Neb. Rev. Stat. §73-107 allows for a preference for a resident disabled veteran or business located in a designated enterprise zone. When a state contract is to be awarded to the lowest responsible bidder, a resident disabled veteran or a business located in a designated enterprise zone under the Enterprise Zone Act shall be allowed a preference over any other resident or nonresident bidder, if all other factors are equal.

Resident disabled veterans means any person (a) who resides in the State of Nebraska, who served in the United States Armed Forces, including any reserve component or the National Guard, who was discharged or otherwise separated with a characterization of honorable or general (under honorable conditions), and who possesses a disability rating letter issued by the United States Department of Veterans Affairs establishing a service-connected disability or a disability determination from the United States Department of Defense and (b)(i) who owns and controls a business or, in the case of a publicly owned business, more than fifty percent of the stock is owned by one or more persons described in subdivision (a) of this subsection and (ii) the management and daily business operations of the business are controlled by one or more persons described in subdivision (a) of this subsection. Any contract entered into without compliance with this section shall be null and void.

Therefore, if a resident disabled veteran or business located in a designated enterprise zone submits a bid in accordance with Neb. Rev. Stat. §73-107 and has so indicated on the RFP cover page under "Bidder must complete the following" requesting priority/preference to be considered in the award of this contract, the following will need to be submitted by the vendor within ten (10) business days of request:

- a. Documentation from the United States Armed Forces confirming service;

Other LAN and WAN requirements - bandwidth or protocols

CLIENT-SERVER REQUIREMENTS

The contractor must identify if software will be installed on existing State workstations or if the Contractor will be supplying new workstations. The Contractor will need to identify if their application is web-based or a separate Windows-based application.

As of this time, any new software installed on State workstations will need to be compatible with Windows 7 64 bit and Internet Explorer 10. If special client configurations or plugins are required, the contractor must specify.

If new servers are required for the project, the physical location for those servers must be identified. If a server is serving multiple sites, it is recommended to place a Virtual Server at the State of Nebraska Data Center for Enterprise Services. If a server is placed at each site, it will need to be a rack mount server (as opposed to a desktop computer) and it will need a proper housing such as a rack in a communications room that has proper environmental controls, power, and cooling.

REMOTE ACCESS (VPN)

NDCS will provide the Contractor with a maximum of three individual VPN accounts upon request. The VPN system for the State of Nebraska is provided by the Nebraska Office of the CIO (OCIO)

The Contractor notifies the DCS project manager about the need for remote access. DCS will give the OCIO VPN form to the contractor and they will return one form for each person who needs access. The form will be signed by the DCS project manager for authorization, and then the form will be given to DCS IT to review network policies. IT will submit the request to OCIO and when the account is ready, IT will send connection instructions to the Contractor directly.

Contractor shall maintain the entire program system and components for the life of the contract. The Server provided by the Contractor will be utilized for the control system only.

PARTS, EQUIPMENT AND SERVICE

Contractor shall provide all necessary replacement parts and equipment for the facility's temperature control system currently in place.

NDCS will provide reasonable means of access to all equipment covered under this contract. The Contractor will be allowed to start and stop all primary equipment incidentals to the operation of the mechanical system(s) as arranged with the department's representative. The Contractor upon completion of service or inspection will return all mechanical systems to full operational status.

The Contractor will provide trained personnel for the performance of the contracted duties. The assignment by the Contractor of a long-term service technician primarily responsible for service under this contract is strongly advised to maintain consistency and continuity of care at the facility level.

Contractor shall employ such trained people as the Contractor deems necessary to perform the services or work under this contract, and these personnel will remain the Contractor's employees, subject at all times to his/her direction. The Contractor will require his/her personnel to comply with instructions pertaining to conduct, safety and security regulations, and all lawful instructions by NDCS facility personnel necessary to ensure the safety, security, and good order of the institution where the service is being performed. The Contractor is responsible for all acts of his employees.

Contractor's personnel shall be subject to departmental security checks prior to their arrival on site, and will carry proper identification with them at all times while on facility grounds. Contractor's personnel identification shall be retained at the Facility or Facilities and issued upon entrance. Contractor's personnel shall relinquish the identification(s) upon exiting the Facility or Facilities.

Contractor's personnel may be subject to pat searches and tool inventory upon arrival at and departure from the facility.

Contractor shall inform his/her personnel of the provisions of 28-322.01 of the State of Nebraska Revised Statutes, which states that it shall be a felony for individuals working for or under contract to NDCS to engage in sexual contact or relations with an inmate or parolee within the state correctional system, and that no such inmate nor parolee is legally capable of

consenting to any such relationship. This statute applies in like measure to the offenders housed at the Work Ethic Camp in McCook.

Preventative Maintenance Inspections shall be provided based on the schedule listed on the attached Form "C". Inspections shall be done to the building automation system as shown on available control drawings (to be provided at pre-proposal conferences).

Contractor may be required to conduct a performance review of services provided on a bi-annual basis with NDCS. Topics may include but are not limited to, review of services provided, discussion of work performed since previous review, questions that may arise at the facility level, and any other methods of maximizing optimum service performance.

Preventative maintenance inspections will include but not be limited to the examination, cleaning, and recalibration of sensors/thermostats, humidity controls, temperature controls, pressure controls, relays, damper actuators, instrumental and accessories directly pertaining to the automatic temperature control system. Vendor must check and verify performance of temperature controls equipment in accordance with manufacturer's specifications, original design criteria, and proper maintenance practice.

Contractor shall check and confirm control system sequence of operation to insure optimum system efficiency and economy. Contractor shall lubricate as required air compressors, control valve packing glands, damper bearings and linkages as well as other accessories directly pertaining to the control system. Contractor shall inspect automatic temperature control valves for proper stroke, close off, and packing conditions.

C. DELIVERABLES (REQUIRED)

The Contractor shall provide temperature control preventative maintenance inspections, building management support services, replacement parts/equipment and maintain the automated monitoring system.

The Contractor shall perform inspections and non-emergency services during normal business hours-Monday through Friday, 7:00 A.M. through 3:30 P.M. Contractor will provide emergency service as requested. Response time for emergency or requested service will not exceed twenty four (24) hours.

A legible copy of the inspection report, test results, services performed, and recommended improvements will be left on site with facility Maintenance Supervisor or designee upon completion of service.

Complete, itemized documentation of all testing, preventative maintenance, and service shall be kept at both the facility and with the Contractor.

A clear, legible copy of the inspection report will be signed by the facility Maintenance Supervisor or designee and will be submitted with the invoice.

Contractor shall establish a primary contact person within their proposal, including the contact's name, address, phone and fax numbers, and email address.

All service shall be coordinated in advance with facility staff during normal working hours, M-F.

Awarded Contractor shall replace all existing controllers and software as needed within six (6) months from start date of contract.

Facility Contacts are as follows:

Nebraska State Penitentiary (NSP)

14th and Pioneers Blvd.

Lincoln, NE 68502

Byron Brown, Facility Maintenance Manager; Phone: 402-471-3161

Andrew Vanek, Business Manager; Phone: 402-479-3217

D. PAYMENT SCHEDULE

The payment schedule for the project is tied to specific dates and deliverables. Invoices may be submitted by the Contractor on specific dates based on the completion and acceptance of related deliverables. No invoice will be approved unless the associated deliverables have been approved. A percentage of the total contract cost may then be invoiced based on the following schedule.
