Explanation: The overall low bid from John Thomas, Inc. did not meet the required Specifications as stipulated in Letter D. and E. under number three (3.) "Components" on page five (5) of the Specifications and Terms and Conditions to 3321 OF and as referenced below:

- D. The hydraulic system shall be designed to allow the system to articulate like a normal trailer behind the support vehicle, but locks to prevent trailer from rotating during off-set or angled impacts.
- E. The trailer shall have a break-away system designed to automatically lock the trailer brakes in the event of a hitch failure and the trailer breaks away from the tow vehicle.
