All licenses expire December 31st, annually. Nebraska Dealers and Nebraska manufacturers report on the license renewal the number of vehicles, motorcycles, and/or trailers sold or manufactured for the reporting period, this is entered into the database which calculates the number of dealer plates the dealer is allowed. The Agency may authorize additional plates, which is manually entered into the database.

Some dealers may have a Supplemental License, which prints in addition to their dealer license.

The Dealer License Number is added (License #) and the salesperson will appear on the dealer's active sales staff list. If the License # begins with DS, MF, or MB, the license printed will indicate Representative and be recorded on the reconciliation report as a Representative. The control # will be recorded once the license prints.
