

ii. The MCO must seek subrogation amounts regardless of the amount believed to be available as required by Federal law. The amount of any subrogation recoveries collected by the MCO outside of the claims processing system must be treated by the MCO as offsets to medical expenses for the purposes of reporting.

16. Coordination of Benefits Data

a. MLTC or its designee will provide the MCO with a list of known third party resources for its members via the enrollment file, based on information made available to MLTC at the time of eligibility determination or re-determination. If the MCO operates or administers any non-Medicaid HMO, health plan, or other lines of business, the MCO must assist MLTC with the identification of members with access to other insurance.

b. The MCO must provide, to MLTC, any third party resource information, in a format requested by MLTC, and must cooperate with MLTC or its cost-recovery vendor.

17. Coordination of Benefits for Dual Eligible Members

a. The MCO is responsible for providing medically necessary covered services to members who are also eligible for Medicare if the service is not covered by Medicare. The MCO must ensure that services covered and provided under this contract are delivered without charge to members who are dually eligible for Medicare and Medicaid. The MCO must coordinate with Medicare payers, Medicare Advantage Plans, and Medicare providers as appropriate to coordinate the care and benefits of members who are also eligible for Medicare. The MCO must propose strategies, in its RFP response, to coordinate care for dually-eligible members.

b. The MCO must sign a Coordination of Benefits Agreement and participate in the automated crossover process administered by Medicare. Under this crossover process, a Medicare provider, who may or may not be part of the MCO's network, must submit a claim to Medicare and there is an automatic crossover to MLTC for whatever Medicaid payment is due.

c. The MCO must include in all of its provider agreements provisions to ensure continuation of benefits. In addition, the provider agreement must specify the provider's responsibility regarding TPL, including:

i. Identifying TPL coverage, including Medicare and long-term care insurance as applicable.

ii. Seeking TPL payments before submitting claims to the MCO.

T. REPORTING AND DELIVERABLES

1. General Requirements

a. This section of the RFP describes in general terms the requirements placed on the MCO regarding State and Federal reporting. Program and financial reporting requirements are discussed throughout the RFP and summarized in Attachment 6 – Reporting Requirements. The MCO must comply with all reporting requirements, or to the extent it does not it may be subject to penalties, sanctions, or contract termination.

b. All deliverables are subject to review by the State and will not be considered complete until deemed complete by MLTC. The format and content of each deliverable must be defined and

agreed upon prior to the onset of work. The State will not review a deliverable unless the format and content has been approved in advance.

c. MLTC may grant approval, reject all or some part of the deliverable, or request that revisions be made by the MCO. Additional review periods are required whenever revisions are requested or a deliverable is rejected. Each deliverable must be consistent with previously approved deliverables. The State reserves the right to require the MCO to revise deliverables previously approved or to reject current deliverables based on inconsistencies with previously approved deliverables.

d. MCO policies are subject to approval by MLTC, and will be monitored through operational reviews.

2. Ownership Disclosure

Federal laws require full disclosure of ownership, management, and control of Medicaid MCOs (42 CFR 455.100-455.106). The MCO must disclose this information to MLTC with its proposal. This information must be provided during the readiness review, annually thereafter for each contract year, and within 30 calendar days of any change in the MCO's management, ownership or control.

3. Information Related to Business Transactions

a. The MCO must furnish, to MLTC and the federal DHHS, information related to significant business transactions as set forth in 42 CFR 455.105. Failure to comply with this requirement may result in termination of this contract.

b. The MCO must submit, within 30 calendar days of a request made by MLTC, full and complete information regarding:

i. The ownership of any subcontractor with whom/which the MCO has had business transactions totaling more than $25,000 during the 12-month period ending on the date of the request.

ii. Any significant business transactions between the MCO and any wholly owned supplier, or between the MCO and any subcontractor, during the five (5) year period ending on the date of the request.

c. For the purpose of this contract, "significant business transactions" means any business transaction or series of transactions during any State fiscal year that exceed(s) $25,000 or 5% of the MCO's total operating expenses, whichever is greater.

4. Encounter Data

a. The MCO must comply with the required format and timelines provided by MLTC for the submission of encounter data. Encounter data includes claims paid or denied by the MCO or the MCO's subcontractors for services delivered to members through the MCO during a specified reporting period. MLTC collects and uses this data for many purposes such as federal reporting, rate setting, risk adjustment, service verification, managed care quality improvement, utilization patterns, access to care determinations, and various research studies.

b. MLTC may change the encounter data transaction requirements with 90 calendar days advance written notice to the MCO. The MCO must, on notice from MLTC, make the necessary changes to its systems to comply with MLTC requirements and provide notice of the changes to its contractors. It is the MCO's responsibility to ensure that its contractors comply with MLTC requirements within the specified timeframes.

5. Financial Reporting

a. The MCO must submit quarterly and annual financial reporting to MLTC. The details and timing of the reports will be developed with MCO input. Examples of expected reports include, but are not limited to:

i. Certification statement.

ii. Balance sheet.

iii. Income statement.

iv. Lag (incurred but not reported) report.

v. Medical loss ratio calculation.

vi. Profit/risk corridor calculation report.

vii. Related-party statements.

viii. Run rate income statement.

ix. Auditor's report and report on internal controls.

x. Performance measure calculation reports.

xi. Annual disclosure report.

xii. Enrollment/revenue reconciliation.

b. MLTC also requires the MCO to electronically provide detailed claims and membership data that tie to the run rate income statement. The MCO's response to a MLTC data request shall include, at a minimum, the following data fields:

i. Rating category.

ii. Category of service.

iii. Utilizers.

iv. Paid dollars.

v. Paid units.

vi. Units measure.

vii. Paid days.

viii. Cost per unit.

ix. Cost per day.

x. Per member per month (PMPM) cost.

xi. Member months.

xii. Month of service.

xiii. Month of payment.

c. The MCO must obtain an annual financial audit acceptable to MLTC for any expenditure of State-awarded funds made by the MCO. The audit must include management letters and audit recommendations.

d. State auditors must have access to all records and accounts for the contract year(s) in which the award was made. The MCO must comply with Federal and State single audit standards, as applicable. MLTC reserves the right to audit or request an audit (at the MCO's expense) of any data or report required under the contract.

e. Risk contracts must provide that MLTC and CMS may inspect and audit any financial records of the MCO or its contractors. There must be no restrictions on the right of the State or Federal government to conduct whatever inspections and audits either of them deem necessary to assure quality, appropriateness, or timeliness of services and reasonableness of their costs.

6. Information on Persons Convicted of Crimes

The MCO must furnish to MLTC information about any person convicted of a criminal offense under a program relating to Medicare (Title XVIII) and Medicaid (Title XIX) as set forth in 42 CFR 455.106. Failure to comply with this requirement may lead to termination of this contract.

7. Submission Process and Timeframes

a. The MCO must ensure that all required deliverables, which may include documents, manuals, files, plans, or reports, as stated in this RFP or required at a future date, are submitted to MLTC in a timely manner for review and approval. The MCO's failure to submit the deliverables as specified may result in the assessment of liquidated damages, as stated in Section IV.V Contract Non-Compliance of this RFP.

b. MLTC may, at its discretion, require the MCO to submit additional deliverables both ad hoc and recurring. If MLTC requests any revisions to the deliverables already submitted, the MCO must make the changes and re-submit the deliverables, according to the time period and format required by MLTC. A 60 calendar day notice will be given on changes to any ongoing reports.

c. Unless otherwise specified in Attachment 6 – Reporting Requirements, deadlines for submitting deliverables are:

i. Monthly deliverables must be submitted no later than the 15th calendar day of the following month.

ii. Quarterly deliverables must be submitted within 45 calendar days of the last day of the calendar quarter immediately preceding the due date.

iii. Annual reports and files, and other deliverables due annually, must be submitted within 30 calendar days following the 12th month of the contract year; except, those annual reports that are specifically exempted from this 30 calendar day deadline by this RFP or by written agreement between MLTC and the MCO.

iv. If a due date falls on a weekend or State-recognized holiday, deliverables are due the next business day.

8. Ad Hoc Reports

a. The MCO must prepare and submit any other reports required and requested by MLTC, any of MLTC's designees, the State Legislature, or CMS that are related to the MCO's duties and obligations under this contract. Information considered to be proprietary must be clearly identified by the MCO at the time of submission.

b. Ad-hoc reports must be submitted within five business days from the date of request, unless otherwise specified by MLTC.

9. Errors

a. The MCO must prepare complete and accurate reports for submission to MLTC. If after preparation and submission, a MCO error is discovered, either by the MCO or MLTC, the MCO must correct the error(s) and resubmit the report within the following timeframes:

i. For encounters, in accordance with the timeframes specified in the Section IV.S Claims Management of this RFP.

ii. For all reports, 15 calendar days from the date of discovery by the MCO or date of written notification by MLTC (whichever is earlier). MLTC may at its discretion extend the due date if an acceptable plan of correction has been submitted and the MCO can

demonstrate to MLTC's satisfaction that the problem cannot be corrected in 15 calendar days.

b. Failure of the MCO to respond within these timeframes may result in penalties per Section IV V Contract Non-Compliance..

10. Reporting Dashboard

a. The MCO must work with MLTC to develop a reporting dashboard. The purpose of this dashboard is to provide MCO and MLTC leadership with easily accessible MCO results related to access to and quality of care, as well as program cost-effectiveness. Access to this dashboard will be determined in consultation with MLTC. The dashboard must be operational within six months after the contract start date. The dashboard will augment, but not replace, other reporting templates required by MLTC. At its sole discretion, MLTC may determine that reports generated by this dashboard are sufficient and may no longer require the MCO to complete similar or other reports. Dashboards must be updated within the timelines specified by MLTC. The reporting dashboard must include, at a minimum, statistics related to:

i. Member enrollment.

ii. Call center statistics.

iii. Status of credentialing applications.

iv. Performance measures.

v. Care management.

vi. Pending grievances and appeals.

vii. Pending claims.

viii. Financial status.

ix. Any other issues as identified by MLTC.

b. MLTC reserves the right to require MCO participation in an alternative reporting and dashboard system at its discretion.

U. CONTRACT MONITORING

1. MCO Policies and Procedures

MLTC will provide the MCO with updates to attachments; other information; interpretation of all pertinent State and/or Federal Medicaid regulations; and, MCO policies, procedures, and guidelines affecting the provision of services under this contract. The MCO will submit written requests to MLTC for additional clarification, interpretation, or other information, as appropriate. Provision of this information does not relieve the MCO of its obligation to keep informed of applicable State and Federal laws related to its obligations under this contract.

2. Operational Reviews

a. In accordance with CMS requirements (42 CFR 438.204), MLTC, or its designee, will conduct periodic operational reviews to ensure program compliance and identify best practices. The reviews will identify and make recommendations for areas of improvement, monitor the MCO's progress towards implementing mandated programs or operational enhancements, and provide the MCO with technical assistance when necessary. The type and duration of the review will be solely at MLTC's discretion.

b. This monitoring by MLTC does not relieve the MCO of its responsibility to continuously monitor its providers' and subcontractors' performance to ensure compliance with contract provisions.

c. Except in cases in which advance notice is not possible or advance notice may render the review less useful, MLTC will give the MCO a minimum of three (3) weeks advance notice of the date of

a review. MLTC reserves the right to conduct reviews without notice to monitor contractual requirements and performance.

d. MLTC, or its designee, will coordinate with the MCO to establish the scope of any review, the review site (if on-site), relevant time frames for obtaining information, and the review criteria.

e. MLTC may request, at the expense of the MCO, to conduct on-site reviews of functions performed at out-of-State locations and will coordinate travel arrangements and accommodations with the MCO.

f. The review may include an inspection of the MCO's facilities, as well as auditing or review of any records including, but not limited to, medical records, grievances, enrollments, disenrollments, utilization and medical management, finance, management systems, policies and procedures, or any other areas or materials relevant to this contract.

g. In preparation for a review, the MCO must cooperate with MLTC, by forwarding, in advance, policies, procedures, job descriptions, contracts, records, logs, and any other materials upon request. Documents not requested in advance must be made available during the course of a review. MCO staff must be available at all times during a review. The MCO must provide an appropriate private workspace and internet access to the review team.

h. The MCO will be provided a copy of the draft review report and given the opportunity to comment on any review finding prior to MLTC issuing the final report, unless the review concerns potential fraudulent or criminal action. The MCO must develop corrective action plans based on the recommendations, if necessary. However, once MLTC finalizes the findings, the MCO must comply with all recommendations that result from the review. Failure to comply with recommendations for improvement may result in monetary penalties, sanctions, and/or enrollment restrictions.

i. Corrective action plans and any modifications must meet the approval of MLTC. Unannounced follow-up reviews may be conducted at any time after the initial operational review, to determine the MCO’s progress in implementing the recommendations and achieving compliance.

j. The MCO may not distribute, or otherwise make available, the operational review tool, draft operational review report, or final report to other MCOs.

3. Business Reviews

a. MLTC will schedule business reviews with each MCO, which will be held on a quarterly basis or frequency as determined by MLTC. Business reviews are regular meetings with MLTC staff and MLTC leadership to review ongoing business operations of the MCO, performance metrics, quality outcomes, and other topics as determined by MLTC.

b. The MCO shall participate in MLTC-organized business reviews.

c. The MCO CEO will participate in, and ensure other key staff members as requested by MLTC to participate in the business reviews. The CEO must ensure the MCO is prepared to participate pursuant to an MLTC-developed agenda and/or presentation template.

V. CONTRACT NON-COMPLIANCE

1. Administrative Actions

a. In the event the MCO fails to perform any obligation under the contract, at the discretion of MLTC, the MCO may be subject to the administrative actions detailed below. , MLTC will provide written notice to the MCO of non-compliance or deficiency. Administrative actions exclude liquidated damages, intermediate sanctions, and termination, and include:

i. A warning through written notice (may include consultation).

ii. Education about program policies and billing procedures. The MCO may be required to participate in a provider education program as a condition of continued participation.

MCO education programs may include attendance at quarterly meetings, at which issues and topics may include, but not be limited to:

a) The use of procedure codes.

b) The review of key provisions of the Medicaid program.

c) Instruction about reimbursement rates.

d) Instruction about how to inquire about coding problems.

e) Quality/medical issues.

iii. Submission of a Corrective Action Plan (CAP). MLTC will approve and monitor implementation of the CAP through available reporting resources, on-site evaluations, and required status reports.. The CAP must address:

a) The steps to be taken by the MCO to comply with the terms of the contract.

b) A timeframe for anticipated compliance and a date certain for correction of the issue.

2. Liquidated Damages

MLTC may impose liquidated damages if the terms of the CAP are not met. Liquidated damages will continue until satisfactory correction of the issue has occurred, as determined by MLTC.

In the event the MCO fails to comply with any term or condition of the RFP or specifically subparagraphs a – h as listed below, the damages detailed in this section and Attachment 18 – Liquidated Damages may be assessed in the sole discretion of MLTC. If assessed, the damages will be used to reduce MLTC's payments to the MCO. If the damages exceed amounts due from MLTC, the MCO will be required to make cash payment to MLTC for the amount in excess.

a. Readiness Review

MLTC will conduct a formal review of the MCO's readiness to implement all required services described in this RFP. Should the MCO fail the review, MLTC may assess damages of $5,000 for each calendar day until such time as MLTC certifies that the MCO has met all readiness requirements.

b. Date of Implementation

Should the MCO fail to begin full operations on the contract start date, and should MLTC determine that the MCO is responsible for the delay, MLTC may assess damages of $10,000 per calendar day for each day beyond the contract start date that the MCO fails to begin full operations.

c. Timely Reports and Data Delivery Requirements

All reports and data (including encounters) required by the contract must be produced in the format and media approved by MLTC and submitted by the due dates required by MLTC. If the data is incomplete, incorrect, or untimely, MLTC may assess a penalty of $1,000 for each calendar day that a report or data delivery is late, includes less than the required copies, or is not in the approved format.

d. Network Performance Requirement

Between the contract award date and the contract start date, the MCO must have a contracted provider network in place, sufficient in size and composition to meet the service requirements of its members on the contract start date. The required attestation of network sufficiency must be submitted to MLTC a minimum of 90 calendar days prior to the contract start date. MLTC may assess a penalty of $1,000, per calendar day, for each day that the provider network is not adequate to meet the service needs of its members.

e. Employment of Key Personnel

The MCO must meet all key personnel requirements specified in Section IV.D Staffing Requirements of this RFP. MLTC may assess a penalty of $1,000 per day, per position, for each day after the 30 allowed calendar days that a key position remains unfilled by a qualified person approved by MLTC.

f. Excessive Reversals on State Fair Hearings

If more than 10% of the MCO decisions on member appeal are overturned by the State Fair Hearing process the MCO may be assessed a penalty of $25,000 per reversal exceeding 10% in a contract year.

g. Marketing and Member Education Violations

i. Whenever MLTC in its discretion determines the MCO or any of its agents, subcontractors, volunteers, or providers has engaged in any unfair, deceptive, or prohibited marketing or member education practices in connection with proposing, offering, selling, soliciting, or providing any health care services, in the discretion of MLTC one or more of the remedial actions specified in Section IV.V Contract Non-Compliance shall apply.

ii. Unfair, deceptive, or prohibited marketing practices shall include, but are not limited to:

a) Failing to secure written approval before distributing marketing or member materials.

b) Engaging in, encouraging, or facilitating prohibited marketing by a provider.

c) Directly marketing to members or potential members.

d) Failing to meet time requirements for communication with new members (e.g., distribution of welcome packets or welcome calls).

e) Failing to provide interpretation services or make materials available in required languages.

f) Engaging in any of the prohibited marketing or member education practices detailed in this RFP.

g) Making false or misleading verbal or written statements, visual descriptions, advertisements, or other representations of any kind that have the capacity, tendency, or effect of deceiving or misleading MCO members or potential members about any health care services, the MCO, any health care provider, or the HERITAGE HEALTH.

h) Representing that a MCO or network provider offers any service, benefit, access to care, or choice that it does not offer.

i) Representing that a MCO or health care provider has any status, certification, qualification, sponsorship, affiliation, or licensure that it does not possess.

j) Failing to state a material fact, if the failure deceives or tends to deceive.

k) Offering any kickback, bribe, award, or benefit to any Medicaid enrollee as an inducement to select, or to refrain from selecting, any health care service, MCO, or health care provider.

l) Using the Medicaid member's or another person's information that is confidential, privileged, or which cannot be disclosed to or obtained by the user without violating a State or Federal confidentiality law, including:

1) Medical records information.

2) Information that identifies the member as a recipient of any government-sponsored or mandated health coverage program.

m) Using any device or artifice in advertising a MCO or soliciting Medicaid enrollees that misrepresents the solicitor's profession, status, affiliation, or mission.

iii. If MLTC determines that the MCO or its subcontractor(s) has marketed to and the member has enrolled in the MCO, MLTC may impose the following sanctions:

a) The MCO will be required to send a letter to each member, notifying the member of the violation and of his/her right to select another MCO. The members disenrollment will be on the earliest effective date allowed.

b) Any payments made to the MCO on behalf of the member(s) will be recouped if the member disenrolls.

c) The MCO will be assessed an additional $5,000 monetary sanction per member.

iv. If MLTC determines that the MCO has violated any of the marketing and/or outreach requirements outlined in the contract, the MCO may be subject to damages up to $10,000 per violation. The amount of damages is at the discretion of MLTC.

h. Other Liquidated Damages may be assessed as otherwise permitted in the RFP.

i. MLTC will provide written notice and factual basis for the assessment of liquidated damages to the MCO. Within ten (10) business days of receipt of the written notice, the MCO may appeal the assessment of liquidated damages in writing to the Deputy Director of the Delivery Systems Section of MLTC. A written decision will be issues within ten (10) business days. Within five (5) business days of receipt of the written decision, the MCO may request reconsideration of the decision in writing to the Director of MLTC. The Director shall issue a written opinion within 30 calendar days. No further appeals shall be allowed.

3. Failure to Provide Benefits and Services

If MLTC determines that the MCO has failed to provide one or more benefits or services, MLTC will direct the MCO to provide the benefit(s) or service(s). If the MCO continues to refuse to provide the benefit(s) or service(s), MLTC will authorize the member(s) to obtain the services from another source and will notify the MCO in writing that the MCO will be charged the actual cost of the services. In this event, funds equivalent to the expense(s) will be deducted from the next monthly capitation payment or a future payment as determined by MLTC. With the deductions, when made, MLTC will provide a list of the affected member(s) concerning which payments to the MCO have been deducted, the nature of the benefit(s) or service(s) denied, and payments MLTC made or will make to provide the medically necessary covered benefit(s) or service(s).

W. INTERMEDIATE SANCTIONS

1. Acts or Failures to Act Subject to Intermediate Sanctions

The following violations are grounds for intermediate sanctions that may be imposed in the sole discretion of MLTC when the MCO act or fails to act:

a. The MCO fails substantially to provide medically necessary services that the MCO is required to provide, under law or under its contract with MLTC, to a member covered under the contract.

b. The MCO imposes on members premiums or charges that are in excess of allowable charges permitted under the Medicaid program.

c. The MCO discriminates against members on the basis of their health status or need for health care services.

d. The MCO misrepresents or falsifies information that it furnishes to CMS or to the State.

e. The MCO misrepresents or falsifies information that it furnishes to a member, enrollee, or health care provider.

f. The MCO fails to comply with the requirements for physician incentive plans, if applicable.

g. The MCO distributes, directly or indirectly through any agent, marketing materials that were not approved in advance by MLTC or that contain false or materially misleading information.

h. The MCO violates any of the other applicable requirements of sections 1903(m) or 1932 of the Social Security Act and any implementing regulations.

i. Any other action or inaction that the State deems a violation and that merits a sanction consistent with this section.

2. Other Misconduct Subject to Intermediate Sanctions

MLTC in its sole discretion also may impose sanctions against a MCO if it finds any of the following non-exclusive actions or occurrences:

a. The MCO failed to correct deficiencies in its delivery of service after having received written notice of these deficiencies from MLTC.

b. The MCO was excluded from participation in Medicare because of fraudulent or abusive practices, pursuant to Public Law 95-142.

c. The MCO or any of its owners, officers, or directors was convicted of a criminal offense relating to performance of the contract with MLTC, of fraudulent billing practices, or of any negligent practice resulting in death or injury to a MCO member.

d. The MCO presented, or caused to be presented, any false or fraudulent claim for services, or submitted or caused to be submitted false information to the State or CMS.

e. The MCO engaged in a practice of charging and accepting payment (in whole or part) from members for services for which a PMPM payment was made to the MCO by MLTC.

f. The MCO rebated or accepted a fee or portion of a fee or charge for a member referral.

g. The MCO failed to repay or make arrangements for the repayment of identified overpayments or otherwise erroneous payments.

h. The MCO failed to keep, or make available for inspection, audit, or copying, the records regarding payments claimed for providing services.

i. The MCO failed to furnish any information requested by MLTC regarding payments for providing goods or services.

j. The MCO furnished goods or services to a member, which at the sole discretion of MLTC, and based on competent medical judgment and evaluation, are determined to be insufficient for his/her needs, harmful to the member, or of grossly inferior quality.

3. Sanction Types

a. MLTC may impose the following intermediate sanctions at its sole discretion:

i. Civil monetary penalties as specified in Attachment 18 – Liquidated Damages.

ii. Appointment of temporary management as described in this section.

iii. Granting members the right to terminate enrollment without cause and notifying the affected members of their right to disenroll.

iv. Suspension of all new enrollments into the MCO, including auto-assignments, as of the effective date of the sanction.

v. Suspension of payment for members enrolled after the effective date of the sanction, unless and until CMS or MLTC is satisfied that the reason for imposition of the sanction no longer exists and is not likely to recur.

vi. Any other remedy, right, or sanction allowed under the contract or applicable law.

b. Payments under the contract will be denied for new members when, and for as long as, payment for those members is denied by CMS in accordance with the requirements of 42 CFR 438.730.

4. Notice of Sanction to MCO and CMS

a. Prior to imposing any intermediate sanction, the State will give the MCO timely written notice that explains the following:

i. The basis and nature of the sanction.

ii. The MCO's right to an administrative hearing.

b. MLTC will give the CMS Regional Office written notice whenever it imposes or lifts an intermediate sanction for one of the violations listed in 42 CFR 438.700, specifying the affected MCO, the kind of sanction, and the reason for MLTC's decision to lift a sanction (if applicable). Notice will be given no later than 30 calendar days after MLTC imposes or lifts the sanction.

5. Payment of Liquidated Damages and Sanctions

a. The purpose of establishing and imposing liquidated damages is to provide a means for MLTC to obtain the services and level of performance required for successful operation of the contract. MLTC's failure to assess liquidated damages in one or more of the particular instances described herein will in no event waive the right, power, or authority of MLTC to assess additional liquidated damages or actual damages at that time or in the future.

b. The decision to impose liquidated damages (including intermediate sanctions) will include consideration of some or all of the following factors:

i. The duration of the violation.

ii. Whether the violation (or one that is substantially similar) has previously occurred.

ii. The MCO's compliance history.

iii. The severity of the violation and whether it imposes an immediate threat to the health or safety of the MCO's members.

iv. The good faith exercised by the MCO in attempting to achieve or remain in compliance.

c. The violations described in Attachment 18 – Liquidated Damages are examples of the grounds, but not an exclusive list of grounds, on which MLTC may impose liquidated damages.

d. Any liquidated damages assessed by MLTC that cannot be collected through withholding from future capitation payments will be due and payable to MLTC within 30 calendar days after the MCO's receipt of the notice of liquidated damages. However, in the event an appeal by the MCO results in a decision in favor of the MCO, any funds withheld by MLTC will be returned to the MCO as consistent with the appeal decision.

6. Special Rules for Temporary Management

a. MLTC may install temporary management if it finds that there is continued egregious behavior by the MCO, including, but not limited to, behavior that is described in 42 CFR 438.706, or that is contrary to any requirements of Sections 1903(m) and 1932 of the Social Security Act.

b. MLTC will impose temporary management if it finds that a MCO has repeatedly failed to meet substantive requirements in Sections 1903(m) or 1932 of the Social Security Act. In this circumstance, MLTC must also notify members of the MCO of their right to select another MCO, and allow them to do so. The State may not delay imposition of temporary management to

provide a hearing regarding the sanction. In addition, MLTC will not terminate temporary management until it determines that the sanctioned behavior will not recur.

7. Payment of Outstanding Monies or Collections from MCO

The MCO will be paid for any outstanding monies due less any assessed liquidated damages or sanctions. If liquidated damages exceed monies due, collection will be made from the MCO performance bond or any insurance policy or policies required under this contract, as appropriate. The rights and remedies provided in this clause shall not be exclusive and are in addition to any other rights and remedies provided by law or under this contract.

8. Provider Sanctions

Nothing contained in this RFP shall prohibit MLTC, pursuant to applicable law, from imposing sanctions, including civil liquidated damages, license revocation, and Medicaid termination, on a health care provider for its violations of applicable law.

X. TRANSITION AND IMPLEMENTATION

1. Preliminary Implementation Plan

a. The MCO is responsible for submitting a preliminary implementation plan with its proposal. This plan must describe the MCO's plan to comply with all the major areas of the contract including:

i. Member services.

ii. Network development and management.

iii. Quality management, including credentialing.

iv. Care management.

v. Utilization management.

vi. Transition and care coordination.

vii. Information systems management.

viii. Claims management.

ix. Grievances and appeals.

b. The preliminary implementation plan must also address staffing, facilities, and other operational issues as identified in this RFP and the MCO's proposal. The plan must include tasks, deliverables, and milestones necessary to implement the program.

2. Transition Period

a. The transition period for the contract begins on contract award and ends 90 calendar days after the contract start date. During the transition period the MCO must implement the requirements of the contract and this RFP and collaborate with MLTC to facilitate a seamless transition between MCOs, providers, and programs in order to prevent an interruption of services and to ensure continuity of care for members.

b. On contract award, the MCO must immediately begin collaborating with MLTC to review the contract, its proposal, and preliminary implementation plan. The MCO must provide to MLTC implementation plan updates, weekly, and collaborate with MLTC to address the following:

i. Defining project management and reporting standards.

ii. Establishing communication protocols between the MCO, MLTC, and existing providers.

iii. Defining expectations for the content and format of contract deliverables.

iv. Resolving transition and implementation issues to MLTC's satisfaction.

c. At minimum, the MCO must have the following key staff in place to participate in the transition coordination/collaboration process:

i. Chief Executive Officer.

ii. Chief Operating Officer.

iii. Medical Director/Chief Medical Officer.

iv. Behavioral Health Clinical Director.

v. Member Services Manager.

vi. Provider Services Manager.

vii. Information Management and Systems Director.

viii. Quality Management Coordinator.

ix. Case Management Administrator.

3. Comprehensive Implementation Plan

a. After contract award and before contract start date, the MCO must develop a detailed and comprehensive implementation plan to monitor progress throughout the transition/implementation period.

b. The MCO must include in its implementation plan a detailed description of its implementation tasks, methods, staff accountable for completing tasks, and timelines, at a minimum for the following areas/issues:

i. Staffing.

ii. Data systems including system readiness testing, acceptance testing, transfer of electronic data and records, and a data conversion plan to include, at a minimum, intake, closure, eligibility, demographics, encounters, and other file data.

iii. Network development.

iv. Clinical transition.

v. Utilization management.

vi. Care management.

vii. Quality management.

viii. Member services.

ix. Member outreach/communications.

x. Security, business continuity, disaster recovery, and contingency planning.

xi. Member Handbook and Provider Manual completion.

xii. Claims and eligibility interface development.

xiii. Compliance plan.

xiv. Financial reporting plan.

xv. Member and staff orientation and training plans.

xvi. Post-implementation deliverables.

4. Network Adequacy Requirement

The MCO must have a contracted provider network in place, sufficient in size and composition, to meet MLTC's access standards and the requirements of the covered population 90 calendar days prior to the contract's start date. The MCO must submit to MLTC a network development plan with its proposal. This plan must be updated upon contract award and bi-weekly until the contract effective date. The plan must detail the MCO's network, including GeoAccess reports, and describe any provider network gaps and the MCO's remediation plans. Additional requirements regarding network adequacy are included in Section IV. I Provider Network Requirements of this RFP.

5. Personnel

The MCO must submit key staff resumes with its proposal, as possible. All key staff, as detailed in Section IV.D Staffing Requirements must be hired prior to the Readiness Review. A minimum of two (2) weeks prior to the readiness review, the MCO must submit to MLTC the resumes of any key staff member (that was not submitted with the MCO's proposal) for MLTC review and approval. At that time, the MCO must submit updated organizational charts. The MCO must have sufficient personnel working and operating in the State during the transition and implementation period in order to be fully compliant with the terms of the contract.

6. Transitioning of Managed Care Members and Operations

a. When applicable, the MCO must transition members receiving services so care is not disrupted.

b. The MCO must collaborate with the current MCOs, the behavioral health MCO, the Pharmacy Benefits Manager, and providers to develop and implement care plans for members who require them during the transition and deliver all services contained in the plans.

c. At a minimum, the MCO must provide service information, emergency telephone numbers, and instructions about how to obtain additional services to each member affected by the transition.

d. If applicable and as necessary, the MCO must transition from the current MCO to the new MCO, pending grievances, appeals, and member/provider service issues to ensure their timely resolution.

e. The MCO must have a sufficient number of qualified staff to meet filing deadlines and attend all court or administrative proceedings.

7. Transitioning from the MLTC FFS Pharmacy Program to the MCO Pharmacy Program

a. The MCO must submit a transition plan to MLTC for review and approval prior to the start date of operations that includes, at a minimum, procedures for continuity of care of prior authorized pharmacy services when an individual transfers from the MLTC FFS pharmacy benefit to the MCO pharmacy plan. This transition plan must ensure that members can continue treatment with any prescribed medications for a period of a minimum of 90 calendar days.

b. The MCO must load to its pharmacy claims processing system the current prior authorization records from MLTC or its designee prior to the contract start date. The MCO is responsible for creating drug reference file conversion tables if needed. The MCO must also load the current restricted services designation(s) by the MLTC FFS pharmacy program to its system prior to the contract start date.

8. Readiness Review

a. Prior to the contract start date, MLTC will conduct an operational and financial readiness review of the MCO, and will provide needed technical assistance. The MCO must cooperate with MLTC's review process to assess the MCO's operational readiness and ability to provide covered services to members as of the contract start date. The MCO will be permitted to commence operations, and Medicaid enrollees will be enrolled with the MCO, only if the readiness review factors are met to MLTC's satisfaction.

b. Based on the results of the review, MLTC will issue a letter of findings and, if necessary, request a corrective action plan from the MCO.

c. The readiness review will cover all provisions of the contract with a particular focus on assessing the following areas:

i. Network adequacy.

ii. Staffing adequacy.

iii. Subcontracts.

iv. Provider services.

v. Member services.

vi. Quality management.

vii. Care management.

viii. Utilization management.

ix. Financial management.

x. Information processing and system testing.

xi. Transition of behavioral health recipients.

xii. Continuity of care.

xiii. Grievance and appeal process.

d. During the readiness review, the MCO must provide to MLTC staff access to MCO staff, operational documentation (including a demonstration of computer systems), private workspace, and the internet.

e. If the MCO is unable to demonstrate its ability to meet the requirements of this contract, as determined by MLTC, within the time frames specified by MLTC, MLTC may terminate this contract and have no liability for payment to the MCO.

Y. Termination of MCO Contract

a. In the event a MCO is terminated or its contract expires, the MCO must provide services through the end of the contract term and pay for all covered services for all members prior to the date of contract termination.

b. The MCO must submit, for approval by MLTC, a detailed plan for the transition of its members to another MCO that includes the schedule for key activities and milestones. The MCO must:

i. Make provisions for continuing all management and administrative services and the delivery of direct services to members until the transition of all members is completed and all other requirements of the current contract are satisfied.

ii. Designate a person with the appropriate training to act as the transition coordinator. The transition coordinator must interact closely with MLTC and staff from the other MCO to ensure a safe and orderly transition.

iii. Provide all reports set forth in this contract necessary for the transition process. This includes providing MLTC, until MLTC is satisfied that the MCO has completed all outstanding obligations, the following additional reports. These reports are due on the fifth day of each succeeding month for the prior month:

iv. Monthly claims aging report by provider/creditor including incurred-but-not-reported amounts.

v. Monthly summary of cash disbursements.

vi. List of all outstanding obligations necessary to complete the contract.

vii. Notify subcontractors of contract termination or expiration, as directed by MLTC.

viii. Notify all its members that the MCO will no longer serve as their MCO a minimum of 45 calendar days in advance of the termination. The MCO shall be financially responsible for all costs associated with this notification. The notification must be approved in advance by MLTC.

ix. Notify each participating provider in writing that the MCO's contract with MLTC is ending a minimum of 45 calendar days in advance of the termination. The written notice must include the contract end date and must explain to the participating provider how the provider can continue participating in the Medicaid program. The MCO shall be financially responsible for all costs associated with this notification. The notification must be approved in advance by MLTC.

x. Pay all outstanding obligations for covered services provided to members. The MCO must cover continuation of services for members for the period for which payment is made, as well as for inpatient admissions up until the member's discharge.

xi. Cooperate with other MCOs during the transition period including, at a minimum, sharing and transferring member information and records. MLTC will notify the MCO with specific instructions and about required actions at the time of transfer.

xii. Return any funds advanced to the MCO for coverage of members for periods after the contract end date to MLTC within 30 calendar days of the contract end date.

xiii. Supply all information necessary for reimbursement of outstanding claims.

xiv. Provide MLTC, in a format approved by MLTC:

a) A list of all network providers.

b) A list of members who are receiving care management services.

c) A list of all services requiring MCO prior authorization.

d) A list of all members receiving prior authorized services with an approved duration that extends beyond the contract termination date.

Z. FFS CLAIMS MANAGEMENT AND PROCESSING

The State of Nebraska intends to award a minimum of two (2) and a maximum of three (3) MCO contracts for the scope of work as described in Section IV. A. Program Description through Y. Termination of MCO Contract. One of the awarded contracts will also include the scope of work as described in Section IV. Z. FFS Claims Management and Processing.

1. Claims Broker Services

The State is currently in the process of replacing its aged Medicaid Management Information System (MMIS). As part of this transition, the State is moving toward a model of contracting with risk-bearing entities for the provision of services for nearly all Medicaid members and services. As this transition continues, the State will be responsible for processing fewer FFS claims for fewer members. Rather than procure a standalone claims processing system for these remaining needs, the State intends to enter into a services agreement with a MCO.

In addition to the MCO responsibilities outlined in this RFP, MLTC will award the processing of the remaining Nebraska Medicaid FFS claims, hereafter referred to as "claims broker services," to a single MCO. Any reference to claims in this section is also inclusive of FFS adjustments, recoupments, voids, and financial transactions. Payment for claims broker services will be paid separately from managed care capitation payments. MLTC will pay the claims broker an administrative processing fee for each unique adjudicated FFS claim or adjustment on a monthly basis. MLTC will provide the per unique claim initial rate.

MLTC will reimburse the MCO for claims broker services based on a per claim administrative fee. The fee will be adjusted yearly based on administrative expense for the FFS claims processing. Each year, the CBS will report the PMPM costs for FFS claims by the following categories:

1. Provider Services
2. Care Coordination / Service Authorizations
3. Member Customer Services
4. Data Capture
5. Claim / Adjustment Processing and Adjudication
6. TPL/COB
7. Grievance and Appeals

All values in red below indicate a value that must be submitted by the CBS.

Category	**Populations not covered by Managed Care 2.0 - All Services**
Provider Services	(1)
Care Coordination / Service Authorizations	(2)
Member Customer Services	(3)
Data Capture	(4)
Claim / Adjustment Processing and Adjudication	(5)
TPL/COB	(6)
Grievance/Appeals	(7)
Total	**(1)+(2)+(3)+(4)+(5)+(6)+(7) = (8)**
MMs	**(9)**
Annual Dollar Est.	**(8) * (9) = (10)**

The State will use the reported values to calculate an updated total dollar estimate by taking the total PMPM for each population and multiplying it by the corresponding MMs (as illustrated by (10), in the above table). This annual dollar estimate will be divided by the fee-for-service claim volume for each year to determine the administrative price per claim for the next year.

MLTC will pay for a claim to be processed multiple times if the resubmission is due to provider error. If a claim is denied multiple times due to a claims broker error, MLTC will only pay to process the claim once.

The claims broker must provide detailed reports to the State for validation of FFS payments and recoveries. The claims broker is responsible for all servicing aspects of FFS claims unless otherwise expressly identified as an exception by MLTC. MLTC will award the claims broker services portion of this contract to the winning MCO with the highest score for Section IV. R. Systems and Technical Requirements, S. Claims Management and Z. FFS Claims management and Processing.

The MCO chosen as the claims broker must develop and maintain claims handling and payment policies and procedures in accordance with Nebraska Medicaid policy, CMS's National Correct Coding Initiative (NCCI) guidelines and Medicaid service limits. The claims broker must ensure accurate collection, processing, payment, and reporting of all FFS claims.

2. Reimbursement for Claims Broker FFS Payments

The claims broker must make payments for all FFS claims to providers. The claims broker must submit to MLTC a reconciliation report of all funds expended and received with remaining balance to be reimbursed for FFS payments. The claims broker may submit a funding request on a weekly basis to MLTC to cover the cost of FFS claims payments. The report must be submitted with each funding request to justify the request.

3. Implementation Timeframe

MLTC anticipates that the implementation of the claims broker functionality will occur during the second year of the contract. MLTC will identify the date for claims broker services to begin and MLTC will coordinate with the MCO providing the claims broker services throughout years one (1) and two (2) of the contract.. The claims broker must submit to MLTC with its proposal the number of months that it will take to be ready to pay FFS claims. MLTC will give the claims broker sufficient time to ensure a smooth implementation process.

4. Functionality

The claims broker must maintain the same functionality for FFS claims that is required for managed care claims as described in Section IV.S Claims Management of this RFP. FFS claims must be processed even if the billing provider is not contracted with the MCO who is performing claims broker services. The claims broker processing system must handle retroactive member eligibility and process claims accordingly.

The MCO must make system or operational changes for FFS claims processing within 60 calendar days of notification by MLTC. The claims broker must correct all processing errors identified by MLTC immediately on notification. Recoupment of erroneous payments made to providers is the sole responsibility of the claims broker. MLTC will not reimburse the claims broker for uncollected recoupments for claims paid in error.

The claims broker processing system must maintain functionality to process claims for services that require unique provider and member reimbursement methodologies that differ from standard processing protocol.

The claims broker must give MLTC inquiry access to its FFS claims processing system to view claims and all information related to FFS claims processing. The claims broker must provide system user training to MLTC staff who support this scope of work.

5. Claims Processing

The claims broker must maintain the same claims processing standards for all non-drug FFS claims that is required for managed care claims, as described in Section IV.S Claims Management of this RFP. Requirements for rejected claims, pended claims, adjustments, voids, and timely filing guidelines must mirror managed care requirements. Claim system edits for FFS claims must be maintained in the same manner as required for managed care claims. The claims broker should expect that FFS claims will have different editing and payment methodologies than managed care claims, and must maintain these edits and payment processes separately. The claims broker claims processing system must post all applicable edits to denied FFS claims during a single processing cycle.

6. Drug Claims Processing

The claims broker must use a PBM to process all FFS drug claims. The PBM must pay FFS claims in accordance with the same requirements for managed care pharmacy claims in this RFP.

7. Service Authorization Procedures

The claims broker must develop and administer prior authorization procedures for services paid as FFS in accordance with Nebraska Medicaid policy and the requirements of Section IV.N Utilization Management of this RFP. FFS claims must be paid or denied in accordance with FFS authorization policies.

8. Payments to Providers

The claims broker must pay FFS claims at a fee schedule rates set by MLTC.

9. Remittance Advice

The claims broker must adhere to the same remittance requirements for FFS claims as required for managed care claims as outlined in Section IV.S Claims Management of this RFP.

10. Third Party Liability

The claims broker must develop and maintain a process to identify and capture information regarding other insurance sources (TPL) for FFS members. Information regarding TPL must be maintained on the member file and utilized during claims payment to ensure that Medicaid is the payer of last resort. The claims broker will also perform recovery activities for claims that have been paid by Medicaid where third-party coverage was applicable. These payment recoveries will be returned to the State in full immediately upon receipt. The claims broker must expend the same level of effort on the recovery and cost avoidance of casualty claims for FFS claims as is expended on managed care claims. Denial of FFS claims for TPL coverage must comply with all MLTC policies and applicable law. MLTC will retain responsibility for all estate recovery activities.

11. Member Services

The claims broker must provide member services call center activities to all eligible FFS members in the same manner as required for managed care members as outlined in Section IV.F Member Services and Education of this RFP. MLTC will provide the claims broker with an interface that provides FFS member eligibility.

12. Provider Services

The claims broker must provide a provider toll-free telephone line to all providers who render services to FFS members, according to the requirements of Section IV.J Provider Services of this RFP. These services must be available to providers even if they are not contracted with the MCO providing claims broker services. These activities include the management of electronic data interchange and trading partner agreements, as well as call center support for provider inquiries such as member eligibility and benefit limits, claims processing issues, or other program clarifications. The claims broker must make provider notifications, bulletins, newsletters, FAQs and other pertinent information available on its website to providers participating in the FFS programs.

13. Paid Claims Sampling

The claims broker must adhere to the same paid claims sampling requirements for FFS claims as required for managed care claims outlined in Section IV.S Claims Management of this RFP.

14. Claims Dispute Management

The claims broker must adhere to the same claims dispute management requirements for FFS claims as required for managed care claims outlined in Section IV.S Claims Management of this RFP. FFS claims must be disputed through the State fair hearing process. The claims broker must support MLTC in claims disputes by providing all required documentation and subject matter representation in the manner specified by MLTC.

15. Claims Payment Accuracy

The claims broker must adhere to the same claims payment accuracy requirements for FFS claims as required for managed care claims as outlined in Section IV.S Claims Management of this RFP.

16. Claims Data

The claims broker must submit all data relevant to the adjudication and payment of FFS claims to MLTC as required by the State. All claims data must be submitted to MLTC in standard HIPAA formats, as applicable. FFS claims data (including adjustments and recoupments) must be submitted a minimum of monthly on a date designated by MLTC. Claim data must be identified as FFS and must have the appropriate account code on the claim.

17. Drug Rebates

The claims broker must provide pharmacy claims information to MLTC so the State may perform all drug rebate activities (including disputed drug rebates) for FFS drug claims.

18. Audit Requirements

The claims broker must adhere to all audit requirements for managing FFS claims as required for managed care claims, as outlined in Section IV.S Claims Management of this RFP. The claims broker must support MLTC by providing claims payment explanations, as requested.

V. PROPOSAL INSTRUCTIONS

This section documents the mandatory requirements that must be met by bidders in preparing the Technical and Cost Proposal. Bidders should identify the subdivisions of "Project Description and Scope of Work" clearly in their proposals; failure to do so may result in disqualification. Failure to respond to a specific requirement may be the basis for elimination from consideration during the State's comparative evaluation.

Proposals are due by the date and time shown in the Schedule of Events. Content requirements for the Technical and Cost Proposal are presented separately in the following subdivisions; format and order:

A. PROPOSAL SUBMISSION

1. REQUEST FOR PROPOSAL FORM

By signing the "Request for Proposal for Contractual Services" form, the bidder guarantees compliance with the provisions stated in this Request for Proposal, agrees to the Terms and Conditions stated in this Request for Proposal unless otherwise agreed to, and certifies bidder maintains a drug free work place environment.

The Request for Proposal for Contractual Services form must be signed in ink and returned by the stated date and time in order to be considered for an award.

Further, Section III. Terms and Conditions must be returned with the proposal response.

2. CORPORATE OVERVIEW

The Corporate Overview section of the Technical Proposal must consist of the following subdivisions:

a. BIDDER IDENTIFICATION AND INFORMATION

The bidder must provide the full company or corporate name, address of the company's headquarters, entity organization (corporation, partnership, proprietorship), state in which the bidder is incorporated or otherwise organized to do business, year in which the bidder first organized to do business and whether the name and form of organization has changed since first organized.

b. FINANCIAL STATEMENTS

The bidder must provide three years of independently audited financial statements, prepared under U.S. generally accepted accounting principles, and associated enrollment figures applicable to the firm. The bidder must also provide the last three years rating from AM Best Company; verification of any contributions made to the bidder to improve its financial position after its most recent audit (e.g. copies of bank statements and deposit slips), if applicable; and, a statement of whether the bidder or predecessor company has filed or had filed against it any bankruptcy or insolvency proceeding, and if so, relevant details. If publicly held, the bidder must provide a copy of the corporation's most recent audited financial reports and statements, and the name, address, and telephone number of the fiscally responsible representative of the bidder's financial or banking organization in the form of a letter, indicating that the bidder's business relationship with the financial institution is in positive standing.

If the bidder is not a publicly held corporation, either the reports and statements required of a publicly held corporation, or a description of the organization, including size, longevity, client base, areas of specialization and expertise, and any other pertinent information, must be submitted in such a manner that proposal evaluators may reasonably formulate a determination about the stability and financial strength of the organization. Additionally, a non-publicly held firm must provide a banking reference.

The bidder must disclose any and all judgments, pending or expected litigation, or other real or potential financial reversals, which might materially affect the viability or stability of the organization, or state that no such condition is known to exist.

The State may elect to use a third-party to conduct credit checks as part of the corporate overview evaluation.

c. CHANGE OF OWNERSHIP

If any change in ownership or control of the company is anticipated during the twelve (12) months following the proposal due date, the bidder must describe the circumstances of such change and indicate when the change will likely occur. Any change of ownership to an awarded vendor(s) will require notification to the State.

d. OFFICE LOCATION

The bidder's office location responsible for performance pursuant to an award of a contract with the State of Nebraska must be identified.

e. RELATIONSHIPS WITH THE STATE

The bidder shall describe any dealings with the State over the previous five (5) years. If the organization, its predecessor, or any party named in the bidder's proposal response has contracted with the State, the bidder shall identify the contract number(s) and/or any other information available to identify such contract(s). If no such contracts exist, so declare.

f. BIDDER'S EMPLOYEE RELATIONS TO STATE

If any party named in the bidder's proposal response is or was an employee of the State within the past twelve (12) months, identify the individual(s) by name, State agency with whom employed, job title or position held with the State, and separation date. If no such relationship exists or has existed, so declare.

If any employee of any agency of the State of Nebraska is employed by the bidder or is a Sub-Contractor to the bidder, as of the due date for proposal submission, identify all such persons by name, position held with the bidder, and position held with the State (including job title and agency). Describe the responsibilities of such persons within the proposing organization. If, after review of this information by the State, it is determined that a conflict of interest exists or may exist, the bidder may be disqualified from further consideration in this proposal. If no such relationship exists, so declare.

g. CONTRACT PERFORMANCE

If the bidder or any proposed Sub-Contractor has had a contract terminated for default during the past five (5) years, all such instances must be described as required below. Termination for default is defined as a notice to stop performance delivery due to the bidder's non-performance or poor performance, and the issue was either not litigated due to inaction on the part of the bidder or litigated and such litigation determined the bidder to be in default.

It is mandatory that the bidder submit full details of all termination for default experienced during the past five (5) years, including the other party's name, address, and telephone number. The response to this section must present the bidder's position on the matter. The State will evaluate the facts and will score the bidder's proposal accordingly. If no such termination for default has been experienced by the bidder in the past five (5) years, so declare.

If at any time during the past five (5) years, the bidder has had a contract terminated for convenience, non-performance, non-allocation of funds, or any other reason, describe fully all circumstances surrounding such termination, including the name and address of the other contracting party.

h. SUMMARY OF BIDDER'S CORPORATE EXPERIENCE

The bidder shall provide a summary matrix listing the bidder's previous projects similar to this Request for Proposal in size, scope, and complexity. The State will use no more than three (3) narrative project descriptions submitted by the bidder during its evaluation of the proposal.

The bidder must address the following:

i. Provide narrative descriptions to highlight the similarities between the bidder's experience and this Request for Proposal. These descriptions must include:

- **a)** The time period of the project;
- **b)** The scheduled and actual completion dates;
- **c)** The Contractor's responsibilities;
- **d)** For reference purposes, a customer name (including the name of a contact person, a current telephone number, a facsimile number, and e-mail address); and
- **e)** Each project description shall identify whether the work was performed as the prime Contractor or as a Sub-Contractor. If a bidder performed as the prime Contractor, the description must provide the originally scheduled completion date and budget, as well as the actual (or currently planned) completion date and actual (or currently planned) budget.

ii. Contractor and Sub-Contractor(s) experience must be listed separately. Narrative descriptions submitted for Sub-Contractors must be specifically identified as Sub-Contractor projects.

iii. If the work was performed as a Sub-Contractor, the narrative description shall identify the same information as requested for the Contractors above. In addition, Sub-Contractors shall identify what share of contract costs, project responsibilities, and time period were performed as a Sub-Contractor.

i. SUMMARY OF BIDDER'S PROPOSED PERSONNEL/MANAGEMENT APPROACH

The bidder must present a detailed description of its proposed approach to the management of the project.

The bidder must identify the specific professionals who will work on the State's project if their company is awarded the contract resulting from this Request for Proposal. The names and titles of the team proposed for assignment to the State project shall be identified in full, with a description of the team leadership, interface and support functions, and reporting relationships. The primary work assigned to each person should also be identified.

The bidder shall provide resumes for all personnel proposed by the bidder to work on the project. The State will consider the resumes as a key indicator of the bidder's understanding of the skill mixes required to carry out the requirements of the Request for Proposal in addition to assessing the experience of specific individuals.

Resumes must not be longer than three (3) pages. Resumes shall include, at a minimum, academic background and degrees, professional certifications, understanding of the process, and a minimum of three (3) references (name, address, and telephone number) who can attest to the competence and skill level of the individual. Any changes in proposed personnel shall only be implemented after written approval from the State.

j. SUB-CONTRACTORS

If the bidder intends to Sub-Contract any part of its performance hereunder, the bidder must provide:

vi. name, address, and telephone number of the Subcontractor(s);
vii. specific tasks for each Subcontractor(s);
viii. percentage of performance hours intended for each Subcontract; and
ix. total percentage of Subcontractor(s) performance hours.

3. TECHNICAL APPROACH

The technical approach section of the Technical Proposal must consist of the following subsections:

a. Understanding of the project requirements (limited to three pages);
b. Response to proposal statements and questions in Attachment 19 – Proposal Statements and Questions; and
c. Proposal deliverables as listed in Attachment 5 – Policies, Procedures, and Plans.

Form A
Bidder Contact Sheet
Request for Proposal Number 5151 Z1

Form A should be completed and submitted with each response to this Request for Proposal. This is intended to provide the State with information on the bidder's name and address, and the specific person(s) who are responsible for preparation of the bidder's response.

Preparation of Response Contact Information	
Bidder Name:	
Bidder Address:	
Contact Person & Title:	
E-mail Address:	
Telephone Number (Office):	
Telephone Number (Cellular):	
Fax Number:	

Each bidder shall also designate a specific contact person who will be responsible for responding to the State if any clarifications of the bidder's response should become necessary. This will also be the person who the State contacts to set up a presentation/demonstration, if required.

Pre-Solicitation Notice and Schedule of Events for Medicaid Integrated Managed Care Procurement

TO: All Prospective Bidders

FROM: Michelle Thompson / Teresa Fleming

DATE: October 19, 2015

SUBJECT: RFP Number 5151Z1 for Statewide Medicaid Integrated Managed Care Contracts

The State of Nebraska, Department of Health and Human Services (DHHS), is issuing notice of its intent to release a Request for Proposal, RFP Number 5151Z1, for the purpose of selecting qualified contractors to provide statewide integrated medical, behavioral health, and pharmacy services for approximately 230,000 Medicaid and Children's Health Insurance Program (CHIP) enrollees through the Medicaid managed care delivery system. DHHS expects to award a minimum of two or a maximum of three contracts for the program in March 2016 and the program to begin operations on January 1, 2017.

A planned schedule of events for this procurement is included below in this notice. The RFP will be available and posted to the Internet prior to the date of the first pre-proposal conference (October 26, 2015). At the pre-proposal conference, leadership from the Division of Medicaid and Long-Term Care will present an overview of the scope of the RFP and planned changes to the managed care program. The state will also have its contracted actuarial firm Optumas available to provide an overview of the capitation rate assumptions and methodologies.

Notification of release of the RFP will be sent to those included in the contact list for this notice. To be added to this list, interested parties should notify Michelle Thompson / Teresa Fleming at as.materielpurchasing@nebraska.gov.
