Award Explanation:

After review of the attached proposals, our recommendation is to accept the bid from Hamilton Equipment Company of Lincoln for the amount of \$34,900.00. The Bobcat model E35 meets or exceeds all specifications as written.

Low bid from Extend Manufacturing, clearly does not meet the specifications. The TMX model bid falls short of critical specifications for operating weight, horsepower, digging depth, dumping height, and hydraulic system pressure. The TMX does not have zero swing capability, which is essential when operating in areas with limited space or along building foundations.
