Explanation: Award was made to the low for each line item except for those items that needed to be grouped together by type for both practice and live rounds, as practice and live agent rounds must perform the same during use. Manufacturer differences between practice rounds and live agent rounds in a grouping could lead to different characteristics in flight paths, distances traveled, and effects. Therefore, for items that are grouped (boxed) together (lines 6-7, 17-20, 21-23, 27-29, 31-39, and 47-49) award was made to the overall low in these groupings.
