Date: November 30, 2015

To: All Bidders

From: Teresa Fleming/Connie Heinrichs, Buyers
AS Materiel State Purchasing Bureau

RE: Addendum for Request for Proposal Number RFP 5152Z1
to be opened Monday, December 14, 2015 at 2:00 p.m. Central Time

Questions and Answers

Following are the questions submitted and answers provided for the above mentioned Request for Proposal. The questions and answers are to be considered as part of the Request for Proposal. It is the Bidder's responsibility to check the State Purchasing Bureau website for all addenda or amendments.

Question Number	RFP Section Reference	RFP Page Number	Question	State Response
1.			Regarding the Request for Bid to install the new TRASAR television antenna at NET's Alliance television facility. The bid specifications rightly require that a plumb and tension be performed on the KTNE-TV tower following the installation of the new antenna. The Stainless Analysis Report stated that the initial tension of the guy wires were based on the values from the tower modification project performed by SpectraSite	Refer to Attachment E for the E01.00 drawing. Also, refer to Attachment B which includes the Table of Tension (pg. 4) and the Table of Tower Plumb (pg. 5).

Materiel Division • Marilyn Bottrell, Administrator

			<p>Broadcast Group in their Job Number 270502. The report did not include these tension values or the guy tensioning charts. The successful installation bidder will need to have the guy tensions and the guy tensioning chart, including tension intercepts. The Stainless Analysis Report indicates that tnxTower design software was used in the analysis and report. That software generates a report that includes an "E-1" drawing that includes the guy tension information. Can this E-1 drawing be furnished to aid in developing a complete and responsive bid submission?</p>
