Award Explanation on next page.

Award Explanation:

1. All LED module lights were not individual directional LEDs. There were only two modules that were directional. All other LEDs appeared reflective given that fact these were the same LEDs that were installed in their reflective model.
2. All LED modules were not stand alone circuit board type. All of the LED modules connected to a single circuit board within the center of the light bar.
3. Alley and take down lights were LED type and the bid called for halogen type of light.
4. The bid specifications called for a light bar length from 46 to 49 inches. The Whelen Justice 50 inch and the Justice 44 inch did not meet length specifications. The Liberty 48.5 inch was bid @ \$1090.00. This is not the low bid for this category.
