Payment Terms				1%, 10	1%, 10	2%, 10
Delivery Days ARO				70	70	30

The Nebraska State Patrol recommends the award of the Tower Trailer be awarded to Aluma Tower Company Inc. due to the following justification:

1. Mobile Systems Integrators bid a gooseneck trailer. We do not want to have to incur the cost to purchase a specialty vehicle equipped with a gooseneck tow system. The State Patrol specifically asked for 1.b. "Tow and tongue weight should not exceed the maximum weight of a class V receiver hitch."
2. Mobile Systems Integrators bid a steel tower. The specifications were for a "100' minimum aluminum tower." Steel is much heavier. This becomes an issue when we tow the vehicle and would again require a specialty vehicle. Aluminum has better corrosion resistance. Since the tower will be outside for storage and deployment, we wanted aluminium so rust and painting were not an issue.
