System of Record for Employee Contact Information

In May, 2012, the Employee Work Center, (EWC/Workday) became the State's system of record for all employee data, including phone numbers, e-mail addresses, work address, and organizational information. Even though Workday is the system of record, there are several interfaces and custom programs currently sending employees' contact information directly into the State's ERP system (PFC-JD Edwards E1).

Due to the State's upgrading of the ERP system during FY 2013-2014 these interfaces and custom programs will no longer be supported and therefore not included in the upgrade plan.

In order to ensure data integrity and to avoid duplication, we request that you identify all current inbound/outbound interfaces with E1 containing employee contact information so that these can be transitioned to Workday interfaces.

Please note that payroll processing remains in JD Edwards E1.

For questions and help, please contact the LINK help desk at 471-6234 or email at as.linkhelp@nebraska.gov.

This message was sent to IT Contacts and HR/Payroll Contacts.

Thanks,

Sue Ferguson
