The company enters into numerous service contracts through its Global Services business. During the contractual period, revenue, cost and profits may be impacted by estimates of the ultimate profitability of each contract, especially contracts for which the company uses the percentage-of-completion (POC) method of accounting. If at any time these estimates indicate the POC contract will be unprofitable, the entire estimated loss for the remainder of the contract is recorded immediately in cost. The company performs ongoing profitability analyses of its services contracts in order to determine whether the latest estimates require updating. Key factors reviewed by the company to estimate the future costs to complete each contract are future labor costs, future product costs and expected productivity efficiencies. Contract loss provisions recorded as a component of other accrued expenses and liabilities were approximately \$54 million and \$52 million at December 31, 2012 and 2011, respectively.

Income Taxes

The company is subject to income taxes in the U.S. and numerous foreign jurisdictions. Significant judgments are required in determining the consolidated provision for income taxes.

During the ordinary course of business, there are many transactions and calculations for which the ultimate tax determination is uncertain. As a result, the company recognizes tax liabilities based on estimates of whether additional taxes and interest will be due. These tax liabilities are recognized when, despite the company's belief that its tax return positions are supportable, the company believes that certain positions may not be fully sustained upon review by tax authorities. The company believes that its accruals for tax liabilities are adequate for all open audit years based on its assessment of many factors, including past experience and interpretations of tax law. This assessment relies on estimates and assumptions, and may involve a series of complex judgments about future events. To the extent that new information becomes available which causes the company to change its judgment regarding the adequacy of existing tax liabilities, such changes to tax liabilities will impact income tax expense in the period in which such determination is made.

Significant judgment is also required in determining any valuation allowance recorded against deferred tax assets. In assessing the need for a valuation allowance, management considers all available evidence for each jurisdiction including past operating results, estimates of future taxable income and the feasibility of ongoing tax planning strategies. In the event that the company changes its determination as to the amount of deferred tax assets that can be realized, the company will adjust its valuation allowance with a corresponding impact to income tax expense in the period in which such determination is made.

The consolidated provision for income taxes will change period to period based on nonrecurring events, such as the settlement of income tax audits and changes in tax laws, as well as recurring factors including the geographic mix of income before taxes, the timing and amount of foreign dividend repatriation, state and local taxes and the effects of various global income tax strategies.

To the extent that the provision for income taxes increases/decreases by 1 percent of income before income taxes, consolidated net income would have decreased/improved by \$219 million in 2012.

Valuation of Assets

The application of business combination and impairment accounting requires the use of significant estimates and assumptions. The acquisition method of accounting for business combinations requires the company to estimate the fair value of assets acquired, liabilities assumed, and any non-controlling interest in the acquiree to properly allocate purchase price consideration between assets that are depreciated and amortized from goodwill and indefinite-lived intangible assets. Impairment testing for assets, other than goodwill and indefinite-lived intangible assets, requires the allocation of cash flows to those assets or group of assets and if required, an estimate of fair value for the assets or group of assets. The company's estimates are based upon assumptions believed to be reasonable, but which are inherently uncertain and unpredictable. These valuations require the use of management's assumptions, which would not reflect unanticipated events and circumstances that may occur.

Valuation of Goodwill

The company reviews goodwill for impairment annually, in the fourth quarter, and whenever events or changes in circumstances indicate the carrying value of goodwill may not be recoverable.

The company assesses qualitative factors in each of its reporting units that carry goodwill. Among other relevant events and circumstances that affect the fair value of reporting units, the company assesses individual factors such as:

- A significant adverse change in legal factors or the business climate;
- An adverse action or assessment by a regulator;
- Unanticipated competition;
- A loss of key personnel; and
- A more likely than not expectation that a reporting unit or a significant portion of a reporting unit will be sold or otherwise disposed of.

The company assesses these qualitative factors to determine whether it is necessary to perform the two-step quantitative goodwill impairment test. This quantitative test is required only if the company concludes that it is more likely than not that a reporting unit's fair value is less than its carrying amount. After performing the annual goodwill impairment qualitative analysis during the fourth quarter of 2012, the company determined it was not necessary to perform the two-step goodwill impairment test.

Loss Contingencies

The company is currently involved in various claims and legal proceedings. Quarterly, the company reviews the status of each significant matter and assesses its potential financial exposure. If the potential loss from any claim or legal proceeding is considered probable and the amount can be reasonably estimated, the company accrues a liability for the estimated loss. Significant judgment is required in both the determination of probability and the determination as to whether an exposure is reasonably estimable. Because

of uncertainties related to these matters, accruals are based only on the best information available at the time. As additional information becomes available, the company reassesses the potential liability related to its pending claims and litigation, and may revise its estimates. These revisions in the estimates of the potential liabilities could have a material impact on the company's results of operations and financial position.

Global Financing Receivables Allowance for Credit Losses

The Global Financing business reviews its financing receivables portfolio at least quarterly in order to assess collectibility. A description of the methods used by management to estimate the amount of uncollectible receivables is included in note A, "Significant Accounting Policies," on [page 85](#). Factors that could result in actual receivable losses that are materially different from the estimated reserve include sharp changes in the economy, or a significant change in the economic health of a particular client that represents a concentration in Global Financing's receivables portfolio.

To the extent that actual collectibility differs from management's estimates currently provided for by 10 percent, Global Financing's segment pre-tax income and the company's consolidated income before income taxes would be higher or lower by an estimated \$36 million (using 2012 data), depending upon whether the actual collectibility was better or worse, respectively, than the estimates.

Residual Value

Residual value represents the estimated fair value of equipment under lease as of the end of the lease. Residual value estimates impact the determination of whether a lease is classified as operating or capital. Global Financing estimates the future fair value of leased equipment by using historical models, analyzing the current market for new and used equipment, and obtaining forward-looking product information such as marketing plans and technological innovations. Residual value estimates are periodically reviewed and "other than temporary" declines in estimated future residual values are recognized upon identification. Anticipated increases in future residual values are not recognized until the equipment is remarketed. Factors that could cause actual results to materially differ from the estimates include significant changes in the used-equipment market brought on by unforeseen changes in technology innovations and any resulting changes in the useful lives of used equipment.

To the extent that actual residual value recovery is lower than management's estimates by 10 percent, Global Financing's segment pre-tax income and the company's consolidated income before income taxes for 2012 would have been lower by an estimated \$105 million. If the actual residual value recovery is higher than management's estimates, the increase in income will be realized at the end of lease when the equipment is remarketed.

Currency Rate Fluctuations

Changes in the relative values of non-U.S. currencies to the U.S. dollar affect the company's financial results and financial position. At December 31, 2012, currency changes resulted in assets and liabilities denominated in local currencies being translated into fewer

dollars than at year-end 2011. The company uses financial hedging instruments to limit specific currency risks related to financing transactions and other foreign currency-based transactions. Further discussion of currency and hedging appears in note D, "Financial Instruments," on [pages 94 to 98](#).

Foreign currency fluctuations often drive operational responses that mitigate the simple mechanical translation of earnings. During periods of sustained movements in currency, the marketplace and competition adjust to the changing rates. For example, when pricing offerings in the marketplace, the company may use some of the advantage from a weakening U.S. dollar to improve its position competitively, and price more aggressively to win the business, essentially passing on a portion of the currency advantage to its customers. Competition will frequently take the same action. Consequently, the company believes that some of the currency-based changes in cost impact the prices charged to clients. The company also maintains currency hedging programs for cash management purposes which mitigate, but do not eliminate, the volatility of currency impacts on the company's financial results.

The company translates revenue, cost and expense in its non-U.S. operations at current exchange rates in the reported period. References to "adjusted for currency" or "constant currency" reflect adjustments based upon a simple constant currency mathematical translation of local currency results using the comparable prior period's currency conversion rate. However, this constant currency methodology that the company utilizes to disclose this information does not incorporate any operational actions that management may take in reaction to fluctuating currency rates. Based on the currency rate movements in 2012, total revenue decreased 2.3 percent as reported and was flat at constant currency versus 2011. On a pre-tax income basis, these translation impacts offset by the net impact of hedging activities resulted in a theoretical maximum (assuming no pricing or sourcing actions) decrease of approximately \$100 million in 2012. The same mathematical exercise resulted in an increase of approximately \$600 million in 2011. The company views these amounts as a theoretical maximum impact to its as-reported financial results. Considering the operational responses mentioned above, movements of exchange rates, and the nature and timing of hedging instruments, it is difficult to predict future currency impacts on any particular period, but the company believes it could be substantially less than the theoretical maximum given the competitive pressure in the marketplace.

For non-U.S. subsidiaries and branches that operate in U.S. dollars or whose economic environment is highly inflationary, translation adjustments are reflected in results of operations. Generally, the company manages currency risk in these entities by linking prices and contracts to U.S. dollars. The company continues to monitor the economic conditions in Venezuela. On December 30, 2010, the official rate for essential goods was eliminated, with no change to the SITME rate. The SITME rate remained constant throughout 2012 and 2011. In February 2013, the SITME rate was eliminated, and the official rate was set at 6.3 bolivars fuerte (BsF) to the U.S. dollar. This devaluation is not expected to have a material impact given the size of the company's operations in Venezuela (less than 1 percent of total 2011 and 2012 revenue, respectively).

Market Risk

In the normal course of business, the financial position of the company is routinely subject to a variety of risks. In addition to the market risk associated with interest rate and currency movements on outstanding debt and non-U.S. dollar denominated assets and liabilities, other examples of risk include collectibility of accounts receivable and recoverability of residual values on leased assets.

The company regularly assesses these risks and has established policies and business practices to protect against the adverse effects of these and other potential exposures. As a result, the company does not anticipate any material losses from these risks.

The company's debt, in support of the Global Financing business and the geographic breadth of the company's operations, contains an element of market risk from changes in interest and currency rates. The company manages this risk, in part, through the use of a variety of financial instruments including derivatives, as described in note D, "Financial Instruments," on [pages 94 to 98](#).

To meet disclosure requirements, the company performs a sensitivity analysis to determine the effects that market risk exposures may have on the fair values of the company's debt and other financial instruments.

The financial instruments that are included in the sensitivity analysis comprise all of the company's cash and cash equivalents, marketable securities, short-term and long-term loans, commercial financing and installment payment receivables, investments, long-term and short-term debt and all derivative financial instruments. The company's derivative financial instruments generally include interest rate swaps, foreign currency swaps and forward contracts.

To perform the sensitivity analysis, the company assesses the risk of loss in fair values from the effect of hypothetical changes in interest rates and foreign currency exchange rates on market-sensitive instruments. The market values for interest and foreign currency exchange risk are computed based on the present value of future cash flows as affected by the changes in rates that are attributable to the market risk being measured. The discount rates used for the present value computations were selected based on market interest and foreign currency exchange rates in effect at December 31, 2012 and 2011. The differences in this comparison are the hypothetical gains or losses associated with each type of risk.

Information provided by the sensitivity analysis does not necessarily represent the actual changes in fair value that the company would incur under normal market conditions because, due to practical limitations, all variables other than the specific market risk factor are held constant. In addition, the results of the model are constrained by the fact that certain items are specifically excluded from the analysis, while the financial instruments relating to the financing or hedging of those items are included by definition. Excluded items include short-term and long-term receivables from sales-type and direct financing leases, forecasted foreign currency cash flows and the company's net investment in foreign operations. As a consequence, reported changes in the values of some of the financial instruments impacting the results of the sensitivity analysis are not matched with the offsetting changes in the values of the items that those instruments are designed to finance or hedge.

The results of the sensitivity analysis at December 31, 2012 and 2011, are as follows:

Interest Rate Risk

At December 31, 2012, a 10 percent decrease in the levels of interest rates with all other variables held constant would result in a decrease in the fair market value of the company's financial instruments of \$192 million as compared with a decrease of \$310 million at December 31, 2011. A 10 percent increase in the levels of interest rates with all other variables held constant would result in an increase in the fair value of the company's financial instruments of \$181 million as compared to an increase of \$290 million at December 31, 2011. Changes in the relative sensitivity of the fair value of the company's financial instrument portfolio for these theoretical changes in the level of interest rates are primarily driven by changes in the company's debt maturities, interest rate profile and amount.

Foreign Currency Exchange Rate Risk

At December 31, 2012, a 10 percent weaker U.S. dollar against foreign currencies, with all other variables held constant, would result in an increase in the fair value of the company's financial instruments of \$1,203 million as compared with an increase of \$1,303 million at December 31, 2011. Conversely, a 10 percent stronger U.S. dollar against foreign currencies, with all other variables held constant, would result in a decrease in the fair value of the company's financial instruments of \$1,203 million compared with a decrease of \$1,303 million at December 31, 2011. The change in impact from 2011 to 2012 was comprised of: assets (\$84 million), debt (\$216 million) and derivatives (\$202 million).

Financing Risks

See the "Description of Business" on [page 24](#) for a discussion of the financing risks associated with the Global Financing business and management's actions to mitigate such risks.

Cybersecurity

While neither a business unit nor a worldwide organization, the company's approach on cybersecurity demonstrates its ability to adapt to a changing environment, as well as the depth and breadth of its global capabilities. IBM has leveraged its extensive knowledge and experience on cybersecurity matters to help its customers. The company has a suite of software solutions that showcase IBM's broad capabilities in identity and access management, data security, application security, network security and endpoint security. IBM's software solutions include a security intelligence dashboard that can collect information on customer IT security events and provide detailed information to customers about potential threats and security posture. The company's services businesses offer professional solutions for security from assessment to deployment. In addition, the company offers managed and outsourced security solutions from multiple security operations centers around the world. Finally, security is embedded in a multitude of IBM offerings through secure engineering processes and by critical functions (encryption, access control, etc.) in servers, storage, software, services and other solutions.

From an enterprise perspective, IBM has implemented a multi-faceted approach involving people, tools, and processes to identify and address cybersecurity risks. The company has established policies and procedures that provide the foundation by which IBM's infrastructure and data are managed, which help protect IBM and client data. In addition, the company utilizes a combination of online education, Web articles and other awareness initiatives to enable

its workforce to be knowledgeable about cybersecurity threats and their responsibilities to identify and mitigate these risks. IBM performs ongoing assessments regarding its technical controls and its methods for identifying emerging risks related to cybersecurity. The company uses a layered approach with overlapping controls to defend against cybersecurity attacks on networks, end-user devices, data centers, and applications.

Employees and Related Workforce

For the year ended December 31:	2012	2011	2010	Yr.-to-Yr. Change	
				2012-11	2011-10
IBM/wholly owned subsidiaries	434,246	433,362	426,751	0.2%	1.5%
Less-than-wholly owned subsidiaries	8,009	7,523	9,334	6.5	(19.4)
Complementary	24,740	25,500	27,784	(3.0)	(8.2)

As a globally integrated enterprise, the company operates in over 170 countries and is continuing to shift its business to the higher value segments of enterprise computing. The company continually assesses its resource needs with the objective of balancing its workforce globally to improve the company's global reach and competitiveness.

The complementary workforce is an approximation of equivalent full-time employees hired under temporary, part-time and limited-term employment arrangements to meet specific business needs in a flexible and cost-effective manner.

Global Financing

Global Financing is a reportable segment that is measured as a stand-alone entity.

In 2012, as the global economy continued to face a challenging credit environment, the Global Financing business remained focused on its core competencies—providing IT financing to the company's clients and business partners. For the year, Global Financing delivered external revenue of \$2,013 million and total revenue of \$4,073 million, and expanded gross and pre-tax margins. Total pre-tax income of \$2,034 million increased 1.1 percent compared to 2011 and return on equity was 41.0 percent.

In addition to the overall health of the economy and its impact on corporate IT budgets, key drivers of Global Financing's results are interest rates and originations. Interest rates directly impact Global Financing's business by increasing or decreasing both financing revenue and the associated borrowing costs. Originations, which determine the asset base of Global Financing's annuity-like business, are impacted by IBM's non-Global Financing sales and services volumes and Global Financing's participation rates. Participation rates are the propensity of IBM's clients to finance their transactions through Global Financing in lieu of paying IBM up-front cash or financing through a third party.

Results of Operations

(\$ in millions)			
For the year ended December 31:	2012	2011	2010
External revenue	\$2,013	\$2,102	\$2,238
Internal revenue	2,060	2,092	1,842
Total revenue	4,073	4,195	4,080
Cost	1,400	1,467	1,474
Gross profit	\$2,673	\$2,728	\$2,606
Gross profit margin	65.6%	65.0%	63.9%
Pre-tax income	\$2,034	\$2,011	\$1,956
After-tax income*	\$1,362	\$1,338	\$1,292
Return on equity*	41.0%	40.7%	41.1%

* See [page 67](#) for the details of the after-tax income and return on equity calculation.

Total revenue in 2012 decreased \$122 million versus 2011 as a result of:

- A decline in external revenue of 4.2 percent (1 percent adjusted for currency) driven by a decrease in financing revenue (down 8.7 percent to \$1,471 million), partially offset by an increase in used equipment sales revenue (up 10.6 percent to \$540 million); and
- A decline in internal revenue of 1.6 percent driven by a decrease in financing revenue (down 11.3 percent to \$500 million), partially offset by an increase in used equipment sales revenue (up 2.0 percent to \$1,559 million).

The decreases in external and internal financing revenue were due to lower asset yields and a decrease in remarketing lease revenue. Global Financing gross profit decreased 2.0 percent compared to 2011 due to a decrease in financing gross profit, partially offset by an increase in used equipment sales gross profit. The gross profit margin increased 0.6 points due to a higher financing margin, partially offset by a shift in mix toward lower margin used equipment sales and a lower used equipment sales margin.

Total revenue in 2011 increased \$115 million versus 2010 as a result of:

- An increase in internal revenue of 13.6 percent primarily driven by an increase in used equipment sales revenue (up 19.7 percent to \$1,528 million); partially offset by
- A decline in external revenue of 6.1 percent (9 percent adjusted for currency) driven by a decrease in used equipment sales revenue (down 25.5 percent to \$490 million), partially offset by an increase in financing revenue (up 2.0 percent to \$1,612 million).

The increase in external financing revenue was due to a higher average asset balance and an increase in remarketing lease revenue.

Global Financing gross profit in 2011 increased 4.7 percent compared to 2010 due to higher used equipment sales and financing gross profit. The gross profit margin increased 1.2 points primarily due to a higher used equipment sales margin.

Global Financing pre-tax income increased 1.1 percent in 2012 versus 2011, following an increase of 2.8 percent in 2011 versus 2010. The increase in 2012 was driven by decreases in SG&A expense (\$61 million) and financing receivables provisions (\$16 million), partially offset by the decrease in gross profit (\$55 million). The increase in 2011 was driven by the increase in gross profit (\$122 million), partially offset by increases in financing receivables provisions (\$51 million) and SG&A expense (\$13 million). The increase in financing receivables provisions in 2011 was due primarily to the economic environment in Europe. At December 31, 2012, the overall allowance for credit losses coverage rate was 1.2 percent, a decrease of 0.1 points versus 2011.

The increase in return on equity from 2011 to 2012 was driven by higher after-tax income, and the decrease in return on equity from 2010 to 2011 was driven by a higher average equity balance.

Financial Condition

Balance Sheet

(\$ in millions)

At December 31:	2012	2011
Cash and cash equivalents	\$ 1,380	\$ 1,308
Net investment in sales-type and direct financing leases	10,008	9,209
Equipment under operating leases		
External clients ^(a)	1,273	1,567
Internal clients ^{(b)(c)}	25	219
Client loans	13,121	11,363
Total client financing assets	24,428	22,358
Commercial financing receivables	7,755	7,130
Intercompany financing receivables ^{(d)(e)}	4,328	4,586
Other receivables	459	334
Other assets	533	712
Total assets	\$38,882	\$36,427
Intercompany payables ^(b)	\$ 6,802	\$ 6,213
Debt ^(d)	24,501	23,332
Other liabilities	4,084	3,633
Total liabilities	35,388	33,178
Total equity	3,494	3,249
Total liabilities and equity	\$38,882	\$36,427

^(a) Includes intercompany mark-up, priced on an arm's-length basis, on products purchased from the company's product divisions, which is eliminated in IBM's consolidated results.

^(b) Entire amount eliminated for purposes of IBM's consolidated results and therefore does not appear on page 72.

^(c) These assets, along with all other financing assets in this table, are leveraged at the value in the table using Global Financing debt.

^(d) Global Financing debt is comprised of intercompany loans and external debt. A portion of Global Financing debt is in support of the company's internal business, or related to intercompany mark-up embedded in the Global Financing assets. See table on page 67.

Sources and Uses of Funds

The primary use of funds in Global Financing is to originate client and commercial financing assets. Client financing assets for end users consist primarily of IBM systems, software and services, but also include non-IBM equipment, software and services to meet IBM clients' total solutions requirements. Client financing assets are primarily sales-type, direct financing and operating leases for systems products as well as loans for systems, software and services with terms generally from one to seven years. Global Financing's client loans are primarily for software and services and are unsecured. These loans are subjected to credit analysis to evaluate the associated risk and, when deemed necessary, actions are taken to mitigate risks in the loan agreements which include covenants to protect against credit deterioration during the life of the obligation. Client financing also includes internal activity as described on page 24.

Commercial financing receivables arise primarily from inventory and accounts receivable financing for dealers and remarketers of IBM and non-IBM products. Payment terms for inventory financing and accounts receivable financing generally range from 30 to 90 days. These short-term receivables are primarily unsecured and are also subjected to additional credit analysis in order to evaluate the associated risk.

In addition to the actions described above, in certain circumstances, the company may take mitigation actions to transfer credit risk to third parties.

At December 31, 2012, substantially all financing assets were IT related assets, and approximately 60 percent of the external portfolio was with investment grade clients with no direct exposure to consumers or mortgage assets.

Originations

The following are total financing originations.

(\$ in millions)			
For the year ended December 31:	2012	2011	2010
Client financing	\$16,277	\$14,390	\$12,748
Commercial financing	36,944	35,282	32,366
Total	\$53,222	\$49,673	\$45,113

In 2012, new financing originations exceeded cash collections for both client and commercial financing. This resulted in a net increase in total financing assets from December 31, 2011. The increase in originations in both 2012 versus 2011 and 2011 versus 2010 was due to improving external volumes in both client and commercial financing. Internal loan financing with Global Services is executed under a loan facility and is not considered originations.

Cash generated by Global Financing in 2012 was primarily deployed to pay the intercompany payables and dividends to IBM.

Global Financing Receivables and Allowances

The following table presents external financing receivables excluding residual values, and the allowance for credit losses.

(\$ in millions)		
At December 31:	2012	2011
Gross financing receivables	\$30,621	\$27,366
Specific allowance for credit losses	240	226
Unallocated allowance for credit losses	115	124
Total allowance for credit losses	355	350
Net financing receivables	\$30,266	\$27,016
Allowance for credit losses coverage	1.2%	1.3%

Roll Forward of Global Financing Receivables Allowance for Credit Losses

(\$ in millions)				
January 1, 2012	Allowance Used*	Additions/ (Reductions)	Other**	December 31, 2012
\$350	\$(19)	\$26	\$(1)	\$355

*Represents reserved receivables, net of recoveries, that were disposed of during the period.

**Primarily represents translation adjustments.

The percentage of Global Financing receivables reserved decreased from 1.3 percent at December 31, 2011 to 1.2 percent at December 31, 2012 primarily due to the disposition of receivables previously reserved, and the increase in gross financing receivables. Specific reserves increased 6.2 percent from \$226 million at December 31, 2011 to \$240 million at December 31, 2012. Unallocated reserves decreased 7.3 percent from \$124 million at December 31, 2011, to \$115 million at December 31, 2012. Global Financing's bad debt expense was an increase of \$26 million for 2012, compared to an increase of \$42 million for 2011. The higher bad debt expense in 2011 was attributed to the economic environment in Europe.

Residual Value

Residual value is a risk unique to the financing business and management of this risk is dependent upon the ability to accurately project future equipment values at lease inception. Global Financing has insight into product plans and cycles for the IBM products under lease. Based upon this product information, Global Financing continually monitors projections of future equipment values and compares them with the residual values reflected in the portfolio. See note A, "Significant Accounting Policies," on page 86 for the company's accounting policy for residual values.

Global Financing optimizes the recovery of residual values by selling assets sourced from end of lease, leasing used equipment to new clients, or extending lease arrangements with current clients. Sales of equipment, which are primarily sourced from equipment returned at the end of a lease, represented 51.6 percent of Global Financing's revenue in 2012 and 48.1 percent in 2011. The gross profit margins on these sales were 53.6 percent and 54.8 percent in 2012 and 2011, respectively. The decrease in gross margin was driven by a lower internal sales margin and a shift in mix toward lower margin external sales, partially offset by a higher external sales margin.

The table below presents the recorded amount of unguaranteed residual value for sales-type, direct financing and operating leases at December 31, 2011 and 2012. In addition, the table presents the residual value as a percentage of the related original amount financed and a run out of when the unguaranteed residual value assigned to equipment on leases at December 31, 2012 is expected to be returned to the company. In addition to the unguaranteed residual value, on a limited basis, Global Financing will obtain guarantees of the future value of the equipment to be returned at end of lease. While primarily focused on IBM products, guarantees are also obtained for certain OEM products. These third-party guarantees are included in minimum lease payments as provided for by accounting standards in the determination of lease classifications for the covered equipment and provide protection against risk of loss arising from declines in equipment values for these assets.

The residual value guarantee increases the minimum lease payments that are utilized in determining the classification of a lease as a sales-type lease, a direct financing lease or an operating lease. The aggregate asset values associated with the guarantees

for sales-type leases were \$776 million and \$821 million for the financing transactions originated during the years ended December 31, 2012 and 2011, respectively. In 2012, the residual value guarantee program resulted in the company recognizing approximately \$601 million of revenue that would otherwise have been recognized in future periods as operating lease revenue. If the company had chosen to not participate in a residual value guarantee program in 2012 and prior years, the 2012 impact would be substantially mitigated by the effect of prior year asset values being recognized as operating lease revenue in the current year. The aggregate asset values associated with the guarantees of direct financing leases were \$199 million and \$44 million for the financing transactions originated during the years ended December 31, 2012 and 2011, respectively. The associated aggregate guaranteed future values at the scheduled end of lease were \$53 million and \$43 million for the financing transactions originated during the years ended December 31, 2012 and 2011, respectively. The cost of guarantees was \$5 million and \$4 million for the year ended December 31, 2012 and 2011, respectively.

Unguaranteed Residual Value

(\$ in millions)

	Total		Estimated Run Out of 2012 Balance			
	2011	2012	2013	2014	2015	2016 and Beyond
At December 31:						
Sales-type and direct financing leases	\$ 745	\$ 794	\$166	\$255	\$228	\$144
Operating leases	296	259	120	75	48	16

Debt

At December 31:	2012	2011
Debt-to-equity ratio	7.0x	7.2x

The company funds Global Financing through borrowings using a debt-to-equity ratio target of approximately 7 to 1. The debt used to fund Global Financing assets is composed of intercompany loans and external debt. The terms of the intercompany loans are set by the company to substantially match the term and currency underlying the financing receivable and are based on arm's-length pricing. Both assets and debt are presented in the Global Financing Balance Sheet on [page 64](#).

Global Financing provides financing predominantly for the company's external client assets, as well as for assets under contract by other IBM units. As previously stated, the company measures Global Financing as a stand-alone entity, and accordingly, interest expense relating to debt supporting Global Financing's external client and internal business is included in the "Global Financing Results of Operations" on [pages 63 and 64](#) and in note T, "Segment Information," on [pages 134 to 138](#).

In the company's Consolidated Statement of Earnings on [page 70](#), the external debt-related interest expense supporting Global Financing's internal financing to the company is reclassified from cost of financing to interest expense.

The following table provides additional information on total company debt. In this table, intercompany activity includes internal loans and leases at arm's-length pricing in support of Global Services' long-term contracts and other internal activity. The company believes these assets should be appropriately leveraged in line with the overall Global Financing business model.

(\$ in millions)	December 31, 2012	December 31, 2011
Global Financing Segment	\$24,501	\$23,332
Debt to support external clients	\$21,583	\$20,051
Debt to support internal clients	2,919	3,281
Non-Global Financing Segments	8,767	7,987
Debt supporting operations	11,686	11,269
Intercompany activity	(2,919)	(3,281)
Total company debt	\$33,269	\$31,320

Liquidity and Capital Resources

Global Financing is a segment of the company, and therefore is supported by the company's overall liquidity position and access to capital markets. Cash generated by Global Financing was primarily deployed to pay intercompany payables and dividends to the company in order to maintain an appropriate debt-to-equity ratio.

Return on Equity

(\$ in millions)	2012	2011
At December 31:		
Numerator		
Global Financing after-tax income ^{(a)*}	\$1,362	\$1,338
Denominator		
Average Global Financing equity ^{(b)**}	\$3,322	\$3,286
Global Financing return on equity ^{(a)/(b)}	41.0%	40.7%

* Calculated based upon an estimated tax rate principally based on Global Financing's geographic mix of earnings as IBM's provision for income taxes is determined on a consolidated basis.

** Average of the ending equity for Global Financing for the last five quarters.

Looking Forward

Global Financing's financial position provides flexibility and funding capacity which enables the company to be well positioned in the current environment. Global Financing's assets and new financing volumes are primarily IBM products and services financed to the company's clients and business partners, and substantially all financing assets are IT related assets which provide a stable base of business for future growth. Global Financing's offerings are competitive and available to clients as a result of the company's borrowing cost and access to the capital markets. Overall, Global Financing's originations will be dependent upon the demand for IT products and services as well as client participation rates.

IBM continues to access both the short-term commercial paper market and the medium- and long-term debt markets. A protracted period where IBM could not access the capital markets would likely lead to a slowdown in originations.

Interest rates and the overall economy (including currency fluctuations) will have an effect on both revenue and gross profit. The company's interest rate risk management policy, however, combined with the Global Financing pricing strategy should mitigate gross margin erosion due to changes in interest rates.

The economy could impact the credit quality of the Global Financing receivables portfolio and therefore the level of provision for credit losses. Global Financing will continue to apply rigorous credit policies in both the origination of new business and the evaluation of the existing portfolio.

As discussed on pages 65 and 66, Global Financing has historically been able to manage residual value risk both through insight into the company's product cycles, as well as through its remarketing business.

Global Financing has policies in place to manage each of the key risks involved in financing. These policies, combined with product and client knowledge, should allow for the prudent management of the business going forward, even during periods of uncertainty with respect to the global economy.

Management Responsibility for Financial Information

Responsibility for the integrity and objectivity of the financial information presented in this Annual Report rests with IBM management. The accompanying financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America, applying certain estimates and judgments as required.

IBM maintains an effective internal control structure. It consists, in part, of organizational arrangements with clearly defined lines of responsibility and delegation of authority, and comprehensive systems and control procedures. An important element of the control environment is an ongoing internal audit program. Our system also contains self-monitoring mechanisms, and actions are taken to correct deficiencies as they are identified.

To assure the effective administration of internal controls, we carefully select and train our employees, develop and disseminate written policies and procedures, provide appropriate communication channels and foster an environment conducive to the effective functioning of controls. We believe that it is essential for the company to conduct its business affairs in accordance with the highest ethical standards, as set forth in the IBM Business Conduct Guidelines. These guidelines, translated into numerous languages, are distributed to employees throughout the world, and reemphasized through internal programs to assure that they are understood and followed.

PricewaterhouseCoopers LLP, an independent registered public accounting firm, is retained to audit IBM's Consolidated Financial Statements and the effectiveness of the internal control over financial reporting. Its accompanying report is based on audits conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States).

The Audit Committee of the Board of Directors is composed solely of independent, non-management directors, and is responsible for recommending to the Board the independent registered public accounting firm to be retained for the coming year, subject to stockholder ratification. The Audit Committee meets periodically and privately with the independent registered public accounting firm, with the company's internal auditors, as well as with IBM management, to review accounting, auditing, internal control structure and financial reporting matters.

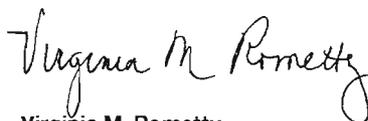

Management's Report on Internal Control Over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting of the company. Internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America.

The company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with accounting principles generally accepted in the United States of America, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

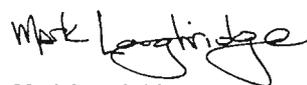

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management conducted an evaluation of the effectiveness of internal control over financial reporting based on the framework in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on this evaluation, management concluded that the company's internal control over financial reporting was effective as of December 31, 2012.

Finance and Enterprise Transformation
February 26, 2013

**To the Stockholders and Board of
Directors of International Business
Machines Corporation:**

In our opinion, the accompanying Consolidated Financial Statements appearing on [pages 70 through 138](#) present fairly, in all material respects, the financial position of International Business Machines Corporation and its subsidiaries at December 31, 2012 and 2011 and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2012 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2012, based on criteria established in *Internal Control – Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting appearing on [page 68](#). Our responsibility is to express opinions on these financial statements and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Amounts may not add due to rounding.

The accompanying notes on [pages 76 through 136](#) are an integral part of the financial statements.

Note A.

Significant Accounting Policies

Basis of Presentation

The accompanying Consolidated Financial Statements and footnotes of the International Business Machines Corporation (IBM or the company) have been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP).

Within the financial statements and tables presented, certain columns and rows may not add due to the use of rounded numbers for disclosure purposes. Percentages presented are calculated from the underlying whole-dollar amounts. Certain prior year amounts have been reclassified to conform to the current year presentation. This is annotated where applicable.

Noncontrolling interest amounts in income of \$11 million, \$6 million and \$9 million, net of tax, for the years ended December 31, 2012, 2011 and 2010, respectively, are included in the Consolidated Statement of Earnings within the other (income) and expense line item.

Principles of Consolidation

The Consolidated Financial Statements include the accounts of IBM and its controlled subsidiaries, which are generally majority owned. Any noncontrolling interest in the equity of a subsidiary is reported in Equity in the Consolidated Statement of Financial Position. Net income and losses attributable to the noncontrolling interest is reported as described above in the Consolidated Statement of Earnings. The accounts of variable interest entities (VIEs) are included in the Consolidated Financial Statements, if required. Investments in business entities in which the company does not have control, but has the ability to exercise significant influence over operating and financial policies, are accounted for using the equity method and the company's proportionate share of income or loss is recorded in other (income) and expense. The accounting policy for other investments in equity securities is on [pages 84 and 85](#) within "Marketable Securities." Equity investments in non-publicly traded entities are primarily accounted for using the cost method. All intercompany transactions and accounts have been eliminated in consolidation.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts of assets, liabilities, revenue, costs, expenses and other comprehensive income/(loss) (OCI) that are reported in the Consolidated Financial Statements and accompanying disclosures. These estimates are based on management's best knowledge of current events, historical experience, actions that the company may undertake in the future and on various other assumptions that are believed to be reasonable under the circumstances. As a result, actual results may be different from these estimates. See "Critical Accounting Estimates" on [pages 59 to 61](#) for a discussion of the company's critical accounting estimates.

Revenue

The company recognizes revenue when it is realized or realizable and earned. The company considers revenue realized or realizable and earned when it has persuasive evidence of an arrangement, delivery has occurred, the sales price is fixed or determinable and collectibility is reasonably assured. Delivery does not occur until products have been shipped or services have been provided to the client, risk of loss has transferred to the client, and either client acceptance has been obtained, client acceptance provisions have lapsed, or the company has objective evidence that the criteria specified in the client acceptance provisions have been satisfied. The sales price is not considered to be fixed or determinable until all contingencies related to the sale have been resolved.

The company recognizes revenue on sales to solution providers, resellers and distributors (herein referred to as "resellers") when the reseller has: economic substance apart from the company, credit risk, title and risk of loss to the inventory; and, the fee to the company is not contingent upon resale or payment by the end user, the company has no further obligations related to bringing about resale or delivery and all other revenue recognition criteria have been met.

The company reduces revenue for estimated client returns, stock rotation, price protection, rebates and other similar allowances. (See Schedule II, "Valuation and Qualifying Accounts and Reserves" included in the company's Annual Report on Form 10-K). Revenue is recognized only if these estimates can be reasonably and reliably determined. The company bases its estimates on historical results taking into consideration the type of client, the type of transaction and the specifics of each arrangement. Payments made under cooperative marketing programs are recognized as an expense only if the company receives from the client an identifiable benefit sufficiently separable from the product sale whose fair value can be reasonably and reliably estimated. If the company does not receive an identifiable benefit sufficiently separable from the product sale whose fair value can be reasonably estimated, such payments are recorded as a reduction of revenue.

Revenue from sales of third-party vendor products or services is recorded net of costs when the company is acting as an agent between the client and the vendor, and gross when the company is a principal to the transaction. Several factors are considered to determine whether the company is an agent or principal, most notably whether the company is the primary obligor to the client, or has inventory risk. Consideration is also given to whether the company adds meaningful value to the vendor's product or service, was involved in the selection of the vendor's product or service, has latitude in establishing the sales price or has credit risk.

The company reports revenue net of any revenue-based taxes assessed by governmental authorities that are imposed on and concurrent with specific revenue-producing transactions. In addition to the aforementioned general policies, the following are the specific revenue recognition policies for multiple-deliverable arrangements and for each major category of revenue.

Multiple-Deliverable Arrangements

The company enters into revenue arrangements that may consist of multiple deliverables of its products and services based on the needs of its clients. These arrangements may include any combination of services, software, hardware and/or financing. For example, a client may purchase a server that includes operating system software. In addition, the arrangement may include post-contract support for the software and a contract for post-warranty maintenance service for the hardware. These types of arrangements can also include financing provided by the company. These arrangements consist of multiple deliverables, with the hardware and software delivered in one reporting period and the software support and hardware maintenance services delivered across multiple reporting periods. In another example, a client may outsource the running of its datacenter operations to the company on a long-term, multiple-year basis and periodically purchase servers and/or software products from the company to upgrade or expand its facility. The outsourcing services are provided on a continuous basis across multiple reporting periods and the hardware and software products are delivered in one reporting period. To the extent that a deliverable in a multiple-deliverable arrangement is subject to specific accounting guidance that deliverable is accounted for in accordance with such specific guidance. Examples of such arrangements may include leased hardware which is subject to specific leasing guidance or software which is subject to specific software revenue recognition guidance on whether and/or how to separate multiple-deliverable arrangements into separate units of accounting (separability) and how to allocate the arrangement consideration among those separate units of accounting (allocation). For all other deliverables in multiple-deliverable arrangements, the guidance below is applied for separability and allocation. A multiple-deliverable arrangement is separated into more than one unit of accounting if the following criteria are met:

- The delivered item(s) has value to the client on a stand-alone basis; and
- If the arrangement includes a general right of return relative to the delivered item(s), delivery or performance of the undelivered item(s) is considered probable and substantially in the control of the company.

If these criteria are not met, the arrangement is accounted for as one unit of accounting which would result in revenue being recognized ratably over the contract term or being deferred until the earlier of when such criteria are met or when the last undelivered element is delivered. If these criteria are met for each element and there is a relative selling price for all units of accounting in an arrangement, the arrangement consideration is allocated to the separate units of accounting based on each unit's relative selling price. The following revenue policies are then applied to each unit of accounting, as applicable.

Revenue from the company's business analytics, Smarter Planet and cloud offerings follow the specific revenue recognition policies for multiple deliverable arrangements and for each major category of revenue depending on the type of offering which can be comprised of services, hardware and/or software.

Services

The company's primary services offerings include information technology (IT) datacenter and business process outsourcing, application management services, consulting and systems integration, technology infrastructure and system maintenance, Web hosting and the design and development of complex IT systems to a client's specifications (design and build). These services are provided on a time-and-material basis, as a fixed-price contract or as a fixed-price per measure of output contract and the contract terms range from less than one year to over 10 years.

Revenue from IT datacenter and business process outsourcing contracts is recognized in the period the services are provided using either an objective measure of output or on a straight-line basis over the term of the contract. Under the output method, the amount of revenue recognized is based on the services delivered in the period.

Revenue from application management services, technology infrastructure and system maintenance and Web hosting contracts is recognized on a straight-line basis over the terms of the contracts. Revenue from time-and-material contracts is recognized as labor hours are delivered and direct expenses are incurred. Revenue related to extended warranty and product maintenance contracts is recognized on a straight-line basis over the delivery period.

Revenue from fixed-price design and build contracts is recognized under the percentage-of-completion (POC) method. Under the POC method, revenue is recognized based on the labor costs incurred to date as a percentage of the total estimated labor costs to fulfill the contract. If circumstances arise that change the original estimates of revenues, costs, or extent of progress toward completion, revisions to the estimates are made. These revisions may result in increases or decreases in estimated revenues or costs, and such revisions are reflected in income in the period in which the circumstances that gave rise to the revision become known by the company.

The company performs ongoing profitability analyses of its services contracts accounted for under the POC method in order to determine whether the latest estimates of revenues, costs and profits require updating. If at any time these estimates indicate that the contract will be unprofitable, the entire estimated loss for the remainder of the contract is recorded immediately. For non-POC method services contracts, any losses are recorded as incurred.

In some services contracts, the company bills the client prior to recognizing revenue from performing the services. Deferred income of \$7,281 million and \$7,363 million at December 31, 2012 and 2011, respectively, is included in the Consolidated Statement of Financial Position. In other services contracts, the company performs the services prior to billing the client. Unbilled accounts receivable of \$1,998 million and \$2,166 million at December 31, 2012 and 2011, respectively, is included in notes and accounts receivable-trade in the Consolidated Statement of Financial Position.

Billings usually occur in the month after the company performs the services or in accordance with specific contractual provisions. Unbilled receivables are expected to be billed within four months.

Hardware

The company's hardware offerings include the sale or lease of system servers, storage solutions, retail store systems and the sale of semiconductors. The company also offers installation services for its more complex products.

Revenue from hardware sales and sales-type leases is recognized when risk of loss has transferred to the client and there are no unfulfilled company obligations that affect the client's final acceptance of the arrangement. Any cost of standard warranties and remaining obligations that are inconsequential or perfunctory are accrued when the corresponding revenue is recognized. Revenue from rentals and operating leases is recognized on a straight-line basis over the term of the rental or lease.

Software

Revenue from perpetual (one-time charge) license software is recognized at the inception of the license term if all revenue recognition criteria have been met. Revenue from term (recurring license charge) license software is recognized on a straight-line basis over the period that the client is entitled to use the license. Revenue from post-contract support, which may include unspecified upgrades on a when-and-if-available basis, is recognized on a straight-line basis over the period such items are delivered. In multiple-deliverable arrangements that include software that is more than incidental to the products or services as a whole (software multiple-deliverable arrangements), software and software-related elements are accounted for in accordance with software revenue recognition guidance. Software-related elements include software products and services for which a software deliverable is essential to its functionality. Tangible products containing software components and non-software components that function together to deliver the tangible product's essential functionality are not within the scope of software revenue recognition guidance and are accounted for based on other applicable revenue recognition guidance.

A software multiple-deliverable arrangement is separated into more than one unit of accounting if all of the following criteria are met:

- The functionality of the delivered element(s) is not dependent on the undelivered element(s);
- There is vendor-specific objective evidence (VSOE) of fair value of the undelivered element(s). VSOE of fair value is based on the price charged when the deliverable is sold separately by the company on a regular basis and not as part of the multiple-deliverable arrangement; and
- Delivery of the delivered element(s) represents the culmination of the earnings process for that element(s).

If any one of these criteria is not met, the arrangement is accounted for as one unit of accounting which would result in revenue being recognized ratably over the contract term or being deferred until the earlier of when such criteria are met or when the last undelivered element is delivered. If these criteria are met for each element and there is VSOE of fair value for all units of accounting in an arrangement, the arrangement consideration is allocated to the separate units of accounting based on each unit's relative VSOE of fair value. There may be cases, however, in which there is VSOE of fair value of the undelivered item(s) but no such evidence for the delivered item(s). In these cases, the residual method is used to allocate the arrangement consideration. Under the residual method, the amount of consideration allocated to the delivered item(s) equals the total arrangement consideration less the aggregate VSOE of fair value of the undelivered elements.

The company's multiple-deliverable arrangements may have a stand-alone software deliverable that is subject to the existing software revenue recognition guidance. The revenue for these multiple-deliverable arrangements is allocated to the software deliverable and the non-software deliverables based on the relative selling prices of all of the deliverables in the arrangement using the hierarchy: VSOE, third-party evidence (TPE) or best estimate of selling price (BESP). In the limited circumstances where the company cannot determine VSOE or TPE of the selling price for all of the deliverables in the arrangement, including the software deliverable, BESP is used for the purpose of performing this allocation.

Financing

Financing income attributable to sales-type leases, direct financing leases and loans is recognized on the accrual basis using the effective interest method. Operating lease income is recognized on a straight-line basis over the term of the lease.

Best Estimate of Selling Price

In certain limited instances, the company is not able to establish VSOE for all elements in a multiple-deliverable arrangement. When VSOE cannot be established, the company attempts to establish the selling price of each element based on TPE. TPE is determined based on competitor prices for similar deliverables when sold separately.

When the company is unable to establish selling price using VSOE or TPE, the company uses BESP in its allocation of arrangement consideration. The objective of BESP is to determine the price at which the company would transact a sale if the product or service were sold on a stand-alone basis. Due to the fact that the company sells its products and services on a stand-alone basis, and therefore has established VSOE for its products and services offerings, the company uses BESP to determine the relative selling price for a product or service in a multiple-deliverable arrangement on an infrequent basis. An example of when BESP would be used is when the company sells a new product, for which VSOE and TPE does not yet exist, in a multiple-deliverable arrangement prior to selling the new product on a stand-alone basis.

The company determines BEBP by considering multiple factors including, but not limited to, overall market conditions, including geographic or regional specific factors, competitive positioning, competitor actions, internal costs, profit objectives and pricing practices. The determination of BEBP is a formal process that includes review and approval by the company's management. In addition, the company regularly reviews VSOE and TPE for its products and services, in addition to BEBP.

Services Costs

Recurring operating costs for services contracts, including costs related to bid and proposal activities, are recognized as incurred. For fixed-price design and build contracts, the costs of external hardware and software accounted for under the POC method are deferred and recognized based on the labor costs incurred to date, as a percentage of the total estimated labor costs to fulfill the contract. Certain eligible, nonrecurring costs incurred in the initial phases of outsourcing contracts are deferred and subsequently amortized. These costs consist of transition and setup costs related to the installation of systems and processes and are amortized on a straight-line basis over the expected period of benefit, not to exceed the term of the contract. Additionally, fixed assets associated with outsourcing contracts are capitalized and depreciated on a straight-line basis over the expected useful life of the asset. If an asset is contract specific, then the depreciation period is the shorter of the useful life of the asset or the contract term. Amounts paid to clients in excess of the fair value of acquired assets used in outsourcing arrangements are deferred and amortized on a straight-line basis as a reduction of revenue over the expected period of benefit not to exceed the term of the contract. The company performs periodic reviews to assess the recoverability of deferred contract transition and setup costs. This review is done by comparing the estimated minimum remaining undiscounted cash flows of a contract to the unamortized contract costs. If such minimum undiscounted cash flows are not sufficient to recover the unamortized costs, an impairment loss is recognized.

Deferred services transition and setup costs were \$2,424 million and \$2,589 million at December 31, 2012 and 2011, respectively. Amortization of deferred services transition and setup costs was estimated at December 31, 2012 to be \$819 million in 2013, \$509 million in 2014, \$430 million in 2015, \$277 million in 2016 and \$390 million thereafter.

Deferred amounts paid to clients in excess of the fair value of acquired assets used in outsourcing arrangements were \$51 million and \$65 million at December 31, 2012 and 2011, respectively. Amortization of deferred amounts paid to clients in excess of the fair value of acquired assets is recorded as an offset of revenue and was estimated at December 31, 2012 to be \$22 million in 2013, \$19 million in 2014, \$9 million in 2015, \$2 million in 2016 and less than \$1 million thereafter. In situations in which an outsourcing contract is terminated, the terms of the contract may require the client to reimburse the company for the recovery of unbilled accounts receivable, unamortized deferred costs incurred to purchase specific assets utilized in the delivery of services and to pay any additional costs incurred by the company to transition the services.

Software Costs

Costs that are related to the conceptual formulation and design of licensed software programs are expensed as incurred to research, development and engineering expense; costs that are incurred to produce the finished product after technological feasibility has been established are capitalized as an intangible asset. Capitalized amounts are amortized on a straight-line basis over periods ranging up to three years and are recorded in software cost within cost of sales. The company performs periodic reviews to ensure that unamortized program costs remain recoverable from future revenue. Costs to support or service licensed programs are charged to software cost within cost of sales as incurred.

The company capitalizes certain costs that are incurred to purchase or to create and implement internal-use software programs, including software coding, installation, testing and certain data conversions. These capitalized costs are amortized on a straight-line basis over periods up to two years and are recorded in selling, general and administrative expense.

Product Warranties

The company offers warranties for its hardware products that generally range up to three years, with the majority being either one or three years. Estimated costs for warranty terms standard to the deliverable are recognized when revenue is recorded for the related deliverable. The company estimates its warranty costs standard to the deliverable based on historical warranty claim experience and estimates of future spending, and applies this estimate to the revenue stream for products under warranty. Estimated future costs for warranties applicable to revenue recognized in the current period are charged to cost of sales. The warranty liability is reviewed quarterly to verify that it properly reflects the remaining obligation based on the anticipated expenditures over the balance of the obligation period. Adjustments are made when actual warranty claim experience differs from estimates. Costs from fixed-price support or maintenance contracts, including extended warranty contracts, are recognized as incurred.

Revenue from separately priced extended warranty contracts is recorded as deferred income and subsequently recognized on a straight-line basis over the delivery period. Changes in deferred income for extended warranty contracts, and in the warranty liability for standard warranties, which are included in other accrued expenses and liabilities and other liabilities in the Consolidated Statement of Financial Position, are presented in the following tables:

Standard Warranty Liability

(\$ in millions)

	2012	2011
Balance at January 1	\$ 407	\$ 375
Current period accruals	394	435
Accrual adjustments to reflect actual experience	(15)	18
Charges incurred	(392)	(420)
Balance at December 31	\$ 394	\$ 407

Extended Warranty Liability (Deferred Income)

(\$ in millions)

	2012	2011
Balance at January 1	\$ 636	\$ 670
Revenue deferred for new extended warranty contracts	268	314
Amortization of deferred revenue	(301)	(330)
Other*	4	(19)
Balance at December 31	\$ 606	\$ 636
Current portion	\$ 289	\$ 301
Noncurrent portion	317	335
Balance at December 31	\$ 606	\$ 636

* Other consists primarily of foreign currency translation adjustments.

Shipping and Handling

Costs related to shipping and handling are recognized as incurred and included in cost in the Consolidated Statement of Earnings.

Expense and Other Income

Selling, General and Administrative

Selling, general and administrative (SG&A) expense is charged to income as incurred. Expenses of promoting and selling products and services are classified as selling expense and include such items as compensation, advertising, sales commissions and travel. General and administrative expense includes such items as compensation, legal costs, office supplies, non-income taxes, insurance and office rental. In addition, general and administrative expense includes other operating items such as an allowance for credit losses, workforce rebalancing accruals for contractually obligated payments to employees terminated in the ongoing course of business, acquisition costs related to business combinations, amortization of certain intangible assets and environmental remediation costs.

Advertising and Promotional Expense

The company expenses advertising and promotional costs as incurred. Cooperative advertising reimbursements from vendors are recorded net of advertising and promotional expense in the period in which the related advertising and promotional expense is incurred. Advertising and promotional expense, which includes media, agency and promotional expense, was \$1,339 million, \$1,373 million and \$1,337 million in 2012, 2011 and 2010, respectively, and is recorded in SG&A expense in the Consolidated Statement of Earnings.

Research, Development and Engineering

Research, development and engineering (RD&E) costs are expensed as incurred. Software costs that are incurred to produce the finished product after technological feasibility has been established are capitalized as an intangible asset. See "Software Costs" on [page 79](#).

Intellectual Property and Custom Development Income

The company licenses and sells the rights to certain of its intellectual property (IP) including internally developed patents, trade secrets and technological know-how. Certain IP transactions to third parties are licensing/royalty-based and others are transaction-based sales and other transfers. Licensing/royalty-based fees involve transfers in which the company earns the income over time, or the amount of income is not fixed or determinable until the licensee sells future related products (i.e., variable royalty, based upon licensee's revenue). Sales and other transfers typically include transfers of IP whereby the company has fulfilled its obligations and the fee received is fixed or determinable at the transfer date. The company also enters into cross-licensing arrangements of patents, and income from these arrangements is recorded when earned. In addition, the company earns income from certain custom development projects for strategic technology partners and specific clients. The company records the income from these projects when the fee is realized and earned, is not refundable and is not dependent upon the success of the project.

Other (Income) and Expense

Other (income) and expense includes interest income (other than from Global Financing external business transactions), gains and losses on certain derivative instruments, gains and losses from securities and other investments, gains and losses from certain real estate transactions, foreign currency transaction gains and losses, gains and losses from the sale of businesses and amounts related to accretion of asset retirement obligations.

Business Combinations and Intangible Assets Including Goodwill

The company accounts for business combinations using the acquisition method and accordingly, the identifiable assets acquired, the liabilities assumed, and any noncontrolling interest in the acquiree are recorded at their acquisition date fair values. Goodwill represents the excess of the purchase price over the fair value of net assets, including the amount assigned to identifiable intangible assets. The primary drivers that generate goodwill are the value of synergies between the acquired entities and the company and the acquired assembled workforce, neither of which qualifies as an identifiable intangible asset. Goodwill recorded in an acquisition is assigned to applicable reporting units based on expected revenues. Identifiable intangible assets with finite lives are amortized over their useful lives. Amortization of completed technology is recorded in Cost, and amortization of all other intangible assets is recorded in SG&A expense. Acquisition-related costs, including advisory, legal, accounting, valuation and other costs, are expensed in the periods in which the costs are incurred. The results of operations of acquired businesses are included in the Consolidated Financial Statements from the acquisition date.

Impairment

Long-lived assets, other than goodwill and indefinite-lived intangible assets, are tested for impairment based on undiscounted cash flows and, if impaired, written down to fair value based on either discounted cash flows or appraised values. Goodwill and indefinite-lived intangible assets are tested annually, in the fourth quarter, for impairment and whenever changes in circumstances indicate an impairment may exist. Goodwill is tested at the reporting unit level which is the operating segment, or a business, which is one level below that operating segment (the "component" level) if discrete financial information is prepared and regularly reviewed by management at the segment level. Components are aggregated as a single reporting unit if they have similar economic characteristics.

Depreciation and Amortization

Property, plant and equipment are carried at cost and depreciated over their estimated useful lives using the straight-line method. The estimated useful lives of certain depreciable assets are as follows: buildings, 30 to 50 years; building equipment, 10 to 20 years; land improvements, 20 years; plant, laboratory and office equipment, 2 to 20 years; and computer equipment, 1.5 to 5 years. Leasehold improvements are amortized over the shorter of their estimated useful lives or the related lease term, rarely exceeding 25 years.

Capitalized software costs incurred or acquired after technological feasibility has been established are amortized over periods ranging up to 3 years. Capitalized costs for internal-use software are amortized on a straight-line basis over periods up to 2 years. Other intangible assets are amortized over periods between 1 and 7 years.

Environmental

The cost of internal environmental protection programs that are preventative in nature are expensed as incurred. When a cleanup program becomes likely, and it is probable that the company will incur cleanup costs and those costs can be reasonably estimated, the company accrues remediation costs for known environmental liabilities. The company's maximum exposure for all environmental liabilities cannot be estimated and no amounts are recorded for environmental liabilities that are not probable or estimable.

Asset Retirement Obligations

Asset retirement obligations (ARO) are legal obligations associated with the retirement of long-lived assets. These liabilities are initially recorded at fair value and the related asset retirement costs are capitalized by increasing the carrying amount of the related assets by the same amount as the liability. Asset retirement costs are subsequently depreciated over the useful lives of the related assets. Subsequent to initial recognition, the company records period-to-period changes in the ARO liability resulting from the passage of time in interest expense and revisions to either the timing or the amount of the original expected cash flows to the related assets.

Defined Benefit Pension and Nonpension Postretirement Benefit Plans

The funded status of the company's defined benefit pension plans and nonpension postretirement benefit plans (retirement-related benefit plans) is recognized in the Consolidated Statement of Financial Position. The funded status is measured as the difference between the fair value of plan assets and the benefit obligation at December 31, the measurement date. For defined benefit pension plans, the benefit obligation is the projected benefit obligation (PBO), which represents the actuarial present value of benefits expected to be paid upon retirement based on employee services already rendered and estimated future compensation levels. For the nonpension postretirement benefit plans, the benefit obligation is the accumulated postretirement benefit obligation (APBO), which represents the actuarial present value of postretirement benefits attributed to employee services already rendered. The fair value of plan assets represents the current market value of cumulative company and participant contributions made to an irrevocable trust fund, held for the sole benefit of participants, which are invested by the trust fund. Overfunded plans, with the fair value of plan assets exceeding the benefit obligation, are aggregated and recorded as a prepaid pension asset equal to this excess. Underfunded plans, with the benefit obligation exceeding the fair value of plan assets, are aggregated and recorded as a retirement and nonpension postretirement benefit obligation equal to this excess.

The current portion of the retirement and nonpension postretirement benefit obligations represents the actuarial present value of benefits payable in the next 12 months exceeding the fair value of plan assets, measured on a plan-by-plan basis. This obligation is recorded in compensation and benefits in the Consolidated Statement of Financial Position.

Net periodic pension and nonpension postretirement benefit cost/(income) is recorded in the Consolidated Statement of Earnings and includes service cost, interest cost, expected return on plan assets, amortization of prior service costs/(credits) and (gains)/losses previously recognized as a component of OCI and amortization of the net transition asset remaining in accumulated other comprehensive income/(loss) (AOCI). Service cost represents the actuarial present value of participant benefits earned in the current year. Interest cost represents the time value of money cost associated with the passage of time. Certain events, such as changes in the employee base, plan amendments and changes in actuarial assumptions, result in a change in the benefit obligation and the corresponding change in OCI. The result of these events is amortized as a component of net periodic cost/(income) over the service lives or life expectancy of the participants, depending on the plan, provided such amounts exceed thresholds which are based upon the benefit obligation or the value of plan assets. Net periodic cost/(income) is recorded in Cost, SG&A and RD&E in the Consolidated Statement of Earnings based on the employees' respective functions.

(Gains)/losses and prior service costs/(credits) not recognized as a component of net periodic cost/(income) in the Consolidated Statement of Earnings as they arise are recognized as a component of OCI in the Consolidated Statement of Comprehensive Income. Those (gains)/losses and prior service costs/(credits) are subsequently recognized as a component of net periodic cost/(income) pursuant to the recognition and amortization provisions of applicable accounting guidance. (Gains)/losses arise as a result of differences between actual experience and assumptions or as a result of changes in actuarial assumptions. Prior service costs/(credits) represent the cost of benefit changes attributable to prior service granted in plan amendments.

The measurement of benefit obligations and net periodic cost/(income) is based on estimates and assumptions approved by the company's management. These valuations reflect the terms of the plans and use participant-specific information such as compensation, age and years of service, as well as certain assumptions, including estimates of discount rates, expected return on plan assets, rate of compensation increases, interest crediting rates and mortality rates.

Defined Contribution Plans

The company's contribution for defined contribution plans is recorded when the employee renders service to the company. The charge is recorded in Cost, SG&A and RD&E in the Consolidated Statement of Earnings based on the employees' respective functions.

Stock-Based Compensation

Stock-based compensation represents the cost related to stock-based awards granted to employees. The company measures stock-based compensation cost at the grant date, based on the estimated fair value of the award and recognizes the cost on a straight-line basis (net of estimated forfeitures) over the employee

requisite service period. The company estimates the fair value of stock options using a Black-Scholes valuation model. The company also grants its employees Restricted Stock Units (RSUs), including Retention Restricted Stock Units (RRSUs) and Performance Share Units (PSUs). RSUs are stock awards granted to employees that entitle the holder to shares of common stock as the award vests, typically over a one- to five-year period. The fair value of the awards is determined and fixed on the grant date based on the company's stock price, adjusted for the exclusion of dividend equivalents. All stock-based compensation cost is recorded in Cost, SG&A, and RD&E in the Consolidated Statement of Earnings based on the employees' respective functions.

The company records deferred tax assets for awards that result in deductions on the company's income tax returns, based on the amount of compensation cost recognized and the statutory tax rate in the jurisdiction in which it will receive a deduction. Differences between the deferred tax assets recognized for financial reporting purposes and the actual tax deduction reported on the income tax return are recorded in additional paid-in capital (if the tax deduction exceeds the deferred tax asset) or in the Consolidated Statement of Earnings (if the deferred tax asset exceeds the tax deduction and no additional paid-in capital exists from previous awards).

Income Taxes

Income tax expense is based on reported income before income taxes. Deferred income taxes reflect the tax effect of temporary differences between asset and liability amounts that are recognized for financial reporting purposes and the amounts that are recognized for income tax purposes. These deferred taxes are measured by applying currently enacted tax laws. Valuation allowances are recognized to reduce deferred tax assets to the amount that will more likely than not be realized. In assessing the need for a valuation allowance, management considers all available evidence for each jurisdiction including past operating results, estimates of future taxable income and the feasibility of ongoing tax planning strategies. When the company changes its determination as to the amount of deferred tax assets that can be realized, the valuation allowance is adjusted with a corresponding impact to income tax expense in the period in which such determination is made.

The company recognizes tax liabilities when, despite the company's belief that its tax return positions are supportable, the company believes that certain positions may not be fully sustained upon review by tax authorities. Benefits from tax positions are measured at the largest amount of benefit that is greater than 50 percent likely of being realized upon settlement. The current portion of tax liabilities is included in taxes and the noncurrent portion of tax liabilities is included in other liabilities in the Consolidated Statement of Financial Position. To the extent that new information becomes available which causes the company to change its judgment regarding the adequacy of existing tax liabilities, such changes to tax liabilities will impact income tax expense in the period in which such determination is made. Interest and penalties, if any, related to accrued liabilities for potential tax assessments are included in income tax expense.

Translation of Non-U.S. Currency Amounts

Assets and liabilities of non-U.S. subsidiaries that have a local functional currency are translated to United States (U.S.) dollars at year-end exchange rates. Translation adjustments are recorded in OCI. Income and expense items are translated at weighted-average rates of exchange prevailing during the year.

Inventories, property, plant and equipment — net and other non-monetary assets and liabilities of non-U.S. subsidiaries and branches that operate in U.S. dollars are translated at the approximate exchange rates prevailing when the company acquired the assets or liabilities. All other assets and liabilities denominated in a currency other than U.S. dollars are translated at year-end exchange rates with the transaction gain or loss recognized in other (income) and expense. Income and expense items are translated at the weighted-average rates of exchange prevailing during the year. These translation gains and losses are included in net income for the period in which exchange rates change.

Derivative Financial Instruments

All derivatives are recognized in the Consolidated Statement of Financial Position at fair value and are reported in prepaid expenses and other current assets, investments and sundry assets, other accrued expenses and liabilities or other liabilities. Classification of each derivative as current or noncurrent is based upon whether the maturity of the instrument is less than or greater than 12 months. To qualify for hedge accounting, the company requires that the instruments be effective in reducing the risk exposure that they are designated to hedge. For instruments that hedge cash flows, hedge designation criteria also require that it be probable that the underlying transaction will occur. Instruments that meet established accounting criteria are formally designated as hedges. These criteria demonstrate that the derivative is expected to be highly effective at offsetting changes in fair value or cash flows of the underlying exposure both at inception of the hedging relationship and on an ongoing basis. The method of assessing hedge effectiveness and measuring hedge ineffectiveness is formally documented at hedge inception. The company assesses hedge effectiveness and measures hedge ineffectiveness at least quarterly throughout the designated hedge period.

Where the company applies hedge accounting, the company designates each derivative as a hedge of: (1) the fair value of a recognized financial asset or liability, or of an unrecognized firm commitment (fair value hedge attributable to interest rate or foreign currency risk); (2) the variability of anticipated cash flows of a forecasted transaction, or the cash flows to be received or paid related to a recognized financial asset or liability (cash flow hedge attributable to interest rate or foreign currency risk); or (3) a hedge of a long-term investment (net investment hedge) in a foreign operation. In addition, the company may enter into derivative contracts that economically hedge certain of its risks, even though hedge accounting does not apply or the company elects not to apply hedge accounting. In these cases, there exists a natural hedging relationship in which changes in the fair value of the derivative, which are recognized currently in net income, act as an economic offset to changes in the fair value of the underlying hedged item(s).

Changes in the fair value of a derivative that is designated as a fair value hedge, along with offsetting changes in the fair value of the underlying hedged exposure, are recorded in earnings each period. For hedges of interest rate risk, the fair value adjustments are recorded as adjustments to interest expense and cost of financing in the Consolidated Statement of Earnings. For hedges of currency risk associated with recorded financial assets or liabilities, derivative fair value adjustments are recognized in other (income) and expense in the Consolidated Statement of Earnings. Changes in the fair value of a derivative that is designated as a cash flow hedge are recorded, net of applicable taxes, in OCI, in the Consolidated Statement of Comprehensive Income. When net income is affected by the variability of the underlying cash flow, the applicable offsetting amount of the gain or loss from the derivative that is deferred in AOCI is released to net income and reported in interest expense, cost, SG&A expense or other (income) and expense in the Consolidated Statement of Earnings based on the nature of the underlying cash flow hedged. Effectiveness for net investment hedging derivatives is measured on a spot-to-spot basis. The effective portion of changes in the fair value of net investment hedging derivatives and other non-derivative financial instruments designated as net investment hedges are recorded as foreign currency translation adjustments in OCI. Changes in the fair value of the portion of a net investment hedging derivative excluded from the effectiveness assessment are recorded in interest expense. If the underlying hedged item in a fair value hedge ceases to exist, all changes in the fair value of the derivative are included in net income each period until the instrument matures. When the derivative transaction ceases to exist, a hedged asset or liability is no longer adjusted for changes in its fair value except as required under other relevant accounting standards. Derivatives that are not designated as hedges, as well as changes in the fair value of derivatives that do not effectively offset changes in the fair value of the underlying hedged item throughout the designated hedge period (collectively, "ineffectiveness"), are recorded in net income each period and are reported in other (income) and expense. When a cash flow hedging relationship is discontinued, the net gain or loss in AOCI must generally remain in AOCI until the item that was hedged affects earnings. However, when it is probable that a forecasted transaction will not occur by the end of the originally specified time period or within an additional two-month period thereafter, the net gain or loss in AOCI must be reclassified into earnings immediately. The company reports cash flows arising from derivative financial instruments designated as fair value or cash flow hedges consistent with the classification of cash flows from the underlying hedged items that these derivatives are hedging. Accordingly, the cash flows associated with derivatives designated as fair value or cash flow hedges are classified in cash flows from operating activities in the Consolidated Statement of Cash Flows. Cash flows from derivatives designated as net investment hedges and derivatives that do not qualify as hedges are reported in cash flows from investing activities. For currency swaps designated as hedges of foreign currency denominated debt (included in the company's debt risk management program as addressed in note D, "Financial Instruments," on pages 94 to 98), cash flows directly associated with the settlement of the principal element of these swaps are reported in payments to settle debt in cash flows from financing activities in the Consolidated Statement of Cash Flows.

Financial Instruments

In determining the fair value of its financial instruments, the company uses a variety of methods and assumptions that are based on market conditions and risks existing at each balance sheet date. See note D, "Financial Instruments," on [pages 92 to 94](#) for further information. All methods of assessing fair value result in a general approximation of value, and such value may never actually be realized.

Fair Value Measurement

Accounting guidance defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Under this guidance, the company is required to classify certain assets and liabilities based on the following fair value hierarchy:

- Level 1—Quoted prices (unadjusted) in active markets for identical assets or liabilities that can be accessed at the measurement date;
- Level 2—Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly; and
- Level 3—Unobservable inputs for the asset or liability.

The guidance requires the use of observable market data if such data is available without undue cost and effort.

When available, the company uses unadjusted quoted market prices in active markets to measure the fair value and classifies such items within Level 1. If quoted market prices are not available, fair value is based upon internally developed models that use current market-based or independently sourced market parameters such as interest rates and currency rates. Items valued using internally generated models are classified according to the lowest level input or value driver that is significant to the valuation.

The determination of fair value considers various factors including interest rate yield curves and time value underlying the financial instruments. For derivatives and debt securities, the company uses a discounted cash flow analysis using discount rates commensurate with the duration of the instrument.

In determining the fair value of financial instruments, the company considers certain market valuation adjustments to the "base valuations" calculated using the methodologies described below for several parameters that market participants would consider in determining fair value:

- Counterparty credit risk adjustments are applied to financial instruments, taking into account the actual credit risk of a counterparty as observed in the credit default swap market to determine the true fair value of such an instrument.
- Credit risk adjustments are applied to reflect the company's own credit risk when valuing all liabilities measured at fair value. The methodology is consistent with that applied in developing counterparty credit risk adjustments, but incorporates the company's own credit risk as observed in the credit default swap market.

As an example, the fair value of derivatives is derived utilizing a discounted cash flow model that uses observable market inputs such as known notional value amounts, yield curves, spot and forward exchange rates as well as discount rates. These inputs relate to liquid, heavily traded currencies with active markets which are available for the full term of the derivative.

Certain financial assets are measured at fair value on a nonrecurring basis. These assets include equity method investments that are recognized at fair value at the measurement date to the extent that they are deemed to be other-than-temporarily impaired. Certain assets that are measured at fair value on a recurring basis can be subject to nonrecurring fair value measurements. These assets include available-for-sale equity investments that are deemed to be other-than-temporarily impaired. In the event of an other-than-temporary impairment of a financial instrument, fair value is measured using a model described above.

Accounting guidance permits the measurement of eligible financial assets, financial liabilities and firm commitments at fair value, on an instrument-by-instrument basis, that are otherwise not permitted to be accounted for at fair value under other accounting standards. This election is irrevocable. The company does not apply the fair value option to any eligible assets or liabilities.

Cash Equivalents

All highly liquid investments with maturities of three months or less at the date of purchase are considered to be cash equivalents.

Marketable Securities

Debt securities included in current assets represent securities that are expected to be realized in cash within one year of the balance sheet date. Long-term debt securities that are not expected to be realized in cash within one year and alliance equity securities are included in investments and sundry assets. Debt and marketable equity securities are considered available for sale and are reported at fair value with unrealized gains and losses, net of applicable taxes, in OCI. The realized gains and losses for available-for-sale securities are included in other (income) and expense in the Consolidated Statement of Earnings. Realized gains and losses are calculated based on the specific identification method.

In determining whether an other-than-temporary decline in market value has occurred, the company considers the duration that, and extent to which, the fair value of the investment is below its cost, the financial condition and near-term prospects of the issuer or underlying collateral of a security; and the company's intent and ability to retain the security in order to allow for an anticipated recovery in fair value. Other-than-temporary declines in fair value from amortized cost for available-for-sale equity and debt securities that the company intends to sell or would more likely than not be required to sell before the expected recovery of the amortized cost basis are charged to other (income) and expense in the period in which the loss occurs. For debt securities that the company has no intent to sell and believes that it more likely than not will not be required to sell prior to recovery, only the credit loss component of the impairment is recognized in other (income) and expense, while the remaining loss is recognized in OCI. The credit loss component recognized in other (income) and expense is identified as the amount of the principal cash flows not expected to be received over the remaining term of the debt security as projected using the company's cash flow projections.

Inventories

Raw materials, work in process and finished goods are stated at the lower of average cost or market. Cash flows related to the sale of inventories are reflected in net cash provided by operating activities in the Consolidated Statement of Cash Flows.

Allowance for Credit Losses

Receivables are recorded concurrent with billing and shipment of a product and/or delivery of a service to customers. A reasonable estimate of probable net losses on the value of customer receivables is recognized by establishing an allowance for credit losses.

Notes and Accounts Receivable—Trade

An allowance for uncollectible trade receivables is estimated based on a combination of write-off history, aging analysis and any specific, known troubled accounts.

Financing Receivables

Financing receivables include sales-type leases, direct financing leases and loans. Leases are accounted for in accordance with lease accounting standards. Loan receivables are financial assets recorded at amortized cost which approximates fair value. The company determines its allowances for credit losses on financing receivables based on two portfolio segments: lease receivables and loan receivables. The company further segments the portfolio into two classes: major markets and growth markets.

When calculating the allowances, the company considers its ability to mitigate a potential loss by repossessing leased equipment and by considering the current fair market value of any other collateral. The value of the equipment is the net realizable value. The allowance for credit losses for capital leases, installment sales and customer loans includes an assessment of the entire balance of the capital lease or loan, including amounts not yet due. The methodologies that the company uses to calculate its receivables reserves, which are applied consistently to its different portfolios, are as follows:

Individually Evaluated—The company reviews all financing receivables considered at risk on a quarterly basis. The review primarily consists of an analysis based upon current information available about the client, such as financial statements, news reports, published credit ratings, current market-implied credit analysis, as well as the current economic environment, collateral net of repossession cost and prior collection history. For loans that are collateral dependent, impairment is measured using the fair value of the collateral when foreclosure is probable. Using this information, the company determines the expected cash flow for the receivable and calculates an estimate of the potential loss and the probability of loss. For those accounts in which the loss is probable, the company records a specific reserve.

Collectively Evaluated—The company records an unallocated reserve that is calculated by applying a reserve rate to its different portfolios, excluding accounts that have been specifically reserved. This reserve rate is based upon credit rating, probability of default, term, characteristics (lease/loan) and loss history. Factors that could result in actual receivable losses that are materially different from the estimated reserve include sharp changes in the economy, or a significant change in the economic health of a particular client that represents a concentration in the company's receivables portfolio.

Other Credit-Related Policies

Non-Accrual—Certain receivables for which the company has recorded a specific reserve may also be placed on non-accrual status. Non-accrual assets are those receivables (impaired loans or nonperforming leases) with specific reserves and other accounts for which it is likely that the company will be unable to collect all amounts due according to original terms of the lease or loan agreement. Income recognition is discontinued on these receivables. Cash collections are first applied as a reduction to principal outstanding. Any cash received in excess of principal payments outstanding is recognized as interest income. Receivables may be removed from non-accrual status, if appropriate, based upon changes in client circumstances.

Write Off—Receivable losses are charged against the allowance when management believes the uncollectibility of the receivable is confirmed. Subsequent recoveries, if any, are credited to the allowance.

Past Due—The company views receivables as past due when payment has not been received after 90 days, measured from the original billing date.

Impaired Loans—As stated above, the company evaluates all financing receivables considered at-risk, including loans, for impairment on a quarterly basis. The company considers any loan with an individually evaluated reserve as an impaired loan. Depending on the level of impairment, loans will also be placed on non-accrual status as appropriate. Client loans are primarily for software and services and are unsecured. These loans are subjected to credit analysis to evaluate the associated risk and, when deemed necessary, actions are taken to mitigate risks in the loan agreements which include covenants to protect against credit deterioration during the life of the obligation.

Estimated Residual Values of Lease Assets

The recorded residual values of lease assets are estimated at the inception of the lease to be the expected fair value of the assets at the end of the lease term. The company periodically reassesses the realizable value of its lease residual values. Any anticipated increases in specific future residual values are not recognized before realization through remarketing efforts. Anticipated decreases in specific future residual values that are considered to be other-than-temporary are recognized immediately upon identification and are recorded as an adjustment to the residual value estimate. For sales-type and direct-financing leases, this reduction lowers the recorded net investment and is recognized as a loss charged to financing income in the period in which the estimate is changed, as well as an adjustment to unearned income to reduce future-period financing income.

Common Stock

Common stock refers to the \$.20 par value per share capital stock as designated in the company's Certificate of Incorporation. Treasury stock is accounted for using the cost method. When treasury stock is reissued, the value is computed and recorded using a weighted-average basis.

Earnings Per Share of Common Stock

Earnings per share (EPS) is computed using the two-class method. The two-class method determines EPS for each class of common stock and participating securities according to dividends and dividend equivalents and their respective participation rights in undistributed earnings. Basic EPS of common stock is computed by dividing net income by the weighted-average number of common shares outstanding for the period. Diluted EPS of common stock is computed on the basis of the weighted-average number of shares of common stock plus the effect of dilutive potential common shares outstanding during the period using the treasury stock method. Dilutive potential common shares include outstanding stock options, stock awards and convertible notes.

Note B.

Accounting Changes

Standards Implemented

In February 2013, the Financial Accounting Standards Board (FASB) issued additional guidance regarding reclassifications out of AOCI. The new guidance requires entities to report the effect of significant reclassifications out of AOCI on the respective line items in net income unless the amounts are not reclassified in their entirety to net income. For amounts that are not required to be reclassified in their entirety to net income in the same reporting period, entities are required to cross-reference other disclosures that provide additional detail about those amounts. For the company, the new guidance is effective prospectively for all interim and annual periods beginning January 1, 2013 with early adoption permitted. The company elected to early adopt the guidance. There was no impact in the consolidated financial results as the guidance related only to additional disclosures. See note L, "Equity Activity," on [pages 107 to 110](#) for further information.

In July 2012, the FASB issued amended guidance that simplifies how entities test indefinite-lived intangible assets other than goodwill for impairment. After an assessment of certain qualitative factors, if it is determined to be more likely than not that an indefinite-lived intangible asset is impaired, entities must perform the quantitative impairment test. Otherwise, the quantitative test is optional. The amended guidance was effective for annual and interim impairment tests performed for fiscal years beginning after September 15, 2012, with early adoption permitted. The company elected to adopt this guidance for its 2012 impairment testing of indefinite-lived intangible assets performed in the fourth quarter. There was no impact in the consolidated financial results.

In May 2011, the FASB issued amended guidance and disclosure requirements for fair value measurements. These changes were effective January 1, 2012 on a prospective basis. These amendments did not have a material impact in the consolidated financial results.

In September 2011, the FASB issued additional disclosure requirements for entities which participate in multi-employer pension plans. The purpose of the new disclosures was to provide financial statement users with information about an employer's level of participation in these plans and the financial health of significant plans. The new disclosures were effective beginning with the full year 2011 financial statements. The company does not participate in any material multi-employer plans. There was no impact in the consolidated financial results as the changes relate only to additional disclosures.

In September 2011, the FASB issued amended guidance that simplified how entities test goodwill for impairment. After an assessment of certain qualitative factors, if it is determined to be more likely than not that the fair value of a reporting unit is less than its carrying amount, entities must perform the quantitative analysis of the goodwill impairment test. Otherwise, the quantitative test(s) is optional. The guidance was effective January 1, 2012 with early adoption permitted. The company adopted this guidance for the 2011 goodwill impairment test. There was no impact in the consolidated financial results.

In June 2011, the FASB issued amended disclosure requirements for the presentation of OCI and AOCI. OCI is comprised of costs, expenses, gains and losses that are included in comprehensive income but excluded from net income, and AOCI comprises the aggregated balances of OCI in equity. The amended guidance eliminated the option to present period changes in OCI as part of the Statement of Changes in Equity. Under the amended guidance, all period changes in OCI are to be presented either in a single continuous statement of comprehensive income, or in two separate, but consecutive financial statements. Only summary totals are to be included in the AOCI section of the Statement of Changes in Equity. In December 2011, the FASB deferred the requirement to present reclassifications from AOCI on the face of the Consolidated Statement of Earnings. The changes were effective January 1, 2012 with early adoption permitted. The company adopted the two statement approach effective with its full year 2011 financial statements. There was no impact in the consolidated financial results as the amendments related only to changes in financial statement presentation.

In December 2010, the FASB issued amended guidance to clarify the acquisition date that should be used for reporting pro-forma financial information for business combinations. If comparative financial statements are presented, the pro-forma revenue and earnings of the combined entity for the comparable prior reporting period should be reported as though the acquisition date for all business combinations that occurred during the current year had been completed as of the beginning of the comparable prior annual reporting period. The amendments in this guidance were effective on a prospective basis for business combinations for which the acquisition date was on or after January 1, 2011. There was no impact in the consolidated financial results as the amendments relate only to additional disclosures. In addition, the company has had no acquisitions which required pro-forma financial information.

In December 2010, the FASB issued amendments to the guidance on goodwill impairment testing. The amendments modified step 1 of the goodwill impairment test for reporting units with zero or negative carrying amounts. For those reporting units, an entity is required to perform step 2 of the goodwill impairment test if it is more likely than not that a goodwill impairment exists. In making that determination, an entity should consider whether there are any adverse qualitative factors indicating that impairment may exist. The amendments were effective January 1, 2011 and did not have an impact in the consolidated financial results.

In July 2010, the FASB issued amendments to the disclosure requirements about the credit quality of financing receivables and the allowance for credit losses. The purpose of the additional disclosures was to enable users of financial statements to better understand the nature of credit risk inherent in an entity's portfolio of financing receivables and how that risk is analyzed. For end-of-period balances, the new disclosures were required to be made in all interim and annual periods ending on or after December 15, 2010. For activity during a reporting period, the disclosures were required to be included in all interim and annual periods after January 1, 2011. In January 2011, the FASB temporarily deferred the disclosures regarding troubled debt restructurings which were included in the requirements of this amendment. Subsequently, in April 2011, the FASB issued additional guidance and clarifications to help creditors in determining whether a creditor has granted a concession, and whether a debtor is experiencing financial difficulties for purposes of determining whether a restructuring constitutes a troubled debt restructuring. The new guidance and the previously deferred disclosures were effective July 1, 2011 applied retrospectively to January 1, 2011. Prospective application was required for any new impairments identified as a result of this guidance. These changes did not have a material impact in the consolidated financial results.

In January 2010, the FASB issued additional disclosure requirements for fair value measurements. According to the guidance, the fair value hierarchy disclosures should be disaggregated by class of assets and liabilities. A class is often a subset of assets or liabilities within a line item in the statement of financial position. In addition, significant transfers between Levels 1 and 2 of the fair value hierarchy are required to be disclosed. These additional requirements were effective January 1, 2010 for quarterly and annual reporting. These amendments did not have an impact in the consolidated financial results as this guidance relates only to additional disclosures. Certain disclosure requirements relating to fair value measurements using significant unobservable inputs (Level 3) were deferred until January 1, 2011. These additional requirements also did not have an impact in the consolidated financial results as they related only to additional disclosures.

Note C. **Acquisitions/Divestitures**

Acquisitions

Purchase price consideration for all acquisitions, as reflected in the tables in this note, is paid primarily in cash. All acquisitions are reported in the Consolidated Statement of Cash Flows net of acquired cash and cash equivalents.

2012

In 2012, the company completed 11 acquisitions at an aggregate cost of \$3,964 million.

Kenexa Corporation (Kenexa)—On December 3, 2012, the company completed the acquisition of 100 percent of Kenexa, a publicly held company, for cash consideration of \$1,351 million. Kenexa, a leading provider of recruiting and talent management solutions, brings a unique combination of cloud-based technology and consulting services that integrates both people and processes, providing solutions to engage a smarter, more effective workforce across their most critical businesses functions. Goodwill of \$1,014 million has been assigned to the Software (\$771 million) and Global Technology Services (GTS) (\$243 million) segments. As of the acquisition date, it is expected that approximately 10 percent of the goodwill will be deductible for tax purposes. The overall weighted-average useful life of the identified intangible assets acquired is 6.5 years.

Other Acquisitions—The Software segment also completed eight other acquisitions: in the first quarter, Green Hat Software Limited (Green Hat), Emptoris Inc. (Emptoris) and Worklight, Inc. (Worklight), all privately held companies, and DemandTec, Inc. (DemandTec), a publicly held company; in the second quarter, Varicent Software Inc. (Varicent), Vivisimo Inc. (Vivisimo) and Tealeaf Technology Inc. (Tealeaf), all privately held companies; and in the third quarter, Butterfly Software, Ltd. (Butterfly), a privately held company. Systems and Technology (STG) completed two acquisitions: in the first quarter, Platform Computing Corporation (Platform Computing), a privately held company; and in the third quarter, Texas Memory Systems (TMS), a privately held company. All acquisitions were for 100 percent of the acquired companies.

The table below reflects the purchase price related to these acquisitions and the resulting purchase price allocations as of December 31, 2012.

2012 Acquisitions

(\$ in millions)

	Amortization Life (in Years)	Kenexa	Other Acquisitions
Current assets		\$ 133	\$ 278
Fixed assets/noncurrent assets		98	217
Intangible assets			
Goodwill	N/A	1,014	1,880
Completed technology	3 to 7	169	403
Client relationships	4 to 7	179	194
In-process R&D	N/A	—	11
Patents/trademarks	1 to 7	39	37
Total assets acquired		1,632	3,020
Current liabilities		(93)	(143)
Noncurrent liabilities		(188)	(264)
Total liabilities assumed		(281)	(407)
Total purchase price		\$1,351	\$2,613

N/A—Not applicable

Each acquisition further complemented and enhanced the company's portfolio of product and services offerings. Green Hat helps customers improve the quality of software applications by enabling developers to use cloud computing technologies to conduct testing of a software application prior to its delivery. Emptoris expands the company's cloud-based analytics offerings that provide supply chain intelligence leading to better inventory management and cost efficiencies. Worklight delivers mobile application management capabilities to clients across a wide range of industries. The acquisition enhances the company's comprehensive mobile portfolio, which is designed to help global corporations leverage the proliferation of all mobile devices—from laptops and smartphones to tablets. DemandTec delivers cloud-based analytics software to help organizations improve their price, promotion and product mix within the broad context of enterprise commerce. Varicent's software automates and analyzes data across sales, finance, human resources and IT departments to uncover trends and optimize sales performance and operations. Vivisimo software automates the discovery of big data, regardless of its format or where it resides, providing decision makers with a view of

key business information necessary to drive new initiatives. Tealeaf provides a full suite of customer experience management software, which analyzes interactions on websites and mobile devices. Butterfly offers storage planning software and storage migration tools, helping companies save storage space, operational time, IT budget and power consumption. Platform Computing's focused technical and distributed computing management software helps clients create, integrate and manage shared computing environments that are used in compute-and-data intensive applications such as simulations, computer modeling and analytics. TMS designs and sells high-performance solid state storage solutions.

For the "Other Acquisitions," the overall weighted-average life of the identified amortizable intangible assets acquired is 6.6 years. These identified intangible assets will be amortized on a straight-line basis over their useful lives. Goodwill of \$1,880 million has been assigned to the Software (\$1,412 million), Global Business Services (GBS) (\$5 million), GTS (\$21 million) and STG (\$443 million) segments. As of the acquisition dates, it is expected that approximately 15 percent of the goodwill will be deductible for tax purposes.

On February 1, 2013, the company announced that it had entered into a definitive agreement to acquire the software portfolio of Star Analytics Inc., a privately held business analytics company based in Redwood City, California. The combination of the company's and Star Analytics software will advance the company's business analytics initiatives. The acquisition is subject to customary closing conditions and is expected to be completed in the first quarter of 2013.

On February 7, 2013, the company completed the acquisition of StoredIQ Inc. (StoredIQ), a privately held company based in Austin, Texas. StoredIQ will advance the company's efforts to help clients derive value from big data and respond more efficiently to litigation and regulations, dispose of information that has outlived its purpose and lower data storage costs. At the date of issuance of the financial statements, the initial purchase accounting was not complete for this acquisition.

2011

In 2011, the company completed five acquisitions of privately held companies at an aggregate cost of \$1,849 million.

These acquisitions were completed as follows: in the second quarter, TRIRIGA, Inc. (TRIRIGA); and in the fourth quarter, i2, Algorithmics, Inc. (Algorithmics), Q1 Labs and Curam Software Ltd. (Curam Software). TRIRIGA was integrated into the Software and GBS segments upon acquisition. All other acquisitions were integrated into the Software segment upon acquisition. All acquisitions reflected 100 percent ownership of the acquired companies.

TRIRIGA is a provider of facility and real estate management software solutions, which help clients make strategic decisions regarding space usage, evaluate alternative real estate initiatives, generate higher returns from capital projects and assess environmental impact investments. The acquisition added advanced real estate intelligence to the company's smarter buildings initiative. i2 expanded the company's Big Data analytics software for Smarter Cities by helping both public and private entities in government, law enforcement, retail, insurance and other industries access and analyze information they need to address crime, fraud and security threats. Algorithmics provides software and services for improved business insights at financial and insurance institutions to assess risk and address regulatory challenges. Q1 Labs is a provider of security intelligence software and accelerates efforts to help clients more intelligently secure their enterprises by applying analytics to correlate information from key security domains and creating security dashboards for their organizations. Curam Software is a provider of software and services which help governments improve the efficiency, effectiveness and accessibility of social programs for Smarter Cities.

The overall weighted-average life of the identified intangible assets acquired was 6.9 years. These identified intangible assets will be amortized on a straight-line basis over their useful lives. Goodwill of \$1,291 million was assigned to the Software (\$1,277 million) and GBS (\$14 million) segments. As of the acquisition dates, it was expected that approximately 25 percent of the goodwill would be deductible for tax purposes.

The table below reflects the purchase price related to these acquisitions and the resulting purchase price allocations as of December 31, 2011.

2011 Acquisitions

(\$ in millions)

	Amortization Life (in Years)	Total Acquisitions
Current assets		\$ 251
Fixed assets/noncurrent assets		88
Intangible assets		
Goodwill	N/A	1,291
Completed technology	7	320
Client relationships	7	222
Patents/trademarks	1 to 7	17
Total assets acquired		2,190
Current liabilities		(191)
Noncurrent liabilities		(150)
Total liabilities assumed		(341)
Total purchase price		\$1,849

N/A—Not applicable

2010

In 2010, the company completed 17 acquisitions at an aggregate cost of \$6,538 million.

Netezza Corporation (Netezza)—On November 10, 2010, the company completed the acquisition of 100 percent of Netezza, for cash consideration of \$1,847 million. Netezza expanded the company's business analytics initiatives to help clients gain faster insights into their business information, with increased performance at a lower cost of ownership. Netezza was integrated into the Software segment upon acquisition, and goodwill, as reflected in the table below, was entirely assigned to the Software segment. As of the acquisition date, it was expected that none of the goodwill would be deductible for tax purposes. The overall weighted-average useful life of the identified intangible assets acquired was 6.9 years.

Sterling Commerce—On August 27, 2010, the company completed the acquisition of 100 percent of Sterling Commerce, a wholly owned subsidiary of AT&T, Inc., for cash consideration of \$1,415 million. Sterling Commerce expanded the company's ability to help clients accelerate their interactions with customers, partners and suppliers through dynamic business networks using either on-premise or cloud delivery models. Sterling Commerce was integrated into the Software segment upon acquisition, and goodwill, as reflected in the table below, was entirely assigned to the Software segment. As of the acquisition date, it was expected that none of the goodwill would be deductible for tax purposes. The overall weighted-average useful life of the identified intangible assets acquired was 6.9 years.

Other Acquisitions—The Software segment also completed acquisitions of 10 privately held companies and one publicly held company: in the first quarter, Lombardi Software, Inc. (Lombardi),

Intelliden Inc. and Initiate Systems, Inc. (Initiate); in the second quarter, Cast Iron Systems; in the third quarter, BigFix, Inc., Coremetrics and Datacap; and in the fourth quarter, Unica Corporation (Unica), a publicly held company, PSS Systems, OpenPages, Inc. (OpenPages) and Clarity Systems. GTS completed an acquisition in the first quarter: the core operating assets of Wilshire Credit Corporation (Wilshire). GBS also completed an acquisition in the first quarter: National Interest Security Company, LLC, a privately held company. STG completed acquisitions of two privately held companies: in the third quarter, Storwize; and in the fourth quarter, BLADE Network Technologies (BLADE). All acquisitions were for 100 percent of the acquired companies.

Lombardi is a leading provider of business process management software and services, and became part of the company's application integration software portfolio. Intelliden Inc. is a leading provider of intelligent network automation software and extended the company's network management offerings. Initiate is a market leader in data integrity software for information sharing among healthcare and government organizations. Cast Iron Systems, a leading Software as a Service (SaaS) and cloud application integration provider, enhances the WebSphere business integration portfolio. BigFix, Inc. is a leading provider of high-performance enterprise systems and security management solutions that revolutionizes the way IT organizations manage and secure their computing infrastructure. Coremetrics, a leader in Web analytics software, expanded the company's business analytics capabilities by enabling organizations to use cloud computing services to develop faster, more targeted marketing campaigns. Datacap strengthens the company's ability to help organizations digitize, manage and automate their information assets.

N/A—Not applicable

Unica, a leading provider of software and services used to automate marketing processes, expanded the company's ability to help organizations analyze and predict customer preferences and develop more targeted marketing campaigns. PSS Systems is a leading provider of legal information governance and information management software. OpenPages is a leading provider of software that helps companies more easily identify and manage risk and compliance activities across the enterprise through a single management system. Clarity Systems delivers financial governance software that enables organizations to automate the process of collecting, preparing, certifying and controlling financial statements for electronic filing. Wilshire's mortgage servicing platform continues the strategic focus on the mortgage services industry and strengthens the commitment to deliver mortgage business process outsourcing solutions. National Interest Security Company strengthens the ability to deliver advanced analytics and IT solutions to the public sector. Storwize, a provider of in-line data compression appliance solutions, helps the company to make it more affordable for clients to analyze massive amounts of data in order to provide new insights and business outcomes. BLADE provides server and top-of-rack switches as well as software to virtualize and manage cloud computing and other workloads.

For the "Other Acquisitions," the overall weighted-average life of the identified intangible assets acquired was 6.4 years. These identified intangible assets will be amortized on a straight-line basis over their useful lives. Goodwill of \$2,312 million was assigned to the Software (\$1,653 million), GTS (\$32 million), GBS (\$252 million) and STG (\$375 million) segments. As of the acquisition dates, it was expected that none of the goodwill would be deductible for tax purposes.

Divestitures

2012

On April 17, 2012, the company announced that it had signed a definitive agreement with Toshiba TEC for the sale of its Retail Store Solutions business to Toshiba TEC. As part of the transaction, Toshiba TEC and the company also signed a multi-year business partner agreement to integrate retail store solutions for Smarter Commerce. The transaction price was \$850 million, and the company will receive approximately \$800 million in cash, net of closing date working capital adjustments.

Through December 31, 2012, the company completed the first three phases of the sale. For the completed phases, the company received net proceeds of \$546 million, recorded a note receivable of \$251 million and recognized a net pre-tax gain of \$446 million. The gain was net of the fair value of certain contractual terms, certain transaction costs and the assets and liabilities sold. The gain was recorded in other (income) and expense in the Consolidated Statement of Earnings and the net proceeds are reflected within divestitures of businesses, net of cash transferred within cash flows from investing activities in the Consolidated Statement of Cash Flows. In addition, in the third quarter, the company acquired a 19.9 percent ownership interest for \$161 million in Toshiba Global Commerce Solutions Holding Corporation, the new holding company that Toshiba TEC established for the business. The company will

retain this ownership for a period of three years at which time Toshiba TEC will purchase the company's equity interest for the initial acquisition value. This investment was recorded in investments and sundry assets in the Consolidated Statement of Financial Position and the payment was reflected within purchases of marketable securities and other investments within cash flows from investing activities in the Consolidated Statement of Cash Flows.

The company expects to close the next phase of the divestiture in the first quarter of 2013 with subsequent closings expected in future periods. Overall, the company expects to recognize a total pre-tax gain on the sale of approximately \$500 million.

2011

During the fourth quarter of 2011, the company completed the divestiture of the iCluster business to Rocket Software. iCluster, which was acquired in the Data Mirror acquisition in 2007, was part of the Software business. This transaction was not material to the Consolidated Financial Statements.

During the second quarter of 2011, the company completed two divestitures related to subsidiaries of IBM Japan. The impact of these transactions was not material to the Consolidated Financial Statements.

2010

On March 31, 2010, the company completed the sale of its activities associated with the sales and support of Dassault Systemes' (Dassault) product lifecycle management (PLM) software, including customer contracts and related assets to Dassault. The company received net proceeds of \$459 million and recognized a net gain of \$591 million on the transaction in the first quarter of 2010. The gain was net of the fair value of certain contractual terms, certain transaction costs and the assets and liabilities sold. The gain was recorded in other (income) and expense in the Consolidated Statement of Earnings and the net proceeds were reflected in proceeds from disposition of marketable securities and other investments within cash flow from investing activities in the Consolidated Statement of Cash Flows.

* Represents a change from the 2011 Annual Report to reflect Canada government securities of \$983 million previously reported in Commercial paper, and a reduction of \$151 million in Time deposits and certificates of deposit due to certain holdings which were out of the scope of this disclosure.

⁽¹⁾ Included within cash and cash equivalents in the Consolidated Statement of Financial Position.

⁽²⁾ Included within investments and sundry assets in the Consolidated Statement of Financial Position.

⁽³⁾ The gross balances of derivative assets contained within prepaid expenses and other current assets, and investments and sundry assets in the Consolidated Statement of Financial Position at December 31, 2011 are \$546 million and \$754 million, respectively.

⁽⁴⁾ The gross balances of derivative liabilities contained within other accrued expenses and liabilities, and other liabilities in the Consolidated Statement of Financial Position at December 31, 2011 are \$365 million and \$166 million, respectively.

⁽⁵⁾ Available-for-sale securities with carrying values that approximate fair value.

⁽⁶⁾ If derivative exposures covered by a qualifying master netting agreement had been netted in the Consolidated Statement of Financial Position, the total derivative asset and liability positions would have been reduced by \$324 million each.

There were no transfers between Levels 1 and 2 for the years ended December 31, 2012 and 2011.

Financial Assets and Liabilities Not Measured at Fair Value

Short-Term Receivables and Payables

Notes and other accounts receivable and other investments are financial assets with carrying values that approximate fair value. Accounts payable, other accrued expenses and short-term debt (excluding the current portion of long-term debt) are financial liabilities with carrying values that approximate fair value. If measured at fair value in the financial statements, these financial instruments would be classified as Level 3 in the fair value hierarchy.

Loans and Long-Term Receivables

Fair values are based on discounted future cash flows using current interest rates offered for similar loans to clients with similar credit ratings for the same remaining maturities. At December 31, 2012 and 2011, the difference between the carrying amount and

estimated fair value for loans and long-term receivables was immaterial. If measured at fair value in the financial statements, these financial instruments would be classified as Level 3 in the fair value hierarchy.

Long-Term Debt

Fair value of publicly traded long-term debt is based on quoted market prices for the identical liability when traded as an asset in an active market. For other long-term debt for which a quoted market price is not available, an expected present value technique that uses rates currently available to the company for debt with similar terms and remaining maturities is used to estimate fair value. The carrying amount of long-term debt is \$24,088 million and \$22,857 million and the estimated fair value is \$27,119 million and \$27,383 million at December 31, 2012 and 2011, respectively. If measured at fair value in the financial statements, long-term debt (including the current portion) would be classified as Level 2 in the fair value hierarchy.

Debt and Marketable Equity Securities

The company's cash equivalents and current debt securities are considered available-for-sale and recorded at fair value, which is not materially different from carrying value, in the Consolidated Statement of Financial Position. The following tables summarize the company's noncurrent debt and marketable equity securities which are also considered available-for-sale and recorded at fair value in the Consolidated Statement of Financial Position.

(\$ in millions)

	Adjusted Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
At December 31, 2012:				
Debt securities—noncurrent ⁽¹⁾	\$ 8	\$2	\$—	\$10
Available-for-sale equity investments ⁽¹⁾	\$31	\$4	\$(1)	\$34

⁽¹⁾ Included within investments and sundry assets in the Consolidated Statement of Financial Position.

(\$ in millions)

	Adjusted Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
At December 31, 2011:				
Debt securities—noncurrent ⁽¹⁾	\$ 7	\$ 1	\$—	\$ 8
Available-for-sale equity investments ⁽¹⁾	\$58	\$27	\$(2)	\$83

⁽¹⁾ Included within investments and sundry assets in the Consolidated Statement of Financial Position.

Based on an evaluation of available evidence as of December 31, 2012, the company believes that unrealized losses on debt and available-for-sale equity securities are temporary and do not represent an other-than-temporary impairment.

Sales of debt and available-for-sale equity securities were as follows:

(\$ in millions)

For the year ended December 31:	2012	2011	2010
Proceeds	\$112	\$405	\$16
Gross realized gains (before taxes)	45	232	6
Gross realized losses (before taxes)	(1)	(0)	(0)

The after-tax net unrealized gains/(losses) on available-for-sale debt and equity securities that have been included in other comprehensive income/(loss) and the after-tax net (gains)/losses reclassified from accumulated other comprehensive income/(loss) to net income were as follows:

(\$ in millions)

For the year ended December 31:	2012	2011
Net unrealized gains/(losses) arising during the period	\$ 17	\$ (7)
Net unrealized (gains)/losses reclassified to net income*	(25)	(143)

*Includes writedowns of \$2.0 million and \$0.3 million in 2012 and 2011, respectively.

The contractual maturities of substantially all available-for-sale debt securities were less than one year at December 31, 2012.

Derivative Financial Instruments

The company operates in multiple functional currencies and is a significant lender and borrower in the global markets. In the normal course of business, the company is exposed to the impact of interest rate changes and foreign currency fluctuations, and to a lesser extent equity and commodity price changes and client credit risk. The company limits these risks by following established risk management policies and procedures, including the use of derivatives, and, where cost effective, financing with debt in the currencies in which assets are denominated. For interest rate exposures, derivatives are used to better align rate movements between the interest rates associated with the company's lease and other financial assets and the interest rates associated with its financing debt. Derivatives are also used to manage the related cost of debt. For foreign currency exposures, derivatives are used to better manage the cash flow volatility arising from foreign exchange rate fluctuations.

As a result of the use of derivative instruments, the company is exposed to the risk that counterparties to derivative contracts will fail to meet their contractual obligations. To mitigate the counterparty credit risk, the company has a policy of only entering into contracts with carefully selected major financial institutions based upon their overall credit profile. The company's established policies and procedures for mitigating credit risk on principal transactions include reviewing and establishing limits for credit exposure and continually assessing the creditworthiness of counterparties. The right of set-off that exists under certain of these arrangements enables the legal entities of the company subject to the arrangement to net amounts due to and from the counterparty reducing the maximum loss from credit risk in the event of counterparty default.

The company is also a party to collateral security arrangements with most of its major counterparties. These arrangements require the company to hold or post collateral (cash or U.S. Treasury securities) when the derivative fair values exceed contractually established thresholds. Posting thresholds can be fixed or can vary based on credit default swap pricing or credit ratings received from the major credit agencies. The aggregate fair value of all derivative instruments under these collateralized arrangements that were in a liability position at December 31, 2012 and 2011 was \$94 million and \$131 million, respectively, for which no collateral was posted at December 31, 2012 and December 31, 2011. Full collateralization of these agreements would be required in the event that the company's credit rating falls below investment grade or if its credit default swap spread exceeds 250 basis points, as applicable, pursuant to the terms of the collateral security arrangements. The aggregate fair value of derivative instruments in net asset positions as of December 31, 2012 and 2011 was \$918 million and \$1,300 million, respectively. This amount represents the maximum exposure to loss at the reporting date as a result of the counterparties failing to perform as contracted. This exposure was reduced by \$262 million and \$324 million at December 31, 2012 and 2011, respectively, of liabilities included in master netting arrangements with those counterparties. Additionally, at December 31, 2012 and 2011, this exposure was reduced by \$69 million and \$466 million of cash collateral, respectively, received by the company. In addition to cash collateral, the company held \$31 million in non-cash collateral, in U.S. Treasury securities at December 31, 2012. Per accounting guidance, non-cash collateral is not recorded on the Statement of Financial Position.

The company does not offset derivative assets against liabilities in master netting arrangements nor does it offset receivables or payables recognized upon payment or receipt of cash collateral against the fair values of the related derivative instruments. No amount was recognized in other receivables at December 31, 2012 and December 31, 2011 for the right to reclaim cash collateral. The amount recognized in accounts payable for the obligation to return cash collateral totaled \$69 million and \$466 million at December 31, 2012 and 2011, respectively. The company restricts the use of cash collateral received to rehypothecation, and therefore reports it in prepaid expenses and other current assets in the Consolidated Statement of Financial Position. No amount was rehypothecated at December 31, 2012 and December 31, 2011.

The company may employ derivative instruments to hedge the volatility in stockholders' equity resulting from changes in currency exchange rates of significant foreign subsidiaries of the company with respect to the U.S. dollar. These instruments, designated as net investment hedges, expose the company to liquidity risk as the derivatives have an immediate cash flow impact upon maturity which is not offset by a cash flow from the translation of the underlying hedged equity. The company monitors this cash loss potential on an ongoing basis, and may discontinue some of these hedging relationships by de-designating the derivative instrument in order to manage the liquidity risk. Although not designated as accounting hedges, the company may utilize derivatives to offset the changes in the fair value of the de-designated instruments from the date of de-designation until maturity.

In its hedging programs, the company uses forward contracts, futures contracts, interest-rate swaps and cross-currency swaps, depending upon the underlying exposure. The company is not a party to leveraged derivative instruments.

A brief description of the major hedging programs, categorized by underlying risk, follows.

Interest Rate Risk

Fixed and Variable Rate Borrowings

The company issues debt in the global capital markets, principally to fund its financing lease and loan portfolio. Access to cost-effective financing can result in interest rate mismatches with the underlying assets. To manage these mismatches and to reduce overall interest cost, the company uses interest rate swaps to convert specific fixed-rate debt issuances into variable-rate debt (i.e., fair value hedges) and to convert specific variable-rate debt issuances into fixed-rate debt (i.e., cash flow hedges). At December 31, 2012 and 2011, the total notional amount of the company's interest rate swaps was \$4.3 billion and \$5.9 billion, respectively. The weighted-average remaining maturity of these instruments at December 31, 2012 and December 31, 2011 was approximately 5.1 years and 5.5 years, respectively.

Forecasted Debt Issuance

The company is exposed to interest rate volatility on future debt issuances. To manage this risk, the company may use forward-starting interest rate swaps to lock in the rate on the interest payments related to the forecasted debt issuance. These swaps are accounted for as cash flow hedges. The company did not have any derivative instruments relating to this program outstanding at December 31, 2012 and 2011.

At December 31, 2012 and 2011, net gains of approximately \$1 million and net losses of approximately \$5 million (before taxes), respectively, were recorded in AOCI in connection with cash flow hedges of the company's borrowings. Within these amounts less than \$1 million of gains and \$6 million of losses, respectively, are expected to be reclassified to net income within the next 12 months, providing an offsetting economic impact against the underlying transactions.

Foreign Exchange Risk

Long-Term Investments in Foreign Subsidiaries (Net Investment)

A large portion of the company's foreign currency denominated debt portfolio is designated as a hedge of net investment in foreign subsidiaries to reduce the volatility in stockholders' equity caused by changes in foreign currency exchange rates in the functional currency of major foreign subsidiaries with respect to the U.S. dollar. The company also uses cross-currency swaps and foreign exchange forward contracts for this risk management purpose. At December 31, 2012 and 2011, the total notional amount of derivative instruments designated as net investment hedges was \$3.3 billion and \$5.0 billion, respectively. The weighted-average remaining maturity of these instruments at December 31, 2012 and 2011 was approximately 0.4 years for both periods.

Anticipated Royalties and Cost Transactions

The company's operations generate significant nonfunctional currency, third-party vendor payments and intercompany payments for royalties and goods and services among the company's non-U.S. subsidiaries and with the parent company. In anticipation of these foreign currency cash flows and in view of the volatility of the currency markets, the company selectively employs foreign exchange forward contracts to manage its currency risk. These forward contracts are accounted for as cash flow hedges. The maximum length of time over which the company is hedging its exposure to the variability in future cash flows is four years. At December 31, 2012 and 2011, the total notional amount of forward contracts designated as cash flow hedges of forecasted royalty and cost transactions was \$10.7 billion and \$10.9 billion, respectively, with a weighted-average remaining maturity of 0.7 years at both year-end dates.

At December 31, 2012 and December 31, 2011, in connection with cash flow hedges of anticipated royalties and cost transactions, the company recorded net losses of \$138 million and net gains of \$88 million (before taxes), respectively, in AOCI. Within these amounts \$79 million of losses and \$191 million of gains, respectively, are expected to be reclassified to net income within the next 12 months, providing an offsetting economic impact against the underlying anticipated transactions.

Foreign Currency Denominated Borrowings

The company is exposed to exchange rate volatility on foreign currency denominated debt. To manage this risk, the company employs cross-currency swaps to convert fixed-rate foreign currency denominated debt to fixed-rate debt denominated in the functional currency of the borrowing entity. These swaps are accounted for as cash flow hedges. The maximum length of time over which the company hedges its exposure to the variability in future cash flows is approximately three years. At December 31, 2012 and December 31, 2011, no instruments relating to this program were outstanding.

Subsidiary Cash and Foreign Currency Asset/Liability Management

The company uses its Global Treasury Centers to manage the cash of its subsidiaries. These centers principally use currency swaps to convert cash flows in a cost-effective manner. In addition, the company uses foreign exchange forward contracts to economically hedge, on a net basis, the foreign currency exposure of a portion of the company's nonfunctional currency assets and liabilities. The terms of these forward and swap contracts are generally less than one year. The changes in the fair values of these contracts and of the underlying hedged exposures are generally offsetting and are recorded in other (income) and expense in the Consolidated Statement of Earnings. At December 31, 2012 and 2011, the total notional amount of derivative instruments in economic hedges of foreign currency exposure was \$12.9 billion and \$13.6 billion, respectively.

Equity Risk Management

The company is exposed to market price changes in certain broad market indices and in the company's own stock primarily related to certain obligations to employees. Changes in the overall value of these employee compensation obligations are recorded in SG&A expense in the Consolidated Statement of Earnings. Although not designated as accounting hedges, the company utilizes derivatives, including equity swaps and futures, to economically hedge the exposures related to its employee compensation obligations. The derivatives are linked to the total return on certain broad market indices or the total return on the company's common stock. They are recorded at fair value with gains or losses also reported in SG&A expense in the Consolidated Statement of Earnings. At December 31, 2012 and 2011, the total notional amount of derivative instruments in economic hedges of these compensation obligations was \$1.2 billion and \$1.0 billion, respectively.

Other Risks

The company may hold warrants to purchase shares of common stock in connection with various investments that are deemed derivatives because they contain net share or net cash settlement provisions. The company records the changes in the fair value of these warrants in other (income) and expense in the Consolidated Statement of Earnings. The company did not have any warrants qualifying as derivatives outstanding at December 31, 2012 and 2011.

The company is exposed to a potential loss if a client fails to pay amounts due under contractual terms. The company utilizes credit default swaps to economically hedge its credit exposures. These derivatives have terms of one year or less. The swaps are recorded at fair value with gains and losses reported in other (income) and expense in the Consolidated Statement of Earnings. The company did not have any derivative instruments relating to this program outstanding at December 31, 2012 and 2011.

The following tables provide a quantitative summary of the derivative and non-derivative instrument related risk management activity as of December 31, 2012 and 2011 as well as for the years ended December 31, 2012, 2011 and 2010, respectively.

Fair Values of Derivative Instruments in the Consolidated Statement of Financial Position

(\$ in millions)

At December 31:	Fair Value of Derivative Assets			Fair Value of Derivative Liabilities

⁽¹⁾ The amount includes changes in clean fair values of the derivative instruments in fair value hedging relationships and the periodic accrual for coupon payments required under these derivative contracts.

⁽²⁾ The amount includes basis adjustments to the carrying value of the hedged item recorded during the period and amortization of basis adjustments recorded on de-designated hedging relationships during the period.

⁽³⁾ The amount of gain/(loss) recognized in income represents ineffectiveness on hedge relationships.

⁽⁴⁾ Instruments in net investment hedges include derivative and non-derivative instruments.

N/A—Not applicable

For the 12 months ending December 31, 2012, 2011 and 2010, there were no significant gains or losses recognized in earnings representing hedge ineffectiveness or excluded from the assessment of hedge effectiveness (for fair value hedges), or associated with an underlying exposure that did not or was not expected to occur (for cash flow hedges); nor are there any anticipated in the normal course of business.

Refer to note A, "Significant Accounting Policies," on page 83 for additional information on the company's use of derivative financial instruments.

Note E. Inventories

(\$ in millions)

	2012	2011
At December 31:		
Finished goods	\$ 475	\$ 589
Work in process and raw materials	1,812	2,007
Total	\$2,287	\$2,595

Note F. Financing Receivables

The following table presents financing receivables, net of allowances for credit losses, including residual values.

(\$ in millions)		
At December 31:	2012	2011
Current		
Net investment in sales-type and direct financing leases	\$ 3,862	\$ 3,765
Commercial financing receivables	7,750	7,095
Client loan receivables	5,395	5,195
Installment payment receivables	1,031	846
Total	\$18,038	\$16,901
Noncurrent		
Net investment in sales-type and direct financing leases	\$ 6,107	\$ 5,406
Commercial financing receivables	5	34
Client loan receivables	5,966	4,925
Installment payment receivables	733	410
Total	\$12,812	\$10,776

Net investment in sales-type and direct financing leases relates principally to the company's systems products and are for terms ranging generally from two to six years. Net investment in sales-type and direct financing leases includes unguaranteed residual values of \$794 million and \$745 million at December 31, 2012 and 2011, respectively, and is reflected net of unearned income of \$728 million and \$733 million, and net of the allowance for credit losses of \$114 million and \$118 million at those dates, respectively. Scheduled maturities of minimum lease payments outstanding at December 31, 2012, expressed as a percentage of the total, are approximately: 2013, 42 percent; 2014, 29 percent; 2015, 18 percent; 2016, 9 percent; and 2017 and beyond, 3 percent.

Commercial financing receivables, net of allowance for credit losses of \$46 million and \$53 million at December 31, 2012 and 2011, respectively, relate primarily to inventory and accounts receivable financing for dealers and remarketers of IBM and non-IBM products. Payment terms for inventory and accounts receivable financing generally range from 30 to 90 days.

Client loan receivables, net of allowance for credit losses of \$155 million and \$126 million at December 31, 2012 and 2011, respectively, are loans that are provided primarily to clients to finance the purchase of software and services. Separate contractual relationships on these financing arrangements are for terms ranging generally from one to seven years.

Installment payment receivables, net of allowance for credit losses of \$39 million and \$51 million at December 31, 2012 and 2011, respectively, are loans that are provided primarily to clients to finance hardware, software and services ranging generally from one to three years.

Client loan receivables and installment payment receivables financing contracts are priced independently at competitive market rates. The company has a history of enforcing the terms of these separate financing agreements.

The company utilizes certain of its financing receivables as collateral for non-recourse borrowings. Financing receivables pledged as collateral for borrowings were \$650 million and \$410 million at December 31, 2012 and 2011, respectively. These borrowings are included in note J, "Borrowings," on pages 104 and 105.

The company did not have any financing receivables held for sale as of December 31, 2012 and 2011.

Financing Receivables by Portfolio Segment

The following tables present financing receivables on a gross basis, excluding the allowance for credit losses and residual value, by portfolio segment and by class, excluding current commercial financing receivables and other miscellaneous current financing receivables at December 31, 2012 and 2011. The company determines its allowance for credit losses based on two portfolio segments: lease receivables and loan receivables, and further segments the portfolio into two classes: major markets and growth markets.

(\$ in millions)			
At December 31, 2012:	Major Markets	Growth Markets	Total
Financing receivables			
Lease receivables	\$ 7,036	\$ 2,138	\$ 9,174

Ending balance at December 31, 2011	\$ 203	\$ 104	\$ 307
Lease receivables	\$ 79	\$ 40	\$ 118
Loan receivables	\$ 125	\$ 64	\$ 189
Collectively evaluated for impairment	\$ 82	\$ 15	\$ 96
Individually evaluated for impairment	\$ 122	\$ 89	\$ 211

When determining the allowances, financing receivables are evaluated either on an individual or a collective basis. For individually evaluated receivables, the company determines the expected cash flow for the receivable and calculates an estimate of the potential loss and the probability of loss. For those accounts in which the loss is probable, the company records a specific reserve. In addition, the company records an unallocated reserve that is calculated by applying a reserve rate to its different portfolios, excluding accounts that have been specifically reserved. This reserve rate is based upon credit rating, probability of default, term, characteristics (lease/loan) and loss history.

Financing Receivables on Non-Accrual Status

The following table presents the recorded investment in financing receivables which were on non-accrual status at December 31, 2012 and 2011.

(\$ in millions)

	2012	2011
At December 31:		
Major markets	\$ 27	\$ 46
Growth markets	21	20
Total lease receivables	\$ 47	\$ 66
Major markets	\$ 67	\$ 75
Growth markets	25	24
Total loan receivables	\$ 92	\$ 99
Total receivables	\$139	\$165

Impaired Loans

The company considers any loan with an individually evaluated reserve as an impaired loan. Depending on the level of impairment, loans will also be placed on a non-accrual status. The following tables present impaired client loan receivables at December 31, 2012 and 2011.

(\$ in millions)

Credit Quality Indicators

The company's credit quality indicators are based on rating agency data, publicly available information and information provided by customers, and are reviewed periodically based on the relative level of risk. The resulting indicators are a numerical rating system that maps to Moody's Investors Service credit ratings as shown on the [following page](#). Moody's does not provide credit ratings to the company on its customers.

The tables present the gross recorded investment for each class of receivables, by credit quality indicator, at December 31, 2012 and 2011. Receivables with a credit quality indicator ranging from Aaa to Baa3 are considered investment grade. All others are considered non-investment grade. The credit quality indicators do not reflect mitigation actions that the company may take to transfer credit risk to third parties.

Lease Receivables

(\$ in millions)

At December 31, 2012:	Major Markets	Growth Markets
Credit rating		
Aaa–Aa3	\$ 646	\$ 86

Total	\$5,021	\$4,895

* Deferred transition and setup costs and other deferred arrangements are related to Global Services client arrangements. See note A, "Significant Accounting Policies," on page 79 for additional information.

** See note D, "Financial Instruments," on pages 94 through 98 for the fair value of all derivatives reported in the Consolidated Statement of Financial Position.

Note I. Intangible Assets Including Goodwill

Intangible Assets

The following table details the company's intangible asset balances by major asset class.

(\$ in millions)

At December 31, 2012:	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
Intangible asset class			
Capitalized software	\$1,527	\$ (665)	\$ 861
Client relationships	2,103	(961)	1,142
Completed technology	2,709	(1,112)	1,597
In-process R&D	28	—	28
Patents/trademarks	281	(127)	154
Other*	31	(27)	3
Total	\$6,679	\$(2,892)	\$3,787

(\$ in millions)

	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
At December 31, 2011:			
Intangible asset class			
Capitalized software	\$1,478	\$ (678)	\$ 799
Client relationships	1,751	(715)	1,035
Completed technology	2,160	(746)	1,414
In-process R&D	18	—	18
Patents/trademarks	207	(88)	119
Other*	29	(22)	7
Total	\$5,642	\$(2,250)	\$3,392

* Other intangibles are primarily acquired proprietary and nonproprietary business processes, methodologies and systems.

The net carrying amount of intangible assets increased \$395 million during the year ended December 31, 2012, primarily due to intangible asset additions resulting from acquisitions, partially offset by amortization. There was no impairment of intangible assets recorded in 2012 and 2011.

Total amortization was \$1,284 million and \$1,226 million for the years ended December 31, 2012 and 2011, respectively. The aggregate amortization expense for acquired intangibles assets (excluding capitalized software) was \$709 million and \$634 million for the years ended December 31, 2012 and 2011, respectively. In addition, in 2012 the company retired \$641 million of fully amortized intangible assets, impacting both the gross carrying amount and accumulated amortization by this amount.

The amortization expense for each of the five succeeding years relating to intangible assets currently recorded in the Consolidated Statement of Financial Position is estimated to be the following at December 31, 2012:

(\$ in millions)

	Capitalized Software	Acquired Intangibles	Total
2013	\$501	\$729	\$1,230
2014	277	626	903
2015	83	498	581
2016	—	458	458
2017	—	340	340

Goodwill

The changes in the goodwill balances by reportable segment, for the years ended December 31, 2012 and 2011, are as follows:

(\$ in millions)

Segment	Balance January 1, 2012	Goodwill Additions	Purchase Price Adjustments	Divestitures	Foreign Currency Translation and Other Adjustments	Balance December 31, 2012
Global Business Services	\$ 4,313	\$ 5	\$ (0)	\$ (2)	\$ 42	\$ 4,357
Global Technology Services	2,646	264	—	(0)	6	2,916
Software	18,121	2,182	(30)	(6)	137	20,405
Systems and Technology	1,133	443	(0)	(14)	6	1,568
Total	\$26,213	\$2,894	\$(30)	\$(22)	\$192	\$29,247

(\$ in millions)

Segment	Balance January 1, 2011	Goodwill Additions	Purchase Price Adjustments	Divestitures	Foreign Currency Translation and Other Adjustments	Balance December 31, 2011
Global Business Services	\$ 4,329	\$ 14	\$ (0)	\$(10)	\$ (20)	\$ 4,313
Global Technology Services	2,704	—	(1)	(2)	(55)	2,646
Software	16,963	1,277	10	(2)	(127)	18,121
Systems and Technology	1,139	—	(6)	—	(0)	1,133
Total	\$25,136	\$1,291	\$ 2	\$(13)	\$(203)	\$26,213

Purchase price adjustments recorded in 2012 and 2011 were related to acquisitions that were completed on or prior to December 31, 2011 or December 31, 2010, respectively, and were still subject to the measurement period that ends at the earlier of 12 months from the acquisition date or when information becomes available. There were no goodwill impairment losses recorded in 2012 or 2011, and the company has no accumulated goodwill impairment losses.

Note J. Borrowings

Short-Term Debt

(\$ in millions)

At December 31:	2012	2011
Commercial paper	\$1,800	\$2,300
Short-term loans	1,789	1,859
Long-term debt — current maturities	5,593	4,306
Total	\$9,181	\$8,463

The weighted-average interest rate for commercial paper at December 31, 2012 and 2011 was 0.1 percent, respectively. The weighted-average interest rates for short-term loans was 1.8 percent and 1.2 percent at December 31, 2012 and 2011, respectively.

Long-Term Debt

Pre-Swap Borrowing

(\$ in millions)

At December 31:	Maturities	2012	2011
U.S. dollar notes and debentures (average interest rate at December 31, 2012):			
2.79%	2013–2014	\$ 7,131	\$ 8,615

Total	\$29,660

Debt Exchange

In the second quarter of 2012, the company completed an exchange of approximately \$6 million of principal of its 7.125 percent debentures due 2036, \$104 million of principal of its 8.00 percent notes due in 2038 and \$800 million of principal of its 5.600 percent senior notes due in 2039 for approximately \$1,107 million of 4.00 percent senior notes due in 2042 and cash of approximately \$121 million. The exchange was completed to retire high coupon debt in the current favorable interest rate environment.

The debt exchange was accounted for as a non-revolving debt modification in accordance with accounting guidance, and therefore it did not result in any gain or loss recorded in the Consolidated Statement of Earnings. Cash payments will be amortized over the life of the new debt. Administrative fees with third parties in relation to the exchange were expensed as incurred.

Interest on Debt

(\$ in millions)

For the year ended December 31:	2012	2011	2010
Cost of financing	\$ 545	\$553	\$555
Interest expense	470	402	365
Net investment derivative activity	(11)	9	3
Interest capitalized	18	9	5
Total interest paid and accrued	\$1,022	\$973	\$928

Refer to the related discussion on page 136 in note T, "Segment Information," for total interest expense of the Global Financing segment. See note D, "Financial Instruments," on pages 92 to 98 for a discussion of the use of currency and interest rate swaps in the company's debt risk management program.

Lines of Credit

In 2011, the company renewed its five-year, \$10 billion Credit Agreement (the "Credit Agreement"), which expires on November 10, 2016. In 2012, the company extended the term of the global credit facility by one year to November 10, 2017. The total expense recorded by the company related to this facility was \$5.3 million in 2012, \$5.0 million in 2011 and \$6.2 million in 2010. The Credit Agreement permits the company and its Subsidiary Borrowers to borrow up to \$10 billion on a revolving basis. Borrowings of the Subsidiary Borrowers will be unconditionally backed by the company. The company may also, upon the agreement of either existing lenders, or of the additional banks not currently party to the Credit Agreement, increase the commitments under the Credit Agreement up to an additional \$2.0 billion. Subject to certain terms of the Credit Agreement, the company and Subsidiary Borrowers may borrow, prepay and reborrow amounts under the Credit Agreement at any time during the Credit Agreement. Interest rates on borrowings under the Credit Agreement will be based on prevailing market interest rates, as further described in the Credit Agreement. The Credit Agreement contains customary representations and warranties, covenants, events of default, and indemnification provisions. The company believes that circumstances that might give rise to breach of these covenants or an event of default, as specified in the Credit Agreement, are remote. As of December 31, 2012, there were no borrowings by the company, or its subsidiaries, under the Credit Agreement.

The company also has other committed lines of credit in some of the geographies which are not significant in the aggregate. Interest rates and other terms of borrowing under these lines of credit vary from country to country, depending on local market conditions.

Note K. Other Liabilities

(\$ in millions)		
At December 31:	2012	2011
Income tax reserves	\$2,527	\$3,989
Executive compensation accruals	1,542	1,388
Disability benefits	890	835
Derivative liabilities	78	166
Special actions	430	347
Workforce reductions	473	366
Deferred taxes	448	549
Environmental accruals	216	249
Noncurrent warranty accruals	167	163
Asset retirement obligations	127	166
Other	709	777
Total	\$7,607	\$8,996

In response to changing business needs, the company periodically takes workforce reduction actions to improve productivity, cost competitiveness and to rebalance skills. The noncurrent contractually obligated future payments associated with these activities are reflected in the workforce reductions caption in the previous table.

In addition, the company executed certain special actions as follows: (1) the second quarter of 2005 associated with Global Services, primarily in Europe, (2) the fourth quarter of 2002 associated with the acquisition of the PricewaterhouseCoopers consulting business, (3) the second quarter of 2002 associated with the Microelectronics Division and the rebalancing of the company's workforce and leased space resources, (4) the 2002 actions associated with the hard disk drive business for reductions in workforce, manufacturing capacity and space, (5) the actions taken in 1999, and (6) the actions that were executed prior to 1994.

The table below provides a roll forward of the current and noncurrent liabilities associated with these special actions. The current liabilities presented in the table are included in other accrued expenses and liabilities in the Consolidated Statement of Financial Position.

(in millions)				
	Liability as of January 1, 2012	Payments	Other Adjustments*	Liability as of December 31, 2012
Current				
Workforce	\$ 33	\$(32)	\$27	\$ 28
Space	4	(4)	1	2
Total current	\$ 38	\$(36)	\$28	\$ 30
Noncurrent				
Workforce	\$344	\$ —	\$85	\$430
Space	3	—	(3)	0
Total noncurrent	\$347	\$ —	\$83	\$430

* The other adjustments column in the table above principally includes the reclassification of noncurrent to current, remeasurement of actuarial assumptions, foreign currency translation adjustments and interest accretion.

The workforce accruals primarily relate to terminated employees who are no longer working for the company who were granted annual payments to supplement their incomes in certain countries. Depending on the individual country's legal requirements, these required payments will continue until the former employee begins receiving pension benefits or passes away. The space accruals are for ongoing obligations to pay rent for vacant space that could not be sublet or space that was sublet at rates lower than the committed lease arrangement. The length of these obligations varies by lease with the longest extending through 2014.

The company employs extensive internal environmental protection programs that primarily are preventive in nature. The company also participates in environmental assessments and cleanups at a number of locations, including operating facilities, previously owned facilities and Superfund sites. The company's maximum exposure for all environmental liabilities cannot be estimated and no amounts have been recorded for non-ARO environmental liabilities that are

not probable or estimable. The total amounts accrued for non-ARO environmental liabilities, including amounts classified as current in the Consolidated Statement of Financial Position, that do not reflect actual or anticipated insurance recoveries, were \$229 million and \$262 million at December 31, 2012 and 2011, respectively. Estimated environmental costs are not expected to materially affect the consolidated financial position or consolidated results of the company's operations in future periods. However, estimates of future costs are subject to change due to protracted cleanup periods and changing environmental remediation regulations.

As of December 31, 2012, the company was unable to estimate the range of settlement dates and the related probabilities for certain asbestos remediation AROs. These conditional AROs are primarily related to the encapsulated structural fireproofing that is not subject to abatement unless the buildings are demolished and non-encapsulated asbestos that the company would remediate only if it performed major renovations of certain existing buildings. Because these conditional

obligations have indeterminate settlement dates, the company could not develop a reasonable estimate of their fair values. The company will continue to assess its ability to estimate fair values at each future reporting date. The related liability will be recognized once sufficient additional information becomes available. The total amounts accrued for ARO liabilities, including amounts classified as current in the Consolidated Statement of Financial Position, were \$171 million and \$187 million at December 31, 2012 and 2011, respectively.

Note L. Equity Activity

The authorized capital stock of IBM consists of 4,687,500,000 shares of common stock with a \$.20 per share par value, of which 1,117,367,676 shares were outstanding at December 31, 2012 and 150,000,000 shares of preferred stock with a \$.01 per share par value, none of which were outstanding at December 31, 2012.

Stock Repurchases

The Board of Directors authorizes the company to repurchase IBM common stock. The company repurchased 61,246,371 common shares at a cost of \$12,008 million, 88,683,716 common shares at a cost of \$15,034 million and 117,721,650 common shares at a cost of \$15,419 million in 2012, 2011 and 2010, respectively. These amounts reflect transactions executed through December 31 of

each year. Actual cash disbursements for repurchased shares may differ due to varying settlement dates for these transactions. At December 31, 2012, \$8,652 million of Board common stock repurchase authorization was still available. The company plans to purchase shares on the open market or in private transactions from time to time, depending on market conditions.

Other Stock Transactions

The company issued the following shares of common stock as part of its stock-based compensation plans and employees stock purchase plan: 15,091,320 shares in 2012, 20,669,785 shares in 2011 and 34,783,386 shares in 2010. The company issued 2,746,169 treasury shares in 2012, 4,920,198 treasury shares in 2011 and 7,929,318 treasury shares in 2010, as a result of exercises of stock options by employees of certain acquired businesses and by non-U.S. employees. Also, as part of the company's stock-based compensation plans, 2,406,007 common shares at a cost of \$468 million, 1,717,246 common shares at a cost of \$289 million and 2,334,932 common shares at a cost of \$297 million in 2012, 2011 and 2010, respectively, were remitted by employees to the company in order to satisfy minimum statutory tax withholding requirements. These amounts are included in the treasury stock balance in the Consolidated Statement of Financial Position and the Consolidated Statement of Changes in Equity.

Note M. Contingencies and Commitments

Contingencies

As a company with a substantial employee population and with clients in more than 170 countries, IBM is involved, either as plaintiff or defendant, in a variety of ongoing claims, demands, suits, investigations, tax matters and proceedings that arise from time to time in the ordinary course of its business. The company is a leader in the information technology industry and, as such, has been and will continue to be subject to claims challenging its IP rights and associated products and offerings, including claims of copyright and patent infringement and violations of trade secrets and other IP rights. In addition, the company enforces its own IP against infringement, through license negotiations, lawsuits or otherwise. Also, as is typical for companies of IBM's scope and scale, the company is party to actions and proceedings in various jurisdictions involving a wide range of labor and employment issues (including matters related to contested employment decisions, country-specific labor and employment laws, and the company's pension, retirement and other benefit plans), as well as actions with respect to contracts, product liability, securities, foreign operations, competition law and environmental matters. These actions may be commenced by a number of different parties, including competitors, clients, current or former employees, government and regulatory agencies, stockholders and representatives of the locations in which the company does business. Some of the actions to which the company is party may involve particularly complex technical issues, and some actions may raise novel questions under the laws of the various jurisdictions in which these matters arise.

The company records a provision with respect to a claim, suit, investigation or proceeding when it is probable that a liability has been incurred and the amount of the loss can be reasonably estimated. Any recorded liabilities, including any changes to such liabilities for the years ended December 31, 2012, 2011 and 2010 were not material to the Consolidated Financial Statements.

In accordance with the relevant accounting guidance, the company provides disclosures of matters for which the likelihood of material loss is at least reasonably possible. In addition, the company also discloses matters based on its consideration of other matters and qualitative factors, including the experience of other companies in the industry, and investor, customer and employee relations considerations.

With respect to certain of the claims, suits, investigations and proceedings discussed herein, the company believes at this time that the likelihood of any material loss is remote, given, for example, the procedural status, court rulings, and/or the strength of the company's defenses in those matters. With respect to the remaining claims, suits, investigations and proceedings discussed in this note, the company is unable to provide estimates of reasonably possible losses or range of losses, including losses in excess of amounts accrued, if any, for the following reasons. Claims, suits, investigations and proceedings are inherently uncertain, and it is not possible to predict the ultimate outcome of these matters. It is the company's experience that damage amounts claimed in litigation against it are unreliable and unrelated to possible outcomes, and as such are not meaningful indicators of the company's potential liability. Further, the company is unable to provide such an estimate due to a number of other factors with respect to these claims, suits, investigations and proceedings, including considerations of the procedural status of

the matter in question, the presence of complex or novel legal theories, and/or the ongoing discovery and development of information important to the matters. The company reviews claims, suits, investigations and proceedings at least quarterly, and decisions are made with respect to recording or adjusting provisions and disclosing reasonably possible losses or range of losses (individually or in the aggregate), to reflect the impact and status of settlement discussions, discovery, procedural and substantive rulings, reviews by counsel and other information pertinent to a particular matter.

Whether any losses, damages or remedies finally determined in any claim, suit, investigation or proceeding could reasonably have a material effect on the company's business, financial condition, results of operations or cash flows will depend on a number of variables, including: the timing and amount of such losses or damages; the structure and type of any such remedies; the significance of the impact any such losses, damages or remedies may have in the Consolidated Financial Statements; and the unique facts and circumstances of the particular matter that may give rise to additional factors. While the company will continue to defend itself vigorously, it is possible that the company's business, financial condition, results of operations or cash flows could be affected in any particular period by the resolution of one or more of these matters.

The following is a summary of the more significant legal matters involving the company.

The company is a defendant in an action filed on March 6, 2003 in state court in Salt Lake City, Utah by the SCO Group (SCO v. IBM). The company removed the case to Federal Court in Utah. Plaintiff is an alleged successor in interest to some of AT&T's UNIX IP rights, and alleges copyright infringement, unfair competition, interference with contract and breach of contract with regard to the company's distribution of AIX and Dynix and contribution of code to Linux. The company has asserted counterclaims, including breach of contract, violation of the Lanham Act, unfair competition, intentional torts, unfair and deceptive trade practices, breach of the General Public License that governs open source distributions, promissory estoppel and copyright infringement. Motions for summary judgment were heard in March 2007, and the court has not yet issued its decision. On September 14, 2007, plaintiff filed for bankruptcy protection, and all proceedings in this case were stayed. On August 25, 2009, the U.S. Bankruptcy Court for the District of Delaware approved the appointment of a Trustee of SCO. The court in another suit, the SCO Group, Inc. v. Novell, Inc., held a trial in March 2010. The jury found that Novell is the owner of UNIX and UnixWare copyrights; the judge subsequently ruled that SCO is obligated to recognize Novell's waiver of SCO's claims against IBM and Sequent for breach of UNIX license agreements. On August 30, 2011, the Tenth Circuit Court of Appeals affirmed the district court's ruling and denied SCO's appeal of this matter. In November 2011, SCO filed a motion in Federal Court in Utah seeking to reopen the SCO v. IBM case.

On May 13, 2010, IBM and the State of Indiana (acting on behalf of the Indiana Family and Social Services Administration) sued one another in a dispute over a 2006 contract regarding the modernization of social service program processing in Indiana. The State terminated the contract, claiming that IBM was in breach, and the State is seeking damages. IBM believes the State's claims against it are without merit and is seeking payment of termination amounts specified in the contract. Trial began in late February 2012 in Marion County, Indiana Superior Court and concluded in early April. On July 18, 2012, the court rejected the State's claims in their entirety and awarded IBM \$52 million plus interest and costs. In August 2012, the State of Indiana filed a notice of appeal. IBM also intends to appeal certain portions of the court's ruling.

The company was named as a co-defendant in numerous purported class actions filed on and after March 18, 2011 in federal and state courts in California in connection with an information technology outsourcing agreement between Health Net, Inc. and IBM. The matters were consolidated in the United States District Court for the Eastern District of California, and plaintiffs filed a consolidated complaint on July 15, 2011. The consolidated complaint alleges that the company violated the California Confidentiality of Medical Information Act in connection with hard drives that are unaccounted for at one of Health Net's data centers in California; plaintiffs have been notified by Health Net that certain of their personal information is believed to be contained on those hard drives. Plaintiffs seek damages, as well as injunctive and declaratory relief. IBM has also received a request for information regarding this matter from the California Attorney General. On January 12, 2012, the court granted IBM's motion to dismiss the complaint for lack of standing, and on February 22, 2012, the case against IBM was dismissed.

IBM United Kingdom Limited (IBM UK) initiated legal proceedings in May 2010 before the High Court in London against the IBM UK Pensions Trust (the UK Trust) and two representative beneficiaries of the UK Trust membership. IBM UK is seeking a declaration that it acted lawfully both in notifying the Trustee of the UK Trust that it was closing its UK defined benefit plans to future accruals for most participants and in implementing the company's new retirement policy. The trial in the High Court began in February 2013. In addition, IBM UK is a defendant in approximately 290 individual actions brought since early 2010 by participants of the defined benefits plans who left IBM UK. These actions, which allege constructive dismissal and age discrimination, are pending before the Employment Tribunal in Southampton UK and are currently stayed pending resolution of the above-referenced High Court proceedings.

In a separate but related proceeding, in March 2011, the Trustee of the IBM UK Trust was granted leave to initiate a claim before the High Court in London against IBM UK and one member of the UK Trust membership, seeking an order modifying certain documents and terms relating to retirement provisions in IBM UK's largest defined benefit plan (the C Plan) dating back to 1983. The trial of these proceedings began in May 2012 and finished in early June. On October 12, 2012, the High Court in London issued its ruling, holding that the 1983 Trust Deeds and Rules should be modified to allow certain categories of current IBM UK employees who are members of the C Plan to retire from the age of 60 (rather than from the age of 63) without actuarial reduction of their defined benefit pension. In a supplementary ruling on December 13, 2012, the Court declined to similarly modify the Trust Deeds and Rules for former employees who were C Plan members and who left the company prior to retirement. On February 7, 2013, the Court issued an order agreed to by all parties, under which there will be no appeals of the October 2012 and December 2012 judgments. As a result of the October 2012 ruling, IBM recorded an additional pre-tax retirement-related obligation of \$162 million in the third quarter of 2012.

In March 2011, the company announced that it has agreed to settle a civil enforcement action with the Securities and Exchange Commission (SEC) relating to activities by employees of IBM Korea, LG IBM, IBM (China) Investment Company Limited and IBM Global Services (China) Co., Ltd., during the period from 1998 through 2009, allegedly in violation of the Foreign Corrupt Practices Act of 1977. As part of the settlement, IBM has consented to the entry of a judgment relating to the books and records and internal control provisions of the securities laws. IBM has also agreed to pay a total of \$10 million, categorized by the SEC as follows: (i) \$5.3 million, representing profits gained as a result of the conduct alleged in the SEC's complaint, (ii) prejudgment interest on that amount of \$2.7 million, and (iii) a civil penalty of \$2 million. The settlement is subject to court approval.

The company is a defendant in numerous actions filed after January 1, 2008 in the Supreme Court for the State of New York, county of Broome, on behalf of hundreds of plaintiffs. The complaints allege numerous and different causes of action, including for negligence and recklessness, private nuisance and trespass. Plaintiffs in these cases seek medical monitoring and claim damages in unspecified amounts for a variety of personal injuries and property damages allegedly arising out of the presence of groundwater contamination and vapor intrusion of groundwater contaminants into certain structures in which plaintiffs reside or resided, or conducted business, allegedly resulting from the release of chemicals into the environment by the company at its former manufacturing and development facility in Endicott. These complaints also seek punitive damages in an unspecified amount.

The company is party to, or otherwise involved in, proceedings brought by U.S. federal or state environmental agencies under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), known as "Superfund," or laws similar to CERCLA. Such statutes require potentially responsible parties to participate in remediation activities regardless of fault or ownership of sites. The company is also conducting environmental investigations, assessments or remediations at or in the vicinity of several current or former operating sites globally pursuant to permits, administrative orders or agreements with country, state or local environmental agencies, and is involved in lawsuits and claims concerning certain current or former operating sites.

The company is also subject to ongoing tax examinations and governmental assessments in various jurisdictions. Along with many other U.S. companies doing business in Brazil, the company is involved in various challenges with Brazilian authorities regarding non-income tax assessments and non-income tax litigation matters. These matters include claims for taxes on the importation of computer software. In November 2008, the company won a significant case in the Superior Chamber of the federal administrative tax court in Brazil, and in late July 2009, the company received written confirmation regarding this decision. The total potential amount related to the remaining matters for all applicable years is approximately \$575 million. The company believes it will prevail on these matters and that this amount is not a meaningful indicator of liability.

Commitments

The company's extended lines of credit to third-party entities include unused amounts of \$4,719 million and \$4,040 million at December 31, 2012 and 2011, respectively. A portion of these amounts was available to the company's business partners to support their working capital needs. In addition, the company has committed to provide future financing to its clients in connection with client purchase agreements for approximately \$1,513 million and \$1,866 million at December 31, 2012 and 2011, respectively.

The company has applied the guidance requiring a guarantor to disclose certain types of guarantees, even if the likelihood of requiring the guarantor's performance is remote. The following is a description of arrangements in which the company is the guarantor.

The company is a party to a variety of agreements pursuant to which it may be obligated to indemnify the other party with respect to certain matters. Typically, these obligations arise in the context of contracts entered into by the company, under which the company customarily agrees to hold the other party harmless against losses arising from a breach of representations and covenants related to such matters as title to assets sold, certain IP rights, specified environmental matters, third-party performance of nonfinancial contractual obligations and certain income taxes. In each of these circumstances, payment by the company is conditioned on the other party making a claim pursuant to the procedures specified in the particular contract, the procedures of which typically allow the company to challenge the other party's claims. While typically indemnification provisions do not include a contractual maximum on the company's payment, the company's obligations under these agreements may be limited in terms of time and/or nature of claim, and in some instances, the company may have recourse against third parties for certain payments made by the company.

It is not possible to predict the maximum potential amount of future payments under these or similar agreements due to the conditional nature of the company's obligations and the unique facts and circumstances involved in each particular agreement. Historically, payments made by the company under these agreements have not had a material effect on the company's business, financial condition or results of operations.

In addition, the company guarantees certain loans and financial commitments. The maximum potential future payment under these financial guarantees was \$65 million and \$56 million at December 31, 2012 and 2011, respectively. The fair value of the guarantees recognized in the Consolidated Statement of Financial Position is not material.

Note N. Taxes

(\$ in millions)

For the year ended December 31:	2012	2011	2010
Income before income taxes			
U.S. operations	\$ 9,668	\$ 9,716	\$ 9,140
Non-U.S. operations	12,234	11,287	10,583
Total income before income taxes	\$21,902	\$21,003	\$19,723

The provision for income taxes by geographic operations is as follows:

(\$ in millions)

For the year ended December 31:	2012	2011	2010
U.S. operations	\$2,582	\$2,141	\$2,000
Non-U.S. operations	2,716	3,007	2,890
Total provision for income taxes	\$5,298	\$5,148	\$4,890

The components of the provision for income taxes by taxing jurisdiction are as follows:

(\$ in millions)

For the year ended December 31:	2012	2011	2010
U.S. federal			
Current	\$1,361	\$ 268	\$ 190
Deferred	403	909	1,015
	1,764	1,177	1,205
U.S. state and local			
Current	134	429	279
Deferred	289	81	210
	423	510	489
Non-U.S.			
Current	3,006	3,239	3,127
Deferred	105	222	69
	3,111	3,461	3,196
Total provision for income taxes	5,298	5,148	4,890
Provision for social security, real estate, personal property and other taxes	4,331	4,289	4,018
Total taxes included in net income	\$9,629	\$9,437	\$8,908

A reconciliation of the statutory U.S. federal tax rate to the company's effective tax rate is as follows:

For the year ended December 31:	2012	2011	2010
Statutory rate	35%	35%	35%
Foreign tax differential	(11)	(10)	(10)
State and local	1	2	2
Other	(1)	(2)	(2)
Effective rate	24%	25%	25%

The significant components reflected within the tax rate reconciliation above labeled "Foreign tax differential" include the effects of foreign subsidiaries' earnings taxed at rates other than the U.S. statutory rate, foreign export incentives, the U.S. tax impacts of non-U.S. earnings repatriation and any net impacts of intercompany transactions. These items also reflect audit settlements or changes in the amount of unrecognized tax benefits associated with each of these items.

In the fourth quarter of 2011, the IRS commenced its audit of the company's U.S. tax returns for the years 2008 through 2010. The company anticipates that this audit will be completed by the end of 2013.

The effect of tax law changes on deferred tax assets and liabilities did not have a material impact on the company's effective tax rate.

The significant components of deferred tax assets and liabilities that are recorded in the Consolidated Statement of Financial Position were as follows:

Deferred Tax Assets

(\$ in millions)

At December 31:	2012	2011
Retirement benefits	\$ 5,870	\$ 5,169
Share-based and other compensation	1,666	1,598
Deferred income	1,018	834
Domestic tax loss/credit carryforwards	954	914
Foreign tax loss/credit carryforwards	681	752
Bad debt, inventory and warranty reserves	586	608
Depreciation	456	474
Other	1,384	1,479
Gross deferred tax assets	12,615	11,828
Less: valuation allowance	1,187	912
Net deferred tax assets	\$11,428	\$10,916

* Reclassified to conform with 2012 presentation.

Deferred Tax Liabilities

(\$ in millions)

At December 31:	2012	2011
Leases	\$2,216	\$2,149
Depreciation	1,378	1,421
Goodwill and intangible assets	957	796
Software development costs	542	466
Retirement benefits	257	551
Other	1,158	1,121
Gross deferred tax liabilities	\$6,508	\$6,504

For income tax return purposes, the company has foreign and domestic loss carryforwards, the tax effect of which is \$706 million, as well as domestic and foreign credit carryforwards of \$929 million. Substantially all of these carryforwards are available for at least two years or are available for 10 years or more.

The valuation allowance at December 31, 2012 principally applies to certain foreign, state and local loss carryforwards that, in the opinion of management, are more likely than not to expire unutilized. However, to the extent that tax benefits related to these carryforwards are realized in the future, the reduction in the valuation allowance will reduce income tax expense.

The amount of unrecognized tax benefits at December 31, 2012 increased by \$97 million in 2012 to \$5,672 million. A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows:

(\$ in millions)

	2012	2011	2010
Balance at January 1	\$5,575	\$5,293	\$ 4,790
Additions based on tax positions related to the current year	401	672	1,054
Additions for tax positions of prior years	215	379	1,768
Reductions for tax positions of prior years (including impacts due to a lapse in statute)	(425)	(538)	(1,659)
Settlements	(94)	(231)	(660)
Balance at December 31	\$5,672	\$5,575	\$ 5,293

The additions to unrecognized tax benefits related to the current and prior years are primarily attributable to non-U.S. issues, certain tax incentives and credits, acquisition-related matters and state issues. The settlements and reductions to unrecognized tax benefits for tax positions of prior years are primarily attributable to the conclusion of the company's various U.S., state and non-U.S. income tax examinations and various non-U.S. matters, as well as impacts due to lapses in statutes of limitation.

In April 2010, the company appealed the determination of a non-U.S. taxing authority with respect to certain foreign tax losses. The tax benefit of these losses, approximately \$1,475 million, had been included in unrecognized tax benefits within 2010 additions for tax positions of prior years. The tax benefit of these losses total \$1,386 million as of December 31, 2012. The 2012 decrease was driven by currency and has been included in the 2012 reductions for tax positions of prior years. In April 2011, the company had received notification that the appeal was denied. In June 2011, the company filed a lawsuit challenging this decision. The next court hearing is scheduled for March 2013. No final determination has been reached on this matter.

The liability at December 31, 2012 of \$5,672 million can be reduced by \$573 million of offsetting tax benefits associated with the correlative effects of potential transfer pricing adjustments, state income taxes and timing adjustments. The net amount of \$5,099 million, if recognized, would favorably affect the company's effective tax rate. The net amounts at December 31, 2011 and 2010 were \$5,090 million and \$4,849 million, respectively.

Interest and penalties related to income tax liabilities are included in income tax expense. During the year ended December 31, 2012, the company recognized \$134 million in interest expense and penalties; in 2011, the company recognized \$129 million in interest expense and penalties, and in 2010, the company recognized a \$15 million benefit in interest expense and penalties. The company has \$533 million for the payment of interest and penalties accrued at December 31, 2012, and had \$461 million accrued at December 31, 2011.

Within the next 12 months, the company believes it is reasonably possible that the total amount of unrecognized tax benefits associated with certain positions may be significantly reduced. The potential decrease in the amount of unrecognized tax benefits is primarily associated with the anticipated resolution of the company's U.S. income tax audit for 2008 through 2010, as well as various non-U.S. audits. Specific positions that may be resolved, and may reduce the amount of unrecognized tax benefits, include transfer pricing matters, tax incentives and credits as well as various other foreign tax matters. The company estimates that the unrecognized tax benefits at December 31, 2012 could be reduced by approximately \$1,700 million.

With limited exception, the company is no longer subject to U.S. federal, state and local or non-U.S. income tax audits by taxing authorities for years through 2007. The years subsequent to 2007 contain matters that could be subject to differing interpretations of applicable tax laws and regulations related to the amount and/or timing of income, deductions and tax credits. Although the outcome of tax audits is always uncertain, the company believes that adequate amounts of tax and interest have been provided for any adjustments that are expected to result for these years.

The company has not provided deferred taxes on \$44.4 billion of undistributed earnings of non-U.S. subsidiaries at December 31, 2012, as it is the company's policy to indefinitely reinvest these earnings in non-U.S. operations. However, the company periodically repatriates a portion of these earnings to the extent that it does not incur an additional U.S. tax liability. Quantification of the deferred tax liability, if any, associated with indefinitely reinvested earnings is not practicable.

Note O. **Research, Development and Engineering**

RD&E expense was \$6,302 million in 2012, \$6,258 million in 2011 and \$6,026 million in 2010.

The company incurred expense of \$6,034 million, \$5,990 million and \$5,720 million in 2012, 2011 and 2010, respectively, for scientific research and the application of scientific advances to the development of new and improved products and their uses, as well as services and their application. Within these amounts, software-related expense was \$3,078 million, \$3,097 million and \$3,028 million in 2012, 2011 and 2010, respectively.

Expense for product-related engineering was \$268 million, \$267 million and \$306 million in 2012, 2011 and 2010, respectively.

Note P. Earnings Per Share of Common Stock

The following table presents the computation of basic and diluted earnings per share of common stock.

(\$ in millions except per share amounts)

For the year ended December 31:	2012	2011	2010
Weighted-average number of shares on which earnings per share calculations are based			
Basic	1,142,508,521	1,196,951,006	1,268,789,202
Add—incremental shares under stock-based compensation plans	10,868,426	14,241,131	16,189,053
Add—incremental shares associated with contingently issuable shares	2,072,370	2,575,848	2,377,133
Assuming dilution	1,155,449,317	1,213,767,985	1,287,355,388
Net income on which basic earnings per share is calculated	\$16,604	\$15,855	\$14,833
Less—net income applicable to contingently issuable shares	(1)	0	0
Net income on which diluted earnings per share is calculated	\$16,603	\$15,855	\$14,833
Earnings/(loss) per share of common stock			
Assuming dilution	\$ 14.37	\$ 13.06	\$ 11.52
Basic	\$ 14.53	\$ 13.25	\$ 11.69

There were no stock options outstanding in 2012, 2011 and 2010 that were considered antidilutive and not included in the diluted earnings per share calculation.

Note Q. Rental Expense and Lease Commitments

Rental expense, including amounts charged to inventories and fixed assets, and excluding amounts previously reserved, was \$1,767 million in 2012, \$1,836 million in 2011 and \$1,727 million in 2010. Rental expense in agreements with rent holidays and scheduled rent increases is recorded on a straight-line basis over the lease term. Contingent rentals are included in the determination of rental expense as accruable. The table below depicts gross minimum

rental commitments under noncancelable leases, amounts related to vacant space associated with infrastructure reductions and special actions taken through 1994, and in 1999, 2002 and 2005 (previously reserved), sublease income commitments and capital lease commitments. These amounts reflect activities primarily related to office space, as well as manufacturing facilities.

(\$ in millions)

	2013	2014	2015	2016	2017	Beyond 2017
Operating lease commitments						
Gross minimum rental commitments (including vacant space below)	\$1,466	\$1,268	\$1,044	\$746	\$535	\$747
Vacant space	\$ 21	\$ 13	\$ 7	\$ 3	\$ 1	\$ 0
Sublease income commitments	\$ 26	\$ 16	\$ 11	\$ 9	\$ 4	\$ 1
Capital lease commitments	\$ 13	\$ 12	\$ 11	\$ 8	\$ 10	\$ 6

Note R.
Stock-Based Compensation

Stock-based compensation cost is measured at grant date, based on the fair value of the award, and is recognized over the employee requisite service period. See note A, "Significant Accounting Policies," on page 82 for additional information.

The following table presents total stock-based compensation cost included in the Consolidated Statement of Earnings.

(\$ in millions)			
For the year ended December 31:	2012	2011	2010
Cost	\$ 132	\$ 120	\$ 94
Selling, general and administrative	498	514	488
Research, development and engineering	59	62	48
Other (income) and expense	(1)	—	(1)
Pre-tax stock-based compensation cost	688	697	629
Income tax benefits	(240)	(246)	(240)
Total stock-based compensation cost	\$ 448	\$ 450	\$ 389

Total unrecognized compensation cost related to non-vested awards at December 31, 2012 and 2011 was \$1,101 million and \$1,169 million, respectively, and is expected to be recognized over a weighted-average period of approximately three years.

There was no significant capitalized stock-based compensation cost at December 31, 2012, 2011 and 2010.

Incentive Awards

Stock-based incentive awards are provided to employees under the terms of the company's long-term performance plans (the "Plans"). The Plans are administered by the Executive Compensation and Management Resources Committee of the Board of Directors (the "Committee"). Awards available under the Plans principally include stock options, restricted stock units, performance share units or any combination thereof.

The amount of shares originally authorized to be issued under the company's existing Plans was 274.1 million at December 31, 2012. In addition, certain incentive awards granted under previous plans, if and when those awards were canceled, could be reissued under the company's existing Plans. As such, 66.2 million additional awards were considered authorized to be issued under the company's existing Plans as of December 31, 2012. There were 121.2 million unused shares available to be granted under the Plans as of December 31, 2012.

Under the company's long-standing practices and policies, all awards are approved prior to or on the date of grant. The awards approval process specifies the individual receiving the grant, the number of options or the value of the award, the exercise price or formula for determining the exercise price and the date of grant. All awards for senior management are approved by the Committee. All awards for employees other than senior management are approved by senior management pursuant to a series of delegations that were approved by the Committee, and the grants made pursuant to these delegations are reviewed periodically with the Committee. Awards that are given as part of annual total compensation for senior management and other employees are made on specific cycle dates scheduled in advance. With respect to awards given in connection with promotions or new hires, the company's policy requires approval of such awards prior to the grant date, which is typically the date of the promotion or the date of hire.

Stock Options

Stock options are awards which allow the employee to purchase shares of the company's stock at a fixed price. Stock options are granted at an exercise price equal to the company's average high and low stock price on the date of grant. These awards, which generally vest 25 percent per year, are fully vested four years from the date of grant and have a contractual term of 10 years.

The company estimates the fair value of stock options at the date of grant using the Black-Scholes valuation model. Key inputs and assumptions used to estimate the fair value of stock options include the grant price of the award, the expected option term, volatility of the company's stock, the risk-free rate and the company's dividend yield. Estimates of fair value are not intended to predict actual future events or the value ultimately realized by employees who receive equity awards, and subsequent events are not indicative of the reasonableness of the original estimates of fair value made by the company.

During the years ended December 31, 2012, 2011 and 2010, the company did not grant stock options.

The following table summarizes option activity under the Plans during the years ended December 31, 2012, 2011 and 2010.

	2012		2011		2010	
	Weighted-Average Exercise Price	Number of Shares Under Option	Weighted-Average Exercise Price	Number of Shares Under Option	Weighted-Average Exercise Price	Number of Shares Under Option
Balance at January 1	\$ 90	20,662,322	\$ 94	39,197,728	\$ 98	73,210,457
Options exercised	86	(9,080,170)	98	(18,144,309)	101	(33,078,316)
Options canceled/expired	75	(192,431)	107	(391,097)	108	(934,413)
Balance at December 31	\$ 94	11,389,721	\$ 90	20,662,322	\$ 94	39,197,728
Exercisable at December 31	\$ 94	11,389,721	\$ 90	20,662,322	\$ 94	39,197,728

The shares under option at December 31, 2012 were in the following exercise price ranges:

Exercise Price Range	Options Outstanding and Exercisable			
	Weighted-Average Exercise Price	Number of Shares Under Option	Aggregate Intrinsic Value	Weighted-Average Remaining Contractual Life (in Years)
\$85 and under	\$ 83	3,222,177	\$ 350,989,003	0.9
\$86–\$105	97	7,532,868	709,980,689	1.9
\$106 and over	106	634,676	54,314,359	1.1
	\$ 94	11,389,721	\$1,115,284,051	1.6

In connection with various acquisition transactions, there was an additional 0.9 million stock-based awards, consisting of stock options and restricted stock units, outstanding at December 31, 2012, as a result of the company's assumption of stock-based awards previously granted by the acquired entities. The weighted-average exercise price of these awards was \$68 per share.

Exercises of Employee Stock Options

The total intrinsic value of options exercised during the years ended December 31, 2012, 2011 and 2010 was \$1,005 million, \$1,269 million and \$1,072 million, respectively. The total cash received from employees as a result of employee stock option exercises for the years ended December 31, 2012, 2011 and 2010 was approximately \$785 million, \$1,786 million and \$3,347 million, respectively. In connection with these exercises, the tax benefits realized by the company for the years ended December 31, 2012, 2011 and 2010 were \$341 million, \$412 million and \$351 million, respectively.

The company settles employee stock option exercises primarily with newly issued common shares and, occasionally, with treasury shares. Total treasury shares held at December 31, 2012 and 2011 were approximately 1,080 million and 1,019 million shares, respectively.

Stock Awards

In lieu of stock options, the company currently grants its employees stock awards. These awards are made in the form of Restricted Stock Units (RSUs), including Retention Restricted Stock Units (RRSUs), or Performance Share Units (PSUs).

The tables below summarize RSU and PSU activity under the Plans during the years ended December 31, 2012, 2011 and 2010.

RSUs

	2012		2011		2010	
	Weighted-Average Grant Price	Number of Units	Weighted-Average Grant Price	Number of Units	Weighted-Average Grant Price	Number of Units
Balance at January 1	\$129	12,218,601	\$110	11,196,446	\$102	13,405,654
RSUs granted	184	2,635,772	154	5,196,802	122	3,459,303
RSUs released	117	(4,338,787)	106	(3,508,700)	98	(5,102,951)
RSUs canceled/forfeited	139	(674,125)	122	(665,947)	105	(565,560)
Balance at December 31	\$148	9,841,481	\$129	12,218,601	\$110	11,196,446

PSUs

	2012		2011		2010	
	Weighted-Average Grant Price	Number of Units	Weighted-Average Grant Price	Number of Units	Weighted-Average Grant Price	Number of Units
Balance at January 1	\$122	3,686,991	\$111	3,649,288	\$107	3,476,737
PSUs granted at target	185	1,004,003	154	1,055,687	117	1,239,468
Additional shares earned above target*	102	550,399	118	230,524	103	463,913
PSUs released	102	(1,998,746)	118	(1,189,765)	103	(1,486,484)
PSUs canceled/forfeited	131	(70,446)	118	(58,743)	108	(44,346)
Balance at December 31**	\$151	3,172,201	\$122	3,686,991	\$111	3,649,288

* Represents additional shares issued to employees after vesting of PSUs because final performance metrics exceeded specified targets.

** Represents the number of shares expected to be issued based on achievement of grant date performance targets. The actual number of shares issued depends on the company's performance against specified targets over the vesting period.

RSUs are stock awards granted to employees that entitle the holder to shares of common stock as the award vests, typically over a one- to five-year period. For RSUs awarded on or after January 1, 2008, dividend equivalents are not paid. The fair value of such RSUs is determined and fixed on the grant date based on the company's stock price adjusted for the exclusion of dividend equivalents.

The remaining weighted-average contractual term of RSUs at December 31, 2012, 2011 and 2010 is the same as the period over which the remaining cost of the awards will be recognized, which is approximately three years. The fair value of RSUs granted during the years ended December 31, 2012, 2011 and 2010 was \$486 million, \$803 million and \$421 million, respectively. The total fair value of RSUs vested and released during the years ended December 31, 2012, 2011 and 2010 was \$509 million, \$373 million and \$503 million, respectively. As of December 31, 2012, 2011 and 2010, there was \$938 million, \$1,021 million and \$865 million, respectively, of unrecognized compensation cost related to non-vested RSUs. The company received no cash from employees as a result of employee vesting and release of RSUs for the years ended December 31, 2012, 2011 and 2010. In the second quarter of 2011, the company granted equity awards valued at approximately \$1 thousand each to about 400,000 non-executive employees. These awards were made under the Plans and vest in December 2015.

PSUs are stock awards where the number of shares ultimately received by the employee depends on the company's performance against specified targets and typically vest over a three-year period. For PSUs, dividend equivalents are not paid. The fair value of each PSU is determined on the grant date, based on the company's stock price, adjusted for the exclusion of dividend equivalents, and assumes that performance targets will be achieved. Over the performance period, the number of shares of stock that will be issued is adjusted upward or downward based upon the probability of achievement of performance targets. The ultimate number of shares issued and the related compensation cost recognized as expense will be based on a comparison of the final performance metrics to the specified targets. The fair value of PSUs granted at target during the years ended December 31, 2012, 2011 and 2010 was \$186 million, \$165 million and \$145 million, respectively. Total fair value of PSUs vested and released during the years ended December 31, 2012, 2011 and 2010 was \$203 million, \$141 million and \$153 million, respectively.

In connection with vesting and release of RSUs and PSUs, the tax benefits realized by the company for the years ended December 31, 2012, 2011 and 2010 were \$454 million, \$283 million and \$293 million, respectively.

IBM Employees Stock Purchase Plan

The company maintains a non-compensatory Employees Stock Purchase Plan (ESPP). The ESPP enables eligible participants to purchase full or fractional shares of IBM common stock at a 5 percent discount off the average market price on the day of purchase through payroll deductions of up to 10 percent of eligible compensation. Eligible compensation includes any compensation received by the employee during the year. The ESPP provides for offering periods during which shares may be purchased and continues as long as shares remain available under the ESPP, unless terminated earlier at the discretion of the Board of Directors. Individual ESPP participants are restricted from purchasing more than \$25,000 of common stock in one calendar year or 1,000 shares in an offering period.

Employees purchased 1.6 million, 1.9 million and 2.4 million shares under the ESPP during the years ended December 31, 2012, 2011 and 2010, respectively. Cash dividends declared and paid by the company on its common stock also include cash dividends on the company stock purchased through the ESPP. Dividends are paid on full and fractional shares and can be reinvested in the ESPP. The company stock purchased through the ESPP is considered outstanding and is included in the weighted-average outstanding shares for purposes of computing basic and diluted earnings per share.

Approximately 3.8 million, 5.4 million and 7.2 million shares were available for purchase under the ESPP at December 31, 2012, 2011 and 2010, respectively.

Note S.

Retirement-Related Benefits

Description of Plans

IBM sponsors defined benefit pension plans and defined contribution plans that cover substantially all regular employees, a supplemental retention plan that covers certain U.S. executives and nonpension postretirement benefit plans primarily consisting of retiree medical and dental benefits for eligible retirees and dependents.

U.S. Plans

Defined Benefit Pension Plans

IBM Personal Pension Plan

IBM provides U.S. regular, full-time and part-time employees hired prior to January 1, 2005 with noncontributory defined benefit pension benefits via the IBM Personal Pension Plan. Prior to 2008, the IBM Personal Pension Plan consisted of a tax qualified (qualified) plan and a non-tax qualified (nonqualified) plan. Effective January 1, 2008, the nonqualified plan was renamed the Excess Personal Pension Plan (Excess PPP) and the qualified plan is now referred to as the Qualified PPP. The combined plan is now referred to as the PPP. The Qualified PPP is funded by company contributions to an irrevocable trust fund, which is held for the sole benefit of participants and beneficiaries. The Excess PPP, which is unfunded, provides benefits in excess of IRS limitations for qualified plans.

Benefits provided to the PPP participants are calculated using benefit formulas that vary based on the participant. The first method uses a five-year, final pay formula that determines benefits based on salary, years of service, mortality and other participant-specific factors. The second method is a cash balance formula that calculates benefits using a percentage of employees' annual salary, as well as an interest crediting rate.

Benefit accruals under the IBM Personal Pension Plan ceased December 31, 2007 for all participants.

U.S. Supplemental Executive Retention Plan

The company also sponsors a nonqualified U.S. Supplemental Executive Retention Plan (Retention Plan). The Retention Plan, which is unfunded, provides benefits to eligible U.S. executives based on average earnings, years of service and age at termination of employment.

Benefit accruals under the Retention Plan ceased December 31, 2007 for all participants.

Defined Contribution Plans

IBM 401(k) Plus Plan

U.S. regular, full-time and part-time employees are eligible to participate in the IBM 401(k) Plus Plan, which is a qualified defined-contribution plan under section 401(k) of the Internal Revenue Code. Effective January 1, 2008, under the IBM 401(k) Plus Plan, eligible employees receive a dollar-for-dollar match of their contributions up to 6 percent of eligible compensation for those hired prior to January 1, 2005, and up to 5 percent of eligible compensation for those hired on or after January 1, 2005. In addition, eligible employees receive automatic contributions from the company equal to 1, 2 or 4 percent of eligible compensation based on their eligibility to participate in the PPP as of December 31, 2007. Employees receive automatic contributions and matching contributions after the completion of one year of service. Further, through June 30, 2009, IBM contributed transition credits to eligible participants' 401(k) Plus Plan accounts. The amount of the transition credits was based on a participant's age and service as of June 30, 1999.

The company's matching contributions vest immediately and participants are always fully vested in their own contributions. All contributions, including the company match, are made in cash and invested in accordance with participants' investment elections. There are no minimum amounts that must be invested in company stock, and there are no restrictions on transferring amounts out of company stock to another investment choice, other than excessive trading rules applicable to such investments. Effective January 1, 2013, matching and automatic contributions are made once annually at the end of the year. In order to receive such contributions each year, a participant must be employed on December 15 of the plan year. However, if a participant separates from service prior to December 15, and has completed certain service and/or age requirements, then the participant will be eligible to receive such matching and automatic contributions following separation from service.

IBM Excess 401(k) Plus Plan

Effective January 1, 2008, the company replaced the IBM Executive Deferred Compensation Plan, an unfunded, nonqualified, defined contribution plan, with the IBM Excess 401(k) Plus Plan (Excess 401(k)), an unfunded, nonqualified defined contribution plan. Employees who are eligible to participate in the 401(k) Plus Plan and whose eligible compensation is expected to exceed the IRS compensation limit for qualified plans are eligible to participate in the Excess 401(k). The purpose of the Excess 401(k) is to provide benefits that would be provided under the qualified IBM 401(k) Plus Plan if the compensation limits did not apply.

Amounts deferred into the Excess 401(k) are record-keeping (notional) accounts and are not held in trust for the participants. Participants in the Excess 401(k) may invest their notional accounts in investments which mirror the primary investment options available under the 401(k) Plus Plan. Participants in the Excess 401(k) are also eligible to receive company match and automatic contributions on eligible compensation deferred into the Excess 401(k) and on compensation earned in excess of the Internal Revenue Code pay limit once they have completed one year of service. Through June 30, 2009, eligible participants also received transition credits. Amounts deferred into the Excess 401(k), including company contributions are recorded as liabilities in the Consolidated Statement of Financial Position. Effective January 1, 2013, matching and automatic contributions are made once annually at the end of the year. In order to receive such contributions each year, a participant must be employed on December 15 of the plan year. However, if a participant separates from service prior to December 15, and has completed certain service and/or age requirements, then the participant will be eligible to receive such matching and automatic contributions following separation from service.

*Nonpension Postretirement Benefit Plan**U.S. Nonpension Postretirement Plan*

The company sponsors a defined benefit nonpension postretirement benefit plan that provides medical and dental benefits to eligible U.S. retirees and eligible dependents, as well as life insurance for eligible U.S. retirees. Effective July 1, 1999, the company established a Future Health Account (FHA) for employees who were more than five years from retirement eligibility. Employees who were within five years of retirement eligibility are covered under the company's prior retiree health benefits arrangements. Under either the FHA or the prior retiree health benefit arrangements, there is a maximum cost to the company for retiree health benefits.

Since January 1, 2004, new hires, as of that date or later, are not eligible for company subsidized nonpension postretirement benefits.

Non-U.S. Plans

Most subsidiaries and branches outside the United States sponsor defined benefit and/or defined contribution plans that cover substantially all regular employees. The company deposits funds under various fiduciary-type arrangements, purchases annuities under group contracts or provides reserves for these plans. Benefits under the defined benefit plans are typically based either on years of service and the employee's compensation (generally during a fixed number of years immediately before retirement) or on annual credits. The range of assumptions that are used for the non-U.S. defined benefit plans reflect the different economic environments within the various countries.

In addition, certain of the company's non-U.S. subsidiaries sponsor nonpension postretirement benefit plans that provide medical and dental benefits to eligible non-U.S. retirees and eligible dependents, as well as life insurance for certain eligible non-U.S. retirees. However, most non-U.S. retirees are covered by local government-sponsored and -administered programs.

Plan Financial Information

Summary of Financial Information

The following table presents a summary of the total retirement-related benefits net periodic (income)/cost recorded in the Consolidated Statement of Earnings.

(\$ in millions)

	U.S. Plans			Non-U.S. Plans			Total		
	2012	2011	2010	2012	2011	2010	2012	2011	2010

* Funded status is recognized in the Consolidated Statement of Financial Position as follows: Asset amounts as prepaid pension assets; (Liability) amounts as compensation and benefits (current liability) and retirement and nonpension postretirement benefit obligations (noncurrent liability).

At December 31, 2012, the company's qualified defined benefit pension plans worldwide were 94 percent funded compared to the benefit obligations, with the U.S. qualified PPP 98 percent funded. Overall, including nonqualified plans, the company's defined benefit pension plans were 86 percent funded.

**Defined Benefit Pension and Nonpension
Postretirement Benefit Plan Financial Information**

The following tables through page 125 represent financial information for the company's retirement-related benefit plans, excluding defined contribution plans. The defined benefit pension plans under U.S. Plans consists of the Qualified PPP, the Excess PPP and the Retention Plan. The defined benefit pension plans and the nonpension postretirement benefit plans under Non-U.S. Plans consists of all

plans sponsored by the company's subsidiaries. The nonpension postretirement benefit plan under U.S. Plan consists of only the U.S. Nonpension Postretirement Benefit Plan.

The tables below present the components of net periodic (income)/cost of the retirement-related benefit plans recognized in the Consolidated Statement of Earnings, excluding defined contribution plans.

* Includes the reinstatement of certain plan assets in Brazil due to a 2011 government ruling allowing certain previously restricted plan assets to be returned to IBM. Beginning June 2011, the assets will be returned to IBM monthly over a three year period, with approximately \$200 million returned during 2012. The remaining surplus in Brazil at December 31, 2012 remains excluded from total plan assets due to continued restrictions imposed by the government on the use of those plan assets.

** Represents the benefit obligation assuming no future participant compensation increases.

Transition (assets)/liabilities	0	(0)	—	0

During the years ended December 31, 2012, 2011 and 2010, the company paid \$22 million, \$16 million and \$22 million, respectively, for mandatory pension insolvency insurance coverage premiums in certain non-U.S. countries (Germany, Canada, Luxembourg and the UK).

No significant amendments of retirement-related benefit plans occurred during the years ended December 31, 2012 and 2011 that had a material effect in the Consolidated Statement of Earnings.

On October 12, 2012, the High Court in London issued a ruling against IBM United Kingdom Limited and IBM United Kingdom Holdings Limited, both wholly-owned subsidiaries of the company, in litigation involving one of IBM UK's defined benefit plans. As a result of the ruling, the company recorded an additional pre-tax retirement-related obligation of \$162 million in the third quarter of 2012 in selling, general and administrative expense in the Consolidated Statement of Earnings. See note M, "Contingencies and Commitments," on pages 111 and 112 for additional information.

Assumptions Used to Determine Plan Financial Information

Underlying both the measurement of benefit obligations and net periodic (income)/cost are actuarial valuations. These valuations use participant-specific information such as salary, age and years of service, as well as certain assumptions, the most significant of which include estimates of discount rates, expected return on plan assets, rate of compensation increases, interest crediting rates and mortality rates. The company evaluates these assumptions, at a minimum, annually, and makes changes as necessary.

The table below presents the assumptions used to measure the net periodic (income)/cost and the year-end benefit obligations for retirement-related benefit plans.

	Defined Benefit Pension Plans					
	U.S. Plans			Non-U.S. Plans		
	2012	2011	2010	2012	2011	2010
Weighted-average assumptions used to measure net periodic (income)/cost for the year ended December 31						
Discount rate	4.20%	5.00%	5.60%	4.28%	4.33%	4.84%
Expected long-term returns on plan assets	8.00%	8.00%	8.00%	6.26%	6.41%	6.56%
Rate of compensation increase*	N/A	N/A	N/A	2.43%	2.37%	2.92%
Weighted-average assumptions used to measure benefit obligations at December 31						
Discount rate	3.60%	4.20%	5.00%	3.23%	4.28%	4.33%
Rate of compensation increase*	N/A	N/A	N/A	2.51%	2.43%	2.37%

* Rate of compensation increase is not applicable to the U.S. defined benefit pension plans as benefit accruals ceased December 31, 2007 for all participants.

N/A—Not applicable

	Nonpension Postretirement Benefit Plans					
	U.S. Plan			Non-U.S. Plans		
	2012	2011	2010	2012	2011	2010
Weighted-average assumptions used to measure net periodic cost for the year ended December 31						
Discount rate	3.90%	4.80%	5.40%	7.37%	7.75%	7.92%
Expected long-term returns on plan assets	N/A	N/A	N/A	9.01%	9.07%	9.16%
Weighted-average assumptions used to measure benefit obligations at December 31						
Discount rate	3.30%	3.90%	4.80%	6.43%	7.37%	7.75%

N/A—Not applicable

Discount Rate

The discount rate assumptions used for retirement-related benefit plans accounting reflect the yields available on high-quality, fixed income debt instruments at the measurement date. For the U.S. and certain non-U.S. countries, a portfolio of high-quality corporate bonds is used to construct a yield curve. The cash flows from the company's expected benefit obligation payments are then matched to the yield curve to derive the discount rates. In other non-U.S. countries, where the markets for high-quality long-term bonds are not generally as well developed, a portfolio of long-term government bonds is used as a base, to which a credit spread is added to simulate corporate bond yields at these maturities in the jurisdiction of each plan, as the benchmark for developing the respective discount rates.

For the U.S. defined benefit pension plans, the changes in the discount rate assumptions impacted the net periodic (income)/cost and the PBO. The changes in the discount rate assumptions resulted in a decrease in 2012 net periodic income of \$258 million, a decrease in 2011 net periodic income of \$171 million and a decrease in 2010 net periodic income of \$40 million. The changes in the discount rate assumptions resulted in an increase in the PBO of \$3,414 million and \$4,216 million at December 31, 2012 and 2011, respectively.

For the nonpension postretirement benefit plans, the changes in the discount rate assumptions had no material impact on net periodic cost for the years ended December 31, 2012, 2011 and 2010 and resulted in an increase in the APBO of \$252 million and \$359 million at December 31, 2012 and 2011, respectively.

Expected Long-Term Returns on Plan Assets

Expected returns on plan assets, a component of net periodic (income)/cost, represent the expected long-term returns on plan assets based on the calculated market-related value of plan assets. Expected long-term returns on plan assets take into account long-term expectations for future returns and the investment policies and strategies as described on [page 128](#). These rates of return are developed by the company and are tested for reasonableness against historical returns. The use of expected long-term returns on plan assets may result in recognized pension income that is greater or less than the actual returns of those plan assets in any given year. Over time, however, the expected long-term returns are designed to approximate the actual long-term returns, and therefore result in a pattern of income and cost recognition that more closely matches the pattern of the services provided by the employees. Differences between actual and expected returns are recognized as a component of net loss or gain in AOCI, which is amortized as a component of net periodic (income)/cost over the service lives or life expectancy of the plan participants, depending on the plan, provided such amounts exceed certain thresholds provided by accounting standards. The market-related value of plan assets recognizes changes in the fair value of plan assets systematically over a five-year period in the expected return on plan assets line in net periodic (income)/cost.

For the U.S. defined benefit pension plan, the Qualified PPP, the expected long-term rate of return on plan assets of 8.00 percent remained constant for the years ended December 31, 2012, 2011 and 2010 and, consequently, had no incremental impact on net periodic (income)/cost.

For the nonpension postretirement benefit plans, the company maintains a highly liquid trust fund balance to ensure timely payments are made. As a result, for the years ended December 31, 2012, 2011 and 2010, the expected long-term return on plan assets and the actual return on those assets were not material.

Rate of Compensation Increases and Mortality Rate

The rate of compensation increases is determined by the company, based upon its long-term plans for such increases. The rate of compensation increase is not applicable to the U.S. defined benefit pension plans as benefit accruals ceased December 31, 2007 for all participants. Mortality rate assumptions are based on life expectancy and death rates for different types of participants. Mortality rates are periodically updated based on actual experience.

Interest Crediting Rate

Benefits for certain participants in the PPP are calculated using a cash balance formula. An assumption underlying this formula is an interest crediting rate, which impacts both net periodic (income)/cost and the PBO. This assumption provides a basis for projecting the expected interest rate that participants will earn on the benefits that they are expected to receive in the following year and is based on the average from August to October of the one-year U.S. Treasury Constant Maturity yield plus one percent.

For the PPP, the change in the interest crediting rate to 1.1 percent for the year ended December 31, 2012, from 1.3 percent for the year ended December 31, 2011, resulted in an increase in 2012 net periodic income of \$10 million. The change in the interest crediting rate to 1.3 percent for the year ended December 31, 2011, from 1.4 percent for the year ended December 31, 2010, resulted in an increase in 2011 net periodic income of \$4 million. The change in the interest crediting rate to 1.4 percent for the year ended December 31, 2010, from 2.8 percent for the year ended December 31, 2009, resulted in an increase in 2010 net periodic income of \$62 million.

Healthcare Cost Trend Rate

For nonpension postretirement benefit plan accounting, the company reviews external data and its own historical trends for healthcare costs to determine the healthcare cost trend rates. However, the healthcare cost trend rate has an insignificant effect on plan costs and obligations as a result of the terms of the plan which limit the company's obligation to the participants. The company assumes that the healthcare cost trend rate for 2013 will be 7.0 percent. In addition, the company assumes that the same trend rate will decrease to 5 percent over the next four years. A one percentage point increase or decrease in the assumed healthcare cost trend rate would not have had a material effect on 2012, 2011 and 2010 net periodic cost or the benefit obligations as of December 31, 2012 and 2011.

Healthcare Legislation

The expected effects of the U.S. healthcare reform legislation enacted in March 2010 were incorporated into the remeasurements of the U.S. nonpension postretirement benefit plan at December 31, 2012 and 2011. The impact was insignificant as a result of the terms of the plan which limit the company's obligation to the participants.

Plan Assets

Retirement-related benefit plan assets are recognized and measured at fair value as described in note A, "Significant Accounting Policies," on [page 84](#). Because of the inherent uncertainty of valuations, these fair value measurements may not necessarily reflect the amounts the company could realize in current market transactions.

Investment Policies and Strategies

The investment objectives of the Qualified PPP portfolio are designed to generate returns that will enable the plan to meet its future obligations. The precise amount for which these obligations will be settled depends on future events, including the retirement dates and life expectancy of the plans' participants. The obligations are estimated using actuarial assumptions, based on the current economic environment and other pertinent factors described on [pages 125 to 127](#). The Qualified PPP portfolio's investment strategy balances the requirement to generate returns, using potentially higher yielding assets such as equity securities, with the need to control risk in the portfolio with less volatile assets, such as fixed income securities. Risks include, among others, inflation, volatility in equity values and changes in interest rates that could cause the plan to become underfunded, thereby increasing its dependence on contributions from the company. To mitigate any potential concentration risk, careful consideration is given to balancing the portfolio among industry sectors, companies and geographies, taking into account interest rate sensitivity, dependence on economic growth, currency and other factors that affect investment returns. As a result, the Qualified PPP portfolio's target allocation is 43 percent equity securities, 47 percent fixed income securities, 5 percent real estate and 5 percent other investments, which is consistent with the allocation decisions made by the company's management and is similar to the prior year target allocation. The table on [page 129](#) details the actual equity, fixed income, real estate and other types of investments in the Qualified PPP portfolio.

The assets are managed by professional investment firms and investment professionals who are employees of the company. They are bound by investment mandates determined by the company's management and are measured against specific benchmarks. Among these managers, consideration is given, but not limited to, balancing security concentration, issuer concentration, investment style and reliance on particular active and passive investment strategies.

Market liquidity risks are tightly controlled, with \$6,946 million of the Qualified PPP portfolio invested in private market assets consisting of private equities and private real estate investments, which are less liquid than publicly traded securities. As of December 31, 2012, the Qualified PPP portfolio had \$2,509 million in commitments for future investments in private markets to be made over a number of years. These commitments are expected to be funded from plan assets.

Derivatives are used as an effective means to achieve investment objectives and/or as a component of the plan's risk management strategy. The primary reasons for the use of derivatives are fixed income management, including duration, interest rate management and credit exposure, cash equitization and to manage currency and commodity strategies.

Outside the U.S., the investment objectives are similar to those described above, subject to local regulations. The weighted-average target allocation for the non-U.S. plans is 35 percent equity securities, 54 percent fixed income securities, 2 percent real estate and 9 percent other investments, which is consistent with the allocation decisions made by the company's management. The table on [page 129](#) details the actual equity, fixed income, real estate and other types of investments for non-U.S. plans. In some countries, a higher percentage allocation to fixed income is required to manage solvency and funding risks. In others, the responsibility for managing the investments typically lies with a board that may include up to 50 percent of members elected by employees and retirees. This can result in slight differences compared with the strategies previously described. Generally, these non-U.S. plans do not invest in illiquid assets and their use of derivatives is consistent with the U.S. plan and mainly for currency hedging, interest rate risk management, credit exposure and alternative investment strategies.

The company's defined benefit pension plans include investments in certain European government securities. At December 31, 2012, the U.S. plan held \$847 million and the non-U.S. plans held approximately \$11 billion in European sovereign debt investments, primarily in AAA-rated securities. Investments in government debt securities in Italy, Spain and Ireland were de minimis in the U.S. plan and represented less than 1 percent of total non-U.S. plan assets. The plans hold no direct investments in government debt securities of Greece and Portugal.

The company's nonpension postretirement benefit plans are underfunded or unfunded. For some plans, the company maintains a nominal, highly liquid trust fund balance to ensure timely benefit payments.

Defined Benefit Pension Plan assets

The following table presents the company's defined benefit pension plans' asset classes and their associated fair value at December 31, 2012. The U.S. Plan consists of the Qualified PPP and the Non-U.S. Plans consist of all plans sponsored by the company's subsidiaries.

Valuation Techniques

The following is a description of the valuation techniques used to measure plan assets at fair value. There were no changes in valuation techniques during 2012 and 2011.

Equity securities are valued at the closing price reported on the stock exchange on which the individual securities are traded. IBM common stock is valued at the closing price reported on the New York Stock Exchange. Equity commingled/mutual funds are typically valued using the net asset value (NAV) provided by the administrator of the fund and reviewed by the company. The NAV is based on the value of the underlying assets owned by the fund, minus liabilities and divided by the number of shares or units outstanding. These assets are classified as Level 1, Level 2 or Level 3 depending on availability of quoted market prices.

The fair value of fixed income securities is typically estimated using pricing models, quoted prices of securities with similar characteristics or discounted cash flows and are generally classified as Level 2. If available, they are valued using the closing price reported on the major market on which the individual securities are traded.

Cash includes money market accounts that are valued at their cost plus interest on a daily basis, which approximates fair value. Short-term investments represent securities with original maturities of one year or less. These assets are classified as Level 1 or Level 2.

Private equity and private real estate partnership valuations require significant judgment due to the absence of quoted market prices, the inherent lack of liquidity and the long-term nature of such assets. These assets are initially valued at cost and are reviewed periodically utilizing available and relevant market data to determine if the carrying value of these assets should be adjusted. These investments are classified as Level 3. The valuation methodology is applied consistently from period to period.

Exchange traded derivatives are valued at the closing price reported on the exchange on which the individual securities are traded, while forward contracts are valued using a mid-close price. Over-the-counter derivatives are typically valued using pricing models. The models require a variety of inputs, including, for example, yield curves, credit curves, measures of volatility and foreign exchange rates. These assets are classified as Level 1 or Level 2 depending on availability of quoted market prices.

Expected Contributions

Defined Benefit Pension Plans

It is the company's general practice to fund amounts for pensions sufficient to meet the minimum requirements set forth in applicable employee benefits laws and local tax laws. From time to time, the company contributes additional amounts as it deems appropriate.

The company contributed \$557 million and \$728 million in cash to non-U.S. defined benefit pension plans and \$60 million and \$70 million in cash to non-U.S. multi-employer plans during the years ended December 31, 2012 and 2011, respectively. The cash contributions to multi-employer plans represent the annual cost included in net periodic (income)/cost recognized in the Consolidated Statement of Earnings. The company has no liability for participants in multi-employer plans other than its own employees. As a result, the company's participation in multi-employer plans has no material impact on the company's financial statements.

In 2013, the company is not legally required to make any contributions to the U.S. defined benefit pension plans. However, depending on market conditions, or other factors, the company may elect to make discretionary contributions to the Qualified PPP during the year.

The Pension Protection Act of 2006 (the Act), enacted into law in 2006, is a comprehensive reform package that, among other provisions, increases pension funding requirements for certain U.S. defined benefit plans, provides guidelines for measuring pension plan assets and pension obligations for funding purposes and raises tax deduction limits for contributions to retirement-related benefit plans. The additional funding requirements by the Act apply to plan years beginning after December 31, 2007. The Act was updated by the Worker, Retiree and Employer Recovery Act of 2008, which revised the funding requirements in the Act by clarifying that pension plans may smooth the value of pension plans over 24 months. At December 31, 2012, no mandatory contribution was required for 2013.

In 2013, the company estimates contributions to its non-U.S. defined benefit and multi-employer plans to be approximately \$700 million, which will be mainly contributed to defined benefit pension plans in Japan, the UK and Switzerland. This amount represents the legally mandated minimum contributions. Financial market performance in 2013 could increase the legally mandated minimum contribution in certain countries which require monthly or daily remeasurement of the funded status. The company could also elect to contribute more than the legally mandated amount based on market conditions or other factors.

Nonpension Postretirement Benefit Plans

The company contributed \$693 million and \$362 million to the non-pension postretirement benefit plans during the years ended December 31, 2012 and 2011, respectively. These contribution amounts exclude the Medicare-related subsidy discussed on [page 133](#). The 2012 amount includes a \$400 million voluntary cash contribution to the U.S. non-pension postretirement benefit plan. This advanced funding will be utilized to fund post-2012 benefit payments for Medicare-eligible prescription drugs.

Expected Benefit Payments

Defined Benefit Pension Plan Expected Payments

The following table presents the total expected benefit payments to defined benefit pension plan participants. These payments have been estimated based on the same assumptions used to measure the plans' PBO at December 31, 2012 and include benefits attributable to estimated future compensation increases, where applicable.

(\$ in millions)

	Qualified U.S. Plan Payments	Nonqualified U.S. Plans Payments	Qualified Non-U.S. Plans Payments	Nonqualified Non-U.S. Plans Payments	Total Expected Benefit Payments
2013	\$ 3,303	\$104	\$ 1,993	\$ 378	\$ 5,778
2014	3,342	106	2,040	373	5,861
2015	3,407	108	2,011	382	5,908
2016	3,438	112	2,049	389	5,988
2017	3,418	113	2,073	400	6,004
2018-2022	17,436	597	11,071	2,252	31,356

The 2013 expected benefit payments to defined benefit pension plan participants not covered by the respective plan assets (underfunded plans) represent a component of compensation and benefits, within current liabilities, in the Consolidated Statement of Financial Position.

Nonpension Postretirement Benefit Plan Expected Payments

The following table reflects the total expected benefit payments to nonpension postretirement benefit plan participants, as well as the expected receipt of the company's share of the Medicare subsidy described below. These payments have been estimated based on the same assumptions used to measure the plan's APBO at December 31, 2012.

(\$ in millions)

	U.S. Plan Payments	Less: IBM Share of Expected Medicare Subsidy	Net Expected U.S. Plan Payments	Qualified Non-U.S. Plans Payments	Nonqualified Non-U.S. Plans Payments	Total Expected Benefit Payments
2013	\$ 462	\$(24)	\$ 438	\$ 8	\$ 34	\$ 480
2014	447	(26)	421	8	38	467
2015	446	(26)	420	8	41	470
2016	437	(25)	412	9	44	465
2017	429	(24)	405	10	48	463
2018-2022	1,979	(21)	1,958	55	305	2,318

The 2013 expected benefit payments to nonpension postretirement benefit plan participants not covered by the respective plan assets represent a component of compensation and benefits, within current liabilities, in the Consolidated Statement of Financial Position.

Medicare Prescription Drug Act

In connection with the Medicare Prescription Drug Improvement and Modernization Act of 2003, the company is expected to continue to receive a federal subsidy of approximately \$298 million to subsidize the prescription drug coverage provided by the U.S. nonpension postretirement benefit plan, which is expected to extend until 2018. Approximately \$147 million of the subsidy will be used by the company to reduce its obligation and cost related to the U.S. nonpension postretirement benefit plan. The company will contribute

the remaining subsidy of \$151 million to the plan in order to reduce contributions required by the participants. The company received total subsidies of \$53 million and \$36 million for prescription drug-related coverage during the years ended December 31, 2012 and 2011, respectively, which were utilized to reduce the company contributions to the U.S. nonpension postretirement benefit plan.

The company has included the impact of its portion of the subsidy in the determination of net periodic cost and APBO for the U.S. nonpension postretirement benefit plan at and for the years ended December 31, 2012, 2011 and 2010. The impact of the subsidy resulted in a reduction in APBO of \$134 million and \$93 million at December 31, 2012 and 2011, respectively. The impact of the subsidy resulted in a reduction in 2012, 2011 and 2010 net periodic cost of \$35 million, \$37 million and \$19 million, respectively.

Other Plan Information

The following table presents information for defined benefit pension plans with accumulated benefit obligations (ABO) in excess of plan assets. For a more detailed presentation of the funded status of the company's defined benefit pension plans, see the table on [page 124](#).

(\$ in millions)

	2012		2011	
	Benefit Obligation	Plan Assets	Benefit Obligation	Plan Assets
At December 31:				
Plans with PBO in excess of plan assets	\$99,184	\$83,799	\$83,777	\$70,570
Plans with ABO in excess of plan assets	98,263	83,677	83,184	70,512
Plans with assets in excess of PBO	6,944	7,889	13,169	16,011

Note T.

Segment Information

The company's major operations consist of five business segments: Global Technology Services, Global Business Services, Software, Systems and Technology and Global Financing. The segments represent components of the company for which separate financial information is available that is utilized on a regular basis by the chief executive officer in determining how to allocate resources and evaluate performance. The segments are determined based on several factors, including client base, homogeneity of products, technology, delivery channels and similar economic characteristics.

Information about each segment's business and the products and services that generate each segment's revenue is located in the "Description of Business" section on [pages 23 and 24](#), and in "Segment Details," on [pages 26 through 31](#) in the Management Discussion.

Segment revenue and pre-tax income include transactions between the segments that are intended to reflect an arm's-length, market-based transfer price. Systems and software that are used by Global Technology Services in outsourcing engagements are primarily sourced internally from Systems and Technology and Software. For providing IT services that are used internally, Global Technology Services and Global Business Services recover cost,

as well as a reasonable fee, that is intended to reflect the arm's-length value of providing the services. The Global Services segments enter into arm's-length loans at prices equivalent to market rates with Global Financing to facilitate the acquisition of equipment used in services engagements. All internal transaction prices are reviewed annually, and reset if appropriate.

The company utilizes globally integrated support organizations to realize economies of scale and efficient use of resources. As a result, a considerable amount of expense is shared by all of the segments. This shared expense includes sales coverage, certain marketing functions and support functions such as Accounting, Treasury, Procurement, Legal, Human Resources, and Billing and Collections. Where practical, shared expenses are allocated based on measurable drivers of expense, e.g., head count. When a clear and measurable driver cannot be identified, shared expenses are allocated on a financial basis that is consistent with the company's management system, e.g., advertising expense is allocated based on the gross profits of the segments. A portion of the shared expenses, which are recorded in net income, are not allocated to the segments. These expenses are associated with the elimination of internal transactions and other miscellaneous items.

The following tables reflect the results of operations of the company's segments consistent with the management and measurement system utilized within the company. Performance measurement is based on pre-tax income. These results are used, in part, by senior management, both in evaluating the performance of, and in allocating resources to, each of the segments.

Reconciliations of IBM as Reported

(\$ in millions)

For the year ended December 31:	2012	2011	2010
Revenue			
Total reportable segments	\$111,826	\$114,440	\$106,827
Other revenue and adjustments	577	722	750
Elimination of internal transactions	(7,896)	(8,246)	(7,707)
Total IBM consolidated revenue	\$104,507	\$106,916	\$ 99,870

(\$ in millions)

For the year ended December 31:	2012	2011	2010
Pre-tax income			
Total reportable segments	\$24,015	\$22,904	\$20,923
Amortization of acquired intangible assets	(703)	(629)	(512)
Acquisition-related charges	(36)	(46)	(46)
Non-operating retirement-related (costs)/income	(538)	72	414
Elimination of internal transactions	(1,197)	(1,243)	(957)
Unallocated corporate amounts*	361	(56)	(98)
Total IBM consolidated pre-tax income	\$21,902	\$21,003	\$19,723

* The 2012 amount includes the gain related to the Retail Store Solutions divestiture. The 2011 amount includes gains related to the sale of Lenovo common stock.

Immaterial Items**Investment in Equity Alliances and Equity Alliances Gains/(Losses)**

The investments in equity alliances and the resulting gains and (losses) from these investments that are attributable to the segments did not have a material effect on the financial position or the financial results of the segments.

Segment Assets and Other Items

Global Technology Services assets are primarily plant, property and equipment including the assets associated with the outsourcing business, accounts receivable, goodwill, acquired intangible assets, deferred services arrangement transition costs and maintenance parts inventory. Global Business Services assets are primarily goodwill and accounts receivable. Software assets are mainly goodwill, acquired intangible assets and accounts receivable. Systems and Technology assets are primarily plant, property and equipment, goodwill, manufacturing inventory and accounts receivable. Global Financing assets are primarily financing receivables and fixed assets under operating leases.

To ensure the efficient use of the company's space and equipment, several segments may share plant, property and equipment assets. Where assets are shared, landlord ownership of the assets is assigned to one segment and is not allocated to each user segment. This is consistent with the company's management system and is reflected accordingly in the table on page 137. In those cases, there will not be a precise correlation between segment pre-tax income and segment assets.

Similarly, the depreciation amounts reported by each segment are based on the assigned landlord ownership and may not be consistent with the amounts that are included in the segments' pre-tax income. The amounts that are included in pre-tax income reflect occupancy charges from the landlord segment and are not specifically identified by the management reporting system. Capital expenditures that are reported by each segment also are consistent with the landlord ownership basis of asset assignment.

Global Financing amounts for interest income and interest expense reflect the interest income and interest expense associated with the Global Financing business, including the intercompany financing activities discussed on page 24, as well as the income from investment in cash and marketable securities. The explanation of the difference between cost of financing and interest expense for segment presentation versus presentation in the Consolidated Statement of Earnings is included on page 66 of the Management Discussion.

Revenue by Classes of Similar Products or Services

The following table presents external revenue for similar classes of products or services within the company's reportable segments. Within Global Technology Services and Global Business Services, client solutions often include IBM software and systems and other suppliers' products if the client solution requires it. Within Software, product license charges and ongoing subscription and support are reported as Software, and software as a service, consulting, education, training and other product-related services are reported as Services. Within Systems and Technology, Microelectronics original equipment manufacturer (OEM) revenue is primarily from the sale

of semiconductors. Microelectronics Services revenue includes circuit and component design services and technology and manufacturing consulting services. See "Description of the Business," beginning on [page 21](#) for additional information.

Note U. Subsequent Events

On January 2, 2013, the American Taxpayer Relief Act of 2012 was signed into law extending several business tax provisions through 2013. Certain of these provisions were reinstated retroactively to January 1, 2012. Accounting guidance requires that the effects of new legislation be recognized upon enactment. Accordingly, the 2012 retroactive impact of the legislation, which is a tax benefit of approximately \$135 million, will be included in the company's first-quarter 2013 tax provision.

On January 29, 2013, the company announced that the Board of Directors approved a quarterly dividend of \$0.85 per common share. The dividend is payable March 9, 2013 to shareholders of record on February 8, 2013.

On February 5, 2013, the company issued \$1 billion of 5-year fixed-rate bonds with a 1.25 percent coupon, and \$1 billion of 2-year floating-rate bonds priced at three month London Interbank Offered Rate (LIBOR) minus two basis points.

** Earnings Per Share (EPS) in each quarter is computed using the weighted-average number of shares outstanding during that quarter while EPS for the full year is computed using the weighted-average number of shares outstanding during the year. Thus, the sum of the four quarters' EPS does not equal the full-year EPS.

* The stock prices reflect the high and low prices for IBM's common stock on the New York Stock Exchange composite tape for the periods presented.

Comparison of Five-Year Cumulative Total Return for IBM, S&P 500 Stock Index and S&P Information Technology Index

The adjacent graph compares the five-year cumulative total returns for IBM common stock with the comparable cumulative return of certain Standard & Poor's (S&P) indices. Due to the fact that IBM is a company included in the S&P 500 Stock Index, the SEC's rules require the use of that index. Under those rules, the second index used for comparison may be a published industry or line-of-business index. The S&P Information Technology Index is such an index. IBM is also included in this index.

The graph assumes \$100 invested on December 31 (of the initial year shown in the graph) in IBM common stock and \$100 invested on the same date in each of the S&P indices. The comparisons assume that all dividends are reinvested.

(U.S. Dollar)	2007	2008	2009	2010	2011	2012
— IBM Common Stock	\$100.00	\$79.24	\$125.67	\$143.62	\$183.01	\$193.87

IBM Stockholder Services

Stockholders with questions about their accounts should contact:

Computershare Trust Company, N.A., P.O. Box 43078, Providence, Rhode Island 02940-3078 (888) IBM-6700

Investors residing outside the United States, Canada and Puerto Rico should call (781) 575-2727

Stockholders can also reach Computershare Trust Company, N.A. by e-mail at: ibm@computershare.com

Hearing-impaired stockholders with access to a telecommunications device (TDD) can communicate directly with Computershare Trust Company, N.A., by calling (800) 490-1493. Stockholders residing outside the United States, Canada and Puerto Rico should call (781) 575-2694.

IBM on the Internet

Topics featured in this Annual Report can be found on the IBM home page on the Internet (www.ibm.com). Financial results, news on IBM products, services and other activities can also be found at that address.

IBM files reports with the Securities and Exchange Commission (SEC), including the annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and any other filings required by the SEC.

IBM's website (www.ibm.com) contains a significant amount of information about IBM, including the company's annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and all amendments to those reports as soon as reasonably practicable after such material is electronically filed with or furnished to the SEC (www.ibm.com/investor). These materials are available free of charge on or through our website.

The public may read and copy any materials the company files with the SEC at the SEC's Public Reference Room at 100 F Street, NE, Washington, DC 20549. The public may obtain information on the operation of the Public Reference Room by calling the SEC at (800) SEC-0330. The SEC maintains an Internet site (www.sec.gov) that contains reports, proxy and information statements, and other information regarding issuers that file electronically with the SEC.

IBM Investor Services Program

The Investor Services Program brochure outlines a number of services provided for IBM stockholders and potential IBM investors, including the reinvestment of dividends, direct purchase and the deposit of IBM stock certificates for safekeeping. Call (888) IBM-6700 for a copy of the brochure. Investors residing outside the United States, Canada and Puerto Rico should call (781) 575-2727.

Investors with other requests may write to: IBM Stockholder Relations, 1 New Orchard Road, Armonk, New York 10504

IBM Stock

IBM common stock is listed on the New York Stock Exchange, the Chicago Stock Exchange, and outside the United States.

Stockholder Communications

Stockholders can get quarterly financial results, a summary of the Annual Meeting remarks, and voting results from the meeting by calling (914) 499-7777, by sending an e-mail to infoibm@us.ibm.com, or by writing to International Business Machines Corporation, 1 New Orchard Road, M/D 325, Armonk, New York 10504.

Annual Meeting

The IBM Annual Meeting of Stockholders will be held on Tuesday, April 30, 2013, at 10 a.m. in the Von Braun Center, 700 Monroe Street SW, Huntsville, Alabama.

Literature for IBM Stockholders

The literature mentioned below on IBM is available without charge from:

Computershare Trust Company, N.A., P.O. Box 43078, Providence, Rhode Island 02940-3078 (888) IBM-6700

Investors residing outside the United States, Canada and Puerto Rico should call (781) 575-2727

The company's annual report on Form 10-K and the quarterly reports on Form 10-Q provide additional information on IBM's business. The 10-K report is released by the end of February; 10-Q reports are released by early May, August and November.

An audio recording of the 2012 Annual Report will be available for sight-impaired stockholders in June 2013.

The IBM Corporate Responsibility Report highlights IBM's values and its integrated approach to corporate responsibility, including its innovative strategies for transforming communities through global citizenship. The Report Summary is available in printed form and downloadable at www.ibm.com/responsibility. The full Corporate Responsibility Report is online with downloadable sections at www.ibm.com/responsibility.

General Information

Stockholders of record can receive online account information and answers to frequently asked questions regarding stockholder accounts on the Internet (www.ibm.com/investor). Stockholders of record can also consent to receive future IBM Annual Reports and Proxy Statements online through the Internet at this site.

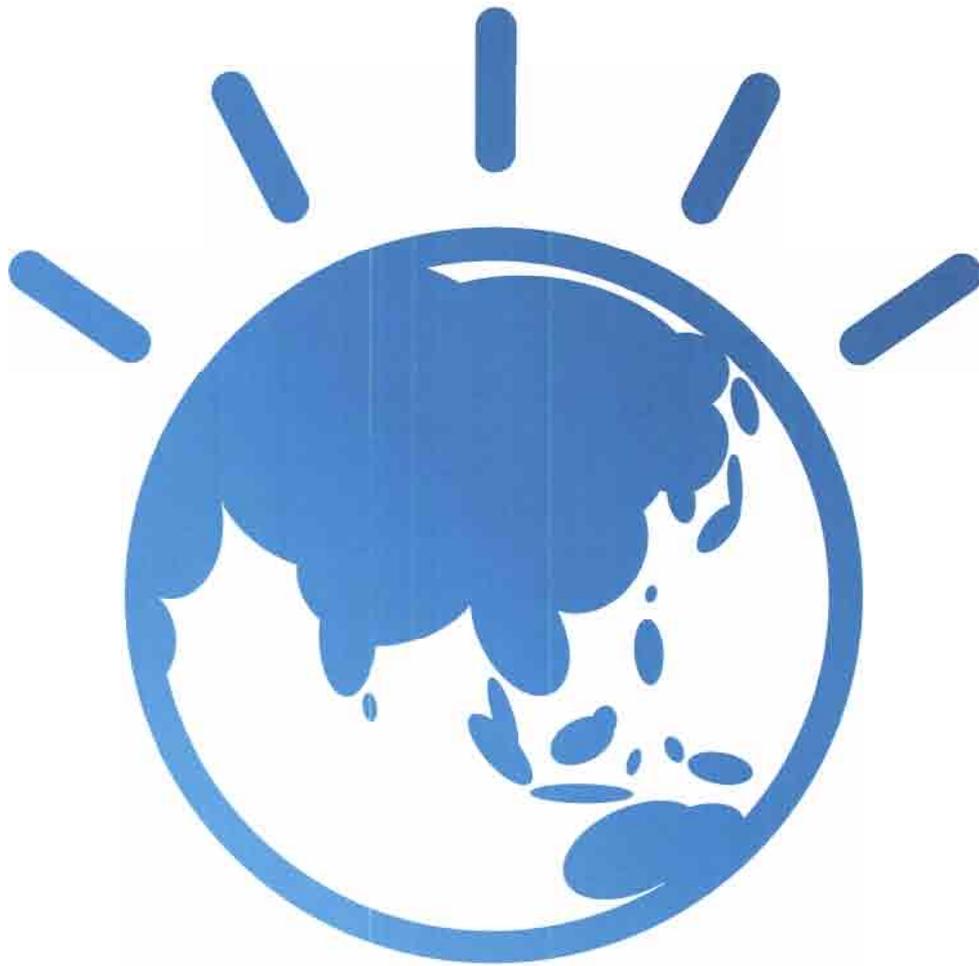

For answers to general questions about IBM from within the continental United States, call (800) IBM-4YOU. From outside the United States, Canada and Puerto Rico, call (914) 499-1900.

TRIRIGA Training Course Map

General Web-Based Training (WBT)

Overview and Navigation (WBT)

Description:

The Overview and Navigation web-based training course covers navigating through the TRIRIGA system and highlights most of the system's basic user interface features, forms, fields, naming conventions and icons.

Duration:

2 hours

Audience:

All TRIRIGA users

Prerequisites:

None

General Reporting (WBT)

Description:

The General Reporting web-based training course covers how to navigate, run and edit base product and customized reports. Users will learn how to navigate to, and filter through, the available base product and customized TRIRIGA reports, how to run and export reports, how to copy frequently used reports into their My Reports tab, and how to edit copied reports.

Duration:

2 hours

Audience:

All TRIRIGA users

Prerequisites:

Overview and Basic Navigation (WBT)

Instructor-Led Training (ILT)

Introduction to TRIRIGA (ILT)

Description:

The Introduction to TRIRIGA course provides end-users with an overview of TRIRIGA and the key functionalities of the application as utilized by the organization and an introduction to business processes that govern the use of TRIRIGA. Specific course topics include Application Features, Portfolio Management, Contract Administration, Entering Work Into TRIRIGA, Work Requests and Work Tasks, Maintenance and Sustainability, Project Management, TRIRIGA Quality Control, Reporting, and TRIRIGA Support and Resources.

Duration:

4 hours

Audience:

All TRIRIGA Users

Prerequisites:

- Overview and Basic Navigation (WBT)
- General Reporting (WBT)

Portfolio (ILT)

Description:

In the Portfolio course, users receive an overview of the primary components of the TRIRIGA application to include facilities, real estate, projects, and operations. Users learn how to create and revise Location data including property, building, land, structure and floors. Instruction is provided on how to access and use the Organization, People and Location data of TRIRIGA. Users also learn how to submit portfolio records for approval and how to process returned records.

Duration:

1 day

Audience:

Users responsible for creating, approving, or retiring any records within the TRIRIGA system (Most users should complete this course.)

Prerequisites:

- Overview and Basic Navigation (WBT)
- General Reporting (WBT)

Lease Management (ILT)

Description:

In the Lease Management course, users learn how to create and manage real estate lease obligations with TRIRIGA giving emphasis on storing contract documentation, conditions, clauses, options, and financial transactions in one comprehensive repository. Users learn to set up automated notifications and alerts about upcoming critical dates including lease expirations, required actions, and contract options to avoid overpayment, late fees, and missed opportunities. Users also learn how to create, revise, expire and terminate leases and the associated clauses, and the Rent Reconciliation process is explained.

Duration:

1 day

Audience:

Users responsible for capturing lease related information for all non-owned facilities

Prerequisites:

- Overview and Basic Navigation (WBT)
- Portfolio

Project Management (ILT)

Description:

The Project Management course teaches users how to create capital and non-capital projects, submit the projects for Quality Control, create schedules, import and export schedules, create potential change orders, and create change orders and risks. Users also learn how to submit percent of completion for capital projects, complete Substantially Complete Forms and complete non-capital projects.

Duration:

2 days

Audience:

Individuals within the organization that create, manage, approve, and/or complete capital and/or non-capital projects

Prerequisites:

- Overview and Basic Navigation (WBT)
- Portfolio (ILT)

Task and Building Equipment Management (ILT)

Description:

In this course, users are introduced to functionality in TRIRIGA necessary to manage all aspects of the operations and maintenance of building equipment and the real property portfolio. Users learn about the portfolio objects like Specifications, Assets and Work Procedures necessary in managing maintenance operations. They also learn how to create building equipment assets together with any warranties or permits. The other main areas covered in depth are demand maintenance, including work requests and tasks (work orders) and planned (preventive) maintenance.

Duration:

1 day

Audience:

This course is recommended for all project managers, environmental specialists and any individuals within any PMOs or Offices that manage deficiencies/opportunities, execute maintenance, and/or perform environmental mitigation measures.

Prerequisites:

- Overview and Basic Navigation (WBT)
- Portfolio (ILT)

Facility Metrics and Costing (ILT)

Description:

In this course users are introduced to the concepts and functionality in TRIRIGA necessary to manage critical information needed to track and provide a quantifiable index to understand the condition of the real property portfolio. Specifically they learn about the importance of Facility Condition Assessments and the Facility Condition Index. They will also learn to create Building System Items and enter the values necessary to drive the condition and risk indices. The users will also create and manage opportunities together with the associated opportunity costing functions and run analysis based on the data input. Finally they will learn the reports that can be generated to determine the condition of a building, property or the entire portfolio.

Duration:

1 day

Audience:

Project Managers
Environmental Users
Energy Audit Users

Prerequisites:

- Overview and Basic Navigation (WBT)
- Portfolio (ILT)

TRIRIGA for Supervisors (ILT)

Description:

In this course, supervisors are given an overview of TRIRIGA and the tools for monitoring projects and overseeing Real Property records. Particular emphasis is placed on the areas of TRIRIGA that can aid supervisors in their roles as stewards of the organization's resources and leaders responsible for carrying out the organization's mission. Specific course topics include the supervisory tools on the Home Portal, Portfolio hierarchies, locating and viewing contracts (including Leases, Warranties/Permits, Space Use Agreements, Service Agreements, Blanket Purchase Orders), viewing project information, finding sustainability and energy data, viewing maintenance actions, identifying and assigning tasks, the quality assurance process and general reports.

Duration:

1 day

Audience:

Facility Managers

Prerequisites:

- Overview and Basic Navigation (WBT)
- General Reporting (WBT)

Advanced Reporting (ILT)

Description:

In this course, users move beyond the basics of running reports in TRIRIGA and explore several advanced reporting capabilities. Users learn how to run and edit reports from the base product, and how to create and run customized reports. Users will also learn how to export reports, and how to copy frequently used reports to their My Reports tab and then edit them for their specific needs.

Please Note: Advanced Reporting is a technical course and requires that attendees have a solid foundation in the various areas of TRIRIGA.

Duration:

1 day

Audience:

Report Writers

Prerequisites:

- Overview and Basic Navigation (WBT)
- General Reporting (WBT)

Web-Based Training (WBT)

Budget Formulation (WBT)

Description:

The Budget Formulation WBT teaches users how to; create formulation projects, associate active facility projects to a formulation project, associate one formulation requirement to another formulation requirement and how to run the Budget Formulation Report. Users also gain an understanding of how the budget formulation process works in TRIRIGA.

Duration:

2 hours

Audience:

Individuals within organization's PMOs/Offices that create budget formulation records and individuals within the organization's Budget Office.

Prerequisites:

- Overview and Basic Navigation (WBT)
- Portfolio (ILT)

Percent of Completion and Monthly Project Review (WBT)

Description:

The Percent of Completion/Monthly Project Review WBT covers how to review, modify, approve, and return technical percent of completion submissions as well as processing monthly capital project reviews.

Duration:

2 hours

Audience:

Individuals who review and modify submitted technical percent of completions for active capital projects and/or participate in the Monthly Capital Project Review to ensure that planned end dates are correct.

Prerequisites:

- Overview and Basic Navigation (WBT)
- Portfolio (ILT)
- Project Management (ILT)

Pre-PMO Reviewer (WBT)

Description:

The Pre-PMO Reviewer WBT covers how to technically review, approve and/or return requests to activate location and lease records, as well as tips and best practices to ensure data integrity and validity. In order for locations (property, building, floor, structure, land) and leases to be activated in TRIRIGA to go to SAP, they must be approved by a PMO Pre-Reviewer. A PMO Pre-Reviewer document is used to facilitate the lesson.

Duration:

2 hours

Audience:

Pre-PMO Reviewers

Prerequisites:

- Overview and Basic Navigation (WBT)
- Portfolio (ILT)
- Project Management (ILT)

Projects (WBT)

Description:

The Projects WBT provides instructions for creating a project, applying a cost code template and submitting the project for quality control. Participants will learn how to update the Plan End Date, submit a technical percent of completion and submit a Substantially Complete Form for capital projects. This is a condensed version of the instructor-led project course and provides the essentials for creating, managing and completing a project in TRIRIGA.

Duration:

2 hours

Audience:

Individuals within the organization that create, manage, approve, and/or complete capital and/or non-capital projects.

Prerequisites:

- Overview and Basic Navigation (WBT)
- Portfolio (ILT)
- Project Management (ILT)

QC and Substantially Complete (WBT)

Description:

The Quality Control WBT covers how to review, approve and return requests to quality control projects as well as how to review, approve and return Substantially Complete Forms. In order for projects in TRIRIGA to go to SAP they must be quality controlled. If projects are not in SAP, purchase requisitions and purchase orders cannot be entered into SAP. A Quality Control Guidance document will be used to facilitate the Quality Control lesson.

Duration:

2 hours

Audience:

Individuals who conduct quality control reviews of projects and/or review and process Substantially Complete Forms.

Prerequisites:

- Overview and Basic Navigation (WBT)
- Portfolio (ILT)
- Project Management (ILT)

Self-Service (WBT)

Description:

In this course, users are introduced to the TRIRIGA Self Service User's Home Portal for creating, managing and viewing requests, and to the TRIRIGA Portfolio module for viewing geographies, locations, organizations, people, and building equipment assets. Users then learn how to create a facilities request for maintenance, repairs, operations or environmental issues for themselves or behalf of another requestor or location. The user also learns how to revise or update a request and how to add attachments such as a photo of the problem or an estimate for repair.

Duration:

2 hours

Audience:

Self-Service Requestors

Prerequisites:

- Overview and Basic Navigation (WBT)

Proposal to Provide Nebraska Medicaid Eligibility and Enrollment Solution

Prepared for:

State of Nebraska Administrative Services
Material Division Purchasing Bureau

Submitted in Response to RFP: 4544Z1
January 21, 2014

Prepared by: Wipro LLC

– ORIGINAL –

Technical Proposal Volume 3 of 3
(APPENDIX – B, C, D)

The Functional Requirements Traceability Matrix (RTM) is used to document and track the project requirements from the proposal through to testing to verify that the requirement has been completely fulfilled. The Contractor will be responsible for maintaining the set of Baseline Requirements directly related to the configuration of the EES. Additions, modifications, and deletions to these requirements will be added and modified throughout the project so it is imperative that a current version of the matrix be maintained at all times.

Bidders must provide an initial RTM as part of its proposal. The RTM shall follow the instructions below. The Bidder must state requirements exactly as they are provided in this RFP. The Bidder must indicate how it will achieve full compliance (i.e., requirement fulfilled 100%). Any requirements that the Bidder cannot attest to full compliance must be documented as outlined in Appendix D: Gap Analysis.

Bidders are required to provide a response, using the appropriate codes provided in the tables below, for each requirements listed in the Functional Requirements Response Matrix. Scoring for each requirement will directly relate to the Ability Code indicated by the Bidder.

Ability Code	Condition	Description
S	Standard Function	The proposed EES fully satisfies the requirement as stated. The Bidder must describe how the requirement is satisfied by the EES.
W	Workflow or System Configuration Required	Current functionality of the proposed EES exists in the EES and can be modified by a system administrator to meet this requirement. The Bidder must describe how the requirement will be satisfied.
M	Modification Required	The proposed EES requires a modification to existing functionality to meet this requirement which requires a source code modification. The EES will be modified to satisfy the requirements as stated or in a different format. The Bidder must describe the modifications. If the modification requires 1000 or more hours the Bidder must also complete Appendix D Gap Analysis.
F	Planned for Future Release	This functionality is planned for a future release. The Bidder must describe how the requirement will be satisfied by the EES and when the release will be available.
C	Custom Design and Development	The proposed EES requires new functionality to meet this requirement which requires a source code addition. The Bidder must describe the feature and its value. If the custom design and development requires 1000 or more hours the Bidder must also complete Appendix D Gap Analysis.
N	Cannot Meet Requirement	The proposed EES will not satisfy the requirement. The Bidder must explain why the requirement cannot be satisfied. The Bidder must complete Appendix D Gap Analysis.
O	Other Software	If the requirement is to be satisfied through the use of a separate software package(s), the Bidder must identify those package(s) and describe how the functionality is integrated into the base system.

General Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
GEN 001	The EES shall be branded using official State of Nebraska and Nebraska Department of Health and Human Services logos, images, etc.	W	Cúram is an ADA compliant web based solution using Web 2.0 technologies. For look and feel Cúram uses Cascading Style Sheets (CSS) which separate presentation from content. By configuring the out-of-the-box CSS files, the SmartPro MedEE portals will be branded using State of Nebraska and Nebraska DHHS logos and images.
GEN 002	The EES shall provide customized local office information, through public-facing front-end (i.e. physical location of nearest local office, driving directions and name, email and phone number).	S	Cúram provides the Department with a public-facing portal, pre-integrated with the wider SmartPro MedEE. This public-facing portal provides the user with local office information, searched by zip code, including contact information (address, phone, etc.), which can further be used to obtain driving directions and locale information.
GEN 003	The EES shall ensure alignment with HIPAA security, privacy and transaction standards	S	The SmartPro MedEE solution supports applicable industry standards for eligibility and enrollment, including HIPAA security, privacy and transaction standards. The SmartPro MedEE solution involves numerous processes involving the transmission of personal information. Privacy and security are major concern while transmitting the personal data of the consumer regarding their eligibility and enrollment. The SmartPro MedEE solution includes role-based security, enabling strict compliance with HIPAA standards.

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
GEN 004	The EES shall implement and support functionality to meet the requirements of the Affordable Care Act (ACA) and achieve compliance deadlines.	S	IBM Cúram for Medical Assistance is an established COTS solution for State Medicaid and CHIP Systems that has evolved in line with the ACA. Among the functionality available, new Medicaid categories (expanded Medicaid) have been introduced, existing categories collapsed, the streamlined application process has been introduced, prebuilt integration with the Federal Hub for verification purposes, introduction of the simplified Modified Adjusted Gross Income (MAGI) standard, and the calculation of Advanced Premium Tax Credits (APTC)/Cost Sharing Reductions (CSR). This prebuilt and pre-integrated solution is a key reason that a Cúram based solution will support the State in achieving the required compliance deadlines.
GEN 005	The EES shall assure that all processes, user interfaces and documents produced by the system meet applicable State and federal accessibility standards for the life of the contract.	S	The SmartPro MedEE solution, based on Cúram's ADA compliant web based solution, meets applicable State and Federal accessibility standards for all processes, user interfaces and documents produced by the system. Cúram-based portals are designed to be accessible so that persons with disabilities can use these portals effectively. Cúram-based portals conform to both the US Federal Section 508 requirements for accessibility for persons with disabilities and the Americans with Disabilities Act (ADA). Accessibility testing is an important element of the continual testing of the Cúram solution. A dedicated team focused only on accessibility testing using the World Wide Web Consortium (W3C) Web Content Accessibility Guidelines 2.0 (WCAG 2.0). As part of the Cúram product development process, new features are continually evaluated and tested using WCAG. These guidelines are an integral part of the Cúram product development process and provide a basis for designing accessible software solutions.

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
GEN 006	The EES shall separate business rules from the application logic. Business rules will be contained in a COTS rules engine.	S	The SmartPro MedEE solution includes the Cúram Expressive Rules (CER) COTS rules engine. CER rules, ultimately saved as XML, are saved and maintained separate from the main application. The web based CER Rules Editor enables dynamic creation and maintenance of CER logic in the runtime application. IBM Cúram for Medical Assistance comes with prebuilt CER eligibility rules for all supported Medicaid categories, including MAGI rules and APTC and CSR calculation rules.
GEN 007	The EES shall provide a scalable solution to allow for the incorporation of shared eligibility determination rules to support the State's phased approach.	S	The phased/incremental deployment of functionality enables the Department to support an increasing number of programs over time, on the single SmartPro MedEE. An important part of achieving this is the ability to deploy and reuse common eligibility and entitlement calculation rules. CER rules support the sharing of rules through the creation and use of common rules within and across programs. 'Common' rules can be referenced or called from higher level rules. CER XML rules enable the definition of common rules once, and then the calling of these common rules from many locations.
GEN 008	The EES will facilitate a "no wrong door" approach to insurance coverage as required in the ACA. The EES will accept account/application transfers to/from the Exchange to seamlessly facilitate eligibility determination for all Insurance Affordability Programs.	S	The SmartPro MedEE solution supports a No Wrong Door approach to insurance coverage by providing a web based portal for clients through which they can apply for State-based and Exchange-based Insurance programs, a web based portal for agency workers and call center workers to enable State workers to assist clients in obtaining insurance coverage, and the necessary web services to enable account/application transfers between the Federally Facilitated Marketplace (FFM) and SmartPro MedEE. All 'doors' connect back to the SmartPro MedEE application which is the system of record for all eligibility and entitlement decisions.

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
GEN 009	The EES will allow applications and renewals via all ACA required media. E.G. Paper, online, phone, fax, in person and other commonly available electronic means.	M	<p>The SmartPro MedEE solution supports application and renewals through all ACA required channels.</p> <p>1) Paper applications received in person, through the post for via fax will be scanned and OCR'ed. The electronic image will be saved in the Document Management System. The OCR process will trigger a workflow which will attempt to process the application automatically and without agency worker intervention. Where agency worker intervention is required, due to missing data, or inability to validate the data, the workflow will notify one or more agency workers that the application needs attention. The agency worker will examine the attached OCR data and image, make the necessary updates, and submit the application for further automatic processing. This process will repeat until the application is successfully processed, and eligibility is determined.</p> <p>2) Applications received online will be processed in a similar manner, with the exception that the consumer themselves will be notified of missing data or missing validations, thus putting the responsibility on the consumer to complete the application to the required level and removing this work from agency workers.</p> <p>3) Applications received over the phone will be accepted and entered by the call center worker. These applications will be processed as above, with the call center worker entering the application data.</p> <p>Workflow configuration and integration effort will be required to connect the scanning solution to the Cúram workflow solution through the ESB, to trigger the above straight through processing.</p>

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
GEN 010	The EES shall leverage existing systems (where appropriate) and is built on system architecture that is scalable, flexible, modular and dynamic.	S	The SmartPro MedEE solution is built on a system architecture that is scalable, flexible, modular and dynamic. Scalability and flexibility are inherent in the SmartPro MedEE in support of the gradual introduction of multiple programs; Cúram has been designed from the ground up to support multiple programs, over time, on a single instance. Beyond this, scalability and flexibility are fundamental capabilities of the overall infrastructure, platform and hardware proposed.
GEN 011	The EES shall leverage connections to the federal data hub to access and verify data from participating agencies such as the IRS, federal DHHS, the Department and others. Hub – Required State - Required Financial Institutions- Future	M	A unique feature of IBM Cúram for Medical Assistance is prebuilt integration with the Federal Hub and prebuilt hooks to enable integration with other systems, such as State systems, for the verification of application data. Once the required State system interfaces are available, they will be connected to SmartPro MedEE through the ESB to these prebuilt hooks.
GEN 012	The EES shall achieve the necessary degree of interoperability between technology components to determine eligibility for Medicaid or CHIP or if the customer is not eligible for Medicaid a transfer to the FFM.	S	The SmartPro MedEE solution consists of technology components that together support the required determination of eligibility for expanded Medicaid, CHIP and Insurance Assistance Programs. Where a customer is eligible for Insurance Assistance their account and application data is transferred to the FFM.
GEN 013	The EES shall support a timed release schedule.	S	As part of our standard project initiation activities, the Wipro IBM team will work with the Department to develop acceptable release schedules, starting with the original implementation, and continuing throughout the Operations & Maintenance period. Time-boxing of non-critical changes is crucial to minimizing both risk and disruption.

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
GEN 014	The EES shall support all Nebraska DHHS Medicaid programs.	W	SmartPro MedEE will support eligibility determination for all of the Department's Medicaid programs (MAGI and non-MAGI). Configuration will be required to support Nebraska non-MAGI specific programs not provided out-of-the-box with IBM Cúram for Medical Assistance and to introduce State limits and rules to those programs that are provided out-of-the-box with IBM Cúram for Medical Assistance. This gap is documented in the contained worksheet "NE Medicaid Programs". Refer to ELG 031.
GEN 015	The EES shall allow business users, as determined by the Department, to easily read/modify the eligibility determination rules.	S	The Cúram Express Rules (CER) editor enables business users to view rules diagrams which present the rules logic in graphical form. Business users can also use this editor to create new rules and enhance/modify existing rules.
GEN 016	The EES shall support client facing services and documents in English and Spanish languages.	S	The SmartPro MedEE user interface is provided by Cúram portals. The Cúram user interface supports multiple languages, including English and Spanish. Document templates will be available in English and Spanish.
GEN 017	The EES shall screen for language needs (LEP) at first point of contact	S	The Plain Writing Act of 2010 requires agencies to write clear communication that the public can understand and use. IBM Cúram Universal Access provides a SmartPro MedEE public-facing portal based on a sixth grade reading level. This public-facing portal can be further tailored to meet the specific language proficiency levels desired by the State. IBM Cúram Universal Access includes an extensive help function that provides detailed explanations of new and non-basic terminology.

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
GEN 018	The EES shall provide functionality to interface with Multi-channel Workforce Management software, such as Verint.	M	In general, the Cúram application and its underlying ESB capability provide the framework to implement interfaces with minimal effort. However, actual interfaces require requirements and technical specification to fully determine scope, time, and cost.
GEN 019	The EES shall have the ability to schedule staff performing call center functions, back office functions, local office appointments, and be integrated with task manager.	M	A worker can input and maintain activities on users' calendars in support of a scheduling function. Modification effort required to integrate with SmartPro MedEE Workflow (i.e. task manager).
GEN 020	The EES shall have the ability to interface with the quality management system.	M	This requirement will be fulfilled through linkage via SmartPro MedEE's ESB, IBM's Integration Bus.
GEN 021	The EES shall have the ability to interface with the LINKS Performance Management and Training System.	S	Training courses developed for SmartPro MedEE will interface with the State's LINKS LMS using industry standard LMS protocols.
GEN 022	The EES should have the ability to measure case review and customer service contact review. It should utilize a scorecard or similar tool to provide feedback down to staff level.	W	Customer Satisfaction Surveys will be managed using Survey Monkey Enterprise Edition, allowing unlimited surveys, and PHI/HIPAA compliant protection. See PRT 014.
GEN 023	The EES shall have the ability to interface with the NE Financial and Accounting system.	W	Cúram will integrate with other systems, through its ESB. For financial and accounting systems, it will interface at the Financial Instruction Line Item (ILI) level.
GEN 024	The EES shall accommodate phone application voice signature mechanism.	M	The SmartPro MedEE will support the capture of voice signature (phone). Modification effort required to expose integration points with required devices. Effort for Cúram web service against GEN026. Also see ELG036.

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
GEN 025	The EES shall validate and return address information errors as entered in the system.	M	All addresses entered in SmartPro MedEE are first checked for data format consistency such as field length and regular expression compliance. Addresses are subsequently validated for accuracy and dynamic correction using Pitney-Bowes Spectrum Universal Addressing Module.
GEN 026	The EES shall provide functionality to allow applicants to provide a signature via all ACA required modes of application.	M	The SmartPro MedEE will support the capture of voice signature (phone), signature pad signing (office), and web based acceptance (the user will select a checkbox when logged in). Modification effort required to expose integration points with required devices. Related to requirements GEN024, ELG034, ELG035, and ELG036.
GEN 027	The EES shall provide free-form narrative notes capabilities with no character limit, wrap-around text, sortable and searchable.	S	SmartPro MedEE supports free-form rich-text narrative notes with no character limits. When notes text is entered beyond the width of the input field, the text automatically wraps around onto the next line. Notes can be associated with new applications, ongoing cases, individuals and households. Notes are sortable by subject, date, status, user and priority. Browser search capability supports word search for a displayed note or notes.
GEN 028	The EES shall auto-populate notes based on predefined business rules.	S	Notes can be pre-populated and auto-created. Workflow logic can determine when to auto-populate a note and what text should be included.
GEN 029	The EES shall provide templates for notes entry.	M	SmartPro MedEE supports free-form rich-text narrative notes with no character limits. Enforcing template rules will require a modification.
GEN 030	The EES shall provide mechanism to spell-check notes.	W	Spell checking of notes is supported through browser capabilities such as iespell or Firefox spell checker. Configuration is required to enable spell checking on notes.

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
GEN 031	The EES shall provide mechanism to associate notes to multiple beneficiary/households without retyping.	S	Notes can be associated with multiple beneficiaries indirectly as notes entered on a case containing a household of people will be related to everyone in the household. Support is also provided to copy and paste notes between beneficiaries and cases.
GEN 032	The EES shall provide a mechanism to automatically date/time stamp all notes.	S	All creation of notes, and updates to existing notes, are date/time stamped.
GEN 033	The EES shall provide a mechanism for eligibility workers to edit their own notes with appropriate audit trails.	S	Updates to existing notes create an audit trail containing the original note plus all date/time stamped updates to that note.
GEN 034	The EES shall provide a mechanism for all system events, including system, user and administrative actions to be auditable.	S	SmartPro MedEE supports configurable audit events. An administrator can decide what events whether user, system or admin initiated should be audited.
GEN 035	The EES shall provide a mechanism to restrict notes from being edited after the initial entry.	S	Notes, once entered, will not be updated in place. Updates to existing notes create an audit trail containing the original note plus all date/time stamped updates.
GEN 036	The EES shall allow for any data element to be exported into an industry standard format.	M	Most data can be directly exported into common industry standard formats; however, some elements will require customization to expose the data from the application. Using BI functionality (Cognos), DataMart elements can also be exported. See IER 029

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
GEN 037	The EES shall allow applicant/beneficiaries to self-report changes in their personal information online, notify the appropriate eligibility worker based on parameters described by the Department when changes are made	W	<p>Life Events (e.g. change in address, change in marital status) enable consumers to self-report changes in personal information online. A Life Event consists of a configurable script of questions. Once complete the answers are associated with any ongoing eligibility cases for that consumer. SmartPro MedEE can be configured to automatically accept life event data submitted through the on-line portal, re-run eligibility rules and have a direct and immediate impact on eligibility. A case worker can be notified of what has occurred.</p> <p>Alternatively SmartPro MedEE can be configured to link the incoming data to the eligibility case and inform a user, group of users, or work queue that this data has been submitted. A user can then examine the incoming data and decide to accept or reject the changes. If changes are accepted, the eligibility rules are re-run and the eligibility status is updated.</p> <p>Some configuration will be required to cater for all required Nebraska change types.</p>
GEN 038	The EES shall re-determine eligibility when a Change of Circumstance is received electronically or entered by a worker.	S	<p>When a Change of Circumstance is received, SmartPro MedEE logic will first calculate what time period is affected by the new data received (which could be past, current or future), it will then load the eligibility rules and rates that apply for that period of time (could be multiple effective dated instances) and any other data needed that was valid during the time period. SmartPro MedEE will then re-run all eligibility rules that apply over the calculated time period, resulting in new eligibility determinations for all programs impacted.</p>

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
GEN 039	The EES shall provide the capability to view the new determination of eligibility after the change in information.	S	SmartPro MedEE maintains a history of all eligibility determinations made on a case. The newest eligibility determination for a period of time will be made immediately available to the user. If there are previous eligibility determinations for that period of time, the user will be able to access all previous determinations as needed. An eligibility determination presents a detailed and organized description of the main facts that the eligibility rules determined.
GEN 040	The EES shall place an individual from one program into another, based on a Change of Circumstance or eligibility rules, without affecting other individuals in that household.	S	When eligibility rules are initially run due to a new application for assistance, or when they are re-run due to a change in circumstance (or due to a rules change), SmartPro MedEE will always place individuals into the correct (optimal) programs. If due to a change in circumstance (e.g. Income change) the eligibility determination for the individual or for the entire household, changes, SmartPro MedEE will place the household members into the correct program(s), from an eligibility point of view. In other words if income decreases, it would be more beneficial for the consumer to be considered under Medicaid than under a subsidized insurance assistance program. Over time a history of program eligibility is maintained for all beneficiaries.
GEN 041	The EES shall provide the capability to track and record any changes to an individual's information.	S	SmartPro MedEE maintains all individual data in an effective dated manner. Changes to individual data will never overwrite existing data. Rather the new data will join a timeline of data that SmartPro MedEE maintains for the individual.
GEN 042	The EES shall provide a mass change capability by a non-technical user to affect all or part of the Department caseload for any or all programs.	S	A non-technical user can be authorized to make changes such as eligibility rules changes, or rates changes that can affect all or a large proportion of program eligibility cases. To ensure that such mass changes happen in a controlled manner without impacting online performance, these requests are designed to either run in batch, or if preferred, asynchronously on-line on separate dedicated hardware.

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
GEN 043	The EES shall allow authorized users to update, add persons, and relationships to an existing household and maintain a history thereof.	S	SmartPro MedEE, based on IBM Cúram for Medical Assistance, maintains individual and household information. The SmartPro MedEE user can add new people to a household, maintain or remove existing people in a household, and also maintain a list of relationships between all individuals in a household. Any modifications made to a household are done in an effective dated manner, thus maintaining a history of all changes made. Related to requirement GEN 086.
GEN 044	The EES shall close eligibility to a program without closing other programs associated with that household or individuals in the household.	S	When eligibility rules are re-run due to a change in circumstance, SmartPro MedEE will always assign individuals to the correct (optimal) programs. Moving an individual from one program to another, due to a change in circumstances, will result in ending (or closing) eligibility for the first program and starting eligibility on another. Only the eligibility for affected household members is updated. The eligibility for non-affected household members will remain the same.
GEN 045	The EES shall change the status of any individual in a household without terminating eligible household members.	S	When eligibility rules are re-run due to a change in circumstance, SmartPro MedEE will always assign individuals to the correct (optimal) programs. If a change in circumstances results in one or more individuals being no longer eligible for any insurance assistance (Medicaid, subsidy, etc.), only the eligibility situation for those affected individuals is impacted. Other eligibility household members will be unaffected.

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
GEN 046	The EES shall provide web-based functionality to allow the applicant to renew and initially apply for eligibility online.	M	The SmartPro MedEE solution will enable the consumer to apply for eligibility online. "Cúram for Medical Assistance" provides online application functionality out-of-the-box. SmartPro MedEE will also support applicant renewal online. Modification is required to allow the beneficiary to renew online. The renewal process will reuse a significant portion of the initial application process, pre-populating the application script with data already in the system.
GEN 047	The EES shall allow for renewals via all ACA required modalities.	M	Modification is required to enable the consumer to renew online. The renewal process will reuse a significant portion of the initial application process, pre-populating the application script with data already in the system. Renewal through other channels (phone, face-to-face, post, and fax) is supported through the out-of-the-box agency worker renewal functionality.
GEN 048	The EES shall accept a renewal prior to the 12 month renewal date. The renewal period may vary by case/household/individual and program.	S	The SmartPro MedEE solution will not restrict when a renewal can be submitted. Any future dated updates received will be maintained on SmartPro MedEE and will only take affect from the date indicated. Different renewal periods are supported across case, household, individual and program.
GEN 049	The EES shall track and allow beneficiaries who did not return the pre-populated renewal form or the required documentation and are terminated on that basis a reconsideration period, as defined the Department, when the Department would reconsider eligibility without a new application and renew eligibility if necessary information is provided.	W	The SmartPro MedEE solution allows for cases that are closed to be reopened, and for program eligibility to be renewed. No limit is enforced out-of-the-box. Ensuring that a time limit can be enforced will require rules configuration changes.
GEN 050	The EES shall allow an individual who regains coverage during the reconsideration period, retroactive coverage back to date of termination.	S	When eligibility is renewed in the reconsideration period, eligibility will be retroactive back to the date of eligibility termination.

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
GEN 051	The EES shall automate the renewal process if all information remains the same or if verified information remains within applicable limits.	M	SmartPro MedEE will automate the renewal process where data does not change or remains within applicable limits. Effort required to support 'applicable limits'.
GEN 052	The EES shall integrate with various systems within the State for the purpose of data sharing, eligibility determination and data verification (i.e. incarceration, Unemployment Insurance benefits, child support income, State wage information)	M	SmartPro MedEE supports integration with other systems, through its underlying ESB capability. Specific interfaces require minimal amounts of code and configuration work.
GEN 053	The EES shall adjust eligibility determination resulting from appeal.	S	When an Appeal results in a change in the prior eligibility determination results, a new eligibility determination will be calculated and applied. A history of all eligibility determinations is maintained.
GEN 054	The EES shall notify the applicant/beneficiary, electronically and via paper, of adjusted eligibility within 30 days of the adjustment, regardless of the reason for the eligibility adjustment.	M	The SmartPro MedEE shall trigger a notification when eligibility changes. This can be done on the same day that the new eligibility determination is calculated. Effort required to support a Nebraska 'adjusted eligibility' notification. Similar to requirements: ELG 037, ELG 070, APP 042, NOT 017.
GEN 055	The EES shall track timeframes and deadlines of the appeal process and alert a worker or management of overdue status.	S	Configured Milestones are used to track timeframes and deadlines in SmartPro MedEE. Workflow logic associated with these milestones will alert users, groups of users or work queues of approaching and past deadlines.
GEN 056	The EES shall allow a worker to view appeal progress/status to report back to the applicant/beneficiary.	S	The SmartPro MedEE tracks appeal progress/status. Authorized workers can view a history of progress on the appeal, including the current appeal status, at any time.

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
GEN 057	The EES shall support an integrated and customizable applicant complaint and grievance process, with reporting capabilities.	S	The SmartPro MedEE solution, based on IBM Cúram for Medical Assistance, supports an integrated and customizable complaint and grievance process. A complaint or grievance will be tracked in SmartPro MedEE as an 'Issue' case. An Issue case tracks one or more complaints or grievances, a history of all actions taken related to the complaint or grievance, related data in support of the complaint or grievance, and the outcome of the complaint or grievance. Reporting on complaints and grievances is supported by the SmartPro MedEE reporting component.
GEN 058	The EES shall be scalable and flexible enough to accommodate and adapt to changes required by State and/or federal statute, regulation, mandate, decision, or policy without significant changes to the architecture and without impacting the scalability or response times of the system.	S	Scalability and flexibility are supported at the platform level (all proposed hardware and software is highly flexible and scalable) and at the application level. The SmartPro MedEE application is highly extensible both through configuration and modification. A majority of changes required in support of State and/or federal statute, regulation, mandate, decision, or policy, will be catered for through CER rules and Cúram Workflow configuration. Where such changes cannot be satisfied thru configuration, SmartPro MedEE can be extended through modification.
GEN 059	The EES shall incorporate the policy choices and priorities of the Nebraska policymakers.	S	The SmartPro MedEE solution shall incorporate the policy choices and priorities of the Department's policymakers. Due to the flexibility of the IBM Cúram product upon which SmartPro MedEE will be based, required policy choices and priorities will be catered for through out-of-the-box capabilities, configuration or modification. The Cúram product has been designed from the ground up to be extensible through configuration and modification, in such a way that ongoing upgrades to the base product are possible.

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
GEN 060	The EES shall meet the requirements of the RFP and be compliant with MITA 3.0 standards.	S	<p>Cúram is based on a modular Service-Oriented Architecture (SOA) and is compliant with MITA 3.0 standards. Its architecture is compatible with the MITA 3.0 business, technical, and data architecture framework, its business maturity model, and its process and planning guidelines. For example:</p> <ul style="list-style-type: none">• Service-oriented Architecture• Open Technology and Standards• Platform Independence• Security and Privacy• Common Interoperability and Access• Adaptability and Extensibility• Performance Metrics• Cloud Computing <p>Moreover, Cúram provides prebuilt, domain -specific, outcome-focused business processes built on a unified data model. Cúram enables social enterprise agencies, such as the Department, to achieve higher levels of efficiency, and more importantly, effectiveness in their efforts to improve the lives of their citizens.</p>
GEN 061	The EES shall be based on an orientation of business processes, business rules and data and metadata management that allows modular componentized design approach that enhances interoperability across service modules and with external applications and data sources.	S	The SmartPro MedEE SOA based architecture supports a modular and componentized design approach that promotes interoperability with external applications and data sources.

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
GEN 062	The EES shall identify individuals who are dual eligible (Medicare plus federal Medicaid) and determine eligibility for dual-eligibles, as well as for those who are eligible for other Medicare savings programs.	S	SmartPro MedEE, based on IBM Cúram for Medical Assistance, shall identify and determine eligibility for individuals who are dual eligible. SmartPro MedEE will also identify and determine eligibility for individuals who are eligible under the following out-of-the-box Medicare savings programs - Qualified Medicare Beneficiary (QMB), Specified Low-Income Medicare Beneficiary (SLMB), Qualifying Individual (QI), and Qualified Disabled and Working Individuals (QDWI). Support for other Medicare savings programs will be supported through configuration, if required.
GEN 063	The EES shall support secure messaging between the Department and the federal data hub and/or the Connector via federally defined interfaces and Business Service Descriptions.	S	IBM Cúram for Medical Assistance provides prebuilt integration with the Federal Data Services Hub for all services related to 'eligibility', including FFM account transfer interfaces.
GEN 064	The EES shall include workflow management based on whether an applicant is MAGI-based and/or MAGI-excepted households.	S	IBM Cúram for Medical Assistance provides out-of-the-box capabilities that support fit for purpose application capture functionality, data verification functionality and eligibility determination rules for both MAGI-based (adults, parents, children, pregnant women) and MAGI-Excepted (Aged, Blind Disabled, SSI, Long-term care, Medically Needy, etc.) households. Once the applicant and household are identified, SmartPro MedEE will present the correct application(s) based on whether the household members are considered MAGI-based or MAGI-excepted. Once the application is captured and data verified, SmartPro MedEE will execute the correct eligibility determination rules.

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
GEN 065	The EES shall allow individuals in a household to be eligible under different categories and receive different benefits based upon individual information.	S	IBM Cúram for Medical Assistance supports a household whose members are eligible under different categories. For example, a single household could have members that are eligible under Medicaid, under CHIP and under subsidized Insurance Assistance through the FFM, at one point in time. SmartPro MedEE will track what category each person in the household is eligible under.
GEN 066	The EES shall provide the capability to defined and stored DDHS specific data. The ability to use the data to drive workflow or pre-populate forms.	S	Due to the flexibility of the IBM Cúram product upon which SmartPro MedEE will be based, any Department data that is not supported out-of-the-box, can be added to SmartPro MedEE and used for typical system processing such as driving workflow, seeding eligibility decisions, and notifications generation. The IBM Cúram product has been designed from the ground up to be extensible through configuration and modification, including extending the data model, in such a way that ongoing upgrades to the base product are possible.
GEN 067	The EES shall be scalable so that it can identify those applicants that are potentially eligible for express lane eligibility should the Department choose to adopt Express Lane Eligibility Program.	S	Due to the flexibility of the IBM Cúram product upon which SmartPro MedEE will be based, SmartPro MedEE can be enhanced and scaled to support express lane eligibility functionality, should the Department choose to adopt it. ELE functionality will primarily be supported through configuration of the Medicaid eligibility rules.

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
GEN 068	The EES shall provide the capability for presumptive eligibility as defined by the Department and include provider web access for application purposes.	M	<p>The SmartPro MedEE solution will support a presumptive eligibility website for providers to enable provider users to submit medical assistance applications online and to assume eligibility for a period of time. Back office functionality such as presumptive eligibility determination processing, and the necessary workflow logic to track and respond accordingly to deadlines for presumptive eligibility will be included in SmartPro MedEE.</p> <p>Effort will be required for the provider website (to extend Cúram provider capabilities) and to enhance out-of-the-box processing in support of presumptive eligibility.</p>
GEN 069	The EES shall provide a mechanism to define required and optional fields, including default data values as applicable, based on program rules.	S	In the SmartPro MedEE solution, data fields can be specified as mandatory or optional. Data fields can optionally be associated with default data values.
GEN 070	The EES shall provide an alert system to notify workers when action items are assigned, have been completed, or are past due.	S	<p>In the SmartPro MedEE solution, action items are known as Tasks. A task can be assigned to a user, group of users, or work queues. When a workflow process requires a user to perform an action item (the completion of which will progress the workflow), the user will see the task in their inbox, and the user will receive an alert that there is a task awaiting their attention. An alert can take two forms: a notification in the user's list of notifications which is displayed on the user's home page, and/or an email.</p> <p>If a user has a specific interest in an action item, they will receive alerts as and when the action item is completed or past due.</p>
GEN 071	The EES shall manually/automatically assign priority to alerts.	S	In SmartPro MedEE, a task (i.e. an action item) has a priority. SmartPro MedEE can automatically assign a priority to a task. A SmartPro MedEE user can manually set a task priority. The priority of the alert is driven by the priority of the task.

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
GEN 072	The EES shall automatically escalate an alert if not addressed within the time limits.	S	Configured Milestones are used to create and maintain time limits (i.e. deadlines) in SmartPro MedEE. Workflow logic associated with these milestones will alert users, groups of users or work queues of approaching and past deadlines.
GEN 073	The EES shall provide mechanism for supervisors to be able to view alerts for any individual or group.	S	A supervisor can view alerts and tasks for individual users, groups of users and work queues.
GEN 074	The EES shall provide a mechanism to associate and tie alerts to household or applicant/beneficiary and have alerts accessible when household is reviewed.	S	In SmartPro MedEE a task/alert can be associated with an individual or a household case. When the Individual or household is viewed, the user can see a list of associated tasks/alerts.
GEN 075	The EES shall automatically delete alerts when action is taken.	S	When a required action is completed, the related alert/task is automatically logically deleted (its status is set to 'closed'). This removes the item from the SmartPro MedEE user's inbox.
GEN 076	The EES shall manually create, assign, update, change, and delete alerts.	S	SmartPro MedEE enables users to manually create, assign, update, change and delete alerts and tasks.
GEN 077	The EES shall automatically or manually archive alerts when the required action is completed.	S	When a required action is completed, the related alert/task is automatically logically archived (its status is set to 'closed'). This removes the item from the SmartPro MedEE user's inbox.
GEN 078	The EES shall provide a sortable and searchable history of alerts that display all actions taken in regards to that alert.	S	SmartPro MedEE users are provided with sortable lists of alerts (reminders) and tasks (to do items), and the ability to search for tasks of interest. Alerts and tasks are associated with a history of all actions taken in regards to that alert or task.
GEN 079	The EES shall provide a mechanism to indicate that a beneficiary/household is under review.	S	Case Review functionality enables SmartPro MedEE to indicate that a Beneficiary/Household case is under review. Special Caution functionality can also be used to enable SmartPro MedEE to indicate that a specific individual (independent of any application or ongoing case) is under special review.

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
GEN 080	The EES shall provide a mechanism to alert management that pending applications have exceeded specified time limits.	S	Milestones on pending applications track time limits. Workflow logic associated with these milestones will alert management users when these time limits are approaching and have been exceeded.
GEN 081	The EES shall create an alert of approaching deadlines.	S	Configured Milestones are used to create and maintain deadlines in SmartPro MedEE. Workflow logic associated with these milestones will alert users, groups of users or work queues of approaching deadlines.
GEN 082	The EES shall create and assign alerts associated with pending tasks.	S	All workflow tasks have associated 'escalation logic' that determines what should happen when certain periods of inactivity elapse. This can result in notifying a user or group of users, notifying a work queue, or it can result in the triggering of automatic logic defined in Rules or in code.
GEN 083	The EES shall alert specified work units when specific beneficiary/household changes are made based on program rules (e.g. customer/beneficiary/eligibility worker changes the address, certain demographic information, etc.	W	SmartPro MedEE triggers internal events when specified actions occur. When specific data is created or modified a relevant internal event will be fired. A configured workflow will be enacted by one of these events, to notify a user, group of users, or work queue that an action of interest has occurred. Related to requirement GEN 085.
GEN 084	The EES shall not allow any duplication or potential duplication of services to the beneficiary.	S	The SmartPro MedEE shall ensure that a beneficiary and all household members are only eligible for those programs and program categories that they should be eligible for at any one point in time. The CER rules ensure that there is no duplication of eligibility across programs.

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
GEN 085	The EES shall provide the capability to alert eligibility worker of multiple households at same physical and/or mailing address.	M	<p>The SmartPro MedEE triggers internal events when specified actions occur. When an address is created or when an address is modified, one of these internal events will be fired. A workflow will be triggered when either of these events is fired. The first activity in the workflow will compare the created or modified address with other addresses in the system. If a match is found with an existing address, and if this existing address is linked to a different household or to an individual outside of the current household, a second activity will notify relevant eligibility workers. The notification will link directly to the two addresses in question.</p> <p>Modification effort required around the address comparison logic.</p> <p>Workflow configuration effort is catered for by requirement GEN 083.</p>
GEN 086	The EES shall maintain individual and household information.	S	<p>The SmartPro MedEE solution, based on IBM Cúram for Medical Assistance, maintains individual and household information. Individual information includes identification data, demographic data, income data, resource data, expense data and all other data required for determining eligibility and entitlement for included programs. Household information includes two-way relationship information between members of the household (inverse relationships are automatically calculated from the provided relationship) information on disabilities, pregnancy, military status, etc. of all members of the household.</p>

Reporting Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
RPT 001	The EES shall make available all business data elements for use with the business intelligence tool.	W	A copy of the SmartPro MedEE operational database shall be made on a regular basis to feed the analytical data warehouse with all business data elements. Apart from the Cúram Reports, Wipro proposes IBM Cognos as the Business Intelligence Tool for generation of operational and analytical reports and all relevant data elements from Cúram, DWH, and DataMarts will be made available for BI queries using Cognos.
RPT 002	The EES shall generate graphical representation of report data (e.g. pie charts, graphs, histograms, line plots, scatter plots)	S	Cognos supports a variety of graphical representation, for e.g. (but not limited not) Map, chart, line and bar graphs, Gauge, Pie chart, Side-by-side bar charts, Single and multiple line charts, Tree graphs, Probability plots, Trend lines, 3 dimensional graphs, Parallel coordinates, Control limits, Histograms etc. Wipro has an advanced visualization library and best practices guidelines which recommend what kind of graphical representation suits what kind of data representation and will leverage this to finalize the reporting design documents.
RPT 003	The EES shall generate all required Department and federal reports, in the format, media and schedule specified by the Department.	W	Wipro has an advanced visualization library and best practices guidelines which recommends what kind of graphical representation suits what kind of data representation and will leverage this to finalize the reporting design documents keeping in consideration the format, media and schedule specified. Depending on format and media same report might have 2 instances with different representation for different formats.

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
RPT 004	The EES shall create 'canned' reports to be run on a scheduled basis. The schedule for each report should be easily changed through the system user interface by a non-IT worker.	M	Cognos has its own report scheduling mechanism. The canned reports will be scheduled by Wipro as per business requirements and Wipro will provide documentation for non-technical users demonstrating how they can schedule new reports or re-schedule existing reports.
RPT 005	The EES shall retain report results in a manner that complies with Nebraska and applicable federal data retention policies, based on data type and program rules. The time period for which the reports are retained shall be mutually determined and shall be aligned with ongoing capacity planning exercise.	S	Noted and will be taken into consideration during requirements finalization and design phase.
RPT 006	The EES shall store all reports in such a manner as to allow online access to and retrieval of both current and historical reports via a user-friendly parameter and/or menu-driven access to reports, based on user permissions, as defined by the Department.	M	Cognos has its own report and data level security (authentication and authorizations) and all current and existing reports will be made available based on the security design and user permission finalized during BI design phase. Cognos/BI will be incorporated into the SSO/Portal implementation, using the State's Microsoft AD for user authentication.
RPT 007	The EES shall provide a mechanism to view online, save and print ad-hoc reports, based on user roles and program rules.	W	Acknowledged and taken into account in solution consideration and design. Basic mechanisms are configurable, and will be integrated with the overall SSO solution.
RPT 008	The EES shall tabulate data by worker, county, region, etc.	W	Acknowledged and will be taken into consideration during requirements finalization and design phase.

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
RPT 009	The EES shall provide a mechanism to perform a QC sampling by maintaining the current functionality for sampling methodology (regions, clusters, random, and stratification), including designating sampling size for random, designating month and year of a sample, designating regions and/or clusters (counties) of a sample.	W	SmartPro MedEE, through Cúram Case Audit, supports configurable QC sampling, that enables the Department to sample by region or other grouping construct, perform random sampling, perform stratification sampling, and to sample by a wide variety of other criteria. Cúram Case Audit ultimately enables a user to configure an SQL statement, through a configurable field, which can select a list of cases using any filtering clause possible in SQL. Sample size, month or year of sample can be used as filters through the above mechanism. the current sampling methodology will be studied by Wipro's BI and Domain experts, who will provide recommendations on the best sampling techniques.
RPT 010	The EES shall provide a mechanism to create the universe from which the system pulls the samples.	S	The universe will be the complete list of eligibility cases in the system. The sampling logic described above will return a sample list of case IDs.
RPT 011	The EES shall provide a mechanism to manually eliminate a case from a sample and replace it with a replacement sample based on user roles. The EES shall capture a reason for eliminating/replacing a case.	S	SmartPro MedEE, through Cúram Case Audit, supports a user role known as an "Audit Coordinator". An authorized audit coordinator can manually add cases to or remove cases from the sample. Comments can be provided to explain why changes are being made to the sample.
RPT 012	The EES shall create, maintain and store QC review results for different program types, by office, sample month and year, sample ID.	M	A history of case audits completed is maintained in SmartPro MedEE. Modification will be required to support the result categorizations listed here.
RPT 013	The EES shall define, implement, collect, and report using a set of business process-related performance metrics that conform to MITA defined performance metrics such as tracking changes in programs and policies and evaluating corresponding changes in health outcomes.	C	Acknowledged and will be taken into consideration during requirements finalization and design phase.

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
RPT 014	The EES shall create case load reports such as active case list, active person list, pending application, review lists by manager, location, region and statewide.	C	Supervisor Workspace provides multiple views of active cases, tasks including pending applications and reviews, based on the position of the supervisor within the organization structure (location, region, statewide)
RPT 015	The EES shall provide multiple reports to include, but not limited to, fraud hearings, number and type of appeals decisions.	C	Acknowledged and will be taken into consideration during requirements finalization and design phase. Wipro's SMEs and functional consultants will leverage Wipro's Fraud and Abuse Management Framework to improve identification and follow ups on such hearings and appeals. Hearing and Appeals data is maintained within Cúram.
RPT 016	The EES shall provide a dashboard summary view of the status of households across units for managers as for example, active, critical, error, quality assurance corrective action, QC reviews, pending reviews, etc.	C	Supervisor Workspace provides supervisors and managers with dashboards to manage the cases (including households which are Integrated Cases) within their span of control that includes cases with issues. Cases for review will appear in their task list.
RPT 017	The EES shall provide a comprehensive reporting solution that will generate standard operating, pre-defined or operational reports without an adverse effect on system performance or response time.	C	Apart from the Cúram Reports, Wipro proposes IBM Cognos as the Business Intelligence Tool for generation of standard operating, pre-defined and operational reports. Ample care has been taken to propose HW to meet performance expectations without any adverse effect on system performance. Moreover, as these reports will be generated on top of DWH / DataMarts, Cúram's operational performance will not be impacted by BI activity.
RPT 018	The EES shall generate standardized or ad-hoc reports without affecting worker response times.	S	Standardized and ad-hoc reports are created in the BI environment, which is implemented on its own set of dedicated Virtual Machines, backed by physical resources dedicated to BI. Worker response times will not be affected by the BI environment.

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
RPT 019	The EES shall store all reports in such a manner to allow online access to and retrieval of report information via a user-friendly parameter and/or menu-driven access to reports.	S	IBM Cognos has powerful business self-service reporting in a unified workspace that allows business users to create and consume reports in one UI without IT assistance. Business users can easily assemble, personalize and interact with reports and report objects to create personalized dashboard content in a unified, web-based BI workspace.
RPT 020	The EES shall identify the date and time on all reports when it was generated and allow the worker to save the report multiple industry standard formats.	S	This is a standard Cognos (proposed BI platform) feature. A user can choose from the following formats, among others: <ul style="list-style-type: none">• HTML• HTML fragment• XHTML• XML• PDF• Excel 2000• Excel 2000 single sheet• Excel 2002• Excel 2007• delimited text (CSV) format
RPT 021	The EES shall allow authorized workers to access, generate, and print reports.	S	This is a standard Cognos (proposed BI platform) feature. For example, IBM® Cognos® BI administrators can set up folders in which reports are stored. They can then secure those folders so that only authorized users can view, change, or perform other tasks using the reports in the folder.

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
RPT 022	The EES shall save reports or raw data in multiple outputs formats (e.g. CSV, tab delimited, text, HTML, XML, XLS) in conformance to security standards and shall provide reports to be exported to an electronic file, PDF, Excel, Text, or Word format depending on the type of report.	S	This is a standard Cognos (proposed BI platform) feature. A user can choose from the following formats, among others: <ul style="list-style-type: none">• HTML• HTML fragment• XHTML• XML• PDF• Excel 2000• Excel 2000 single sheet• Excel 2002• Excel 2007• delimited text (CSV) format
RPT 023	The EES shall maintain a history of documents and reports received, track these items and make them accessible in the electronic case file, so that information can be shared across programs and agencies using a HIPAA compliant method.	M	The Cúram document management interface will associate all documents and reports received with the appropriate case or case participant (person) so that they can be accessed directly from the case file and be shared across programs and agencies with anyone with appropriate authority to view the case file.
RPT 024	The EES shall have standard reports to measure progress against the Department goals, initiatives, and policy changes, including, but not limited to, policy initiatives, budget initiatives, Affordable Care Act requirements, and grant opportunities.	M	Apart from the Cúram Standard reports (customized for the State of Nebraska), if there are any additional reports which the State requires to internally measure progress, they will be generated using Cognos BI.

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
RPT 025	The EES shall generate ad-hoc and standard reports in real-time as well as historical.	S	<p>This is a standard Cognos (proposed BI platform) feature. Cognos Query Studio enables you to build custom ad-hoc reports that you may share with other Cognos users.</p> <p>Also, IBM® Cognos® Real-time Monitoring is an operational business intelligence solution designed to provide easy access to consistent data so you can react quickly to revenue and cost-saving opportunities. Cognos Real-time Monitoring features self-service, interactive dashboards with operational key performance indicator (KPI) measures for frontline business users, executives, managers and analysts.</p> <p>Cognos Real-time Monitoring features include:</p> <ul style="list-style-type: none">• Self-service query, reporting and analysis from virtually any data source• Business-defined alerts about sudden issues that need attention• Patented memory-based data store for continuous data integration• Real-time data navigation that can help you investigate the root cause of an issue• Drag-and-drop dashboard environment that enables you to add real-time, formatted information to your historical business intelligence
RPT 026	The EES shall provide summary tables of reports.	S	IBM Cognos can provide filters summaries, and calculations to compare and analyze data and provides drill up and drill down capabilities to view related detail information.
RPT 027	The EES shall ensure that the reports are print-ready, visually acceptable to the user and provide the ability to format, set headers, labels.	S	<p>This is a standard Cognos (proposed BI platform) feature.</p> <p>A user can use combinations of text, data items, and report expressions in titles, headers and footers.</p>

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
RPT 028	The EES shall be scalable to produce ad hoc reports on request without impacting system response times.	S	This is a standard Cognos (proposed BI platform) feature. Using the Framework Manager, a semantic layer will be created which will enable users to produce ad-hoc reports themselves or through IT staff. The general BI subsystem is isolated from impacting the operational performance of Cúram by separating it onto its own set of Virtual Machines backed by dedicated physical resource operating against a Data Warehouse / DataMart structure.
RPT 029	The EES shall create reports using all current data elements available at the point of creation.	S	Cognos Business Designer can be used to create reports using any data elements available within the BI environment.
RPT 030	The EES shall produce control and error reports from mass change processing.	C	Mass change processing is performed via Cúram batch jobs that produce control and error reports as part of their standard processing.
RPT 031	The EES shall have the capability to import data from other data sources.	S	The DataMarts will be scalable to allow data from other sources to be integrated to meet additional reporting requirements.
RPT 032	The EES shall support the ability to run online queries at the worker level.	W	IBM Cúram uses the BIRT (Business Intelligence and Reporting Tools) Report Designer which allows developers to create custom BI reports which can then be imported into the Cúram application. This provides workers with the ability to run queries that can be displayed in Cúram application pages when required, as text or graphs.
RPT 033	The EES shall produce reports on frequencies specified by the Department with the ability to change those frequencies at any time with minimal IT support.	W	Reports will be generated on frequencies as per business requirements and Wipro will provide a user manual explaining to non-IT users how they can schedule new reports or re-schedule existing reports.

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
RPT 034	The EES shall allow users to sort, search, filter and drill down on any parameter of a standard report.	S	This is a standard Cognos (proposed BI platform) feature. You can create a drill-through path in a source report in Report Studio, or using Drill-through Definitions in IBM® Cognos® Connection. A drill-through path is the definition of the path that is taken when moving from one report to another, including how the data values are passed between the reports. When you drill through, the values that you pass are usually, but not always, used to filter the report.
RPT 035	The EES shall include version control for all reports.	S	This is a standard Cognos (proposed BI platform) feature.
RPT 036	The EES shall generate data and reports needed to comply with federal audit and oversight requirements.	W	SmartPro MedEE will comply with this requirement. The reporting requirements will be finalized during the Requirements Analysis phase and these reports will be implemented by configuring Cognos reports.
RPT 037	The EES shall generate data and reports needed to apply for and demonstrate appropriate use of federal grant funding sources.	W	SmartPro MedEE will comply with this requirement. The reporting requirements will be finalized during the Requirements Analysis phase and these reports will be implemented by configuring Cognos reports.
RPT 038	The EES shall document the appropriate benefit programs, projects or other categories impacted by system or human actions to support claims for federal matching funds.	W	SmartPro MedEE will comply with this requirement. The reporting requirements will be finalized during the Requirements Analysis phase and these reports will be implemented by configuring Cognos reports.
RPT 039	The EES shall provide reports or data to support the cost allocation strategies (e.g., numbers and types of applications processed etc.).	W	SmartPro MedEE will comply with this requirement. The reporting requirements will be finalized during the Requirements Analysis phase and these reports will be implemented by configuring Cognos reports.

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
RPT 040	The EES shall differentiate funding source based on Department -specified criteria.	C	SmartPro MedEE will comply with this requirement. The reporting requirements will be finalized during the Requirements Analysis phase and the reports will be implemented by configuring Cognos reports based on criteria driven by the organizational structure.
RPT 041	The EES shall automate reports to support accurate forecasting of program costs.	W	SmartPro MedEE will comply with this requirement. The reporting requirements will be finalized during the Requirements Analysis phase and the reports will be implemented by configuring Cognos reports and schedules.
RPT 042	The EES shall automate reports to support evaluation of cost-containment and quality improvement initiatives	W	SmartPro MedEE will comply with this requirement. The reporting requirements will be finalized during the Requirements Analysis phase and the reports will be implemented by configuring Cognos reports and schedules.
RPT 043	The EES shall create standard reports defined by the Department to compare program expenses to budgeted expenses for the State and federal fiscal year-to-date, prior State and federal fiscal year, and projected through the remainder of the State and federal fiscal year.	W	SmartPro MedEE will comply with this requirement. The reporting requirements will be finalized during the Requirements Analysis phase and the reports will be implemented by configuring Cognos reports.
RPT 044	The EES shall generate an inventory of current and available reports.	S	This is a standard Cognos (proposed BI platform) feature. There are standard auditing features and also there is an IBM Cognos SDK application that provides additional auditing, including Role Auditing, folders, reports, queries, etc.

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
RPT 045	The EES shall support the ability to produce formatted reports based on online queries.	S	<p>This is a standard Cognos (proposed BI platform) feature. IBM® Cognos® Query Studio is the reporting tool for creating simple queries and reports in IBM Cognos Business Intelligence.</p> <p>In Query Studio, you can</p> <ul style="list-style-type: none">• <u>view data</u> Connect to a data source to view data in a tree hierarchy. Expand the query subjects to see query item details.• <u>create reports</u> Use the data source to create reports, which you can save and reuse. You can also create a new report by opening an existing report, changing it, and saving it using another name.• <u>change the appearance of reports</u> Improve the layout of your report. For example, you can create a chart, add a title, specify text and border styles, or reorder columns for easy comparison.• <u>work with data in a report</u> Use filters, summaries, and calculations to compare and analyze data. Drill up and drill down to view related information. <p>IBM Cognos Report Studio is the professional reporting tool for IBM Cognos Business Intelligence. Report Studio offers greater flexibility in calculating and formatting results. A user can use Report Studio to make more extensive changes, such as adding borders and modifying object properties.</p>

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
RPT 046	The EES shall provide access to Query builder application.	S	This is a standard Cognos (proposed BI platform) feature. A user can use the Query Builder to create custom Microsoft SQL data queries and retrieve the results into a report. The query can be then inserted into an Excel object. The Query Builder is designed to retrieve data via SELECT statements. However, it supports other query commands against the database, as permitted by SQL Server.
RPT 047	The EES shall support the preparation of a branch report, i.e., standard template with pre-populated data.	S	This is a standard Cognos (proposed BI platform) feature. A user can create new template to provide report authors with a layout that they can use to create reports or they can apply to existing reports. IBM Cognos Query Studio and IBM Cognos Analysis Studio users can also use these templates. You can also use the template in Query Studio to define a layout for prompt pages.

Business Requirements/Processes Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
OPS 001	The EES shall create easy, efficient, and accurate interfaces with other systems, including the federal data hub, state and other data sources to verify application information	C	SmartPro MedEE uses Cúram and an ESB (IBM Integration Bus), along with communication facilitation tools such as Sterling Direct:Connect to facilitate connections to outside sources of information – both classic batch and transactional real-time. These interfaces are secure, reliable, efficient, and straight-forward to implement in almost all cases. Cúram directly supports connectivity with the federal data hub out-of-the-box. Individual interfaces, as named in the RFP, will be addressed in detail during requirements specification. The proposed schedule accommodates the time and effort to implement all named interfaces.
OPS 002	The EES shall support integrated eligibility system and/or reduce errors associated with processing eligibility for more complex populations	S	SmartPro MedEE, based on IBM Cúram for Medical Assistance, is an integrated eligibility system. It will be initially deployed to support eligibility for Medical Assistance programs, such as Medicaid, CHIP and subsidized health care as provided through the Affordable Care Act. It is extensible to support eligibility for other programs in the future. It supports the capture of a single application for a complex household, with all household data being saved and verified centrally. It supports an advanced workflow capability for ensuring that work is completed on time and by the people that should be completing it. It supports an eligibility rules engine for calculating eligibility for all supported programs. It provides a modern, intuitive web-based user interface.
OPS 003	The EES shall support workers to improve workflow and reduce errors including:	S	SmartPro MedEE will support workers to improve workflow and reduce errors.

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
OPS 004	<ul style="list-style-type: none">Computerized case files and online case histories	S	At its heart, SmartPro MedEE is an electronic case management system. All household data will be captured and verified within the context of an application case, and when disposed, will be transferred to an ongoing integrated case for ongoing case management. All cases will maintain a detailed case history. All case types support common case management functionality such as case notes, case calendar, linked case documents and attachments, case reviews, complaints and grievances, appeals, milestones, and case owners.
OPS 005	<ul style="list-style-type: none">Automated assignments of case files to workers according to their expertise and availability	W	Cúram has the concept of a Case Owner. A Case Owner can be a user, a group of users and even a work queue. Case Owner logic can reference any combination of relevant data such as user expertise, new application complexity, language preference, and location, for example. Some configuration effort will be necessary to provide the Department with their required assignment logic.
OPS 006	<ul style="list-style-type: none">Logic flags	S	SmartPro MedEE provides flags such as 'number of data items awaiting verification'; number of days remaining to a milestone, if a milestone has passed, if an individual has any special cautions.
OPS 007	<ul style="list-style-type: none">Online policy and procedure manuals	S	SmartPro MedEE will provide links to online policy and procedure manuals.
OPS 008	<ul style="list-style-type: none">Integrated document imaging	C	We propose implementing a real-time (Web Services based) interface with the State's Hyland OnBase Imaging and Document Management solution. Mediated by SmartPro MedEE's ESB (IIB), we will link Cúram's Case Management capability with Hyland's imaging capabilities to meet the State's requirements. See IMG003

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
OPS 009	The EES shall contain the business rules and technical capability to determine online, real-time eligibility for Medicaid MAGI and non-MAGI based eligibility	W	See IMG 002, based on IBM Cúram for Medical Assistance, supports online, real-time eligibility determination for MAGI (e.g. Adults and Parents) and non-MAGI (e.g. ABD) categories, and batch eligibility where mass change processing is required. The out-of-the-box solution will support a significant portion of Nebraska medical assistance categories. Those categories that are not provided out-of-the-box will be supported through configuration of rules, workflow and program data.
OPS 010	The EES shall automate eligibility verification including electronic acceptance of verification documents; validation of applicant data through electronic data exchanges with valid sources	W	A unique feature of IBM Cúram for Medical Assistance is prebuilt integration with the Federal Hub and prebuilt hooks to enable integration with other systems, such as State systems, for the verification of application data. Once the required State system interfaces are available, they will be connected to See IMG 002. Through the ESB to these prebuilt hooks. Where data cannot be automatically verified through an interface with a valid source, a worker can upload verification documents provided by the consumer. These documents will be saved in the Document Management System.
OPS 011	The EES shall centralize User Account Management, Authentication and Authorization	M	SmartPro MedEE will use its Portal implementation to link to the State's Microsoft Active Directory to authenticate State (Internal) users. Once authenticated, Role-Based Authorization will be used, combined with Single-Sign On to the SmartPro MedEE components, to control authorization. External Users will be authenticated against Cúram's user database; once authenticated, the same RBAC and SSO capability controls their access to system functionality. See IDT 001, RSR 085, RSR 107 and MDM 031.

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
OPS 012	The EES shall display and print stored or imaged forms	C	SmartPro MedEE will be interfaced to the State's Hyland OnBase Document Management system, which will be the repository of truth for images. SmartPro MedEE will retrieve images from OnBase, and display and print them as needed. See the DOC and IMG requirement sections.
OPS 013	The EES shall allow documents to be scanned into and associated with the electronic application/renewal individual, and/or household.	W	<p>Paper documents received in person, through the post for via fax will be scanned and saved in the Document Management System. Upon completion of scanning, a Cúram workflow will be triggered which will attempt to link the document image in the Document Management System to the correct case and individual in Cúram using scanned meta data. The workflow will attempt to do this automatically and without agency worker intervention. Where agency worker intervention is required the workflow will notify one or more agency workers that the document image needs attention. The agency worker will examine the attached image, and attempt to manually link the document image to a relevant case or individual. If it is not possible to link to an existing case, manual examination of the paper document may be required.</p> <p>Workflow and configuration effort will be required to connect the scanning solution to the Cúram workflow solution through the ESB, to trigger the above straight through processing.</p> <p>This requirement is related to GEN 009.</p>
OPS 014	The EES shall upload attachments to correspondence records.	S	SmartPro MedEE users have the ability to upload digital attachments, such as correspondence, to cases and individuals.
OPS 015	The EES shall link scanned images to correspondence and records to provide one view of all related material (images, letters, or contacts with staff), with multiple links.	S	Documents and images, whether manually uploaded through the worker portal or attached automatically via the scanning solution, are organized by individual and case. All documents and images related to a specific case or a specific individual will be listed alongside the individual or case.

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
OPS 016	The EES shall provide the ability to view related correspondence records from a single correspondence record.	S	Documents and images are organized by individual and case. All documents and images related to a specific case or a specific individual will be listed alongside the individual or case.
OPS 017	The EES shall meet federal and State records retention and purging standards	M	SmartPro MedEE will modify Cúram to provide records purging (and restoration) capability compliant with Federal and State standards.
OPS 018	The EES shall provide a searchable library, with highly flexible search criteria to enable a user to quickly find needed information in policy manuals, policy memos, training material, implementation memos and all help functions without affecting work in progress.	W	SmartPro MedEE implements LifeRay Portal, which provides full library/document management capability, along with wiki, blog, and other forms of dynamic / social communication. The portal implements full Web Content Management (WCM) and comprehensive search technology out-of-the-box.
OPS 019	The EES shall support both task-based, individual-based, and household-based operations.	S	SmartPro MedEE supports all three types of work organization. Workflow tasks inform a worker that they need to perform some work by a particular time period and that this work is part of a larger process, possibly involving multiple workers. Tasks are presented to the worker in their inbox. Tasks are also presented to the worker as items of work outstanding for a specific individual or household. When the worker is focused on an individual or household, they can access a list of outstanding work items for that individual or household, regardless of whether they are responsible for completing the related tasks.
OPS 020	The EES shall forward finished tasks to the next responsible party or parties, when multiple levels of effort are required for resolution.	S	When the work associated with a task is completed, the workflow that issued this task will automatically close the task and resume workflow processing. When the next step in the configured workflow process involves another responsible party or parties, they will then receive a new task in their inbox. They can directly access the work they need to complete from this new task.

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
OPS 021	The EES shall save work in progress, exit the workflow, access work at a later point with all of the information still populated from the previous worker's actions so previous work will not need to be repeated and the worker can enter the workflow where they left off.	S	Data entered in the SmartPro MedEE is saved directly to the SmartPro MedEE database. If a worker is entering data across multiple web pages, the data is saved as the worker moves from page to page. If the worker logs out, or shuts down their browser, SmartPro MedEE will remember all data that was previously entered (as it is saved in the SmartPro MedEE database) and enable the worker to continue where they left off. SmartPro MedEE also remembers what individuals and households the worker was maintaining such that when the worker logs in again, they are presented with those individuals and households they were working on before.
OPS 022	The EES shall track, monitor, and display work done/ in queue to supervisors.	S	A supervisor can monitor workload for those workers that they are responsible for.
OPS 023	The EES shall create and maintain eligibility worker availability information at the local office level.	S	Worker calendars are used to track worker availability. An authorized worker at the local office level can search for users and maintain the user calendar. Related to requirement IER031
OPS 024	The EES shall monitor caseload size in real time and support an automated workload assignment process.	M	SmartPro MedEE will support workload assignment processing. Some modification effort will be required to provide the Department workload assignment algorithms.
OPS 025	The EES shall weigh caseloads and provide recommended distribution.	M	As above, modification effort will be required to provide Department-specific workload assignment algorithms.
OPS 026	The EES shall establish a flexible assigned workload management hierarchy that identifies the responsible organizational unit.	S	Location and User grouping capabilities are hierarchical in nature. Department-specific workload assignment algorithms (see OPS 024 and OPS 025) will use these hierarchical structures as part of their workload assignment logic.
OPS 027	The EES shall provide an automated and manual benefit card generation capability.	M	Support for creating and tracking Benefit Cards requires modification.
OPS 028	The EES shall provide a mechanism to override automatic mailing of benefit card.	W	Suppression of auto mailing of benefit card included in logic in requirement OPS 027.

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
OPS 029	The EES shall provide a mechanism to indicate a replacement benefit card is needed.	W	Support for replacement of benefit cards logic in requirement OPS 027.
OPS 030	The EES shall assign work using flexible criteria; for example, assign work by worker or the type of work.	S	Cúram Task allocation capabilities enable flexible work assignment. Actual algorithms catered for in requirements OPS 024 and OPS 025.
OPS 031	The EES shall transfer a single case, or a collection of cases in mass, including all electronic supporting documentation to and from any organizational unit.	S	Single case transfer is provided in both the worker portal and the supervisor portal. Mass case transfer is provided in the supervisor portal. When a case is transferred, all linked data such as supporting documentation is also transferred. A case can be transferred to a user, group of users, or to a work queue.
OPS 032	The EES shall automatically create a notification of a case transfer.	S	The from and to users are notified on case transfer. If the from user is the user initiating the transfer, they will not be notified.
OPS 033	The EES shall allow a worker to manually create a notification of case transfer.	S	A SmartPro MedEE user can manually create a notification task related to a case transfer.
OPS 034	The EES shall evaluate a case prior to a transfer, prompt user if established transfer criteria are not met and not allow transfer until criteria is met.	M	The Case transfer workflow will be configured to trigger new case evaluation logic and react accordingly.
OPS 035	The EES shall allow user to override assignment rules and process a transfer when defined criteria are not met based on security rule and audit trail.	M	Extensions to logic for OPS 034. If the user is prevented from transferring a case, and if that user is authorized to override the case transfer logic, the user will be asked if they would like to override the prevention of case transfer. An audit record will be written to the audit log to track the override.
OPS 036	The EES shall have the flexibility to assign a Single Point of Contact (SPOC) to a case or use a universal assignment.	S	The Case Owner, which can be a user or group of users, is the Single Point of Contact. The Case Owner can change over time.
OPS 037	The EES shall identify if and when a SPOC is assigned to a case so all communications go through the SPOC.	S	All alerts and tasks go to the Case Owner.

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
OPS 038	The EES shall update case and/or household members' information, based on user roles and business functions.	S	Role Based Access Control limits the screens that a user can visit and the actions they can perform.
OPS 039	The EES shall have a real time, comprehensive listing of workers per customer and/or case.	S	A list of named workers can be associated with a case or individual.
OPS 040	The EES shall sort and display the type and number of cases assigned to a specific caseload.	S	A case worker has the ability to view, sort, search, and filter their own case load. A case worker can also create custom case lists based on a dynamic case query, or manually due to having an interest in specific cases. A supervisor can view, sort, search, and filter the case load for all workers they supervise.
OPS 041	The EES shall add, subtract or modify the number of caseloads supported within the system.	S	The number of caseloads will increase and decrease dynamically based on the volume of work, based on the workload allocation logic, and based on the number of case workers available. Caseloads can be organized by worker, group of workers or work queues.
OPS 042	The EES shall assign a unique identifier to each caseload.	S	A caseload will be associated with a user, group of users or a work queue. The caseload will be directly associated with username, group name or work queue name.
OPS 043	The EES shall recommend transfer of cases from one caseload to another.	M	Modification will be required to support automatic case transfer recommendations. The recommendation algorithm will be unique to the Department.
OPS 044	The EES shall identify when a referral is required and automatically generate and track a referral.	M	The assumption here that there will be logic required that will recognize, based on application data received, when a referral to a specialized work unit should be triggered. This will result in the triggering of configured workflow. Use the Cúram Evidence Broker to trigger referral workflow.
OPS 045	The EES shall allow and track manually generated referrals.	S	A referral workflow can be manually enacted in the SmartPro MedEE.

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
OPS 046	The EES shall track status of referrals to monitor for required or expected action by the receiving entity.	S	All workflows, including referral workflows, are tracked and monitored in SmartPro MedEE. If work items are not completed in a timely manner escalation logic will automatically be triggered.
OPS 047	The EES shall provide the ability to differentiate types of referrals within programs. (e.g. Child only CSE referrals, ERU spousal elective share, TPL lead vs. change, HIPPS, subrogation)	M	When certain types of data are captured a referral workflow will be triggered for the attention of a specialized work unit. The referral type and target will depend on the type of data captured. Refer to requirement OPS 044.
OPS 048	The EES shall identify when a Change referral is necessary (e.g. employment changes, household changes, entering or leaving foster care, etc.) and send the referral.	S	The assumption here that this requirement relates to informing a user or group of users when certain types of change in circumstances occur. Refer to requirement OPS044
OPS 049	The EES shall associate a consumer notice related to the specific Cost Avoidance and Recovery area (CSE, TPL, HIPPS, ERU, and Medical Subrogation).	M	The assumption here that the consumer will be notified, via generated notice, when certain actions occur related to Cost Avoidance and Recovery.
OPS 050	The EES shall identify, generate and send potential resource situations to work unit as specified. (e.g., Annuities, Trust like Devices, Spousal Elective Shares, Personal Injury cases, Workers Comp, etc.)	W	SmartPro MedEE will support referring cases with specific resource situations to specialized work units. Configuration of workflow required to recognize specific resource situations and trigger the referral required.
OPS 051	The EES shall display a summary of case information by user role (e.g. head of household, members, relationships, addresses, date of birth, caseworker or process queue, office location, case status, recertification date, simplified report date, current benefit amount, sanction status, etc.).	S	Case information is organized and displayed across a set of tabbed panels. A case context panel is always displayed, above the tabs, to show high level summary data about the case regardless of what part of the case the case worker is focused on.
OPS 052	The EES shall provide a mechanism to provide custom views of case summary information, based on user roles, program rules, and office procedure.	M	Modifications will be required to support multiple different case summary views.
OPS 053	The EES shall match and merge duplicate case information, based on user role and program rules.	S	A case worker can manually merge duplicate case information, depending on assigned user role.

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
OPS 054	The EES shall automatically update case information received through electronic access.	W	Case information received through the client portal or received through external interfaces will be processed by the Cúram Evidence Broker. Based on the data type, the Evidence Broker can be configured to automatically apply the data to the case (and eligibility will be automatically re-determined) or to put the data into a holding area, inform a case worker, and enable the case worker to review and accept or reject the data. Some configuration will be necessary to ensure that all data types are dealt with correctly.
OPS 055	The EES shall update and track reported changes which do not affect eligibility and do not require verification that are submitted electronically (e.g. phone number, cell number, e-mail address, change in income which remains below program threshold, etc.)	S	All changes that are submitted electronically will be captured and maintained in SmartPro MedEE, regardless of whether they impact eligibility.
OPS 056	The EES shall have the ability to close or deny a Category of Eligibility when business rules dictate.	S	When eligibility rules are re-run due to a change in circumstance, SmartPro MedEE will assign individuals to the correct (optimal) category of eligibility. Moving an individual from one category to another, due to a change in circumstances, will result in ending (or closing) eligibility for the first category and starting eligibility on another.
OPS 057	The EES shall close a Category of Eligibility without closing other active Category of Eligibility s associated with that case.	S	When eligibility rules are re-run due to a change in circumstance, only the eligibility for affected household members is updated. The eligibility for non-affected household members will remain the same. Related to requirement OPS 056.
OPS 058	The EES shall close any individual other than the program case name in a Category of Eligibility without closing the entire Category of Eligibility that has other active members.	S	When eligibility rules are re-run due to a change in circumstance, only the eligibility for affected household members is updated. The eligibility for non-affected household members will remain the same.

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
OPS 059	The EES shall provide a mechanism for authorized users to manually override a category of eligibility and/or allow opt-in/opt-out functionality within an active Category of Eligibility.	M	SmartPro MedEE will support manual selection of eligibility by authorized users. Modification required. Manual selection of eligibility requires changes to benefit data captured (override indicator data required) and rules. When manual override is selected, an audit trail will be created.
OPS 060	The EES shall provide a mechanism to automatically change Category of Eligibility within an active program.	S	SmartPro MedEE supports automatic changing of categories of eligibility. Eligibility rules determine category of eligibility.
OPS 061	The EES shall assign a new eligibility begin date for a new Category of Eligibility and automatically assign eligibility end date for a Category of Eligibility being closed.	S	Eligibility determinations are start and end dated. When a change in circumstances occurs, previous determinations are end dated and new determinations are start dated.
OPS 062	The EES shall provide a mechanism to release the hold after final disposition by the secondary reviewer.	W	SmartPro MedEE supports a disposition workflow. The out-of-the-box workflow supports a first reviewer. The workflow will be enhanced to support a second reviewer.
OPS 063	The EES shall share common data elements across multiple programs for selected fields.	S	SmartPro MedEE shares common data elements, captured and maintained once, across multiple programs. Data such as household data, income data, expense data and resource data is captured and maintained once but shared for eligibility purposes across multiple programs.
OPS 064	The EES shall have the capability to automatically reassign categories according to business rules.	S	SmartPro MedEE supports automatic reassigning of categories of eligibility. Eligibility rules determine category of eligibility.
OPS 065	The EES shall apply specific eligibility rules during renewal, a reported change or processing simplified reporting for a program(s).	W	SmartPro MedEE will support targeted rules for targeted processes. This will require configuration enhancements to out-of-the-box eligibility rules.
OPS 066	The EES shall provide a mechanism to collect all information required to auto-populate all necessary Procuring Agency case processing forms, based on program rules.	M	SmartPro MedEE captures a wide selection of data for eligibility purposes. This data is organized into Household data, Income data, Expense data and Resource data. Assumption here that further data needs to be captured to support sufficient auto-population of all necessary Procuring Agency case processing forms.

Eligibility Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
ELG 001	The EES shall support eligibility determination in keeping with federal "timeliness" guidelines and State performance standards.	W	SmartPro MedEE, based on IBM Cúram for Medical Assistance, provides configured milestones and related workflow that support federal timeliness guidelines. State timeliness guidelines will require configuration to introduce State-specific milestones and workflow.
ELG 002	The EES shall support electronic verification of application data, using State or federal sources, where possible, and support post-enrollment verification where electronic data cannot be obtained.	W	A unique feature of IBM Cúram for Medical Assistance is prebuilt integration with the Federal Hub and prebuilt hooks to enable integration with other systems, such as State systems, for the verification of application data. Once the required State system interfaces are available, they will be connected to SmartPro MedEE through the ESB to these prebuilt hooks. Where data cannot be automatically verified through an interface with a valid source, a worker can upload verification documents provided by the consumer.
ELG 003	The EES shall use the CMS Single Streamlined Application or a modified version of the Single Streamlined Application.	S	IBM Cúram for Medical Assistance provides the streamlined application out-of-the-box.
ELG 004	The EES shall support the use of supplemental application for initial eligibility determinations, renewals or changes to existing Medicaid clients.	W	IBM Cúram for Medical Assistance provides a full Medicaid application out-of-the-box. Supplemental applications will require configuration.
ELG 005	The EES shall electronically capture and store all data elements on the CMS Single Streamlined Application, even if the data elements are not needed for Medicaid eligibility determination.	S	SmartPro MedEE, based on IBM Cúram for Medical Assistance, captures and stores all data elements on the streamlined application.

ELG 006	The EES shall support the use of alternative applications such as shorten form for non-MAGI, and assessment of resources.	W	Non-MAGI application is provided out-of-the-box by IBM Cúram for Medical Assistance. Alternative applications will require configuration. Refer to requirement ELG 004.
ELG 007	The EES shall support multiple non-MAGI specific programs, such as spousal impoverishment, Medicare buy-in program; etc.	S	SmartPro MedEE, based on IBM Cúram for Medical Assistance, supports multiple non-MAGI specific programs including Spousal Impoverishment and Medicare buy-in (specifically Qualified Medicare Beneficiaries (QMB), Specified Low Income Medicare Beneficiary (SLMB), and Qualified Individuals (QI).)
ELG 008	The EES shall maintain beneficiary eligibility data and information on each beneficiary's benefits.	S	SmartPro MedEE maintains beneficiary eligibility data for all members of the provided household. Other benefit data is captured and maintained as part of this eligibility data.
ELG 009	Where an existing case (account) exists, the EES shall reuse relevant information and/or selections	S	Existing Participant and Case data can be reused for eligibility purposes.
ELG 010	The EES shall ensure seamless transfer of customers between the EES and the FFM as appropriate.	S	IBM Cúram for Medical Assistance provides prebuilt capabilities for inbound and outbound account transfer with the FFM,
ELG 011	The EES shall provide beneficiaries with periodic notifications by mail, e-mail, text, telephone and/or other format according to their stated preference for receiving such communications. The EES shall follow-up electronic notifications with paper notifications where required by federal rules or desired by State operations.	M	SmartPro MedEE will notify consumers using their preferred communication format. Messages will also be delivered to the consumers account inbox, to support secure messaging. Some effort will be required to support all listed formats and to implement workflow in support of telephone users. Refer to requirement CSE 020.
ELG 012	The EES shall provide the capability to determine eligibility, and make changes to eligibility, on a retroactive basis as allowed by federal and State statuses and regulations	S	SmartPro MedEE provides eligibility determination, change in circumstance processing, and where a change occurs for a period in the past, retroactive eligibility determination.
ELG 013	The EES shall provide beneficiaries with clearly stated details as to rights and opportunity for appeal and grievance processes	W	Beneficiary users will be presented with rights and responsibilities text. Out-of-the-box, Cúram provides rights and responsibilities text for a new application. This text will be configured to match the Department's required wording. Refer to requirement NOT 002.

ELG 014	The EES shall provide beneficiaries with clear information about privacy and confidentiality protections in the application process	W	Beneficiary users will be presented with privacy and confidentiality text. Out-of-the-box, Cúram provides privacy and confidentiality text for a new application. This text will be configured to match the Department's required wording. Refer to requirement NOT 002.
ELG 015	The EES shall provide beneficiaries with clear information about the Department's protocols in case of an information breach	W	Beneficiary users will be presented with information breach text. This text will be configured to match the Department's required wording. Refer to requirement NOT 002.
ELG 016	The EES shall integrate with the existing or replace a self-assessment tool to be used by external partners and customers to evaluate potential eligibility.	W	The Cúram screening tool will be deployed to support customers in completing a self-assessment. This screening tool provides a pre-configured question script and preconfigured screening rules for determining potential eligibility. Configuration will be required to ensure that specific Departmental requirements are supported.
ELG 017	The EES shall integrate with the existing or replace pre-application screening without entering any personal identifying information.	M	The pre-application screening calculator enables the user to understand potential medical assistance eligibility using summarized household data. Some configuration will be required to satisfy Nebraska specific limits and rules. Refer to requirement ELG 019.
ELG 018	The EES shall allow a customer to securely access an electronic account containing application information, notices and appeals information and Fair Hearing information.	M	The IBM Cúram Universal Access 'My Account' functionality enables beneficiaries to manage their interactions with the SmartPro MedEE. The beneficiary account supports secure messaging, access to submitted applications, ability to submit change in circumstances and access to appeals information. Some modification required to expose appeals data through the beneficiary account.
ELG 019	The EES shall use summarized household data for the pre-application process. (e.g., two adults with two children and estimated income).	S	The pre-application screening calculator enables the user to understand potential medical assistance eligibility using summarized household data.

ELG 020	The EES shall apply eligibility rules to identify and flag potential financial and non-financial eligibility.	W	SmartPro MedEE will use eligibility rules to determine financial and non-financial eligibility. Financial and non-financial rules are available out-of-the-box with IBM Cúram for Medical Assistance. Some configuration will be required to satisfy Nebraska-specific limits and rules.
ELG 021	The EES shall provide the customer information on eligibility and general verification requirements for Medicaid eligibility and timelines for applications and verification processes.	M	Configuration is required for paper/PDF notification template. Configuration of workflow is required for telephone notification (a worker needs to be informed to phone the applicant). Maintenance is required to extract the required data for the notification template. Similar to requirements: GEN 054, ELG 037, ELG 070, APP 042, NOT 017.
ELG 022	The EES shall access educational materials on functions of Medicaid and on other state programs.	W	SmartPro MedEE will link to education materials. Configuration in the Client Portal.
ELG 023	The EES shall provide informational fact sheets on programs for which the customer is potentially eligible.	W	SmartPro MedEE will link to program fact sheets. Configuration in the Client Portal.
ELG 024	The EES shall populate the online application with data entered in the pre-application screening tool, if a customer chooses to apply in the same session, where data elements are compatible.	S	The Client Portal application script is pre-populated with data entered into the screening tool, where data elements are compatible.
ELG 025	The EES shall track applications that originate from pre-application screening.	S	SmartPro MedEE will track new applications that originate with pre-screening.
ELG 026	The EES shall identify and flag expedited benefit cases, with user configurable triggers for expedited cases	S	SmartPro MedEE will flag expedited cases. Based on configurable questions presented to the user, the application determines if it should be considered for expedited processing. If an application is expedited, the worker will see this fact when viewing the submitted application.

ELG 027	The EES shall use existing information on a known customer to preview the impact of potential changes via a new self-assessment.	M	The pre-application screening calculator will be enhanced to support pre-population of summary data (number of household members, total income) calculated from actual data. The customer can use this simple calculator to modify the summary data and so get a preview the impact of changes in household size, income, or both, has on their household's eligibility.
ELG 028	The EES shall assure consistency in eligibility determination processing when applicants attempt to access services through different entry points.	S	SmartPro MedEE supports a No Wrong Door to insurance coverage by providing a web-based portal for clients through which they can apply for State-based and Exchange-based Insurance programs, a web-based portal for agency workers and call center workers to enable State workers to assist clients in obtaining insurance coverage, and the necessary web services to enable account/application transfers between the Federally Facilitated Marketplace (FFM) and SmartPro MedEE. All 'doors' connect back to the SmartPro MedEE application which is the system of record for all eligibility and entitlement decisions.
ELG 029	The EES shall accept complete applications from the Marketplace electronically and make Medicaid eligibility determination without requiring additional information from the applicant consistent with the policies set in the State Plan Amendment.	S	IBM Cúram for Medical Assistance provides prebuilt capabilities for inbound and outbound account transfer with the FFM. Assuming the inbound application is complete; SmartPro MedEE will make the required eligibility determination without the need for additional application data.
ELG 030	The EES shall specify beginning coverage date for those who know their existing employer coverage will be ending.	W	SmartPro MedEE will enable a beginning coverage date to be set by the worker. Configuration of new application question script is required.

ELG 031	The EES shall determine eligibility for all Medical Assistance programs.	W	SmartPro MedEE will support eligibility determination for all Departmental Medicaid programs (MAGI and non-MAGI). Configuration will be required to support Nebraska non-MAGI specific programs not provided out-of-the-box with IBM Cúram for Medical Assistance and to introduce State limits and rules to those programs that are provided out-of-the-box with IBM Cúram for Medical Assistance. This gap is documented in the contained worksheet "NE Medicaid Programs" Refer to GEN 014.
ELG 032	The EES shall validate all data fields for valid format (e.g. valid text, numbers, currency, dates, special characters allowed etc.)	S	All input fields are validated automatically for format (e.g., dates, numbers, currency, etc.). Regular expressions (regex) can be configured for special detailed formatting requirements.
ELG 033	The EES shall upload, store, and index verification documents such that they are tied to the appropriate case and searchable.	M	All verification documents captured through scanning, or directly uploaded will be stored in the Document Management System and linked to the relevant application, case, individual and/or household. Refer to requirement GEN 009.
ELG 034	The EES shall provide electronic signature capabilities for customers applying in a local office using an electronic signature pad.	M	SmartPro MedEE will support electronic signature capture. Modification will be required to integrate the signature pad with the SmartPro MedEE application. The signature graphic will be uploaded and attached to the application.
ELG 035	The EES shall provide an electronic signature for an application	S	SmartPro MedEE supports the electronic signing of applications submitted by an authenticated customer through the Client Portal. Once the new application is complete, a disclaimer is displayed asking the user to sign the new application. The customer must click a number of check boxes confirming that all the information they have provided is accurate.
ELG 036	The EES shall record and store a telephonic signature for an application	M	SmartPro MedEE will integrate with the State's IVR/telephony solution via its ESB to capture telephonic signatures, which will then be stored in Cúram Case information.

ELG 037	The EES shall provide the customer with a notification of approval or denial.	M	Modification is required to populate the paper/PDF Notification template. Configuration of workflow is required for telephone notification (a worker needs to be informed to phone the applicant). Similar to requirements: GEN 054, ELG 021, ELG 068, APP 042, NOT 017.
ELG 038	The EES shall confirm for customers or workers that submitted applications are complete.	S	SmartPro MedEE will confirm for the user when an application is complete.
ELG 039	The EES shall maintain data privacy and security requirements consistent with applicable laws.	S	SmartPro MedEE will maintain data privacy and security for all captured application data. Role-based access control ensures that only authenticated workers with sufficient authorization, and the consumer or selected assistor, can access captured application data. Refer to requirements RSR 001 - RSR 035.
ELG 040	The EES shall retain completed applications with various retention schedules. All application data will be easily searchable and retrievable.	S	All applications will be retained for an agreed period of time. In SmartPro MedEE when an application is complete and accepted, it remains on SmartPro MedEE and is linked to the ongoing eligibility case. This ensures that the original application is always available for query.
ELG 041	The EES shall allow the customers to track their status via online or telephone during the application process.	S	Customers can track their application status online through their online account. A customer can phone the call center to inquire about their application status. The call center worker will log into SmartPro MedEE and search for the application using the customer provided application reference number. Where this reference number is not available, the call center worker can search for the customer record, using any customer data provided. Once located, the worker can access the customer record and view the application.

ELG 042	The EES shall store a version of the completed application form and allow the customer to retrieve it.	W	When an application is received and complete, SmartPro MedEE generates a PDF version of the application using the application data provided. Out-of-the-box, Cúram uses a plain, non-branded, PDF document. Some configuration effort will be required to prepare the Nebraska application PDF form to allow application data be used to prepopulate the form where possible.
ELG 043	The EES shall save and print a version of a completed application form that was saved online.	S	The authorized users can open the saved PDF document and print it.
ELG 044	The EES shall auto-populate known data within the system between modules, functions and applications within the life of the household.	S	The SmartPro MedEE will pre-populate data fields with available data.
ELG 045	The EES shall process household with more than one applicant	S	The SmartPro MedEE will support single and multi-person households.
ELG 046	The EES shall refer cases with potentially fraudulent activity to appropriate agency	W	To identify potentially fraudulent applications, PCR (Priority, Complexity and Risk) rules will be configured. The Risk rules will identify potentially fraudulent applications. A workflow will be configured to refer identified case to an appropriate working unit.
ELG 047	The EES shall identify applications which are pending HUB Citizenship etc. verification	S	Applications that are pending hub citizenship verification are tracked in SmartPro MedEE.
ELG 048	The EES shall establish an eligibility base period from one to twelve months.	W	Eligibility base periods are determined based on case circumstances and established based on program-specific policy. Updates to base period calculation logic for Nebraska-specific programs will be configured.
ELG 049	The EES shall determine the correct eligibility base period automatically and manually.	S	Eligibility base periods are set by SmartPro MedEE based on case circumstances and established based on program-specific policy. Eligibility based periods can also be set or updated manually.
ELG 050	The EES shall retain a viewable history of changes to the eligibility base period.	S	A history of changes to the start and end dates for eligibility periods is maintained and is viewable in SmartPro MedEE.

ELG 051	The EES shall place cases in a pending status if eligibility cannot be determined in real time due to system unavailability. The case will be flagged for follow up and verification of the required information	S	If eligibility cannot be determined in real time due to SmartPro MedEE system unavailability, any impacted applications will be picked up by a nightly catch-all batch job. This batch job will be run regularly to automate eligibility determination for those complete applications that were not processed online, during the day, regardless of the reason.
ELG 052	The EES shall place cases in a pending status if eligibility cannot be determined in real time due to data inconsistencies in accordance with 155.315(f). The case will be flagged for follow up and verification of the required information	S	If eligibility cannot be determined in real time due to data inconsistencies, the case owner(s) will be notified.
ELG 053	The EES shall support multiple budgeting methodologies (e.g. perform multiple tests on a single household when family beneficiaries may be eligible for multiple programs).	S	SmartPro MedEE will perform multiple eligibility tests on a single household to determine the correct combination of assistance for all members of the family. This can result in different family members being eligible for different programs (e.g. father on insurance assistance, pregnant mom on Medicaid, and children on CHIP).
ELG 054	The EES shall identify all types of incomes (e.g. countable or exempt statuses of incomes, and resources by program or individual).	S	SmartPro MedEE, based on IBM Cúram for Medical Assistance, supports a wide range of income types, out-of-the-box.
ELG 055	The EES shall document case notes of actions which have occurred on case	S	Case notes are linked to Individuals and Cases. Authorized users can input case notes.
ELG 056	The EES shall calculate start and end dates of presumptive eligibility periods based on user configurable rules	M	Presumptive eligibility will be supported in SmartPro MedEE through Modification. Refer to requirement GEN 068.
ELG 057	The EES shall create automatic and manual alerts to internal and external users upon the occurrence of specified events.	S	SmartPro MedEE will create automatic and manual alerts according to the specified events in these requirements. An alert can be issued as an EES notification (available through the user inbox) or as an eMail.

ELG 058	The EES shall automatically re-determine eligibility for customers based on specified events (e.g. cost-of-living adjustment, changes in insurance premium amounts).	S	A non-technical user can be authorized to make changes such as Cost of Living Allowance (COLA) rate adjustments or insurance premium adjustments. Given that the two examples provided here could impact the eligibility profile of a large number of cases; this would be considered a mass change. Refer to requirement GEN 042. To ensure that such mass changes happen in a controlled manner without impacting online performance, eligibility re-determination will either run in batch, or asynchronously on-line on separate dedicated hardware.
ELG 059	The EES shall calculate customer responsibility/cost sharing for Long Term Care or Home and Community Based waiver programs.	S	SmartPro MedEE, based on IBM Cúram for Medical Assistance, supports eligibility for Long Term Care Programs: Long Term Care (Special Income Level) and Medically Needy Long Term Care. Calculation of customer responsibility/cost share for Long Term Care or Home and Community Based waiver programs supported out-of-the-box.
ELG 060	The EES shall determine applicant eligibility for specific non-independent living Long Term Care or waiver programs. (e.g. Institutional Living).	W	SmartPro MedEE, based on IBM Cúram for Medical Assistance, supports eligibility for Long Term Care Programs: Long Term Care (Special Income Level) and Medically Needy Long Term Care.
ELG 061	The EES shall set a period of ineligibility for a Long Term Care or waiver customer who commits a prohibited transfer of resources.	S	Available as part of IBM Cúram for Medical Assistance.
ELG 062	The EES shall track movement from one facility to another to re-determine insurance eligibility, and cost sharing based on regulations. (e.g. hospitalization, nursing home, independent living).	M	Living Arrangement details are captured as part of the standard non-MAGI application. Eligibility Rules will consider if the type of facility impacts eligibility or cost sharing. Some modification effort is required around 'cost sharing' for Long Term Care (LTC). . Refer to requirement ELG 057.
ELG 063	The EES shall identify resources excluded due to Long Term Care insurance.	W	SmartPro MedEE will identify resources that are excluded due to LTC insurance. Some simple rates table configuration work is required for specific resource exclusion.

ELG 064	The EES shall complete and retain a resource assessment.	S	Resource details are captured in the application. Rules are provided, out-of-the-box, to calculate eligibility based on a resource test, for appropriate programs.
ELG 065	The EES shall support the process of reviewing program eligibility.	S	Any user with the sufficient authorization can review eligibility determination details by person, by program. Workflow will notify the reviewing user that their attention is required.
ELG 066	The EES shall display the basis of the eligibility budget calculations.	S	SmartPro MedEE will display budget calculations as part of the overall eligibility determination.
ELG 067	The EES shall support varying methods of reviewing program eligibility (e.g. paper process where a review form is generated with pre-populated information).	M	SmartPro MedEE will enable a reviewer to examine all details of an application, change in circumstance, or as part of, the associated eligibility determination online. Some modification will be required to trigger and pre-populate a paper review form.
ELG 068	The EES shall trigger redetermination on cases with a fixed schedule of timed intervals.	S	An eligibility batch job in SmartPro MedEE will be run on a regular basis. This will support redetermination of cases, on a fixed schedule.
ELG 069	The EES shall track eligibility determinations separately. (e.g., income used to determine eligibility for Program 1 may be different than the income used to determine eligibility for Program2, etc.)	S	Different rules for different programs consider the same application data (e.g. income) differently, according to the eligibility rules. For example one set of eligibility rules might consider gross income whereas another considers net income. While program eligibility rules can vary from one program to another, shared rule sets are also supported where common eligibility rules exist across programs.
ELG 070	The EES shall send notification of eligibility determination.	W	Modifications will be required to support the notification of eligibility template and population of. Refer to requirement ELG 011. Similar to requirements: GEN 054, ELG 021, ELG 035, APP 042, NOT 017.
ELG 071	The EES shall use the available interfaces to process redetermination for the MAGI qualifying population.	S	All interfaces used as part of the initial eligibility determination process will be available for use as part of eligibility redetermination.

ELG 072	The EES shall provide the capability to create and maintain an electronic household file of all applicants and families requesting services from the time that they first make an entry to the system.	S	Household details are fundamental to SmartPro MedEE eligibility determination. Throughout the life of an eligibility case, a history of all household details is maintained.
ELG 073	The EES shall support a range of disposition action triggers including event-based triggers (e.g., creation date, closing date, date of last review).	W	Automatic and Manual disposition triggers are provided out-of-the-box by IBM Cúram for Medical Assistance. Configuration effort is required to support extra disposition triggers.
ELG 074	The EES shall allow authorized users to review disposition actions prior to their execution.	S	Authorized users can review application data and eligibility determinations before disposing of an application.
ELG 075	The EES shall allow users to apply disposition action holds on records.	S	Application disposition can result in the reviewer not accepting the eligibility determination decision and putting the related case on hold for further investigation/review.
ELG 076	The EES shall have the flexibility to process individuals in the newly created categories.	S	SmartPro MedEE, based on IBM Cúram for Medical Assistance, will provide support for all new categories introduced as part of the ACA. This includes support for the new category covering single adults with no dependents. Refer to requirement GEN 004.
ELG 077	The EES shall provide a mechanism to generate a list of received and pending verifications including eligibility worker entered comments.	S	The applicant is notified of all outstanding verifications as part of submitting the application online. Furthermore a list of all received and outstanding verifications are tracked against the application. A worker can view this list plus any worker comments entered at any time.
ELG 078	The EES shall provide the ability to allow applicants to view, confirm, dispute and submit corrections to verification results.	M	Cúram enables the worker to view, confirm and submit corrections to verification results. The worker can also register a dispute on behalf of the applicant. Exposing this functionality online to enable the applicant to view confirm, dispute and submit corrections to verification results will require modifications to the base system.

ELG 079	The EES shall provide applicants the ability to address inconsistencies reported by external entities (i.e. income, citizenship, etc.) within a timeframe defined by the Department.	W	SmartPro Med EE, through Cúram Life Event processing, will enable an applicant to submit changes to address any inconsistencies to data reported by external entities. Workflow and milestone configuration will be required to notify the applicant when external entities provide data and to track the allowable timeframe to address inconsistencies.
ELG 080	The EES shall update the applicant's record with the verification results as appropriate.	S	Verification details are tracked against the applicant's data in SmartPro MedEE.
ELG 081	The EES shall utilize master indexes to avoid duplicates.	M	SmartPro MedEE utilizes IBM's advanced InfoSphere MDM tool to implement matching and duplicate resolution. Please refer to the MDM requirements for more detail.
ELG 082	The EES shall search and match the existing client data before assigning new unique number (e.g., for example, search/match criteria could be the following, including but not limited to, "Fuzzy search", first name, last name, DOB, unique id, SSN, address, aliases, case number, etc.).	S	SmartPro MedEE enables a worker to search and match new client data against the database of existing clients before registering the new client record.
ELG 083	The EES shall have the capability to reconcile duplicate records.	S	Where multiple records are created for the same client, a worker can merge the client records into a single record.
ELG 084	The EES shall provide the data reports or file extracts to reconcile data between the EES and other systems.	C	We will finalize specifications of the required extracts and reports as part of our Reporting / Business Intelligence work; in order to meet the State's reconciled requirements.
ELG 085	The EES shall capture alias information.	S	SmartPro MedEE captures alias data for clients. Multiple aliases can be captured.
ELG 086	The EES shall search account by multiple criteria (e.g., name, ID#, phone number, date of birth, county, assigned worker, etc.).	M	SmartPro MedEE provides a client search function that enables the worker to search for a client using multiple criteria. Modification required to support a 'county' criteria is required.
ELG 087	The EES shall perform compound searches (e.g., names of married couple, names of parent and child, name of siblings, etc.).	M	This is a new search, not supported in Cúram out-of-the-box. Modification to the base application is required.

ELG 088	The EES shall easily modify list criteria while searching.	S	The worker can input further search criteria in order to filter the list of search results. The worker can also sort the list of search results alphabetically by clicking the search result field heading.
ELG 089	The EES shall perform responsible person searches.	S	SmartPro MedEE client search will search across all clients in the system in order to find the relevant responsible person data.
ELG 090	The EES shall automatically identify a customer currently known to the system (e.g. applicant pending determination, past member not currently enrolled, etc.)	S	Client records are organized into prospect clients and registered clients. Prospect clients are associated with a new, unverified application. Both prospect and registered clients will be returned and easily identified in the search results. Further details regarding the application or eligibility status of the client can be viewed by accessing the full client record.
ELG 091	The EES shall electronically or manually assign a customer to a case.	S	An individual will be assigned automatically to a case by SmartPro MedEE. An individual can also be assigned manually to a case by an authorized user.
ELG 092	The EES shall conduct a manual case registration by a worker.	S	SmartPro MedEE will support auto and manual registration of cases. A worker can manually register a case. This process will be used to cater to walk-ins.
ELG 093	The EES shall create a case by grouping associated customers together.	S	SmartPro MedEE a case will group a household of customers together.
ELG 094	The EES shall allow a worker to manually create a case.	S	SmartPro MedEE will support the manual creation of cases. A worker can manually create a case. This process will be used to cater to walk-ins.
ELG 095	The EES shall use an existing case number per policy.	S	If a case number exists, this can be added to a case in SmartPro MedEE. SmartPro MedEE can support multiple different case numbers per case, if required. This will be useful to maintain a legacy case number and a new case number, if different, on a single case.
ELG 096	The EES shall assign a unique case number to a case.	S	SmartPro MedEE will assign a unique, generated, case identifier to a new case.

ELG 097	The EES shall allow a customer to be associated to multiple cases at the same time. (e.g. customer may receive insurance products on one case number and be the case name for a different case number on which their child is receiving insurance products, etc.)	S	A single customer can be involved in and associated with multiple cases at the same time. This customer record is saved independent of can case, and is linked to all associated cases.
ELG 098	The EES shall associate multiple cases to each other. (e.g. cases that share customers).	S	A case can be related to one or more cases.
ELG 199	The EES shall allow manually associate multiple cases to each other. (e.g. cases that share customers).	S	A worker can manually create a case relationship.
ELG 100	The EES shall close beneficiaries/households/categories based on applicable eligibility rules resulting from changes in information and track closure reasons.	S	The determine eligibility process will automatically and accurately track the eligibility status of all beneficiaries, households and program categories, as new applications and change in circumstances are received. As individuals/households move out of eligibility for program categories, the relevant eligibility records are end dated, rather than closing the client or household record. Beneficiaries, household and categories can also be closed, though closing a record in Cúram, means it is no long active in the system. Worker comments are captured on closure.
ELG 101	The EES shall provide a process to override system closures.	S	A worker can reopen a closed record.
ELG 102	The EES shall provide functionality to manually close beneficiaries/households/categories based on applicable eligibility rules resulting from changes in information and track closure reasons.	S	A worker can manually close beneficiary, household, and category-based relationships.
ELG 103	The EES shall allow the user to manually associate customers to each other.	S	A worker can manually relate two customers. When the relationship is initiated (e.g. Parent), the inverse relationship is automatically calculated (e.g. Child) and captured.

ELG 104	The EES shall create multiple cases based on regulations. (e.g. Disabled parent with a child).	S	SmartPro MedEE will perform multiple eligibility tests on a single household to determine the correct combination of assistance for all members of the family. This can result in different family members being eligible for different programs (e.g., disabled parent, child on CHIP). Multiple eligibility cases will be created to represent this eligibility situation. However these eligibility cases are contained within a higher level integrated case that links all eligibility cases to the original application and application data.
ELG 105	The EES shall manually separate cases per regulations.	S	A worker can manually cancel a case relationship.
ELG 106	The EES shall automatically create a task for updates in the eligibility determination of insurance products/other public assistance programs (e.g., child turning 18, 21 or an adult turning 65, etc.).	S	Time based events are recognized when the related entity (e.g. an individual) is associated with a case. An eligibility determination that extends beyond one of these time based events will be called to initiate the event. This can result in a change in eligibility decision for one or more household members, depending on the eligibility rules.
ELG 107	The EES shall provide Medicaid enrollment roster to Marketplace at stipulated frequency.	M	Some modification will be required to provide the FFM with Medicaid enrollment data on a regular basis. The modification will involve the creation of a new batch job to extract Medicaid enrollment details from the SmartPro MedEE database to a file. The file will be sent to the FFM via the ESB. This batch job will be run at the stipulated frequency.
ELG 108	The EES shall display or capture prior insurance requests.	S	The EES maintains and displays a history of all applications submitted, including application data entered, data verifications applied and eligibility determinations made.
ELG 109	The EES shall set 'special situation' indicators based on rules maintained in the system. (e.g. language, confidentiality situations).	S	SmartPro MedEE will identify and track 'special situation' aspects of applications and ongoing eligibility cases. These include language preference, sensitive cases, applicant special cautions (e.g. violent, history of fraud, etc.), and expedited applications.
ELG 110	The EES shall allow manually override all automatically set 'special situation' indicators.	M	The ability to manually override 'all' special situation indicators will require some modification effort.

ELG 111	The EES shall provide the customer with a paper receipt of the documentation (e.g. paystub or birth certificate) that has been turned in to a worker.	M	Enhancement to out-of-the-box Verifications functionality is required. For example an enhancement is required to generate a paper receipt. Another enhancement is related to the ability to store and link the receipt with the received verification item.
ELG 112	The EES shall have the capability for the Department to notify Marketplace of Medicaid Determination	M	SmartPro MedEE will have the capability to notify the FFM of a Medicaid Determination. This will typically happen in the following scenario: The FFM may first assess a consumer as eligible for Medicaid. The FFM will transfer the account to SmartPro MedEE. SmartPro MedEE then runs its own determination for Medicaid. If the consumer is now determined as ineligible by the SmartPro MedEE (i.e., the FFM assessment was incorrect) then SmartPro MedEE sends the account back to the FFM to enable the consumer to shop for qualified health plans in the FFM.
ELG 113	The EES shall provide a mechanism to manually extend verification timeframes.	S	A worker can manually extend Verification deadlines.
ELG 114	The EES shall point out missing data, errors and inconsistencies as they progress through the application, performing verification in real time where possible	S	As the user is entering data, SmartPro MedEE will check for missing data, badly formatted data, inconsistent data and data that fail business validation rules (e.g. end date cannot be before start date). The user will be informed of any data issues on screen. Real-time verification of application data, e.g., a call to the Federal Data Hub, will provide the user with verification feedback online.
ELG 115	The EES shall provide a mechanism to have a "same as" selection to enter repetitive data.	S	When entering data, such as address data (e.g., contact address and mailing address); the user can take advantage of "same as" capabilities.
ELG 116	The EES shall allow a worker to jump back to sections previously completed without losing data entered.	S	The user is presented with a guided script of questions to simplify new application data entry (note that workers also have an option to enter application data in a non-guided manner, if preferred). At any time, the user can jump back to any section previously completed.

ELG 117	The EES shall provide a mechanism to manually navigate/skip to any screens that the worker is authorized to access.	S	The worker can manually navigate to any application screen that they are authorized to access. This enables the worker to complete a new application in an order that suits their situation.
ELG 118	The EES shall identify and display verifications required for the applicant based on program rules.	S	SmartPro MedEE will track and display all data verifications required for a new application, or for a change in circumstance.
ELG 119	The EES shall produce a customized listing of verification documents for an eligibility criteria required to complete eligibility determination.	S	SmartPro MedEE will list all received and outstanding verifications required for an eligibility determination.
ELG 120	The EES shall allow a worker to upload and attach source documents to support eligibility determination.	S	A worker can upload documents in support of eligibility determination. These documents will be saved in the Hyland OnBase and directly linked to the new application or the ongoing eligibility case.
ELG 121	The EES shall present worker with a summary view of the information entered prior to submission.	S	When data in support of eligibility determination is entered, it is done so in a 'holding area'. This gives the worker the opportunity to complete and verify a set of data, without impacting eligibility, until the worker is satisfied that that the data is complete, correct and verified. When the worker is ready, the verified set of data is then released from the holding area and eligibility determination is triggered. This capability enables a worker to view a summary set of related data (e.g. a full application, or one or more change in circumstances) before deciding to submit it.
ELG 122	The EES shall provide applicants the ability to submit alternative verification via multiple avenues (e.g., email, mail, phone, fax, walk-in).	S	Verification documents can be submitted through all supported channels. Any paper documentation submitted will be scanned, saved in Hyland OnBase and linked to the related application.
ELG 123	The EES shall assign a unique identifier as specified by the Department to be for each person entered.	S	SmartPro MedEE will support a Department-unique identifier for each person in the system. Note that SmartPro MedEE will also support multiple unique identifiers per person (e.g., legacy DHHS identifier, passport number, for example.)

ELG 124	The EES shall allow an applicant or applicant's authorized representative to review the current application before and after formal submission with the appropriate safeguards and security measures.	S	The applicant and the applicant's authorized representative can view the application before and after submission. The authorized representative will also have to log in to the system, in order to view all applications that they are the authorized representative for.
ELG 125	The EES shall not allow an applicant and applicant's authorized representative to submit more than one application within 30 days from the initial submission unless the application was denied.	W	SmartPro MedEE will prevent the applicant from submitting more than one (non-denied) application within 30 days. Some configuration necessary in order to modify the existing submission workflow to implement this logic.
ELG 126	The EES shall allow an applicant or applicant's representative to amend an application as long as a determination has not been made.	S	An application can be amended up to the point that a determination is made. If a change is submitted after the determination is made, then this change is treated as a Change in Circumstance, and a re-determination will be carried out.
ELG 127	The EES shall allow the applicant or applicant's authorized representative to save and amend the application or renewal for up to 30 days in order to gather additional information prior to submittal.	M	Modifications are required to implement logic that will prevent further amendments to an application or renewal after 30 days.
ELG 128	The EES shall allow and record an applicant's request to withdraw an application.	S	A submitted application can be withdrawn by the applicant.
ELG 129	The EES shall only collect applicant/household information once and share across Department designated fields.	S	Applicant and household information will only be collected once. This data will be available for sharing through SmartPro MedEE's ESB, IBM Integration Bus.
ELG 130	The EES shall provide an automated or guided application process to enable the worker to easily enter required information.	S	The user is presented with a guided script of questions to simplify new application data entry and change in circumstance data entry. At any time, the user can jump back to any section previously completed.
ELG 131	The EES shall capture and track from which organization an application was submitted.	S	SmartPro MedEE will capture and track the source organization responsible for submitting an application, and provide a report on this information..

ELG 132	The EES shall monitor the number of applications submitted and abandoned and the number of applicants who requested assistance via chat, telephonic, etc.	M	SmartPro MedEE will track the number of submitted and abandoned applications, and the channels by which applicants request assistance, and provide a report on this information.
ELG 133	The EES shall monitor and report on number of applications received and the method by which they were submitted.	M	SmartPro MedEE will track the number of applications received, and their method of submission, and will provide a report on this information.
ELG 134	The EES shall capture interview dates.	S	SmartPro MedEE enables the applicant to request an interview and select interview dates. The interview request is linked to the new application and can be viewed and maintained by a worker.
ELG 135	The EES shall provide system-generated date and time stamp for receipt of electronic applications to be used in monitoring standards of promptness by program.	S	The date and time of an electronic application is captured in SmartPro MedEE.
ELG 136	The EES shall provide system-generated date and time stamp for registration of paper applications.	S	The date and time of a paper application registration is captured in SmartPro MedEE.
ELG 137	The EES shall provide a mechanism to begin benefits on a date different than the application date and system-generated date.	S	The benefits start date can be different to the application date.
ELG 138	The EES shall capture and display date that a disposition was made on an application/renewal.	S	The date that the application/renewal is disposed is tracked and displayed in SmartPro MedEE.
ELG 139	The EES shall check each incoming applicant against existing eligibility database to determine if the incoming applicant is new to the system, reopening a prior category, or adding applicants to existing household.	S	SmartPro MedEE supports a person match function by identifying a new applicant to existing participants registered in the system.
ELG 140	The EES shall allow continuance of the application process for applicants without an SSN and assign pseudo-number and ensure pseudo number allows match to get correct SSN.	S	SmartPro MedEE will accept an application where SSNs are not provided for all members of the household. When this occurs, SmartPro MedEE will generate a unique identifier for these members.
ELG 141	The EES shall provide a mechanism to match and replace the pseudo-SSN with the actual SSN.	S	SmartPro MedEE will enable a worker to add the SSN to the member record, and set the SSN as the primary reference number for the member. The auto-generated unique identifier will remain on the member record. The member can be searched for using either reference number.

ELG 142	The EES shall route applications to the appropriate staff, based on business rules.	W	Applications are routed to a central work queue, by default. Workflow configuration logic will be required to route applications according to the Department's specifications.
ELG 143	The EES shall display to the applicant discrepant information between the new application and information stored in the existing household.	M	Some modification will be required to highlight discrepant information.
ELG 144	The EES shall provide a mechanism through which an applicant could check the applicant's status.	S	The applicant can check their application status by logging in to the client portal
ELG 145	The EES shall provide the ability to allow applicants to submit paper applications, whether through walk-in, fax or mail-in.	S	Paper applications received in person, through the mail, or by fax will be scanned and OCR'ed. The electronic image will be saved in the Hyland OnBase. The OCR process will trigger a workflow which will attempt to process the application automatically and without agency worker intervention. Refer to requirement GEN 009 and OPS 013.
ELG 146	The EES shall provide capability to track incomplete, new, add-on, and pending applications.	S	SmartPro MedEE will track the status of all applications.
ELG 147	The EES shall allow for a manual verification process when the Marketplace hub verification service is not available.	S	A worker can upload documents in support of manual verification. These documents will be to Hyland OnBase and be directly linked to the new application or the ongoing eligibility case.
ELG 148	The EES shall provide a mechanism to indicate which verification documents have already been provided.	S	SmartPro MedEE maintains a list of received and outstanding verifications outstanding for an application.
ELG 149	The EES shall send notification of alternative verification options to the applicant when electronic verification is not available.	M	Modifications are required to notify the applicant of alternative verification options if data cannot be verified electronically. Refer to requirement ELG 011.

ELG 150	The EES shall provide the capability to determine and correct eligibility for current and prior months.	S	Eligibility determination can process prior, current and future periods of time. Where an existing determination exists for a period of time, and where data, rules or rates change during that period of time, eligibility can be re-run resulting in a new eligibility decision for that period of time, superseding the previous decision. A history of all eligibility decisions (superseded and current) is maintained.
ELG 151	The EES shall determine eligibility without worker intervention, as allowed by policy (e.g., exceeds the Medical Assistance income limit).	S	Eligibility determination can be triggered at any time manually or automatically. SmartPro MedEE will support no-touch claims. A no-touch claim can be submitted through the client portal or via scanning and OCR of a paper application or fax. Once captured, the data can be auto-verified against the Federal data hub, and if no verifications are outstanding, the application will be auto-disposed, and an eligibility determination created. This overall process will be orchestrated by a workflow. At any time, if a problem is encountered, the workflow will raise a task for the attention of a user, group of users or work queue, to examine the application and fix the problem. Once such a problem has been fixed, no-touch processing can resume.
ELG 152	The EES shall allow designated users to override eligibility determinations.	M	SmartPro MedEE will support manual override of eligibility by authorized users as such a modification is required. Manual override of eligibility requires changes to benefit data captured (override indicator data required) and rules. When manual override is selected, an audit trail will be created.
ELG 153	The EES shall send eligibility determinations to the MMIS enrollment system on a real-time basis to support plan enrollment and claims processing functions.	M	SmartPro MedEE will integrate Cúram with the MMIS system using its ESB capability to support the necessary real-time interface. Refer to requirement IER 010 for related modification effort.
ELG 154	The EES shall generate reports related to eligibility decisions.	C	SmartPro MedEE will generate the required reports relating to Eligibility decisions.

ELG 155	The EES shall be flexible enough to add additional Medical Assistance programs.	S	SmartPro MedEE application is highly extensible both through configuration and modification. A majority of changes required in support of additional Medical Assistance programs will be catered for through CER rules and Cúram Workflow configuration. Where such changes cannot be satisfied through configuration, SmartPro MedEE can be extended through modification.
ELG 156	The EES shall display the eligibility results in a manner that is comprehensive and easy to understand.	S	Eligibility results are displayed in a format that is both intuitive and comprehensive. An eligibility determination covers a period of time. It can contain multiple eligibility decisions during that period of time, if rules, rates or eligibility data changed during that period. A single eligibility decision is displayed across a set of tabbed panels. The initial panel contains a summary of the eligibility decision. Subsequent panels display a breakdown of this eligibility decision. Depending on the program, these will include household eligibility results, income eligibility results, and resource eligibility results.
ELG 157	The EES shall have spenddown capability, including automating a spenddown of resources and income calculation.	S	SmartPro MedEE will support spenddown capability including the automation of spenddown of resources and income calculation.
ELG 158	The EES shall allow the Department to set enrollment limits and provide a mechanism to manage applications for programs that are at whose enrollment is capped.	M	SmartPro MedEE will support enrollment limits. out-of-the-box wait list capability will be used to manage applications for programs for which the enrollment limit has already been reached. Modifications are required to enforce enrollment limits (program level maintenance of enrollment limits, rules to check if enrollment max has been reached, processing of items on wait list), and to issue wait list notifications (added to and removed from wait list).
ELG 159	The EES shall provide the capability for certain programs, as identified by the Department, to be flagged according to funding source.	M	SmartPro MedEE will support linking programs to funding sources. Using Cúram's Codetable of funds and screens will associate a program type with a fund.

ELG 160	The EES shall evaluate the resource/asset eligibility of an applicant when determining eligibility for those programs requiring a resource / asset test.	S	SmartPro MedEE eligibility rules evaluate resource and asset eligibility using program specific eligibility rules and limits.
ELG 161	The EES shall allow authorized users to search online household files using key fields such as name, SSN, ID, date of birth, etc.	S	SmartPro MedEE provides a client search function that enables the worker to search for all clients across all household using multiple search criteria. For each client returned the household(s) that this client is part of are directly accessible.
ELG 162	The EES shall provide a mechanism for authorized users to access beneficiary/household summary from any screen.	S	Case information is organized and displayed across a set of tabbed panels. A case context panel is always displayed, above these tabs, to show high level summary data about the case regardless of what part of the case the case worker is focused on. Beneficiary and household summary data are included on this case context panel and are always visible within a case.
ELG 163	The EES shall provide the capability to re-open a category that is closed in the status it was before the closure.	S	A history of all status changes is maintained in SmartPro MedEE. This history supports reverting to a previous status.
ELG 164	The EES shall provide a mechanism to indicate relationships between all members of a household.	S	When a new application is created, household relationships are requested and captured for all members of the household. Inverse relationships are automatically created.
ELG 165	The EES shall provide a mechanism to automatically create the inverse family relationships (e.g., parent - child, child - parent, etc.).	S	When a relationship is created between two clients, an inverse relationship is automatically calculated and captured.
ELG 166	The EES shall provide the capability to perform mass terminations due to changes in status as well as program changes.	S	A non-technical user can be authorized to make changes such as eligibility rules changes, or rates changes that can result in mass termination, affecting a large number of program eligibility cases. To ensure that such mass changes happen in a controlled manner without impacting online performance, these requests are designed to either run in batch, or if preferred, asynchronously on-line using separate dedicated hardware.

ELG 167	The EES shall provide household-based activity checklists (to-do lists) to assist in prompting the workers in the completion of required household activities	S	A list of work item tasks will be associated with an application or case. This list will enable a worker to view outstanding and completed work items related to a case.
ELG 168	The EES shall allow for interview scheduling and tracking of completed interviews. Send client notification of interview is not completed.	M	SmartPro MedEE enables the applicant to request an interview. The interview request is linked to the new application and can be viewed and maintained by a worker. Some modification required around tracking attendance and issuing no-show notices.
ELG 169	The EES shall include workflow management based on whether an applicant is MAGI-based and/or MAGI-excepted households.	S	SmartPro MedEE will react accordingly based on whether the applicant is MAGI based or MAGI excepted. Both categories of population are supported out-of-the-box in IBM Cúram for Medical Assistance.
ELG 170	The EES shall identify all types of incomes (e.g. countable or exempt statuses of incomes, and resources by program or individual).	S	IBM Cúram for Medical Assistance" supports a wide range of income types, out-of-the-box.
ELG 171	The EES shall provide the capability at an individual level to be able to rework a prior case that is closed even if an open case exists.	S	A worker can rework a closed case, even if another case is currently open.
ELG 172	The EES shall track program requirements for individuals, e.g., those who are penalized due to transfer of assets.	S	Program requirements, such as the need to capture transfer of assets details for LTC clients, are captured in SmartPro MedEE. Program specific eligibility rules reference this data to determine eligibility.
ELG 173	The EES shall provide an automated screening tool to determine potential eligibility status using predefined rules and to route to the next step in the process.	W	The Cúram screening tool enables customers to screen for potential eligibility. This screening tool provides a pre-configured question script and preconfigured screening rules for determining potential eligibility. Configuration will be required to ensure that Department-specific requirements are supported.

Appeals Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
APP 001	The EES shall support an electronic appeals process, which includes transmission of data to the federal Hub, interfacing with document imaging, and a client web accessibility	S	SmartPro MedEE will support electronic Appeals processing. SmartPro MedEE will support interfacing with the federal hub, interfacing with document imaging and enabling applicants to interact with EES over a web client portal.
APP 002	If an Appeals decision is in favor of The Department, the EES shall automate the recovery of premiums or medical services that were paid and auto-generate form to Finance Office for recovery.	M	If an appeal decision is made that is in favor of the Department, and covers a period of time during which financial payments were made on behalf of a client that should not have been paid, SmartPro MedEE will automatically create an over payment record. This over payment record will track the total amount that should be recovered from the client. Modification is required to support the auto generation of a form for the Finance Office, containing details of the over payment calculated.
APP 003	The EES shall capture and track the disposition of appeals (including status, assignments, and relevant household notes).	S	An Appeal case will capture and track relevant appeal data including status, user assignments, attachments, and appeal notes. An Appeal case will be linked directly to the item under appeal.
APP 004	The EES shall record the detailed results and supporting documentation that result from or support an appeals decision.	S	An Appeal case will capture and maintain the appeal results. Supporting attachments and documents can be linked to an appeal case.
APP 005	The EES shall have the ability to be notified of results of Appeals	S	SmartPro MedEE will support the entry of appeal results as part of an appeal case.
APP 006	The EES shall automatically capture, retain, and display receipt of eligibility appeals.	S	When an eligibility appeal is raised by a client or a worker, an appeals case will automatically be created.
APP 007	The EES shall allow manually entered eligibility appeals.	S	SmartPro MedEE will support the manual creation of an appeal case.

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
APP 008	The EES shall record the reporter/source (name, address, associated agency of person expressing the eligibility appeals, etc.), if applicable.	S	SmartPro MedEE will link to the client or entity raising the appeal, and if not already registered in the system, will record the required details on that client or entity.
APP 009	The EES shall provide a mechanism to generate a list of received and pending verifications including eligibility worker entered comments.	S	The applicant is notified of all outstanding verifications as part of submitting the application online. Furthermore a list of all received and outstanding verifications are tracked against the application. A worker can view this list plus any worker comments entered at any time. Refer to requirement ELG 080.
APP 010	The EES shall assign a unique tracking number to the eligibility appeals.	S	When an appeal case is created it is assigned an auto generated unique tracking number.
APP 011	The EES shall assign a worker, or group of workers, to manage eligibility appeals.	S	A worker or group of workers can be assigned as owner of the appeal case.
APP 012	The EES shall update/change manager assigned to a eligibility appeal.	S	A manager can be assigned to the appeal case. An existing assignment can be updated. A history of all assignments will be maintained.
APP 013	The EES shall identify and assign the priority of eligibility appeals.	S	In SmartPro MedEE, an appeal case supports a priority level.
APP 014	The EES shall cross reference common eligibility appeals (e.g. receiving 100 fair appeals requests from a single customer on a single policy change).	S	In SmartPro MedEE it will be possible to associate multiple appeals with a single customer and cross reference these appeals with an appeal reason.
APP 015	The EES shall track when a request for reconsideration becomes an appeal request.	S	In SmartPro MedEE, a request for reconsideration will become an appeal request when an appeal case is created. The creation date of the appeal case will represent the start date of the appeal request.
APP 016	The EES shall provide the facility to export and print case histories and case notes for the purposes of appeals.	M	Modification effort will be required to export and print case details and case notes in support of the appeals process.

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
APP 017	The EES shall support the appeals process for customer exemption decision.	S	In SmartPro MedEE, the customer can raise an appeal for an exemption decision.
APP 018	The EES shall accept and adjudicate customers appeals regarding eligibility determinations and exemptions from the customer responsibility requirement.	S	SmartPro MedEE will accept and support the adjudication of appeals regarding eligibility determinations and exemptions from the customer responsibility requirement.
APP 019	The EES shall associate the eligibility appeals to a case(s) and /or a customer(s).	S	An appeal case will be linked to the relevant customer and the relevant eligibility case.
APP 020	The EES shall track all eligibility appeals.	S	SmartPro MedEE will track all eligibility appeals as appeal cases.
APP 021	The EES shall track multiple eligibility appeals from a single contact.	S	A single client or entity can raise multiple appeals. SmartPro MedEE will track all appeals raised by that client or entity.
APP 022	The EES shall store all eligibility appeals in a central location.	S	SmartPro MedEE will store all eligibility appeals in the SmartPro MedEE database.
APP 023	The EES shall track a request for reconsideration outside of standard case notes	M	Modification effort will be required to track requests for reconsideration against eligibility cases.
APP 024	The EES shall log updates to an appeal in case notes	S	All updates to appeals will be logged against the appeal case. Note that an appeal case supports appeal case notes.
APP 025	The EES shall add notes to appeals	S	SmartPro MedEE will support notes for an appeal case.
APP 026	The EES shall capture history of eligibility appeals by multiple parameters (e.g. source, subject, date, etc.)	S	A history of appeals will be maintained in SmartPro MedEE. An appeal will be represented by an appeal case which will contain relevant details such as subject, start date, notes, and attachment.
APP 027	The EES shall sort history of eligibility appeals by multiple parameters (e.g. source, subject, date, etc.).	S	SmartPro MedEE will support a list of appeals for a client, for a single eligibility case (more than one appeal could have been raised) and for all appeals across a filtered list of eligibility cases. These lists can be sorted by column header.

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
APP 028	The EES shall document an audit trail which reflect who updated associated details to a case.	S	SmartPro MedEE will maintain an appeal audit log that will reflect important events that occurred on that appeal, including worker audit events that represent update made on the appeal case.
APP 029	The EES shall provide the capability to record all decisions of appeals.	S	SmartPro MedEE captures all decisions made on an appeal, including hearing decisions, hearing review decisions and if required judicial review decisions.
APP 030	The EES shall alert appropriate staff when action is needed or information is due to ensure timely processing of the eligibility appeals.	S	Configured Milestones are used to track timeframes and deadlines in SmartPro MedEE. Workflow logic associated with these milestones will alert users, groups of users or work queues of approaching and past deadlines.
APP 031	The EES shall support an appeals process on individual exemption decisions from the individual responsibility requirement.	S	In SmartPro MedEE, the customer can raise an appeal for an exemption decision. Refer to requirement APP018.
APP 032	The EES shall provide the functionality to reinstate service coverage until the Administrative Appeals decision is rendered.	S	SmartPro MedEE supports both terminating and continuing service delivery during appeals processing.
APP 033	The EES shall provide the ability to allow applicants to view, confirm, dispute and submit corrections to verification results.	M	SmartPro MedEE will enable the worker to view, confirm and submit corrections to verification results. The worker can also register a dispute on behalf of the applicant. Exposing this functionality online to enable the applicant to view confirm, dispute and submit corrections to verification results will require modifications. Refer to requirement ELG 078.
APP 034	The EES shall have the ability for customers to request a postponement of an appeal if the request is made in compliance with State and federal guidelines.	S	SmartPro MedEE will support the customer in requesting the postponement of an appeal. Postponing an appeal with change the status of the appeal case.
APP 035	The EES shall have the ability for the customers to request for reconsideration to handle inquiries.	M	SmartPro MedEE will support the ability for customers to appeal all eligibility determinations.

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
APP 036	The EES shall have an appeal request submitted through multiple channels including phone, e-mail, letter, etc.	S	An appeal request can be submitted through all listed channels. The worker portal will enable a call center worker to raise an appeal on behalf of a client who phones or walks-in.
APP 037	The EES shall provide an electronic template for eligibility appeal process.	S	SmartPro MedEE will provide a standard process for capturing a new appeal.
APP 038	The EES shall generate a referral to a third party assignee. (e.g. regular letter, email, automated referral, etc.).	M	Modification is needed to support a new referral notification template and logic to populate this template with data from SmartPro MedEE. Workflow configuration effort also needed re automated referral.
APP 039	The EES shall require a response by the third party assignee on a case by case basis.	S	The assignee response will be attached to the appeal case (e.g. letter received, copy of email). The response will be tracked by workflow.
APP 040	The EES shall have the ability for customers to request an appeal in written form or verbally and followed up in writing.	S	SmartPro MedEE will support a customer request for appeal when submitted in written form or verbally. The written request can be attached to the appeal case. The verbal request can be entered as notes on the appeal case.
APP 041	The EES shall maintain health benefit plan at the current level after an appeal is requested by the customer on a timely manner until the decision of appeal is made (for a discontinuance of an active case).	S	When an appeal is requested, the case decision appealed will remain unchanged, until a decision is made. Thus SmartPro MedEE will maintain benefit levels as they were before the appeal was requested.
APP 042	The EES shall notify customer, third party entity, worker, etc. that the status of an eligibility appeal has changed. (e.g. pending hearing, withdraw, referred, etc.).	W	All interested parties in an appeal will be notified when the appeal status changes. Configuration is required in order to provide notifications with Nebraska look and feel. Similar to requirements: GEN 054, ELG 037, ELG 070, NOT 017.
APP 043	The EES shall notify applicants of failed verifications.	S	Applicants are notified of failed verifications through their MyAccount inbox. Support for new notice template and logic to populate this template required to support paper notifications.

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
APP 044	The EES shall notify the customer that their eligibility appeal has been received.	W	Configuration is required in order to provide notifications with Nebraska look and feel.
APP 045	The EES shall notify the customer who their eligibility appeal has been referred to.	W	Configuration is required in order to provide notifications with Nebraska look and feel.
APP 046	The EES shall provide a mechanism to track required verification timeframes.	S	SmartPro MedEE will track verification timeframes. As deadlines approach SmartPro MedEE can issue reminder notifications.
APP 047	The EES shall provide the capability to create an electronic household file that records all application data and organizes all supporting documentation and images in an easy-to-use format.	S	Household details are fundamental to EES eligibility determination. Throughout the life of an eligibility case, a history of all household details is maintained. Supporting documentation and images can be saved in Hyland OnBase and linked to from the household case. Refer to requirement ELG 072.
APP 048	The EES shall allow all individuals to exercise their right to appeal any eligibility determination for Medicaid, premium tax credits, cost sharing subsidies, or QHP eligibility.	S	SmartPro MedEE will enable individuals to request an appeal for any relevant medical assistance eligibility determination

Notifications Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
NOT 001	The EES shall generate notices by applicant/beneficiary preferred method of communication e.g., mail, email, or fax.	S	SmartPro MedEE notifies consumers using their preferred communication format. Messages are also delivered to the consumers account inbox, to support secure messaging. Refer to requirement ELG 011.
NOT 002	The EES shall support multiple pages and applicant/beneficiaries standard "Rights and Responsibilities" text, including, but not limited to, applicant/beneficiary's right to an Administrative Appeal.	S	SmartPro MedEE generates multi-page documents which can include standard text. Refer to requirements ELG 013 to ELG 015.
NOT 003	The EES shall allow applicant/beneficiaries to choose the method of preferred communication.	S	Each beneficiary can select their own preferred method of communication.
NOT 004	The EES shall record and track how correspondence was issued to the applicant/beneficiary.	S	SmartPro MedEE tracks all correspondence sent to the applicant/beneficiary, including keeping track of how the correspondence was issued and when. Issued correspondence is saved in Hyland OnBase and linked to from SmartPro MedEE.
NOT 005	The EES shall provide the capability for mass notifications to applicant/beneficiaries or groups of applicant/beneficiaries.	M	SmartPro MedEE will support issuing mass notifications through a batch driven mechanism. Modification is required in order to provide a batch job the necessary functionality to trigger the mass issuance of notices.
NOT 006	The EES shall auto-populate all forms with required information from the system (e.g., applicable dates, missing and provided verifications, notes, etc.).	S	SmartPro MedEE will populate forms and document templates with data from the SmartPro MedEE database.
NOT 007	The EES shall not have page limits.	S	SmartPro MedEE will support multi-page forms and documents with no page limits.

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
NOT 008	The EES shall produce notices and forms in English and Spanish languages as required by the federal and State statutes, regulations, and policies.	M	SmartPro MedEE will have the ability to generate notices and forms in multiple languages, including English and Spanish.
NOT 009	The EES shall issue notices at set timeframes according to program rules.	M	SmartPro MedEE will have the ability to issue required notices at set points in time, based on program logic. Modification is required in order to provide a notice batch job. A notice batch job will trigger the issuance of notices at set points in time.
NOT 010	The EES shall provide the capability to set and change release dates.	M	Maintaining release dates for notices will require some modification. This will include providing the ability for a worker to view a list of release dates and modify as appropriate.
NOT 011	The EES shall provide a mechanism to suppress and track any specific notice (one-time notice suppression).	M	Enabling a worker to suppress one or more notices will be included in the modification work required for NOT 010.
NOT 012	The EES shall provide a mechanism to suspend any notice type.	S	Refer to requirement NOT 011.
NOT 013	The EES shall provide a mechanism for designated persons to create new versions of notices/forms/correspondence from templates.	M	A worker can manually create a new version of a notice/form/correspondence from a template.
NOT 014	The EES shall provide standard letter templates and the ability to add free form text to customize a letter to the customer's specific issue.	S	SmartPro MedEE will provide the capability to generate notices from templates by combining data from the SmartPro MedEE database with a template of a suitable format. MS Word documents and templates can be further edited in MS Word. Editable PDF documents, produced by combining an empty, editable PDF document with data from the SmartPro MedEE database, can be further updated through Adobe Reader.

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
NOT 015	The EES shall allow workers to generate or regenerate a notice/form upon demand.	M	SmartPro MedEE will enable a worker to manually generate or regenerate a notice/form on demand. Some modification is required to fully support this requirement, specifically in support of PDF notices.
NOT 016	The EES shall generate a notice which includes a list of needed actions by the applicant/beneficiary by a standard due date (with a worker override), depending on the status or type of program applied for.	M	SmartPro MedEE will support the creation of a “notice of outstanding actions” for the applicant/beneficiary. Some modification effort is necessary to fully support this requirement. Workflow will be configured to track and react to due dates.
NOT 017	The EES shall notify the beneficiary when their enrollment status has changed based on pre-set parameters so that the appropriate notice is generated for the circumstance.	W	When Program and Program Category status changes, SmartPro MedEE will generate the appropriate notice to notify the beneficiary. Modification effort necessary to fully support required notices. Similar to requirements: GEN 054, ELG 037, ELG 070, APP 042.
NOT 018	The EES shall provide the capability to electronically generate notices to obtain missing information.	S	SmartPro MedEE will provide the capability to generate a notice requesting missing information. Related to requirement NOT 016.
NOT 019	The EES shall create a sortable history of all notices associated with the applicant/beneficiary, including specific dates, and have the ability to view notices.	S	SmartPro MedEE provides a sortable list of all notices for a consumer and for an application and case. The notices will be saved in Hyland OnBase and linked to from the SmartPro MedEE application. A single document can be linked to both a consumer record and a case record.
NOT 020	The EES shall provide the capability to bundle and send out multiple notices and/or send out notices with corresponding forms together.	S	The Worker can generate and print out multiple notices and/or forms in order to bundle the paper documents.
NOT 021	The EES shall provide the capability to change information in a notice or delete a notice if it has not been 'sent'.	S	SmartPro MedEE will support cancelling and regenerating correspondence that have not been sent.
NOT 022	The EES shall identify whether notice was auto-generated or worker-generated.	M	SmartPro MedEE will track if a notice was auto generated or manually generated. Some modification effort is required to track this data.

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
NOT 023	The EES shall have noticing tightly integrated with the Marketplace and complying with all ACA regulations for such integration.	S	SmartPro MedEE Notices will be designed to 'tightly' align with FFM noticing. Effort for ensuring this will be considered under specific notice requirements.
NOT 024	The EES shall send electronic and/or paper renewal notices to beneficiaries.	M	SmartPro MedEE will generate and issue renewal notices. Some modification effort is required to fully support the required renewal process. Related to requirements GEN 046 to GEN 049.
NOT 025	The EES shall pre-populate electronic and/or paper renewal forms with beneficiary information that is currently on file and allow the beneficiary to change or add information.	M	SmartPro MedEE will pre-populate the renewal notice with available information. Some modification effort is required to fully support the required renewal notice. Related to requirement GEN 049.
NOT 026	The EES shall renew eligibility based on current federal and State statutes and regulations. The system shall be modified as required to meet all federal and State statutes that are changed during the life of the contract.	S	Upon receipt and input of any renewal updates, SmartPro MedEE will automatically recalculate eligibility for the household. Eligibility processing uses the configured rules and rates. These rules and rates reflect the Federal and State statutes and regulations.
NOT 027	The EES shall track and provide notification to users when a renewal is due.	W	SmartPro MedEE will track and provide notification functionality to workers when a renewal is due. Workflow configuration is required to fully support this requirement.
NOT 028	The EES shall track which electronic and/or paper renewals have been sent and which have been returned,	M	SmartPro MedEE will track the current status of a renewal; created, issued, and returned. Some modification effort is required to support renewal functionality.
NOT 029	The EES shall allow workers to generate notices, compliant with State and federal regulations at the time of notice generation, throughout the appeal process.	S	Notices can be generated throughout the appeals process. Support for manual generation of PDF notices catered for in requirement NOT 015.

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
NOT 030	The EES shall accept automated and manual responses received on referrals sent and associate them with initial referral.	S	Referral responses, e.g., for workflow referrals, will be related to the initial referral task. The initial referral task represents the original referral sent to a worker. Refer to requirements OPS 044 to OPS 048.
NOT 031	The EES shall retain history of all referrals sent and responses received.	S	SmartPro MedEE will track all referral workflow processes. Refer to requirements OPS 044 to OPS 048.
NOT 032	The EES shall store a copy of notices. These notices shall be available to the work units that support these functions (CSE, TPL, HIPPS, ERU, and Medical Subrogation).	S	SmartPro MedEE will store all generated notices in the solution's Document Management System. These notices will be available to EES workers.
NOT 033	The EES shall generate Notice to customer that the full application must be completed to continue coverage beyond the presumptive eligibility period.	M	SmartPro MedEE will notify the customer, eligible under Presumptive Eligibility, that a full application is required to continue eligibility. Modification effort is required for Presumptive Eligibility processing. Refer to requirements GEN 068 and ELG 056.

The Non-Functional Requirements Traceability Matrix (RTM) is used to document and track the project requirements from the proposal through to testing to verify that the requirement has been completely fulfilled. The Contractor will be responsible for maintaining the set of Baseline Requirements directly related to the configuration of the EES. Additions, modifications, and deletions to these requirements will be added and modified throughout the project so it is imperative that a current version of the matrix be maintained at all times.

Bidders must provide an initial RTM as part of its proposal. The RTM shall follow the instructions below. The Bidder must state requirements exactly as they are provided in this RFP. The Bidder must indicate how it will achieve full compliance (i.e., requirement fulfilled 100%). Any requirements that the Bidder cannot attest to full compliance must be documented as outlined in Appendix D: Gap Analysis.

Bidders are required to provide a response, using the appropriate codes provided in the tables below, for each requirements listed in the Functional Requirements Response Matrix. Scoring for each requirement will directly relate to the Ability Code indicated by the Bidder.

Ability Code	Condition	Description
S	Standard Function	The proposed EES fully satisfies the requirement as stated. The Bidder must describe how the requirement is satisfied by the EES.
W	Workflow or System Configuration Required	Current functionality of the proposed EES exists in the EES and can be modified by a system administrator to meet this requirement. The Bidder must describe how the requirement will be satisfied.
M	Modification Required	The proposed EES requires a modification to existing functionality to meet this requirement which requires a source code modification. The EES will be modified to satisfy the requirements as stated or in a different format. The Bidder must describe the modifications. If the modification requires 1000 or more hours the Bidder must also complete Appendix D Gap Analysis.
F	Planned for Future Release	This functionality is planned for a future release. The Bidder must describe how the requirement will be satisfied by the EES and when the release will be available.
C	Custom Design and Development	The proposed EES requires new functionality to meet this requirement which requires a source code addition. The Bidder must describe the feature and its value. If the custom design and development requires 1000 or more hours the Bidder must also complete Appendix D Gap Analysis.
N	Cannot Meet Requirement	The proposed EES will not satisfy the requirement. The Bidder must explain why the requirement cannot be satisfied. The Bidder must complete Appendix D Gap Analysis.
O	Other Software	If the requirement is to be satisfied through the use of a separate software package(s), the Bidder must identify those package(s) and describe how the functionality is integrated into the base system.

General System Requirements

Req #	Requirement Description	Bidding Ability Code	Proposed EES/Comments
GSR 001	The EES shall follow a modular, flexible approach to systems development which is consistent with the MITA 3.0 guidelines, the CMS Exchange Reference Architecture, and Service-Oriented Architecture (SOA) design principles.	S	<p>IBM Cúram is based on a modular Service-Oriented Architecture and is compliant with MITA 3.0 standards. Its architecture is compatible with the MITA 3.0 business, technical, and data architecture framework, its business maturity model, and its process and planning guidelines. For example:</p> <ul style="list-style-type: none"> • Service-oriented Architecture • Open Technology and Standards • Platform Independence • Security and Privacy • Common Interoperability and Access • Adaptability and Extensibility • Performance Metrics • Cloud Computing <p>Moreover, Cúram provides prebuilt, domain-specific, outcome-focused business processes built on a unified data model. Cúram enables social enterprise agencies, such as DHHS, to achieve higher levels of efficiency, and more importantly, effectiveness in their efforts to improve the lives of their citizens.</p>

Req #	Requirement Description	Bidding Ability Code	Proposed EES/Comments
GSR 002	The EES shall follow an n-tiered (layered) architectural approach in which presentation, business logic, and data access are separated.	S	SmartPro MedEE supports a modern n-tier Java Enterprise Edition (Java EE) architecture with separate Presentation, Application (business logic), and Persistence (data access) tiers. <ul style="list-style-type: none">• The Presentation Tier manages the creation and population of the screens/pages which the client will use to interact with the application;• The Application Tier is where the business objects are manipulated and application business logic is handled;• The Persistence Tier manages the storage, retrieval and updating of system data.
GSR 003	The EES shall provide scalable architecture.	S	SmartPro MedEE is built on a Java EE architecture that is scalable. It is SOA compliant and facilitates incremental implementation strategies so that additional components can be added over time to enable Nebraska DHHS to adopt a seamless, enterprise-wide solution. Scalability is a fundamental capability of the overall infrastructure, platform and hardware proposed.

Req #	Requirement Description	Bidding Ability Code	Proposed EES/Comments
GSR 004	The EES shall be architected with no single point of failure, supporting a high-availability enterprise.	S	IBM Cúram is deployed on a JEE Application server. Cúram supports IBM WebSphere Application Server and Oracle WebLogic Application Server. Both WebSphere and WebLogic support deployment of Cúram in a high availability configuration. A high availability configuration includes multiple application server nodes deployed across multiple physical machines or machine partitions. The overall SmartPro MedEE solution is hosted on IBM's PureApplication server, which is a high availability, no single point of failure platform. It has fully redundant HW, processors, busses, storage, power, network interfaces and so forth. The entire network fabric is fully redundant, with no single point of failure. The System Architecture is implemented with clustering for load balancing and auto-failover, and VMs are configured for auto-restart.
GSR 005	The EES shall be deployable to servers running one of the following operating systems: - Linux - Unix - Windows - z/OS	S	SmartPro MedEE is built on the JavaEE architecture. All listed platforms are supported. See the following for details: http://www-01.ibm.com/support/docview.wss?uid=swg27036661#plats

Req #	Requirement Description	Bidding Ability Code	Proposed EES/Comments
GSR 006	The EES shall support deployment on virtualized servers to support scalability and flexibility.	S	<p>The entire hosting environment is a fully virtualized “Cloud In A Box” implementation based on the IBM PureApplication Server. PureApp implements fully pre-configured, Pattern based VM installation with fully integrated middleware – a completely operational multi-tier web application architecture with clustering and automatic failover can be defined and instantiated, ready for application deployment, within 10-15 minutes, start to finish.</p> <p>VM’s can be automatically tuned by PureApp by modifying the physical resources assigned according to configurable business rules setting limits, and resource utilization and performance targets. Once configured, PureApp self-manages physical resource assignments to meet workload SLRs, without service interruption.</p> <p>Full vertical and horizontal scaling is supported in our architecture – both automatically, and with human intervention.</p> <p>This flexible VM environment is used to implement each EES Environment as a customized workload within PureApp, each workload configured with a VM deployment model suited to its security, performance, and reliability needs.</p>
GSR 007	All infrastructure software used by the EES (operating system, databases, web servers, network management, etc.) shall be a version that is currently supported under standard maintenance agreements and is generally available during the life of the contract.	S	All SmartPro MedEE constituent software components are late model, supported by standard maintenance agreements. The Wipro / IBM Team will monitor the component’s lifecycles, and ensure that this currency is maintained throughout the life of the contract, and will work jointly with the State to schedule and execute the necessary upgrades and maintenance activities.

Req #	Requirement Description	Bidding Ability Code	Proposed EES/Comments
GSR 008	The EES shall incorporate an externalized rules repository and engine that allows business rules (including, but not limited to eligibility rules, program determination rules, rate calculations, and application validation rules) to be separated from application logic and defined and maintained through graphical user interfaces or other non-programmatic means.	S	SmartPro MedEE uses the IBM Cúram Express Rules (CER) language and the CER Editor to define and maintain business rules. The CER editor is a graphical web based tool for business and technical users to view, create and manage CER rule sets. CER rule sets are stored as XML data on the EES database, and therefore are separate for other application logic. The EES solution is pre-integrated with the CER rules engine to simplify deployment, and can be externalized as a service for the benefit of remote systems.
GSR 009	The rules engine shall be scalable and flexible to allow it to support expanded eligibility and enrollment rules in the future.	S	SmartPro MedEE uses IBM Cúram Express Rules which has been built around the following design principle: A rules environment needs to be flexible, high performing, and easily configurable, so that ongoing changes in legislation and policy rules can be quickly implemented with the minimum of disruption. Thus scalability and flexibility are supported at the platform level and at the application level.
GSR 010	The EES shall use an enterprise workflow engine to support the routing of work items, work queues, etc.	S	SmartPro MedEE uses IBM Cúram's workflow management engine. The workflow management engine has support for managing the allocation of work items associated with workflow activity steps among machine resources, individuals and organizational units.
GSR 011	The EES shall leverage an electronic document management system that is integrated with the workflow engine to support the storage and retrieval of document images associated with member and eligibility and enrollment processes.	C	SmartPro MedEE will reuse the State's existing Hyland OnBase EDMS, using our ESB (IBM Integration Bus) to mediate the necessary real-time Web service based interface(s) between IBM Cúram's Case Management functionality and Hyland.

Req #	Requirement Description	Bidding Ability Code	Proposed EES/Comments
GSR 012	The EES shall use an industry-standard commercial Relational Database Management System (RDBMS), Application Server, and Web Server infrastructure.	S	SmartPro MedEE supports and depends on a standard commercial Relational Database Management system, an Application Server, and Web Server infrastructure. All components can operate with a number of common industry choices - SmartPro MedEE will be implemented for the State of Nebraska using IBM's DB2 and WebSphere middleware – already fully integrated and certified out-of-the box on the PureApplication Server platform.
GSR 013	The EES' transactional databases shall use data models, referential integrity, constraints, stored procedures, and other DB specific functions to ensure data is properly formatted and orphaned records are not allowed in the EES	S	SmartPro MedEE uses the data architecture of IBM Cúram's Social Program Management (SPM) Data Model; a data model which is based on identified best practice in the delivery of programs in the areas of social security, healthcare and human services. The data model runs on a transactional database (RDBMS) which uses DB specific functions to ensure data is consistent and accurate. IBM Cúram purposely avoids the use of Stored Procedures to avoid having business logic on the database tier.
GSR 014	The EES shall support a multi-tiered network deployment model that allows some physical tiers (e.g. load balancers, web servers) to be deployed in one network zone and other tiers (e.g. application servers, databases) to be secured behind internal firewalls	S	SmartPro MedEE architecture consists of a three-tier arrangement composed of Presentation, Application and Persistence tiers. The logical separation of these tiers allows the design and maintenance considerations of each to be addressed in relative isolation and facilitates upgrading or replacing of tiers independently as requirements or technologies change. The physical separation of these tiers supports deployment across multiple network zones including secure zones which are typically protected behind configured firewalls.
GSR 015	The EES shall employ an Enterprise Service Bus (ESB) that serves as the integration backbone and the broker between service consumers and producers.	S	SmartPro MedEE is built on top of IBM's Integration Bus (aka Message Broker), which provides all ESB services.

Req #	Requirement Description	Bidding Ability Code	Proposed EES/Comments
GSR 016	The EES shall provide a business process layer that manages/orchestrates executable business processes via the ESB, including reusable business services such as encryption, compression, validation, and dynamic routing.	S	The ESB implementation will be done using IBM Integration Bus which provides service orchestration at the ESB layer. The ESB mainly implements amalgamation of multiple data services, and/or business service to address business functionality. However the orchestration is mainly on the services layer. The Business Process Orchestration will be implemented in IBM Cúram.
GSR 017	The EES shall be architected using Business Process Management and workflow technologies as the primary integrated vehicle to implement business processes by composing them from human interactions and coarse-grained services.	S	SmartPro MedEE leverages the IBM Cúram Social Program Management Platform which incorporates extensive workflow management capabilities to support the automation of business processes and work allocation. Workflows can be defined to include human tasks and coarse-grained services. The EES enables Nebraska DHHS to define and maintain workflows to ensure that best practices are followed and to improve the speed, consistency, and quality of business processing.
GSR 018	The EES shall support multi-node application server processing so that application processing load can be distributed and balanced across multiple physical servers.	S	SmartPro MedEE will be deployed on a WebSphere Application Server. This application server is a network deployment application server which supports multi-node configuration so that application processing load can be balanced across multiple application servers.

Req #	Requirement Description	Bidding Ability Code	Proposed EES/Comments
GSR 019	The EES architecture shall ensure that reporting and batch processing does not interfere with general system responsiveness or availability.	S	<p>SmartPro MedEE architecture is design to minimize the impact that that batch processing will have on general EES user responsiveness and EES system availability. Batch processing is designed to execute on dedicated server resources independent of online focused server resources.</p> <p>The Business Intelligence component, used for both ad-hoc reporting and comprehensive system reporting, is based on a Cognos implementation executing against a Data Warehouse and multiple DataMarts that are fully isolated from the operational database and application. While executing in the same "Environment", the BI functionality has its own dedicated set of Virtual Machines isolated from the IBM Cúram component's VMs. The two components are each configured with dedicated physical resources that are separate, and do not interact. The IBM PureApplication Server Appliance, which hosts these VM structures, will automatically tune physical resources on the fly and without service interruption to maintain target resource utilization levels and responsiveness without human intervention.</p>
GSR 020	The EES workflow, web pages and program functions, shall be configurable and modifiable without changing program code.	S	<p>SmartPro MedEE is a highly configurable and extensible system. The Workflow Process Definition Tool (PDT), provided within the IBM Cúram administration application, is used to define and maintain workflow process definitions. As with most configurable functions provided in Cúram, the PDT is presented as an online web application. Web pages are all configured through XML User Interface Metadata (UIM) pages, Cascading Style Sheets (CSS), Intelligent Evidence Gathering (IEG) scripts, etc. without the need to change program code. In addition, the Cúram Administration Workspace is available to configure the system to meet the needs of Nebraska DHHS.</p>

Req #	Requirement Description	Bidding Ability Code	Proposed EES/Comments
GSR 021	The EES shall be designed and developed using a component-based architecture that is modifiable and reusable.	S	The fundamental architecture of SmartPro MedEE and its IBM Cúram component is component based and reusable. Underlying Cúram is IBM's Integration Bus (aka Message Broker), which supplies ESB functionality. IBM WebSphere SOA Policy Gateway (aka WSRR) provides Service Registry and SOA Governance functionality. Cúram's functionality can be exposed as SOA services, using the wide ranging choice of protocols and means of connectivity supported by the ESB.
GSR 022	The EES shall be designed, built and deployed in accordance with Enterprise Architecture best practices.	S	SmartPro MedEE and its major components of IBM Cúram and LifeRay Portal are fully modern architectures. Implemented based on J2EE, they support relational databases, business rule abstraction, workflow, and SOA architectures, amongst other modern best practices. The system will be built, configured, and deployed following the Federal ELC Life Cycle and Wipro/IBM's best practices driven Program and Project Management techniques. Deployment will be in a state of the art, fully virtualized and dynamic "Cloud-In-The-Box" platform, IBM's PureApplication Server.

Req #	Requirement Description	Bidding Ability Code	Proposed EES/Comments
GSR 023	The EES shall be built upon an infrastructure that is easily upgradable through patches and point releases, including the upgrading of the EES software and all prerequisite infrastructure software and the application of data migration or update scripts.	S	The SmartPro MedEE technical infrastructure is anchored by IBM PureSystems which accelerate the deployment of applications and analytics from weeks to days or minutes with the built-in expertise and integration by design. This reduces the time and cost associated with support and upgrades by providing single system-level fixes/patches/upgrades. Platform upgrades, which include firmware, OS, DB2, and WebSphere in a single certified fix-pack, can be applied in moments. Hardware upgrades can be made without service interruption. IBM Cúram is designed for simple point upgrades. It is compartmentalized into small functional modules implemented as WAR files for deployment – this allows most upgrades to be made by only updating a few small components, reducing both time and risk.
GSR 024	The EES shall have the ability to interact with the N-FOCUS legacy system to allow for all functionality of the old and new systems to be available.	M	IBM Cúram will be integrated with N-Focus according to the interfaces described in the RFP and its supplements. The ESB and File Transfer elements of SmartPro MedEE will be used to implement these connection points.
GSR 025	The EES shall comply with CMS requirements to establish a framework of enabling technologies and processes that support improved administration of the Medicaid program.	S	SmartPro MedEE meets this out of the box. It is 7 conditions compliant, built on a MITA compliant architecture.
GSR 026	The EES shall provide the ability to terminate, reverse or back-out a software update in the event it is discovered the update is erroneous or corrupted. The EES shall provide the ability to restore the data to the state prior to the update.	S	The standard procedures for build deployment meet this requirement. Data and system (VMs) are backed up at the point of deployment, and are restorable instantly if required, as they remain available online until the risk is sufficiently low that they can be moved to archival storage.

Req #	Requirement Description	Bidding Ability Code	Proposed EES/Comments
GSR 027	The EES shall provide a clearly defined promote-to-production process that enforces a strictly defined methodology for movement from development to QA and production.	S	<p>Our methodology incorporates complete formal Change Management, with formalized authorization to promote changes from one level to the next. Development and System Test will be managed by the Wipro / IBM team. Promotion to Integration Test, then to QA/UAT, Staging, and ultimately Production, are authorized by the State, and technically highly proceduralized. The Change process itself is supported by IBM Team Concert, which controls Change and Configuration Management.</p> <p>The Wipro / IBM team will document a Configuration Management Plan that will outline practices for release management and Change Management consistent with the CMS ELC Methodology. These processes will identify timelines and approval levels where both the State of Nebraska and the collective Wipro / IBM team will be involved before any configuration item or custom code can be promoted to the Production environment. Synchronization efforts between teams will be identified as part of the deliverable scheduling areas of the Configuration Management Plan.</p>
GSR 028	The EES shall provide the ability to roll back data and software releases/programs as requested by DHHS during testing cycles.	S	The PureApplication server's functionality to manage VM and Workload configurations will be used to implement streamlined procedures supporting rapid rollback and Environment restoration.
GSR 029	The EES shall provide DHHS with all changes, modifications, enhancements, or customized features it makes to any licensed software approved by the Department to be used in The EES.	S	We will comply with this requirement.

Req #	Requirement Description	Bidding Ability Code	Proposed EES/Comments
GSR 030	The EES shall include appropriate checkpoint/restart capabilities, and other features necessary to ensure reliability and recovery, including telecommunications reliability, file backups, and disaster recovery.	W	The implementation of SmartPro MedEE is fully redundant, without a single point of failure in its network, hardware, storage, and middleware. To achieve the highest degree of system availability possible under normal operations, the software architecture makes aggressive use of software redundancy, such as clustering with automatic internal fail-over and restart, to achieve maximal availability levels. Additionally, all components are actively monitored by our Data Center's Enterprise Management System, with real-time alerts to human staff should components fail, resources become over-burdened, or response times suffer. Within our Data Centers, all Environments (Production, QA, Training) of SmartPro MedEE are backed up according to custom documented backup procedures that build upon our Data Center's Standard Operating Procedures
GSR 031	The EES shall be deployed primarily as a web-based interface, so that users only need a web browser to access the EES.	S	SmartPro MedEE uses IBM Cúram's web applications which use web-based interfaces both for internal access (Worker Portal) and external access (Cúram Universal Access Portal).
GSR 032	The EES workflow, web pages, and program functions shall be configurable and modifiable without changing program code.	S	SmartPro MedEE solution is a highly configurable and extensible system. The Workflow Process Definition Tool (PDT), provided within the IBM Cúram administration application, is used to define and maintain workflow process definitions. As with most configurable functions provided in Cúram, the PDT is presented as an online web application. Web pages are all configured through XML User Interface Metadata (UIM) pages, Cascading Style Sheets (CSS), Intelligent Evidence Gathering (IEG) scripts, etc. without the need to change program code. In addition, the Cúram Administration Workspace is available to configure the system to meet the needs of Nebraska DHHS.
GSR 033	The EES shall maintain the security requirements set forth by federal and Nebraska government.	C	See all the security requirements in the RSR section.

Req #	Requirement Description	Bidding Ability Code	Proposed EES/Comments
GSR 034	The EES shall be scalable and flexible enough to accommodate any changes required by Nebraska and/or federal statute, mandate, decision or policy.	S	Scalability and flexibility are supported at the platform level (all proposed hardware and software is highly flexible and scalable) and at the application level. The EES application is highly extensible both through configuration and modification. A majority of changes required in support of State and/or federal statute, regulation, mandate, decision, or policy, will be catered for through CER rules and IBM Cúram Workflow configuration. Where such changes cannot be satisfied thru configuration, EES can be extended through modification.
GSR 035	The EES shall support multiple deployment environments, including development, test, training, and production. (sandbox, break-fix)	W	SmartPro MedEE supports 13 environments throughout the life cycle of the project. The environments to be used and supported are Production, Production Shadow, Disaster Recovery, Development, System Test, Integration Test, QA (Small), QA (Large), Sandbox, Training, Data Conversion, Staging, and PMO.
GSR 036	The EES shall provide the following testing functions: - Functional Testing - Regression Testing - Load & Performance Testing - Test case creation and tracking - Test data generation (i.e. data masking, data filtering, etc.)	W	Wipro will provide the mentioned testing functions. Apart from this Wipro will also use in-house testing tools and methodologies like Shift Left Methodology, WipDVA for data centric testing, StORM tools (Test Suite Optimizer [TSO]), CoDeC tools like DSM, SCE and SCIM. More details on this are available in the Testing section of the proposal response.
GSR 037	The EES should make the rules engine available in a shared services model to be accessed by other Nebraska systems.	M	The CER rules engine will be available as a service through the solution ESB. Some basic modification effort required to expose the rules engine as a service through the ESB.
GSR 038	The EES should leverage an enterprise content management system to store digital content, downloadable forms, and personalized on-screen content.	W	SmartPro MedEE uses LifeRay Portal to implement ECM/WCM, digital forms, content personalization, social media communications, chat, wiki, blog, and other forms of constituent communication.

Req #	Requirement Description	Bidding Ability Code	Proposed EES/Comments
GSR 039	The EES should assure that third party software, used for ancillary aspects of the EES, that require distribution or maintenance to remote desktops or servers can be capable of being distributed and configured on user work stations from a central site and not require onsite intervention. In other words, software should support "silent" or unattended installation functionality for any non-web based features.	S	SmartPro MedEE functions are almost exclusively Web based, requiring no client side software installation or management. The few tools that use workstation software meet these requirements as stated – these are very limited in scope, either developer testing tools, or designer tools deployed to a handful of Business Analyst roles.
GSR 040	The EES should be able to support the following multi-agency configurations:	S	SmartPro MedEE will support the following multi-agency configurations:
GSR 041	<ul style="list-style-type: none">Two or more independent yet integrated Agencies in a single instance of the business application running on a single instance of the technical infrastructure	S	SmartPro MedEE will support this configuration.
GSR 042	<ul style="list-style-type: none">Two or more independent yet integrated Agencies each with a separate instance of the business application which all run on the same instance of the technical infrastructure	S	SmartPro MedEE will support this configuration.
GSR 043	<ul style="list-style-type: none">Two or more independent, yet integrated, Agencies each with a separate instances of the business application which run on separate instances of the technical infrastructure.	S	SmartPro MedEE will support this configuration.
GSR 044	The EES should include a service management layer that provides the following:	S	SmartPro MedEE has selected IBM WebSphere Service Registry and Repository (WSRR) as the Service Governance tool. The model and Taxonomy of the Service development life cycle will be implemented in WSRR for design time and run time governance. WSRR supports UDDI as its core and WSDL to publish the service description for consumer consumption.

Req #	Requirement Description	Bidding Ability Code	Proposed EES/Comments
GSR 045	<ul style="list-style-type: none">A registry/repository in which all services related to the EES can be published. This registry should support Universal Description Discovery and Integration (UDDI) and the Web Services Description Language (WSDL)	S	<p>The ESB solution (IIB) will implement the reusable components for error handling, logging, auditing so that all services implemented in ESB uses those components for error handling, logging.</p> <p>IIB provides track and replay feature which can be used to track and replay of messages in message broker layer.</p> <p>The basic service monitoring is done using IIB off-the shelf capability. The advanced monitoring, platform will be done using IBM ITCAM as per configured in PureApplication Server.</p>
GSR 046	<ul style="list-style-type: none">Service monitoring, logging, and audit	S	<p>The ESB solution (IIB) will implement the reusable components for error handling, logging, auditing so that all services implemented in ESB uses those components for error handling, logging.</p> <p>IIB provides track and replay feature which can be used to track and replay of messages in message broker layer.</p> <p>The basic service monitoring is done using IIB off-the shelf capability. The advanced monitoring, platform will be done using IBM ITCAM as per configured in PureApp.</p>

Req #	Requirement Description	Bidding Ability Code	Proposed EES/Comments
GSR 047	<ul style="list-style-type: none">Should be open to others and reusable by other systems and agencies	F	<p>The WebSphere SOA Policy Gateway (WSRR) supports design time governance, run time governance for services to be discoverable during the design time and run time respectively. The services will be published using in standard based description using WSDL and the end points are based on standard protocols like Webservice, MQ, etc. which makes the services open and reusable for others within the enterprise.</p> <p>For Service exposure to the external (outside of the Enterprise Firewall) an AAA layer needs to be considered to be placed in the DMZ layer. DataPower XG-45 is the recommended hardware based appliance for exposing services (as Webservice, API) to external agencies. The Enterprise Services are published in DataPower which acts as security proxy for the services and protects the enterprise services. This element is for future expansion should the need materialize.</p> <p>At this time, this expense is not required, as standard ESB and File Transfer protocols cover all stated functional requirements.</p>
GSR 048	The EES should ensure that the use of acronyms and codes are consistent across the EES components (windows, screens, reports and databases or data dictionary).	S	The EES solution will provide consistent acronyms and codes across all components. The configurability of the EES solution (codetable items - code/description pairs, workflow, question scripts, etc.) enables non-disruptive update of user-visible content such as screens and messages. The database is based on the IBM Cúram data model and as such provides consistent terms and acronyms across the EES worker and client applications.
GSR 049	The EES should provide the ability to support client services through a variety of channels. This may include, but is not limited to web, kiosks, call centers, other organizations, and walk ins.	S	These channels are supported, and can be extended through both the LifeRay Portal and the ESB layer, depending on actual requirements.

Req #	Requirement Description	Bidding Ability Code	Proposed EES/Comments
GSR 050	The EES should allow new data items to be automatically included in migration paths during software upgrades.	S	The standard processes for system change and upgrade include data conversion and migration as part of the deployment scripts, to be used when required.
GSR 051	The EES should document and expose all SOA services using standard WSDL and industry best practices.	W	IBM WebSphere SOA Policy Gateway (WSRR) exposes SOA Services, following robust SOA governance practices.
GSR 052	The EES should leverage webs services and adhere to key standards such as SOAP, XML, UDDI, WSDL, BPEL, SAML, and other standards as detailed by the Department.	S	SmartPro MedEE is highly standards based in its design, following applicable industry standards throughout its constituent components. The middleware architecture is Web based, with SOA/ESB capability.
GSR 053	The EES should define service modules independently, with the interface modules bridging the gap between modules.	W	SmartPro MedEE proposed by Wipro is a modular, component-based application, which easily interfaces systems. SmartPro MedEE is rules-based and is built on SOA principles which supports modularity and effective interfacing between modules
GSR 054	The EES should provide the ability to refresh each environment.	W	The EES uses 13 Environments. The refresh activity for certain environment will be managed by periodic refresh activities, implemented using IBM PureSystems Manager. Examples of such periodic refresh are Production Shadow and Disaster Recovery. There are other environments where the refresh is managed on a need or demand basis. The refresh of the environments will be as defined in the Configuration Management Plan
GSR 055	The EES should have the ability to backup, recover, restart, and cancel jobs.	W	SmartPro MedEE uses IBM SmartCloud Workload Automation for Job / Workload Scheduling and Jobstream management. When the actual job duration deviates from the expected job duration, recovery actions, predefined by the user, are automatically taken by the tool.

Req #	Requirement Description	Bidding Ability Code	Proposed EES/Comments
GSR 056	The EES should utilize a web portal that is scalable and has the ability to accommodate additional systems and content in the future.	S	<p>LifeRay Portal is the portal and Web Content Management solution product, is scalable and will be deployed on a clustered environment to support a large user base. LifeRay is a leader in Gartner Quadrant for Horizontal Portals 2013 based on evaluation on scalable and other non-functional factors.</p> <p>It is built on an n-tier Java Enterprise Edition (Java EE) technical architecture that enables EES applications to be robust, scalable and adaptable. This allows the EES to accommodate additional systems and content whenever needed.</p>

Service Oriented Architecture (SOA) Requirements

Req #	Requirement Description	Bidding Ability Code	Proposed EES/Comments
SOA 001	The EES components shall be committed to an advanced approach to interoperability using web services and SOA aligned with Nebraska standards and vision for interoperability.	M	IBM Cúram functions can be exposed as needed using the underlying ESB and Service Registry components to implement SOA based services. Additionally, the ESB provides a wide range of supported techniques for deploying industry standard interfaces, ranging from batch file transfer to complex real-time transactions.
SOA 002	The EES shall provide the ability to distribute services amongst different components and tiers of the architecture.	S	SmartPro MedEE is designed as a tiered, Web-centric architecture, with a SOA layer in place supporting external interfaces.
SOA 003	The EES shall develop/integrate services using standardized Web Services formats.	S	Using the IBM Integration Bus (aka Message Broker), SmartPro MedEE supports the standard Web service formats.
SOA 004	The EES shall allow for centralized service maintenance (new, update, delete).	S	The service implementation will be following IBM WebSphere SOA Policy Gateway (aka WSRR) defined governance process for centralized service maintenance. Any service versioning, Service addition, deletion will be done in WSRR as centralized service maintenance.
SOA 005	The EES shall provide the ability to publish services and related data to be used by different types and classes of service consumers.	S	The services will developed will be exposed using standard protocol like Webservice, MQ, API, FTP (depending on the service consume patterns) for service consumption. For the service exposure the data are planned to be exposed as XML or JSON (for API) which is a standard that are followed by various service consumer. In case of file based integration the data will be transformed to CSV/delimited/accepted patterns depending on the service consumers which are mostly standard way of sending and receiving data via file.

Req #	Requirement Description	Bidding Ability Code	Proposed EES/Comments
SOA 006	The EES shall ensure enterprise-wide access to services through all required channels such as Nebraska facilities, phone, mail, and online via the Internet.	W	SmartPro MedEE combines use of its ESB (IBM Integration Bus aka Message Broker) and its LifeRay Portal to provide for a wide range of communication channels, including online, email, social media, chat, phone/IVR, mail (through use of the States Mailroom printing capability).
SOA 007	The EES shall provide the capabilities for a Real-Time (or near real-time) Integrated Enterprise where common data elements about the consumers served and services rendered are easily shared across organizational units with appropriate adherence to security and privacy restrictions.	S	The service providers adhere to the standard protocol or integration and the services are exposed in ESB with the standard protocols. The services are registered in WSRR for service governance. Policy enforcement is required in WSRR to keep track of service consumers who are using the services. The policy also needs to enforce appropriate security and privacy restriction to the access of WSRR.
SOA 008	The EES shall establish an interoperability layer that supports interactions among components via a variety of protocols (HTTP/plain old XML, SOAP, Internet Inter-ORB Protocol [IIOP], .NET remoting, Message-Oriented Middleware [MOM] protocols, file transfer protocols and others) and interaction styles (request/reply, conversational, publish and subscribe, asynchronous messaging and others).	S	<p>The middleware IBM Integration Bus supports variety of protocols like HTTP over XML, SOAP, MOM, IIOP, File transfer protocol using MQ FTE, etc. IIB also comes with .Net version however for .Net remoting is not recommended to be implemented in IIB with Java version. With the service implementation more standardized protocols are recommended to be used like HTTP, HTTPS, SOAP, MQ, JMS, etc.</p> <p>Using IBM integration Bus (IIB) various interaction styles will be implemented like request-reply, Pub-Sub (MQ Pub-Sub will be leveraged), Conversational, event based integration, etc.</p> <p>Wipro has developed Service Enabler Kit (SEK) in Message Broker which has implemented various integration patterns and classified all implementation into three broad based components like Façade, Mediation and Routing. The SEK provides effort savings during development. Wipro will try to see if the SEK can be used in the State's ESB implementation.</p>

Req #	Requirement Description	Bidding Ability Code	Proposed EES/Comments
SOA 009	The EES shall implement synchronous and asynchronous program-to-program communication, moving messages between SOA service consumer modules and service provider modules at runtime. The ESB component may also move files, database rows and other data.	S	The A2A integration within Enterprise will be implemented in IBM ESB layer. The services are classified into various categories like Data Services, ESB and Mediation Services, Business Services. Business Process Services (not implemented in ESB). The data Services are typically used to communicate data between two A2A layers. The ESB and Mediation services are used to communication messages between A2A, Services. The Business Services integrate multiple Data, ESB services. ESB along with MQ FTE can move files between two A2A applications within the Enterprise.
SOA 010	EES shall implement a SOA by using an ESB, responsible to monitor and control routing of message exchange between services, resolve contention between communicating service components, control deployment and versioning of services and marshal use of redundant services.	S	The ESB implementation will be done using IBM Integration Bus (IIB) and Service Governance by IBM WebSphere Service Registry and Repository (WSRR). ESB manages controlling routing of message exchange between services, service routing, mediation, etc. WSRR manages the service versioning, end point management (service contention), design time governance (selection of right services during design and development time). The policy enforcement is required to use WSRR as design time and run time governance, service versioning, discovery of service end point during run time, etc.
SOA 011	EES shall support creation and extension of service interfaces through the use of WSDL.	S	IBM Integration Bus (IIB) supports creation and extension of service interfaces using WSDL.

Interoperability & Interfaces Requirements

Req #	Requirement Description	Bidding Ability Code	Proposed EES/Comments
IOI 001	The EES shall provide a SOA based infrastructure (i.e. hub and spoke) for connecting to other EESs using an ESB infrastructure.	S	Wipro envisions a SOA based approach in identifying, defining, designing services for the Enterprise. For EES implementation the solution will be integrated with various enterprise applications such as MMIS, N-Focus, FFE, Federal Data Hub, State Systems, etc.
IOI 002	The EES's Interface architecture for internal A2A (Application to Application) integration shall not have a negative impact on the user experience and expectation for application performance. All points of contacts for A2A communications shall be documented.	S	All such functionality is documented as a byproduct of the defined SDLC, based on the CMS ELC standard. The interface architecture allows sufficient isolation, both logically and physically, to ensure that A2A integration has no discernable impact on application performance. IBM's ITCAM actively monitors performance against SLRs as part of our integrated Performance Management Process to ensure a positive user experience.
IOI 003	The EES's interfaces shall secure and protect the data and the associated infrastructure from a confidentiality, integrity and availability perspective.	W	The toolkit used by SmartPro MedEE to effect interfaces and integration, such as IBM Integration Bus (Message Broker) and Sterling Direct Connect, provide configurable confidentiality, integrity, and availability capabilities as intrinsic and configurable options.
IOI 004	The EES shall be able to support Application to Application (A2A) synchronous and asynchronous messaging using web services. The messaging capabilities will be able to support a wide variety of A2A patterns including, but not limited to, the following: -	S	The services are classified into various categories like Data Services, ESB and Mediation Services, Business Services. Business Process Services (not implemented in ESB). The data Services are typically used to communicate data between two A2A layers. The ESB and Mediation services are used to communication messages between A2A, Services
IOI 005	<ul style="list-style-type: none"> Data look-up and retrieval 	S	Data Look up and retrieval is implemented as Data Service in the ESB layer.

Req #	Requirement Description	Bidding Ability Code	Proposed EES/Comments
IOI 006	<ul style="list-style-type: none"> Data look-up with services provided by other applications 	S	Data Look up and retrieval is implemented as Data Service in the ESB layer.
IOI 007	<ul style="list-style-type: none"> Simple bulk data transfer to/from other EES's. 	S	IIB supports bulk data load using an event based integration pattern. When required, Sterling Direct Connect also provides bulk data transfer. IBM Cúram implements the necessary ETL steps using a mixture of code and the ETL tool.
IOI 008	The EES' interface infrastructure shall continue to operate despite failure or unavailability of individual technology components such as a server platform or network connection.	S	The design is fully redundant in network, hardware, and software architecture, with no single point of failure and automatic fail-over within the data center.
IOI 009	The EES shall have the capability to notify System Administrators/system support staff if an interface is not available for any reason. The notification and issue(s) shall be invisible to the applicant/beneficiary/client.	W	The Data Center's Enterprise Management System receives notice from the PureApplication Server's monitoring environment, including ITCAM, if any interface fails.
IOI 010	The EES' interfaces must be scalable to accommodate changes in scale including changes in user population, transaction volume, throughput and geographical distribution.	S	The SmartPro MedEE is open, flexible and scalable. SmartPro MedEE is architected using SOA. SmartPro MedEE is built upon IBM's PureApp server, a fully integrated web and cloud-ready hardware and software appliance. PureApp encompasses highly scalable hardware (IBM Power+ series), Operating System (AIX), Database (DB2 Enterprise), Application Server (WebSphere ND), virtualization, and monitoring/management in a single pre-integrated and certified whole. The SOA architecture provides for interoperability, scalability and, by avoiding single points of failure provides for high availability and resilience. The design is fully scalable both vertically and horizontally, without service interruption, including to the point of adding additional computing capacity while the system is still "hot".

Req #	Requirement Description	Bidding Ability Code	Proposed EES/Comments
IOI 011	The EES shall be capable of making any changes to the interface data elements/layouts easily, and to test those changes.	S	SmartPro MedEE employs tools-based data and architectural models, and easy deployment of changes to screens, fields, data elements, process flow and so forth. IBM Cúram abstracts Business Rules into a high-level Rules Engine, further easing significant changes. Automated test tools are used for functional, regression, integration, and load testing.
IOI 012	The EES shall implement, at a minimum, interfaces (both real-time or batch) with the applications and data sources listed in "Interface List - N-FOCUS" document included in the procurement library.	M	SmartPro MedEE meets these requirements, using the ESB and File Transfer components to mediate the communications between IBM Cúram and all listed points of interface.
IOI 013	The EES shall provide the capability to detect and remediate errors caused by batch processing and real time processing via user defined rules	W	IBM's SmartCloud Workload Automation tool is used to configure and execute intelligent "Job" scripts, and to manage their recovery. Serious event alerts are escalated to the Data Center's Enterprise Management System.
IOI 014	The EES shall provide the capability to perform source to destination file integrity checks for exchange data and alert appropriate parties with issues	W	Integrity checks are intrinsic in many of the protocols used for file movement. Application level checks will be implemented consonant with the interface requirements. For example, some interfaces are being implemented as exact replacements of existing ones, without the ability to redesign – these will have whatever level of application integrity/validation checking they have today. However, new interfaces, or ones where change is permissible, will make application validation a design consideration.
IOI 015	The EES shall build in contingencies for the storage of transactions where there is dependency on availability of data from business partners that provide authoritative data (e.g., the IRS, DHS, and SSA).	M	This is intrinsic in some of the interface specifications, and IBM Cúram functionality. Design determination will be made after Requirements Validation, on a case by case basis.

Scalability and Extensibility Requirements

Req #	Requirement Description	Bidding Ability Code	Proposed EES/Comments
SCA 001	The EES shall be designed for ease of maintenance and readily allow future functional enhancements. This shall be accomplished through use of modern design principles for SOA, applying principles of modularity, interface abstraction, and loose coupling.	S	The overall design of SmartPro MedEE and its constituent COTS components is modern, tiered, J2EE, SOA centric, rules based, workflow driven, modular, standards driven, with data and interface abstraction.
SCA 002	The EES shall be adequately flexible to keep up with ever changing technology and regulatory changes. This shall be accomplished by separating workflow and business rules into their own separate tiers.	S	Scalability and flexibility are supported at the platform level (all proposed hardware and software is highly flexible and scalable) and at the application level: Platform flexibility will enable EES to keep up to date with ever changing technology standards and available products. The EES application is highly extensible both through configuration and modification. A majority of enhancements required in support of regulation changes will be catered for through CER rules and IBM Cúram Workflow configuration. Where such changes cannot be satisfied thru configuration, EES can be extended through modification. The application rules and workflow components are pre-integrated with the overall eligibility solution. These components can be available as services through the solution ESB for the purposes of supporting external system rules and workflow needs.

Req #	Requirement Description	Bidding Ability Code	Proposed EES/Comments
SCA 003	The EES shall be scalable and adaptable to meet future growth and expansion/contraction needs such that the EES can be expanded on demand and be able to retain its performance levels when adding additional users, functions, and data.	S	SmartPro MedEE is built on an n-tier Java Enterprise Edition (Java EE) technical architecture that enables SmartPro MedEE applications to be robust, scalable and adaptable. Scalability and flexibility are supported at the platform level (all proposed hardware and software is highly flexible and scalable) and at the application level. SmartPro MedEE application is highly extensible both through configuration and modification while retaining performance levels when adding users, functions, and data to the system.
SCA 004	The screens shall be highly re-configurable, providing ability to reposition and rename field labels/data fields, remove or “turn-off” unused fields, maintain data, and allow addition of custom-defined fields.	S	SmartPro MedEE is a highly configurable and extensible system. Web pages/screens and data fields are configured through XML User Interface Metadata (UIM) pages, Cascading Style Sheets (CSS), Intelligent Evidence Gathering (IEG) scripts, etc. without the need to change program code.
SCA 005	The Department shall be able to modify the labels and arrangement of information in the data model EES documentation templates and can create custom data fields.	S	The data model used by SmartPro MedEE is extremely flexible. It is designed to be modified and extended where necessary without impacting future upgrades of the base IBM Cúram product. On screen labels and messages can be modified to suit the needs of DHHS. Labels and messages support multiple languages.
SCA 006	The EES shall provide the ability to create and/or modify edits and business rules which determine the correctness/integrity of data.	S	The IBM Cúram Expressive Rules (CER) editor, used by SmartPro MedEE, enables users to view rules diagrams which present the rules logic in graphical form. Users can use this editor to create new rules and enhance/modify existing rules to determine the correctness/integrity of data.

Req #	Requirement Description	Bidding Ability Code	Proposed EES/Comments
SCA 007	The EES shall provide the ability for on-line access by any site connected to the organization WAN.	S	SmartPro MedEE user interface is provided by IBM Cúram portals. Cúram portals are web-based and can be accessible through the organization's WAN. Cúram facilitates secure deployment both within an intranet and over the Internet, and enables agencies to deploy web portals providing self-service capability to clients, providers and partners.
SCA 008	The EES shall provide the capability for remote access in compliance with existing Nebraska / federal connectivity/security policies.	W	Compliant VPN access will be supported, using Juniper VPN for Wipro / IBM Team staff for maintenance/support activities, and the State's VPN for their internal staff.

EES Performance Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
PER 001	The Contractor must build the EES such that expansion of the system can be achieved with a minimum of additional system administration burden and staffing.	S	The system is fully scalable both vertically and horizontally. The IBM PureApplication Server allows for dynamic allocation/reallocation of physical resources without interruption, in real time, and can be automatically performed by the system itself according to configured business rules i.e. self-tuning. New hardware can be added without service interruption to a hot system, and placed into use immediately. Each of the two servers is in a single cabinet, which will be configured with 64 processing cores for this system. That single cabinet can be expanded to up to 608 processors. Management overhead remains nearly constant, regardless of processing power – management is highly automated and exception driven.
PER 002	EES Administration staffing requirements and workload should be minimally impacted with expanded system usage.	S	Only the help desk functions are closely coupled to usage, in that the number of State internal users will affect the related support staffing needs. However, system performance and capacity, external user capacity, and other technical measures have almost no impact on administrative staffing needs.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
PER 003	The Contractor must build the EES so that there is a near linear relationship between each additional server added, and the additional load that can be accommodated (load vs. capacity added), up to specified limit.	S	<p>The EES Solution is based on a a stateless JEE architecture. A stateless JEE architecture best supports linear scalability, such that as more processing power and memory is added in the server environment, the performance of the system will improve directly. The EES solution will take full advantage of new server resources.</p> <p>One typical scenario is adding memory to the existing server environment. User data is never cached in memory across web pages in the EES solution. When a user commits data on a page it is always written back to the EES database. Given that user transactional data is never cached in memory, the EES application will take full advantage of any new memory provided.</p>
PER 004	The EES shall use fully redundant network and hardware. Hardware components (such as processor and memory) should have built-in redundancy to allow a second component to take over in the event of a failure in the primary component. Similarly, redundant paths should also exist for networks.	S	The PureApplication Server Appliance is fully redundant, with no single point of HW failure. Processors, compute nodes, memory, busses, power, network interfaces, storage and such are all redundant, and failover is automatic. Equally, the entire network fabric is fully redundant, including routers, firewall, network segments and so forth.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
PER 005	The EES shall leverage virtualization to expedite disaster recovery.	W	<p>SmartPro MedEE is built upon IBM's PureApp server, a fully integrated web and cloud-ready hardware and software appliance. PureApp encompasses many features including virtualization. PureApp's virtualization environment will be utilized by all computing resources of both the Primary (Production) and Secondary (Disaster Recovery) locations to expedite disaster recovery.</p> <p>During normal operations, the Production VM environment will ship database logs to a shadow VM environment operating at the contingency center. The Disaster Recovery VM Environment is kept synchronized with Production by simple VM shipping. Should a disaster occur, the recovery VM configuration can be instantiated instantly – and without taking down any other Environments operating at the contingency site. Those will be auto-tuned by the system to a reduced level of physical capacity, but will remain fully operational.</p>
PER 006	The EES shall have the ability to support either a Production and hot (real time replication) disaster recovery design or a multi host site Production design that would allow one site to seamlessly be offline and the other site would maintain service without interruption.	W	<p>Wipro has proposed to create the following environments to support Disaster Recovery facilities. The Production Environment runs on the Primary PureApp Server, shipping database log files in near real-time to a special Production Shadow Environment at the Secondary site. This shadow is a small Environment configured just to apply those updates in near real time to a database copy, using native DB2 functionality. A Disaster Recovery Environment configuration is also present at the Secondary site, but not instantiated. Should a Disaster materialize, the shadow is shutdown, and the DR Environment is instantiated, pointing at the current (or nearly current) DB copy. Network addressing is adjusted, the MPLS circuit to the State Data Center is swung over, and operation begins. No need to shut down any other supporting environments, no need to restore anything.</p>

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
PER 007	The EES shall include a disaster recovery plan and provide contingency plans for client lookup capabilities and online collaboration in the event of a disaster.	W	As part of the Business Continuity Plan, Wipro has designed a business interruption contingency plan to ensure the survival of the business in the worst possible scenario. Wipro will assist the State of Nebraska in the event of a disaster at a Wipro data center. Specific recovery services provided by Wipro include (but are not limited to): <ul style="list-style-type: none">• Upon disaster, a Wipro administrator would restore operations of the Production Environment at the Secondary Site, nearly instantly. See PER 006 for a description.• Management and coordination of recovery operations• Provisioning of appropriate technical resources during the recovery process
PER 008	The EES shall provide the ability to recover from data loss due to end user error and application error.	S	SmartPro MedEE implements a comprehensive backup plan, including both local (on disk) backups that can be restored nearly instantly by remapping logical file sets, and offsite tape backups for archival and ultimate Disaster Recovery.
PER 009	The EES shall provide the ability to perform archival/incremental backups and the ability to perform open/closed database backups.	S	These are standard features of the technical and operational environment.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
PER 010	The EES shall provide tools for managing an environment that supports both high availability and disaster recovery.	S	SmartPro MedEE is implemented on high availability hardware (IBM PureApplication Server) that is fully redundant, without single points of failure: multiple CPU nodes, power supplies, busses, network interfaces, RAID disk storage and so forth. The surrounding network fabric, including routers, firewalls, load balancers, security appliances and circuits is also fully redundant. The IBM PureApplication Server can be physically maintained, and even expanded, without interruption of service. The PureSystems Manager and IBM middleware environments operate in concert to allow dynamic tuning, including automatic self-tuning, of physical resources to meet performance targets. Please refer to PER 006 for a description of the Disaster Recovery approach, which makes heavy use of intrinsic DB2 functionality (DB shadowing), and PureSystems Manager (VM shipping.)
PER 011	The EES shall include the capability to maintain all data according to Department defined records retention guidelines (i.e. record schedule). In general document retentions range from 3 to 10 years.	M	Data maintenance is out-of-the box, with sufficient capacity configured to cover all expected volume growth. Selective ageing based archival and retrieval will require a modification to the IBM Cúram system. Imaged Document Retention is managed by the State's own Hyland OnBase system, with a real-time interface with Cúram that will maintain synchronization.
PER 012	The EES shall include the capability to maintain all images and electronic documents according to Department defined document retention guidelines (i.e. record schedule).	M	Similar to PER 011, "documents", such as manuals and coded data documents will be managed within SmartPro MedEE, but "scanned" images remain with the State's Hyland OnBase application.

Regulatory & Security Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RSR 001	The EES must provide a mechanism to comply with EES security requirements and safeguards requirements following federal agencies/entities:	W	<p>Overall, SmartPro MedEE supports the comprehensive security requirements enumerated below. Key aspects are:</p> <ul style="list-style-type: none"> • Role Based Security • Strong encryption of protected data while at rest and in flight • Access controls over data at the “row” and “column” level, based on defined roles and individual identities • Full logging of data access, traceable bi-directionally: “Who touched this data?”; “What data did this individual touch?” • Comprehensive physical controls in the data centers: access controls, surveillance, physical security • HR policies regarding acceptability for employment, background checks, ongoing sanctioned behaviors • Mandatory HIPAA and other standards based security training and certification programs for internal staff and contractors • Data Confidentiality, Integrity, and Assurance Controls • Fully redundant computing environments, no single points of network, hardware, or system failure; near real-time data redundancy; local and offsite backups; full Disaster Recovery capabilities on own equipment • Intrusion detection (servers and workstations), malware protection (servers and workstations), non-discretionary controls over computers accessing secure network zones, file alteration detection on servers • Strong password and access controls

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
			<ul style="list-style-type: none">• VPN protected access from off-net locations• Automatic suspension of access/user id's for non-use, with follow-up; strong mandatory password controls• Penetration testing, vulnerability testing, including networks, systems, and applications• Complete Enterprise level data Center monitoring and management, automatic alerting due to failures, performance, or other SLR failures• Formalized auditing• NIST/ITIL Compliance• HIPAA Certified Data Centers – certified by the Federal Government for housing and operating the Medicare Database (MBD), the official SSA/CMS healthcare data records for all Medicare Eligible Individuals• Trusted to be the SSA/CMS single vendor for Dual-Eligible Eligibility/Enrollment Processing (Medicare/Medicaid)

RSR 036	The EES shall conform to the sub-parts of Section 508 of the Americans with Disabilities Act (ADA), and any other appropriate Nebraska or federal disability legislation.	S	<p>SmartPro MedEE, based on IBM Cúram's ADA compliant web based solution, meets applicable State and Federal accessibility standards for all processes and user interfaces produced by the system.</p> <p>Cúram-based portals are designed to be accessible so that persons with disabilities can use these portals effectively. Cúram-based portals conform to both the US Federal Section 508 requirements for accessibility for persons with disabilities and the Americans with Disabilities Act (ADA). Accessibility testing is an important element of the continual testing of the Cúram solution. A dedicated team focuses only on accessibility testing using the World Wide Web Consortium (W3C) Web Content Accessibility Guidelines 2.0 (WCAG 2.0). As part of the Cúram product development process, new features are continually evaluated and tested using WCAG. These guidelines are an integral part of the Cúram product development process and provide a basis for designing accessible software solutions.</p>
RSR 037	The EES shall comply with all applicable Nebraska security policies and adhere to all legal, statutory, and regulatory requirements, as determined by Nebraska Leadership.	S	SmartPro MedEE will comply with all applicable Nebraska Security policies and requirements. Compliance will be enforced through Wipro's Government Healthcare Systems Information Security Office.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RSR 038	The EES should have a unique identifier which is not the SSN.	S	The EES solution supports the concept of a Participant Reference Number. A participant (e.g. client, provider, etc.) can be associated with a list of reference numbers (e.g. a DHHS number, a passport number, a driving license numbers, an SSN). The provision of an SSN is not mandatory, but can be captured if required. The EES solution also support an internal, database generated primary key for a participant. This is used for internal usage only, and is not exposed to the business user.
RSR 039	The EES shall comply with accessibility requirements described in 45 CFR 85 and with Nebraska accessibility requirements.	S	45 CFR Part 85 - Enforcement Of Non Discrimination on the basis of handicap in programs or activities conducted by the department of Health and Human Services. SmartPro MedEE, based on IBM Cúram's ADA compliant web based solution, meets applicable State and Federal accessibility standards for all processes and user interfaces produced by the system. Cúram-based portals are designed to be accessible so that persons with disabilities can use these portals effectively. Cúram-based portals conform to both the US Federal Section 508 requirements for accessibility for persons with disabilities and the Americans with Disabilities Act (ADA). Accessibility testing is an important element of the continual testing of the Cúram solution. A dedicated team focuses only on accessibility testing using the World Wide Web Consortium (W3C) Web Content Accessibility Guidelines 2.0 (WCAG 2.0). As part of the Cúram product development process, new features are continually evaluated and tested using WCAG. These guidelines are an integral part of the Cúram product development process and provide a basis for designing accessible software solutions.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RSR 040	The EES shall comply with Nebraska branding standards as defined by the Department.	S	IBM Cúram is an ADA compliant web based solution using Web 2.0 technologies. For look and feel Cúram uses Cascading Style sheets (CSS) which separate presentation from content. By configuring the out of the box CSS files, the EES portals will be branded using State of Nebraska and Nebraska DHHS standards, logos, images, etc. Refer to requirement GEN 001.
RSR 041	The Contractor shall adhere to the principle of “Fail Safe” to ensure that a system in a failed state does not reveal any sensitive information or leave any access controls open for attacks.	S	Access is proscribed when network or system components fail – traffic is routed to redundant fully functioning componentry which continues to enforce policies and safeguards, up to the point that no functioning component is available and all access is denied. Sensitive database information is encrypted, and not visible absent a functioning system
RSR 042	The EES shall allow for controlled access to participant records. Users will be able to view participant data within the EES at the Department defined levels of access based on user security privileges.	S	Participant records are maintained in the IBM Cúram data model. Once a user has been authenticated, the RBAC authorization capabilities of EES control access to the various types of securable system resources.
RSR 043	The EES shall maintain a level of security that is commensurate with the risk and magnitude of the harm that could result from the loss, misuse, disclosure, or modification of information.	W	SmartPro MedEE provides scaled security of information based on its sensitivity and potential impact. Data is formally classified as to its security requirements, and commensurate controls are configured. In almost all cases, this has already been accommodated out-of-the-box. General controls include role based security, selective hiding of data based on role, role-based control over ability to alter data, role-based control over visibility of and access to functionality, role-based control over the ability to access “rows” e.g. “Whose data can I see?” and “fields” e.g. “Am I permitted to access PHI?”, and selective additional protection, such as system encryption of data inside the database.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RSR 044	Information security shall be built into the EES from its inception rather than “bolted on” after the EES has been implemented.	S	See IDT001, MDM031, RSR085 User authentication, role based access control and auditing capabilities are core cross cutting concerns of the overall EES solution. They are fundamental to the overall solution and have been built into the solution components from their inception.
RSR 045	The EES shall support security at the object level (e.g. Table, View, Index).	W	IBM Cúram implements a rich security model that provides full access control over what data rows and fields can be accessed based on roles. The Business Intelligence environment makes use of database object security as part of its implementation model, again based on use roles.
RSR 046	The EES shall support security at the row and column level.	W	IBM Cúram implements a rich security model that provides full access control over what data rows and fields can be accessed based on roles. The Business Intelligence environment makes use of database object security as part of its implementation model, again based on use roles.
RSR 047	The EES shall support auditing at the object level (i.e. Table, Column).	S	IBM Cúram maintains full audit records of which users have accessed what data. From this data, it can be determined what users have made access to specific data, or what data a specific user has accessed.
RSR 048	The EES shall provide the ability for concurrent users to simultaneously view the same record, documentation and/or template.	S	IBM Cúram uses optimistic locking for concurrency control which means that more than one user can access a record at a time, but only one of those users can commit changes to that record. Once one user has modified the record, another user cannot modify it without first re-reading the latest version of the record.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RSR 049	The EES shall provide protection to maintain the integrity of data during concurrent access.	S	IBM Cúram uses optimistic locking for concurrency control, which means that more than one user can access a record at a time, but only one of those users can commit changes to that record. Once one user has modified the record, another user cannot modify it without first re-reading the latest version of the record.
RSR 050	The software used to install and update the systems, independent of the mode or method of conveyance, shall be certified free of malevolent software ("malware"). Contractor may self-certify compliance with this standard through procedures that make use of commercial malware scanning software.	S	As part of standard Data Center operating procedures, all servers are equipped with malware and intrusion detection software, Sophos Server Antivirus. All company issued PC devices that are permitted access to internal network resources other than the public facing Internet are also equipped with Antivirus and Malware detection software, and managed through centralized corporate configuration management systems.
RSR 051	The EES shall be configurable to prevent corruption or loss of data already accepted into the EES in the event of an EES failure (e.g. integrating with a UPS, etc.).	S	SmartPro MedEE is implemented out-of-the-box with numerous data safeguards, including full database logging, near-real-time log shipping to the contingency site, redundant storage (RAID), local and offsite data backup. Hardware is configured without a single point of failure, and UPS services are standard.
RSR 052	The EES shall support protection of confidentiality of all Protected Health Information (PHI) delivered over the Internet or other known open networks via encryption using triple-DES (3DES) or the Advanced Encryption Standard (AES) and an open protocol such as Transport Layer Security (TLS), Secure Sockets Layer (SSL), Internet Protocol Security (IPsec), XML encryptions, or Secure/Multipurpose Internet Mail Extensions(S/MIME) or their successors.	S	All protected information is delivered to browsers protected by HTTPS/SSL. Data circuits between our data center and the State's is encrypted. All file transfer protocols over which the State has control are implemented with secure transfer protocols such as SFTP or Connect Direct. Similarly, real-time interfaces are protected by appropriate encryption standards compliant with PHI security regulations.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RSR 053	The EES, when storing PHI on any device intended to be portable/removable (e.g. smartphones, portable computers, portable storage devices), shall support use of a standards based encrypted format using 3DES, AES or their successors.	S	IBM Cúram never stores PHI locally. If this becomes a future requirement, the ESB will be configured to provide appropriate encryption using the current accepted industry standards.
RSR 054	The EES, prior to access to any PHI, shall display a configurable warning or login banner (e.g. "The EES should only be accessed by authorized users"). In the event that an EES does not support pre-login capabilities, the EES shall display the banner immediately following authorization.	M	The EES will warn the worker that they are accessing PHI data. Some modification will be required to ensure that the user is either warned or asked to re-authenticate before viewing PHI data.
RSR 055	The EES shall comply with Title XIX and related regulations and guidance.	S	The EES will comply with Title XIX and related regulations and guidance. SmartPro MedEE, based on IBM Cúram, will be an integrated, service oriented, eligibility system. It will be initially deployed to support eligibility for Medical Assistance programs, such as Medicaid, CHIP and subsidized health care as provided through the Affordable Care Act. EES supports the initial capture of application data (MAGI and non-MAGI), verification of application data (automatic and manual), maintenance of application data (change in circs), and eligibility calculation using this application data and required supporting processes to determine eligibility for all Nebraska DHHS Medicaid programs.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RSR 056	The EES shall comply with Title XXI and related regulations and guidance.	S	The EES will comply with Title XXI and related regulations and guidance. SmartPro MedEE, based on IBM Cúram, will be an integrated, service oriented, eligibility system. It will be initially deployed to support eligibility for Medical Assistance programs, such as Medicaid, CHIP and subsidized health care as provided through the Affordable Care Act. EES supports the initial capture of application data (MAGI and non-MAGI), verification of application data (automatic and manual), maintenance of application data (change in circs), and eligibility calculation using this application data and required supporting processes to determine eligibility for all Nebraska DHHS Medicaid programs.
RSR 057	The EES shall comply with the Office of the National Coordinator's Nationwide Privacy and Security Framework for Electronic Exchange of Individually Identifiable Health Information.	W	SmartPro MedEE is compliant with this security framework.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RSR 058	The EES shall comply with the Section 504 of the Rehabilitation Act.	S	<p>Section 504 of the Rehabilitation Act of 1973 is a national law that protects qualified individuals from discrimination based on their disability.</p> <p>SmartPro MedEE, based on Cúram's ADA compliant web based solution, meets applicable State and Federal accessibility standards for all processes and user interfaces produced by the system.</p> <p>Cúram-based portals are designed to be accessible so that persons with disabilities can use these portals effectively. Cúram-based portals conform to both the US Federal Section 508 requirements for accessibility for persons with disabilities and the Americans with Disabilities Act (ADA). Accessibility testing is an important element of the continual testing of the Cúram solution. A dedicated team focuses only on accessibility testing using the World Wide Web Consortium (W3C) Web Content Accessibility Guidelines 2.0 (WCAG 2.0). As part of the Cúram product development process, new features are continually evaluated and tested using WCAG. These guidelines are an integral part of the Cúram product development process and provide a basis for designing accessible software solutions.</p>
RSR 059	The EES shall comply with the Section 6103 of the Internal Revenue Code.	S	<p>26 USC § 6103 - Confidentiality and disclosure of returns and return information.</p> <p>Only authenticated users with sufficient authorization can view sensitive data such as Internal Revenue data (e.g. for the purposes of validating household income). Auditing can track which users viewed sensitive data, and when.</p>
RSR 060	The EES should comply with the National Information Exchange Model (NIEM).	W	Data exchange mediated by the ESB can be NIEM compliant when required.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RSR 061	The EES should support processing of data in multiple formats such as XML, X12, and other industry standard formats.	W	The common data exchange standards are supported by the data exchange components of SmartPro MedEE (ESB and ETL), and EDI formats through re-use of the State's EDI capabilities via SmartPro MedEE's ESB.
RSR 062	The EES shall provide for security concepts covering the following components: Virtual Private Network (VPN), firewall technology and Demilitarized Zone (DMZ), virus-/intrusion detection, mail/content filtering avoiding fault positives, encryption, Public Key Infrastructure (PKI).	S	SmartPro MedEE fully satisfies the requirement as stated.
RSR 063	The EES upon detection of inactivity of an interactive session shall prevent further viewing and access to the EES by that session by terminating the session, or by initiating a session lock that remains in effect until the user reestablishes access using appropriate identification and authentication procedures. The inactivity timeout shall be configurable.	S	SmartPro MedEE uses Cúram's web portal application. If the browser is left inactive for a period of time, the session will timeout and the user is prevented from viewing and accessing to the EES. In this case, the user will be required to log back in and a new session will be started. The timeout value can be configured using the application server's configuration settings.
RSR 064	The EES shall enforce a limit of (configurable) consecutive invalid access attempts by a user. The EES shall protect against further, possibly malicious, user authentication attempts using an appropriate mechanism (e.g. locks the account/node until released by an administrator, locks the account/node for a configurable time period, or delays the next login prompt according to a configurable delay algorithm).	S	The underlying directories used for authentication beneath the SSO/Portal enforce these constraints: the State's own Microsoft AD implementation for State employees, Cúram's directory for external users.
RSR 065	The EES shall provide the capability to prevent database administrators from seeing the data in databases they maintain.	S	DB2 encryption capabilities are used to meet this requirement.
RSR 066	The EES shall provide the ability to maintain a directory of all personnel who currently use or access the system/IVR/SQL database.	S	SmartPro MedEE maintains information on all authorized users, linking them to their roles.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RSR 067	The EES shall provide the ability to create and maintain a directory of external providers to facilitate communication and information exchange.	S	IBM Cúram Provider Management maintains extensive information about providers their status and services provided, including contact information and preferred means of contact.
RSR 068	The EES shall provide the ability to identify certain information as confidential (e.g. PII, PHI, etc.) and only make that accessible by appropriately authorized users.	M	The security architecture of IBM Cúram Social Program Management controls user authorization. During deployment of EES, the security profiles used to control users' access are configured. The ability to identify certain data as confidential will require some modification. Refer to requirement RSR 054.
RSR 069	The EES shall restrict access to summarized information according to organizational policy, scope of practice, and jurisdictional law.	S	The security architecture of IBM Cúram Social Program Management controls user authorization. During deployment of SmartPro MedEE, the security profiles used to control users' access are configured. Access to summarized information will be controlled through this capability.
RSR 070	The EES must be able to associate permissions with a user using one or more of the following access controls:	S	The security architecture of IBM Cúram Social Program Management supports Role Based access control.
RSR 071	<ul style="list-style-type: none"> User-based (access rights assigned to each user) 	S	The security architecture of IBM Cúram Social Program Management supports Role Based access control.
RSR 072	<ul style="list-style-type: none"> Role-Based Access Controls (RBAC; users are grouped by role and access rights assigned to these groups) 	S	The security architecture of IBM Cúram Social Program Management supports Role Based access control.
RSR 073	<ul style="list-style-type: none"> Context-based (role-based with additional access rights assigned or restricted based on the context of the transaction such as time-of-day, workstation-location, emergency-mode, etc.) 	S	The security architecture of IBM Cúram Social Program Management supports Role Based access control. For specific business transactions, additional aspects are considered when determining access. Aspects such as location, time of day, sensitivity, etc. are considered.
RSR 074	The EES shall provide the ability to prevent specified user(s) or groups from accessing confidential information such as a patient's chart.	S	If data such as a patient's chart is available to SmartPro MedEE, access to this data and other sensitive data (e.g. PHI and PII data) can be controlled to role based access control.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RSR 075	The EES should preserve and report specified audit data when potential security violations are detected.	S	SmartPro MedEE fully satisfies the requirement as stated.
RSR 076	When access to a user's account is restricted, the EES shall provide a means for appropriately authorized users to "break the glass" and obtain access for emergency situations, as defined by Nebraska policy.	M	SmartPro MedEE will support a "Break the Glass" mechanism for workers to access specific client data in emergency situations. Modification effort is required to support the break the glass requirements.
RSR 077	When access to a chart is restricted and the "break the glass" has occurred, the EES shall provide the ability to notify specified users and provide an audit trail for this access.	M	Support for "Break the glass" will require modification. A workflow will be configured to notify specified users when break the glass occurs. The IBM Cúram Administration Suite provides extensive auditing capability which tracks who has accessed, updated or requested sensitive information, what they accessed and when.
RSR 078	The EES shall enforce the most restrictive set of rights/privileges or accesses needed by users/groups or processes acting on behalf of users, for the performance of specified tasks.	S	SmartPro MedEE uses Cúram's Administration Suite to provide a set of security menu options to enable administrators to configure and govern overall access to the application. The options provided allow for account administration and user set-up including management of: <ul style="list-style-type: none"> Assigned role Access Periods Sensitivity Levels Location In addition, SmartPro MedEE will have a central Identity Management solution which will be tightly integrated with Cúram's security architecture.
RSR 079	The EES shall provide the ability for authorized administrators to assign restrictions or privileges to users/groups.	S	SmartPro MedEE uses Cúram's Administration Suite to provide a set of security menu options to enable administrators to configure and govern overall access to the application.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RSR 080	The EES shall support removal of a user's privileges without deleting the user from the EES to ensure history of user's identity and actions.	S	SmartPro MedEE uses Cúram's Administration Suite to provide a set of security menu options to enable administrators to configure and govern overall access to the application. A user account can be disabled or the user's role can be modified to be more restrictive.
RSR 081	The EES shall be able to support RBAC in compliance with the HL7 Permissions Catalog.	W	Basic capability exists, requiring configuration within the ESB to implement.
RSR 082	The EES shall provide more-advanced session management abilities such as prevention of duplicate logins, remote logout and location-specific session timeouts.	W	The single Sign-On/Portal component implements these controls.
RSR 083	The EES shall provide the ability to perform EES administration functions such as reference table maintenance and adding/removing users from the system.	S	This is basic functionality of SmartPro MedEE.
RSR 084	The EES shall allow users access based on their roles irrespective of their geographical location.	S	Each user is assigned a security role, consisting of one or more security groups, which are in turn composed of multiple SIDs. This allows for highly specific user roles to be configured in order to control the functions each user can access, the data they can view, and the data they can modify. Cúram supports RBAC category of authorization, regardless of geographical location, which are configurable through the Cúram Administration Suite.
RSR 085	The EES shall provide the capability to integrate with existing authentication and authorization mechanisms (RACF on the mainframe).	M	SmartPro MedEE has central Identity Management solution which will be tightly integrated with Cúram's security architecture. Initial integration will be with the State's Microsoft AD directory, and Cúram's external user directory. See IDT 001, RSR 085, RSR 107 and MDM 031.
RSR 086	The EES shall provide the capability to create temporary and emergency accounts and terminate those accounts automatically after a user defined period of time.	M	Active Directory and SSO Solution (IDT001, MDM031)

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RSR 087	The EES shall provide the capability to override a role and restrict access to information by users or groups of users.	S	SmartPro MedEE uses Cúram's Administration Suite to provide a set of security menu options to enable administrators to configure and govern overall access to the application for users and groups of roles, roles, etc. In addition, the EES solution will have a central Identity Management solution which will be tightly integrated with Cúram's security architecture.
RSR 088	The EES shall allow an individual with active eligibility under a different user ID to reapply under their own user ID.	S	SmartPro MedEE, a client record can only ever be associated with one user ID. In the scenario when a client incorrectly has two records in the database, then it is possible for each client record to be associated with a different user ID. In this scenario, a worker can perform a client record merge, and disable one of the user IDs. Eligibility information from both client records will be catered for as part of the merge.
RSR 089	The EES shall provide the capability to monitor events on the information system, detect attacks, and provide identification of unauthorized use of the system.	S	SmartPro MedEE fully satisfies the requirement as stated.
RSR 090	The EES shall provide the capability to identify and report on inappropriate access to information in the system, based on user defined criteria.	C	Cúram generally prevents such inappropriate actions rather than identifying and reporting but there could be circumstances where a user was allowed certain access but patterns of persistent access indicated inappropriate use (e.g. looking for data on relatives of celebrities). Such patterns can be identified and reported on via the Cúram audit trail. Application Audit logs are centralized, and scanned for such violations.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RSR 091	The EES shall manage user profiles, including enforcing role-based security access to system data and functions.	C	Cúram supports role based access control, configurable through the Cúram Administration Suite. Each user is assigned a security role, consisting of one or more security groups, which are in turn composed of multiple SIDs. This allows for highly specific user roles to be configured in order to control the functions and screens each user can access, the data they can view, and the data they can modify. Matching logic will be implemented in the related system components – MDM and Business Intelligence.
RSR 092	The EES shall enforce strong password rules per NITC & IRS requirements.	S	Active Directory and SSO Solution (IDT001, MDM031)
RSR 093	The EES support the use of Multi-factor authentication	C	Multi-factor authentication uses data from the application database to confirm identity. The integrated identify management solution will be configured to support multi-factor authentication. Data from the application database will be compared with provided data. From the Cúram database.
RSR 094	The EES shall support the ability to disable user accounts and ensure no disabled accounts can log in or access the solution.	S	Active Directory and SSO Solution (IDT001, MDM031)
RSR 095	The EES shall provide the same security provisions for all the environments as those used in the production environment.	S	All Environments follow the same overall security model.
RSR 096	The EES shall support user account authentication procedures with configurable parameters (time, cipher strength, logon attempts, etc.).	W	Active Directory and SSO Solution (IDT001, MDM031). Configurable.
RSR 097	The EES shall implement appropriate encryption mechanisms to protect the confidentiality and integrity of critical types of data, including but not limited to passwords, social security numbers, and bank account numbers.	M	SmartPro MedEE implements application data encryption where needed. For example, stored passwords are encrypted. Some modification required to support encryption of data fields other than passwords.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RSR 098	All sensitive data shall be encrypted in transit (including emails) to protect data confidentiality and integrity as appropriate based on the sensitivity of data.	S	Cúram complies. Will support HTTPS for browser communication. IBM Integration Bus (IIB) complies with Web Service Security for a) SOAP Message Security b) Username Token Profile 1.1 c) X.509 Certificate Token Profile 1.1 d) SAML Token Profile (only Passthrough) e) Kerberos Token Profile (for Kerberos GSS v5 AP_REQ, Kerberos v5 AP_REQ)
RSR 099	The EES shall provide the ability to implement security for transport and messaging via web services.	S	Cúram complies. IBM Integration Bus (IIB) supports transport layer security and also message layer security. PI refers RSR 098.
RSR 100	The EES shall have the ability to support strong authentication through SSL, Kerberos, RADIUS, SAML, XACML, or OpenID.	S	IIB supports SSL, Kerberos Token Profile (for Kerberos GSS v5 AP_REQ, Kerberos v5 AP_REQ), SAML (pass through), Webservice reliable messaging.
RSR 101	The EES shall provide the ability to virus scan uploaded files using Department approved virus scanning software.	S	SmartPro MedEE uses Sophos Serv3r AntiVirus to scan all files uploaded into the Data Center.
RSR 102	The EES shall provide the ability to administer user security based on organizational unit.	C	Cúram maintains the organizational unit data, and will be interfaced to the SSO/Portal solution.
RSR 103	The EES shall support the latest version of Secure Sockets Layer (SSL)/Transport Layer Security.	S	Cúram complies. Intrinsic for all Browser presenting environments through WebSphere.
RSR 104	The EES shall be able to use HTTPS/SSL for connections between interfaces.	S	IBM ESB supports both HTTPS and SSL based connections between two participating applications.
RSR 105	The EES shall pass vulnerability tests that are deemed industry standard for an application which hosts confidential information of clients like Social Security Numbers, dates of birth, addresses etc.	S	During the deployment lifecycle, the EES shall pass vulnerability tests against the application. IBM AppScan will be used to test for system and application vulnerabilities.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RSR 106	The EES shall pass tests for common web vulnerabilities such as poor session controls, injection flaws, denial of service, un-validated input, and cross site scripting.	S	SmartPro MedEE is based on the Cúram product. Cúram is continually tested for SQL injection and cross-site scripting vulnerabilities. Cúram is designed such that SQL injection and cross-site scripting are prevented at the infrastructure level. Any project modifications or custom development work that results in the creation of new web pages will utilize this Cúram infrastructure, thus ensuring that these new pages will also be protected against these common vulnerabilities. IBM AppScan is then used externally as a final checkpoint for system and application vulnerabilities for all components.
RSR 107	The EES shall manage user authentication and authorization via LDAP version 3.0 or higher.	S	The SSO/Portal solution is fully compliant with LDAP V3.0.
RSR 108	The solution shall contain verification mechanisms that are capable of authenticating authority (as well as identify) for the use or disclosure requested.	S	A Remote Identity Proofing process is provided to verify that the application filer is who they say they are. In this process, the application filer's identifying information such as Name and Date of Birth are sent to an external service that generates and sends back a set of questions for the application filer to answer. These questions are called the Precise Identity Questions, which are based on the personal information of the application filer, such as the last four digits of the SSN or Bank Account Number. The application filer's responses are then evaluated by the external service, and a decision returned.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RSR 109	The EES should provide role-based security using unique identifiers (IDs), mandatory password standards, and profile or group access assignments. All users should be authenticated when establishing a connection to the solution. Authentication should be based on unique user IDs and should support separation of duties based on roles.	C	Each user is assigned a security role, consisting of one or more security groups, which are in turn composed of multiple SIDs. This allows for highly specific user roles to be configured in order to control the functions each user can access, the data they can view, and the data they can modify. Cúram supports RBAC category of authorization, which are configurable through the Cúram Administration Suite. The SSO solution is interfaced to Cúram's role definitions, to allow other application components to be integrated with the environment and re-use these roles.
RSR 110	The EES shall enforce password policies for length, character requirements, forced reset intervals, and updates, as defined by the Department.	S	These policies are enforced by the underlying directories – Microsoft AD for State employees, Cúram for external users.
RSR 111	The EES shall have the ability to use secure (SSL/SSH) FTP to accommodate file transfers.	S	IBM MQ FTE Supports SSL based FTP to accommodate file transfer. Connect:Direct will be leveraged for SSL/SSH FTP with external parties.
RSR 112	The EES shall ensure a timely and reliable process for security breach notification to the appropriate entity.	S	Wipro provides timely and accurate notification of security breaches as part of its standard operating procedures. Wipro has significant experience hosting HIPPA compliant systems for private Insurers, and both State and Federal Governmental entities, including hosting a copy of the Federal MDB.
RSR 113	The EES shall alert appropriate staff authorities of potential violations of privacy safeguards, such as inappropriate access to confidential information.	S	Wipro will comply. Cúram monitors access attempts, including those that are proscribed, and SmartPro MedEE rises the appropriate alerts.
RSR 114	The EES shall assure strict adherence to IRS security and privacy requirements for data obtained from IRS and the federal Data Hub.	W	SmartPro MedEE will be compliant with IRS and Federal Data Hub security requirements.
RSR 115	The EES shall adhere to all Nebraska and federal requirements to secure, store, and dispose of data.	W	SmartPro MedEE will be configured to meet the requirements for securing, storing, and disposing data.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RSR 116	The EES shall provide complete control and accounting of all data received, stored, accessed, or transmitted to ensure administrative, physical, and technical security of the data	M	An End to End tracking and monitoring will be implemented to provide the audit information of the data movement in the integration layer. Tivoli ITCAM along with the IBM ESB will be leveraged to provide end to end tracking and monitoring of events.
RSR 117	The EES shall ensure the security of all State documents and data ensuring that complete segregation of the State data and files exists from other selected Contractors/selected Contractor customers.	S	All SmartPro MedEE storage is dedicated, never shared at the physical or logical level within the Data Centers.
RSR 118	The EES shall offer the latest, commercially available and industry accepted encryption technologies for any file transfers or information exchanges within the solution network through the Internet and with any potentially unsecured network.	S	SupportPac for Encryption/Decryption Nodes allows users to encrypt/decrypt message body in WebSphere Message Broker, irrespective of the protocol being used. This increases the security to the message body when messages are moving out or into the message broker. Currently Password Based Cryptographic methods are supported in the SupportPac. File Transfers are secured via standard protocols such as SFTP and Connect:Direct, as required.
RSR 119	The EES should implement a security architecture based on MITA 3.0 Security and Privacy model, including the following security architectural elements: - Multi-Level Security - Identity Management - Role Based Access Control (RBAC) - Decentralized Label Model (DLM)	M	Cúram supports these requirements out-of-the-box, and the SSO/Portal solution will be integrated Cúram to extend this functionality across all components.
RSR 120	The EES should support a defense-in-depth, multi-zone computing architecture that physically separates the layers between the solution components. Each layer should be protected by firewalls and appropriate security devices based on the sensitivity of data it houses and functions it performs.	S	The basic SmartPro MedEE design is based on strong firewall protection of multiple access zones, including DMZ and Secure Zone, with VLAN separation between environments with different security classes.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RSR 121	The EES should be built upon an infrastructure that protects against the known forms of exploits and attacks, including SQL injection, code injection, cross-site scripting, request forgery, and session fixation.	S	SmartPro MedEE is based on the Cúram product. Cúram is continually tested for SQL injection and cross-site scripting vulnerabilities. Cúram is designed such that SQL injection and cross-site scripting are prevented at the infrastructure level. Any project modifications or custom development work that results in the creation of new web pages will utilize this Cúram infrastructure, thus ensuring that these new pages will also be protected against these common vulnerabilities.
RSR 122	The EES should support the saving of user profiles for archival purposes, including the ability to re-enable/reuse the profile.	S	Active Directory and SSO Solution.
RSR 123	The EES should pass credentials for authentication and authorization from the solution to authenticate system access to web service transactions (that is, connect to external web systems in the context of a named user, not super-user, account).	S	Active Directory and SSO Solution.
RSR 124	The EES should support, issue, and manage public key certificates for secure transactions, following standard practices such as the use of accepted Certification Authorities (CA), documented Certificate Policies (CP), and Certificate Practice Statements (CPS), including key escrow strategy. Implementation should use fundamental technical standards such as X.509 certificate format and Public Cryptographic Standards (PKCS).	S	This is standard Wipro Data Center practice, managed by the operations and security teams.
RSR 125	If a system component or application fails, the EES should not leave sensitive data accessible, and should return user-friendly error messages that do not expose internal system details and does not include information that might help an attacker exploit vulnerabilities in the application.	S	SmartPro MedEE leverage's Cúram's exception handling which returns user-friendly error messages when a system component does not work as expected. The text for the exception is loaded from a message catalog file and can easily be changed. Exception messages never contain sensitive data. Also when an exception is thrown, Cúram access control still applies for future transactions.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RSR 126	The EES should have the ability to support robust session management controls, including the ability to limit the number of concurrent sessions for an individual user.	S	Enforced by the Portal/SSO.
RSR 127	The EES should ensure transactions and messages are accurately received as they were sent and information is not altered by non-authorized individuals.	S	IBM Integration Bus (IIB) conditionally complies with Web service Security for a) SOAP Message Security b) Username Token Profile 1.1 c) X.509 Certificate Token Profile 1.1 d) SAML Token Profile (only Passthrough) e) Kerberos Token Profile (for Kerberos GSS v5 AP_REQ, Kerberos v5 AP_REQ) This ensures transactions and messages are accurately received as they were sent.
RSR 128	The EES should support the latest version of the IP Protocol Security extension (IPSec).	S	Wipro's Network and system environments support IPSec.
RSR 129	The EES should support S/MIME for email communications.	W	S/Mime is configurable within SmartPro MedEE.
RSR 130	The EES should support cryptography levels set forth in FIPS 1402.	S	A standard used to accredit cryptographic modules - SmartPro MedEE is compliant.
RSR 131	The EES should prevent the creation of duplicate user accounts.	S	Standard function of Active Directory and SSO Solution (IDT001, MDM031)
RSR 132	The EES should use file encryption for data transfer between entities.	S	For file based integration and external component needs to be written to encrypt file with the security software that are selected by State. For Service based integration protocol layer security and also message layer security are implemented in IIB (the ESB).
RSR 133	The EES should provide the ability to create, display and maintain an administrative structure as specified by the Department.	S	SmartPro MedEE's organizational unit structure is also maintained via the Cúram Administration suite.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RSR 134	The EES should provide the ability to include a viewable online history of all changes made by User Account Managers as specified by the Department.	S	The IBM Cúram Administration Suite provides extensive auditing capability to allow administrative personnel to identify who has accessed, updated or requested sensitive information, what they accessed and when.
RSR 135	The EES should prevent installation or use of remote control or file sharing software unless explicitly approved by the Department.	W	Wipro controls this for all Wipro controlled workstations through centralized automated policy management.
RSR 136	The EES should detect and prevent hacking, intrusion, and other unauthorized use of system resources.	S	SmartPro MedEE fully satisfies the requirement as stated. Intrusion Detection at the network and server level is standard in our data centers, as is malware detection and prevention for all servers and workstations. McAfee Intrushield, Sophos Server AV.
RSR 137	The EES should provide procedures for guarding, monitoring and detecting malicious software.	S	SmartPro MedEE fully satisfies the requirement as stated. We deploy Sophos Server AV across all server environments, and McAfee AV across all workstations.
RSR 138	The EES should update virus blocking software daily and aggressively monitor for and protect against viruses.	S	SmartPro MedEE fully satisfies the requirement as stated.
RSR 139	The EES should suspend all EES users who have not accessed the solution within a specified number of days as specified by the Department. The suspension requirements should be configurable and distinct for each system environment.	S	Configurable inactivity suspension is standard in Microsoft Ad and our SSO/Portal solution.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RSR 140	The EES should provide screen/window security, including links that route to interfaces.	S	<p>IBM Cúram includes comprehensive security capabilities to help assure the protection of sensitive information. Cúram achieves this by providing features and functionality designed to:</p> <ul style="list-style-type: none">• ensure that only authorized individuals have access to Cúram applications and data;• control access to sensitive personal information;• restrict the access of authorized individuals to only the personal information needed in order to effectively deliver services;• identify who has access to sensitive information and audit who has made changes to that information. <p>In addition, the default configuration uses SSL provided by the application server to secure content as it is transferred.</p>
RSR 141	The EES should provide a secure web portal with authentication and encryption to protect interactions and transactions including, at a minimum Secure Socket Layers (SSL).	S	<p>SmartPro MedEE provides a secured web portal with a log in screen for authentication. SSL is on by default for access to the web application. This ensures a secure SSL connection between the client and server and also ensures data is encrypted. SSL is turned on for the client through settings in the web.xml file for the web client application. SSL is turned on at the application server level.</p>
RSR 142	The EES should provide a secure web portal with role based access enabling viewing and maintenance of information across all components of the solution meeting all applicable Nebraska and federal standards.	S	<p>SmartPro MedEE provides a secured web portal with a log in screen for authentication. SmartPro MedEE supports RBAC category of authorization, which is configurable through the Cúram Administration Suite. Once a user logs in, depending on their assigned role, the appropriate screens (or workspace) with specific functionality will be displayed.</p>

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RSR 143	The EES should accommodate all current HIPAA revisions/updates including those that may occur during the life of the project.	S	Wipro maintains currency with HIPAA regulations, as it operates certified data centers that include hosting a copy of the SSA/CMS Medicare Data Base (MDB), and extensive other Medicare and Medicaid programs for both Healthcare plans, the Federal Government, and various state Governments.
RSR 144	The EES should maintain all data sets defined by the HIPAA Implementation Guides to support all transactions required under HIPAA Administrative Simplification Rule.	M	Cúram plus the ESB are configured to support required HIPAA transaction under the HIPAA Administrative Simplification rule, when relevant.
RSR 145	The EES should protect the confidentiality and integrity of electronic Protected Health Information (PHI).	M	Cúram protects PHI data; this protection will be extended to the MDM and BI components.
RSR 146	The EES should support encryption and decryption of stored PHI or an equivalent alternative protection mechanism, if approved by the Department.	M	DB2 encryption will be used to protect PHI data stored in the database, and modules that access this data will be compliant.
RSR 147	The EES should track disclosures of PHI; provide authorized users access to, and reports on the disclosures.	W	The IBM Cúram Administration Suite provides extensive auditing capability to track who has accessed, updated or requested sensitive information, what they accessed and when.
RSR 148	The EES should include procedures for accessing necessary electronic PHI in the event of an emergency and continue protection of PHI in emergency.	S	In an emergency, alternative persons can be temporarily given authority to access electronic PHI, while maintaining the protection of the PHI.
RSR 149	The EES should provide data integrity of PHI by preventing and detecting improper alteration or destruction (including but not limited to: message authentication, electronic signature, check sums etc.).	S	IBM Cúram and Master Data Management do not allow improper alteration or destruction of any case information, including PHI. Changes history is maintained and an audit trail recording the authenticated user ID as electronic signature from the user interface or from the authenticated source of message from other systems, and an audit trail will be maintained of such changes. Security will be maintained at the database level to prevent unauthorized change through other means than through the Cúram or Master Person Index applications.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RSR 150	The EES should perform data mapping to identify the PHI contained in the solution.	S	This will be a project responsibility, part of our standard approach when dealing with sensitive healthcare data.
RSR 151	The EES should provide ability to redact records in whole or in part to comply with Nebraska and federal privacy standards based on role and authority.	S	In SmartPro MedEE, redacted data can be asterixed out. Redaction will occur at the database level and will involve an operational user. This will provide DHHS with a solution that enables redaction of fields, partial fields, or complete records.
RSR 152	The EES should provide audit reports for tracking users, associated security groups, roles, settings, passwords and duplicate IDs. The frequency and content of security audit reports will be determined by the Department.	C	A uniform audit logging and reporting capability will be implemented, based on data and log extracts.
RSR 153	The EES should track adds, changes and deletes of individual user data.	S	The IBM Cúram Administration Suite provides extensive auditing capability to track who has accessed, updated or requested sensitive information, what they accessed and when. This includes tracking adds, changes and deletes of individual user data.
RSR 154	The EES shall audit/track all activity specific to each user and process, including at a minimum date and time of last login, invalid login attempts, system errors, and all transaction activities, including inquiry.	S	The EES solution includes auditing capability that tracks user transaction activities, including inquiry activity. Auditing can be configured on or off for selected transactions by a system administrator.
RSR 155	The EES should provide read-only access to system job and maintenance schedule, submission, and processing statistics, and system performance tools for designated staff.	S	IBM SmartCloud Workload Automation provides this capability.
RSR 156	The EES should monitor system activity and log and examine system activity in accordance with audit policies and procedures adopted by the Department.	S	The proposed EES fully satisfies the requirement as stated.
RSR 157	The EES should provide security administrative rights to the Department security administrator(s) for the purpose of adding, updating, and deleting security access.	W	This role will be configured into SmartPro MedEE. Basic State User authentication will be maintained by the State's Active Directory implementation.

Audit & Compliance Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
AUD 001	The EES shall maintain a record (e.g. audit trail) of all additions, changes and deletions made to data in the system. This should be readily searchable by user ID or client ID. This must include but is not limited to:	W	The EES solution will maintain an audit trail of all transactions that impact EES data. Auditing can be configured on or off for selected transactions by a system administrator. Additional log data will be gathered and consolidated to provide a comprehensive audit picture.
AUD 002	<ul style="list-style-type: none">The user ID of the person who made the change	S	The IBM Cúram Administration Suite provides extensive auditing capability to track who has accessed, updated or requested sensitive information, what they accessed and when. The user ID is captured in the audit record.
AUD 003	<ul style="list-style-type: none">The date and time of the change	S	The IBM Cúram Administration Suite provides extensive auditing capability to track who has accessed, updated or requested sensitive information, what they accessed and when. The date and time of change are captured in the audit record.
AUD 004	<ul style="list-style-type: none">The physical, software/hardware and/or network location of the person while making the change	M	These data elements will be retrieved from WebSphere, the webserver layer provider.
AUD 005	<ul style="list-style-type: none">The information that was changed	S	The IBM Cúram Administration Suite provides extensive auditing capability to track who has accessed, updated or requested sensitive information, what they accessed and when. The before and after data are captured in the audit record.
AUD 006	<ul style="list-style-type: none">The outcome of the event	S	The IBM Cúram Administration Suite provides extensive auditing capability to track who has accessed, updated or requested sensitive information, what they accessed and when. The before and after data are captured in the audit record.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
AUD 007	<ul style="list-style-type: none">The data before and after it was changed, and which screens were accessed and used	S	The IBM Cúram Administration Suite provides extensive auditing capability to track who has accessed, updated or requested sensitive information, what they accessed and when. The before and after data are captured in the audit record. The screens accessed and used are also written to the audit trail.
AUD 008	The EES shall allow an authorized administrator to set the inclusion or exclusion of auditable events based on organizational policy and operating requirements/limits.	S	The IBM Cúram Administration Suite provides extensive auditing capability which tracks who has accessed, updated or requested sensitive information, what they accessed and when. The type and extent of audit data captured can be tailored to meet specific implementation requirements.
AUD 009	The EES shall support logging to a common audit engine using the schema and transports specified in the Integrating the Healthcare Enterprise (IHE) Audit Trails and Node Authentication (ATNA) profile, Audit Log specification.	C	Existing Cúram logs will be augmented with data taken from other system component's logs and placed in a consolidated logging database to fulfill this and related audit logging requirements.
AUD 010	The EES shall be able to detect security-relevant events that it mediates and generate audit records for them. At a minimum the events shall include those listed here:	C	Monitoring of all key system events/logs will be consolidated into a single repository.
AUD 011	<ul style="list-style-type: none">start/stop	S	From system log files
AUD 012	<ul style="list-style-type: none">user login/logout	S	From SSO Solution (IDT001) logs

AUD 014	<ul style="list-style-type: none">account lockout	S	From SSO Solution (IDT001) log

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
AUD 015	<ul style="list-style-type: none"> client record created/viewed/updated/deleted 	S	The IBM Cúram Administration Suite provides extensive auditing capability which tracks who has accessed, updated or requested sensitive information, what they accessed and when. The type and extent of audit data captured can be tailored to meet specific implementation requirements such as tracking the client records that have been created, viewed, updated, and deleted.
AUD 016	<ul style="list-style-type: none"> scheduling 	S	From SmartCloud Workload Manager logs
AUD 017	<ul style="list-style-type: none"> query 	S	Cúram provides robust auditing capability to enable administrative personnel to identify who has accessed, updated or requested sensitive information, what they accessed and when. For more details see section 6.2
AUD 018	<ul style="list-style-type: none"> order 	S	See previous "AUD 017" – queries and updates are logged. There are no deletions as such, only logical deletions which are also logged.
AUD 019	<ul style="list-style-type: none"> node-authentication failure 	S	The proposed EES fully satisfies the requirement as stated.
AUD 020	<ul style="list-style-type: none"> signature created/validated 	S	Creation of validated identifiers is performed either through the State's Active Directory (for State personnel) or the Cúram Universal Access portal and both of these are able to maintain audit logs of these events.
AUD 021	<ul style="list-style-type: none"> Personally Identifiable Information (PII) export 	S	Cúram has no explicit function to export PII (or other) data, other than through the standard export to the BI subsystem which is not inappropriate – will be enforced in the Cognos/BI component.
AUD 022	<ul style="list-style-type: none"> PII import 	C	Cúram has no explicit function to import PII (or other) data – enforced by Cognos/BI.
AUD 023	<ul style="list-style-type: none"> security administration events 	S	The proposed EES fully satisfies the requirement as stated.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
AUD 024	<ul style="list-style-type: none">• backup and restore	S	The proposed EES fully satisfies the requirement as stated.
AUD 025	The EES shall provide authorized administrators with the capability to read all audit information from the audit records.	C	Part of the Audit Log Consolidation and Reporting.
AUD 026	The EES shall provide the audit records in a manner suitable for the user to interpret the information.	C	Part of the Audit Log Consolidation and Reporting.
AUD 027	The EES shall provide the capability to generate reports based on ranges of EES date and time that audit records were collected.	C	Part of the Audit Log Consolidation and Reporting.
AUD 028	The EES shall be able to export logs into text format in such a manner as to allow correlation based on time (e.g. Coordinated Universal Time [UTC] synchronization).	C	Part of the Audit Log Consolidation and Reporting.
AUD 029	The EES shall be able to perform time synchronization using NTP/SNTP, and use this synchronized time in all security records of time.	S	Standard system time maintenance at the OS level, from which date/timestamps are subsequently derived.
AUD 030	The EES shall have the ability to format for export recorded time stamps using UTC based on ISO 8601.	C	Part of the Audit Log Consolidation and Reporting.
AUD 031	The EES shall prohibit all users read access to the audit records, except those users that have been granted explicit read access.	C	Part of the Audit Log Consolidation and Reporting.
AUD 032	The EES shall protect the stored audit records from unauthorized deletion.	C	Part of the Audit Log Consolidation and Reporting.
AUD 033	The EES shall prevent modifications to the audit records.	C	Part of the Audit Log Consolidation and Reporting.
AUD 034	The proposed EES shall provide logging, reporting and accessing errors and exceptions.	C	Part of the Audit Log Consolidation and Reporting.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
AUD 035	The EES shall maintain an audit trail of all inquiry, and updates to the EES that are required by State and federal policies and regulations.	S	The IBM Cúram Administration Suite provides extensive auditing capability which tracks who has accessed, updated or requested sensitive information, what they accessed and when. The type and extent of audit data captured can be tailored to meet specific implementation requirements. Auditing all inquiry will generate a very large volume of audit data. As required DHHS can decide to audit certain inquiry types, and not others.
AUD 036	The EES shall ensure plans and procedures are in place for all modules to meet audit and compliance requirements	S	This is a standard component of our Project Management / SDLC procedures.
AUD 037	The EES should capture and retain the data that was used to determine eligibility, calculate benefits, and generate various outputs, at the point in time that the particular action took place. Subsequent changes to data elements (e.g. an applicant's income) should not over-write the value that used to make a determination at a particular point in the past.	S	EES maintains all eligibility data in an effective dated manner. Changes to eligibility data will never overwrite existing data. Rather the new data will join a timeline of data that EES maintains for the beneficiary.
AUD 038	The EES should have the ability to research transaction exceptions (e.g. a failed "add" transaction due to business rule violation) and make corrections within the system as necessary to correct enrollment discrepancies.	S	Transaction exceptions will be written to the application logs. Business users will use the EES application to make corrections as necessary to business data. Operational users can also make corrections directly on the database in exceptional circumstances.

Usability Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
USE 001	The EES will adhere to the accessibility standard as outlined in the web guidelines and based on the W3C level 2 accessibility guidelines: (http://www.w3.org/TR/WCAG10/full-checklist.html).	S	The IBM Cúram user interface is presented through a standard web browser and provides an intuitive and consistent look and feel for system users. Designed in accordance with the W3C's Web Content Accessibility Guidelines (WCAG), including level 2 accessibility guidelines, the Cúram user interface provides a modern, configurable and highly accessible user experience.
USE 002	The EES shall adhere to all federal and Nebraska accessibility requirements, or their successors: (section 508 of the Rehabilitation Act and detailed in section 1194.22 of the Code of Federal Regulations, "Web-based intranet and internet information and applications".	S	SmartPro MedEE, based on Cúram's ADA compliant web based solution, meets applicable State and Federal accessibility standards for all processes, user interfaces and documents produced by the system. Cúram-based portals are designed to be accessible so that persons with disabilities can use these portals effectively. Cúram-based portals conform to both the US Federal Section 508 requirements for accessibility for persons with disabilities and the Americans with Disabilities Act (ADA). Accessibility testing is an important element of the continual testing of the Cúram solution. A dedicated team focuses only on accessibility testing using the World Wide Web Consortium (W3C) Web Content Accessibility Guidelines 2.0 (WCAG 2.0). As part of the Cúram product development process, new features are continually evaluated and tested using WCAG. These guidelines are an integral part of the Cúram product development process and provide a basis for designing accessible software solutions.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
USE 003	The EES shall provide a user interface that shall be simple and consistent throughout all areas and functions of the EES.	S	SmartPro MedEE uses Cúram's user interfaces which are consistent throughout all areas and functions of SmartPro MedEE. Cúram screens are 'described' in XML User Interface Metadata (UIM). From the UIM and the centrally maintained Cascading Style Sheets, JSPs are generated. Using this generation approach, the SmartPro MedEE user interface is guaranteed to have a consistent user interface throughout. UIM supports the following user interface components: application sections, application tabs, section shortcut panels, section shortcut categories, section shortcut menu items, content area navigation bar, page group navigation bar, and in page navigation tabs. These components are used throughout and provide the worker with the same look and feel, and consistent navigation metaphors through the SmartPro MedEE application.
USE 004	The EES shall minimize the number of mouse clicks/user interaction to complete any action.	S	SmartPro MedEE uses Cúram's user interfaces which are designed to minimize the number of mouse clicks required to complete any action, and to ensure that user has complete context of what they are working on and how they got to where they are. The Cúram product was first released in the year 2000. Between then and now, the user interface has evolved through four different versions to where it is at today. It took that many iterations to get user navigation right.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
USE 005	The EES shall use a Graphical User Interface (GUI) to help the user navigate to the next logical step in the workflow, or freely navigate to other parts of the EES functionality, and then allow the user to return to complete the in-process task.	S	<p>Cúram provides several features that contribute towards making it as easy as possible to navigate quickly around the system. For example, every Cúram page contains a variety of quick navigation hyperlinks that are relevant to the particular user-type that is logged on.</p> <p>In addition to the extensive use of hyperlinks throughout the application, Cúram also supports the use of predefined wizards and workflows to assist users with complex processing paths. This includes allowing users to freely navigate to previous steps and then returning to complete the in-process task.</p>
USE 006	The EES shall preserve context by limiting abrupt transitions and redispays in order to maximize and enhance the user experience and EES usability.	S	<p>One of the primary goals of the Cúram user interface is to maintain context for the user, and to make it very easy for the user to understand how they got to where they currently are, and to return back to where they came from. The User Interface achieves this by being organized around the concept of 'primary objects'; a client, a case, an eligibility determination, etc. Each primary object has a home page that is displayed within a Cúram tab. As each primary object is accessed (e.g. the client is accessed from the case) a new object home page is opened in a new tab. This enables the user to always click back on the case tab, or on previously accessed primary objects.</p> <p>Above these Cúram tabs, the user has access to static links, such as a link to the page they see when they log in (the workspace page), a link to their task inbox, a link to their calendar, etc. As such, no matter what the user is working on, they always have single click access to key parts of their application.</p>

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
USE 007	The EES shall speak the users' language, with words, phrases and concepts familiar to the user, rather than EES-oriented terms.	S	The IBM Cúram user interface is presented through a standard web browser and provides an intuitive and consistent look and feel for system users. Designed in accordance with the W3C's Web Content Accessibility Guidelines (WCAG), the Cúram user interface provides a modern, configurable and highly accessible user experience. It delivers a highly consistent look and feel, which is user-friendly and intuitive for new users to learn. The configurable user interface will speak the user's language.
USE 008	The EES shall follow real-world conventions, making information appear in a natural and logical order.	S	The IBM Cúram user interface is presented through a standard web browser and provides an intuitive and consistent look and feel for system users. Designed in accordance with the W3C's Web Content Accessibility Guidelines (WCAG), the Cúram user interface provides a modern, configurable and highly accessible user experience. It delivers a highly consistent look and feel, which is user-friendly and intuitive for new users to learn. Information and tasks in the user interface appear in a natural and logical order.
USE 009	The EES shall allow the users to easily navigate to a variety of functions available to them without having to move sequentially through excessive menus and screens.	S	The Cúram user interface provides clear navigation that ensures users have a sense of where they are, where they have been, and where they can go to in the system. This also allows a user to easily navigate to a particular function.
USE 010	The EES shall support undo and redo, or provide onscreen confirmation/acceptance to the user to confirm a change that is permanent and cannot be "undone".	S	The Cúram user interface provides clear buttons to go back to a previous screen/step as well to as confirm an action.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
USE 011	The EES shall provide users with a clearly marked "emergency exit" for the instances when a user mistakenly chooses a function and such "emergency exit" must be simple with minimal dialogue.	S	SmartPro MedEE's user interface is designed to ensure that a user always has direct access to "emergency exit" type links such as their home page or their task inbox. Other "emergency exit" type links are available based on the context of what the user is working on. For example if a user is working on an eligibility case, they will have direct access to a link that will return them to the eligibility case home page. For transactions where new data is being added or existing data is being modified, the user will always be presented with a Cancel button, to enable them to back out of what they have been doing.
USE 012	The EES shall follow standardized conventions and limit the use of words, situations, or actions that have multiple meanings.	S	The user interface of SmartPro MedEE follows standardized conventions and thus limits situations which may confuse a user.
USE 013	The EES shall eliminate error-prone conditions or check for them and present users with a confirmation option before they commit to the action.	S	The Cúram user interface provides summary screens that allow a user to review the information provided before submitting. If there are any errors in the information entered by the user, the user interface will display error messages and will allow the user to correct the information before committing an action.
USE 014	The EES shall minimize the user's memory load by making objects, actions, and options visible.	S	The SmartPro MedEE user interface displays text, objects, and actions that are available to the user thus minimizing the user's memory load.
USE 015	The EES shall provide the option to have rollover/ tool-tip help or context messages and provide the option to turn off this option in the user preferences profile.	S	SmartPro MedEE provides an extensive and integrated help capability which supports page and field level context help. Rollover/tool-tip help is also available on images and individual data fields for the user.
USE 016	The EES shall provide all user instructions in a visible or easily retrievable location, when appropriate.	S	Whenever a user action is needed, SmartPro MedEE displays the user with guided screens to complete the appropriate action.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
USE 017	The EES shall cater to both inexperienced and experienced users and shall provide accelerators (e.g. onscreen short cuts, hot-keys, alternate workflows, etc.) to speed up the interaction for the expert user.	S	SmartPro MedEE caters to several different kinds of users, business and technical users as well as citizens (experienced or inexperienced), administrators, caseworkers, etc. For example, a short cut panel is always displayed in the Worker portal application. An experienced case worker may choose an action from the short cut panel were as an inexperienced case worker may go through a set of guided screens in order to complete the same action.
USE 018	The EES will allow users to create shortcuts (e.g. onscreen short cuts, hot-keys, etc.) for frequent actions.	S	The worker can create browser bookmarks for frequent actions.
USE 019	The EES's error messages shall be expressed in plain language, precisely indicate the problem, and constructively suggest a solution.	S	SmartPro MedEE leverages Cúram's exception handling which returns user-friendly error messages when an exception is raised. The text for the exception is loaded from a message catalog file and can easily be changed.
USE 020	The EES shall use colors to enhance user experience and EES usability while complying with all disability requirements notated elsewhere in these requirements.	S	SmartPro MedEE, based on Cúram's ADA compliant web based solution, meets applicable State and Federal accessibility standards for all processes and user interfaces produced by the system. User interface colors are maintained centrally in Cascading Style sheets and can easily be modified to suit DHHS needs. Default user interface colors are ADA compliant.
USE 021	The EES shall allow the user to navigate to any functional component from a client landing page.	S	Upon log in, the user is presented with their personalized home page or workspace which has links to all the functions they are able to do. For example, a case worker can log in to their workspace and search for cases, view their assigned cases, check their Inbox for tasks assigned, etc.
USE 022	The EES shall alert the user with information relevant to required next steps.	S	When a user is processing through a multi-step process (i.e. applying for an application, entering evidence data, etc.) a "menu of steps" is shown to the users with the total amount of steps in sequential order needed to complete the process.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
USE 023	The EES shall provide drop down and list boxes for all key entry, and text entry will display existing values for selection (auto fill).	S	SmartPro MedEE provides user interfaces with drop down lists, list boxes, text entry fields, etc. for entering values into the system. If the user types in their selection into the editable part of a drop down list, the items in the list will change to only show the items that align with what is being typed in.
USE 024	The EES shall accommodate point and click selection and check box entry for all relevant data entries to ensure that the user does not have to enter textual data that may already be available to the system.	S	SmartPro MedEE supports point and click selection options and check boxes for data entry/selection.
USE 025	The EES shall facilitate data entry and shall contain pop-up list boxes for all code fields in all processing windows and allow selection of the entry with use of hot keys.	S	Where an input field is associated with a list of items to select from (e.g. US States or Gender), the user will be presented with a text field containing a drop down list of selectable items. The user can use the arrow keys and the page up/page down keys to select the item they want. The user can also type ahead in the input field, and the available items in the list will be updated to reflect the characters entered.
USE 026	The EES shall provide field level on-screen edits with limited user override capabilities.	S	SmartPro MedEE will provide on-screen edits. When a user attempts to commit the data, they are informed of any required edits that must be made. For example, if the user enters a date of 13/32/2013, the on-screen edits will inform the user that they must update the date field before continuing.
USE 027	The EES shall not show fields that are not accessible to a given user based on access rights, nor shall the EES show fields not in use.	S	SmartPro MedEE interface is a role-based web portal. Depending on the user role logged into the system, appropriate system functionality and actions will be available and displayed. For example, when a case worker is logged in to the system, they are only presented with functionality related to case management.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
USE 028	The EES cursor shall automatically advance to the next logical input field when the maximum allowed numbers of characters have been entered for the keyed field.	S	SmartPro MedEE's input cursor will advance to the next input field when the user hits the tab key. The majority of data input fields have a length that extends beyond what most users need (e.g. a name field is 30 characters).
USE 029	The EES shall provide the option of having a selection from the drop down boxes automatically take the user to the next field.	S	SmartPro MedEE input cursor will advance to the next input field when the user hits the tab key.
USE 030	The EES shall provide validation checks by methods described within policy, functional, and detailed requirements.	S	IBM Curam will support both electronic validation of data through the federal data hub and required State systems (modification required - see GEN 011) and the ability to manually upload validation documents where electronic validation is not possible.
USE 031	The EES shall identify invalid entries to the user as immediately as possible.	S	SmartPro MedEE leverages Curam's exception handling which returns user-friendly error messages when invalid entries are submitted by the user. The text for the exception is loaded from a message catalog file and can easily be changed. Error messages and informational messages are displayed on screen as the user is entering or maintaining data.
USE 032	The EES shall provide the ability to suggest or automatically change entries that do not conform to data entry standards.	S	IBM Curam will highlight entries that do not conform to data entry standards, as the user is entering data. For example if the user enters letters into a date field.
USE 033	The EES shall be designed to include only the necessary information and functionality on screens and shall be based on the user's access level and the user's configuration.	S	SmartPro MedEE's interface is a role-based web portal. Depending on the user role logged into the system, and their access level rights, appropriate system information and functionality will be available and displayed.
USE 034	The EES shall be designed to include logical transitions between screens and level of detail during navigation.	S	SmartPro MedEE provides clear navigation that ensures users have a sense of where they are, where they have been, and where they can go to in the system. It also includes "tabbed" pages to provide an easily navigable way of viewing and accessing a large amount of information for various record types.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
USE 035	The EES shall provide templates for data entry with identified mandatory and optional data fields.	S	SmartPro MedEE supports the requirement to identify and enforce entry of mandatory input fields and allow other fields to be optional. All mandatory fields are indicated with an asterisk (*) – for example, Last Name, Gender, Date of Birth, etc. – while optional fields do not show an asterisk.
USE 036	The EES shall allow incomplete data sets to be saved for completion of the workflow at a later time.	S	Once logged in to the system, users can save their incomplete data sets for completion at a later time. For example, a citizen can start an online program application and decide to Save and Exit half way through the application.
USE 037	The EES shall highlight and flag required and incomplete data fields.	S	IBM Cúram supports the requirement to identify and enforce entry of mandatory input fields and allow other fields to be optional. All mandatory fields are indicated with an asterisk (*) – for example: Last Name, Gender, Date of Birth, etc. – while optional fields do not show an asterisk. Incomplete data fields will be highlighted via exception messages.
USE 038	The EES shall include a graduated system of alert levels to allow users to determine urgency and relevancy.	S	Electronic notifications are sent in SmartPro MedEE to users to alert them of task items such as pending and overdue work. Alerts can be sent to a user via tasks in their Inbox or displayed in their Home Pages for greater urgency.
USE 039	The EES shall allow configuration of alerts by a user, for a user by a supervisor, and for a user by an EES administrator	S	The alerts in the system can be configured via the workflows in which they pertain to.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
USE 040	The EES shall allow for the request of or entry of data from external devices (e.g. tablets, kiosks, barcode scanner, RFID scanner, speech).	S	<p>External devices can be used to input data into SmartPro MedEE:</p> <p>The tablet browser can be used to display the IBM Cúram client and worker portals.</p> <p>A Kiosk can run a supported browser and so display the IBM Cúram client portal.</p> <p>A connected barcode or RFID scanner can read data and insert it automatically in an on screen input field.</p> <p>A speech to text device can be used to interact with the IBM Cúram portal.</p>
USE 041	The EES shall notify the user when a source system is unavailable/inoperable and notify user that any available information about the subject being viewed is as of certain time and date.	M	SmartPro MedEE will inform a user when any data that is mastered in a remote system, was last updated. Modification effort will be included to cater for this requirement, though it is not yet clear what functions will operate like this.
USE 042	The EES's web interface shall be aligned with Web 2.0 design principles and best practices.	S	Cúram is an ADA compliant web based solution that users Web 2.0 technologies including JSP, JavaScript, Cascading Style sheets, AJAX, etc.
USE 043	The EES shall not require users to reenter data due to validation errors if the systems can auto-correct based on the entered data or the user can navigate to the entry error to correct the entry.	S	Upon validation errors in the system, SmartPro MedEE does not require the user to re-enter all information which was not deemed invalid. The EES displays user friendly messages to the users to highlight which entries need to be corrected.
USE 044	The EES shall enable central workflow alerts and transactional status.	S	Notifications can be defined and associated with any workflow activity. They can be issued in the form of an Alert.
USE 045	The EES shall centralize pending work items for the user as in a "work queue"	S	Cúram Workflow provides work allocation features for assigning work items to system resources, individuals, organizational units, and shared work queues as appropriate. Once a work item has been allocated, it ultimately becomes a task for an individual who can then view and action the task. Tasks are used to assign and track a user's workload.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
USE 046	The EES shall have the capability to push messages to the intended workers without requiring them to specifically inquire for the data.	S	Users manage their workload from the Inbox. A toolbar shortcut to the user Inbox is available on each page in the application. The Inbox provides the functionality necessary to allow a user to manage workload. Messages are handled as tasks. When a task is assigned to a user, an alert can optionally be configured. The alert will appear in the user's notification list and can be emailed directly to the user.
USE 047	The EES shall provide linked access to help functions which contain the appropriate information and search of all help information from every window, based on user profiles.	S	IBM Cúram provides links to access help information from every window. The Help viewer provides the user with a help search function.
USE 048	The EES shall have the capability to capture a public benefit applicant's application in a disconnected/offline mode to be processed once a connection to the Internet is established	M	Will be implemented with email delivery of an offline form.
USE 049	The EES shall utilize standard web browser-based technology with the ability to provide data over a web browser interface (i.e. HTML over HTTP).	S	The Cúram user interface is composed of HTML pages generated JSP pages, using cascading style sheets (CSS) to determine the formatting of screen pages. The user interface provides the ability to send data over a web browser interface (HTML over HTTP or HTTPS).
USE 050	The EES shall include the capability to encrypt the data communicated over the network via SSL (HTML over HTTPS).	S	SmartPro MedEE provides a secured web portal with a log in screen for authentication. SSL is on by default for access to the web application. This ensures a secure SSL connection between the client and server and also ensures data is encrypted. SSL is turned on for the client through settings in the web.xml file for the web client application. SSL is turned on at the application server level.

Integrated Eligibility Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
IER 001	The EES shall have the capability of exchanging information with the legacy N-FOCUS system.	M	The interfaces described in the RFP will be supported using SmartPro MedEE's ESB and File Transfer functionality.
IER 002	The EES shall have the capability to provide data and access to notifications to the Federal Facilitated Marketplace.	S	SmartPro MedEE has prebuilt capability in support of the FFM account transfer interface.
IER 003	The EES shall have the capability to request and store data from federal Hub for a number of purposes including, but not limited to: updated Citizenship and Income verification.	S	A unique feature of "Cúram for Medical Assistance" is prebuilt integration with the Federal Hub and prebuilt hooks to enable integration with other systems, such as State systems, for the verification of application data.
IER 004	The EES shall have the capability to request and store results of IRS service information.	S	SmartPro MedEE has prebuilt capability in support of Federal Hub integration. The Fed Hub supports a connection to the IRS.
IER 005	The EES shall have the capability to request and store results of Equifax – TALX wage verification.	M	SmartPro MedEE will support integration with the Equifax - TALX wage verification service through IBM's Integration Bus, the solution ESB. TALX is an employment verification service (among other things) - state systems talk directly to this for many of their benefit programs (SNAP and TANF too) - this is not through the Fed Hub. Some modification effort required to support the integration with the TALX wage verification service.
IER 006	The EES shall have the capability to request and store results of verification service citizenship/lawful presence provided by CMS	S	SmartPro MedEE supports prebuilt integration with the Federal Hub for electronic verification purposes, and where not possible the manual creation of verification records and the upload of related verification artefacts.
IER 007	The EES must be able to express eligibility determination business rules outside transactional system in the business rules engine implemented as part of the Nebraska EES.	S	The Eligibility determination rules can be extracted out of the transactional system as XML documents.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
IER 008	The EES shall have the capability of exchanging eligibility information with the legacy N-FOCUS system.	S	SmartPro MedEE uses the IIB (ESB) to exchange information with N-FOCUS. Refer to requirement IER 010 for Cúram effort. See also IER 019.
IER 009	The EES shall have the capability of exchanging eligibility information with the legacy MMIS.	S	SmartPro MedEE uses the IIB (ESB) to exchange information with the legacy MMIS. Refer to requirement IER 010 for Cúram effort. See also IER 019 and ELG 153.
IER 010	The EES shall have the capability to provide results of eligibility determination to other systems.	M	SmartPro MedEE maintains the eligibility determination results for all beneficiaries. Modification effort required to expose required eligibility details for external systems. Refer to requirements IER 008 and IER 009.
IER 011	The EES shall have the capability to provide data and access to notifications to other systems.	S	Access to data through the ESB and web services exposed from Cúram. Access to notifications (i.e. correspondence) will be through the EDMS, the State's Hyland system – this will be connected through the ESB to SmartPro MedEE.
IER 012	The EES shall have the capability to store results/client attestation of a number of factors including, but not limited to Native American Status, Residency, Incarceration Status, and Individual Exemption qualification.	S	SmartPro MedEE supports the capture of application data including native American status, pregnancy details, disability status, incarceration status, individual exemption qualification data, etc., and of the client attestation of this data.
IER 013	The EES shall have the capability to store results of alternate client verifications for a number of items including, but not limited to income, Citizenship / Lawful presence	S	IBM Cúram supports prebuilt integration with the Federal Hub for electronic verification purposes, and where not possible the manual creation of verification records and the upload of related verification artefacts. New verification types for specific data (e.g. citizenship, income, lawful presence, etc.) can be configured into EES.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
IER 014	The services and consumers employed in the EES shall be loosely-coupled to ensure service logic can evolve while guaranteeing backwards compatibility to existing consumers.	S	The interfaces are developed with SOA based implementation to identify reusability. The grain of the services determines its reusability. The services are loosely coupled and are exposed with standard set of protocols which ensures the service logic can evolve while guaranteeing backwards compatibility.
IER 015	The EES shall be able to interface with multiple state systems as well as external partner systems to allow interoperability as appropriate with outside entities and state agencies. (Real-time, near-time, batch)	S	For external integration there are two types of patterns a) Real time/near real time integration b) Batch based integration. For type a integration the ESB mediates the exchange. For type b integration either the ESB or Connect Direct integrates with outside entities, state agencies, the choice depending upon the interface protocol. For User access based integration (UI Layer) the access credentials and access privileges ensures the security of the user/group access.
IER 016	The EES shall provide the ability to leverage the federal approach to verification from federal agencies such as the Internal Revenue Service, Department of Health and Human Services, and Department of Homeland Security to eliminate the independent establishment of those interfaces and connections at the Nebraska level.	S	A unique feature of "Cúram for Medical Assistance" is prebuilt integration with the Federal Hub and prebuilt hooks to enable integration with other systems, such as State systems, for the verification of application data. Direct connections to the IRS, department of Homeland Security, etc. is discouraged, and not needed.
IER 017	The EES shall provide standard, secure, and configurable interfaces between all interfacing information sharing entities.	S	SmartPro MedEE Interfaces will be implemented in IBM Integration Bus providing a standard, secure set of interfaces which can be configured to be leveraged between different interfacing entities.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
IER 018	The EES shall provide the ability to support real-time automated data exchanges with internal systems to ensure that data is aligned.	S	The event based integration between participating application where any change in data entity are published by the service provider to a message queue which ESB Send data to the service consumer after doing transformation and routing. The service consumer needs to consume messages from the queue and update its system. This way the data is synced between two participating applications.
IER 019	The EES shall provide the ability to communicate the eligibility decision to other relevant systems.	S	SmartPro MedEE will provide the ability to communicate eligibility information to external systems, either online through a web services or in batch through an eligibility data file. Refer to requirement IER 010.
IER 020	The EES shall provide the ability to export an enrollment file to external entities as specified by the Department.	S	Refer to requirement ELG 107 for effort around extracting enrollment data from the EES. Exporting the file for external entities is an ESB file transfer effort.
IER 021	The EES shall provide the ability to export Medicaid benefits to the Nebraska MMIS.	S	Refer to requirement ELG 107 for effort around extracting enrollment data (i.e. Medicaid benefit enrollment data) from the EES. Exporting the file for external entities is an ESB file transfer effort.
IER 022	The EES shall ensure that dates across Nebraska systems remain in synch (e.g., a case's closing or some other action).	S	Refer to IER 018.
IER 023	The EES shall provide the ability for data and process integration between programs according to state and federal regulations as required.	S	The IBM ESB provides for data and process integration.
IER 024	The EES should expose a web service that allows other systems to submit requests to verify an individual's enrollment.	M	Modification effort required to support a common format for individual enrollment data. Refer to requirement ELG 107 for effort around extracting enrollment data from SmartPro MedEE.
IER 025	All web services used in the EES should be reusable as enterprise resources by systems external to the EES.	S	The Services are developed using SOA principals which ensures reusability.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
IER 026	The data exchange infrastructure should support multiple open standards and industry standard protocols, including Secure FTP (S-FTP), SOAP over HTTPS, and JMS/ MQ messages.	S	The Integration layer supports SFTP, SOAP over HTTPS, JMS/MQ based integration.
IER 027	The EES should provide common bi-direction interfaces (preferably, a web service API) that will support the integration with Computer Telephone Integration (CTI) systems for purposes such as retrieving caller information and triggering screen pops.	S	The Service Consumer makes a call to the ESB which in-turn makes call to the CTI Webservices to get the response and provides the information to the service consumer.
IER 028	The EES should provide the ability to report on interface transmissions (e.g., total number of records loaded, date of interface transmission, amount of time to execute the interface transmission, errors, and failures).	S	The audit logging will be done by the common components implemented in the ESB layer. The main flows implemented in the ESB provide information based on the audit logging framework defined.
IER 029	The EES should provide the ability to import data into the EES in multiple formats (e.g., csv, fixed length ASCII, tab-delimited).	S	The ESB layer supports file based integration using various formats like CSV, Fixed length ASCII, Tab delimited, etc. IBM ESB supports file based integration.
IER 030	The EES should provide the ability to automatically identify inconsistencies between the case record and information received from interfaces as specified by the Department.	S	Cúram Evidence Broker is used to capture and process incoming eligibility data. Cúram Evidence Broker mediates the sharing of eligibility data across cases, acting as both a receiver and a broadcaster of eligibility data. Cúram Evidence Broker is used to decide the types of evidence can be shared, and what to do when shared data and existing data does not match - auto-accept the shared data, auto-reject the shared data, or inform a user.
IER 031	The EES should support integration with Nebraska's current calendar and e-mail environment.	W	IBM Cúram supports integration with calendar and email systems through several mechanisms. For example, workflow can generate emails automatically when tasks are ready or overdue, or through Cúram calendaring, where for a scheduled meeting, Invitations to all parties are sent via Personal Information Manager (PIM) tools such as Microsoft Outlook. The invite appears in the invited user's calendar where they can accept or reject the invitation.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
IER 032	The EES should employ XML-based standards for communication and integration with other environments.	S	IIB uses XML as the standard for messaging. The objects are implemented as XML.
IER 033	The EES should provide alerts to DHHS staff on status of interface data processing (e.g., when processing is completed or error occurs).	M	The ESB implements Audit and Error handling components to provide the status of the interface processing, which will be exposed to DHHS staff.
IER 034	The EES should provide the ability to support Interfaces by exchanging information on schedule as specified by the Department.	W	IBM's SmartCloud Workload Scheduler manages scheduled interfaces.
IER 035	The EES should provide the ability to automatically track inbound customer service interactions received through the IVR and/or interfaces based on program rules.	M	For IVR integration interfaces the ESB components will implement an audit log entry for each invocation.
IER 036	The EES should provide the ability to present a result list for data imports and exports (e.g., success or failure, time started, time completed).	S	SmartPro MedEE maintains status and timestamps for interface events.
IER 037	The EES should provide the ability to restart an interface transmission from a specific point (e.g., restart at failed record, restart from beginning).	S	IBM IIB provides a record and Replay feature which provides ability to restart from a failure to a logically completed step.
IER 038	The EES should associate information received via interface with the line-of-business record which generated the information request.	M	Cúram maintains alternate identifiers, which can be identifiers used by other systems for line-of-business records. Cúram can then use these external identifiers to associate the information received via an interface with the appropriate Cúram record. This may require only configuration where the interface is using identifiers already "known" to Cúram as part of standard message formats, but others may require modification to identify the identifier.
IER 039	The EES should support exchange of bulk data information to be printed and mailed.	W	Cúram will deliver the ready to print mailing files via batch file transfer to the State, which will dispatch them to their mailroom printer for production and mailing.

EES Administration Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
ADM 001	The EES shall provide data archiving capabilities based on Department defined criteria.	C	Cúram will be extended to allow archiving of aged operational data while maintaining internal database consistency. Aging / Archival will be constrained to closed/inactive cases and to log data, such as logs of data access. The value of the aging threshold will be set in agreement with the State as determined in project execution. Aging / archival will normally be executed as a monthly job, and the resultant archives will be retained consistent with State requirements. Archived data will be restorable based on Archive date.
ADM 002	The EES shall provide the capability to move all historical, expired and/or unnecessary data to offline storage according to a set of business rules and schedule to be defined by the Department as a part of the ongoing system operational decision making.	C	Same as ADM 001
ADM 003	The EES shall maintain an archival process so that accumulated historical records and log files do not consume large amounts of disk space.	C	See ADM 001
ADM 004	The EES shall provide an auto archive/purge of the log files to prevent uncontrolled growth of the log and historical records storage using administrator-set parameters.	C	See ADM 001
ADM 005	The EES shall provide version control capabilities to ensure the integrity of all software releases.	S	Versioning is an intrinsic capability of Rational Team Concert, which manages configurations and SCC.
ADM 006	The EES shall monitor and provide reports on any unauthorized access.	S	SmartPro MedEE fully satisfies the requirement as stated.
ADM 007	All EES communications shall be protected by at least 128-bit encryption.	S	SmartPro MedEE fully satisfies the requirement as stated.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
ADM 008	The EES shall be supported by public key/private key encryption Secure Socket Layer (SSL) certificates.	S	SmartPro MedEE fully satisfies the requirement as stated.
ADM 009	The EES shall provide admin tools and maintenance routines to change access rights quickly.	S	Native Cúram and Portal functionality.
ADM 010	The EES shall use firewalls and Demilitarized Zones (DMZs) for external access and remote access.	S	Basic design of Wipro's shared Data Center services.
ADM 011	The EES shall allow EES administrators to create and manage user accounts.	S	Mixture of State Microsoft and Cúram functionality.
ADM 012	The EES shall allow EES administrators to assign status and permissions to user accounts.	S	Cúram and Portal functionality.
ADM 013	The EES shall allow EES administrators to create and manage user roles.	S	See IDT001, MDM031 and RSR085. SmartPro MedEE uses Cúram's Administration Suite to provide a set of security menu options to enable administrators to configure and govern overall access to the Cúram application including the creation and management of user roles.
ADM 014	The EES shall allow EES administrators to create user groups to manage workflow.	S	SmartPro MedEE uses Cúram's Workflow component that provides work allocation features for assigning work items to system resources, individuals and organizational units. Allocation strategies determine how work is distributed to individuals or groups. Administrators can create groups and manage the workflows.
ADM 015	The EES shall allow EES administrators to assign users to particular local offices.	S	SmartPro MedEE administrators can assign users to locations. A Location hierarchy is maintained.
ADM 016	The EES shall allow EES administrators to assign users to particular user groups / units.	S	SmartPro MedEE administrators can assign users to user groups.
ADM 017	The EES shall allow EES administrators to assign users to particular supervisors.	S	SmartPro MedEE administrators can assign users to supervisors and vice versa.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
ADM 018	The Contractor shall establish an automated maintenance routine that shall at a minimum: - backup the user IDs and password data - identify expired IDs and related data	S	Backup in Cúram and Portal is automatic, as is expiry.
ADM 019	The Contractor shall use offsite storage. Data backup should be stored offsite in the event of a physical disaster	S	SmartPro MedEE fully satisfies the requirement as stated. SOP for Wipro Data Center operations.

EES Management Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
MGT 001	The EES shall have the ability to generate administrative alerts and warnings when statistics indicate an impact or potential limits on EES component performance and availability. The specific alerts will be defined by the hosting services provider.	W	Wipro will be the hosting provider for SmartPro MedEE. PureSystems Manager monitors component performance and utilization. It can dynamically self tune within boundaries defined by configured business rules. When this management layer cannot self-correct within defined boundaries, it elevates an alert to Wipro's Data Center Enterprise Management software.
MGT 002	The EES shall allow for all changes/updates to the distributed components to be administered and completed centrally and available immediately to all source systems and sites.	S	PureSystems Manager and WebSphere SOA Policy Gateway (WSRR) provide this functionality to SmartPro MedEE.
MGT 003	The EES shall provide Service Level Requirements (SLR) monitoring and reporting capabilities. Service Level definitions will be drafted into a single document provided as an attachment.	S	SmartPro MedEE fully satisfies the requirement as stated. The PureApplication Server Monitoring and ITCAM provide most of server based SLR monitoring. Other Data Center shared tools monitor network, backup, and job performance -- all are consolidated in the Data Center's Enterprise Management software, and are made available to the State over a Portal. SLR definitions will be prepared and maintained in a single reference document.
MGT 004	The EES shall securely support State's existing remote control (i.e. support personnel ability to take over the user device for troubleshooting and support) capabilities deployed for any type of client workstation.	S	All user interfaces for SmartPro MedEE are based on standard browser technology and therefore have no impact on the ability to manage the workstations or take over the device for troubleshooting and support.
MGT 005	The EES shall provide event management and monitoring functionality according to Information Technology Infrastructure Library version 3 (ITIL v3) or equivalent best practices.	S	SmartPro MedEE fully satisfies the requirement as stated. Our Data Centers provide extensive industry standard monitoring and event management support, pursuant to ITIL standards.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
MGT 006	The EES shall provide application performance monitoring and management capabilities (i.e. transaction monitoring, synthetic transactions, component root cause analysis)	S	SmartPro MedEE fully satisfies the requirement as stated. PureSystems Manager and ITCAM provide monitoring and management, including response time measurement. Root cause analysis is SOP for Wipro Data Center Operations.
MGT 007	The EES shall provide transaction tracking and log consolidation capabilities across all tiers of the application	C	Complete log consolidation with alert and search capability will be created as part of SmartPro MedEE.
MGT 008	The EES shall use automated application and network performance measuring tools for proactive system monitoring, tuning mechanisms, reporting, and trend analysis. Performance monitoring alerts shall be configurable and allow for user notification using multiple communication methods.	S	SmartPro MedEE fully satisfies the requirement as stated. PureSystems Manager and ITCAM provide monitoring and management, including response time measurement. PureSystems Manager provides for dynamic tuning, including business rule driven self-tuning. Data Center shared tools provide reporting and trend analysis, which is made available to the State over a portal.
MGT 009	The EES shall provide a custom report outlining system anomalies such as high levels of utilization, poor response times, large number of failed logins, and other abnormal activities, identified, repaired and resolved. This report's frequency shall be dictated by the number of anomalous activities. The report shall include specifics regarding the issues encountered, the measures taken to resolve the anomalies and the resources (EES Contractor, Department and third-party, as applicable) participating in the process.	W	The monitoring requirements are addressed as part of the standard toolkit, and report their data to the Data Center's centralized Enterprise Management system. eHealth provides significant reporting and drill down capabilities to present customized reports. Incident Management tracks the resources used to resolve tickets, and is accessible to the State.
MGT 010	The EES shall provide a report reflective of system performance statistics. This performance statistics report shall be presented to the Department not less than monthly for the purposes of monitoring the Department's systems and network activity.	S	SmartPro MedEE fully satisfies the requirement as stated. System reports are available online to the State through a portal.
MGT 011	The EES shall provide event and incident notification capabilities which can integrate with industry standard system management frameworks such as those provided by CA, IBM and Microsoft.	S	SmartPro MedEE fully satisfies the requirement as stated. Wipro's Data Centers utilize all of those frameworks, integrated into a comprehensive Enterprise Management system.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
MGT 012	The EES shall have the ability to capture and report on system utilization needed to allocate costs down to the user and transaction level.	M	SmartPro MedEE captures basic Business Metrics, including transaction performed, and the users who performed them. These metrics can be associated with accurate models of required system resources to develop allocation data.
MGT 013	All performance and systems management functions shall be able to operate without degrading business systems response time.	S	SmartPro MedEE will undergo different types of performance testing activities like benchmark testing, load, stress and endurance. All the hardware server resources and software resources are monitored, including transaction response time, to validate adherence to performance SLRs. Physical resources are allocated to meet SLR goals, and already accommodate monitoring overhead.
MGT 014	The EES shall include the infrastructure (e.g. via the ESB and business process layer) needed to support effective Business Activity Monitoring and Reporting of various business performance metrics, and the information reports necessary to allocate costs based on usage.	M	SmartPro MedEE captures basic Business Metrics, including transaction performed, and the users who performed them. These metrics can be associated with accurate models of required system resources to develop allocation data.
MGT 015	The EES shall provide the ability for system capacity monitoring including, but not limited to, server volume/capacity, and network volume/capacity.	S	PureApplication systems self-monitor all key system resources, and provide a rich management console capability to review and manage this data, including graphical presentations, dashboards, and drill down. Similarly, Data Center tools capture network utilization statistics. In all domains, usage is analyzed against capacity, and known trends in expected business volumes, to update and refine capacity models.
MGT 016	The EES shall have the ability to provide workload statistics (e.g., work-in-process, queues, waiting-for-resources).	S	An EES supervisor can monitor workload for those workers, groups of workers and work queues that they are responsible for. Refer to requirements OPS 022 and OPS 024.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
MGT 017	The EES shall have the ability to notify users, via multiple channels, when the measured performance is outside tolerances.	S	SmartPro MedEE fully satisfies the requirement as stated. Exceeding configured limits triggers automatic notifications to the Data Center's Enterprise Management software, and based on rules can automatically open trouble tickets and notify both Wipro operations staff and management, and State staff.
MGT 018	The EES shall have the ability for users, upon notification of performance outside tolerance, to identify the cause of the performance issue.	S	Wipro's Data Center Standard Operating Procedures include root cause analysis for performance issues, and other failures or problems.
MGT 019	The EES shall have the ability to provide dashboard and other report types suitable for business activity monitoring including templates for common display types.	C	Cúram's own Monitoring and Reporting features, along with 1 Cognos based Dashboard and 3-4 custom reports will fulfil this requirement. The actual monitoring activity will be finalized by Wipro IBM SMEs and State's Business users during requirements Assessment Phase, and IBM Cognos standard display types and functionalities will be more than sufficient for such reports.
MGT 020	The EES shall provide for and support the ability to control batch job execution by time of day, date, and processing cycle (weekly, monthly, yearly, quarterly, on request, etc.).	W	IBM's SmartCloud Workload Automation provides complete control of job execution.

Enterprise Service Bus (ESB) Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
ESB 001	The EES shall provide reliable, once-only delivery of messages (guarantee of reliable and non-repetitive delivery).	S	SmartPro MedEE implements IBM's Integration Bus "IIB" (incorporating "Message Broker" and "MQ" functionality) as its ESB middleware. IIB provides reliable, once-only, non-repetitive message delivery.
ESB 002	The EES shall have the ability to support varying message payloads, ranging from individual transactions to large files (more than 1GB) containing multiple transactions.	S	IIB and Sterling Direct Connect jointly provide information transfer ranging from short real-time transactions up to effectively unlimited size file transfers. A wide range of transfer protocols, both messaging and file based are supported by this tool combination.
ESB 003	The EES shall have the ability to track a message from its origin to its destination (inside a firewall), inquire on the status of that message and address exceptions (for example, resend the message if a target times out).	S	IIB addresses this requirement. ITCAM is configured to monitor applications and messages.
ESB 004	The EES shall have the ability to use standards-based communication protocols, such as TCP/IP, HTTP, HTTP/S and SMTP.	S	IIB directly supports all of these protocols.
ESB 005	The EES shall have the ability to convert between the protocol native to the messaging platform and other protocols, such as Remote Method Invocation (RMI), IIOP and .NET remoting.	S	IIB provides this functionality.
ESB 006	The EES shall have features that enable in-flight message manipulation, such as transformation (typically XML-based), intelligent routing, naming and addressing.	S	IIB provides this. Message transformation can be performed by IIB standard nodes, and if needed, in code. Intelligent routing is accommodated.
ESB 007	The EES shall have the ability to apply logic to the routing of messages, including support for the following file interaction styles:	S	IIB addresses this and the following subordinate requirements:

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
ESB 008	<ul style="list-style-type: none">Store and forward: Ability to persist a message and then send it to destinations.	S	IIB supports persisting and then sending messages to their destinations.
ESB 009	<ul style="list-style-type: none">Publish/subscribe: Ability to distribute a message to multiple destinations based on a message attribute usually described as the subject area of the message.	S	IIB supports the publishing of messages to subscribers based on subscriber configurations and message attributes.
ESB 010	<ul style="list-style-type: none">Request/reply: Ability to correlate asynchronous messages so that the target's response is associated with the appropriate request made by the source.	S	IIB supports both synchronous and asynchronous Request/Reply messages. It correlates the request and reply messages using unique ids, so that the reply will be associated with the appropriate request message.
ESB 011	<ul style="list-style-type: none">Content-based: The ability to route a message based on a value or values within a message. For example, the ability to route a referral message whose target turnaround time is small to a different set of targets than a referral message whose turnaround time is high.	S	IIB can route messages to various destinations based on the message content.
ESB 012	The EES shall provide for syntactic conversion and semantic transformation, including ease of use and reuse, number of built-in functions, ease of extending the transformation function with custom-coded logic and XML support (e.g. schema or Extensible Style sheet Language Transformations [XSLT]).	S	Message Broker handles message transformation using built-in nodes as well as using code. This can also be achieved using XSLT transformation. The common mapping logic can be reused across different flows.
ESB 013	The EES shall have the capability during operations, to assist service consumers by dynamically finding, binding to and invoking the execution of service providers.	S	IIB combined with WebSphere SOA Policy Gateway (WSRR) will address this requirement. Service consumers dynamically locate provider services by using IIB to connect to WSRR, and can then invoke the target service. This is an integration pattern for EESB implementations provided on the PureApplication Server.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
ESB 014	The EES shall provide the technology that combines design tools and runtime software to implement programs that act as "glue," transforming among protocols, connecting to databases and linking pre-SOA Application Programming Interfaces (APIs) to the SOA backplane. To support B2B projects, adapters also need to support SOA services using B2B protocols such as Applicability Statement 1 (AS1)/Applicability Statement 2 (AS2), RosettaNet and Electronic Data Interchange for Administration, Commerce and Transportation (EDIFACT).	S	These functions are provided by IIB the State's existing EDI implementation in tandem. IIB provides the SOA implementation linking SmartPro MedEE to the State's EDI capabilities.
ESB 015	The EES shall support the industry-standards messaging and interfaces relevant to health and human services organizations including, but not limited to: - Health Level Seven (HL7) Versions 2.x, 3.x, and CCD - Integrating the Healthcare Enterprise (IHE) XD* Profiles	S	IIB links SmartPro MedEE with the State's EDI system to provide this functionality. If in the future the State wishes to dispense with its EDI gateway, or some other reason arises that it will no longer support HI7 et al, then SmartPro MedEE can acquire and deploy InfoSphere Transformation Extender (WTX) to directly provide this functionality.
ESB 016	The EES shall provide the technology that hosts the execution of process logic spanning multiple back-end services or applications - typically for short-term (seconds or minutes) processes that can occasionally also be long term (hours, days, weeks) - with the aim of implementing composite services or automated EES-to-EES processes. Features include:	S	IBM Cúram provides a full workflow capability that can orchestrate short or long term processes and this provides all the functionality needed to meet the requirements. Where it is required to orchestrate processes spanning multiple back-end services, Cúram tasks can be exposed as Web Services and orchestrated by an external Business Process Manager. Our solution includes the open source Bonita BPM software that integrates with our WebSphere Application server to provide this functionality.
ESB 017	<ul style="list-style-type: none"> Graphical design surface for specifying process flows 	S	Standard Bonita functionality.
ESB 018	<ul style="list-style-type: none"> Support for standard specification languages including Business Process Modeling Notation (BPMN) 	S	Standard Bonita functionality.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
ESB 019	<ul style="list-style-type: none">Support for standard representations including Business Process Execution Language (BPEL), XML Process Definition Language (XPDL), Business Process Modeling Language (BPML) and Web Services Flow Language (WSFL)	S	Standard Bonita functionality.
ESB 020	<ul style="list-style-type: none">Ability to specify compensating transactions and execute those transactions upon failure of the process flow	S	Standard Bonita functionality.
ESB 021	<ul style="list-style-type: none">Integration with workflow	S	Standard Cúram and Bonita functionality.
ESB 022	The EES shall provide the technology to perform syntactic and semantic hub-based transformation of messages, including:	S	IIB provides this as standard functionality.
ESB 023	<ul style="list-style-type: none">Support of taxonomy	S	IIB and WSRR together address this requirement. SmartPro MedEE uses WSRR as the Service Governance tool. The model and Taxonomy of the Service Development Life Cycle will be implemented in WSRR for design time and run time governance. WSRR supports UDDI as its core and WSDL to publish the service description for consumer consumption.
ESB 024	<ul style="list-style-type: none">Support of ontology	S	IIB addresses this requirement.
ESB 025	<ul style="list-style-type: none">Reusable transformation maps	S	IIB fulfills this requirement. The transformation maps which are common across multiple messages can be reused across various message flows.
ESB 026	<ul style="list-style-type: none">Built-in transformation functions	S	IIB addresses this. It has built-in mapping nodes that are used for message transformation, and also supports transformations using custom-code.
ESB 027	<ul style="list-style-type: none">Extending the transformation function with custom-coded logic	S	IIB addresses this. It has built-in mapping nodes that are used for message transformation, and also supports transformations using custom-code.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
ESB 028	<ul style="list-style-type: none">Support B2B project translation including Electronic Data Interchange (EDI), RosettaNet, HL7, etc.	S	IIB links SmartPro MedEE with the State's EDI system to provide this functionality. If in the future the State wishes to dispense with its EDI gateway, or some other reason arises that it will no longer support HL7 et al, then SmartPro MedEE can acquire and deploy InfoSphere Transformation Extender (WTX) to directly provide this functionality.
ESB 029	The EES shall provide the functionality that provides reliability for applications, services or message flows:	S	IIB provides for these functions and requirements.
ESB 030	<ul style="list-style-type: none">Load balancing	S	IIB supports clustering, both for load balancing and for high availability. The PureApplication Server is "IIB Aware", with preconfigured deployment Patterns to circumvent the need to engineer a complex clustered design: instead, the PureApp box directly deploys clustered IIB in a certified configuration suitable for load balancing, high availability, fault tolerance, and automatic failover, merely by requesting that IIB be deployed on more than one VM within the environment.
ESB 031	<ul style="list-style-type: none">High availability	S	Please refer to ESB 030.
ESB 032	<ul style="list-style-type: none">Fault tolerance	S	Please refer to ESB 030.
ESB 033	<ul style="list-style-type: none">Failover	S	Please refer to ESB 030.
ESB 034	<ul style="list-style-type: none">In-order delivery	S	IIB provides for in-order delivery of messages.
ESB 035	<ul style="list-style-type: none">Transaction support	S	IIB supports message transactionality. If a failure happens between source and destination, IIB can roll back the message.
ESB 036	<ul style="list-style-type: none">Execution prioritization	S	IIB supports prioritization of execution.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
ESB 037	<ul style="list-style-type: none"> Message prioritization 	S	IIB supports prioritization of message delivery.
ESB 038	<ul style="list-style-type: none"> Downstream throttling 	S	Using IIB channel configuration / message exit, downstream throttling can be achieved.
ESB 039	The EES shall provide the functionality used to monitor the operation of the overall system (services, applications, processes and application infrastructure), and to collect events and usage information aimed at populating technical KPIs of the deliverables supported by the SOA backplane and of the SOA backplane components by monitoring and collecting metrics for:	W	Provided by PureSystems Manager and ITCAM.
ESB 040	<ul style="list-style-type: none"> Messaging traffic 	S	Provided by PureSystems Manager and ITCAM.
ESB 041	<ul style="list-style-type: none"> Process state and behavior 	S	Provided by PureSystems Manager and ITCAM.
ESB 042	<ul style="list-style-type: none"> Application and service parameters and behavior for all nodes in a LAN or WAN 	S	Provided by PureSystems Manager and ITCAM, plus Wipro's Data Center Enterprise Management monitoring of the network fabric.
ESB 043	The EES must provide for any combination of Alert Destinations such as Email, JMS, SNMP, reporting services, and server logs. The alerts shall be customizable with respect to the frequency of the alert, the ability to enable/disable an alert, rule expiration dates, starting and ending times for an alert, and customizable conditions for an alert".	W	Wipro's Data Center Enterprise Management system provides for configurable alerting and flexible delivery of information to the State, including a web portal.
ESB 044	The EES shall provide the tools and technologies required to implement the necessary control access to the services and the connected resources (for example, other services and databases), as well as the SOA backplane functionality. Capabilities include:	S	IIB, combined with WebSphere SOA Policy Gateway (WSRR), provides for these requirements.
ESB 045	<ul style="list-style-type: none"> Authentication 	S	Service based authentication is supported by IIB.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
ESB 046	<ul style="list-style-type: none">Authorization	S	Service based authorization is supported by the IIB.
ESB 047	<ul style="list-style-type: none">Encryption/decryption	S	Refer to RSR 118
ESB 048	<ul style="list-style-type: none">Digital signatures	S	IIB Functionality.
ESB 049	<ul style="list-style-type: none">Credential mapping	S	IIB Functionality.
ESB 050	The EES shall provide the functionality to assist Department's operations personnel in keeping the resultant system (applications, services and infrastructure) running at peak efficiency at all times, including:	W	While Wipro has the responsibility as the hosting provider for managing the environment, SmartPro MedEE does deploy the monitoring tools to meet these requirements, and will provide the State with the associated management reporting, including online through our management web portal.
ESB 051	<ul style="list-style-type: none">Establishing rules for automated system monitoring	W	Configurable functionality of the management environment.
ESB 052	<ul style="list-style-type: none">Establishing network-alert-based management	W	Configurable functionality of the management environment.
ESB 053	<ul style="list-style-type: none">Supporting autonomous network behavior so local management and problem resolution can continue during an outage	S	Part of Wipro's generic Data Center design.
ESB 054	<ul style="list-style-type: none">A console that enables domain-specific display for multiple devices	W	Configurable functionality of the management environment. CA Spectrum consolidates all information, and consolidated reporting is available to the State via eHealth and the CA Service Desk portal.
ESB 055	The EES shall provide the technology that manages the metadata and provides the features needed to support the reliable operation of services. Examples include:	S	Functionality of WebSphere SOA policy Gateway (WSRR).

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
ESB 056	<ul style="list-style-type: none"> Online catalog of services and associated artifacts such as WSDL files, XSDs, BPEL files 	S	SmartPro MedEE uses WSRR as the Service Governance tool. The model and Taxonomy of the Service development life cycle will be implemented in WSRR for design time and run time governance. WSRR supports UDDI as its core and WSDL files, XSDs and BPEL files to publish service descriptions for consumer consumption.
ESB 057	<ul style="list-style-type: none"> A single point of controlled access for cataloging, promoting, publishing and searching for information about managed assets 	S	WSRR controls access for cataloging, promoting, publishing and searching for assets.
ESB 058	<ul style="list-style-type: none"> Metadata that enables an ESB to find, bind to and invoke the execution of a service implementation 	S	IIBB and WSRR fulfil this requirement. IIB has built-in nodes to connect to WSRR, find, and invokes a service.
ESB 059	<ul style="list-style-type: none"> Support for extending existing asset types and defining and populating custom asset types 	S	WSRR addresses this requirement.
ESB 060	The EES shall provide support for building frameworks and extensible tools that enable the design, configuration, assembly, deployment, monitoring, and management of software designed around an SOA.	S	SmartPro MedEE addresses this requirement with a combination of IIB, WSRR, and ITCAM.
ESB 061	The EES shall provide assistance for deploying applications with SOA and event-driven architecture in a manner that supports the following implementation strategies:	S	IIB and WSRR will address these requirements.
ESB 062	<ul style="list-style-type: none"> Web Services: Web Services Interoperability (WS-I) Organization-compliant implementation of basic Web services standards, including SOAP, WSDL and Universal Description, Discovery and Integration (UDDI), as well as higher-level Web services standards, such as WS-Security. 	S	The model and Taxonomy of the Service Development Life Cycle will be implemented in WSRR for design time and run time governance. WSRR supports UDDI as its core and WSDL, SOAP to publish the service description for consumer consumption.
ESB 063	<ul style="list-style-type: none"> Representational State Transfer (REST): Support for XML-based message processing a well as HTTP, and XHTML. 	S	IIB handles XML based message processing over HTTP and XHTML.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
ESB 064	The EES shall support Transport Security, Message Security, WS-Security, SAML architecture, and WS-Policy.	S	IIB conditionally complies with Web service Security for <ul style="list-style-type: none">• SOAP Message Security• Username Token Profile 1.1• X.509 Certificate Token Profile 1.1• SAML Token Profile (only Passthrough)• Kerberos Token Profile (for Kerberos GSS v5 AP_REQ, Kerberos v5 AP_REQ)
ESB 065	The EES shall implement the ability to externalize security by using a third-party security infrastructure whereby the ESB's proxy action calls a third-party for user/role information.	S	IIB can make a service call to an LDAP implementation for security authentication.
ESB 066	The EES shall provide the technology to implement processing logic that directly manipulates data values, and the representation of those values for storage, transport or presentation purposes to establish common access to data sources (structured and unstructured), improve data quality or federate data from multiple sources.	W	Implemented in IIB based on the mapping specification to be provided by State.
ESB 067	The EES shall provide the tooling that enables the recording (storage) or retrieving (reading) of information (data) from data stores. An example is distributed query functionality that parses incoming queries into sub queries and the execution of those sub queries, via the connectivity layer, against the respective sources where the desired data resides.	S	The IBM Integration Bus contains "nodes" that allow the bus to communicate with various data stores. These include <ul style="list-style-type: none">• Database node• DatabaseInput node• DatabaseRetrieve node• DatabaseRoute node which allow the bus to orchestrate and integrate sub queries and assemble the results into a single message.
ESB 068	The EES shall provide the data infrastructure tooling that enables users to represent semantic models, identify model-to-model relationships, and execute the necessary translations to reconcile data with differing semantic models.	S	By using the database nodes referred to in the ESB 067, together with the IBM Integration Bus ability to transform data using a canonical representation, messages resulting in data reconciliation can be transformed from one semantic model to another.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
ESB 069	The EES shall provide optimization services that continuously read various types of metadata from across the architecture. The optimization verbs shall use the semantic/logical services to reconcile context to data content and deliver against some aspect of the application service-level agreement (requirements for data quality, data freshness, data volumes, throughput parameters, data-mining results, on-demand data aggregation or summarization, data enrichment, and many others).	W	SmartPro MedEE is implemented on top of IBM's PureApplication Server, which continuously self-monitors all aspects of its operation, resource utilization and performance, ranging from low-level technical metrics such as CPU or memory usage, up to high level measures such as service response time (ITCAM). Based on the metrics, PureApp self-tunes its physical resource allocations, based on configured business rules, to maintain defined tolerances in resource loading and responsiveness. If the system is unable to maintain SLR performance on its own, it raises an alert with the Data Center Enterprise Management System, triggering human investigation and intervention.
ESB 070	The EES shall provide tooling that supports data profiling: the process of examining the data available in an existing data source (for example, a database or a file), and collecting statistics and information about that data.	S	ER/Studio and DB2 combine to provide this profiling data.
ESB 071	The EES shall provide a modeling environment to support the roles of the business analyst, process architect, EES architect and developer.	S	SmartPro MedEE implements ER/Studio and Rational Enterprise Architect as its primary tools supporting the technical roles. Cúram provides the Business Analyst and Process Architect with Workflow Management and Business Rule management tools, such as the Process Definition Tool (PDT).
ESB 072	The EES shall support individual and group teamwork at design time and runtime.	S	SmartPro MedEE uses Rational Team Concert for core project team collaboration support, supplemented by the systems own LiveRay Portal which provides advanced social media and content management capabilities to the internal teams, as well as to the States internal and external users.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
ESB 073	The EES must incorporate the ability to undo changes, detect and resolve conflicts, test service connectivity with tracing information, easily enable/disable services, provide logging and view all session activities/change history attributable to each logged in user.	S	This is the standard management functionality of IIB.
ESB 074	The EES must incorporate Role/Group-based rights for the management of the ESB across the environments.	S	The integrated OS and ESB environments support Role / Group based management rights.
ESB 075	The EES shall have the ability to automatically manage complex workflow patterns that are system-based, human-based, or a mixture of both.	S	IBM Cúram has an integrated workflow engine that will be used to orchestrate the complex workflow patterns required, including mixes of automated or system tasks. See 4.2.2.6 Technical Components subsection xiv.d Workflow Engine for more details.
ESB 076	The EES shall have the ability to design workflows, preferably using Business Process Model and Notation (BPMN).	S	IBM Cúram has a Process Definition Tool (PDT) for designing workflows), which incorporates a graphical visualization tool. The PDT allows workflow administrators to define and maintain workflow processes and automatically maintain a version history for each process. The development of a workflow process involves defining the workflow activities, the transitions between these activities, and the data that passes through the workflow process. A Cúram workflow process can be marked as a Web Service by setting a metadata value which indicates that the process should be exposed as a Web Service. This allows the process to be able to participate in a BPEL or BPMN process. Workflow processes outside of Cúram can be defined by Bonita BPM, which is BPMN 2 compliant.
ESB 077	The EES shall provide the ability to schedule events (e.g., reminders, notification generation, business process execution, etc.).	S	Cúram workflow can schedule activities of various types including: Manual events (such as reminders); Automatic business process execution; Loops; Event Wait; Route; Notification; and Subflow.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
ESB 078	The EES shall provide the ability to associate the scheduled event with a system record (e.g., case record to an event).	S	Cúram workflows define the data objects which often include the CaseID but can include other data – the required data is defined using the PDT.
ESB 079	The EES shall provide the ability to attach documentation to the scheduled event.	S	The data can include document IDs which will result in the document being made available.
ESB 080	The EES shall provide the ability to notify a user of a scheduled event based on user-defined criteria (e.g., reminder time, delivery mechanism).	S	The workflow engine is able to notify interested users about the progress of a workflow process instance based on criteria specified via the PDT.
ESB 081	The EES shall provide the ability to modify existing scheduled events (e.g., begin date, end date, frequency, and business process specific information).	S	The Cúram workflow engine provides an administrative function to modify the existing workflows.
ESB 082	The EES shall have the ability to monitor and manage executing processes, including the capability to override workflows and business rules by authorized users.	W	Cúram workflow provides the capabilities to search for, view, suspend, resume and abort executing workflow instances. It also permits overriding of “event waits” (If the workflow is waiting for some event that has not occurred, the workflow will be resumed regardless) Once the workflow is suspended, if the system is configured to permit it, persons with authority to override rules or trigger an alternate workflow can do so.
ESB 083	The EES shall provide the ability to suspend a scheduled event.	S	The workflow administration tool provides the capability to suspend and resume scheduled events.
ESB 084	The EES shall provide the ability to cancel a scheduled event.	S	The workflow administration tool provides the capability to cancel scheduled events.
ESB 085	The EES shall provide the ability to route imaged correspondence to any work queue.	S	The EES will include a monitor which picks up imaged correspondence and uses configured rules to route the images to appropriate work queues based on image metadata.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
ESB 086	The EES shall provide the ability to maintain historical information related to scheduled events.	S	The task history and comments page displays all of the events that have occurred during the life cycle of the task. For each event, the user name, the date and time that the life cycle event occurred and change information are recorded. A task history item is recorded for the following task life cycle events: <ul style="list-style-type: none">• Task Created• Comment Added• Time Worked Changed• Priority Changed• Deadline Changed• Added to My Tasks• Made Available• Forwarded• Allocation Failed• Allocated To Default Queue• Reallocated• Deferred• Restarted• Deadline Expired• Closed

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
ESB 087	The EES shall provide the ability to maintain user-defined calendars and dates specific to business functionality (e.g., time off, work hours, review dates).	S	User calendars are used to schedule and maintain meetings and activities for the users of the organization. Meetings are appointments about a client or a case to which other users or participants can be invited. Invitations to all parties are sent via Personal Information Manager (PIM) tools such as Microsoft Outlook. The invite appears in the invited user's calendar where they can accept or reject the invitation. Cúram calendars are used to schedule events, activities, meetings, holidays and payment processing dates. In addition to user calendars, Cúram also provides other calendars including case calendars and location calendars that show events related to specific cases or holidays for a location.
ESB 088	The EES shall provide the ability to associate comments with scheduled events.	S	A comment can be added at any time by an authorized user.
ESB 089	The EES should have the ability to import and export process designs using an industry standard format, such as Business Process Execution Language (BPEL) or XML Process Definition Language (XPDL).	S	SmartPro MedEE uses Bonita BPM for external BPM functionality. Bonita can import and execute both BPEL and XPDL. Bonita Studio, its designer environment, supports importation of design in several Industry standard formats, including: <ul style="list-style-type: none">• BPMN 2.0• jBPM 2.2• MS Visio Bonita supports process exporting in BPMN 2.0

Data Integration & ETL Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
ETL 001	The EES shall have the ability to convert message formats and translate coded data within messages.	S	SmartPro MedEE uses a combination of IBM InfoSphere Information Server (aka DataStage) for general ETL, and IBM Integration Bus (ESB) to convert data and message formats as required.
ETL 002	The EES shall provide support for a metadata repository for data and message conversion and transformations.	C	Acknowledged and Metadata repository has been considered as part of overall solution.
ETL 003	The EES shall at a minimum support the following standards:	M	Acknowledged and all mentioned standards will be supported and tested and compliance reports will be submitted. Per Q&A Round 2, SmartPro MedEE will utilize the State's existing EDI capability, interfacing through our ESB solution, to support this functionality when needed. If it should become necessary in the future to directly support these standards without relying upon the State's existing EDI solution, IBM WebSphere Transformation Extender can be deployed into SmartPro MedEE.
ETL 004	<ul style="list-style-type: none">Integrating the Health Enterprise (IHE): Cross-Enterprise Document Sharing (XDS); Cross-Community Access (XCA)	M	Acknowledged and all mentioned standards will be supported and tested and compliance reports will be submitted.
ETL 005	<ul style="list-style-type: none">Health Level Seven (HL7) Continuity of Care Document (CCD) C32 profile	M	Acknowledged and all mentioned standards will be supported and tested and compliance reports will be submitted.
ETL 006	<ul style="list-style-type: none">ONC Direct Project	M	Acknowledged and all mentioned standards will be supported and tested and compliance reports will be submitted.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
ETL 007	The EES shall provide the technology to implement processing logic that can manipulate data values, and the representation of those values for transport or conversion purposes.	S	SmartPro MedEE uses a combination of IBM InfoSphere Information Server (aka DataStage) for general ETL, and IBM Integration Bus (ESB) to manipulate data values as required.
ETL 008	The EES shall provide tools for data source connectivity: Adapters for a range of source types beyond RDBMS' and legacy databases (access to data stored in non-relational structures - for example, VSAM files and IMS databases), including packaged applications and Web services, the ability to access semi-structured and unstructured data (such as e-mail, websites, office productivity tools, content repositories and rich media) and the ability to interpret (as a source) XML structures.	S	SmartPro MedEE provides this functionality through the IBM Integration Bus (ESB). The ESB supplies multiple built-in nodes/adapters to connect to Databases, send emails, etc. It also has parsers to interpret various message formats such as XML structures, files, etc.
ETL 009	The EES shall provide tools to support the Extract-Transform-Load (ETL) process that involves:	S	SmartPro MedEE implements IBM InfoSphere Information Server (aka DataStage) as its ETL tool for EES. It will be used for conversion, cleansing, transformation, extraction, loading etc.
ETL 010	<ul style="list-style-type: none"> Extracting data from data sources 	W	IBM InfoSphere Information Server (aka DataStage) has connectors to legacy/DB2 and required ETL scripts will be built and leveraged. Where required, SmartPro MedEE's ESB will be used to mediate access to remote data source.
ETL 011	<ul style="list-style-type: none"> Transforming it to fit business needs (which can include quality levels). 	W	IBM InfoSphere Information Server (aka DataStage) will be used for all batch transformations and conversions, the ESB for transactional transformations.
ETL 012	<ul style="list-style-type: none"> Loading it into the target data store 	W	IBM InfoSphere Information Server (aka DataStage) will be leveraged for loading the transformed data to Cúram (which has its own loading utility) as well as to DW and DataMarts.
ETL 013	<ul style="list-style-type: none"> Caching: The ability to cache federation results and various subsets of the source data to improve performance in situations where source data volumes are large; therefore, retrieving all data required for integration directly from the source is not feasible. 	S	The IBM Integration Bus ESB uses SupportPac for Message Broker to fulfil this requirement. It stores and retrieves data from memory, providing fast access to transient data.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
ETL 014	<ul style="list-style-type: none">Verbose ETL process logging to allow for ease of support and debugging.	C	Wipro will create additional reports (apart from the ones generated by DataStage) which will give additional visibility to ETL process and allow easier debugging.
ETL 015	The EES shall have the ability to load data in a variety of approaches including (but not limited to) the following:	S	Standard functionality of DataStage. All required configurations, scheduling will be done by Wipro Data Conversion team.
ETL 016	<ul style="list-style-type: none">Bulk data extraction and loading	S	Standard functionality of DataStage. All required configurations, scheduling will be done by Wipro Data Conversion team.
ETL 017	<ul style="list-style-type: none">Granular trickle-feed acquisition and delivery	S	Standard functionality of DataStage. All required configurations, scheduling will be done by Wipro Data Conversion team.
ETL 018	<ul style="list-style-type: none">Changed-data capture (ability to identify and extract modified data)	S	Standard functionality of DataStage. All required configurations, scheduling will be done by Wipro Data Conversion team.
ETL 019	<ul style="list-style-type: none">Event-based acquisition (time-based or data-value-based)	S	Standard functionality of DataStage. All required configurations, scheduling will be done by Wipro Data Conversion team.
ETL 020	The EES shall include the following types of transformation:	S	DataStage can support all such transformations. Wipro's Data Conversion team will design and develop the ETL scripts to address all kind of transformations required.
ETL 021	<ul style="list-style-type: none">Simple transformations such as data-type conversions, string manipulations and Simple calculations	S	DataStage can support all such simple transformations. Wipro's Data conversion team will design and develop the ETL scripts to address all kind of transformations required.
ETL 022	<ul style="list-style-type: none">Moderate-complexity transformations, such as lookup and replace operations, aggregations, summarizations, deterministic matching and management of slowly changing dimensions	S	DataStage can support all such medium complexity transformations. Wipro's Data conversion team will design and develop the ETL scripts to address all kind of transformations required.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
ETL 023	<ul style="list-style-type: none">Higher-order transformations, such as sophisticated parsing operations on free-form text and rich media Facilities for developing custom transformations and extending packaged transformations	M	DataStage ETLs and built integrations will support all such complex and higher order transformations.
ETL 024	<ul style="list-style-type: none">Facilities for developing custom transformations and extending packaged transformations	S	DataStage ETLs and built integrations will support all such complex and higher order transformations.
ETL 025	The EES shall provide tools that enables the recording (storage) or retrieving (reading) of information (data) from data stores. An example is distributed query functionality that parses incoming queries into sub-queries and the execution of those sub-queries, via the connectivity layer, against the respective sources where the desired data resides.	W	Where required, SmartPro MedEE's ESB can be used to store and retrieve data from data stores external to SmartPro MedEE.
ETL 026	The EES shall comply with all relevant HIPAA standards, including national standards for electronic health care transactions and code sets, unique employee and provider identifiers, and security and privacy of individually identifiable health information (called "protected health information" or PHI).	S	Acknowledged and all mentioned standards will be supported and tested and compliance reports will be submitted.

Master Data Management Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
MDM 001	The EES shall have the capability to support the global identification, linking and/or synchronization of client and provider information across heterogeneous data sources through semantic reconciliation of master client and master provider data.	M	The proposed IBM's InfoSphere Master & Patient Hub (Initiate) MDM solution component addresses this requirement.
MDM 002	The EES shall create and manage a central, database-based EES or index of record for master client (i.e. Master Client Index [MCI]) and master provider (i.e. Master Provider Index [MPI]) data.	M	The proposed IBM's InfoSphere Master & Patient Hub (Initiate) MDM solution component addresses this requirement.
MDM 003	The EES shall enable the delivery of a single client and a single provider view for all stakeholders.	M	The proposed IBM's InfoSphere Master & Patient Hub (Initiate) MDM solution component, along with Cúram, addresses this requirement. Cúram fundamentally presents a single point of view; MDM is required to provide the accurate information from multiple sources.
MDM 004	The EES shall support ongoing client and provider data stewardship and governance requirements through monitoring of policy decisions and corrective action.	W	The proposed IBM's InfoSphere Master & Patient Hub (Initiate) MDM solution component addresses this requirement. Wipro will deploy a Governance lead and Policy Specialist during the engagement to make the required configurations.
MDM 005	The EES shall track and maintain detailed records on all changes via interfaces and authoring to support audit requirements.	M	Acknowledged and will be taken into consideration during requirements finalization and design phase. Audit records will be written to a central Audit repository, accessible to authorized users via the Business Intelligence (Cognos) component.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
MDM 006	The EES must include a flexible data model that can model the complex relationships between the internal application sources inside Nebraska, its trading partners, clients and providers, as well as intermediaries and other parties, with the ability to handle complex hierarchies.	S	The Cúram data model used by SmartPro MedEE is extremely flexible and is designed to be modified and extended where necessary. It is a client-centric, multiple program based, data model with a pre-built social program specific data structure. While its client-centric it allows for a holistic view of a citizen, its multi program capabilities improve the reuse and currency of data by capturing data such as household, relationships, income, expenses, and resources only once and utilizing that data to support the eligibility and enrollment process across multiple program types.
MDM 007	The EES's data model must be capable of handling at least the following categories of elements for clients and providers:	S	The SmartPro MedEE Data Model can handle the elements listed here:
MDM 008	<ul style="list-style-type: none"> • Identification 	S	The Cúram data model captures identification information for both clients and providers.
MDM 009	<ul style="list-style-type: none"> • Demographics 	S	The Cúram data model captures demographic information for both clients and providers.
MDM 010	<ul style="list-style-type: none"> • Contact information 	S	The Cúram data model captures contact information for both clients and providers.
MDM 011	<ul style="list-style-type: none"> • Relationships with other entities / providers 	S	The Cúram data model captures relationships between participants.
MDM 012	<ul style="list-style-type: none"> • Interactions with other entities / providers 	S	The Cúram data model captures interactions with other providers for both clients and providers.
MDM 013	The EES shall include data modeling capabilities that will be configurable, customizable, extensible, and upgradable.	S	The Cúram data model used by SmartPro MedEE is extensible. It is designed to be modified and extended where necessary to meet the specific needs of individual agencies. The data model is extended following certain rules that ensure future upgrades are not impacted.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
MDM 014	The EES data model must be able to support Nebraska's standards for data content and coding where they exist.	S	The SmartPro MedEE data model can support Nebraska standards for content and coding. DHHS would be advised to stay as close to the out of the box data model for existing data definitions, as changes to the existing data model, while possible, can impact dependent technical artefacts (e.g. changing the length of a name field is non-disruptive, whereas changing the name of the 'Person' table would be disruptive).
MDM 015	The EES data model must be expressed using commonly accepted logical data model conventions with associated metadata.	S	Cúram has its own data model which will be leveraged, and the logical data model conventions are already in place and being leveraged by other states.
MDM 016	The EES shall have strong facilities, in batch and real-time mode, for profiling, cleansing, matching, linking, identifying and semantically reconciling master client and master provider data in different data sources to create and maintain golden records.	C	The proposed IBM's InfoSphere Master & Patient Hub (Initiate) MDM solution component addresses this requirement. Apart from this InfoSphere Information Server (DataStage and QualityStage) will be used for cleansing, reconciling and other requirements.
MDM 017	The EES's business rules and associated metadata related to data cleansing shall be sufficiently visible to satisfy any audit requirements.	C	Acknowledged and will be taken into consideration during requirements finalization and design phase. Proper audit mechanism, data lineage and metadata visibility are core to the solution considered.
MDM 018	The EES shall include the ability to review data quality metrics and track corrective actions.	M	Acknowledged and will be taken into consideration during requirements finalization and design phase. Proper data quality metrics and auditing are core to the proposed solution and will be enabled during development phase.
MDM 019	The EES shall provide dynamically configurable rules for comparing and reconciling semantics across data sources, matching (both probabilistic and tunable) across changing demographic data structures, linking data, and managing the merging and unmerging of client and provider records with full auditability and survivability.	M	The proposed IBM's InfoSphere Master & Patient Hub (Initiate) MDM solution component, along with Cúram, addresses this requirement.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
MDM 020	Where data is matched by a proxy rather than the actual identifier (e.g. client or provider ID) the EES shall load data no less quickly, efficiently or accurately.	W	The proposed IBM's InfoSphere Master & Patient Hub (Initiate) MDM solution component, along with Cúram, addresses this requirement.
MDM 021	The EES shall include integration middleware to provide a communication backbone for the bidirectional flow of client and provider data between the central repository and the spoke solutions, and/ or remote applications.	S	SmartPro MedEE uses IBM's Integration Bus (ESB) to provide this functionality, supporting both bi and uni-directional communication flows between a client and a provider.
MDM 022	The EES shall provide tools to validate and manage all client and provider addresses to include all address types (mailing, residential, etc.).	S	The proposed IBM's InfoSphere Master & Patient Hub (Initiate) MDM solution component addresses this requirement.
MDM 023	The EES shall be able to leverage a range of middleware products to data sources, including all Nebraska and trading partner data sources, and expose Healthcare industry-standard interfaces.	S	SmartPro MedEE is able to leverage multiple external sources and expose Healthcare standard interfaces through a combination of IBM Integration Server (ESB) and the State's own EDI capabilities.
MDM 024	The EES shall support integration with different latency characteristics and styles (e.g. real-time, batch).	S	SmartPro MedEE supports batch and real-time interfaces directly, through a combination of IBM's Integration Bus and Sterling Connect Direct/File Gateway.
MDM 025	The EES shall support integration with downstream Business Intelligence (BI) and analytical requirements.	C	All such integrations have been considered as part of the proposed DW and BI solution.
MDM 026	The EES shall provide flexible and comprehensive workflow capabilities to enable business users and client and provider data managers to collaborate effectively in the authoring and management of client and provider data across the multiple source systems.	W	The proposed IBM's InfoSphere Master & Patient Hub (Initiate) MDM solution component addresses this requirement, in concert with SmartPro MedEE's LifeRay Portal to provide effective collaboration between remote teams. The workflow configuration will be done by the Wipro/IBM team.
MDM 027	The EES shall include facilities for managing and controlling access to client and provider data in the MDM such as reporting on MDM activities.	C	The proposed IBM's InfoSphere Master & Patient Hub (Initiate) MDM solution component addresses this requirement. Required reports about MDM activities will be configured / built by the Wipro/IBM team.
MDM 028	The EES shall have the ability to integrate the data within the MDM with management and security tools.	C	Acknowledged and will be taken into consideration during requirements finalization and design phase.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
MDM 029	The EES shall manage the policies and rules associated with privacy access rights.	S	SmartPro MedEE/Cúram directly manages privacy policies and rules.
MDM 030	The EES shall configure and manage differing visibility rules, providing different views for different roles.	S	The EES solution supports Role Based Access Control. Access control (i.e. controlling access to the individual components) will be managed centrally EES. Upon log in to the system, the user will be presented with a workspace page that contains appropriate content depending on their user role.
MDM 031	The EES shall integrate with the Department's Active Directory to provide authorization, e.g., role-based security.	W	SmartPro MedEE's LifeRay Portal Server implementation is trivially configurable to connect directly with the Department's AD implementation to provide single point-of-authentication for system users to be authenticated by the State.
MDM 032	The EES shall provide analytics and performance measures related to the range of processes and activities taking place within the MDM; from the running of batch data loads and the execution of workflows against benchmarks to the quality of active client and provider data in the MDM.	C	The proposed IBM's InfoSphere Master & Patient Hub (Initiate) MDM solution component addresses this requirement. Required reports, Analytics, and benchmarking on MDM activities will be configured / built by the Wipro/IBM team.
MDM 033	The EES shall include status and management tools for the data stewards to monitor to-do lists to ensure effective action takes place across the management of the master client and master provider data.	C	The proposed IBM's InfoSphere Master & Patient Hub (Initiate) MDM solution component addresses this requirement.
MDM 034	The EES shall include solution-wide meta models to help identify what users, roles, applications and systems are responsible for which client and provider data.	C	Both Data Modelling (ER/Studio) and Design (Rational System Architect) are used were applicable to capture and maintain this information.
MDM 035	The EES shall provide workflow services for remediation of quality issues in client and provider data.	W	The proposed IBM's InfoSphere Master & Patient Hub (Initiate) MDM solution component addresses this requirement.
MDM 036	The EES shall include business rules services to interrogate which rules are used by MDM by frequency and preference and to provide suggested enhancements to such business rules.	C	The proposed IBM's InfoSphere Master & Patient Hub (Initiate) MDM solution component addresses this requirement.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
MDM 037	The EES shall be based on up-to-date, mainstream technologies, and capable of flexible and effective integration with a wide range of other application and infrastructure platform components (whether from the same Contractor or not) that will be deployed by Nebraska.	S	SmartPro MedEE is based upon current architectural principles (multi-tier Web Application, Relational Database, ESB), and implemented on top of IBM's most current infrastructure technology, middleware, and supporting tools. SmartPro MedEE implements a wide range of common protocols and integration techniques, including messaging, web services, common file movement and ETL techniques, SSO protocols and so forth.
MDM 038	The EES shall protect and complement the data layer with a layer of business services for accessing and manipulating the client and provider data that is built for an SOA environment, by exposing web services interfaces.	S	SmartPro MedEE/Cúram is SOA compliant and capable out of the box. IBM Integration Bus (ESB) is used to develop and expose Web Service interfaces. IBM SOA Policy Gateway (formerly WSRR) provides for Service Registry, WSDL definition, and both design and run-time SOA governance.
MDM 039	The EES shall be capable of flexible configuration into a range of architectural styles in terms of instantiation, latency and use of client and provider data to enable different deployment scenarios, such as the consolidation, registry, coexistence and centralized scenarios.	S	SmartPro MedEE uses IBMs PureApplication Server to rapidly instantiate architectural styles that are flexible, self-tuning based on parameters, and directly supports multiple, flexible deployment styles.

Consent Management Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
CMT 001	The EES shall be interoperable/Contractor agnostic.	S	SmartPro MedEE will interoperate, through the solution ESB (IIB) with remote systems.
CMT 002	The EES shall support break-the-glass/ override access for emergency data access per HIPAA.	S	See requirements RSR 076 and RSR 077.
CMT 003	The EES shall provide an alert mechanism for privacy breaches.	S	Refer to requirement RSR 077. When break -the-glass occurs, a configured workflow will notify an identified user or group of users and the action will be audited.
CMT 004	The EES shall be non-disruptive to worker workflow.	S	SmartPro MedEE is non-disruptive to worker workflow. SmartPro MedEE can be used in a guided manner, or in a more ad hoc manner, where the user navigates according to their preference.
CMT 005	The EES shall be centralized to consistently enforce policies network-wide.	S	External systems will communicate with SmartPro MedEE through the ESB (IIB). Access Control rules will be enforced for SmartPro MedEE Users and for external systems.
CMT 006	The EES shall enable all applications to support consumer consent.	S	The ACA streamlined application requests consumer consent to access remote systems, through the hub, for verification purposes.
CMT 007	The EES shall accommodate granular directives.	S	SmartPro MedEE supports very granular access control directives. Also see requirement CMT 012.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
CMT 008	The EES shall audit all access to protected information in real time.	S	The IBM Cúram Administration Suite provides extensive auditing capability which tracks who has accessed, updated or requested sensitive information, what they accessed and when. The type and extent of audit data captured can be tailored to meet specific implementation requirements including auditing all access to protected information.
CMT 009	The EES shall provide an alert mechanism for privacy breaches or when HIPAA break-the-glass or override functions are enacted.	S	Refer to requirement RSR 077. When break -the-glass occurs, a configured workflow will notify an identified user or group of users, and the action will be audited.
CMT 010	The EES shall be highly flexible to meet changing requirements.	S	SmartPro MedEE's physical architecture and application configuration are highly flexible to enable the changes needed in support of changing or evolving requirements.
CMT 011	The Department has a strong preference to use a COTS product to provide the consent management required for the EES.	S	The Cúram COTS product provides functionality that underpins the requirements in this section.
CMT 012	The EES shall have the consent service tied into role-based access control system for real-time permissions access-granting/removal/denial.	M	Some modification required to enable a client to maintain consumer consent through the client portal. Also the ability for a worker, with sufficient authorization, to view and maintain consumer consent data. Assumption that the client can select from the list of case data (in Cúram this is known as evidence data) and assign consent to all or to specific rows. Also modifications needed to reference this consent data during display and access to this data.
CMT 013	The EES shall provide extensive search and reporting capabilities on any consent audit event data.	C	Search and reporting on audit data will depend on the common audit engine and the viewing solution used. See AUD 009.
CMT 014	The EES shall maintain historical record of consent/removal of consent.	M	Refer to requirement CMT 012. Enhanced capability to support a history of consent pre case data record.

Business Intelligence and Reporting Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
BIR 001	The EES shall provide the ability to impose graduated access to reports based on user role and agency requirements/permissions to better analyze program data.	M	User role based authentication and authorization have been considered in the proposed BI solution. During the requirements analysis phase the actual permissions for Program data analysis/reports will be finalized and subsequently implemented. SmartPro MedEE's portal will provide user credentials for single-sign on, authenticating users against the States' Microsoft Active Directory.
BIR 002	The EES's business intelligence and reporting capabilities must be scalable to accommodate changes in EES scale including changes in user population, transaction volume, throughput and geographical distribution while maintaining the agreed service levels.	S	The proposed BI solution will be as per the industry best practices and will have all such flexibility and scalability accounted for. It is implemented on top of a highly flexible system platform, IBM PureApplication Server, which provides near instantaneous allocation of physical resources to meet performance targets.
BIR 003	The EES shall have a mechanism to share specific data (e.g. limited data sets, detailed data at the level of the individual but with the data anonymous and completely de-identified, etc.) in a controllable fashion with other State and local agencies.	M	Acknowledged and will be taken into consideration during requirements finalization and design phase.
BIR 004	The EES shall be extensible and have a scalable data architecture incorporating State and external data.	S	The proposed Solution will be as per the industry best practices and will have all such flexibility and scalability accounted for. SmartPro MedEE's fundamental architecture provides Data Warehouse and DataMart functionality out-of-the-box, implemented in its own virtualized environment isolated from the operational data stores. The design is highly scalable, both vertically and horizontally to meet future needs for incorporating State and external data.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
BIR 005	The EES shall provide a tool to allow predictive modeling and analysis utilizing production data and coexist and integrate with tools such tools as SPSS and SAS.	S	Wipro will initially utilize Cognos BI for basic modeling and analysis, supported by Data Scientists and Statisticians who have been accounted for in the proposed BI team. If at a future date the State wishes to expand its capabilities, it can supply its own SPSS or SAS applications to operate against the SmartPro MedEE BI universe, or Wipro/IBM can provide a bid for such an implementation.
BIR 006	The EES shall provide the ability for user to create and customize reports, queries, and dashboards.	S	This is a standard Cognos (proposed BI platform) feature. Appropriate security and access controls will be designed which will allow specific users to be able to create reports, view, query only permissible data.
BIR 007	The EES shall provide scalable architecture and support designs that will provide flexibility to add more data fields and change granularity level efficiently as analytic demand matures and expands.	S	Acknowledged and will be taken into consideration during requirements finalization and design phase. The fundamental architecture is based on a formalized Data Warehouse and DataMart model out of the box, hosted on the scalable on-demand PureApplication Server system. The basic design allows for the addition of new data and structures as required, naturally with our DWH/DM/Cognos BI solution.
BIR 008	The EES shall have the ability for logical and physical view creation and storage.	S	The basic data modelling tools, ER/Studio, support this directly.
BIR 009	The EES shall support designs that facilitate a single view of business data.	S	This is intrinsic in Cúram's basic DWH/DM design, and will be maintained if/when the models are extended to meet new requirements.
BIR 010	The EES shall support OLAP database structure for use in analytics and business intelligence to include ROLAP or MOLAP processing.	S	The proposed BI solution has been designed keeping such requirements in consideration. OLAP structures are directly supported by the Bi toolset, IBM's DN2 and Cognos.
BIR 011	The EES shall support hierarchical drill up/down; ad-hoc query; multi-dimensional tables and views.	S	This is a standard Cognos (proposed BI platform) feature. Appropriate configurations will be done by the Wipro BI team.
BIR 012	The EES shall provide the ability to support data mining functions.	S	The proposed BI solution has been designed keeping such requirements in consideration.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
BIR 013	The EES shall provide the ability to perform in-database analytics.	S	Analytical querying will be available on top of the DWH and DataMarts using native Cognos capabilities.
BIR 014	The EES shall offer options to use Database Management EES (DBMS)-integrated data integration tool and/or third party Contractor integration tool.	M	The proposed solution has been designed keeping such requirements in consideration.
BIR 015	The EES shall support fast large volume data loading and shall have the ability to capture real-time data.	S	Support for fast large volume data loading and real-time data capture are intrinsic in the toolset: the proposed BI solution has been designed keeping such requirements in consideration. Actual real time data integration requirements will be finalized during requirements analysis phase and appropriate integrations/ETLs will be designed and developed.
BIR 016	The EES shall have the ability to capture delta of changes to data from diverse systems and populate them to Shared Analytics.	C	The proposed BI solution has been designed keeping such requirements in consideration.
BIR 017	The EES shall provide the ability to capture and load data via SOA-based services and the ability to schedule data integration and load jobs.	W	The IBM Integration Bus ESB solution addresses this requirement. The SOA-based services are implemented using IB (aka Message Broker). IBM SmartCloud Workload Automation provides scheduling and management of scheduled jobs.
BIR 018	The EES shall include the ability to facilitate design and construction of data integration processes.	S	SmartPro MedEE provides a rich suite of tools for facilitating the design and construction of data integration processes: IBM's Integration Bus (ESB), InfoSphere Information Server, and DB2 are the core of this capability.
BIR 019	The EES shall provide the ability to create custom transformations and the ability to group and reuse mapping and transformation operations.	S	The IBM Integration Broker solution addresses this requirement. IB aka Message Broker is used for transformations based on mapping specifications. The common transformation logic is made a reusable component and can be reused by several flows.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
BIR 020	The EES shall provide comprehensive metadata management from source to target.	C	A comprehensive metadata management component has been accounted for as part of overall solution and data lineage and tracking will be enabled as required.
BIR 021	The EES shall provide single repository for metadata, such as mappings of business concepts to underlying data structures, business glossary, data lineage, reference data, and objects (e.g. view, table, join) and reports from source to target.	C	A comprehensive metadata management component / repository has been accounted for as part of overall solution
BIR 022	The EES shall provide the ability to import metadata from tools and data sources.	C	The proposed metadata management solution component will address this requirement.
BIR 023	The EES shall provide data quality tools and/or support 3rd party data quality tools for data profiling, cleansing and monitoring.	S	Appropriate Data quality tools within IBM InfoSphere stack (like QualityStage, Info Analyzer) are used to meet profiling, cleansing and monitoring requirements.
BIR 024	The EES shall produce metadata and/or data dictionaries in a format that the Department can consume, e.g., Word, Excel, PDF, OF, etc.	C	The proposed metadata management solution component will address this requirement.
BIR 025	The EES shall be highly available via various mechanisms, e.g. data marts, data replication, clustering and backup configuration.	S	The basic SmartPro MedEE platform is implemented on a highly fault-tolerant, no single point of failure HW and SW architecture, built on top of IBM's PureApplication Server Appliance. Production data is protected by local redundancy such as RAID storage, by classic point-in-time backups (both local and offsite), and by real-time shadow replication of data changes to the backup data center.
BIR 026	The EES shall support reorganization of databases, indexes and configurations online without the need for the EES to shut down.	S	DB2 provides SmartPro MedEE with this functionality out of the box.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
BIR 027	The Contractor shall release upgrades and patches that shall be applied with minimal loss of system availability during production hours.	S	Most changes to the environment can be scheduled during non-operating times, with no impact. However, should a change be required during operating hours, Curam is designed to allow extremely rapid deployment of small units of functionality while the remainder of the system is fully functional. This compartmentalization minimizes the scope of any outage to a minimal set of functions.
BIR 028	The EES shall allow data loading to support environments with small or no window where system is down when loading data.	S	Acknowledged and will be taken into consideration during requirements finalization and design phase. Data load schedules will be finalized based on State's IT team feedback and loads will be scheduled in a manner when there is least impact to system uptime.
BIR 029	The EES shall provide standards based connectivity including Open Database Connectivity (ODBC), Java Database Connectivity (JDBC), Web Services (WS) and others.	S	SmartPro MedEE uses both native capabilities in its own code, and IBM's Integration Bus to provide these types of standards-based connection, including JDBC and JDBC connectivity, along with Web services and other common protocols.
BIR 030	The EES shall have no limit on the size of data types (including CHAR, NUM, CLOB, BLOB and XML) that are less than that of the manufacturer-known and published limits of the underlying DBMS.	S	Acknowledged and will be taken into consideration during requirements finalization and design phase.
BIR 031	The EES shall have no limits on the size of tables, indexes and other database-level objects that are less than that of the manufacturer-known and published limits of the underlying DBMS.	S	Acknowledged and will be taken into consideration during requirements finalization and design phase.
BIR 032	The EES shall support both horizontal and vertical scaling.	S	This is an out-of-the-box capability of both the underlying environment (IBM PureApplication Server), all middleware (clusterable, load balanced) and the VM design which allows for real-time self-tuning of physical resources such as compute and memory capacity.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
BIR 033	The EES shall have an option for fast loading of data into the database. Where necessary this will include minimal relaxation of quality and integrity constraints and mechanisms for carrying out data quality checks as the final stage in the process.	M	Acknowledged and will be taken into consideration during requirements finalization and design phase.
BIR 034	The EES shall provide for expansion of data storage as needed to accommodate increased volume of data based on approved Capacity Plans by the Department.	S	The hosting environment is fully virtualized, including storage. Extensive capacity for data growth is accommodated in the server box (~48TB per each of two PureApplication servers), after which nearly unlimited additional expansion can be accomplished through expansion into Data Center SAN.
BIR 035	The EES shall be American National Standards Institute (ANSI) Structured Query Language (SQL) Compliant. (Contractor needs to specify version of SQL compliance – e.g. 2003, 2006, 2008).	S	SmartPro MedEE, using DB2, is compliant with SQL-92. DB2® Version 10 is compliant with the following standards: <ul style="list-style-type: none"> • ANSI/ISO SQL 92 Entry via FIPS 127.2 Entry • JDBC • Object Management Group (OMG) Common Warehouse Metadata Interchange (CWM1) • Open Geospatial Consortium (OGC) • ISO SQL/MM part 3: Spatial • SQLJ is compliant to ISO/IEC 9075-10:2003. Specification dated 2003/07/25. "Information technology - Database languages - SQL - Part 10: Object Language Bindings (SQL/OLB)" • X/OPEN CLI (Call Level Interface) • X/Open XA
BIR 036	The EES shall be XQuery 1.0 standard compliant.	S	DB2 is XQuery 1.0 compliant.
BIR 037	The EES shall support industry standards for electronic data exchange.	S	SmartPro MedEE supports a wide variety of industry technical and format standards, through its ESB component, IBM Integration Bus (Message Broker).

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
BIR 038	The EES shall provide flexibility in using public/private cloud versions of the DBMS as an option to provide cost-effective scalability as needed.	S	SmartPro MedEE is implemented on a highly scalable private cloud offering with extremely cost effective scaling out-of-the-box: IBM's PureApplication Server.
BIR 039	The EES shall run on and be portable across multiple Contractors' hardware and operating systems (e.g. IBM, HP, and Dell hardware, AIX, Linux, and Windows Operating Systems and VMware)	S	While SmartPro MedEE is implementing on IBM's PureApplication Server Appliance under AIX, its components are either directly compatible with the standard HW and OS options named, or have licensable version of middleware components that have this compatibility.
BIR 040	The EES shall make an underlying DBMS available as a data warehouse appliance so it is also available as a standalone query-able DBMS.	S	SmartPro MedEE implements a fully isolated Data Warehouse and DataMart model, executing on a distinct instance of the DB2 database within a virtualized environment that is never in conflict with the resources supporting the operational database.
BIR 041	The EES shall support major application development interfaces (e.g. .NET interface, Java 2 Platform, Enterprise Edition [J2EE]).	S	The SmartPro MedEE environment is predominately a standards compliant Java environment, and directly supports these interfaces through native Application Server environment or through the ESB component (IBM Integration Bus).
BIR 042	The EES shall support various database connectivity protocols (e.g. ODBC, JDBC, etc.)	S	SmartPro MedEE supports the standard database connectivity protocols in its own data base layer (DB2), and external through its ESB – IBM Integration Bus.
BIR 043	The EES shall support all connections required for BI analysis and reporting tools and ETL tools.	M	The proposed BI solution will support this. Wipro will configure all connections required for ETL (DataStage) and Reporting (Cognos)
BIR 044	The EES shall support stored procedures and extensions.	S	The proposed BI solution will support this.
BIR 045	The EES shall not employ triggers or cursors.	S	SmartPro MedEE does not employ triggers or cursors.
BIR 046	The EES shall support native geo-spatial data types.	S	The proposed BI solution will support this.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
BIR 047	The EES shall provide DBA tools for monitoring and administering DBMS and contain tools to manage the storage devices.	S	SmartPro MedEE utilizes IBM's PureSystem Manager, ITCAM for Applications, and Computer Associates NetIQ AppManager, to monitor the DBS and manage storage devices.
BIR 048	The EES shall have built-in utilities to the DBMS to automate the normal day-to-day DBA operations (e.g., automated index rebuilding, free space reclamation and block reorganization).	S	This is a standard feature of the DB2 and Job scheduling environment out of the box. These will be configured as required during system development and implementation.
BIR 049	The EES shall provide the ability to:	S	See below, fully compliant.
BIR 050	<ul style="list-style-type: none">• prioritize workload executions and ensure quality-of-service;	S	SmartPro MedEE uses a combination of IBM SmartCloud Workload Automation and PureApplication's PureSystems Manager to prioritize and dynamically manage workloads.
BIR 051	<ul style="list-style-type: none">• partition indexing and aggregate management via parameters and tools;	S	IBM DB2 directly supports this requirement.
BIR 052	<ul style="list-style-type: none">• simulate the various workloads and mixes	S	SmartPro MedEE provides a fully configured and provisioned Load/Stress Test Environment fully sufficient to simulate full production workloads on production sized hardware.
BIR 053	The EES shall provide workflow and collaboration support for administrator tasks.	W	SmartPro MedEE uses LifeRay Portal and collaboration services and Computer Associates Service Desk module to support administrative workflows and collaboration.

Rules Engine Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RLE 001	The EES shall support data verification and consistency checks.	S	SmartPro MedEE supports data verification and consistency checks of all data entered in the system.
RLE 002	The EES shall support compute values based on input data.	S	Based on the values entered in the system, the system will compute values where appropriate.
RLE 003	The EES shall support the selection of business process path.	S	SmartPro MedEE, built on IBM Cúram, incorporates extensive workflow management capabilities that support the automation and selection of business processes and work allocation.
RLE 004	The EES shall support mechanisms and ease of use for users to edit rules while maintaining compliance with CMS rules.	S	SmartPro MedEE uses IBM Cúram Express Rules (CER). CER is a flexible, high performing, and configurable rules environment. Evolving legislation and policy rules can be implemented quickly with the minimum of disruption. The CER editor is a graphical web based tool for business and technical users to view, create and manage CER rule sets.
RLE 005	The Contractor must follow all standards defined by CMS in Guidance for Exchange and Medicaid Technology Systems and Enhanced Funding Requirements: Seven Conditions and Standards; and other federal guidelines yet to be defined; including use a technology neutral rules repository.	S	SmartPro MedEE adheres to the CMS 7 Conditions and Standards and enhanced funding requirements.
RLE 006	The EES shall support design for a multi-step decision.	S	SmartPro MedEE, built on IBM Cúram, incorporates extensive workflow management capabilities that support the automation and selection of business processes and work allocation. Workflow multi-step processes consist of multiple activities linked with rules based transitions.
RLE 007	The EES shall have the ability to tune individual steps in the overall decision process for maximum performance by the execution engine.	S	Cúram Express Rules and Cúram Workflow both support the ability to focus on individual steps, or units of logic and tune for maximum performance.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RLE 008	The EES shall support reporting requirements either natively or integrate with other reporting tools to provide reporting.	M	Apart from the Cúram Reports, Wipro proposes IBM Cognos as the Business Intelligence Tool for generation of operational and analytical reports and catering to State's EES reporting Requirements.
RLE 009	The EES shall support repository infrastructure for rule storage and versioning.	S	SmartPro MedEE includes versioning capabilities for rules.
RLE 010	The EES shall support seamless and easy user interaction.	S	CER provides a highly versatile and adaptable rules environment that supports the definition, creation, and execution of rules. CER consists of a Rules Engine and Rules Editor components. The Rules Editor component provides a user friendly tool for business analysts and developers to storyboard, design, and construct rules, and to link rules to data.
RLE 011	The EES shall provide context sensitive help and extensive documentation.	S	IBM provides online help and documentation for creating and maintaining CER rule sets.
RLE 012	The Rules Engine must be able to submit business rules to a federal repository at such time as the repository exists.	S	Rule sets are stored as XML document in the system's data repository. These XML documents can be exported as XML files.
RLE 013	The EES shall support high performance and scalability, including the following characteristics:	S	CER Rules, deployed as part of the Cúram application on a JEE application server, supports high performance and scalability of rules execution.
RLE 014	<ul style="list-style-type: none">High performance for large rule bases (more than 20,000 rules)	S	The EES supports a large rules base. As an example, 'Cúram for Medical Assistance' provides an extensive prebuilt rules base for Medicaid programs, extended Medicaid, CHIP and ACA Insurance Assistance programs.
RLE 015	<ul style="list-style-type: none">Ability to share rule sets across multiple engines	S	Rulesets can execute in parallel, such as during a bulk re-assessment

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RLE 016	<ul style="list-style-type: none">Dynamic and static execution versions for performance	S	A CER Rule set is saved as an XML document on the EES database. When the rule set is first executed, it is parsed and loaded into in memory java objects. Subsequent executions of this same ruleset will run from the in-memory representation of the rule set, unless the original XML document has been updated. In which case, the rule set will be reloaded to memory. The in memory representation of the rule set is provided for performance reasons, as it avoids the need to parse and continually re-parse the Rules XML document.
RLE 017	<ul style="list-style-type: none">Multiple, cross-platform support	S	The Cúram rules engine and rules editor are supported across various platforms including either of WebLogic Server or WebSphere Application server on a variety of Unix platforms, Microsoft Windows, IBM z/OS, using DB2 or Oracle as its database. Rulesets can execute across multiple nodes of a JEE application server.
RLE 018	<ul style="list-style-type: none">Segmented repositories	S	The EES solution uses IBM Cúram Express Rules (CER). CER supports segmented rule repositories. A CER Rule set is saved as an XML document on the EES repository, separate from the main server logic, and can be extracted and maintained independently.
RLE 019	<ul style="list-style-type: none">Pre-built rule paths	S	Cúram for Medical Assistance ¹ provides prebuilt rules for Medicaid programs, extended Medicaid, CHIP and ACA Insurance Assistance programs.
RLE 020	<ul style="list-style-type: none">Rule pre-fetch to memory	S	Rulesets are cached in memory, as Java objects, when first executed.
RLE 021	<ul style="list-style-type: none">Parallel rule search	S	Multiple Rules Search transactions can be executed in parallel.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RLE 022	<ul style="list-style-type: none">Ability to compile rule sequences into base languages like C++, Java and C#	S	A CER Rule set is saved as an XML document on the EES database. When the rule set is first executed, it is parsed and loaded into in memory java objects. Subsequent executions of this same ruleset will run from the in-memory representation of the rule set.
RLE 023	The EES shall support advanced inference features, including:	S	CER supports advanced inference features.
RLE 024	<ul style="list-style-type: none">Truth maintenance to support parallel rule execution	N	CER Rules is not a TMS (Truth Maintenance System). Truth Maintenance is an advanced inference feature that is not required for eligibility determination.
RLE 025	<ul style="list-style-type: none">Inductive and deductive problem sets supported.	N	CER Rules support deductive reasoning only.
RLE 026	<ul style="list-style-type: none">Recursive rules supported	S	CER supports recursive execution.
RLE 027	<ul style="list-style-type: none">Rule aggregation supported	S	The EES solution uses IBM Cúram Express Rules (CER). CER supports aggregated rules by building rule sets that are dependent on other rules or rule sets as needed.
RLE 028	<ul style="list-style-type: none">Links to simulation capabilities	S	CER supports the ability to Check Eligibility on "In Edit" eligibility data to perform "what if" scenarios. Bulk simulation of rules changes against live data should be performed in a pre-production system with a copy of the live database.
RLE 029	<ul style="list-style-type: none">Agent or daemon links	S	The IBM Cúram Express Rules (CER) engine can execute in the background as an Agent or Daemon process. As data is entered and maintained the rules engine executes in the background monitoring input and presents onscreen guidance to the worker. The guidance is related to the specific Case, Household or Individual, that the worker is focusing on.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RLE 030	<ul style="list-style-type: none">Object inheritance supported	S	The EES solution supports object inheritance.
RLE 031	<ul style="list-style-type: none">Multiple-engine support	S	Rulesets can execute in parallel and across nodes of a JEE application server.
RLE 032	The EES shall include rule management features for the execution engine, including:	S	The EES includes rule management features for the rules engine.
RLE 033	<ul style="list-style-type: none">Rule extensibility	S	OOTB rulesets can be extended to meet State requirements.
RLE 034	<ul style="list-style-type: none">Rule mapping to owners and stewards	M	The EES will support Rule mapping to workers. Modification is required to link CER Rule sets to one or more workers.
RLE 035	<ul style="list-style-type: none">Rule change impact analysis purposes	S	CER Editor has a "Find References To This Rule" option which can be used to determine the impact of a rule change.
RLE 036	<ul style="list-style-type: none">Integration/coordination of distributed rule engines with a corporate "master"	C	When required, the CER Rules Engine can be set to invoke a "higher authority" through the ESB of SmartPro MedEE.
RLE 037	<ul style="list-style-type: none">Ability to rerun the engine for a point which has passed (for example, after 1 January, still able to rerun year-end jobs with 31 December rules)	S	The CER Rules Engine can be executed for any point in time. The correct rule set, program rates and eligibility data will be used for the selected date.
RLE 038	<ul style="list-style-type: none">Ability to enter new rules or changes to become effective on a future date (for example, ability to put in the rule changes for 1 January in December)	S	Rules, Rates and eligibility data are all effective dated. Rules, Rates and eligibility data can be entered effective a past, current or future date.
RLE 039	<ul style="list-style-type: none">Rule consistency/collision checks	S	Rules consistency/collision checking occurs during rules unit testing. Rules unit testing enables rules developers to fully test all rules and rule fragments in isolation, and supports ongoing regression testing of CER rules.
RLE 040	<ul style="list-style-type: none">Rule versioning	S	CER rule sets support rule versioning.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RLE 041	<ul style="list-style-type: none">Release versioning and rollback	S	CER rule sets support rule versioning and ability to rollback.
RLE 042	<ul style="list-style-type: none">Rule security	S	Cúram Role Based Access Control (RBAC) controls access to rules and rules maintenance screens and processes.
RLE 043	The EES shall include a rule repository for global rule management, including:	S	Rules are stored as XML documents in the EES database.
RLE 044	<ul style="list-style-type: none">nomadic support	S	CER Rules can be exported as XML documents and maintained while disconnected from the server.
RLE 045	<ul style="list-style-type: none">an extensible meta model	S	Any rule set can be extended
RLE 046	<ul style="list-style-type: none">rule merge support	S	Supported through the export of the rules XML file and use a text/XML diff and merge tool.
RLE 047	<ul style="list-style-type: none">versioning/lockout	S	Rules management includes versioning and lockout.
RLE 048	<ul style="list-style-type: none">rule promotion	S	The Cúram Configuration Transport Manager (CTM) provides a mechanism for packaging configuration data and transporting it from one Cúram deployment to another Cúram deployment. For example, promoting a rule set from a pre-production environment to a production environment.
RLE 049	<ul style="list-style-type: none">change management	S	The Cúram Configuration Transport Manager (CTM) provides a mechanism for packaging configuration data and transporting it from one system to another.
RLE 050	<ul style="list-style-type: none">electronic rule distribution (publish or subscribe)	S	Rulesets are managed globally within the database - if a new version is activated, it is instantly available.
RLE 051	<ul style="list-style-type: none">security	S	Cúram Role Based Access Control (RBAC) controls access to rules and rules maintenance screens and processes.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RLE 052	The EES shall support ease of use in operation/development and administration, including:	S	Rules are managed by the CER rules engine and the CER rules editor. The CER rules editor provides a user friendly tool for business analysts and developers to storyboard, design/develop, and construct rules, administer, and to link rules to data.
RLE 053	<ul style="list-style-type: none">• Rule-firing audit report capabilities	S	The EES solution supports rules execution auditing.
RLE 054	<ul style="list-style-type: none">• Rule views by project or role	S	The CER Rules editor supports both a business user view and a technical user view. The user can switch back and forth between these two views. Cúram also support a rules execution view, that displays the output of the rules calculation in a format suitable for an eligibility worker.
RLE 055	<ul style="list-style-type: none">• Ability to be used as a wizard/plugin for multiple development environments	S	CER Rules are saved as XML documents. These XML documents can be extracted from the EES database and further modified using an XML editor. Common XML editors are available as plug-ins, such as Eclipse plug-ins.
RLE 056	<ul style="list-style-type: none">• Dynamic rule change supported	S	Dynamic rule change is supported in the EES. Rules are saved as XML documents, not as source code.
RLE 057	<ul style="list-style-type: none">• Rules separated from the engine	S	Rules are stored as XML documents in the EES database separate from the Rules Engine.
RLE 058	<ul style="list-style-type: none">• Constraints naturally supported	S	Constraints are supported.
RLE 059	The EES will include the capability to save and retrieve partial user sessions.	S	Partial user sessions, such as an in progress application, can be saved and later retrieved and completed.
RLE 060	The EES shall provide the capability to associate effective dates with each program and rule in the rules engine.	S	Rules sets are effective dated - multiple dated versions co-exist and are selected based on timeframe being evaluated. Within a specific rule set, the concept of an Era exists to support effective dated rules with a specific rule set.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RLE 061	The EES shall provide the capability to associate a rule with multiple program profiles.	S	A program definition in Cúram can be associated with multiple rule sets. A rule set can be associated with multiple different programs.
RLE 062	The EES shall provide the capability to identify and apply a rule change appropriately to existing cases.	S	Rules changes will be associated appropriately with existing active cases. Where the rules change is in the past, this may result in re-running eligibility for a selection of cases. As this could result in a large number of cases, this process will run in batch or asynchronously online on dedicated hardware.
RLE 063	The EES shall provide the capability to copy an existing rule to create a new rule.	S	In the CER editor, rules can be created and modified as needed. This can include copying an existing rule, or group of rules, to create a new one.
RLE 064	The EES shall provide the ability to identify all other rules that are dependent on a specific rule by allowing rules association.	S	During rules execution, the CER engine will identify all other rules that are dependent on the specific rule being executed. During rules editing, the user can find all rules that reference or depend on a specific rule.
RLE 065	The EES shall provide the capability to generate and display a flow chart of each program profile.	S	CER rules display the output of the rules calculation in a format suitable for an eligibility worker. Known as an eligibility decision, this eligibility view is displayed across a set of tabbed panels. The initial panel contains a summary of eligibility decision. Subsequent panels display a breakdown of this eligibility decision. Depending on the program, this view will include household eligibility results, income eligibility results, resource eligibility results, etc.
RLE 066	The EES shall provide the ability to maintain and display the history of each rule change in the rules engine to show previous versions of the rule, a timestamp of when the change was made and the ID of the user making the change.	S	Cúram captures the versioning details of a Ruleset.
RLE 067	The EES shall provide the capability to add additional table-driven variables to support new regulations using a rules engine.	S	Cúram Rate tables are used for table-driven values in the EES.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RLE 068	The EES shall include an automated rule build capability for rule repository propagation through the environments Development, Integration/Test, User Acceptance Testing and Production.	S	The Cúram Configuration Transport Manager (CTM) provides a mechanism for packaging configuration data and transporting it from one Cúram deployment to another.
RLE 069	The EES shall have the ability to expose sets of interrelated rules in the rules repository as either a web service and/or in an interactive, web-based interview format.	M	Modification required to expose the rules engine as a Web Service. The web service will take parameters that identify what rule set to execute, what date to execute for, and an identifier that will specify what eligibility data to use. Interactive, web-based interview format will be supported by Cúram Intelligent Evidence Gathering infrastructure.
RLE 070	The EES shall have the ability to create customizable web-based, interview sessions based on defined rule sets.	S	IBM Cúram Intelligent Evidence Gathering (IEG) uses a dynamic questionnaire capability to maximize the efficiency of data collection and to reduce the likelihood of redundant or irrelevant data being requested. Cúram IEG presents questions to the user through a series of screens known as a "script".
RLE 071	The EES must facilitate the creation and maintenance of rules referencing complex data relationships this will include, but not be limited to, rules referencing complex many-to-many relationships between entity types	S	The IBM Cúram CER Editor provides a user friendly tool for business analysts and developers to storyboard, design, and construct rules, and to link rules to data, including data with complex many-to-many relationships.
RLE 072	The EES must have the ability for text documentation and meta-data to be included as part of the rules repository.	S	The EES can include descriptions/annotations on each rule.
RLE 073	The EES will have documentation to assist rule authors and administrators with best practices for rule repository creation and maintenance, repository check-in/checkout, repository promotion across environments.	S	CER Rules documentation is available online from IBM and will be made available to rule authors and administrators.
RLE 074	The Contractor shall partner with the Department management and Rule Author(s) to design suitable policy models for Eligibility Determination and other rules to be automated using the proposed Rules Management System.	S	Cúram OOTB Medical Assistance Rulesets will be extended to meet State requirements; new rulesets will be created for State specific programs, or State variants of existing programs.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RLE 075	The Contractor shall transform all of the state's Medicaid eligibility program rules into a format that can be consumed by the proposed Rules Management System.	S	A significant proportion of the State's Medicaid eligibility programs are provided, prebuilt, with 'Cúram for Medical Assistance'. For those programs or program variants that are not prebuilt, configuration and extension will enable the implementation of these programs. All required eligibility rules will be expressed in CER Rules.
RLE 076	The Contractor shall create the program rules in the proposed Rules Management System and test them in an established environment.	S	The rules will be created in the CER Rules Editor and shall be unit and regression tested in the EES development environment, and integration tested in the system test environment.
RLE 077	The Contractor shall create a valid set of rules to transition from the current mainframe system to the proposed Rules Management system in preparation for the new SOA system.	S	Rules are created and maintained via the Cúram CER Editor.
RLE 078	The Contractor rules management team will work with and mentor the Department staff Rule Author(s) in the best practices of: - Converting rules from federal or legislative documents into properly structured rules that can be consumed by the proposed Rules Management System and writing future rules in such a way that eases the transition - Capturing meta-data about each of the rules sets and how they function	S	The Wipro / IBM team will mentor the designated State Staff, and provide a variety of training materials both written and CBT, to teach them how to use the Rules Engine, and best practices for converting rules from external sources into the Rules Engine.
RLE 079	The Contractor shall provide guidance on: - How best to store and look up the meta-data - Defining the Lifecycle of rule sets - How to integrate or flow rules - How to provide help or commentary on rules - General use of the proposed Rules Management System	S	CER Rules documentation is available online from IBM and will be made available to rule authors and administrators.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RLE 080	<p>The Contractor shall provide selected Department staff with holistic education on the proposed Rules Management system that includes (but is not limited to):</p> <ul style="list-style-type: none"> - Knowledge about how the proposed Rules Management system works - Knowledge about how to structure the Rule Author(s) to meet the Agency goals - Knowledge about how to create, maintain and update rules in the proposed Rules Management system 	S	See RLE 078. The Wipro / IBM team will provide the designated State staff with the required educational experience. Both the Training Environment and the Sandbox Environment can be used as practical Exploratoriums to further deepen the State's knowledge.
RLE 081	The EES shall have the ability to test rules independently from the application with which they are being integrated.	S	CER rules can be unit tested in the EES Eclipse-based development environment, separate from main application. Support for this type of isolated testing is key to enabling the tests to only focus on the accuracy of the rules, and not other factors such as accessing the correct data. Further dedicated unit tests will be developed for testing data access.
RLE 082	The EES shall have the ability to debug rules using an integrated tool.	S	Rules logic is debugged using Eclipse development tools.
RLE 083	The EES shall have the ability to assign effective dates to rules to control when rules are applied and to allow the storage and application of rules in historical, current, and future contexts.	S	Rules sets are effective dated - multiple dated versions co-exist and are selected based on timeframe being evaluated. Within a specific rule set, the concept of an Era exists to support effective dated rules with a specific rule set.
RLE 084	The EES shall have the ability to invoke rules as a service from the service integration capability as well as directly from other system modules.	S	The CER Rules Engine can be made available as a Rules Service through the solution ESB. It is also pre-integrated with the overall EES eligibility solution to facilitate and accelerate system deployment.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RLE 085	The EES shall have the ability to record and output the exact reasons and/or basis for decisions determined by the Rules Engine.	S	CER rules display the output of the rules calculation in a format suitable for an eligibility worker. Known as an eligibility decision, this eligibility view is displayed across a set of tabbed panels. The initial panel contains a summary of eligibility decision. Subsequent panels display a breakdown of this eligibility decision. Depending on the program, this view will include household eligibility results, income eligibility results, resource eligibility results, etc.
RLE 086	The EES business rules shall be expressed using a consistent, technology-neutral standard format that is human-readable.	S	Rules are stored as XML documents and can be viewed in any XML viewer that is human -readable.
RLE 087	The EES shall provide a Business Rules Engine to generate transaction logs in accordance with the Harmonized Security and Privacy Framework and other federal requirements.	S	The CER Rules engine will generate a configurable level of logging information that can be used to understand system activity; i.e. the rules that were executed and the results of those rules.
RLE 088	The EES shall provide a Business Rules Engine, which generates transaction logs in accordance with the Health Insurance Portability and Accountability Act (HIPAA)	S	<p>HIPAA - 45 C.F.R. § 164.312(b): "Implement hardware, software, and/or procedural mechanisms that record and examine activity in information systems that contain or use electronic protected health information."</p> <p>The CER Rules engine will generate a configurable level of logging information that can be used to understand system activity; i.e. the rules that were executed and the results of those rules.</p>
RLE 089	The EES should be able to recreate results on a unique set of data regardless of when the rules are executed; modeled and/or What-if situations are required.	S	SmartPro MedEE will always recreate identical results on a unique set of data, using the same rules and rates. Rules, Rates and Eligibility Data are all effective dated. If new versions exist for a future date, EES will always use those rules, rates and data that were/are/will be valid for a particular date.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RLE 090	The EES should provide a Business Rules Engine which contains a process for built-in rule review and approval process that should identify any conflicts in business rules as they are being developed.	S	CER Rules are reviewed and approved as part of the CER rules implementation process.
RLE 091	The EES should include a Business Rules Engine which provides a debugging process that automatically analyzes and identifies logical errors (i.e. conflict, redundancy, and incompleteness) across business rules.	S	CER includes a comprehensive rule set validator which can detect errors in a rule set before allowing the rule set to be published or executed.
RLE 092	The EES should provide a Business Rules Engine which allows for the tracking and reporting of rules usage.	S	Rules logging will allow for the tracking and reporting of rules usage.
RLE 093	The EES should include a Business Rules Engine which provides the flexibility to define business rules by inclusion or exclusion.	S	By default, CER rules are defined by inclusion. Exclusion requires copying existing rule sets and extracting specific rules from that copy.
RLE 094	The EES should include a Business Rules Engine which provides the capability for the user to view and model rules for system exceptions online and to trace exception rule dependencies.	S	The CER Rules engine provides the capability for the user to maintain rules in support of system exception processing.
RLE 095	The EES should provide a Business Rules Engine to manage the synchronization of business policies and rules across physical system environments. (e.g. development, test, training and production).	S	The Cúram Transport Manager manages the synchronization of rules between physical environments.
RLE 096	The EES should have the ability to automatically promote rules from one environment to another (e.g. development to system test to user acceptance to production) as well as rollback changes to a previous version.	S	The Cúram Transport Manager manages the synchronization of rules between physical environments.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RLE 097	The EES should have the ability to produce and consume rules in both machine and human readable formats (which may be the same format).	S	A CER Rule set is saved as an XML document on the EES database. When the rule set is first executed, it is parsed and loaded into in memory java objects. Subsequent executions of this same ruleset will run from the in-memory representation of the rule set, unless the original XML document has been updated. In which case, the rule set will be reloaded to memory. The in memory representation of the rule set is provided for performance reasons, as it avoids the need to parse and continually re-parse the Rules XML document.
RLE 098	The EES should have the ability to define rules via a customizable business vocabulary using rule metaphors, including decision tables, decision trees, and text-based rules.	S	SmartPro MedEE uses Cúram's CER editor which includes both business and technical palettes used to design the business and technical logic in a diagram form. The Decision Table Template contains the decision table element which is used to create decision tables. The Data Types palette includes a range of rule elements (string, date, number, rate, etc.) that can be used to design the data types in the diagram form.

Portal Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
PRT 001	The EES shall provide a portal UI framework that separates content from logic and is robust, scalable and interoperable with W3C Web-based standards.	S	LifeRay Portal is the portal product and is a leader in Gartner Quadrant for Horizontal Portals 2013, and easily meets the goals expressed in this requirement.
PRT 002	The EES shall provide session management capabilities to support user sessions and coordinated back-end application functionality.	S	Comes out of the box with both application and portal servers.
PRT 003	The EES shall provide support for multiple languages and character set encoding standards.	S	Multi-Lingual support with the help of resource bundles and out of the box support from Liferay portal.
PRT 004	The EES shall provide portal personalization and customization capabilities for the constituent user experience.	S	Out of the box portal server capability, will be configured to meet customer specific need.
PRT 005	The EES shall support access from multiple channels and devices.	S	Portal supports multi-channel detection and redirection. Specific device based themes would be created to provide better user experience across devices as per the need.
PRT 006	The EES shall provide support for Web content management EES that is robust and scalable.	S	LifeRay portal comes bundled with web content management tool for usage.
PRT 007	The EES shall provide time-based content expiration and version management capabilities.	S	LifeRay Bundled Content Mgmt. solution has the versioning capabilities.
PRT 008	The EES shall provide Web content related workflow management capabilities.	S	LifeRay Bundled Content Mgmt. solution has the workflow management capabilities.
PRT 009	The EES shall provide syndicated content capabilities including creation and subscription to RSS feeds	S	LifeRay Bundled Content Mgmt. solution has the Syndication and Subscription capabilities.
PRT 010	The EES shall provide content metadata attributes for portal extensibility.	S	Our processes will define the desired metadata attributes, which will be employed in the Portal implementation.
PRT 011	The EES shall provide multimedia Web content management capabilities.	S	LifeRay Bundled Content Mgmt. solution has the limited Multi-media WCM capabilities.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
PRT 012	The EES shall provide wiki- and blog-based capabilities	S	LifeRay has 60 out of the box portlets which includes Wiki's and Blog capabilities.
PRT 013	The EES shall provide XHTML e-form capabilities.	S	Portal integrates directly with ORBEON 4.0.0 form portlet and provides this capability out of the box.
PRT 014	The EES shall provide survey engine capabilities.	S	Portal can integrate with any 3rd party service provider for Survey Capabilities like Survey Monkey.
PRT 015	The EES shall provide chat and instant messaging (IM) support.	S	LifeRay come Bundled with LIMS – Chat and Instant Messaging solution. This function can be enhanced for client specific use.
PRT 016	The EES shall provide the capability to consume externally available mapping Web services.	S	Provided out of the box.
PRT 017	The EES shall provide portlet capabilities.	S	LifeRay support the Portlet JSR 286 specification and hence supports Portlet capabilities.
PRT 018	The EES shall provide inter-portlet communications that are robust, scalable and reliable using Shared Render Parameter and Events methods.	S	LifeRay supports the Portlet JSR 286 specification and hence supports Inter-Portlet communication capabilities.
PRT 019	The EES shall provide search engine capabilities.	M	LifeRay Portal can Integrate with any external search engine, and provides its own strong internal engine.
PRT 020	The EES shall provide taxonomy-based cataloging of portal resources.	M	Minimal modification required.
PRT 021	The EES shall provide index-based search capabilities.	S	Crawling and Indexing capabilities comes out of the box with all major enterprise search providers. Enterprise Search engine can be integrated with Portal server. LifeRay provides an complete indexed search capability.
PRT 022	The EES must allow for user analytics to be captured and reported	S	Any Web Analytics tool can be integrated with portal to provide user analytics.
PRT 023	The EES shall support commonly used Internet browsers without any degradation in functionality, including the following:	S	We plan to use AWD/RWD along with HTML5/CS3 and Ajax based JS Framework for User Experience rendering and cross browser compliance.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
PRT 024	<ul style="list-style-type: none">Internet Explorer Version 8.0 or greater	S	Internet Explorer 8 and above is supported.
PRT 025	<ul style="list-style-type: none">Mozilla Firefox Version 6 or greater	S	Mozilla Firefox is supported.
PRT 026	<ul style="list-style-type: none">Google Chrome Version 20 or greater	S	Google Chrome is supported.
PRT 027	<ul style="list-style-type: none">Apple Safari version 5.1 or greater	S	Apple Safari is supported.
PRT 028	<ul style="list-style-type: none">Opera Browsers 10 or greater	M	Cúram requires Opera testing and possible style sheet maintenance to accommodate Opera.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
PRT 029	The EES shall meet all American with Disabilities Act (ADA) and Limited English (LEP) requirements as required by the ACA and Federal regulations.	S	<p>SmartPro MedEE, based on IBM Cúram's ADA compliant web based solution, meets applicable State and Federal accessibility standards for all processes and user interfaces produced by the system.</p> <p>Cúram-based portals are designed to be accessible so that persons with disabilities can use these portals effectively. Cúram-based portals conform to both the US Federal Section 508 requirements for accessibility for persons with disabilities and the Americans with Disabilities Act (ADA). Accessibility testing is an important element of the continual testing of the Cúram solution. A dedicated team focused only on accessibility testing using the World Wide Web Consortium (W3C) Web Content Accessibility Guidelines 2.0 (WCAG 2.0). As part of the Cúram product development process, new features are continually evaluated and tested using WCAG. These guidelines are an integral part of the Cúram product development process and provide a basis for designing accessible software solutions.</p> <p>The Plain Writing Act of 2010 requires agencies to write clear communication that the public can understand and use. "Cúram Universal Access" provides an EES public-facing portal based on a sixth grade reading level. This public-facing portal can be further tailored to meet the specific language proficiency levels desired by the State. "Cúram Universal Access" includes an extensive help function that provides detailed explanations of new and non-basic terminology. Usability and Visual Design team will take care of the UI compliance and regulations. Portal team will enable rendering.</p> <p>IBM rational Policy Tester / Access will be used to automate X509 standards compliance testing.</p>

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
PRT 030	The EES shall allow consumers to submit applications with an electronic signature that complies with State, federal, and agency requirements and standards.	M	EES supports the electronic signing of applications submitted by an authenticated customer through the Client Portal. Once the new application is complete, a disclaimer is displayed asking the user to sign the new application. The customer must click a number of check boxes confirming that all the information they have provided is accurate. Specific Portal Pages/Forms will be designed and developed to enable this functionality.
PRT 031	The EES shall use cascading style sheets and other modern browser technologies to ensure that the look and feel of the site can be changed without requiring reprogramming the portal if using a browser based interface.	S	The EES uses cascading style sheets and HTML to define the appearance (colors, fonts, etc.) of the client pages when viewed in a web browser. Default style sheets are provided for the Cúram client application which can be overridden to suit DHHS branding. Plan to use CSS3 for themes/skins and User Experience.
PRT 032	The EES shall provide the ability to capture, display and maintain confidentiality statements and privacy protections as specified by the Department.	M	The EES supports the configuration and display of disclaimers and confidentiality statements for display in the client portal. Specific Portal Pages/Forms will be designed and developed to enable this functionality.
PRT 033	The EES shall provide the ability to capture, display and maintain signature acknowledgement(s) of completed forms / case activity(s) as specified by the Department.	M	The EES supports the configuration, display and capture of signature acknowledgements. Specific Portal Pages/Forms will be designed and developed to enable this functionality.
PRT 034	The EES shall provide the ability for external users (e.g. Clients, Community Partners) to upload documents as specified by the Department.	M	SmartPro MedEE will enable external users to upload documents. All uploaded documents will be virus checked, saved in the document management system and linked to the relevant application, individual or ongoing eligibility case. Some modification effort will be required to expose this existing worker capability to external users. Specific Portal Pages/Forms will be designed and developed to enable this functionality.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
PRT 035	The EES should support small form-factor devices, including the following mobile phone and tablet platforms:	S	SmartPro MedEE web pages can be displayed using common mobile micro browsers. Pages are best viewed using a larger form factor. We plan to use AWD/RWD along with HTML5/CS3 and Ajax based JS Framework for User Experience rendering and cross browser compliance.
PRT 036	iOS phones and tablets	S	SmartPro MedEE web pages can be displayed using common mobile micro browsers.
PRT 037	Android phones and tablets	S	SmartPro MedEE web pages can be displayed using common mobile micro browsers.
PRT 038	Blackberry phones and tablets	S	SmartPro MedEE web pages can be displayed using common mobile micro browsers.
PRT 039	Windows mobile phones and tablets	S	SmartPro MedEE web pages can be displayed using common mobile micro browsers.
PRT 040	The EES should be 100% accessible via the Internet and require no desktop software (including specialized plug-ins and applets) except for the commercially-available web browsers listed above.	S	SmartPro MedEE is a web-based portal solution that does not require any desktop software to be installed. We will use AWD/RWD along with HTML5/CS3 and Ajax based JS Framework for User Experience rendering and cross browser compliance.
PRT 041	The EES should provide web analytics.	S	Any Web Analytics tool can be integrated with portal to provide web analytics info. LifeRay also comes with its own internal analytics capability.
PRT 042	The EES should provide citizen and business-centric portals.	S	SmartPro MedEE uses Cúram's Universal Access portal for citizen and Cúram's Worker portal for business-centric portals. Portal can enable any number of sub-portals as per the requirement.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
PRT 043	The EES should have a common look and feel across the portal, regardless of the source of information	S	<p>Web pages are all configured through XML User Interface Metadata (UIM) pages, Cascading Style Sheets (CSS), Intelligent Evidence Gathering (IEG) scripts, etc. without the need to change program code. The use of these technologies ensures SmartPro MedEE has a common look and feel across the entire portal.</p> <p>Based on the branding guidelines, the Visual Design team will create screen and portal would enable the screens for user perspective.</p>

Application Server Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
APP 001	The Application Server shall be a scalable, enterprise-ready application and shall support the deployment of many types of distributed applications and provides an ideal foundation for building applications based on SOA.	S	SmartPro MedEE is architected using SOA and built upon IBM's PureApp server, a fully integrated web and cloud-ready hardware and software appliance. The SOA architecture provides for interoperability, scalability and, by avoiding single points of failure provides for high availability and resilience. The use of IBM's PureApplication server appliance, specifically PureApp's PureSystems Manager (PSM) as the core tool for technical system management is central to successfully executing this strategy. PSM provides a single unified tool environment for Application Management, Web services Management, Systems Management, Performance Monitoring, and Workload Management.
APP 002	The Application Server shall enable deployment of mission-critical applications or components in a robust, secure, highly available, and scalable environment.	S	PureApplication Server and WebSphere jointly provide nearly instant deployment of fully scalable, tiered, clustered environments, without the usual integration engineering effort. By using pre-certified Patterns, and management software representing over 1,000,000 staff hours of IBM expertise of effort, these mission critical middleware environments can literally be deployed application-ready within minutes, not months.
APP 003	The Application Server clusters shall provide scalability and reliability for applications by distributing the work load among multiple instances of the server.	S	Please also refer to APP 002. SmartPro MedEE provides this out of the box, based on PureApplication Server and WebSphere – clustering for reliability and performance scaling. By merely assigning more than one VM to a tier (Web, Application, or DB), the tier is automatically deployed as a scalable fault-tolerant cluster.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
APP 004	The Application Server clusters shall have overload protection to allow the server the ability to detect, avoid, and recover from overload conditions.	S	PureApplication Server self-monitors resource utilization, and auto-tunes without service interruption based on configured business rules. For example, provisioning a VM with additional physical CPU cores if utilization exceeds a configured threshold,
APP 005	The Application Server clusters shall prioritize work based on pre-defined rules and by monitoring actual run time performance statistics.	S	PureApplication Server and ITCAM monitor actual performance, and adjust the cluster based on configured business rules, in real time, without human intervention.
APP 006	The Application Server clusters shall store-and-forward services to enable the server to deliver messages reliably between applications that are distributed across many Server instances.	S	The ESB is used to deliver store and forward message when required. However, SmartPro MedEE does not rely upon this for its functionality.
APP 007	Allows for System Administration that include tasks such as creating Application Server domains; deploying applications or components; migrating domains from development environments to production environments; monitoring and configuring the performance of the application Server domain; and diagnosing and troubleshooting problems.	S	PureApplication provides direct high level management for all of these administrative functions, via a highly functional graphical control console. Complete multi-tier redundant clustered fault tolerant environments, with the middleware already integrated and certified, can be engineered, configured, and instantiated within less than 15 minutes. Basic tools allow for entire EES Environments, complex definitions of many VMs, to be configured in moments, and moved freely between environments upon command.
APP 008	The Application Server security architecture shall provide a comprehensive, flexible security infrastructure designed to address the security challenges of making applications or components available on the Web.	S	WebSphere provides the Web Server and Application Server tiers of SmartPro MedEE. Based on the deployment pattern, these may be compressed into a single small environment (for example, an internal test environment), or fully isolated by firewalls and VLAN protection, all via simple configuration.
APP 009	Shall provide for a monitoring and diagnostic service that creates, collects, analyzes archives, and accesses diagnostic data generated by a running server and its deployed applications.	W	PureApplication Server provides all the technical level monitoring of the appliance, while ITCAM provides SOA Service and response time monitoring. Both report exceptions up to the Data Center Enterprise Management system in real time.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
APP 010	The EES must allow for user analytics to be captured and reported.	C	Such Detailed Analytics will be enabled using the DW/DataMart solution component of EES solution. Wipro will leverage its KPI library and learning and best practices from other State Eligibility Enrollment system to recommend the user Analytics KPIs State should capture.
APP 011	The EES shall support session replication to support transparent fail over.	S	PureApplication Server provides this out of the box, on demand. When using a Web Architecture deployment Pattern, the mere act of requesting more than one VM in any of the middleware tiers (Web, Application, DB) automatically provisions and instantiates clustered design with load balancing and automatic fail-over.
APP 012	The EES shall provide guidelines and tools (MVC frameworks, persistent frameworks) to create web applications (portal or stand-alone) with basic CRUD functionality.	S	Primarily the web application will be supported as portlets on the Liferay Portal Server using the Spring MVC framework; the same framework can be used at Application Server Layer in case the need arises for development of web applications.

Database Management System Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
DMS 001	The EES shall lock database records based on various parameters (e.g., at row level, field level, or at the application level).	S	In the EES solution, a database transaction runs at a specific isolation level: Repeatable Read - This guarantees that dirty data is not read and that a second read will read the same thing as a first. Read Committed isolation level - This guarantees that a transaction cannot read a row with uncommitted changes in it. "WITH CS" is automatically appended to SELECT statements All queries which do not have the forUpdate flag set run at the "Cursor Stability" isolation level. All modifies and queries with the forUpdate flag set run at "repeatable read" isolation level. This means that they place a lock on the row(s) that have been read so that they cannot be updated by anyone else, and in the case of modify operations be read by anyone else. This lock is not released until the transaction commits.
DMA 002	The EES shall accommodate separate instances of databases.	S	PureApplication automatically implements fully integrated DB2 database deployments upon demand. Preconfigured Patterns are provided out of the box for common architectural metaphors, such as "3-Tier Web Application" or "Cognos BI Database". Appropriately optimized VM configurations are immediately deployed. VM technology is used to enforce isolation, both for security and for performance management.
DMS 003	The EES shall support online modifications to database structures with minimal user downtime.	S	DB2 and Cúram cooperate to allow very rapid modifications in almost all cases to database structures, with minimal downtime.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
DMS 004	The EES shall allow for data and transaction replication including, but not limited to, copying an instance of any database to specified locations (e.g. SAN, Multi-site implementations)	S	PureApplication management tools allow instant copying of data stores within and between Environments and locations. This capability is at the heart of the Disaster Recovery approach implemented by SmartPro MedEE.
DMS 005	The EES shall provide standard data extraction APIs to allow import and export of data.	S	Db2 and InfoSphere Information Server (DataStage) provide these out of the box.
DMS 006	The EES shall provide documented best practices including, but not limited to optimum database configuration, client maintenance and change control.	S	These are provided. Please note that much of the database configuration optimization is fully automatic and system driven, and is dynamically tunable by the PureApplication system, dramatically simplifying the technical engineering task.
DMS 007	The EES shall handle load balancing, failover and/or clustering ability for extended scalability and performance	S	PureApplication provides this automatically, within moments, without requiring integration or middleware Engineering. The PureApplication environment instantiates the most common application architecture and middleware designs based on fully automated and preconfigured Patterns, based on answering a handful of design parameter questions. These patterns already accommodate load balancing, clustering for performance and fail-over (automatic), vertical and horizontal scaling, and online physical resource provisioning for performance. Provisioning can be optimized dynamically by the system itself, while hot, in real time, to meet performance goals expressed as business rules.,
DMS 008	The System shall avail the capacity planning model for database configuration.	S	Our SDLC processes include specific capacity planning, engineering, monitoring, and corrections in a feedback loop. However, PureApplication dramatically simplifies the actual execution, by directly executing real-time capacity and resourcing adjustments to meet resource and performance goals.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
DMS 009	The EES supports advanced configurations for data caching (e.g., support of client/application caching, support of server caching, etc.)	S	Both client side and server side caching are used. Client caching is used to store non-user data; code table items, security role configurations, error message strings, etc. This data represents configurable data, used on the presentation tier that is accessed very regularly. When this data changes, due to configuration, the cache is refreshed. Server caching is used to cache data that is repeatedly accessed in a single transaction. For example, when executing an eligibility period over a long period of time, multiple date-based executions of the rules engine is often required. During this period, a lot of the referenced data (e.g. the rules, rates, and eligibility data) will not change, and so does not need to be continually be re-read from the database. It is far more efficient to read from a cache.
DMS 010	The EES shall have the ability to optimize performance in transaction processing versus report processing	S	SmartPro MedEE is designed with these two aspects of the Production Environment isolated using VM technology. Report processing is executed against a Data Warehouse / DataMart model, against its own database and middleware instance, provisioned physically on different computer nodes with the single large server.
DMS 011	The EES shall use history tracking within the database and logging options (e.g., transaction auditing)	S	SmartPro MedEE enables these database functions.
DMS 012	The EES shall be fully ACID (Atomicity, Consistency, Isolation, Durability)- compliant so as to ensure it handles transaction rollbacks, validity and referential integrity checks, etc.	S	The EES fully supports ACID principals, both on the database and on the application server. Two phase commit is used when both the database and application server message queues must be updated together. If one rolls back, the other will too.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
DMS 013	The EES shall handle record locking (e.g., row, field, other) and record updating/committing.	S	Cúram uses optimistic locking for concurrency control. This means that more than one user can access a record at a time, but only one of those users can commit changes to that record. Once one user has modified the record, another user cannot modify it without first re-reading the latest version of the record.
DMS 014	The EES shall support indexing technology (multiple types of Indexing shall be available to tune performance of SQL statements).	S	DB2 standard index management and SQL tuning technologies are employed for this.
DMS 015	The EES must have the ability to support a variety of data model constructs including complex entity relationships and complex many-to-many relationships	S	The EES data model supports complex data model constructs including 1:1, (0)1:N, N:1(0), and N:N types relationships using Primary Key/Foreign Key constraints and link tables.
DMS 016	The EES shall provide the ability to optimize individual queries and support parallelizing a query to run on multiple CPUs at the same time to increase performance.	S	This is implemented as a standard feature of DB2.
DMS 017	The EES shall manage multiple query queue entries in parallel.	S	This is implemented as a standard feature of DB2.
DMS 018	The EES shall offer tools to manage and control disparate mixed workloads in a DBMS environment.	S	A supervisor worker can monitor and maintain workload for those workers that they are responsible for. Refer to requirements OPS 022 to OPS 026
DMS 019	The EES must have the ability to maintain security based upon defined roles.	S	The EES solution supports Role Based Access Control. Fine grained access control will be the responsibility of the individual solution components. High level access control (i.e. controlling access to the individual components) will be managed centrally in the EES Identity Management solution.
DMS 020	The EES must have data replication capabilities to external file formats or other RDBM Systems.	S	Provided by DB2 and InfoSphere Information Server.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
DMS 021	The EES shall have full, incremental and transaction log backup and recovery capabilities on both a regular schedule and an ad hoc basis, including redundant off-site backups.	S	Standard features of DB2. Data is also backed up locally, offsite on Tape, and a near real-time shadow database instance receives all Production Environment database updates at the contingency data center, using DB2's log shipping functionality,
DMS 022	The EES shall provide the capability to remain fully-functional during database backup windows.	S	Standard capability.
DMS 023	The EES must support geo-coded address data for the storage and retrieval of latitude and longitude coordinates.	S	The system property "curam.miscapp.geocode.enabled" allows for geocoding functionality to be enabled or disabled. Longitude and latitude details are included in the data that is recorded for a participant's address.
DMS 024	The EES shall assist the Department in developing procedures to ensure that specified data is archived and protected from loss, unauthorized access, or destruction.	S	This is part of our proposed Project and SDLC Plan.
DMS 025	The EES shall have the ability to extend the data model in a manner that is compatible with framework upgrades.	S	Due to the flexibility of the IBM Cúram product upon which the EES solution is based, any DHHS data that is not supported out of the box, can be added to EES and used for typical system processing such as driving workflow, seeding eligibility decisions, notifications generation, etc. The IBM Cúram product has been designed from the ground up to be extensible through configuration and modification, including extending the data model, in such a way that ongoing upgrades to the base product are possible. Refer to requirement GEN 066.
DMS 026	The EES shall have the ability within the base data model to store effective and expiration dates for items being tracked.	S	Effective dating of application data is an important and fundamental capability of the EES solution. All application data is dated. As change in circumstances occur, data is never changed in place, rather the current data record is end dated, and a new record is inserted with a contiguous start date.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
DMS 027	The EES shall have the ability to prevent the alteration of information that has been deemed as historical.	S	In the EES solution, data is never modified in place. Any attempt to modify effective dated data will result in a new record being inserted, linked to the previous record and the status of the previous record is updated to reflect that it has been superseded. Superseded records are never updated.
DMS 028	The EES shall have the ability to maintain the data model and associated dictionaries and generate appropriate DDL for local modifications and new releases of the product.	S	The EES data model is designed and modelled in a UML model. Cúram supplied generators will generate the DDL from this UML model, and will also generate a HTML based data dictionary that provides an up to date non-UML version of the EES data model. As the base UML model is extended to reflect DHHS data definitions, the Cúram generators will combine the provided extensions with the base model to produce a single set of DDL and a single data dictionary that represents the updated, DHHS specific data model.
DMS 029	The EES shall have the ability to gather and analyze database performance information and provide recommendations for improvement.	S	DB2 and PureApplication Server monitoring provide this capability.
DMS 030	The EES shall employ one defined set of data standards (e.g., consistent data schema, data element, data class, field lengths, data tables, view naming conventions).	S	The EES solution will be based on one defined set of data standards. These data standards are defined in the Cúram UML model (from which the DDL is generated). They will include standards relating to field types, field lengths, field format validations (e.g. date formats, money formats, regular expressions, etc.), field names, related pick-lists for drop down types.
DMS 031	The EES shall provide consistency and validity checks on data elements at the database level.	S	The EES solution employs Primary Key/Foreign Key pairs to ensure data consistency between related tables.
DMS 032	The EES shall provide a data history in accordance with state and federal law (7 years is the general requirement except where otherwise indicated).	S	Applicable data retention standards will be met. Physical disc provisioning accommodates projected long term needs.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
DMS 033	The EES shall provide the ability to archive records (i.e., remove from active system) based on administrator defined criteria.	M	A minor modification will be made to Cúram to migrate records from storage to archival storage, and to accommodate their restoration when needed.
DMS 034	The EES shall properly normalize or de-normalize all tables for efficient operation.	S	Data normalization and de-normalization is used in the EES database. The majority of the data on database will be normalized to third normal form. Denormalized data is used where appropriate.
DMS 035	The EES shall store all data (data, configuration, user, etc.) in a central repository.	S	All EES eligibility data, configuration data and user data will be saved in the central EES relational database.
DMS 036	The EES shall provide sharing of data among all parts of an integrated system.	S	Standard DB2 design, mediated by security design.
DMS 037	The EES shall store all data in industry-standard relational databases that use referential integrity rules.	S	The EES solution will store all data in an industry-standard relational database and will employ Primary Key/Foreign Key pairs to ensure the referential integrity of data.
DMS 038	The EES shall have the capability and capacity to maintain data as required by Nebraska and federal requirements as well as the DHHS electronic retention policy	S	The EES database will maintain the eligibility data as required by this RFP.
DMS 039	The EES should have the ability to support conceptual, logical and physical modeling.	S	The EES solution supports conceptual, logical and physical data modelling.
DMS 040	The EES should have the ability to reverse engineer, document, and inventory existing databases.	S	Provided by ER/Studio tool.
DMS 041	The EES should include metadata on all data fields stored in the database, web services, or indexed documents in the document library.	S	Metadata will be captured and maintained in the design tools ER/Studio, Rational System Architect.
DMS 042	The EES should provide the ability to return archived records to the active system based on user request and/or administrator defined criteria.	M	To be implemented as a functional requirement of the archival process.
DMS 043	The EES should provide the ability to configure a retention schedule for records and documents.	M	Requirement of the Archival process.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
DMS 044	The EES should provide automatic program checks for controlling data files, verifying correct processing, and ensuring data integrity.	W	A combination of DB2 functionality and job stream management using SmartCloud Workload Automation.
DMS 045	The EES should have the ability to retrieve data based on worker requests and retrieve the data and return it to the system within 24 hours.	M	Requirement of the Archival Design.

SOA Governance Infrastructure Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
GOV 001	The Enterprise Metadata Repository shall provide design-time governance in support of the service life phase, delivering key capabilities for the storage and management of an extensible set of metadata for number of composites, services, business processes, and other IT-related assets.	S	This functionality will be provided by WebSphere SOA Policy Gateway (WSRR - WebSphere Service Registry & Repository).
GOV 002	A Service Registry shall serve as an integration point for runtime tooling.	S	This functionality will be provided by WebSphere SOA Policy Gateway (WSRR - WebSphere Service Registry & Repository).
GOV 003	The SOA governance infrastructure should support the Service Bus in subscribing to new or modified assets.	S	WSRR and IBM ESB products are well integrated and WSRR artifacts can be used by IBM ESB products at run time out of the box.
GOV 004	The SOA governance infrastructure should facilitate composite applications in discovering updated endpoints and WSDL locations.	S	This will be implemented using the service end point lookup primitive/node in IBM ESB products.
GOV 005	As part of the SOA governance model, Runtime monitoring tooling should publish metrics to the Service Registry.	C	Requires a small amount of custom code to move the metrics to the Registry. This will be illuminated during formal Requirements Analysis.
GOV 006	The security policy manager for Web services shall allow for centrally defined security policies that govern Web services operations (such as access policy, logging policy, and load balancing).	S	Provided by a combination of WSRR and PureApplication management.
GOV 007	The ESB solution shall provide dynamic discovery and service level monitoring of all artifacts deployed in the Application Server.	S	Dynamic discovery as per GOV004. ITCAM will be integrated with the ESB to provide service level monitoring.
GOV 008	The Contractor shall define governance processes for the following domains:	S	Basic Project / SDLC Process. These processes will be defined:

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
GOV 009	<ul style="list-style-type: none">Service Portfolio Management	S	This functionality is provided by WSRR out of the box. The complete service life cycle can be defined and managed within WSRR.
GOV 010	<ul style="list-style-type: none">Services Technical Architecture	S	Rational System Architect and Document based.
GOV 011	<ul style="list-style-type: none">Service Design & Development	S	Rational System Architect and WebSphere will provide service design and development functionality.
GOV 012	<ul style="list-style-type: none">Configuration & Release Management	S	Will be provided using the IBM Rational Jazz Team Concert platform.
GOV 013	<ul style="list-style-type: none">Contract Management	S	Program Management governance process will define this.
GOV 014	<ul style="list-style-type: none">Service Monitoring & Control	S	Will be provided by utilizing the services of ITCAM
GOV 015	<ul style="list-style-type: none">Incident Management	S	During technical activities such as development, Rational Team Concert will provide for in-Team incident management. The functioning Environments will use Computer Associates Service Desk Module aka InfoPac for true ticket / problem management.
GOV 016	<ul style="list-style-type: none">Change Management	S	Will be provided by implementing the features provided by IBM Rational Team Concert.

Business Process and Case Management Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
CSE 001	The EES shall include business process management capabilities (e.g., roles, responsibilities, policies, procedures, approvals, deadlines, integrations, etc.).	S	SmartPro MedEE uses Cúram's Workflow Management System (WMS) which serves two main functions. The first is to support the automation of business processes. The second is to facilitate the routing of work among individuals and departments. The main components of this system are Workflow Process Definitions, the Workflow Engine, the Inbox and Task Management, and the Workflow Administration application (which includes the Process Definition Tool, PDT).
CSE 002	The EES shall provide process execution and state management.	S	The Workflow Engine performs and maintains the runtime execution of the workflow process definition (i.e. process enactment).
CSE 003	The EES shall interact/integrate with the case management components with Enterprise Data Management and Content Management Systems.	C	SmartPro MedEE will re-use the State's existing Hyland OnBase EDMS for Case Level Document storage and management. This real-time link between Cúram and Hyland will be established using the ESB layer, based on IBM's Integration Bus (aka Message Broker).
CSE 004	The EES shall enable collaboration.	S	Multiple users can work together in a controlled workflow. Users can communicate with each other as part of the workflow.
CSE 005	The EES shall enable BAM (Business Activity Monitoring) and event-based notifications.	S	The Workflow Management system supports Business Activity Monitoring and event driven notifications.
CSE 006	The EES shall provide simulation and optimization.	S	Workflow simulation and optimization is best executed on a pre-production system using a copy of the live production database.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
CSE 007	The EES shall provide a registry for process components.	S	SmartPro MedEE uses Cúram's Workflow Process Definition Tool (PDT) to create workflow process definitions. The PDT manages a registry of workflow process definitions and a library of business methods which are available for use by the workflow process definitions.
CSE 008	The EES shall provide robust Administration functions.	S	The Workflow Administration used by the EES provides functions which enable an administrator to monitor, control and manage process instances that are executed by the Workflow Engine.
CSE 009	The EES shall provide and/or integrate with a robust and easily configurable workflow engine.	S	The Workflow Engine used by the EES provides the runtime execution environment for a process instance. The Workflow Engine is pre-integrated into the EES solution. It can also be made available, as needed, for the workflow needs of external systems.
CSE 010	The EES shall include the capability to assign tasks to staff based on defined business rules.	S	Workflow processes will assign tasks to users when manual activities are executed. A manual workflow activity is a workflow step that requires human involvement (as opposed to an automatic activity that will be satisfied by the system itself). The logic in the workflow definition will determine when a manual activity is executed, and when it is, the allocation rules will determine which user, group of users or work queue should be assigned the task.
CSE 011	The EES shall include the capability to route work to the next person in a workflow based on process outcomes.	S	Workflow processes will assign tasks to users when manual activities are executed. If multiple manual activities are defined in the workflow definition then work will be routed to the next user as defined by the workflow definition logic.
CSE 012	The EES shall provide an automated method to balance workload based on user and work unit queues or skills and availability.	W	Modification effort required to implement automated workload balancing.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
CSE 013	The EES will provide a method to manually reassign workload based on user input.	S	The worker or supervisor can manually reassign workload.
CSE 014	The EES shall support e-mail (push) or on-line queries (pull) by a user for work that is in their queue.	S	When a task is assigned to a user, the user can view that task in their inbox. They can also optionally be notified by email that there is a task awaiting their attention.
CSE 015	The EES shall provide data validation rules to ensure data validity	S	All data input into EES is validated first for format and then for correctness using business validation rules.
CSE 016	The EES shall enforce workflow rules (with task checklists) to ensure that processes are completed correctly.	S	Workflow logic and allocation rules ensure that the workflow completes correctly and that work is assigned to the correct allocation targets (system, user, user group, work queue)
CSE 017	The EES shall improve management and staff accountability through the production of reports and/or electronic notifications which will alert users of pending and overdue work.	S	Electronic notifications are sent in the EES to users to alert them of task items such as pending and overdue work. Supervisors have a high level view of all users and tasks in a department via the Supervisor Workspace. In this workspace, supervisors can take action to improve staff workload management.
CSE 018	The EES shall provide for comprehensive case tracking as defined in requirements detailed during system configuration - minimally these requirements will include logging of task status, case and contact history, issues, etc.	S	SmartPro MedEE supports comprehensive case tracking. A case is a central concept in Cúram. All data related to a case is linked to the case home page and is viewable by a user with sufficient authorization. Workflow tasks associated with a case are directly linked to the case. The user can view a list of tasks associated with a case, and their status. The user can also link directly to a case from a task.
CSE 019	The EES shall track milestones and due dates and support notification of the appropriate parties about upcoming and overdue milestones.	S	Milestones are used to maintain due dates in EES. If a milestone is approaching or is overdue, workflow processing will informed a configured target (a user, user group or work queue).

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
CSE 020	The EES shall support multiple forms of electronics notification channels for external users (e.g. text, page, etc.).	M	SmartPro MedEE will notify consumers using their preferred communication format. Messages will also be delivered to the consumers account inbox, to support secure messaging. Refer to requirement ELG 011. The LifeRay Portal component of SmartPro MedEE will be used to deliver Social Media messages when desired, and will be interfaced to Cúram using the common ESB layer based on IBM's Integration Bus (aka Message Broker.)
CSE 021	The EES shall support a visual/modeling tool to define business process flows.	S	The Workflow Process Definition Tool (PDT) – provided within the Cúram administration application – is used to define and maintain workflow process definitions. The PDT allows a process definition to be visualized during design.
CSE 022	The EES shall be integrated and exposed via portal for citizens (100%) and key functionality for other users, enabling high usage of system within portal.	S	SmartPro MedEE uses Cúram's Universal Access portal for citizen access. Other users, such as case workers/administrators/etc, have access to the Cúram Worker portal.
CSE 023	The EES shall support standard business process definition languages.	S	Cúram Workflow is designed based on standards for workflow management that have been defined by the Workflow Management Coalition (WfMC). Workflow definitions are saved internally as XML documents.
CSE 024	The EES shall provide the capability to tie business rules to workflows.	S	The Workflow Engine directly uses business rules for routing and work allocation logic. Workflow and Rules can also be tied together through the execution of an automatic activity that executes the rules engine for a particular purpose.
CSE 025	The EES shall provide the capability to link a workflow to one or more workflows.	S	A process definition can include a sub-flow step which allows another process definition to be enacted as part of a parent process.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
CSE 026	The EES shall provide the capability to suspend and resume a workflow that is incomplete.	S	A workflow administrator has the ability to influence the execution of a running process instance through the Cúram Workflow Administration interface. This includes suspending and resuming a process instance.
CSE 027	The EES shall provide production of reports and/or electronic notifications to identify suspended workflows.	S	The state of a process instance can be monitored in the Workflow Administration Tool. A report of all workflows that have encountered errors and are therefore suspended is available.

Application/Transaction Monitoring and Logging Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
TNS 001	The EES shall log all system transactions and keep them easily retrievable and sortable.	S	The system and middleware tools generate these logs OOTB.
TNS 002	The EES shall detect major errors related to one or more components including loss of network connectivity, a database server going off line, or the application suffers an out-of-memory situation.	S	PureApplication management detects almost all in-server events. ITCAM monitors service and application availability and performance. Data Center Enterprise Management software monitors jobs, backups, and the network fabric, plus consolidates serious exception events from the server monitoring layers.
TNS 003	The EES shall detect less than desirable application performance, such as degraded servlet, database or other back end resource response times.	S	PureApplication Server and ITCAM monitor these resource and performance metrics. The PureApplication server self-tunes physical resources in an attempt to resolve any shortfalls, according to configured business rules. If it is unable to achieve its rules-driven goals, it alerts the Data Center's Enterprise Management system to trigger human intervention.
TNS 004	The EES shall have safeguards designed to ensure that configuration variables affecting the application and the back end resources remain at Department predetermined configuration settings.	S	Change and Configuration Management will enforce this.
TNS 005	The EES shall detect intrusion attempts by unauthorized system users.	S	The Data Center implements network and server based intrusion detection.
TNS 006	The EES shall monitor critical performance parameters such as response time, resource availability, CPU Utilization, etc.	S	PureApplication Server directly monitors these parameters, and attempts to self-tune physical resources to correct resource and performance shortfalls, following configured business rules. If the server is unable to self correct within the constraints it was given, it alerts the Data Center Enterprise Management system to trigger human intervention.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
TNS 007	The EES shall provide a holistic view of a wide range of application services and network services providing the ability to drill down to a level where the observations provide useful information and both real-time and snapshot views.	S	ITCAM and Network monitoring capture these metrics, which are forwarded to the shared Data Center Management Environment. This system provides tools for dashboard presentation, graphical presentation, and drill down into performance and related data, and information is made available to the State via a web portal.
TNS 008	The EES shall send alarms based on the monitored attributes; these can be escalated through E-Mail / SMS etc.	S	The Data Center Enterprise Management software provides this capability.
TNS 009	The EES shall provide information on the bottleneck in the system.	S	The monitoring environment provides this information.
TNS 010	The EES shall allow Department staff to perform admin activities through an intuitive user interface.	S	SmartPro MedEE will provide department staff with the Cúram Administration Suite A broad range of functions in the Cúram application can be administratively configured through an intuitive user interface including eligibility rules, workflow, question scripts, case audit selection queries, communication templates, batch processes, security role settings, etc.
TNS 011	The EES shall have the ability to create custom dashboards to empower the users.	S	The Data Center tools provide for customized reporting and dashboards, accessible through a web portal.
TNS 012	The EES shall allow for different roles for Users including Operators, Administrators, Managers etc.	S	SmartPro MedEE will support multiple user roles.
TNS 013	The EES shall allow for report generation and analysis for application troubleshooting and capacity planning.	S	The proposed EES fully satisfies the requirement as stated.

Enterprise Content Management Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
Document Management			
DOC 001	The EES shall provide the ability to capture EES-generated documents and store them at appropriate level (e.g. individual, case, program, application, various workflow/process).	C	Documents can be uploaded through Cúram and will be attached to participants, applications, cases, etc. Also any documents that come into the system through scanning will be linked to a Cúram object (Participant, Application, Case, etc.) through a call to a Cúram Web Service. Cúram will respond around the Web Service. Cúram will be integrated with the State's Hyland OnBase Document Management system using standard Hyland Web service access points, linked to SmartPro MedEE via the ESB, to manage scanned documents.
DOC 002	The EES shall provide the ability to store electronic forms (EES generated or 3rd-party generated forms).	C	Capability to be provided by the State's Highland OnBase system, interfaced with SmartPro MedEE via the ESB.
DOC 003	The EES shall enable indexing and searching of documents by a variety of user-defined metadata attributes.	C	Typically the meta data and indexing considered here would be the associated participant or case. Refer to requirement ELG 033.
DOC 004	The EES shall provide support for full text search.	C	Capability to be provided by the State's Highland OnBase system, interfaced with SmartPro MedEE via the ESB.
DOC 005	The EES shall provide built-in viewers/converters for a wide variety of file types.	C	Capability to be provided by the State's Highland OnBase system, interfaced with SmartPro MedEE via the ESB.
DOC 006	The EES shall provide digital rights management capabilities.	C	Capability to be provided by the State's Highland OnBase system, interfaced with SmartPro MedEE via the ESB.
DOC 007	The EES shall provide check-in/check-out functionality for electronic documents.	C	Capability to be provided by the State's Highland OnBase system, interfaced with SmartPro MedEE via the ESB.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
DOC 008	The EES shall provide notification features for files that are checked out (overdue, availability, etc.).	C	If using Cúram Workflow for notification features some effort will be required to call a Cúram Web Service from the Doc Mgmt solution to ensure the correct user or group of users are notified. Also see IMG005 and IMG008.
DOC 009	The EES shall ensure version control of documents as they are changed or modified.	C	Capability to be provided by the State's Highland OnBase system, interfaced with SmartPro MedEE via the ESB.
DOC 010	The EES shall allow rollback to a previous version of a document.	C	Capability to be provided by the State's Highland OnBase system, interfaced with SmartPro MedEE via the ESB.
DOC 011	The EES shall enable collaborative document creation and/or markup.	C	Capability to be provided by the State's Highland OnBase system, interfaced with SmartPro MedEE via the ESB.
DOC 012	The EES shall enable attachment of documents to e-mails and e-mail distribution lists.	C	Note requirement IER031 - integration with State email system, to be provided through the ESB.
DOC 013	The EES shall utilize the EES' authorization and access control for file level security.	S	See RSR085, MDM031 and IDT001.
DOC 014	The EES shall have the ability to, based on rules or context, automate the creation of indexing, meta data and overall taxonomy.	C	Capability to be provided by the State's Highland OnBase system, interfaced with SmartPro MedEE via the ESB.
DOC 015	The EES shall have robust bulk load and conversion features.	C	Capability to be provided by the State's Highland OnBase system, interfaced with SmartPro MedEE via the ESB.
DOC 016	The EES shall provide the capability to communicate natively with the document management API.	C	Cúram supports the CMIS open interface standard for integrating with document management systems.
DOC 017	The EES shall provide the capability to access the output of the document management system over the Internet and/or Intranet web sites.	S	SmartPro MedEE implements online access to policy, procedure, and training material via the LifeRay Portal.
DOC 018	The EES shall develop a user guide that can be accessed online and printed on demand.	C	The User guide will be developed, and will be accessible from SmartPro MedEE's LifeRay portal.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
DOC 019	The EES shall provide the capability for online access to policy and procedure and training materials.	W	SmartPro MedEE implements online access to policy, procedure, and training material via the LifeRay Portal.
DOC 020	The EES shall be integrated with document processing center workflow.	C	To be determined which system (Hyland or SmartPro MedEE) controls the workflow – both alternatives are possible. Refer to requirement DOC 008.
Imaging and Image Capture			
IMG 001	The EES shall accommodate multiple imaging locations.	S	State’s Hyland System feature
IMG 002	The EES shall integrate the Imaging and Document Management System with Nebraska’s Hyland On-Base solution.	C	ESB integration, Cúram is CMIS capable.
IMG 003	The EES shall provide the capability to access Nebraska’s Hyland On-Base solution to extract data to pre-populate index fields, and/or values on forms.	C	ESB integration, Cúram is CMIS capable.
IMG 004	The EES shall provide the capability to send and receive faxed and e-form documents, process the data and image directly into and out of the system including the ability to automatically send confirmation of transmission to the sender.	C	ESB integration, Cúram is CMIS capable.
IMG 005	The EES shall provide the capability for performing conditional routing that will send documents to a specific queue or inbox, either manually or electronically, based on preset conditions as defined by the User.	S	When a new document is received, a Cúram workflow will be triggered which will attempt to link the document image in the Document Management System to the correct case and individual in Cúram using scanned meta data. The workflow will attempt to do this automatically and without worker intervention. Where worker intervention is required the workflow will notify one or more workers, or a work queue, that the document image needs attention. Refer to requirements GEN 009 and OPS 013.
IMG 006	The EES shall provide the capability to store and view a multiple page document as a single document.	C	State’s Hyland system

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
IMG 007	The EES shall provide the capability to attach notes, annotations, e-mails and other documents to an original scanned document at any time without rescanning.	C	ESB integration, Cúram is CMIS capable.
IMG 008	The EES shall provide the capability to notify the user when a duplicate document has been received so the user can decide whether to use the previously received document, replace the existing document or store the new document separately.	W	SmartPro MedEE will notify a worker, group of workers or a work queue when a duplicate document is recognized. Both documents will be available for viewing and the worker can process the duplicate document accordingly. Configuration of workflow will be required.
IMG 009	The EES shall provide the capability to link imaged documentation together and link it to an individual and/or cases within Nebraska EES.	C	Refer to requirements GEN 009 and OPS 013 re linking docs to an individual or case.
IMG 010	The EES shall provide the capability to record user and workstation identification for each document processed, accessed or updated.	C	ESB Integration between Hyland and Cúram.
IMG 011	The EES shall provide the capability for documents to be grouped together during scanning based on user defined criteria.	S	Hyland capability.
IMG 012	The EES shall provide the capability to allow the User to manually remove, rescan and replace a previously scanned image or document(s).	S	Hyland capability.
IMG 013	The EES shall provide the capability to employ user-defined form/template, indexes and/or field values for recognition and retrieval of documents.	S	Hyland capability.
IMG 014	The EES shall provide the capability to validate data captured from specific fields on forms electronically read by OCR/OMR/ICR.	S	Hyland capability.
IMG 015	The EES will provide the capability to archive documents manually and/or automatically by user-defined criteria.	S	Hyland capability.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
IMG 016	The EES shall provide the capability for archived documents to be retrieved and re-indexed.	S	Hyland capability.
IMG 017	The EES shall provide the capability to permanently delete documents based on user defined criteria.	S	Hyland capability.
IMG 018	The EES shall provide the capability to interface with other imaging systems using industry standard interfaces and file formats.	M	Curam is CMIS capable; will use the ESB (IIB) to integrate.
IMG 019	The EES shall provide the capability to version multiple copies of scanned documents.	S	Hyland capability.
IMG 020	Scanners provided as part of the EES shall have the capability to scan at least 80 pages per minute.	S	Hyland capability.
IMG 021	The EES shall provide image retrieval response times within a maximum of two seconds for all documents stored in the system given a minimum level of bandwidth agreed during detailed requirements and EES configuration.	C	Cúram / Hyland Integration
IMG 022	Scanners provided as part of the EES shall provide the capability for simplex and duplex scanning.	S	Hyland Capability.
IMG 023	The EES shall provide audit trail functions with the ability to log every step in the process to a database for query and reporting purposes.	C	Refer to the Audit requirements section
Records Management			
REC 001	The EES shall automatically calculate transfer and destruction dates (and assign records ready for deletion to the appropriate review process for approval of final deletion) for all records in the retention schedules.	M	SmartPro MedEE will support retention schedules for paper records, including transfer and destruction dates. Modification required to support record retention schedules.
REC 002	The EES shall provide email notification of disposition results	M	SmartPro MedEE will email notification of disposition results. Modification required to support record disposition.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
REC 003	The EES shall include a workflow tool to support the records management process.	S	The Cúram Workflow component is included in the EES.
REC 004	The EES shall allow users to manually or automatically classify records or classified automatically based on a policy/rules engine.	M	SmartPro MedEE will enable users to manually or automatically classify records. SmartPro MedEE will support the ability to automatically classify records using the CER Rules Engine. Modification required to support records classification.
REC 005	The EES shall allow administrators and authorized users to create, apply, view or remove legal holds for individual or multiple records.	M	SmartPro MedEE will enable administrators and authorized users to create, apply, view or remove legal holds for individual or multiple records. Modification required to support legal hold processing for records.
REC 006	The EES shall have the capability to produce colored and bar-coded labels created for physical records.	M	SmartPro MedEE will enable a user to produce colored and bar-coded labels for physical records. Modification required to support label generation.
REC 007	The EES shall have the capability to check records in and out using barcodes, with adherence to security permissions and support the use of barcode scanners for the purpose.	M	SmartPro MedEE will support the capture and maintenance of record check in and check out status, by what user and when. Modification required to support this functionality.
REC 008	The EES shall have the capability to track all types and sizes of storage containers within storage locations.	M	SmartPro MedEE will track all types and sizes of storage containers within storage locations. Modification required to support this functionality.
REC 009	The EES shall have the ability for an administrator to create and maintain retention schedules.	M	Refer to requirement REC 001.
REC 010	The EES shall have the ability to create disposition, legal hold and audit reports for the records.	S	The SmartPro MedEE Reporting solution will support the required reports.
Web Content Management			
WEB 001	The EES shall provide content authoring capabilities including:•	S	Native features of LifeRay Portal implemented in SmartPro MedEE.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
WEB 002	<ul style="list-style-type: none"> Provide a structured container for the content (e.g. document) 	S	<p>This is out of box feature of Liferay WMS, in LifeRay you can Easily add and remove fields you want available to content creators and then dynamically move them around. This editor includes an entire suite of form controls you can drag and drop onto your structure.</p> <p>Further its provides template feature wherein with help of template script files it informs the system how to display the content within the fields determined by the structure. Web publishing works alongside Liferay Portal's larger collection of applications, which means that you can add in shopping cart functionality, visitor polls, web forms, community collaboration tools and more. Liferay Portal's OpenOffice/LibreOffice integration, allows users to convert the content to one of several formats:</p> <ul style="list-style-type: none"> DOC ODT PDF RTF SXW TXT <p>Everything is done with LifeRay's collection of easy-to-use tools with familiar rich-text editors and intuitive interface.</p>
WEB 003	<ul style="list-style-type: none"> Support reuse via Copy and Paste or "Save As" 	S	<p>LifeRay WMS has a strong and Rich WYSIWYG Editing with support reuse and copy paste content within a given text snippet/ content.</p> <p>The system also enable used of assets content,</p>
WEB 004	<ul style="list-style-type: none"> Tracking of changes to content within a container 	S	<p>Native features of LifeRay Portal</p>

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
WEB 005	<ul style="list-style-type: none">Drag-and-drop page layout	S	LifeRay comes with many layouts already defined; the administrator can modify the page layouts from the dockbar menu. Developers can create more and they can be deployed to your portal for your use. The overall functionality of managing page layout allows administrator, user or developer to drag and drop various portlets across the page layout Further, the portal customization feature provides
WEB 006	<ul style="list-style-type: none">Ability for collaboration by allowing the "single control" to transfer between authors, reviewers and authorizers	S	LifeRay CMS provide workflow feature functionality which enables the content creation process, allowing single control and collaborative content management. Apart from the workflow feature, LifeRay CMS's page customization and page permission feature enable users to manage the access and permission to define user controls.
WEB 007	<ul style="list-style-type: none">Real-time active collaboration allowing multiple authors to review and update the content in a container during the course of a shared session	S	The Kaleo workflow engine of Liferay supports ability to fork and create parallel activity enabling shared session.
WEB 008	<ul style="list-style-type: none">Standard templates to make authoring documents within certain parameters	S	LifeRay provides a template feature wherein with help of template script files it informs the system how to display the content within the fields determined by the structure. LifeRay comes with many layouts already defined. Developers can create more and they can be deployed to your portal for your use. Web publishing works alongside Liferay Portal's larger collection of applications, which means that you can add in shopping cart functionality, visitor polls, web forms, community collaboration tools and more.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
WEB 009	<ul style="list-style-type: none"> Facilitate the use of Microsoft Office creation tools to submit content directly into the WCM repository 	S	LifeRay provides integration with Microsoft Office® for content management and authoring , The system also provides OpenOffice / LibreOffice integration, allows users to convert the content to one of several formats DOC, ODT,PDF,RTF,SXW,TXT etc.
WEB 010	<ul style="list-style-type: none"> The bulk import and export of XML content for integration and migration 	S	Native features of LifeRay Portal
WEB 011	<ul style="list-style-type: none"> Reuse of content and templates to enforce a common "look and feel" and brand identity 	S	LifeRay WMS provide feature functionality to reuse media assets, content and leverage complex asset with its assets framework. Similarly structures and templates can also be re-used.
WEB 012	<ul style="list-style-type: none"> A flexible and extensible workflow to manage authoring review and approval of content across its life cycle 	S	LifeRay Portal includes a workflow engine called Kaleo. In Greek, Kaleo means "called ones," which is appropriate for a workflow engine that calls users to participate in a process designed for them. Kaleo workflow allows a user to define any number of simple to complex business processes/workflows, deploy them, and manage them through a portal interface. The processes have knowledge of users, groups and roles. You don't have to write a single line of code to accomplish this: all you have to do is create one XML document. And if you're a LifeRay EE customer, you get a graphical workflow designer which gives you a point and click interface to create workflows.
WEB 013	<ul style="list-style-type: none"> The ability to expire and retire content. 	S	LifeRay's WCM lets you define when your content goes live. You can determine when the content is displayed, expired and/or reviewed. This is an excellent way to keep your site current and free from outdated (and perhaps incorrect) information.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
WEB 014	The EES shall support the combination of text and other page elements, such as graphics, logos and buttons and multimedia, such as audio/video and Flash.	S	SmartPro MedEE's web-based portal is provided by Cúram and LifeRay. As such, the portal supports the combination of all typical web based components including graphics, text and multimedia. LifeRay has set of functionality that supports content management, layout definition, page creation, content creation that supports various media types. The Content Authoring WYSIWYG editor supports the platform also supports the use of various other editors namely ckeditor, fckeditor, tinymce etc. as part of content authoring capabilities of both CMS as well as portal functionalities.
WEB 015	The EES shall include the ability to support content in multiple languages.	S	SmartPro MedEE supports content in multiple languages. LifeRay supports multi-language as well as multi-site capabilities which can provide friendly URLs that are location-aware, and can be defined on a per-language basis. In addition to this, a default language can be set for each site.
WEB 016	The EES shall support multiple versions of the same site using the same WCM instance and repository.	S	LifeRay's Site Pages Variations functionality provides the capability to maintain various version of the page. Variations only affect pages and not the content, which means all the existing content in your staging site is shared by all your variations. In different site page variations you can have different logos, different look and feel for your pages, different applications on these pages, different configuration of these applications and even different pages. One page can exist in just one site page variation or in several of them.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
WEB 017	The EES shall display content targeted toward specific user profiles.	S	The EES portal is provided by Cúram. Cúram leverages a role-based web portal. Depending on the user role (Admin, supervisor, case worker, etc.) logged in to the system; a personalized workspace will be displayed. A workspace is a view that is specific to their role. In addition, a user's workspace can be customized based on user preferences. Such customization includes displaying particular pods in the user's workspace. Such pods include, My Queries, My Tasks, My Appointments, My Care Summary, Recent Notifications, etc. This customization is saved on the user's profile.
WEB 018	The EES shall target content based on visitor-supplied preferences	S	Outreach is a configurable rules-based capability that facilitates the display of targeted messages to client users based on information held about the individual. In addition, a worker's workspace can be modified to control what areas of functionality should be displayed by default, based on user preferences.
WEB 019	The EES shall personalize a site based on customer transaction data, apply personalization rules to elements smaller than pages and use perceived behavior employing mechanisms to assess the behavior of an individual user (known or unknown) in real time and enable choice of delivered content based on that analysis).	S	The EES will personalize what the client sees based on customer transaction data. For example if the user submits a Change of Address Life Event, their MyAccount home page can be configured to display related outreach information, such as Moving Companies that are available in the immediate area. The system can also prompt the user for related information, such as 'has your rent changed?' LifeRay portal and CMS supports feature functionality that allows content targeting based on user group, role and communities.
WEB 020	The EES shall provide reporting of:	S	Native features of LifeRay Portal
WEB 021	<ul style="list-style-type: none"> The status and history of a piece of content 	S	Native features of LifeRay Portal

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
WEB 022	<ul style="list-style-type: none">Content source and descriptive information	S	Native features of LifeRay Portal
WEB 023	<ul style="list-style-type: none">Timetable of release dates or content submission dates	W	Native features of LifeRay Portal
WEB 024	<ul style="list-style-type: none">User-definable audit reporting on an ad hoc basis for content	W	Native features of LifeRay Portal
WEB 025	<ul style="list-style-type: none">Active content page inventory	S	Native features of LifeRay Portal
WEB 026	The EES shall provide out-of-the-box log file analysis.	S	LifeRay uses Log4j extensively to implement logging for nearly every class in the portal. If you need to debug something specific while the system is running, you can use the control panel to set logging levels by class dynamically. The system provides an administrative console where logs are displayed in a paginated list based on categories with an ability to search through the logs.
WEB 027	The EES shall have the ability to find broken links and repair them.	S	Native features of LifeRay Portal
WEB 028	The EES shall have the capability to track and report on-site use and demographics.	W	LifeRay includes built-in support for usage reporting.
WEB 029	The EES shall provide content publication capabilities including:	S	Native features of LifeRay Portal
WEB 030	<ul style="list-style-type: none">Support in-context (what you see is what you get [WYSIWYG])	S	Web publishing works alongside LifeRay Portal's larger collection of applications, which means that you can add in shopping cart functionality, visitor polls, web forms, community collaboration tools and more. Liferay has a rich WYSIWYG where it show in-context editing and page creation.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
WEB 031	<ul style="list-style-type: none">• editing and the ability to preview rendered content in a staging area.	S	Staging is an important feature of LifeRay WCM. The concept of staging is a simple one: you can modify your site behind the scenes and then publish all your updates in one shot. Liferay provides site administrators with two different ways to set up staging: Local Live and Remote Live. With Local Live staging, both your staging environment and your live environment are hosted on the same server
WEB 032	<ul style="list-style-type: none">• verify content for hygiene (for example, accessibility, spelling, format validation, privacy, security, speed of deployment)	S	LifeRay Portal gives you great control in managing when, and for how long, your web content is displayed on your web site. Additionally, you have the ability to determine when your content should be reviewed for accuracy and/or relevance. This makes it possible to manage your growing inventory of content.
WEB 033	<ul style="list-style-type: none">• Publish to multiple locations and channels based on predefined attributes	S	Native features of LifeRay Portal
WEB 034	<ul style="list-style-type: none">• Roll back content publication if unsuccessful	S	Staging Page publication enables administrator to work on new changes and releases of the portal content, Manage page variation across versions, LifeRay provides an ability to undo/redo.
WEB 035	<ul style="list-style-type: none">• Automatically publishing on a scheduled date	S	LifeRay's WCM lets you define when your content goes live. You can determine when the content is displayed, expired and/or reviewed. In LifeRay you can use the functionality of scheduling content to automatically publish content
WEB 036	<ul style="list-style-type: none">• Support dynamic and event-driven presentation of content	S	Native features of LifeRay Portal

Identity Management Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
IDT 001	The EES shall provide APIs/Connectors to integrate with a variety of 3rd party/custom applications to provide single sign-on.	S	SmartPro MedEE's general portal component, LifeRay Portal, provides these connectors OOTB.
IDT 002	The EES shall enforce a limit of (configurable) consecutive invalid access attempts by a user.	W	Configured in States' AD for State Internal Users and in Cúram for External Users. LifeRay honors these underlying sources of User Authentication.
IDT 003	The EES shall protect against further, possibly malicious, user authentication attempts using an appropriate mechanism (e.g. locks the account/node until released by an administrator, locks the account/node for a configurable time period, or delays the next login prompt according to a configurable delay algorithm).	W	Configured in States' AD for State Internal Users, and in Cúram for External Users.
IDT 004	The EES shall provide an administrative function to reset passwords.	S	AD & Cúram native feature.
IDT 005	The EES shall not display passwords while being entered.	S	SmartPro MedEE does not display passwords during entry.
IDT 006	The EES shall provide only limited feedback information to the user during the authentication.	S	SmartPro MedEE does not leak extra information back during user authentication. For example, SmartPro MedEE does not distinguish to the client if they have a wrong ID or a wrong password – merely that the logon attempt was not successful.
IDT 007	The EES shall support case-sensitive usernames that contain typeable alpha-numeric characters in support of ISO-646/ECMA-6 (aka US ASCII).	S	SmartPro MedEE supports case-sensitive usernames containing typeable characters from these character sets.
IDT 008	The EES shall allow an authenticated user to change their password, automatically when possible, consistent with password strength rules.	W	Configured in States' AD, and in Cúram for External Users.

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
IDT 009	The EES shall support password strength rules that allow for minimum number of characters, and inclusion of alpha-numeric complexity.	W	Configured in States' AD, and in Cúram for External Users. Enforced by SmartPro MedEE.
IDT 010	The EES shall support case-sensitive passwords that contain typeable alpha-numeric characters in support of ISO-646/ECMA-6 (aka US ASCII).	W	SmartPro MedEE supports case-sensitive passwords containing typeable characters from these character sets.
IDT 011	The EES shall use either standards-based encryption, e.g., 3DES, AES, or standards-based hashing, e.g., SHA1 to store or transport passwords.	W	Configured in States' AD, and in Cúram for External Users.
IDT 012	The EES shall prevent the reuse of passwords previously used within a specific (configurable) timeframe, or shall prevent the reuse of a specific (configurable) number of the most recently used passwords.	W	Configured in States' AD, and in Cúram for External Users.
IDT 013	The EES shall meet:	C	Active Directory/SSO Solution(s)
IDT 014	<ul style="list-style-type: none"> CMS E-Authentication Assurance Levels 	C	Met by AD and Cúram.
IDT 015	<ul style="list-style-type: none"> NIST 800-63 guidance <ul style="list-style-type: none"> Level 1: Single factor authentication, Identity proofing relies on subscriber's own assertions Level 2: Single factor authentication, requires verifying the individual's financial account information, and other information Level 3: Multifactor authentication, requires verifying the individual's financial account information, and other information Level 4: Multifactor authentication, In-person proofing is required Tokens (typically a cryptographic key or password) for proving identity, 	C	Met by AD and Cúram.
IDT 016	<ul style="list-style-type: none"> Identity proofing, registration and the delivery of credentials which bind an identity to a token, 	C	Performed by the Portal/SSO

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
IDT 017	<ul style="list-style-type: none">Remote authentication mechanisms, that is the combination of credentials, tokens and authentication protocols used to establish that a claimant is in fact the subscriber he or she claims to be	C	A Cúram function for external users; requires integration with SSO.
IDT 018	<ul style="list-style-type: none">Assertion mechanisms used to communicate the results of a remote authentication to other parties.	C	Details to be determined in Requirements Analysis
IDT 019	The EES should re-authenticate the user before any access to Protected Health Information (PHI) or other sensitive or confidential information is allowed, including when not connected to a network (e.g. on unconnected mobile devices).	M	z will re-authenticate the user before the user accesses any PHI data. Modification required to support this requirement.
IDT 020	The EES shall encrypt storage of all passwords using a one-way hash or other equivalent functionality to minimize damage from a security breach.	S	Standard for both AD's & Curam's directory stores.

any requirements that the Bidder cannot attest to full compliance; i.e., provides a value of “N” in the Ability Code field of the Appendix B Functional Requirements Traceability Matrix or Appendix C Non-Functional Requirements Traceability Matrix, must document the requirement gap as outlined in this Appendix.

The Bidder must ensure that the Gap Analysis Matrix contains an entry for each requirement where one or more of these conditions are true:

1. The Bidder has indicated “N” to Compliant in either RTM
2. The Bidder has indicated an M or C and indicated that 1,000 or more hours will be needed to meet the requirement as documented in the EES description in the RTM.

For each requirement gap, the Bidder must follow the instructions in this Appendix. The Bidder must copy exactly the Identifier, Requirement Description, and Ability Code from the RTM to ensure linkage between the RTM and the Requirement Gap Analysis Matrix.

The Bidder must provide an assessment of the requirement gap, including an estimate of its impact or severity if not compliant, and the steps necessary to close the gap and achieve full compliance. For system and/or product features that will support the requirement and close the gap, the Bidder must also provide an estimated date when the capability will be available as part of the Bidder’s baseline capability.

Bidders are required to use the following Gap Analysis instructions:

Column Description	Bidder Responsibility
Identifier	The unique identifier of the requirement which does not have a compliant solution according to the criteria established in either Appendix B Functional Requirements Traceability Matrix or Appendix C Non-Functional Requirements Traceability Matrix. Copy the requirement identifier from the applicable RTM.
Requirement Description	Copy the requirement description from the applicable RTM for the requirement identified above.
Ability Code	Copy from the RTM for the requirement identified above.
Impact/Severity (Product development or integration effort to fulfil the requirement)	High (H) = >2500 hours Medium (m) = >1000 hours to <2500 hours Low (l) = <1000 hours
Gap Description	Provide a description and analysis of the gap.
Recommendation for Closure	Recommended steps provided by the Bidder to close the gap and achieve full compliance with the requirement.
Date Available	Date to be published for release to baseline capability (e.g. available to installed EES base) per recommendation for closure above.

Appendix D Gap Analysis

Identifier	Requirement description	Ability Code	Impact severity	Gap Description	Recommendation for Closure	Date Available
RPT 017	The EES shall provide a comprehensive reporting solution that will generate standard operating, pre-defined or operational reports without an adverse effect on system performance or response time.	C	H	Full details of EES reporting requirements are not specified in the RFP. Requires analysis, implementation, and testing.	Our project plan includes all the steps to finalize reporting requirements with the State, and to design, implement, and test within the development phase. This capability will be predominantly implemented under the Cognos BI subsystem, drawing upon the Data Warehouse and DataMarts of SmartPro MedEE.	3/19/2015 (Closed within initial implementation)
OPS 001	The EES shall create easy, efficient, and accurate interfaces with other systems, including the federal data hub, state and other data sources to verify application information	C	H	EES requires the implementation of numerous interfaces, both batch and real-time. Cúram comes with the Federal Hub OOTB. Other interfaces will require analysis, design, and implementation.	We've included the necessary time and resources in our project plan to fully deliver all required interfaces between SmartPro MedEE and State, Federal, and Private organizations. The ESB (IIB) and Connect:Direct tools will be used as the basic framework for interface implementation.	3/19/2015 (Closed within initial implementation)

Identifier	Requirement description	Ability Code	Impact severity	Gap Description	Recommendation for Closure	Date Available
OPS 008 GSR 011	Integrated document imaging The EES shall leverage an electronic document management system that is integrated with the workflow engine to support the storage and retrieval of document images associated with member and eligibility and enrollment processes.	C	M	We are proposing reusing the State's Hyland OnBase Image and Document Management system for image and EDMS. This requires the development of the necessary interface to support transfer of index information and retrieval of images.	This interface will be fully designed and implemented within the project's DDI phase, using HyLand's published Web Services interface and SmartPro MedEE's ESB capability to provide the technical connection required. Cúram will be modified to store and manipulate the required indices, and to invoke Hyland functions for image storage and retrieval as required.	3/19/2015 (Closed within initial implementation)
AUD 009	The EES shall support logging to a common audit engine using the schema and transports specified in the Integrating the Healthcare Enterprise (IHE) Audit Trails and Node Authentication (ATNA) profile, Audit Log specification.	C	H	EES requires a single common audit trail, across multiple components. The multiple components of SmartPro MedEE do not commonly support this common engine.	This common audit engine will be implemented as part of the primary DDI, deriving its source data from the components of SmartPro MedEE.	3/19/2015 (Closed within initial implementation)
MDM 002	The EES shall create and manage a central, database-based EES or index of record for master client (i.e. Master Client Index [MCI]) and master provider (i.e. Master Provider Index [MPI]) data.	M	H	Cúram incorporates the concept of single identifier, single point of view OOTB. However, the actual conversion and interface components must be design, implemented, and tested.	Cúram, combined with InfoSphere MDM will provide the solution framework. This task accommodates the requirements finalization, design, development, and testing of the necessary conversion and interface elements required of MDM.	3/19/2015 (Closed within initial implementation)

Identifier	Requirement description	Ability Code	Impact severity	Gap Description	Recommendation for Closure	Date Available
RLE 024	Truth maintenance to support parallel rule execution	N	H	CER Rules is not a TMS (Truth Maintenance System). Truth Maintenance is an advanced inference feature that is not required for eligibility determination.	Since 1990, the Cúram Social Program Management platform has been implemented in the United States 19 times. In each of these implementations, there has not been a business need for either TMS or Inductive Reasoning to make eligibility determinations. Cúram's integrated Rules Engine is highly configurable and, in fact, more tailored to the needs of the state than competitive platforms: the Cúram rules engine solution was built with the social services community in mind.	
RLE 026	Inductive and deductive problem sets supported	N	H	CER Rules support deductive reasoning only.		

Proposal to Provide Nebraska Medicaid Eligibility and Enrollment Solution

Prepared for:

State of Nebraska Administrative Services
Material Division Purchasing Bureau

Submitted in Response to RFP: 4544Z1

January 21, 2014

Pricing Summary

1. Pricing Summary

As required by State of Nebraska, Wipro proposes fixed price cost “SmartPro MedEE” solution for Nebraska Medicaid Eligibility and Enrollment System.

Proposed “SmartPro MedEE” solution is expected to be ready for use by April 2015. This provides State of Nebraska an opportunity to use and stabilize new system 9 months in advance, at no extra cost to State of Nebraska.

Wipro “SmartPro MedEE” solution leverages state of the art “IBM PureApplication™”, which has hardware and software bundled in a box. Proposed fixed price to state includes bundled hardware and software price of “IBM PureApplication™”.

Wipro proposes an attractive economical fixed price of **\$79.87Million** for EES project, as per project description by State of Nebraska in the section “IV. PROJECT DESCRIPTION AND SCOPE OF WORK” of RFP, starting in March 2014 and ending on Dec 31, 2023.

Table 1 provides a summary of fixed price cost proposed for “SmartPro MedEE” solution.

Table 1: Summary of fixed price cost

Sequence Number	Description	fixed price cost
1.	Design Development Implementation (DDI) Phase, including 9 months of new system advanced use and stabilization of system. Duration: March 2014 to December 31, 2015	\$38,760,000
2.	4 Years of post-implementation support - maintenance & operation, hosting and disaster recovery, including 6 months of warranty for services and 4 years of warranty support for software. Duration : January 01, 2016 to December 31, 2019	\$19,688,696
3.	2 years of post-implementation support – maintenance & operation, hosting and disaster recovery, software defect fix services. Duration: January 01, 2020 to December 31, 2021	\$10,710,652
4.	2 years of post-implementation support – maintenance & operation, hosting and disaster recovery, software defect fix services. Duration: January 01, 2022 to December 31, 2023	\$10,710,652
5.	EES project Duration: March 2014 to December 31, 2023	\$79,870,000

Prices

2. Prices

All fixed price quoted on this “Cost Proposal” document are net inclusive of transportation and delivery charges fully paid by Wipro delivered supplies/services F. O. B. (Free On Board) destination named in the Request for proposal by State of Nebraska.

Table2 through Table6 in this section provides details of fixed price cost proposed for supplies and services, price for various parts of software/hardware.

Table 2: Prices for supplies/services

Description	FIXED price cost
IBM Cúram License and 12 months software support and subscription (S&S)	\$4,500,000
IBM Cúram 105 months software support and subscription (S&S)	\$9,643,374
IBM PureApplication™ appliance install, 12 months support and subscription (S&S)	\$1,760,350

Fixed Hourly Rates

3. Fixed Hourly Rates

Wipro will provide support for solution change projects, as required by State of Nebraska.

- a. Wipro will provision 1000 total hours of annual work to be performed by Wipro's change management staff(s) in each calendar year of operation.
- b. Wipro's change management staff will use these 1000 hours to work on solution change project(s) approved by State of Nebraska. No other staff time such as vacation, sick leave, training etc. will be applied against the annual 1000 hours allocated for working on change project(s).
- c. Wipro's change management staff(s) will track; record and report hours spent working on system change project. If any Wipro staff working under fixed administrative fee services spends effort on system change project, effort spent by such staff on system change project will be tracked; recorded and reported to State of Nebraska.
- d. At the completion of system change project, Wipro will charge for time spent by change management staff on the system change project, at the hourly rates included in this cost proposal section.
- e. Wipro will provide additional staff resources to work on the system change projects, as required by State of Nebraska. Additional staff will be provided on the hourly rate as per this cost proposal and number of resource for each role as described in contract amendment to acquire additional staff.

ADDENDUM THREE

DATE: February 11, 2014
 TO: All Vendors
 FROM: Peter Kroll/Robert Thompson, Buyers
 State Purchasing Bureau
 RE: Revised Schedule of Events for RFP Number 4544Z1

REVISED SCHEDULE OF EVENTS

The State expects to adhere to the tentative procurement schedule shown below. It should be noted, however, that some dates are approximate and subject to change.

	ACTIVITY	DATE/TIME
10.	“Oral Interviews/Presentations and/or Demonstrations” (if required)	January 27, 2014 February 10, 2014 To February 7, 2014 February 21, 2014 To Be Determined
11.	Post “Letter of Intent to Contract” to Internet at: http://das.nebraska.gov/materiel/purchasing/rfp.htm	February 14, 2014 February 28, 2014 To Be Determined
12.	Performance bond submission	February 21, 2014 March 7, 2014 To Be Determined
13.	Contract award	February 21, 2014 March 7, 2014 To Be Determined
14.	Contractor start date	March 3, 2014 March 17, 2014 To Be Determined

This addendum will become part of the proposal and should be acknowledged with the RFP.

ADDENDUM TWO

DATE: December 20, 2013

TO: All Vendors

FROM: Peter Kroll/Robert Thompson, Buyers
 State Purchasing Bureau

RE: Round Two Questions and Answers and Revised Schedule of Events for RFP
 Number 4544Z1 to be opened January 21, 2014 2:00 pm Central Time

Following are the questions submitted and answers provided for the above mentioned Request For Proposal. The questions and answers are to be considered as part of the Request For Proposal.

QUESTIONS	ANSWERS
<p>1. RFP Section Reference-N/A RFP Page Number-N/A</p> <p>What is the operational budget for Nebraska DHHS?</p>	<p>Please find information on Nebraska's budget, including DHHS, at: http://budget.nebraska.gov/</p>
<p>2. RFP Section Reference-IV.D and V.A.4.b.i RFP Page Number-38 and 108</p> <p>Paragraph IV.D states, "The EES' Functional Requirements are contained in the narrative of the RFP and in Appendix B. Bidders must become familiar with and respond to both."</p> <p>Question: Can you be more specific about the statement "contained in the narrative of the RFP"? Are the functional requirements referring to the EES Functional Components listed in the table on Page 32?</p>	<p>Yes. The reference is to the table entitled "EES Functional Components" on page 32.</p>

QUESTIONS	ANSWERS
<p>3. RFP Section Reference-I.A.7 RFP Page Number-1</p> <p>Will the State of Nebraska consider a four-week extension to the due date, making proposals due on February 4, 2014?</p>	<p>The Department will extend the due date for proposals 2 (two) weeks. All RFP events subsequent to the new due date will also move back two weeks. Please see the revised schedule of events posted with the responses to Round 2 questions.</p>
<p>4. RFP Section Reference-Cover & 1 - A RFP Page Number- I & 1</p> <p>Will the State consider a 3 week extension to give the vendors adequate time to respond based upon the information provided to the 2nd round for vendors' questions?</p>	<p>The Department will extend the due date for proposals 2 (two) weeks. All RFP events subsequent to the new due date will also move back two weeks. Please see the revised schedule of events posted with the responses to Round 2 questions.</p>
<p>5. RFP Section Reference-IV.I RFP Page Number-80</p> <p>Does the LINK Learning Management System (LMS) support the scheduling and tracking of class, CBT and on-line training?</p>	<p>Yes.</p>
<p>6. RFP Section Reference-IV.I RFP Page Number-80</p> <p>Does the LINK system provide qualification tracking as well as test results and certifications?</p>	<p>LINK provides test results and certification tracking, but does not provide qualification tracking at this time. Future enhancements to this system may meet this.</p>
<p>7. RFP Section Reference-V.A.1 RFP Page Number-104</p> <p>The RFP instructs the bidder to include "Form A" in combination with the "Terms and Conditions" from Section III.</p> <p>Which sub section of Section III - Corporate Overview should we include this information in?</p>	<p>Please include "Form A" in combination with the "Terms and Conditions" from Section III with the Technical Proposal as part of the "Request For Proposal For Contractual Services" section.</p>
<p>8. RFP Section Reference-IV.I Training RFP Page Number-79</p> <p>In many cases there are external stakeholders that will also require training such as providers, community partners, etc. Will the state require the vendor to train external providers? If so can the state provide a rough estimate?</p>	<p>No. The Department will not require external provider training.</p>

QUESTIONS	ANSWERS
<p>9. RFP Section Reference-BI and Reporting RFP Page Number-Multiple</p> <p>With the separation of the Medicaid Program (EES) and the other HHS programs (N-FOCUS) is the expectation that the BI and Reporting solution will integrate the data from these 2 systems and provide integrated reporting across all programs as needed?</p>	<p>No.</p>
<p>10. RFP Section Reference- e.Technical Components xviii RFP Page Number-50</p> <p>Please explain how Shared Analytics is different than Reporting and/or BI.</p>	<p>Shared Analytics is an overarching term to encompass various information domains, such as Business Intelligence (What happened?), Diagnostic Analytics (Why did it happen?), and Predictive analytics (What will happen?).</p> <p>Reporting is differentiated from shared analytics in that it is typically pre-defined and is focused on providing insight into operational aspects of the system as opposed to answering informational questions.</p>
<p>11. RFP Section Reference-Appendix B - Functional Requirements - Reporting RFP Page Number-B-12</p> <p>The requirement states: RPT 046 - The EES shall provide access to Query builder application. Please explain what the Query builder application is.</p>	<p>This requirement is looking for the bidder to provide query building capability within their solution.</p>

QUESTIONS	ANSWERS
<p>12. RFP Section Reference-I RFP Page Number-1</p> <p>We applaud the State for recognizing the value of a COTS-based solution and the importance of being able to take advantage of a clear upgrade path. We did not see COTS in the glossary of terms and COTS can sometimes have broad interpretations. For example, a transfer system that includes some elements of third-party products being referred to as a COTS. Given the various interpretations, could the State provide their definition of a COTS-based solution and what is required to be considered compliant?</p>	<p>The Department defines COTS as commercially available software that can be leased, licensed, or purchased by the general public and which can be tailored for specific uses through configuration as opposed to programming. COTS should require limited modifications and should receive regular maintenance over its lifespan.</p> <p>The Departments motivations for pursuing COTS include the potential for reduced overall system-development time, effort and costs (as components can be bought or licensed instead of being developed from scratch) and reduced long-term maintenance costs.</p> <p>The Department has not set a specific standard for compliance given the breadth of viable alternatives. The Department is open to considering solutions that range from being COTS in themselves to solutions that leverage COTS components.</p>
<p>13. RFP Section Reference-Section N. Provide Post Implementation Support RFP Page Number-83</p> <p>In order to provide the highest value solution to Nebraska is it acceptable to use service desk agents that are potentially shared with other clients?</p>	<p>Yes, as long as the bidder is able to provide the requirements defined in the RFP.</p>
<p>14. RFP Section Reference-Section N. Provide Post Implementation Support, Section 4, RFP Page Number-86</p> <p>In order to provide the highest value solution to Nebraska, is it acceptable to use a Service Desk ticketing platform (infrastructure and application) that is shared with other clients but would have a logically dedicated instance for Nebraska with all appropriate access / security controls necessary?</p>	<p>Yes, so long as the bidder is able to provide the requirements defined in the RFP and can satisfy all necessary security and privacy requirements.</p>

QUESTIONS	ANSWERS
<p>15. RFP Section Reference-Section I. Training RFP Page Number-77</p> <p>The RFP, it states "over 400 employees that perform Medicaid eligibility duties throughout the state"</p> <p>1. Can we get additional details on these programs these employees support?</p> <p>2. In addition to heavy workloads and turnover, what other specific training needs and concerns does the Department believe needs coverage in our response?</p> <p>3. Groups to be trained include medical eligibility employees, department partners and contact center staff -</p> <p>a. What roles are considered department partners, and will these staff be using the system to process items, or do they work in the system in a "view-only" capacity?</p> <p>b. What are the current duties of contact center staff?</p>	<p>1. The State has a dedicated workforce to support Medicaid eligibility.</p> <p>2 The Department expects the training to cover anything necessary for staff to effectively utilize the EES and satisfy all requirements as identified in the RFP.</p> <p>3a. Department partners are considered external or internal. External Department partners should have a limited role in the EES to allow benefit inquiry and do not require training. Internal Department partners, such as other agencies and contractors may require full access to the EES and training.</p> <p>3b. The customer service centers (CSC) answer phones, gather financial and demographic information, assess client's situations and make referrals for community resources if necessary, verify information utilizing interfaces/databases, prepare correspondence, and determine client eligibility and document actions.</p>
<p>16. RFP Section Reference-Appendix B RFP Page Number-19</p> <p>Regarding requirement ELG 031, is the state of Nebraska planning to retire any family Medicaid categories due to ACA? If so, which ones?</p>	<p>Not at this time.</p>

QUESTIONS	ANSWERS
<p>17. RFP Section Reference-F. Project Planning and Management RFP Page Number-51</p> <p>Regarding the sample plans requested throughout the RFP, is the following list sufficient to meet the state's requirements:</p> <ul style="list-style-type: none"> Scope Management Plan Requirements Management & Traceability Plan Issue Resolution Plan Risk Management Plan Configuration Management Plan Performance Management Plan Communications Management Plan Quality Management Plan Change Management Plan Detailed Design Documents Technical Design Documents Architectural Diagrams and Design Documents Network Diagrams Data Model Diagrams Requirements Traceability Matrix Business Rules Configuration Documents Test Plans User Cases or User Stories Business Design Documents Business Process Models Organization Change Management Plan Training Plan Courseware Knowledge Transfer Plan EES Canned Reports EES Standardized Reports Implementation Plan Disaster Recovery Plan 	<p>Bidders should comply with the requirements and specifications of the RFP.</p>

QUESTIONS	ANSWERS
<p>18. RFP Section Reference-Appendix B Page B-15 RFP Page Number-B-15</p> <p>Functional Requirement OPS 049 states "The EES shall associate a consumer notice related to the specific Cost Avoidance and Recovery area (CSE, TPL, HIPPS, ERU, and Medical Subrogation)." Please provide clarity on this requirement. Is this asking for generation of notices to clients? Is there a portion of this requirement that is missing?</p>	<p>Please see revised Appendix B 12/20/2013.</p>
<p>19. RFP Section Reference-Appendix B RFP Page Number-B-19</p> <p>Functional Requirement - ELG 031 states "The EES shall determine eligibility for all Medical Assistance programs." Will the state please provide a list of what constitutes all Medical Assistance programs?</p>	<p>Medical Assistance programs include: (Bidders should be aware this list is subject to change.)</p> <p>599 CHIP</p> <p>Enhanced Medical Assistance for Children</p> <p>Former Foster Children Medicaid</p> <p>CHIP</p> <p>Medicaid for AABD</p> <p>Medicaid for TANF</p> <p>Medicaid Insurances for Workers with Disabilities</p> <p>Medical Assistance for Children</p> <p>Medically Needy sub guardian</p> <p>Medicare Savings Programs</p> <p>Personal Assistance Services</p> <p>Pregnant Woman</p> <p>Presumptive Eligibility</p> <p>Qualified Medicare</p> <p>Ribicoff</p> <p>School Aged Medical</p> <p>Specified Low Income Medicare Beneficiaries</p> <p>Specified Low Income Medicare Beneficiaries</p> <p>Spousal Impoverishment Programs</p> <p>State 1619 B</p> <p>Waiver cases</p> <p>Women's Cancer Program</p>

QUESTIONS	ANSWERS
<p>20. RFP Section Reference-Appendix B RFP Page Number-B-3</p> <p>Functional Requirement - GEN 014 states "The EES shall support all Nebraska DHHS Medicaid programs." Will the state please provide a list of what constitutes all Nebraska DHHS Medicaid programs?</p>	<p>Medical Assistance programs include: (Bidders should be aware this list is subject to change.)</p> <p>599 CHIP</p> <p>Enhanced Medical Assistance for Children</p> <p>Former Foster Children Medicaid</p> <p>CHIP</p> <p>Medicaid for AABD</p> <p>Medicaid for TANF</p> <p>Medicaid Insurances for Workers with Disabilities</p> <p>Medical Assistance for Children</p> <p>Medically Needy sub guardian</p> <p>Medicare Savings Programs</p> <p>Personal Assistance Services</p> <p>Pregnant Woman</p> <p>Presumptive Eligibility</p> <p>Qualified Medicare</p> <p>Ribicoff</p> <p>School Aged Medical</p> <p>Specified Low Income Medicare Beneficiaries</p> <p>Specified Low Income Medicare Beneficiaries</p> <p>Spousal Impoverishment Programs</p> <p>State 1619 B</p> <p>Waiver cases</p> <p>Women's Cancer Program</p>

QUESTIONS	ANSWERS
<p>21. RFP Section Reference-Form D-2; Post Implementation Support RFP Page Number-121</p> <p>If a solution enables Post Implementation Support activities (M&O and Hosting & DR) to start earlier than January 1, 2016, how should bidders include the pricing for these services as the M&O 2015 pricing is currently grayed out in Form D-2? In this case, should bidders price only 48 months of M&O or 48 plus the additional months prior to 12/31/15? If additional M&O months are included in a bidder's proposal, how will the State ensure a fair price comparison occurs between bidders?</p>	<p>RFP Section IV.N Provide Post Implementation Support has been replaced and superseded in its entirety. RFP Sections IV.N.12 Warranty and RFP Section IV.N.13 Software Maintenance and Operations (M&O) have been revised. Please see RFP Revision 12/20/2013 Section IV. N – Provide Post Implementation Support.</p> <p>To ensure fair pricing comparison, all bidders should bid 48 months of M&O which should be recorded in Form D.</p>
<p>22. RFP Section Reference-Appendix B RFP Page Number-B-26</p> <p>Functional Requirement ELG 141 states "The EES shall provide a mechanism to match and replace the pseudo-SSN with the actual SSN." Our understanding is that the Federal Data Services Hub will not return an SSN for an applicant if the eligibility system doesn't send it. Can the State clarify the expected data source for SSN match and retrieval?</p>	<p>There are a number of potential sources ranging from the SSA service provided by the FDSH, data provided via an existing batch feed from the SSA, State data sources, and ultimately data sources provided by the applicant.</p>
<p>23. RFP Section Reference-Appendix B RFP Page Number-B-20</p> <p>Functional Requirement ELG 046 states "The EES shall refer cases with potentially fraudulent activity to appropriate agency". To which agencies will potentially fraudulent activity need to be sent?</p>	<p>The following agencies/departments play a role in fraud cases: Nebraska Attorney General Office, Medicaid Fraud and Patient Abuse Unit; and Nebraska Department of Health and Human Services, Child and/or Adult Protective Services; the Special Investigative Unit (SIU).</p>

QUESTIONS	ANSWERS
<p>24. RFP Section Reference-Appendix B RFP Page Number-B-28</p> <p>Functional Requirement APP 001 states "The EES shall support an electronic appeals process, which includes transmission of data to the Federal Hub, interfacing with document imaging, and a client web accessibility." Can the state please confirm what data needs to be sent to the federal HUB regarding appeals?</p>	<p>The specifics of the Appeals data interface with the FDSH and FFM has not been defined by CMS, and therefore the Department is unable to provide at this time.</p>
<p>25. RFP Section Reference-Appendix B RFP Page Number-B-30</p> <p>Functional Requirement APP 035 states "The EES shall have the ability for the customers to request for reconsideration to handle inquiries." Can the state please clarify what this requirement is asking for?</p>	<p>Please see revised Appendix B 12/20/2013.</p>
<p>26. RFP Section Reference-Appendix B RFP Page Number-B-29, B-30</p> <p>Regarding Functional Requirements APP – 017, 018, 031, and 048, we believe these requirements all relate to ACA and appealing a Marketplace Exchange eligibility determination. These determinations are made outside of the EES system. Is the State expecting citizens to be able to appeal and process non-EES determined eligibility in EES?</p>	<p>Nebraska's ACA mandated private insurance Exchange is operated by the FFM under an assessment model. The FFM performs eligibility determinations for advanced premium tax credit/cost sharing reduction (APTC/CSR) and also performs Medicaid eligibility assessments. Medicaid eligibility determinations are performed by Nebraska DHHS.</p> <p>Per Federal regulations, applicants can appeal Medicaid eligibility decisions and Federally Facilitated Marketplace (FFM) advanced premium tax credit/cost sharing reduction APTC/CSR eligibility decisions.</p> <p>The Department expects the EES to support eligibility appeals in two ways. First, it should support the Department in appeals of all Medicaid eligibility related decisions. Second, per ACA regulations, as an FFM assessment state, the State Department is required to coordinate support the FFM with all APTC/CSR eligibility appeals with the FFM as eligibility for APTC/CSR requires the applicant to be Medicaid ineligible.</p>

QUESTIONS	ANSWERS
<p>27. RFP Section Reference-Appendix B RFP Page Number-B-17</p> <p>Regarding requirement ELG 011, how many paper NOAs does the State have for Medicaid today?</p>	<p>The current system has a flexible template that can handle approval and denials in numerous combinations.</p>
<p>28. RFP Section Reference-V.A.3.i RFP Page Number-108</p> <p>Regarding the Integration Lead key personnel role, can the State please elaborate further on the expectations of the specific responsibilities of this role? Is this role the Implementation Lead role who would be responsible for the implementation activities (training, OCM, deployment, etc.) of the project? Or is this a technical integration role who would be responsible for the integration of all the various system components?</p>	<p>It is the latter. The Integration Lead is the technical integration role responsible for the integration of all the various system components.</p>
<p>29. RFP Section Reference- Appendix C: non Functional requirements RFP Page Number-9</p> <p>“The EES shall provide a mechanism to perform a QC sampling by maintaining the current functionality for sampling methodology”</p> <p>Can the state explain the technology involved in the current functionality of the sampling methodology for the purposes of appropriately estimating integration effort?</p>	<p>The Department’s current eligibility system, N-FOCUS, provides the ability to pull quality control samples in accordance with CMS required methodology. The bidder should describe and submit how their EES solution will provide sampling methodology consistent with CMS requirements.</p>
<p>30. RFP Section Reference- Appendix C: non Functional requirements RFP Page Number-18</p> <p>RSR 066 and IER 035 both state data and integration to IVR as requirements.</p> <p>Does the vendor have to propose an IVR system as part of the EES solution?</p>	<p>The use of an IVR is a key and integral part of how the Department currently supports the clients and will remain so in the foreseeable future. Therefore, the ability of the proposed EES to integrate with the existing IVR is highly desirable.</p>

QUESTIONS	ANSWERS
<p>31. RFP Section Reference- Appendix C: non Functional requirements RFP Page Number-21</p> <p>RSR 098 state “All sensitive data shall be encrypted in transit (including emails) to protect data confidentiality and integrity as appropriate based on the sensitivity of data.”</p> <p>Will the State provide access to the existing email server for the EES system to send or receive emails in encrypted manner? Or Will the State expect the vendor to setup separate e-mail server for this requirement as part of the solution?</p>	<p>The Department can provide access to the existing email system for the EES system to send or receive emails in encrypted manner. Vendors may set up their gateway to require encryption when sending to the State’s SMTP gateway or the State can set up a list of IP addresses to require a TLS connection. Email could also be encrypted using CRES, and every recipient would be required to register once and provide a password when opening the emails.</p> <p>A separate email system is not required so long as the emails can be routed/smarthost through the State’s SMTP gateway.</p>
<p>32. RFP Section Reference- Appendix C: non Functional requirements RFP Page Number-34</p> <p>IER 022 state “The EES shall ensure that dates across Nebraska systems remain in synch (e.g., a case’s closing or some other action)”.</p> <p>Can the State provide more clarification for this requirement?</p> <p>Would it be appropriate to interpret requirement to mean that the systems is required to capture the ‘date time zone’ such as PST, CST, GMT and maintain consistency across the solution?</p>	<p>While the need to address multiple time zones within the system is important, that is not the intent of the requirement.</p> <p>The requirement is focused on the ability of the proposed system to ensure that a case that crosses programs (Medicaid, SNAP, etc.) can be manage as a single entity, and therefore activities related to it are properly coordinated and synchronized.</p>

QUESTIONS	ANSWERS
<p>33. RFP Section Reference- Appendix C: non Functional requirements RFP Page Number-54</p> <p>There are requirements, including MDM 031 which refers to Active Directory for identification, authorization and role-based security. Additionally, requirement RSR 085 states “The EES shall provide the capability to integrate with existing authentication and authorization mechanisms (RACF on the mainframe).”</p> <p>Can the State clarify with more details if the solution should integrate with Active Directory, RACF, or both? If both, can further clarification of the circumstances under which each should be utilized, be provided?</p>	<p>The details of the answer to this question are driven by the solution proposed by the bidder.</p> <p>The Department can provide the following for the bidders to consider. The Department currently utilizes Active Directory as a source of authentication, authorization and security. RACF is used for authentication, authorization, and security on the mainframe.</p>
<p>34. RFP Section Reference- Appendix C: non Functional requirements RFP Page Number-68</p> <p>PRT 009 – requires syndicated content capabilities including creation and subscription to RSS feeds.</p> <p>Can the state clarify if this functionality is intended for citizen users, case worker users, or for both the categories of users?</p>	<p>While the specific uses of this functionality have not been determined at this time, the State anticipates that this functionality would be restricted to agents of the State for the foreseeable future.</p> <p>Bidders should use the base RFP narrative and functional requirements as the basis for determining what functionality to include in their proposed solution.</p>
<p>35. RFP Section Reference- Appendix C: non Functional requirements RFP Page Number-68</p> <p>PRT 012 – requires wiki and blog functionality.</p> <p>Can the state clarify if Is this functionality intended to be viewed by citizens, DHHS agency staff, or both the categories of users?</p>	<p>While the specific uses of this functionality have not been determined at this time, the State anticipates that this functionality would be restricted to agents of the State for the foreseeable future.</p> <p>Bidders should use the base RFP narrative and functional requirements as the basis for determining what functionality to include in their proposed solution.</p>

QUESTIONS	ANSWERS
<p>36. RFP Section Reference- Appendix B: Functional requirements. Notifications Requirements RFP Page Number-31</p> <p>NOT008 states: “The EES shall produce notices and forms in English and Spanish languages as required by the federal and State statutes, regulations, and policies “</p> <p>Can the State specify how many notices are expected to support this requirement?</p>	<p>All client correspondence shall be available in both English and Spanish.</p>
<p>37. RFP Section Reference- RFP 4544Z1 Eligibility and Enrollment Solution Nebraska: Section R RFP Page Number-100-101</p> <p>The Value Added Options specify in part (a) that the bidder should list the description of requirements, products or services necessary to successfully install and implement the Nebraska EES. In part (b) the bidder should list the description of requirements, products or services necessary to install and implement the bidder’s solution.</p> <p>As each requirement has been responded to elsewhere in the RFP, is it acceptable to provide only a description of capabilities and products to install any value-added components and reference the sections where the sections where the details of the requirements have already been provided?</p>	<p>RFP Section IV.R Value Added Options has been replaced and superseded in its entirety. Please see RFP Revision 12/20/2013 Section IV. R - Value Added Options.</p>

QUESTIONS	ANSWERS
<p>38. RFP Section Reference- RFP 4544Z1 Eligibility and Enrollment Solution Nebraska: SECURITY AND PRIVACY RFP Page Number-50</p> <p>RFP states that “The EES must be compliant with FedRAMP CSP, NIST-800-53 Rev 4 Federal Security controls, MARS-e requirements, and State of Nebraska Security and Privacy Policies”</p> <p>Is the State’s expectation for the data center is to be FedRAMP CSP compliant at the time of bid process or can this be procured during the implementation of this project?</p>	<p>The bidder is expected to achieve FedRAMP by production implementation. In the absence of formal FedRAMP compliance, the bidder must meet IRS Cloud Computing requirements, and State and DHHS Cloud Computing standards and policies.</p> <p>The bidder should refer to the latest version of IRS publication 1075, and should pay particular attention to sections on Cloud Computing (such as 7.4.1 Cloud Computing (45 day Notification Requirement), and 9.4.1 Cloud Computing Environment).</p> <p>See: http://www.irs.gov/pub/irs-pdf/p1075.pdf.</p> <p>Appendix A Bidders Library Content: Excerpt from DHHS IT Securing Hardware and Software Standard DHHS-2013-001-A. Please see Revised Appendix A 12/20/2013 Bidder Library Content.</p>
<p>39. RFP Section Reference- RFP 4544Z1 Eligibility and Enrollment Solution Nebraska: POST IMPLEMENTATION SUPPORT RFP Page Number-N/A</p> <p>What is the State’s requirement towards the desired support window for L1, L2 and L3 kind of support?</p> <p>Is it appropriate to assume the support window to be 8*5?</p>	<p>The Department considers these to be Service Levels that fall within the scope of Section IV.P on page number 98.</p> <p>It is not appropriate to assume the support window is 8*5. See RFP section IV.C.8 Capacity Planning for some guidance.</p>
<p>40. RFP Section Reference- RFP 4544Z1 Eligibility and Enrollment Solution Nebraska: General RFP Page Number-N/A</p> <p>Is the State currently using any ITIL tool for change, incident and problem management?</p> <p>If yes, please provide the details of the tools and indicate if the Vendor will be expected to re-use the existing tools.</p>	<p>The bidder is not expected to re-use the Departments existing tools used for change, incident and problem management.</p> <p>However, the vendor’s solution should provide accessibility and visibility to these capabilities and may need to integrate their functions with other solutions in the future.</p>

QUESTIONS	ANSWERS
<p>41. RFP Section Reference- RFP 4544Z1 Eligibility and Enrollment Solution Nebraska: Data Migration RFP Page Number-N/A</p> <p>Can the state provide the details of which Medicaid data domains are included in migration along with the number of tables and data elements to be migrated?</p> <ul style="list-style-type: none"> • Enrollment/Eligibility • Claims • Providers • Third Party Liability • Managed Care Plans 	<p>The primary focus of this project is on Eligibility and Enrollment (inclusive of plan selection).</p> <p>Please refer to the “Production Database by Table Size” for N-FOCUS table in Appendix A. N-FOCUS to EES conversion requirements have not been determined</p>
<p>42. RFP Section Reference- RFP 4544Z1 Eligibility and Enrollment Solution Nebraska: Data Migration RFP Page Number-N/A</p> <p>Can the State provide the details with respect to how many data marts are expected to be migrated?</p>	<p>This is a design detail that the Department considers to be best developed in the course of executing the project.</p>
<p>43. RFP Section Reference- RFP 4544Z1 Eligibility and Enrollment Solution Nebraska: Data Migration RFP Page Number-N/A</p> <p>In addition to EES, NFOCUS and Marketplace what are the other essential state of Nebraska systems considered part of migration?</p>	<p>For clarification, EES is the system that will be delivered through this RFP so it will be the target of the data migration as opposed to a source.</p> <p>Nebraska is using the Federally Facilitated Marketplace which will need to integrate with the EES. It is unlikely there will be the need to migrate any data from that system since it will continue to operate as it does currently.</p> <p>At this time, it is expected that it will be necessary to migrate data from N-FOCUS, and most likely some data migration from the MMIS to support the plan selection capability.</p> <p>Migration from other systems may be necessary based on details of the proposed solution(s) that are unknown at this time.</p>

QUESTIONS	ANSWERS
<p>44. RFP Section Reference- RFP 4544Z1 Eligibility and Enrollment Solution Nebraska: Data Migration RFP Page Number-N/A</p> <p>Is there a coexistence period defined by the state? (Where both old and new databases should be maintained and synched)</p>	<p>N-FOCUS supports eligibility and enrollment for programs other than those targeted for EES and will therefore remain an active system. We anticipate that it will be necessary for both databases to be maintained and synched for the foreseeable future.</p>
<p>45. RFP Section Reference- RFP 4544Z1 Eligibility and Enrollment Solution Nebraska: Data Migration RFP Page Number-N/A</p> <p>Can the State clarify, if all the data is required to be migrated or only data which would be older than a certain period can be archived?</p>	<p>The Department is required to adhere to the data retention policies set forth by CMS and the State of Nebraska. Currently, this requires that data be retained for a minimum of seven years.</p> <p>The data can be archived versus remaining active in operational and/or informational data stores are based on details of the proposed solution(s) that are unknown at this time.</p>
<p>46. RFP Section Reference- RFP 4544Z1 Eligibility and Enrollment Solution Nebraska: IVR, CTI RFP Page Number-N/A</p> <p>We understand that the state uses the custom CTI system supplied by the vendor E-metro Tel and it has softphone features and real time dashboard.</p> <p>Please clarify ;</p> <p>Is this CTI solution used by the agents across the entire 4 customer service center? Does this offer email and chat feature? Can we get more technical details about this solution ability to integrate with external systems e.g. does this support web-service integration?</p>	<p>The CTI application is used by all 4 DHHS call centers. The CTI feature does not accommodate an e-mail or chat feature. Currently the CTI does not support web service integration. Web service integration may be available in the future.</p>

QUESTIONS	ANSWERS
<p>47. RFP Section Reference- RFP 4544Z1 Eligibility and Enrollment Solution Nebraska: IVR, CTI RFP Page Number- N/A</p> <p>We understand there are 4 distributed customer service center currently in use.</p> <p>What is the current agent seating capacity per location?</p> <p>Approximately, how many calls are being currently handled by agents per location on a daily basis?</p>	<p>Two locations are specific to Medicaid eligibility. Those are the Lincoln CSC, which presently has 120 employees and the Lexington CSC, which presently has 60 employees. Freemont and Scotts Bluff locations are used to support non-Medicaid programs.</p> <p>Medicaid workers are currently handling approximately 2400 calls per day.</p>
<p>48. RFP Section Reference- RFP 4544Z1 Eligibility and Enrollment Solution Nebraska: IVR, CTI RFP Page Number- N/A</p> <p>Does the existing call center operations have telephony notification feature enabled? If yes, please share the appropriate component/infrastructure details</p>	<p>No.</p>
<p>49. RFP Section Reference- RFP 4544Z1 Eligibility and Enrollment Solution Nebraska: IVR, CTI RFP Page Number- N/A</p> <p>Would it be appropriate to assume that the existing voice infrastructure (MPS, CS1000, CTI, and QM) can be leveraged to build and host the new IVR, CTI applications?</p>	<p>Yes, if the bidder is able to meet or exceed the Departments requirements as identified in the RFP (functional and non-functional) by leveraging the existing voice infrastructure.</p>

QUESTIONS	ANSWERS
<p>50. RFP Section Reference- RFP 4544Z1 Eligibility and Enrollment Solution Nebraska: IVR, CTI RFP Page Number- N/A</p> <p>We understand the state has existing MPS, CS1000, and CCT as part of call center infrastructure.</p> <p>Please share the technical architecture diagrams that can provide insight in the following</p> <ul style="list-style-type: none"> • System redundancy, resiliency? • Whether these systems are centrally hosted and distribute calls to any of the 4 customer service center.45 • How these systems are centrally managed and what sort of reporting systems are available? 	<p>The existing CS1000/MPS/Contact Center are part of a centrally hosted infrastructure with a geographically redundant core located in Lincoln Nebraska. This centralized system supports all 4 DHHS call centers. These systems are centrally managed by the OCIO with contracts in place that utilize a Vendor and the manufacturer for additional support. Reporting is available utilizing the Avaya Aura Contact Center Manager reporting platform. Canned and custom reports provide various information, both historical and real-time, on calls in queue, hold times, averages, and agent performance.</p>
<p>51. RFP Section Reference- RFP 4544Z1 Eligibility and Enrollment Solution Nebraska: IVR, CTI RFP Page Number- N/A</p> <p>Can the State share the existing IVR application details?</p>	<p>The current IVR application provides benefit inquiry information and directs callers to various sites for service.</p>
<p>52. RFP Section Reference- RFP 4544Z1 Eligibility and Enrollment Solution Nebraska: IVR, CTI RFP Page Number- N/A</p> <p>Can the State share the existing method used by the state to record voice signatures for phone applications i.e. how the voice signature is stored, indexed and retrieved with other eligibility information?</p>	<p>Currently the entire phone application is recorded, including the signature, and kept on a mass storage device. Records are currently indexed by date/time of call and incoming phone number, making client specific retrieval difficult.</p>
<p>53. RFP Section Reference- RFP 4544Z1 Eligibility and Enrollment Solution Nebraska: IVR, CTI RFP Page Number- N/A</p> <p>Is the vendor expected to provide forecasting and scheduling module capability in the proposed solution?</p>	<p>Yes.</p>

QUESTIONS	ANSWERS
<p>54. RFP Section Reference- RFP 4544Z1 Eligibility and Enrollment Solution Nebraska: IVR, CTI RFP Page Number- N/A</p> <p>Is the State looking to integrate EES with CRQM solution?</p>	<p>Yes.</p>
<p>55. RFP Section Reference- RFP 4544Z1 Eligibility and Enrollment Solution Nebraska: General RFP Page Number- N/A</p> <p>Can the State please clarify if Hyland Onbase Document Management system license be reused for this project and whether it can be installed in the new data center?</p>	<p>The State's licensing for Hyland Onbase Document Management does not allow for installation in additional data centers beyond the State data center.</p> <p>If the use of Hyland Onbase presents a significant barrier to the bidder's solution, the Department asks the bidder to provide a description of the barrier and an alternative approach which will satisfy the remaining requirements.</p>
<p>56. RFP Section Reference- Addendum Round One Q_A RFP Page Number-32</p> <p>The State in the Q&A has confirmed that warranty for services will be for 180 days. Can the State please validate our understanding of the timeline for Warranty and Application Maintenance & Support?</p> <p>Warranty From 1-Jan-2016 till 30-Jun-2016</p> <p>Application Maintenance & Support From 1-Jan-2016 till 31-Dec-2019</p>	<p>RFP Section IV.N Provide Post Implementation Support has been replaced and superseded in its entirety. RFP Sections IV.N.12 Warranty and RFP Section IV.N.13 Software Maintenance and Operations (M&O) have been revised. Please see RFP Revision 12/20/2013 Section IV. N – Provide Post Implementation Support.</p> <p>The warranty period will run for 180 days beginning upon the production deployment of the full scope of the project.</p> <p>The Maintenance and Operation Support will begin at the expiration of the warranty period and will run for 42 months.</p>
<p>57. RFP Section Reference- RFP 4544Z1 Eligibility and Enrollment Solution Nebraska – IV – N – 1 – Production RFP Page Number-85</p> <p>At what time will the State be making the decision to host the production system with the selected contractor, or with another provider? If the state chooses to host the production systems with another provider, will the remaining environments (Sandbox, Configuration/Development, Testing, QA and DR) still be hosted with the contractor?</p>	<p>The production system will initially be hosted by the selected contractor, but the Department reserves the right to host the production system with another provider (including the Department or other State agency) at any time during the life of the contract. The Department will consider other provider capabilities and cost among other factors when considering the future hosting of the application. At the time another provider would host the production system it is anticipated that all remaining environments would also be hosted by the other provider.</p>

QUESTIONS	ANSWERS
<p>58. RFP Section Reference- RFP 4544Z1 Eligibility and Enrollment Solution Nebraska – Non-Functional Requirements Spreadsheet RFP Page Number-RSR 131</p> <p>What level of FIPS 140-2 will be required? (Level 1, Level 2, Level 3 or Level 4)</p>	<p>FIPS 140-2 Level 1</p>
<p>59. RFP Section Reference-A. REQUEST FOR PROPOSAL FOR CONTRACTUAL SERVICES FORM RFP Page Number-</p> <p>“Would the State favorably consider extending the Opening Date and Time by 2 weeks, until 21 January 2014?</p> <p>Little more than a week ago, RFP Amendment One revised Appendix A, Bidders’ Library Content, giving potential bidders expanded access to technical and other information. The amendment also answered important bidder questions that make possible several solution concepts that were precluded by the original RFP. This combination now enables bidders to propose solutions to provide the State short-term benefits and position the State to reach their longer term goals. However, unless given additional time, bidders may not be able to formalize and integrate these new amended solutions into a proposal based on the original RFP’s premise. A related factor is that bidders will otherwise have only 2 weeks after receiving Round Two answers and any related RFP amendment, which could further impact bidders’ ability to propose a solution in the State’s best interest. “</p>	<p>The Department will extend the due date for proposals 2 (two) weeks. All RFP events subsequent to the new due date will also move back two weeks. Please see the revised schedule of events posted with the responses to Round 2 questions.</p>

QUESTIONS	ANSWERS
<p>60. RFP Section Reference- Appendix B, Gen009 RFP Page Number-B-2</p> <p>Will the State support re-use of existing State Call Center capabilities for transmission and delivery of FAX, integrating it at the backend with EES? Or is a stand-alone FAX gateway within EES required?</p>	<p>The Department supports re-use of either the existing Call Center capabilities or the State Fax Gateway (RightFax) if the bidder is able to meet or exceed the Departments requirements as identified in the RFP (functional and non-functional).</p>
<p>61. RFP Section Reference- Appendix B, Table 2, Reporting Requirements RFP Page Number-B-9</p> <p>Can the State provide an estimate of the number of users of the Business Intelligence capabilities, especially users of on-demand reporting and analysis tools? Does the State have an estimate of the peak concurrent BI user base? Approximately how many State staff will require training in the BI capabilities of ESS?</p>	<p>The Department expects approximately 20 initial BI users with approximately 10 simultaneous users. All initial users are required to receive training.</p> <p>Bidders are cautioned however that the original user number could change based on the system proposed and the skill level required using the BI tools.</p>
<p>62. RFP Section Reference- Appendix C, RSR129; Appendix B, ELG123 (and various others) RFP Page Number-C-23, B-26</p> <p>The State requires EES to send and accept emails, referenced by several requirements disbursed throughout the RFP. Is it acceptable to the State if EES reuses existing State email capabilities as the mail server of record for all emails, public and internal, integrating EES to the State's email using a standard low-cost SMTP gateway connection carried over a secure data channel between the State's network and EES? Or does the State require EES to provide its own stand-alone email domain?</p>	<p>Yes, it is acceptable for EES to reuse existing State email capabilities using an SMTP gateway connection carried over a secure data channel between the State's network and EES.</p> <p>No, the Department does not require EES to provide its own stand-alone email domain so long as EES can route/smarthost all email generated for the State of Nebraska solution to the State's SMTP gateway.</p>

QUESTIONS	ANSWERS
<p>63. RFP Section Reference- Appendix C, Table 14, MDM RFP Page Number-C-52</p> <p>Master Data Management: does the State have an estimate of the quality of current master data, such as estimates of the percentage of duplication, percentage of "junk" data?</p>	<p>The Department has no such estimate.</p> <p>For client demographic data originating from N-FOCUS and CHARTS (refer to the answer to question 57 Addendum One), client identification information is verified via the Social Security Administration (SVES) interface. Additionally, N-FOCUS interfaces client demographics to CHARTS daily and CHARTS tracks and stores the N-FOCUS internal person (client) identifier which results in a reliable cross referencing mechanism between these two (N-FOCUS, CHARTS) client data sources.</p>
<p>64. RFP Section Reference- Appendix C, Table 14, MDM RFP Page Number- C-52</p> <p>Master Data Management: Are there presently any 3rd party external data quality services that are integrated into the current system that are in-scope and to be retained in EES?</p>	<p>No.</p>
<p>65. RFP Section Reference- Appendix C, Table 14, MDM RFP Page Number-C-52</p> <p>Master Data Management: Is any of the current master data unstructured, requiring parsing & interpretation? If so, can the State estimate the % of total master data that is unstructured?</p>	<p>Detailed, data element level data mastering requirements have not been determined at this time. However, the Department anticipates limited amounts of unstructured master data will be utilized.</p>
<p>66. RFP Section Reference- Appendix C, BIR005 RFP Page Number-C-57</p> <p>The State requires integration of predictive modelling and analysis with SPSS and SAS. Are SPSS and SAS in the current State toolset, or is that a plan for the future?</p>	<p>These tools are not actively utilized by the Department. They are being considered for the future.</p>

QUESTIONS	ANSWERS
<p>67. RFP Section Reference- Appendix C, BIR046 RFP Page Number-C-60</p> <p>The State requires support for geo-spatial data types. Does the State have an estimate of the number of reports that will require geo-spatial visualization?</p>	<p>The Department has no such estimates at this time.</p> <p>The Department can share that the Medicaid Eligibility and Enrollment system does not currently have this functionality.</p> <p>Bidders should use the base RFP narrative and functional requirements as the basis for determining what functionality to include in their proposed solution.</p>
<p>68. RFP Section Reference- Appendix C, PRT014 RFP Page Number-C-68</p> <p>Can the State provide an estimate of the number of surveys to be conducted annually, and the average and maximum number of participants per survey?</p>	<p>The Department plans to utilize surveys. No estimates are available at this time.</p>
<p>69. RFP Section Reference- Appendix C, PRT012 RFP Page Number-C-68</p> <p>Will authorship and editing of Wiki content be restricted to agents of the State, or does the State require opening this capability to the general public? Will blog authorship remain within the State, or does the State require opening authorship to the general public?</p>	<p>While the specific uses of this functionality have not been determined at this time, the State anticipates that authorship and editing would be restricted to agents of the State for the foreseeable future.</p> <p>Bidders should use the base RFP narrative and functional requirements as the basis for determining what functionality to include in their proposed solution.</p>
<p>70. RFP Section Reference- Appendix C, PRT015 RFP Page Number-C-68</p> <p>What are the State's estimates for the volumes (average daily and peak hourly) for Chat sessions; Instant Messaging? Can the State provide the high level functional use case for Chat and IM? For example, citizens communicating with the State's Help Desk.</p>	<p>At this time, the primary use case is to provide another avenue for support to our client base.</p> <p>Estimated volumes are not known at this time.</p>
<p>71. RFP Section Reference- Appendix C, PRT039 RFP Page Number-C-70</p> <p>What percentage of the total reports/dashboards does the State expect to access via mobile devices and tablets?</p>	<p>The Department has no such estimates at this time.</p>

QUESTIONS	ANSWERS
<p>72. RFP Section Reference- "RFP II.K - Evaluation of Proposals IV.O - Turnover" RFP Page Number-Page 6, Page 96</p> <p>Is a discussion of Turnover required in the proposal? The list of required proposal elements in RFP II.K (page 6) includes Turnover as required proposal response (in the table under c. Technical Proposal, item XVIII). Turnover is also described within the Statement of Work, but there does not appear to be any mention in RFP Part V as to where this discussion should be placed within the proposal.</p>	<p>Yes, a discussion of Turnover is a required component of the RFP.</p> <p>RFP Section V.A.4.c.xiii Turnover corresponds to RFP II.K.3.o and IV O. Turnover. Bidders should respond as required in RFP Section V.A.4.b.xiii.</p>
<p>73. RFP Section Reference- Project Overview RFP Page Number-Page 31</p> <p>The RFP states "The Department is looking for the EES and associated training materials to provide additional power for users, but with less training."</p> <p>Please explain the ""additional power for users"" statement. What is the power to be gained/realized that the training plan would address?"</p>	<p>The requirement is to enable users to quickly come up to speed on the EES with less training than the current system requires.</p>
<p>74. RFP Section Reference- RFP IV.C.6.a & b RFP Page Number- Page 38</p> <p>Browser Access & VPN Access: Is it safe to assume that all State employees and Agents accessing EES (as opposed to citizens) will access the non-public aspects of EES through the State's network, with traffic then passing over secured communications pipes between the State and EES? Specifically, for mobile State staff accessing non-public portions of EES from the public Internet, that they will connect to the State's front end/VPN and then be securely routed to EES?</p>	<p>The optimal network design to handle this communications traffic is dependent on details of the proposed solution(s) that are unknown at this time; therefore the Department is unable to confirm this assumption at this time.</p>

QUESTIONS	ANSWERS
<p>75. RFP Section Reference- RFP Section IV.I - Training RFP Page Number-Page 78</p> <p>The RFP states "The Contractor shall develop a Training Plan deliverable that addresses how the training needs of the EES users will be met, including but not limited to: Different user groups."</p> <p>Does the State have a list of user groups?"</p>	<p>User groups are currently defined by functional area. The Department is open to alternative methods of user classification based on the capabilities and business functionality of the EES solution selected.</p>
<p>76. RFP Section Reference- RFP Section IV.I – Training RFP Page Number-Page 78</p> <p>The RFP states "The Training Plan should provide training based on Department staff training needs including:</p> <ol style="list-style-type: none"> 1. Instructor Led (ILT); 2. Web-based Training (WBT); 3. Computer–based Training (CBT); and 4. On-line Help, On-screen tips and Training Aids." <p>Does the State have a preference of which "Department" staff need which type of training?</p> 	<p>No, the materials covered in training should dictate which method of delivery would be most appropriate to ensure accurate competency test completion and retention.</p>
<p>77. RFP Section Reference- RFP Section IV.I – Training RFP Page Number-Page 78</p> <p>The RFP states "The Training Plan should provide training based on Department staff training needs including:</p> <ol style="list-style-type: none"> 1. Instructor Led (ILT); 2. Web-based Training (WBT); 3. Computer–based Training (CBT); and 4. On-line Help, On-screen tips and Training Aids." <p>Can the State clarify what they see as the difference between WBT and CBT?</p> 	<p>In this context, Web based training utilizes the Internet for content delivery. Computer based training is software installed on a desktop computer.</p>

QUESTIONS	ANSWERS
<p>78. RFP Section Reference- RFP Section IV.I – Training RFP Page Number-Page 78</p> <p>The RFP states "The Contractor will work with the State of Nebraska to upload all the required materials into the LINK Learning Management System (LMS) or other approved location/tool."</p> <p>What version on the Cornerstone On Demand LMS is the state using? What are the standards for developing content in order to be playable on the State's LINK LMS?</p>	<p>Cornerstone is a cloud software application, which means that we are always using the latest version of the software. We have quarterly updates to the software each year.</p> <p>Online content must be SCORM or AICC compliant. We also ask that if online content is developed in/for the system, it at the very least have effective text accompaniment (closed captioning being ideal/desired). For ILT training, there is no formal requirement. We do ask that for sessions, reasonable accommodations be made for those employees who need it.</p>
<p>79. RFP Section Reference- RFP Section IV.I – Training RFP Page Number-Page 78</p> <p>The RFP states "The Contractor will work with the State of Nebraska to upload all the required materials into the LINK Learning Management System (LMS) or other approved location/tool."</p> <p>What are all the content formats that would be supported by the LINK LMS?</p> <p>For ex: Deployed Scorm, AICC, zip file, TinCan, File, IMS Pkg, SCORM package, URL, type of video files</p>	<p>Cornerstone supports SCORM and AICC, which are content standards for online content. Cornerstone will also house URLs, zip files, word processor files, PDFs, spreadsheets, and the following video content formats - .mpg, .mpeg, .wmv, .flv, .m4v, .mp4.</p>
<p>80. RFP Section Reference- RFP Section IV.I - Training RFP Page Number-Page 79</p> <p>The RFP states "The reports will include at a minimum the training classes planned for the next reporting period, training registration and training completion, the competency rate by office and trainer and the number of total training classes planned and delivered."</p> <p>What is the periodicity of the reports being referenced?</p>	<p>The periodicity can change depending upon circumstances. For example, annual training vs. new hire training.</p>

QUESTIONS	ANSWERS
<p>81. RFP Section Reference- RFP Section IV.I – Training RFP Page Number-Page 79</p> <p>The RFP states "The Plan must provide backup knowledge for a Department-determined period of time."</p> <p>What is "backup knowledge"? Is this referring to offline availability of training materials? Please explain.</p>	<p>"Backup knowledge" refers to the successful bidder providing knowledge to keep the EES and associated processes running until such time as the knowledge transfer activities have completed and the Department's staff are properly equipped to run the EES and associated processes.</p>
<p>82. RFP Section Reference- RFP Section IV.I – Training RFP Page Number-Page 80</p> <p>Of the roughly 400 State staff to be trained in ESS, what percentage of the staff, and what key roles (i.e. Supervisors, Admin, Management) would the State like to have trained before the commencement of UAT?</p>	<p>The Department expects only those users participating in UAT to be trained before UAT commences.</p>
<p>83. RFP Section Reference- RFP IV.P - Service Level Requirements RFP Page Number-Page 103</p> <p>Please clarify where within the proposal bidders are to include the State's proposal response needs pertaining to service level requirements.</p> <p>RFP Part IV.P (page 103) states ""The Bidder must submit a list of their standard Service Level Requirements for the EES as part of the proposal."" However, RFP Part V seems to be silent as to where the list should included, and we do not wish to appear non-compliant.</p>	<p>The Bidder must submit a list of their standard Service Level Requirements for the EES as part of the proposal. The Service Level Requirements should be included in Section V.A.4.c. Technical Considerations.</p>

QUESTIONS	ANSWERS
<p>84. RFP Section Reference- Appendix C, ESB015, ESB028 RFP Page Number-Round One Q&As, pg 47</p> <p>Answer 151 encourages re-use of the State's existing EDI gateway. What is the EDI gateway product? Does it suffice to fulfil the RFP's EDI requirements? Does it support HL7, CCD, RosettaNet, IHE XD* as required in the non-functional requirements? Are those requirements solid for this implementation, as Medicaid E&E does not appear to require their use at this time - building in support for unused non-functional requirements can increase system cost without providing a matching benefit.</p>	<p>The Departments existing EDI gateway products include Sybase EDI Gateway for batch exchanges, and Edifecs: XEngine Server, XEConnect, and SpecBuilder for real-time exchanges.</p> <p>The Department believes that these solutions are capable of meeting the EDI requirements set forth in the Non-Functional requirements that apply to the scope of the project.</p> <p>Given the investment that the Department is making in the EES, it considers the associated infrastructure, tools and platforms to be enterprise in nature. Therefore, from a non-functional functionality perspective, they are being evaluated against capabilities that transcend the Medicaid program.</p> <p>Bidders should use the base RFP narrative and functional requirements as the basis for determining what functionality to include in their proposed solution.</p>
<p>85. RFP Section Reference-Round One Q & As , Question 126 RFP Page Number-Q&A Page 38</p> <p>Does the State supplied equipment in its Training Centers include student PC's and networking that would allow students to access the vendor maintained ESS Training Environment, perhaps through the State's VPN? Are the Training Centers provisioned with a projector?</p>	<p>Networked PCs and projectors are available for in the Training Centers.</p>

QUESTIONS	ANSWERS
<p>86. RFP Section Reference Section IV, N, 12 RFP Page Number 91</p> <p>Please confirm the Department envisions the 4 year warranty period to run concurrently with the M&O period (CY 2016 - 2019). Because contractors' generally warrant systems to function as delivered for a short period of time after the system is delivered, will the Department please define what it envisions will fall under "warranty" vs. "M&O" work during the 4 year warranty period.</p>	<p>RFP Section IV.N Provide Post Implementation Support has been replaced and superseded in its entirety. RFP Sections IV.N.12 Warranty and RFP Section IV.N.13 Software Maintenance and Operations (M&O) have been revised. Please see RFP Revision 12/20/2013 Section IV. N – Provide Post Implementation Support.</p> <p>No, the warranty period and the M&O periods will not run concurrently. As described in the revised RFP sections, the Warranty will run for six-months and will include maintenance, modifications, and services to address failures, faults, "errors", and other defects related to the execution of the project and/or the design, development, configuration, and implementation of the solution. The activities related to warranty should be at no cost to the Department and therefore are not included in the cost proposal.</p> <p>M&O will commence upon the end of the Warranty period and will include everything initially covered by the Warranty, as well as, maintenance, modifications, and services needed to ensure that the solution, and its underlying environments, adapt to changes in policy, technology, and the industry and therefore remain current and functionally rich. M&O is part of the on-going costs and should therefore be included in the cost proposal.</p>
<p>87. RFP Section Reference Form D-2 RFP Page Number 121</p> <p>There is a column titled "warranty", the area to insert warranty price is grayed out until the start of the first option period (2020), what kind of warranty does the Department intend for the contractor to price during the option years (2020 – 2023)?</p>	<p>Those columns should have been grayed out; therefore bidders should leave them blank.</p> <p>The Departments expects that the terms of the software warranty will carry forward upon executing the option(s).</p>

QUESTIONS	ANSWERS
<p>88. RFP Section Reference Round 1 Q&A, Question 110</p> <p>The Department amended the warranty requirement to 180 days of warranty for Services and 4 years of warranty for Software. Will the State please define “services” and “software” within the context of the warranty?</p>	<p>RFP Section IV.N Provide Post Implementation Support has been replaced and superseded in its entirety. RFP Sections IV.N.12 Warranty and RFP Section IV.N.13 Software Maintenance and Operations (M&O) have been revised. Please see RFP Revision 12/20/2013 Section IV. N – Provide Post Implementation Support.</p> <p>The 180 days of warranty applies to both the services rendered during the DDI phase and post production deployment, and all components of the solution.</p> <p>M&O will commence upon expiration of the 180 days of warranty, and will apply to all components of the solution and any services rendered after the end of the warranty period.</p>
<p>89. RFP Section Reference Appendix C RFP Page Number C-85</p> <p>Could the State provide additional information about the rationale for records management system and if these requirements (REC 001-005 and REC 007-010) are imperative for the mission?</p>	<p>Given the investment that the Department is making in the EES, it considers the underlying technology; tools and platforms to be the basis of an enterprise architecture (see Technical Framework General 1.1). Therefore, from a non-functional functionality perspective, they are being evaluated against capabilities that transcend the Medicaid program.</p> <p>Bidders should use the base RFP narrative and functional requirements as the basis for determining what functionality to include in their proposed solution.</p>
<p>90. RFP Section Reference Appendix C RFP Page Number C-85 through C-87</p> <p>Could the State provide additional information about the rationale for a full Web Content Management System and if these requirements (WEB 001-013, WEB 016-28, and WEB 032-035) are imperative for the mission?</p>	<p>Given the investment that the Department is making in the EES, it considers the underlying technology, tools and platforms to be the basis of an enterprise architecture (see Technical Framework General 1.1). Therefore, from a non-functional functionality perspective, they are being evaluated against capabilities that transcend the Medicaid program.</p> <p>Bidders should use the base RFP narrative and functional requirements as the basis for determining what functionality to include in their proposed solution.</p>

QUESTIONS	ANSWERS
<p>91. RFP Section Reference c. System Security and Disaster Recovery RFP Page Number 44</p> <p>The RFP states that the bidder must describe the approach to development and implementation of security measures that will provide security and protection for POS terminals. Will the State please clarify what POS terminal is referring to?</p>	<p>In this instance POS stands for Point of Service.</p> <p>Examples are kiosks, terminals supported by the Department in county offices, and terminals not supported by the Department in locations such as Libraries.</p>
<p>92. RFP Section Reference Section IV.F.15 RFP Page Number 69</p> <p>Will the NE EES contractor be testing the interfaces using live systems or is there a test system or harness that the NE EES contractor will be using?</p>	<p>A definitive answer cannot be provided at this time since the details of which systems will be interfacing to the EES won't be determined until project execution.</p> <p>The major systems that are known integration points (N-FOCUS, MMIS, and FFM/FDSH) have either test systems or harnesses.</p>

REVISED SCHEDULE OF EVENTS

The State expects to adhere to the tentative procurement schedule shown below. It should be noted, however, that some dates are approximate and subject to change.

	ACTIVITY	DATE/TIME
5.	State responds to Round Two written questions through Request for Proposal "Addendum" and/or "Amendment" to be posted to the Internet at: http://das.nebraska.gov/materiel/purchasing/rfp.htm	December 20, 2013
6.	Last day to submit "Letter of Intent To Bid"	December 23, 2013
7.	Proposal opening Location: State Purchasing Bureau 1526 K Street, Suite 130 Lincoln, NE 68508	January 7, 2014 January 21, 2014 2:00 PM Central Time
8.	Review for conformance of mandatory requirements	January 7, 2014 January 21, 2014
9.	Evaluation period	January 8, 2014 January 22, 2014 to January 20, 2014 February 3, 2014
10.	"Oral Interviews/Presentations and/or Demonstrations" (if required)	January 27, 2014 February 10, 2014 To February 7, 2014 February 21, 2014
11.	Post "Letter of Intent to Contract" to Internet at: http://das.nebraska.gov/materiel/purchasing/rfp.htm	February 14, 2014 February 28, 2014
12.	Performance bond submission	February 21, 2014 March 7, 2014
13.	Contract award	February 21, 2014 March 7, 2014
14.	Contractor start date	March 3, 2014 March 17, 2014

This addendum will become part of the proposal and should be acknowledged with the RFP.

ADDENDUM ONE

DATE: November 26, 2013

TO: All Vendors

FROM: Pete Kroll/Robert Thompson, Buyers
 State Purchasing Bureau

RE: Round One Questions and Answers for RFP Number 4544Z1
 to be opened January 7, 2014 2:00 p.m. Central Time

Following are the questions submitted and answers provided for the above mentioned Request For Proposal. The questions and answers are to be considered as part of the Request For Proposal.

NOTE: State Purchasing is moving from December 16 through 27, 2013. Effective Monday, December 30, 2013, all bid/proposal openings will be held at our new location, 1526 K Street, Suite 130, Lincoln, NE.

QUESTIONS	ANSWERS
<p>1. RFP Section Reference Request for Proposal Scope of Service Cover Sheet RFP Page Number i Cover Page</p> <p>Will the State revise the RFP by replacing the sentence on the cover sheet concerning the purported unconstitutionality of limitations of liability with a provision substantially similar to the following sentence:</p> <p>“The State is of the opinion that it may negotiate and enter into an enforceable limitation of contractor liability not in violation of the Nebraska State Constitution provided the limitation of liability provision does not obligate the State to indemnify the contractor with respect to third party claims that may arise from the performance of the contract.”</p>	<p>The State of Nebraska will not negotiate terms and conditions prior to the Award Process; however the State will be open to a discussion on this topic with the selected contractor only during contract negotiations.</p>

QUESTIONS	ANSWERS
<p>2. RFP Section Reference IV.8(Item C – IT Component Capacity Planning) RFP Page Number 38</p> <p>Can the State please clarify the State’s objective in requiring a Tier IV datacenter which can result in a higher cost for the State? Tier III + facilities can meet necessary uptime and redundancy requirements for a lower cost without restricting competition to a few data centers.</p>	<p>After further consideration, the State has determined that it is open to the use of a Tier III facility as long as the Bidder can identify those areas where cost drove the decision and the increased risk that it presents.</p>
<p>3. RFP Section Reference IV.E.1. RFP Page Number 39-40</p> <p>The RFP states “The EES Contractor will be responsible for supporting the required modifications to N-FOCUS to integrate with the EES.” Could the state clarify the nature of the support expected? Is the contractor expected to perform modifications to N-FOCUS? If new (rather than modified) interfaces to N-FOCUS are required, is the development of these interfaces the responsibility of the Contractor, the State, or both?</p>	<p>Successful integration of the two systems will require the involvement of both the State and the Contractor, and therefore will be the responsibility of both parties.</p> <p>While the Contractor will not be expected to perform the actual modifications to the N-FOCUS system, they will be expected to support the analysis, design, testing and implementation of those modifications, in addition to any and all changes needed in the EES to support the integration.</p>

QUESTIONS	ANSWERS
<p>4. RFP Section Reference V. A. 3. i. RFP Page Number 107</p> <p>RFP Section V. A. 3. i. (page 107) states that the State of Nebraska will provide workspace, equipment and conference telephone capabilities to house the EES Contractor staff in Lincoln, NE. However, RFP Section V, A. 3. d. (page 103) states “The bidder’s office location responsible for performance pursuant to an award of a contract with the State of Nebraska must be identified.”</p> <p>With the exception of the service desk and application support help desk which may be located anywhere within the United States and training facilities provided by the State, could the state please clarify who provides the primary place of performance for the main project office (i.e., the State or the vendor)? If the place of performance is at a State provided facility, will the State provide office furniture and equipment and office supplies in addition to the workspace, equipment and conference telephone capabilities?</p>	<p>RFP Section V, A. 3. d. (page 103) refers to the Contractor’s business office location responsible for the performance of the contract. This could be a regional, Divisional or Corporate office location.</p> <p>RFP Section V. A. 3. i. (page 107) refers to the work to be performed in Lincoln, NE. The State of Nebraska will provide workspace with office furniture, equipment and conference telephone capabilities to house the EES Contractor staff in Lincoln, NE. Basic office supplies will be provided.</p>
<p>5. RFP Section Reference RFP for Contractual Services Form RFP Page Number Cover Page</p> <p>The RFP for Contractual Services Form states, “It is understood by the parties that in the State of Nebraska’s opinion, any limitation on the contractor’s liability is unconstitutional under the Nebraska State Constitution, Article XIII, Section 3, and that any limitation of liability shall not be binding on the State of Nebraska despite inclusion of such language in documents supplied with the contractor’s bid or in the final contract.”</p> <p>Is the State open to discussing during negotiation inclusion of an industry-standard limitation of contractor liability in the final contract? What will be the contractual provisions regarding limitation of liability?</p>	<p>The State of Nebraska will not negotiate terms and conditions prior to the Award Process; however the State will be open to a discussion on this topic with the selected contractor only during contract negotiations.</p>

QUESTIONS	ANSWERS
<p>6. RFP Section Reference II.G – Submission of Proposals RFP Page Number 5</p> <p>This section states, “Pages may be consecutively numbered for the entire proposal, or may be numbered consecutively within sections.”</p> <p>For ease of evaluation, would the State allow the Bidder to include an ‘RFP Compliance Matrix’ or ‘Table of Contents’ with the Technical Proposal to ensure responsiveness to all RFP requirements?</p>	<p>A Bidder may include an RFP Compliance Matrix or Table of Contents with the Technical Proposal to ensure responsiveness to all RFP requirements, however it is not mandatory.</p>
<p>7. RFP Section Reference II.O – Secretary of State/Tax Commissioner Registration Requirements RFP Page Number 8</p> <p>This section states, “...Bidders should submit the above certification(s) with their bid.”</p> <p>Would the State accept said certifications in the first section of our Technical Proposal, accompanying the signed RFP Form, completed Form A, and completed Terms and Conditions?</p>	<p>Yes, this is acceptable to include in this section.</p>
<p>8. RFP Section Reference III.B – Award RFP Page Number 10</p> <p>This section states, “The State reserves the right to waive any deviations or errors that are not material...”</p> <p>Because “Materiality” is not defined in definitions section; would the state please clarify how materiality is determined?</p>	<p>The State of Nebraska will determine “Material” on a case by case basis with the selected contractor.</p>

QUESTIONS	ANSWERS
<p>9. RFP Section Reference III.E – Ownership of Information and Data Page Number 11</p> <p>This section states, “The State of Nebraska shall have the unlimited right to publish, duplicate, use and disclose all information and data developed or derived by the contractor pursuant to the contract.”</p> <p>Assuming that information has been acknowledged to be proprietary or confidential, what reasonable measures will be undertaken by the State to ensure that proprietary and confidential information will not be published or similarly disclosed?</p>	<p>Please reference Section III OO Proprietary Information</p> <p>“Although every effort will be made to withhold information that is properly submitted as proprietary and meets the State’s definition of proprietary information, the State is under no obligation to maintain the confidentiality of proprietary information and accepts no liability for the release of such information.”</p>
<p>10. RFP Section Reference III.F – Insurance Requirements RFP Page Number 11</p> <p>This section states, “If contractor will be utilizing any subcontractors, the contractor is responsible for obtaining the certificate(s) of insurance required herein under from any and all subcontractor(s).”</p> <p>Are the certificates of insurance for subcontractors due at the time of proposal submission?</p>	<p>No Certificate of Insurance is required for sub-contractors.</p> <p>Please reference Section III F</p> <p>“The contractor shall not commence work under this contract until he or she has obtained all the insurance required hereunder and such insurance has been approved by the State. If contractor will be utilizing any subcontractors, the contractor is responsible for obtaining the certificate(s) of insurance required herein under from any and all subcontractor(s). Contractor is also responsible for ensuring subcontractor(s) maintain the insurance required until completion of the contract requirements. The contractor shall not allow any subcontractor to commence work on his or her subcontract until all similar insurance required of the subcontractor has been obtained and approved by the contractor. Approval of the insurance by the State shall not limit, relieve or decrease the liability of the contractor hereunder.”</p>

QUESTIONS	ANSWERS
<p>11. RFP Section Reference III.F.2 – Insurance Requirements RFP Page Number 11</p> <p>This section states, “The Commercial General Liability Insurance shall be written on an occurrence basis, and provide Premises/Operations, Products/Completed Operations, Independent Contractors, Personal Injury and Contractual Liability coverage...”</p> <p>Is it possible to obtain a complete list of parties required to be listed as additional insured?</p>	<p>No such list exists. Upon award, The State of Nebraska, Certificate Holder, is an additionally insured, primary and non-contributory on the General Liability.</p>
<p>12. RFP Section Reference III.F.4 – Evidence of Coverage RFP Page Number 12</p> <p>With respect to Evidence of Coverage, does the State require a particular “Acord” form of insurance certificate?</p>	<p>The State of Nebraska prefers the “Acord” form of insurance Certificate.</p>
<p>13. RFP Section Reference III.F.4 – Evidence of Coverage RFP Page Number 12</p> <p>Under existing insurance policies, cancellation notice is per the policy conditions which is typically sent to the first named insured.</p> <p>Must notice of cancellation be sent to all additional insureds, or if to any, which ones?</p>	<p>The notice of cancellation should be sent to the State of Nebraska should cancellation occur.</p>
<p>14. RFP Section Reference III.F.4 – Evidence of Coverage RFP Page Number 12</p> <p>Regarding auto coverage, is additional insured status required for the State, and if so, on a primary and non-contributory basis, and is a waiver of subrogation required?</p>	<p>The State of Nebraska, Certificate Holder, is an additionally insured, primary and non-contributory on the General Liability.</p> <p>A waiver of subrogation is required on the COI.</p>

QUESTIONS	ANSWERS
<p>15. RFP Section Reference III.G.1 – Cooperation with Other Contractors RFP Page Number 13</p> <p>This section states, “The State reserves the right to award the contract jointly between two or more potential contractors, if such an arrangement is in the best interest of the State.”</p> <p>May the contractor opt out of any such partnership?</p>	<p>It is not anticipated that this procurement will be awarded jointly. Any bidder may withdraw their bid prior to the award.</p>
<p>16. RFP Section Reference III.I – Contractor Responsibility RFP Page Number 13</p> <p>This section states, “The contractor shall agree that it will not utilize any subcontractors not specifically included in its proposal, in the performance of the contract, without the prior written authorization of the State.”</p> <p>May the contractor augment staff on as-needed basis with qualified independent contractors and/or agency contractors?</p>	<p>Yes.</p> <p>Please reference Section III I Contractor Responsibility</p> <p>“If the contractor intends to utilize any subcontractors' services, the subcontractors' level of effort, tasks and time allocation must be clearly defined in the contractor's proposal. The contractor shall agree that it will not utilize any subcontractors not specifically included in its proposal, in the performance of the contract, without the prior written authorization of the State. Following execution of the contract, the contractor shall proceed diligently with all services and shall perform such services with qualified personnel in accordance with the contract.”</p>
<p>17. RFP Section Reference III.J – Contractor Personnel RFP Page Number 14</p> <p>This section states, “The contractor warrants that all persons assigned to the project shall be employees of the contractor or specified subcontractors, and shall be fully qualified to perform the work required herein.”</p> <p>Must all independent contractors and agency contractors be specified by name in advance at the time of bid submission? Also, does contractor have sole discretion to determine contractor qualifications?</p>	<p>Please reference Section V A i</p> <p>For key personnel the Bidder must provide resume(s) for the defined the key personnel positions and at a minimum must meet the defined requirements to receive State of Nebraska approval.</p> <p>For non-key personnel the contractor does have sole discretion to determine contractor qualifications for RFP response purposes.</p> <p>“ The Bidder is required to demonstrate that their consultant(s) or employee(s) have the skills necessary to meet the objectives of this project”</p>

QUESTIONS	ANSWERS
<p>18. RFP Section Reference III.K – State of Nebraska Personnel Recruitment Prohibition RFP Page Number 14</p> <p>This section states, “The contractor shall not, at any time, recruit or employ any State employee or agent who has worked on the Request for Proposal or project, or who had any influence on decisions affecting the Request for Proposal or project.”</p> <p>Does this obligation survive completion of contract obligations, and if so for how long?</p>	<p>The obligation terminates upon completion of the contractual obligations.</p>
<p>19. RFP Section Reference III.L – Conflict of Interest RFP Page Number 15</p> <p>This section states, “The bidder certifies that it shall not take any action or acquire any interest, either directly or indirectly, which will conflict in any manner or degree with the performance of its services hereunder or which creates an actual or appearance of conflict of interest....”</p> <p>How is a conflict of interest or appearance of conflict of interest determined as it is not defined in the glossary of terms?</p>	<p>Conflicts of Interest will be determined on a case by case basis.</p>
<p>20. RFP Section Reference III.Q – Assignment by the Contractor RFP Page Number 16</p> <p>This section states, “The contractor may not assign, voluntarily or involuntarily, the contract or any of its rights or obligations hereunder (including without limitation rights and duties of performance) to any third party, without the prior written consent of the State, which will not be unreasonably withheld.”</p> <p>Does this provision limit the use of independent or agency contractors for staff augmentation?</p>	<p>This provision does not limit the use of sub-contractors, provided all requirements regarding sub-contractors are met.</p>

QUESTIONS	ANSWERS
<p>21. RFP Section Reference III.W – Site Rules and Regulations RFP Page Number 17</p> <p>This section states, “The contractor shall use its best efforts to ensure that its employees, agents and subcontractors comply with site rules and regulations while on State premises.”</p> <p>Will site rules be promulgated in writing and if not, how will site rules be made known?</p>	<p>All rules and regulations will be made available to the selected contractor through the agency.</p>
<p>22. RFP Section Reference III.Y.3.i – Early Termination RFP Page Number 18</p> <p>Concerning the language: “second or subsequent documented “vendor performance report” form deemed acceptable by the State Purchasing Bureau,” should the reference be to “unacceptable”?</p>	<p>The reference to “acceptable” in this section refers to the State Purchasing Bureau accepting the documentation in the form of a vendor performance report from the agency as being valid, not that the vendor performance is acceptable.</p>
<p>23. RFP Section Reference III.CC – Penalty RFP Page Number 19</p> <p>This section states, “In the event that the contractor fails to perform any substantial obligation under the contract, the State may withhold all monies due and payable, until such failure is cured/adjudicated. Failure to meet the dates stipulated in the contract for the deliverables may result in an assessment of penalty due the State of \$1,000 dollars per day, until the deliverables are approved.”</p> <p>What is defined as a “substantial” obligation, such that failure of performance would trigger the withholding of funds and/or the penalty? Will notice and opportunity to cure be given before penalties are assessed?</p>	<p>“Substantial” will be determined on a case by case basis. Notice and opportunity to cure will be given before forfeiture of the bond occurs.</p>

QUESTIONS	ANSWERS
<p>24. RFP Section Reference III.DD – Performance Bond RFP Page Number 19-20</p> <p>This section states, “...The check or bond will guarantee that the selected contractor will faithfully perform all requirements, terms and conditions of the contract. Failure to comply shall be grounds for forfeiture of the check or bond as liquidated damages.”</p> <p>Does this apply to a material default or any default? Will notice and opportunity to cure be given before forfeiture of the bond occurs?</p>	<p>Notice and opportunity to cure will be given before forfeiture of the bond occurs.</p>
<p>25. RFP Section Reference III.DD – Performance Bond RFP Page Number 19-20</p> <p>This section states, “The bond or certified check will be returned when the service has been satisfactorily completed as solely determined by the State, after termination or expiration of the contract.”</p> <p>Would the State confirm that the bond functions as a security deposit and that it will in fact be returned, and in fact not forfeited, provided the work is satisfactorily completed after notification to Contractor of the deficiency?</p>	<p>The bond or certified check will be returned upon completion of contractual obligations.</p>
<p>26. RFP Section Reference III.EE – Force Majeure RFP Page Number 20</p> <p>This section states, “Neither party shall be liable for any costs or damages resulting from its inability to perform any of its obligations under the contract due to a natural disaster, or other similar event outside the control and not the fault of the affected party (“Force Majeure Event”). A Force Majeure Event shall not constitute a breach of the contract.”</p> <p>Would the State please confirm this does not apply to payment obligations for work satisfactorily performed prior to the occurrence of the force majeure event?</p>	<p>Yes. Payment obligations for work satisfactorily performed will be honored.</p>

QUESTIONS	ANSWERS
<p>27. RFP Section Reference III.GG – Payment RFP Page Number 20</p> <p>This section states, “State will render payment to contractor when the terms and conditions of the contract and specifications have been satisfactorily completed on the part of the contractor as solely determined by the State.”</p> <p>Would the State please define the specific payment approval process?</p>	<p>Please reference Section V. C</p> <p>“The payment schedule for the project is tied to specific dates and deliverables. Invoices may be submitted by the contractor on specific dates based on the completion and acceptance of related deliverables. No invoice will be approved unless the associated deliverables have been approved. The vendor will be given an opportunity to cure any defects prior to the penalty provision being utilized.”</p>
<p>28. RFP Section Reference III.II – Audit Requirements RFP Page Number 21</p> <p>This section states, “...The contractor shall agree that it will be held liable for any State audit exceptions, and shall return to the State all payments made under the contract for which an exception has been taken or which has been disallowed because of such an exception.</p> <p>Because “Exceptions” is not defined in Glossary of Terms, would the State please clarify how exceptions will be noted?</p>	<p>“Exceptions” will be determined on a case by case basis.</p>
<p>29. RFP Section Reference III.KK – Inspection and Approval RFP Page Number 21</p> <p>This section states, “The State and/or its authorized representatives shall have the right to enter any premises where the contractor or subcontractor duties under the contract are being performed, and to inspect, monitor or otherwise evaluate the work being performed.</p> <p>Will the State provide reasonable prior notice?</p>	<p>Yes.</p>

QUESTIONS	ANSWERS
<p>30. RFP Section Reference III.LL – Changes in Scope/Change Orders RFP Page Number 22</p> <p>This section states, “The State may, at any time with written notice to the contractor, make changes within the general scope of the contract. (The State retains the right to employ the services of a third party to perform any change order(s)).”</p> <p>Would the State please clarify circumstances under which the State would engage a third party, and whether Contractor will participate in discussions to engage any such third party?</p>	<p>The State of Nebraska will not speculate as to circumstances that may involve a third party. The State of Nebraska reserves the right as specified in the RFP.</p>
<p>31. RFP Section Reference III.LL – Changes in Scope/Change Orders RFP Page Number 22</p> <p>This section states, “Changes in work and the amount of compensation to be paid to the contractor for any extra work so ordered shall be determined in accordance with the applicable unit prices of the contractor’s proposal.”</p> <p>Will the contract set forth more specific procedures for Change Order requests?</p>	<p>No.</p>
<p>32. RFP Section Reference III.NN – Confidentiality RFP Page Number 22</p> <p>What reasonable measures or protections will be given to contractor’s confidential information?</p>	<p>Please reference Section III OO Proprietary Information</p> <p>“Although every effort will be made to withhold information that is properly submitted as proprietary and meets the State’s definition of proprietary information, the State is under no obligation to maintain the confidentiality of proprietary information and accepts no liability for the release of such information.”</p>

QUESTIONS	ANSWERS
<p>33. RFP Section Reference III.OO – Proprietary Information RFP Page Number 23</p> <p>This section states, “Proprietary information is defined as trade secrets, academic and scientific research work which is in progress and unpublished, and other information which if released would give advantage to business competitors and serve no public purpose (see Neb. Rev. Stat. §84-712.05(3)).</p> <p>Will contractor’s interpretation of Nebraska law with respect to the definition of proprietary information, if reasonable, control, or if not, what mechanism exists for resolving any disparity of interpretations under the statute as to what constitutes proprietary information?</p>	<p>The bidder’s interpretation of proprietary information will not control any governance related to proprietary information. Proprietary information will be processed following all internal rules and regulations.</p>
<p>34. RFP Section Reference IV.C.6.b – VPN Access RFP Page Number 37</p> <p>The State has requested VPN access or encrypted tunnels to connect in to the EES.</p> <p>What type of networking infrastructure does the State have in place today (e.g., MPLS)? Does the State have preferred vendor for network gear?</p>	<p>Existing infrastructure is MPLS and utilizes Cisco routers and Fortinet firewalls.</p>

QUESTIONS	ANSWERS
<p>35. RFP Section Reference IV.E.2.e.xvi – Enterprise Content Management System RFP Page Number 47</p> <p>This section states that “The EES must have the capability to connect to the State of Nebraska’s Enterprise Content Management System to centrally manage all documents throughout their lifecycle and share documents between various stakeholders.”</p> <p>For clarification sake, is it safe to assume that the ‘State of Nebraska Enterprise Content Management System’ and the ‘State of Nebraska Document Repository’ (mentioned throughout the RFP) are references to the Document Management System provided by Hyland OnBase? If not, please provide additional details on these various systems.</p>	<p>Yes.</p>
<p>36. RFP Section Reference IV.F.8 – Communications Management RFP Page Number 59</p> <p>This section of the SOW mentions both Communications Management and Contact Management.</p> <p>For the Contact Management System requirement, is the State looking for the Bidder to propose a CRM tool?</p>	<p>This section of the proposal refers to Communications Management during the execution of the project as opposed to the on-going EES solution. As part of that communications management, it is expected that the project will track the communications including the contacts. It is up to the Bidder to propose how to accomplish this activity.</p>
<p>37. RFP Section Reference IV.I – Training RFP Page Number 78</p> <p>This section states that “The Contractor will work with the State of Nebraska to upload all the required materials into the LINK Learning Management System (LMS) or other approved location/tool...”</p> <p>Because this is the only reference made to the LINK LMS, would the State please provide additional details on the LINK LMS as it relates to the Training requirement?</p>	<p>LINK is the portal to the Cornerstone On-Demand Learning Management System (LMS) that the State uses to deliver training to the workforce.</p> <p>The LMS provides the capability to upload training materials, so as part of the proposal Bidders should identify in what formats they can deliver the training materials.</p>

QUESTIONS	ANSWERS
<p>38. RFP Section Reference IV.N.2 – Equipment Summary RFP Page Number 84</p> <p>This section states, “The Primary Data Center (PDC) shall be configured at the Tier IV – Fault Tolerant Site Infrastructure Level (as defined by the Uptime Institute).”</p> <p>Can the State be more specific about which Tier IV capabilities it’s seeking for the EES solution (e.g., power, environmental and network connectivity levels)? Would an IT infrastructure hosting company which provides secure “tenant” Co-Lo for equipment suffice?</p>	<p>After further consideration, the State has determined that it is open to the use of a Tier III facility so long as the Bidder can identify those areas where cost drove the decision and the increased risk that it presents.</p>
<p>39. RFP Section Reference IV.N.3 – Network RFP Page Number 85</p> <p>Does the State of Nebraska have any subsidized bandwidth options they would prefer to use for connectivity?</p>	<p>No.</p>
<p>40. RFP Section Reference IV.N.10 – Data Systems Access RFP Page Number 90</p> <p>This section states that “The Contractor agrees to access the State of Nebraska data systems only through State supplied CITRIX access and encryption technology.”</p> <p>Would the State consider other proposed options for access and encryption technology that may be better suited to the proposed EES solution? If not, would the State please provide additional details on how the State is leveraging CITRIX access and encryption technology?</p>	<p>Yes, the Department is open to considering other options as identified in the bidder’s RFP response. Please include the proposed options in the Technical section of the RFP response.</p> <p>For reference: For applications hosted inside the DHHS network, the Department is using Citrix XenApp 6.5 to host virtual applications to Citrix clients. Citrix clients currently use the Citrix Web Interface and the Citrix Secure Gateway to launch and utilize the virtual applications. In the near future, DHHS will be replacing Citrix Web Interface and Citrix Secure Gateway with Citrix Netscaler appliance.</p>
<p>41. RFP Section Reference IV.N.14 – Hosting and Disaster Recovery Services RFP Page Number 94</p> <p>What is the Recovery Point Objective (RPO) and Recovery Time Objective (RTO) required for the Disaster Recovery system?</p>	<p>The Department considers these to be Service Levels that fall within the scope of Section IV.P on page number 98.</p> <p>For the purposes of proposal, the Bidder should use the following. The Department considers the EES to be a Class 2 system. The RTO threshold is 24 hours, and the RPO goal would be zero data loss. The Department realizes that in extreme cases zero data loss may not be achievable so the Department is willing to accept 8 hours.</p>

QUESTIONS	ANSWERS
<p>42. RFP Section Reference V.A.3.b – Financial Statements RFP Page Number 103</p> <p>If the bidder is not a publicly held corporation, would the State accept unaudited financial statements? In addition, how many years of financial statements are required to satisfy this requirement?</p>	<p>Please see Section V. A.3.b</p> <p>“If the bidder is not a publicly held corporation, either the reports and statements required of a publicly held corporation, or a description of the organization, including size, longevity, client base, areas of specialization and expertise, and any other pertinent information must be submitted in such a manner that proposal evaluators may reasonably formulate a determination about the stability and financial strength of the organization. Additionally, a non-publicly held firm must provide a banking reference.”</p> <p>Please provide the most current financial statement.</p>
<p>43. RFP Section Reference V.A.3.h – Corporate Experience RFP Page Number 104-105</p> <p>This section states, “Contractor and subcontractor(s) experience must be listed separately.”</p> <p>How will subcontractors’ experience narrative descriptions be evaluated?</p>	<p>The State of Nebraska will not disclose evaluation information at this time. All bidders should provide their best proposal to meet all requirements.</p>
<p>44. RFP Section Reference V.A.3.h – Corporate Experience RFP Page Number 104-105</p> <p>This section states, “...In addition, subcontractors shall identify what share of contract costs, project responsibilities, and time period were performed as a subcontractor.”</p> <p>Is this additional information required for both the narrative descriptions of Bidder’s corporate experience (performed as a sub) AND subcontractor corporate experience (performed as a sub)?</p>	<p>Yes.</p>
<p>45. RFP Section Reference V.A.3.i – Proposed Personnel RFP Page Number 107</p> <p>Are the three (3) references included in the three page limit for resumes?</p>	<p>No.</p>

QUESTIONS	ANSWERS
<p>46. RFP Section Reference V.4 – Technical Approach RFP Page Number 108</p> <p>Sub-bullet “A” simply states ‘Understanding of the project requirements’ with no specific requirement cross-referenced in section IV of the RFP.</p> <p>Is it safe for the Bidder’s to assume that ‘Understanding of the project requirements’ is a free-form narrative to be provided as an overarching introduction for our proposed Technical Approach. If not, would the state please clarify the ‘Understanding of the projects requirements’ section for the Technical Approach?</p>	<p>Yes as described in RFP Section V.A.2 Executive Summary.</p>
<p>47. RFP Section Reference V.4 – Technical Approach RFP Page Number 108</p> <p>Sub-bullet “C” simply states ‘Technical Considerations’ with no requirement cross-referenced in section IV of the RFP.</p> <p>Is it safe for the Bidder’s to assume that ‘Technical Considerations’ really means ‘Assumptions, Qualifiers, and Constraints’? If not, would the state please clarify the ‘Technical Considerations’ requirement for the Technical Approach?</p>	<p>Technical Considerations should be an explanation of the Bidder considerations made to develop their solution for the EES.</p>
<p>48. RFP Section Reference V.4 – Technical Approach RFP Page Number 108</p> <p>Sub-bullet “F” simply states ‘Personnel Management and Planning’ with no requirement cross-referenced in section IV of the RFP.</p> <p>Is it safe for the Bidder’s to assume that ‘Personnel Management and Planning’ is already addressed in Sub-bullet “b.iv” ‘Project Planning and Management’, which already includes a summary of the Bidder’s proposed Personnel/Management Approach? If not, would the state please clarify the ‘Personnel Management and Planning’ requirement for the Technical Approach?</p>	<p>See RFP Section V.A.3.i Summary of Bidder Personnel/Management Approach for the response requirements for sub-bullet f.</p>

QUESTIONS	ANSWERS
<p>49. RFP Section Reference V.C – Payment Schedule RFP Page Number 110</p> <p>This section states, “No invoice will be approved unless the associated deliverables have been approved.”</p> <p>What is the specific deliverable approval process that will be utilized by the State?</p>	<p>See RFP Section IV.Q Deliverable Approval Process.</p>
<p>50. RFP Section Reference Appendix B – Functional Requirements RFP Page Number B-3</p> <p>GEN 016 states that “The EES shall support client facing services and documents in English and Spanish languages.”</p> <p>Would the State please define which functional requirements are considered to be “client facing services and documents” in Appendix B?</p>	<p>Many of requirements in Appendix B lead to direct or indirect system interaction with clients. Whenever there is interaction with the client, including but not limited to, documents, notices, Web screens, voice, email, text messages, or fax, the client shall have the option to choose English or Spanish for the interaction.</p>
<p>51. RFP Section Reference Appendix B – Functional Requirements RFP Page Number B-3</p> <p>GEN 021 states that “The EES shall have the ability to interface with the LINKS Performance Management and Training System.”</p> <p>Because this interface isn’t listed in the Bidder Library, would the state please provide additional details surrounding the LINKS System?</p>	<p>LINK is the portal to the Cornerstone On-Demand Learning Management System (LMS) that the State uses to deliver training to the workforce.</p> <p>The LMS provides the capability to upload training materials, so as part of the proposal Bidders should identify in what formats they can deliver the training materials.</p>
<p>52. RFP Section Reference Appendix B – Functional Requirements RFP Page Number B-3</p> <p>GEN 023 states that “The EES shall have the ability to interface with the NE Financial and Accounting system.”</p> <p>Because this interface isn’t listed in the Bidder Library, would the state please provide additional details surrounding the NE Financial and Accounting system?</p>	<p>The State Financial and Accounting system is JD Edwards Oracle Enterprise One.</p>

QUESTIONS	ANSWERS
<p>53. RFP Section Reference Appendix B – Functional Requirements RFP Page Number B-19</p> <p>Appendix B contains two (2) separate requirements for ELG 020 and two (2) separate requirements for ELG 021.</p> <p>Will the State please confirm the numbering for these requirements and subsequently determine the impact and numbering of the remaining ELG requirements listed?</p>	<p>See the revised Appendix B Functional Requirements.</p>
<p>54. RFP Section Reference Appendix B – Functional Requirements RFP Page Number B-28</p> <p>ELG 161 states that “The EES shall evaluate the resource/asset eligibility of an applicant when determining eligibility for those programs requiring a resource / asset test.”</p> <p>Would the State please provide details regarding all resource/asset verification services/sources currently in place and available to the EES?</p>	<p>Currently the Department interfaces with Internal Revenue Services, Social Security Administration, and the Department of Motor Vehicles for data related to assets.</p>
<p>55. RFP Section Reference Appendix B – Functional Requirements RFP Page Number B-34</p> <p>NOT 008 states that “The EES shall provide notices and forms in English and Spanish languages as required by the federal and State statutes, regulations and policies.”</p> <p>Would the State please clarify specifically which notices and forms are to be provided? Also, would the State please clarify which federal and State statutes, regulations and policies are being referenced?</p>	<p>All client notices/forms must be in English or Spanish. The Department policy referenced is titled <i>Language Assistance for DHHS Service Recipients who are Limited English Proficient (LEP)</i>.</p> <p>http://dhhs.ne.gov/Pages/lep.aspx</p> <p>Currently Spanish is the only language translated.</p>

QUESTIONS	ANSWERS
<p>56. RFP Section Reference Appendix C – Non-Functional Requirements 13. Data Integration & ETL Requirements RFP Page Number C-49 – C-51</p> <p>General: What is the approximate volume of data or data capacities that are required to support the ETL/data integration environment?</p> <p>General: What technologies are required for source system connectivity, i.e. what relational databases, which packaged applications and which mainframe data structures.</p> <p>ETL013: Does the EES require a federated data access capability?</p>	<p>Please refer to the “Production Database by Table Size” for N-FOCUS table in Appendix A. Source system data is primarily stored in DB2 on the state mainframe (N-FOCUS). There may be relevant source system data on a smaller scale in Microsoft SQL Server data stores in the state server environment.</p> <p>Federated data access is a desirable capability</p>
<p>57. RFP Section Reference Appendix C – Non-Functional Requirements 14. Master Data Management RFP Page Number C-52 – C-55</p> <p>General: What is the approximate number of providers and clients that need to be mastered?</p> <p>General: How many systems are the data sources for providers and/or clients? On average how many of these systems does a provider/client reside in (e.g., there are 5 source systems for providers, on average a provider will exist in three of these systems)?</p>	<p>Between N-FOCUS and the Nebraska child support system (CHARTS), there are approximately 2 million unduplicated persons in various program and case roles. These systems would be the major sources of person-level records for the State. Approximately 1.5 million of the 2 million are known to both N-FOCUS and CHARTS.</p> <p>In October 2013 there were 241,615 persons (clients) who were Medicaid eligible. There were another 82,599 persons with active involvements in Medicaid cases who were not Medicaid eligible but who are included in the case for purposes of determining eligibility, e.g. financially responsible parents or spouses and ineligible siblings.</p> <p>N-FOCUS is currently the single source for Medicaid client eligibility information.</p> <p>For the purposes of this project Providers are not expected to be mastered. That would be related other programs that may leverage the solution.</p>

QUESTIONS	ANSWERS
<p>58. RFP Section Reference Appendix C – Non-Functional Requirements 16. Business Intelligence and Reporting RFP Page Number C-57 – C-60</p> <p>BIR021: Does the Metadata management tool need to perform impact analysis across different metadata sources?</p> <p>BIR023: Should the data quality tool be deployed and leveraged within the ETL environment and well as other environments (e.g. Data Conversion)?</p>	<p>BIR021: The ability to perform impact analysis across the metadata sources is a desirable capability.</p> <p>BIR023: The ability to leverage the data quality tool within the ETL and other environments is a desirable capability.</p>
<p>59. RFP Section Reference Appendix D – Requirements Gap Analysis RFP Page Number 127</p> <p>The initial sentence makes reference to a <i>Compliant</i> field and the numbered list makes reference to <i>Availability</i>. This does not match up with the Ability Codes in Appendix B nor C, as neither contains <i>Compliant</i> or <i>Availability</i> fields.</p> <p>Will the State please clarify these instructions?</p>	<p>See the revised instructions for Appendices B, C and D.</p>
<p>60. RFP Section Reference Appendix D – Requirements Gap Analysis RFP Page Number 127</p> <p>The first part of the paragraph above seems to indicate that only requirements where we specify 'N' needs to be in the Appendix D, Gap matrix. The numbered list seems to indicate N, M, F, C or O all need to be added to the gap matrix.</p> <p>Will the State please clarify which items must be included in the Fit Gap Analysis?</p>	<p>See the revised instructions for Appendices B, C and D.</p>
<p>61. RFP Section Reference III. TERMS AND CONDITIONS : 3.LL RFP Page Number 22</p> <p>Regarding Section III.LL of the RFP: what are State audit exceptions?</p>	<p>“Exceptions” will be determined on a case by case basis.</p>

QUESTIONS	ANSWERS
<p>62. RFP Section Reference III. TERMS AND CONDITIONS: 3.Y(i) RFP Page Number 17</p> <p>5.1. Section 3.Y(i) of the RFP states that Nebraska may terminate immediately for “second or subsequent documented “vendor performance report” form deemed acceptable by the State Purchasing Bureau.”</p> <p>We assume that this is a typo and the state implied this to be 'form deemed un-acceptable'. Please confirm.</p>	<p>The reference to “acceptable” in this section refers to the State Purchasing Bureau accepting the documentation in the form of a vendor performance report from the agency as being valid, not that the vendor performance is acceptable.</p>
<p>63. RFP Section Reference III. TERMS AND CONDITIONS: 3.Y(i) RFP Page Number 17</p> <p>What criteria would State Purchasing Bureau use for evaluation of acceptability?</p>	<p>“Acceptability” is determined on a case by case basis.</p>
<p>64. RFP Section Reference Appendix A : Proposed System Conceptual Architecture RFP Page Number Page 15</p> <p>In the Business functions and processes, a high level process is determined to be 'Plan Management'. Should the vendor interpret this business process to manage for Medicaid Programs - both MAGI & NON MAGI?</p>	<p>Yes, this business process is for both MAGI and Non-MAGI.</p>
<p>65. RFP Section Reference Appendix B : ELG 010 RFP Page Number B-18</p> <p>If an applicant applies for coverage through FFM, how will he/she be directed to EES system in case they are found eligible for Medicaid? Will there be a SSO redirect, or a service call, or both?</p>	<p>This is a question that ultimately falls within the domain of the Federally Facilitate Marketplace (FFM).</p> <p>Based on the current FFM model this occurs through an account transfer processed through the Federal Data Services Hub (FDSH).The Department is not aware of any plans on the part of CMS to change that method.</p> <p>It is important for the bidder to consider that the integration through the FDSH is not limited to the FFM but to the other Federal Trusted Data Sources like IRS, SSA, DHS, etc.</p>

QUESTIONS	ANSWERS
<p>66. RFP Section Reference Appendix B : ELG 011 RFP Page Number B-18</p> <p>Please provide details of the existing mailroom infrastructure used for printing and mailing notices. Will the existing infrastructure be able to accommodate the requirements for EES?</p>	<p>The Department currently utilizes the State Print Shop for printing and mailing of notices. The Print Shop mails the correspondence the day after an action is taken. The existing structure can accommodate the needs of the EES.</p>
<p>67. RFP Section Reference Appendix B : Notification RFP Page Number B-34</p> <p>Please provide an estimate for the number of Notices needed to be generated for this project</p>	<p>Approximately 108,000 pieces of correspondence is currently produced each month.</p>
<p>68. RFP Section Reference Appendix B : Reporting Requirements RFP Page Number B-9</p> <p>Please provide an estimate for the number of Transactional and Analytical reports from the EES system</p>	<p>The Department currently has approximately 25 transactional and analytical reports available. However, the current system is not agile and many more reports are needed.</p>
<p>69. RFP Section Reference Appendix B Functional Requirements GEN 016 RFP Page Number 3</p> <p>It is understood that the EES shall support client facing services and documents in English and Spanish languages. Is the non-client facing services also required to support both the languages?</p>	<p>No, non-client facing services should be in English only.</p>
<p>70. RFP Section Reference Appendix C : PRT 035 RFP Page Number C-70</p> <p>For mobile device access, will generic browser based mobile access be sufficient?</p>	<p>At a minimum. If the Bidder provides capabilities beyond simply accessing a full web page from a browser, such as device-specific rendering or a mobile app, please provide details.</p>
<p>71. RFP Section Reference Appendix C Non-Functional Requirements 5.EES Performance Requirements RFP Page Number 12</p> <p>Please share the average volumetric data and the expected performance service level requirement</p>	<p>The Department considers this to fall into the Service Levels within the scope of Section IV.P on page number 98.</p> <p>The Department would request the Bidder to include this in their proposed SLRs, and to include the data volume assumptions used to determine the proposed HW/SW.</p>

QUESTIONS	ANSWERS
<p>72. RFP Section Reference Appendix C: IER 034 RFP Page Number C-35</p> <p>Please provide details of the existing IVR system used to support NFOCUS. Please elaborate if this system is extensible to accommodate requirements of the new EES</p>	<p>The existing IVR is an AVAYA MPS500. The Avaya MPS500 is extensible to accommodate the requirements of the new EES utilizing “Web Services”.</p>
<p>73. RFP Section Reference Appendix-B RPT047 RFP Page Number B-12</p> <p>Please elaborate on what are 'Branch Reports'? Please share a template, if available.</p>	<p>In this context, a “Branch Report” simply means a more detailed, drill down of data contained in another summary level report. No template is currently available.</p>
<p>74. RFP Section Reference Appendix-B, ELG146, RFP Page Number B-27</p> <p>Is there an existing infrastructure for scanning and uploading paper applications? If yes, will EES be expected to reuse these facilities to convert paper applications and scan documents?</p>	<p>Yes and reuse is highly encouraged.</p>
<p>75. RFP Section Reference Appendix-B: GEN012, ELG010 RFP Page Number B-3, B-18</p> <p>How is N-FOCUS integrated with FFM? Should the vendor consider that the integration specifications currently managed between N-FOCUS and FFM would be replicated for integration between EES and FFM?</p>	<p>N-FOCUS is currently integrated with the Federally Facilitated Marketplace (FFM) via the services provided by the Federal Data Services Hub (FDSH).</p> <p>Since the EES will be required to integrate with the FFM, and the FDSH is the mandated integration method, it stands to reason that the integration will need to be replicated.</p> <p>It is important for the Bidder to consider that the integration through the FDSH is not limited to the FFM but to the other federal Trusted Data Sources like IRS, SSA, DHS, etc.</p>
<p>76. RFP Section Reference Appendix-C (GSR040) RFP Page Number C-5</p> <p>This is with regards to GSR-041 from Appendix-C which states EES capability to support multi-agency. Is this in reference to Portal Technology Architecture which can host applications as virtual sites, but still can run on the same server?</p>	<p>That is one potential method of accomplishing this requirement. The State encourages the Bidder to indicate if they are able to support this requirement, and to describe their proposed method.</p>

QUESTIONS	ANSWERS
<p>77. RFP Section Reference Appendix-C (IOI012) RFP Page Number C-9</p> <p>Are all interfaces in the interface-list (in procurement library) required for the new EES System? If not, please share a list of interfaces that are needed for EES.</p> <p>Also, please elaborate on your recommendation for any additional interfaces to be developed.</p>	<p>These are design details that the State considers to be the best developed in the course of executing the project.</p>
<p>78. RFP Section Reference Appendix-C (RSR085) RFP Page Number C-20</p> <p>EES is expected to have its identity & access management. However when a request or message is routed to the N-FOCUS, then, the user credential will be propagated to N-FOCUS, which will be used to authenticate against RACF. Is this assumption correct?</p>	<p>The State is unclear on the basis for the question and request that the Bidder provide more clarification. Please restate your question in Round 2 of Q&A.</p> <p>Further, the design of the interface/integration with N-FOCUS is unknown at this time. The State anticipates this will be a work product of the project.</p>
<p>79. RFP Section Reference III. TERMS AND CONDITIONS: Bidder declaration and 3.R RFP Page Number 1 and 16</p> <p>Bidder declaration on page 1 of the RFP states (in relevant part) “the bidder ...agrees to the terms and conditions (see Section III).” Section 3.R “Deviation from Proposal” states that deviations from terms contained in Section 3 may be submitted. Can the State please clarify whether bidders may submit proposed deviations from terms and conditions contained within Section 3 of the RFP?</p>	<p>Yes, a Bidder can submit deviations. RFP Section III states “Bidders are expected to closely read the Terms and Conditions and provide a binding signature of intent to comply with the Terms and Conditions; provided, however, a bidder may indicate any exceptions to the Terms and Conditions by (1) clearly identifying the term or condition by subsection, (2) including an explanation for the bidder’s inability to comply with such term or condition which includes a statement recommending terms and conditions the bidder would find acceptable. Rejection in whole or in part of the Terms and Conditions may be cause for rejection of a bidder’s proposal.”</p> <p>The State will not negotiate Terms and Conditions prior to award.</p>
<p>80. RFP Section Reference General RFP Page Number NA</p> <p>Please share the roadmap for ongoing maintenance and support for the N-FOCUS system. Will the state's incumbent team manage changes to N-FOCUS or are these expected from the contractor building the new EES.</p>	<p>The incumbent team will manage changes to N-FOCUS that do not impact the EES. Where the two systems interrelate then it is expected that the EES Contractor would support and collaborate on changes.</p>

QUESTIONS	ANSWERS
<p>81. RFP Section Reference General RFP Page Number NA</p> <p>Will Access Nebraska continue to be the User interface for end users for both Medicaid and Non Medicaid users?</p>	<p>No.</p>
<p>82. RFP Section Reference General RFP Page Number NA</p> <p>Please share a roadmap for keeping N-FOCUS in production. How long will N-FOCUS accept Medicaid eligibility transactions after EES goes live?</p>	<p>While the potential to migrate many of the programs currently supported by N-FOCUS exists, the Department does not anticipate completely retiring the system for the foreseeable future.</p> <p>The expectation is that upon completion of this project Medicaid eligibility will be performed solely by the EES.</p>
<p>83. RFP Section Reference General RFP Page Number NA</p> <p>Please provide your expected roadmap of enhancements to the EES system post go-live.</p>	<p>The State considers this to be premature to present such a roadmap. The focus at this time is on the successful implementation of the EES for the Medicaid program. Once the goal has been accomplished the State will better understand the capabilities and limitations of the solution and will be able to determine what should be on the roadmap (ex. more programs, richer functionality, etc.).</p>
<p>84. RFP Section Reference General RFP Page Number NA</p> <p>What is expected population year on year that will participate in Medicaid eligibility determination?</p>	<p>Nebraska's current average monthly enrollment is 225,000 individuals. This number does not include woodwork population. For projections of insurance switchers and the woodwork effect, please refer to a Milliman report prepared for the State.</p> <p>http://dhhs.ne.gov/medicaid/Documents/AffordableCareActFiscalAnalysis2013.pdf</p>
<p>85. RFP Section Reference General RFP Page Number NA</p> <p>With systems, other than EES, is the user expected to login via SSO?</p>	<p>While not a specific requirement for this implementation, the goal is to reduce the number of sign-ons the user must endure, and therefore would like to understand the Bidder's ability to support this goal.</p>
<p>86. RFP Section Reference General RFP Page Number NA</p> <p>Does the state's existing ECM Hyland OnBase support web content management or is it pure document management system? Is the existing state' web portal (ACCESSNebraska) integrated with Hyland OnBase?</p>	<p>No, the state's Hyland OnBase ECM solution is not currently supporting web content management.</p> <p>No, the existing ACCESSNebraska web applications and N-FOCUS are integrated with a different document management product that preceded the Hyland OnBase solution, called Spielberg FileDirector.</p>

QUESTIONS	ANSWERS
<p>87. RFP Section Reference General RFP Page Number NA</p> <p>Where are the existing policy manuals, training materials stored? Does that system provide search capabilities which can be integrated with the new EES?</p>	<p>The Department's policy manuals are available on the public and internal websites. The training materials are available on the internal website only. Search capabilities are very limited in the current system.</p>
<p>88. RFP Section Reference General RFP Page Number NA</p> <p>Is state planning to use the BPM solution and Rules engine enterprise-wide? Is the expectation that these can be leveraged for any new applications development in future?</p>	<p>The State plans to use these tools to support other applications within the State where feasible.</p>
<p>89. RFP Section Reference General RFP Page Number NA</p> <p>Please share details of integration between AccessNebraska/N-FOCUS and the existing enterprise content management system (Hyland OnBase).</p>	<p>There is no integration between ACCESSNebraska/N-FOCUS and the Hyland OnBase solution that is relevant to the EES.</p>
<p>90. RFP Section Reference General RFP Page Number NA</p> <p>What is the current process of storing and searching documents (including scanned documents) into the enterprise content management system (Hyland onbase)?</p>	<p>The Department utilizes a High Speed IBML Scanner for documents entering through the ACCESSNebraska Document Imaging Centers; the system also has 50 small Canon scanners located throughout the state for scanning of paper documents. Staff can transfer email and online documents into the Imaging system by utilizing a tool that is accessed through N-FOCUS. A web application is also available for clients to submit online. This web application is on the ACCESSNebraska.ne.gov website. Documents are connected to individuals and categorized by the content of the document. Document Imaging is an icon on N-FOCUS that staff utilize to search documents. Documents are searchable by person and categorized by date scanned and content of document such as income, expense, etc.</p> <p>A copy of the ACCESSNebraska Document Imaging Architecture showing the existing FileDirector-based solution is included in Appendix A Procurement Library documents.</p>

QUESTIONS	ANSWERS
<p>91. RFP Section Reference General RFP Page Number NA</p> <p>Does the current enterprise content management system use business process management feature of HYLand Onbase system? If so, please elaborate on the usage.</p>	<p>The current solution (FileDirector) does not use business process management.</p>
<p>92. RFP Section Reference General RFP Page Number NA</p> <p>Are there any existing interfaces published from the enterprise content management system (Hyland onbase) which can be reused in new EES system? If yes, please share these details</p>	<p>No.</p>
<p>93. RFP Section Reference General RFP Page Number NA</p> <p>What are the different content types supported by the existing content management system (i.e. *.jpeg, .Tiff, *.doc, .htm, .pdf etc.)?</p>	<p>The current solution (FileDirector) stores images in .tiff and .jpeg formats.</p>
<p>94. RFP Section Reference GLOSSARY OF TERMS RFP Page Number Page vii</p> <p>Conversion period is defined to be 6 months. Does this mean that data conversion activity should be completed within 6 months after project start?</p>	<p>No. While that timeframe may prove to be appropriate for data conversion, the definition refers specifically to conversion of "Operating System".</p>
<p>95. RFP Section Reference Appendix-B - (RPT020) RFP Page Number B-10</p> <p>This Requirements needs that state worker shall be able to save the reports in multiple industry standard formats. We propose to incorporate the following - Excel, PDF and CSV. Please confirm if these are acceptable.</p>	<p>Those are acceptable formats and would constitute the minimum set. Bidders should provide a list of formats that they can support.</p>
<p>96. RFP Section Reference IV. PROJECT DESCRIPTION AND SCOPE OF WORK RFP Page Number 71</p> <p>Network Intrusion Testing and Security Audits: Do you have list of firms as approved by the State of Nebraska?</p>	<p>The State does not have a list of pre-qualified firms for this type of testing. The Bidder is responsible for identifying a firm which would then be submitted to the State for approval.</p>

QUESTIONS	ANSWERS
<p>97. RFP Section Reference IV. PROJECT DESCRIPTION AND SCOPE OF WORK: A. PROJECT OVERVIEW RFP Page Number 43</p> <p>Scenario - An applicant applies for coverage through EES and becomes eligible for non-QHP, non-Medicaid programs</p> <p>Question - In this case, is it expected to redirect the user to Access Nebraska? If not, should the EES system have interface with N-FOCUS for eligibility determination for respective non Medicaid programs?</p>	<p>While the State expects that the EES will someday handle more of the programs currently handled by N-FOCUS, the scope of this project is to implement Medicaid eligibility and enrollment only. Therefore, the EES will handle Medicaid and N-FOCUS will handle non-Medicaid programs. There should be no need to redirect the user.</p>
<p>98. RFP Section Reference IV. PROJECT DESCRIPTION AND SCOPE OF WORK : A. PROJECT OVERVIEW RFP Page Number NA</p> <p>After the new EES system goes into production, there could be members in the old system that might be eligible after couple of months of go-live. Are such users expected to re-enroll via EES or will N-FOCUS generate any automated triggers?</p>	<p>The answer should be defined in the implementation/conversion plan provided by bidders. N-FOCUS currently provides triggers.</p> <p>The State would like to minimize the amount of client interaction required due to an implementation/conversion.</p>
<p>99. RFP Section Reference IV. PROJECT DESCRIPTION AND SCOPE OF WORK: A. PROJECT OVERVIEW RFP Page Number 43</p> <p>Is EES expected to have a real time interface with N-FOCUS for non-Medicaid eligibility determination?</p>	<p>No, N-FOCUS does not currently support real time determination</p>
<p>100. RFP Section Reference IV. PROJECT DESCRIPTION AND SCOPE OF WORK: Identity Management RFP Page Number 35</p> <p>Do you want single sign on mechanism using Windows Native Authentication?</p>	<p>While not a specific requirement for this implementation, the goal is to reduce the number of sign-ons the user must endure, and therefore would like to understand the bidder's ability to support this goal.</p>

QUESTIONS	ANSWERS
<p>101. RFP Section Reference IV. PROJECT DESCRIPTION AND SCOPE OF WORK : Identity Management RFP Page Number 35</p> <p>Please share details of the existing Identity management solution. What is the current user store (LDAP) for authentication and authorization?</p>	<p>The current user store (LDAP) for authentication and authorization is Microsoft Active Directory 2008 R2.</p>
<p>102. RFP Section Reference IV. PROJECT DESCRIPTION AND SCOPE OF WORK: Identity Management RFP Page Number NA</p> <p>Is it expected the user-id in the RACF be ported to the new Identity & Access Management? The rules governing user-id creation in the new system may not be same as what is there in RACF.</p>	<p>No, it is not.</p>
<p>103. RFP Section Reference IV. PROJECT DESCRIPTION AND SCOPE OF WORK: DEPLOYMENT RFP Page Number 51</p> <p>Please describe your backup requirements based on existing data size and projected growth for next 2 years.</p> <p>Please share the current data classification, data size and frequency of backup</p> <p>Please share the volume of data available on site and off site using online, near line, and off line backups.</p>	<p>Please refer to the “Production Database by Table Size” for N-FOCUS table in Appendix A.</p> <p>Currently production mainframe DASD (including N-FOCUS data) is mirrored in real time to the state’s disaster recovery site. For the N-FOCUS DB2 database, a full image copy is done twice per day, once before the batch schedule and once after the batch cycle is completed. The image copy is first written to virtual tape, then to physical tape. The disaster recovery (physical) tapes are kept on site for approximately 24 hours and then offsite data is kept for 7 days.</p> <p>These backups all encompass the entire N-FOCUS DB2 database.</p> <p>Currently, N-FOCUS database growth is projected at approximately 10% annually.</p>
<p>104. RFP Section Reference IV. PROJECT DESCRIPTION AND SCOPE OF WORK: DISASTER RECOVERY/BACK UP PLAN RFP Page Number 39</p> <p>Please provide your classification for business criticality of the EES system from the Disaster Recovery standpoint. What are the expected Recovery Time Objective (RTO) and Recovery Point Objective (RPO) for EES?</p>	<p>The Department considers these to be Service Levels that fall within the scope of Section IV.P on page number 98.</p> <p>For the purposes of proposal, the Bidder should use the following. The Department considers the EES to be a Class 2 system. The RTO threshold is 24 hours, and the RPO goal would be zero data loss. The Department realizes that in extreme cases zero data loss may not be achievable so The Department is willing to accept 8 hours.</p>

QUESTIONS	ANSWERS
<p>105. RFP Section Reference IV. PROJECT DESCRIPTION AND SCOPE OF WORK: Identity Management RFP Page Number 35</p> <p>Is it required to do provisioning for any other target system, or downstream application, using Identity Manager?</p>	<p>While not a specific requirement for this implementation, the goal is to reuse/leverage the investment where feasible, and therefore would like to understand the Bidder's ability to support this goal.</p>
<p>106. RFP Section Reference IV. PROJECT DESCRIPTION AND SCOPE OF WORK: MIGRATION PLAN RFP Page Number 35</p> <p>Please share details of volume of data, type of data (e.g. membership only) and number of tables to be migrated from NFOCUS to EES? Also, please elaborate on how many past years data should be migrated.</p>	<p>Please refer to the "Production Database by Table Size" for N-FOCUS table in Appendix A. N-FOCUS to EES conversion requirements have not been determined</p>
<p>107. RFP Section Reference IV. PROJECT DESCRIPTION AND SCOPE OF WORK: RISK MANAGEMENT AND RESOLUTION RFP Page Number 56</p> <p>Please share an estimate for the number of information assets in the existing N-FOCUS system to be covered under 'risk assessment' post implementation of the new EES System.</p>	<p>This section of the proposal refers to Risk Management during the execution of the project as opposed to the on-going EES, and therefore does not apply to post-implementation.</p>
<p>108. RFP Section Reference IV. PROJECT DESCRIPTION AND SCOPE OF WORK: Section E Non-Functional requirements RFP Page Number 39</p> <p>What functionalities from N-FOCUS need to be implemented in EES? For E.g. – If the eligibility system in the new portal determines the individual is eligible for other non-Medicaid program then it will route the request to the legacy system. Is the current legacy capable of reading the message coming in from the new system & take appropriate action? Or is there a need to build new business logic in the legacy system to determine appropriate action? Also provide an estimate on the number of legacy application that may be impacted?</p>	<p>These are design details that the State believes are best developed in the course of executing the project.</p> <p>The State anticipates that the Contractor will provide the necessary expertise to aid the State in determining the best option.</p>

QUESTIONS	ANSWERS
<p>109. RFP Section Reference IV. PROJECT DESCRIPTION AND SCOPE OF WORK: PROVIDE POST IMPLEMENTATION SUPPORT RFP Page Number 91</p> <p>Please elaborate on the scope of the 'reactive modifications' as covered by the warranty clause</p>	<p>Reactive modifications include, but are not limited to, system changes or development activities needed to remedy system faults and/or gaps in the system functionality which were to be delivered as part of the scope of the project.</p>
<p>110. RFP Section Reference IV. PROJECT DESCRIPTION AND SCOPE OF WORK: PROVIDE POST IMPLEMENTATION SUPPORT RFP Page Number 91</p> <p>Will the State allow Contractor to offer 90 day warranty for Services and a 4 year warranty for Software, instead of 4 year warranty for both Services and Software if doing so would allow substantial cost savings to the State</p>	<p>The Department agrees to amend this requirement to 180 days of warranty for Services and 4 years of warranty for Software.</p>
<p>111. RFP Section Reference IV.8(Item C – IT Component Capacity Planning) RFP Page Number 38</p> <p><i>Please note: This question was previously submitted to the Department on 11/08/2013.</i></p> <p>Can the Department please clarify the Department's objective in requiring a Tier IV datacenter which can result in a higher cost for the Department? Tier III + facilities can meet necessary uptime and redundancy requirements for a lower cost without restricting competition to a few data centers.</p>	<p>After further consideration, the State has determined that it is open to the use of a Tier III facility so long as the Bidder can identify those areas where cost drove the decision and the increased risk that it presents.</p>

QUESTIONS	ANSWERS
<p>112. RFP Section Reference IV.E.1. RFP Page Number 39-40</p> <p><i>Please note: This question was previously submitted to the Department on 11/08/2013.</i></p> <p>The RFP states “The EES Contractor will be responsible for supporting the required modifications to N-FOCUS to integrate with the EES.” Could the Department clarify the nature of the support expected? Is the contractor expected to perform modifications to N-FOCUS? If new (rather than modified) interfaces to N-FOCUS are required, is the development of these interfaces the responsibility of the Contractor, the Department, or both?</p>	<p>Successful integration of the two systems will require the involvement of both the State and the Contractor, and therefore will be the responsibility of both parties.</p> <p>While the Contractor will not be expected to perform the actual modifications to the N-FOCUS system, they will be expected to support the analysis, design, testing and implementation of those modifications, in addition to any and all changes needed in the EES to support the integration.</p>

QUESTIONS	ANSWERS
<p>113. RFP Section Reference V. A. 3. i. RFP Page Number 107</p> <p><i>Please note: This question was previously submitted to the Department on 11/08/2013.</i></p> <p>RFP Section V. A. 3. i. (page 107) states that the State of Nebraska will provide workspace, equipment and conference telephone capabilities to house the EES Contractor staff in Lincoln, NE. However, RFP Section V, A. 3. d. (page 103) states “The bidder’s office location responsible for performance pursuant to an award of a contract with the State of Nebraska must be identified.”</p> <p>With the exception of the service desk and application support help desk which may be located anywhere within the United States and training facilities provided by the Department, could the Department please clarify who provides the primary place of performance for the main project office (i.e., the Department or the vendor)? If the place of performance is at a Department provided facility, will the Department provide office furniture and equipment and office supplies in addition to the workspace, equipment and conference telephone capabilities?</p>	<p>RFP Section V, A. 3. d. (page 103) refers to the Contractor’s business office location responsible for the performance of the contract. This could be a regional, Divisional or Corporate office location.</p> <p>RFP Section V. A. 3. i. (page 107) refers to the work to be performed in Lincoln, NE. The State of Nebraska will provide workspace with office furniture, equipment and conference telephone capabilities to house the EES Contractor staff in Lincoln, NE. Basic office supplies will be provided.</p>
<p>114. RFP Section Reference IV.F.15 RFP Page Number 69</p> <p>The RFP states: “Stress/Performance Testing is performed to ensure that the technical, application, data and network architectures are sufficiently designed and sized to meet the anticipated transaction volume or workload.”</p> <p>Does the Department have defined exit criteria for quality and performance testing (i.e. page response time under load)? If so, can they be provided so that vendors can better estimate the level of effort needed for this project?</p>	<p>The State considers these to be Service Levels that fall within the scope of Section IV.P on page number 98.</p> <p>The Bidder is to include this in their proposed SLRs, and to include the assumptions used to determine the proposed solution.</p>

QUESTIONS	ANSWERS
<p>115. RFP Section Reference Appendix B ELG044 RFP Page Number B-21</p> <p>The RFP states: “The EES shall refer cases with potentially fraudulent activity to appropriate agency.”</p> <p>There are not requirements for fraud detection; Will the state please provide specific requirements for fraud detection?</p>	<p>Currently, fraud detection occurs when a worker refers a case to the Special Investigation Unit (SIU) for review. SIU utilizes the eligibility system when completing their investigating.</p> <p>Bidders should include recommendations to assist with fraud detection in their technical response.</p>
<p>116. RFP Section Reference V.A.3.i. RFP Page Number 109</p> <p>Please confirm the tasks associated with system maintenance and systems changes (ref. page 109 and 110) will be proposed and invoiced based on a T&M basis utilizing the fixed hourly rates.</p>	<p>The State of Nebraska considers system maintenance and system changes are part of the responsibilities of operating the EES Solution. Some activities performed by Contractor staff will be considered system maintenance (e.g., operating system patching) and as such those activities are to be considered and budgeted as part of the annual fixed administrative fee.</p>
<p>117. RFP Section Reference Form C-2 RFP Page Number 117</p> <p>Form C-2 Milestones and Deliverables Mapping and Schedule identifies the % of payment by milestone upon successful completion. RFP page 110 states: “Some activities performed by Contractor staff will be considered system maintenance (e.g., operating system patching) and as such those activities are to be considered and budgeted as part of the annual fixed administrative fee”. Please confirm this milestone schedule (C-2) will not address the tasks associated with system maintenance and systems changes which are based on fixed hourly rates and only incurred when needed per RFP page 110 -111.</p>	<p>Form C-3 not C-2 identifies the % of payment by milestone. Bidders are responsible to ensure C-2 includes all milestones and deliverables identified in this RFP and any additional milestones or deliverables identified by the Bidder that are needed to successfully meet the goals of the project.</p>
<p>118. RFP Section Reference Appendix B RFP Page Number B-6, GEN 066</p> <p>The RFP states “The EES shall provide the capability to defined and stored DDHS specific data. The ability to use the data to drive workflow or pre-populate forms.” Could the Department further elaborate on this requirement so that the vendors can properly scope this requirement?</p>	<p>The Department is anticipating the system to be able to capture and store user-defined data fields that are specific to our State. In addition, it is expected that these fields will be available for display (on-line or print), or to be utilized as part of the system rules or business process.</p>

QUESTIONS	ANSWERS
<p>119. RFP Section Reference Appendix B RFP Page Number B-19, ELG 024</p> <p>The RFP states “The EES shall identify and flag expedited benefit cases, with user configurable triggers for expedited cases.” What program types are expedited? Please provide the requirements for the expedited process.</p>	<p>The Department currently doesn’t have any expedited eligibility policies for Medicaid. However there is the potential for future populations. The Department envisions the EES to be able to handle implementation of a regulation that would require an expedited implementation date or process.</p>
<p>120. RFP Section Reference Appendix B RFP Page Number B-20, ELG 027</p> <p>The RFP states “The EES shall accept complete applications from the Marketplace electronically and make Medicaid eligibility determination without requiring additional information from the applicant consistent with the policies set in the State Plan Amendment.” Could the Department provide the referenced State Plan Amendment?</p>	<p>The referenced State Plan Amendment has not been submitted or approved yet by CMS.</p>
<p>121. RFP Section Reference Appendix B RFP Page Number B-21, ELG 045</p> <p>The RFP states “The EES shall identify applications which are pending HUB Citizenship etc. verification.” Please define “etc.”</p>	<p>The EES shall identify any cases that have delays in any data returned by the HUB.</p>
<p>122. RFP Section Reference Appendix C RFP Page Number C-19, RSR 074</p> <p>The RFP states “The EES shall provide the ability to prevent specified user(s) or groups from accessing confidential information such as a patient’s chart.” This is the only reference to a patient’s chart in the requirements. Is the EES required to access/store patient charts which are typically not part of an eligibility system?</p>	<p>Supporting clinical information/medical information is submitted occasionally in order to determine Medicaid eligibility related to a disability determination. Medical records and other patient specific medical documents/information should not be viewable in client or provider accounts.</p>

QUESTIONS	ANSWERS
<p>123. RFP Section Reference Appendix B RFP Page Number B-19</p> <p>Item ELG 017: "...The EES shall integrate with the existing or replace pre-application screening without entering any personal identifying information..."</p> <p>Would the Department be able to provide additional info to help better understand the functionality of the existing pre-application screening tool?</p>	<p>The Department has a Web-based tool called <u>Am I Eligible</u> on the website <u>www.ACCESSNebraska.ne.gov</u> . The Department would like to utilize a similar tool for Medicaid screening with the new EES system.</p>
<p>124. RFP Section Reference IV.N RFP Page Number 82</p> <p>The RFP states: "Both the Service Desk and Application Support Help Desk must be integrated into the internal support structures within the State of Nebraska" Please define the requirements for this integration.</p>	<p>The details of this integration are best developed in the course of executing the project.</p> <p>The high-level expectation is that the Contractor Service Desk and Application Support Help Desk process will be integrated with the State Help Desk and Application support processes in a way that is seamless to the user</p>
<p>125. RFP Section Reference V.A.3.f. RFP Page Number 103</p> <p>RFP Section V.A.3.f. states, "If any employee of any agency of the State of Nebraska is employed by the bidder or is a subcontractor to the bidder, as of the due date for proposal submission, identify all such persons by name, position held with the bidder, and position held with the State (including job title and agency)." Could the Department clarify that this is limited to Contractor and Subcontractor employees being proposed under this proposal?</p>	<p>Yes, this requirement is limited to the Contractor and Subcontractor employees being proposed under this proposal</p>

QUESTIONS	ANSWERS
<p>126. RFP Section Reference IV. I RFP Page Number 77</p> <p>Can the Department provide the following information as relates to training:</p> <ol style="list-style-type: none"> 1. The percentage breakout of the 400 staff to be trained i.e., percent of eligibility workers vs. percent of support staff 2. A map showing the disbursement of staff that would logically attend training by RFP-identified training center 3. A description of the facilities to be used for training to include the number of workstations to be used for hands-on training, available equipment, etc. 	<p>Of the 400 workers to be trained, 88.5% are eligibility workers, 11.5% are support staff.</p> <p>The Staff Training map in Appendix A shows the distribution of staff to be trained and the location of the training centers. Training centers contain equipment sufficient to meet training needs.</p> <p>Available training sites:</p> <ol style="list-style-type: none"> a) Scottsbluff located in Scottsbluff County has two training rooms. Each room seats 20. b) Norfolk Veterans Home located in Madison County has 14 seats. c) Omaha located in Douglas County has two rooms; one room seats 18 and the other seats 16. d) Eastern Nebraska Veterans Home, located in Sarpy County has 14 seats. e) Grand Island Veterans Home located in Hall County has 12 seats. f) Hastings Regional Center located in Adams County has 12 seats. g) Lincoln, TAB located in Lancaster Country, Cottage 3 has 14 seats. h) Lexington CSC located in Dawson County has 18 seats. <p>Lincoln CSC, two rooms; One room seats 10, one room seats 25.</p>

QUESTIONS	ANSWERS
<p>127. RFP Section Reference Appendix B RFP Page Number Gen 012</p> <p>The RFP states: “The EES shall achieve the necessary degree of interoperability between technology components to determine eligibility for Medicaid or CHIP or if the customer is not eligible for Medicaid a transfer to the FFM”</p> <p>This requirement is only one, of very few, to reference CHIP. Since the Medicaid.gov website indicates that NE has a combined program model for CHIP, can the Department please clarify:</p> <p>Is unborn coverage the only separate CHIP coverage?</p> <p>Is this coverage in-scope for ESS?</p>	<p>Currently unborn coverage is the only separate CHIP. However, effective January 1, 2014 the State will implement the mandated 2101(f) CHIP. This coverage is in scope for the EES.</p>
<p>128. RFP Section Reference Appendix B RFP Page Number Gen 019</p> <p>The RFP states: “The EES shall have the ability to schedule staff performing call center functions, back office functions, local office appointments, and be integrated with task manager”</p> <p>Does the Department already use separate task manager software and if so, can the Department identify/describe the product?</p>	<p>The Department currently does not have this software available.</p>
<p>129. RFP Section Reference Appendix B RFP Page Number Gen 024</p> <p>The RFP states: “The EES shall accommodate phone application voice signature mechanism”</p> <p>Will the Department please clarify what the EES functionality is that is expected for this requirement?</p>	<p>The ACA requires Medicaid programs to accept applications with signatures via several mechanisms, including phone. Nebraska currently has a method to record voice signatures for phone applications. However, the State would like to see what alternatives exist in the market and would like to see how the voice signature is stored, indexed and retrieved with other eligibility information.</p>

QUESTIONS	ANSWERS
<p>130. RFP Section Reference Appendix B RFP Page Number Gen 068</p> <p>The RFP states: “The EES shall provide the capability for presumptive eligibility as defined by the Department and include provider web access for application purposes.”</p> <p>Please provide the presumptive eligibility workflow followed by Nebraska.</p>	<p>Hospital presumptive policies are currently under development. The State will work with the selected Contractor during JAD sessions to finalize workflows.</p>
<p>131. RFP Section Reference Appendix B RFP Page Number OPS 002</p> <p>The RFP states: “The EES shall support integrated eligibility system and/or reduce errors associated with processing eligibility for more complex populations”</p> <p>Will the Department please clarify the programs and requirements as it relates to supporting integrated eligibility?</p>	<p>The programs to be supported are the Medicaid programs and may include MAGI and non-MAGI eligibility. Future integration could include Economic Assistance Programs such as Temporary Assistance for Needy Families, Child Care, Supplemental Nutrition Assistance Program, etc.</p>
<p>132. RFP Section Reference Appendix B RFP Page Number ELG 004</p> <p>The RFP states: “The EES shall support the use of supplemental application for initial eligibility determinations, renewals or changes to existing Medicaid clients.”</p> <p>Has the Department already created its alternative application and if so can the Department please make this available to the bidders? Is the EES vendor responsible for programming of the supplemental application in the EES?</p>	<p>The Supplemental Application is available as a fillable pdf application on the ACCESSNebraska website www.ACCESSNebraska.ne.gov ; it is called Supplemental Application for Insurance Affordability Programs. Yes, the EES vendor is responsible for the inclusion of this information as a part of online applications.</p>

QUESTIONS	ANSWERS
<p>133. RFP Section Reference Appendix B RFP Page Number ELG 021</p> <p>The RFP states: “The EES shall provide informational fact sheets on programs for which the customer is potentially eligible.”</p> <p>Is it the intent that these fact sheets be available to citizens via the web portal OR is the EES vendor responsible for distributing these sheets? If the later, is it the Department’s intention to provide the vendor with the content for the fact sheets for printing and mailing purposes? If so, can the Department estimate monthly volumes as well as costs for postage?</p>	<p>The fact sheet should be part of the online screening tool and available in the web portal. It also could be content for client accounts and/or included on Department communication via letters, notices, etc.</p> <p>The EES vender is not responsible for distribution of information sheets.</p>
<p>134. RFP Section Reference Appendix B RFP Page Number ELG 073</p> <p>The RFP states: “The EES shall allow users to apply disposition action holds on records”</p> <p>Since requirements regarding a “hold on benefits” vary considerably by state, will the Department please provide an example of a situation that requires a “hold” on a client record so we can more accurately assess our current system functionality against Nebraska’s requirement?</p>	<p>Currently the Department does not apply any holds; the case is left in pending status. The State would like to explore options for holds during requirements JAD sessions. An example of when a hold could be used is resource spend down.</p>
<p>135. RFP Section Reference B. IV. 2.e.iii RFP Page Number 46</p> <p>The RFP states, “Describe the approach to implementing the MDM technologies to build a Master Client Index/Enterprise Master Person Index to meet the Department’s requirements in each phase of the implementation”</p> <p>Which systems of record and other systems will the EES need to interface with?</p>	<p>These are design details that the State believes are best developed in the course of executing the project.</p> <p>The State anticipates that the Contractor will provide the necessary expertise to aid the Department in determining the best option.</p>

QUESTIONS	ANSWERS
<p>136. Section IV. PROJECT DESCRIPTION AND SCOPE OF WORK E. NON-FUNCTIONAL REQUIREMENTS Page 39</p> <p>Key Assumptions table - EES # 6: The EES Contractor will be responsible for supporting the required modifications to N-FOCUS to integrate with the EES.</p> <p>Could you please clarify this assumption and what is meant by "supporting the required modifications to N-FOCUS"?</p>	<p>Successful integration of the two systems will require the involvement of both the State and the Contractor, and therefore will be the responsibility of both parties.</p> <p>While the Contractor will not be expected to perform the actual modifications to the N-FOCUS system, they will be expected to support the analysis, design, testing and implementation of those modifications, in addition to any and all changes needed in the EES to support the integration.</p>
<p>137. RFP Section Reference Appendix B and Appendix C RFP Page Number Page B-1 and C-1</p> <p>In responding to both the functional and technical Requirements Traceability Matrices (RTM), we have found that using multiple Ability Codes per requirement can give the State a better understanding of our ability to satisfy the requirement. For example, we may satisfy a requirement as a Standard Function (S) in our solution, but the functionality in the solution may be provided by a third party COTS product (O), (e.g., the rules in our solution are managed in an externalized third-party rules engine per CMS mandates). Will the State permit the use of multiple Ability Codes per requirement where we feel it will better describe our solution?</p>	<p>Multiple ability codes are not necessary. In your example the ability codes should be O, the requirement is satisfied through the use of a separate software package. The Bidder must identify those package(s) and describe how the functionality is integrated into the base system.</p>
<p>138. RFP Section Reference Appendix B RFP Page Number Multiple in Appendix B</p> <p>Within the Appendix B Functional Requirements, there are multiple instances of a requirement being duplicated across 2 different requirements. Some examples include ELG 078 and ELG 111, ELG 079 and ELG 112, APP 002 and APP 050, GEN 057 and APP 003, & ELG 075 and APP 044. Is it the State's intention to have different requirement text for these requirements or does the State desire the bidder to respond with the same response for these requirement sets?</p>	<p>See the revised Appendix B Functional Requirements.</p> <p>The following requirements have been deleted:</p> <p>ELG 075, ELG 111 and ELG 112</p> <p>APP 003 and App 050</p>

QUESTIONS	ANSWERS
<p>139. RFP Section Reference Appendix B RFP Page Number B-19</p> <p>On the Appendix B Functional Requirements, the Requirement IDs ELG 020 and ELG 021 have been assigned to two different requirements. Does the State desire to renumber the requirements so that each has a unique Requirement ID?</p>	<p>See the revised Appendix B Functional Requirements.</p>
<p>140. RFP Section Reference I.A.5 RFP Page Number 1</p> <p>In RFP section I.A.5, the State intends to issue answers to Round Two questions on December 20. Given the short timeframe between December 20 and the actual due date of proposal responses of January 7, and the desire to fully incorporate the direction received from the State on these questions, would it be possible to have the State release responses periodically between December 6 and December 20, to allow vendor teams more time to incorporate the answers more thoroughly?</p>	<p>The State will not respond to questions as they are received. The State will respond to questions on the date presented in RFP Section I.A Schedule of Events.</p>
<p>141. RFP Section Reference IV.E.1.6 RFP Page Number 40</p> <p>In the assumptions provided in Section IV.E, Assumption 6, the State assumes the EES Contractor will be responsible for supporting required modifications to N-FOCUS to integrate with the EES. Is it to be assumed that State staff will lead this effort? Is the vendor team required only to provide information and testing support on changes to the EES solution to interface with N-FOCUS?</p> <p>If not, and the vendor is required to direct the effort to modify N-FOCUS, what State staff will be provided to assist in that effort, at what level, and for what duration?</p>	<p>Successful integration of the two systems will require the involvement of both the State and the Contractor, and therefore will be the responsibility of both parties.</p> <p>While the Contractor will not be expected to perform the actual modifications to the N-FOCUS system, they will be expected to support the analysis, design, testing and implementation of those modifications, in addition to any and all changes needed in the EES to support the integration.</p>

QUESTIONS	ANSWERS
<p>142. RFP Section Reference IV.E.8 RFP Page Number 40</p> <p>Section IV.E, Assumption 8 states that all technical support and system hosting must be provided by individuals residing in the continental United States. For other activities in scope of the RFP such as the build of the Solution, is Nebraska allowing work to be performed outside of the continental United States, providing non-domestic staff would have no access to production data?</p>	<p>No.</p> <p>The Department understands that many COTS solutions on the market are developed utilizing resources outside of the United States. For the purposes of this project, the Department will accept the use of systems and/or core components previously developed using non-domestic resources as part of the base system, but require that all work specific to the Nebraska solution be performed by individuals residing in the United States.</p>
<p>143. RFP Section Reference Section IV.N RFP Page Number 33, 83, 84, 95</p> <p>Please clarify the scope of the vendor in relation to the Hosting of the Solution for Non-production and Production environments during the DDI phase and post-implementation. The RFP contains direction within page 33 and 83 that the EES Contractor will be responsible for Hosting during the DDI and post-implementation phases while pages 84 and 95 contain language around a potential transition of the hosting to a State Data Center and states that Hosting "may" be in scope. Please describe the desired hosting solution that should be included and priced by each vendor in order to get bids with the same hosting scope.</p>	<p>The Bidder should plan on hosting the environments for a minimum of six (6) years with the potential of ten (10) years.</p> <p>The first six years are comprised of the two (2) year initial period and the four (4) year Base M&O. The additional four (4) years represent the two optional two (2) year extensions.</p> <p>During the course of the contract the State may choose to move to an alternate data center as indicated in Section IV.O Turnover.</p>
<p>144. RFP Section Reference IV. H RFP Page Number 76-77</p> <p>Should implementation of the Change Management Plan be included in the vendor's Solution and Pricing, or is the vendor expected to support implementation of the Plan by the State or an OCM vendor? If the State is expecting to participate in OCM implementation, please describe the types and quantity of State resources the vendor may assume will be participating.</p>	<p>Implementation of the Change Management Plan should be included in the Solution and pricing. The State will participate in OCM implementation as stakeholders and change leaders that can deliver messages as part of the plan; however the State is planning on the EES Contractor leading and performing the OCM implementation activities.</p>

QUESTIONS	ANSWERS
<p>145. RFP Section Reference Scope of Service - Cover Page RFP Page Number RFP Cover Page - Limit of Liability Restriction</p> <p>Our response and submission is dependent upon our ability to negotiate and reach mutual agreement upon critical industry standard terms and conditions applicable to similar Integrated Eligibility projects. Toward that end, will the State confirm whether the Department will negotiate and consider the inclusion of a limitation of liability on a contractor's performance that will be incorporated into the Final Contract? For purposes of clarity, this limitation is separate from the issue of any indemnification in favor of a contractor or supplier.</p>	<p>The State of Nebraska will not negotiate terms and conditions prior to the Award Process; however the State will be open to a discussion on this topic with the selected contractor only during contract negotiations.</p>
<p>146. RFP Section Reference I.A RFP Page Number 1</p> <p>The RFP identifies the process by which a bidder can submit exceptions to the State's proposed Terms and Conditions. The Procurement timeline in the RFP, however, does not contain a specified time period in which the parties will negotiate to reach agreement on mutually acceptable Terms and Conditions. Can the State please clarify at what point in the Procurement process a bidder's proposed exceptions to the Contract Terms and Conditions will be discussed and negotiated?</p>	<p>Any Terms and Conditions that the bidder has taken exception to will be negotiated during the Award Process.</p>

QUESTIONS	ANSWERS
<p>147. RFP Section Reference IV.C.8; IV.N.1-2 RFP Page Number 40,85,86</p> <p>The RFP currently asks for the Primary Data Center to be a Tier IV data center. A recent white paper by the Uptime Institute recommended a Tier IV level Data Center to be most appropriate for "Companies with an international market presence delivering "24 by forever" services in a highly competitive client-facing market space or where processes are continuous (international in- and outbound wire transfers, etc)". As a leading provider of Eligibility hosted solutions, we do not see the value of a Tier IV data center for the Nebraska hosted solution, especially considering the extra cost such centers typically add to the solution price, for features that are typically not necessary to meet the business requirements of an eligibility system. We kindly request that Nebraska consider going with a Tier III data center which is what other States' Eligibility solutions have been based upon.</p>	<p>After further consideration, the State has determined that it is open to the use of a Tier III facility so long as the Bidder can identify those areas where cost drove the decision and the increased risk that it presents.</p>
<p>148. RFP Section Reference III.DD RFP Page Number 19</p> <p>In light of the anticipated value of the solution responses to this RFP, the \$15 million Performance Bond appears to be well beyond the typical industry standard bond, which usually is 10% of total contract value at the maximum. To encourage bids from mature Eligibility Solution providers, would the State consider a reduction of the Performance Bond to 10% of contract value?</p>	<p>As referenced in the RFP, a Performance Bond or Certified Check will be required from the awarded contractor and at the dollar amount stated.</p>

QUESTIONS	ANSWERS
<p>149. RFP Section Reference IV.N.17 RFP Page Number 96</p> <p>Within Section IV.N.17, the RFP states that off-site hardware will remain the property of the contractor. In order for contractor's to provide the most robust Infrastructure solutions at the most competitive pricing, would Nebraska be willing to take ownership of the hardware (in title) following the Contractor's purchase of the hardware?</p>	<p>The State will consider cost saving related to hardware purchase options that a Bidder can provide. Please provide details in Round 2 for further research and analysis.</p>
<p>150. RFP Section Reference IV.C.2 RFP Page Number 35</p> <p>In Section IV.C.2, the State requests a "formal and highly tuned Data Warehouse and Data Mart Architecture". However, the RTM does not contain any requirements in regards to the State's expectation of the scope of the Data Warehouse or Data Marts. Can the State please elaborate on the expectations of the requested Data Warehouse and Data Marts to ensure contractor's bids assume the same scope?</p>	<p>In section IV.C.3, the Department identifies the need for "Analytics and Business Intelligence Tools and Repositories". The Data Warehouse and Data Mart would be considered part of the repositories.</p> <p>The State requests that Bidders provide the details of their capabilities in these areas and, if applicable, how they utilize them to satisfy the functional requirements of the proposed solution.</p>
<p>151. RFP Section Reference General RFP Page Number N/A</p> <p>Are there existing legacy systems that Nebraska DHS expects the contractor to reuse to meet the functionality described? If so, please specify the applications and versions.</p>	<p>From an applications perspective, the answer is no.</p> <p>To the degree possible, the Department would like to reuse/leverage existing standard infrastructure components. Some of which have already been identified, such as Hyland On-Base, the IVR, the document scanning platform, EDI gateway.</p>
<p>152. RFP Section Reference General RFP Page Number N/A</p> <p>After a bid is submitted, when is the deadline for withdrawing that bid?</p>	<p>Any bidder may withdraw their bid prior to the contract award.</p>

QUESTIONS	ANSWERS
<p>153. RFP Section Reference III Terms and Conditions RFP Page Number 19</p> <p>CC. PENALTY states</p> <p>"Failure to meet the dates stipulated in the contract for the deliverables may result in an assessment of penalty due the State of \$1,000 dollars per day, until the deliverables are approved."</p> <p>Please clarify the deliverable acceptance process and how the penalties would be applied in case of non-approval of a deliverable that is not priced or does not delay a milestone or another deliverable?</p>	<p>Please reference Section V. C</p> <p>"The payment schedule for the project is tied to specific dates and deliverables. Invoices may be submitted by the contractor on specific dates based on the completion and acceptance of related deliverables. No invoice will be approved unless the associated deliverables have been approved. The vendor will be given an opportunity to cure any defects prior to the penalty provision being utilized."</p>
<p>154. RFP Section Reference Appendix B RFP Page Number 125</p> <p>Functional Requirement OPS006 states</p> <p>"The EES shall support workers to improve workflow and reduce errors including: ... Logic Flags"</p> <p>What are "Logic flags"?</p>	<p>Logic Flags are the business rules that support notification of impossible condition, such as a pregnant male.</p>
<p>155. RFP Section Reference Appendix B RFP Page Number 125</p> <p>Functional Requirement GEN025 states</p> <p>"The EES shall validate and return address information errors as entered in the system."</p> <p>Does the state currently have an address verification service that the contractor should incorporate into the EES or does the state intend the contractor to propose a service as part of the EES?</p>	<p>The Department does not have an address verification service. The Department requires this capability as part of the Bidder's Technical solution.</p>
<p>156. RFP Section Reference Appendix C RFP Page Number 126</p> <p>Non-Functional Requirement PRT 016 states</p> <p>"The EES shall provide the capability to consume externally available mapping Web services."</p> <p>Does Nebraska DHS have a preferred mapping service? Does Nebraska DHS have available licenses?</p>	<p>No, the Department does not have a preferred mapping service or licenses.</p> <p>This is a desired capability, but it will most likely not be utilized in the initial implementation.</p>

QUESTIONS	ANSWERS
<p>157. RFP Section Reference Appendix C RFP Page Number 126</p> <p>Non-Functional Requirement WEB009 states</p> <p>"Facilitate the use of Microsoft Office creation tools to submit content directly into the WCM repository"</p> <p>Is "WCM" an acronym for WebSpehere Content Manager?</p>	<p>No, it is an acronym for Web Content Management which is the heading of subsection under which this requirement falls.</p>
<p>158. RFP Section Reference Appendix C RFP Page Number 126</p> <p>Non-Functional Requirement MDM031 states</p> <p>The EES shall integrate with the Department's Active Directory to provide authorization, e.g., role-based security."</p> <p>Is Active Directory hosted by the state or does the contractor need to link Active Directory into the system?</p> <p>Does this apply to internal and external users?</p> <p>Are all stored in Active Directory or just internal users?</p>	<p>The Department currently has an Active Directory infrastructure in place.</p> <p>It applies to both internal and external users of the system. Currently external users (who connect via Citrix) utilize the Department Active Directory for authentication.</p> <p>Both internal and external users are in Active Directory.</p>

QUESTIONS	ANSWERS
<p>159. RFP Section Reference Appendix B RFP Page Number B-19</p> <p>Appendix B includes ELG 20 and ELG21 twice, with different values. The listing appears as follows:</p> <p>ELG 020 = The EES shall apply eligibility rules to identify and flag potential financial and non-financial eligibility.</p> <p>ELG 021 = The EES shall provide the customer information on eligibility and general verification requirements for Medicaid eligibility and timelines for applications and verification processes.</p> <p>ELG 020 = The EES shall access educational materials on functions of Medicaid and on other state programs.</p> <p>ELG 021 = The EES shall provide informational fact sheets on programs for which the customer is potentially eligible.</p> <p>Will the State please confirm the numbering for these requirements and subsequently determine the impact and numbering of the remaining ELG requirements listed?</p>	<p>See the revised Appendix B Functional Requirements.</p>

QUESTIONS	ANSWERS
<p>160. RFP Section Reference Appendix D RFP Page Number 140</p> <p>The RFP states:</p> <p>Any requirements that the Bidder cannot attest to full compliance; i.e., provides a value of “N” in the Compliant field of the Appendix B Functional Requirements Traceability Matrix or Appendix C Non-Functional Requirements Traceability Matrix, must document the requirement gap as outlined in this Appendix. The Bidder must ensure that the Gap Analysis Matrix contains an entry for each requirement where one or more of these conditions are true:</p> <ol style="list-style-type: none"> 1. The Bidder has indicated “N” to Compliant in either RTM 2. The Bidder has indicated “M”, “F”, “C” or “O” to Availability in either RTM 3. The Bidder has indicated that an extensive integration effort of more than 2,500 hours will be needed to meet the requirement as documented in the Key Features of the EES description in the RTM. <ol style="list-style-type: none"> a) The first sentence in this paragraph indicates that the vendor must document Appendix B and C RTM items marked “N” must be included as an entry in Appendix D Fit Gap Analysis. The numbers list seems to indicate that items scored as N, M, F, C or O must be included as items in the Fit Gap Analysis. <p>Will the State please clarify which items must be included in the Fit Gap Analysis?</p> <ol style="list-style-type: none"> b) Additionally the initial sentence also makes reference to a Compliant field and the numbered list makes reference to Availability. Neither Appendix B nor C contains Compliant or Availability fields. <p>Will the State please clarify this statement?</p> 	<p>See the revised instructions for Appendices B, C and D.</p>

SCOPE OF ADDENDUM

Page numbers 125 through 128 of RFP 4544Z1 are hereby deleted in their entirety. All instructions for the appendices are incorporated into the individual documents (Appendix A, Appendix B, Appendix C, Appendix D) located at:

<http://das.nebraska.gov/materiel/purchasing/4544.htm>

Page number 124 of RFP 4544Z1 is hereby replaced and superseded with the following:

Appendix A

Bidder Library Content

Request for Proposal Number 4544Z1

The Procurement Library contains information which should be of use to the vendor in developing their proposed solution.

Medicaid Eligibility and Enrollment System
MMIS Existing Infrastructure
N-FOCUS Overview
N-FOCUS Interface Documentation and Schedule
N-FOCUS Technical Overview
Technical Framework
Nebraska EES Analysis
EES IV&V RFP
Production Database Size by table for N-Focus
Staff in County
ANDI Full Architecture

This addendum will become part of the proposal and should be acknowledged with the RFP.

OPENING DATE AND TIME	PROCUREMENT CONTACT
January 7, 2014 2:00 p.m. Central Time	Peter A. Kroll Robert Thompson

This form is part of the specification package and must be signed and returned, along with proposal documents, by the opening date and time specified.

PLEASE READ CAREFULLY!

SCOPE OF SERVICE

The State of Nebraska, Administrative Services (AS), Materiel Division, Purchasing Bureau, is issuing this Request for Proposal, RFP Number 4544Z1 for the purpose of selecting a qualified contractor to replace the functionality of the current Medicaid Eligibility and Enrollment (E&E) System with a modern COTS-based Eligibility and Enrollment Solution (EES) that meets the CMS Seven Standard and Conditions.

Written questions are due no later than November 12, 2013, and should be submitted via e-mail to as.materielpurchasing@nebraska.gov. Written questions may also be sent by facsimile to (402) 471-2089.

Bidder should submit one (1) original and one (1) hard copy of the Technical Proposal and one (1) original and one (1) hard copy of the Cost Proposal. In the event of any inconsistencies among the proposals, the language contained in the original proposal shall govern. Proposals must be submitted by the proposal due date and time.

PROPOSALS MUST MEET THE REQUIREMENTS OUTLINED IN THIS REQUEST FOR PROPOSAL TO BE CONSIDERED VALID. PROPOSALS WILL BE REJECTED IF NOT IN COMPLIANCE WITH THESE REQUIREMENTS.

1. Sealed proposals must be received in State Purchasing by the date and time of proposal opening indicated above. No late proposals will be accepted. No electronic, e-mail, fax, voice, or telephone proposals will be accepted.
2. This form "REQUEST FOR PROPOSAL FOR CONTRACTUAL SERVICES" MUST be manually signed, in ink, and returned by the proposal opening date and time along with bidder's proposal and any other requirements as specified in the Request for Proposal in order to be considered for an award.
3. It is the responsibility of the bidder to check the website for all information relevant to this solicitation to include addenda and/or amendments issued prior to the opening date. Website address is as follows: <http://das.nebraska.gov/materiel/purchasing/rfp.htm>
4. It is understood by the parties that in the State of Nebraska's opinion, any limitation on the contractor's liability is unconstitutional under the Nebraska State Constitution, Article XIII, Section 3, and that any limitation of liability shall not be binding on the State of Nebraska despite inclusion of such language in documents supplied with the contractor's bid or in the final contract.

BIDDER MUST COMPLETE THE FOLLOWING

By signing this Request For Proposal For Contractual Services form, the bidder guarantees compliance with the provisions stated in this Request for Proposal, agrees to the terms and conditions (see Section III) and certifies bidder maintains a drug free work place environment.

_____ I hereby certify that I am a Resident disabled veteran or business located in a designated enterprise zone in accordance with Neb. Rev Stat §73-107 and wish to have preference, if applicable, considered in the award of this contract.

GLOSSARY OF TERMS

Assistance to the Aged, Blind and Disabled (AABD): Medicaid available to certain Nebraskans to assist with medical expenses. Nebraskans who are aged, blind or have a disability (as classified by the Social Security Administration) must meet established financial guidelines in order to be eligible. Some consumers in the AABD Medicaid program access services through managed care while the remaining population access care through a fee-for-service delivery system.

Acceptance Test Procedure: Benchmarks and other performance criteria, developed by the State of Nebraska or other sources of testing standards, for measuring the effectiveness of products or services and the means used for testing such performance.

Affordable Care Act (ACA): On March 23, 2010, President Obama signed into law the Patient Protection and Affordable Care Act. On March 30, 2010, the Health Care and Education Reconciliation Act of 2010 was signed into law. The two laws are collectively referred to as the Affordable Care Act (ACA). ACA is also referred to as the “health reform act” or “Patient Protection and Affordable Care Act (PPACA).

ACCESSNebraska Web Portal: The public application portal for various Nebraska public assistance benefit programs such as: Medicaid, Supplemental Nutritional Assistance Program (SNAP), Temporary Assistance for Needy Families (TANF), Assistance to Aged, Blind and Disabled, Energy Assistance, Kids Connection, and Child Care Subsidy.

Addendum: Something added or deleted.

Agency: Any state agency, board, or commission other than the University of Nebraska, the Nebraska State colleges, the courts, the Legislature, or any officer or agency established by the Constitution of Nebraska.

Agent: A person authorized by a superior or organization to act on their behalf.

Amend: To alter or change by adding, subtracting, or substituting. A contract can be amended only by the parties participating in the contract. A written contract can only be amended in writing.

Amendment: Written correction or alteration.

Appropriation: Legislative authorization to expend public funds for a specific purpose. Money set apart for a specific use.

Award: All purchases, leases, or contracts which are based on competitive proposals will be awarded according to the provisions in the Request for Proposal. The State reserves the right to reject any or all proposals, wholly or in part, or to award to multiple bidders in whole or in part. The State reserves the right to waive any deviations or errors that are not material, do not invalidate the legitimacy of the proposal, and do not improve the bidder’s competitive position. All awards will be made in a manner deemed in the best interest of the State.

Best and Final Offer (BAFO): A second-stage bid in a public procurement for services.

Bid: The executed document submitted by a bidder in response to a Request for Proposal.

Bid Bond: A bond given by a surety on behalf of the bidder to ensure that the bidder will enter into the contract as bid and is retained by the State from the date of the bid opening to the date of contract signing.

Bidder: Any person or entity submitting a competitive bid response to a solicitation.

Business: Any corporation, partnership, individual, sole proprietorship, joint-stock company, joint venture, or any other private legal entity.

Business Day: Any weekday, excepting public holidays.

Calendar Day: Every day shown on the calendar; Saturdays, Sundays and State/Federal holidays included. Not to be confused with "Work Day".

Centers for Medicare & Medicaid Services (CMS): The federal agency within the United States Department of Health and Human Services (DHHS) that administers the Medicare program and works in partnership with state governments to administer Medicaid, the Children's Health Insurance Program (CHIP), and health insurance portability standards.

Children's Health Insurance Program (CHIP): Enacted in 1997, CHIP is a federal-state program that provides health care coverage for uninsured low-income children who are not eligible for Medicaid. States have the option of administering CHIP through their Medicaid programs or through a separate program (or a combination of both). The federal government matches state spending for CHIP but federal CHIP funds are capped.

Collusion: A secret agreement or cooperation between two or more persons or entities to accomplish a fraudulent, deceitful or unlawful purpose.

Competition: The process by which two or more vendors vie to secure the business of a purchaser by offering the most favorable terms as to price, quality, delivery and/or service.

Confidential Information: Unless otherwise defined below, "Confidential Information" shall also mean proprietary trade secrets, academic and scientific research work which is in progress and unpublished, and other information which if released would give advantage to business competitors and serve no public purpose (see Neb. Rev. Stat. §84-712.05(3)). In accordance with Nebraska Attorney General Opinions 92068 and 97033, proof that information is proprietary requires identification of specific, named competitor(s) who would be advantaged by release of the information and the specific advantage the competitor(s) would provide.

Configure: Modification to software that does not require changes to the Source Code for such software. This includes rules-based, rules engine based, or parameter driven modification.

Contract: An agreement between two or more persons to perform a specific act or acts.

Contract Administration: The Management of various facets of contracts to assure that the contractors total performance is in accordance with the contractual commitments and obligations to the purchaser are fulfilled.

Contract Management: Includes reviewing and approving of changes, executing renewals, handling disciplinary actions, adding additional users, and any other form of action that could change the contract.

Contractor: Any person or entity that supplies goods and/or services.

Conversion Period: A period of time not to exceed six (6) months, during which the State converts to a new Operating System under “Conversion” as per this RFP.

Copyright: A grant to a writer/artist that recognizes sole authorship/creation of a work and protects the creator’s interest(s) therein.

CPU: Any computer or computer system that is used by the State to store, process, or retrieve data or perform other functions using Operating Systems and applications software.

Critical Program Error: Any Program Error, whether or not known to the State, which prohibits or significantly impairs use of the Licensed Software as set forth in the documentation and intended in the contract.

Default: The omission or failure to perform a contractual duty.

Deviation: Any proposed change(s) or alteration(s) to either the contractual language or deliverables within the scope of this Request for Proposal.

Documentation: The user manuals and any other materials in any form or medium customarily provided by the contractor to the users of the Licensed Software which will provide the State with sufficient information to operate, diagnose, and maintain the Licensed Software properly, safely, and efficiently.

Evaluation Committee: A committee (or committees) appointed by the requesting agency that advises and assists the procuring office in the evaluation of proposals.

Evaluation of Proposal: The process of examining a proposal after opening to determine the bidder’s responsibility, responsiveness to requirements, and to ascertain other characteristics of the proposal that relate to determination of the successful bidder.

Extension: A provision, or exercise of a provision, of a contract that allows a continuance of the contract (at the option of the State of Nebraska) for an additional time according to contract conditions. Not to be confused with “Renewals.”

F.O.B. Destination: Free on Board. The delivery charges have been included in the quoted price and prepaid by the vendor. Vendor is responsible for all claims associated with damages during delivery of product.

Foreign Corporation: A foreign corporation is a corporation that was formed (i.e. incorporated) in another state but transacting business in Nebraska pursuant to a certificate of authority issued by the Nebraska Secretary of State.

Health Insurance Portability and Accountability Act of 1996 (HIPAA): The Standards for Security and Privacy of Individually Identifiable Health Information found in the Health Insurance Portability and Accountability Act of 1996, Public Law 104-91, as amended and related HIPAA regulations at 45 C.F.R. part 160-164, as in effect or as amended.

Installation Date: The date when the procedures described in “Installation by Contractor, and Installation by State”, as found in the RFP, are completed.

Late Proposal: A proposal received at the place specified in the solicitation after the date and time designated for all proposals to be received.

Licensed Software: Any and all software and documentation by which the State acquires or is granted any rights under the contract.

Local Time: Central Time in Lincoln, NE.

Modified Adjusted Gross Income (MAGI): A definition of income from the tax system that will be used to determine eligibility for certain categories of Medicaid eligibility in addition to tax credits available to people buying insurance in exchanges.

Mandatory: Required, compulsory or obligatory.

May: Denotes discretion.

Medicaid Information Technology Architecture (MITA): An initiative of the Centers for Medicare and Medicaid Services (CMS), aligned with the National Health Infrastructure Initiative (NHII), and intended to foster integrated business and information technology transformation across the Medicaid enterprise to improve the administration of the Medicaid program.

Module: A collection of routines and data structures that perform a specific function of the Licensed Software.

Must: Denotes the imperative, required, compulsory or obligatory.

Nebraska Family Online Client User System (N-FOCUS): The Nebraska Department's software application used to support eligibility determinations for Nebraska Medicaid, Nebraska CHIP and various Economic Assistance Programs. This system also provides additional functionality such as case management, provider management and payment calculations.

Opening Date: Specified date and time for the public opening of received, labeled and sealed formal proposals. Not to be confused with "Release Date".

Operating System: The control program in a computer that provides the interface to the computer hardware and peripheral devices, and the usage and allocation of memory resources, processor resources, input/output resources, and security resources.

Outsourcing: Acquiring computing or related services from a source outside of the State of Nebraska which may include programming and/or executing the State's Licensed Software on the State's CPU's, programming, and/or executing the State's programs and Licensed Software on the contractor's CPU's or any mix thereof.

Outsourcing Company: A company that provides Outsourcing Services under contract to the State.

Performance Bond: A bond given by a surety on behalf of the contractor to ensure the timely and proper (in sole estimation of the State) performance of a contract.

Protected Health Information (PHI): Individually identifiable health information that is transmitted by, or maintained in, electronic media or any other form or medium. Individually identifiable health information is information that is a subset of health information, including demographic information collected from an individual, and 1) is created or received by a healthcare provider, health plan, employer, or healthcare clearinghouse; and 2) related to the past, present, or future physical or mental health or condition of an individual; the provision of healthcare to an individual; or the past, pre-sent, or future payment for the provision of healthcare to an individual; (i) that identifies the individual; or (ii) with respect to which there is a reasonable basis to believe the information can be used to identify the individual.

Personally Identifiable Information (PII): Information: 1) that directly identifies an individual (e.g., name, address, social security number or other identifying number or code, telephone number, email, address, etc.), or 2) by which an agency intends to identify specific individuals in conjunction with other data elements, e.g., indirect identification. (These data elements may include a combination of gender, race, birth date, geographic indicator, and other descriptors.)

Platform: A specific hardware and Operating System combination that is different from other hardware and Operating System combinations to the extent that a different version of the Licensed Software product is required to execute properly in the environment established by such hardware and Operating System combination.

Patient Protection and Affordable Care Act (PPACA): See ACA: Affordable Care Act.

Pre-Proposal Conference: A meeting scheduled for the purpose of providing clarification regarding a Request for Proposal and related expectations.

Product: A module, a system, or any other software-related item provided by the contractor to the State.

Program Error: Code in Licensed Software which produces unintended results or actions, or which produces results or actions other than those described in the specifications. A program error includes, without limitation, any "Critical Program Error."

Program Set: The group of programs and products, including the Licensed Software specified in the RFP, plus any additional programs and products licensed by the State under the contract for use by the State.

Project: The total of all software, documentation, and services to be provided by the contractor under this contract.

Project Management Plan (PMP): A formal, approved document used to guide both project execution and project control. The primary uses of the Project Management Plan are to document planning assumptions and decisions, facilitate communication among stakeholders, and document approved scope, cost, and schedule baselines.

Proposal: The executed document submitted by a bidder in response to a Request for Proposal.

Proprietary Information: Proprietary information is defined as trade secrets, academic and scientific research work which is in progress and unpublished, and other information which if released would give advantage to business competitors and serve no public purpose (see Neb. Rev. Stat. §84-712.05(3)). In accordance with Attorney General Opinions 92068 and 97033, proof that information is proprietary requires identification of specific, named competitor(s) who would be advantaged by release of the information and the specific advantage the competitor(s) would receive.

Protest: A complaint about a governmental action or decision related to a Request for Proposal or the resultant contract, brought by a prospective bidder, a bidder, a contractor, or other interested party to AS Materiel Division or another designated agency with the intention of achieving a remedial result.

Public Proposal Opening: The process of opening proposals, conducted at the time and place specified in the Request for Proposal, and in the presence of anyone who wishes to attend.

Recommended Hardware Configuration: The data processing hardware (including all terminals, auxiliary storage, communication, and other peripheral devices) to the extent utilized by the State as recommended by the contractor.

Release Date: Date of release of the Request for Proposal to the public for submission of proposal responses. Not to be confused with "Opening Date".

Renewal: Continuance of a contract for an additional term after a formal signing by the parties.

Representative: Includes an agent, an officer of a corporation or association, a trustee, executor or administrator of an estate, or any other person legally empowered to act for another.

Request for Proposal (RFP): All documents, whether attached or incorporated by reference, utilized for soliciting competitive proposals.

Responsible Bidder: A bidder who has the capability in all respects to perform fully all requirements with integrity and reliability to assure good faith performance.

Responsive Bidder: A bidder who has submitted a bid which conforms in all respects to the solicitation document.

Seven Standards and Conditions for Enhanced Funding: The Centers for Medicare & Medicaid Services (CMS) standards and conditions that must be met by the states in order for Medicaid technology investments (including traditional claims processing systems, as well as eligibility systems) to be eligible for enhanced match funding.

Shall: Denotes the imperative, required, compulsory or obligatory.

Should: Indicates an expectation.

Service Oriented Architecture (SOA): A set of principles and methodologies for designing and developing software in the form of interoperable services. These services are well-defined business functionalities that are built as software components (discrete pieces of code and/or data structures) that can be reused for different purposes. SOA design principles are used during the phases of systems development and integration.

Solicitation: The process of notifying prospective bidders or offerors that the State of Nebraska wishes to receive proposals for furnishing services. The process may consist of public advertising, posting notices, or mailing Request for Proposals and/or Request for Proposal announcement letter to prospective bidders, or all of these.

Solicitation Document: Request for Proposal.

Specifications: The information provided by or on behalf of the contractor that fully describes the capabilities and functionality of the Licensed Software as set forth in any material provided by the contractor, including the documentation and User's Manuals described herein.

System: Any collection or aggregation of two (2) or more Modules that is designed to function, or is represented by the contractor as functioning or being capable of functioning as an entity.

Termination: Occurs when either party pursuant to a power created by agreement or law puts an end to the contract. All obligations which are still executory on both sides are discharged but any right based on prior breach or performance survives.

Trademark: A distinguishing sign, symbol, mark, word, or arrangement of words in the form of a label or other indication, that is adopted and used by a manufacturer or distributor to designate its particular goods and which no other person has the legal right to use.

Trade Secret: Information, including, but not limited to, a drawing, formula, pattern, compilation, program, device, method, technique, code, or process that; (a) derives independent economic value, actual or potential, from not being known to, and not being ascertainable by proper means, other persons who can obtain economic value from its disclosure or use; and (b) is the subject of efforts that are reasonable under the circumstances to maintain its secrecy (see Neb. Rev. Stat. §87-502(4)).

Upgrade: Any improvement or change in the Software that improves or alters its basic function.

Vendor: An actual or potential contractor; a contractor.

Will: Denotes the imperative, required, compulsory or obligatory.

I. SCOPE OF THE REQUEST FOR PROPOSAL

The State of Nebraska, Administrative Services (AS), Materiel Division, Purchasing Bureau (hereafter known as State Purchasing Bureau), is issuing this Request for Proposal, RFP Number 4544Z1 for the purpose of selecting a qualified contractor to replace the functionality of the current Medicaid Eligibility and Enrollment (E&E) System with a modern COTS-based Eligibility and Enrollment Solution (EES) that meets the CMS Seven Standard and Conditions.

A contract resulting from this Request for Proposal will be issued from the date of the award for six (6) years, with the option to renew for two (2) additional two-year renewal periods as mutually agreed upon by all parties. The initial period of the contract will be the Design, Development and Implementation (DDI) of the EES, with the expectation that it will be completed and approved by the State of Nebraska by December 31, 2015. The subsequent Base Maintenance and Operations (Base M&O) period shall be four (4) years from the projected date of January 1, 2016.

ALL INFORMATION PERTINENT TO THIS REQUEST FOR PROPOSAL CAN BE FOUND ON THE INTERNET AT: <http://das.nebraska.gov/materiel/purchasing/rfp.htm>

A. SCHEDULE OF EVENTS

The State expects to adhere to the tentative procurement schedule shown below. It should be noted, however, that some dates are approximate and subject to change.

ACTIVITY		DATE/TIME
1.	Release Request for Proposal	October 31, 2013
2.	Last day to submit Round One written questions	November 12, 2013
3.	State responds to Round One written questions through Request for Proposal "Addendum" and/or "Amendment" to be posted to the Internet at: http://das.nebraska.gov/materiel/purchasing/rfp.htm	November 26, 2013
4.	Last day to submit Round Two written questions	December 6, 2013
5.	State responds to Round Two written questions through Request for Proposal "Addendum" and/or "Amendment" to be posted to the Internet at: http://das.nebraska.gov/materiel/purchasing/rfp.htm	December 20, 2013
6.	Last day to submit "Letter of Intent To Bid"	December 23, 2013
7.	Proposal opening Location: State Purchasing Bureau 1526 K Street, Suite 130 Lincoln, NE 68508	January 7, 2014 2:00 PM Central Time
8.	Review for conformance of mandatory requirements	January 7, 2014
9.	Evaluation period	January 8, 2014 to January 20, 2014
10.	"Oral Interviews/Presentations and/or Demonstrations" (if required)	January 27, 2014 To February 7, 2014
11.	Post "Letter of Intent to Contract" to Internet at: http://das.nebraska.gov/materiel/purchasing/rfp.htm	February 14, 2014
12.	Performance bond submission	February 21, 2014
13.	Contract award	February 21, 2014
14.	Contractor start date	March 3, 2014

II. PROCUREMENT PROCEDURES

A. PROCURING OFFICE AND CONTACT PERSON

Procurement responsibilities related to this Request for Proposal reside with the State Purchasing Bureau. The point of contact for the procurement is as follows:

Notice to Bidders: Department of Administrative Services, Materiel Division, State Purchasing is moving December 16 through 30. Effective Monday, December 30, 2013, all bid/proposal openings will be held at our new location, 1526 K Street, Suite 130, Lincoln, NE.

Name: Peter A. Kroll and Robert Thompson
Agency: State Purchasing Bureau
Address: 1526 K Street, Suite 130
Lincoln, NE 68508

OR

Address: P.O. Box 94847
Lincoln, NE 68509
Telephone: 402-471-2401
Facsimile: 402-471-2089
E-Mail: as.materielpurchasing@nebraska.gov

B. GENERAL INFORMATION

The Request for Proposal is designed to solicit proposals from qualified vendors who will be responsible for providing an EES at a competitive and reasonable cost. Proposals that do not conform to the mandatory items as indicated in the Request for Proposal will not be considered.

Proposals shall conform to all instructions, conditions, and requirements included in the Request for Proposal. Prospective bidders are expected to carefully examine all documentation, schedules and requirements stipulated in this Request for Proposal, and respond to each requirement in the format prescribed.

A fixed-price contract will be awarded as a result of this proposal. In addition to the provisions of this Request for Proposal and the awarded proposal, which shall be incorporated by reference in the contract, any additional clauses or provisions required by the terms and conditions will be included as an amendment to the contract.

C. COMMUNICATION WITH STATE STAFF

From the date the Request for Proposal is issued until a determination is announced regarding the selection of the contractor, contact regarding this project between potential contractors and individuals employed by the State is restricted to only written communication with the staff designated above as the point of contact for this Request for Proposal.

Once a contractor is preliminarily selected, as documented in the intent to contract, that contractor is restricted from communicating with State staff until a contract is signed. Violation of this condition may be considered sufficient cause to reject a contractor's proposal and/or selection irrespective of any other condition.

The following exceptions to these restrictions are permitted:

1. written communication with the person(s) designated as the point(s) of contact for this Request for Proposal or procurement;
2. contacts made pursuant to any pre-existing contracts or obligations; and
3. state-requested presentations, key personnel interviews, clarification sessions or discussions to finalize a contract.

Violations of these conditions may be considered sufficient cause to reject a bidder's proposal and/or selection irrespective of any other condition. No individual member of the State, employee of the State, or member of the Evaluation Committee is empowered to make binding statements regarding this Request for Proposal. The buyer will issue any clarifications or opinions regarding this Request for Proposal in writing.

D. NOTIFICATION OF INTENT TO BID

Bidders should hand deliver, return by facsimile, e-mail or delivery by US mail the "Notification of Intent to Bid Form" that accompanies this document (see Form B) to the contact person shown on the cover page of the Request For Proposal Form. This form should be filled out in its entirety and returned no later than the date shown in the Schedule of Events.

It is preferred that Form B, Notification of Intent To Bid, be sent via e-mail to as.materielpurchasing@nebraska.gov, but may be hand delivered, sent via facsimile to 402-471-2089 or delivery by US mail.

A list of vendors who submitted a Notification of Intent to Bid will be provided through an addendum to be posted on the Internet at <http://das.nebraska.gov/materiel/purchasing/rfp.htm> on or after the date shown in the Schedule of Events.

E. WRITTEN QUESTIONS AND ANSWERS

Any explanation desired by a bidder regarding the meaning or interpretation of any Request for Proposal provision must be submitted in writing to the State Purchasing Bureau and clearly marked "RFP Number 4544Z1; EES Questions". It is preferred that questions be sent via e-mail to as.materielpurchasing@nebraska.gov Questions may also be sent by facsimile to 402-471-2089, but must include a cover sheet clearly indicating that the transmission is to the attention of Buyer Name, showing the total number of pages transmitted, and clearly marked "RFP Number 4544Z1; EES Questions".

It is recommended that Bidders submit questions sequentially numbered, include the RFP reference and page number using the following format:

Question Number	RFP Section Reference	RFP Page Number	Question

Written answers will be provided through an addendum to be posted on the Internet at <http://das.nebraska.gov/materiel/purchasing/rfp.htm> on or before the date shown in the Schedule of Events.

F. ORAL INTERVIEWS/PRESENTATIONS AND/OR DEMONSTRATIONS

The Evaluation Committee(s) may conclude after the completion of the Technical and Cost Proposal evaluation that oral interviews/presentations and/or demonstrations are required in order to determine the successful bidder. All bidders may not have an opportunity to interview/present and/or give demonstrations; the State reserves the right to select only the top scoring bidders to present/give oral interviews in its sole discretion. The scores from the oral interviews/presentations and/or demonstrations will be added to the scores from the Technical and Cost Proposals. The presentation process will allow the bidders to demonstrate their proposal offering, explaining and/or clarifying any unusual or significant elements related to their proposals. Bidders' key personnel will be requested to participate in a structured interview to determine their understanding of the requirements of this proposal, their authority and reporting relationships within their firm, and their management style and philosophy. Bidders shall not be allowed to alter or amend their proposals. Only representatives of the State and the presenting bidders will be permitted to attend the oral interviews/presentations and/or demonstrations.

Once the oral interviews/presentations and/or demonstrations have been completed the State reserves the right to make a contract award without any further discussion with the bidders regarding the proposals received.

Detailed notes of oral interviews/presentations and/or demonstrations may be recorded and supplemental information (such as briefing charts, et cetera) may be accepted; however, such supplemental information shall not be considered an amendment to a bidders' proposal. Additional written information gathered in this manner shall not constitute replacement of proposal contents.

Any cost incidental to the oral interviews/presentations and/or demonstrations shall be borne entirely by the bidder and will not be compensated by the State.

G. SUBMISSION OF PROPOSALS

The following describes the requirements related to proposal submission, proposal handling and review by the State.

To facilitate the proposal evaluation process, one (1) original, clearly identified as such, and one (1) hard copy of the Technical proposal and one (1) original, clearly identified as such, and one (1) hard copy of the Cost Proposal should be submitted. The copy marked "original" shall take precedence over any other copies, should there be a discrepancy. Proposals must be submitted by the proposal due date and time. A separate sheet must be provided that clearly states which sections have been submitted as proprietary or have copyrighted materials. All proprietary information the bidder wishes the State to withhold must be submitted in accordance with the instructions outlined in Section III, Proprietary Information. Proposal responses should include the completed Form A, Bidder Contact Sheet.

Proposals must reference the request for proposal number and be sent to the specified address. Container(s) utilized for original documents should be clearly marked "ORIGINAL DOCUMENTS". Please note that the address label should appear as specified in Section II part A on the face of each container or bidder's bid response packet. Rejected late proposals will be returned to the bidder unopened, if requested, at bidder's expense. If a recipient phone number is required for delivery purposes, 402-471-2401 should be used. The request for proposal number must be included in all correspondence.

Emphasis should be concentrated on conformance to the Request for Proposal instructions, responsiveness to requirements, completeness and clarity of content. If the bidder's proposal is presented in such a fashion that makes evaluation difficult or overly time consuming, it is likely that points will be lost in the evaluation process. Elaborate and lengthy proposals are neither necessary nor desired.

The Technical and Cost Proposals should be packaged separately (loose-leaf binders are preferred) on standard 8 ½" by 11" paper, except that charts, diagrams and the like may be on fold-outs which, when folded, fit into the 8 ½" by 11" format. Pages may be consecutively numbered for the entire proposal, or may be numbered consecutively within sections. Figures and tables must be numbered and referenced in the text by that number. They should be placed as close as possible to the referencing text. The Technical Proposal must not contain any reference to dollar amounts. However, information such as data concerning labor hours and categories, materials, subcontracts and so forth, shall be considered in the Technical Proposal so that the bidder's understanding of the scope of work may be evaluated. The Technical Proposal shall disclose the bidder's technical approach in as much detail as possible, including, but not limited to, the information required by the Technical Proposal instructions.

H. PROPOSAL OPENING

The sealed proposals will be publicly opened and the bidding entities announced on the date, time and location shown in the Schedule of Events. Proposals will be available for viewing by those present after the proposal opening. Vendors may also contact the State to schedule an appointment for viewing proposals after the opening date.

I. LATE PROPOSALS

Proposals received after the time and date of the proposal opening will be considered late proposals. Rejected late proposals will be returned to the bidder unopened, if requested, at bidder's expense. The State is not responsible for proposals that are late or lost due to mail service inadequacies, traffic or any other reason(s).

J. REJECTION OF PROPOSALS

The State reserves the right to reject any or all proposals, wholly or in part, or to award to multiple bidders in whole or in part. The State reserves the right to waive any deviations or errors that are not material, do not invalidate the legitimacy of the proposal and do not improve the bidder's competitive position. All awards will be made in a manner deemed in the best interest of the State.

K. EVALUATION OF PROPOSALS

All responses to this Request for Proposal which fulfill all mandatory requirements will be evaluated. Each category will have a maximum possible point potential. The State will conduct a fair, impartial and comprehensive evaluation of all proposals in accordance with the criteria set forth below. Areas that will be addressed and scored during the evaluation include:

1. Executive Summary;
2. Corporate Overview shall include but is not limited to;
 - a. the ability, capacity and skill of the bidder to deliver and implement the system or project that meets the requirements of the Request for Proposal;
 - b. the character, integrity, reputation, judgment, experience and efficiency of the bidder;

- c. whether the bidder can perform the contract within the specified time frame;
- d. the quality of bidder performance on prior contracts;
- e. such other information that may be secured and that has a bearing on the decision to award the contract;

3. Technical Approach must include but is not limited to;

- a. Understanding the Project requirements;
- b. Proposed development approach;
- c. Functional Requirements
- d. Non-Functional Requirements
- e. Requirements Traceability Matrices (RTM)
 - i. Functional RTM – Appendix B
 - ii. Non-Functional RTM – Appendix C
 - iii. Requirements Gap Analysis - Appendix D
- f. Project Planning and Management;
- g. Business Process Reengineering;
- h. Organizational Change Management;
- i. Training;
- j. Knowledge Transfer;
- k. Reporting
- l. Documentation;
- m. Implementation;
- n. Post Implementation Support;
- o. Turnover;
- p. Technical Considerations;
- q. Draft Project Work Plan;
- r. Milestones and Deliverables (Forms C-1, C-2 and C-3); and
- s. Personnel Management and Planning.

4. Cost Proposal (Forms D-1, D-2, D-3, and D-4).

State Statute 73-107 allows for a preference for a resident disabled veteran or business located in a designated enterprise zone. When a state contract is to be awarded to the lowest responsible bidder, a resident disabled veteran or a business located in a designated enterprise zone under the Enterprise Zone Act shall be allowed a preference over any other resident or nonresident bidder, if all other factors are equal.

Resident disabled veterans means any person (a) who resides in the State of Nebraska, who served in the United States Armed Forces, including any reserve component or the National Guard, who was discharged or otherwise separated with a characterization of honorable or general (under honorable conditions), and who possesses a disability rating letter issued by the United States Department of Veterans Affairs establishing a service-connected disability or a disability determination from the United States Department of Defense and (b)(i) who owns and controls a business or, in the case of a publicly owned business, more than fifty percent of the stock is owned by one or more persons described in subdivision (a) of this subsection and (ii) the management and daily business operations of the business are controlled by one or more persons described in subdivision(a) of this subsection. Any contract entered into without compliance with this section shall be null and void.

Therefore, if a resident disabled veteran or business located in a designated enterprise zone submits a bid in accordance with Neb. Rev. Stat. §73-107 and has checked “yes” requesting priority/preference to be considered in the award of this contract, the following will need to be submitted by the vendor within 10 business days of request:

- a. Documentation from the United States Armed Forces confirming service,
- b. Documentation of discharge or otherwise separated characterization of honorable or general (under honorable conditions),
- c. Disability rating letter issued by the United States Department of Veterans Affairs establishing a service-connected disability or a disability determination from the United States Department of Defense; and
- d. Documentation which shows ownership and control of a business or, in the case of a publicly owned business, more than fifty percent of the stock is owned by one or more persons described in subdivision (a) of this subsection; and the management and daily business operations of the business are controlled by one or more persons described in subdivision (a) of this subsection.

Failure to submit the requested documentation within 10 business days of notice will disqualify the bidder from consideration of the preference.

Evaluation criteria will become public information at the time of the Request for Proposal opening. Evaluation criteria and a list of respondents will be posted to the State Purchasing Bureau website at <http://das.nebraska.gov/materiel/purchasing/rfp.htm> Evaluation criteria will not be released prior to the proposal opening.

L. EVALUATION COMMITTEE

Proposals will be independently evaluated by members of the Evaluation Committee(s). The committee(s) will consist of staff with the appropriate expertise to conduct such proposal evaluations. Names of the members of the Evaluation Committee(s) will not become public information.

Prior to award, bidders are advised that only the point of contact indicated on the front cover of this Request For Proposal For Contractual Services Form can clarify issues or render any opinion regarding this Request for Proposal. No individual member of the State, employee of the State or member of the Evaluation Committee(s) is empowered to make binding statements regarding this Request for Proposal.

M. MANDATORY REQUIREMENTS

The proposals will first be examined to determine if all mandatory requirements listed below have been addressed to warrant further evaluation. Proposals not meeting mandatory requirements will be excluded from further evaluation. The mandatory requirement items are as follows:

1. Request For Proposal For Contractual Services form signed in ink;
2. Executive Summary;
3. Corporate Overview;
4. Technical Approach; and
5. Cost Proposal.

N. REFERENCE CHECKS

The State reserves the right to check any reference(s), regardless of the source of the reference information, including but not limited to, those that are identified by the company in the proposal, those indicated through the explicitly specified contacts, those that are identified during the review of the proposal, or those that result from communication with other entities involved with similar projects.

Information to be requested and evaluated from references may include, but is not limited to, some or all of the following: project description and background, job performed, functional and technical abilities, communication skills and timeliness, cost and schedule estimates and accuracy, problems (poor quality deliverables, contract disputes, work stoppages, et cetera), overall performance, and whether or not the reference would rehire the firm or individual. Only top scoring bidders may receive reference checks and negative references may eliminate bidders from consideration for award.

O. SECRETARY OF STATE/TAX COMMISSIONER REGISTRATION REQUIREMENTS

All bidders shall be authorized to transact business in the State of Nebraska. All bidders are expected to comply with all Nebraska Secretary of State registration requirements. It is the responsibility of the bidder to comply with any registration requirements pertaining to types of business entities (e.g. person, partnership, foreign or domestic limited liability company, association, or foreign or domestic corporation or other type of business entity). The Bidder who is the recipient of an Intent to Award will be required to certify that it has so complied and produce a true and exact copy of its current (within 90 days), valid Certificate of Good Standing or Letter of Good Standing; or in the case registration is not required, to provide, in writing, the reason as to why none is required. This must be accomplished prior to the award of the contract. Construction contractors are expected to meet all applicable requirements of the Nebraska Contractor Registration Act and provide a current, valid certificate of registration. Further, all bidders shall comply with any and all other applicable Nebraska statutes regarding transacting business in the State of Nebraska. Bidders should submit the above certification(s) with their bid.

P. VIOLATION OF TERMS AND CONDITIONS

Violation of the terms and conditions contained in this Request for Proposal or any resultant contract, at any time before or after the award, shall be grounds for action by the State which may include, but is not limited to, the following:

1. rejection of a bidder's proposal;
2. suspension of the bidder from further bidding with the State for the period of time relative to the seriousness of the violation, such period to be within the sole discretion of the State.

III. TERMS AND CONDITIONS

By signing the "Request For Proposal For Contractual Services" form, the bidder guarantees compliance with the provisions stated in this Request for Proposal, agrees to the terms and conditions and certifies bidder maintains a drug free work place environment.

Bidders are expected to closely read the Terms and Conditions and provide a binding signature of intent to comply with the Terms and Conditions; provided, however, a bidder may indicate any exceptions to the Terms and Conditions by (1) clearly identifying the term or condition by subsection, (2) including an explanation for the bidder's inability to comply with such term or condition which includes a statement recommending terms and conditions the bidder would find acceptable. Rejection in whole or in part of the Terms and Conditions may be cause for rejection of a bidder's proposal.

A. GENERAL

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contract resulting from this Request for Proposal shall incorporate the following documents:

1. Amendment to Contract Award with the most recent dated amendment having the highest priority;
2. Contract Award and any attached Addenda;
3. The signed Request for Proposal form and the Contractor's Proposal;
4. Amendments to RFP and any Questions and Answers; and
5. The original RFP document and any Addenda.

These documents constitute the entirety of the contract.

Unless otherwise specifically stated in a contract amendment, in case of any conflict between the incorporated documents, the documents shall govern in the following order of preference with number one (1) receiving preference over all other documents and with each lower numbered document having preference over any higher numbered document: 1) Amendment to Contract Award with the most recent dated amendment having the highest priority, 2) Contract Award and any attached Addenda, 3) the signed Request for Proposal form and the Contractor's Proposal, 4) Amendments to RFP and any Questions and Answers, 5) the original RFP document and any Addenda.

Any ambiguity in any provision of this contract which shall be discovered after its execution shall be resolved in accordance with the rules of contract interpretation as established in the State of Nebraska.

Once proposals are opened they become the property of the State of Nebraska and will not be returned.

B. AWARD

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

All purchases, leases, or contracts which are based on competitive proposals will be awarded according to the provisions in the Request for Proposal. The State reserves the right to reject any or all proposals, wholly or in part, or to award to multiple bidders in whole or in part, and at its discretion, may withdraw or amend the Request for Proposal at any time. The State reserves the right to waive any deviations or errors that are not material, do not invalidate the legitimacy of the proposal, and do not improve the bidder's competitive position. All awards will be made in a manner deemed in the best interest of the State. The Request for Proposal does not commit the State to award a contract. If, in the opinion of the State, revisions or amendments will require substantive changes in proposals, the due date may be extended.

By submitting a proposal in response to this Request for Proposal, the bidder grants to the State the right to contact or arrange a visit in person with any or all of the bidder's clients.

Once an intent to award decision has been determined, it will be posted to the Internet at: <http://www.das.state.ne.us/materiel/purchasing/rfp.htm>

Grievance and protest procedure is available on the Internet at: <http://www.das.state.ne.us/materiel/purchasing/agencyervicesprocurementmanual/ProtestGrievanceProcedureForServices.doc>

Any protests must be filed by a vendor within ten (10) calendar days after the intent to award decision is posted to the Internet.

C. COMPLIANCE WITH CIVIL RIGHTS LAWS AND EQUAL OPPORTUNITY EMPLOYMENT / NONDISCRIMINATION

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contractor shall comply with all applicable local, State and Federal statutes and regulations regarding civil rights laws and equal opportunity employment. The Nebraska Fair Employment Practice Act prohibits contractors of the State of Nebraska, and their subcontractors, from discriminating against any employee or applicant for employment, with respect to hire, tenure, terms, conditions or privileges of employment because of race, color, religion, sex, disability, or national origin (Neb. Rev. Stat. §48-1101 to 48-1125). The contractor guarantees compliance with the Nebraska Fair Employment Practice Act, and breach of this provision shall be regarded as a material breach of contract. The contractor shall insert a similar provision in all subcontracts for services to be covered by any contract resulting from this Request for Proposal.

D. PERMITS, REGULATIONS, LAWS

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contractor shall procure and pay for all permits, licenses and approvals necessary for the execution of the contract. The contractor shall comply with all applicable local, state, and federal laws, ordinances, rules, orders and regulations.

E. OWNERSHIP OF INFORMATION AND DATA

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The State of Nebraska shall have the unlimited right to publish, duplicate, use and disclose all information and data developed or derived by the contractor pursuant to this contract.

The contractor must guarantee that it has the full legal right to the materials, supplies, equipment, and other rights or titles (e.g. rights to licenses transfer or assign deliverables) necessary to execute this contract. The contract price shall, without exception, include compensation for all royalties and costs arising from patents, trademarks and copyrights that are in any way involved in the contract. It shall be the responsibility of the contractor to pay for all royalties and costs, and the State must be held harmless from any such claims.

F. INSURANCE REQUIREMENTS

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contractor shall not commence work under this contract until he or she has obtained all the insurance required hereunder and such insurance has been approved by the State. If contractor will be utilizing any subcontractors, the contractor is responsible for obtaining the certificate(s) of insurance required herein under from any and all subcontractor(s). Contractor is also responsible for ensuring subcontractor(s) maintain the insurance required until completion of the contract requirements. The contractor shall not allow any subcontractor to commence work on his or her subcontract until all similar insurance required of the subcontractor has been obtained and approved by the contractor. Approval of the insurance by the State shall not limit, relieve or decrease the liability of the contractor hereunder.

If by the terms of any insurance a mandatory deductible is required, or if the contractor elects to increase the mandatory deductible amount, the contractor shall be responsible for payment of the amount of the deductible in the event of a paid claim.

1. WORKERS' COMPENSATION INSURANCE

The contractor shall take out and maintain during the life of this contract the statutory Workers' Compensation and Employer's Liability Insurance for all of the contractors' employees to be engaged in work on the project under this contract and, in case any such work is sublet, the contractor shall require the subcontractor similarly to provide Worker's Compensation and Employer's Liability Insurance for all of the subcontractor's employees to be engaged in such work. This policy shall be written to meet the statutory requirements for the state in which the work is to be performed, including Occupational Disease. This policy shall include a waiver of subrogation in favor of the State. The amounts of such insurance shall not be less than the limits stated hereinafter.

2. COMMERCIAL GENERAL LIABILITY INSURANCE AND COMMERCIAL AUTOMOBILE LIABILITY INSURANCE

The contractor shall take out and maintain during the life of this contract such Commercial General Liability Insurance and Commercial Automobile Liability Insurance as shall protect contractor and any subcontractor performing work covered by this contract from claims for damages for bodily injury, including death, as well as from claims for property damage, which may arise from operations under this contract, whether such operation be by the contractor or by any subcontractor or by anyone

directly or indirectly employed by either of them, and the amounts of such insurance shall not be less than limits stated hereinafter.

The Commercial General Liability Insurance shall be written on an occurrence basis, and provide Premises/Operations, Products/Completed Operations, Independent Contractors, Personal Injury and Contractual Liability coverage. The policy shall include the State, and others as required by the Contract Documents, as an Additional Insured. This policy shall be primary, and any insurance or self-insurance carried by the State shall be considered excess and non-contributory. The Commercial Automobile Liability Insurance shall be written to cover all Owned, Non-owned and Hired vehicles.

3. INSURANCE COVERAGE AMOUNTS REQUIRED

a. WORKERS' COMPENSATION AND EMPLOYER'S LIABILITY

Coverage A	Statutory
Coverage B	
Bodily Injury by Accident	\$100,000 each accident
Bodily Injury by Disease	\$500,000 policy limit
Bodily Injury by Disease	\$100,000 each employee

b. COMMERCIAL GENERAL LIABILITY

General Aggregate	\$2,000,000
Products/Completed Operations Aggregate	\$2,000,000
Personal/Advertising Injury	\$1,000,000 any one person
Bodily Injury/Property Damage	\$1,000,000 per occurrence
Fire Damage	\$50,000 any one fire
Medical Payments	\$5,000 any one person

c. COMMERCIAL AUTOMOBILE LIABILITY

Bodily Injury/Property Damage	\$1,000,000 combined single limit
-------------------------------	-----------------------------------

d. UMBRELLA/EXCESS LIABILITY

Over Primary Insurance	\$1,000,000 per occurrence
------------------------	----------------------------

4. EVIDENCE OF COVERAGE

The contractor should furnish the State, with their proposal response, a certificate of insurance coverage complying with the above requirements to the attention of Buyer Name, Administrative Services, State Purchasing Bureau, 1526 K Street, Suite 130, Lincoln, NE 68508 (facsimile 402-471-2089). These certificates or the cover sheet shall reference the RFP number, and the certificates shall include the name of the company, policy numbers, effective dates, dates of expiration and amounts and types of coverage afforded. If the State is damaged by the failure of the contractor to maintain such insurance, then the contractor shall be responsible for all reasonable costs properly attributable thereto.

Notice of cancellation of any required insurance policy must be submitted to Buyer Name, Administrative Services State Purchasing Bureau when issued and a new coverage binder shall be submitted immediately to ensure no break in coverage.

G. COOPERATION WITH OTHER CONTRACTORS

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The State may already have in place or choose to award supplemental contracts for work related to this Request for Proposal, or any portion thereof.

- 1. The State reserves the right to award the contract jointly between two or more potential contractors, if such an arrangement is in the best interest of the State.
- 2. The contractor shall agree to cooperate with such other contractors, and shall not commit or permit any act which may interfere with the performance of work by any other contractor.

H. INDEPENDENT CONTRACTOR

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

It is agreed that nothing contained herein is intended or should be construed in any manner as creating or establishing the relationship of partners between the parties hereto. The contractor represents that it has, or will secure at its own expense, all personnel required to perform the services under the contract. The contractor's employees and other persons engaged in work or services required by the contractor under the contract shall have no contractual relationship with the State; they shall not be considered employees of the State.

All claims on behalf of any person arising out of employment or alleged employment (including without limit claims of discrimination against the contractor, its officers or its agents) shall in no way be the responsibility of the State. The contractor will hold the State harmless from any and all such claims. Such personnel or other persons shall not require nor be entitled to any compensation, rights or benefits from the State including without limit, tenure rights, medical and hospital care, sick and vacation leave, severance pay or retirement benefits.

I. CONTRACTOR RESPONSIBILITY

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contractor is solely responsible for fulfilling the contract, with responsibility for all services offered and products to be delivered as stated in the Request for Proposal, the contractor's proposal, and the resulting contract. The contractor shall be the sole point of contact regarding all contractual matters.

If the contractor intends to utilize any subcontractors' services, the subcontractors' level of effort, tasks and time allocation must be clearly defined in the contractor's proposal. The contractor shall agree that it will not utilize any subcontractors not specifically included in its proposal, in the performance of the contract, without the prior written authorization of the State. Following execution of the contract, the contractor shall proceed diligently with all services and shall perform such services with qualified personnel in accordance with the contract.

J. CONTRACTOR PERSONNEL

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contractor warrants that all persons assigned to the project shall be employees of the contractor or specified subcontractors, and shall be fully qualified to perform the work required herein. Personnel employed by the contractor to fulfill the terms of the contract shall remain under the sole direction and control of the contractor. The contractor shall include a similar provision in any contract with any subcontractor selected to perform work on the project.

Personnel commitments made in the contractor's proposal shall not be changed without the prior written approval of the State. Replacement of key personnel, if approved by the State, shall be with personnel of equal or greater ability and qualifications.

The State reserves the right to require the contractor to reassign or remove from the project any contractor or subcontractor employee.

In respect to its employees, the contractor agrees to be responsible for the following:

1. any and all employment taxes and/or other payroll withholding;
2. any and all vehicles used by the contractor's employees, including all insurance required by state law;
3. damages incurred by contractor's employees within the scope of their duties under the contract;
4. maintaining workers' compensation and health insurance and submitting any reports on such insurance to the extent required by governing State law; and
5. determining the hours to be worked and the duties to be performed by the contractor's employees.

Notice of cancellation of any required insurance policy must be submitted to the State when issued and a new coverage binder shall be submitted immediately to ensure no break in coverage.

K. STATE OF NEBRASKA PERSONNEL RECRUITMENT PROHIBITION

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contractor shall not, at any time, recruit or employ any State employee or agent who has worked on the Request for Proposal or project, or who had any influence on decisions affecting the Request for Proposal or project.

L. CONFLICT OF INTEREST

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

By submitting a proposal, bidder certifies that there does not now exist any relationship between the bidder and any person or entity which is or gives the appearance of a conflict of interest related to this Request for Proposal or project.

The bidder certifies that it shall not take any action or acquire any interest, either directly or indirectly, which will conflict in any manner or degree with the performance of its services hereunder or which creates an actual or appearance of conflict of interest.

The bidder certifies that it will not employ any individual known by bidder to have a conflict of interest.

M. PROPOSAL PREPARATION COSTS

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The State shall not incur any liability for any costs incurred by bidders in replying to this Request for Proposal, in the demonstrations, or oral presentations, or in any other activity related to bidding on this Request for Proposal.

N. ERRORS AND OMISSIONS

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The bidder shall not take advantage of any errors and/or omissions in this Request for Proposal or resulting contract. The bidder must promptly notify the State of any errors and/or omissions that are discovered.

O. BEGINNING OF WORK

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The bidder shall not commence any billable work until a valid contract has been fully executed by the State and the successful contractor. The contractor will be notified in writing when work may begin.

P. ASSIGNMENT BY THE STATE

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The State shall have the right to assign or transfer the contract or any of its interests herein to any agency, board, commission, or political subdivision of the State of Nebraska. There shall be no charge to the State for any assignment hereunder.

Q. ASSIGNMENT BY THE CONTRACTOR

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contractor may not assign, voluntarily or involuntarily, the contract or any of its rights or obligations hereunder (including without limitation rights and duties of performance) to any third party, without the prior written consent of the State, which will not be unreasonably withheld.

R. DEVIATIONS FROM THE REQUEST FOR PROPOSAL

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The requirements contained in the Request for Proposal become a part of the terms and conditions of the contract resulting from this Request for Proposal. Any deviations from the Request for Proposal must be clearly defined by the bidder in its proposal and, if accepted by the State, will become part of the contract. Any specifically defined deviations must not be in conflict with the basic nature of the Request for Proposal or mandatory requirements. "Deviation", for the purposes of this RFP, means any proposed changes or alterations to either the contractual language or deliverables within the scope of this RFP. The State discourages deviations and reserves the right to reject proposed deviations.

S. GOVERNING LAW

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contract shall be governed in all respects by the laws and statutes of the State of Nebraska. Any legal proceedings against the State of Nebraska regarding this Request for Proposal or any resultant contract shall be brought in the State of Nebraska administrative or judicial forums as defined by State law. The contractor must be in compliance with all Nebraska statutory and regulatory law.

T. ATTORNEY'S FEES

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

In the event of any litigation, appeal or other legal action to enforce any provision of the contract, the contractor agrees to pay all expenses of such action, as permitted by law, including attorney's fees and costs, if the State is the prevailing party.

U. ADVERTISING

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contractor agrees not to refer to the contract award in advertising in such a manner as to state or imply that the company or its services are endorsed or preferred by the State. News releases pertaining to the project shall not be issued without prior written approval from the State.

V. STATE PROPERTY

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contractor shall be responsible for the proper care and custody of any State-owned property which is furnished for the contractor's use during the performance of the contract. The contractor shall reimburse the State for any loss or damage of such property, normal wear and tear is expected.

W. SITE RULES AND REGULATIONS

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contractor shall use its best efforts to ensure that its employees, agents and subcontractors comply with site rules and regulations while on State premises. If the contractor must perform on-site work outside of the daily operational hours set forth by the State, it must make arrangements with the State to ensure access to the facility and the equipment has been arranged. No additional payment will be made by the State on the basis of lack of access, unless the State fails to provide access as agreed to between the State and the contractor.

X. NOTIFICATION

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

During the bid process, all communication between the State and a bidder shall be between the bidder's representative clearly noted in its proposal and the buyer noted in Section II, A. Procuring Office and Contact Person of this RFP. After the award of the contract, all notices under the contract shall be deemed duly given upon delivery to the staff designated as the point of contact for this Request for Proposal, in person, or upon delivery by U.S. Mail, facsimile, or e-mail. Each bidder should provide in its proposal the name, title and complete address of its designee to receive notices.

1. Except as otherwise expressly specified herein, all notices, requests or other communications shall be in writing and shall be deemed to have been given if delivered personally or mailed, by U.S. Mail, postage prepaid, return receipt requested, to the parties at their respective addresses set forth above, or at such other addresses as may be specified in writing by either of the parties. All notices, requests, or communications shall be deemed effective upon personal delivery or three (3) days following deposit in the mail.
2. Whenever the contractor encounters any difficulty which is delaying or threatens to delay its timely performance under the contract, the contractor shall immediately give notice thereof in writing to the State reciting all relevant information with respect thereto. Such notice shall not in any way constitute a basis for an extension of the delivery schedule or be construed as a waiver by the State of any of its rights or remedies to which it is entitled by law or equity or pursuant to the provisions of the contract. Failure to give such notice, however, may be grounds for denial of any request for an extension of the delivery schedule because of such delay.

Either party may change its address for notification purposes by giving notice of the change, and setting forth the new address and an effective date.

For the duration of the contract, all communication between contractor and the State regarding the contract shall take place between the contractor and individuals specified by the State in writing. Communication about the contract between contractor and individuals not designated as points of contact by the State is strictly forbidden.

Y. EARLY TERMINATION

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contract may be terminated as follows:

1. The State and the contractor, by mutual written agreement, may terminate the contract at any time.
2. The State, in its sole discretion, may terminate the contract for any reason upon 30 days written notice to the contractor. Such termination shall not relieve the contractor of warranty or other service obligations incurred under the terms of the contract. In the event of cancellation the contractor shall be entitled to payment, determined on a pro rata basis, for products or services satisfactorily performed or provided.
3. The State may terminate the contract immediately for the following reasons:
 - a. if directed to do so by statute;
 - b. contractor has made an assignment for the benefit of creditors, has admitted in writing its inability to pay debts as they mature, or has ceased operating in the normal course of business;
 - c. a trustee or receiver of the contractor or of any substantial part of the contractor's assets has been appointed by a court;
 - d. fraud, misappropriation, embezzlement, malfeasance, misfeasance, or illegal conduct pertaining to performance under the contract by its contractor, its employees, officers, directors or shareholders;
 - e. an involuntary proceeding has been commenced by any party against the contractor under any one of the chapters of Title 11 of the United States Code and (i) the proceeding has been pending for at least sixty (60) days; or (ii) the contractor has consented, either expressly or by operation of law, to the entry of an order for relief; or (iii) the contractor has been decreed or adjudged a debtor;
 - f. a voluntary petition has been filed by the contractor under any of the chapters of Title 11 of the United States Code;
 - g. contractor intentionally discloses confidential information;
 - h. contractor has or announces it will discontinue support of the deliverable;
 - i. second or subsequent documented "vendor performance report" form deemed acceptable by the State Purchasing Bureau.

Z. FUNDING OUT CLAUSE OR LOSS OF APPROPRIATIONS

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The State may terminate the contract, in whole or in part, in the event funding is no longer available. The State's obligation to pay amounts due for fiscal years following the current fiscal year is contingent upon legislative appropriation of funds for the contract. Should said funds not be appropriated, the State may terminate the contract with respect to those payments for the fiscal years for which such funds are not appropriated. The State will give the contractor written notice thirty (30) days prior to the effective date of any termination, and

advise the contractor of the location (address and room number) of any related equipment. All obligations of the State to make payments after the termination date will cease and all interest of the State in any related equipment will terminate. The contractor shall be entitled to receive just and equitable compensation for any authorized work which has been satisfactorily completed as of the termination date. In no event shall the contractor be paid for a loss of anticipated profit.

AA. BREACH BY CONTRACTOR

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The State may terminate the contract, in whole or in part, if the contractor fails to perform its obligations under the contract in a timely and proper manner. The State may, by providing a written notice of default to the contractor, allow the contractor to cure a failure or breach of contract within a period of thirty (30) days (or longer at State's discretion considering the gravity and nature of the default). Said notice shall be delivered by Certified Mail, Return Receipt Requested or in person with proof of delivery. Allowing the contractor time to cure a failure or breach of contract does not waive the State's right to immediately terminate the contract for the same or different contract breach which may occur at a different time. In case of default of the contractor, the State may contract the service from other sources and hold the contractor responsible for any excess cost occasioned thereby.

BB. ASSURANCES BEFORE BREACH

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

If any document or deliverable required pursuant to the contract does not fulfill the requirements of the Request for Proposal/resulting contract, upon written notice from the State, the contractor shall deliver assurances in the form of additional contractor resources at no additional cost to the project in order to complete the deliverable, and to ensure that other project schedules will not be adversely affected.

CC. PENALTY

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

In the event that the contractor fails to perform any substantial obligation under the contract, the State may withhold all monies due and payable to the contractor, without penalty, until such failure is cured or otherwise adjudicated. Failure to meet the dates stipulated in the contract for the deliverables may result in an assessment of penalty due the State of \$1,000 dollars per day, until the deliverables are approved. Contractor will be notified in writing when penalty will commence.

DD. PERFORMANCE BOND

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The selected contractor will be required to supply a certified check or a bond executed by a corporation authorized to contract surety in the State of Nebraska, payable to the State of Nebraska, which shall be valid for the life of the contract to include any renewal and/or

extension periods. The amount of the certified check or bond must be the dollar amount of \$15,000,000.00. The check or bond will guarantee that the selected contractor will faithfully perform all requirements, terms and conditions of the contract. Failure to comply shall be grounds for forfeiture of the check or bond as liquidated damages. Amount of forfeiture will be determined by the agency based on loss to the State. The bond or certified check will be returned when the service has been satisfactorily completed as solely determined by the State, after termination or expiration of the contract.

EE. FORCE MAJEURE

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

Neither party shall be liable for any costs or damages resulting from its inability to perform any of its obligations under the contract due to a natural disaster, or other similar event outside the control and not the fault of the affected party (“Force Majeure Event”). A Force Majeure Event shall not constitute a breach of the contract. The party so affected shall immediately give notice to the other party of the Force Majeure Event. The State may grant relief from performance of the contract if the contractor is prevented from performance by a Force Majeure Event. The burden of proof for the need for such relief shall rest upon the contractor. To obtain release based on a Force Majeure Event, the contractor shall file a written request for such relief with the State Purchasing Bureau. Labor disputes with the impacted party’s own employees will not be considered a Force Majeure Event and will not suspend performance requirements under the contract.

FF. PROHIBITION AGAINST ADVANCE PAYMENT

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

Payments shall not be made until contractual deliverable(s) are received and accepted by the State.

GG. PAYMENT

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

State will render payment to contractor when the terms and conditions of the contract and specifications have been satisfactorily completed on the part of the contractor as solely determined by the State. Payment will be made by the responsible agency in compliance with the State of Nebraska Prompt Payment Act (See Neb. Rev. Stat. §81-2401 through 81-2408). The State may require the contractor to accept payment by electronic means such as ACH deposit. In no event shall the State be responsible or liable to pay for any services provided by the contractor prior to the Effective Date, and the contractor hereby waives any claim or cause of action for any such services.

HH. INVOICES

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

Invoices for payments must be submitted by the contractor to the agency requesting the services with sufficient detail to support payment. Invoices must be submitted to: Medicaid and Long-Term Care Division, P.O. Box 95026, Lincoln, NE 68509. The terms and conditions included in the contractor’s invoice shall be deemed to be solely for the convenience of the parties. No terms or conditions of any such invoice shall be binding upon the State, and no action by the State, including without limitation the payment of any such invoice in whole or in part, shall be construed as binding or estopping the State with respect to any such term or condition, unless the invoice term or condition has been previously agreed to by the State as an amendment to the contract.

II. AUDIT REQUIREMENTS

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

All contractor books, records and documents relating to work performed or monies received under the contract shall be subject to audit at any reasonable time upon the provision of reasonable notice by the State. These records shall be maintained for a period of five (5) full years from the date of final payment, or until all issues related to an audit, litigation or other action are resolved, whichever is longer. All records shall be maintained in accordance with generally accepted accounting principles.

In addition to, and in no way in limitation of any obligation in the contract, the contractor shall agree that it will be held liable for any State audit exceptions, and shall return to the State all payments made under the contract for which an exception has been taken or which has been disallowed because of such an exception. The contractor agrees to correct immediately any material weakness or condition reported to the State in the course of an audit.

JJ. TAXES

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The State is not required to pay taxes of any kind and assumes no such liability as a result of this solicitation. Any property tax payable on the contractor's equipment which may be installed in a state-owned facility is the responsibility of the contractor.

KK. INSPECTION AND APPROVAL

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

Final inspection and approval of all work required under the contract shall be performed by the designated State officials. The State and/or its authorized representatives shall have the right to enter any premises where the contractor or subcontractor duties under the contract are being performed, and to inspect, monitor or otherwise evaluate the work being performed. All inspections and evaluations shall be at reasonable times and in a manner that will not unreasonably delay work.

LL. CHANGES IN SCOPE/CHANGE ORDERS

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The State may, at any time with written notice to the contractor, make changes within the general scope of the contract. Changes in scope shall only be conducted with the written approval of the State’s designee as so defined by the State from time to time. (The State retains the right to employ the services of a third party to perform any change order(s)).

The State may, at any time work is in progress, by written order, make alterations in the terms of work as shown in the specifications, require the performance of extra work, decrease the quantity of work, or make such other changes as the State may find necessary or desirable. The contractor shall not claim forfeiture of contract by reasons of such changes by the State. Changes in work and the amount of compensation to be paid to the contractor for any extra work so ordered shall be determined in accordance with the applicable unit prices of the contractor’s proposal.

Corrections of any deliverable services or performance of work required pursuant to the contract shall not be deemed a modification requiring a change order.

MM. SEVERABILITY

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

If any term or condition of the contract is declared by a court of competent jurisdiction to be illegal or in conflict with any law, the validity of the remaining terms and conditions shall not be affected, and the rights and obligations of the parties shall be construed and enforced as if the contract did not contain the particular provision held to be invalid.

NN. CONFIDENTIALITY

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

All materials and information provided by the State or acquired by the contractor on behalf of the State shall be regarded as confidential information. All materials and information provided by the State or acquired by the contractor on behalf of the State shall be handled in accordance with Federal and State Law, and ethical standards. The contractor must ensure the confidentiality of such materials or information. Should said confidentiality be breached by a contractor; contractor shall notify the State immediately of said breach and take immediate corrective action.

It is incumbent upon the contractor to inform its officers and employees of the penalties for improper disclosure imposed by the Privacy Act of 1974, 5 U.S.C. 552a. Specifically, 5 U.S.C. 552a (i)(1), which is made applicable to contractors by 5 U.S.C. 552a (m)(1), provides that any officer or employee of a contractor, who by virtue of his/her employment or official position has possession of or access to agency records which contain individually identifiable information, the disclosure of which is prohibited by the Privacy Act or regulations established thereunder, and who knowing that disclosure of the specific material is prohibited, willfully discloses the material in any manner to any person or agency not entitled to receive it, shall be guilty of a misdemeanor and fined not more than \$5,000.

OO. PROPRIETARY INFORMATION

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

Data contained in the proposal and all documentation provided therein, become the property of the State of Nebraska and the data becomes public information upon opening the proposal. If the bidder wishes to have any information withheld from the public, such information must fall within the definition of proprietary information contained within Nebraska’s public record statutes. All proprietary information the bidder wishes the State to withhold must be submitted in a sealed package, which is separate from the remainder of the proposal. The separate package must be clearly marked PROPRIETARY on the outside of the package. Bidders may not mark their entire Request for Proposal as proprietary. Bidder’s cost proposals may not be marked as proprietary information. Failure of the bidder to follow the instructions for submitting proprietary and copyrighted information may result in the information being viewed by other bidders and the public. Proprietary information is defined as trade secrets, academic and scientific research work which is in progress and unpublished, and other information which if released would give advantage to business competitors and serve no public purpose (see Neb. Rev. Stat. §84-712.05(3)). In accordance with Attorney General Opinions 92068 and 97033, bidders submitting information as proprietary may be required to prove specific, named competitor(s) who would be advantaged by release of the information and the specific advantage the competitor(s) would receive. Although every effort will be made to withhold information that is properly submitted as proprietary and meets the State’s definition of proprietary information, the State is under no obligation to maintain the confidentiality of proprietary information and accepts no liability for the release of such information.

PP. CERTIFICATION OF INDEPENDENT PRICE DETERMINATION/COLLUSIVE BIDDING

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

By submission of this proposal, the bidder certifies, that he or she is the party making the foregoing proposal that the proposal is not made in the interest of, or on behalf of, any undisclosed person, partnership, company, association, organization, or corporation; that the proposal is genuine and not collusive or sham; that the bidder has not directly or indirectly induced or solicited any other bidder to put in a false or sham proposal, and has not directly or indirectly colluded, conspired, connived, or agreed with any bidder or anyone else to put in a sham proposal, or that anyone shall refrain from bidding; that the bidder has not in any manner, directly or indirectly, sought by agreement, communication, or conference with anyone to fix the proposal price of the bidder or any other bidder, or to fix any overhead, profit, or cost element of the proposal price, or of that of any other bidder, or to secure any advantage against the public body awarding the contract of anyone interested in the proposed contract; that all statements contained in the proposal are true; and further that the bidder has not, directly or indirectly, submitted his or her proposal price or any breakdown thereof, or the contents thereof, or divulged information or data relative thereto, or paid, and will not pay, any fee to any corporation, partnership, company association, organization, proposal depository, or to any member or agent thereof to effectuate a collusive or sham proposal.

QQ. PRICES

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

All prices, costs, terms and conditions outlined in the proposal shall remain fixed and valid commencing on the opening date of the proposal until an award is made (and for bidder receiving award prices shall remain as bid for the duration of the contract unless otherwise so stated in the contract) or the Request for Proposal is cancelled.

Contractor represents and warrants that all prices for services, now or subsequently specified are as low as and no higher than prices which the contractor has charged or intends to charge customers other than the State for the same or similar products and services of the same or equivalent quantity and quality for delivery or performance during the same periods of time. If, during the term of the contract, the contractor shall reduce any and/or all prices charged to any customers other than the State for the same or similar products or services specified herein, the contractor shall make an equal or equivalent reduction in corresponding prices for said specified products or services.

Contractor also represents and warrants that all prices set forth in the contract and all prices in addition, which the contractor may charge under the terms of the contract, do not and will not violate any existing federal, state or municipal law or regulations concerning price discrimination and/or price fixing. Contractor agrees to hold the State harmless from any such violation. Prices quoted shall not be subject to increase throughout the contract period unless specifically allowed by these specifications.

RR. BEST AND FINAL OFFER

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The State will compile the final scores for all parts of each proposal. The award may be granted to the highest scoring responsive and responsible bidder. Alternatively, the highest scoring bidder or bidders may be requested to submit best and final offers. If best and final offers are requested by the State and submitted by the bidder, they will be evaluated (using the stated criteria), scored and ranked by the Evaluation Committee. The award will then be granted to the highest scoring bidder. However, a bidder should provide its best offer in its original proposal. Bidders should not expect that the State will request a best and final offer.

SS. ETHICS IN PUBLIC CONTRACTING

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

No bidder shall pay or offer to pay, either directly or indirectly, any fee, commission compensation, gift, gratuity, or anything of value to any State officer, legislator or employee based on the understanding that the receiving person's vote, actions or judgment will be influenced thereby. No bidder shall give any item of value to any employee of the State Purchasing Bureau.

Bidders shall be prohibited from utilizing the services of lobbyists, attorneys, political activists, or consultants to secure the contract. It is the intent of this provision to assure that the prohibition of state contact during the procurement process is not subverted through the use of lobbyists, attorneys, political activists, or consultants. It is the intent of the State that the process of evaluation of proposals and award of the contract be completed without external

influence. It is not the intent of this section to prohibit bidders from seeking professional advice, for example consulting legal counsel, regarding terms and conditions of this Request for Proposal or the format or content of their proposal.

If the bidder is found to be in non-compliance with this section of the Request for Proposal, they may forfeit the contract if awarded to them or be disqualified from the selection process.

TT. INDEMNIFICATION

_____ **Accept (Initial)** _____ **Reject (Initial)** _____ **Reject and Provide Alternative within RFP Response (Initial)**

1. GENERAL

The contractor agrees to defend, indemnify, hold, and save harmless the State and its employees, volunteers, agents, and its elected and appointed officials (“the indemnified parties”) from and against any and all claims, liens, demands, damages, liability, actions, causes of action, losses, judgments, costs, and expenses of every nature, including investigation costs and expenses, settlement costs, and attorney fees and expenses (“the claims”), sustained or asserted against the State, arising out of, resulting from, or attributable to the willful misconduct, negligence, error, or omission of the contractor, its employees, subcontractors, consultants, representatives, and agents, except to the extent such contractor liability is attenuated by any action of the State which directly and proximately contributed to the claims.

2. INTELLECTUAL PROPERTY

The contractor agrees it will at its sole cost and expense, defend, indemnify, and hold harmless the indemnified parties from and against any and all claims, to the extent such claims arise out of, result from, or are attributable to the actual or alleged infringement or misappropriation of any patent, copyright, trade secret, trademark, or confidential information of any third party by the contractor or its employees, subcontractors, consultants, representatives, and agents; provided, however, the State gives the contractor prompt notice in writing of the claim. The contractor may not settle any infringement claim that will affect the State’s use of the Licensed Software without the State’s prior written consent, which consent may be withheld for any reason.

If a judgment or settlement is obtained or reasonably anticipated against the State’s use of any intellectual property for which the contractor has indemnified the State, the contractor shall at the contractor’s sole cost and expense promptly modify the item or items which were determined to be infringing, acquire a license or licenses on the State’s behalf to provide the necessary rights to the State to eliminate the infringement, or provide the State with a non-infringing substitute that provides the State the same functionality. At the State’s election, the actual or anticipated judgment may be treated as a breach of warranty by the contractor, and the State may receive the remedies provided under this RFP.

3. PERSONNEL

The contractor shall, at its expense, indemnify and hold harmless the indemnified parties from and against any claim with respect to withholding taxes, worker’s compensation, employee benefits, or any other claim, demand, liability, damage, or loss of any nature relating to any of the personnel provided by the contractor.

UU. NEBRASKA TECHNOLOGY ACCESS STANDARDS

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

Contractor shall review the Nebraska Technology Access Standards, found at <http://nitc.nebraska.gov/standards/2-101.html> and ensure that products and/or services provided under the contract comply with the applicable standards. In the event such standards change during the contractor’s performance, the State may create an amendment to the contract to request that contract comply with the changed standard at a cost mutually acceptable to the parties.

VV. ANTITRUST

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contractor hereby assigns to the State any and all claims for overcharges as to goods and/or services provided in connection with this contract resulting from antitrust violations which arise under antitrust laws of the United States and the antitrust laws of the State.

WW. DISASTER RECOVERY/BACK UP PLAN

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contractor shall have a disaster recovery and back-up plan, of which a copy should be provided to the State, which includes, but is not limited to equipment, personnel, facilities, and transportation, in order to continue services as specified under these specifications in the event of a disaster.

XX. TIME IS OF THE ESSENCE

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

Time is of the essence in this contract. The acceptance of late performance with or without objection or reservation by the State shall not waive any rights of the State nor constitute a waiver of the requirement of timely performance of any obligations on the part of the contractor remaining to be performed.

YY. RECYCLING

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

Preference will be given to items which are manufactured or produced from recycled material or which can be readily reused or recycled after their normal use as per state statute (Neb. Rev. Stat. §81-15, 159).

ZZ. DRUG POLICY

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

Contractor certifies it maintains a drug free work place environment to ensure worker safety and workplace integrity. Contractor agrees to provide a copy of its drug free workplace policy at any time upon request by the State.

AAA. EMPLOYEE WORK ELIGIBILITY STATUS

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The Contractor is required and hereby agrees to use a federal immigration verification system to determine the work eligibility status of employees physically performing services within the State of Nebraska. A federal immigration verification system means the electronic verification of the work authorization program authorized by the Illegal Immigration Reform and Immigrant Responsibility Act of 1996, 8 U.S.C. 1324a, known as the E-Verify Program, or an equivalent federal program designated by the United States Department of Homeland Security or other federal agency authorized to verify the work eligibility status of a hired employee.

If the Contractor is an individual or sole proprietorship, the following applies:

1. The Contractor must complete the United States Citizenship Attestation Form, available on the Department of Administrative Services website at www.das.state.ne.us.
2. If the Contractor indicates on such attestation form that he or she is a qualified alien, the Contractor agrees to provide the US Citizenship and Immigration Services documentation required to verify the Contractor’s lawful presence in the United States using the Systematic Alien Verification for Entitlements (SAVE) Program.
3. The Contractor understands and agrees that lawful presence in the United States is required and the Contractor may be disqualified or the contract terminated if such lawful presence cannot be verified as required by Neb. Rev. Stat. §4-108.

BBB. CERTIFICATION REGARDING DEBARMENT, SUSPENSION AND INELIGIBILITY

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contractor, by signature to this RFP, certifies that the contractor is not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded by any federal department or agency from participating in transactions (debarred). The contractor also agrees to include the above requirements in any and all subcontracts into which it enters. The contractor shall immediately notify the State of Nebraska if, during the term of this contract, contractor becomes debarred. The State of Nebraska may immediately terminate this contract by providing contractor written notice if contractor becomes debarred during the term of this contract.

IV. PROJECT DESCRIPTION AND SCOPE OF WORK

In March 2010, the Patient Protection and Affordable Care Act (PPACA) and the Health Care and Education Reconciliation Act of 2010 were signed into law. The two laws are collectively referred to as the Affordable Care Act (ACA). Sections of the ACA, codified at 45 CFR 155, 156 and 157, require the creation of a health insurance exchange in each state, either by the state or by the federal government. The State of Nebraska will employ the Federally Facilitated Marketplace (Marketplace) option.

The ACA codified at 42 CFR 431, 435, and 437 calls for considerable change in the manner in which states manage their Medicaid programs. The final and interim final regulations call for implementation of a streamlined Medicaid eligibility process which collapses existing Medicaid categories, streamlines the application process and employs the simplified Modified Adjusted Gross Income (MAGI) standard for a significant proportion of the population. In addition, the regulations call for a coordinated process by which individuals may apply for and receive an eligibility determination for Medicaid on a MAGI, non-MAGI basis or for Advanced Premium Tax Credits (APTC)/Cost Sharing Reductions (CSR) of premium payments for insurance coverage purchased via an exchange.

The Nebraska Department of Health and Human Services (Department), Division of Medicaid and Long Term Care (MLTC) is responsible for Medicaid eligibility services. The Information Systems and Technology (IS&T) Division provides leadership, project management, planning, implementation, and support services for information technology for the Department. IS&T will provide support for the project, including the technical planning, implementation, testing and maintenance of the new solution.

The implementation of ACA has introduced new complexities and challenges for the State of Nebraska. An analysis was conducted by the State of Nebraska to determine the most desirable option for an eligibility and enrollment system that complies with ACA regulations and the CMS Seven Standards and Conditions. The analysis revealed that replacing the current Medicaid eligibility and enrollment system with a modern solution was the best course of action. The analysis criterion is available in the Procurement Library.

The purpose of this RFP is to procure the products and services of a Systems Integrator with an integrated Eligibility and Enrollment Solution (EES). Nebraska's existing Nebraska Family Online Client User System (N-FOCUS) Eligibility and Enrollment System, developed with client/server technology, is almost twenty years old. Medicaid eligibility will move out of the N-FOCUS system and into the EES that meets the CMS Seven Standard and Conditions and obtains ACA compliance. Nebraska intends to migrate Medicaid eligibility and enrollment off the existing N-FOCUS by the end of 2015 to leverage the enhanced federal matching funds that expire at that time.

The State of Nebraska will select one Contractor to fulfill all the EES responsibilities described herein. The EES described in this RFP must comply with regulatory requirements detailed in the ACA and all requirements for enhanced federal matching funds, including the CMS Seven Standards and Conditions. Although many details of the implementation of the new provisions have been defined, it is absolutely essential that the EES support not only the additional workflows, processes, and rules that will come about, but also the increase in the number of members that are served and the cultural change that will occur as a result of this implementation. The general functionality provided by the EES must also have sufficient flexibility to easily include the new processes and rules.

The Department will utilize the following values as guiding principles to aid decision-making and the work effort. The principles may be updated over time as new developments occur or as new information is discovered.

The Department will:

1. Meet federal and/or State of Nebraska compliance requirements;
2. Ensure fiscal responsibility by:
 - a. Leveraging existing human resources;
 - b. Fulfilling future business needs; and
 - c. Maximize federal funding for the EES implementation and operations.
3. Ensure positive consumer experience through:
 - a. No wrong door;
 - b. Fully-automated (real-time) eligibility;
 - c. Customer communications that meet and/or exceed all requirements;
 - d. Enhanced system logic and workflow; and
 - e. Consumer assistance to understand new or changed processes for application and enrollment.
4. Develop and utilize robust reporting capabilities;
5. Establish efficient and accountable eligibility management by:
 - a. Retaining Department final eligibility determination; and
 - b. Developing a separate Medicaid eligibility unit.
6. Leverage electronic data to the extent possible; and
7. Promote intra-agency, inter-agency and external communications to realize efficient and coordinated outcomes.

Independent Verification & Validation Contractor

The State of Nebraska has released an RFP to procure an Independent Verification and Validation (IV&V) Contractor. The purpose of that procurement was to contract for IV&V services to assist the State of Nebraska to ensure success of the EES project by facilitating early detection and correction of errors, enhance management insight into risks and ensure compliance with project performance, schedule, and budget requirements.

The State of Nebraska will award the IV&V contract to perform critical monitoring services throughout the course of the EES project. The Department and the IV&V Contractor will review all deliverables of the EES Contractor. The initial list of deliverables is defined in this RFP along with a description of the formal process to be used in the submission and review of the deliverables. The EES Contractor must produce and submit to the Department deliverables based on the dates that will be agreed upon in the project schedule.

In compliance with 45 CFR 95.626 and their contractual obligations, the IV&V Contractor will independently produce status reports on the progress of the project and submit them to the Department and CMS. This action will ensure a check and balance approach to assessment and allow the IV&V Contractor to maintain the independence it needs to do the job for which they were contracted. It will also ensure that CMS is getting necessary information in a timely and unedited manner. The Department will also initiate a standing monthly status update call with CMS the week following the status report to discuss the findings, recommendations, and corrective action, if required.

The contractor awarded the EES IV&V contract, their subcontractor(s) and third party vendor(s) are precluded from submitting an EES proposal, assisting another company in making a proposal, or otherwise materially participating in any subsequent contract related to the EES project.

The bidder must provide the following information in response to this Request for Proposal.

A. PROJECT OVERVIEW

The State of Nebraska is seeking proposals from qualified bidders with system integration and healthcare enrollment and eligibility expertise, project management expertise, and relevant past experience installing Medicaid or healthcare eligibility determination systems similar to the requirements defined in this RFP. The Bidder must have or team with a company with an Eligibility and Enrollment Solution and offer hosting capabilities defined in this RFP.

The current N-FOCUS eligibility/enrollment system and associated business processes have been in operation for approximately 20 years. The State of Nebraska wants to replace the current Medicaid eligibility and enrollment functionality in N-FOCUS with a modern Commercial off the Shelf (COTS) solution for the following business reasons:

1. The State of Nebraska is looking for a modern, integrated eligibility and enrollment solution that has been designed around a well thought-out, efficient set of business processes needed to support eligibility and enrollment in public benefit programs. The Department will modify its current business processes and retrain its staff to adopt the business processes built into the EES. Given the Department's willingness to adapt its core eligibility processes to the EES, the EES must be built around a strong, fundamentally sound set of eligibility and enrollment processes. That foundation should be easily demonstrated in the EES design, workflow, user interface and reports.
2. Like most states, Nebraska is working hard to maintain fiscal discipline at a time when the State of Nebraska is being asked to take on more responsibilities. Due to various ACA provisions, the State of Nebraska fully expects Medicaid enrollment to increase. In addition, the ACA required integration with the Marketplace increases program responsibilities. These issues, combine with an already heavy workload mandates some significant operational changes. The Department is hiring additional eligibility workers to handle the increased workload, but replacement of the eligibility system represents an opportunity to bring increased efficiency to systems and business processes. The State of Nebraska fully expects the EES to allow it to increase operational efficiency; to do more with less.
3. As part of the increased efficiency, the Department expects the EES to be highly configurable by administrative users (i.e. non-technical users). Allowing administrative users to easily update eligibility rules and other key system functions, without programming changes, will allow the Department to run a more nimble and responsive program at a lower cost than N-FOCUS.
4. N-FOCUS has the ability for customers to self-service their account, but there are limitations. The EES should provide an easy to use interface to allow self-service for customers who prefer to do as much as they can on their own via different modalities such as online and phone. All appropriate functions, forms, notices, documentation, help, etc., should be available to the customer in an interactive and easy to use format.

Equally important, the EES should not neglect those customers that do not or cannot

help themselves via self-service mechanisms. For these customers, the EES should facilitate easy access via methods such as, having a customer's representative act on their behalf; allowing an eligibility worker to provide application support; or allowing the customer to be serviced in person or via paper. The EES should fully support a range of options to make the eligibility/enrollment process as easy and friendly as possible. The customer should not feel like their service is compromised due to the option they have chosen.

5. The EES should take full advantage of advances made in reporting and business intelligence over the last 20 years. The EES should provide the ability to produce "canned", parameter based reports on a routine schedule or on demand, as well as, ad-hoc reports as desired. The ability to produce reports of all kinds should be as easy as possible. A range of tools should be available to allow system users with data handling skills ranging from novice to expert the ability to extract data required to perform their job function. A newly trained eligibility worker, the Department's Executive Team and a seasoned data analyst should all be provided tools appropriate for their skill level without presenting barriers to obtaining desired information from the system. Users of the system should not have to wait for a data expert to extract critical information. Equally important is the ability of the solution to provide metrics and analysis that allows the Department to proactively manage programs in the EES. It is the Department's desire to be out in front, actively making policy and programmatic changes to benefit its enrolled customers and the citizens of Nebraska.
6. The Department currently invests a significant amount of time training its eligibility workers so they can provide the highest levels of customer service possible. The Department is looking for the EES and associated training materials to provide additional power for users, but with less training. Decreasing training time allows the Department to lower costs, more easily fill vacancies and make workers more productive.
7. As part of its fiscal responsibility, the State of Nebraska is looking for an EES with an overall lower Total Cost of Ownership (TCO) than its current systems. There are many factors that go into TCO, such as implementation costs, maintenance costs, modification costs, operational costs, etc. The EES should demonstrate a sound long term investment and efficient use of tax dollars for Nebraskans.

B. SCOPE OF WORK

The State of Nebraska seeks a Contractor who will bring experienced and knowledgeable project personnel, processes, approaches and tools to meet the requirements of the EES Project. The EES Contractor will perform all contractor responsibilities required of a Systems Integrator, will provide and implement a modern integrated COTS-based EES that is ACA compliant, meets the CMS Seven Standard and Conditions, and completes all modifications needed to meet the State of Nebraska's requirements outlined in this RFP.

The Contractor shall evaluate its proposed EES against the Medicaid Information Technology Architecture (MITA) Framework 3.0 Technical Capability Matrix. The Contractor shall deliver a system that supports MITA 3.0 for Eligibility which is expected to be finalized by CMS during the early months of this project.

The desired system design, development, and subsequent implementation of a new EES must meet the State of Nebraska's goals and produce benefits that significantly improve and

simplify business processes or tasks. The Contractor’s solution must not be cumbersome for eligibility staff and shall maximize business and system efficiencies as much as possible.

The following RFP sections focus on the “how” and “what” aspects of the various functions the Contractor services and technology solutions shall perform. Each section is not inclusive of every possible duty, task, or deliverable necessary to achieve success on this Contract. Bidders should not assume that any perceived lack of detail in a specific area indicates that the Contractor will have no duties in that area. Bidders shall develop a solution that fulfills the State of Nebraska’s goals and requirements in a cost-effective manner, which may include details not specifically outlined in this RFP. Many objectives describe the end result, thus allowing Bidders flexibility in proposing the details of how their solution meets the Department’s goals.

The State of Nebraska encourages responses that demonstrate a thorough understanding of the ACA requirements, applicable State of Nebraska and federal policies, Medicaid eligibility and enrollment, and the defined RFP requirements. The Bidder must provide a detailed description of its proposed approach and methodologies to all aspects of the project. The proposal should be as specific as possible in its responses to provide the State of Nebraska with an adequate understanding of the intent of the Bidder.

The RFP and appendices provide information for Bidders to evaluate the RFP and prepare a response. The following information is not meant to identify every detail but to lay the ground work. Bidders are strongly encouraged to review and understand the contents of the Bidders’ Library (Appendix A) for more detail.

The core Functional components of the EES the State of Nebraska is seeking are as follows:

EES Functional Components		
<ul style="list-style-type: none"> 1. Presumptive Eligibility 2. Registration 3. Application Intake and Processing 4. Determine MAGI and non-MAGI Medicaid Eligibility 5. Caseload Management 6. Spousal Impoverishment Assessment 	<ul style="list-style-type: none"> 1. Enrollment/Renewals 2. Case Review Quality Assurance 3. Outreach and Notifications 4. Workflow 5. Master Person Index 6. Reporting 7. Policy Management 8. Public Self-Service Portal 	<ul style="list-style-type: none"> 1. No Wrong Door Policy (Application Pathways) 2. Changes to Beneficiary Information 3. Performance Management 4. Audit Trail 5. Organizational Change Management 6. Business Process Reengineering 7. Documentation

The core Non-Functional components of the EES the State of Nebraska is seeking are as follows:

EES Non-Functional Components		
1. Infrastructure Design, Installation, Testing, Implementation 2. Software Installation, Testing, Implementation 3. Software Configuration, Testing, Implementation	1. Interface Design, Development, Testing, Implementation 2. System Integration, Testing, Implementation 3. Technical Support Services 4. User and Technical Training	1. Post-Implementation Maintenance and Operations 2. Data Conversion and System Migration 3. EES Pilot, if applicable 4. Turnover

C. TECHNICAL ENVIRONMENT

The State of Nebraska currently operates a legacy eligibility and enrollment system called N-FOCUS that resides on an IBM mainframe in the State of Nebraska’s data center. N-FOCUS is an integrated system used to determine, track, and report eligibility for Medicaid as well as a number of other Department programs (TANF, SNAP, LIHEAP, Child Welfare, etc.).

Currently in N-FOCUS, Medicaid eligibility is determined, and enrollment information is forwarded to the State of Nebraska’s internally developed and maintained Medicaid Management Information System (MMIS) for claims processing.

Due to the breadth of functionality provided by N-FOCUS, the system has numerous interfaces to other systems (batch and real-time). A graphic depiction of the key interfaces between N-FOCUS and other systems is provided in the Procurement Library along with a more comprehensive description of N-FOCUS and other key systems and technologies that will help in understanding the current environment.

1. PROPOSED SYSTEM APPROACH

The primary focus of the EES Contractor is to develop and deliver a fully functional EES for the business processes and functionality defined in this RFP, including shared business services that will provide an enterprise set of shared services. The EES Contractor will also deploy the entire hardware and software infrastructure needed to run a robust Service Oriented Architecture (SOA) infrastructure and application platform for the EES.

Through its response to this RFP, Bidders are expected to demonstrate an approach and solution that will provide a flexible and interoperable solution for the design, development, and implementation of an integrated eligibility solution that will fit within the vision for the State of Nebraska's enterprise approach to technology for Nebraska’s Health and Human Services programs (See Technology Framework in the Procurement Library).

The EES must be a SOA web-based solution hosted at a secure location in the continental United States. This RFP seeks to procure hosting services for the EES during the project and post implementation.

The EES must be designed to maximize opportunities for automation and minimize the need for human input or intervention. The EES Contractor will design and configure the solution so that changes can be implemented quickly.

The solution should be capable of reusing components and capabilities from the federal government and other states, as well as, be reusable itself. The solution should include specific opportunities to reuse functional components, operational capacities, and/or business rules from other sources. In addition, the solution should leverage strategies to reduce build and operational costs by sharing components and capabilities with other sources.

2. SYSTEM ARCHITECTURE

The EES System must be designed with leverage and reuse in mind. A key goal of this initiative is to take advantage of common COTS applications and infrastructure to shorten development and deployment time wherever possible, while preserving the Department's ability to meet the required unique business, functional, and non-functional requirements.

The EES should leverage contemporary IT industry best practices and technology innovations such as Service Oriented and Event Driven Architectures (SOA and EDA), Component Based Development, Web Services Standards and the Internet to achieve its objectives in creating highly modular, reusable, configurable and agile systems with relatively lower maintenance and enhancement costs than the current solution or alternate architectures. The EES should also leverage innovative ways to engage the existing and future participants through the adoption of self-service technologies.

The EES must leverage Composite Application Architecture principles and techniques. A Composite Application Architecture approach will allow the State of Nebraska to leverage both internal investments in automation as well as solutions being developed by the contractor community to enable and drive its strategies. The State of Nebraska expects to create the infrastructure, the development approach, and discipline needed to have a true plug and play application assembly environment. The new environment should be able to take advantage of the development work completed by contractors in other states. The State of Nebraska wants new systems to be designed to provide feature rich applications that can be updated over the WAN and the Internet, and should deliver a consistent and appealing user experience to the Department's employees, contractors, participants, and partners. The interface between the Service Consumer and Service Provider modules must be bi-directional.

The State of Nebraska's strategic Web Services preferences include XML, SOAP, WSDL, and XSD, over HTTP. The Web Service Specifications (collectively referred to as "WS-**") and REST, industry-supported standards that provide the heterogeneity and interoperability for applications, are both required for this initiative.

The EES and platform, must deliver highly capable Business Intelligence (BI) and Reporting capabilities. The requirement for Business Intelligence Services is to build applications to provide capabilities in the following categories:

- a. Analysis, such as Online Analytical Processing (OLAP)
- b. Information delivery, such as reports and dashboards

These BI and Reporting capabilities should be delivered through a formal and highly tuned Data Warehouse and Data Mart Architecture.

3. TECHNICAL SERVICES

The EES will utilize a range of technical services to provide participants, Department staff, and external service providers with robust, secure access to information and functionality. The table below provides an overview of those services and capabilities.

Service	Description
Identity Management	Ensure individuals are identified across a permitted range of roles in the Medicaid area with whom they interact, and have access only to information and functionality for which they are authorized.
Consent Management	Ensure that appropriate information is shared only with individuals that are authorized and have a need for access to it.
Portal	Provide consistent user interface and access to information and functionality.
Enterprise Information Exchange	Also referred to as a gateway or service bus, which will provide a standards based mechanism for integrating with and sharing information among full range of human services and administrative applications.
Master Data Management	Includes Master Person Index, and may include Master Provider Index, etc. to ensure a common view and single version of the “truth” across the Department’s programs.
Rules Engine	Define and manage the business rules which will drive eligibility assessment across human services programs.
Content Management	Allow management of and access to a wide range of information and media.
Analytics and Business Intelligence Tools and Repositories	Create reports and dashboards to demonstrate compliance, manage current operations, and develop analytical and predictive analyses for future planning and policy development.
Collaboration Capabilities	These include: Service Coordination, Client and Provider Look-up and Query, Referral Management, and Alerts and Notifications.
System Management	The capability to manage updates to the system software and hardware, schedule and execute non-intrusive back-ups, monitor system performance and other such systems management functionality.
Security/Privacy Management	The capability to manage access to the system (logins, passwords, access-level privileges), manage all security logging, generate security reports, manage privacy levels and other such functions.

4. MIGRATION PLAN

The EES Contractor must develop a Migration Plan to transition the State of Nebraska’s Medicaid eligibility and enrollment functionality supported by N-FOCUS to the EES. The Migration Plan deliverable approved by the Department must detail the requirements for integration between the EES, N-FOCUS, the Marketplace, and other essential State of Nebraska systems. Additional information concerning other State of Nebraska systems is available in the Procurement Library.

The Migration Plan must include all touch points, along with appropriate roles and responsibilities to ensure that the systems are aligned and synchronized during the coexistence period of N-FOCUS, the Marketplace and the EES. The Plan needs to include robust consideration of the citizen (applicant, recipient and beneficiary) and worker/user experience to ensure that during the coexistence period the external users have a seamless and streamlined user interface, and that there is minimal impact on Department workers' productivity and workflow efficiency.

The Migration Plan must provide, at a minimum, a strategy for:

- a. All integration, interface and data synchronization transactions;
- b. Data Conversion plan;
- c. Scheduling each of the migration activities;
- d. Maintaining data integrity between the existing N-FOCUS system and the EES; and
- e. Modification of N-FOCUS functions that will remain in N-FOCUS.

The Bidder is expected to propose an appropriate number of working sessions with the Department Project team to define the required integration between the systems and ensure a robust and seamless user experience.

5. DATA CONVERSION AND SYNCHRONIZATION

The Bidder's approach to data conversion should incorporate a sound methodology, careful project planning, a proven project management methodology, and the use of automated tools. The approach should provide a strong emphasis on data quality and close collaboration with the Department. The Bidder's proposed strategy shall result in high quality data in the EES, reduce risk, and ensure a predictable on-time, on-budget outcome.

The objective of the data conversion activity is to:

- a. Retain relevant data from the existing system;
- b. Prevent manual reentry of data to the EES; and
- c. Allow users to function without interruption or loss of data.

6. REMOTE ACCESS

Remote Access will be necessary and require an end-user device, a transport network, and hardware and software within the enterprise to allow the establishment and use of applications and data by remote users. Mobile and Remote Access services will be used most often to support "nomadic" users – those who travel from location to location, and to support "telecommuters" – users who access enterprise resources from their home.

a. BROWSER ACCESS

The externally-exposed application must include a Remote Access Portal for workers, which will provide a common User Interface (UI) and integration for multiple native Web-based applications and gateways to non-Web-based applications.

b. VPN ACCESS

Any end user device with a Java or ActiveX-capable browser and appropriate endpoint protection should be able to access State of Nebraska resources by connecting to the State of Nebraska Demilitarized Zone (DMZ) SSL VPN server. Data communication between the client and the VPN server can take place across the Internet or other IP networks, and must be controlled by security mechanisms. Authentication services must be used to verify the identity of the end user before access is granted.

7. SECURITY AND PRIVACY

The EES must maintain the security of information in the environment elements under management and in accordance with the Nebraska Security Policy. The Nebraska Security Policy is available at <http://www.nitc.nebraska.gov/standards/index.html>, Section 8. The Contractor will implement information security policies and capabilities as set forth by the State of Nebraska. The Contractor's responsibilities with respect to security services must also include the following:

- a.** Support intrusion detection and prevention including prompt agency notification of such events, reporting, monitoring and assessing security events;
- b.** Provide vulnerability management services including support of remediation for identified vulnerabilities as agreed;
- c.** Support the State of Nebraska Security Policy that includes the development, maintenance, updates, and implementation of security procedures with the State of Nebraska's review and approval, including physical access strategies and standards, ID approval procedures and a breach of security action plan;
- d.** Manage and administer access to the systems, networks, operating software, systems files and State of Nebraska data;
- e.** Install and update State of Nebraska provided or approved system security software, assign and reset passwords per established procedures, provide the State of Nebraska access to create user IDs, suspend and delete inactive logon IDs, research system security problems, maintain network access authority, assist processing Department requested security requests, performing security audits to confirm that adequate security procedures are in place on an ongoing basis, with the State of Nebraska's assistance provide incident investigation support, and provide environment and server security support and technical advice; and
- f.** Develop, implement, and maintain a set of automated and manual processes so that the State of Nebraska data access rules, as they are made known are not compromised.

The EES will comply with State of Nebraska and federal confidentiality and information disclosure laws, rules and regulations applicable to this RFP including but not limited to:

- a.** United States Code 42 USC 1320d through 1320d-8 (HIPAA); and
- b.** Code of Federal Regulations, 42 CFR 431.300, 431.302, 431.305, 431.306, 435.945, 45 CFR 164.502 (e) and 164.504 (e).

The EES must be compliant with FedRAMP CSP, NIST-800-53 Rev 4 Federal Security controls, MARS-e requirements, and State of Nebraska Security and Privacy Policies.

8. CAPACITY PLANNING

The EES design and implementation approach must be responsive to three core dimensions of capacity planning.

a. BUSINESS CAPACITY PLANNING

Ensures that the future business capacity requirements (e.g., desired outcomes, anticipated number and type of Participants, etc.) are considered and understood; and that sufficient IT capacity to support the EES is planned and implemented within an appropriate timeframe.

b. SERVICE CAPACITY PLANNING

Helps estimate the end-to-end performance, usage, workloads and resources of the EES; and ensures that the performance of the EES as detailed in the capacity section of the Non-Functional requirements in Appendix C, is monitored and measured, and that the collected data is recorded, analyzed, and reported.

c. IT COMPONENT CAPACITY PLANNING

Helps predict the performance, utilization, and capability of individual IT technology components. It also ensures that all components within the required IT infrastructure with finite resources are monitored and measured and that the collected data can be recorded, analyzed, and reported.

The EES and its databases need to support the State of Nebraska's Medicaid caseloads (active and inactive participants and historical participant data) and future caseload increases. The current Medicaid caseload is 215,000 individuals.

The EES must also accommodate the anticipated number of users and devices at each location. There are approximately 700 internal users/300 concurrent users and 200 external users/25 concurrent users at this time, and all of the internal users/employees are expected to have a workstation that will access the EES.

The new shared infrastructure and functional capabilities need be designed to be operational 7x24x365. The centralized servers and resources and public facing website will be designed to be operational 7x24x365.

The EES is required to have the ability to support transparent failover capabilities using high-availability processor architectural options. The EES needs to be able to continue to operate at all State of Nebraska locations despite failure or availability of any single technology components such as a server platform or network connection.

It is imperative that the EES provides the highest level of control and responsiveness in meeting the Department's business needs. The Bidder data center must be configured at the Tier IV – Fault Tolerant Site Infrastructure Level (as defined by the Uptime Institute).

D. FUNCTIONAL REQUIREMENTS

The EES' Functional Requirements are contained in the narrative of the RFP and in Appendix B. Bidders must become familiar with and respond to both.

E. NON-FUNCTIONAL REQUIREMENTS

The Non-Functional Requirements defined in this section of the RFP were driven by the functional requirements, an understanding of the existing environment and the overarching goals of the IS&T organization.

The Contractor is required to review, validate and further define the non-functional requirements with the State of Nebraska. In addition, the Contractor is required to conduct a crosswalk of the requirements against the legacy N-FOCUS system functionality to validate and identify any possible gaps in the requirements.

The EES' non-functional requirements are contained in the narrative of the RFP and in Appendix C. Bidders must become familiar with and respond to both.

1. KEY ASSUMPTIONS

The assumptions in the following table are presented for Bidders to consider when proposing a viable approach to achieving the outcomes envisioned for the EES.

Assumption	Description
<p>General</p>	<p>1 The EES Contractor is responsible for the deployment of the EES and its associated business processes underlying technologies and platforms for the Nebraska Medicaid program. The State of Nebraska has an expectation that the deployment and associated business processes will be completed and approved by December 31, 2015.</p>
	<p>2 N-FOCUS is anticipated to coexist alongside the EES for the foreseeable future to support other non-Medicaid programs. This will require the EES Contractor to support integration with the N-FOCUS legacy system to ensure a citizen centric approach to accessing and applying for Nebraska Health and Human Services programs and to manage updates and changes to eligibility status.</p>
<p>EES</p>	<p>1 The State of Nebraska through this RFP is selecting a Contractor to migrate the Medicaid eligibility and enrollment functions to the new COTS-based EES and N-FOCUS so that the two systems work together as an integrated eligibility solution.</p>
	<p>2 A key objective of the EES is to present a central and easy to use web presence for applicants and beneficiaries, while minimizing the operational and technological implementation risks.</p>
	<p>3 CMS and CCIIO are collaboratively defining a catalog of standardized web services that enable communications between the Marketplace and the Federal Data Services Hub. The EES Contractor will be responsible for leveraging CMS' Business Service definition efforts and implement similar integration between the EES and the existing N-FOCUS System.</p>

Assumption	Description
	4 The EES Contractor will enable the State of Nebraska to comply with the new ACA rules related to automated verification, redetermination, and multi-channel support (i.e. on-line, phone, etc.).
	5 The EES Contractor will create and test business rules for the eligibility and enrollment functions in support of the Medicaid program. These business rules must be shareable within the State of Nebraska and/or the federal government.
	6 The EES Contractor will be responsible for supporting the required modifications to N-FOCUS to integrate with the EES.
	7 Non-Medicaid functionality of N-FOCUS will continue to reside in CA Gen/AION and on the IBM Mainframe after the migration of Medicaid eligibility related functionality to the EES. The retirement of N-FOCUS is not within the scope of this RFP.
	8 All technical support and system hosting must be provided by individuals residing in the continental United States.
EES Platform	1 The State of Nebraska has not chosen an SOA infrastructure or technology stack for the EES, and therefore expects the EES Contractor to include that as part of the RFP proposal.

2. PROPOSAL REQUIREMENTS

The Bidder must provide a narrative overview of how the proposed solution will meet the EES requirements. The following requirements pertaining to the Non-functional Requirements for the EES and must be responded by the Bidder.

Bidders must provide specific details of the proposed approach to meeting the State of Nebraska’s requirements in each area. Also, include one or more diagrams where necessary that detail the proposed design and the relationships between key technical components.

Responses in this section must be highly-focused on the specific requirements and must not simply provide generic or marketing descriptions of technology or product capabilities.

The Bidder's response must include:

a. ARCHITECTURE & POLICY

Describe the proposed approach to SOA. The approach must, at a minimum, take the following topics into consideration in the details:

1. Distribution of Services;
2. Integration of Services;

3. Ease of Maintenance;
 4. Administrations and Security; and
 5. Support for various Protocols.
- i. Describe the system integration approach between the Bidder's solution, Interfaced Systems and any other proposed third party products. The approach must, at a minimum, provide details on the interoperability features and capabilities of the Bidder's proposed solution and how the EES intends to meet or exceed the Interoperability-Interface Requirements set forth in Appendix C;
 - ii. Describe the approach to scalability and extensibility of the proposed EES. The approach, at a minimum, must take the following topics into consideration while providing the details:
 - a) Ability to meet future growth;
 - b) Configurability;
 - c) Flexibility to keep up with changing technology and Regulatory needs; and
 - d) Ease of maintenance.
 - iii. Describe the approach for the proposed solution to meet Performance Standards. The approach must, at a minimum, provide details on how the EES intends to meet or exceed the Performance Requirements set forth in Appendix C;
 - iv. Describe the approach for the EES to adhere to or enable State of Nebraska and federal regulations;
 - v. Describe the approach for the proposed EES to meet Audit and Compliance requirements; and
 - vi. Describe the design approach and the characteristics of the user interface for the EES. The EES must be designed to utilize a browser based interface that can provide feature rich applications that can be updated over the Wide Area Network and the Internet, and should deliver a consistent user experience to participants, Department staff, contractors, and partners.

b. SYSTEM ADMINISTRATION AND SUPPORT

- i. Describe the system administration tools and procedures that will be delivered for the ongoing support and maintenance, including customization of the EES.
- ii. Describe the proposed overall management framework, including proposed tools for:
 - a) Application Management and Monitoring;
 - b) Web Services Management;
 - c) Systems Management and Monitoring;
 - d) Event Management;
 - e) Identity and Access Management;
 - f) Network Management and Monitoring;
 - g) Performance Monitoring;

- h) Business Rules;
 - i) Print Prioritization and Management; and
 - j) Workload Management.
- iii. Describe any proposed third-party off-the-shelf management tools and include detailed information regarding provider, product and version;
 - iv. Describe the audit trail capabilities of the EES;
 - v. Describe the processes used to archive and restore data from operational databases;
 - vi. Describe the technical documentation that comes delivered with the EES; and
 - vii. Describe the approach that will be taken to establish:
 - a) Multiple environments (e.g., sandbox, configuration/development, testing, quality assurance, production, training, and disaster recovery);
 - b) Procedures used to migrate software and system configuration (e.g. rules, workflows)from one environment to another; and
 - c) Steps needed to maintain the synchronization between environments.

c. SYSTEM SECURITY AND DISASTER RECOVERY

- i. Describe the approach to support technical controls and technology solutions that must be secured to ensure the overall security of the EES, including:
 - a) Provide security-related input into IT infrastructure, system and application design;
 - b) Leverage published industry standards and models to apply security best practices;
 - c) Support, enable and extend the security policy by providing specific security-related guidance to decision makers;
 - d) Contain the capability to provide user and site authentication;
 - e) Support VPN access;
 - f) Include the ability to recover from a failure of any single element;
 - g) Be easily serviceable;
 - h) Support the establishment and active management of data sensitivity levels; and
 - i) Include application and system hardening processes.
- ii. Describe the approach to support Identity and Access Management, including:
 - a) Compliance with all State of Nebraska and federal requirements for identity proofing including but not limited to, appropriate IRS regulations for identity proofing access to income tax data;
 - b) Enable the Department to identify users in different contexts so that the Department policies and user preferences can be applied consistently;

- c) Deliver an integrated login experience for users across the State of Nebraska's systems and channels;
 - d) Enable coherent audit trails and chain of custody records needed for security forensics and compliance requirements;
 - e) Support the proactive management of user access to the State of Nebraska's resources including de-provisioning when needed;
 - f) Enable the State of Nebraska to consistently identify participants so that customer service can be more effective; and
 - g) Support the use of Microsoft Active Directory for identification and authorization.
- iii. Describe the approach to support Application Encryption, including:
- a) Encryption of database columns and indexes for data at rest;
 - b) Encryption of flat files at rest and in motion;
 - c) Network encryption at the session layer (or lower) to secure communication streams that traverse un-trusted networks, and to provide encryption for sensitive data in motion across any network;
 - d) Field-level encryption so custom applications can secure pertinent information within a communication stream; and
 - e) Key management for secure creation, storage, and retrieval of encryption keys.
- iv. Describe the approach to support Privacy and Consent, including:
- a) Role-based access within the EES must ensure that access to sensitive information will conform to State of Nebraska policies; and
 - b) The EES must be able to identify and delineate between internal and external users (users outside the State of Nebraska) and must give them different levels of visibility to EES data. When displaying data, identification information tying the records back to specific participants must be omitted where appropriate.
- v. Describe the approach to support an audit trail of all pertinent events, giving due consideration to storage space and performance constraints. Examples of these events include:
- a) System start-up and shutdown;
 - b) Successful and unsuccessful login attempts;
 - c) User actions to access files or applications (successful and unsuccessful);
 - d) Actions taken by system administrators and security personnel;
 - e) All administrative actions performed on the EES;
 - f) Permission changes;
 - g) Creation of users and objects;
 - h) Deletion and modification of system files;
 - i) Registry key/kernel changes;
 - j) Changes, additions or deletions to data (including operational and security data) sets identified by management; and

- k) Out of normal EES operations usage or user access.
 - vi. Describe the approach to ensure the Confidentiality, Integrity and Availability (CIA) of the Database Management Systems responsible for managing data related to the proposed EES;
 - vii. Describe the approach to development and implementation of security measures that will provide security and protection for the system, including:
 - a) Server OS Security;
 - b) Client OS Security;
 - c) Mobile Devices Security;
 - d) Web Server Security;
 - e) Network security;
 - f) Browser Security; and
 - g) POS Terminal Security.
 - viii. Describe the approach to support Data Backup, including
 - a) Database and application backup procedures must be updated to include backups for the EES; and
 - b) Full online data backups must occur, as well as offline backups using tape storage.
 - ix. Describe the general approach to reestablishing operations in the event of a catastrophe, as well as its approach to providing the State of Nebraska with a Disaster Recovery Plan; and
 - x. Provide specifications on any hardware and software components utilized by the proposed security and disaster recovery solutions. Include the required components, configurations and procedures to enable a recovery.
- d. **SYSTEM PERFORMANCE, AVAILABILITY AND CAPACITY**
 - i. Describe the ability of the proposed solution architecture to support:
 - a) Internal case workers, and external participants;
 - b) Mission-critical services/Service Level Requirements;
 - c) Ease of management;
 - d) Ability to upgrade (ease and compatibility);
 - e) Virtualization and resource management;
 - f) Network Performance Requirements;
 - g) Meeting System response time requirements; and
 - h) Data dashboard capabilities to facilitate real time graphical display of technology performance metrics with drill-down capability aligned with IT Operations user's role and permissions.
 - ii. Describe the approach to providing a highly available system. The Contractor is responsible for delivering a cost-effective, high-availability environment that minimizes the frequency and impact of system failures,

reduces downtime, and minimizes recovery time in the event of catastrophic failure.

iii. Describe the approach to planning, sizing and controlling the system as IT Component Capacity needs change:

- a) Data Base Storage Capacity;
- b) Real-time Integrated/Centralized Database;
- c) Data Warehouse and Data Marts;
- d) User Capacity;
- e) Network Capacity;
- f) Server Capacity;
- g) Knowledge Base; and
- h) Document Repository.

iv. Describe the methodology for monitoring and reporting system performance, as well as the approach to Technology Management. This includes the methods for centrally managing system resources such as servers, backup, archiving, and recovery equipment, databases and applications. Address methods for auditing, tracing and scanning the system. Provide details on the use of specialized tools the Contractor will use to automate and track monitoring and management activities.

e. TECHNICAL COMPONENTS

i. Describe the approach to meeting the Enterprise Service Bus (ESB) requirements as well as the messaging approach for server-to-server and client-to-server communications, if applicable. The approach, at a minimum, must take the following topics into consideration while providing the details:

- a) SOA Architecture;
- b) Integration Mechanism;
- c) Routing and Orchestration Mechanism;
- d) Synchronous and Asynchronous Communication;
- e) Reliability of Message Delivery;
- f) Support for Industry Standard Messaging and Interfaces; and
- g) Administration and Security.

ii. Describe the approach to Data Integration and supporting technologies for Data Extraction, Transformation and Load into appropriate target systems.

The State of Nebraska's requirement for Enterprise Data Management is to have a mixture of OLTP, Operational Data Store (ODS), Data Warehouse, and Data Mart technologies that support transaction processing systems, information integration and reporting, enterprise analysis and decision support, and functional analysis.

The design approach for the EES must take into account the following four major types of shared data:

- a) Online Transaction Processing (OLTP) databases must be the read-write stores of the Department's transactional services and systems, and must be the primary point of data creation within the Department;
 - b) Operational Data Store (ODS) databases should be used to support operational and tactical data consolidation and data access needs of the Department. The data contained in an ODS must originate in one or more OLTP databases;
 - c) Data Warehouse databases should primarily support managerial and strategic decision making for the Department. A data warehouse may contain summarized data rather than detailed data as in an ODS; and
 - d) Data Mart databases should support departmental decision making for the Department. The scope of information stored within a data mart should be generally much smaller than within a data warehouse, and is limited to the needs of its audience.
- iii. Describe the approach to implementing the MDM technologies to build a Master Client Index/Enterprise Master Person Index to meet the Department's requirements in each phase of the implementation;
- iv. Describe the Security Architecture and Management approach supporting the EES;
- v. Describe the approach to the Business Intelligence (BI) platform that should deliver a balanced set of capabilities across three areas: information delivery, analysis, and development and integration with certain fundamental capabilities that need to be provided as part of the shared analytics and a user-driven BI strategy;
- vi. Describe the Reporting approach for both canned and ad-hoc reports and the ability of the proposed solution to provide Dashboarding capabilities. The approach, at a minimum, must take the following topics into consideration while providing the details:
- a) BI Infrastructure;
 - b) Scalable Data Architecture; and
 - c) Data Integration Tools.
- vii. Describe the Business Rules Engine technology that will enable and support the EES for both Integrated Eligibility as well as support of other programs;
- viii. Describe the approach the following topics that must be taken into consideration while providing the details:
- a) Rules Engine Architecture;
 - b) Validation, Calculation, Decision and Generation Rules;
 - c) Performance Tuning and Debugging; and
 - d) Rule Storage and Versioning.

- ix.** Describe the approach to using the Portal technologies to enable access for the variety of internal and external end users of the proposed solution. The approach, at a minimum, must take the following topics into consideration while providing the details:

 - a)** Multiple Channel Support;
 - b)** Search Capabilities;
 - c)** Accessibility considerations;
 - d)** Personalization; and
 - e)** Usability best practices and federal guidance.

- x.** Describe the Application Server technology and approach supporting the EES. The approach, at a minimum, must take the following topics into consideration while providing the details:

 - a)** Enterprise Ready and Scalable;
 - b)** Clustering;
 - c)** Store-and-Forward;
 - d)** Administration; and
 - e)** Security.

- xi.** Describe the approach to database management, metadata management, load balancing and/or clustering for extended scalability and performance, performance in transaction processing and report processing, Security and Audit;

- xii.** Describe the design approach for the EES shall address three major sets of shared data:

 - a)** Real-time Integrated/Centralized Database – Data regarding an applicant’s status, participant’s profile, benefits records/account, and financial records must be stored in a centralized operational database for real-time access and subsequent follow-up and reporting;
 - b)** Data Warehouse and Data Marts – Data extracted from the Real-Time operational databases and other external sources must be integrated, aggregated and optimized into physical data warehouses and marts a timely fashion to support reporting and business intelligence needs; and
 - c)** Document Repository – The EES must have the capability to connect to the State of Nebraska’s Enterprise Content Management System to centrally manage all documents throughout their lifecycle and share documents between various stakeholders.

- xiii.** Describe the approach to designing and deploying the appropriate Service Oriented Governance infrastructure technologies supporting the EES. The EES and approach, at a minimum, must take the following technology sub-categories into consideration while providing the details:
 - a)** SOA Policy Management;
 - b)** Service Portfolio Management;
 - c)** Compliance Engine;
 - d)** Service Repository;
 - e)** Service Registry;
 - f)** SOA Monitoring; and
 - g)** SOA Policy Enforcement.

- xiv.** Describe the Case Management and Business Process Management technologies and design approach supporting the EES. The approach, at a minimum, must take the following topics into consideration while providing the details:
 - a)** Rules Engine;
 - b)** Registry;
 - c)** Process modeling support;
 - d)** Workflow and task management; and
 - e)** Administration.

- xv.** Describe the EES Monitoring and Logging capabilities. The approach, at a minimum, must take the following topics into consideration while providing the details:
 - a)** Fault Monitoring;
 - b)** Performance Monitoring;
 - c)** Configuration Monitoring;
 - d)** Network Monitoring;
 - e)** Security Monitoring;
 - f)** Management and Reporting; and
 - g)** Root Cause Analysis.

- xvi.** Describe the approach to leveraging the State of Nebraska's Enterprise Content Management System technologies for Eligibility Determination process. The approach, at a minimum, must take the following topics into consideration while providing the details:
 - a)** Store Electronic Forms;
 - b)** Scan, Index and Store Imaged Documents;
 - c)** Searching of Documents; and
 - d)** Digital Rights Management Capabilities.

- xvii.** Describe the approach to Identity Management supporting the EES;
- xviii.** Describe the Shared Analytics approach supporting the EES. The approach, at a minimum, must take the following topics into consideration while providing the details:

- a) Shared Analytics Architecture and Design;
 - b) Integration and Data Quality;
 - c) Metadata and Data Quality;
 - d) Availability and Security;
 - e) Performance;
 - f) Connectivity;
 - g) Scalability;
 - h) Compliance;
 - i) Deployment;
 - j) Application Support; and
 - k) Administration and Backup-Archiving.
- xix. Describe the language environment(s), standards, relational databases, channels supported, hardware platforms supported, and other aspects of the technical direction for the EES; and
 - xx. Describe the timetable for migration of the EES to new technologies, product sets, or standards.

f. SOFTWARE AND HARDWARE COMPONENTS

- i. Describe the supported OS platforms and Server Configurations for the EES. Include minimum recommended specifications to support the proposed solution in all required environments (e.g., sandbox, configuration/development, testing, quality assurance, production, training, and disaster recovery);
- ii. Describe the client (desktop) architecture for the EES, including minimum recommended specifications (e.g., RAM, video RAM, disk space, processor speed) to support the EES, as well virtualized configurations to improve manageability and reduce operational costs;
- iii. Describe the proposed data storage software and hardware components;
- iv. Describe the tools and utilities used to design, build, test, deploy, report, monitor, and operate the EES and its components;
- v. Describe the architecture of other devices such as printers, electronic signature pads, smart card reader/writer and attached disks, which are necessary or recommended for the EES, including minimum and recommended specifications to support the proposed solution; and
- vi. Describe the proposed solution approach to network topology and hardware required to achieve this architecture (e.g., load balancing utilizing hardware and software based load balancers ahead of the web servers, Virtual Private Networks (VPNs), creation of DMZs by firewalls).

g. ENVIRONMENT INSTALLATION AND CONFIGURATION

- i. Describe the Environment Installation strategy and approach and the specifications for all necessary hardware, software and tools for the seven (7) enterprise environments listed below. The Bidder may propose to combine certain environments, where appropriate. The environments include:
 - a) Sandbox

- b) Configuration/Development;
 - c) Test;
 - d) Quality Assurance;
 - e) Production;
 - f) Training; and
 - g) Disaster Recovery.
- ii. Describe the Environment Configuration strategy and approach by providing details on configuration of all hardware, software and tools proposed.

h. DESIGN, DEVELOPMENT AND CUSTOMIZATION

- i. Describe the System Design Methodology. Include a description of the system Architecture and Design methodology and detailed Design Specifications;
- ii. Describe the System Development Methodology (e.g., Waterfall model, Rapid Application Development etc.) for both the Contractor and the State of Nebraska during the implementation of the EES;
- iii. Describe the process that ensures that the State of Nebraska's IT staff will be able to develop the required skills to support and maintain the EES configuration and integration after deployment into production;
- iv. Describe the configuration and/or customization methodology for both the Contractor and the State of Nebraska during the implementation of the EES;
- v. Describe the Data Conversion strategy and approach for supporting migration of data from N-FOCUS to the EES and EES Platform. Describe how the Contractor will ensure data integrity and consistency through all phases of the project;
- vi. Describe the Data Transition strategy and approach during the roll-over of data from N-FOCUS to the EES; and
- vii. Describe the Testing strategy and approach to ensure that the system is functioning and processing the data correctly. Address at a minimum the end-to-end application testing, stress tests, performance tests, UAT and Final Acceptance Testing (FAT) tests to ensure that the EES will meet performance requirements under expected user loads, backup and recovery, and installation.

i. DEPLOYMENT

- i. Describe the methodology, tools, and techniques for implementation/rollout planning. Address specific staging, readiness and deployment techniques that the Contractor will use to determine the proper sequencing of deployment processes and functions required for successful implementation;
- ii. Describe the implementation and deployment strategy. In addition, include a realistic implementation approach and timeframe for the implementation of the EES that meets the State of Nebraska's requirements. If some of the EES' Functional or Technical requirements and capabilities are not a part of the standard EES (available now or via configuration), describe a proposed phasing methodology to deliver to

- the State of Nebraska's full requirements for the EES and EES Platform. Provide reference to the proposed work plan and WBS in the required work plan submission; and
- iii. Describe how the Contractor will implement and comply with industry standard backup procedures and the State of Nebraska's backup requirements, as well as the State of Nebraska's record and document management policies. Describe the Contractor's backup processes and procedures.

F. PROJECT PLANNING AND MANAGEMENT

The focus of Project Planning and Management is the development of a comprehensive series of planning document deliverables that, when executed, ensure that the project maintains a high quality of products and deliverables, adheres to the development schedule and remains within budget.

The Contractor's Project Management approach must promote the development of a strong working relationship and facilitate open and timely communication with the Department, the IV&V Contractor, other contractors and stakeholders that will support achievement of the overall goal of satisfactory performance within budget.

The State of Nebraska considers the use of recognized methodologies to control all project activities to be critical to the success of the project. Bidders must describe what standard(s) proposed methodologies are based upon, or are consistent with, and how they are integrated into a Project Management methodology. The Contractor must develop and put into practice a series of plans (e.g., Project Management, Risk Management, Scope Management, and Configuration Management Plans) based on its proposed Project Management and Systems Development Lifecycle Methodologies. These Plans are deliverables and must be designed and developed to support all project phases.

The Bidder must provide a detailed description of its proposed approach and methodologies to the management of all aspects of the project. This section must contain a complete description of the Contractor's project management methodology and describe how its project management, quality management and software development methodologies are designed to work together and are based on industry best practices and recognized methodologies.

The IV&V Contractor will take an active role assessing the EES Project Management and Planning Deliverables and will submit comments to Department within a timeframe that allows inclusion of IV&V feedback in the Department's response to the EES Contractor. The EES Contractor will support the IV&V Contractor in their objective verification and validation activities. The IV&V Contractor will have access to all deliverables and visibility into the EES Contractor's processes to produce those deliverables.

1. PROJECT MANAGEMENT PLAN

Bidders' must develop a Project Management Plan (PMP) that is based upon its proposed Project Management methodology and describes its overall plan and activities required to successfully complete this project within budget and on schedule. The PMP deliverable must be in sufficient detail to demonstrate to the Department that the Bidder has a clear and concise understanding of the overall complexity of the project and all associated tasks to successfully implement the requirements in this RFP. The PMP must address both the technical and operational aspects of the project.

The final PMP deliverable must address all the major sections of this RFP and, once approved by the Department, must be continuously updated by the Contractor throughout the life of the project. Any system or operational enhancement activities must be added to the PMP in sufficient detail as to provide the Department with a clear understanding of the magnitude and steps necessary to implement the change and the tasks and resources that will be required.

a. PROPOSAL REQUIREMENTS

The Bidder must provide a narrative overview of how the proposed solution will meet the Project Management Plan requirements. Please provide specific details of the proposed approach to meeting the State of Nebraska's requirements. Also, include a sample of each Plan in your proposal.

Responses in this section must be highly-focused on the specific requirements and must not simply provide generic or marketing descriptions of technology or product capabilities.

The Bidder must describe its proposed Project Management Methodology. This methodology will serve as the foundation for the PMP and must describe the Bidder's approach and plan for managing the project.

The Bidder's response must include:

- i. Describe in detail the Bidder's proposed Project Management Methodology and show how it provides an integrated approach to project management;
- ii. Describe how the proposed methodology is based on industry best practices;
- iii. Include a detailed narrative of your proposed PMP. This PMP narrative must be in sufficient detail to demonstrate to the State of Nebraska that the Bidder has a clear and concise understanding of project's overall complexity and all associated tasks to successfully implement the requirements in this RFP;
- iv. Describe how the Bidder's implementation of its proposed PMP will address and balance such factors as quality, scope, time and cost;
- v. Identify and describe all tasks and activities to be undertaken in the delivery of the EES and provide the associated timing of these activities;
- vi. Describe how the Bidder decomposes deliverables and projects into a WBS and work packages;
- vii. Describe the deliverables that will be produced at different milestones in the PMP;
- viii. Describe the Bidder's experience working with an IV&V Contractor; and
- ix. Include a high level Project Schedule. The proposed Project Schedule deliverable must be broken down into Work Breakdown Structures (WBS) and must include key tasks, resources, milestones, deliverables, and task dependencies.

2. SCOPE MANAGEMENT

Scope Management includes the processes required to ensure that the project includes all the work required, and only the work required, to complete the project successfully. The State of Nebraska expects that a proactive approach to Scope Management will be adopted based on a Project Scope Management methodology that is integrated with the proposed Project Management Methodology. The Bidder must explain how using the methodology proposed will facilitate the management of scope expansion.

A Scope Management Plan deliverable documents how the project scope will be defined, verified, and controlled. The Contractor must develop and implement a Scope Management Plan that describes its approach to defining the project, creating WBS and controlling scope expansion while still allowing for progressive elaboration throughout the life of the contract.

The Contractor must show how, by subdividing the major project deliverables and project work into smaller, more manageable components, or WBS, the Contractor will be able to manage scope expansion. A Project Schedule deliverable approved by the Department must be developed and maintained throughout the life of the contract.

a. PROPOSAL REQUIREMENTS

The Bidder must provide a narrative overview of how the proposed solution will meet the Scope Management requirements. Please provide specific details of the proposed approach to meeting the State of Nebraska's requirements. Responses in this section must be highly-focused on the specific requirements and must not simply provide generic or marketing descriptions of technology or product capabilities.

The Bidder must describe its proposed Project Scope Management Methodology that will serve as the foundation for the Scope Management Plan deliverable for the project. The methodology must describe the Bidder's approach and plan for managing scope changes.

- i.** Describe business processes and procedures for controlling the scope of the project and how they will differentiate between scope changes and progressive elaboration;
- ii.** Describe how the business processes and procedures will control schedule, cost, time and effort;
- iii.** Describe any tools that will be used to control scope;
- iv.** Describe how the Scope Management Plan will be implemented into the overall PM approach including any and all tools that are used;
- v.** Describe how changes in scope will be presented to the State of Nebraska, including but not limited to prioritization of changes, budget and schedule implications; and
- vi.** Describe how the PMP will be used to control scope.

3. REQUIREMENTS TRACEABILITY AND MANAGEMENT

The Contractor must develop and implement a Requirements Management and Traceability Plan deliverable approved by the Department for all projects and any system enhancements to the EES. The Plan must be based upon the Requirements Management and Traceability Methodology proposed by the Bidder. This Plan will be

used to track requirements from the time they are defined by a stakeholder to the time they are implemented within the EES. The Contractor must use the approved methodology in tracing a requirement throughout all steps of the System Development Lifecycle (SDLC). The process for tracking and monitoring a requirement begins at the time a requirement is defined by a stakeholder.

The Bidder must propose a tool that will support a requirements repository that will be used for requirements management and traceability throughout the SDLC. The tracking must be done in a way that allows stakeholders to obtain the status of a particular requirement through the required tool. The Contractor must initially populate the requirements repository with those requirements listed in Appendix B Functional Requirements Traceability Matrix and Appendix C Non-Functional Requirements Traceability Matrix (RTM). Appendix D Gap Analysis will also become part of the Requirements Traceability Matrix. Each of these requirements will be tracked according to the proposed methodology.

Throughout the execution of projects and any system enhancement, the Contractor must use the proposed Requirements Management and Traceability Plan as approved by the Department, producing a weekly list of each requirement and its status.

The Requirements Management and Traceability methodology must include aggressive monitoring of requirements throughout the SDLC, including the status of requirement's documentation, the test scripts associated with a requirement, and the results of the testing of the requirement.

a. PROPOSAL REQUIREMENTS

The Bidder must provide a narrative overview of how the proposed solution will meet the Requirements Traceability and Management requirements. Please provide specific details of the proposed approach to meeting the Department's requirements. Responses in this section must be highly-focused on the specific requirements and must not simply provide generic or marketing descriptions of technology or product capabilities.

The Bidder must describe in detail its proposed methodology for Requirements Management and Traceability for the EES project. The methodology will become the foundation for the Requirements Management and Traceability Plan deliverable and must describe the Bidder's approach and plan for managing and tracing requirements.

- i. Describe how requirements derived from stakeholder needs, wants and expectations will be documented and categorized;
- ii. Describe how requirement changes will be analyzed and managed to ensure scope creep is identified and avoided;
- iii. Describe how requirements will be tracked, documented and versioned;
- iv. Describe in detail the documentation deliverables that will be produced as a result of the requirements analysis and provide samples of the documentation;
- v. Describe the tools and business processes that will be used to track requirements throughout the SDLC;

- vi. Describe how the Requirements Management and Traceability Plan will be implemented into the overall PM approach including any and all tools that are used;
- vii. Describe how requirements will be stored in a repository and how the State of Nebraska and stakeholders will access the information about a requirement; and
- viii. Describe business processes and procedures that will be used for tracking requirements from design through configuration/coding, acceptance, unit, and integration testing, as well as promotion into production.

4. ISSUE RESOLUTION MANAGEMENT

A key component of Issue Resolution Management is the Issue Resolution Plan to be developed and implemented by the Contractor that describes its approach to issue resolution and provides the Department with the ability to monitor resolution of issues throughout the life of the contract. The primary goal of this Issue Resolution Plan deliverable is to ensure that issues are identified, evaluated, assigned for resolution, and monitored. In addition, issue resolutions or decisions must be documented and communicated to all affected parties.

The Bidder must propose a tool that will record and track issues. This tool must also be used for recording and tracking risks.

a. PROPOSAL REQUIREMENTS

The Bidder must provide a narrative overview of how the proposed solution will meet the Issue Resolution Management requirements. Please provide specific details of the proposed approach to meeting the Department's requirements. Responses in this section must be highly-focused on the specific requirements and must not simply provide generic or marketing descriptions of technology or product capabilities.

The Bidder must describe its proposed Issues Resolution Management methodology that will serve as the foundation for the Issues Resolution Management Plan deliverable for the EES project. The methodology must describe the Bidder's approach and plan for managing issues.

- i. Describe business processes and procedures that will be used for the identification, definition and evaluation of project issues related to the EES;
- ii. Describe how the processes and procedures will differentiate between an issue and a risk;
- iii. Describe how the business processes and procedures will be used to resolve issues;
- iv. Describe the tools that will be used to document, track and manage issues and document issue resolutions;
- v. Describe how the Issue Resolution Management Plan will be implemented into the overall PM approach including any and all tools that are used; and
- vi. Describe how the tools will be used to support State of Nebraska and stakeholder access to information about issue resolution.

5. RISK MANAGEMENT AND RESOLUTION

Like Issue Management, Risk Management also requires a proactive approach to analyzing and assessing the risks within all aspects of the EES. The Contractor must implement its Risk Management Plan across the broad spectrum of the EES, including but not limited to, manual and automated processes and the SDLC.

Throughout the execution of the EES project and any system enhancement, the Contractor must continually perform risk assessments, producing lists of identified risks. For each risk identified, the Contractor must evaluate and set the risk priority based on the likelihood the risk will occur and the potential impact of the risk, assign risk management responsibility, and create a risk mitigation strategy.

The Contractor must develop and implement a Risk Management Plan deliverable approved by the Department for the EES project and any system enhancement to address potential risks that may compromise the operational readiness and continued operation of the EES. The Plan must be based upon the Contractor's proposed Risk Management methodology. The proposed methodology must address, at a minimum, the process and timing for risk identification, the process for tracking and monitoring risks, the identification of the Contractor staff that will be involved in the risk management process, the identification of the tools and techniques that will be used in risk identification and analysis, a description of how risks will be quantified and qualified, and how the Contractor must perform risk mitigation and response planning.

The Risk Management methodology must include aggressive monitoring for risks, identify the frequency of risk reports, and describe the plan for timely notification to the State of Nebraska of any changes in risk or trigger of risk events.

The State of Nebraska recognizes the risk inherent in transferring the Nebraska requirements to a different system and at the same time moving to a new environment. The Contractor must identify the risks in the EES implementation and provide aggressive mitigation strategies, including how the Contractor will leverage a single or phased implementation to ensure a successful transition.

The proposed tool for tracking risks must also be used for tracking issues and their resolution.

a. PROPOSAL REQUIREMENTS

The Bidder must provide a narrative overview of how the proposed solution will meet the Risk Management and Resolution requirements. Please provide specific details of the proposed approach to meeting the Department's requirements. Responses in this section must be highly-focused on the specific requirements and must not simply provide generic or marketing descriptions of technology or product capabilities.

The Bidder must describe its proposed Risk Management and Resolution methodology that will be the foundation for the Risk Management Plan deliverable for the project. The methodology must describe the Bidder's approach and plan for managing risk.

- i. Describe business processes and procedures that will be used for:
 - a) Identifying and defining risks;

- b) Tracking and monitoring risks;
 - c) Quantifying, qualifying and prioritizing risks; and,
 - d) Mitigating of risks.
- ii. Describe processes and procedures that will be used for risk assessment;
- iii. Describe processes and procedures that will differentiate between an issue and a risk;
- iv. Describe the tool(s) and techniques that will be used for:
 - a) Risk identification;
 - b) Risk documentation;
 - c) Risk management;
 - d) Risk analysis;
 - e) Risk logging; and,
 - f) Risk mitigation.
- v. Describe how the Risk Management Plan will aggressively monitor risk and identify triggers to risk events;
- vi. Describe how the Risk Management Plan will be implemented into the overall PM approach including any and all tools that are used; and
- vii. Describe how the Risk Management Plan will address the risks of a single or phased EES implementation and provide aggressive mitigation strategies, including how the single or phased implementation will be leveraged to ensure a successful transition.

6. CONFIGURATION MANAGEMENT

Configuration Management is a process that the Contractor must employ to control the versions of software and hardware that will operate and support the EES across all environments. This applies to operating systems, applications, software, documentation, networks and all devices within the entire enterprise.

Configuration Management includes but is not limited to:

- a. Software version control (e.g., operating system, application, and COTS);
- b. Hardware version control; and,
- c. Documentation, Training Materials, User and Policy Manual version control.

The Contractor must develop and implement a Configuration Management Plan deliverable that is approved by the Department that describes its approach to implementing the proposed Configuration Management methodology. As part of the Plan, the Contractor must clearly identify the process for approving and implementing new versions, including the organizational responsibility for each type of version control.

When new hardware or software becomes available or when subsequent releases to the current operating system, server(s), database management software, grouper software, COTS products, or other hardware/software supporting the EES become available, the Contractor must inform the State of Nebraska of the benefits that can be derived by implementing the newest version. If the State of Nebraska requires the Contractor to proceed with the implementation, the Contractor must determine the

impact of implementation and develop an Upgrade Plan. All such upgrades must be included under the fixed cost portion of the contract. The State of Nebraska shall review and approve the Upgrade Plan for implementation or return the Plan for modification. The Contractor must not operate software for the EES that is either not supported by the vendor or is more than two (2) versions behind the software vendor's current commercial offering without prior approval from the State of Nebraska.

a. PROPOSAL REQUIREMENTS

The Bidder must provide a narrative overview of how the proposed solution will meet the Configuration Management requirements. Please provide specific details of the proposed approach to meeting the Department's requirements. Responses in this section must be highly-focused on the specific requirements and must not simply provide generic or marketing descriptions of technology or product capabilities.

The Bidder must describe in detail its proposed Configuration Management methodology that will serve as the foundation for the Configuration Management Plan deliverable for the project. The methodology must describe the Bidder's approach and plan for managing configuration changes.

- i. Describe how changes will be tracked, documented and versioned;
- ii. Describe how changes will be synchronized and distributed when multiple activities are occurring simultaneously across multiple environments (e.g. sandbox, configuration/development, test, quality assurance, production, training, and disaster recovery);
- iii. Describe any tools and business processes that will be used to control software development, including check in/check out procedures and a responsibility audit trail;
- iv. Describe how the Configuration Management Plan will be implemented into the overall PM approach including any and all tools that are used;
- v. Describe business processes and procedures that will be used for controlling the migration of code from design through coding, acceptance, unit, and integration testing, as well as promotion into production. Explain how proposed changes will be communicated to the stakeholder;
- vi. Describe how changes to the environments will be controlled so that no changes to hardware, software or operational procedures will be implemented without the State of Nebraska's review and approval;
- vii. Describe the software development management process that will be used, including the migration of code from design to production. This description shall include diagrams and other graphical representations to communicate the processes;
- viii. Identify the types of configuration changes that can be made. Categorize the changes in terms of functionality, testing requirements, quality of change and the extent of the change in terms of immutability and retractability;
- ix. Describe the organizational structure that will be in place to control changes; and
- x. Describe how the Contractor will inform the State of Nebraska of the benefits that would realize from any and all announcements of a new version of hardware, software or COTS product.

7. PROJECT PERFORMANCE MANAGEMENT

The Contractor must develop and implement a Performance Management Plan deliverable approved by the Department with specific, measureable performance indicators. The Contractor must develop, and provide access through a web access to an EES Dashboard that will display (upon-demand) the Contractor's operational performance metrics and provide State of Nebraska Management with the latest statistics regarding those metrics.

a. PROPOSAL REQUIREMENTS

The Bidder must provide a narrative overview of how the proposed solution will meet the Project Performance Management requirements. Please provide specific details of the proposed approach to meeting the Department's requirements. Responses in this section must be highly-focused on the specific requirements and must not simply provide generic or marketing descriptions of technology or product capabilities.

The Bidder must describe in detail its proposed methodology for Project Performance Management for the project. This methodology will become the foundation for the Project Performance Management Plan deliverable that must describe the Bidder's approach and plan for managing performance.

- i. Describe the performance metrics that will be established for the project;
- ii. Describe the EES Dashboard that will be developed based upon the Contractor's previous experience;
- iii. Describe any tools that will be used to track its Project Performance;
- iv. Describe how the Performance Management Plan will be implemented into the overall PM approach including any and all tools that are used; and
- v. Describe the Contractor's organizational structure that will be used to track performance.

8. COMMUNICATIONS MANAGEMENT

Implementation of a project of this complexity requires daily collaboration and communication among all project stakeholders. Time is critical in communicating issues, solutions and decisions among the EES Contractor, the Department's programmatic, technical and management staff; and other stakeholders and the IV&V Contractor. Effective communication among the Department, the EES Contractor, members, the provider community and other stakeholders is essential to encourage continued participation in the Nebraska Medicaid program.

The Contractor must provide and implement a Communication Management Plan deliverable approved by the Department, describing how the Contractor will communicate with all the stakeholders. The Plan must define each stakeholder's communication needs, determine the method and frequency of communicating in order to meet those needs and allocate appropriate resources to meet the communication schedule. The schedule should address regular (on-going) communication as well as event-driven communication. This Plan must be updated regularly or at the direction of the Department.

The Bidder must propose a tool for Contact Management that will be used to track and report users written, electronic, and telephone inquiries.

a. PROPOSAL REQUIREMENTS

The Bidder must provide a narrative overview of how the proposed solution will meet the Communication Management requirements. Please provide specific details of the proposed approach to meeting the Department's requirements. Responses in this section must be highly-focused on the specific requirements and must not simply provide generic or marketing descriptions of technology or product capabilities.

The Bidder must describe in detail its proposed methodology for Communication Management for the EES project. This methodology will serve as the foundation for the Communication Management Plan deliverable that must describe the Bidder's approach and plan for managing communications.

- i. Describe how communication with the different stakeholders will be accomplished;
- ii. Describe the different communication channels that will be used;
- iii. Describe how the Communications Management Plan will be implemented into the overall PM approach including any and all tools that are used; and
- iv. Describe the Contact Management System that will be used to track and report written, electronic, and telephone inquiries from users and other stakeholders; and how it will be integrated with other EES functions and accessed by Department staff.

9. SYSTEM DEVELOPMENT LIFECYCLE (SDLC)

The State of Nebraska requires Bidders to propose a System Development Lifecycle (SDLC) process that will govern the initial development and implementation of the EES, as well as ongoing maintenance and enhancements. This SDLC must be a proven process that the Contractor has used in other EES or large scale application development efforts. Bidders must describe in detail their proposed SDLC.

During development and implementation, the Contractor will support and participate in the applicable Exchange Life Cycle (ELC) reviews with CMS/CCIO including travel to CMS/CCIO headquarters, as required. CMS requires a formal process for each review with required products and deliverables to determine project completeness. The Contractor shall generate and deliver all CMS required artifacts and supply all appropriate documentation to support the relevant project stage gate review. The CMS artifacts and supporting documentation shall be provided at least three (3) weeks prior to the CMS review. The Contractor will be required to assist in formal reviews and presentations to CMS personnel.

The State of Nebraska requires the Contractor to use at the core of their SDLC a suite of tools to manage the implementation and maintenance of the EES. This suite must be used at a minimum, during the following SDLC tasks: 1) Requirements Validation, 2) System Design, 3) System Development and 4) testing.

The goals of the SDLC are to:

- a. Provide a framework for developing quality systems using an identifiable, measurable, and repeatable process;
- b. Establish a project management structure to ensure that each system development project is effectively managed throughout its life cycle; and,
- c. Ensure that system requirements are well defined, traceable throughout each phase of the SDLC and subsequently satisfied.

Through the use of the SDLC, the Contractor should achieve these goals by:

- a. Establishing appropriate levels of management authority to provide timely direction, coordination, control, review, and approval of the system development project;
- b. Ensuring project management accountability;
- c. Documenting requirements and maintaining traceability of those requirements throughout the design, development, testing and implementation process;
- d. Ensuring that projects are developed efficiently within the proposed technology infrastructure; and
- e. Identifying project issues and risks early and managing them before they have a negative impact on the project.

The data development component of the SDLC must address the definition and management of conceptual, logical and physical data models in support of the EES data structures. It must contain logical data depictions or models of the EES that will support the business and technical requirements outlined in this RFP. The physical data models relating to the EES must also be depicted for each deployment environment (e.g., sandbox, configuration/development, test, quality assurance, production, training, disaster recovery and pilot, if applicable).

At a minimum the Contractor's SDLC process must produce the following deliverables for approval by the Department:

- a. Business Design Documents;
- b. Business Process Models;
- c. Detailed Design Document;
- d. Technical Design Document;
- e. Architecture, Network and Data Modeling Diagrams;
- f. Test Plans;
- g. Disaster Recovery
- h. Training Plan;
- i. Knowledge Transfer Plan;
- j. Canned and newly developed EES Reports;
- k. Project Documentation; and
- l. Implementation Plan.

The Bidder is required to describe in detail the artifacts and deliverables generated from each step within its proposed SDLC process and provide a sample of each of these artifacts and deliverable in the proposal.

The following topics are provided to assist Bidders responding to the specific proposal response requirements at the end of this section. The State of Nebraska understands that Bidders may use different terminology for these topics and deliverables however the EES project and outcomes must be the same.

a. PROPOSAL REQUIREMENTS

The Bidder must provide a narrative overview of how the proposed solution will meet the EES requirements. Responses in this section must be highly-focused on the specific requirements and must not simply provide generic or marketing descriptions of technology or product capabilities.

The Bidder must describe in detail the SDLC it will use in the requirements analysis, design, development, testing, implementation and maintenance of the EES including a definition of the methodology for gathering and validating stakeholder requirements and the methodology it will follow in the design, development, testing, training and implementation of those validated requirements.

- i. Describe the SDLC the Bidder will use in the requirements analysis, design, development, testing, implementation and maintenance of the EES;
- ii. Describe the contents of all documents and artifacts deliverables produced within the SDLC including but not limited to:
 - a) Business Design Document;
 - b) Requirements Document (business, functional, non-functional, requirements traceability matrix; etc.);
 - c) Business Process Models;
 - d) Use Cases or User Stories;
 - e) Detailed Design Document;
 - f) Technical Design Document;
 - g) Architecture, Network and Data Modeling Diagrams;
 - h) Test Plans;
 - i) Disaster Recovery;
 - j) Training Plan; Knowledge Transfer Plan;
 - k) Canned and newly developed EES Reports;
 - l) Project Definition; and
 - m) All artifacts required by the federal Enterprise Life Cycle.
- iii. Include a sample of the documents and artifacts described above that the Contractor has produced for a previous EES engagement or engagement of similar size and scope;
- iv. Describe the proposed estimation methodology;
- v. Describe the organizational structure to control all system development and maintenance;
- vi. Describe how the SDLC will be implemented and how it will be integrated into the overall Project Management approach, including but not limited to, Quality Management, Change Management, Data Governance;

- vii. Describe the levels of management authority that will be used to ensure timely direction, coordination, control, review and approval of the SDLC process;
- viii. Describe the process that will be used for developing and updating Business Process Models for the EES;
- ix. Describe the data modeling tool that will be used to model the conceptual, logical, and physical EES data structures. Include how the models will be managed and versioned from a single tool and central control point. Discuss the solution in terms of its degree of integration, flexibility, scalability, extensibility, supportability/maintainability, and affinity/relationship with other proposed components; and
- x. Describe the degree to which the physical model that is created from the tool can be used without augmenting physical characteristics after the data structure generation scripts are created.

10. PROJECT INITIATION

The foundation of every successful large-scale system implementation project is a solid set of methodologies that will be used in project planning and team orientation activities. The Bidder must propose a set of project initiation tasks that set the stage for the project, ensure all infrastructure needs are met and provide a detailed orientation for staff to begin the design and development efforts. A Project Orientation Plan deliverable approved by the Department shall capture the planned orientation tasks.

This is also the time within the project when the Contractor must implement the comprehensive series of planning documents that were developed in Project Planning. It is here that the Contractor lays the foundation for the project that when executed, will ensure that the project remains within budget, adheres to the development schedule and maintains a high quality of products and deliverables.

a. PROPOSAL REQUIREMENTS

Bidders must provide specific details of the proposed approach to meeting the Department's requirements for Project Initiation. Responses in this section must be highly-focused on the specific requirements and must not simply provide generic or marketing descriptions of technology or product capabilities.

The Bidder must describe its proposed methodology for the Project Initiation activities that will become the foundation for the Project Orientation Plan for the EES.

- i. Describe the Project Initiation activities that detail the approach for orienting the Project Team (Department, IV&V Contractor, and other stakeholders);
- ii. Describe the activities that will be necessary to secure and to prepare adequate facility space; and
- iii. Describe the steps necessary to assemble other key staff, including specific plans for disseminating individual staff responsibilities.

11. REQUIREMENTS VALIDATION

Requirements Validation is a major component of the SDLC process which confirms that all requirements are correct, complete, consistent, and validated prior to the initiation of system design activities. This task results in a Business Process Gap

Analysis deliverable that includes, at a minimum, updated Business Process Models, an updated Requirements Traceability Matrix and a Gap Analysis Report. Upon approval by the Department, the updated Requirements Traceability Matrix and repository will be used to manage the scope of the EES development.

During Requirements Validation the Contractor shall confirm, document and elaborate the RFP requirements in sufficient detail to adequately support system design and development activities. This will be accomplished by conducting a series of Joint Application Design (JAD) sessions with Department staff and other stakeholders. The JAD session materials and JAD Session meeting minutes must be submitted to the Department as deliverables. The Contractor must supplement the requirements with any additional requirements that result from this task. The additional detail and definition is considered within the scope of the original RFP requirements and contract. The Contractor must also document and submit the Department's business rules as deliverables that support the Department's policies.

Bidders must clearly describe the Requirements Validation approach and process, and ensure it meets the Department's needs.

a. PROPOSAL REQUIREMENTS

Bidders must provide specific details of the proposed approach to meeting the State of Nebraska's requirements for Requirements Validation. Responses in this section must be highly-focused on the specific requirements and must not simply provide generic or marketing descriptions of technology or product capabilities.

The Bidder must describe in detail the Requirements Validation process which will be used to document and elaborate the RFP requirements in sufficient detail to adequately support system design and development activities. The Bidder must define the methodology for gathering and validating stakeholder requirements through a series of JAD sessions with the Department and other stakeholders.

- i. Describe the proposed approach to Requirements Validation;
- ii. Provide a detailed description of the Requirements Validation Methodology;
- iii. Describe the methodology and analytical tools that will be used to complete the requirement validation tasks. Provide samples of templates;
- iv. Describe how the proposed methodology and proposed tool(s) will enhance requirements validation and be supported by experienced staff;
- v. At a minimum the Bidder's proposal must:
 - a) Define the goals, expectations, and output of the JAD sessions;
 - b) Define how the JAD sessions will be conducted;
 - c) Define how demonstrations of functionality will occur in the JAD sessions;
 - d) Define how the requirements will be identified and documented. Provide templates and samples;
 - e) Define how the Department's business processes will be identified and documented in the JAD sessions; and,

- f) Define the documentation that will be provided to staff attending the JAD sessions.
- vi. Describe how the Bidder has planned, organized and facilitated requirements sessions in the implementation and/or transfer, design and implementation of an EES or other health care systems;
- vii. Describe how Department staff, IV&V Contractor and other stakeholders participating in JAD sessions will be oriented into the processes and trained to participate in the JAD sessions;
- viii. Describe the documents that will be produced as a result of the JAD Sessions, i.e. business requirements, uses cases, etc.
- ix. Describe any tools that will be used in these sessions and the orientation and training participants will receive in using these tools;
- x. Describe how the documentation from the JAD Sessions (e.g., Department decisions, approved notes and updated requirements) will be collected and stored in the State of Nebraska's Document Repository. This description must include the process for collecting the data that will update the Requirements Traceability Matrix;
- xi. Describe the process for finalizing requirements, documenting the results and incorporating information from the JAD Sessions, maintaining a Requirements Repository throughout the life of the project and ensuring the requirements continuously reflect the approved project scope. The requirement repository must reflect the current scope of the project;
- xii. Describe the process that will be used to identify new requirements and describe how these will be presented to the Department;
- xiii. Describe the process for developing the Business Process Gap Analysis including how changes to the Business Process Models and Requirements Traceability Matrix will be tracked, and the content of the Gap Analysis Report; and
- xiv. Describe the interaction that will take place among the Contractor's staff and the Department's Business Analysts and Technical Review Teams during the Requirements Validation process.

12. BUSINESS RULES CONFIGURATION

The State of Nebraska anticipates that the EES will require expertise from the State and the Contractor. Department project staff has actively participated in CMS-sponsored webinars, weekly status meetings and providing written questions and updates to ensure a successful integration and program development. Our staff understands, knows and has experience in Medicaid eligibility and our current business processes.

The Contractor is responsible for collecting and documenting this knowledge and expertise during JAD sessions to configure the EES. Configuring the Business Rules correctly is upmost to the success of the EES. All Business Rules Configuration document deliverables must include a human-readable version.

The Contractor must lead the collection, configuration, and testing of the EES. The State of Nebraska expects the Contractor to work with and transfer business rules configuration knowledge to Department staff.

The State of Nebraska desires a Gap Analysis deliverable documenting the disposition of each functional requirement and the resolution of identified gaps (e.g., customization, workaround, eliminate requirement). The Contractor shall assist to identify appropriate business process improvement opportunities, document the recommended changes, and to plan and implement approved business process changes.

The Contractor shall facilitate JAD sessions to analyze, identify, validate, refine, and document business rules related to the EES. Prior to each session, the Contractor shall develop/update the proposed preliminary design and present it at the session. After the sessions, the Contractor shall summarize the results of the business rules in narrative format. Included in this task will be the identification of decision tables, appropriate parameters, and reference tables utilized by the business rules. JAD session documents are considered deliverables which requires Department approval.

a. PROPOSAL REQUIREMENTS

Bidders must provide specific details of the proposed approach to meeting the Department's requirements for Business Rules Configuration. Responses in this section must be highly-focused on the specific requirements and must not simply provide generic or marketing descriptions of technology or product capabilities.

The Bidder must describe in detail the Business Rules Configuration process that will be used to document in sufficient detail to adequately support system design and configure the EES. The Bidder must define the methodology for gathering and validating stakeholder Business Rules through a series of JAD sessions.

- i. Describe in detail the proposed approach to Business Rules Configuration;
- ii. Provide a detailed description of the Business Rules Configuration process;
- iii. Describe the methodology and analytical tools that will be used to complete the Business Rules Configuration tasks. Provide samples of templates;
- iv. Describe the interaction that will take place among the Contractor's staff and the Department's Business Analysts and Technical Review Teams during the Business Rules Configuration process; and
- v. Describe the skills and knowledge the Contractor's Business Rules Configuration Team members possess. The Department is interested in learning what skills will be needed to maintain and/or modify business rules.

13. SYSTEM DESIGN

System design, a major component of the overarching SDLC methodology, focuses on developing the business and technical design deliverables of the system, including the development of detailed stakeholder requirements; conceptual and detailed design documents; programming and technical specifications; technical architecture; security requirements; and workflow requirements. The foundation for the design task is approved and validated requirements.

System design also includes related activities that define changes in the current technical environment; set performance parameters; and set the baseline for the development and testing tasks to come.

a. PROPOSAL REQUIREMENTS

Bidders must provide specific details of the proposed approach to meeting the Department's requirements for System Design. Responses in this section must be highly-focused on the specific requirements and must not simply provide generic or marketing descriptions of technology or product capabilities. Also, include one or more diagrams where necessary that detail the proposed design and the relationships between key technical components.

The Bidder must describe in detail the System Design Methodology that will be used in the design of the EES. Describe in detail the System Design Methodology which at a minimum must:

- i. Describe how the SDLC will be applied to accomplish the System Design Task;
- ii. Explain how Project Management, Quality Management and SDLC methodologies will be employed to control the development of deliverables;
- iii. Describe the format and medium that will be used for the design documents and demonstrate how the design will be presented in a fashion that can be understood by a wide range of users using the tool to cross reference requirements;
- iv. Describe the system design deliverables and artifacts, and provide samples;
- v. Describe the Technological Overview of the proposed architecture and clearly describe how the design and development approach will be specifically tailored to this technology;
- vi. Describe how the tool(s) will be configured to assist both Contractor and the Department staff in the system design tasks;
- vii. Describe the process that will be used for the review and walk-thru of the design documents; and
- viii. Describe the interface and interactions that will take place among the Contractor's staff and the Department's Business Analysts, Technical Review Teams and other stakeholders during the System Design process.

14. DEVELOPMENT

System Development, also a part of the overarching SDLC methodology, involves the construction of the system that will be implemented into production. It addresses system development activities, including establishing the development and testing environments; development of new programs, objects, services and processes; enhancement or modification of existing programs, objects, services and business processes; and unit testing. The Contractor must ensure that the development is based on State of Nebraska-approved system design deliverables and complies with all current State of Nebraska and federal requirements.

As part of the proposed SDLC, the Contractor must develop and implement a System Design methodology. The proposed methodology, as approved by the Department, must outline the processes and procedures that will be used in the system design

tasks, and must include a discussion of the use of the COTS product and how it will be integrated into those processes and procedures.

The key activities in this task are the construction and unit testing of the software, which is an iterative process of coding, testing and performing software quality control checks. System development activities must occur in a controlled environment governed by the Contractor's configuration management program, subject to a daily program of process and progress monitoring.

a. PROPOSAL REQUIREMENTS

Bidders must provide specific details of the proposed approach to meeting the Department's requirements for System Design. Responses in this section must be highly-focused on the specific requirements and must not simply provide generic or marketing descriptions of technology or product capabilities. Also, include one or more diagrams where necessary that detail the proposed design and the relationships between key technical components.

The Bidder must describe in detail the System Development Methodology it will use in the development of the EES. Describe in detail the System Development Methodology which at a minimum must:

- i. Describe the relationship between the System Development Task and other SDLC tasks;
- ii. Provide an overview of software development activities that will be performed by the Contractor and the environment in which this work will be completed. This will include issues such as security, privacy, standards, and interdependencies in hardware and software development;
- iii. Describe the software development methods that will be used, including the use of iterative or phased development, if appropriate. This should include descriptions of manual and automated tools and procedures that will be used in support of these methods;
- iv. Specify development tools that will be used, and explain its specific roles;
- v. Describe the approach that will be used for unit and integration testing and the tools developers will have available to ensure testing is thorough and accurate;
- vi. Describe the approach that will be followed for tracking requirements during development;
- vii. Describe the approach that will be followed for allocating computer hardware resources and monitoring their utilization;
- viii. Describe the method to be followed for recording issues and information that will be useful for key decisions made during development activities;
- ix. Describe the quality assurance methodology and activities that will be used to ensure adherence to design requirements;
- x. Describe how developer performance will be monitored against defect tracking and the corrective measures taken to improve developer performance;
- xi. Describe the process that will be used for the review and walk-thru of the source code; and

- xii. Describe how the tool(s) will be configured and assist in the system development tasks.

15. TESTING

Testing is also a part of the overarching SDLC methodology. In-depth, process driven, fully documented testing is required for the EES. The Contractor must provide and implement a Comprehensive Test Plan deliverable for the EES based upon the proposed Comprehensive Testing Methodology, which describes how the Contractor will perform testing of the EES.

The Contractor should automate the testing process where possible through the use of COTS product(s). To the extent possible test results should be automated, test scripts and test cases should be automatically generated, and results from regression tests should be automatically compared to previous regression test.

The Contractor must provide accurate test data while protecting privacy. The Contractor must deliver a comprehensive Test Report deliverable documenting all test results for Department approval prior to any software or COTS product being implemented in the production environment. The report will delineate the results of each testing phase, problems identified and the resolution.

The IV&V Contractor will have an active role during testing. Their responsibilities include assessing planned testing activities, results reporting, and error correction/resolution, including an appropriate change control and configuration management process, to ensure the following:

- a. Test efforts and schedule are based on defined requirements priorities as well as project risk;
- b. Test scenarios address the testable requirements;
- c. Specific business cases and test verification efforts for each case has been defined; and
- d. Conducting reviews of testing to ensure that critical elements of the EES are stable and comply with State of Nebraska requirements as detailed in the State of Nebraska's contract with the EES Contractor.

The methodology must include the testing that is performed at all stages of SDLC may include but are not limited to:

Unit Testing/Configuration Testing is done at the lowest level. It tests the basic unit of software, which is the smallest testable piece of software, and is often called "unit," "module," or "component" interchangeably. Unit testing is required during the initial construction of an EES module(s) and whenever any enhancements/modifications are made. Prior to the initiation of System Integration Testing, adequate unit testing must have been conducted to uncover defects.

Integration Testing is performed when two or more tested units are combined into a larger structure. This test is done on both the interfaces between the components and the larger structure being constructed. Integration testing is required during the initial construction of an EES module(s) and whenever any enhancements/modifications are made. Prior to the initiation of System Integration Testing, adequate integration testing must have been conducted to uncover defects.

System Integration Testing (SIT) is done when the system is handed over from the developers to the Testing Unit and tends to affirm the end-to-end quality of the entire system. SIT is often based on the functional/requirement specification of the system. Quality attributes, such as reliability, security, and maintainability, are also checked. SIT verifies that related groups of functionality are correct and that the EES is free from defects and functions as required by validated requirements and approved system design documents. SIT includes testing of functionality that is related because of the underlying business problem they solve or based on functionality that is technically related such as elemental utilities like data access, logging/auditing and error handling. The Contractor's Testing Unit must develop test plans, test cases and test scripts for SIT. The test plans must test all requirements for the release and all test cases and scripts must be tied back to requirements. Upon completion of SIT, the EES Contractor must ensure the EES functions as required by the approved design prior to initiation of User Acceptance testing.

User Acceptance Testing (UAT) is done when the completed project is released from the Testing Unit to the State of Nebraska. The purpose of UAT is for users to test the system in a pseudo environment to verify that the system is performing to specifications. UAT is the final phase before the EES is moved to production and begins after the Contractor successfully completes SIT. UAT provides the users of the system an opportunity to review and accept system components prior to production implementation of the EES. The acceptance test demonstrates that the system software meets the detailed functional requirements and specifications and that the system infrastructure works within the defined constraints. UAT is required throughout the life of the contract when enhancements or modifications to the EES have successfully completed SIT.

Stress/Performance Testing is performed to ensure that the technical, application, data and network architectures are sufficiently designed and sized to meet the anticipated transaction volume or workload. Stress and Performance Testing is intended to demonstrate that the software and hardware will provide the intended functionality and meet requirements under production conditions. Stress Testing introduces greater and greater loads on the hardware and software until it fails, while Performance Testing measures software response time under light, average and heavy loads.

Regression Testing allows a consistent, repeatable validation of each new release of the EES component(s) or COTS version. Such testing ensures reported defects have been corrected for each new release and that no new quality problems were introduced in the maintenance process. The Contractor must perform Regression Testing. This testing will demonstrate the EES functions properly by demonstrating that it produces the same result as the production system under the same conditions or that the difference is expected due to a known change from the existing system. The Contractor must compare the results and explain any differences; identify, track and resolve all problems; and conduct additional regression testing on any test cases or scripts that detected a system, data or programming error.

The Department and IV&V Contractor review Regression Testing outcomes. After review of the reports, the Department will determine if the EES functions properly by demonstrating that it produces the same result as the production system under the

same conditions or that the difference is expected due to a known change from the existing system.

System Recovery Testing is performed to ensure that the system will meet the business continuity requirements in this RFP. The Contractor must perform System Recovery Testing and must develop and execute test scripts or automated testing processes that are specifically designed to exercise both routine and non-routine system recovery processes. The Contractor is responsible for tracking and resolving any issues with their system recovery processes and updating system documentation as required.

Parallel Testing is performed prior to the Operations Phase of the system. During this period the Contractor may be responsible for conducting parallel testing with the existing Eligibility and Enrollment system. Prior to the start of the Operations Phase, the Contractor will work with Department staff, IV&V staff, and other stakeholders to develop a Parallel Test Plan and Acceptance Test cases. The Parallel Test Plan deliverable will be based upon the Contractor's proposed Parallel Test methodology that documents the approach to parallel testing the current Eligibility and Enrollment system and the EES and becomes the "blueprint" for conducting the parallel test. This Plan must be approved by the Department.

Determining the scope of the EES functionality that is to be parallel tested is the responsibility of the Department, and may range from testing all automated system functionality to testing only selected critical business functions; testing associated manual processes (e.g., call center and mail distribution); and testing provider support processes.

Acceptance test cases and supporting test scripts will be created to assist the Department with system validation ensuring the EES meets the approved requirements and functionality, and that the designed functionality is appropriately implemented in the EES. Test scripts are step-by-step instructions and data required to perform the test. The Acceptance Test Plan deliverable lists the test cases, as well as a procedure for developing and approving test scripts that implement the test cases. The scripts developed for the parallel test will become the basis for future regression testing.

The Department and IV&V Contractor will observe the Parallel Testing effort and document its observations in a report for the Department. After review of the report, the Department will determine if the EES and all the associated manual processes are ready for operations.

Network Intrusion Testing and Security Audits are performed to verify the integrity of the network security. The Contractor must contract with an independent firm, approved by the State of Nebraska, who will perform a Network Intrusion Test and Security Audit before EES Implementation and document its observations and findings in an independent report for the State of Nebraska. The independent firm must be made aware that the IV&V Contractor will participate in this audit. The Network Intrusion Testing and Security Audit will become an annual deliverable of the M&O. The Contractor must be responsible for correcting any and all deficiencies listed in the report without additional cost to the State of Nebraska.

a. PROPOSAL REQUIREMENTS

Bidders must provide specific details of the proposed approach to meeting the Department's requirements for System Design. Responses in this section must be highly-focused on the specific requirements and must not simply provide generic or marketing descriptions of technology or product capabilities. Also, include one or more diagrams where necessary that detail the proposed design and the relationships between key technical components.

The Bidder must describe in detail its proposed Comprehensive Testing Methodology that will become the foundation for the Comprehensive Test Plan for the EES. This methodology must include a description of the testing that will be performed at all stages of SDLC.

- i. Describe the Contractor's proposed methodology for executing the nine (9) required types of testing (Unit, Integration, System Integration, User Acceptance, Stress/ Performance, Regression, System Recovery, Parallel, and Network Intrusion,);
- ii. Describe the tool that will be used by the Contractor, the rationale used to select the product and how the State of Nebraska will have access to it;
- iii. Describe to what extent the tool being proposed will automate the testing process;
- iv. Describe the tool that will be used for the automatic generation of test transactions;
- v. Describe how test cases and test scripts will be tied back to requirements;
- vi. Describe the methodology that will be used for Parallel Testing including the State of Nebraska's requirement for the IV&V Contractor oversight;
- vii. Describe the approach to parallel testing and, based on past experience, identify potential risks and problem areas;
- viii. Describe the methodology that will be used for the testing during the data conversion task;
- ix. Describe how defects will be tracked and reported;
- x. Describe the processes, procedures and tools that will be in place for problem identification and resolution;
- xi. Describe how defect tracking will be used to identify organizational or procedural weaknesses and track the resulting corrective actions;
- xii. Describe the Contractor's proposed organizational structure and management of the testing function;
- xiii. Define how defects and other issues reported by the Department will be analyzed, tracked, resolved; required system changes implemented; and integrated with other project phases;
- xiv. Describe how the Contractor will work with the Department and EES IV&V Contractor to develop the Acceptance Test Plan and Test Cases;
- xv. Describe how the Contractor's testing methodology and tools will support the State of Nebraska's requirement to move to a SOA environment;
- xvi. Describe how services that execute on the Enterprise Service Bus (ESB) will be unit, integrated and SIT tested;
- xvii. Describe how performance and stress testing of services will be accomplished;
- xviii. Describe how message-oriented interactions will be accomplished;

- xix.** Describe how the testing methodology will accommodate workflow testing;
- xx.** Describe the parallel testing strategy, methodology and schedule; including a description of the tool(s) for tracking and reporting of testing activities including, but not limited to, documentation of test scripts, test results, error resolution and re-testing; and
- xxi.** Describe the strategy for coordinating the parallel test, including the respective responsibilities of the Contractor, the Department and IV&V Contractor.

16. DATA CONVERSION TASK

The State of Nebraska considers the data conversion task critical to the success of the project. Conversion activities are often the source of failure in projects due to the volume of data; complexities inherent in defining the relationship between source and target data structures; the differences in the data required for processing between legacy and new systems; and the history of changes to processing requirements and valid codes that may result in data inconsistencies and missing data conditions.

The Data Conversion Plan deliverable must clearly identify and define the strategies and activities required by the data conversion task including those required for contingency planning in the event that it is determined that conversion cannot be accomplished as scheduled. The Data Conversion Plan deliverable approved by the Department will be based on the Data Conversion Methodology.

The objectives of Data Conversion Management include:

- a.** The accurate, timely, consistent, and complete conversion of data from N-FOCUS to the EES;
- b.** The validation of completeness by mapping data from N-FOCUS data structures to the EES data structures;
- c.** The verification of data conversion processes through systemic testing;
- d.** The effective and timely management of data conversion issues using procedures that track issues from identification through correction; and
- e.** Minimizing and mitigating data conversion risks with thorough and detailed contingency planning.

Medicaid data stored in N-FOCUS must be converted to the EES unless it is specifically identified as unnecessary during the requirements validation JAD sessions.

The State of Nebraska requires the Contractor to provide and use an Extraction, Transformation, and Load (ETL) tool for the conversion of the data from N-FOCUS to the EES and throughout the life of the contract.

a. PROPOSAL REQUIREMENTS

Bidders must provide specific details of the proposed approach to meeting the Department's requirements for System Design. Responses in this section must be highly-focused on the specific requirements and must not simply provide generic or marketing descriptions of technology or product capabilities. Also, include one or more diagrams where necessary that detail the proposed design and the relationships between key technical components.

The Bidder must describe in detail its proposed Data Conversion Methodology that will become the foundation for the Data Conversion Plan deliverable. This Methodology must include a description of the processes, procedures and tools to be used to complete the conversion effort.

- i. Describe the data conversion methodology and approach that will be used to convert data from N-FOCUS to the EES data structures including a description of the contents of the Data Conversion Plan. The methodology must include all technical components that comprise the proposed solution including all software (both COTS and custom-developed), hardware, and environments;
- ii. Describe the solution in terms of its degree of integration, flexibility, scalability, extensibility, supportability/maintainability, and affinity/relationship with other proposed components;
- iii. Describe the proposed solution by describing how the data conversion effort will be:
 - a) Designed;
 - b) Developed;
 - c) Tested;
 - d) Implemented;
 - e) Documented;
 - f) Managed; and
 - g) Run in parallel with other EES project tasks.
- iv. Describe the interdependencies between the conversion efforts and other development tasks;
- v. Describe all data conversion methods and requirements, regardless of whether an automated or manual method is recommended;
- vi. Describe the tools and how they will be used for converting the data; and
- vii. Describe any tools and how they will be used for validating the data.

17. OPERATIONAL READINESS REVIEW TASK

This task includes completion of an Operational Readiness Review (ORR), a formal inspection of the EES conducted to determine if the system is ready for release into the production environment. The ORR includes verification of all EES components including operations, hardware, software, network, and telecommunications. All components of the EES must be evaluated against the ORR checklists.

The EES Contractor must work with the Department and IV&V Contractor who will observe the Operational Readiness Review effort, review manual processes and procedures, and other functions defined in the ORR, and document its observations in a report.. After review of the reports the State of Nebraska will determine if the EES and all associated manual operational processes are ready for operations.

a. PROPOSAL REQUIREMENTS

Bidders must provide specific details of the proposed approach to meeting the State of Nebraska's requirements for Operational Readiness Review. Responses in this section must be highly-focused on the specific requirements and must not simply provide generic or marketing descriptions of technology or product capabilities.

The Bidder must describe in detail its proposed Operational Readiness Review methodology that will become the foundation for the Operational Readiness Plan deliverable. This methodology must include a description of the processes, procedures and tools to be used to complete the Operational Readiness Review effort.

- i. Describe the approach to the Operational Readiness Review;
- ii. Describe the systems, business processes and procedures included in the ORR to ensure the system is ready for operations; and
- iii. Describe the methodology that will be used to fulfill the Department's requirement for working with the IV&V Contractor.

G. BUSINESS PROCESS REENGINEERING

The Contractor must perform a Business Process Reengineering Study of the current Eligibility and Enrollment system's business processes and work flows. The purpose of this Study is to provide a mechanism to examine the business processes that are an integral part of the current Eligibility and Enrollment system in order to identify changes that would improve the administrative efficiency and responsiveness of the program; improve quality control; and/or facilitate the State of Nebraska's attainment of the primary objectives for the EES. The Study must be documented and undertaken in close coordination with Department Management, staff and other stakeholders. The Study when completed is a deliverable that requires Department approval.

The Contractor must assess the effectiveness and efficiency of the reengineered business processes and workflows. The Contractor must refine and upgrade the business processes (including automated and manual processes) as necessary. New Business Models must be prepared and delivered to the Department for approval. The Contractor must provide Department users with complete and timely training on the refined and upgraded business processes and work flows.

1. PROPOSAL REQUIREMENTS

The Bidder must describe its proposed Business Process Reengineering Methodology, which will be the foundation for the Business Process Reengineering Plan and how it will fulfill the Department's requirements while minimizing the disruption to the organization during the implementation of the EES.

The Business Process Reengineering Methodology must have a set of defined processes designed to assist the Department's workforce and other stakeholders in managing change.

- a. Describe the approach and methodology that will be employed to assess and reengineer the current business processes;
- b. Describe the approach to conducting the Business Process Reengineering Study;

- c. Describe the approach that will be utilized to develop recommendations for business process reengineering as part of the EES design;
- d. Describe how the proposed methodology will measure the results of a change; and
- e. Describe the approach the Bidder recommends for implementation of business process changes associated with the EES in a manner that ensures coordination with training and implementation activities and that ongoing operations are not disrupted.

H. ORGANIZATIONAL CHANGE MANAGEMENT

The implementation and introduction of the EES will produce significant changes to work processes and the overall work environment for all stakeholders. The purpose of organizational change is to provide a smooth transition from the current business environment to a new, more efficient and effective business environment. The Contractor must provide its expertise in business change management to address and mitigate the impact.

Transition also requires coordination of all information technology organizations and applications affected by the EES. Organizational Change Management (OCM) focuses on understanding the level of change that the EES will bring to the State of Nebraska, its staff, and its stakeholders.

The State of Nebraska is seeking services to assist with the OCM aspect of the streamlining and modernization of Medicaid eligibility and enrollment processes and procedures, as well as to support the rollout of EES. A primary objective is to determine the level of organizational support needed to promote the change, proactively develop strategies and action plans to manage the impact, and develop strategies to manage resistance to the changes. The results of this task will drive how the system will be designed and the content of the training materials.

The Contractor must develop and implement an Organizational Change Management Plan based upon its proposed Organizational Change Management Methodology. The Organizational Change Management Plan is a deliverable for Department approval.

1. PROPOSAL REQUIREMENTS

The Bidder must describe its proposed Organizational Change Management Methodology, which will be the foundation for the Organizational Change Management Plan and how it will fulfill the Department’s requirements while minimizing the disruption to the organization during the implementation of the EES. This Organizational Change Management Methodology must have a set of defined processes designed to assist the State of Nebraska and other stakeholders in managing change.

- a. Describe the approach to Organizational Change Management and the methodology that will be employed to assist the Department to envision the EES and document associated business processes;
- b. Describe how the methodology will in:
 - i. Assessing the impact of change upon jobs, roles, workflows and skill requirements needed to ensure successful deployment;
 - ii. Performing the Business Process Gap Analysis;
 - iii. Performing organizational readiness assessments; and
 - iv. Planning and conducting workforce transition activities.

- c. Describe identification of any potential organizational issues anticipated with the implementation of the EES and describe how these will be addressed through its Organizational Change Management Methodology;
- d. Describe the plans to evaluate the changes necessary to the Department's business processes in order to benefit from the EES being proposed;
 - i. How will business processes benefit from workflow, business rules engine and/or content management be identified;
 - ii. How will recommendations be made regarding changes to these business processes; and
 - iii. How will the Contractor's organization and staff be used to implement these recommendations;
- e. Describe the staffing organization and how it will provide assistance to the stakeholders with regard to the identification and definition of their functional requirements;
- f. Describe how the Organizational Change Management tasks integrate with Requirements Gathering, Business Process Gap Analysis and Training; and
- g. Describe how the proposed methodology will measure the results of a change.

I. **TRAINING**

The State of Nebraska wishes to not simply have training delivered, but to have the required knowledge incorporated into its overall organizational environment, including on-going availability of innovative training materials, and the delivery of role-based items such as skill competency lists, job role descriptions, and job evaluation criteria that will help institutionalize the competencies that are being introduced to the organization. These things will be used to facilitate the State of Nebraska's expected transition to new staff and a greater level of organizational maturity in this area. The State of Nebraska views training and knowledge management as a key means to mitigating risk.

The Bidder must propose a Training Strategy that is the basis for the Training Plan deliverable. The Training Strategy must demonstrate that the Contractor has a clear and comprehensive understanding of the State of Nebraska's training requirements, the training-related tasks that are needed to support this project, and the Contractor and Department roles in those tasks.

The development of an effective training program for the EES is as important as the actual software product. The Department will have over 400 employees that perform Medicaid eligibility related duties throughout the state of Nebraska. The routine turnover of employees associated with an operation this large has resulted in a training program that is an ongoing, recurring process. The Department will work with the Contractor to define the number of employees who require training, by local office location and job category.

Bidders should assume that Department users are qualified and capable of performing their assigned duties; therefore the training requirements are specific to EES functionality, features and benefits. The courseware and curriculum must be competency based and assess the knowledge and skills learned. The Contractor must continually assess training materials and training delivery staff to ensure a minimum of 95% competency rate for each course delivered by training delivery site.

The training type will be dictated by the audience and will be scheduled far enough in advance to allow maximum participation. The Contractor will clearly define the specific duration for each

type of training. In order to successfully accomplish the training goal and specific objectives, a Contractor Training Coordinator will identify the different training audiences within the Department. The identification of training audiences will be incorporated in the Training Plan. It will include the targeted audience's roles and responsibilities with regard to the operation and/or support of the EES as well as the audiences' unique training requirements. The Contractor is expected to have training staff available at a minimum during the first month of Operations. The Department will work with the Contractor to determine where Contractor Training staff will be assigned.

The Contractor shall develop a Training Plan deliverable that addresses how the training needs of the EES users will be met, including but not limited to:

1. Different user groups;
2. Each user group's training needs;
3. The types of training proposed for each group;
4. The proposed delivery mechanisms;
5. The proposed training topics;
6. The proposed duration; and
7. Any prerequisites that need to be satisfied for users to be able to participate in training.

The Training Plan should provide training based on Department staff training needs including:

1. Instructor Led (ILT);
2. Web-based Training (WBT);
3. Computer-based Training (CBT); and
4. On-line Help, On-screen tips and Training Aids.

The Training Plan must include how the Contractor intends to provide training materials and guidance intended to last beyond the Contract end date, including but not limited to train-the-trainer sessions.

The Contractor is responsible for furnishing and maintaining appropriate hardware, software, and telecommunications to support the development, maintenance, and presentation of training program(s) and materials. The Contractor will create and support a separate and stable training environment, mirroring production or as specified by the State of Nebraska, that will be used to train Department staff and other system users.

The State of Nebraska currently has Training Centers available for the training delivery in Scottsbluff, Lexington, Fremont, Omaha and Lincoln. Additional trainings sites can be made available. The Contractor is responsible for printing and shipping costs of training materials to Training Centers.

The Contractor will develop and maintain all training documentation and tutorials, training schedules and meeting information, along with the capability to obtain associated maps and driving directions based on a data-entered location by the entity. The Contractor will work with the State of Nebraska to upload all the required materials into the LINK Learning Management System (LMS) or other approved location/tool. In addition, all training materials must be loaded and maintained in the State of Nebraska's Document Repository.

The Contractor shall create or modify existing training materials and supply master copies of all class materials, including Trainer guides, course books, exercise books, tests, evaluations, and quick reference guides for each training module. All training materials must be maintained

to reflect the latest version of the system. Training materials should include a cover page, table of contents, and a history of document changes that identifies each issuance date, version number, and the list of changes made compared to the previous document issuance. All EES courseware is a deliverable that must be approved by the Department prior to its use.

The Contractor is required to monitor and prepare weekly and monthly reports for the Department. The reports will include at a minimum the training classes planned for the next reporting period, training registration and training completion, the competency rate by office and trainer and the number of total training classes planned and delivered.

1. PROPOSAL REQUIREMENT

The Bidder must describe its proposed Training Strategy, which will be the foundation for the Training Plan and how it will fulfill the Department's requirements while minimizing the disruption to the organization during the implementation of the EES.

- a. Describe the proposed Training Strategy based on its understanding project goals, the Contractor's proposed solution, and the Contractor's own experience with comparable EES projects;
- b. Describe the proposed methods to be used to develop and deliver training to end users;
- c. Describe how the proposed Training Strategy will achieve the expected training outcomes detailed in this RFP;
- d. Describe how the Training Plan allows for a variety of pre-existing staff skills and minimizes the amount of time staff are away from the job;
- e. Describe the approach to transfer knowledge and the training mechanisms that will be put into place to not only ensure but to measure the knowledge transferred;
- f. Describe the Training Staffing model and the skill sets of the training development and delivery teams;
- g. Describe how the Contractor will assess their training materials and training delivery staff to achieve and maintain a 95% competency rate for each course delivered by training delivery site;
- h. Describe how the Contractor will collect and report information on training activities on a throughout the system implementation training effort, including progress to schedule (classes scheduled v. classes actually held, total planned to be trained v. number actually trained); number and category of staff trained; and material covered; and
- i. Provide a sample course map, training syllabus and courseware that demonstrates the quality of the current Bidder's training materials in the proposal.

J. KNOWLEDGE TRANSFER

The Contractor must develop a Knowledge Transfer Plan deliverable for transitioning knowledge and artifacts to the State of Nebraska. The Plan must address how knowledge will be transferred, length of time, and methodologies, without disrupting operations. The Plan must provide backup knowledge for a Department-determined period of time.

The EES Contractor's staff will work closely with the State of Nebraska in all phases of the EES contract and under the direction of designated State of Nebraska staff and/or Department contractor staff. The EES Contractor's staff will provide knowledge transfer to the State of Nebraska's technical and programmatic staff throughout the life of the contract. The State of

Nebraska requires that designated key and core staffs are full time, work at the primary State of Nebraska project site and are intermingled with State of Nebraska staff and contractor staff to enable direct interaction.

Approaches to Knowledge Transfer must be based on a working partnership with the State of Nebraska and result in a carefully orchestrated transfer of the knowledge and skills related to processes necessary to support implementation, operations and maintenance activities. The Contractor must provide staff knowledgeable in the Contractor's proposed EES, and must perform rules configuration, optimization, and management, and perform knowledge transfer to the appropriate State of Nebraska staff to assess and potentially assume these responsibilities at the conclusion of the contract.

The Contractor is required to create a knowledge-base that serves as a single "point of truth" for business rules and is complemented with a high level of integration to avoid duplication of costs, processes, data, and effort on the part of the State of Nebraska and beneficiaries.

The Knowledge Transfer Plan deliverable must be comprehensive and cover topics including but not limited to:

- a. The design of the overall system;
- b. Detailed System and Operations documentation in a format which is easily navigated and can be maintained;
- c. Descriptions of all COTS-based components and/or products developed for other states which were installed for Nebraska;
- d. Procedures for configuring the system and its components;
- e. The tools used for system maintenance and enhancement;
- f. How the knowledge base transfer will occur;
- g. How the knowledge transferred is measured and reported
- h. The expected period of time for the transfer; and
- i. The methodologies that will be used.

1. **PROPOSAL REQUIREMENTS**

The Bidder must provide a narrative overview of how the proposed solution will meet the Knowledge Transfer Plan requirements. Please provide specific details of the proposed approach to meeting the State of Nebraska's requirements. Also, include a sample of the Plan in your proposal.

- a. Describe the Knowledge Transfer Strategy based on its understanding of State of Nebraska's project goals, the Contractor's proposed solution, and the Contractor's own experience with comparable EES projects;
- b. Describe the methods to be used to develop and deliver knowledge transfer to State of Nebraska users;
- c. Describe how the proposed Knowledge Transfer Strategy will achieve the expected knowledge outcomes detailed in this RFP;
- d. Describe how the Knowledge Transfer Plan allows for a variety of staff skills and minimizes the amount of time staff are away from the job;
- e. Describe the approach to knowledge transfer that will be put into place to not only ensure but to measure and report the knowledge transferred;
- f. Describe in detail an overview of how the Bidder proposes to approach knowledge transfer for EES;

- g. Describe the knowledge-base and how it will be maintained to serves as a single “point of truth” for business rules; and
- h. Describe the methods which will be used to provide system documentation to the State of Nebraska and the methods which will be utilized to maintain the documentation.

K. REPORTING

Reporting is critical to the monitoring and performance analysis of the Medicaid program. The EES is expected to provide a robust reporting environment with capabilities that are founded on user friendliness and adaptability. The EES shall produce raw data and polished reports, from the individual- to summary-level, to conform to State of Nebraska and federal mandates in the present and in the long-term.

The Contractor must provide an easy-to-use report generation tool that meets the reporting requirements within this RFP and those defined in Appendix B Functional Requirements with one comprehensive tool suite. This reporting toolset will provide the capability to build and publish a library of canned reports, as well as provide State of Nebraska staff with ad-hoc reporting capability.

The State of Nebraska considers any CMS reporting requirement to be included in the Contractor’s canned reports. The Contractor must ensure that reports are produced in an accurate and timely manner, in accordance with State of Nebraska and federal requirements.

1. PROPOSAL REQUIREMENTS

The Bidder must provide a narrative overview of how the proposed solution will meet the Reporting requirements. Please provide specific details of the proposed approach to meeting the State of Nebraska’s requirements. Also, include a sample of reports in your proposal.

The Bidder must describe in detail its proposed Reporting tool and how it will be used for the creation of operational and ad-hoc reports.

- a. Describes the mechanisms and methodologies that shall be built into the EES to allow the State of Nebraska to extract relevant information and build reports according to their specifications.
- b. Describe the Reporting Tool being proposed for all operational and ad-hoc reporting;
- c. Describe the tool’s scalability, ease of use, and features;
- d. Describe in detail the conversion strategy that will be used to convert historical Eligibility and Enrollment System reports into either a canned report or a newly developed report; and
- e. Describe the report tool training and knowledge transfer planned for State of Nebraska staff.

L. DOCUMENTATION

The Contractor shall establish and utilize documentation update procedures, including Meeting Status Reports to ensure that the EES documentation remains current at all times. The Contractor is responsible for the design, drafting and maintenance of all Department approved EES documentation deliverables. The Contractor is required to upload and maintain project, system, and operations documentation in the State of Nebraska Document Repository. The

Contractor must provide a complete copy of all system documentation prior to going live. At a minimum, the Contractor must provide the following documentation deliverables:

- a. Data Dictionary;
- b. COTS Manufacturers' Documentation;
- c. COTS User Manuals;
- d. Technical Operations Manual;
- e. System Administration Manuals;
- f. System Standards; and
- g. Standard Operating Procedures.

1. PROPOSAL REQUIREMENTS

The Bidder must provide a narrative overview of how the proposed solution will meet the Documentation requirements. Please provide specific details of the proposed approach to meeting the State of Nebraska's requirements. Also, include a sample of documentation in your proposal.

- a. Describe how standards to be applied for the development of documentation will be identified;
- b. Describe how document specification templates will be used to establish agreed-upon outlines for each document type;
- c. Describe how documentation to be produced by the process will be identified;
- d. Describe how design, content and publication of documentation will be consistent and standardized;
- e. Describe how documentation will be kept current and that errors are found and corrected;
- f. Describe how documentation will be stored in the State of Nebraska's Document Repository and available to authorized staff; and
- g. Provide samples of current EES document in the proposal.

M. IMPLEMENTATION

The State of Nebraska is looking to the Bidder to describe in detail their recommendation for a single or multi-phase EES implementation.

1. PROPOSAL REQUIREMENT

- a. Describe in detail your recommendation for a single or multi-phase EES implementation. The description must include the reasoning behind the recommendation, and the benefits of the Bidder's recommendation over the other implementation phase option.
- b. Provide a description of a previous implementation or a current implementation project underway where the Bidder's implementation recommendation can be supported.
- c. Provide a recommendation whether to include a Pilot EES. The Pilot recommendation should describe the value gained, duration, and parameters for a pilot.

N. PROVIDE POST IMPLEMENTATION SUPPORT

The EES Contractor must provide EES hosting, Disaster Recovery services and a dedicated Service Desk and Application Support Help Desk. The Service Desk will provide the single point of contact for systems related issues. The Application Support Help Desk, to be staffed during business hours (to be determined by the State of Nebraska), will provide support for issues related to the systems business functionality which need to be escalated for investigation and resolution. Both the Service Desk and Application Support Help Desk must be integrated into the internal support structures within the State of Nebraska. The Service Desk, the Application Support Help Desk, and associated staff must be physically located in the continental United States.

1. SYSTEM HOSTING

The EES Contractor will be responsible for hosting all systems during the DDI Period and must provide approach and costs for Infrastructure as a Service (IaaS) and Platform as a Service (PaaS) for all environments. The EES must be hosted in a Tier IV data center with the provision of disaster recovery during the DDI Period. The Contractor shall provide, or utilize as applicable, the following hosted services by environment type. The Bidder is to propose, specify, implement and support as many environments or instances within each environment type as necessary to fully support the design, construction, delivery, operation and ongoing maintenance of the system as per this RFP. These environments are deliverables and are therefore required to be approved by the Department.

Sandbox: The sandbox environment is intended primarily for learning and experimentation of system features rather than for testing alterations to existing functionality. It isolates configuration changes and outright experimentation from the other environments within the systems landscape. Sandboxing protects "live" servers and their data, tested source code distributions, and other collections of code, data and/or content from changes that could be damaging. The Sandbox should replicate the minimal functionality needed to accurately test the functionality or configuration being exercised. This will be hosted by the Contractor in its facilities in the continental United States.

Configuration/Development: This environment will consist of the servers necessary to implement all the servers including Database, Application, Portal and other technical layers of the system stack. The environment will be used to support the daily software build cycle and to execute unit test to verify the continuous integration of the code base throughout the development cycle. This will be hosted by the Contractor in its facilities in the continental United States.

Testing: At scheduled intervals, specific builds of the code base will be placed into a "testing environment." This environment will be overseen by the testing team who will use it to verify functionality that has been implemented. This will be hosted by the Contractor in its facilities in the continental United States.

Quality Assurance: This environment will be used to assess compliance to requirements, risk of release, and performance capacity. This environment may be a scaled replication of the production environment to minimize errors caused by incompatibility. This will be hosted by the Contractor in its facilities in the continental United States.

Production: This environment should scale to accommodate the proposed and future capacity of the system and will be built for flexibility, scalability and redundancy. This will be hosted with the Contractor, or potentially collocated with other mission critical HHS applications with another provider. This will be hosted by the Contractor in its facilities in the continental United States.

Training: This separate and stable environment, must mirror production or as specified by the State of Nebraska, for use to train staff and other system users. The environment must have a minimum daily refresh capability to allow Trainers to delete practice and assessment data. This will be hosted by the Contractor in its facilities in the continental United States.

Disaster Recovery: All required environments to support the ongoing operation of the production system in the event of a disaster or outage condition at the selected computing center(s).

Each environment should be on a logically and/or physically separate sub-network to safeguard access to configuration, data, and code. The EES Contractor will maintain tight control over the configuration of all code through the use of a source control tool. This tool will provide the Development Team with the ability to check out code for editing in developer workstation sandboxes and to maintain a common code repository. At the end of the implementation of the EES, the State of Nebraska will have access to all environments.

The EES Contractor will provide a System Maintenance, Support and System Transition Plan for transitioning the production environment to the State of Nebraska's Data Center if desired by the State.

2. **EQUIPMENT SUMMARY**

The proposed infrastructure and systems will be housed in a purpose-built and dedicated physical environment. It is imperative that the proposed infrastructure and systems provide the highest level of control and responsiveness in meeting the State of Nebraska's business needs. The Primary Data Center (PDC) shall be configured at the Tier IV – Fault Tolerant Site Infrastructure Level (as defined by the Uptime Institute).

The PDC will provide processing power, control data traffic, and will house and manage all participant and program data. The PDC will at a minimum house:

- a. Web Server(s);
- b. Application Server(s);
- c. Integration Server(s);
- d. Portal Server(s);
- e. Database Server(s);
- f. Analytics Server(s);
- g. Report Server(s); and
- h. Storage Area Network (SAN).

The proposed infrastructure and solution set shall explore the use of server virtualization technologies in the data center in order to optimize the investments in server infrastructure and accelerate the ability to provision and deploy new servers and applications. Virtualization shall help reduce the TCO during the life of the EES.

In addition to these servers, managed enterprise class switches and routers shall help direct data traffic. Other hardware equipment at the PDC include generators, Uninterruptible Power Supplies (UPS) to provide continuous power in the event of a power failure, backup devices (Tape, RAID, SAN, etc.), Power Distribution Units (PDUs), fire suppression system, HVAC, telecommunications lines and equipment (DS3 lines) as well as an enterprise hardware firewall. Where applicable, the UPS should have the ability for unattended graceful shutdowns and restarts in the case of a total power failure.

A secondary data center will need to be established to handle failovers in case of problems with the PDC. This failover site equipment will mirror the PDC equipment configuration and data needed to restore full data center operations within the agreed to Recovery Time Objectives.

3. NETWORK

The Contractor is expected to provide highly redundant connectivity to the State of Nebraska Data Center facilities located in Lincoln, NE for all communications between the systems at Contractor's facility and those at the State of Nebraska. All users will be using the existing network infrastructure and functionality of the State of Nebraska's WAN. The Contractor is expected to leverage the State of Nebraska's WAN and the Internet to provide connectivity to all State of Nebraska workers.

4. IT SERVICE DESK

The EES Contractor will be responsible for providing a professional IT Service Desk to be physically located in the continental United States. The IT Service Desk will enable the central management of service delivery and provides the functions and oversight of Contractor's support services including:

- a. Incident Management;
- b. Problem Management;
- c. Change Management; and
- d. Service Requests.

Service support management represents a core support center that handles and manages the resolution of Incidents, Problems and Changes. This set of services manages events as they occur, and assures escalation, ownership and closure of these events. The Service Desk should follow best practices based on ITIL v3 standards.

IT Service Desk approach should structure the engagement into four distinct stages:

- a. **Stage 1:**
Service Initiation - This stage covers all initiation activities.
- b. **Stage 2:**
Service Transition - This stage describes a process of transitioning the Service Desk into a full production environment.

- c. **Stage 3:**
Service Operations - This stage is the full systems support of the Maintenance & Operations Phase, where the Contractor has assumed full operational responsibilities.
- d. **Stage 4:**
Service Re-Transition - Upon written notification, if the State of Nebraska elects to assume operational responsibility for the Service Desk, this represents the stage where the Contractor will transfer knowledge and collateral to the State or a designated Service Provider.

During the above four staged approach, the following activities shall be addressed during Service Operations:

- a. **PRODUCTION SUPPORT**
Supporting production, addressing system interruptions focusing on identifying and fixing system faults quickly or crafting workarounds enabling later root cause analysis and problem remediation.
- b. **MAINTENANCE SUPPORT**
Making changes to existing functionality and features that are necessary to continue proper system operation. This includes routine maintenance, root cause analysis, applying change requirements, software upgrades, business need changes, rule changes, infrastructure policy impacts, and corrective, adaptive or perfective maintenance, as appropriate.
- c. **ENHANCEMENT SUPPORT ANALYSIS**
Analyzing the functional and non-functional requirements for adding new functionality/features to the EES on prioritized requests from the user community. This includes interpreting any rules changes and other critical business needs from a technical and logistical standpoint.
- d. **USER SUPPORT**
Providing application-specific support coordinated through the IT Service staff as well as conducting system research and inquiries.
- e. **HELPDESK PLATFORM**
The IT Service Desk shall utilize a dedicated implementation of industry standard service desk software suite to be hosted and used by the State of Nebraska.
- f. **DATABASE SUPPORT**
This includes both DB support as well as refactoring the EES to enhance database efficiency in storage and query response time and coordinating with system administrators to enable ideal hardware.

5. SOFTWARE CONFIGURATION MANAGEMENT

Software Configuration Management includes the identification and maintenance of System software components and the relationships and dependencies among them. These activities include:

- a.** Automatic capture and storage of IT Service to Application, Application-to-Component and Component-to-Component relationships; and
- b.** Maintenance of the history of those relationships and any transformation required to appropriately manage and document (e.g., source control, version control, profiles, security plans) configuration changes affecting the application and its processing environment.

Code Migration includes promoting new and modified code, configuration, and scripts, in support of new and existing applications through development, test, and production. These activities include:

- c.** Migrate code from development to test on an agreed upon basis;
- d.** Track migration status and notification;
- e.** Identify and resolve issues with the services delivery team and development teams;
- f.** Develop and document recommended operations and administration procedures related to code migration; and
- g.** Develop and document test-to-production turnover requirements and instructions for each project or release.

6. CHANGE AND RELEASE MANAGEMENT

Change and Release Management activities include services required to appropriately manage and document (e.g., impact analysis, version control, library management, turnover management, build management, parallel development) changes to the application and any of the constituent components being developed. Change and Release Management also includes services required to appropriately manage and document changes to the underlying application development environment components. These include the following:

- a.** Library Management the classification, control, and storage of the physical components of the application;
- b.** Version Control the maintenance, tracking, and auditing of modifications to an application's components over time, facilitating the restoration of an application to prior development stages; and
- c.** Turnover Management the automated promotion of software changes across different phases of the life cycle (e.g., development, unit test, systems test, and production), including management of the approval process, production turnover, and software migration control.

The EES shall utilize a centralized solution to automate and control the software change and release management process.

- a.** This software change and release management process will control migration patterns (i.e., how a given set of code moves from one environment to another); and

- b. This software configuration management process will control versioning, access controls, data quality, etc., for each environment.

7. DATA RETENTION AND ARCHIVING

The EES should be designed to support multiple layers of data backup protection using a combination of both disk based and tape based technologies to meet the EES Backup and Recovery (BU/R) requirements.

The EES should leverage SAN replication and mirroring technologies to provide online, disk based system data protection. The EES should utilize SAN-based; block level data replication to protect both critical Database and Application components. Mission critical system components will also be mirrored synchronously to provide fast access to critical functions in the event of failure. In the event of catastrophic system failure at the primary site, clients can be redirected to the secondary site via DNS to utilize redundant systems present at the secondary site. Clients will then be able to retrieve application from replicated sources that will be up to date based on the last completed replication cycle.

Additionally, database replication should also be utilized to synchronize data between both primary and secondary databases. Finally, another layer of protection should be designed to provide traditional, versioned system data backup to tape storage. The implementation team shall create new backup job policies specific to the EES.

All EES database and application backup policies will utilize recommended schedules, and all policies will include at least one weekly full backup plus daily incremental backups to ensure data integrity and prevent data loss. Data on all tapes will also be encrypted to ensure security in the event tapes are taken to an offsite storage facility. The backup solution shall utilize on-line backup methodologies where possible that would enable quick backup and restore. Tape and off-site backups should be used to comply with long-term retention and meet the Nebraska Secretary of State Records Retention standards.

Documentation of all B/UR related processes and procedures will be generated during the course of the project, will be validated during system test, and will be presented t at project close. Additionally, processes and procedures that mandate routine testing and restoration of system backup data will also be developed. In this manner, the effectiveness and health of the proposed System B/UR solution will be continually validated.

8. SYSTEM PERFORMANCE MONITORING AND REPORTING

a. PERFORMANCE MONITORING

Operational performance monitoring begins with the tracking of each and every service request via a ticket tracking tool capable of capturing and providing detailed information regarding the Contractor's efforts associated with resolving each specific request. The Contractor must ensure that all data collected is accessible by appropriate stakeholders to ensure an "open book" approach to problem management and performance monitoring.

b. PERFORMANCE REPORTING

The Contractor's Service Delivery Manager is responsible for presenting the Monthly Performance Status deliverable against the SLR expectations. The

monthly report will include monthly progress for each support area as well as a rolling trend chart. Any deviations from expected performance will be reviewed and discussed with agreements toward corrective action plans defined jointly with the appropriate State of Nebraska management. Continued failure to meet or exceed committed targets should result in escalation of issues.

c. MONITORING TOOLS

The Contractor should propose one or more monitoring tool(s) to proactively monitor the performance of key infrastructure components of the EES. These tools should provide a flexible, well-rounded solution for monitoring server and network health. These should also monitor basic services and database connectivity, and perform advanced monitoring of Web-based applications through customizable monitoring scripts. These tools should have extensively customizable dashboards to provide availability and response time on devices, URLs, WAN links and services; besides providing health and performance statistics of the servers, network devices, services and applications. These tools should utilize a combination of ICMP, SNMP, and WMI protocols that enables them to monitor almost any networked device. Automatic alerting and reporting in multiple formats including email, SMS text messages, and application pop-up windows should also be available.

9. COMPLIANCE WITH FEDERAL HIPAA, HI-TECH AND STATE OF NEBRASKA CONFIDENTIALITY LAW

The EES Contractor acknowledges its duty to become familiar with and comply, to the extent applicable, with all requirements of the Federal Health Insurance Portability and Accountability Act (HIPAA), 42 U.S.C. § 1320d et seq. and implementing regulations including 45 CFR Parts 160 and 164. The Contractor also agrees to comply with all State of Nebraska Privacy Policies.

The Contractor shall maintain the privacy and security of all individually identifiable health information acquired by or provided to it as a part of the performance of this contract. The Contractor shall follow federal and State of Nebraska law relating to privacy and security of individually identifiable health information as applicable, including the Health Insurance Portability and Accountability Act (HIPAA) and its federal regulations.

Protected Health Information as defined in the HIPAA regulations at 45 CFR 160.103 and 164.501 means information transmitted that is individually identifiable; that is created or received by a healthcare provider, health plan, public health authority, employer, life insurer, school or university, or healthcare clearinghouse; and that is related to the past, present, or future physical or mental health or condition of an individual, to the provision of healthcare to an individual, or to the past, present, or future payment for the provision of healthcare to an individual. The definition excludes certain education records as well as employment records held by a covered entity in its role as employer.

Based on the determination that the functions to be performed in accordance with this RFP constitute Business Associate functions as defined in HIPAA, the EES Contractor shall execute a Business Associate Agreement as required by HIPAA regulations at 45 CFR §164.501.

10. DATA SYSTEMS ACCESS

The Contractor agrees that all information accessed in the State of Nebraska computer systems is the sole property of the State of Nebraska; Contractor employees are granted access to this under the terms and conditions of this Contract. All information collected and compiled by the Contractor under the terms and conditions defined in this Contract is the sole property of the State of Nebraska and subject to all privacy and security safeguards defined by the State of Nebraska.

The Contractor agrees that under the terms and conditions of the contract resulting from this RFP, that the State of Nebraska computer system access will only be granted to employees or subcontractors approved by the Department.

The Contractor agrees that under the terms of this contract they are responsible for ensuring all State of Nebraska approved subcontractors understand and agree to abide by the same terms and conditions defined in this contract.

The Contractor agrees that unique access logon accounts into the State of Nebraska's data systems will be assigned to an individual and that logon account may only be used by the individual to which it is originally assigned.

The Contractor agrees to access the State of Nebraska data systems only through State supplied CITRIX access and encryption technology.

The Contractor agrees to meet compliance requirements for all applicable State of Nebraska and federal physical, administrative, and electronic safeguard standards (as per safeguard publications listed below) and abide by State of Nebraska Information Technology Policies that govern the appropriate use of disclosure of privacy of and security of information provided by the State under the terms and conditions defined in this Contract.

11. SAFEGUARD PUBLICATIONS

- a. Health Information Portability Accountability Act of 1996 (HIPPA—privacy rule 45 CFR Part 160 and subparts A and B of Part 164)
- b. HIPPA – Security Rules 45 CFR Part 160 and subpart A and C Part 164
- c. Internal Revenue Service (IRS) Publication 1075
- d. Social Security Administration (SSA) – Computer Match Agreement
- e. DHHS Information Technology Policies

The Contractor agrees that the State of Nebraska or federal agencies with jurisdiction (i.e., OCR, IRS, SSA, DHHS, or State of Nebraska Auditor's Office) may conduct unannounced compliance inspections related to the physical administrative and electronic safeguards defined in the publications listed above.

The Contractor understands that it will be held responsible for all criminal and civil penalties for actions of the subcontractor as defined in the publications listed above.

The Contractor agrees to immediately notify the State of Nebraska's HIPPA privacy/security office of any suspected loss of, threat of, inappropriate disclosure of, unauthorized access of, or destruction of and/or corruption of Departmental information

obtained from Departmental computer systems and agree to comply with incident reporting criteria as defined in their BAA and the publication listed above.

The Contractor agrees to immediately notify the State of Nebraska of any lost or stolen computer hardware that may have been used to access, process, or store State of Nebraska information or State computer systems.

Contractor agrees to comply with State of Nebraska Breach Notification Law Revised Statute 87-802 any time there is a suspected loss of personal information as defined in the revised statute.

The Contractor agrees that no State of Nebraska information will be stored on a personal device and all State of Nebraska information stored, processed, or otherwise transmitted will be performed on State of Nebraska resources accessed through CITRIX or through the State of Nebraska secure e-mail system.

12. WARRANTY

The Contractor shall be responsible for fixing any errors that occur during the deployment and four (4) years into the operation of the entire solution at no additional cost. The four-year Software Warranty period starts after the full scope of the project is released into production.

The Contractor shall provide the four (4) years of Software Warranty following deployment of the full scope of the project at no additional cost. The Contractor shall provide the equipment needed to support its staff for duration of the project. The Contractor shall be responsible for the root cause analysis activities to demonstrate whether a defect is related to the scope of functionality delivered by the Contractor. The four-year Software Warranty period applies to all “corrective” maintenance/reactive modification of the EES performed after completion of deployment to correct discovered faults with any functionality within the scope of original software development effort. All such fixes are required to occur in a reasonable timeframe (depending on severity as defined in the table below) and shall be produced at no additional cost to the State of Nebraska.

Production Defect Severity	Response Time
Severity 1 - The EES no longer functions at all, or a System component is unavailable to more than 20% of active production users.	4 Hours
Severity 2 - Any defect that affects less than 20% of the EES functionality or less than 20% of active production users.	8 Hours
Severity 3 - The EES is able to function with a temporary workaround.	72 Hours

a. PROPOSAL REQUIREMENTS

The Bidder must provide a narrative overview of how the proposed solution will meet the EES requirements. The following response requirements pertaining to the Non-functional Requirements for the EES and must be responded by the Bidder.

Provide specific details of the proposed approach to meeting the State of Nebraska's requirements in each area. Also, include one or more diagrams where necessary that detail the proposed design and the relationships between key technical components.

Responses in this section must be highly-focused on the specific requirements and must not simply provide generic or marketing descriptions of technology or product capabilities.

i. Describe the proposed approach to system warranty, including the type of warranty being offered. In addition, provide a summary of the Bidder's proposed strategy for supporting that warranty. Please address the following areas (at a minimum):

- a) Four-Year Software Warranty;
- b) Staff Resources and Supporting Equipment; and
- c) Meeting Service Level Requirements (SLRs)

13. SOFTWARE MAINTENANCE AND OPERATIONS (M&O)

A contract resulting from this Request for Proposal will be issued from the date of the award for six (6) years, with the option to renew for two (2) additional two-year renewal periods as mutually agreed upon by all parties. The initial period of the contract will be the Design, Development and Implementation (DDI) of the EES, with the expectation that it will be completed and approved by the State of Nebraska by December 31, 2015. The subsequent Base Maintenance and Operations (Base M&O) period shall be four (4) years from the projected date of January 1, 2016.

The Base M&O period includes the "adaptive" maintenance/modification of the EES performed after completion of deployment to keep the EES usable in a changed or changing environment, and "perfective" maintenance which is modification of the EES after completion of deployment to improve performance or maintainability. During this period, the Contractor shall be in charge of Software Maintenance, and hosting and operating the EES platforms and underlying technologies, and providing Disaster Recovery services

Costs for this item must be clearly defined in the Cost Proposal. The Bidder shall communicate and document all software faults that are not a part of the scope of the original development effort during the Software Maintenance period.

At the expiration of the Base M&O period, the State of Nebraska may elect to enter optional renewal M&O Period(s). The scope of services covered under the optional renewal M&O Period(s) will be the same as the Base M&O period.

The Bidder agrees to propose two (2) two-year renewal M&O periods. The State of Nebraska shall be able to exercise its option to sign-up for the same services to those offered in the warranty and Base M&O period.

a. PROPOSAL REQUIREMENTS

This section defines Bidder requirements regarding the M&O Support approach (availability of staff, lead time for on-boarding of staff, staff due diligence process, knowledge transfer and documentation processes, etc.). The Bidder's proposal must provide information that can be used by the State of Nebraska to evaluate the Bidder's knowledge of, and intended approach to, the M&O Support requirements. This information must include at least the following:

- i. Describe the approach for providing ongoing maintenance and support services, including a flexible and scalable approach to providing the various types of personnel, including:
 - a) Architect;
 - b) Business Analyst/Functional Lead;
 - c) Communication/Network Specialist;
 - d) Database Administrator;
 - e) Help Desk Specialist;
 - f) Hardware Specialist;
 - g) Operations Lead/Manager;
 - h) Project Manager;
 - i) Programmer;
 - j) Security Systems Engineer; and
 - k) Systems Administrator.

- ii. Describe the approach to system operations support, including the levels of support offered and the process for requesting support. In addition, provide a summary of the strategy for maintaining and repairing the system. Please address the following areas (at a minimum):
 - a) Base Software Maintenance Period;
 - b) Incident and maintenance request reporting; and.
 - c) Optional Extension Software Maintenance Period.

- iii. Describe the proposed approach to Defect Resolution and Solution Acceptance that shall incorporate methodologies and practices which will assist the State of Nebraska to successfully manage the enterprise's M&O lifecycle phase and shall address at least the following areas:
 - a) Support Model;
 - b) Triage Procedures;
 - c) Tools;
 - d) Roles and Responsibilities of support personnel;
 - e) Release Management;
 - f) Upgrades;
 - g) Maintenance;
 - h) On-going Operations;
 - i) Customer Support;
 - j) Specific support procedures for production;
 - k) Deliverables;
 - l) Capacity Management;

- m) Technology Refresh;
 - n) Solution Security;
 - o) Backup and Recovery;
 - p) Disaster Recovery; and
 - q) Defect/Issue Management.
- iv. Describe the approach to Solution Administration that shall incorporate methodologies and practices which will assist the State of Nebraska to successfully administrate the EES and shall address at least the following areas:
- a) Archive/Purge of Log files;
 - b) Version control capabilities;
 - c) Logging and reporting for accessing errors and exceptions and unauthorized access;
 - d) Public key/private key encryption Secure Socket Layer (SSL) certificates;
 - e) Single sign-on capability and integration with Nebraska's Active Directory authentication and authorization;
 - f) Admin tools and maintenance routines;
 - g) Firewalls and DMZ for external access and remote access; and
 - h) Administration of User Accounts, User Roles, User Groups etc.
- v. Describe the approach to Solution Management that shall incorporate methodologies and practices which will assist the State of Nebraska to successfully manage the EES and shall address at least the following areas:
- a) Generate Administrative Alerts;
 - b) Updates to Distributed components;
 - c) SLR Monitoring;
 - d) Remote support;
 - e) Event Management and Monitoring using ITIL v3 or equivalent best practices; and
 - f) Application Performance Monitoring.

14. HOSTING AND DISASTER RECOVERY SERVICES

The State of Nebraska has requirements for the Contractor to host the environments associated with the development phases of the EES project (DDI period), provide support services to long term development environments, provide application support services for production environment(s), as well as provide disaster recovery site and technical services.

15. DEVELOPMENT ENVIRONMENTS

The Bidder must propose, provide and operate all required environments to support its proposal for the specification, design, development and implementation of the system including, but not limited to the following environments:

- a. Sandbox;
- b. Configuration/Development;
- c. Test;
- d. Quality Assurance;
- e. Production
- f. Training; and
- g. Disaster Recovery

These environments should be sized in accordance with planned use and be inclusive of all hardware, storage, networking, backup/restore, database, file system, monitors and other items as required to comprehensively support the development effort.

16. PRODUCTION ENVIRONMENT

The State of Nebraska may choose to use the services of the Contractor for the EES and EES Platform Production hosting. In advance of use, and in consideration of the State of Nebraska procurement, installation and commissioning cycles, the Bidder will specify all required environments to support their proposal for the ongoing specification, design, development of the project associated with subsequent cycles including, but not limited to the following environments:

- a. Full Production Operation;
- b. Production Replica for Fault Resiliency/Onsite Disaster Recovery Purposes and debugging/issue resolution purposes;
- c. Offsite Disaster Recovery Replication; and
- d. Other environments deemed necessary by the Contractor to support production operations.

These environments should be sized in accordance with planned use and be inclusive of all hardware, storage, networking, backup/restore, database, file system, monitors and other items as required to comprehensively support the ongoing development operation of the EES as well as to support the debugging or resolution of issues within the production environment.

17. DISASTER RECOVERY ENVIRONMENTS

The State of Nebraska may choose to use the services of the Contractor for the EES and the EES Platform Disaster Recovery site hosting. The Bidder must specify all required environments to support their proposal for the ongoing operation of the production system in the event of a disaster or outage condition at the selected computing center(s) associated with the following environments:

- a. Full Production Operation;
- b. Systems Development inclusive of then current code bases and associated data associated with the development effort; and
- c. Other environments deemed necessary by the Bidder to support production operations in the event of an outage or disaster.

These environments should be sized in accordance with planned use and be inclusive of all hardware, storage, networking, backup/restore, database, file system, monitors and other items as required to support limited development effort during the disaster or outage condition as well as to not adversely impact or jeopardize phases that are being developed.

Bidders must detail the proposed approach to system hosting and disaster recovery support services, including the type and levels of services offered and the process for requesting changes to the services. In addition, provide a summary of the Bidder's strategy for ensuring stable and uninterrupted operations. Specifically, describe any industry best practices employed (e.g. ITIL) or certifications achieved (e.g. ISO 20000) that would provide assurances that the Bidder shall be able to provide a consistent and high quality level of services.

The term for providing these environments shall commence upon execution of an agreement between the State of Nebraska and Contractor, and shall conclude upon the end of the term for this contract or upon notification from the State of Nebraska of the desire to host the system(s) elsewhere. During the term of this contract the off-site hardware used by the Contractor to provide the hosting service is and will remain the property of the contractor. The State of Nebraska will pay the Contractor an agreed upon fee for the use of the hosted environments.

Upon notification by the State of Nebraska of the availability or receipt of the hardware to support these environments in the State of Nebraska data center or an alternate data center, the Contractor shall install, configure and commission for ongoing use these environments within the State of Nebraska data center or alternate data center, if required.

Upon completion of this migration and direction from the State of Nebraska, the old non-production environment should be decommissioned by the Contractor, any Contractor hardware usage charges arising from the use of this equipment shall no longer be the responsibility of, nor billed to the State of Nebraska, and all State data or other artifacts resident on this hardware shall be destroyed or otherwise deleted.

O. TURNOVER

The Turnover Period represents a period of transition during which the EES and all related operational and technical support activities that have been maintained and operated by the Contractor must be turned over to the State of Nebraska or successor contractor(s).

During the Turnover Period the Contractor must provide turnover planning and the requisite services in support of the following State of Nebraska turnover objectives:

1. Provide for an orderly, complete, and controlled transition to the State of Nebraska or successor contractor(s);
2. Avoid disruptions of processing and services provided to members, providers, and operational users of the EES during the turnover period;
3. Maintain EES responsibility through the effective date of the transfer of responsibility and through the completion of the reconciliation of final day processing conducted by the Contractor, including data and report output; and
4. Provide technical and operational services and information as needed to facilitate an informed, coordinated, and complete transfer of activity.

The State of Nebraska will notify the Contractor in writing of its plans to take over the EES or to procure a new EES contract. The Contractor will be required to support the Department during the RFP development by providing contract performance reports; inventories of hardware/software, technical frameworks and/or schematics including EES interfaces; and other EES contract information defined by the State of Nebraska.

No later than thirty (30) days from notification, the Contractor must provide a draft Turnover Plan. The State of Nebraska will work with the Contractor to finalize the Turnover Plan deliverable. The Turnover Plan deliverable must include:

1. Proposed approach to turnover;
2. Turnover work plan, including detailed tasks and subtasks;
3. Schedule for turnover; and
4. Procedures to maintain up-to-date documentation during turnover.

Along with the Turnover Plan, the Contractor must submit a statement of the resources that would be required by the State of Nebraska or a successor contractor to take over operation of the EES. The Requirements Statement must be based on the Contractor's experience in the operations of an EES and must include actual Contractor resources devoted to the operation of the EES. The Requirements Statement deliverable must include:

1. An inventory of all application software used to perform the functions of all components of the EES;
2. An inventory of all hardware, system software, and other technical environment resources required to operate all components of the EES; and,
3. The number and type of personnel required to perform the functions under the contract, including both data processing staff and administrative support staff.

The Contractor must identify a dedicated Turnover Manager for the Turnover Period. The dedicated Turnover Manager will be responsible for all activities associated with the turnover of the EES to the State of Nebraska or successor contractor(s).

The Contractor must cooperate with the State of Nebraska and/or successor contractor while providing all required turnover services. This will include meeting with the State of Nebraska and/or successor and devising work schedules that are agreeable to all involved parties. The Bidder must state in its proposal a commitment to working with the State of Nebraska and/or successor contractor(s) in planning and performing the Turnover activities.

The Contractor will be paid at the end of the Turnover period when the final EES Contract Report deliverables have been approved by the Department.

1. PROPOSAL REQUIREMENTS

The Bidder must describe its proposed methodology for turning the system and full operations over to the State of Nebraska or a successor contractor. The methodology should describe the Contractor's approach and plan for turnover.

- a. Describe the approach to system and operations turnover based on the Contractor's proposed solution, and the Contractor's own experience with comparable EES projects;
- b. Describe the approach for training State of Nebraska staff, State contractor staff or the successor contractor;
- c. Describe how the Contractor will manage the transition while maintaining production schedules;

- d. Describe the staff responsible for transition; and
- e. Include a statement that the Contractor is committed to working with the State of Nebraska and successor contractor(s) in planning and performing the Turnover activities.

P. SERVICE LEVEL REQUIREMENTS

The State of Nebraska will monitor the performance of the contract issued under this RFP. All services and deliverables under the contract shall be provided at an acceptable level of quality and in a manner consistent with acceptable industry standards, custom, and practice.

The Bidder must submit a list of their standard Service Level Requirements for the EES as part of the proposal. The final set of SLRs and the associated Liquidated Damages for non-performance will be determined by the State of Nebraska and the selected Contractor.

Q. DELIVERABLE APPROVAL PROCESS

Once the detailed Project Plan is approved by the Department, the following sections detail the process for submission and review of deliverables during the life of the project/contract.

The Contractor must provide one electronic copy of each deliverable to the appropriate Department Project Manager and IV&V Contractor as identified in the contract. Once a deliverable is approved and accepted by Department, the Contractor must upload an electronic copy into the designated State of Nebraska Document Repository.

Deliverables will be evaluated by the Department and IV&V Contractor utilizing mutually agreed to acceptance/exit criteria.

1. DELIVERABLE SUBMISSION

Prior to development and submission of Department specified contract deliverable, a Deliverables Expectations Document (DED) containing a description of the format and content of each deliverable will be delivered to the Department for review and approval. The DED must contain, at a minimum, the following:

- a. Cover letter;
- b. Table of Contents with a brief description of the content of each section;
- c. Anticipated number of pages; and
- d. Identification of appendices/exhibits

The DED must contain an approval/rejection section that can be completed by the Department. The summary document will be returned to the Contractor within a mutually agreed upon time frame. Deliverables must be developed by the Contractor according to the approved format and content of the summary document for each specific deliverable.

At a mutually agreed to meeting, on or before the time of delivery to Department, the Contractor must provide a walkthrough of each deliverable. Deliverables must be submitted no later than 5:00 PM CST, per the approved contract deliverable schedule and must be accompanied by a deliverable sign-off form with the appropriate sections completed by the Contractor.

2. DELIVERABLE REVIEW

The Department's review time begins on the next business day following receipt of the deliverable. The Department's review time will be determined by the approved and accepted detailed project plan and the approved contract. The Department has up to five (5) working days to determine if a deliverable is complete and ready for review. In the case of large deliverables the Department will work with the EES Contractor and IV&V Contractor to determine a mutually agreeable review period. Unless otherwise negotiated, this is part of the Department's review time.

Any subsequent deliverable dependent upon the Department's acceptance of a prior deliverable will not be accepted for review until all issues related to the previous deliverable have been resolved. Deliverables determined to be incomplete and/or unacceptable for review will be rejected, not considered delivered and returned to the Contractor. After review of a deliverable, the Department will return to the Contractor the project deliverable sign-off form with the deliverable submission and review history section completed.

3. DELIVERABLES ACCEPTANCE

If the deliverable is accepted, the original deliverable sign-off form signed by the appropriate Department representatives will be returned to the Contractor.

4. COMMENTS/REVISIONS REQUESTED BY THE STATE OF NEBRASKA

If the Department has comments and/or revisions to a deliverable, the following will be provided to the Contractor:

- a. The original deliverable sign-off form with an updated entry to the deliverable submission and review history section.
- b. Attached to the deliverable sign-off form will be a detailed explanation of the revisions to be made and/or a marked up copy of the deliverable.
- c. The Department's first review and return with comments will be completed within the times specified in the contract.
- d. The EES Contractor will have five (5) working days, unless otherwise mutually agreed to, for review, acceptance and/or rejection of the Department's comments.

A meeting to resolve outstanding issues must be completed within three (3) business days after completion of the Contractor's review or a mutually agreed upon time frame. Agreements made during meetings to resolve issues must be documented separately. Once an agreement is reached regarding changes, the Contractor must incorporate them into the deliverable for resubmission to the Department. All changes must be easily identifiable by the Department.

Resubmission of the deliverable must occur within five (5) business days or a mutually agreed upon time frame of the resolution of any outstanding issues. The resubmitted deliverable must be accompanied by the original deliverable sign-off form. This review process continues until all issues have been resolved within a mutually agreed upon time frame.

During the re-review process, the Department will only comment on the original exceptions noted. All other items not originally commented on are considered to be accepted by the Department. Once all revisions have been accepted, the original

deliverable sign-off form signed by the appropriate MLTC representatives will be returned to the Contractor.

The Contractor must provide one (1) updated electronic copy of each deliverable after approval and acceptance by the Department.

5. REJECTED, NOT CONSIDERED DELIVERED

If the Department considers a deliverable not ready for review, the following will be returned to the Contractor:

- a. The original deliverable sign-off form with an updated entry to the deliverable submission and review history section.
- b. The original deliverable and all copies with a written explanation as to why the deliverable is being rejected, not considered delivered.
- c. The Contractor will have five (5) business days, unless otherwise mutually agreed to, for review, acceptance and/or rejection of the Department's comments.

A meeting to discuss the Department's position regarding the rejection of the deliverable must be completed within three (3) business days after completion of the Contractor's review or a mutually agreed upon time frame. Resubmission of the deliverable must occur within a mutually agreed upon time frame. The resubmitted deliverable must be accompanied by the original deliverable sign-off form.

Upon resubmission of the completed deliverable, the Department will follow the steps outlined in this process.

Bidders are required to complete and submit Form D, which lists EES Project Deliverables. The submission dates for the PMP have been entered and cannot be changed without Department approval prior to the requested change. The Bidder should enter the projected dates for the other deliverables. The Deliverables dates entered in this form must match the dates in the Bidder Project Plan. The Bidder is responsible for ensuring this form includes all deliverables identified in this RFP and any additional deliverables identified by the Bidder.

R. VALUE ADDED OPTIONS

The State of Nebraska has attempted to identify and incorporate the requirements necessary to successfully procure and install the Nebraska EES. We recognize that Bidders may have completed an installation in another state or for a commercial client. The Bidder is requested to convey any other considerations, products or services which they believe the State of Nebraska may have overlooked or not requested.

1. PROPOSAL REQUIREMENT

- a. Provide a list and description of requirements, products or services necessary to successfully install and implement the Nebraska EES. This requirement does not include necessary products or services specific to a Bidder's solution; and
- b. Provide a list and description of requirements, products or services necessary to successfully install and implement the Bidder's solution.

The Bidder may also submit Value Added Options that have not been requested in this RFP, but are based on a Bidder's market knowledge and experience. The Value Added Options will not be evaluated to determine the EES Contractor; however the State of Nebraska may determine to contract for an option after the Contractor selection has been made. Bidders must include a cost for each Value Added Option in their Cost proposal.

- a.** Describe each Value Added Option. The description should include:
 - i.** How the Value Added Option could enhance the EES;
 - ii.** How the State of Nebraska could benefit from the Value Added Option;
 - iii.** How the Medicaid eligibility effort could benefit from the Value Added Option; and
 - iv.** Where and when the recommended Value Added Option(s) has been implemented.

- b.** Describe the EES' current mobility (e.g. smartphone, tablet, etc.) capabilities and/or plans for mobility in upcoming version(s).

V. PROPOSAL INSTRUCTIONS

This section documents the mandatory requirements that must be met by bidders in preparing the Technical and Cost Proposal. Bidders should identify the subdivisions of "Project Description and Scope of Work" clearly in their proposals; failure to do so may result in disqualification. Failure to respond to a specific requirement may be the basis for elimination from consideration during the State's comparative evaluation.

Proposals are due by the date and time shown in the Schedule of Events. Content requirements for the Technical and Cost Proposal are presented separately in the following subdivisions:

A. TECHNICAL PROPOSAL

The Technical Proposal shall consist of four (4) sections:

1. SIGNED in ink "State of Nebraska Request For Proposal For Contractual Services" form;
2. Executive Summary;
3. Corporate Overview; and
4. Technical Approach.

1. REQUEST FOR PROPOSAL FORM

By signing the "Request For Proposal For Contractual Services" form, the bidder guarantees compliance with the provisions stated in this Request for Proposal, agrees to the Terms and Conditions stated in this Request for Proposal and certifies bidder maintains a drug free work place environment.

The Request For Proposal For Contractual Services form must be signed in ink and returned by the stated date and time in order to be considered for an award. Please include "Form A" in combination with the "Terms and Conditions" from Section III.

2. EXECUTIVE SUMMARY

The Executive Summary shall condense and highlight the contents of the solution being proposed by the bidder in such a way as to provide the Evaluation Committee with a broad understanding of the Contractor's Technical Proposal.

Bidders must present their understanding of the problems being addressed by implementing a new system, the objectives and intended results of the project, and the scope of work. Bidders shall summarize how their Technical Proposal meets the requirements of the Request for Proposal, and why they are best qualified to perform the work required herein.

3. CORPORATE OVERVIEW

The Corporate Overview section of the Technical Proposal must consist of the following subdivisions:

a. BIDDER IDENTIFICATION AND INFORMATION

The bidder must provide the full company or corporate name, address of the company's headquarters, entity organization (corporation, partnership, proprietorship), state in which the bidder is incorporated or otherwise organized to do business, year in which the bidder first organized to do business, whether

the name and form of organization has changed since first organized, and Federal Employer Identification Number and/or Social Security Number.

b. FINANCIAL STATEMENTS

The bidder must provide financial statements applicable to the firm. If publicly held, the bidder must provide a copy of the corporation's most recent audited financial reports and statements, and the name, address and telephone number of the fiscally responsible representative of the bidder's financial or banking organization.

If the bidder is not a publicly held corporation, either the reports and statements required of a publicly held corporation, or a description of the organization, including size, longevity, client base, areas of specialization and expertise, and any other pertinent information must be submitted in such a manner that proposal evaluators may reasonably formulate a determination about the stability and financial strength of the organization. Additionally, a non-publicly held firm must provide a banking reference.

The bidder must disclose any and all judgments, pending or expected litigation, or other real or potential financial reversals, which might materially affect the viability or stability of the organization, or state that no such condition is known to exist.

c. CHANGE OF OWNERSHIP

If any change in ownership or control of the company is anticipated during the twelve (12) months following the proposal due date, the bidder must describe the circumstances of such change and indicate when the change will likely occur. Any change of ownership to an awarded vendor(s) will require notification to the State.

d. OFFICE LOCATION

The bidder's office location responsible for performance pursuant to an award of a contract with the State of Nebraska must be identified.

e. RELATIONSHIPS WITH THE STATE

The bidder shall describe any dealings with the State over the previous five (5) years. If the organization, its predecessor, or any party named in the bidder's proposal response has contracted with the State, the bidder shall identify the contract number(s) and/or any other information available to identify such contract(s). If no such contracts exist, so declare.

f. BIDDER'S EMPLOYEE RELATIONS TO STATE

If any party named in the bidder's proposal response is or was an employee of the State within the past twenty-four (24) months, identify the individual(s) by name, State agency with whom employed, job title or position held with the State, and separation date. If no such relationship exists or has existed, so declare.

If any employee of any agency of the State of Nebraska is employed by the bidder or is a subcontractor to the bidder, as of the due date for proposal submission, identify all such persons by name, position held with the bidder,

and position held with the State (including job title and agency). Describe the responsibilities of such persons within the proposing organization. If, after review of this information by the State, it is determined that a conflict of interest exists or may exist, the bidder may be disqualified from further consideration in this proposal. If no such relationship exists, so declare.

g. CONTRACT PERFORMANCE

If the bidder or any proposed subcontractor has had a contract terminated for default during the past five (5) years, all such instances must be described as required below. Termination for default is defined as a notice to stop performance delivery due to the bidder's non-performance or poor performance, and the issue was either not litigated due to inaction on the part of the bidder or litigated and such litigation determined the bidder to be in default.

It is mandatory that the bidder submit full details of all termination for default experienced during the past five (5) years, including the other party's name, address and telephone number. The response to this section must present the bidder's position on the matter. The State will evaluate the facts and will score the bidder's proposal accordingly. If no such termination for default has been experienced by the bidder in the past five (5) years, so declare.

If at any time during the past five (5) years, the bidder has had a contract terminated for convenience, non-performance, non-allocation of funds, or any other reason, describe fully all circumstances surrounding such termination, including the name and address of the other contracting party.

h. SUMMARY OF BIDDER'S CORPORATE EXPERIENCE

The bidder shall provide a summary matrix listing the bidder's previous projects similar to this Request for Proposal in size, scope and complexity. The State will use no more than three (3) narrative project descriptions submitted by the bidder during its evaluation of the proposal

The bidder must address the following:

- i. Bidder must provide narrative descriptions to highlight the similarities between their experience and this Request for Proposal. These descriptions must include:
 - a) the time period of the project;
 - b) the scheduled and actual completion dates;
 - c) the contractor's responsibilities;
 - d) for reference purposes, a customer name (including the name of a contact person, name of the State, federal or commercial client and Project Name, a current telephone number, a facsimile number and e-mail address); and
 - e) each project description shall identify whether the work was performed as the prime contractor or as a subcontractor. If a bidder performed as the prime contractor, the description must provide the originally scheduled completion date and budget, as well as the actual (or currently planned) completion date and actual (or currently planned) budget.

- ii. Contractor and subcontractor(s) experience must be listed separately. Narrative descriptions submitted for subcontractors must be specifically identified as subcontractor projects.
- iii. If the work was performed as a subcontractor, the narrative description shall identify the same information as requested for the contractors above. In addition, subcontractors shall identify what share of contract costs, project responsibilities, and time period were performed as a subcontractor.

i. SUMMARY OF BIDDER'S PROPOSED PERSONNEL/MANAGEMENT APPROACH

The bidder must present a detailed description of its proposed approach to the management of the project.

The bidder must identify the specific professionals who will work on the State's project if their company is awarded the contract resulting from this Request for Proposal. The names and titles of the team proposed for assignment to the State project shall be identified in full, with a description of the team leadership, interface and support functions, and reporting relationships. The primary work assigned to each person should also be identified.

A major factor in the success of the Project is the degree of collaboration between EES Contractor, EES IV&V Contractor and State of Nebraska staff. The EES Contractor is expected to work with stakeholders, management and subject matter experts throughout the business and technology enterprise when conducting the project activities and developing the work products and deliverables. The EES Contractor is expected to propose a project approach that incorporates the involvement of State of Nebraska business and technology staff in order to obtain information and feedback necessary to produce quality work products and deliverables.

The Bidder must provide resume(s) for the key personnel proposed for this project. The Bidder is required to demonstrate that their consultant(s) or employee(s) have the skills necessary to meet the objectives of this project as listed below. The named Key Personnel include:

Key Personnel	Recommended Qualifications
Project Manager	1. Minimum of five years of project management and account management experience for a government or private sector project of similar size and complexity. 2. Minimum of three (3) referenced projects of similar size and complexity. 3. Health care industry or health and human services implementation experience preferred.
Technical Architecture Lead	1. Minimum of five (5) years of web-based, solution design, development, implementation, and governance life cycle experience 2. Minimum of two (2) referenced projects of similar size and scope in which this role was performed.

Key Personnel	Recommended Qualifications
	3. Demonstrated experience with the proposed solution to design and develop an EES. 4. Health care industry or health and human services implementation experience preferred.
Test Lead	1. Must have at least three (3) years of experience coordinating, conducting and operating functional, system, acceptance and performance tests. 2. Minimum of two (2) referenced, web-based projects of similar size and scope in which this role was performed. 3. Health care industry or health and human services implementation experience (including a major health plan or claims processing environment) preferred.
Data Conversion Lead	1. At least three (3) years of experience with the conversion effort on other large-scale system implementation project. 2. Minimum of one (1) referenced data conversion project of similar size and scope in which this role was performed. 3. Health care industry or health and human services implementation experience (including a major health plan or claims processing environment) preferred.
Integration Lead	1. At least three (3) years of experience with the integration effort on other large-scale system implementation project. 2. Minimum of one (1) referenced integration project of similar size and scope in which this role was performed. 3. Health care industry or health and human services implementation experience (including a major health plan or claims processing environment) preferred.
Eligibility Policy SME (Part Time)	1. At least three (3) years of experience with eligibility determination for State-and federally assisted programs, specifically Medicaid, CHIP, or waiver populations. 2. At least three (3) years of experience with other covered State or federally assisted populations such as Medicaid, CHIP, waiver populations, etc. 3. Expert knowledge of PPACA, MITA, and other federal mandates

Resumes should not be longer than three (3) pages. The resumes must include:

- i. Educational qualifications;
- ii. Summary of employment experience;
- iii. Specific experience with the service areas for which they are being proposed;
- iv. Previous work assignments in a similar role for this type of engagement demonstrating ability to meet the objectives listed below:
 - a) Proven experience with Consulting, Project Administration and Technical Assistance for Commercial or State Government Eligibility Solutions for a period of at least two years within the last four years;

- b)** Experience in the design, development, testing, and implementation of Medicaid or Commercial eligibility system;
- c)** Government or public sector experience;
- d)** In-depth knowledge of ACA Regulations; and
- e)** Highly developed written and verbal communication skills.

In addition, at least three (3) references (name, address, and telephone number) who can attest to the competence and skill level of the individual.

The Bidder must describe policies, plans and intentions with regard to maintaining continuity of key personnel and the implementation team assigned to the project to avoid and minimize the impact of necessary staff changes. Any changes in proposed personnel shall only be implemented after written approval from the State of Nebraska.

The State of Nebraska will provide workspace, equipment and conference telephone capabilities to house the EES Contractor staff in Lincoln, NE. Additionally, the EES Contractor will be assigned State of Nebraska Document Repository capabilities for all EES Contractor project documents and deliverables.

In order to ensure the success of this project, it is important that there is a continuity of Key Staff assigned to the project. The Bidder's proposal must:

- i.** Describe policies, plans, and intentions with regard to maintaining continuity of personnel assignments throughout the performance of any agreement resulting from this RFP.
- ii.** Discuss the Bidder's plans to avoid and minimize the impact of personnel changes.
- iii.** Identify planned backup personnel assignments.
- iv.** Commit to using the personnel identified in the proposal and agree to the State of Nebraska's right to approve proposed personnel changes during the term of the contract.
- v.** Agree that the Bidder's proposed project personnel may not be reassigned, replaced, or added during the project without the prior written consent of the Department's Project Manager. Should a key staff position be vacated, the IV&V Contractor must give the Department resumes of and an opportunity to interview and approve, potential replacements for that employee.
- vi.** Agree that the Bidder's proposed key project personnel may not be assigned new or additional contract assignments outside the State of Nebraska contract, without the prior written consent of the Department Project Manager.
- vii.** Agree that the Department Project Manager reserves the right to require a change in the IV&V Contractor's project personnel at the Department Project Manager's discretion and that the Department must be given an opportunity to interview and approve potential replacements for that employee. However, the Department will not unreasonably exercise this option and will take reasonable steps to work with the IV&V Contractor toward a solution.

State of Nebraska Staffing

A risk to the success of any large project like the EES is inadequate staffing, either from the number of staff to the knowledge and experience. The State of Nebraska wants to ensure adequate staff is available for the EES Project. Bidders must detail the number of State of Nebraska staff by job title, with a description of the tasks associated with each title. The Bidder is required to estimate the hours and include State of Nebraska staff in the draft Work Plan.

The State of Nebraska will review the information provided and will endeavor to meet State staffing levels defined by the Bidder. The State of Nebraska, however is not agreeing to staff to the defined levels.

j. SUBCONTRACTORS

If the bidder intends to subcontract any part of its performance hereunder, the bidder must provide:

- i.** name, address and telephone number of the subcontractor(s);
- ii.** specific tasks for each subcontractor(s);
- iii.** percentage of performance hours intended for each subcontract; and
- iv.** total percentage of subcontractor(s) performance hours.

4. TECHNICAL APPROACH

The technical approach section of the Technical Proposal must consist of the following subsections:

- a.** Understanding of the project requirements;
- b.** Proposed development approach;
 - i.** Functional Requirements
 - ii.** Non-Functional Requirements
 - iii.** Requirements Traceability Matrices (RTM)
 - a)** Functional RTM – Appendix B
 - b)** Non-Functional RTM – Appendix C
 - c)** Requirements Gap Analysis - Appendix D
 - iv.** Project Planning and Management
 - v.** Business Process Reengineering
 - vi.** Organizational Change Management
 - vii.** Training
 - viii.** Knowledge Transfer
 - ix.** Reporting
 - x.** Documentation
 - xi.** Implementation
 - xii.** Post Implementation Support
 - xiii.** Turnover
- c.** Technical considerations;
- d.** Draft project work plan;
- e.** Milestones and Deliverables (Forms C-1, C-2, and C-3) and
- f.** Personnel Management and Planning.

B. COST PROPOSAL REQUIREMENTS

This section describes the requirements to be addressed by bidders in preparing the Cost Proposal (Forms D1, D-2, D-3, and D-4). The bidder must submit the Cost Proposal in a section of the proposal that is a separate section or is packaged separately as specified in this RFP from the Technical Proposal section.

The component costs of the fixed price proposal for providing the services set forth in the Request for Proposal must be provided by submitting forms substantially equivalent to those described below.

1. PRICING SUMMARY

This summary shall present the total fixed price to perform all of the requirements of the Request for Proposal. The bidder must include details in the Cost Proposal supporting any and all costs. These details must include, at a minimum, detailed descriptions and/or specifications of the goods and/or services to be provided, quantities, and timing and unit costs, if applicable.

The State reserves the right to review all aspects of the Cost Proposal for reasonableness and to request clarification of any proposal where the cost component shows significant and unsupported deviation from industry standards or in areas where detailed pricing is required.

2. PRICES

Prices quoted shall be net, including transportation and delivery charges fully prepaid by the bidder, F.O.B. destination named in the Request for Proposal. No additional charges will be allowed for packing, packages, or partial delivery costs. When an arithmetic error has been made in the extended total, the unit price will govern.

3. FIXED HOURLY RATES

The State of Nebraska believes that system maintenance and system changes are part of the responsibilities of operating the EES Solution. Some activities performed by Contractor staff will be considered system maintenance (e.g., operating system patching) and as such those activities are to be considered and budgeted as part of the annual fixed administrative fee.

The State of Nebraska expects the Contractor will also provide support for solution change projects. The Department requires the following pricing approach be used when addressing Change Management tasks and activities:

- a. The State of Nebraska requires the Contractor to support projects to change the system in each year of operations through the annual provision of 1000 hours of work performed by Change Management staff. The annual Change Management pricing and budgets must be developed in these schedules using this 1000 annual allotment of hours;
- b. The 1000 annual allotments of hours are to be used only for time the Change Management staff spend directly on State of Nebraska approved projects. All other Change Management staff time (e.g., vacation, sick leave, training, etc.) shall not be applied against this allotment of hours;
- c. Tracking and reporting of hours spent on individual system change projects by staff paid through the fixed administrative fees is mandatory. These hours are

to be considered in each system change project's estimated and expended hours.

- d. Time spent on State of Nebraska system change projects must also be included in each project's estimated and expended hours. Time spent by these staff resources working on a change project will be paid upon State of Nebraska-approved completion of that project based on the appropriate hourly rates; and
- e. If during the operations of the EES the State of Nebraska determines that the change workload and associated project deadlines necessitate additional Contractor staff resources, the State may develop a contract amendment to acquire the additional staff using the contracted hourly rates submitted in the Cost Proposal.

C. PAYMENT SCHEDULE

The payment schedule for the project is tied to specific dates and deliverables. Invoices may be submitted by the contractor on specific dates based on the completion and acceptance of related deliverables. No invoice will be approved unless the associated deliverables have been approved.

Form A

Bidder Contact Sheet

Request for Proposal Number 4544Z1

Form A should be completed and submitted with each response to this Request for Proposal. This is intended to provide the State with information on the bidder's name and address, and the specific person(s) who are responsible for preparation of the bidder's response.

Preparation of Response Contact Information	
Bidder Name:	
Bidder Address:	
Contact Person & Title:	
E-mail Address:	
Telephone Number (Office):	
Telephone Number (Cellular):	
Fax Number:	

Each bidder shall also designate a specific contact person who will be responsible for responding to the State if any clarifications of the bidder's response should become necessary. This will also be the person who the State contacts to set up a presentation/demonstration, if required.

Communication with the State Contact Information	
Bidder Name:	
Bidder Address:	
Contact Person & Title:	
E-mail Address:	
Telephone Number (Office):	
Telephone Number (Cellular):	
Fax Number:	

Form B

Notification of Intent to Bid

Request for Proposal Number 4544Z1

Bidder Name:	
Bidder Address:	
Contact Person:	
E-mail Address:	
Telephone Number:	
Fax Number:	

The "Notification of Intent to Bid" form should be submitted to the State Purchasing Bureau via e-mail (matpurch.dasmat@nebraska.gov), facsimile (402-471-2089), hand delivered or US Mail by the date shown in the Schedule of Events.

Form C

Milestones & Deliverables

Request for Proposal Number 4544Z1

Bidders are required to complete all forms provided in this section. Forms C-1, C-2 and C-3 are to be included as part of the Technical Proposal. Bidders are cautioned not to enter dollar amounts in these forms.

The State of Nebraska recognizes that Bidders may have different methodologies or Best Practices to deliver a large project like the EES. The State of Nebraska wishes to allow each potential Bidder to bring its industry-best-practice system development methodologies and tailor them to the State's needs.

To encourage this, the State of Nebraska has defined a list of minimum EES milestones and deliverables. The purpose of Forms C-1, C-2 and C-3 is to collect the Bidder's defined milestones and deliverables, the scheduled delivery of the milestones and deliverables and finally to understand the percentage of the fixed price contract required to deliver the milestones and deliverables.

Form C-1: Nebraska Milestones & Deliverables

Form C-2: Milestones and Deliverables Mapping and Schedule

Form C-3: Milestones & Deliverables Payment Percentage

Form C-1 Nebraska Milestones & Deliverables

Request for Proposal Number 4544Z1

This form lists the minimum set of project Milestones & Deliverables, identified by the State of Nebraska that the Bidder must address in their proposed Milestones & Deliverables (Form C-2).

Bidders are required to validate that each Nebraska identified Milestone or Deliverable is mapped to one or more of the Bidder's defined deliverables in Form C-2 Milestones and Deliverables Mapping and Schedule by adding a check mark in the confirmation column.

Form C-1		
Number	Nebraska Milestone/Deliverable	Confirmation
Example	Project Management Services (Weekly/Monthly Project Status Meetings, Weekly/Monthly Status Written Reports, CMS Gate Reviews, etc.)	✓
1.	Project Management Services (Weekly/Monthly Project Status Meetings, Weekly/Monthly Status Written Reports, CMS Gate Reviews, etc.)	
2.	Project Management Plan	
3.	Project Schedule	
4.	Scope Management Plan	
5.	Requirements Management & Traceability Plan	
6.	Issue Resolution Plan	
7.	Risk Management Plan	
8.	Configuration Management Plan	
9.	Performance Management Plan	
10.	Communications Management Plan

Form C-3 Milestones & Deliverables Payment Percentage

Request for Proposal Number 4544Z1

The Bidder should enter the percent (%) of the Fixed Price for the payment of the milestones below. Bidders are cautioned not to include any cost data in their Technical Proposal.

Form C-3	
Key Payment Milestones	% Of Payment Upon Successful Completion
Example: Project Kick-off	5%
Example: Phase 1	5%
	% To Be Proposed by Bidder
	% To Be Proposed by Bidder
	% To Be Proposed by Bidder
	% To Be Proposed by Bidder
	% To Be Proposed by Bidder
	% To Be Proposed by Bidder
	% To Be Proposed by Bidder

Form D

Cost Proposal Forms

Request for Proposal Number 4544Z1

Bidders are required to complete all forms provided in this section. Forms D-1, D-2, D-3 and D-4 make up the Cost Proposal. Bidders are cautioned not to include any cost data in their Technical Proposal.

Total Cost and Fixed Price Summary

The Bidder must provide an overview of the Cost Proposal that describes any pricing approaches, discounts, and reasons why the Bidder's combined technical and cost approach is the best value to the State of Nebraska. Bidders must provide their methodology and financial breakdown of how they arrived at their costs.

The Cost Proposal Sheet(s) must include the Bidder's Name and be completed per the request for RFP instructions. The RFP Cost Proposal Sheet must be submitted in a separately sealed package.

Form D-1: Fixed Price by Deliverable

Form D-2: Post Implementation Support

Form D-3: Total Cost and Fixed Price Summary Response

Form D-4: Value Added Options

As noted in the RFP, the State of Nebraska, at its option, may request a "Best and Final Offer."

Form D-1: Fixed Price by Deliverable

Request for Proposal Number 4544Z1

The Bidder must submit the fixed price of each Milestone and Deliverable defined in Form C-2. The following instructions define the content for the columns.

Bidder Milestone/Deliverable: Use the Bidder defined Milestone/Deliverable from Form C-2 Milestones & Deliverables Schedule.

Labor: Define the fixed price for the staff assigned to each Bidder defined Phase. Bidders must submit a Total Cost that includes all tasks, activities and deliverables defined in the RFP and supplied on the embedded spreadsheet. The cost for each category must be complete and include all expenses, including travel, per diem and out-of-pocket expenses as well as administrative and/or overhead expenses.

Hardware: For those deliverables that require hardware, the Bidder must list the itemized costs associated with providing the required hardware specifying the required cache servers, web servers, application servers, database servers, and all other associated devices. Bidder must include all environments included in the RFP but not limited to Sandbox, Configuration/Development, Test, Quality Assurance, Productions, Training and Disaster Recovery environments to be used to develop, maintain, and operate the solution, including the details on the process of code promotion.

Base Software: For those deliverables that require system software all third-party products (middleware, database management software, operating system software, compilers, job schedulers, security-related packages, etc.) required to successfully install and operate the proposed EES must be identified, describing the cost, quantities, release levels, etc. of each of these products.

EES License: The Bidder must provide the licensing cost for each individual application module and third-party tool included as part of the proposed software solution. Software components that are necessary to operate and maintain the proposed COTS software system, or COTS components, must be included. The costs for each item are to be quoted separately unless bundled pricing is offered. If licenses are associated with the Bidder's proposed environments then the Bidder must include all environments included in the RFP but not limited to Sandbox, Configuration/Development, Test, Quality Assurance, Productions, Training and Disaster Recovery environments to be used to develop, maintain, and operate the EES, including the details on the process of code promotion.

Other: Bidders may include other cost but the items must be defined and pertain to the EES list of milestones and deliverables define in Form C-2.

Bidder Name:							
D-1 Fixed Price by Deliverable							
Bidder Milestone/Deliverable	Date	Labor	Hardware	Base Software	EES License	Other	
<i>Example 1: Project Management Plan</i>	<i>Month 1</i>	<enter amount>					
<i>Example 2: Project Management Plan</i>	<i>1/31/2014</i>	<enter amount>					
Other:	Enter an description or explanation of Other.						

Form D-2: Post Implementation Support

Request for Proposal Number 4544Z1

Bidders must submit fixed pricing for the ongoing costs associated with the support, maintenance, and hosting of the EES after the production system is brought on-line and stabilized. The bidder must provide the annual fees related to ongoing support, maintenance, and hosting of the system, including but not limited to staffing for maintenance and support, software maintenance and support, hardware maintenance and support and software licensing maintenance and support, as well as any discounts offered.

Bidder Name:			
D.2 Post Implementation Support			
Year	Warranty	M&O	Hosting & Disaster Recovery
2014			
2015			
2016		<enter amount>	<enter amount>
2017			
2018			
2019			
2020	<enter amount>		
2021			
2022			
2023			

Form D-3: Total Cost and Fixed Price Summary Response

Request for Proposal Number 4544Z1

The content of the Total Cost and Fixed Price Summary Response must be the Bidder's total cost charged to the State of Nebraska for all products and services during the respective year for the entire EES in the Bidder's proposal. The costs for years 2014-2019 represent the per year costs to State of Nebraska for the initial RFP. The following years of 2020-2023 represent the optional renewals at the discretion of the State of Nebraska for the Bidder continuing to be renewed to support the EES.

Bidder Name:			
D-3 Total Cost and Fixed Price Summary			
Year	Total Cost	Fixed Price for RFP	
2014	<Enter Amount>		
2015	<Enter Amount>		
2016	<Enter Amount>		
2017	<Enter Amount>		
2018	<Enter Amount>		
2019	<Enter Amount>		<Enter Amount>
2020	<Enter Amount>		
2021	<Enter Amount>		<Enter Amount>
2022	<Enter Amount>		
2023	<Enter Amount>	<Enter Amount>	

Form D-4: Value Added Options

Request for Proposal Number 4544Z1

The Value Added Options will not be evaluated to determine the EES Contractor; however the State of Nebraska may determine to contract for an option after the Contractor selection has been made.

Bidders must submit the fixed price for each Value Added Option identified in the Technical Proposal.

Value Added Option: Enter the Bidder defined Value Added Option Name identified and described in the Technical Proposal.

Schedule: Enter the date proposed by the Bidder to realize the maximum benefit of the Value Added Option.

Cost: Enter the fixed price for the Value Added Option.

Bidder Name:		
D-4 Value Added Options		
Value Added Option	Schedule	Cost
	<i><enter date></i>	<i><enter amount></i>

Appendix B

Functional Requirements Traceability Matrix

Request for Proposal Number 4544Z1

The Functional Requirements Traceability Matrix (RTM) is used to document and track the project requirements from the proposal through to testing to verify that the requirement has been completely fulfilled. The Contractor will be responsible for maintaining the set of Baseline Requirements directly related to the configuration of the EES. Additions, modifications, and deletions to these requirements will be added and modified throughout the project so it is imperative that a current version of the matrix be maintained at all times.

Bidders must provide an initial RTM as part of its proposal. The RTM shall follow the instructions below. **The Bidder must state requirements exactly as they are provided in this RFP.** The Bidder must indicate how it will achieve full compliance (i.e., requirement fulfilled 100%). Any requirements that the Bidder cannot attest to full compliance must be documented as outlined in Appendix D: Gap Analysis.

Bidders are required to provide a response, using the appropriate codes provided in the tables below, for each requirements listed in the Functional Requirements Response Matrix. Scoring for each requirement will directly relate to the ability code indicated by the bidder.

Ability Code	Condition	Description
S	Standard Function	The proposed EES fully satisfies the requirement as stated. The Bidder must describe how the requirement is satisfied by the EES.
W	Workflow or System Configuration Required	Current functionality of the proposed EES exists in the EES and can be modified by a system administrator to meet this requirement.
M	Modification Required	The proposed EES requires a modification to existing functionality to meet this requirement which requires a source code modification. The EES will be modified to satisfy the requirements as stated or in a different format. The Bidder must describe the modifications.
F	Planned for Future Release	This functionality is planned for a future release. The Bidder must describe how the requirement will be satisfied by the EES and when the release will be available.
C	Custom Design and Development	The proposed EES requires new functionality to meet this requirement which requires a source code addition. The Bidder must describe the feature and its value.
N	Cannot Meet Requirement	The proposed EES will not satisfy the requirement. The Bidder must explain why the requirement cannot be satisfied.
O	Other Software	If the requirement is to be satisfied through the use of a separate software package(s), the Bidder must identify those package(s) and describe how the functionality is integrated into the base system.

Appendix C

Non-Functional Requirements Traceability Matrix

Request for Proposal Number 4544Z1

The Non-Functional Requirements Traceability Matrix (RTM) is used to document and track the project requirements from the proposal through to testing to verify that the requirement has been completely fulfilled. The Contractor will be responsible for maintaining the set of Baseline Requirements directly related to the configuration of the EES. Additions, modifications, and deletions to these requirements will be added and modified throughout the project so it is imperative that a current version of the matrix be maintained at all times.

Bidders must provide an initial RTM as part of its proposal. The RTM shall follow the instructions below. **The Bidder must state requirements exactly as they are provided in this RFP.** The Bidder must indicate how it will achieve full compliance (i.e., requirement fulfilled 100%). Any requirements that the Bidder cannot attest to full compliance must be documented as outlined in Appendix D: Gap Analysis.

Bidders are required to provide a response, using the appropriate codes provided in the tables below, for each requirements listed in the Functional Requirements Response Matrix. Scoring for each requirement will directly relate to the ability code indicated by the Bidder.

Ability Code	Condition	Description
S	Standard Function	The proposed EES fully satisfies the requirement as stated. The Bidder must describe how the requirement is satisfied by the EES.
W	Workflow or System Configuration Required	Current functionality of the proposed EES exists in the EES and can be modified by a system administrator to meet this requirement.
M	Modification Required	The proposed EES requires a modification to existing functionality to meet this requirement which requires a source code modification. The EES will be modified to satisfy the requirements as stated or in a different format. The Bidder must describe the modifications.
F	Planned for Future Release	This functionality is planned for a future release. The Bidder must describe how the requirement will be satisfied by the EES and when the release will be available.
C	Custom Design and Development	The proposed EES requires new functionality to meet this requirement which requires a source code addition. The Bidder must describe the feature and its value.
N	Cannot Meet Requirement	The proposed EES will not satisfy the requirement. The Bidder must describe why the requirement cannot be satisfied.
O	Other Software	If the requirement is to be satisfied through the use of a separate software package(s), the Bidder must identify those package(s) and describe how the functionality is integrated into the base system.

Appendix D

Requirements Gap Analysis

Request for Proposal Number 4544Z1

Any requirements that the Bidder cannot attest to full compliance; i.e., provides a value of “N” in the Compliant field of the Appendix B Functional Requirements Traceability Matrix or Appendix C Non-Functional Requirements Traceability Matrix, must document the requirement gap as outlined in this Appendix. The Bidder must ensure that the Gap Analysis Matrix contains an entry for each requirement where one or more of these conditions are true:

1. The Bidder has indicated “N” to Compliant in either RTM
2. The Bidder has indicated “M”, “F”, “C” or “O” to Availability in either RTM
3. The Bidder has indicated that an extensive integration effort of more than 2,500 hours will be needed to meet the requirement as documented in the Key Features of the EES description in the RTM.

For each requirement gap, the Bidder must follow the instructions in this Appendix. The Bidder must copy, exactly, the Identifier, Requirement Description, and Availability from the RTM to ensure linkage between the RTM and the Requirement Gap Analysis Matrix.

The Bidder must provide an assessment of the requirement gap, including an estimate of its impact or severity if not compliant, and the steps necessary to close the gap and achieve full compliance. For system and/or product features that will support the requirement and close the gap, the Bidder must also provide an estimated date when the capability will be available as part of the Bidder’s baseline capability.

Bidders are required to use the following Gap Analysis instructions:

Column Description	Bidder Responsibility
Identifier	The unique identifier of the requirement which does not have a compliant solution according to the criteria established in either Appendix B Functional Requirements Traceability Matrix or Appendix C Non-Functional Requirements Traceability Matrix. Copy the requirement identifier from the applicable RTM.
Requirement Description	Copy the requirement description from the applicable RTM for the requirement identified above.
Availability	Copy from the RTM for the requirement identified above.
Impact/Severity (Product development or integration effort to fulfill the requirement)	High (H) = >2500 hours Medium (M) =>1000 hours to <2500 hours Low (L) =<1000 hours
Gap Analysis	Description and analysis of gap as provided by the Bidder.
Recommendation for Closure	Recommended steps provided by the Bidder to close the gap and achieve full compliance with the State of Nebraska’s requirement.
Date Available	Date to be published or released.

Form C-1 Milestones and Deliverables

Request for Proposal Number 4544Z1

This form lists the minimum set of project Milestones & Deliverables, identified by the State of Nebraska that the Bidder must address in their proposed Milestones & Deliverables (Form C-2).

Bidders are required to validate that each Nebraska identified Milestone or Deliverable is mapped to one or more of the Bidder's defined deliverables in Form C-2 Milestones and Deliverables Mapping and Schedule by adding a check mark in the confirmation column.

Bidder Name:

Form D-1: Fixed Price by Deliverable

Request for Proposal Number 4544Z1

The Bidder must submit the fixed price of each Milestone and Deliverable defined in Form C-2. The following instructions define the content for the columns.

Bidder Milestone/Deliverable: Use the Bidder defined Milestone/Deliverable from Form C-2 Milestones & Deliverables Schedule.

Labor: Define the fixed price for the staff assigned to each Bidder defined Phase. Bidders must submit a Total Cost that includes all tasks, activities and deliverables defined in the RFP and supplied on the embedded spreadsheet. The cost for each category must be complete and include all expenses, including travel, per diem and out-of-pocket expenses as well as administrative and/or overhead expenses.

Hardware: For those deliverables that require hardware, the Bidder must list the itemized costs associated with providing the required hardware specifying the required cache servers, web servers, application servers, database servers, and all other associated devices. Bidder must include all environments included in the RFP but not limited to Sandbox, Configuration/Development, Test, Quality Assurance, Productions, Training and Disaster Recovery environments to be used to develop, maintain, and operate the solution, including the details on the process of code promotion.

Base Software: For those deliverables that require system software all third-party products (middleware, database management software, operating system software, compilers, job schedulers, security-related packages, etc.) required to successfully install and operate the proposed EES must be identified, describing the cost, quantities, release levels, etc. of each of these products.

EES License: The Bidder must provide the licensing cost for each individual application module and third-party tool included as part of the proposed software solution. Software components that are necessary to operate and maintain the proposed COTS software system, or COTS components, must be included. The costs for each item are to be quoted separately unless bundled pricing is offered. If licenses are associated with the Bidder's proposed environments then the Bidder must include all environments included in the RFP but not limited to Sandbox, Configuration/Development, Test, Quality Assurance, Productions, Training and Disaster Recovery environments to be used to develop, maintain, and operate the EES, including the details on the process of code promotion.

Other: Bidders may include other cost but the items must be defined and pertain to the EES list of milestones and deliverables define in Form C-2.

Nebraska EES Analysis
EES IV&V RFP

Medicaid Eligibility and Enrollment System

Request for Proposal Number 4544Z1

There are two existing systems that Nebraska will be modifying for ACA compliance.

Nebraska's current functional environment is called ACCESSNebraska. ACCESSNebraska provides service delivery for Nebraska Medicaid and the Economic Assistance Programs (Temporary Assistance for Needy Families (TANF), Supplemental Nutrition Assistance Program (SNAP), Low Income Home Energy Assistance Program (LIHEAP) and several smaller programs. The environment contains the following components:

1. Web site
2. Customer Service Centers
3. Local Offices
4. Universal and Assigned Case Management model
5. Functional Case Management Assignments
6. Document Imaging

The web site ACCESSNebraska.ne.gov contains the following: Do I Qualify? (screening tool), Application, Change Reporting, Benefit Accounts, Submit Documents and information on Community Partners, Local Offices, etc. The Benefit Accounts contains information on benefit eligibility and copies of correspondence sent to the account holder. The accounts require a PIN authentication process and security questions to set up.

ACCESSNebraska has four (4) Customer Service Centers with a total of 400 staff. The Customer Service Centers utilize a single 800 telephone number for access with local calling available in Lincoln. With ACA implementation, a new phone number is being set up for Medicaid. Two of the Customer Service Centers will begin taking these calls for a total of 150 staff. The phone system utilizes an Integrated Voice Response System that retrieves customer data from N-FOCUS and is available 24 hours a day, seven days a week. The system is connected to an Automated Call Distribution System which directs callers to specific routing with case managers who have knowledge and expertise to answer the question. The system utilizes Call Quality Recording and Monitoring (CQRM) to store data. The voice signature will be stored as a part of this. It is currently envisioned that a staff member will take the application over the telephone. Eventually the application process will be moved to the IVR with the data transmitted to the new EES. The system is managed utilizing Contact Center Manager software that allows for reporting.

Nebraska has local offices throughout the state where customers can walk in. The local offices accept applications, conduct interviews, determine eligibility and have kiosks available for customers to utilize the web site and contact the Customer Service Center.

ACCESSNebraska utilizes a Universal Case Management system for most of its case management. In the Universal Case Management System, work tasks are created for staff to act on the cases as the need arises. Work is prioritized inside the work queues. Work queues in use include: Document Imaging, Application Management, Interviewing, Eligibility Processing, and Change Management. Some cases are assigned to a case manager and processed with the single case manager completing all case actions.

Staff is assigned to work out of queues according to functions. Staff complete all tasks for the function assigned. Staff is also divided into Service Delivery Groups known as adult and family. With ACA implementation, staff will now be divided by MAGI, Non-MAGI and Combined. Combined is a case with both MAGI and Non-MAGI eligible people.

The system is supported by two Document Imaging Centers. These centers contain two high speed IBML scanners that scan documents. In addition, documents can be moved electronically to be stored in the system. All documents are indexed by person and category. Local offices have Canon Scanners to scan documents received locally. The Document Imaging System is integrated and viewable through N-FOCUS.

MMIS Existing Infrastructure

Request for Proposal Number 4544Z1

The foundation of the current MMIS technical architecture was developed in 1973. The current MMIS has been fully operational since 1978 and became HIPAA compliant in October 2003. The MMIS consists of batch and online CICS mainframe components and a front-end HIPAA compliant Sybase Translator.

The Nebraska MMIS currently consists of the following 16 subsystems:

1. Data Management – The Nebraska DHHS currently contracts with Truven Health Analytics for data management, housing ten years of Medicaid claims and provider and client information used to facilitate management reporting, including the Management & Administrative Reporting Subsystem (MARS), the Surveillance and Utilization Review Subsystem (SURS) and the Medicaid Statistical Information System (MSIS) reporting.
2. Drug Claims Processing – The Nebraska DHHS currently contracts with Magellan Medicaid Administration (MMA) for drug claims receipt and adjudication. MMA's Point of Service (POS) system supports the National Council for Prescription Drug Programs standards, including currently D.0 and 1.1 (batch) formats. The POS sends processed pharmacy claims to the State's MMIS on a daily basis, where the claims are passed into the MMIS weekly payment cycle for final adjudication, payment, and reporting.
3. Management & Administrative Reporting Subsystem (MARS) – Provides system generated reports. The Nebraska DHHS also contracts with Truven Health Analytics to provide management information.
4. Medicaid Drug Rebate (MDR) – A PC-based extract from MMIS claims history to prepare quarterly invoices for drug rebates from manufacturers.
5. Medical Claims Processing (MCP) – Edits claims and calculates reimbursement amounts.
6. Medical Non-Federal (MNF) – Ensures that Title XIX Federal matching funds are not used to pay for health care services otherwise available through Title XVIII (Medicare) funding.
7. Medical Provider Subsystem (MPS) – Maintains demographic, eligibility, and licensing data for all enrolled Medicaid providers.
8. Nebraska Aging Management Information System (NAMIS II) – This application supports the activities of the State Unit on Aging. It was developed to enter, edit, monitor, and report services provided by Area Agencies on Aging in Nebraska, track services required by the U.S. Administration on Aging (AoA), and to compile information required by the AoA for NAPIS, the National Aging Program Information System. It is also used to manage programs, track costs in certain services, track program usage, and analyze client demographics.
9. Nebraska Disability Program (NDP) – Accounts for the separate funding of health care services for disabled persons who do not meet the SSI disability duration requirements but are eligible for the same medical services as Medicaid.
10. Nebraska Managed Care System (NMC) – Provides plan and PCP enrollment of Medicaid clients into managed care, and documentation of communications between the client, the enrollment broker, and the managed care plans. The NMC offers basic case management functionality.

11. Nebraska Medicaid Eligibility System (NMES) – An automated voice response system used to verify client Medicaid or managed care eligibility for Nebraska Medicaid. The current Interactive Voice Response Unit also supports the Nebraska's Child Support system, known as Children Have A Right To Support (CHARTS), which serves as Nebraska's statewide Child Support Enforcement (CSE) system.
12. Recipient File Subsystem (RFS) – Uses and maintains Medicaid client eligibility data obtained from N-FOCUS.
13. Reference File Subsystem (RSS) – A database containing various reference information that includes but is not limited to, procedure, diagnosis and drug codes, and fee schedules.
14. Screening Eligible Children (SEC) – Facilitates comprehensive, preventative health care and early detection and treatment of health problems in Medicaid eligible children.
15. Surveillance and Utilization Review Subsystem (SURS) – Provides system generated reports. MLTC also contracts with Truven Health Analytics for reports and tools to support the investigation of potential provider fraud, abuse, or misuse.
16. Third Party Liability (TPL) – Stores information on Medicaid clients with private insurance; contains edits and produces reports for coordination of benefits and recovery.

Current System

Current System Overview

- ◆ Current solution is comprised of two primary components
 - ◆ N-FOCUS and ACCESSNebraska

- ◆ Nebraska Family Online Client User System (N-FOCUS)
 - ◆ Integrated service delivery and case management system
 - ◆ Supports over 30 programs overseen by the Nebraska Department of Health and Human Services (DHHS)
 - ◆ Functions include client/case intake, eligibility determination, case management, service authorization, benefit payments, claims processing and payment, provider contract management, and government and management reporting.
 - ◆ Supports Medicaid Eligibility, as well as other programs such as SNAP and TANF
 - ◆ Statewide Automated Child Welfare Information System (SACWIS)
 - ◆ Interfaces with Medicaid Management Information System (MMIS)

Current System Overview

- ◆ ACCESSNebraska
 - ◆ Public facing web front-end
 - ◆ Provides the public a means to apply on-line for public aid
 - ◆ Supports subset of programs in N-FOCUS
 - ◆ Umbrella Application which includes the following functions:
 - ◇ Screening – survey that assists applicants in understanding their potential eligibility
 - ◇ E-App – electronic application for benefits
 - ◇ Change Reporting – update name, address other demographic data
 - ◇ Inquiry – check status of benefits
 - ◆ Call Centers
 - ◇ Operate in conjunction with the AccessNebraska system
 - ◇ Four centers located across the state
 - ◇ Functions include conducting interviews, taking customer changes, and providing information and referral services via the telephone

Current System Architecture

◆ N-FOCUS

- ◆ Highly integrated client/server application built in 1996

- ◆ On-line system

- ◆ Client

- ◆ Windows 7/XP

- ◆ developed using CA Gen and AION to generate windows and C code

- ◆ some custom developed C code

- ◆ External Call Interface (ECI) used to connect to server components

- ◆ 475 windows, 490 +client procedures

- ◆ Server components

- ◆ Z/OS

- ◆ CICS transactions

- ◆ CA Gen generated and in house developed COBOL

- ◆ 470 server procedures

- ◆ AION

- ◆ Supports complex eligibility data gathering

- ◆ Automated determination and noticing processes

Current System Architecture

- ◆ N-FOCUS On-line System (continued)
 - ◇ Web components
 - ◇ Java Server Faces and Facelets developed using Eclipse IDE
 - ◇ Tomcat WAS on Linux

- ◆ Batch System
 - ◇ Z/OS COBOL
 - ◇ 700+ procedures, 640+ programs, 220+ stored procedures
 - ◇ Crystal Reports
 - ◇ 540+ reports distributed via Business Objects Enterprise

- ◆ Database
 - ◇ Z/OS based DB2 database
 - ◇ 500+ tables, 550+ table relationships, 935 indexes, 8700+ attributes
 - ◇ Over 1.3 billion rows, largest table exceeds 200 million rows

Current System Architecture

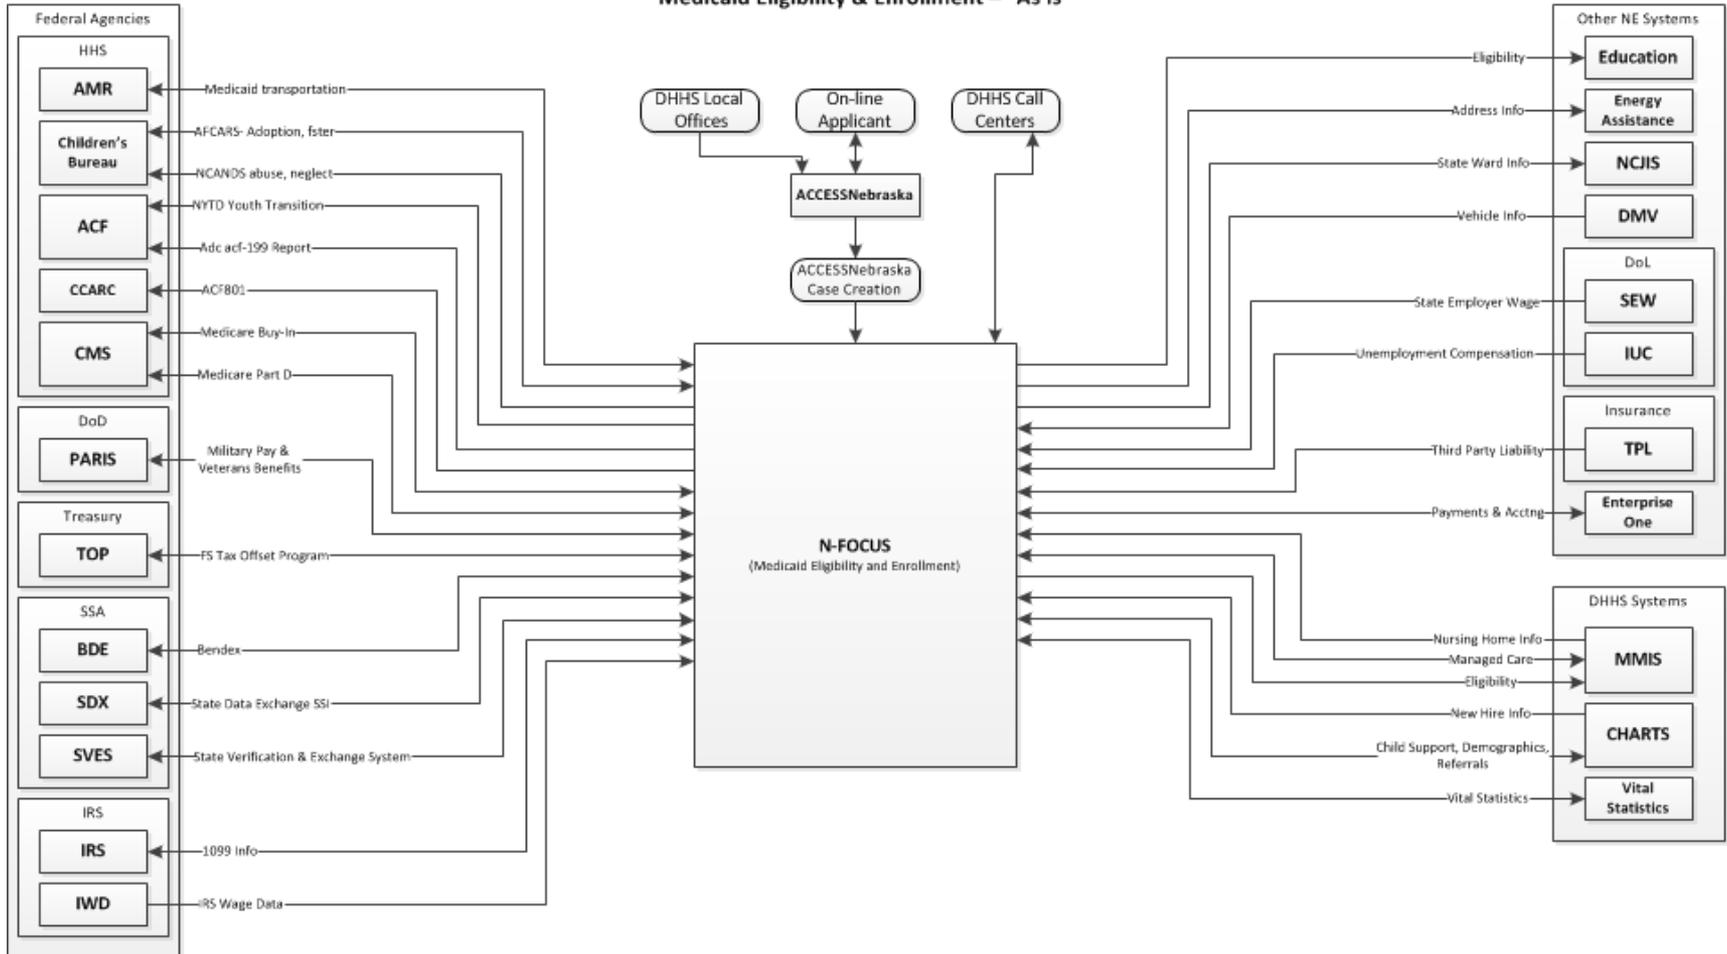

- ◆ ACCESSNebraska
 - ◆ Established in 2008
 - ◆ Web-Based Java application
 - ◆ Utilizes SQL server for temporary data and DB2 for long terms storage
 - ◆ Call Center Telephony Components
 - ◇ Interactive Voice Response System (IVR)
 - ◇ Automated Call Distribution (ACD)
 - ◇ Dashboard Client – provide CTI capabilities
 - ◇ Contact Recording and Quality Monitoring (CRQM) – provides call recording and playback capabilities
 - ◇ Dashboard Manager Shortcut – provides ability to review call statistics in real time

- ◆ N-FOCUS and ACCESSNebraska are not currently integrated electronically, therefore information is manually re-entered into N-FOCUS to initiate the eligibility process.

Current System

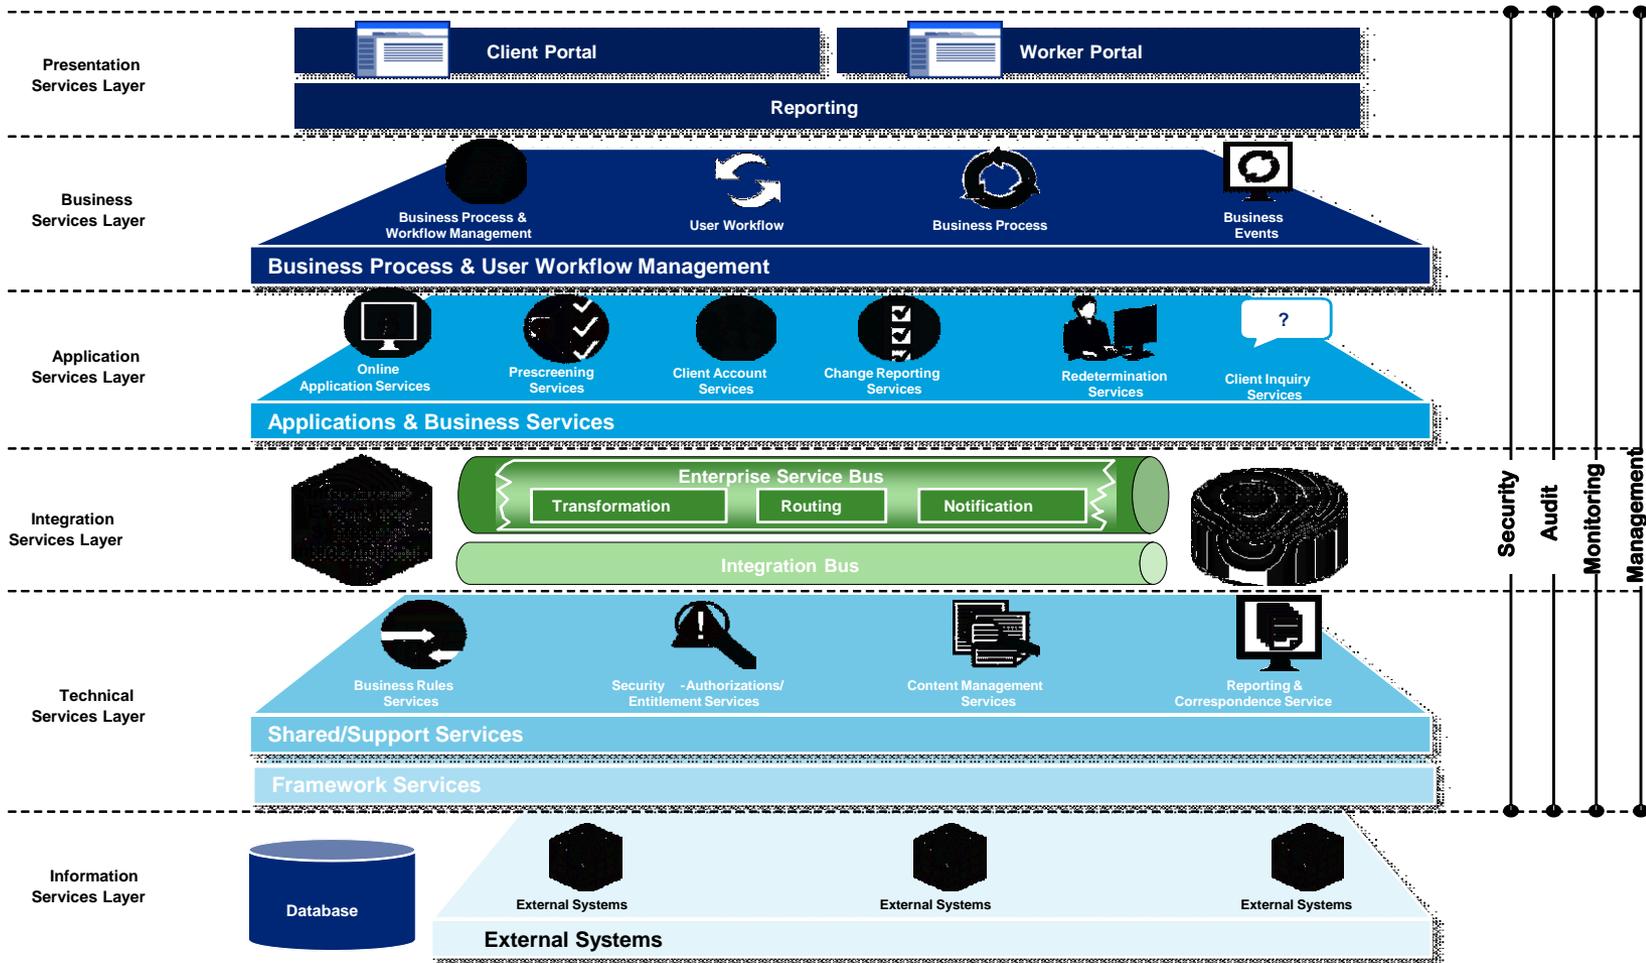

Medicaid Eligibility & Enrollment – “As Is”

Proposed System

Proposed System Conceptual Architecture

Proposed System Conceptual Architecture

Presentation Layer includes:

- User Interface(s)
 - Lightweight
 - Role based
 - Access Method based
- Data Entry validation
 - Complete
 - Type
 - Logical
- Help screens/prompts
- Standards compliant

Business Functions/Processes:

- Predefined Business processes/workflows like:
 - Eligibility
 - Enrollment
 - Plan Selection
 - Change of Circumstances
 - Renewal
- Configurable through external rules and/or business process/workflow definitions

Business Services:

- Predefined services used to construct Business Functions:
 - Determine Medicaid Eligibility
 - Conduct Verification
 - Verify Citizenship
 - Determine MAGI Eligibility
 - Calculate MAGI
 - Transfer Account
 - Check Exchange Enrollment
- Configurable through external rules

Data & Database Management includes:

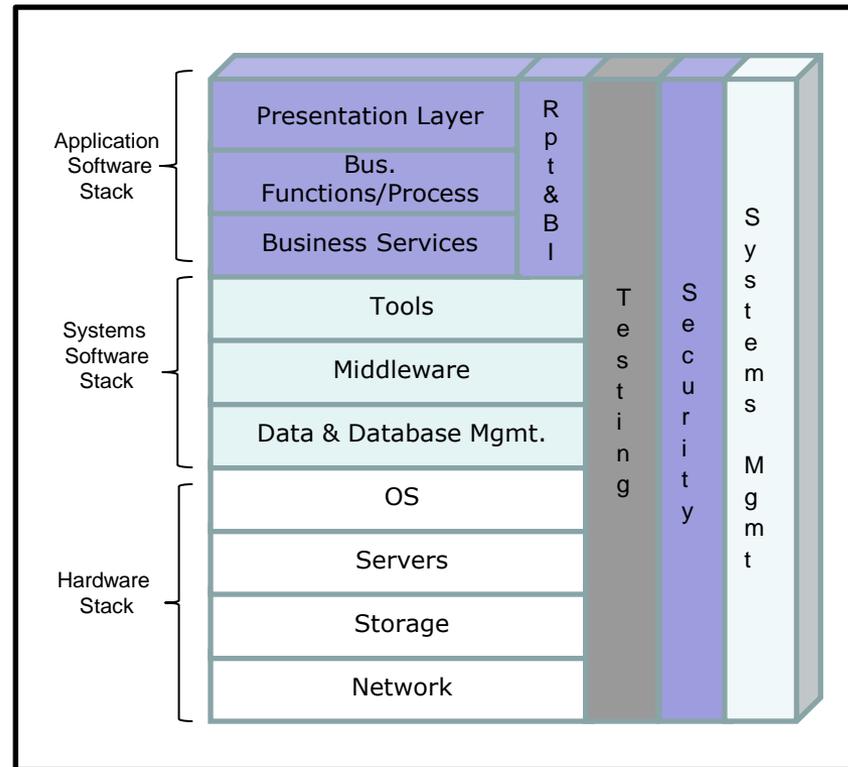

- Enterprise Content Management (ECM)
- Document Management & Imaging (DM)
- Extraction, Transformation, Load (ETL)
- Data Conversion
- Data Migration & Transfer
- Data Quality (DQ)
- Database Management Software (DBMS)
- Database Management & Monitoring
- Database Backup & Recovery
- Data Archival & Retrieval

Middleware includes:

- Business Process Management/Workflow (BPM/WF)
- Business Rules Management/Rules Engine (BRM/RE)
- Enterprise Service Bus/Message Broker (ESB/MB)
- Enterprise Application Integration (EAI)
- Electronic Data Integration (EDI)
- Web Application Server (WAS)
- Web Server (WS)
- Interactive Voice Response System (IVR)
- Computer Telephony Integration (CTI)

Tools includes:

- Integrated Development Environment (IDE)
- Source code control (check in/out, versioning, etc)
- Debuggers
- Report Development and Generation
- Ad-hoc Query & Reporting
- On-line Analytical Processing (OLAP, ROLAP, MOLAP, OOLAP)
- Data Mining

Systems Management includes:

- Performance Monitoring & Reporting
- Business Activity Monitoring (BAM)
- Workload/Job Scheduling
- System Backup & Recovery
- Configuration Management
- Release Management
- Change Management
- Event/Incident Management
- Problem Management
- Capacity Management
- Financial Management/Cost Allocation

Security includes:

- Identity Management
 - Authentication
 - Authorization
 - Access Control
 - Single Sign-On (SSO)
- Non-Repudiation
- Auditability
- Data Integrity
- Data Protection & Confidentiality
- Encryption (static and in motion)
- Intrusion Detection System (IDS)
- Firewalls
- Virus and Malware Detection

Testing includes:

- Test Management
- Functional/Regression Test
- Load & Performance Test
- Test Case Development
- Test Data Generator
- Capture & Playback
- Web App/UI
- Standards Compliance

N-FOCUS Interfaces

Interface Name	Incoming / Outgoing / Both	Recipient / Sender	Frequency	Transfer	Function
ADC ACF-199 Reporting	Both	Administration of Children and Families (ACF), Federal	Quarterly	Connect/Direct	ADC ACF-199 federal reports.
Child Care ACF-801 Reporting	Outgoing	Child Care Automation Resource Center (CCARC), Federal	Monthly	Connect/Direct	Child Care ACF-801 federal report.
Child Support (CHARTS)	Both	CHARTS State Application	Daily	State Mainframe File	Child Support data interface including eligibility, demographic, referral information. CHARTS also directly accesses some N-FOCUS table information.
Child Welfare AFCARS Reporting	Both	HHS Children's Bureau, Federal	Semiannual	Tibco Managed File Transfer (formerly named Cyberfusion)	Child Welfare AFCARS adoption and foster care information; incoming files are not automatically processed.
Child Welfare CONNECT	Outgoing	CONNECT State Application	Weekly	Invoked DB2 Stored Procedure	EDN and CAPTA referrals.
Child Welfare Court (JUSTICE)	Outgoing	JUSTICE State Application	Daily	FTP	Child Welfare state ward information for county courts.
Child Welfare Criminal Justice (NCJIS)	Outgoing	NCJIS State Application	Hourly, Daily	Hourly: invoked DB2 stored procedure; daily FTP	Child Welfare Nebraska Crime Commission information for state wards and law enforcement.
Child Welfare NCANDS Reporting	Outgoing	HHS Children's Bureau, Federal	Annual	Upload to NCANDS Portal	Child Welfare NCANDS (National Child Abuse and Neglect Data System) information.
Child Welfare Project Impact	Outgoing	Project Impact - Juvenile Accountability Impact Block Grant (Omaha)	Monthly	SFTP	Child Welfare Project Impact state ward information.
Child Welfare Quality Assurance	Outgoing	Child Welfare Quality Assurance State Application	Monthly	State Mainframe File	Child Welfare case information.
Debit Card (Reliacard)	Both	US Bank	Daily	Connect/Direct	Electronic payment debit card information.
Developmental Disabilities Therap	Outgoing	Therap vendor	Daily	SFTP	Client eligibility information. Future phases in 2012 will include Provider information as well as incoming service authorization/claim information.
Education	Outgoing	Department of Education, State	Daily	FTP	Client eligibility information.
Energy Assistance	Outgoing	Energy Assistance State Application	Monthly	Direct Data Access	Energy Assistance directly accesses N-FOCUS address information. LIHEAP is scheduled to be incorporated into N-FOCUS July 2012.
Enterprise One (NIS)	Both	Enterprise One (NIS) State Application	Daily	FTP	Payment and accounting information for clients and providers.
Interactive Voice Response (IVR)	Both	HHS Voice Response Unit	Real Time	Invoked DB2 Stored Procedure	Client and provider eligibility information.
IRS 1099	Both	Internal Revenue Service, Federal	Monthly	Axway Secure Transport (formerly named Tumbleweed)	IRS 1099 information.
Labor Employment	Incoming	State Department of Labor	Daily	State Mainframe File	Labor employer wage information (SEW).
Labor Unemployment	Incoming	State Department of Labor	Daily	State Mainframe File	Labor unemployment benefit information.
Labor Unemployment Compensation Tax	Both	State Department of Labor	Weekly, Quarterly	SFTP	Labor unemployment compensation tax information and reporting.

N-FOCUS Interfaces

Interface Name	Incoming / Outgoing / Both	Recipient / Sender	Frequency	Transfer	Function
Medicaid Cards	Outgoing	Lasermark Vendor	Daily	SFTP	Medicaid card information for printing/mailing.
Medicaid (MMIS)	Outgoing	MMIS State Application (RFS, SEC)	Daily	State Mainframe File; Direct Data Access	Medicaid data interface including eligibility, demographic information. MMIS also directly accesses some N-FOCUS table information.
Medicaid Long Term Care (MMIS)	Incoming	MMIS State Application (RFS)	Daily	State Mainframe File	Medicaid nursing home per diem rate information (Long Term Care interface)
Medicaid Managed Care (MMIS)	Both	MMIS Managed Care State Application (NMC)	Daily	State Mainframe File; Direct Data Access	Medicaid managed care information. Managed Care also directly accesses some N-FOCUS table information.
Medicaid Transportation Broker	Both	American Medical Response (AMR) Vendor	Daily	SFTP	Medicaid transportation and authorization information.
Medicare Buy-In	Both	Centers for Medicare and Medicaid Services (CMS), Federal	Monthly	Connect/Direct	Medicare buy-in information exchange.
Medicare Part D	Both	Centers for Medicare and Medicaid Services (CMS), Federal	Monthly	Connect/Direct	Medicare Part D information.
Motor Vehicles	Incoming	Department of Motor Vehicles (DMV) State Application	Real Time	Direct Data Access	Motor vehicle registration information.
New Hire	Incoming	CHARTS State Application	Daily	State Mainframe File	New Hire employment information which originates federally and is transmitted to N-FOCUS via CHARTS.
NTAP	Outgoing	Public Service Commission	Monthly	FTP	Nebraska Telephone Assistance Program (NTAP).
NYTD	Outgoing	Administration of Children and Families (ACF), Federal	Semiannual	Tibco Managed File Transfer (formerly named Cyberfusion)	National Youth Transition Database (NYTD)
OnBase Claims & Service Authorizations	Both	Enterprise Content Manager (ECM), State	Daily, Real Time	SFTP, invoked DB2 stored procedure	Child Care provider and client claims and service authorization information (will be expanded to other programs later in 2012).
PARIS	Both	Department of Defense, Federal	Quarterly / Request	Connect/Direct	PARIS military benefits information; matches from other states.
Provider Rating and Review Reporting	Outgoing	Center for Children, Family, and the Law (CCFL) Answer 4 Families, University	Monthly	SFTP	Client, provider, and service authorization information.
SNAP EBT	Both	JP Morgan Electronic Financial Services, EBT Vendor	Daily	Connect/Direct	SNAP electronic benefits transfer.
SNAP Treasury Offset	Both	Financial Management Services (FMS) Treasury Offset Program, Federal	Weekly	Connect/Direct	SNAP Treasury Offset Program.
Social Security (Bendex)	Both	Social Security Administration, Federal	Daily	Tibco Managed File Transfer (formerly named Cyberfusion)	Social Security beneficiary and earnings data exchange (BENDEX/SVES).
Social Security (LIS)	Incoming	Social Security Administration, Federal	Daily	Tibco Managed File Transfer (formerly named Cyberfusion)	Social Security medicaid applications for Low Income Subsidy (LIS)
Social Security (SDX)	Both	Social Security Administration, Federal	Daily	Tibco Managed File Transfer (formerly named Cyberfusion)	Social Security supplemental security income information (SDX/SVES).
Social Security (SVES)	Both	Social Security Administration, Federal	Daily	Tibco Managed File Transfer (formerly named Cyberfusion)	Social Security verification exchange system (SVES); includes SNAP forty quarters information and citizenship verifications.
Third Party Liability (TPL)	Incoming	TPL State Application	Daily	State Mainframe File	Third Party Liability insurance information.
Vital Statistics	Both	Vital Statistics State Application	Daily	Connect/Direct	Vital Statistics information (passed on to the CHARTS application too)

N-FOCUS Technical Overview

Request for Proposal Number 4544Z1

N-FOCUS (Nebraska Family Online Client User System) is an integrated system that automates benefit/service delivery and case management for more than 30 Nebraska Department of Health and Human Services (DHHS) programs, including Child Welfare, Aid to Dependent Children, Supplemental Nutrition Assistance Program, and Medicaid. N-FOCUS functions include client/case intake, eligibility determination, case management, service authorization, benefit payments, claims processing and payments, provider contract management, interfacing with other private, state and federal organizations, and management and government reporting. N-FOCUS was implemented in production in mid-1996 and is operational statewide.

The typical N-FOCUS user is a DHHS or contracted employee. N-FOCUS daily supports over 2500 workers, operating from offices around the State as well as from 4 customer service centers and 2 hub scanning facilities. Some cases are assigned to specific workers; however the majority of cases are managed via a universal caseload methodology coordinated by the customer service centers.

The application has both batch and online components and stores data in DB2, V9. The DB2 database has over 500 tables, some with a corresponding archive table. There are over 642 relationships between tables, 1054 indexes, and over 7839 attributes. There are over 1.6 billion rows of production data with over 206 million rows in one table with an average table size of 2.8 million rows.

The batch system is coded in Z/OS COBOL and executes in a Z/OS environment. There are more than 660 procedures, over 720 programs, and over 230 stored procedures. The application generates over 540 reports using Crystal Reports that are published to a web portal through Business Objects Enterprise software. Another 100 reports generated independently are published to the portal for viewing.

The online system is an integrated client/server based software system. The client software executes on Windows 7 and resides on Windows 2008 servers located throughout the State. Computer Associates Gen and AION toolsets are used to generate windows and C code, along with custom in-house architecture code written in C. The server components are Z/OS CICS transactions. The CICS programs are Gen-generated COBOL, along with in-house written COBOL and Assembler externals. The CICS programs access DB2 on the Z/OS mainframe. The Gen clients use External Call Interface (ECI), IBM's CICS Universal Client to connect to the Z/OS CICS using TCP/IP protocol. The Gen online system consists of over 570 client procedures, 555 server procedures, 550 windows, and 1450 dialog boxes. The AION online system supports the complex eligibility data gathering and automated determination and noticing processes.

N-FOCUS web applications consist of public applications, including dashboard applications, and applications launched directly from N-FOCUS. Eclipse is the IDE used to generate the Java Server Faces and Facelets code. These Java applications run on Tomcat application servers on the Linux Operating System. The Java applications call stored procedures to access DB2 data and SQL to access SQL server data.

The primary role of the N-FOCUS team today is to maintain and enhance the N-FOCUS application. This includes providing users with technical and business support to keep the system current with government policy and industry technology, both of which continue to change at a rapid pace. The N-FOCUS team works in the Nebraska State Office Building in Lincoln. Business and technical contract and full-time State team members are organized into teams that are involved in application development (Gen, AION, COBOL, Web, Reporting), technical architecture (workstation communications, mainframe communications, print architecture, reporting architecture administration, document imaging administration), database administration, configuration management, project management, business requirements and testing, application and production support, and training. Approximately 40 technical and 30 business team members are assigned to the N-FOCUS team.

Technology Framework

Request for Proposal Number 4544Z1

1.1 General

As part of this RFP procurement process the Department is looking for systems and technologies that can form the basis for an Enterprise Architecture that can be utilized and leveraged across Divisions and/or Programs. As such, we are looking for a solution that is built upon a technology framework that will support and promote this goal. The remaining sections of this document describe what the Department considers a “technology framework”.

1.2 Definitions

Architecture - the fundamental organization of a system embodied in its components, their relationships to each other, and to the environment, and the principles guiding its design and evolution.

Service-Oriented Architecture – an architecture that aims to enhance efficiency, agility, and productivity of an enterprise by positioning services as the primary means through which solution logic is represented. Services act as containers of related capabilities. High-quality service-oriented architectures are consistent with the following principles:

- Standardized service contract – services within the same service inventory are in compliance with the same contract design standards.
- Service loose coupling – service contracts impose low consumer coupling requirements and are themselves decoupled from their surrounding environment.
- Service abstraction – service contracts only contain essential information, and information about services is limited to what is published in the service contracts.
- Service reusability – services contain and express agnostic logic and can be positioned as reusable enterprise resources.
- Service autonomy – services exercise a high level of control over their underlying runtime execution environment.
- Service statelessness – services minimize resource consumption by deferring the management of state information when necessary.
- Service discoverability – services are supplemented with communicative meta data by which that can be effectively discovered and interpreted.
- Service composability – services are effective composition participants, regardless of the size and complexity of the composition.

Framework – for the purposes of this RFP, a framework is an extensible software platform providing general purpose and domain-specific services in the context of a uniform, reusable, service-oriented architecture with consistent abstractions. A framework may include the ability to both directly instantiate end-user capabilities and to provide developer-centric capabilities.

1.3 MITA Technical Principles

The Framework should support the MITA technical principles:

- **Business driven.** Technology will only be used when it supports a business goal or objective; technology will not be used for technology’s sake alone.
- **Implementation neutral.**
- **Platform independent.** Application software and infrastructure components should be developed for reusability and platform independence.
- **Adaptable, extensible, and scalable.**
- **Open technology and standards based.** The advantages of standardization (e.g., data sharing and interoperability) should be leveraged.
- **Security and privacy** must be integrated into a system.
- **Interoperability standards** are established and followed.
- **Quality data** are enabled to support good decision making.
- **Current and proven technology** is selected.

1.4 Seven Conditions and Standards

In order to receive enhanced Federal financial participation (FFP), the Department must implement solutions that are consistent with 42 CFR 433.112 and related guidance from the Centers for Medicare and Medicaid Services (CMS), e.g., *Medicaid IT Supplement MITS-11-01-VI.0*, commonly referred to as the seven conditions and standards (“Seven Conditions”). The Framework must allow the Department to satisfy, to the greatest extent practical, those portions of the Seven Conditions that are system-related. The Seven Conditions are:

- Modularity Standard
- MITA Condition
- Industry Standards Condition
- Leverage Condition
- Business Results Condition
- Reporting Condition
- Interoperability Condition

1.5 Framework Attributes, and Areas of Commonality

1.5.1 Attributes

The following attributes are required in the proposed framework:

The Framework for the Solution must be consistent. A framework is not merely a random or semi-related set of utilities or generic services. Various services, tools, and data structures should use a unified design paradigm and design patterns (service calls; service arguments and return values; data types, etc.) to improve productivity and reduce defects driven by “impedance mismatches.” Frameworks encourage the use of helpful design patterns, but don’t force developers into deep levels of abstraction that detract from their productivity (e.g., factories of factories). Database schema are normalized; data are stored in only one place within the framework and its resulting applications; and these data are accessible only by service calls to the services “owning” the data.

The Framework for the Solution must promote interoperability. The use of standards (where standards exist) and the use of well-documented information interchange specifications (where standards do not exist) assist the using organization in producing and consuming information and services that are interoperable with other systems and organizations. Frameworks should make using interoperable standards easier than creating homegrown interface solutions.

The Framework for the Solution must externalize parameters that are prone to frequent change. These include:

- Business rules
- Workflows
- Configuration, environment, and startup parameters
- Localization resources
- Security roles
- User interface elements

The Framework for the Solution must be service-oriented. The Framework should provide a discoverable service inventory containing service contracts having granularity that is neither so coarse as to result in performance and governance issues nor so fine as to result in excessive developer burden and poor reuse. Service orientation principles may be compromised to the extent necessary to meet performance standards.

The Framework for the Solution must enable functional build out by configuration rather than customization as much as is practical. This likely requires that the base functionality, as delivered, has been used and is configured to support the Medicaid and health insurance domains.

The Framework for the Solution should have a standard, domain-specific base data model. This data model should be consistent, normalized, and incorporate the common data elements used in Medicaid eligibility, enrollment, and member management. The data model must be extensible via documented processes, and must not have any proprietary restrictions on the State's use or extension of the data model.

The Framework for the Solution must encourage reuse. Areas of reuse may include:

- Intra-application. Developers on a single team should find it easy to reuse base framework services or custom services built by other team members.
- Inter-application. Developers on different teams within the same organization should find it easy to reuse base framework services to promote commonality and to discover and use services created by other application teams.
- Inter-enterprise. Developers in sister human and social services agencies and in sister states should find it easy to reuse base framework services to promote commonality and to discover and use services created by other agencies.

The Framework for the Solution must have a security architecture that supports standard security principles. These principles are:

- **Confidentiality** – prevent disclosure to unauthorized persons or systems.
- **Integrity** – data cannot be modified undetectably.

- **Availability** – access is not inappropriately blocked or denied.
- **Authenticity** – validation that the parties to a transaction are who they say they are and that their communications are genuine.
- **Non-repudiation** – parties to a transaction cannot deny their participation in the transaction.
- **Auditability** – track and log data changes including the user or system making the change. Track and log any inquiries, views or access of data that may require such tracking as a result of law, policy or data use agreements including user or system making inquiry, doing the viewing or accessing the data along with the data and time of the inquiry, view or access.

The Framework for the Solution must be architecturally-rich. A framework should have a thoughtful architecture that is better than one in which an organization would normally invest for a single project. Because a framework is intended to be reusable, the framework developer must ensure that the breadth and depth of the services extend to cover the uses that can be reasonably foreseen. Other attributes of the architecture are:

- The functional and structural abstractions chosen to implement the architecture are intuitive, robust, and consistent. Confusing, frail, or inconsistent architectures can destroy using development organization productivity and induce high defect rates.
- The framework is easily extensible. Lacking extensibility, a framework is merely an incomplete software application.
- The framework supports scalable, high-performance applications.
- Security and privacy are built into the architecture as primary considerations rather than as afterthoughts.

The Framework for the Solution must enhance the productivity of the using organization.

An important reason for an organization to use a framework is to improve productivity. The increase in productivity should enable an organization to deliver needed capabilities more rapidly and at a lower cost. It should also enable the organization to respond to life-cycle changes in business needs with greater agility. Frameworks enhance productivity by:

- Providing tools that assist the using organization in performing common, redundant, or complex tasks with ease.
- Providing pre-constructed features, services, and capabilities with default behavior that shorten the time from inception to deployment while allowing fine-grained control to avoid the need for workarounds.
- Being supported by a long-term maintenance concept that continues to improve the features and usability of the framework, reduces the burden of workarounds (particularly security workarounds), and minimizes “reinventing the wheel” by the using organization.
- Using self-documenting tools (e.g., maintaining the official business process diagrams in the business process management system) to avoid having to maintain business and technical design artifacts in multiple locations.

The Framework for the Solution should be multi-platform unless user or enterprise needs require targeting specific hardware/operating system platforms. As the use of specific CPUs, hardware architectures, and operating systems change rapidly, the Department prefers not to be tightly bound to a particular platform. Support for various platforms such as Windows,

z/OS, Linux, and various UNIX is desirable. In addition, the Department strongly prefers the use of products that can be run in virtualized environments while recognizing that some components may have performance needs that preclude or contraindicate the use of virtualization.

Additionally, the current migration towards mobile platforms is likely to continue for the foreseeable future. A framework should assist with and automate activities needed to optimize applications for mobile devices as well as desktop devices, including addressing touch interfaces; limited display sizes; limited bandwidth and intermittent network connectivity; limited processor capabilities; and the movement towards standards-based Web technologies, such as HTML 5.

Frameworks should minimize the number of programming languages necessary for their use, consistent with developer need and balanced against other principles. The Department has the following goals for various types of programming languages:

- General – the Department prefers using open, standards-defined programming languages to the greatest extent practical. The Department understands that there are some domains today (particularly business rules and business process management) where standards are still emerging and permeating the market.
- Object-oriented – the Department prefers the use of a single object-oriented language, that uses automated memory management, to create the majority of custom services and to extend the Framework. While it would consider other languages, the Department prefers Java.
- Procedural – the Department prefers little or no use of procedural languages (e.g., C) in the Framework.
- Declarative – the Department prefers that declarative languages (e.g., HTML) largely be limited to displaying Web-based user interfaces. Even when building user interfaces, the Department prefers to substantially limit the amount of hand-coding necessary by using graphical design and construction tools.
- Scripting – the Department prefers that scripting languages be limited to functions such as user interface code, build management, system startup, and integration with non-service based external systems. Even when performing these functions, the Department prefers to substantially limit the amount of hand-coding necessary by using graphical design and construction tools.
- Business rules – the Department prefers that business rules are represented in English-like statements that are easy to interpret by business users and business analysts. While the Department is not currently planning to allow business analysts to make changes directly to a production system, the ability for these analysts to create and interpret the business rules in the Framework’s native rules language will substantially improve productivity and agility in managing business rules. Based on the Department of the market, the Department would be willing to accept rules languages that are more developer-focused.
- Business Process Management System (BPMS) – the Department prefers the use of Business Process Execution Language (BPEL) for executing managed business processes. Direct consumption of Business Process Model and Notation models (perhaps via the XML Process Definition Language format) is also acceptable. As this area is still maturing, the Department would accept other languages for BPMS process execution, particularly if they are transformable to BPEL for forward compatibility. While the

Department would like direct access to the process execution files for manipulation, including the ability to “round trip” modifications through the Integrated Development Environment, the BPMS must have graphical design and construction tools as directly coding BPEL and other related languages would likely result in substantial productivity reductions and an increase in defects.

- Database – the Department prefers the use of standards-based Structured Query Language (SQL) for database queries. Based on the use of other languages and general purpose frameworks within the Framework (e.g., Java), programming language-specific query languages may also be acceptable (either for relational or object queries). The Department discourages the use of database stored procedures or DBMS specific functionality other than in those instances where needed performance can only be obtained with such use.
- XML-based – the Department encourages the use of XML-based documents for purposes such as system configuration and messaging. The Framework should generate documents without requiring the developer to hand-code XML; however, direct access to the XML documents for manipulation is desirable, including the ability to “round trip” modifications through the Integrated Development Environment.
- Proprietary languages – while there may be specific needs for using proprietary programming languages, the Department prefers to avoid proprietary languages to the greatest extent practical.

1.5.2 Areas of Commonality

In the list below, the Department has identified the areas of commonality it expects to be supplied by the Framework or supplied by the Department to supplement the Framework. These have been identified using common product-oriented terminology, but that does not mean that each capability must be satisfied by a separate, self-contained product. While the Department has a preference for using general purpose COTS products to perform major functions (where Framework capabilities and performance are not compromised), it is not mandating that the functions of the major capabilities be supplied by general purpose COTS products nor is it mandating that the functions are even performed by standalone software services partitioned as listed below. For example, while the Department prefers the use of general purpose COTS business process management and business rules management components, it would be willing to accept an integrated business process/business rules capability as part of the Contractor’s COTS suite. The Department does not intend the list of capabilities to be all-inclusive. Bidders must propose a complete suite of capabilities to comprise the Framework.

1.5.2.1 Framework Areas of Commonality

The following areas of commonality and capabilities are consistent with the State’s goals for the Framework and should be addressed in system solutions:

- **Unified data source/database** – this is a capability to store/persist information using a unified data model on a common database product. The unified data source should support the use of effective time segments and a “never delete a record” approach to enable maintaining complete historical data and referential integrity.
- **Business Process Management** – this is a capability to design and execute business processes enabled by automation for the purposes of orchestration (automated execution

of a workflow) and choreography (coordinated interaction between two or more independent parties or services). While these may include steps executed synchronously, business process management tools excel at automating processes where most or all tasks are executed asynchronously, potentially over extended periods of time.

- **Business Activity Monitoring (BAM)** – this is a capability to monitor and manage business processes, transaction volumes, and quality indicators, in real time and retrospectively. This capability may include statistical analyses of the execution of the indicators being monitored.
- **Business Rules Management** – this is a capability to design and manage the business rules logic within the system and is supported by a repository for the rules.
- **Interaction Management** – this is a capability that allows an organization to manage information about and interactions with stakeholders or clients via multiple channels including easy access to historical data.
- **Case Management** – this is a capability that allows an organization to manage information and transactional activities over time relative to a specific entity.
- **Correspondence** – this is a capability to generate and manage communications with stakeholders via multiple channels, and includes the ability to generate canned, semi-custom, and custom messages.
- **Service Integration/Enterprise Service Bus** – this is a capability that allows the discovery and interaction of distributed services via synchronous and asynchronous messaging in a service-oriented architecture. Through adapters, service integration should also allow interaction with non-service based capabilities.
- **Web Portal** – this is a capability that allows for configurable Web access to backend services. While any sort of Web page could conceivably allow access, a Web portal automates the access, security, and configuration of Web access, and is configurable by not only the developers, but to a limited extent by the end users (e.g., what information is shown and where on the page is it shown).
- **Reporting/Business Intelligence** – this is a capability that allows for textual, tabular, and graphical representations of data needed to answer questions, monitor/control parameters, and make decisions and querying to gather data to fill these reports.
- **Call Center Integration** – this is a capability for the Framework (and resulting system) to integrate with common call center technology to be able to link telephone calls to records, automatically call up useful information for the call center operator, etc.
- **Integrated Development Environment** – this is a capability to develop, integrate, build, test, deploy, and control configuration of software using a unified, integrated, and coherent suite of tools.
- **Security** – while security is an attribute that should apply across the suite of capabilities in the Framework, in this particular case it is a capability to manage authentication, authorization, and access to the system, including a single sign-on capability.
- **Data Management Tools** - This is the capability of collecting, aggregating, matching, consolidating, persisting, securing and distributing data and its meta data to ensure consistency and control in the ongoing maintenance and use of the information.
- **Online Help** – this is the capability to manage, produce, and publish help files, training, and reference information that is integrated in a context-sensitive fashion with the Framework and resulting applications.

- **Document Management*** - this is a capability to store, index, and access electronic documents and images of paper documents in a structured and scalable manner. The capability may have standalone uses or be integrated into an enterprise system via documented interfaces or services.

*Note that the State has designated and procured Hyland OnBase as the enterprise document management system. The preference would be to leverage OnBase as part of the Framework, therefore the Bidder should provide details regarding how their proposed Framework could integrate seamlessly with OnBase.

Nebraska EES Analysis

Request for Proposal Number 4544Z1

1. Summary of the Alternatives Analysis

As part of the systems strategy development process for the Medicaid Eligibility & Enrollment and Information Systems project, we considered a number of system options for delivering integrated eligibility, enrollment and case management functionality which satisfies the requirements of the ACA. The options were ultimately consolidated into four primary alternatives for comparison and evaluation purposes. Those options were:

1. Maintain Status Quo
2. Ground Up Development
3. Incremental Modernization
4. Transfer/COTS System

2. Evaluation Criteria and Results

The set of criteria that was used to evaluate these alternatives was primarily based upon the architectural principles set forth by the Centers for Medicare & Medicaid Services (CMS), which are presented and described in the following table.

Table 2-1: Description of Evaluation Criteria Used	Description
System Integration	<p>Applies a modular, flexible approach to systems development, including the use of open interfaces and exposed application programming interfaces, and the separation of business rules from core programming, available in both human and machine readable formats.</p> <p>Ensures seamless coordination between Medicaid, DHCP, and the Exchange, and allows interoperability with health information exchanges, public health agencies, human services programs, and community organizations providing outreach and enrollment assistance services.</p>
Service-Oriented Architecture (SOA)	Employs common authoritative data sources and data exchange services such as but not limited to, federal and state agencies or other commercial entities.
Isolation of Business Rules	Uses standards-based business rules and a technology-neutral business rules repository. Enables the business rules to be accessible and adaptable by other states.

This form is part of the specification package and must be signed and returned, along with proposal documents, by the opening date and time specified.

PLEASE READ CAREFULLY!

SCOPE OF SERVICE

The State of Nebraska, Administrative Services (AS), Materiel Division, Purchasing Bureau, is issuing this Request for Proposal, RFP Number 4468Z1 for the purpose of selecting a qualified contractor to provide Eligibility and Enrollment Solution (EES) Independent Verification and Validation (IV&V) Services.

Written questions are due no later than August 30, 2013, and should be submitted via e-mail to as.materielpurchasing@nebraska.gov. Written questions may also be sent by facsimile to (402) 471-2089.

Bidder should submit one (1) original and six (6) hardcopies of the entire proposal. In the event of any inconsistencies among the proposals, the language contained in the original proposal shall govern. Proposals must be submitted by the proposal due date and time.

PROPOSALS MUST MEET THE REQUIREMENTS OUTLINED IN THIS REQUEST FOR PROPOSAL TO BE CONSIDERED VALID. PROPOSALS WILL BE REJECTED IF NOT IN COMPLIANCE WITH THESE REQUIREMENTS.

1. Sealed proposals must be received in State Purchasing by the date and time of proposal opening indicated above. No late proposals will be accepted. No electronic, e-mail, fax, voice, or telephone proposals will be accepted.
2. This form "REQUEST FOR PROPOSAL FOR CONTRACTUAL SERVICES" MUST be manually signed, in ink, and returned by the proposal opening date and time along with bidder's proposal and any other requirements as specified in the Request for Proposal in order to be considered for an award.
3. It is the responsibility of the bidder to check the website for all information relevant to this solicitation to include addenda and/or amendments issued prior to the opening date. Website address is as follows:
<http://das.nebraska.gov/materiel/purchasing/rfp.htm>
4. It is understood by the parties that in the State of Nebraska's opinion, any limitation on the contractor's liability is unconstitutional under the Nebraska State Constitution, Article XIII, Section 3, and that any limitation of liability shall not be binding on the State of Nebraska despite inclusion of such language in documents supplied with the contractor's bid or in the final contract.

BIDDER MUST COMPLETE THE FOLLOWING

By signing this Request for Proposal For Contractual Services form, the bidder guarantees compliance with the provisions stated in this Request for Proposal, agrees to the terms and conditions (see Section III) and certifies that bidder maintains a drug free work place environment.

GLOSSARY OF TERMS

AABD (Assistance to the Aged, Blind and Disabled): Medicaid available to certain Nebraskans to assist with medical expenses. Nebraskans who are aged, blind or have a disability (as classified by the Social Security Administration) must meet established financial guidelines in order to be eligible. Some consumers in the AABD Medicaid program access services through managed care while the remaining population access care through a fee-for-service delivery system.

Acceptance Test Procedure: Benchmarks and other performance criteria, developed by the State of Nebraska or other sources of testing standards, for measuring the effectiveness of products or services and the means used for testing such performance.

ACA (Affordable Care Act): On March 23, 2010, President Obama signed into law the Patient Protection and Affordable Care Act. On March 30, 2010, the Health Care and Education Reconciliation Act of 2010 was signed into law. The two laws are collectively referred to as the Affordable Care Act (ACA). ACA is also referred to as the “health reform act” or “Patient Protection and Affordable Care Act (PPACA).

ACCESSNebraska Web Portal: The public application portal for various Nebraska public assistance benefit programs such as: Medicaid, Supplemental Nutritional Assistance Program (SNAP), Aid to Dependent Children (ADC), Aid to Aged, Blind and Disabled, Energy Assistance, Kids Connection, and Child Care Subsidy.

Addendum: Something added or deleted.

Agency: Any state agency, board, or commission other than the University of Nebraska, the Nebraska State colleges, the courts, the Legislature, or any officer or agency established by the Constitution of Nebraska.

Agent: A person authorized by a superior or organization to act on their behalf.

Amend: To alter or change by adding, subtracting, or substituting. A contract can be amended only by the parties participating in the contract. A written contract can only be amended in writing.

Amendment: Written correction or alteration.

Appropriation: Legislative authorization to expend public funds for a specific purpose. Money set apart for a specific use.

Award: All purchases, leases, or contracts which are based on competitive proposals will be awarded according to the provisions in the Request for Proposal. The State reserves the right to reject any or all proposals, wholly or in part, or to award to multiple bidders in whole or in part. The State reserves the right to waive any deviations or errors that are not material, do not invalidate the legitimacy of the proposal, and do not improve the bidder’s competitive position. All awards will be made in a manner deemed in the best interest of the State.

Best and Final Offer (BAFO): A second-stage bid in a public procurement for services.

Bid: The executed document submitted by a bidder in response to a Request for Proposal.

Bid Bond: A bond given by a surety on behalf of the bidder to ensure that the bidder will enter into the contract as bid and is retained by the State from the date of the bid opening to the date of contract signing.

Bidder: Any person or entity submitting a competitive bid response to a solicitation.

Business: Any corporation, partnership, individual, sole proprietorship, joint-stock company, joint venture, or any other private legal entity.

Business Day: Any weekday, excepting public holidays.

Calendar Day: Every day shown on the calendar; Saturdays, Sundays and State/Federal holidays included. Not to be confused with "Work Day".

Centers for Medicare & Medicaid Services (CMS): is a federal agency within the United States Department of Health and Human Services (DHHS) that administers the Medicare program and works in partnership with state governments to administer Medicaid, the Children's Health Insurance Program (CHIP), and health insurance portability standards.

CHIP (Children's Health Insurance Program): Enacted in 1997, CHIP is a federal-state program that provides health care coverage for uninsured low-income children who are not eligible for Medicaid. States have the option of administering CHIP through their Medicaid programs or through a separate program (or a combination of both). The federal government matches state spending for CHIP but federal CHIP funds are capped.

Collusion: A secret agreement or cooperation between two or more persons or entities to accomplish a fraudulent, deceitful or unlawful purpose.

Competition: The process by which two or more vendors vie to secure the business of a purchaser by offering the most favorable terms as to price, quality, delivery and/or service.

Confidential Information: Unless otherwise defined below, "Confidential Information" shall also mean proprietary trade secrets, academic and scientific research work which is in progress and unpublished, and other information which if released would give advantage to business competitors and serve no public purpose (see Neb. Rev. Stat. §84-712.05(3)). In accordance with Nebraska Attorney General Opinions 92068 and 97033, proof that information is proprietary requires identification of specific, named competitor(s) who would be advantaged by release of the information and the specific advantage the competitor(s) would provide.

Configure: Modification to software that does not require changes to the Source Code for such software. This includes rules-based, rules engine based, or parameter driven modification.

Contract: An agreement between two or more persons to perform a specific act or acts.

Contract Administration: The Management of various facets of contracts to assure that the contractors total performance is in accordance with the contractual commitments and obligations to the purchaser are fulfilled.

Contract Management: Includes reviewing and approving of changes, executing renewals, handling disciplinary actions, adding additional users, and any other form of action that could change the contract.

Contractor: Any person or entity that supplies goods and/or services.

Conversion Period: A period of time not to exceed six (6) months, during which the State converts to a new Operating System under "Conversion" as per this RFP.

Copyright: A grant to a writer/artist that recognizes sole authorship/creation of a work and protects the creator's interest(s) therein.

CPU: Any computer or computer system that is used by the State to store, process, or retrieve data or perform other functions using Operating Systems and applications software.

Critical Program Error: Any Program Error, whether or not known to the State, which prohibits or significantly impairs use of the Licensed Software as set forth in the documentation and intended in the contract.

Default: The omission or failure to perform a contractual duty.

Deviation: Any proposed change(s) or alteration(s) to either the contractual language or deliverables within the scope of this Request for Proposal.

Documentation: The user manuals and any other materials in any form or medium customarily provided by the contractor to the users of the Licensed Software which will provide the State with sufficient information to operate, diagnose, and maintain the Licensed Software properly, safely, and efficiently.

Evaluation Committee: A committee (or committees) appointed by the requesting agency that advises and assists the procuring office in the evaluation of proposals.

Evaluation of Proposal: The process of examining a proposal after opening to determine the bidder's responsibility, responsiveness to requirements, and to ascertain other characteristics of the proposal that relate to determination of the successful bidder.

Extension: A provision, or exercise of a provision, of a contract that allows a continuance of the contract (at the option of the State of Nebraska) for an additional time according to contract conditions. Not to be confused with "Renewals."

FOA (Funding Opportunity Announcement): A publicly available document by which a U.S. Federal agency makes known its intentions to award discretionary grants or cooperative agreements, usually as a result of competition for funds. Funding opportunity announcements may be known as program announcements, requests for applications, notices of funding availability, solicitations, or other names depending on the agency and type of program

F.O.B. Destination: Free on Board. The delivery charges have been included in the quoted price and prepaid by the vendor. Vendor is responsible for all claims associated with damages during delivery of product.

Foreign Corporation: A foreign corporation is a corporation that was formed (i.e. incorporated) in another state but transacting business in Nebraska pursuant to a certificate of authority issued by the Nebraska Secretary of State.

HIPAA (Health Insurance Portability and Accountability Act of 1996): The Standards for Security and Privacy of Individually Identifiable Health Information found in the Health Insurance Portability and Accountability Act of 1996, Public Law 104-91, as amended and related HIPAA regulations at 45 C.F.R. part 160-164, as in effect or as amended.

Installation Date: The date when the procedures described in "Installation by Contractor, and Installation by State", as found in the RFP, are completed.

Late Proposal: A proposal received at the place specified in the solicitation after the date and time designated for all proposals to be received.

Licensed Software: Any and all software and documentation by which the State acquires or is granted any rights under this contract

Local Time: Central Time in Lincoln, NE.

MAGI (Modified Adjusted Gross Income): A definition of income from the tax system that will be used to determine eligibility for certain categories of Medicaid eligibility in addition to tax credits available to people buying insurance in exchanges.

Mandatory: Required, compulsory or obligatory.

May: Denotes discretion.

MITA (Medicaid Information Technology Architecture): an initiative of the Centers for Medicare and Medicaid Services (CMS), aligned with the National Health Infrastructure Initiative (NHII), and intended to foster integrated business and information technology transformation across the Medicaid enterprise to improve the administration of the Medicaid program.

Module: A collection of routines and data structures that perform a specific function of the Licensed Software.

Must: Denotes the imperative, required, compulsory or obligatory

N-FOCUS: (Nebraska Family Online Client User System) The Department's software application used to support eligibility determinations for Nebraska Medicaid, Nebraska CHIP and various Economic Assistance Programs. This system also provides additional functionality such as case management, provider management and payment calculations.

Opening Date: Specified date and time for the public opening of received, labeled and sealed formal proposals. Not to be confused with "Release Date".

Operating System: The control program in a computer that provides the interface to the computer hardware and peripheral devices, and the usage and allocation of memory resources, processor resources, input/output resources, and security resources.

Outsourcing: Acquiring computing or related services from a source outside of the State of Nebraska which may include programming and/or executing the State's Licensed Software on the State's CPU's, programming, and/or executing the State's programs and Licensed Software on the contractor's CPU's or any mix thereof.

Outsourcing Company: A company that provides Outsourcing Services under contract to the State.

Performance Bond: A bond given by a surety on behalf of the contractor to ensure the timely and proper (in sole estimation of the State) performance of a contract.

PHI (Protected Health Information): Individually identifiable health information that is transmitted by, or maintained in, electronic media or any other form or medium. Individually identifiable health information is information that is a subset of health information, including demographic information collected from an individual, and 1) is created or received by a healthcare provider, health plan, employer, or healthcare clearinghouse; and 2) related to the past, present, or future physical or

mental health or condition of an individual; the provision of healthcare to an individual; or the past, pre-sent, or future payment for the provision of healthcare to an individual; (i) that identifies the individual; or (ii) with respect to which there is a reasonable basis to believe the information can be used to identify the individual.

PII (Personally Identifiable Information): Information: 1) that directly identifies an individual (e.g., name, address, social security number or other identifying number or code, telephone number, email, address, etc.), or 2) by which an agency intends to identify specific individuals in conjunction with other data elements, e.g., indirect identification. (These data elements may include a combination of gender, race, birth date, geographic indicator, and other descriptors.)

Platform: A specific hardware and Operating System combination that is different from other hardware and Operating System combinations to the extent that a different version of the Licensed Software product is required to execute properly in the environment established by such hardware and Operating System combination.

PPACA (Patient Protection and Affordable Care Act): See ACA: Affordable Care Act.

Pre-Proposal Conference: A meeting scheduled for the purpose of providing clarification regarding a Request for Proposal and related expectations.

Product: A module, a system, or any other software-related item provided by the contractor to the State.

Program Error: Code in Licensed Software which produces unintended results or actions, or which produces results or actions other than those described in the specifications. A program error includes, without limitation, any "Critical Program Error."

Program Set: The group of programs and products, including the Licensed Software specified in the RFP, plus any additional programs and products licensed by the State under this contract for use by the State.

Project: The total of all software, documentation, and services to be provided by the contractor under this contract.

Proposal: The executed document submitted by a bidder in response to a Request for Proposal.

Proprietary Information: Proprietary information is defined as trade secrets, academic and scientific research work which is in progress and unpublished, and other information which if released would give advantage to business competitors and serve no public purpose (see Neb. Rev. Stat. §84-712.05(3)). In accordance with Attorney General Opinions 92068 and 97033, proof that information is proprietary requires identification of specific, named competitor(s) who would be advantaged by release of the information and the specific advantage the competitor(s) would receive.

Protest: A complaint about a governmental action or decision related to a Request for Proposal or the resultant contract, brought by a prospective bidder, a bidder, a contractor, or other interested party to AS Materiel Division or another designated agency with the intention of achieving a remedial result.

Public Proposal Opening: The process of opening proposals, conducted at the time and place specified in the Request for Proposal, and in the presence of anyone who wishes to attend.

Recommended Hardware Configuration: The data processing hardware (including all terminals, auxiliary storage, communication, and other peripheral devices) to the extent utilized by the State as

recommended by the contractor.

Release Date: Date of release of the Request for Proposal to the public for submission of proposal responses. Not to be confused with “Opening Date”.

Renewal: Continuance of a contract for an additional term after a formal signing by the parties.

Representative: Includes an agent, an officer of a corporation or association, a trustee, executor or administrator of an estate, or any other person legally empowered to act for another.

Request for Proposal (RFP): All documents, whether attached or incorporated by reference, utilized for soliciting competitive proposals.

Responsible Bidder: A bidder who has the capability in all respects to perform fully all requirements with integrity and reliability to assure good faith performance.

Responsive Bidder: A bidder who has submitted a bid which conforms in all respects to the solicitation document.

Seven Standards and Conditions for Enhanced Funding: The Centers for Medicare & Medicaid Services (CMS) issued standards and conditions that must be met by the states in order for Medicaid technology investments (including traditional claims processing systems, as well as eligibility systems) to be eligible for enhanced match funding.

Shall: Denotes the imperative, required, compulsory or obligatory.

Should: Indicates an expectation.

SOA (Service Oriented Architecture): A set of principles and methodologies for designing and developing software in the form of interoperable services. These services are well-defined business functionalities that are built as software components (discrete pieces of code and/or data structures) that can be reused for different purposes. SOA design principles are used during the phases of systems development and integration.

Solicitation: The process of notifying prospective bidders or offerors that the State of Nebraska wishes to receive proposals for furnishing services. The process may consist of public advertising, posting notices, or mailing Request for Proposals and/or Request for Proposal announcement letter to prospective bidders, or all of these.

Solicitation Document: Request for Proposal.

Specifications: The information provided by or on behalf of the contractor that fully describes the capabilities and functionality of the Licensed Software as set forth in any material provided by the contractor, including the documentation and User’s Manuals described herein.

System: Any collection or aggregation of two (2) or more Modules that is designed to function, or is represented by the contractor as functioning or being capable of functioning as an entity.

Termination: Occurs when either party pursuant to a power created by agreement or law puts an end to the contract. All obligations which are still executory on both sides are discharged but any right based on prior breach or performance survives.

Trademark: A distinguishing sign, symbol, mark, word, or arrangement of words in the form of a label

or other indication, that is adopted and used by a manufacturer or distributor to designate its particular goods and which no other person has the legal right to use.

Trade Secret: Information, including, but not limited to, a drawing, formula, pattern, compilation, program, device, method, technique, code, or process that; (a) derives independent economic value, actual or potential, from not being known to, and not being ascertainable by proper means, other persons who can obtain economic value from its disclosure or use; and (b) is the subject of efforts that are reasonable under the circumstances to maintain its secrecy (see Neb. Rev. Stat. §87-502(4)).

Upgrade: Any improvement or change in the Software that improves or alters its basic function.

Vendor: An actual or potential contractor; a contractor

Will: Denotes the imperative, required, compulsory or obligatory.

I. SCOPE OF THE REQUEST FOR PROPOSAL

The State of Nebraska, Administrative Services (AS), Materiel Division, Purchasing Bureau, is issuing this Request for Proposal, RFP Number 4468Z1 for the purpose of selecting a qualified contractor to provide Eligibility and Enrollment Solution (EES) Independent Verification and Validation (IV&V) Services.

The IV&V contractor awarded the IV&V contract for the EES project, their subcontractor(s) and vendor(s) are precluded from submitting an EES proposal, assisting another company in making a proposal, or otherwise materially participating in any subsequent contract related to the EES project.

A contract resulting from this Request for Proposal will be issued from the date of the award through December 31, 2015, with the option to renew for one (1) additional six-month period as mutually agreed upon by all parties.

ALL INFORMATION PERTINENT TO THIS REQUEST FOR PROPOSAL CAN BE FOUND ON THE INTERNET AT: <http://www.das.state.ne.us/materiel/purchasing/rfp.htm>

A. SCHEDULE OF EVENTS

The State expects to adhere to the tentative procurement schedule shown below. It should be noted, however, that some dates are approximate and subject to change.

	ACTIVITY	DATE/TIME
1.	Release Request for Proposal	August 16, 2013
2.	Last day to submit written questions	August 30, 2013
3.	State responds to written questions through Request for Proposal "Addendum" and/or "Amendment" to be posted to the Internet at: http://www.das.state.ne.us/materiel/purchasing/rfp.htm	September 6, 2013
4.	Proposal opening Location: Nebraska State Office Building State Purchasing Bureau 301 Centennial Mall South, Mall Level Lincoln, NE 68508	September 24, 2013 2:00 PM Central Time
5.	Review for conformance of mandatory requirements	September 24, 2013
6.	Evaluation period	September 25, 2013 To October 11, 2013
7.	"Oral Interviews/Presentations and/or Demonstrations" (if required)	October 11, 2013 To November 1, 2013
8.	Post "Letter of Intent to Contract" to Internet at: http://www.as.materielpurchasing@nebraska.gov/rfp.htm	November 4, 2013
9.	Performance bond submission	November 11, 2013
10.	Contract award	November 11, 2013
11.	Contractor start date	November 15, 2013

II. PROCUREMENT PROCEDURES

A. PROCURING OFFICE AND CONTACT PERSON

Procurement responsibilities related to this Request for Proposal reside with the State Purchasing Bureau. The point of contact for the procurement is as follows:

Name: Peter Kroll/Robert Thompson
Agency: State Purchasing Bureau
Address: 301 Centennial Mall South, Mall Level
Lincoln, NE 68508

OR

Address: P.O. Box 94847
Lincoln, NE 68509
Telephone: 402-471-2401
Facsimile: 402-471-2089
E-Mail: as.materielpurchasing@nebraska.gov

B. GENERAL INFORMATION

The Request for Proposal is designed to solicit proposals from qualified vendors who will be responsible for providing Eligibility and Enrollment Solution (EES) Independent Verification and Validation (IV&V) Services at a competitive and reasonable cost. Proposals that do not conform to the mandatory items as indicated in the Request for Proposal will not be considered.

Proposals shall conform to all instructions, conditions, and requirements included in the Request for Proposal. Prospective bidders are expected to carefully examine all documentation, schedules and requirements stipulated in this Request for Proposal, and respond to each requirement in the format prescribed.

A fixed-price contract will be awarded as a result of this proposal. In addition to the provisions of this Request for Proposal and the awarded proposal, which shall be incorporated by reference in the contract, any additional clauses or provisions required by the terms and conditions will be included as an amendment to the contract.

C. COMMUNICATION WITH STATE STAFF

From the date the Request for Proposal is issued until a determination is announced regarding the selection of the contractor, contact regarding this project between potential contractors and individuals employed by the State is restricted to only written communication with the staff designated above as the point of contact for this Request for Proposal.

Once a contractor is preliminarily selected, as documented in the intent to contract, that contractor is restricted from communicating with State staff until a contract is signed. Violation of this condition may be considered sufficient cause to reject a contractor's proposal and/or selection irrespective of any other condition.

The following exceptions to these restrictions are permitted:

1. written communication with the person(s) designated as the point(s) of contact for this Request for Proposal or procurement;
2. contacts made pursuant to any pre-existing contracts or obligations; and

3. state-requested presentations, key personnel interviews, clarification sessions or discussions to finalize a contract.

Violations of these conditions may be considered sufficient cause to reject a bidder's proposal and/or selection irrespective of any other condition. No individual member of the State, employee of the State, or member of the Evaluation Committee is empowered to make binding statements regarding this Request for Proposal. The buyer will issue any clarifications or opinions regarding this Request for Proposal in writing.

D. WRITTEN QUESTIONS AND ANSWERS

Any explanation desired by a bidder regarding the meaning or interpretation of any Request for Proposal provision must be submitted in writing to the State Purchasing Bureau and clearly marked "RFP Number 4468Z1; Eligibility and Enrollment Solution (EES) Independent Verification and Validation (IV&V) Services Questions". It is preferred that questions be sent via e-mail to as.materielpurchasing@nebraska.gov Questions may also be sent by facsimile to 402-471-2089, but must include a cover sheet clearly indicating that the transmission is to the attention of Buyer, showing the total number of pages transmitted, and clearly marked "RFP Number 4468Z1; Eligibility and Enrollment Solution (EES) Independent Verification and Validation (IV&V) Services Questions".

It is recommended that Bidders submit questions sequentially numbered, include the RFP reference and page number using the following format:

Question Number	RFP Section Reference	RFP Page Number	Question

Written answers will be provided through an addendum to be posted on the Internet at <http://das.nebraska.gov/materiel/purchasing/rfp.htm> on or before the date shown in the Schedule of Events.

E. ORAL INTERVIEWS/PRESENTATIONS AND/OR DEMONSTRATIONS

The Evaluation Committee(s) may conclude after the completion of the Technical and Cost Proposal evaluation that oral interviews/presentations and/or demonstrations are required in order to determine the successful bidder. All bidders may not have an opportunity to interview/present and/or give demonstrations; the State reserves the right to select only the top scoring bidders to present/give oral interviews in its sole discretion. The scores from the oral interviews/presentations and/or demonstrations will be added to the scores from the Technical and Cost Proposals. The presentation process will allow the bidders to demonstrate their proposal offering, explaining and/or clarifying any unusual or significant elements related to their proposals. Bidders' key personnel will be requested to participate in a structured interview to determine their understanding of the requirements of this proposal, their authority and reporting relationships within their firm, and their management style and philosophy. Bidders shall not be allowed to alter or amend their proposals. Only representatives of the State and the presenting bidders will be permitted to attend the oral interviews/presentations and/or demonstrations.

Once the oral interviews/presentations and/or demonstrations have been completed the State reserves the right to make a contract award without any further discussion with the bidders regarding the proposals received.

Detailed notes of oral interviews/presentations and/or demonstrations may be recorded and supplemental information (such as briefing charts, et cetera) may be accepted; however, such supplemental information shall not be considered an amendment to a bidders' proposal.

Additional written information gathered in this manner shall not constitute replacement of proposal contents.

Any cost incidental to the oral interviews/presentations and/or demonstrations shall be borne entirely by the bidder and will not be compensated by the State.

F. SUBMISSION OF PROPOSALS

The following describes the requirements related to proposal submission, proposal handling and review by the State.

To facilitate the proposal evaluation process, one (1) original, clearly identified as such, and six (6) hardcopies of the entire proposal should be submitted. The copy marked "original" shall take precedence over any other copies, should there be a discrepancy. Proposals must be submitted by the proposal due date and time. A separate sheet must be provided that clearly states which sections have been submitted as proprietary or have copyrighted materials. All proprietary information the bidder wishes the State to withhold must be submitted in accordance with the instructions outlined in Section III, Proprietary Information. Proposal responses should include the completed Form A, Bidder Contact Sheet. Proposals must reference the request for proposal number and be sent to the specified address. Container(s) utilized for original documents should be clearly marked "ORIGINAL DOCUMENTS". Please note that the address label should appear in Section II part A as specified on the face of each container or bidder's bid response packet. Rejected late proposals will be returned to the bidder unopened, if requested, at bidder's expense. If a recipient phone number is required for delivery purposes, 402-471-2089 should be used. The request for proposal number must be included in all correspondence.

Emphasis should be concentrated on conformance to the Request for Proposal instructions, responsiveness to requirements, completeness and clarity of content. If the bidder's proposal is presented in such a fashion that makes evaluation difficult or overly time consuming, it is likely that points will be lost in the evaluation process. Elaborate and lengthy proposals are neither necessary nor desired.

The Technical and Cost Proposals should be packaged separately (loose-leaf binders are preferred) on standard 8 ½" by 11" paper, except that charts, diagrams and the like may be on fold-outs which, when folded, fit into the 8 ½" by 11" format. Pages may be consecutively numbered for the entire proposal, or may be numbered consecutively within sections. Figures and tables must be numbered and referenced in the text by that number. They should be placed as close as possible to the referencing text. The Technical Proposal must not contain any reference to dollar amounts. However, information such as data concerning labor hours and categories, materials, subcontracts and so forth, shall be considered in the Technical Proposal so that the bidder's understanding of the scope of work may be evaluated. The Technical Proposal shall disclose the bidder's technical approach in as much detail as possible, including, but not limited to, the information required by the Technical Proposal instructions.

G. PROPOSAL OPENING

The sealed proposals will be publicly opened and the bidding entities announced on the date, time and location shown in the Schedule of Events. Proposals will be available for viewing by those present after the proposal opening. Vendors may also contact the State to schedule an appointment for viewing proposals after the opening date.

H. LATE PROPOSALS

Proposals received after the time and date of the proposal opening will be considered late proposals. Rejected late proposals will be returned to the bidder unopened, if requested, at bidder's expense. The State is not responsible for proposals that are late or lost due to mail service inadequacies, traffic or any other reason(s).

I. REJECTION OF PROPOSALS

The State reserves the right to reject any or all proposals, wholly or in part, or to award to multiple bidders in whole or in part. The State reserves the right to waive any deviations or errors that are not material, do not invalidate the legitimacy of the proposal and do not improve the bidder's competitive position. All awards will be made in a manner deemed in the best interest of the State.

J. EVALUATION OF PROPOSALS

All responses to this Request for Proposal which fulfill all mandatory requirements will be evaluated. Each category will have a maximum possible point potential. The State will conduct a fair, impartial and comprehensive evaluation of all proposals in accordance with the criteria set forth below. Areas that will be addressed and scored during the evaluation include:

1. Executive Summary;
2. Corporate Overview shall include but is not limited to;
 - a. the ability, capacity and skill of the bidder to deliver and implement the system or project that meets the requirements of the Request for Proposal;
 - b. the character, integrity, reputation, judgment, experience and efficiency of the bidder;
 - c. whether the bidder can perform the contract within the specified time frame;
 - d. the quality of bidder performance on prior contracts;
 - e. such other information that may be secured and that has a bearing on the decision to award the contract;
3. Technical Approach
 - a. Program Management/IV&V Project Plan
 - b. Deliverables Review and Acceptance
 - c. Quality Assurance
 - d. Contract Compliance
4. Cost Proposal.

Evaluation criteria will become public information at the time of the Request for Proposal opening. Evaluation criteria and a list of respondents will be posted to the Internet at: <http://www.das.state.ne.us/materiel/purchasing/rfp.htm>. Evaluation criteria will not be released prior to the proposal opening.

K. EVALUATION COMMITTEE

Proposals will be independently evaluated by members of the Evaluation Committee(s). The committee(s) will consist of staff with the appropriate expertise to conduct such proposal evaluations. Names of the members of the Evaluation Committee(s) will not become public information.

Prior to award, bidders are advised that only the point of contact indicated on the front cover of this Request For Proposal For Contractual Services Form can clarify issues or render any

opinion regarding this Request for Proposal. No individual member of the State, employee of the State or member of the Evaluation Committee(s) is empowered to make binding statements regarding this Request for Proposal.

L. MANDATORY REQUIREMENTS

The proposals will first be examined to determine if all mandatory requirements listed below have been addressed to warrant further evaluation. Proposals not meeting mandatory requirements will be excluded from further evaluation. The mandatory requirement items are as follows:

1. signed Request For Proposal For Contractual Services form in ink;
2. Executive Summary;
3. Corporate Overview;
4. Technical Approach; and
5. Cost Proposal.

M. REFERENCE CHECKS

The State reserves the right to check any reference(s), regardless of the source of the reference information, including but not limited to, those that are identified by the company in the proposal, those indicated through the explicitly specified contacts, those that are identified during the review of the proposal, or those that result from communication with other entities involved with similar projects.

Information to be requested and evaluated from references may include, but is not limited to, some or all of the following: project description and background, job performed, functional and technical abilities, communication skills and timeliness, cost and schedule estimates and accuracy, problems (poor quality deliverables, contract disputes, work stoppages, et cetera), overall performance, and whether or not the reference would rehire the firm or individual. Only top scoring bidders may receive reference checks and negative references may eliminate bidders from consideration for award.

N. SECRETARY OF STATE/TAX COMMISSIONER REGISTRATION REQUIREMENTS

All bidders shall be authorized to transact business in the State of Nebraska. All bidders are expected to comply with all Nebraska Secretary of State registration requirements. It is the responsibility of the bidder to comply with any registration requirements pertaining to types of business entities (e.g. person, partnership, foreign or domestic limited liability company, association, or foreign or domestic corporation or other type of business entity). The Bidder who is the recipient of an Intent to Award will be required to certify that it has so complied and produce a true and exact copy of its current (within 90 days), valid Certificate of Good Standing or Letter of Good Standing; or in the case registration is not required, to provide, in writing, the reason as to why none is required. This must be accomplished prior to the award of the contract. Construction contractors are expected to meet all applicable requirements of the Nebraska Contractor Registration Act and provide a current, valid certificate of registration. Further, all bidders shall comply with any and all other applicable Nebraska statutes regarding transacting business in the State of Nebraska. Bidders should submit the above certification(s) with their bid.

O. VIOLATION OF TERMS AND CONDITIONS

Violation of the terms and conditions contained in this Request for Proposal or any resultant contract, at any time before or after the award, shall be grounds for action by the State which may include, but is not limited to, the following:

1. rejection of a bidder's proposal;

2. suspension of the bidder from further bidding with the State for the period of time relative to the seriousness of the violation, such period to be within the sole discretion of the State.

III. TERMS AND CONDITIONS

By signing the "Request For Proposal For Contractual Services" form, the Bidder guarantees compliance with the provisions stated in this Request for Proposal, agrees to the terms and conditions and certifies bidder maintains a drug free work place environment.

Bidders are expected to closely read the Terms and Conditions and provide a binding signature of intent to comply with the Terms and Conditions; provided, however, a bidder may indicate any exceptions to the Terms and Conditions by (1) clearly identifying the term or condition by subsection, (2) including an explanation for the bidder's inability to comply with such term or condition which includes a statement recommending terms and conditions the bidder would find acceptable. Rejection in whole or in part of the Terms and Conditions may be cause for rejection of a bidder's proposal.

The Contractor awarded the IV&V contract for the EES project, their subcontractor(s) and vendor(s) are precluded from submitting an EES proposal, assisting another company in making a proposal, or otherwise materially participating in any subsequent contract related to the EES project.

A. GENERAL

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contract resulting from this Request for Proposal shall incorporate the following documents:

1. Amendment to Contract Award with the most recent dated amendment having the highest priority;
2. Contract Award and any attached Addenda;
3. The signed Request for Proposal form and the Contractor's Proposal;
4. Amendments to RFP and any Questions and Answers; and
5. The original RFP document and any Addenda.

These documents constitute the entirety of the contract.

Unless otherwise specifically stated in a contract amendment, in case of any conflict between the incorporated documents, the documents shall govern in the following order of preference with number one (1) receiving preference over all other documents and with each lower numbered document having preference over any higher numbered document: 1) Amendment to Contract Award with the most recent dated amendment having the highest priority, 2) Contract Award and any attached Addenda, 3) the signed Request for Proposal form and the Contractor's Proposal, 4) Amendments to RFP and any Questions and Answers, 5) the original RFP document and any Addenda.

Any ambiguity in any provision of this contract which shall be discovered after its execution shall be resolved in accordance with the rules of contract interpretation as established in the State of Nebraska.

Once proposals are opened they become the property of the State of Nebraska and will not be returned.

B. AWARD

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

All purchases, leases, or contracts which are based on competitive proposals will be awarded according to the provisions in the Request for Proposal. The State reserves the right to reject any or all proposals, wholly or in part, or to award to multiple bidders in whole or in part, and at its discretion, may withdraw or amend the Request for Proposal at any time. The State reserves the right to waive any deviations or errors that are not material, do not invalidate the legitimacy of the proposal, and do not improve the bidder's competitive position. All awards will be made in a manner deemed in the best interest of the State. The Request for Proposal does not commit the State to award a contract. If, in the opinion of the State, revisions or amendments will require substantive changes in proposals, the due date may be extended.

By submitting a proposal in response to this Request for Proposal, the bidder grants to the State the right to contact or arrange a visit in person with any or all of the bidder's clients.

Once an intent to award decision has been determined, it will be posted to the Internet at: <http://www.das.state.ne.us/materiel/purchasing/rfp.htm>

Grievance and protest procedure is available on the Internet at: <http://www.das.state.ne.us/materiel/purchasing/agencyervicesprocurementmanual/ProtestGrievanceProcedureForServices.doc>

Any protests must be filed by a vendor within ten (10) calendar days after the intent to award decision is posted to the Internet.

C. COMPLIANCE WITH CIVIL RIGHTS LAWS AND EQUAL OPPORTUNITY EMPLOYMENT / NONDISCRIMINATION

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contractor shall comply with all applicable local, State and Federal statutes and regulations regarding civil rights laws and equal opportunity employment. The Nebraska Fair Employment Practice Act prohibits contractors of the State of Nebraska, and their subcontractors, from discriminating against any employee or applicant for employment, with respect to hire, tenure, terms, conditions or privileges of employment because of race, color, religion, sex, disability, or national origin (Neb. Rev. Stat. §48-1101 to 48-1125). The contractor guarantees compliance with the Nebraska Fair Employment Practice Act, and breach of this provision shall be regarded as a material breach of contract. The contractor shall insert a similar provision in all subcontracts for services to be covered by any contract resulting from this Request for Proposal.

D. PERMITS, REGULATIONS, LAWS

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contractor shall procure and pay for all permits, licenses and approvals necessary for the execution of the contract. The contractor shall comply with all applicable local, state, and federal laws, ordinances, rules, orders and regulations.

E. OWNERSHIP OF INFORMATION AND DATA

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The State of Nebraska shall have the unlimited right to publish, duplicate, use and disclose all information and data developed or derived by the contractor pursuant to this contract.

The contractor must guarantee that it has the full legal right to the materials, supplies, equipment, and other rights or titles (e.g. rights to licenses transfer or assign deliverables) necessary to execute this contract. The contract price shall, without exception, include compensation for all royalties and costs arising from patents, trademarks and copyrights that are in any way involved in the contract. It shall be the responsibility of the contractor to pay for all royalties and costs, and the State must be held harmless from any such claims.

F. INSURANCE REQUIREMENTS

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contractor shall not commence work under this contract until he or she has obtained all the insurance required hereunder and such insurance has been approved by the State. If contractor will be utilizing any subcontractors, the contractor is responsible for obtaining the certificate(s) of insurance required herein under from any and all subcontractor(s). Contractor is also responsible for ensuring subcontractor(s) maintain the insurance required until completion of the contract requirements. The contractor shall not allow any subcontractor to commence work on his or her subcontract until all similar insurance required of the subcontractor has been obtained and approved by the contractor. Approval of the insurance by the State shall not limit, relieve or decrease the liability of the contractor hereunder.

If by the terms of any insurance a mandatory deductible is required, or if the contractor elects to increase the mandatory deductible amount, the contractor shall be responsible for payment of the amount of the deductible in the event of a paid claim.

1. WORKERS' COMPENSATION INSURANCE

The contractor shall take out and maintain during the life of this contract the statutory Workers' Compensation and Employer's Liability Insurance for all of the contractors' employees to be engaged in work on the project under this contract and, in case any such work is sublet, the contractor shall require the subcontractor similarly to provide Worker's Compensation and Employer's Liability Insurance for all of the subcontractor's employees to be engaged in such work. This policy shall be written to meet the statutory requirements for the state in which the work is to be performed, including Occupational Disease. This policy shall include a waiver of subrogation in favor of the State. The amounts of such insurance shall not be less than the limits stated hereinafter.

2. COMMERCIAL GENERAL LIABILITY INSURANCE AND COMMERCIAL AUTOMOBILE LIABILITY INSURANCE

The contractor shall take out and maintain during the life of this contract such Commercial General Liability Insurance and Commercial Automobile Liability Insurance as shall protect contractor and any subcontractor performing work covered by this contract from claims for damages for bodily injury, including death, as well as from claims for property damage, which may arise from operations under this contract, whether such operation be by the contractor or by any subcontractor or by anyone

directly or indirectly employed by either of them, and the amounts of such insurance shall not be less than limits stated hereinafter.

The Commercial General Liability Insurance shall be written on an occurrence basis, and provide Premises/Operations, Products/Completed Operations, Independent Contractors, Personal Injury and Contractual Liability coverage. The policy shall include the State, and others as required by the contract documents, as an Additional Insured. This policy shall be primary, and any insurance or self-insurance carried by the State shall be considered excess and non-contributory. The Commercial Automobile Liability Insurance shall be written to cover all Owned, Non-owned and Hired vehicles.

3. INSURANCE COVERAGE AMOUNTS REQUIRED

a. WORKERS' COMPENSATION AND EMPLOYER'S LIABILITY

Coverage A	Statutory
Coverage B	
Bodily Injury by Accident	\$100,000 each accident
Bodily Injury by Disease	\$500,000 policy limit
Bodily Injury by Disease	\$100,000 each employee

b. COMMERCIAL GENERAL LIABILITY

General Aggregate	\$2,000,000
Products/Completed Operations Aggregate	\$2,000,000
Personal/Advertising Injury	\$1,000,000 any one person
Bodily Injury/Property Damage	\$1,000,000 per occurrence
Fire Damage	\$50,000 any one fire
Medical Payments	\$5,000 any one person

c. COMMERCIAL AUTOMOBILE LIABILITY

Bodily Injury/Property Damage	\$1,000,000 combined single limit
-------------------------------	-----------------------------------

d. UMBRELLA/EXCESS LIABILITY

Over Primary Insurance	\$1,000,000 per occurrence
------------------------	----------------------------

4. EVIDENCE OF COVERAGE

The Contractor should furnish the State, with their proposal response, a certificate of insurance coverage complying with the above requirements, which shall be submitted to the Buyer, Administrative Services, State Purchasing Bureau, 301 Centennial Mall S, 1st Fl., Lincoln, NE 68508 (facsimile 402-471-2089). These certificates or the cover sheet shall reference the RFP number, and the certificates shall include the name of the company, policy numbers, effective dates, dates of expiration and amounts and types of coverage afforded. If the State is damaged by the failure of the contractor to maintain such insurance, then the contractor shall be responsible for all reasonable costs properly attributable thereto.

Notice of cancellation of any required insurance policy must be submitted to Buyer, Administrative Services, State Purchasing Bureau, 301 Centennial Mall S, 1st Fl., Lincoln, NE 68508 (facsimile 402-471-2089 when issued and a new coverage binder shall be submitted immediately to ensure no break in coverage.

G. COOPERATION WITH OTHER CONTRACTORS

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The State may already have in place or choose to award supplemental contracts for work related to this Request for Proposal, or any portion thereof.

- 1. The State reserves the right to award the contract jointly between two or more potential contractors, if such an arrangement is in the best interest of the State.
- 2. The contractor shall agree to cooperate with such other contractors, and shall not commit or permit any act which may interfere with the performance of work by any other contractor.

H. INDEPENDENT CONTRACTOR

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

It is agreed that nothing contained herein is intended or should be construed in any manner as creating or establishing the relationship of partners between the parties hereto. The contractor represents that it has, or will secure at its own expense, all personnel required to perform the services under the contract. The contractor's employees and other persons engaged in work or services required by the contractor under the contract shall have no contractual relationship with the State; they shall not be considered employees of the State.

All claims on behalf of any person arising out of employment or alleged employment (including without limit claims of discrimination against the contractor, its officers or its agents) shall in no way be the responsibility of the State. The contractor will hold the State harmless from any and all such claims. Such personnel or other persons shall not require nor be entitled to any compensation, rights or benefits from the State including without limit, tenure rights, medical and hospital care, sick and vacation leave, severance pay or retirement benefits.

I. CONTRACTOR RESPONSIBILITY

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contractor is solely responsible for fulfilling the contract, with responsibility for all services offered and products to be delivered as stated in the Request for Proposal, the contractor's proposal, and the resulting contract. The contractor shall be the sole point of contact regarding all contractual matters.

If the contractor intends to utilize any subcontractors' services, the subcontractors' level of effort, tasks and time allocation must be clearly defined in the contractor's proposal. The contractor shall agree that it will not utilize any subcontractors not specifically included in its proposal, in the performance of the contract, without the prior written authorization of the State. Following execution of the contract, the contractor shall proceed diligently with all services and shall perform such services with qualified personnel in accordance with the contract.

J. CONTRACTOR PERSONNEL

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contractor warrants that all persons assigned to the project shall be employees of the contractor or specified subcontractors, and shall be fully qualified to perform the work required

herein. Personnel employed by the contractor to fulfill the terms of the contract shall remain under the sole direction and control of the contractor. The contractor shall include a similar provision in any contract with any subcontractor selected to perform work on the project.

Personnel commitments made in the contractor's proposal shall not be changed without the prior written approval of the State. Replacement of key personnel, if approved by the State, shall be with personnel of equal or greater ability and qualifications.

The State reserves the right to require the contractor to reassign or remove from the project any contractor or subcontractor employee.

In respect to its employees, the contractor agrees to be responsible for the following:

1. any and all employment taxes and/or other payroll withholding;
2. any and all vehicles used by the contractor's employees, including all insurance required by state law;
3. damages incurred by contractor's employees within the scope of their duties under the contract;
4. maintaining workers' compensation and health insurance and submitting any reports on such insurance to the extent required by governing State law; and
5. determining the hours to be worked and the duties to be performed by the contractor's employees.

Notice of cancellation of any required insurance policy must be submitted to the State when issued and a new coverage binder shall be submitted immediately to ensure no break in coverage.

K. STATE OF NEBRASKA PERSONNEL RECRUITMENT PROHIBITION

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contractor shall not, at any time, recruit or employ any State employee or agent who has worked on the Request for Proposal or project, or who had any influence on decisions affecting the Request for Proposal or project.

L. CONFLICT OF INTEREST

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

By submitting a proposal, bidder certifies that there does not now exist any relationship between the bidder and any person or entity which is or gives the appearance of a conflict of interest related to this Request for Proposal or project.

The bidder certifies that it shall not take any action or acquire any interest, either directly or indirectly, which will conflict in any manner or degree with the performance of its services hereunder or which creates an actual or appearance of conflict of interest.

The bidder certifies that it will not employ any individual known by bidder to have a conflict of interest.

M. PROPOSAL PREPARATION COSTS

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The State shall not incur any liability for any costs incurred by bidders in replying to this Request for Proposal, in the demonstrations, or oral presentations, or in any other activity related to bidding on this Request for Proposal.

N. ERRORS AND OMISSIONS

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The bidder shall not take advantage of any errors and/or omissions in this Request for Proposal or resulting contract. The bidder must promptly notify the State of any errors and/or omissions that are discovered.

O. BEGINNING OF WORK

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The bidder shall not commence any billable work until a valid contract has been fully executed by the State and the successful contractor. The contractor will be notified in writing when work may begin.

P. ASSIGNMENT BY THE STATE

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The State shall have the right to assign or transfer the contract or any of its interests herein to any agency, board, commission, or political subdivision of the State of Nebraska. There shall be no charge to the State for any assignment hereunder.

Q. ASSIGNMENT BY THE CONTRACTOR

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contractor may not assign, voluntarily or involuntarily, the contract or any of its rights or obligations hereunder (including without limitation rights and duties of performance) to any third party, without the prior written consent of the State, which will not be unreasonably withheld.

R. DEVIATIONS FROM THE REQUEST FOR PROPOSAL

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The requirements contained in the Request for Proposal become a part of the terms and conditions of the contract resulting from this Request for Proposal. Any deviations from the Request for Proposal must be clearly defined by the bidder in its proposal and, if accepted by the State, will become part of the contract. Any specifically defined deviations must not be in conflict with the basic nature of the Request for Proposal or mandatory requirements. "Deviation", for the purposes of this RFP, means any proposed changes or alterations to either the contractual language or deliverables within the scope of this RFP. The State discourages deviations and reserves the right to reject proposed deviations.

S. GOVERNING LAW

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contract shall be governed in all respects by the laws and statutes of the State of Nebraska. Any legal proceedings against the State of Nebraska regarding this Request for Proposal or any resultant contract shall be brought in the State of Nebraska administrative or judicial forums as defined by State law. The contractor must be in compliance with all Nebraska statutory and regulatory law.

T. ATTORNEY'S FEES

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

In the event of any litigation, appeal or other legal action to enforce any provision of the contract, the contractor agrees to pay all expenses of such action, as permitted by law, including attorney's fees and costs, if the State is the prevailing party.

U. ADVERTISING

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contractor agrees not to refer to the contract award in advertising in such a manner as to state or imply that the company or its services are endorsed or preferred by the State. News releases pertaining to the project shall not be issued without prior written approval from the State.

V. STATE PROPERTY

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contractor shall be responsible for the proper care and custody of any State-owned property which is furnished for the contractor's use during the performance of the contract. The contractor shall reimburse the State for any loss or damage of such property, normal wear and tear is expected.

W. SITE RULES AND REGULATIONS

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contractor shall use its best efforts to ensure that its employees, agents and subcontractors comply with site rules and regulations while on State premises. If the contractor must perform on-site work outside of the daily operational hours set forth by the State, it must make arrangements with the State to ensure access to the facility and the equipment has been arranged. No additional payment will be made by the State on the basis of lack of access, unless the State fails to provide access as agreed to between the State and the contractor.

X. NOTIFICATION

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

During the bid process, all communication between the State and a bidder shall be between the bidder's representative clearly noted in its proposal and the buyer noted in Section II, A. Procuring Office and Contact Person of this RFP. After the award of the contract, all notices under the contract shall be deemed duly given upon delivery to the staff designated as the

point of contact for this Request for Proposal, in person, or upon delivery by U.S. Mail, facsimile, or e-mail. Each bidder should provide in its proposal the name, title and complete address of its designee to receive notices.

1. Except as otherwise expressly specified herein, all notices, requests or other communications shall be in writing and shall be deemed to have been given if delivered personally or mailed, by U.S. Mail, postage prepaid, return receipt requested, to the parties at their respective addresses set forth above, or at such other addresses as may be specified in writing by either of the parties. All notices, requests, or communications shall be deemed effective upon personal delivery or three (3) days following deposit in the mail.
2. Whenever the contractor encounters any difficulty which is delaying or threatens to delay its timely performance under the contract, the contractor shall immediately give notice thereof in writing to the State reciting all relevant information with respect thereto. Such notice shall not in any way constitute a basis for an extension of the delivery schedule or be construed as a waiver by the State of any of its rights or remedies to which it is entitled by law or equity or pursuant to the provisions of the contract. Failure to give such notice, however, may be grounds for denial of any request for an extension of the delivery schedule because of such delay.

Either party may change its address for notification purposes by giving notice of the change, and setting forth the new address and an effective date.

For the duration of the contract, all communication between contractor and the State regarding the contract shall take place between the contractor and individuals specified by the State in writing. Communication about the contract between contractor and individuals not designated as points of contact by the State is strictly forbidden.

Y. EARLY TERMINATION

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contract may be terminated as follows:

1. The State and the contractor, by mutual written agreement, may terminate the contract at any time.
2. The State, in its sole discretion, may terminate the contract for any reason upon 30 days written notice to the contractor. Such termination shall not relieve the contractor of warranty or other service obligations incurred under the terms of the contract. In the event of cancellation the contractor shall be entitled to payment, determined on a pro rata basis, for products or services satisfactorily performed or provided.
3. The State may terminate the contract immediately for the following reasons:
 - a. if directed to do so by statute;
 - b. contractor has made an assignment for the benefit of creditors, has admitted in writing its inability to pay debts as they mature, or has ceased operating in the normal course of business;
 - c. a trustee or receiver of the contractor or of any substantial part of the contractor's assets has been appointed by a court;

- d. fraud, misappropriation, embezzlement, malfeasance, misfeasance, or illegal conduct pertaining to performance under the contract by its contractor, its employees, officers, directors or shareholders;
- e. an involuntary proceeding has been commenced by any party against the contractor under any one of the chapters of Title 11 of the United States Code and (i) the proceeding has been pending for at least sixty (60) days; or (ii) the contractor has consented, either expressly or by operation of law, to the entry of an order for relief; or (iii) the contractor has been decreed or adjudged a debtor;
- f. a voluntary petition has been filed by the contractor under any of the chapters of Title 11 of the United States Code;
- g. contractor intentionally discloses confidential information;
- h. contractor has or announces it will discontinue support of the deliverable;
- i. second or subsequent documented "vendor performance report" form deemed acceptable by the State Purchasing Bureau.

Z. FUNDING OUT CLAUSE OR LOSS OF APPROPRIATIONS

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The State may terminate the contract, in whole or in part, in the event funding is no longer available. The State's obligation to pay amounts due for fiscal years following the current fiscal year is contingent upon legislative appropriation of funds for the contract. Should said funds not be appropriated, the State may terminate the contract with respect to those payments for the fiscal years for which such funds are not appropriated. The State will give the contractor written notice thirty (30) days prior to the effective date of any termination, and advise the contractor of the location (address and room number) of any related equipment. All obligations of the State to make payments after the termination date will cease and all interest of the State in any related equipment will terminate. The contractor shall be entitled to receive just and equitable compensation for any authorized work which has been satisfactorily completed as of the termination date. In no event shall the contractor be paid for a loss of anticipated profit.

AA. BREACH BY CONTRACTOR

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The State may terminate the contract, in whole or in part, if the contractor fails to perform its obligations under the contract in a timely and proper manner. The State may, by providing a written notice of default to the contractor, allow the contractor to cure a failure or breach of contract within a period of thirty (30) days (or longer at State's discretion considering the gravity and nature of the default). Said notice shall be delivered by Certified Mail, Return Receipt Requested or in person with proof of delivery. Allowing the contractor time to cure a failure or breach of contract does not waive the State's right to immediately terminate the contract for the same or different contract breach which may occur at a different time. In case of default of the contractor, the State may contract the service from other sources and hold the contractor responsible for any excess cost occasioned thereby.

BB. ASSURANCES BEFORE BREACH

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

If any document or deliverable required pursuant to the contract does not fulfill the requirements of the Request for Proposal/resulting contract, upon written notice from the State, the contractor shall deliver assurances in the form of additional contractor resources at

no additional cost to the project in order to complete the deliverable, and to ensure that other project schedules will not be adversely affected.

CC. PENALTY

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

In the event that the contractor fails to perform any substantial obligation under the contract, the State may withhold all monies due and payable to the contractor, without penalty, until such failure is cured or otherwise adjudicated. Failure to meet the dates stipulated in the contract for the deliverables may result in an assessment of penalty due the State of \$1000.00 dollars per day, until the deliverables are approved. Contractor will be notified in writing when penalty will commence.

DD. FORCE MAJEURE

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

Neither party shall be liable for any costs or damages resulting from its inability to perform any of its obligations under the contract due to a natural disaster, or other similar event outside the control and not the fault of the affected party (“Force Majeure Event”). A Force Majeure Event shall not constitute a breach of the contract. The party so affected shall immediately give notice to the other party of the Force Majeure Event. The State may grant relief from performance of the contract if the contractor is prevented from performance by a Force Majeure Event. The burden of proof for the need for such relief shall rest upon the contractor. To obtain release based on a Force Majeure Event, the contractor shall file a written request for such relief with the State Purchasing Bureau. Labor disputes with the impacted party’s own employees will not be considered a Force Majeure Event and will not suspend performance requirements under the contract.

EE. PROHIBITION AGAINST ADVANCE PAYMENT

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

Payments shall not be made until contractual deliverable(s) are received and accepted by the State.

FF. PAYMENT

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

State will render payment to contractor when the terms and conditions of the contract and specifications have been satisfactorily completed on the part of the contractor as solely determined by the State. Payment will be made by the responsible agency in compliance with the State of Nebraska Prompt Payment Act (See Neb. Rev. Stat. §81-2401 through 81-2408). The State may require the contractor to accept payment by electronic means such as ACH deposit. In no event shall the State be responsible or liable to pay for any services provided by the contractor prior to the Effective Date, and the contractor hereby waives any claim or cause of action for any such services.

GG. INVOICES

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

Invoices for payments must be submitted by the contractor to the agency requesting the services with sufficient detail to support payment. Invoices must be submitted to: Medicaid and Long-Term Care Division, P.O. Box 95026, Lincoln, NE 68509. The terms and conditions included in the contractor’s invoice shall be deemed to be solely for the convenience of the parties. No terms or conditions of any such invoice shall be binding upon the State, and no action by the State, including without limitation the payment of any such invoice in whole or in part, shall be construed as binding or estopping the State with respect to any such term or condition, unless the invoice term or condition has been previously agreed to by the State as an amendment to the contract.

HH. AUDIT REQUIREMENTS

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

All contractor books, records and documents relating to work performed or monies received under the contract shall be subject to audit at any reasonable time upon the provision of reasonable notice by the State. These records shall be maintained for a period of five (5) full years from the date of final payment, or until all issues related to an audit, litigation or other action are resolved, whichever is longer. All records shall be maintained in accordance with generally accepted accounting principles.

In addition to, and in no way in limitation of any obligation in the contract, the contractor shall agree that it will be held liable for any State audit exceptions, and shall return to the State all payments made under the contract for which an exception has been taken or which has been disallowed because of such an exception. The contractor agrees to correct immediately any material weakness or condition reported to the State in the course of an audit.

II. TAXES

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The State is not required to pay taxes of any kind and assumes no such liability as a result of this solicitation. Any property tax payable on the contractor's equipment which may be installed in a state-owned facility is the responsibility of the contractor.

JJ. INSPECTION AND APPROVAL

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

Final inspection and approval of all work required under the contract shall be performed by the designated State officials. The State and/or its authorized representatives shall have the right to enter any premises where the contractor or subcontractor duties under the contract are being performed, and to inspect, monitor or otherwise evaluate the work being performed. All inspections and evaluations shall be at reasonable times and in a manner that will not unreasonably delay work.

KK. CHANGES IN SCOPE/CHANGE ORDERS

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The State may, at any time with written notice to the contractor, make changes within the general scope of the contract. Changes in scope shall only be conducted with the written approval of the State’s designee as so defined by the State from time to time. (The State retains the right to employ the services of a third party to perform any change order(s)).

The State may, at any time work is in progress, by written order, make alterations in the terms of work as shown in the specifications, require the performance of extra work, decrease the quantity of work, or make such other changes as the State may find necessary or desirable. The contractor shall not claim forfeiture of contract by reasons of such changes by the State. Changes in work and the amount of compensation to be paid to the contractor for any extra work so ordered shall be determined in accordance with the applicable unit prices of the contractor’s proposal.

Corrections of any deliverable services or performance of work required pursuant to the contract shall not be deemed a modification requiring a change order.

LL. SEVERABILITY

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

If any term or condition of the contract is declared by a court of competent jurisdiction to be illegal or in conflict with any law, the validity of the remaining terms and conditions shall not be affected, and the rights and obligations of the parties shall be construed and enforced as if the contract did not contain the particular provision held to be invalid.

MM. CONFIDENTIALITY

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

All materials and information provided by the State or acquired by the contractor on behalf of the State shall be regarded as confidential information. All materials and information provided by the State or acquired by the contractor on behalf of the State shall be handled in accordance with Federal and State Law, and ethical standards. The contractor must ensure the confidentiality of such materials or information. Should said confidentiality be breached by a contractor; contractor shall notify the State immediately of said breach and take immediate corrective action.

It is incumbent upon the contractor to inform its officers and employees of the penalties for improper disclosure imposed by the Privacy Act of 1974, 5 U.S.C. 552a. Specifically, 5 U.S.C. 552a (i)(1), which is made applicable to contractors by 5 U.S.C. 552a (m)(1), provides that any officer or employee of a contractor, who by virtue of his/her employment or official position has possession of or access to agency records which contain individually identifiable information, the disclosure of which is prohibited by the Privacy Act or regulations established thereunder, and who knowing that disclosure of the specific material is prohibited, willfully discloses the material in any manner to any person or agency not entitled to receive it, shall be guilty of a misdemeanor and fined not more than \$5,000.

NN. PROPRIETARY INFORMATION

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

Data contained in the proposal and all documentation provided therein, become the property of the State of Nebraska and the data becomes public information upon opening the proposal. If the bidder wishes to have any information withheld from the public, such information must fall within the definition of proprietary information contained within Nebraska’s public record statutes. All proprietary information the bidder wishes the State to withhold must be submitted in a sealed package, which is separate from the remainder of the proposal. The separate package must be clearly marked PROPRIETARY on the outside of the package. Bidders may not mark their entire Request for Proposal as proprietary. Bidder’s cost proposals may not be marked as proprietary information. Failure of the bidder to follow the instructions for submitting proprietary and copyrighted information may result in the information being viewed by other bidders and the public. Proprietary information is defined as trade secrets, academic and scientific research work which is in progress and unpublished, and other information which if released would give advantage to business competitors and serve no public purpose (see Neb. Rev. Stat. §84-712.05(3)). In accordance with Attorney General Opinions 92068 and 97033, bidders submitting information as proprietary may be required to prove specific, named competitor(s) who would be advantaged by release of the information and the specific advantage the competitor(s) would receive. Although every effort will be made to withhold information that is properly submitted as proprietary and meets the State’s definition of proprietary information, the State is under no obligation to maintain the confidentiality of proprietary information and accepts no liability for the release of such information.

OO. CERTIFICATION OF INDEPENDENT PRICE DETERMINATION/COLLUSIVE BIDDING

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

By submission of this proposal, the bidder certifies, that he or she is the party making the foregoing proposal that the proposal is not made in the interest of, or on behalf of, any undisclosed person, partnership, company, association, organization, or corporation; that the proposal is genuine and not collusive or sham; that the bidder has not directly or indirectly induced or solicited any other bidder to put in a false or sham proposal, and has not directly or indirectly colluded, conspired, connived, or agreed with any bidder or anyone else to put in a sham proposal, or that anyone shall refrain from bidding; that the bidder has not in any manner, directly or indirectly, sought by agreement, communication, or conference with anyone to fix the proposal price of the bidder or any other bidder, or to fix any overhead, profit, or cost element of the proposal price, or of that of any other bidder, or to secure any advantage against the public body awarding the contract of anyone interested in the proposed contract; that all statements contained in the proposal are true; and further that the bidder has not, directly or indirectly, submitted his or her proposal price or any breakdown thereof, or the contents thereof, or divulged information or data relative thereto, or paid, and will not pay, any fee to any corporation, partnership, company association, organization, proposal depository, or to any member or agent thereof to effectuate a collusive or sham proposal.

PP. PRICES

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

All prices, costs, terms and conditions outlined in the proposal shall remain fixed and valid commencing on the opening date of the proposal until an award is made (and for bidder

receiving award prices shall remain as bid for the duration of the contract unless otherwise so stated in the contract) or the Request for Proposal is cancelled.

Contractor represents and warrants that all prices for services, now or subsequently specified are as low as and no higher than prices which the contractor has charged or intends to charge customers other than the State for the same or similar products and services of the same or equivalent quantity and quality for delivery or performance during the same periods of time. If, during the term of the contract, the contractor shall reduce any and/or all prices charged to any customers other than the State for the same or similar products or services specified herein, the contractor shall make an equal or equivalent reduction in corresponding prices for said specified products or services.

Contractor also represents and warrants that all prices set forth in the contract and all prices in addition, which the contractor may charge under the terms of the contract, do not and will not violate any existing federal, state or municipal law or regulations concerning price discrimination and/or price fixing. Contractor agrees to hold the State harmless from any such violation. Prices quoted shall not be subject to increase throughout the contract period unless specifically allowed by these specifications.

QQ. BEST AND FINAL OFFER

Accept (Initial) Reject (Initial) Reject and Provide Alternative within RFP Response (Initial)

The State will compile the final scores for all parts of each proposal. The award may be granted to the highest scoring responsive and responsible bidder. Alternatively, the highest scoring bidder or bidders may be requested to submit best and final offers. If best and final offers are requested by the State and submitted by the bidder, they will be evaluated (using the stated criteria), scored and ranked by the Evaluation Committee. The award will then be granted to the highest scoring bidder. However, a bidder should provide its best offer in its original proposal. Bidders should not expect that the State will request a best and final offer.

RR. ETHICS IN PUBLIC CONTRACTING

Accept (Initial) Reject (Initial) Reject and Provide Alternative within RFP Response (Initial)

No bidder shall pay or offer to pay, either directly or indirectly, any fee, commission compensation, gift, gratuity, or anything of value to any State officer, legislator or employee based on the understanding that the receiving person's vote, actions or judgment will be influenced thereby. No bidder shall give any item of value to any employee of the State Purchasing Bureau.

Bidders shall be prohibited from utilizing the services of lobbyists, attorneys, political activists, or consultants to secure the contract. It is the intent of this provision to assure that the prohibition of state contact during the procurement process is not subverted through the use of lobbyists, attorneys, political activists, or consultants. It is the intent of the State that the process of evaluation of proposals and award of the contract be completed without external influence. It is not the intent of this section to prohibit bidders from seeking professional advice, for example consulting legal counsel, regarding terms and conditions of this Request for Proposal or the format or content of their proposal.

If the bidder is found to be in non-compliance with this section of the Request for Proposal, they may forfeit the contract if awarded to them or be disqualified from the selection process.

SS. INDEMNIFICATION

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

1. GENERAL

The contractor agrees to defend, indemnify, hold, and save harmless the State and its employees, volunteers, agents, and its elected and appointed officials (“the indemnified parties”) from and against any and all claims, liens, demands, damages, liability, actions, causes of action, losses, judgments, costs, and expenses of every nature, including investigation costs and expenses, settlement costs, and attorney fees and expenses (“the claims”), sustained or asserted against the State, arising out of, resulting from, or attributable to the willful misconduct, negligence, error, or omission of the contractor, its employees, subcontractors, consultants, representatives, and agents, except to the extent such contractor liability is attenuated by any action of the State which directly and proximately contributed to the claims.

2. INTELLECTUAL PROPERTY

The contractor agrees it will at its sole cost and expense, defend, indemnify, and hold harmless the indemnified parties from and against any and all claims, to the extent such claims arise out of, result from, or are attributable to the actual or alleged infringement or misappropriation of any patent, copyright, trade secret, trademark, or confidential information of any third party by the contractor or its employees, subcontractors, consultants, representatives, and agents; provided, however, the State gives the contractor prompt notice in writing of the claim. The contractor may not settle any infringement claim that will affect the State’s use of the Licensed Software without the State’s prior written consent, which consent may be withheld for any reason.

If a judgment or settlement is obtained or reasonably anticipated against the State’s use of any intellectual property for which the contractor has indemnified the State, the contractor shall at the contractor’s sole cost and expense promptly modify the item or items which were determined to be infringing, acquire a license or licenses on the State’s behalf to provide the necessary rights to the State to eliminate the infringement, or provide the State with a non-infringing substitute that provides the State the same functionality. At the State’s election, the actual or anticipated judgment may be treated as a breach of warranty by the contractor, and the State may receive the remedies provided under this RFP.

3. PERSONNEL

The contractor shall, at its expense, indemnify and hold harmless the indemnified parties from and against any claim with respect to withholding taxes, worker’s compensation, employee benefits, or any other claim, demand, liability, damage, or loss of any nature relating to any of the personnel provided by the contractor.

TT. NEBRASKA TECHNOLOGY ACCESS STANDARDS

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

Contractor shall review the Nebraska Technology Access Standards, found at <http://nitc.nebraska.gov/standards/2-101.html> and ensure that products and/or services provided under the contract comply with the applicable standards. In the event such standards change during the contractor’s performance, the State may create an amendment to

the contract to request that contract comply with the changed standard at a cost mutually acceptable to the parties.

UU. ANTITRUST

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contractor hereby assigns to the State any and all claims for overcharges as to goods and/or services provided in connection with this contract resulting from antitrust violations which arise under antitrust laws of the United States and the antitrust laws of the State.

VV. DISASTER RECOVERY/BACK UP PLAN

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contractor shall have a disaster recovery and back-up plan, of which a copy should be provided to the State, which includes, but is not limited to equipment, personnel, facilities, and transportation, in order to continue services as specified under these specifications in the event of a disaster.

WW. TIME IS OF THE ESSENCE

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

Time is of the essence in this contract. The acceptance of late performance with or without objection or reservation by the State shall not waive any rights of the State nor constitute a waiver of the requirement of timely performance of any obligations on the part of the contractor remaining to be performed.

XX. RECYCLING

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

Preference will be given to items which are manufactured or produced from recycled material or which can be readily reused or recycled after their normal use as per state statute (Neb. Rev. Stat. §81-15, 159).

YY. DRUG POLICY

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

Contractor certifies that it maintains a drug free work place environment to ensure worker safety and workplace integrity. Contractor agrees to provide a copy of its drug free workplace policy at any time upon request by the State.

ZZ. NEW EMPLOYEE WORK ELIGIBILITY STATUS

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The Contractor is required and hereby agrees to use a federal immigration verification system to determine the work eligibility status of new employees physically performing services within the State of Nebraska. A federal immigration verification system means the electronic verification of the work authorization program authorized by the Illegal Immigration Reform and Immigrant Responsibility Act of 1996, 8 U.S.C. 1324a, known as the E-Verify Program, or an equivalent federal program designated by the United States Department of Homeland Security

or other federal agency authorized to verify the work eligibility status of a newly hired employee.

If the Contractor is an individual or sole proprietorship, the following applies:

1. The Contractor must complete the United States Citizenship Attestation Form, available on the Department of Administrative Services website at www.das.state.ne.us.
2. If the Contractor indicates on such attestation form that he or she is a qualified alien, the Contractor agrees to provide the US Citizenship and Immigration Services documentation required to verify the Contractor's lawful presence in the United States using the Systematic Alien Verification for Entitlements (SAVE) Program.
3. The Contractor understands and agrees that lawful presence in the United States is required and the Contractor may be disqualified or the contract terminated if such lawful presence cannot be verified as required by Neb. Rev. Stat. §4-108.

AAA. CERTIFICATION REGARDING DEBARMENT, SUSPENSION AND INELIGIBILITY

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contractor, by signature to this RFP, certifies that the contractor is not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded by any federal department or agency from participating in transactions (debarred). The contractor also agrees to include the above requirements in any and all subcontracts into which it enters. The contractor shall immediately notify the Department if, during the term of this contract, contractor becomes debarred. The Department may immediately terminate this contract by providing contractor written notice if contractor becomes debarred during the term of this contract.

IV. PROJECT DESCRIPTION AND SCOPE OF WORK

In March 2010, PPACA and the Health Care and Education Reconciliation Act of 2010 were signed into law. The two laws are collectively referred to as the Affordable Care Act (ACA). Sections of the ACA, codified at 42 CFR 431, 435, and 437, require the creation of a health insurance exchange in each state, either by the state or by the federal government. The State of Nebraska will employ the Federally Facilitated Marketplace (Marketplace) option.

An analysis was conducted by the Nebraska Department of Health and Human Services' (Department) to determine the most desirable option for meeting ACA compliance, and CMS Seven Standards and Conditions as defined in Medicaid IT Supplement (MITS-11-01-v1.0). The analysis revealed that replacing the current Medicaid eligibility and enrollment system with a modern solution was the best course of action given the project constraints. The same analysis revealed there was not enough time to procure and implement a solution by the ACA mandated deadline of October 1, 2013.

The purpose of this RFP is to select a Contractor who is responsible for performing Independent Verification and Validation (IV&V) services for implementing a new Eligibility and Enrollment Solution (EES). The Department plans to release an RFP to procure an Eligibility and Enrollment Solution. The RFP will procure the products and services of a Systems Integrator with an Eligibility and Enrollment Solution.

Nebraska's existing Eligibility and Enrollment System is almost twenty years old. The current system was developed with client/server technology. Nebraska intends to complete replacement of the existing Medicaid Eligibility and Enrollment System in order to access the enhanced federal matching funds for these legacy system replacements since the enhanced funding expires at the end of 2015.

The Department will award one Contractor to fulfill all the IV&V responsibilities described herein. The awarded IV&V Contractor shall review EES related artifacts defined by the Department to gain sufficient understanding of the EES project.

The IV&V services described in this RFP must comply with IV&V regulatory requirements detailed in 45 CFR 95.626, which requires that IV&V efforts be conducted by an entity that is independent. The IV&V contractor is required to:

1. Develop an IV&V Workplan. The plan must be provided directly to the Centers for Medicare and Medicaid (CMS) at the same time it is given to the Department.
2. Review and make recommendations on both the management of the EES project (Department and Contractor), and the technical aspects of the project. The IV&V Contractor must provide the results of its analysis directly to CMS at the same time it reports to the State.
3. Consult with all stakeholders and assess the user involvement and buy-in regarding system functionality and the system's ability to support program business needs.
4. Conduct an analysis of past project performance sufficient to identify and make recommendations for improvement.
5. Provide EES risk management assessment.
6. Develop EES performance metrics which allow tracking project completion against milestones set by the Department.

The bidder must provide the following information in response to this Request for Proposal.

A. PROJECT OVERVIEW

The purpose of this procurement is to contract for the IV&V services to assist the Department to ensure the success of the EES project by facilitating early detection and correction of errors, enhance management insight into risks and ensure compliance with project performance, schedule, and budget requirements. The Information Systems and Technology (IS&T) Division provides leadership, project management, planning, implementation, and support services for information technology for the Department. IS&T will provide support for the project, including the technical planning, implementation, testing and maintenance of the new solution.

The Department is seeking proposals from qualified bidders with IV&V expertise, project management expertise, and relevant past experience performing IV&V work for Medicaid eligibility determination systems similar to the system that will be developed for the State.

The Department seeks an IV&V contractor who will bring project personnel, processes, approaches and tools to meet the requirements of the IV&V services for the EES Project.

The IV&V scope of work includes:

1. Program Management
2. Deliverables Review and Acceptance
3. Quality Assurance
4. Contract Compliance

The contractor awarded the IV&V contract for the EES project, their subcontractor(s) and vendor(s) are precluded from submitting an EES proposal, assisting another company in making a proposal, or otherwise materially participating in any subsequent contract related to the EES project.

B. PROJECT REQUIREMENTS

The IV&V Contractor will perform all IV&V responsibilities defined in this RFP throughout the life of the contract including the optional renewal period. The IV&V Contractor is expected to actively participate in meetings and to contribute IV&V expertise to all phases of the EES Project to ensure that the EES Contractor activities result in successful project completion.

The IV & V project requirements are outlined in the following sections. The tasks and activities within this section are not necessarily listed in the order that they should be completed. Bidders must reflect within their proposal and preliminary project plan their recommended approach to scheduling and accomplishing the tasks and activities identified within this RFP.

1. PROGRAM MANAGEMENT

Perform a review of IV&V project activities for the EES Project which shall be documented and submitted in the appropriate Management Briefing, EES Management, Project Status or Deliverable Review Report. Activities shall include but not be limited to:

- a. Delivery of an Initial Project Assessment Report that includes the initial status of each activity shown on the IV&V Management Plan for the EES project.
- b. A review of the EES Contractor's analysis of risk areas of the implementation of the EES Component and the risk mitigation plan for those identified risks. The IV&V Contractor shall include recommendations for any deficiencies it finds during its review of the risk mitigation plans. The results and recommendation

of the analysis shall be written and presented as part of the Risk Assessment Report.

- c.** Hosting the Monthly Management Briefings at times approved by the Department.
- d.** Attendance at all status meetings between the Department and the EES Contractor, which will occur on at least a monthly basis and may occur more regularly based on the phase and stage of the implementation of the EES.
- e.** Assessment of the methodology for maintaining requirements traceability throughout the transfer and development process.
- f.** A review all MITA documentation, guidance and rules promulgated by CMS..
- g.** A review all ACA Regulations documentation, guidance and rules promulgated by CMS.
- h.** Notification to the Department if any MITA documentation, guidance and rules, or any changes to those items, will impact the implementation of any EES Component or the work performed by any EES Contractor.
- i.** Notification to the Department if any ACA Regulation documentation, guidance and rules, or any changes to those items, will impact the implementation of any EES Component or the work performed by any EES Contractor.
- j.** Performance of program management services for all EES activities. These program management services shall include, at a minimum, all of the following:
 - i.** Assess the progress of the implementation of the entire EES project, and recommend improvements as necessary.
 - ii.** Verify that lines of reporting and associated responsibility within the EES Contractor to ensure adequate technical and managerial oversight of the project.
 - iii.** Verify the EES Contractor and the State are not independently duplicating effort toward the same end.
 - iv.** Evaluate project progress, resources, budget, schedules, work flow and reporting.
 - v.** Verify the EES Contractor has created a project management plan and that the EES Contractor is following the approved project management plan.
 - vi.** Evaluate the project management plans and procedures to verify that they are developed, communicated, implemented, monitored and complete.
 - vii.** Evaluate project reporting plan and actual project reports to verify project status is accurately traced using project metrics.
 - viii.** Verify milestones and completion dates contained in the EES Contractor's project management plan and contract are planned, monitored and met.
 - ix.** Verify the EES Contractor has created and implemented an appropriate project issue tracking mechanism that documents issues as they arise, enables communication of issues to proper stakeholders, documents a mitigation strategy as appropriate, and tracks the issue to closure.
 - x.** Evaluate the EES Contractor's planned life-cycle development methodology or methodologies (e.g. waterfall, evolutionary spiral, rapid prototyping, or incremental) to see if they are appropriate for the EES component that EES Contractor is developing.
 - xi.** Verify that all business process reengineering recommendations are strategic, have management backing, resources, skills and incentives necessary for effective change.

- xii. Verify that the EES Contractor has a change management plan and that the change management plan and procedures to verify them are developed, communicated, implemented, monitored and complete.
 - xiii. Verify that the EES Contractor has a communication plan and that that plan is being followed.
 - xiv. Evaluate the EES Contractor's communication plans and procedures to verify that they support communications and work product sharing between all project stakeholders and that the communication plans and strategies are effective, implemented, monitored and complete.
- k. Manage the identification, resolution and tracking of stakeholder concerns, both internal and external.
 - l. All documentation and deliverables produced in the performance by the IV&V Contractor must be stored in a central repository to be designated by the Department.

2. DELIVERABLE REVIEW AND ACCEPTANCE

As part of the Deliverable Review Report, the IV&V Contractor shall assess the EES Deliverables based upon quality attributes including:

- a. Adherence to Requirements;
- b. Clarity;
- c. Completeness;
- d. Consistency;
- e. Traceability: and
- f. Adherence to laws, rules and guideline.

Deliverable review shall be performed by identified IV&V resources that are experienced and/or certified in the related technical, functional, and federal requirements of the deliverable under review, and comments shall be submitted to Department as part of the Deliverable Review Report within a timeframe that allows inclusion of IV&V feedback in Department's response to the EES Contractor.

The IV&V Contractor shall perform the following Deliverable Review and Acceptance tasks:

- a. Develop and submit a Performance Metrics Document to track project completion against milestones set by the Department using Department approved performance metrics.
- b. Review each deliverable and report submitted by the EES Contractor, as directed by the Department, for content, quality and timeliness.
- c. Notify the Department of any EES Contractor submitted management reports that do not contain the content required for that report, are of not sufficient quality or were not submitted in a timely manner.
- d. Participate in walk-through of EES Contractor deliverables as requested by the Department.
- e. Assess each reviewed deliverable and recommend a corrective action plan for each deliverable that fails to achieve the standards or timelines in that EES Contractor's contract with the Department.
- f. The IV&V Contractor will work with the Department to define criteria for a Critical Incident which could adversely affect the outcome of the EES Project.

- g.** Notify the Department immediately when the IV&V Contractor discovers any Critical Incident. Provide an EES Contractor Critical Incident Report for each Critical Incident that summarizes the incident, how it may affect the project, notes any discrepancies found by the IV&V Contractor and provides a proposed action plan to resolve the incident and mitigate its impact.

3. QUALITY ASSURANCE

The IV&V Contractor shall perform the following Quality Assurance tasks:

- a.** Write and verbally present Management Briefings on a monthly basis regarding the performance of the EES Contractor and the monitoring performed by the IV&V Contractor. This Management Briefing shall include, at a minimum, all of the following:

 - i.** The current general status of the EES Contractor in relation to the EES Contractor's work plans and implementation plans.
 - ii.** Any flaws or issues with the system design for each EES Component that may negatively impact the implementation of the EES with recommendations to mitigate or eliminate those flaws or issues.
 - iii.** Any flaws or issues regarding system security for each EES component that may negatively impact the implementation of the EES with recommendations to mitigate or eliminate those flaws or issues.
 - iv.** The results of any system testing or retesting performed during the prior month and recommendations on how to resolve any flaws or issues identified as a result of that system testing or retesting.
 - v.** Any flaws or issues with the interfaces within each EES Component, between each of the EES Components or between the EES Components and external systems that may negatively impact the implementation of the EES with recommendations to mitigate or eliminate those flaws or issues.
 - vi.** Any delays or issues with the transition from the Department's current Eligibility and Enrollment System to any EES Contractor and recommendations to mitigate or eliminate those delays or issues.
 - vii.** The results of all acceptance testing performed during the prior month and recommendations on how to resolve any flaws or issues identified as a result of that testing.
 - viii.** The status of the overall implementation and operation of each EES Component and any flaws or issues that are negatively impacting the operation of any EES Component with recommendations on how to resolve those issues or flaws.
 - ix.** Any recommendations regarding training provided by the EES Contractor to system users.
 - x.** Any recommendations regarding the EES Contractors' progress and procedures for managing requirements.
 - xi.** Any recommendations regarding each EES Contractor's policies and procedures for ensuring that each EES Component is secure and that the privacy of Client data is maintained.

4. CONTRACT COMPLIANCE

The IV&V Contractor shall perform the following EES Contract Compliance tasks which shall be documented and submitted in the appropriate Management Briefing, EES Management, Project Status or Deliverable Review Report:

- a.** As part of developing and submitting the Estimating and Schedule Review Recommendation Report evaluate and make recommendations on the estimating and scheduling process of the EES Project to ensure that the project budget and EES resources are adequate for the work break-down structure and schedule.
- b.** Review EES schedules to verify that adequate time and resources are assigned for planning, development, review, testing and rework.
- c.** Perform ongoing assessments of EES Contractor staffing, which include key and non-key personnel, to ensure adequate staffing for the EES Contractor to comply with their contract and maintain service levels defined throughout the EES contract.
- d.** Examine the job assignments, skills, training and experience of the EES Contractor personnel involved in program development to verify that they are adequate for the development task.
- e.** Verify that the EES Contractor's organizational structure supports training, process definition, independent Quality Assurance, Configuration Management, product evaluation, and any other functions critical for the project's success.
- f.** Monitor the performance of the EES Contractor to ensure that EES Contractor is in compliance with its contract with the Department and that the solution that EES Contractor is developing meets all requirements of its contract with the Department. This shall include, but is not limited to, monitoring all of the following:
 - i.** EES Contractor work plans.
 - ii.** EES Contractor implementation plans.
 - iii.** General Solution design for each EES Component.
 - iv.** Detailed Solution design for each EES Component.
 - v.** Solution security for each EES Component.
 - vi.** Solution testing for each EES Component.
 - vii.** EES Contractor transition from the Department's existing NE Eligibility and Enrollment System.
 - viii.** Acceptance Testing for each EES Component.
- g.** The IV&V Contractor shall evaluate the EES Contractor's progress and procedures for managing requirements. This shall include at minimum all of the following:
 - i.** Verify that system requirements are well-defined, understood and documented.
 - ii.** Verify that software requirements can be traced through design, code and test phases to verify that the system performs as intended and contains no unnecessary software elements.
 - iii.** Verify that requirements are under formal configuration control.
 - iv.** Evaluate on the EES Contractor's policies and procedures for ensuring that each EES Component is secure and that the privacy of Client data is maintained. This shall include all of the following:

- a) Evaluate the restrictions on system and data access.
 - b) Evaluate the system security plan to ensure it meets Department standards.
- v. Verify that EES processes and equipment are in place to back up client and project data files and archive them safely at appropriate levels.
- vi. The IV&V Contractor shall verify that the EES Contractor has performed an adequate requirements analysis for that EES Contractor's deliverables. This shall include a verification of all of the following:
 - a) An analysis of client, State, and Federal needs and objectives has been performed to verify that requirements of the system are well understood, well defined and satisfy federal regulations.
 - b) All stakeholders have been consulted to the desired functionality of the system, and that users have been involved in prototyping of the user interface.
- vii. All stakeholders have bought-in to all changes with impact project objectives, cost and schedule.
- viii. EES Performance requirements satisfy user needs.
- ix. User's maintenance requirements for the system are completely specified.
- h. The IV&V Contractor shall verify that the EES Contractor has described all system interfaces for each EES Component exactly, by medium and by function, including input/output control codes, data format, polarity, range, units and frequency. The IV&V Contractor shall also verify that all approved interface documents are available and that appropriate relationships are in place with all agencies and organizations supporting the interfaces.
- i. The IV&V Contractor shall verify that there is a well-defined plan for transferring data from the legacy system to the new EES.

5. EES SOFTWARE DEVELOPMENT

The IV&V Contractor shall evaluate both the high level and detailed design of any custom software developed or used by the EES Contractor for any EES component. The Design and Analysis Review Report shall include at minimum all of the following:

- a. Evaluate all high-level design products to verify the design is workable, efficient, and satisfies all system and system interface requirements.
- b. Evaluate all detail design products to verify that the design is workable, efficient, and satisfies all high level design requirements.
- c. Evaluate the design products for adherence to the project design methodology and standards.
- d. Evaluate the design and analysis process used to develop the design and make recommendations for improvements.
- e. Evaluate design standards, methodology and CASE tools used.
- f. Verify that design requirements can be traced back to system requirements.
- g. Verify that all design products are under configuration control and formally approved before detailed design begins.
- h. Verify that all design products are under configuration control and formally approved before coding begins.

- i. The IV&V Contractor shall evaluate the plans, requirements, environment, tools, and procedures used for unit testing system modules as well as the level of test automation, interactive testing, and interactive debugging available in the test environment.
- j. The IV&V Contractor shall review all unit testing to ensure that an appropriate level of test coverage was achieved by the test process, that test results were verified, that the correct code configuration was tested, and that the tests were appropriately documented. The IV&V Contractor shall develop and submit a Unit Testing Review Report documenting the results of all unit testing reviews and evaluations.

6. SYSTEM TESTING

The IV&V Contractor shall review all system testing performed on each EES component and submit all findings as part of the Management Briefing, Unit Testing or Critical Incident Reports. This review shall include the following:

- a. Assess planned testing activities, results reporting, and error correction/resolution, including an appropriate change control and configuration management process, to include all of the following:
 - i. Assess test efforts and schedules are based on defined requirements priorities as well as project risk.
 - ii. Assess test scenarios address the testable requirements.
 - iii. Assess specific business cases and test verification efforts for each case has been defined.
 - iv. Conduct reviews of testing to ensure that critical elements of the EES are stable and comply with Department requirements as detailed in the Department's contract with the EES Contractor.
 - v. Evaluate the plans, requirements, environment, tools, and procedures used for system testing.
 - vi. Evaluate the level of automation and the availability of the system test environment.
- b. Verify that an appropriate level of test coverage is achieved by the test process, that test results are verified, that the correct code configuration has been tested, and that the tests are appropriately documented, including formal logging of errors found in testing.
- c. Verify that the individuals conducting the test have an appropriate level of independence from those completing the development.
- d. Verify that a sufficient number and type of case scenarios are used to ensure comprehensive but manageable testing and those tests are run in a realistic, real-time environment.
- e. Verify that test scripts are complete, with step-by-step procedures, required pre-existing events or triggers and expected results.

7. DATA MANAGEMENT

The IV&V Contractor shall evaluate the EES Contractors' proposed plans, procedures and software for data conversion and submit a Data Conversion Process Review Report. This evaluation shall include, at a minimum, all of the following:

- a. Verify that procedures are in place and are being followed to review the completed data for completeness and accuracy and to perform data clean-up as required.
- b. As part of developing the Data Conversion Error Report, determine conversion error rates and if the error rates are manageable.
- c. Make recommendations on the conversion process to make it more efficient and on maintain the integrity of data during the conversion.
- d. The IV&V Contractor shall evaluate all EES Contractor database designs and system processes/workflows to determine if they meet system requirements contained in the EES Contractor's contract with the Department. This shall include an evaluation of all of the following:
 - i. The design for maintainability, scalability, refresh-ability, concurrence, normalization and any other factors affecting performance and data integrity.
 - ii. The process for administering the database, including backup, recovery, performance analysis and control of data item creation.

C. BUSINESS REQUIREMENTS

The IV&V Contractor shall develop a comprehensive Project Management Plan (IV&V Project Management Plan) for Department approval, and shall manage and carry out the IV&V services in accordance with the IV&V Project Management Plan. The IV&V Project Management Plan (PMP) must include at a minimum the following elements:

1. Description of how the IV&V Contractor plans to carry out the IV&V services. This description should include methodologies, strategies, standards, and approaches employed by the IV&V Contractor for executing each of the IV&V activities within this Scope of Work.
2. High level IV&V services schedule which aligns with the EES Master Project Schedule.
3. Detailed schedule that includes activities, tasks, task work effort estimates, estimated start and end dates, durations, deliverables, and assigned resources.. Coordinate and align the IV&V deliverable schedule with the Department and the EES Contractors.
4. Organizational structure which reflects, among other things, the need to coordinate activities among the Department, IV&V, and EES Contractor.
5. Description of resources assigned to activities, tasks and the IV&V deliverable creation.
6. Assigned personnel dedicated to the IV&V reviews on the EES project.
7. Description of the deliverables produced as a result of IV&V activities.

The IV&V Contractor shall perform ongoing program monitoring activities and shall review and validate issues/deficiencies/risks identified with the Department Project Management Team and the EES Contractor. Project monitoring tasks include but are not limited to:

1. Review and validate all project work plans and schedules, including staffing levels.
2. Develop and submit an EES Project Status and Milestone Report to monitor all project milestones and costs.
3. Perform ongoing assessments of project staffing levels (key and non-key personnel) and report on the ability to meet project schedule and milestones.
4. Provide Risk Assessment Reports for all project risks, with proposed mitigation strategies.
5. Monitor the Department's ACA project management office practices, processes and deliverables.

The IV&V Contractor shall conduct verification and validation reviews of the quality and completeness of critical path deliverables produced by the awarded contractor for the EES Project to help ensure they meet the requirements and expectations of the Department, CMS, and internal and external stakeholders.

D. SCOPE OF WORK

The following Scope of Work sections focus on the key IV&V activities and requirements for the Eligibility and Enrollment Solution project. Specifically:

1. Program Management - Oversight and acceptance of PMP Deliverables, Executive Committee Participation and Monthly Status Reporting
2. Deliverables Review and Acceptance
3. Quality Assurance
4. Contract Compliance

E. EES TECHNOLOGY REVIEW

The IV&V Contractor shall develop and submit a Technical Recommendations Report as part of performing the following defined EES Technology Review tasks:

1. EES Operating Environment

The IV&V Contractor will evaluate each EES Component for all of the following:

- a. System hardware configurations to determine if their performance is adequate to meet proposed system requirements as defined in the EES contract.
- b. Compatibility with the State's existing processing environment, if it is maintainable, and if it is easily upgradeable. This evaluation will include, but is not limited to Central Processing Units (CPUs) and other processors, memory, network connections, and bandwidth, communication controllers, telecommunications systems (Local Area Network/Wide Area Network [LAN/WAN]), terminals, printers, and storage devices.
- c. System software to determine if its capabilities are adequate to meet proposed system requirements.
- d. Whether the software is maintainable and easily upgradeable.
- e. Projected service provider support of the hardware and software.
- f. Database products to determine if their capabilities are adequate to meet proposed system requirements.
- g. The database's data format to determine if it is easily convertible to other formats, if it supports the addition of new data items, if it is scalable, if it is easily refreshable and if it is compatible with the State's existing hardware and software, including any on-line transaction processing environment.
- h. Processing capacity of the system to determine if it is adequate for current statewide needs for both batch and on-line processing.
- i. The system's capacity to support future growth.

The Contractor shall make recommendations on changes in processing hardware, storage, network systems, operating systems, consumer off the shelf software, and software design to meet future growth and improve system performance.

F. PROJECT PLANNING AND MANAGEMENT

The IV&V Contractor shall ensure that staff attending meetings between the Department and the IV&V Contractor has the authority to represent and commit the IV&V Contractor regarding work planning, problem resolution and program development.

At the Department's direction, the Contractor shall make its Key Personnel and other personnel assigned to the Contract available to attend meetings as subject matter experts with stakeholders both within the State government and external or private stakeholders. The IV&V Contractor shall be present at all scheduled status meetings between the Department and EES Vendor, unless the Department provides permission otherwise.

All of the IV&V Contractor's personnel that attend any meeting with the Department or other Department stakeholders shall be physically present at the location of the meeting, unless the Department gives prior, written permission to attend by telephone or video conference. In the event that the Contractor has any personnel attend by telephone or video conference and are the only entity not at the location of the meeting, the IV&V Contractor shall be responsible for providing the conference line or virtual meeting place.

The IV&V Contractor shall respond to all telephone calls, voicemails and emails from the Department within one (1) Business Day of receipt by the IV&V Contractor.

G. DELIVERABLES

The IV&V Contractor must provide the deliverables required by CMS and defined in the IV&V activities.

1. THE IV&V DELIVERABLES INCLUDE

- a. Initial Project Assessment Report
- b. IV&V Project Management Plan
- c. IV&V Project Status Report
- d. IV&V Project Schedule
- e. Performance Standards Planning Document
- f. Performance Metrics Document
- g. Monthly Management Briefing Report
- h. Risk Assessment Report
- i. EES Estimating and Schedule Review Recommendations Report
- j. EES Deliverable Review Report
- k. Critical Incident Report
- l. EES Project Milestone and Cost Status Report
- m. EES Estimating and Schedule Review Recommendations Report
- n. EES Design and Analysis Review Report
- o. Unit Testing Review Report
- p. EES Technical Recommendations Report
- q. Data Conversion Process Review Report
- r. Data Conversion Error Report

Once the detailed IV&V Project Plan is approved by the Department, the following sections detail the process for submission and review of deliverables during the life of the project/contract.

The IV&V Contractor must provide one electronic copy of each deliverable to the appropriate Department Project manager as identified in the contract. Once a deliverable is approved and

accepted by Department, the IV&V Contractor must upload an electronic copy into the designated Department SharePoint site.

Deliverables will be evaluated by the Department utilizing mutually agreed to acceptance/exit criteria.

2. DELIVERABLE SUBMISSION

Prior to development and submission of Department specified contract deliverable, a Deliverables Expectations Document (DED) containing a description of the format and content of each deliverable will be delivered to the Department for review and approval. The DED must contain, at a minimum, the following:

- a. Cover letter;
- b. Table of Contents with a brief description of the content of each section;
- c. Anticipated number of pages; and
- d. Identification of appendices/exhibits

The DED must contain an approval/rejection section that can be completed by the Department. The summary document will be returned to the IV&V Contractor within a mutually agreed upon time frame. Deliverables must be developed by the IV&V Contractor according to the approved format and content of the summary document for each specific deliverable.

At a mutually agreed to meeting, on or before the time of delivery to Department, the IV&V Contractor must provide a walkthrough of each IV&V deliverable. IV&V Deliverables must be submitted no later than 5:00 PM CST, per the approved contract deliverable schedule and must be accompanied by a deliverable sign-off form with the appropriate sections completed by the IV&V Contractor.

3. DELIVERABLE REVIEW

The Department's review time begins on the next business day following receipt of the deliverable. The Department's review time will be determined by the approved and accepted detailed project plan and the approved contract. The Department has up to five (5) working days to determine if a deliverable is complete and ready for review. Unless otherwise negotiated, this is part of the Department's review time.

Any subsequent deliverable dependent upon the Department's acceptance of a prior deliverable will not be accepted for review until all issues related to the previous deliverable have been resolved. Deliverables determined to be incomplete and/or unacceptable for review will be rejected, not considered delivered and returned to the IV&V Contractor. After review of a deliverable, the Department will return to the IV&V Contractor the project deliverable sign-off form with the deliverable submission and review history section completed.

4. DELIVERABLES ACCEPTANCE

If the deliverable is accepted, the original deliverable sign-off form signed by the appropriate Department representatives will be returned to the Contractor.

Comments/Revisions Requested by the State

If the Department has comments and/or revisions to a deliverable, the following will be provided to the IV&V Contractor:

- a. The original deliverable sign-off form with an updated entry to the deliverable submission and review history section.
- b. Attached to the deliverable sign-off form will be a detailed explanation of the revisions to be made and/or a marked up copy of the deliverable.
- c. The Department's first review and return with comments will be completed within the times specified in the contract.
- d. The IV&V Contractor will have five (5) working days, unless otherwise mutually agreed to, for review, acceptance and/or rejection of the Department's comments.

A meeting to resolve outstanding issues must be completed within three (3) business days after completion of the IV&V Contractor's review or a mutually agreed upon time frame. Agreements made during meetings to resolve issues must be documented separately. Once an agreement is reached regarding changes, the IV&V Contractor must incorporate them into the deliverable for resubmission to the Department. All changes must be easily identifiable by the Department.

Resubmission of the deliverable must occur within five (5) business days or a mutually agreed upon time frame of the resolution of any outstanding issues. The resubmitted deliverable must be accompanied by the original deliverable sign-off form. This review process continues until all issues have been resolved within a mutually agreed upon time frame.

During the re-review process, the Department will only comment on the original exceptions noted. All other items not originally commented on are considered to be accepted by the Department. Once all revisions have been accepted, the original deliverable sign-off form signed by the appropriate the Department representatives will be returned to the IV&V Contractor.

The IV&V Contractor must provide one (1) updated electronic copy of each deliverable after approval and acceptance by the Department. At this point the IV&V Contractor must submit the Department approved deliverable to CMS.

5. REJECTED, NOT CONSIDERED DELIVERED

If the Department considers a deliverable not ready for review, the following will be returned to the IV&V Contractor:

- a. The original deliverable sign-off form with an updated entry to the deliverable submission and review history section.
- b. The original deliverable and all copies with a written explanation as to why the deliverable is being rejected, not considered delivered.
- c. The IV&V Contractor will have five (5) business days, unless otherwise mutually agreed to, for review, acceptance and/or rejection of the Department's comments.

A meeting to discuss the Department's position regarding the rejection of the deliverable must be completed within three (3) business days after completion of the IV&V Contractor's review or a mutually agreed upon time frame. Resubmission of the deliverable must occur within a mutually agreed upon time frame. The resubmitted deliverable must be accompanied by the original deliverable sign-off form.

Upon resubmission of the completed deliverable, the Department will follow the steps outlined in this process.

H. REPORTING REQUIREMENTS

The IV&V Contractor shall deliver the IV&V Project Status Report to the Department on a monthly basis. The monthly IV&V Project Status Report should contain, at a minimum, all of the following:

1. Written support and documentation of all items to be presented during the next Management Briefing.
2. The results or findings of any assessments, evaluations, reviews or verifications completed during the prior month or updates in relation to any of the following areas:
 - a. CMS guidance.
 - b. Operational oversight.
 - c. Overview of IV&V Contractor Management Plan updates;
 - d. Overview of periodic reviews of the EES Project;
 - e. Updates to Risk Analysis and Mitigation Plan Review;
 - f. Overview of Corrective Action Plans produced during the previous month;
 - g. Overview of EES Contractor Critical Incident Reports;
 - h. Project Management updates;
 - i. Quality Assurance updates;
 - j. EES Operating Environment updates;
 - k. EES Software Development updates;
 - l. EES System Testing updates;
 - m. EES Data Management updates;
 - n. Any recommendations to mitigate any risk, deficiency or issue discovered as a result of any assessment, evaluation, review or verification completed during the prior month;
 - o. A Performance Standard Planning Document that includes the status of each activity shown on the IV&V Management Plan for that EES Component as well as the progress since the prior report; and
 - p. Any updated Work Breakdown Structure developed during the prior month.

V. PROPOSAL INSTRUCTIONS

This section documents the mandatory requirements that must be met by bidders in preparing the Technical and Cost Proposal. Bidders should identify the subdivisions of "Project Description and Scope of Work" clearly in their proposals; failure to do so may result in disqualification. Failure to respond to a specific requirement may be the basis for elimination from consideration during the State's comparative evaluation.

Proposals are due by the date and time shown in the Schedule of Events. Content requirements for the Technical and Cost Proposal are presented separately in the following subdivisions:

A. TECHNICAL PROPOSAL

The Technical Proposal shall consist of four (4) sections:

1. SIGNED "State of Nebraska Request For Proposal For Contractual Services" form;
2. Executive Summary;
3. Corporate Overview; and
4. Technical Approach.

1. REQUEST FOR PROPOSAL FORM

By signing the "Request For Proposal For Contractual Services" form, the bidder guarantees compliance with the provisions stated in this Request for Proposal, agrees to the Terms and Conditions stated in this Request for Proposal and certifies bidder maintains a drug free work place environment.

The Request For Proposal For Contractual Services form must be signed in ink and returned by the stated date and time in order to be considered for an award.

2. EXECUTIVE SUMMARY

The Executive Summary shall condense and highlight the contents of the solution being proposed by the bidder in such a way as to provide the Evaluation Committee with a broad understanding of the Contractor's Technical Proposal. The Executive Summary should include:

- a. A clear and concise summary of the bidder's understanding of the EES project, the IV&V Services and the Department's needs.
- b. A clear and concise summary of the proposed approach.
- c. A brief summary of the bidder's experience and ability to perform this project.
- d. A general description of the capabilities and role of any subcontractors

Bidders must present their understanding of the problems being addressed by implementing a new system, the objectives and intended results of the project, and the scope of work. Bidders shall summarize how their Technical Proposal meets the requirements of the Request for Proposal, and why they are best qualified to perform the work required herein.

3. CORPORATE OVERVIEW

The Corporate Overview section of the Technical Proposal must consist of the following subdivisions:

a. BIDDER IDENTIFICATION AND INFORMATION

The bidder must provide the full company or corporate name, address of the company's headquarters, entity organization (corporation, partnership, proprietorship), state in which the bidder is incorporated or otherwise organized to do business, year in which the bidder first organized to do business, whether the name and form of organization has changed since first organized, and Federal Employer Identification Number and/or Social Security Number.

b. FINANCIAL STATEMENTS

The bidder must provide financial statements applicable to the firm. If publicly held, the bidder must provide a copy of the corporation's most recent audited financial reports and statements, and the name, address and telephone number of the fiscally responsible representative of the bidder's financial or banking organization.

If the bidder is not a publicly held corporation, either the reports and statements required of a publicly held corporation, or a description of the organization, including size, longevity, client base, areas of specialization and expertise, and any other pertinent information must be submitted in such a manner that proposal evaluators may reasonably formulate a determination about the stability and financial strength of the organization. Additionally, a non-publicly held firm must provide a banking reference.

The bidder must disclose any and all judgments, pending or expected litigation, or other real or potential financial reversals, which might materially affect the viability or stability of the organization, or state that no such condition is known to exist.

c. CHANGE OF OWNERSHIP

If any change in ownership or control of the company is anticipated during the twelve (12) months following the proposal due date, the bidder must describe the circumstances of such change and indicate when the change will likely occur. Any change of ownership to an awarded vendor(s) will require notification to the State.

d. OFFICE LOCATION

The bidder's office location responsible for performance pursuant to an award of a contract with the State of Nebraska must be identified.

e. RELATIONSHIPS WITH THE STATE

The bidder shall describe any dealings with the State over the previous two (2) years. If the organization, its predecessor, or any party named in the bidder's proposal response has contracted with the State, the bidder shall identify the contract number(s) and/or any other information available to identify such contract(s). If no such contracts exist, so declare.

f. BIDDER'S EMPLOYEE RELATIONS TO STATE

If any party named in the bidder's proposal response is or was an employee of the State within the past twenty-four (24) months, identify the individual(s) by name, State agency with whom employed, job title or position held with the State, and separation date. If no such relationship exists or has existed, so declare.

If any employee of any agency of the State of Nebraska is employed by the bidder or is a subcontractor to the bidder, as of the due date for proposal submission, identify all such persons by name, position held with the bidder, and position held with the State (including job title and agency). Describe the responsibilities of such persons within the proposing organization. If, after review of this information by the State, it is determined that a conflict of interest exists or may exist, the bidder may be disqualified from further consideration in this proposal. If no such relationship exists, so declare.

g. CONTRACT PERFORMANCE

If the bidder or any proposed subcontractor has had a contract terminated for default during the past five (5) years, all such instances must be described as required below. Termination for default is defined as a notice to stop performance delivery due to the bidder's non-performance or poor performance, and the issue was either not litigated due to inaction on the part of the bidder or litigated and such litigation determined the bidder to be in default.

It is mandatory that the bidder submit full details of all termination for default experienced during the past five (5) years, including the other party's name, address and telephone number. The response to this section must present the bidder's position on the matter. The State will evaluate the facts and will score the bidder's proposal accordingly. If no such termination for default has been experienced by the bidder in the past five (5) years, so declare.

If at any time during the past five (5) years, the bidder has had a contract terminated for convenience, non-performance, non-allocation of funds, or any other reason, describe fully all circumstances surrounding such termination, including the name and address of the other contracting party.

h. SUMMARY OF BIDDER'S CORPORATE EXPERIENCE

The bidder shall provide a summary matrix listing the bidder's previous projects similar to this Request for Proposal in size, scope and complexity, specifically:

- i. Experience performing IV&V services for governmental agencies or large private health insurance providers.
- ii. Experience with a highly similar task for providing IV&V services on projects of similar scope.
- iii. Experience performing IV&V services for a project that included transitioning data from a legacy or existing system into a new system.
- iv. Demonstrated knowledge and understanding of the CMS Enterprise Life Cycle Gate Review process including required documents and their associated templates.
- v. Experience with CMS's Medicaid Information Technology Architecture (MITA).
- vi. Experience working with CMS or projects that had CMS oversight.

The State will use no more than three (3) narrative project descriptions submitted by the bidder during its evaluation of the proposal.

The bidder must address the following:

- vii. Bidder must provide narrative descriptions to highlight the similarities between their experience and this Request for Proposal. These descriptions must include:
 - a) the time period of the project;
 - b) the scheduled and actual completion dates;
 - c) the contractor's responsibilities;
 - d) for reference purposes, a customer name (including the name of a contact person, a current telephone number, a facsimile number and e-mail address); and
 - e) each project description shall identify whether the work was performed as the prime contractor or as a subcontractor. If a bidder performed as the prime contractor, the description must provide the originally scheduled completion date and budget, as well as the actual (or currently planned) completion date and actual (or currently planned) budget.
- viii. Contractor and subcontractor(s) experience must be listed separately. Narrative descriptions submitted for subcontractors must be specifically identified as subcontractor projects.
- ix. If the work was performed as a subcontractor, the narrative description shall identify the same information as requested for the contractors above. In addition, subcontractors shall identify what share of contract costs, project responsibilities, and time period were performed as a subcontractor.

i. SUMMARY OF BIDDER'S PROPOSED PERSONNEL/MANAGEMENT APPROACH

The bidder must present a detailed description of its proposed approach to the management of the project.

The bidder must identify the specific professionals who will work on the State's project if their company is awarded the contract resulting from this Request for Proposal. The names and titles of the team proposed for assignment to the State project shall be identified in full, with a description of the team leadership, interface and support functions, and reporting relationships. The primary work assigned to each person should also be identified.

The bidder shall provide resumes for all personnel proposed by the bidder to work on the project. The State will consider the resumes as a key indicator of the bidder's understanding of the skill mixes required to carry out the requirements of the Request for Proposal in addition to assessing the experience of specific individuals.

Resumes must not be longer than three (3) pages. Resumes shall include, at a minimum, academic background and degrees, professional certifications, understanding of the process, and at least three (3) client references (Client and Company Name, Project Name, address, email address and telephone number) who can attest to the competence and skill level of the individual. Any changes in proposed personnel shall only be implemented after written approval from the State.

A major factor in the success of the Project is the degree of collaboration between IV&V and EES Contractor staff and Department staff. The IV&V Contractor is expected to work with key Department stakeholders, management and subject matter experts throughout the business and technology enterprise when conducting the project activities and developing the work products and deliverables. The IV&V Contractor is expected to propose a project approach that incorporates the involvement of Department business and technology staff in order to obtain information and feedback necessary to produce quality work products and deliverables.

The Bidder will provide resume(s) for the key personnel proposed for this project. The Bidder is required to demonstrate that their consultant(s) or employee(s) will have the skills necessary to meet the objectives of this project as listed below. The resumes must include:

- i.** Educational qualifications
- ii.** Summary of employment experience
- iii.** Specific experience with the service areas for which they are being proposed
- iv.** Previous work assignments in a similar role for this type of engagement demonstrating ability to meet the objectives listed below:
- v.** Proven experience with Consulting, Project Administration and Technical Assistance for Commercial or State Government Eligibility Solutions for a period of at least two years within the last four years
- vi.** Core competency in IV&V and QA as demonstrated by the resume
- vii.** Experience in the design, development, testing, and implementation of Medicaid or Commercial eligibility system
- viii.** Government or public sector experience
- ix.** In-depth knowledge of ACA Regulations
- x.** Highly developed written and verbal communication skills

The Bidder's proposal shall describe policies, plans and intentions with regard to maintaining continuity of key personnel and the implementation team assigned to the project to avoid and minimize the impact of necessary staff changes.

The Department will provide workspace, equipment and conference telephone capabilities to house the IV&V Contractor staff in Lincoln, NE. Additionally, the IV&V Contractor will be assigned Department SharePoint repository capabilities for all IV&V Contractor project documents and deliverables.

In order to ensure the success of this project, it is important that there is a continuity of Key Staff assigned to the project. The Bidder's proposal must:

- i.** Describe policies, plans, and intentions with regard to maintaining continuity of personnel assignments throughout the performance of any agreement resulting from this RFP.
- ii.** Discuss the Bidder's plans to avoid and minimize the impact of personnel changes.
- iii.** Identify planned backup personnel assignments.

- iv. Commit to using the personnel identified in the proposal and agree to DHHS' right to approve proposed personnel changes during the term of the contract.
- v. Agree that the Bidder's proposed project personnel may not be reassigned, replaced, or added during the project without the prior written consent of the DHHS Project Manager. Should a key staff position be vacated, the IV&V Contractor must give DHHS resumes of, and an opportunity to interview and approve, potential replacements for that employee.
- vi. Agree that the Bidder's proposed key project personnel may not be assigned new or additional contract assignments outside the State of Nebraska contract, without the prior written consent of the DHHS Project Manager.
- vii. Agree that the DHHS Project Manager reserves the right to require a change in the IV&V Contractor's project personnel at the DHHS Project Manager's discretion and that DHHS must be given an opportunity to interview and approve potential replacements for that employee. However, DHHS will not unreasonably exercise this option and will take reasonable steps to work with the IV&V Contractor toward a solution.

j. SUBCONTRACTORS

If the bidder intends to subcontract any part of its performance hereunder, the bidder must provide:

- i. name, address and telephone number of the subcontractor(s);
- ii. specific tasks for each subcontractor(s);
- iii. percentage of performance hours intended for each subcontract; and
- iv. total percentage of subcontractor(s) performance hours.

4. TECHNICAL APPROACH

The technical approach section of the Technical Proposal must consist of the following subsections:

- a. Description how the IV&V Bidder plans to carry out the IV&V Services for the EES Project. This description shall include methodologies, strategies, standards and approaches employed by the Bidder for executing each of the IV&V activities within the Scope of Work of this RFP.
- b. Description of the deliverables produced as a result of IV&V activities, including sample reports.
- c. A documented methodology for performing IV&V Services that has proved successful on past projects.
- d. A documented methodology for developing performance matrices that has proved successful on past projects.
- e. A documented methodology for developing the performance matrices.
- f. Description for assessing risks, documenting findings and communicating them to the Department and contractors.
- g. A preliminary project management plan that includes the activities and deliverables which are defined in this RFP and expected of the vendor.

B. COST PROPOSAL REQUIREMENTS

This section describes the requirements to be addressed by bidders in preparing the Cost Proposal. The bidder must submit the Cost Proposal in a section of the proposal that is a separate section or is packaged separately as specified in the RFP from the Technical Proposal section.

The component costs of the fixed price proposal for providing the services set forth in the Request for Proposal must be provided by submitting forms substantially equivalent to those described below.

1. PRICING SUMMARY

This summary shall present the total fixed price to perform all of the requirements of the Request for Proposal - Use Form B. The bidder must include details in the Cost Proposal supporting any and all costs. These details must include, at a minimum, detailed descriptions and/or specifications of the goods and/or services to be provided, quantities, and timing and unit costs, if applicable.

The State reserves the right to review all aspects of the Cost Proposal for reasonableness and to request clarification of any proposal where the cost component shows significant and unsupported deviation from industry standards or in areas where detailed pricing is required.

2. PRICES

Prices quoted shall be net, including transportation and delivery charges fully prepaid by the bidder, F.O.B. destination named in the Request for Proposal. No additional charges will be allowed for packing, packages, or partial delivery costs. When an arithmetic error has been made in the extended total, the unit price will govern.

C. PAYMENT SCHEDULE

The payment schedule for the project is tied to specific dates and deliverables. Invoices may be submitted by the contractor on specific dates based on the completion and acceptance of related deliverables. No invoice will be approved unless the associated deliverables have been approved. A percentage of the total contract cost may then be invoiced based on the following schedule.

Form A

Bidder Contact Sheet

Request for Proposal Number 4468Z1

The Bidder Contact Sheet should be completed and submitted with each response to this Request for Proposal. This is intended to provide the State with information on the bidder's name and address, and the specific person(s) who are responsible for preparation of the bidder's response. Each bidder shall also designate a specific contact person who will be responsible for responding to the State if any clarifications of the bidder's response should become necessary. This will also be the person who the State contacts to set up a presentation/demonstration, if required.

Preparation of Response Contact Information	
Bidder Name:	
Bidder Address:	
Contact Person & Title:	
E-mail Address:	
Telephone Number (Office):

Appendix B Functional Requirements

Request for Proposal Number 4544Z1

The Functional Requirements Traceability Matrix (RTM) is used to document and track the project requirements from the proposal through to testing to verify that the requirement has been completely fulfilled. The Contractor will be responsible for maintaining the set of Baseline Requirements directly related to the configuration of the EES. Additions, modifications, and deletions to these requirements will be added and modified throughout the project so it is imperative that a current version of the matrix be maintained at all times.

Bidders must provide an initial RTM as part of its proposal. The RTM shall follow the instructions below. The Bidder must state requirements exactly as they are provided in this RFP. The Bidder must indicate how it will achieve full compliance (i.e., requirement fulfilled 100%). Any requirements that the Bidder cannot attest to full compliance must be documented as outlined in Appendix D: Gap Analysis.

Bidders are required to provide a response, using the appropriate codes provided in the tables below, for each requirements listed in the Functional Requirements Response Matrix. Scoring for each requirement will directly relate to the ability code indicated by the bidder.

Ability Code	Condition	Description
S	Standard Function	The proposed EES fully satisfies the requirement as stated. The Bidder must describe how the requirement is satisfied by the EES.
W	Workflow or System Configuration Required	Current functionality of the proposed EES exists in the EES and can be modified by a system administrator to meet this requirement.
M	Modification Required	The proposed EES requires a modification to existing functionality to meet this requirement which requires a source code modification. The EES will be modified to satisfy the requirements as stated or in a different format. The Bidder must describe the modifications.
F	Planned for Future Release	This functionality is planned for a future release. The Bidder must describe how the requirement will be satisfied by the EES and when the release will be available.
C	Custom Design and Development	The proposed EES requires new functionality to meet this requirement which requires a source code addition. The Bidder must describe the feature and its value.
N	Cannot Meet Requirement	The proposed EES will <u>not</u> satisfy the requirement. The Bidder must explain why the requirement cannot be satisfied.
O	Other Software	If the requirement is to be satisfied through the use of a separate software package(s), the Bidder must identify those package(s) and describe how the functionality is integrated into the base system.

Appendix B Functional Requirements

Request for Proposal Number 4544Z1

1. General Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
GEN 001	The EES shall be branded using official State of Nebraska and Nebraska Department of Health and Human Services logos, images, etc.		
GEN 002	The EES shall provide customized local office information, through public-facing front-end (i.e. physical location of nearest local office, driving directions and name, email and phone number).		
GEN 003	The EES shall ensure alignment with HIPAA security, privacy and transaction standards		
GEN 004	The EES shall implement and support functionality to meet the requirements of the Affordable Care Act (ACA) and achieve compliance deadlines.		
GEN 005	The EES shall assure that all processes, user interfaces and documents produced by the system meet applicable State and federal accessibility standards for the life of the contract.		
GEN 006	The EES shall separate business rules from the application logic. Business rules will be contained in a COTS rules engine.		
GEN 007	The EES shall provide a scalable solution to allow for the incorporation of shared eligibility determination rules to support the State's phased approach.		
GEN 008	The EES will facilitate a "no wrong door" approach to insurance coverage as required in the ACA. The EES will accept account/application transfers to/from the Exchange to seamlessly facilitate eligibility determination for all Insurance Affordability Programs.		
GEN 009	The EES will allow applications and renewals via all ACA required media. E.G. Paper, online, phone, fax, in person and other commonly available electronic means.		
GEN 010	The EES shall leverage existing systems (where appropriate) and is built on system architecture that is scalable, flexible, modular and dynamic.		

Appendix B Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
GEN 011	The EES shall leverage connections to the federal data hub to access and verify data from participating agencies such as the IRS, federal DHHS, the Department and others. Hub – Required State - Required Financial Institutions- Future		
GEN 012	The EES shall achieve the necessary degree of interoperability between technology components to determine eligibility for Medicaid or CHIP or if the customer is not eligible for Medicaid a transfer to the FFM.		
GEN 013	The EES shall support a timed release schedule.		
GEN 014	The EES shall support all Nebraska DHHS Medicaid programs.		
GEN 015	The EES shall allow business users, as determined by the Department, to easily read/modify the eligibility determination rules.		
GEN 016	The EES shall support client facing services and documents in English and Spanish languages.		
GEN 017	The EES shall screen for language needs (LEP) at first point of contact		
GEN 018	The EES shall provide functionality to interface with Multi-channel Workforce Management software, such as Verint.		
GEN 019	The EES shall have the ability to schedule staff performing call center functions, back office functions, local office appointments, and be integrated with task manager.		
GEN 020	The EES shall have the ability to interface with the quality management system.		
GEN 021	The EES shall have the ability to interface with the LINKS Performance Management and Training System.		
GEN 022	The EES should have the ability to measure case review and customer service contact review. It should utilize a scorecard or similar tool to provide feedback down to staff level.		
GEN 023	The EES shall have the ability to interface with the NE Financial and Accounting system.		
GEN 024	The EES shall accommodate phone application voice signature mechanism.		

Appendix B Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
GEN 025	The EES shall validate and return address information errors as entered in the system.		
GEN 026	The EES shall provide functionality to allow applicants to provide a signature via all ACA required modes of application.		
GEN 027	The EES shall provide free-form narrative notes capabilities with no character limit, wrap-around text, sortable and searchable.		
GEN 028	The EES shall auto-populate notes based on predefined business rules.		
GEN 029	The EES shall provide templates for notes entry.		
GEN 030	The EES shall provide mechanism to spell-check notes.		
GEN 031	The EES shall provide mechanism to associate notes to multiple beneficiary/households without retyping.		
GEN 032	The EES shall provide a mechanism to automatically date/time stamp all notes.		
GEN 033	The EES shall provide a mechanism for eligibility workers to edit their own notes with appropriate audit trails.		
GEN 034	The EES shall provide a mechanism for all system events, including system, user and administrative actions to be auditable.		
GEN 035	The EES shall provide a mechanism to restrict notes from being edited after the initial entry.		
GEN 036	The EES shall allow for any data element to be exported into an industry standard format.		
GEN 037	The EES shall allow applicant/beneficiaries to self-report changes in their personal information online, notify the appropriate eligibility worker based on parameters described by the Department when changes are made		
GEN 038	The EES shall re-determine eligibility when a Change of Circumstance is received electronically or entered by a worker.		
GEN 039	The EES shall provide the capability to view the new determination of eligibility after the change in information.		
GEN 040	The EES shall place an individual from one program into another, based on a Change of Circumstance or eligibility rules, without affecting other individuals in that household.		

Appendix B Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
GEN 041	The EES shall provide the capability to track and record any changes to an individual's information.		
GEN 042	The EES shall provide a mass change capability by a non-technical user to affect all or part of the Department caseload for any or all programs.		
GEN 043	The EES shall allow authorized users to update, add persons, and relationships to an existing household and maintain a history thereof.		
GEN 044	The EES shall close eligibility to a program without closing other programs associated with that household or individuals in the household.		
GEN 045	The EES shall change the status of any individual in a household without terminating eligible household members.		
GEN 046	The EES shall provide web-based functionality to allow the applicant to renew and initially apply for eligibility online.		
GEN 047	The EES shall allow for renewals via all ACA required modalities.		
GEN 048	The EES shall accept a renewal prior to the 12 month renewal date. The renewal period may vary by case/household/individual and program.		
GEN 049	The EES shall track and allow beneficiaries who did not return the pre-populated renewal form or the required documentation and are terminated on that basis a reconsideration period, as defined the Department, when the Department would reconsider eligibility without a new application and renew eligibility if necessary information is provided.		
GEN 050	The EES shall allow an individual who regains coverage during the reconsideration period, retroactive coverage back to date of termination.		
GEN 051	The EES shall automate the renewal process if all information remains the same or if verified information remains within applicable limits.		
GEN 052	The EES shall integrate with various systems within the State for the purpose of data sharing, eligibility determination and data verification (i.e. incarceration, Unemployment Insurance benefits, child support income, State wage information)		
GEN 053	The EES shall adjust eligibility determination resulting from appeal.		

Appendix B Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
GEN 054	The EES shall notify the applicant/beneficiary, electronically and via paper, of adjusted eligibility within 30 days of the adjustment, regardless of the reason for the eligibility adjustment.		
GEN 055	The EES shall track timeframes and deadlines of the appeal process and alert a worker or management of overdue status.		
GEN 056	The EES shall allow a worker to view appeal progress/status to report back to the applicant/beneficiary.		
GEN 057	The EES shall support an integrated and customizable applicant complaint and grievance process, with reporting capabilities.		
GEN 058	The EES shall be scalable and flexible enough to accommodate and adapt to changes required by State and/or federal statute, regulation, mandate, decision, or policy without significant changes to the architecture and without impacting the scalability or response times of the system.		
GEN 059	The EES shall incorporate the policy choices and priorities of the Nebraska policymakers.		
GEN 060	The EES shall meet the requirements of the RFP and be compliant with MITA 3.0 standards.		
GEN 061	The EES shall be based on an orientation of business processes, business rules and data and metadata management that allows modular componentized design approach that enhances interoperability across service modules and with external applications and data sources.		
GEN 062	The EES shall identify individuals who are dual eligible (Medicare plus federal Medicaid) and determine eligibility for dual-eligibles, as well as for those who are eligible for other Medicare savings programs.		
GEN 063	The EES shall support secure messaging between the Department and the federal data hub and/or the Connector via federally defined interfaces and Business Service Descriptions.		
GEN 064	The EES shall include workflow management based on whether an applicant is MAGI-based and/or MAGI-excepted households.		
GEN 065	The EES shall allow individuals in a household to be eligible under different categories and receive different benefits based upon individual information.		
GEN 066	The EES shall provide the capability to defined and stored DDHS specific data. The ability to use the data to drive workflow or pre-populate forms.		

Appendix B Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
GEN 067	The EES shall be scalable so that it can identify those applicants that are potentially eligible for express lane eligibility should the Department choose to adopt Express Lane Eligibility Program.		
GEN 068	The EES shall provide the capability for presumptive eligibility as defined by the Department and include provider web access for application purposes.		
GEN 069	The EES shall provide a mechanism to define required and optional fields, including default data values as applicable, based on program rules.		
GEN 070	The EES shall provide an alert system to notify workers when action items are assigned, have been completed, or are past due.		
GEN 071	The EES shall manually/automatically assign priority to alerts.		
GEN 072	The EES shall automatically escalate an alert if not addressed within the time limits.		
GEN 073	The EES shall provide mechanism for supervisors to be able to view alerts for any individual or group.		
GEN 074	The EES shall provide a mechanism to associate and tie alerts to household or applicant/beneficiary and have alerts accessible when household is reviewed.		
GEN 075	The EES shall automatically delete alerts when action is taken.		
GEN 076	The EES shall manually create, assign, update, change, and delete alerts.		
GEN 077	The EES shall automatically or manually archive alerts when the required action is completed.		
GEN 078	The EES shall provide a sortable and searchable history of alerts that display all actions taken in regards to that alert.		
GEN 079	The EES shall provide a mechanism to indicate that a beneficiary/household is under review.		
GEN 080	The EES shall provide a mechanism to alert management that pending applications have exceeded specified time limits.		
GEN 081	The EES shall create an alert of approaching deadlines.		
GEN 082	The EES shall create and assign alerts associated with pending tasks.		

Appendix B Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
GEN 083	The EES shall alert specified work units when specific beneficiary/household changes are made based on program rules (e.g. customer/beneficiary/eligibility worker changes the address, certain demographic information, etc.		
GEN 084	The EES shall not allow any duplication or potential duplication of services to the beneficiary.		
GEN 085	The EES shall provide the capability to alert eligibility worker of multiple households at same physical and/or mailing address.		
GEN 086	The EES shall maintain individual and household information.		

Appendix B Functional Requirements

Request for Proposal Number 4544Z1

2. Reporting Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
RPT 001	The EES shall make available all business data elements for use with the business intelligence tool.		
RPT 002	The EES shall generate graphical representation of report data (e.g. pie charts, graphs, histograms, line plots, scatter plots)		
RPT 003	The EES shall generate all required Department and federal reports, in the format, media and schedule specified by the Department.		
RPT 004	The EES shall create 'canned' reports to be run on a scheduled basis. The schedule for each report should be easily changed through the system user interface by a non-IT worker.		
RPT 005	The EES shall retain report results in a manner that complies with Nebraska and applicable federal data retention policies, based on data type and program rules. The time period for which the reports are retained shall be mutually determined and shall be aligned with ongoing capacity planning exercise.		
RPT 006	The EES shall store all reports in such a manner as to allow online access to and retrieval of both current and historical reports via a user-friendly parameter and/or menu-driven access to reports, based on user permissions, as defined by the Department.		
RPT 007	The EES shall provide a mechanism to view online, save and print ad-hoc reports, based on user roles and program rules.		
RPT 008	The EES shall tabulate data by worker, county, region, etc.		
RPT 009	The EES shall provide a mechanism to perform a QC sampling by maintaining the current functionality for sampling methodology (regions, clusters, random, and stratification), including designating sampling size for random, designating month and year of a sample, designating regions and/or clusters (counties) of a sample.		
RPT 010	The EES shall provide a mechanism to create the universe from which the system pulls the samples.		
RPT 011	The EES shall provide a mechanism to manually eliminate a case from a sample and replace it with a replacement sample based on user roles. The EES shall capture a reason for eliminating/ replacing a case.		
RPT 012	The EES shall create, maintain and store QC review results for different program types, by office, sample month and year, sample ID.		

Appendix B Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
RPT 013	The EES shall define, implement, collect, and report using a set of business process-related performance metrics that conform to MITA defined performance metrics such as tracking changes in programs and policies and evaluating corresponding changes in health outcomes.		
RPT 014	The EES shall create case load reports such as active case list, active person list, pending application, review lists by manager, location, region and statewide.		
RPT 015	The EES shall provide multiple reports to include, but not limited to, fraud hearings, number and type of appeals decisions.		
RPT 016	The EES shall provide a dashboard summary view of the status of households across units for managers as for example, active, critical, error, quality assurance corrective action, QC reviews, pending reviews, etc.		
RPT 017	The EES shall provide a comprehensive reporting solution that will generate standard operating, pre-defined or operational reports without an adverse effect on system performance or response time.		
RPT 018	The EES shall generate standardized or ad-hoc reports without affecting worker response times.		
RPT 019	The EES shall store all reports in such a manner to allow online access to and retrieval of report information via a user-friendly parameter and/or menu-driven access to reports.		
RPT 020	The EES shall identify the date and time on all reports when it was generated and allow the worker to save the report multiple industry standard formats.		
RPT 021	The EES shall allow authorized workers to access, generate, and print reports.		
RPT 022	The EES shall save reports or raw data in multiple outputs formats (e.g. CSV, tab delimited, text, HTML, XML, XLS) in conformance to security standards and shall provide reports to be exported to an electronic file, PDF, Excel, Text, or Word format depending on the type of report.		
RPT 023	The EES shall maintain a history of documents and reports received, track these items and make them accessible in the electronic case file, so that information can be shared across programs and agencies using a HIPAA compliant method.		
RPT 024	The EES shall have standard reports to measure progress against the Department goals, initiatives, and policy changes, including, but not limited to, policy initiatives, budget initiatives, Affordable Care Act requirements, and grant opportunities.		

Appendix B Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
RPT 025	The EES shall generate ad-hoc and standard reports in real-time as well as historical.		
RPT 026	The EES shall provide summary tables of reports.		
RPT 027	The EES shall ensure that the reports are print-ready, visually acceptable to the user and provide the ability to format, set headers, labels.		
RPT 028	The EES shall be scalable to produce ad hoc reports on request without impacting system response times.		
RPT 029	The EES shall create reports using all current data elements available at the point of creation.		
RPT 030	The EES shall produce control and error reports from mass change processing.		
RPT 031	The EES shall have the capability to import data from other data sources.		
RPT 032	The EES shall support the ability to run online queries at the worker level.		
RPT 033	The EES shall produce reports on frequencies specified by the Department with the ability to change those frequencies at any time with minimal IT support.		
RPT 034	The EES shall allow users to sort, search, filter and drill down on any parameter of a standard report.		
RPT 035	The EES shall include version control for all reports.		
RPT 036	The EES shall generate data and reports needed to comply with federal audit and oversight requirements.		
RPT 037	The EES shall generate data and reports needed to apply for and demonstrate appropriate use of federal grant funding sources.		
RPT 038	The EES shall document the appropriate benefit programs, projects or other categories impacted by system or human actions to support claims for federal matching funds.		
RPT 039	The EES shall provide reports or data to support the cost allocation strategies (e.g., numbers and types of applications processed etc.).		
RPT 040	The EES shall differentiate funding source based on Department - specified criteria.		
RPT 041	The EES shall automate reports to support accurate forecasting of program costs.		

Appendix B Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
RPT 042	The EES shall automate reports to support evaluation of cost-containment and quality improvement initiatives		
RPT 043	The EES shall create standard reports defined by the Department to compare program expenses to budgeted expenses for the State and federal fiscal year-to-date, prior State and federal fiscal year, and projected through the remainder of the State and federal fiscal year.		
RPT 044	The EES shall generate an inventory of current and available reports.		
RPT 045	The EES shall support the ability to produce formatted reports based on online queries.		
RPT 046	The EES shall provide access to Query builder application.		
RPT 047	The EES shall support the preparation of a branch report, i.e., standard template with pre-populated data.		

Appendix B Functional Requirements

Request for Proposal Number 4544Z1

3. Business Requirements/Processes Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
OPS 001	The EES shall create easy, efficient, and accurate interfaces with other systems, including the federal data hub, state and other data sources to verify application information		
OPS 002	The EES shall support integrated eligibility system and/or reduce errors associated with processing eligibility for more complex populations		
OPS 003	The EES shall support workers to improve workflow and reduce errors including:		
OPS 004	<ul style="list-style-type: none"> • Computerized case files and online case histories 		
OPS 005	<ul style="list-style-type: none"> • Automated assignments of case files to workers according to their expertise and availability 		
OPS 006	<ul style="list-style-type: none"> • Logic flags 		
OPS 007	<ul style="list-style-type: none"> • Online policy and procedure manuals 		
OPS 008	<ul style="list-style-type: none"> • Integrated document imaging 		
OPS 009	The EES shall contain the business rules and technical capability to determine online, real-time eligibility for Medicaid MAGI and non-MAGI based eligibility		
OPS 010	The EES shall automate eligibility verification including electronic acceptance of verification documents; validation of applicant data through electronic data exchanges with valid sources		
OPS 011	The EES shall centralize User Account Management, Authentication and Authorization		
OPS 012	The EES shall display and print stored or imaged forms		
OPS 013	The EES shall allow documents to be scanned into and associated with the electronic application/renewal individual, and/or household.		
OPS 014	The EES shall upload attachments to correspondence records.		

Appendix B Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
OPS 015	The EES shall link scanned images to correspondence and records to provide one view of all related material (images, letters, or contacts with staff), with multiple links.		
OPS 016	The EES shall provide the ability to view related correspondence records from a single correspondence record.		
OPS 017	The EES shall meet federal and State records retention and purging standards		
OPS 018	The EES shall provide a searchable library, with highly flexible search criteria to enable a user to quickly find needed information in policy manuals, policy memos, training material, implementation memos and all help functions without affecting work in progress.		
OPS 019	The EES shall support both task-based, individual-based, and household-based operations.		
OPS 020	The EES shall forward finished tasks to the next responsible party or parties, when multiple levels of effort are required for resolution.		
OPS 021	The EES shall save work in progress, exit the workflow, access work at a later point with all of the information still populated from the previous worker's actions so previous work will not need to be repeated and the worker can enter the workflow where they left off.		
OPS 022	The EES shall track, monitor, and display work done/ in queue to supervisors.		
OPS 023	The EES shall create and maintain eligibility worker availability information at the local office level.		
OPS 024	The EES shall monitor caseload size in real time and support an automated workload assignment process.		
OPS 025	The EES shall weigh caseloads and provide recommended distribution.		
OPS 026	The EES shall establish a flexible assigned workload management hierarchy that identifies the responsible organizational unit.		
OPS 027	The EES shall provide an automated and manual benefit card generation capability.		
OPS 028	The EES shall provide a mechanism to override automatic mailing of benefit card.		
OPS 029	The EES shall provide a mechanism to indicate a replacement benefit card is needed.		

Appendix B Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
OPS 030	The EES shall assign work using flexible criteria; for example, assign work by worker or the type of work.		
OPS 031	The EES shall transfer a single case, or a collection of cases in mass, including all electronic supporting documentation to and from any organizational unit.		
OPS 032	The EES shall automatically create a notification of a case transfer.		
OPS 033	The EES shall allow a worker to manually create a notification of case transfer.		
OPS 034	The EES shall evaluate a case prior to a transfer, prompt user if established transfer criteria are not met and not allow transfer until criteria is met.		
OPS 035	The EES shall allow user to override assignment rules and process a transfer when defined criteria are not met based on security rule and audit trail.		
OPS 036	The EES shall have the flexibility to assign a Single Point of Contact (SPOC) to a case or use a universal assignment.		
OPS 037	The EES shall identify if and when a SPOC is assigned to a case so all communications go through the SPOC.		
OPS 038	The EES shall update case and/or household members' information, based on user roles and business functions.		
OPS 039	The EES shall have a real time, comprehensive listing of workers per customer and/or case.		
OPS 040	The EES shall sort and display the type and number of cases assigned to a specific caseload.		
OPS 041	The EES shall add, subtract or modify the number of caseloads supported within the system.		
OPS 042	The EES shall assign a unique identifier to each caseload.		
OPS 043	The EES shall recommend transfer of cases from one caseload to another.		
OPS 044	The EES shall identify when a referral is required and automatically generate and track a referral.		
OPS 045	The EES shall allow and track manually generated referrals.		

Appendix B Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
OPS 046	The EES shall track status of referrals to monitor for required or expected action by the receiving entity.		
OPS 047	The EES shall provide the ability to differentiate types of referrals within programs. (e.g. Child only CSE referrals, ERU spousal elective share, TPL lead vs. change, HIPPS, subrogation)		
OPS 048	The EES shall identify when a Change referral is necessary (e.g. employment changes, household changes, entering or leaving foster care, etc.) and send the referral.		
OPS 049	The EES shall associate a consumer notice related to the specific Cost Avoidance and Recovery area (CSE, TPL, HIPPS, ERU, and Medical Subrogation).		
OPS 050	The EES shall identify, generate and send potential resource situations to work unit as specified. (e.g. Annuities, Trust like Devices, Spousal Elective Shares, Personal Injury cases, Workers Comp, etc.)		
OPS 051	The EES shall display a summary of case information by user role (e.g. head of household, members, relationships, addresses, date of birth, caseworker or process queue, office location, case status, recertification date, simplified report date, current benefit amount, sanction status, etc.).		
OPS 052	The EES shall provide a mechanism to provide custom views of case summary information, based on user roles, program rules, and office procedure.		
OPS 053	The EES shall match and merge duplicate case information, based on user role and program rules.		
OPS 054	The EES shall automatically update case information received through electronic access.		
OPS 055	The EES shall update and track reported changes which do not affect eligibility and do not require verification that are submitted electronically (e.g. phone number, cell number, e-mail address, change in income which remains below program threshold, etc.)		
OPS 056	The EES shall have the ability to close or deny a Category of Eligibility when business rules dictate.		
OPS 057	The EES shall close a Category of Eligibility without closing other active Category of Eligibility s associated with that case.		
OPS 058	The EES shall close any individual other than the program case name in a Category of Eligibility without closing the entire Category of Eligibility that has other active members.		

Appendix B Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
OPS 059	The EES shall provide a mechanism for authorized users to manually override a category of eligibility and/or allow opt-in/opt-out functionality within an active Category of Eligibility.		
OPS 060	The EES shall provide a mechanism to automatically change Category of Eligibility within an active program.		
OPS 061	The EES shall assign a new eligibility begin date for a new Category of Eligibility and automatically assign eligibility end date for a Category of Eligibility being closed.		
OPS 062	The EES shall provide a mechanism to release the hold after final disposition by the secondary reviewer.		
OPS 063	The EES shall share common data elements across multiple programs for selected fields.		
OPS 064	The EES shall have the capability to automatically reassign categories according to business rules.		
OPS 065	The EES shall apply specific eligibility rules during renewal, a reported change or processing simplified reporting for a program(s).		
OPS 066	The EES shall provide a mechanism to collect all information required to auto-populate all necessary Procuring Agency case processing forms, based on program rules.		

Appendix B Functional Requirements

Request for Proposal Number 4544Z1

4. Eligibility Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
ELG 001	The EES shall support eligibility determination in keeping with federal "timeliness" guidelines and State performance standards.		
ELG 002	The EES shall support electronic verification of application data, using State or federal sources, where possible, and support post-enrollment verification where electronic data cannot be obtained.		
ELG 003	The EES shall use the CMS Single Streamlined Application or a modified version of the Single Streamlined Application.		
ELG 004	The EES shall support the use of supplemental application for initial eligibility determinations, renewals or changes to existing Medicaid clients.		
ELG 005	The EES shall electronically capture and store all data elements on the CMS Single Streamlined Application, even if the data elements are not needed for Medicaid eligibility determination.		
ELG 006	The EES shall support the use of alternative applications such as shorten form for non-MAGI, and assessment of resources.		
ELG 007	The EES shall support multiple non-MAGI specific programs, such as spousal impoverishment, Medicare buy-in program; etc.		
ELG 008	The EES shall maintain beneficiary eligibility data and information on each beneficiary's benefits.		
ELG 009	Where an existing case (account) exists, the EES shall reuse relevant information and/or selections		
ELG 010	The EES shall ensure seamless transfer of customers between the EES and the FFM as appropriate.		
ELG 011	The EES shall provide beneficiaries with periodic notifications by mail, e-mail, text, telephone and/or other format according to their stated preference for receiving such communications. The EES shall follow-up electronic notifications with paper notifications where required by federal rules or desired by State operations.		
ELG 012	The EES shall provide the capability to determine eligibility, and make changes to eligibility, on a retroactive basis as allowed by federal and State statutes and regulations		

Appendix B Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
ELG 013	The EES shall provide beneficiaries with clearly stated details as to rights and opportunity for appeal and grievance processes		
ELG 014	The EES shall provide beneficiaries with clear information about privacy and confidentiality protections in the application process		
ELG 015	The EES shall provide beneficiaries with clear information about the Department's protocols in case of an information breach		
ELG 016	The EES shall integrate with the existing or replace a self-assessment tool to be used by external partners and customers to evaluate potential eligibility.		
ELG 017	The EES shall integrate with the existing or replace pre-application screening without entering any personal identifying information.		
ELG 018	The EES shall allow a customer to securely access an electronic account containing application information, notices and appeals information and Fair Hearing information.		
ELG 019	The EES shall use summarized household data for the pre-application process. (e.g. two adults with two children and estimated income).		
ELG 020	The EES shall apply eligibility rules to identify and flag potential financial and non-financial eligibility.		
ELG 021	The EES shall provide the customer information on eligibility and general verification requirements for Medicaid eligibility and timelines for applications and verification processes.		
ELG 020	The EES shall access educational materials on functions of Medicaid and on other state programs.		
ELG 021	The EES shall provide informational fact sheets on programs for which the customer is potentially eligible.		
ELG 022	The EES shall populate the online application with data entered in the pre-application screening tool, if a customer chooses to apply in the same session, where data elements are compatible.		
ELG 023	The EES shall track applications that originate from pre-application screening.		
ELG 024	The EES shall identify and flag expedited benefit cases, with user configurable triggers for expedited cases		

Appendix B Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
ELG 025	The EES shall use existing information on a known customer to preview the impact of potential changes via a new self-assessment.		
ELG 026	The EES shall assure consistency in eligibility determination processing when applicants attempt to access services through different entry points.		
ELG 027	The EES shall accept complete applications from the Marketplace electronically and make Medicaid eligibility determination without requiring additional information from the applicant consistent with the policies set in the State Plan Amendment.		
ELG 028	The EES shall specify beginning coverage date for those who know their existing employer coverage will be ending.		
ELG 029	The EES shall determine eligibility for all Medical Assistance programs.		
ELG 030	The EES shall validate all data fields for valid format (e.g. valid text, numbers, currency, dates, special characters allowed etc.)		
ELG 031	The EES shall upload, store and index verification documents such that they are tied to the appropriate case and searchable.		
EIG 032	The EES shall provide electronic signature capabilities for customers applying in a local office using an electronic signature pad.		
ELG 033	The EES shall provide an electronic signature for an application		
ELG 034	The EES shall record and store a telephonic signature for an application		
ELG 035	The EES shall provide the customer with a notification of approval or denial.		
ELG 036	The EES shall confirm for customers or workers that submitted applications are complete.		
ELG 037	The EES shall maintain data privacy and security requirements consistent with applicable laws.		
ELG 038	The EES shall retain completed applications with various retention schedules. All application data will be easily searchable and retrievable.		
ELG 039	The EES shall allow the customers to track their status via online or telephone during the application process.		

Appendix B Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
ELG 040	The EES shall store a version of the completed application form and allow the customer to retrieve it.		
ELG 041	The EES shall save and print a version of a completed application form that was saved online.		
ELG 042	The EES shall auto-populate known data within the system between modules, functions and applications within the life of the household.		
ELG 043	The EES shall process household with more than one applicant		
ELG 044	The EES shall refer cases with potentially fraudulent activity to appropriate agency		
ELG 045	The EES shall identify applications which are pending HUB Citizenship etc. verification		
ELG 046	The EES shall establish an eligibility base period from one to twelve months.		
ELG 047	The EES shall determine the correct eligibility base period automatically and manually.		
ELG 048	The EES shall retain a viewable history of changes to the eligibility base period.		
ELG 049	The EES shall place cases in a pending status if eligibility cannot be determined in real time due to system unavailability. The case will be flagged for follow up and verification of the required information		
ELG 050	The EES shall place cases in a pending status if eligibility cannot be determined in real time due to data inconsistencies in accordance with 155.315(f). The case will be flagged for follow up and verification of the required information		
ELG 051	The EES shall support multiple budgeting methodologies (e.g. perform multiple tests on a single household when family beneficiaries may be eligible for multiple programs).		
ELG 052	The EES shall identify all types of incomes (e.g. countable or exempt statuses of incomes, and resources by program or individual).		
ELG 053	The EES shall document case notes of actions which have occurred on case		
ELG 054	The EES shall calculate start and end dates of presumptive eligibility periods based on user configurable rules		

Appendix B Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
ELG 055	The EES shall create automatic and manual alerts to internal and external users upon the occurrence of specified events.		
ELG 056	The EES shall automatically re-determine eligibility for customers based on specified events (e.g. cost-of-living adjustment, changes in insurance premium amounts).		
ELG 057	The EES shall calculate customer responsibility/cost sharing for Long Term Care or Home and Community Based waiver programs.		
ELG 058	The EES shall determine applicant eligibility for specific non-independent living Long Term Care or waiver programs. (e.g. Institutional Living).		
ELG 059	The EES shall set a period of ineligibility for a Long Term Care or waiver customer who commits a prohibited transfer of resources.		
ELG 060	The EES shall track movement from one facility to another to re-determine insurance eligibility, and cost sharing based on regulations. (e.g. hospitalization, nursing home, independent living).		
ELG 061	The EES shall identify resources excluded due to Long Term Care insurance.		
ELG 062	The EES shall complete and retain a resource assessment.		
ELG 063	The EES shall support the process of reviewing program eligibility.		
ELG 064	The EES shall display the basis of the eligibility budget calculations.		
ELG 065	The EES shall support varying methods of reviewing program eligibility (e.g. paper process where a review form is generated with pre-populated information).		
ELG 066	The EES shall trigger redetermination on cases with a fixed schedule of timed intervals.		
ELG 067	The EES shall track eligibility determinations separately. (e.g., income used to determine eligibility for Program 1 may be different than the income used to determine eligibility for Program2, etc.)		
ELG 068	The EES shall send notification of eligibility determination.		
ELG 069	The EES shall use the available interfaces to process redetermination for the MAGI qualifying population.		

Appendix B Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
ELG 070	The EES shall provide the capability to create and maintain an electronic household file of all applicants and families requesting services from the time that they first make an entry to the system.		
ELG 071	The EES shall support a range of disposition action triggers including event-based triggers (e.g., creation date, closing date, date of last review).		
ELG 072	The EES shall allow authorized users to review disposition actions prior to their execution.		
ELG 073	The EES shall allow users to apply disposition action holds on records.		
ELG 074	The EES shall have the flexibility to process individuals in the newly created categories.		
ELG 075	The EES shall notify applicants of failed verifications.		
ELG 076	The EES shall provide a mechanism to generate a list of received and pending verifications including eligibility worker entered comments.		
ELG 077	The EES shall provide the ability to allow applicants to view, confirm, dispute and submit corrections to verification results.		
ELG 078	The EES shall provide applicants the ability to address inconsistencies reported by external entities (i.e. income, citizenship, etc.) within a timeframe defined by the Department.		
ELG 079	The EES shall update the applicant's record with the verification results as appropriate.		
ELG 080	The EES shall utilize master indexes to avoid duplicates.		
ELG 081	The EES shall search and match the existing client data before assigning new unique number (e.g., for example, search/match criteria could be the following, including but not limited to, "Fuzzy search", first name, last name, DOB, unique id, SSN, address, aliases, case number, etc.).		
ELG 082	The EES shall have the capability to reconcile duplicate records.		
ELG 083	The EES shall provide the data reports or file extracts to reconcile data between the EES and other systems.		

Appendix B Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
ELG 084	The EES shall capture alias information.		
ELG 085	The EES shall search account by multiple criteria (e.g., name, ID#, phone number, date of birth, county, assigned worker, etc.).		
ELG 086	The EES shall perform compound searches (e.g., names of married couple, names of parent and child, name of siblings, etc.).		
ELG 087	The EES shall easily modify list criteria while searching.		
ELG 088	The EES shall perform responsible person searches.		
ELG 089	The EES shall automatically identify a customer currently known to the system (e.g. applicant pending determination, past member not currently enrolled, etc.)		
ELG 090	The EES shall electronically or manually assign a customer to a case.		
ELG 091	The EES shall conduct a manual case registration by a worker.		
ELG 092	The EES shall create a case by grouping associated customers together.		
ELG 093	The EES shall allow a worker to manually create a case.		
ELG 094	The EES shall use an existing case number per policy.		
ELG 095	The EES shall assign a unique case number to a case.		
ELG 096	The EES shall allow a customer to be associated to multiple cases at the same time. (e.g. customer may receive insurance products on one case number and be the case name for a different case number on which their child is receiving insurance products, etc.)		
ELG 097	The EES shall associate multiple cases to each other. (e.g. cases that share customers).		
ELG 098	The EES shall allow manually associate multiple cases to each other. (e.g. cases that share customers).		
ELG 099	The EES shall close beneficiaries/households/categories based on applicable eligibility rules resulting from changes in information and track closure reasons.		

Appendix B Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
ELG 100	The EES shall provide a process to override system closures.		
ELG 101	The EES shall provide functionality to manually close beneficiaries/households/categories based on applicable eligibility rules resulting from changes in information and track closure reasons.		
ELG 102	The EES shall allow the user to manually associate customers to each other.		
ELG 103	The EES shall create multiple cases based on regulations. (e.g. Disabled parent with a child).		
ELG 104	The EES shall manually separate cases per regulations.		
ELG 105	The EES shall automatically create a task for updates in the eligibility determination of insurance products/other public assistance programs (e.g., child turning 18, 21 or an adult turning 65, etc.).		
ELG 106	The EES shall provide Medicaid enrollment roster to Marketplace at stipulated frequency.		
ELG 107	The EES shall display or capture prior insurance requests.		
ELG 108	The EES shall set 'special situation' indicators based on rules maintained in the system. (e.g. language, confidentiality situations).		
ELG 109	The EES shall allow manually override all automatically set 'special situation' indicators.		
ELG 110	The EES shall provide the customer with a paper receipt of the documentation (e.g. paystub or birth certificate) that has been turned in to a worker.		
ELG 111	The EES shall provide applicants the ability to address inconsistencies reported by external entities (i.e. income, citizenship, etc.) within a timeframe defined by the Department.		
ELG 112	The EES shall update the applicant's record with the verification results as appropriate.		
ELG 113	The EES shall have the capability for the Department to notify Marketplace of Medicaid Determination		
ELG 114	The EES shall provide a mechanism to manually extend verification timeframes.		

Appendix B Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
ELG 115	The EES shall point out missing data, errors and inconsistencies as they progress through the application, performing verification in real time where possible		
ELG 116	The EES shall provide a mechanism to have a "same as" selection to enter repetitive data.		
ELG 117	The EES shall allow a worker to jump back to sections previously completed without losing data entered.		
ELG 118	The EES shall provide a mechanism to manually navigate/skip to any screens that the worker is authorized to access.		
ELG 119	The EES shall identify and display verifications required for the applicant based on program rules.		
ELG 120	The EES shall produce a customized listing of verification documents for an eligibility criteria required to complete eligibility determination.		
ELG 121	The EES shall allow a worker to upload and attach source documents to support eligibility determination.		
ELG 122	The EES shall present worker with a summary view of the information entered prior to submission.		
ELG 123	The EES shall provide applicants the ability to submit alternative verification via multiple avenues (e.g., email, mail, phone, fax, walk- in).		
ELG 124	The EES shall assign a unique identifier as specified by the Department to be for each person entered.		
ELG 125	The EES shall allow an applicant or applicant's authorized representative to review the current application before and after formal submission with the appropriate safeguards and security measures.		
ELG 126	The EES shall not allow an applicant and applicant's authorized representative to submit more than one application within 30 days from the initial submission unless the application was denied.		
ELG 127	The EES shall allow an applicant or applicant's representative to amend an application as long as a determination has not been made.		
ELG 128	The EES shall allow the applicant or applicant's authorized representative to save and amend the application or renewal for up to 30 days in order to gather additional information prior to submittal.		
ELG 129	The EES shall allow and record an applicant's request to withdraw an application.		
ELG 130	The EES shall only collect applicant/household information once and share across Department designated fields.		

Appendix B Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
ELG 131	The EES shall provide an automated or guided application process to enable the worker to easily enter required information.		
ELG 132	The EES shall capture and track from which organization an application was submitted.		
ELG 133	The EES shall monitor the number of applications submitted and abandoned and the number of applicants who requested assistance via chat, telephonic, etc.		
ELG 134	The EES shall monitor and report on number of applications received and the method by which they were submitted.		
ELG 135	The EES shall capture interview dates.		
ELG 136	The EES shall provide system-generated date and time stamp for receipt of electronic applications to be used in monitoring standards of promptness by program.		
ELG 137	The EES shall provide system-generated date and time stamp for registration of paper applications.		
ELG 138	The EES shall provide a mechanism to begin benefits on a date different than the application date and system-generated date.		
ELG 139	The EES shall capture and display date that a disposition was made on an application/renewal.		
ELG 140	The EES shall check each incoming applicant against existing eligibility database to determine if the incoming applicant is new to the system, reopening a prior category, or adding applicants to existing household.		
ELG 141	The EES shall allow continuance of the application process for applicants without an SSN and assign pseudo-number and ensure pseudo number allows match to get correct SSN.		
ELG 142	The EES shall provide a mechanism to match and replace the pseudo-SSN with the actual SSN.		
ELG 143	The EES shall route applications to the appropriate staff, based on business rules.		
ELG 144	The EES shall display to the applicant discrepant information between the new application and information stored in the existing household.		
ELG 145	The EES shall provide a mechanism through which an applicant could check the applicant's status.		
ELG 146	The EES shall provide the ability to allow applicants to submit paper applications, whether through walk-in, fax or mail-in.		

Appendix B Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
ELG 147	The EES shall provide capability to track incomplete, new, add-on, and pending applications.		
ELG 148	The EES shall allow for a manual verification process when the Marketplace hub verification service is not available.		
ELG 149	The EES shall provide a mechanism to indicate which verification documents have already been provided.		
ELG 150	The EES shall send notification of alternative verification options to the applicant when electronic verification is not available.		
ELG 151	The EES shall provide the capability to determine and correct eligibility for current and prior months.		
ELG 152	The EES shall determine eligibility without worker intervention, as allowed by policy (e.g., exceeds the Medical Assistance income limit).		
ELG 153	The EES shall allow designated users to override eligibility determinations.		
ELG 154	The EES shall send eligibility determinations to the MMIS enrollment system on a real-time basis to support plan enrollment and claims processing functions.		
ELG 155	The EES shall generate reports related to eligibility decisions.		
ELG 156	The EES shall be flexible enough to add additional Medical Assistance programs.		
ELG 157	The EES shall display the eligibility results in a manner that is comprehensive and easy to understand.		
ELG 158	The EES shall have spenddown capability, including automating a spenddown of resources and income calculation.		
ELG 159	The EES shall allow the Department to set enrollment limits and provide a mechanism to manage applications for programs that are at whose enrollment is capped.		
ELG 160	The EES shall provide the capability for certain programs, as identified by the Department, to be flagged according to funding source.		
ELG 161	The EES shall evaluate the resource/asset eligibility of an applicant when determining eligibility for those programs requiring a resource / asset test.		
ELG 162	The EES shall allow authorized users to search online household files using key fields such as name, SSN, ID, date of birth, etc.		
ELG 163	The EES shall provide a mechanism for authorized users to access beneficiary/household summary from any screen.		

Appendix B Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
ELG 164	The EES shall provide the capability to re-open a category that is closed in the status it was before the closure.		
ELG 165	The EES shall provide a mechanism to indicate relationships between all members of a household.		
ELG 166	The EES shall provide a mechanism to automatically create the inverse family relationships (e.g., parent - child, child - parent, etc.).		
ELG 167	The EES shall provide the capability to perform mass terminations due to changes in status as well as program changes.		
ELG 168	The EES shall provide household-based activity checklists (to-do lists) to assist in prompting the workers in the completion of required household activities		
ELG 169	The EES shall allow for interview scheduling and tracking of completed interviews. Send client notification of interview is not completed.		
ELG 170	The EES shall include workflow management based on whether an applicant is MAGI-based and/or MAGI-excepted households.		
ELG 171	The EES shall identify all types of incomes (e.g. countable or exempt statuses of incomes, and resources by program or individual).		
ELG 172	The EES shall provide the capability at an individual level to be able to rework a prior case that is closed even if an open case exists.		
ELG 173	The EES shall track program requirements for individuals, e.g., those who are penalized due to transfer of assets.		
ELG 174	The EES shall provide an automated screening tool to determine potential eligibility status using predefined rules and to route to the next step in the process.		

Appendix B Functional Requirements

Request for Proposal Number 4544Z1

5. Appeals Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
APP 001	The EES shall support an electronic appeals process, which includes transmission of data to the federal Hub, interfacing with document imaging, and a client web accessibility		
APP 002	If an Appeals decision is in favor of The Department, the EES shall automate the recovery of premiums or medical services that were paid and auto-generate form to Finance Office for recovery.		
APP 003	The EES shall support an integrated and customizable applicant complaint and grievance process, with reporting capabilities.		
APP 004	The EES shall capture and track the disposition of appeals (including status, assignments, and relevant household notes).		
APP 005	The EES shall record the detailed results and supporting documentation that result from or support an appeals decision.		
APP 006	The EES shall have the ability to be notified of results of Appeals		
APP 007	The EES shall automatically capture, retain, and display receipt of eligibility appeals.		
APP 008	The EES shall allow manually entered eligibility appeals.		
APP 009	The EES shall record the reporter/source (name, address, associated agency of person expressing the eligibility appeals, etc.), if applicable.		
APP 010	The EES shall provide a mechanism to generate a list of received and pending verifications including eligibility worker entered comments.		
APP 011	The EES shall assign a unique tracking number to the eligibility appeals.		
APP 012	The EES shall assign a worker, or group of workers, to manage eligibility appeals.		
APP 013	The EES shall update/change manager assigned to an eligibility appeal.		
APP 014	The EES shall identify and assign the priority of eligibility appeals.		

Appendix B Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
APP 015	The EES shall cross reference common eligibility appeals (e.g. receiving 100 fair appeals requests from a single customer on a single policy change).		
APP 016	The EES shall track when a request for reconsideration becomes an appeal request.		
APP 017	The EES shall provide the facility to export and print case histories and case notes for the purposes of appeals.		
APP 018	The EES shall support the appeals process for customer exemption decision.		
APP 019	The EES shall accept and adjudicate customers appeals regarding eligibility determinations and exemptions from the customer responsibility requirement.		
APP 020	The EES shall associate the eligibility appeals to a case(s) and /or a customer(s).		
APP 021	The EES shall track all eligibility appeals.		
APP 022	The EES shall track multiple eligibility appeals from a single contact.		
APP 023	The EES shall store all eligibility appeals in a central location.		
APP 024	The EES shall track a request for reconsideration outside of standard case notes		
APP 025	The EES shall log updates to an appeal in case notes		
APP 026	The EES shall add notes to appeals		
APP 027	The EES shall capture history of eligibility appeals by multiple parameters (e.g. source, subject, date, etc.)		
APP 028	The EES shall sort history of eligibility appeals by multiple parameters (e.g. source, subject, date, etc.).		
APP 029	The EES shall document an audit trail which reflect who updated associated details to a case.		
APP 030	The EES shall provide the capability to record all decisions of appeals.		
APP 031	The EES shall alert appropriate staff when action is needed or information is due to ensure timely processing of the eligibility appeals.		

Appendix B Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
APP 032	The EES shall support an appeals process on individual exemption decisions from the individual responsibility requirement.		
APP 033	The EES shall provide the functionality to reinstate service coverage until the Administrative Appeals decision is rendered.		
APP 034	The EES shall provide the ability to allow applicants to view, confirm, dispute and submit corrections to verification results.		
APP 035	The EES shall have the ability for customers to request a postponement of an appeal if the request is made in compliance with State and federal guidelines.		
APP 036	The EES shall have the ability for the customers to request for reconsideration to handle inquiries.		
APP 037	The EES shall have an appeal request submitted through multiple channels including phone, e-mail, letter, etc.		
APP 038	The EES shall provide an electronic template for eligibility appeal process.		
APP 039	The EES shall generate a referral to a third party assignee. (e.g. regular letter, email, automated referral, etc.).		
APP 040	The EES shall require a response by the third party assignee on a case by case basis.		
APP 041	The EES shall have the ability for customers to request an appeal in written form or verbally and followed up in writing.		
APP 042	The EES shall maintain health benefit plan at the current level after an appeal is requested by the customer on a timely manner until the decision of appeal is made (for a discontinuance of an active case).		
APP 043	The EES shall notify customer, third party entity, worker, etc. that the status of an eligibility appeal has changed. (e.g. pending hearing, withdraw, referred, etc.).		
APP 044	The EES shall notify applicants of failed verifications.		
APP 045	The EES shall notify the customer that their eligibility appeal has been received.		
APP 046	The EES shall notify the customer who their eligibility appeal has been referred to.		
APP 047	The EES shall provide a mechanism to track required verification timeframes.		

Appendix B Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
APP 048	The EES shall provide the capability to create an electronic household file that records all application data and organizes all supporting documentation and images in an easy-to-use format.		
APP 049	The EES shall allow all individuals to exercise their right to appeal any eligibility determination for Medicaid, premium tax credits, cost sharing subsidies, or QHP eligibility.		
APP 050	If an appeals decision is in favor of the Department, the EES shall automate the recovery of premiums or medical services that were paid and auto-generate form to Finance Office for recovery.		

Appendix B Functional Requirements

Request for Proposal Number 4544Z1

6. Notifications Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
NOT 001	The EES shall generate notices by applicant/beneficiary preferred method of communication e.g., mail, email, or fax.		
NOT 002	The EES shall support multiple pages and applicant/beneficiaries standard "Rights and Responsibilities" text, including, but not limited to, applicant/beneficiary's right to an Administrative Appeal.		
NOT 003	The EES shall allow applicant/beneficiaries to choose the method of preferred communication.		
NOT 004	The EES shall record and track how correspondence was issued to the applicant/beneficiary.		
NOT 005	The EES shall provide the capability for mass notifications to applicant/beneficiaries or groups of applicant/beneficiaries.		
NOT 006	The EES shall auto-populate all forms with required information from the system (e.g., applicable dates, missing and provided verifications, notes, etc.).		
NOT 007	The EES shall not have page limits.		
NOT 008	The EES shall produce notices and forms in English and Spanish languages as required by the federal and State statutes, regulations, and policies.		
NOT 009	The EES shall issue notices at set timeframes according to program rules.		
NOT 010	The EES shall provide the capability to set and change release dates.		
NOT 011	The EES shall provide a mechanism to suppress and track any specific notice (one-time notice suppression).		
NOT 012	The EES shall provide a mechanism to suspend any notice type.		
NOT 013	The EES shall provide a mechanism for designated persons to create new versions of notices/forms/correspondence from templates.		
NOT 014	The EES shall provide standard letter templates and the ability to add free form text to customize a letter to the customer's specific issue.		
NOT 015	The EES shall allow workers to generate or regenerate a notice/form upon demand.		

Appendix B Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
NOT 016	The EES shall generate a notice which includes a list of needed actions by the applicant/beneficiary by a standard due date (with a worker override), depending on the status or type of program applied for.		
NOT 017	The EES shall notify the beneficiary when their enrollment status has changed based on pre-set parameters so that the appropriate notice is generated for the circumstance.		
NOT 018	The EES shall provide the capability to electronically generate notices to obtain missing information.		
NOT 019	The EES shall create a sortable history of all notices associated with the applicant/beneficiary, including specific dates, and have the ability to view notices.		
NOT 020	The EES shall provide the capability to bundle and send out multiple notices and/or send out notices with corresponding forms together.		
NOT 021	The EES shall provide the capability to change information in a notice or delete a notice if it has not been 'sent'.		
NOT 022	The EES shall identify whether notice was auto-generated or worker-generated.		
NOT 023	The EES shall have noticing tightly integrated with the Marketplace and complying with all ACA regulations for such integration.		
NOT 024	The EES shall send electronic and/or paper renewal notices to beneficiaries.		
NOT 025	The EES shall pre-populate electronic and/or paper renewal forms with beneficiary information that is currently on file and allow the beneficiary to change or add information.		
NOT 026	The EES shall renew eligibility based on current Federal and State statutes and regulations. The system shall be modified as required to meet all federal and State statutes that are changed during the life of the contract.		
NOT 027	The EES shall track and provide notification to users when a renewal is due.		
NOT 028	The EES shall track which electronic and/or paper renewals have been sent and which have been returned,		
NOT 029	The EES shall allow workers to generate notices, compliant with State and federal regulations at the time of notice generation, throughout the appeal process.		
NOT 030	The EES shall accept automated and manual responses received on referrals sent and associate them with initial referral.		

Appendix B Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
NOT 031	The EES shall retain history of all referrals sent and responses received.		
NOT 032	The EES shall store a copy of notices. These notices shall be available to the work units that support these functions (CSE, TPL, HIPPS, ERU, and Medical Subrogation).		
NOT 033	The EES shall generate Notice to customer that the full application must be completed to continue coverage beyond the presumptive eligibility period.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

The Non-Functional Requirements Traceability Matrix (RTM) is used to document and track the project requirements from the proposal through to testing to verify that the requirement has been completely fulfilled. The Contractor will be responsible for maintaining the set of Baseline Requirements directly related to the configuration of the EES. Additions, modifications, and deletions to these requirements will be added and modified throughout the project so it is imperative that a current version of the matrix be maintained at all times.

Bidders must provide an initial RTM as part of its proposal. The RTM shall follow the instructions below. The Bidder must state requirements exactly as they are provided in this RFP. The Bidder must indicate how it will achieve full compliance (i.e., requirement fulfilled 100%). Any requirements that the Bidder cannot attest to full compliance must be documented as outlined in Appendix D: Gap Analysis.

Bidders are required to provide a response, using the appropriate codes provided in the tables below, for each requirements listed in the Functional Requirements Response Matrix. Scoring for each requirement will directly relate to the ability code indicated by the Bidder.

Ability Code	Condition	Description
S	Standard Function	The proposed EES fully satisfies the requirement as stated. The Bidder must describe how the requirement is satisfied by the EES.
W	Workflow or System Configuration Required	Current functionality of the proposed EES exists in the EES and can be modified by a system administrator to meet this requirement.
M	Modification Required	The proposed EES requires a modification to existing functionality to meet this requirement which requires a source code modification. The EES will be modified to satisfy the requirements as stated or in a different format. The Bidder must describe the modifications.
F	Planned for Future Release	This functionality is planned for a future release. The Bidder must describe how the requirement will be satisfied by the EES and when the release will be available.
C	Custom Design and Development	The proposed EES requires new functionality to meet this requirement which requires a source code addition. The Bidder must describe the feature and its value.
N	Cannot Meet Requirement	The proposed EES will not satisfy the requirement. The Bidder must describe why the requirement cannot be satisfied.
O	Other Software	If the requirement is to be satisfied through the use of a separate software package(s), the Bidder must identify those package(s) and describe how the functionality is integrated into the base system.

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

1. General System Requirements

Req #	Requirement Description	Bidding Ability Code	Proposed EES/Comments
GSR 001	The EES shall follow a modular, flexible approach to systems development which is consistent with the MITA 3.0 guidelines, the CMS Exchange Reference Architecture, and Service-Oriented Architecture (SOA) design principles.		
GSR 002	The EES shall follow an n-tiered (layered) architectural approach in which presentation, business logic, and data access are separated.		
GSR 003	The EES shall provide scalable architecture.		
GSR 004	The EES shall be architected with no single point of failure, supporting a high-availability enterprise.		
GSR 005	The EES shall be deployable to servers running one of the following operating systems: <ul style="list-style-type: none"> - Linux - Unix - Windows - z/OS 		
GSR 006	The EES shall support deployment on virtualized servers to support scalability and flexibility.		
GSR 007	All infrastructure software used by the EES (operating system, databases, web servers, network management, etc.) shall be a version that is currently supported under standard maintenance agreements and is generally available during the life of the contract.		
GSR 008	The EES shall incorporate an externalized rules repository and engine that allows business rules (including, but not limited to eligibility rules, program determination rules, rate calculations, and application validation rules) to be separated from application logic and defined and maintained through graphical user interfaces or other non-programmatic means.		
GSR 009	The rules engine shall be scalable and flexible to allow it to support expanded eligibility and enrollment rules in the future.		
GSR 010	The EES shall use an enterprise workflow engine to support the routing of work items, work queues, etc.		
GSR 011	The EES shall leverage an electronic document management system that is integrated with the workflow engine to support the storage and retrieval of document images associated with member and eligibility and enrollment processes.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidding Ability Code	Proposed EES/Comments
GSR 012	The EES shall use an industry-standard commercial Relational Database Management System (RDBMS), Application Server, and Web Server infrastructure.		
GSR 013	The EES' transactional databases shall use data models, referential integrity, constraints, stored procedures, and other DB specific functions to ensure data is properly formatted and orphaned records are not allowed in the EES		
GSR 014	The EES shall support a multi-tiered network deployment model that allows some physical tiers (e.g. load balancers, web servers) to be deployed in one network zone and other tiers (e.g. application servers, databases) to be secured behind internal firewalls		
GSR 015	The EES shall employ an Enterprise Service Bus (ESB) that serves as the integration backbone and the broker between service consumers and producers.		
GSR 016	The EES shall provide a business process layer that manages/orchestrates executable business processes via the ESB, including reusable business services such as encryption, compression, validation, and dynamic routing.		
GSR 017	The EES shall be architected using Business Process Management and workflow technologies as the primary integrated vehicle to implement business processes by composing them from human interactions and coarse-grained services.		
GSR 018	The EES shall support multi-node application server processing so that application processing load can be distributed and balanced across multiple physical servers.		
GSR 019	The EES architecture shall ensure that reporting and batch processing does not interfere with general system responsiveness or availability.		
GSR 020	The EES workflow, web pages and program functions, shall be configurable and modifiable without changing program code.		
GSR 021	The EES shall be designed and developed using a component-based architecture that is modifiable and reusable.		
GSR 022	The EES shall be designed, built and deployed in accordance with Enterprise Architecture best practices.		
GSR 023	The EES shall be built upon an infrastructure that is easily upgradable through patches and point releases, including the upgrading of the EES software and all prerequisite infrastructure software and the application of data migration or update scripts.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidding Ability Code	Proposed EES/Comments
GSR 024	The EES shall have the ability to interact with the N-FOCUS legacy system to allow for all functionality of the old and new systems to be available.		
GSR 025	The EES shall comply with CMS requirements to establish a framework of enabling technologies and processes that support improved administration of the Medicaid program.		
GSR 026	The EES shall provide the ability to terminate, reverse or back-out a software update in the event it is discovered the update is erroneous or corrupted. The EES shall provide the ability to restore the data to the state prior to the update.		
GSR 027	The EES shall provide a clearly defined promote-to-production process that enforces a strictly defined methodology for movement from development to QA and production.		
GSR 028	The EES shall provide the ability to roll back data and software releases/programs as requested by DHHS during testing cycles.		
GSR 029	The EES shall provide DHHS with all changes, modifications, enhancements, or customized features it makes to any licensed software approved by the Department to be used in The EES.		
GSR 030	The EES shall include appropriate checkpoint/restart capabilities, and other features necessary to ensure reliability and recovery, including telecommunications reliability, file backups, and disaster recovery.		
GSR 031	The EES shall be deployed primarily as a web-based interface, so that users only need a web browser to access the EES.		
GSR 032	The EES workflow, web pages, and program functions shall be configurable and modifiable without changing program code.		
GSR 033	The EES shall maintain the security requirements set forth by federal and Nebraska government.		
GSR 034	The EES shall be scalable and flexible enough to accommodate any changes required by Nebraska and/or federal statute, mandate, decision or policy.		
GSR 035	The EES shall support multiple deployment environments, including development, test, training, and production. (sandbox, break-fix)		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidding Ability Code	Proposed EES/Comments
GSR 036	The EES shall provide the following testing functions: <ul style="list-style-type: none"> - Functional Testing - Regression Testing - Load & Performance Testing - Test case creation and tracking - Test data generation (i.e. data masking, data filtering, etc.) 		
GSR 037	The EES should make the rules engine available in a shared services model to be accessed by other Nebraska systems.		
GSR 038	The EES should leverage an enterprise content management system to store digital content, downloadable forms, and personalized on-screen content.		
GSR 039	The EES should assure that third party software, used for ancillary aspects of the EES, that require distribution or maintenance to remote desktops or servers can be capable of being distributed and configured on user work stations from a central site and not require onsite intervention. In other words, software should support "silent" or unattended installation functionality for any non-web based features.		
GSR 040	The EES should be able to support the following multi-agency configurations:		
GSR 041	<ul style="list-style-type: none"> • Two or more independent yet integrated Agencies in a single instance of the business application running on a single instance of the technical infrastructure 		
GSR 042	<ul style="list-style-type: none"> • Two or more independent yet integrated Agencies each with a separate instance of the business application which all run on the same instance of the technical infrastructure 		
GSR 043	<ul style="list-style-type: none"> • Two or more independent, yet integrated, Agencies each with a separate instances of the business application which run on separate instances of the technical infrastructure. 		
GSR 044	The EES should include a service management layer that provides the following:		
GSR 045	<ul style="list-style-type: none"> • A registry/repository in which all services related to the EES can be published. This registry should support Universal Description Discovery and Integration (UDDI) and the Web Services Description Language (WSDL) 		
GSR 046	<ul style="list-style-type: none"> • Service monitoring, logging, and audit 		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidding Ability Code	Proposed EES/Comments
GSR 047	<ul style="list-style-type: none"> • Should be open to others and reusable by other systems and agencies 		
GSR 048	The EES should ensure that the use of acronyms and codes are consistent across the EES components (windows, screens, reports and databases or data dictionary).		
GSR 049	The EES should provide the ability to support client services through a variety of channels. This may include, but is not limited to web, kiosks, call centers, other organizations, and walk ins.		
GSR 050	The EES should allow new data items to be automatically included in migration paths during software upgrades.		
GSR 051	The EES should document and expose all SOA services using standard WSDL and industry best practices.		
GSR 052	The EES should leverage webs services and adhere to key standards such as SOAP, XML, UDDI, WSDL, BPEL, SAML, and other standards as detailed by the Department.		
GSR 053	The EES should define service modules independently, with the interface modules bridging the gap between modules.		
GSR 054	The EES should provide the ability to refresh each environment.		
GSR 055	The EES should have the ability to backup, recover, restart, and cancel jobs.		
GSR 056	The EES should utilize a web portal that is scalable and has the ability to accommodate additional systems and content in the future.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

2. Service Oriented Architecture (SOA) Requirements

Req #	Requirement Description	Bidding Ability Code	Proposed EES/Comments
SOA 001	The EES components shall be committed to an advanced approach to interoperability using web services and SOA aligned with Nebraska standards and vision for interoperability.		
SOA 002	The EES shall provide the ability to distribute services amongst different components and tiers of the architecture.		
SOA 003	The EES shall develop/integrate services using standardized Web Services formats.		
SOA 004	The EES shall allow for centralized service maintenance (new, update, delete).		
SOA 005	The EES shall provide the ability to publish services and related data to be used by different types and classes of service consumers.		
SOA 006	The EES shall ensure enterprise-wide access to services through all required channels such as Nebraska facilities, phone, mail, and online via the Internet.		
SOA 007	The EES shall provide the capabilities for a Real-Time (or near real-time) Integrated Enterprise where common data elements about the consumers served and services rendered are easily shared across organizational units with appropriate adherence to security and privacy restrictions.		
SOA 008	The EES shall establish an interoperability layer that supports interactions among components via a variety of protocols (HTTP/plain old XML, SOAP, Internet Inter-ORB Protocol [IIOP], .NET remoting, Message-Oriented Middleware [MOM] protocols, file transfer protocols and others) and interaction styles (request/reply, conversational, publish and subscribe, asynchronous messaging and others).		
SOA 009	The EES shall implement synchronous and asynchronous program-to-program communication, moving messages between SOA service consumer modules and service provider modules at runtime. The ESB component may also move files, database rows and other data.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidding Ability Code	Proposed EES/Comments
SOA 010	EES shall implement a SOA by using an ESB, responsible to monitor and control routing of message exchange between services, resolve contention between communicating service components, control deployment and versioning of services and marshal use of redundant services.		
SOA 011	EES shall support creation and extension of service interfaces through the use of WSDL.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

3. Interoperability & Interfaces Requirements

Req #	Requirement Description	Bidding Ability Code	Proposed EES/Comments
IO1 001	The EES shall provide a SOA based infrastructure (i.e. hub and spoke) for connecting to other EESs using an ESB infrastructure.		
IO1 002	The EES's Interface architecture for internal A2A (Application to Application) integration shall not have a negative impact on the user experience and expectation for application performance. All points of contacts for A2A communications shall be documented.		
IO1 003	The EES's interfaces shall secure and protect the data and the associated infrastructure from a confidentiality, integrity and availability perspective.		
IO1 004	The EES shall be able to support Application to Application (A2A) synchronous and asynchronous messaging using web services. The messaging capabilities will be able to support a wide variety of A2A patterns including, but not limited to, the following: -		
IO1 005	<ul style="list-style-type: none"> • Data look-up and retrieval 		
IO1 006	<ul style="list-style-type: none"> • Data look-up with services provided by other applications 		
IO1 007	<ul style="list-style-type: none"> • Simple bulk data transfer to/from other EES's. 		
IO1 008	The EES' interface infrastructure shall continue to operate despite failure or unavailability of individual technology components such as a server platform or network connection.		
IO1 009	The EES shall have the capability to notify System Administrators/system support staff if an interface is not available for any reason. The notification and issue(s) shall be invisible to the applicant/beneficiary/client.		
IO1 010	The EES' interfaces must be scalable to accommodate changes in scale including changes in user population, transaction volume, throughput and geographical distribution.		
IO1 011	The EES shall be capable of making any changes to the interface data elements/layouts easily, and to test those changes.		
IO1 012	The EES shall implement, at a minimum, interfaces (both real-time or batch) with the applications and data sources listed in "Interface List - N-FOCUS" document included in the procurement library.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidding Ability Code	Proposed EES/Comments
IOI 013	The EES shall provide the capability to detect and remediate errors caused by batch processing and real time processing via user defined rules		
IOI 014	The EES shall provide the capability to perform source to destination file integrity checks for exchange data and alert appropriate parties with issues		
IOI 015	The EES shall build in contingencies for the storage of transactions where there is dependency on availability of data from business partners that provide authoritative data (e.g., the IRS, DHS, and SSA).		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

4. Scalability and Extensibility Requirements

Req #	Requirement Description	Bidding Ability Code	Proposed EES/Comments
SCA 001	The EES shall be designed for ease of maintenance and readily allow future functional enhancements. This shall be accomplished through use of modern design principles for SOA, applying principles of modularity, interface abstraction, and loose coupling.		
SCA 002	The EES shall be adequately flexible to keep up with ever changing technology and regulatory changes. This shall be accomplished by separating workflow and business rules into their own separate tiers.		
SCA 003	The EES shall be scalable and adaptable to meet future growth and expansion/contraction needs such that the EES can be expanded on demand and be able to retain its performance levels when adding additional users, functions, and data.		
SCA 004	The screens shall be highly re-configurable, providing ability to reposition and rename field labels/data fields, remove or "turn-off" unused fields, maintain data, and allow addition of custom-defined fields.		
SCA 005	The Department shall be able to modify the labels and arrangement of information in the data model EES documentation templates and can create custom data fields.		
SCA 006	The EES shall provide the ability to create and/or modify edits and business rules which determine the correctness/integrity of data.		
SCA 007	The EES shall provide the ability for on-line access by any site connected to the organization WAN.		
SCA 008	The EES shall provide the capability for remote access in compliance with existing Nebraska / federal connectivity/security policies.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

5. EES Performance Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
PER 001	The Contractor must build the EES such that expansion of the system can be achieved with a minimum of additional system administration burden and staffing.		
PER 002	EES Administration staffing requirements and workload should be minimally impacted with expanded system usage.		
PER 003	The Contractor must build the EES so that there is a near linear relationship between each additional server added, and the additional load that can be accommodated (load vs. capacity added), up to specified limit.		
PER 004	The EES shall use fully redundant network and hardware. Hardware components (such as processor and memory) should have built-in redundancy to allow a second component to take over in the event of a failure in the primary component. Similarly, redundant paths should also exist for networks.		
PER 005	The EES shall leverage virtualization to expedite disaster recovery.		
PER 006	The EES shall have the ability to support either a Production and hot (real time replication) disaster recovery design or a multi host site Production design that would allow one site to seamlessly be offline and the other site would maintain service without interruption.		
PER 007	The EES shall include a disaster recovery plan and provide contingency plans for client lookup capabilities and online collaboration in the event of a disaster.		
PER 008	The EES shall provide the ability to recover from data loss due to end user error and application error.		
PER 009	The EES shall provide the ability to perform archival/incremental backups and the ability to perform open/closed database backups.		
PER 010	The EES shall provide tools for managing an environment that supports both high availability and disaster recovery.		
PER 011	The EES shall include the capability to maintain all data according to Department defined records retention guidelines (i.e. record schedule). In general document retentions range from 3 to 10 years.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
PER 012	The EES shall include the capability to maintain all images and electronic documents according to Department defined document retention guidelines (i.e. record schedule).		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

6. Regulatory & Security Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RSR 001	The EES must provide a mechanism to comply with EES security requirements and safeguards requirements following federal agencies/entities:		
RSR 002	<ul style="list-style-type: none"> • United States Department of Agriculture (USDA) 		
RSR 003	<ul style="list-style-type: none"> • Food & Nutrition Services (FNS) 		
RSR 004	<ul style="list-style-type: none"> • Internal Revenue Service (IRS) 		
RSR 005	<ul style="list-style-type: none"> • Social Security Administration (SSA) 		
RSR 006	<ul style="list-style-type: none"> • Department of Health & Human Services (DHHS) Center for Medicare & Medicaid Services (CMS) 		
RSR 007	<ul style="list-style-type: none"> • Administration for Children & Families (ACF) 		
RSR 008	<ul style="list-style-type: none"> • NIST 800-53 and DOD 8500.2 		
RSR 009	<ul style="list-style-type: none"> • Federal Information Security Management Act (FISMA) of 2002 		
RSR 010	<ul style="list-style-type: none"> • Health Insurance Portability and Accountability Act (HIPAA) of 1996 		
RSR 011	<ul style="list-style-type: none"> • Health Information Technology for Economic and Clinical Health Act (HITECH) of 2009 		
RSR 012	<ul style="list-style-type: none"> • Privacy Act of 1974 		
RSR 013	<ul style="list-style-type: none"> • e-Government Act of 2002 		
RSR 014	<ul style="list-style-type: none"> • Patient Protection and Affordable Care Act of 2010, Section 1561 Recommendations 		
RSR 015	<ul style="list-style-type: none"> • Safeguards for Protecting Federal Tax Returns and Return Information (26 U.S.C. Section 6103 and related provisions) 		
RSR 016	<ul style="list-style-type: none"> • Health Insurance Portability and Accountability Act (HIPAA) 		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RSR 017	<ul style="list-style-type: none"> Family Educational Rights and Privacy Act (FERPA) 		
RSR 018	<ul style="list-style-type: none"> Health Information Technology for Economic and Clinical Health (HITECH) Act

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RSR 033	<ul style="list-style-type: none"> Computer Matching and Privacy Protection Act of 1988 (CMPPA) 		
RSR 034	<ul style="list-style-type: none"> SSA Information System Security Guidelines for federal, State, and Local Agencies 		
RSR 035	<ul style="list-style-type: none"> Title XIX Confidentiality Rules 		
RSR 036	The EES shall conform to the sub-parts of Section 508 of the Americans with Disabilities Act (ADA), and any other appropriate Nebraska or federal disability legislation.		
RSR 037	The EES shall comply with all applicable Nebraska security policies and adhere to all legal, statutory, and regulatory requirements, as determined by Nebraska Leadership.		
RSR 038	The EES should have a unique identifier which is not the SSN.		
RSR 039	The EES shall comply with accessibility requirements described in 45 CFR 85 and with Nebraska accessibility requirements.		
RSR 040	The EES shall comply with Nebraska branding standards as defined by the Department.		
RSR 041	The Contractor shall adhere to the principle of "Fail Safe" to ensure that a system in a failed state does not reveal any sensitive information or leave any access controls open for attacks.		
RSR 042	The EES shall allow for controlled access to participant records. Users will be able to view participant data within the EES at the Department defined levels of access based on user security privileges.		
RSR 043	The EES shall maintain a level of security that is commensurate with the risk and magnitude of the harm that could result from the loss, misuse, disclosure, or modification of information.		
RSR 044	Information security shall be built into the EES from its inception rather than "bolted on" after the EES has been implemented.		
RSR 045	The EES shall support security at the object level (e.g. Table, View, Index).		
RSR 046	The EES shall support security at the row and column level.		
RSR 047	The EES shall support auditing at the object level (i.e. Table, Column).		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RSR 048	The EES shall provide the ability for concurrent users to simultaneously view the same record, documentation and/or template.		
RSR 049	The EES shall provide protection to maintain the integrity of data during concurrent access.		
RSR 050	The software used to install and update the systems, independent of the mode or method of conveyance, shall be certified free of malevolent software ("malware"). Contractor may self-certify compliance with this standard through procedures that make use of commercial malware scanning software.		
RSR 051	The EES shall be configurable to prevent corruption or loss of data already accepted into the EES in the event of an EES failure (e.g. integrating with a UPS, etc.).		
RSR 052	The EES shall support protection of confidentiality of all Protected Health Information (PHI) delivered over the Internet or other known open networks via encryption using triple-DES (3DES) or the Advanced Encryption Standard (AES) and an open protocol such as Transport Layer Security (TLS), Secure Sockets Layer (SSL), Internet Protocol Security (IPsec), XML encryptions, or Secure/Multipurpose Internet Mail Extensions(S/MIME) or their successors.		
RSR 053	The EES, when storing PHI on any device intended to be portable/removable (e.g. smartphones, portable computers, portable storage devices), shall support use of a standards based encrypted format using 3DES, AES or their successors.		
RSR 054	The EES, prior to access to any PHI, shall display a configurable warning or login banner (e.g. "The EES should only be accessed by authorized users"). In the event that an EES does not support pre-login capabilities, the EES shall display the banner immediately following authorization.		
RSR 055	The EES shall comply with Title XIX and related regulations and guidance.		
RSR 056	The EES shall comply with Title XXI and related regulations and guidance.		
RSR 057	The EES shall comply with the Office of the National Coordinator's Nationwide Privacy and Security Framework for Electronic Exchange of Individually Identifiable Health Information.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RSR 058	The EES shall comply with the Section 504 of the Rehabilitation Act.		
RSR 059	The EES shall comply with the Section 6103 of the Internal Revenue Code.		
RSR 060	The EES should comply with the National Information Exchange Model (NIEM).		
RSR 061	The EES should support processing of data in multiple formats such as XML, X12, and other industry standard formats.		
RSR 062	The EES shall provide for security concepts covering the following components: Virtual Private Network (VPN), firewall technology and Demilitarized Zone (DMZ), virus-/intrusion detection, mail/content filtering avoiding fault positives, encryption, Public Key Infrastructure (PKI).		
RSR 063	The EES upon detection of inactivity of an interactive session shall prevent further viewing and access to the EES by that session by terminating the session, or by initiating a session lock that remains in effect until the user reestablishes access using appropriate identification and authentication procedures. The inactivity timeout shall be configurable.		
RSR 064	The EES shall enforce a limit of (configurable) consecutive invalid access attempts by a user. The EES shall protect against further, possibly malicious, user authentication attempts using an appropriate mechanism (e.g. locks the account/node until released by an administrator, locks the account/node for a configurable time period, or delays the next login prompt according to a configurable delay algorithm).		
RSR 065	The EES shall provide the capability to prevent database administrators from seeing the data in databases they maintain.		
RSR 066	The EES shall provide the ability to maintain a directory of all personnel who currently use or access the system/IVR/SQL database.		
RSR 067	The EES shall provide the ability to create and maintain a directory of external providers to facilitate communication and information exchange.		
RSR 068	The EES shall provide the ability to identify certain information as confidential (e.g. PII, PHI, etc.) and only make that accessible by appropriately authorized users.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RSR 069	The EES shall restrict access to summarized information according to organizational policy, scope of practice, and jurisdictional law.		
RSR 070	The EES must be able to associate permissions with a user using one or more of the following access controls:		
RSR 071	<ul style="list-style-type: none"> • User-based (access rights assigned to each user) 		
RSR 072	<ul style="list-style-type: none"> • Role-Based Access Controls (RBAC; users are grouped by role and access rights assigned to these groups) 		
RSR 073	<ul style="list-style-type: none"> • Context-based (role-based with additional access rights assigned or restricted based on the context of the transaction such as time-of-day, workstation-location, emergency-mode, etc.) 		
RSR 074	The EES shall provide the ability to prevent specified user(s) or groups from accessing confidential information such as a patient's chart.		
RSR 075	The EES should preserve and report specified audit data when potential security violations are detected.		
RSR 076	When access to a user's account is restricted, the EES shall provide a means for appropriately authorized users to "break the glass" and obtain access for emergency situations, as defined by Nebraska policy.		
RSR 077	When access to a chart is restricted and the "break the glass" has occurred, the EES shall provide the ability to notify specified users and provide an audit trail for this access.		
RSR 078	The EES shall enforce the most restrictive set of rights/privileges or accesses needed by users/groups or processes acting on behalf of users, for the performance of specified tasks.		
RSR 079	The EES shall provide the ability for authorized administrators to assign restrictions or privileges to users/groups.		
RSR 080	The EES shall support removal of a user's privileges without deleting the user from the EES to ensure history of user's identity and actions.		
RSR 081	The EES shall be able to support RBAC in compliance with the HL7 Permissions Catalog.		
RSR 082	The EES shall provide more-advanced session management abilities such as prevention of duplicate logins, remote logout and location-specific session timeouts.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RSR 083	The EES shall provide the ability to perform EES administration functions such as reference table maintenance and adding/removing users from the system.		
RSR 084	The EES shall allow users access based on their roles irrespective of their geographical location.		
RSR 085	The EES shall provide the capability to integrate with existing authentication and authorization mechanisms (RACF on the mainframe).		
RSR 086	The EES shall provide the capability to create temporary and emergency accounts and terminate those accounts automatically after a user defined period of time.		
RSR 087	The EES shall provide the capability to override a role and restrict access to information by users or groups of users.		
RSR 088	The EES shall allow an individual with active eligibility under a different user ID to reapply under their own user ID.		
RSR 089	The EES shall provide the capability to monitor events on the information system, detect attacks, and provide identification of unauthorized use of the system.		
RSR 090	The EES shall provide the capability to identify and report on inappropriate access to information in the system, based on user defined criteria.		
RSR 091	The EES shall manage user profiles, including enforcing role-based security access to system data and functions.		
RSR 092	The EES shall enforce strong password rules per NITC & IRS requirements.		
RSR 093	The EES support the use of Multi-factor authentication		
RSR 094	The EES shall support the ability to disable user accounts and ensure no disabled accounts can log in or access the solution.		
RSR 095	The EES shall provide the same security provisions for all the environments as those used in the production environment.		
RSR 096	The EES shall support user account authentication procedures with configurable parameters (time, cipher strength, logon attempts, etc.).		
RSR 097	The EES shall implement appropriate encryption mechanisms to protect the confidentiality and integrity of critical types of data, including but not limited to passwords, social security numbers, and bank account numbers.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RSR 098	All sensitive data shall be encrypted in transit (including emails) to protect data confidentiality and integrity as appropriate based on the sensitivity of data.		
RSR 099	The EES shall provide the ability to implement security for transport and messaging via web services.		
RSR 100	The EES shall have the ability to support strong authentication through SSL, Kerberos, RADIUS, SAML, XACML, or OpenID.		
RSR 101	The EES shall provide the ability to virus scan uploaded files using Department approved virus scanning software.		
RSR 102	The EES shall provide the ability to administer user security based on organizational unit.		
RSR 103	The EES shall support the latest version of Secure Sockets Layer (SSL)/Transport Layer Security.		
RSR 104	The EES shall be able to use HTTPS/SSL for connections between interfaces.		
RSR 105	The EES shall pass vulnerability tests that are deemed industry standard for an application which hosts confidential information of clients like Social Security Numbers, dates of birth, addresses etc.		
RSR 106	The EES shall pass tests for common web vulnerabilities such as poor session controls, injection flaws, denial of service, un-validated input, and cross site scripting.		
RSR 107	The EES shall manage user authentication and authorization via LDAP version 3.0 or higher.		
RSR 108	The solution shall contain verification mechanisms that are capable of authenticating authority (as well as identify) for the use or disclosure requested.		
RSR 109	The EES should provide role-based security using unique identifiers (IDs), mandatory password standards, and profile or group access assignments. All users should be authenticated when establishing a connection to the solution. Authentication should be based on unique user IDs and should support separation of duties based on roles.		
RSR 110	The EES shall enforce password policies for length, character requirements, forced reset intervals, and updates, as defined by the Department.		
RSR 111	The EES shall have the ability to use secure (SSL/SSH) FTP to accommodate file transfers.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RSR 112	The EES shall ensure a timely and reliable process for security breach notification to the appropriate entity.		
RSR 113	The EES shall alert appropriate staff authorities of potential violations of privacy safeguards, such as inappropriate access to confidential information.		
RSR 114	The EES shall assure strict adherence to IRS security and privacy requirements for data obtained from IRS and the federal Data Hub.		
RSR 115	The EES shall adhere to all Nebraska and federal requirements to secure, store, and dispose of data.		
RSR 116	The EES shall provide complete control and accounting of all data received, stored, accessed, or transmitted to ensure administrative, physical, and technical security of the data		
RSR 117	The EES shall ensure the security of all State documents and data ensuring that complete segregation of the State data and files exists from other selected Contractors/selected Contractor customers.		
RSR 118	The EES shall offer the latest, commercially available and industry accepted encryption technologies for any file transfers or information exchanges within the solution network through the Internet and with any potentially unsecured network.		
RSR 119	The EES should implement a security architecture based on MITA 3.0 Security and Privacy model, including the following security architectural elements: <ul style="list-style-type: none"> - Multi-Level Security - Identity Management - Role Based Access Control (RBAC) - Decentralized Label Model (DLM) 		
RSR 120	The EES should support a defense-in-depth, multi-zone computing architecture that physically separates the layers between the solution components. Each layer should be protected by firewalls and appropriate security devices based on the sensitivity of data it houses and functions it performs.		
RSR 121	The EES should be built upon an infrastructure that protects against the known forms of exploits and attacks, including SQL injection, code injection, cross-site scripting, request forgery, and session fixation.		
RSR 122	The EES should support the saving of user profiles for archival purposes, including the ability to re-enable/reuse the profile.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RSR 123	The EES should pass credentials for authentication and authorization from the solution to authenticate system access to web service transactions (that is, connect to external web systems in the context of a named user, not super-user, account).		
RSR 124	The EES should support, issue, and manage public key certificates for secure transactions, following standard practices such as the use of accepted Certification Authorities (CA), documented Certificate Policies (CP), and Certificate Practice Statements (CPS), including key escrow strategy. Implementation should use fundamental technical standards such as X.509 certificate format and Public Cryptographic Standards (PKCS).		
RSR 125	If a system component or application fails, the EES should not leave sensitive data accessible, and should return user-friendly error messages that do not expose internal system details and does not include information that might help an attacker exploit vulnerabilities in the application.		
RSR 126	The EES should have the ability to support robust session management controls, including the ability to limit the number of concurrent sessions for an individual user.		
RSR 127	The EES should ensure transactions and messages are accurately received as they were sent and information is not altered by non-authorized individuals.		
RSR 128	The EES should support the latest version of the IP Protocol Security extension (IPSec).		
RSR 129	The EES should support S/MIME for email communications.		
RSR 130	The EES should support cryptography levels set forth in FIPS 1402.		
RSR 131	The EES should prevent the creation of duplicate user accounts.		
RSR 132	The EES should use file encryption for data transfer between entities.		
RSR 133	The EES should provide the ability to create, display and maintain an administrative structure as specified by the Department.		
RSR 134	The EES should provide the ability to include a viewable online history of all changes made by User Account Managers as specified by the Department.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RSR 135	The EES should prevent installation or use of remote control or file sharing software unless explicitly approved by the Department.		
RSR 136	The EES should detect and prevent hacking, intrusion, and other unauthorized use of system resources.		
RSR 137	The EES should provide procedures for guarding, monitoring and detecting malicious software.		
RSR 138	The EES should update virus blocking software daily and aggressively monitor for and protect against viruses.		
RSR 139	The EES should suspend all EES users who have not accessed the solution within a specified number of days as specified by the Department. The suspension requirements should be configurable and distinct for each system environment.		
RSR 140	The EES should provide screen/window security, including links that route to interfaces.		
RSR 141	The EES should provide a secure web portal with authentication and encryption to protect interactions and transactions including, at a minimum Secure Socket Layers (SSL).		
RSR 142	The EES should provide a secure web portal with role based access enabling viewing and maintenance of information across all components of the solution meeting all applicable Nebraska and federal standards.		
RSR 143	The EES should accommodate all current HIPAA revisions/updates including those that may occur during the life of the project.		
RSR 144	The EES should maintain all data sets defined by the HIPAA Implementation Guides to support all transactions required under HIPAA Administrative Simplification Rule.		
RSR 145	The EES should protect the confidentiality and integrity of electronic Protected Health Information (PHI).		
RSR 146	The EES should support encryption and decryption of stored PHI or an equivalent alternative protection mechanism, if approved by the Department.		
RSR 147	The EES should track disclosures of PHI; provide authorized users access to, and reports on the disclosures.		
RSR 148	The EES should include procedures for accessing necessary electronic PHI in the event of an emergency and continue protection of PHI in emergency.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RSR 149	The EES should provide data integrity of PHI by preventing and detecting improper alteration or destruction (including but not limited to: message authentication, electronic signature, check sums etc.).		
RSR 150	The EES should perform data mapping to identify the PHI contained in the solution.		
RSR 151	The EES should provide ability to redact records in whole or in part to comply with Nebraska and federal privacy standards based on role and authority.		
RSR 152	The EES should provide audit reports for tracking users, associated security groups, roles, settings, passwords and duplicate IDs. The frequency and content of security audit reports will be determined by the Department.		
RSR 153	The EES should track adds, changes and deletes of individual user data.		
RSR 154	The EES shall audit/track all activity specific to each user and process, including at a minimum date and time of last login, invalid login attempts, system errors, and all transaction activities, including inquiry.		
RSR 155	The EES should provide read-only access to system job and maintenance schedule, submission, and processing statistics, and system performance tools for designated staff.		
RSR 156	The EES should monitor system activity and log and examine system activity in accordance with audit policies and procedures adopted by the Department.		
RSR 157	The EES should provide security administrative rights to the Department security administrator(s) for the purpose of adding, updating, and deleting security access.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

7. Audit & Compliance Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
AUD 001	The EES shall maintain a record (e.g. audit trail) of all additions, changes and deletions made to data in the system. This should be readily searchable by user ID or client ID. This must include but is not limited to:		
AUD 002	<ul style="list-style-type: none"> • The user ID of the person who made the change 		
AUD 003	<ul style="list-style-type: none"> • The date and time of the change 		
AUD 004	<ul style="list-style-type: none"> • The physical, software/hardware and/or network location of the person while making the change 		
AUD 005	<ul style="list-style-type: none"> • The information that was changed 		
AUD 006	<ul style="list-style-type: none"> • The outcome of the event 		
AUD 007	<ul style="list-style-type: none"> • The data before and after it was changed, and which screens were accessed and used 		
AUD 008	The EES shall allow an authorized administrator to set the inclusion or exclusion of auditable events based on organizational policy and operating requirements/limits.		
AUD 009	The EES shall support logging to a common audit engine using the schema and transports specified in the Integrating the Healthcare Enterprise (IHE) Audit Trails and Node Authentication (ATNA) profile, Audit Log specification.		
AUD 010	The EES shall be able to detect security-relevant events that it mediates and generate audit records for them. At a minimum the events shall include those listed here:		
AUD 011	<ul style="list-style-type: none"> • start/stop 		
AUD 012	<ul style="list-style-type: none"> • user login/logout 		
AUD 013	<ul style="list-style-type: none"> • session timeout 		
AUD 014	<ul style="list-style-type: none"> • account lockout 		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
AUD 015	<ul style="list-style-type: none"> client record created/viewed/updated/deleted 		
AUD 016	<ul style="list-style-type: none"> scheduling 		
AUD 017	<ul style="list-style-type: none"> query 		
AUD 018	<ul style="list-style-type: none"> order 		
AUD 019	<ul style="list-style-type: none"> node-authentication failure 		
AUD 020	<ul style="list-style-type: none"> signature created/validated 		
AUD 021	<ul style="list-style-type: none"> Personally Identifiable Information (PII) export 		
AUD 022	<ul style="list-style-type: none"> PII import 		
AUD 023	<ul style="list-style-type: none"> security administration events 		
AUD 024	<ul style="list-style-type: none"> backup and restore 		
AUD 025	The EES shall provide authorized administrators with the capability to read all audit information from the audit records.		
AUD 026	The EES shall provide the audit records in a manner suitable for the user to interpret the information.		
AUD 027	The EES shall provide the capability to generate reports based on ranges of EES date and time that audit records were collected.		
AUD 028	The EES shall be able to export logs into text format in such a manner as to allow correlation based on time (e.g. Coordinated Universal Time [UTC] synchronization).		
AUD 029	The EES shall be able to perform time synchronization using NTP/SNTP, and use this synchronized time in all security records of time.		
AUD 030	The EES shall have the ability to format for export recorded time stamps using UTC based on ISO 8601.		
AUD 031	The EES shall prohibit all users read access to the audit records, except those users that have been granted explicit read access.		
AUD 032	The EES shall protect the stored audit records from unauthorized deletion.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
AUD 033	The EES shall prevent modifications to the audit records.		
AUD 034	The proposed EES shall provide logging, reporting and accessing errors and exceptions.		
AUD 035	The EES shall maintain an audit trail of all inquiry, and updates to the EES that are required by State and federal policies and regulations.		
AUD 036	The EES shall ensure plans and procedures are in place for all modules to meet audit and compliance requirements		
AUD 037	The EES should capture and retain the data that was used to determine eligibility, calculate benefits, and generate various outputs, at the point in time that the particular action took place. Subsequent changes to data elements (e.g. an applicant's income) should not over-write the value that used to make a determination at a particular point in the past.		
AUD 038	The EES should have the ability to research transaction exceptions (e.g. a failed "add" transaction due to business rule violation) and make corrections within the system as necessary to correct enrollment discrepancies.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

8. Usability Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
USE 001	The EES will adhere to the accessibility standard as outlined in the web guidelines and based on the W3C level 2 accessibility guidelines: (http://www.w3.org/TR/WCAG10/full-checklist.html).		
USE 002	The EES shall adhere to all federal and Nebraska accessibility requirements, or their successors: (section 508 of the Rehabilitation Act and detailed in section 1194.22 of the Code of Federal Regulations, "Web-based intranet and internet information and applications").		
USE 003	The EES shall provide a user interface that shall be simple and consistent throughout all areas and functions of the EES.		
USE 004	The EES shall minimize the number of mouse clicks/user interaction to complete any action.		
USE 005	The EES shall use a Graphical User Interface (GUI) to help the user navigate to the next logical step in the workflow, or freely navigate to other parts of the EES functionality, and then allow the user to return to complete the in-process task.		
USE 006	The EES shall preserve context by limiting abrupt transitions and redispays in order to maximize and enhance the user experience and EES usability.		
USE 007	The EES shall speak the users' language, with words, phrases and concepts familiar to the user, rather than EES-oriented terms.		
USE 008	The EES shall follow real-world conventions, making information appear in a natural and logical order.		
USE 009	The EES shall allow the users to easily navigate to a variety of functions available to them without having to move sequentially through excessive menus and screens.		
USE 010	The EES shall support undo and redo, or provide onscreen confirmation/acceptance to the user to confirm a change that is permanent and cannot be "undone".		
USE 011	The EES shall provide users with a clearly marked "emergency exit" for the instances when a user mistakenly chooses a function and such "emergency exit" must be simple with minimal dialogue.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
USE 012	The EES shall follow standardized conventions and limit the use of words, situations, or actions that have multiple meanings.		
USE 013	The EES shall eliminate error-prone conditions or check for them and present users with a confirmation option before they commit to the action.		
USE 014	The EES shall minimize the user's memory load by making objects, actions, and options visible.		
USE 015	The EES shall provide the option to have rollover/ tool-tip help or context messages and provide the option to turn off this option in the user preferences profile.		
USE 016	The EES shall provide all user instructions in a visible or easily retrievable location, when appropriate.		
USE 017	The EES shall cater to both inexperienced and experienced users and shall provide accelerators (e.g. onscreen short cuts, hot-keys, alternate workflows, etc.) to speed up the interaction for the expert user.		
USE 018	The EES will allow users to create shortcuts (e.g. onscreen short cuts, hot-keys, etc.) for frequent actions.		
USE 019	The EES's error messages shall be expressed in plain language, precisely indicate the problem, and constructively suggest a solution.		
USE 020	The EES shall use colors to enhance user experience and EES usability while complying with all disability requirements notated elsewhere in these requirements.		
USE 021	The EES shall allow the user to navigate to any functional component from a client landing page.		
USE 022	The EES shall alert the user with information relevant to required next steps.		
USE 023	The EES shall provide drop down and list boxes for all key entry, and text entry will display existing values for selection (auto fill).		
USE 024	The EES shall accommodate point and click selection and check box entry for all relevant data entries to ensure that the user does not have to enter textual data that may already be available to the system.		
USE 025	The EES shall facilitate data entry and shall contain pop-up list boxes for all code fields in all processing windows and allow selection of the entry with use of hot keys.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
USE 026	The EES shall provide field level on-screen edits with limited user override capabilities.		
USE 027	The EES shall not show fields that are not accessible to a given user based on access rights, nor shall the EES show fields not in use.		
USE 028	The EES cursor shall automatically advance to the next logical input field when the maximum allowed numbers of characters have been entered for the keyed field.		
USE 029	The EES shall provide the option of having a selection from the drop down boxes automatically take the user to the next field.		
USE 030	The EES shall provide validation checks by methods described within policy, functional, and detailed requirements.		
USE 031	The EES shall identify invalid entries to the user as immediately as possible.		
USE 032	The EES shall provide the ability to suggest or automatically change entries that do not conform to data entry standards.		
USE 033	The EES shall be designed to include only the necessary information and functionality on screens and shall be based on the user's access level and the user's configuration.		
USE 034	The EES shall be designed to include logical transitions between screens and level of detail during navigation.		
USE 035	The EES shall provide templates for data entry with identified mandatory and optional data fields.		
USE 036	The EES shall allow incomplete data sets to be saved for completion of the workflow at a later time.		
USE 037	The EES shall highlight and flag required and incomplete data fields.		
USE 038	The EES shall include a graduated system of alert levels to allow users to determine urgency and relevancy.		
USE 039	The EES shall allow configuration of alerts by a user, for a user by a supervisor, and for a user by an EES administrator		
USE 040	The EES shall allow for the request of or entry of data from external devices (e.g. tablets, kiosks, barcode scanner, RFID scanner, speech).		
USE 041	The EES shall notify the user when a source system is unavailable/inoperable and notify user that any available information about the subject being viewed is as of certain time and date.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
USE 042	The EES's web interface shall be aligned with Web 2.0 design principles and best practices.		
USE 043	The EES shall not require users to reenter data due to validation errors if the systems can auto-correct based on the entered data or the user can navigate to the entry error to correct the entry.		
USE 044	The EES shall enable central workflow alerts and transactional status.		
USE 045	The EES shall centralize pending work items for the user as in a "work queue"		
USE 046	The EES shall have the capability to push messages to the intended workers without requiring them to specifically inquire for the data.		
USE 047	The EES shall provide linked access to help functions which contain the appropriate information and search of all help information from every window, based on user profiles.		
USE 048	The EES shall have the capability to capture a public benefit applicant's application in a disconnected/offline mode to be processed once a connection to the Internet is established		
USE 049	The EES shall utilize standard web browser-based technology with the ability to provide data over a web browser interface (i.e. HTML over HTTP).		
USE 050	The EES shall include the capability to encrypt the data communicated over the network via SSL (HTML over HTTPS).		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

9. Integrated Eligibility Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
IER 001	The EES shall have the capability of exchanging information with the legacy N-FOCUS system.		
IER 002	The EES shall have the capability to provide data and access to notifications to the Federal Facilitated Marketplace.		
IER 003	The EES shall have the capability to request and store data from federal Hub for a number of purposes including, but not limited to: updated Citizenship and Income verification.		
IER 004	The EES shall have the capability to request and store results of IRS service information.		
IER 005	The EES shall have the capability to request and store results of Equifax – TALX wage verification.		
IER 006	The EES shall have the capability to request and store results of verification service citizenship/lawful presence provided by CMS		
IER 007	The EES must be able to express eligibility determination business rules outside transactional system in the business rules engine implemented as part of the Nebraska EES.		
IER 008	The EES shall have the capability of exchanging eligibility information with the legacy N-FOCUS system.		
IER 009	The EES shall have the capability of exchanging eligibility information with the legacy MMIS.		
IER 010	The EES shall have the capability to provide results of eligibility determination to other systems.		
IER 011	The EES shall have the capability to provide data and access to notifications to other systems.		
IER 012	The EES shall have the capability to store results/client attestation of a number of factors including, but not limited to Native American Status, Residency, Incarceration Status, and Individual Exemption qualification.		
IER 013	The EES shall have the capability to store results of alternate client verifications for a number of items including, but not limited to income, Citizenship / Lawful presence		
IER 014	The services and consumers employed in the EES shall be loosely-coupled to ensure service logic can evolve while guaranteeing backwards compatibility to existing consumers.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
IER 015	The EES shall be able to interface with multiple state systems as well as external partner systems to allow interoperability as appropriate with outside entities and state agencies. (Real-time, near-time, batch)		
IER 016	The EES shall provide the ability to leverage the federal approach to verification from federal agencies such as the Internal Revenue Service, Department of Health and Human Services, and Department of Homeland Security to eliminate the independent establishment of those interfaces and connections at the Nebraska level.		
IER 017	The EES shall provide standard, secure, and configurable interfaces between all interfacing information sharing entities.		
IER 018	The EES shall provide the ability to support real-time automated data exchanges with internal systems to ensure that data is aligned.		
IER 019	The EES shall provide the ability to communicate the eligibility decision to other relevant systems.		
IER 020	The EES shall provide the ability to export an enrollment file to external entities as specified by the Department.		
IER 021	The EES shall provide the ability to export Medicaid benefits to the Nebraska MMIS.		
IER 022	The EES shall ensure that dates across Nebraska systems remain in synch (e.g., a case's closing or some other action).		
IER 023	The EES shall provide the ability for data and process integration between programs according to state and federal regulations as required.		
IER 024	The EES should expose a web service that allows other systems to submit requests to verify an individual's enrollment.		
IER 025	All web services used in the EES should be reusable as enterprise resources by systems external to the EES.		
IER 026	The data exchange infrastructure should support multiple open standards and industry standard protocols, including Secure FTP (S-FTP), SOAP over HTTPS, and JMS/ MQ messages.		
IER 027	The EES should provide common bi-direction interfaces (preferably, a web service API) that will support the integration with Computer Telephone Integration (CTI) systems for purposes such as retrieving caller information and triggering screen pops.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
IER 028	The EES should provide the ability to report on interface transmissions (e.g., total number of records loaded, date of interface transmission, amount of time to execute the interface transmission, errors, and failures).		
IER 029	The EES should provide the ability to import data into the EES in multiple formats (e.g., csv, fixed length ASCII, tab-delimited).		
IER 030	The EES should provide the ability to automatically identify inconsistencies between the case record and information received from interfaces as specified by the Department.		
IER 031	The EES should support integration with Nebraska's current calendar and e-mail environment.		
IER 032	The EES should employ XML-based standards for communication and integration with other environments.		
IER 033	The EES should provide alerts to DHHS staff on status of interface data processing (e.g., when processing is completed or error occurs).		
IER 034	The EES should provide the ability to support Interfaces by exchanging information on schedule as specified by the Department.		
IER 035	The EES should provide the ability to automatically track inbound customer service interactions received through the IVR and/or interfaces based on program rules.		
IER 036	The EES should provide the ability to present a result list for data imports and exports (e.g., success or failure, time started, time completed).		
IER 037	The EES should provide the ability to restart an interface transmission from a specific point (e.g., restart at failed record, restart from beginning).		
IER 038	The EES should associate information received via interface with the line-of-business record which generated the information request.		
IER 039	The EES should support exchange of bulk data information to be printed and mailed.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

10. EES Administration Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
ADM 001	The EES shall provide data archiving capabilities based on Department defined criteria.		
ADM 002	The EES shall provide the capability to move all historical, expired and/or unnecessary data to offline storage according to a set of business rules and schedule to be defined by the Department as a part of the ongoing system operational decision making.		
ADM 003	The EES shall maintain an archival process so that accumulated historical records and log files do not consume large amounts of disk space.		
ADM 004	The EES shall provide an auto archive/purge of the log files to prevent uncontrolled growth of the log and historical records storage using administrator-set parameters.		
ADM 005	The EES shall provide version control capabilities to ensure the integrity of all software releases.		
ADM 006	The EES shall monitor and provide reports on any unauthorized access.		
ADM 007	All EES communications shall be protected by at least 128-bit encryption.		
ADM 008	The EES shall be supported by public key/private key encryption Secure Socket Layer (SSL) certificates.		
ADM 009	The EES shall provide admin tools and maintenance routines to change access rights quickly.		
ADM 010	The EES shall use firewalls and Demilitarized Zones (DMZs) for external access and remote access.		
ADM 011	The EES shall allow EES administrators to create and manage user accounts.		
ADM 012	The EES shall allow EES administrators to assign status and permissions to user accounts.		
ADM 013	The EES shall allow EES administrators to create and manage user roles.		
ADM 014	The EES shall allow EES administrators to create user groups to manage workflow.		
ADM 015	The EES shall allow EES administrators to assign users to particular local offices.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
ADM 016	The EES shall allow EES administrators to assign users to particular user groups / units.		
ADM 017	The EES shall allow EES administrators to assign users to particular supervisors.		
ADM 018	The Contractor shall establish an automated maintenance routine that shall at a minimum: - backup the user IDs and password data - identify expired IDs and related data		
ADM 019	The Contractor shall use offsite storage. Data backup should be stored offsite in the event of a physical disaster		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

11. EES Management Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
MGT 001	The EES shall have the ability to generate administrative alerts and warnings when statistics indicate an impact or potential limits on EES component performance and availability. The specific alerts will be defined by the hosting services provider.		
MGT 002	The EES shall allow for all changes/updates to the distributed components to be administered and completed centrally and available immediately to all source systems and sites.		
MGT 003	The EES shall provide Service Level Requirements (SLR) monitoring and reporting capabilities. Service Level definitions will be drafted into a single document provided as an attachment.		
MGT 004	The EES shall securely support State's existing remote control (i.e. support personnel ability to take over the user device for troubleshooting and support) capabilities deployed for any type of client workstation.		
MGT 005	The EES shall provide event management and monitoring functionality according to Information Technology Infrastructure Library version 3 (ITIL v3) or equivalent best practices.		
MGT 006	The EES shall provide application performance monitoring and management capabilities (i.e. transaction monitoring, synthetic transactions, component root cause analysis)		
MGT 007	The EES shall provide transaction tracking and log consolidation capabilities across all tiers of the application		
MGT 008	The EES shall use automated application and network performance measuring tools for proactive system monitoring, tuning mechanisms, reporting, and trend analysis. Performance monitoring alerts shall be configurable and allow for user notification using multiple communication methods.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
MGT 009	The EES shall provide a custom report outlining system anomalies such as high levels of utilization, poor response times, large number of failed logins, and other abnormal activities, identified, repaired and resolved. This report's frequency shall be dictated by the number of anomalous activities. The report shall include specifics regarding the issues encountered, the measures taken to resolve the anomalies and the resources (EES Contractor, Department and third-party, as applicable) participating in the process.		
MGT 010	The EES shall provide a report reflective of system performance statistics. This performance statistics report shall be presented to the Department not less than monthly for the purposes of monitoring the Department's systems and network activity.		
MGT 011	The EES shall provide event and incident notification capabilities which can integrate with industry standard system management frameworks such as those provided by CA, IBM and Microsoft.		
MGT 012	The EES shall have the ability to capture and report on system utilization needed to allocate costs down to the user and transaction level.		
MGT 013	All performance and systems management functions shall be able to operate without degrading business systems response time.		
MGT 014	The EES shall include the infrastructure (e.g. via the ESB and business process layer) needed to support effective Business Activity Monitoring and Reporting of various business performance metrics, and the information reports necessary to allocate costs based on usage.		
MGT 015	The EES shall provide the ability for system capacity monitoring including, but not limited to, server volume/capacity, and network volume/capacity.		
MGT 016	The EES shall have the ability to provide workload statistics (e.g., work-in-process, queues, waiting-for-resources).		
MGT 017	The EES shall have the ability to notify users, via multiple channels, when the measured performance is outside tolerances.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
MGT 018	The EES shall have the ability for users, upon notification of performance outside tolerance, to identify the cause of the performance issue.		
MGT 019	The EES shall have the ability to provide dashboard and other report types suitable for business activity monitoring including templates for common display types.		
MGT 020	The EES shall provide for and support the ability to control batch job execution by time of day, date, and processing cycle (weekly, monthly, yearly, quarterly, on request, etc.).		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

12. Enterprise Service Bus (ESB) Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
ESB 001	The EES shall provide reliable, once-only delivery of messages (guarantee of reliable and non-repetitive delivery).		
ESB 002	The EES shall have the ability to support varying message payloads, ranging from individual transactions to large files (more than 1GB) containing multiple transactions.		
ESB 003	The EES shall have the ability to track a message from its origin to its destination (inside a firewall), inquire on the status of that message and address exceptions (for example, resend the message if a target times out).		
ESB 004	The EES shall have the ability to use standards-based communication protocols, such as TCP/IP, HTTP, HTTP/S and SMTP.		
ESB 005	The EES shall have the ability to convert between the protocol native to the messaging platform and other protocols, such as Remote Method Invocation (RMI), IIOP and .NET remoting.		
ESB 006	The EES shall have features that enable in-flight message manipulation, such as transformation (typically XML-based), intelligent routing, naming and addressing.		
ESB 007	The EES shall have the ability to apply logic to the routing of messages, including support for the following file interaction styles:		
ESB 008	<ul style="list-style-type: none"> • Store and forward: Ability to persist a message and then send it to destinations. 		
ESB 009	<ul style="list-style-type: none"> • Publish/subscribe: Ability to distribute a message to multiple destinations based on a message attribute usually described as the subject area of the message. 		
ESB 010	<ul style="list-style-type: none"> • Request/reply: Ability to correlate asynchronous messages so that the target's response is associated with the appropriate request made by the source. 		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
ESB 011	<ul style="list-style-type: none"> Content-based: The ability to route a message based on a value or values within a message. For example, the ability to route a referral message whose target turnaround time is small to a different set of targets than a referral message whose turnaround time is high. 		
ESB 012	The EES shall provide for syntactic conversion and semantic transformation, including ease of use and reuse, number of built-in functions, ease of extending the transformation function with custom-coded logic and XML support (e.g. schema or Extensible Style sheet Language Transformations [XSLT]).		
ESB 013	The EES shall have the capability during operations, to assist service consumers by dynamically finding, binding to and invoking the execution of service providers.		
ESB 014	The EES shall provide the technology that combines design tools and runtime software to implement programs that act as "glue," transforming among protocols, connecting to databases and linking pre-SOA Application Programming Interfaces (APIs) to the SOA backplane. To support B2B projects, adapters also need to support SOA services using B2B protocols such as Applicability Statement 1 (AS1)/Applicability Statement 2 (AS2), RosettaNet and Electronic Data Interchange for Administration, Commerce and Transportation (EDIFACT).		
ESB 015	<p>The EES shall support the industry-standards messaging and interfaces relevant to health and human services organizations including, but not limited to:</p> <ul style="list-style-type: none"> - Health Level Seven (HL7) Versions 2.x, 3.x, and CCD - Integrating the Healthcare Enterprise (IHE) XD* Profiles 		
ESB 016	The EES shall provide the technology that hosts the execution of process logic spanning multiple back-end services or applications - typically for short-term (seconds or minutes) processes that can occasionally also be long term (hours, days, weeks) - with the aim of implementing composite services or automated EES-to-EES processes. Features include:		
ESB 017	<ul style="list-style-type: none"> Graphical design surface for specifying process flows 		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
ESB 018	<ul style="list-style-type: none"> Support for standard specification languages including Business Process Modeling Notation (BPMN) 		
ESB 019	<ul style="list-style-type: none"> Support for standard representations including Business Process Execution Language (BPEL), XML Process Definition Language (XPDL), Business Process Modeling Language (BPML) and Web Services Flow Language (WSFL) 		
ESB 020	<ul style="list-style-type: none"> Ability to specify compensating transactions and execute those transactions upon failure of the process flow 		
ESB 021	<ul style="list-style-type: none"> Integration with workflow 		
ESB 022	The EES shall provide the technology to perform syntactic and semantic hub-based transformation of messages, including:		
ESB 023	<ul style="list-style-type: none"> Support of taxonomy 		
ESB 024	<ul style="list-style-type: none"> Support of ontology 		
ESB 025	<ul style="list-style-type: none"> Reusable transformation maps 		
ESB 026	<ul style="list-style-type: none"> Built-in transformation functions 		
ESB 027	<ul style="list-style-type: none"> Extending the transformation function with custom-coded logic 		
ESB 028	<ul style="list-style-type: none"> Support B2B project translation including Electronic Data Interchange (EDI), RosettaNet, HL7, etc. 		
ESB 029	The EES shall provide the functionality that provides reliability for applications, services or message flows:		
ESB 030	<ul style="list-style-type: none"> Load balancing 		
ESB 031	<ul style="list-style-type: none"> High availability 		
ESB 032	<ul style="list-style-type: none"> Fault tolerance 		
ESB 033	<ul style="list-style-type: none"> Failover 		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
ESB 034	<ul style="list-style-type: none"> In-order delivery 		
ESB 035	<ul style="list-style-type: none"> Transaction support 		
ESB 036	<ul style="list-style-type: none"> Execution prioritization 		
ESB 037	<ul style="list-style-type: none"> Message prioritization 		
ESB 038	<ul style="list-style-type: none"> Downstream throttling 		
ESB 039	The EES shall provide the functionality used to monitor the operation of the overall system (services, applications, processes and application infrastructure), and to collect events and usage information aimed at populating technical KPIs of the deliverables supported by the SOA backplane and of the SOA backplane components by monitoring and collecting metrics for:		
ESB 040	<ul style="list-style-type: none"> Messaging traffic 		
ESB 041	<ul style="list-style-type: none"> Process state and behavior 		
ESB 042	<ul style="list-style-type: none"> Application and service parameters and behavior for all nodes in a LAN or WAN 		
ESB 043	The EES must provide for any combination of Alert Destinations such as Email, JMS, SNMP, reporting services, and server logs. The alerts shall be customizable with respect to the frequency of the alert, the ability to enable/disable an alert, rule expiration dates, starting and ending times for an alert, and customizable conditions for an alert".		
ESB 044	The EES shall provide the tools and technologies required to implement the necessary control access to the services and the connected resources (for example, other services and databases), as well as the SOA backplane functionality. Capabilities include:		
ESB 045	<ul style="list-style-type: none"> Authentication 		
ESB 046	<ul style="list-style-type: none"> Authorization 		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
ESB 047	<ul style="list-style-type: none"> Encryption/decryption 		
ESB 048	<ul style="list-style-type: none"> Digital signatures 		
ESB 049	<ul style="list-style-type: none"> Credential mapping 		
ESB 050	The EES shall provide the functionality to assist Department's operations personnel in keeping the resultant system (applications, services and infrastructure) running at peak efficiency at all times, including:		
ESB 051	<ul style="list-style-type: none"> Establishing rules for automated system monitoring 		
ESB 052	<ul style="list-style-type: none"> Establishing network-alert-based management 		
ESB 053	<ul style="list-style-type: none"> Supporting autonomous network behavior so local management and problem resolution can continue during an outage 		
ESB 054	<ul style="list-style-type: none"> A console that enables domain-specific display for multiple devices 		
ESB 055	The EES shall provide the technology that manages the metadata and provides the features needed to support the reliable operation of services. Examples include:		
ESB 056	<ul style="list-style-type: none"> Online catalog of services and associated artifacts such as WSDL files, XSDs, BPEL files 		
ESB 057	<ul style="list-style-type: none"> A single point of controlled access for cataloging, promoting, publishing and searching for information about managed assets 		
ESB 058	<ul style="list-style-type: none"> Metadata that enables an ESB to find, bind to and invoke the execution of a service implementation 		
ESB 059	<ul style="list-style-type: none"> Support for extending existing asset types and defining and populating custom asset types 		
ESB 060	The EES shall provide support for building frameworks and extensible tools that enable the design, configuration, assembly, deployment, monitoring, and management of software designed around an SOA.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
ESB 061	The EES shall provide assistance for deploying applications with SOA and event-driven architecture in a manner that supports the following implementation strategies:		
ESB 062	<ul style="list-style-type: none"> • Web Services: Web Services Interoperability (WS-I) Organization-compliant implementation of basic Web services standards, including SOAP, WSDL and Universal Description, Discovery and Integration (UDDI), as well as higher-level Web services standards, such as WS-Security. 		
ESB 063	<ul style="list-style-type: none"> • Representational State Transfer (REST): Support for XML-based message processing as well as HTTP, and XHTML. 		
ESB 064	The EES shall support Transport Security, Message Security, WS-Security, SAML architecture, and WS-Policy.		
ESB 065	The EES shall implement the ability to externalize security by using a third-party security infrastructure whereby the ESB's proxy action calls a third-party for user/role information.		
ESB 066	The EES shall provide the technology to implement processing logic that directly manipulates data values, and the representation of those values for storage, transport or presentation purposes to establish common access to data sources (structured and unstructured), improve data quality or federate data from multiple sources.		
ESB 067	The EES shall provide the tooling that enables the recording (storage) or retrieving (reading) of information (data) from data stores. An example is distributed query functionality that parses incoming queries into sub queries and the execution of those sub queries, via the connectivity layer, against the respective sources where the desired data resides.		
ESB 068	The EES shall provide the data infrastructure tooling that enables users to represent semantic models, identify model-to-model relationships, and execute the necessary translations to reconcile data with differing semantic models.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
ESB 069	The EES shall provide optimization services that continuously read various types of metadata from across the architecture. The optimization verbs shall use the semantic/logical services to reconcile context to data content and deliver against some aspect of the application service-level agreement (requirements for data quality, data freshness, data volumes, throughput parameters, data-mining results, on-demand data aggregation or summarization, data enrichment, and many others).		
ESB 070	The EES shall provide tooling that supports data profiling: the process of examining the data available in an existing data source (for example, a database or a file), and collecting statistics and information about that data.		
ESB 071	The EES shall provide a modeling environment to support the roles of the business analyst, process architect, EES architect and developer.		
ESB 072	The EES shall support individual and group teamwork at design time and runtime.		
ESB 073	The EES must incorporate the ability to undo changes, detect and resolve conflicts, test service connectivity with tracing information, easily enable/disable services, provide logging and view all session activities/change history attributable to each logged in user.		
ESB 074	The EES must incorporate Role/Group-based rights for the management of the ESB across the environments.		
ESB 075	The EES shall have the ability to automatically manage complex workflow patterns that are system-based, human-based, or a mixture of both.		
ESB 076	The EES shall have the ability to design workflows, preferably using Business Process Model and Notation (BPMN).		
ESB 077	The EES shall provide the ability to schedule events (e.g., reminders, notification generation, business process execution, etc.).		
ESB 078	The EES shall provide the ability to associate the scheduled event with a system record (e.g., case record to an event).		
ESB 079	The EES shall provide the ability to attach documentation to the scheduled event.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
ESB 080	The EES shall provide the ability to notify a user of a scheduled event based on user-defined criteria (e.g., reminder time, delivery mechanism).		
ESB 081	The EES shall provide the ability to modify existing scheduled events (e.g., begin date, end date, frequency, and business process specific information).		
ESB 082	The EES shall have the ability to monitor and manage executing processes, including the capability to override workflows and business rules by authorized users.		
ESB 083	The EES shall provide the ability to suspend a scheduled event.		
ESB 084	The EES shall provide the ability to cancel a scheduled event.		
ESB 085	The EES shall provide the ability to route imaged correspondence to any work queue.		
ESB 086	The EES shall provide the ability to maintain historical information related to scheduled events.		
ESB 087	The EES shall provide the ability to maintain user-defined calendars and dates specific to business functionality (e.g., time off, work hours, review dates).		
ESB 088	The EES shall provide the ability to associate comments with scheduled events.		
ESB 089	The EES should have the ability to import and export process designs using an industry standard format, such as Business Process Execution Language (BPEL) or XML Process Definition Language (XPDL).		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

13. Data Integration & ETL Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
ETL 001	The EES shall have the ability to convert message formats and translate coded data within messages.		
ETL 002	The EES shall provide support for a metadata repository for data and message conversion and transformations.		
ETL 003	The EES shall at a minimum support the following standards:		
ETL 004	<ul style="list-style-type: none"> • Integrating the Health Enterprise (IHE): Cross-Enterprise Document Sharing (XDS); Cross-Community Access (XCA) 		
ETL 005	<ul style="list-style-type: none"> • Health Level Seven (HL7) Continuity of Care Document (CCD) C32 profile 		
ETL 006	<ul style="list-style-type: none"> • ONC Direct Project 		
ETL 007	The EES shall provide the technology to implement processing logic that can manipulate data values, and the representation of those values for transport or conversion purposes.		
ETL 008	The EES shall provide tools for data source connectivity: Adapters for a range of source types beyond RDBMS' and legacy databases (access to data stored in non-relational structures - for example, VSAM files and IMS databases), including packaged applications and Web services, the ability to access semi-structured and unstructured data (such as e-mail, websites, office productivity tools, content repositories and rich media) and the ability to interpret (as a source) XML structures.		
ETL 009	The EES shall provide tools to support the Extract-Transform-Load (ETL) process that involves:		
ETL 010	<ul style="list-style-type: none"> • Extracting data from data sources 		
ETL 011	<ul style="list-style-type: none"> • Transforming it to fit business needs (which can include quality levels). 		
ETL 012	<ul style="list-style-type: none"> • Loading it into the target data store 		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
ETL 013	<ul style="list-style-type: none"> Caching: The ability to cache federation results and various subsets of the source data to improve performance in situations where source data volumes are large; therefore, retrieving all data required for integration directly from the source is not feasible. 		
ETL 014	<ul style="list-style-type: none"> Verbose ETL process logging to allow for ease of support and debugging. 		
ETL 015	The EES shall have the ability to load data in a variety of approaches including (but not limited to) the following:		
ETL 016	<ul style="list-style-type: none"> Bulk data extraction and loading 		
ETL 017	<ul style="list-style-type: none"> Granular trickle-feed acquisition and delivery 		
ETL 018	<ul style="list-style-type: none"> Changed-data capture (ability to identify and extract modified data) 		
ETL 019	<ul style="list-style-type: none"> Event-based acquisition (time-based or data-value-based) 		
ETL 020	The EES shall include the following types of transformation:		
ETL 021	<ul style="list-style-type: none"> Simple transformations such as data-type conversions, string manipulations and Simple calculations 		
ETL 022	<ul style="list-style-type: none"> Moderate-complexity transformations, such as lookup and replace operations, aggregations, summarizations, deterministic matching and management of slowly changing dimensions 		
ETL 023	<ul style="list-style-type: none"> Higher-order transformations, such as sophisticated parsing operations on free-form text and rich media 		
ETL 024	<ul style="list-style-type: none"> Facilities for developing custom transformations and extending packaged transformations 		
ETL 025	The EES shall provide tools that enables the recording (storage) or retrieving (reading) of information (data) from data stores. An example is distributed query functionality that parses incoming queries into sub-queries and the execution of those sub-queries, via the connectivity layer, against the respective sources where the desired data resides.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
ETL 026	The EES shall comply with all relevant HIPAA standards, including national standards for electronic health care transactions and code sets, unique employee and provider identifiers, and security and privacy of individually identifiable health information (called "protected health information" or PHI).		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

14. Master Data Management Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
MDM 001	The EES shall have the capability to support the global identification, linking and/or synchronization of client and provider information across heterogeneous data sources through semantic reconciliation of master client and master provider data.		
MDM 002	The EES shall create and manage a central, database-based EES or index of record for master client (i.e. Master Client Index [MCI]) and master provider (i.e. Master Provider Index [MPI]) data.		
MDM 003	The EES shall enable the delivery of a single client and a single provider view for all stakeholders.		
MDM 004	The EES shall support ongoing client and provider data stewardship and governance requirements through monitoring of policy decisions and corrective action.		
MDM 005	The EES shall track and maintain detailed records on all changes via interfaces and authoring to support audit requirements.		
MDM 006	The EES must include a flexible data model that can model the complex relationships between the internal application sources inside Nebraska, its trading partners, clients and providers, as well as intermediaries and other parties, with the ability to handle complex hierarchies.		
MDM 007	The EES's data model must be capable of handling at least the following categories of elements for clients and providers:		
MDM 008	<ul style="list-style-type: none"> • Identification 		
MDM 009	<ul style="list-style-type: none"> • Demographics 		
MDM 010	<ul style="list-style-type: none"> • Contact information 		
MDM 011	<ul style="list-style-type: none"> • Relationships with other entities / providers 		
MDM 012	<ul style="list-style-type: none"> • Interactions with other entities / providers 		
MDM 013	The EES shall include data modeling capabilities that will be configurable, customizable, extensible, and upgradable.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
MDM 014	The EES data model must be able to support Nebraska's standards for data content and coding where they exist.		
MDM 015	The EES data model must be expressed using commonly accepted logical data model conventions with associated metadata.		
MDM 016	The EES shall have strong facilities, in batch and real-time mode, for profiling, cleansing, matching, linking, identifying and semantically reconciling master client and master provider data in different data sources to create and maintain golden records.		
MDM 017	The EES's business rules and associated metadata related to data cleansing shall be sufficiently visible to satisfy any audit requirements.		
MDM 018	The EES shall include the ability to review data quality metrics and track corrective actions.		
MDM 019	The EES shall provide dynamically configurable rules for comparing and reconciling semantics across data sources, matching (both probabilistic and tunable) across changing demographic data structures, linking data, and managing the merging and unmerging of client and provider records with full auditability and survivability.		
MDM 020	Where data is matched by a proxy rather than the actual identifier (e.g. client or provider ID) the EES shall load data no less quickly, efficiently or accurately.		
MDM 021	The EES shall include integration middleware to provide a communication backbone for the bidirectional flow of client and provider data between the central repository and the spoke solutions, and/ or remote applications.		
MDM 022	The EES shall provide tools to validate and manage all client and provider addresses to include all address types (mailing, residential, etc.).		
MDM 023	The EES shall be able to leverage a range of middleware products to data sources, including all Nebraska and trading partner data sources, and expose Healthcare industry-standard interfaces.		
MDM 024	The EES shall support integration with different latency characteristics and styles (e.g. real-time, batch).		
MDM 025	The EES shall support integration with downstream Business Intelligence (BI) and analytical requirements.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
MDM 026	The EES shall provide flexible and comprehensive workflow capabilities to enable business users and client and provider data managers to collaborate effectively in the authoring and management of client and provider data across the multiple source systems.		
MDM 027	The EES shall include facilities for managing and controlling access to client and provider data in the MDM such as reporting on MDM activities.		
MDM 028	The EES shall have the ability to integrate the data within the MDM with management and security tools.		
MDM 029	The EES shall manage the policies and rules associated with privacy access rights.		
MDM 030	The EES shall configure and manage differing visibility rules, providing different views for different roles.		
MDM 031	The EES shall integrate with the Department's Active Directory to provide authorization, e.g., role-based security.		
MDM 032	The EES shall provide analytics and performance measures related to the range of processes and activities taking place within the MDM; from the running of batch data loads and the execution of workflows against benchmarks to the quality of active client and provider data in the MDM.		
MDM 033	The EES shall include status and management tools for the data stewards to monitor to-do lists to ensure effective action takes place across the management of the master client and master provider data.		
MDM 034	The EES shall include solution-wide meta models to help identify what users, roles, applications and systems are responsible for which client and provider data.		
MDM 035	The EES shall provide workflow services for remediation of quality issues in client and provider data.		
MDM 036	The EES shall include business rules services to interrogate which rules are used by MDM by frequency and preference and to provide suggested enhancements to such business rules.		
MDM 037	The EES shall be based on up-to-date, mainstream technologies, and capable of flexible and effective integration with a wide range of other application and infrastructure platform components (whether from the same Contractor or not) that will be deployed by Nebraska.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
MDM 038	The EES shall protect and complement the data layer with a layer of business services for accessing and manipulating the client and provider data that is built for an SOA environment, by exposing web services interfaces.		
MDM 039	The EES shall be capable of flexible configuration into a range of architectural styles in terms of instantiation, latency and use of client and provider data to enable different deployment scenarios, such as the consolidation, registry, coexistence and centralized scenarios.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

15. Consent Management Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
CMT 001	The EES shall be interoperable/Contractor agnostic.		
CMT 002	The EES shall support break-the-glass/ override access for emergency data access per HIPAA.		
CMT 003	The EES shall provide an alert mechanism for privacy breaches.		
CMT 004	The EES shall be non-disruptive to worker workflow.		
CMT 005	The EES shall be centralized to consistently enforce policies network-wide.		
CMT 006	The EES shall enable all applications to support consumer consent.		
CMT 007	The EES shall accommodate granular directives.		
CMT 008	The EES shall audit all access to protected information in real time.		
CMT 009	The EES shall provide an alert mechanism for privacy breaches or when HIPAA break-the-glass or override functions are enacted.		
CMT 010	The EES shall be highly flexible to meet changing requirements.		
CMT 011	The Department has a strong preference to use a COTS product to provide the consent management required for the EES.		
CMT 012	The EES shall have the consent service tied into role-based access control system for real-time permissions access-granting/removal/denial.		
CMT 013	The EES shall provide extensive search and reporting capabilities on any consent audit event data.		
CMT 014	The EES shall maintain historical record of consent/removal of consent.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

16. Business Intelligence and Reporting Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
BIR 001	The EES shall provide the ability to impose graduated access to reports based on user role and agency requirements/permissions to better analyze program data.		
BIR 002	The EES's business intelligence and reporting capabilities must be scalable to accommodate changes in EES scale including changes in user population, transaction volume, throughput and geographical distribution while maintaining the agreed service levels.		
BIR 003	The EES shall have a mechanism to share specific data (e.g. limited data sets, detailed data at the level of the individual but with the data anonymous and completely de-identified, etc.) in a controllable fashion with other State and local agencies.		
BIR 004	The EES shall be extensible and have a scalable data architecture incorporating State and external data.		
BIR 005	The EES shall provide a tool to allow predictive modeling and analysis utilizing production data and coexist and integrate with tools such tools as SPSS and SAS.		
BIR 006	The EES shall provide the ability for user to create and customize reports, queries, and dashboards.		
BIR 007	The EES shall provide scalable architecture and support designs that will provide flexibility to add more data fields and change granularity level efficiently as analytic demand matures and expands.		
BIR 008	The EES shall have the ability for logical and physical view creation and storage.		
BIR 009	The EES shall support designs that facilitate a single view of business data.		
BIR 010	The EES shall support OLAP database structure for use in analytics and business intelligence to include ROLAP or MOLAP processing.		
BIR 011	The EES shall support hierarchical drill up/down; ad-hoc query; multi-dimensional tables and views.		
BIR 012	The EES shall provide the ability to support data mining functions.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
BIR 013	The EES shall provide the ability to perform in-database analytics.		
BIR 014	The EES shall offer options to use Database Management EES (DBMS)-integrated data integration tool and/or third party Contractor integration tool.		
BIR 015	The EES shall support fast large volume data loading and shall have the ability to capture real-time data.		
BIR 016	The EES shall have the ability to capture delta of changes to data from diverse systems and populate them to Shared Analytics.		
BIR 017	The EES shall provide the ability to capture and load data via SOA-based services and the ability to schedule data integration and load jobs.		
BIR 018	The EES shall include the ability to facilitate design and construction of data integration processes.		
BIR 019	The EES shall provide the ability to create custom transformations and the ability to group and reuse mapping and transformation operations.		
BIR 020	The EES shall provide comprehensive metadata management from source to target.		
BIR 021	The EES shall provide single repository for metadata, such as mappings of business concepts to underlying data structures, business glossary, data lineage, reference data, and objects (e.g. view, table, join) and reports from source to target.		
BIR 022	The EES shall provide the ability to import metadata from tools and data sources.		
BIR 023	The EES shall provide data quality tools and/or support 3rd party data quality tools for data profiling, cleansing and monitoring.		
BIR 024	The EES shall produce metadata and/or data dictionaries in a format that the Department can consume, e.g., Word, Excel, PDF, OF, etc.		
BIR 025	The EES shall be highly available via various mechanisms, e.g. data marts, data replication, clustering and backup configuration.		
BIR 026	The EES shall support reorganization of databases, indexes and configurations online without the need for the EES to shut down.		
BIR 027	The Contractor shall release upgrades and patches that shall be applied with minimal loss of system availability during production hours.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
BIR 028	The EES shall allow data loading to support environments with small or no window where system is down when loading data.		
BIR 029	The EES shall provide standards based connectivity including Open Database Connectivity (ODBC), Java Database Connectivity (JDBC), Web Services (WS) and others.		
BIR 030	The EES shall have no limit on the size of data types (including CHAR, NUM, CLOB, BLOB and XML) that are less than that of the manufacturer-known and published limits of the underlying DBMS.		
BIR 031	The EES shall have no limits on the size of tables, indexes and other database-level objects that are less than that of the manufacturer-known and published limits of the underlying DBMS.		
BIR 032	The EES shall support both horizontal and vertical scaling.		
BIR 033	The EES shall have an option for fast loading of data into the database. Where necessary this will include minimal relaxation of quality and integrity constraints and mechanisms for carrying out data quality checks as the final stage in the process.		
BIR 034	The EES shall provide for expansion of data storage as needed to accommodate increased volume of data based on approved Capacity Plans by the Department.		
BIR 035	The EES shall be American National Standards Institute (ANSI) Structured Query Language (SQL) Compliant. (Contractor needs to specify version of SQL compliance – e.g. 2003, 2006, 2008).		
BIR 036	The EES shall be XQuery 1.0 standard compliant.		
BIR 037	The EES shall support industry standards for electronic data exchange.		
BIR 038	The EES shall provide flexibility in using public/private cloud versions of the DBMS as an option to provide cost-effective scalability as needed.		
BIR 039	The EES shall run on and be portable across multiple Contractors' hardware and operating systems (e.g. IBM, HP, and Dell hardware, AIX, Linux, and Windows Operating Systems and VMware)		
BIR 040	The EES shall make an underlying DBMS available as a data warehouse appliance so it is also available as a standalone query-able DBMS.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
BIR 041	The EES shall support major application development interfaces (e.g. .NET interface, Java 2 Platform, Enterprise Edition [J2EE]).		
BIR 042	The EES shall support various database connectivity protocols (e.g. ODBC, JDBC, etc.)		
BIR 043	The EES shall support all connections required for BI analysis and reporting tools and ETL tools.		
BIR 044	The EES shall support stored procedures and extensions.		
BIR 045	The EES shall not employ triggers or cursors.		
BIR 046	The EES shall support native geo-spatial data types.		
BIR 047	The EES shall provide DBA tools for monitoring and administering DBMS and contain tools to manage the storage devices.		
BIR 048	The EES shall have built-in utilities to the DBMS to automate the normal day-to-day DBA operations (e.g., automated index rebuilding, free space reclamation and block reorganization).		
BIR 049	The EES shall provide the ability to:		
BIR 050	<ul style="list-style-type: none"> • prioritize workload executions and ensure quality-of-service; 		
BIR 051	<ul style="list-style-type: none"> • partition indexing and aggregate management via parameters and tools; 		
BIR 052	<ul style="list-style-type: none"> • simulate the various workloads and mixes 		
BIR 053	The EES shall provide workflow and collaboration support for administrator tasks.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

17. Rules Engine Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RLE 001	The EES shall support data verification and consistency checks.		
RLE 002	The EES shall support compute values based on input data.		
RLE 003	The EES shall support the selection of business process path.		
RLE 004	The EES shall support mechanisms and ease of use for users to edit rules while maintaining compliance with CMS rules.		
RLE 005	The Contractor must follow all standards defined by CMS in Guidance for Exchange and Medicaid Technology Systems and Enhanced Funding Requirements: Seven Conditions and Standards; and other federal guidelines yet to be defined; including use a technology neutral rules repository.		
RLE 006	The EES shall support design for a multi-step decision.		
RLE 007	The EES shall have the ability to tune individual steps in the overall decision process for maximum performance by the execution engine.		
RLE 008	The EES shall support reporting requirements either natively or integrate with other reporting tools to provide reporting.		
RLE 009	The EES shall support repository infrastructure for rule storage and versioning.		
RLE 010	The EES shall support seamless and easy user interaction.		
RLE 011	The EES shall provide context sensitive help and extensive documentation.		
RLE 012	The Rules Engine must be able to submit business rules to a federal repository at such time as the repository exists.		
RLE 013	The EES shall support high performance and scalability, including the following characteristics:		
RLE 014	<ul style="list-style-type: none"> • High performance for large rule bases (more than 20,000 rules) 		
RLE 015	<ul style="list-style-type: none"> • Ability to share rule sets across multiple engines 		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RLE 016	<ul style="list-style-type: none"> Dynamic and static execution versions for performance 		
RLE 017	<ul style="list-style-type: none"> Multiple, cross-platform support 		
RLE 018	<ul style="list-style-type: none"> Segmented repositories 		
RLE 019	<ul style="list-style-type: none"> Pre-built rule paths

RLE 051	<ul style="list-style-type: none"> security 		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RLE 052	The EES shall support ease of use in operation/development and administration, including:		
RLE 053	<ul style="list-style-type: none"> • Rule-firing audit report capabilities 		
RLE 054	<ul style="list-style-type: none"> • Rule views by project or role 		
RLE 055	<ul style="list-style-type: none"> • Ability to be used as a wizard/plugin for multiple development environments 		
RLE 056	<ul style="list-style-type: none"> • Dynamic rule change supported 		
RLE 057	<ul style="list-style-type: none"> • Rules separated from the engine 		
RLE 058	<ul style="list-style-type: none"> • Constraints naturally supported 		
RLE 059	The EES will include the capability to save and retrieve partial user sessions.		
RLE 060	The EES shall provide the capability to associate effective dates with each program and rule in the rules engine.		
RLE 061	The EES shall provide the capability to associate a rule with multiple program profiles.		
RLE 062	The EES shall provide the capability to identify and apply a rule change appropriately to existing cases.		
RLE 063	The EES shall provide the capability to copy an existing rule to create a new rule.		
RLE 064	The EES shall provide the ability to identify all other rules that are dependent on a specific rule by allowing rules association.		
RLE 065	The EES shall provide the capability to generate and display a flow chart of each program profile.		
RLE 066	The EES shall provide the ability to maintain and display the history of each rule change in the rules engine to show previous versions of the rule, a timestamp of when the change was made and the ID of the user making the change.		
RLE 067	The EES shall provide the capability to add additional table-driven variables to support new regulations using a rules engine.		
RLE 068	The EES shall include an automated rule build capability for rule repository propagation through the environments Development, Integration/Test, User Acceptance Testing and Production.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RLE 069	The EES shall have the ability to expose sets of interrelated rules in the rules repository as either a web service and/or in an interactive, web-based interview format.		
RLE 070	The EES shall have the ability to create customizable web-based, interview sessions based on defined rule sets.		
RLE 071	The EES must facilitate the creation and maintenance of rules referencing complex data relationships this will include, but not be limited to, rules referencing complex many-to-many relationships between entity types		
RLE 072	The EES must have the ability for text documentation and meta-data to be included as part of the rules repository.		
RLE 073	The EES will have documentation to assist rule authors and administrators with best practices for rule repository creation and maintenance, repository check-in/checkout, repository promotion across environments.		
RLE 074	The Contractor shall partner with the Department management and Rule Author(s) to design suitable policy models for Eligibility Determination and other rules to be automated using the proposed Rules Management System.		
RLE 075	The Contractor shall transform all of the state's Medicaid eligibility program rules into a format that can be consumed by the proposed Rules Management System.		
RLE 076	The Contractor shall create the program rules in the proposed Rules Management System and test them in an established environment.		
RLE 077	The Contractor shall create a valid set of rules to transition from the current mainframe system to the proposed Rules Management system in preparation for the new SOA system.		
RLE 078	The Contractor rules management team will work with and mentor the Department staff Rule Author(s) in the best practices of: <ul style="list-style-type: none"> - Converting rules from federal or legislative documents into properly structured rules that can be consumed by the proposed Rules Management System and writing future rules in such a way that eases the transition - Capturing meta-data about each of the rules sets and how they function 		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RLE 079	The Contractor shall provide guidance on: <ul style="list-style-type: none"> - How best to store and look up the meta-data - Defining the Lifecycle of rule sets - How to integrate or flow rules - How to provide help or commentary on rules - General use of the proposed Rules Management System 		
RLE 080	The Contractor shall provide selected Department staff with holistic education on the proposed Rules Management system that includes (but is not limited to): <ul style="list-style-type: none"> - Knowledge about how the proposed Rules Management system works - Knowledge about how to structure the Rule Author(s) to meet the Agency goals - Knowledge about how to create, maintain and update rules in the proposed Rules Management system 		
RLE 081	The EES shall have the ability to test rules independently from the application with which they are being integrated.		
RLE 082	The EES shall have the ability to debug rules using an integrated tool.		
RLE 083	The EES shall have the ability to assign effective dates to rules to control when rules are applied and to allow the storage and application of rules in historical, current, and future contexts.		
RLE 084	The EES shall have the ability to invoke rules as a service from the service integration capability as well as directly from other system modules.		
RLE 085	The EES shall have the ability to record and output the exact reasons and/or basis for decisions determined by the Rules Engine.		
RLE 086	The EES business rules shall be expressed using a consistent, technology-neutral standard format that is human-readable.		
RLE 087	The EES shall provide a Business Rules Engine to generate transaction logs in accordance with the Harmonized Security and Privacy Framework and other federal requirements.		
RLE 088	The EES shall provide a Business Rules Engine, which generates transaction logs in accordance with the Health Insurance Portability and Accountability Act (HIPAA)		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RLE 089	The EES should be able to recreate results on a unique set of data regardless of when the rules are executed; modeled and/or What-if situations are required.		
RLE 090	The EES should provide a Business Rules Engine which contains a process for built-in rule review and approval process that should identify any conflicts in business rules as they are being developed.		
RLE 091	The EES should include a Business Rules Engine which provides a debugging process that automatically analyzes and identifies logical errors (i.e. conflict, redundancy, and incompleteness) across business rules.		
RLE 092	The EES should provide a Business Rules Engine which allows for the tracking and reporting of rules usage.		
RLE 093	The EES should include a Business Rules Engine which provides the flexibility to define business rules by inclusion or exclusion.		
RLE 094	The EES should include a Business Rules Engine which provides the capability for the user to view and model rules for system exceptions online and to trace exception rule dependencies.		
RLE 095	The EES should provide a Business Rules Engine to manage the synchronization of business policies and rules across physical system environments. (e.g. development, test, training and production).		
RLE 096	The EES should have the ability to automatically promote rules from one environment to another (e.g. development to system test to user acceptance to production) as well as rollback changes to a previous version.		
RLE 097	The EES should have the ability to produce and consume rules in both machine and human readable formats (which may be the same format).		
RLE 098	The EES should have the ability to define rules via a customizable business vocabulary using rule metaphors, including decision tables, decision trees, and text-based rules.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

18. Portal Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
PRT 001	The EES shall provide a portal UI framework that separates content from logic and is robust, scalable and interoperable with W3C Web-based standards.		
PRT 002	The EES shall provide session management capabilities to support user sessions and coordinated back-end application functionality.		
PRT 003	The EES shall provide support for multiple languages and character set encoding standards.		
PRT 004	The EES shall provide portal personalization and customization capabilities for the constituent user experience.		
PRT 005	The EES shall support access from multiple channels and devices.		
PRT 006	The EES shall provide support for Web content management EES that is robust and scalable.		
PRT 007	The EES shall provide time-based content expiration and version management capabilities.		
PRT 008	The EES shall provide Web content related workflow management capabilities.		
PRT 009	The EES shall provide syndicated content capabilities including creation and subscription to RSS feeds		
PRT 010	The EES shall provide content metadata attributes for portal extensibility.		
PRT 011	The EES shall provide multimedia Web content management capabilities.		
PRT 012	The EES shall provide wiki- and blog-based capabilities		
PRT 013	The EES shall provide XHTML e-form capabilities.		
PRT 014	The EES shall provide survey engine capabilities.		
PRT 015	The EES shall provide chat and instant messaging (IM) support.		
PRT 016	The EES shall provide the capability to consume externally available mapping Web services.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
PRT 017	The EES shall provide portlet capabilities.		
PRT 018	The EES shall provide inter-portlet communications that are robust, scalable and reliable using Shared Render Parameter and Events methods.		
PRT 019	The EES shall provide search engine capabilities.		
PRT 020	The EES shall provide taxonomy-based cataloging of portal resources.		
PRT 021	The EES shall provide index-based search capabilities.		
PRT 022	The EES must allow for user analytics to be captured and reported		
PRT 023	The EES shall support commonly used Internet browsers without any degradation in functionality, including the following:		
PRT 024	<ul style="list-style-type: none"> • Internet Explorer Version 8.0 or greater 		
PRT 025	<ul style="list-style-type: none"> • Mozilla Firefox Version 6 or greater 		
PRT 026	<ul style="list-style-type: none"> • Google Chrome Version 20 or greater 		
PRT 027	<ul style="list-style-type: none"> • Apple Safari version 5.1 or greater 		
PRT 028	<ul style="list-style-type: none"> • Opera Browsers 10 or greater 		
PRT 029	The EES shall meet all American with Disabilities Act (ADA) and Limited English (LEP) requirements as required by the ACA and Federal regulations.		
PRT 030	The EES shall allow consumers to submit applications with an electronic signature that complies with State, federal, and agency requirements and standards.		
PRT 031	The EES shall use cascading style sheets and other modern browser technologies to ensure that the look and feel of the site can be changed without requiring reprogramming the portal if using a browser based interface.		
PRT 032	The EES shall provide the ability to capture, display and maintain confidentiality statements and privacy protections as specified by the Department.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
PRT 033	The EES shall provide the ability to capture, display and maintain signature acknowledgement(s) of completed forms / case activity(s) as specified by the Department.		
PRT 034	The EES shall provide the ability for external users (e.g. Clients, Community Partners) to upload documents as specified by the Department.		
PRT 035	The EES should support small form-factor devices, including the following mobile phone and tablet platforms:		
PRT 036	<ul style="list-style-type: none"> • iOS phones and tablets 		
PRT 037	<ul style="list-style-type: none"> • Android phones and tablets 		
PRT 038	<ul style="list-style-type: none"> • Blackberry phones and tablets 		
PRT 039	<ul style="list-style-type: none"> • Windows mobile phones and tablets 		
PRT 040	The EES should be 100% accessible via the Internet and require no desktop software (including specialized plug-ins and applets) except for the commercially-available web browsers listed above.		
PRT 041	The EES should provide web analytics.		
PRT 042	The EES should provide citizen and business-centric portals.		
PRT 043	The EES should have a common look and feel across the portal, regardless of the source of information		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

19. Application Server Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
APP 001	The Application Server shall be a scalable, enterprise-ready application and shall support the deployment of many types of distributed applications and provides an ideal foundation for building applications based on SOA.		
APP 002	The Application Server shall enable deployment of mission-critical applications or components in a robust, secure, highly available, and scalable environment.		
APP 003	The Application Server clusters shall provide scalability and reliability for applications by distributing the work load among multiple instances of the server.		
APP 004	The Application Server clusters shall have overload protection to allow the server the ability to detect, avoid, and recover from overload conditions.		
APP 005	The Application Server clusters shall prioritize work based on pre-defined rules and by monitoring actual run time performance statistics.		
APP 006	The Application Server clusters shall store-and-forward services to enable the server to deliver messages reliably between applications that are distributed across many Server instances.		
APP 007	Allows for System Administration that include tasks such as creating Application Server domains; deploying applications or components; migrating domains from development environments to production environments; monitoring and configuring the performance of the application Server domain; and diagnosing and troubleshooting problems.		
APP 008	The Application Server security architecture shall provide a comprehensive, flexible security infrastructure designed to address the security challenges of making applications or components available on the Web.		
APP 009	Shall provide for a monitoring and diagnostic service that creates, collects, analyzes archives, and accesses diagnostic data generated by a running server and its deployed applications.		
APP 010	The EES must allow for user analytics to be captured and reported.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
APP 011	The EES shall support session replication to support transparent fail over.		
APP 012	The EES shall provide guidelines and tools (MVC frameworks, persistent frameworks) to create web applications (portal or stand-alone) with basic CRUD functionality.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

20. Database Management System Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
DMS 001	The EES shall lock database records based on various parameters (e.g., at row level, field level, or at the application level).		
DMA 002	The EES shall accommodate separate instances of databases.		
DMS 003	The EES shall support online modifications to database structures with minimal user downtime.		
DMS 004	The EES shall allow for data and transaction replication including, but not limited to, copying an instance of any database to specified locations (e.g. SAN, Multi-site implementations)		
DMS 005	The EES shall provide standard data extraction APIs to allow import and export of data.		
DMS 006	The EES shall provide documented best practices including, but not limited to optimum database configuration, client maintenance and change control.		
DMS 007	The EES shall handle load balancing, failover and/or clustering ability for extended scalability and performance		
DMS 008	The System shall avail the capacity planning model for database configuration.		
DMS 009	The EES supports advanced configurations for data caching (e.g., support of client/application caching, support of server caching, etc.)		
DMS 010	The EES shall have the ability to optimize performance in transaction processing versus report processing		
DMS 011	The EES shall use history tracking within the database and logging options (e.g., transaction auditing)		
DMS 012	The EES shall be fully ACID (Atomicity, Consistency, Isolation, Durability)- compliant so as to ensure it handles transaction rollbacks, validity and referential integrity checks, etc.		
DMS 013	The EES shall handle record locking (e.g., row, field, other) and record updating/committing.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
DMS 014	The EES shall support indexing technology (multiple types of Indexing shall be available to tune performance of SQL statements).		
DMS 015	The EES must have the ability to support a variety of data model constructs including complex entity relationships and complex many-to-many relationships		
DMS 016	The EES shall provide the ability to optimize individual queries and support parallelizing a query to run on multiple CPUs at the same time to increase performance.		
DMS 017	The EES shall manage multiple query queue entries in parallel.		
DMS 018	The EES shall offer tools to manage and control disparate mixed workloads in a DBMS environment.		
DMS 019	The EES must have the ability to maintain security based upon defined roles.		
DMS 020	The EES must have data replication capabilities to external file formats or other RDBM Systems.		
DMS 021	The EES shall have full, incremental and transaction log backup and recovery capabilities on both a regular schedule and an ad hoc basis, including redundant off-site backups.		
DMS 022	The EES shall provide the capability to remain fully-functional during database backup windows.		
DMS 023	The EES must support geo-coded address data for the storage and retrieval of latitude and longitude coordinates.		
DMS 024	The EES shall assist the Department in developing procedures to ensure that specified data is archived and protected from loss, unauthorized access, or destruction.		
DMS 025	The EES shall have the ability to extend the data model in a manner that is compatible with framework upgrades.		
DMS 026	The EES shall have the ability within the base data model to store effective and expiration dates for items being tracked.		
DMS 027	The EES shall have the ability to prevent the alteration of information that has been deemed as historical.		
DMS 028	The EES shall have the ability to maintain the data model and associated dictionaries and generate appropriate DDL for local modifications and new releases of the product.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
DMS 029	The EES shall have the ability to gather and analyze database performance information and provide recommendations for improvement.		
DMS 030	The EES shall employ one defined set of data standards (e.g., consistent data schema, data element, data class, field lengths, data tables, view naming conventions).		
DMS 031	The EES shall provide consistency and validity checks on data elements at the database level.		
DMS 032	The EES shall provide a data history in accordance with state and federal law (7 years is the general requirement except where otherwise indicated).		
DMS 033	The EES shall provide the ability to archive records (i.e., remove from active system) based on administrator defined criteria.		
DMS 034	The EES shall properly normalize or de-normalize all tables for efficient operation.		
DMS 035	The EES shall store all data (data, configuration, user, etc.) in a central repository.		
DMS 036	The EES shall provide sharing of data among all parts of an integrated system.		
DMS 037	The EES shall store all data in industry-standard relational databases that use referential integrity rules.		
DMS 038	The EES shall have the capability and capacity to maintain data as required by Nebraska and federal requirements as well as the DHHS electronic retention policy		
DMS 039	The EES should have the ability to support conceptual, logical and physical modeling.		
DMS 040	The EES should have the ability to reverse engineer, document, and inventory existing databases.		
DMS 041	The EES should include metadata on all data fields stored in the database, web services, or indexed documents in the document library.		
DMS 042	The EES should provide the ability to return archived records to the active system based on user request and/or administrator defined criteria.		
DMS 043	The EES should provide the ability to configure a retention schedule for records and documents.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
DMS 044	The EES should provide automatic program checks for controlling data files, verifying correct processing, and ensuring data integrity.		
DMS 045	The EES should have the ability to retrieve data based on worker requests and retrieve the data and return it to the system within 24 hours.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

21. SOA Governance Infrastructure Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
GOV 001	The Enterprise Metadata Repository shall provide design-time governance in support of the service life phase, delivering key capabilities for the storage and management of an extensible set of metadata for number of composites, services, business processes, and other IT-related assets.		
GOV 002	A Service Registry shall serve as an integration point for runtime tooling.		
GOV 003	The SOA governance infrastructure should support the Service Bus in subscribing to new or modified assets.		
GOV 004	The SOA governance infrastructure should facilitate composite applications in discovering updated endpoints and WSDL locations.		
GOV 005	As part of the SOA governance model, Runtime monitoring tooling should publish metrics to the Service Registry.		
GOV 006	The security policy manager for Web services shall allow for centrally defined security policies that govern Web services operations (such as access policy, logging policy, and load balancing).		
GOV 007	The ESB solution shall provide dynamic discovery and service level monitoring of all artifacts deployed in the Application Server.		
GOV 008	The Contractor shall define governance processes for the following domains:		
GOV 009	<ul style="list-style-type: none"> • Service Portfolio Management 		
GOV 010	<ul style="list-style-type: none"> • Services Technical Architecture 		
GOV 011	<ul style="list-style-type: none"> • Service Design & Development 		
GOV 012	<ul style="list-style-type: none"> • Configuration & Release Management 		
GOV 013	<ul style="list-style-type: none"> • Contract Management 		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
GOV 014	<ul style="list-style-type: none">Service Monitoring & Control		
GOV 015	<ul style="list-style-type: none">Incident Management		
GOV 016	<ul style="list-style-type: none">Change Management		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

22. Business Process and Case Management Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
CSE 001	The EES shall include business process management capabilities (e.g., roles, responsibilities, policies, procedures, approvals, deadlines, integrations, etc.).		
CSE 002	The EES shall provide process execution and state management.		
CSE 003	The EES shall interact/integrate with the case management components with Enterprise Data Management and Content Management Systems.		
CSE 004	The EES shall enable collaboration.		
CSE 005	The EES shall enable BAM (Business Activity Monitoring) and event-based notifications.		
CSE 006	The EES shall provide simulation and optimization.		
CSE 007	The EES shall provide a registry for process components.		
CSE 008	The EES shall provide robust Administration functions.		
CSE 009	The EES shall provide and/or integrate with a robust and easily configurable workflow engine.		
CSE 010	The EES shall include the capability to assign tasks to staff based on defined business rules.		
CSE 011	The EES shall include the capability to route work to the next person in a workflow based on process outcomes.		
CSE 012	The EES shall provide an automated method to balance workload based on user and work unit queues or skills and availability.		
CSE 013	The EES will provide a method to manually reassign workload based on user input.		
CSE 014	The EES shall support e-mail (push) or on-line queries (pull) by a user for work that is in their queue.		
CSE 015	The EES shall provide data validation rules to ensure data validity		
CSE 016	The EES shall enforce workflow rules (with task checklists) to ensure that processes are completed correctly.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
CSE 017	The EES shall improve management and staff accountability through the production of reports and/or electronic notifications which will alert users of pending and overdue work.		
CSE 018	The EES shall provide for comprehensive case tracking as defined in requirements detailed during system configuration - minimally these requirements will include logging of task status, case and contact history, issues, etc.		
CSE 019	The EES shall track milestones and due dates and support notification of the appropriate parties about upcoming and overdue milestones.		
CSE 020	The EES shall support multiple forms of electronics notification channels for external users (e.g. text, page, etc.).		
CSE 021	The EES shall support a visual/modeling tool to define business process flows.		
CSE 022	The EES shall be integrated and exposed via portal for citizens (100%) and key functionality for other users, enabling high usage of system within portal.		
CSE 023	The EES shall support standard business process definition languages.		
CSE 024	The EES shall provide the capability to tie business rules to workflows.		
CSE 025	The EES shall provide the capability to link a workflow to one or more workflows.		
CSE 026	The EES shall provide the capability to suspend and resume a workflow that is incomplete.		
CSE 027	The EES shall provide production of reports and/or electronic notifications to identify suspended workflows.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

23. Application/Transaction Monitoring and Logging Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
TNS 001	The EES shall log all system transactions and keep them easily retrievable and sortable.		
TNS 002	The EES shall detect major errors related to one or more components including loss of network connectivity, a database server going off line, or the application suffers an out-of-memory situation.		
TNS 003	The EES shall detect less than desirable application performance, such as degraded servlet, database or other back end resource response times.		
TNS 004	The EES shall have safeguards designed to ensure that configuration variables affecting the application and the back end resources remain at Department predetermined configuration settings.		
TNS 005	The EES shall detect intrusion attempts by unauthorized system users.		
TNS 006	The EES shall monitor critical performance parameters such as response time, resource availability, CPU Utilization, etc.		
TNS 007	The EES shall provide a holistic view of a wide range of application services and network services providing the ability to drill down to a level where the observations provide useful information and both real-time and snapshot views.		
TNS 008	The EES shall send alarms based on the monitored attributes; these can be escalated through E-Mail / SMS etc.		
TNS 009	The EES shall provide information on the bottleneck in the system.		
TNS 010	The EES shall allow Department staff to perform admin activities through an intuitive user interface.		
TNS 011	The EES shall have the ability to create custom dashboards to empower the users.		
TNS 012	The EES shall allow for different roles for Users including Operators, Administrators, Managers etc.		
TNS 013	The EES shall allow for report generation and analysis for application troubleshooting and capacity planning.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

24. Enterprise Content Management Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
	Document Management		
DOC 001	The EES shall provide the ability to capture EES-generated documents and store them at appropriate level (e.g. individual, case, program, application, various workflow/process).		
DOC 002	The EES shall provide the ability to store electronic forms (EES generated or 3rd-party generated forms).		
DOC 003	The EES shall enable indexing and searching of documents by a variety of user-defined metadata attributes.		
DOC 004	The EES shall provide support for full text search.		
DOC 005	The EES shall provide built-in viewers/converters for a wide variety of file types.		
DOC 006	The EES shall provide digital rights management capabilities.		
DOC 007	The EES shall provide check-in/check-out functionality for electronic documents.		
DOC 008	The EES shall provide notification features for files that are checked out (overdue, availability, etc.).		
DOC 009	The EES shall ensure version control of documents as they are changed or modified.		
DOC 010	The EES shall allow rollback to a previous version of a document.		
DOC 011	The EES shall enable collaborative document creation and/or markup.		
DOC 012	The EES shall enable attachment of documents to e-mails and e-mail distribution lists.		
DOC 013	The EES shall utilize the EES' authorization and access control for file level security.		
DOC 014	The EES shall have the ability to, based on rules or context, automate the creation of indexing, meta data and overall taxonomy.		
DOC 015	The EES shall have robust bulk load and conversion features.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
DOC 016	The EES shall provide the capability to communicate natively with the document management API.		
DOC 017	The EES shall provide the capability to access the output of the document management system over the Internet and/or Intranet web sites.		
DOC 018	The EES shall develop a user guide that can be accessed online and printed on demand.		
DOC 019	The EES shall provide the capability for online access to policy and procedure and training materials.		
DOC 020	The EES shall be integrated with document processing center workflow.		
	Imaging and Image Capture		
IMG 001	The EES shall accommodate multiple imaging locations.		
IMG 002	The EES shall integrate the Imaging and Document Management System with Nebraska's Hyland On-Base solution.		
IMG 003	The EES shall provide the capability to access Nebraska's Hyland On-Base solution to extract data to pre-populate index fields, and/or values on forms.		
IMG 004	The EES shall provide the capability to send and receive faxed and e-form documents, process the data and image directly into and out of the system including the ability to automatically send confirmation of transmission to the sender.		
IMG 005	The EES shall provide the capability for performing conditional routing that will send documents to a specific queue or inbox, either manually or electronically, based on preset conditions as defined by the User.		
IMG 006	The EES shall provide the capability to store and view a multiple page document as a single document.		
IMG 007	The EES shall provide the capability to attach notes, annotations, e-mails and other documents to an original scanned document at any time without rescanning.		
IMG 008	The EES shall provide the capability to notify the user when a duplicate document has been received so the user can decide whether to use the previously received document, replace the existing document or store the new document separately.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
IMG 009	The EES shall provide the capability to link imaged documentation together and link it to an individual and/or cases within Nebraska EES.		
IMG 010	The EES shall provide the capability to record user and workstation identification for each document processed, accessed or updated.		
IMG 011	The EES shall provide the capability for documents to be grouped together during scanning based on user defined criteria.		
IMG 012	The EES shall provide the capability to allow the User to manually remove, rescan and replace a previously scanned image or document(s).		
IMG 013	The EES shall provide the capability to employ user-defined form/template, indexes and/or field values for recognition and retrieval of documents.		
IMG 014	The EES shall provide the capability to validate data captured from specific fields on forms electronically read by OCR/OMR/ICR.		
IMG 015	The EES will provide the capability to archive documents manually and/or automatically by user-defined criteria.		
IMG 016	The EES shall provide the capability for archived documents to be retrieved and re-indexed.		
IMG 017	The EES shall provide the capability to permanently delete documents based on user defined criteria.		
IMG 018	The EES shall provide the capability to interface with other imaging systems using industry standard interfaces and file formats.		
IMG 019	The EES shall provide the capability to version multiple copies of scanned documents.		
IMG 020	Scanners provided as part of the EES shall have the capability to scan at least 80 pages per minute.		
IMG 021	The EES shall provide image retrieval response times within a maximum of two seconds for all documents stored in the system given a minimum level of bandwidth agreed during detailed requirements and EES configuration.		
IMG 022	Scanners provided as part of the EES shall provide the capability for simplex and duplex scanning.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
IMG 023	The EES shall provide audit trail functions with the ability to log every step in the process to a database for query and reporting purposes.		
	Records Management		
REC 001	The EES shall automatically calculate transfer and destruction dates (and assign records ready for deletion to the appropriate review process for approval of final deletion) for all records in the retention schedules.		
REC 002	The EES shall provide email notification of disposition results		
REC 003	The EES shall include a workflow tool to support the records management process.		
REC 004	The EES shall allow users to manually or automatically classify records or classified automatically based on a policy/rules engine.		
REC 005	The EES shall allow administrators and authorized users to create, apply, view or remove legal holds for individual or multiple records.		
REC 006	The EES shall have the capability to produce colored and bar-coded labels created for physical records.		
REC 007	The EES shall have the capability to check records in and out using barcodes, with adherence to security permissions and support the use of barcode scanners for the purpose.		
REC 008	The EES shall have the capability to track all types and sizes of storage containers within storage locations.		
REC 009	The EES shall have the ability for an administrator to create and maintain retention schedules.		
REC 010	The EES shall have the ability to create disposition, legal hold and audit reports for the records.		
	Web Content Management		
WEB 001	The EES shall provide content authoring capabilities including:•		
WEB 002	<ul style="list-style-type: none"> • Provide a structured container for the content (e.g. document) 		
WEB 003	<ul style="list-style-type: none"> • Support reuse via Copy and Paste or "Save As"

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

25. Identity Management Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
IDT 001	The EES shall provide APIs/Connectors to integrate with a variety of 3rd party/custom applications to provide single sign-on.		
IDT 002	The EES shall enforce a limit of (configurable) consecutive invalid access attempts by a user.		
IDT 003	The EES shall protect against further, possibly malicious, user authentication attempts using an appropriate mechanism (e.g. locks the account/node until released by an administrator, locks the account/node for a configurable time period, or delays the next login prompt according to a configurable delay algorithm).		
IDT 004	The EES shall provide an administrative function to reset passwords.		
IDT 005	The EES shall not display passwords while being entered.		
IDT 006	The EES shall provide only limited feedback information to the user during the authentication.		
IDT 007	The EES shall support case-sensitive usernames that contain typeable alpha-numeric characters in support of ISO-646/ECMA-6 (aka US ASCII).		
IDT 008	The EES shall allow an authenticated user to change their password, automatically when possible, consistent with password strength rules.		
IDT 009	The EES shall support password strength rules that allow for minimum number of characters, and inclusion of alpha-numeric complexity.		
IDT 010	The EES shall support case-sensitive passwords that contain typeable alpha-numeric characters in support of ISO-646/ECMA-6 (aka US ASCII).		
IDT 011	The EES shall use either standards-based encryption, e.g., 3DES, AES, or standards-based hashing, e.g., SHA1 to store or transport passwords.		
IDT 012	The EES shall prevent the reuse of passwords previously used within a specific (configurable) timeframe, or shall prevent the reuse of a specific (configurable) number of the most recently used passwords.		

Appendix C Non-Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
IDT 013	The EES shall meet:		
IDT 014	<ul style="list-style-type: none"> • CMS E-Authentication Assurance Levels 		
IDT 015	<ul style="list-style-type: none"> • NIST 800-63 guidance <ul style="list-style-type: none"> Level 1: Single factor authentication, Identity proofing relies on subscriber's own assertions Level 2: Single factor authentication, requires verifying the individual's financial account information, and other information Level 3: Multifactor authentication, requires verifying the individual's financial account information, and other information Level 4: Multifactor authentication, In-person proofing is required Tokens (typically a cryptographic key or password) for proving identity,		
IDT 016	<ul style="list-style-type: none"> • Identity proofing, registration and the delivery of credentials which bind an identity to a token, 		
IDT 017	<ul style="list-style-type: none"> • Remote authentication mechanisms, that is the combination of credentials, tokens and authentication protocols used to establish that a claimant is in fact the subscriber he or she claims to be 		
IDT 018	<ul style="list-style-type: none"> • Assertion mechanisms used to communicate the results of a remote authentication to other parties. 		
IDT 019	The EES should re-authenticate the user before any access to Protected Health Information (PHI) or other sensitive or confidential information is allowed, including when not connected to a network (e.g. on unconnected mobile devices).		
IDT 020	The EES shall encrypt storage of all passwords using a one-way hash or other equivalent functionality to minimize damage from a security breach.		

Appendix D
Requirements Gap Analysis
RFP# 4544Z1

Any requirements that the Bidder cannot attest to full compliance; i.e., provides a value of “N” in the Compliant field of the Appendix B Functional Requirements Traceability Matrix or Appendix C Non-Functional Requirements Traceability Matrix, must document the requirement gap as outlined in this Appendix. The Bidder must ensure that the Gap Analysis Matrix contains an entry for each requirement where one or more of these conditions are true:

1. The Bidder has indicated “N” to Compliant in either RTM
2. The Bidder has indicated “M”, “F”, “C” or “O” to Availability in either RTM
3. The Bidder has indicated that an extensive integration effort of more than 2,500 hours will be needed to meet the requirement as documented in the Key Features of the EES description in the RTM.

For each requirement gap, the Bidder must follow the instructions in this Appendix. The Bidder must copy, exactly, the Identifier, Requirement Description, and Availability from the RTM to ensure linkage between the RTM and the Requirement Gap Analysis Matrix.

The Bidder must provide an assessment of the requirement gap, including an estimate of its impact or severity if not compliant, and the steps necessary to close the gap and achieve full compliance. For system and/or product features that will support the requirement and close the gap, the Bidder must also provide an estimated date when the capability will be available as part of the Bidder’s baseline capability.

Bidders are required to use the following Gap Analysis instructions:

Column Description	Bidder Responsibility
Identifier	The unique identifier of the requirement which does not have a compliant solution according to the criteria established in either Appendix B Functional Requirements Traceability Matrix or Appendix C Non-Functional Requirements Traceability Matrix. Copy the requirement identifier from the applicable RTM.
Requirement Description	Copy the requirement description from the applicable RTM for the requirement identified above.
Availability	Copy from the RTM for the requirement identified above.
Impact/Severity (Product development or integration effort to fulfill the requirement)	High (H) = >2500 hours Medium (M) =>1000 hours to <2500 hours Low (L) =<1000 hours

Medicaid Eligibility and Enrollment System

Request for Proposal Number 4544Z1

There are two existing systems that Nebraska will be modifying for ACA compliance.

Nebraska's current functional environment is called ACCESSNebraska. ACCESSNebraska provides service delivery for Nebraska Medicaid and the Economic Assistance Programs (Temporary Assistance for Needy Families (TANF), Supplemental Nutrition Assistance Program (SNAP), Low Income Home Energy Assistance Program (LIHEAP) and several smaller programs. The environment contains the following components:

1. Web site
2. Customer Service Centers
3. Local Offices
4. Universal and Assigned Case Management model
5. Functional Case Management Assignments
6. Document Imaging

The web site ACCESSNebraska.ne.gov contains the following: Do I Qualify? (screening tool), Application, Change Reporting, Benefit Accounts, Submit Documents and information on Community Partners, Local Offices, etc. The Benefit Accounts contains information on benefit eligibility and copies of correspondence sent to the account holder. The accounts require a PIN authentication process and security questions to set up.

ACCESSNebraska has four (4) Customer Service Centers with a total of 400 staff. The Customer Service Centers utilize a single 800 telephone number for access with local calling available in Lincoln. With ACA implementation, a new phone number is being set up for Medicaid. Two of the Customer Service Centers will begin taking these calls for a total of 150 staff. The phone system utilizes an Integrated Voice Response System that retrieves customer data from N-FOCUS and is available 24 hours a day, seven days a week. The system is connected to an Automated Call Distribution System which directs callers to specific routing with case managers who have knowledge and expertise to answer the question. The system utilizes Call Quality Recording and Monitoring (CQRM) to store data. The voice signature will be stored as a part of this. It is currently envisioned that a staff member will take the application over the telephone. Eventually the application process will be moved to the IVR with the data transmitted to the new EES. The system is managed utilizing Contact Center Manager software that allows for reporting.

Nebraska has local offices throughout the state where customers can walk in. The local offices accept applications, conduct interviews, determine eligibility and have kiosks available for customers to utilize the web site and contact the Customer Service Center.

ACCESSNebraska utilizes a Universal Case Management system for most of its case management. In the Universal Case Management System, work tasks are created for staff to act on the cases as the need arises. Work is prioritized inside the work queues. Work queues in use include: Document Imaging, Application Management, Interviewing, Eligibility Processing, and Change Management. Some cases are assigned to a case manager and processed with the single case manager completing all case actions.

Staff is assigned to work out of queues according to functions. Staff complete all tasks for the function assigned. Staff is also divided into Service Delivery Groups known as adult and family. With ACA implementation, staff will now be divided by MAGI, Non-MAGI and Combined. Combined is a case with both MAGI and Non-MAGI eligible people.

The system is supported by two Document Imaging Centers. These centers contain two high speed IBML scanners that scan documents. In addition, documents can be moved electronically to be stored in the system. All documents are indexed by person and category. Local offices have Canon Scanners to scan documents received locally. The Document Imaging System is integrated and viewable through N-FOCUS.

MMIS Existing Infrastructure

Request for Proposal Number 4544Z1

The foundation of the current MMIS technical architecture was developed in 1973. The current MMIS has been fully operational since 1978 and became HIPAA compliant in October 2003. The MMIS consists of batch and online CICS mainframe components and a front-end HIPAA compliant Sybase Translator.

The Nebraska MMIS currently consists of the following 16 subsystems:

1. Data Management – The Nebraska DHHS currently contracts with Truven Health Analytics for data management, housing ten years of Medicaid claims and provider and client information used to facilitate management reporting, including the Management & Administrative Reporting Subsystem (MARS), the Surveillance and Utilization Review Subsystem (SURS) and the Medicaid Statistical Information System (MSIS) reporting.
2. Drug Claims Processing – The Nebraska DHHS currently contracts with Magellan Medicaid Administration (MMA) for drug claims receipt and adjudication. MMA's Point of Service (POS) system supports the National Council for Prescription Drug Programs standards, including currently D.0 and 1.1 (batch) formats. The POS sends processed pharmacy claims to the State's MMIS on a daily basis, where the claims are passed into the MMIS weekly payment cycle for final adjudication, payment, and reporting.
3. Management & Administrative Reporting Subsystem (MARS) – Provides system generated reports. The Nebraska DHHS also contracts with Truven Health Analytics to provide management information.
4. Medicaid Drug Rebate (MDR) – A PC-based extract from MMIS claims history to prepare quarterly invoices for drug rebates from manufacturers.
5. Medical Claims Processing (MCP) – Edits claims and calculates reimbursement amounts.
6. Medical Non-Federal (MNF) – Ensures that Title XIX Federal matching funds are not used to pay for health care services otherwise available through Title XVIII (Medicare) funding.
7. Medical Provider Subsystem (MPS) – Maintains demographic, eligibility, and licensing data for all enrolled Medicaid providers.
8. Nebraska Aging Management Information System (NAMIS II) – This application supports the activities of the State Unit on Aging. It was developed to enter, edit, monitor, and report services provided by Area Agencies on Aging in Nebraska, track services required by the U.S. Administration on Aging (AoA), and to compile information required by the AoA for NAPIS, the National Aging Program Information System. It is also used to manage programs, track costs in certain services, track program usage, and analyze client demographics.
9. Nebraska Disability Program (NDP) – Accounts for the separate funding of health care services for disabled persons who do not meet the SSI disability duration requirements but are eligible for the same medical services as Medicaid.
10. Nebraska Managed Care System (NMC) – Provides plan and PCP enrollment of Medicaid clients into managed care, and documentation of communications between the client, the enrollment broker, and the managed care plans. The NMC offers basic case management functionality.

11. Nebraska Medicaid Eligibility System (NMES) – An automated voice response system used to verify client Medicaid or managed care eligibility for Nebraska Medicaid. The current Interactive Voice Response Unit also supports the Nebraska's Child Support system, known as Children Have A Right To Support (CHARTS), which serves as Nebraska's statewide Child Support Enforcement (CSE) system.
12. Recipient File Subsystem (RFS) – Uses and maintains Medicaid client eligibility data obtained from N-FOCUS.
13. Reference File Subsystem (RSS) – A database containing various reference information that includes but is not limited to, procedure, diagnosis and drug codes, and fee schedules.
14. Screening Eligible Children (SEC) – Facilitates comprehensive, preventative health care and early detection and treatment of health problems in Medicaid eligible children.
15. Surveillance and Utilization Review Subsystem (SURS) – Provides system generated reports. MLTC also contracts with Truven Health Analytics for reports and tools to support the investigation of potential provider fraud, abuse, or misuse.
16. Third Party Liability (TPL) – Stores information on Medicaid clients with private insurance; contains edits and produces reports for coordination of benefits and recovery.

Current System

Current System Overview

- ◆ Current solution is comprised of two primary components
 - ◆ N-FOCUS and ACCESSNebraska

- ◆ Nebraska Family Online Client User System (N-FOCUS)
 - ◆ Integrated service delivery and case management system
 - ◆ Supports over 30 programs overseen by the Nebraska Department of Health and Human Services (DHHS)
 - ◆ Functions include client/case intake, eligibility determination, case management, service authorization, benefit payments, claims processing and payment, provider contract management, and government and management reporting.
 - ◆ Supports Medicaid Eligibility, as well as other programs such as SNAP and TANF
 - ◆ Statewide Automated Child Welfare Information System (SACWIS)
 - ◆ Interfaces with Medicaid Management Information System (MMIS)

Current System Overview

- ◆ ACCESSNebraska
 - ◆ Public facing web front-end
 - ◆ Provides the public a means to apply on-line for public aid
 - ◆ Supports subset of programs in N-FOCUS
 - ◆ Umbrella Application which includes the following functions:
 - ◇ Screening – survey that assists applicants in understanding their potential eligibility
 - ◇ E-App – electronic application for benefits
 - ◇ Change Reporting – update name, address other demographic data
 - ◇ Inquiry – check status of benefits
 - ◆ Call Centers
 - ◇ Operate in conjunction with the AccessNebraska system
 - ◇ Four centers located across the state
 - ◇ Functions include conducting interviews, taking customer changes, and providing information and referral services via the telephone

Current System Architecture

◆ N-FOCUS

- ◆ Highly integrated client/server application built in 1996

- ◆ On-line system

- ◆ Client

- ◆ Windows 7/XP

- ◆ developed using CA Gen and AION to generate windows and C code

- ◆ some custom developed C code

- ◆ External Call Interface (ECI) used to connect to server components

- ◆ 475 windows, 490 +client procedures

- ◆ Server components

- ◆ Z/OS

- ◆ CICS transactions

- ◆ CA Gen generated and in house developed COBOL

- ◆ 470 server procedures

- ◆ AION

- ◆ Supports complex eligibility data gathering

- ◆ Automated determination and noticing processes

Current System Architecture

- ◆ N-FOCUS On-line System (continued)
 - ◇ Web components
 - ◇ Java Server Faces and Facelets developed using Eclipse IDE
 - ◇ Tomcat WAS on Linux

- ◆ Batch System
 - ◇ Z/OS COBOL
 - ◇ 700+ procedures, 640+ programs, 220+ stored procedures
 - ◇ Crystal Reports
 - ◇ 540+ reports distributed via Business Objects Enterprise

- ◆ Database
 - ◇ Z/OS based DB2 database
 - ◇ 500+ tables, 550+ table relationships, 935 indexes, 8700+ attributes
 - ◇ Over 1.3 billion rows, largest table exceeds 200 million rows

Current System Architecture

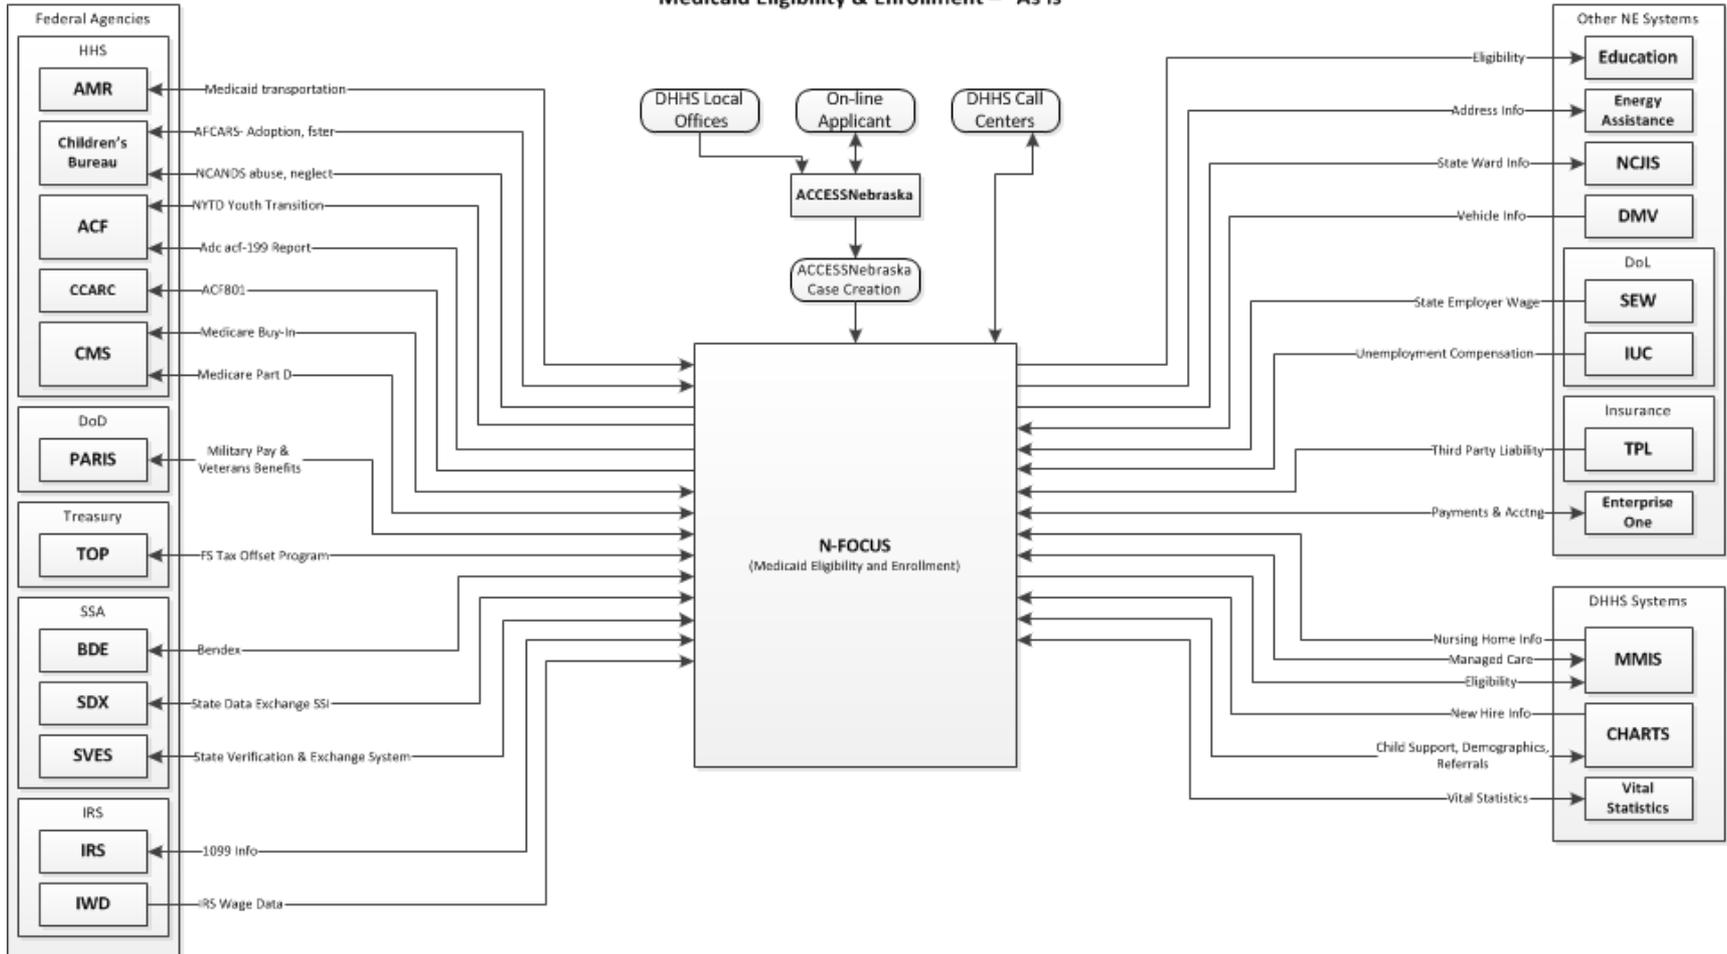

- ◆ ACCESSNebraska
 - ◆ Established in 2008
 - ◆ Web-Based Java application
 - ◆ Utilizes SQL server for temporary data and DB2 for long terms storage
 - ◆ Call Center Telephony Components
 - ◇ Interactive Voice Response System (IVR)
 - ◇ Automated Call Distribution (ACD)
 - ◇ Dashboard Client – provide CTI capabilities
 - ◇ Contact Recording and Quality Monitoring (CRQM) – provides call recording and playback capabilities
 - ◇ Dashboard Manager Shortcut – provides ability to review call statistics in real time

- ◆ N-FOCUS and ACCESSNebraska are not currently integrated electronically, therefore information is manually re-entered into N-FOCUS to initiate the eligibility process.

Current System

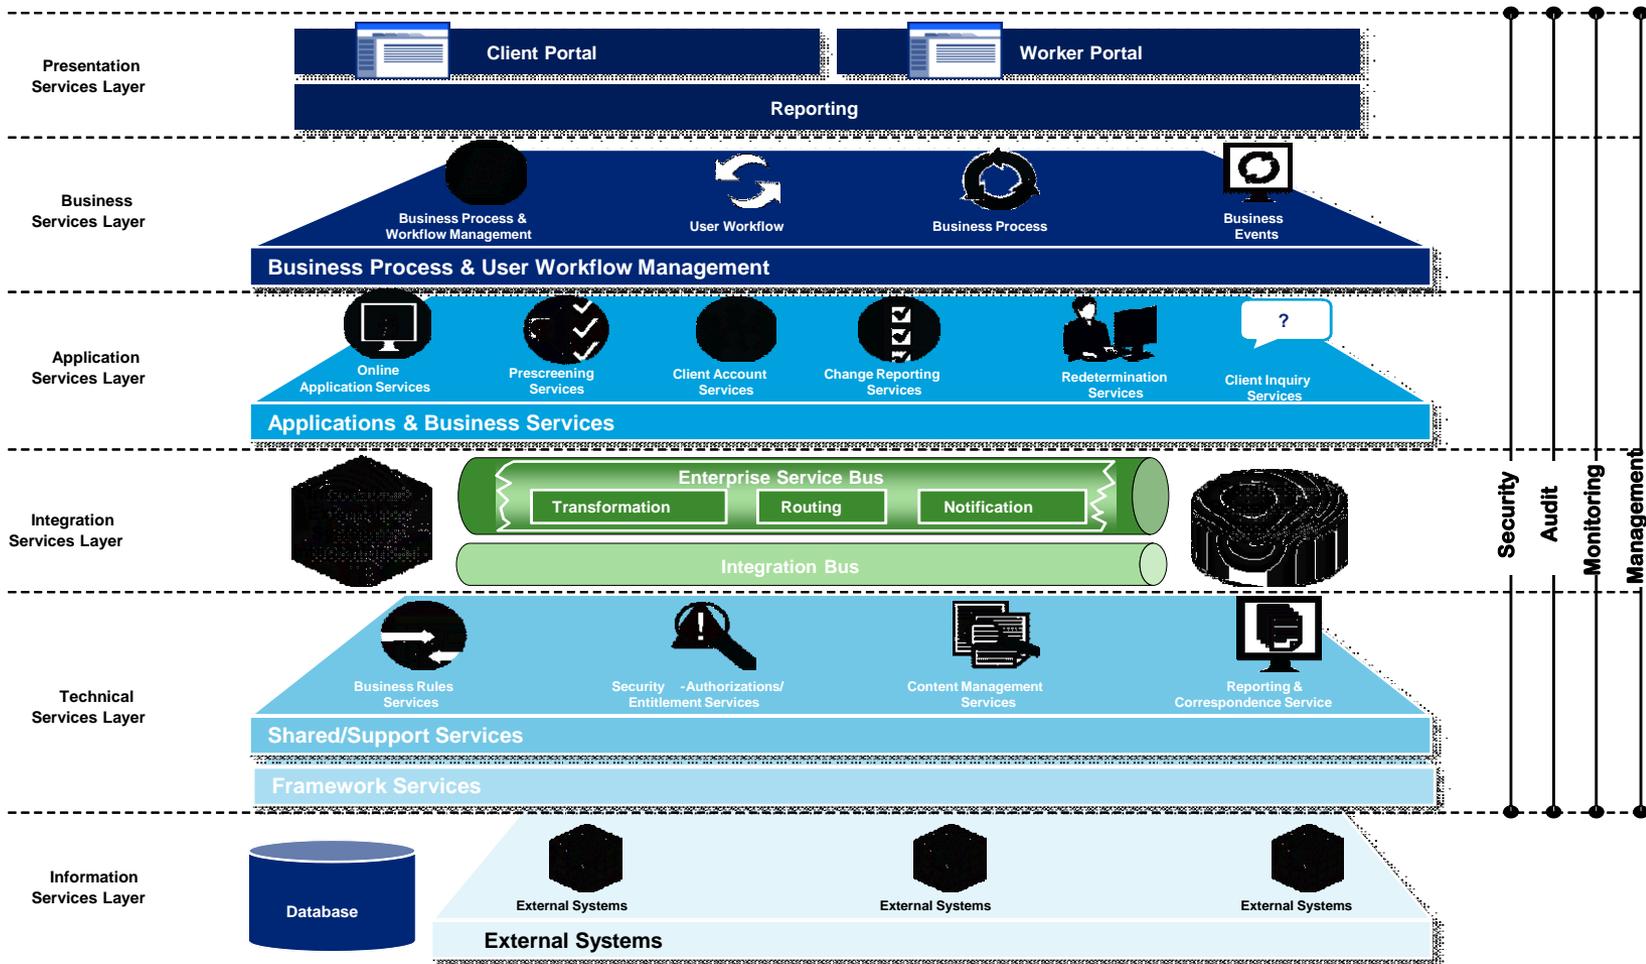

Medicaid Eligibility & Enrollment – “As Is”

Proposed System

Proposed System Conceptual Architecture

Proposed System Conceptual Architecture

Presentation Layer includes:

- User Interface(s)
 - Lightweight
 - Role based
 - Access Method based
- Data Entry validation
 - Complete
 - Type
 - Logical
- Help screens/prompts
- Standards compliant

Business Functions/Processes:

- Predefined Business processes/workflows like:
 - Eligibility
 - Enrollment
 - Plan Selection
 - Change of Circumstances
 - Renewal
- Configurable through external rules and/or business process/workflow definitions

Business Services:

- Predefined services used to construct Business Functions:
 - Determine Medicaid Eligibility
 - Conduct Verification
 - Verify Citizenship
 - Determine MAGI Eligibility
 - Calculate MAGI
 - Transfer Account
 - Check Exchange Enrollment
- Configurable through external rules

Data & Database Management includes:

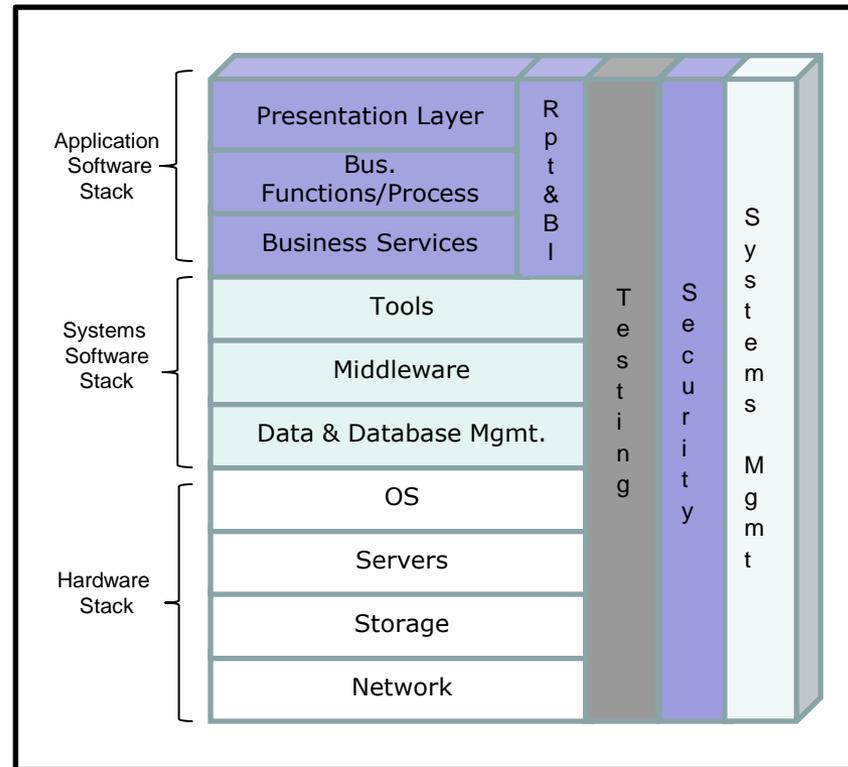

- Enterprise Content Management (ECM)
- Document Management & Imaging (DM)
- Extraction, Transformation, Load (ETL)
- Data Conversion
- Data Migration & Transfer
- Data Quality (DQ)
- Database Management Software (DBMS)
- Database Management & Monitoring
- Database Backup & Recovery
- Data Archival & Retrieval

Middleware includes:

- Business Process Management/Workflow (BPM/WF)
- Business Rules Management/Rules Engine (BRM/RE)
- Enterprise Service Bus/Message Broker (ESB/MB)
- Enterprise Application Integration (EAI)
- Electronic Data Integration (EDI)
- Web Application Server (WAS)
- Web Server (WS)
- Interactive Voice Response System (IVR)
- Computer Telephony Integration (CTI)

Tools includes:

- Integrated Development Environment (IDE)
- Source code control (check in/out, versioning, etc)
- Debuggers
- Report Development and Generation
- Ad-hoc Query & Reporting
- On-line Analytical Processing (OLAP, ROLAP, MOLAP, OOLAP)
- Data Mining

Systems Management includes:

- Performance Monitoring & Reporting
- Business Activity Monitoring (BAM)
- Workload/Job Scheduling
- System Backup & Recovery
- Configuration Management
- Release Management
- Change Management
- Event/Incident Management
- Problem Management
- Capacity Management
- Financial Management/Cost Allocation

Security includes:

- Identity Management
 - Authentication
 - Authorization
 - Access Control
 - Single Sign-On (SSO)
- Non-Repudiation
- Auditability
- Data Integrity
- Data Protection & Confidentiality
- Encryption (static and in motion)
- Intrusion Detection System (IDS)
- Firewalls
- Virus and Malware Detection

Testing includes:

- Test Management
- Functional/Regression Test
- Load & Performance Test
- Test Case Development
- Test Data Generator
- Capture & Playback
- Web App/UI
- Standards Compliance

N-FOCUS Interfaces

Interface Name	Incoming / Outgoing / Both	Recipient / Sender	Frequency	Transfer	Function
ADC ACF-199 Reporting	Both	Administration of Children and Families (ACF), Federal	Quarterly	Connect/Direct	ADC ACF-199 federal reports.
Child Care ACF-801 Reporting	Outgoing	Child Care Automation Resource Center (CCARC), Federal	Monthly	Connect/Direct	Child Care ACF-801 federal report.
Child Support (CHARTS)	Both	CHARTS State Application	Daily	State Mainframe File	Child Support data interface including eligibility, demographic, referral information. CHARTS also directly accesses some N-FOCUS table information.
Child Welfare AFCARS Reporting	Both	HHS Children's Bureau, Federal	Semiannual	Tibco Managed File Transfer (formerly named Cyberfusion)	Child Welfare AFCARS adoption and foster care information; incoming files are not automatically processed.
Child Welfare CONNECT	Outgoing	CONNECT State Application	Weekly	Invoked DB2 Stored Procedure	EDN and CAPTA referrals.
Child Welfare Court (JUSTICE)	Outgoing	JUSTICE State Application	Daily	FTP	Child Welfare state ward information for county courts.
Child Welfare Criminal Justice (NCJIS)	Outgoing	NCJIS State Application	Hourly, Daily	Hourly: invoked DB2 stored procedure; daily FTP	Child Welfare Nebraska Crime Commission information for state wards and law enforcement.
Child Welfare NCANDS Reporting	Outgoing	HHS Children's Bureau, Federal	Annual	Upload to NCANDS Portal	Child Welfare NCANDS (National Child Abuse and Neglect Data System) information.
Child Welfare Project Impact	Outgoing	Project Impact - Juvenile Accountability Impact Block Grant (Omaha)	Monthly	SFTP	Child Welfare Project Impact state ward information.
Child Welfare Quality Assurance	Outgoing	Child Welfare Quality Assurance State Application	Monthly	State Mainframe File	Child Welfare case information.
Debit Card (Reliacard)	Both	US Bank	Daily	Connect/Direct	Electronic payment debit card information.
Developmental Disabilities Therap	Outgoing	Therap vendor	Daily	SFTP	Client eligibility information. Future phases in 2012 will include Provider information as well as incoming service authorization/claim information.
Education	Outgoing	Department of Education, State	Daily	FTP	Client eligibility information.
Energy Assistance	Outgoing	Energy Assistance State Application	Monthly	Direct Data Access	Energy Assistance directly accesses N-FOCUS address information. LIHEAP is scheduled to be incorporated into N-FOCUS July 2012.
Enterprise One (NIS)	Both	Enterprise One (NIS) State Application	Daily	FTP	Payment and accounting information for clients and providers.
Interactive Voice Response (IVR)	Both	HHS Voice Response Unit	Real Time	Invoked DB2 Stored Procedure	Client and provider eligibility information.
IRS 1099	Both	Internal Revenue Service, Federal	Monthly	Axway Secure Transport (formerly named Tumbleweed)	IRS 1099 information.
Labor Employment	Incoming	State Department of Labor	Daily	State Mainframe File	Labor employer wage information (SEW).
Labor Unemployment	Incoming	State Department of Labor	Daily	State Mainframe File	Labor unemployment benefit information.
Labor Unemployment Compensation Tax	Both	State Department of Labor	Weekly, Quarterly	SFTP	Labor unemployment compensation tax information and reporting.

N-FOCUS Interfaces

Interface Name	Incoming / Outgoing / Both	Recipient / Sender	Frequency	Transfer	Function
Medicaid Cards	Outgoing	Lasermark Vendor	Daily	SFTP	Medicaid card information for printing/mailing.
Medicaid (MMIS)	Outgoing	MMIS State Application (RFS, SEC)	Daily	State Mainframe File; Direct Data Access	Medicaid data interface including eligibility, demographic information. MMIS also directly accesses some N-FOCUS table information.
Medicaid Long Term Care (MMIS)	Incoming	MMIS State Application (RFS)	Daily	State Mainframe File	Medicaid nursing home per diem rate information (Long Term Care interface)
Medicaid Managed Care (MMIS)	Both	MMIS Managed Care State Application (NMC)	Daily	State Mainframe File; Direct Data Access	Medicaid managed care information. Managed Care also directly accesses some N-FOCUS table information.
Medicaid Transportation Broker	Both	American Medical Response (AMR) Vendor	Daily	SFTP	Medicaid transportation and authorization information.
Medicare Buy-In	Both	Centers for Medicare and Medicaid Services (CMS), Federal	Monthly	Connect/Direct	Medicare buy-in information exchange.
Medicare Part D	Both	Centers for Medicare and Medicaid Services (CMS), Federal	Monthly	Connect/Direct	Medicare Part D information.
Motor Vehicles	Incoming	Department of Motor Vehicles (DMV) State Application	Real Time	Direct Data Access	Motor vehicle registration information.
New Hire	Incoming	CHARTS State Application	Daily	State Mainframe File	New Hire employment information which originates federally and is transmitted to N-FOCUS via CHARTS.
NTAP	Outgoing	Public Service Commission	Monthly	FTP	Nebraska Telephone Assistance Program (NTAP).
NYTD	Outgoing	Administration of Children and Families (ACF), Federal	Semiannual	Tibco Managed File Transfer (formerly named Cyberfusion)	National Youth Transition Database (NYTD)
OnBase Claims & Service Authorizations	Both	Enterprise Content Manager (ECM), State	Daily, Real Time	SFTP, invoked DB2 stored procedure	Child Care provider and client claims and service authorization information (will be expanded to other programs later in 2012).
PARIS	Both	Department of Defense, Federal	Quarterly / Request	Connect/Direct	PARIS military benefits information; matches from other states.
Provider Rating and Review Reporting	Outgoing	Center for Children, Family, and the Law (CCFL) Answer 4 Families, University	Monthly	SFTP	Client, provider, and service authorization information.
SNAP EBT	Both	JP Morgan Electronic Financial Services, EBT Vendor	Daily	Connect/Direct	SNAP electronic benefits transfer.
SNAP Treasury Offset	Both	Financial Management Services (FMS) Treasury Offset Program, Federal	Weekly	Connect/Direct	SNAP Treasury Offset Program.
Social Security (Bendex)	Both	Social Security Administration, Federal	Daily	Tibco Managed File Transfer (formerly named Cyberfusion)	Social Security beneficiary and earnings data exchange (BENDEX/SVES).
Social Security (LIS)	Incoming	Social Security Administration, Federal	Daily	Tibco Managed File Transfer (formerly named Cyberfusion)	Social Security medicaid applications for Low Income Subsidy (LIS)
Social Security (SDX)	Both	Social Security Administration, Federal	Daily	Tibco Managed File Transfer (formerly named Cyberfusion)	Social Security supplemental security income information (SDX/SVES).
Social Security (SVES)	Both	Social Security Administration, Federal	Daily	Tibco Managed File Transfer (formerly named Cyberfusion)	Social Security verification exchange system (SVES); includes SNAP forty quarters information and citizenship verifications.
Third Party Liability (TPL)	Incoming	TPL State Application	Daily	State Mainframe File	Third Party Liability insurance information.
Vital Statistics	Both	Vital Statistics State Application	Daily	Connect/Direct	Vital Statistics information (passed on to the CHARTS application too)

N-FOCUS Technical Overview

Request for Proposal Number 4544Z1

N-FOCUS (Nebraska Family Online Client User System) is an integrated system that automates benefit/service delivery and case management for more than 30 Nebraska Department of Health and Human Services (DHHS) programs, including Child Welfare, Aid to Dependent Children, Supplemental Nutrition Assistance Program, and Medicaid. N-FOCUS functions include client/case intake, eligibility determination, case management, service authorization, benefit payments, claims processing and payments, provider contract management, interfacing with other private, state and federal organizations, and management and government reporting. N-FOCUS was implemented in production in mid-1996 and is operational statewide.

The typical N-FOCUS user is a DHHS or contracted employee. N-FOCUS daily supports over 2500 workers, operating from offices around the State as well as from 4 customer service centers and 2 hub scanning facilities. Some cases are assigned to specific workers; however the majority of cases are managed via a universal caseload methodology coordinated by the customer service centers.

The application has both batch and online components and stores data in DB2, V9. The DB2 database has over 500 tables, some with a corresponding archive table. There are over 642 relationships between tables, 1054 indexes, and over 7839 attributes. There are over 1.6 billion rows of production data with over 206 million rows in one table with an average table size of 2.8 million rows.

The batch system is coded in Z/OS COBOL and executes in a Z/OS environment. There are more than 660 procedures, over 720 programs, and over 230 stored procedures. The application generates over 540 reports using Crystal Reports that are published to a web portal through Business Objects Enterprise software. Another 100 reports generated independently are published to the portal for viewing.

The online system is an integrated client/server based software system. The client software executes on Windows 7 and resides on Windows 2008 servers located throughout the State. Computer Associates Gen and AION toolsets are used to generate windows and C code, along with custom in-house architecture code written in C. The server components are Z/OS CICS transactions. The CICS programs are Gen-generated COBOL, along with in-house written COBOL and Assembler externals. The CICS programs access DB2 on the Z/OS mainframe. The Gen clients use External Call Interface (ECI), IBM's CICS Universal Client to connect to the Z/OS CICS using TCP/IP protocol. The Gen online system consists of over 570 client procedures, 555 server procedures, 550 windows, and 1450 dialog boxes. The AION online system supports the complex eligibility data gathering and automated determination and noticing processes.

N-FOCUS web applications consist of public applications, including dashboard applications, and applications launched directly from N-FOCUS. Eclipse is the IDE used to generate the Java Server Faces and Facelets code. These Java applications run on Tomcat application servers on the Linux Operating System. The Java applications call stored procedures to access DB2 data and SQL to access SQL server data.

The primary role of the N-FOCUS team today is to maintain and enhance the N-FOCUS application. This includes providing users with technical and business support to keep the system current with government policy and industry technology, both of which continue to change at a rapid pace. The N-FOCUS team works in the Nebraska State Office Building in Lincoln. Business and technical contract and full-time State team members are organized into teams that are involved in application development (Gen, AION, COBOL, Web, Reporting), technical architecture (workstation communications, mainframe communications, print architecture, reporting architecture administration, document imaging administration), database administration, configuration management, project management, business requirements and testing, application and production support, and training. Approximately 40 technical and 30 business team members are assigned to the N-FOCUS team.

Technology Framework

Request for Proposal Number 4544Z1

1.1 General

As part of this RFP procurement process the Department is looking for systems and technologies that can form the basis for an Enterprise Architecture that can be utilized and leveraged across Divisions and/or Programs. As such, we are looking for a solution that is built upon a technology framework that will support and promote this goal. The remaining sections of this document describe what the Department considers a “technology framework”.

1.2 Definitions

Architecture - the fundamental organization of a system embodied in its components, their relationships to each other, and to the environment, and the principles guiding its design and evolution.

Service-Oriented Architecture – an architecture that aims to enhance efficiency, agility, and productivity of an enterprise by positioning services as the primary means through which solution logic is represented. Services act as containers of related capabilities. High-quality service-oriented architectures are consistent with the following principles:

- Standardized service contract – services within the same service inventory are in compliance with the same contract design standards.
- Service loose coupling – service contracts impose low consumer coupling requirements and are themselves decoupled from their surrounding environment.
- Service abstraction – service contracts only contain essential information, and information about services is limited to what is published in the service contracts.
- Service reusability – services contain and express agnostic logic and can be positioned as reusable enterprise resources.
- Service autonomy – services exercise a high level of control over their underlying runtime execution environment.
- Service statelessness – services minimize resource consumption by deferring the management of state information when necessary.
- Service discoverability – services are supplemented with communicative meta data by which that can be effectively discovered and interpreted.
- Service composability – services are effective composition participants, regardless of the size and complexity of the composition.

Framework – for the purposes of this RFP, a framework is an extensible software platform providing general purpose and domain-specific services in the context of a uniform, reusable, service-oriented architecture with consistent abstractions. A framework may include the ability to both directly instantiate end-user capabilities and to provide developer-centric capabilities.

1.3 MITA Technical Principles

The Framework should support the MITA technical principles:

- **Business driven.** Technology will only be used when it supports a business goal or objective; technology will not be used for technology’s sake alone.
- **Implementation neutral.**
- **Platform independent.** Application software and infrastructure components should be developed for reusability and platform independence.
- **Adaptable, extensible, and scalable.**
- **Open technology and standards based.** The advantages of standardization (e.g., data sharing and interoperability) should be leveraged.
- **Security and privacy** must be integrated into a system.
- **Interoperability standards** are established and followed.
- **Quality data** are enabled to support good decision making.
- **Current and proven technology** is selected.

1.4 Seven Conditions and Standards

In order to receive enhanced Federal financial participation (FFP), the Department must implement solutions that are consistent with 42 CFR 433.112 and related guidance from the Centers for Medicare and Medicaid Services (CMS), e.g., *Medicaid IT Supplement MITS-11-01-VI.0*, commonly referred to as the seven conditions and standards (“Seven Conditions”). The Framework must allow the Department to satisfy, to the greatest extent practical, those portions of the Seven Conditions that are system-related. The Seven Conditions are:

- Modularity Standard
- MITA Condition
- Industry Standards Condition
- Leverage Condition
- Business Results Condition
- Reporting Condition
- Interoperability Condition

1.5 Framework Attributes, and Areas of Commonality

1.5.1 Attributes

The following attributes are required in the proposed framework:

The Framework for the Solution must be consistent. A framework is not merely a random or semi-related set of utilities or generic services. Various services, tools, and data structures should use a unified design paradigm and design patterns (service calls; service arguments and return values; data types, etc.) to improve productivity and reduce defects driven by “impedance mismatches.” Frameworks encourage the use of helpful design patterns, but don’t force developers into deep levels of abstraction that detract from their productivity (e.g., factories of factories). Database schema are normalized; data are stored in only one place within the framework and its resulting applications; and these data are accessible only by service calls to the services “owning” the data.

The Framework for the Solution must promote interoperability. The use of standards (where standards exist) and the use of well-documented information interchange specifications (where standards do not exist) assist the using organization in producing and consuming information and services that are interoperable with other systems and organizations. Frameworks should make using interoperable standards easier than creating homegrown interface solutions.

The Framework for the Solution must externalize parameters that are prone to frequent change. These include:

- Business rules
- Workflows
- Configuration, environment, and startup parameters
- Localization resources
- Security roles
- User interface elements

The Framework for the Solution must be service-oriented. The Framework should provide a discoverable service inventory containing service contracts having granularity that is neither so coarse as to result in performance and governance issues nor so fine as to result in excessive developer burden and poor reuse. Service orientation principles may be compromised to the extent necessary to meet performance standards.

The Framework for the Solution must enable functional build out by configuration rather than customization as much as is practical. This likely requires that the base functionality, as delivered, has been used and is configured to support the Medicaid and health insurance domains.

The Framework for the Solution should have a standard, domain-specific base data model. This data model should be consistent, normalized, and incorporate the common data elements used in Medicaid eligibility, enrollment, and member management. The data model must be extensible via documented processes, and must not have any proprietary restrictions on the State's use or extension of the data model.

The Framework for the Solution must encourage reuse. Areas of reuse may include:

- Intra-application. Developers on a single team should find it easy to reuse base framework services or custom services built by other team members.
- Inter-application. Developers on different teams within the same organization should find it easy to reuse base framework services to promote commonality and to discover and use services created by other application teams.
- Inter-enterprise. Developers in sister human and social services agencies and in sister states should find it easy to reuse base framework services to promote commonality and to discover and use services created by other agencies.

The Framework for the Solution must have a security architecture that supports standard security principles. These principles are:

- **Confidentiality** – prevent disclosure to unauthorized persons or systems.
- **Integrity** – data cannot be modified undetectably.

- **Availability** – access is not inappropriately blocked or denied.
- **Authenticity** – validation that the parties to a transaction are who they say they are and that their communications are genuine.
- **Non-repudiation** – parties to a transaction cannot deny their participation in the transaction.
- **Auditability** – track and log data changes including the user or system making the change. Track and log any inquiries, views or access of data that may require such tracking as a result of law, policy or data use agreements including user or system making inquiry, doing the viewing or accessing the data along with the data and time of the inquiry, view or access.

The Framework for the Solution must be architecturally-rich. A framework should have a thoughtful architecture that is better than one in which an organization would normally invest for a single project. Because a framework is intended to be reusable, the framework developer must ensure that the breadth and depth of the services extend to cover the uses that can be reasonably foreseen. Other attributes of the architecture are:

- The functional and structural abstractions chosen to implement the architecture are intuitive, robust, and consistent. Confusing, frail, or inconsistent architectures can destroy using development organization productivity and induce high defect rates.
- The framework is easily extensible. Lacking extensibility, a framework is merely an incomplete software application.
- The framework supports scalable, high-performance applications.
- Security and privacy are built into the architecture as primary considerations rather than as afterthoughts.

The Framework for the Solution must enhance the productivity of the using organization.

An important reason for an organization to use a framework is to improve productivity. The increase in productivity should enable an organization to deliver needed capabilities more rapidly and at a lower cost. It should also enable the organization to respond to life-cycle changes in business needs with greater agility. Frameworks enhance productivity by:

- Providing tools that assist the using organization in performing common, redundant, or complex tasks with ease.
- Providing pre-constructed features, services, and capabilities with default behavior that shorten the time from inception to deployment while allowing fine-grained control to avoid the need for workarounds.
- Being supported by a long-term maintenance concept that continues to improve the features and usability of the framework, reduces the burden of workarounds (particularly security workarounds), and minimizes “reinventing the wheel” by the using organization.
- Using self-documenting tools (e.g., maintaining the official business process diagrams in the business process management system) to avoid having to maintain business and technical design artifacts in multiple locations.

The Framework for the Solution should be multi-platform unless user or enterprise needs require targeting specific hardware/operating system platforms. As the use of specific CPUs, hardware architectures, and operating systems change rapidly, the Department prefers not to be tightly bound to a particular platform. Support for various platforms such as Windows,

z/OS, Linux, and various UNIX is desirable. In addition, the Department strongly prefers the use of products that can be run in virtualized environments while recognizing that some components may have performance needs that preclude or contraindicate the use of virtualization.

Additionally, the current migration towards mobile platforms is likely to continue for the foreseeable future. A framework should assist with and automate activities needed to optimize applications for mobile devices as well as desktop devices, including addressing touch interfaces; limited display sizes; limited bandwidth and intermittent network connectivity; limited processor capabilities; and the movement towards standards-based Web technologies, such as HTML 5.

Frameworks should minimize the number of programming languages necessary for their use, consistent with developer need and balanced against other principles. The Department has the following goals for various types of programming languages:

- General – the Department prefers using open, standards-defined programming languages to the greatest extent practical. The Department understands that there are some domains today (particularly business rules and business process management) where standards are still emerging and permeating the market.
- Object-oriented – the Department prefers the use of a single object-oriented language, that uses automated memory management, to create the majority of custom services and to extend the Framework. While it would consider other languages, the Department prefers Java.
- Procedural – the Department prefers little or no use of procedural languages (e.g., C) in the Framework.
- Declarative – the Department prefers that declarative languages (e.g., HTML) largely be limited to displaying Web-based user interfaces. Even when building user interfaces, the Department prefers to substantially limit the amount of hand-coding necessary by using graphical design and construction tools.
- Scripting – the Department prefers that scripting languages be limited to functions such as user interface code, build management, system startup, and integration with non-service based external systems. Even when performing these functions, the Department prefers to substantially limit the amount of hand-coding necessary by using graphical design and construction tools.
- Business rules – the Department prefers that business rules are represented in English-like statements that are easy to interpret by business users and business analysts. While the Department is not currently planning to allow business analysts to make changes directly to a production system, the ability for these analysts to create and interpret the business rules in the Framework’s native rules language will substantially improve productivity and agility in managing business rules. Based on the Department of the market, the Department would be willing to accept rules languages that are more developer-focused.
- Business Process Management System (BPMS) – the Department prefers the use of Business Process Execution Language (BPEL) for executing managed business processes. Direct consumption of Business Process Model and Notation models (perhaps via the XML Process Definition Language format) is also acceptable. As this area is still maturing, the Department would accept other languages for BPMS process execution, particularly if they are transformable to BPEL for forward compatibility. While the

Department would like direct access to the process execution files for manipulation, including the ability to “round trip” modifications through the Integrated Development Environment, the BPMS must have graphical design and construction tools as directly coding BPEL and other related languages would likely result in substantial productivity reductions and an increase in defects.

- Database – the Department prefers the use of standards-based Structured Query Language (SQL) for database queries. Based on the use of other languages and general purpose frameworks within the Framework (e.g., Java), programming language-specific query languages may also be acceptable (either for relational or object queries). The Department discourages the use of database stored procedures or DBMS specific functionality other than in those instances where needed performance can only be obtained with such use.
- XML-based – the Department encourages the use of XML-based documents for purposes such as system configuration and messaging. The Framework should generate documents without requiring the developer to hand-code XML; however, direct access to the XML documents for manipulation is desirable, including the ability to “round trip” modifications through the Integrated Development Environment.
- Proprietary languages – while there may be specific needs for using proprietary programming languages, the Department prefers to avoid proprietary languages to the greatest extent practical.

1.5.2 Areas of Commonality

In the list below, the Department has identified the areas of commonality it expects to be supplied by the Framework or supplied by the Department to supplement the Framework. These have been identified using common product-oriented terminology, but that does not mean that each capability must be satisfied by a separate, self-contained product. While the Department has a preference for using general purpose COTS products to perform major functions (where Framework capabilities and performance are not compromised), it is not mandating that the functions of the major capabilities be supplied by general purpose COTS products nor is it mandating that the functions are even performed by standalone software services partitioned as listed below. For example, while the Department prefers the use of general purpose COTS business process management and business rules management components, it would be willing to accept an integrated business process/business rules capability as part of the Contractor’s COTS suite. The Department does not intend the list of capabilities to be all-inclusive. Bidders must propose a complete suite of capabilities to comprise the Framework.

1.5.2.1 Framework Areas of Commonality

The following areas of commonality and capabilities are consistent with the State’s goals for the Framework and should be addressed in system solutions:

- **Unified data source/database** – this is a capability to store/persist information using a unified data model on a common database product. The unified data source should support the use of effective time segments and a “never delete a record” approach to enable maintaining complete historical data and referential integrity.
- **Business Process Management** – this is a capability to design and execute business processes enabled by automation for the purposes of orchestration (automated execution

of a workflow) and choreography (coordinated interaction between two or more independent parties or services). While these may include steps executed synchronously, business process management tools excel at automating processes where most or all tasks are executed asynchronously, potentially over extended periods of time.

- **Business Activity Monitoring (BAM)** – this is a capability to monitor and manage business processes, transaction volumes, and quality indicators, in real time and retrospectively. This capability may include statistical analyses of the execution of the indicators being monitored.
- **Business Rules Management** – this is a capability to design and manage the business rules logic within the system and is supported by a repository for the rules.
- **Interaction Management** – this is a capability that allows an organization to manage information about and interactions with stakeholders or clients via multiple channels including easy access to historical data.
- **Case Management** – this is a capability that allows an organization to manage information and transactional activities over time relative to a specific entity.
- **Correspondence** – this is a capability to generate and manage communications with stakeholders via multiple channels, and includes the ability to generate canned, semi-custom, and custom messages.
- **Service Integration/Enterprise Service Bus** – this is a capability that allows the discovery and interaction of distributed services via synchronous and asynchronous messaging in a service-oriented architecture. Through adapters, service integration should also allow interaction with non-service based capabilities.
- **Web Portal** – this is a capability that allows for configurable Web access to backend services. While any sort of Web page could conceivably allow access, a Web portal automates the access, security, and configuration of Web access, and is configurable by not only the developers, but to a limited extent by the end users (e.g., what information is shown and where on the page is it shown).
- **Reporting/Business Intelligence** – this is a capability that allows for textual, tabular, and graphical representations of data needed to answer questions, monitor/control parameters, and make decisions and querying to gather data to fill these reports.
- **Call Center Integration** – this is a capability for the Framework (and resulting system) to integrate with common call center technology to be able to link telephone calls to records, automatically call up useful information for the call center operator, etc.
- **Integrated Development Environment** – this is a capability to develop, integrate, build, test, deploy, and control configuration of software using a unified, integrated, and coherent suite of tools.
- **Security** – while security is an attribute that should apply across the suite of capabilities in the Framework, in this particular case it is a capability to manage authentication, authorization, and access to the system, including a single sign-on capability.
- **Data Management Tools** - This is the capability of collecting, aggregating, matching, consolidating, persisting, securing and distributing data and its meta data to ensure consistency and control in the ongoing maintenance and use of the information.
- **Online Help** – this is the capability to manage, produce, and publish help files, training, and reference information that is integrated in a context-sensitive fashion with the Framework and resulting applications.

- **Document Management*** - this is a capability to store, index, and access electronic documents and images of paper documents in a structured and scalable manner. The capability may have standalone uses or be integrated into an enterprise system via documented interfaces or services.

*Note that the State has designated and procured Hyland OnBase as the enterprise document management system. The preference would be to leverage OnBase as part of the Framework, therefore the Bidder should provide details regarding how their proposed Framework could integrate seamlessly with OnBase.

Nebraska EES Analysis

Request for Proposal Number 4544Z1

1. Summary of the Alternatives Analysis

As part of the systems strategy development process for the Medicaid Eligibility & Enrollment and Information Systems project, we considered a number of system options for delivering integrated eligibility, enrollment and case management functionality which satisfies the requirements of the ACA. The options were ultimately consolidated into four primary alternatives for comparison and evaluation purposes. Those options were:

1. Maintain Status Quo
2. Ground Up Development
3. Incremental Modernization
4. Transfer/COTS System

2. Evaluation Criteria and Results

The set of criteria that was used to evaluate these alternatives was primarily based upon the architectural principles set forth by the Centers for Medicare & Medicaid Services (CMS), which are presented and described in the following table.

Table 2-1: Description of Evaluation Criteria Used	Description
System Integration	Applies a modular, flexible approach to systems development, including the use of open interfaces and exposed application programming interfaces, and the separation of business rules from core programming, available in both human and machine readable formats. Ensures seamless coordination between Medicaid, DHCP, and the Exchange, and allows interoperability with health information exchanges, public health agencies, human services programs, and community organizations providing outreach and enrollment assistance services.
Service-Oriented Architecture (SOA)	Employs common authoritative data sources and data exchange services such as but not limited to, federal and state agencies or other commercial entities.
Isolation of Business Rules	Uses standards-based business rules and a technology-neutral business rules repository. Enables the business rules to be accessible and adaptable by other states.

This form is part of the specification package and must be signed and returned, along with proposal documents, by the opening date and time specified.

PLEASE READ CAREFULLY!

SCOPE OF SERVICE

The State of Nebraska, Administrative Services (AS), Materiel Division, Purchasing Bureau, is issuing this Request for Proposal, RFP Number 4468Z1 for the purpose of selecting a qualified contractor to provide Eligibility and Enrollment Solution (EES) Independent Verification and Validation (IV&V) Services.

Written questions are due no later than August 30, 2013, and should be submitted via e-mail to as.materielpurchasing@nebraska.gov. Written questions may also be sent by facsimile to (402) 471-2089.

Bidder should submit one (1) original and six (6) hardcopies of the entire proposal. In the event of any inconsistencies among the proposals, the language contained in the original proposal shall govern. Proposals must be submitted by the proposal due date and time.

PROPOSALS MUST MEET THE REQUIREMENTS OUTLINED IN THIS REQUEST FOR PROPOSAL TO BE CONSIDERED VALID. PROPOSALS WILL BE REJECTED IF NOT IN COMPLIANCE WITH THESE REQUIREMENTS.

1. Sealed proposals must be received in State Purchasing by the date and time of proposal opening indicated above. No late proposals will be accepted. No electronic, e-mail, fax, voice, or telephone proposals will be accepted.
2. This form "REQUEST FOR PROPOSAL FOR CONTRACTUAL SERVICES" MUST be manually signed, in ink, and returned by the proposal opening date and time along with bidder's proposal and any other requirements as specified in the Request for Proposal in order to be considered for an award.
3. It is the responsibility of the bidder to check the website for all information relevant to this solicitation to include addenda and/or amendments issued prior to the opening date. Website address is as follows:
<http://das.nebraska.gov/materiel/purchasing/rfp.htm>
4. It is understood by the parties that in the State of Nebraska's opinion, any limitation on the contractor's liability is unconstitutional under the Nebraska State Constitution, Article XIII, Section 3, and that any limitation of liability shall not be binding on the State of Nebraska despite inclusion of such language in documents supplied with the contractor's bid or in the final contract.

BIDDER MUST COMPLETE THE FOLLOWING

By signing this Request for Proposal For Contractual Services form, the bidder guarantees compliance with the provisions stated in this Request for Proposal, agrees to the terms and conditions (see Section III) and certifies that bidder maintains a drug free work place environment.

GLOSSARY OF TERMS

AABD (Assistance to the Aged, Blind and Disabled): Medicaid available to certain Nebraskans to assist with medical expenses. Nebraskans who are aged, blind or have a disability (as classified by the Social Security Administration) must meet established financial guidelines in order to be eligible. Some consumers in the AABD Medicaid program access services through managed care while the remaining population access care through a fee-for-service delivery system.

Acceptance Test Procedure: Benchmarks and other performance criteria, developed by the State of Nebraska or other sources of testing standards, for measuring the effectiveness of products or services and the means used for testing such performance.

ACA (Affordable Care Act): On March 23, 2010, President Obama signed into law the Patient Protection and Affordable Care Act. On March 30, 2010, the Health Care and Education Reconciliation Act of 2010 was signed into law. The two laws are collectively referred to as the Affordable Care Act (ACA). ACA is also referred to as the “health reform act” or “Patient Protection and Affordable Care Act (PPACA).

ACCESSNebraska Web Portal: The public application portal for various Nebraska public assistance benefit programs such as: Medicaid, Supplemental Nutritional Assistance Program (SNAP), Aid to Dependent Children (ADC), Aid to Aged, Blind and Disabled, Energy Assistance, Kids Connection, and Child Care Subsidy.

Addendum: Something added or deleted.

Agency: Any state agency, board, or commission other than the University of Nebraska, the Nebraska State colleges, the courts, the Legislature, or any officer or agency established by the Constitution of Nebraska.

Agent: A person authorized by a superior or organization to act on their behalf.

Amend: To alter or change by adding, subtracting, or substituting. A contract can be amended only by the parties participating in the contract. A written contract can only be amended in writing.

Amendment: Written correction or alteration.

Appropriation: Legislative authorization to expend public funds for a specific purpose. Money set apart for a specific use.

Award: All purchases, leases, or contracts which are based on competitive proposals will be awarded according to the provisions in the Request for Proposal. The State reserves the right to reject any or all proposals, wholly or in part, or to award to multiple bidders in whole or in part. The State reserves the right to waive any deviations or errors that are not material, do not invalidate the legitimacy of the proposal, and do not improve the bidder’s competitive position. All awards will be made in a manner deemed in the best interest of the State.

Best and Final Offer (BAFO): A second-stage bid in a public procurement for services.

Bid: The executed document submitted by a bidder in response to a Request for Proposal.

Bid Bond: A bond given by a surety on behalf of the bidder to ensure that the bidder will enter into the contract as bid and is retained by the State from the date of the bid opening to the date of contract signing.

Bidder: Any person or entity submitting a competitive bid response to a solicitation.

Business: Any corporation, partnership, individual, sole proprietorship, joint-stock company, joint venture, or any other private legal entity.

Business Day: Any weekday, excepting public holidays.

Calendar Day: Every day shown on the calendar; Saturdays, Sundays and State/Federal holidays included. Not to be confused with "Work Day".

Centers for Medicare & Medicaid Services (CMS): is a federal agency within the United States Department of Health and Human Services (DHHS) that administers the Medicare program and works in partnership with state governments to administer Medicaid, the Children's Health Insurance Program (CHIP), and health insurance portability standards.

CHIP (Children's Health Insurance Program): Enacted in 1997, CHIP is a federal-state program that provides health care coverage for uninsured low-income children who are not eligible for Medicaid. States have the option of administering CHIP through their Medicaid programs or through a separate program (or a combination of both). The federal government matches state spending for CHIP but federal CHIP funds are capped.

Collusion: A secret agreement or cooperation between two or more persons or entities to accomplish a fraudulent, deceitful or unlawful purpose.

Competition: The process by which two or more vendors vie to secure the business of a purchaser by offering the most favorable terms as to price, quality, delivery and/or service.

Confidential Information: Unless otherwise defined below, "Confidential Information" shall also mean proprietary trade secrets, academic and scientific research work which is in progress and unpublished, and other information which if released would give advantage to business competitors and serve no public purpose (see Neb. Rev. Stat. §84-712.05(3)). In accordance with Nebraska Attorney General Opinions 92068 and 97033, proof that information is proprietary requires identification of specific, named competitor(s) who would be advantaged by release of the information and the specific advantage the competitor(s) would provide.

Configure: Modification to software that does not require changes to the Source Code for such software. This includes rules-based, rules engine based, or parameter driven modification.

Contract: An agreement between two or more persons to perform a specific act or acts.

Contract Administration: The Management of various facets of contracts to assure that the contractors total performance is in accordance with the contractual commitments and obligations to the purchaser are fulfilled.

Contract Management: Includes reviewing and approving of changes, executing renewals, handling disciplinary actions, adding additional users, and any other form of action that could change the contract.

Contractor: Any person or entity that supplies goods and/or services.

Conversion Period: A period of time not to exceed six (6) months, during which the State converts to a new Operating System under "Conversion" as per this RFP.

Copyright: A grant to a writer/artist that recognizes sole authorship/creation of a work and protects the creator's interest(s) therein.

CPU: Any computer or computer system that is used by the State to store, process, or retrieve data or perform other functions using Operating Systems and applications software.

Critical Program Error: Any Program Error, whether or not known to the State, which prohibits or significantly impairs use of the Licensed Software as set forth in the documentation and intended in the contract.

Default: The omission or failure to perform a contractual duty.

Deviation: Any proposed change(s) or alteration(s) to either the contractual language or deliverables within the scope of this Request for Proposal.

Documentation: The user manuals and any other materials in any form or medium customarily provided by the contractor to the users of the Licensed Software which will provide the State with sufficient information to operate, diagnose, and maintain the Licensed Software properly, safely, and efficiently.

Evaluation Committee: A committee (or committees) appointed by the requesting agency that advises and assists the procuring office in the evaluation of proposals.

Evaluation of Proposal: The process of examining a proposal after opening to determine the bidder's responsibility, responsiveness to requirements, and to ascertain other characteristics of the proposal that relate to determination of the successful bidder.

Extension: A provision, or exercise of a provision, of a contract that allows a continuance of the contract (at the option of the State of Nebraska) for an additional time according to contract conditions. Not to be confused with "Renewals."

FOA (Funding Opportunity Announcement): A publicly available document by which a U.S. Federal agency makes known its intentions to award discretionary grants or cooperative agreements, usually as a result of competition for funds. Funding opportunity announcements may be known as program announcements, requests for applications, notices of funding availability, solicitations, or other names depending on the agency and type of program

F.O.B. Destination: Free on Board. The delivery charges have been included in the quoted price and prepaid by the vendor. Vendor is responsible for all claims associated with damages during delivery of product.

Foreign Corporation: A foreign corporation is a corporation that was formed (i.e. incorporated) in another state but transacting business in Nebraska pursuant to a certificate of authority issued by the Nebraska Secretary of State.

HIPAA (Health Insurance Portability and Accountability Act of 1996): The Standards for Security and Privacy of Individually Identifiable Health Information found in the Health Insurance Portability and Accountability Act of 1996, Public Law 104-91, as amended and related HIPAA regulations at 45 C.F.R. part 160-164, as in effect or as amended.

Installation Date: The date when the procedures described in "Installation by Contractor, and Installation by State", as found in the RFP, are completed.

Late Proposal: A proposal received at the place specified in the solicitation after the date and time designated for all proposals to be received.

Licensed Software: Any and all software and documentation by which the State acquires or is granted any rights under this contract

Local Time: Central Time in Lincoln, NE.

MAGI (Modified Adjusted Gross Income): A definition of income from the tax system that will be used to determine eligibility for certain categories of Medicaid eligibility in addition to tax credits available to people buying insurance in exchanges.

Mandatory: Required, compulsory or obligatory.

May: Denotes discretion.

MITA (Medicaid Information Technology Architecture): an initiative of the Centers for Medicare and Medicaid Services (CMS), aligned with the National Health Infrastructure Initiative (NHII), and intended to foster integrated business and information technology transformation across the Medicaid enterprise to improve the administration of the Medicaid program.

Module: A collection of routines and data structures that perform a specific function of the Licensed Software.

Must: Denotes the imperative, required, compulsory or obligatory

N-FOCUS: (Nebraska Family Online Client User System) The Department's software application used to support eligibility determinations for Nebraska Medicaid, Nebraska CHIP and various Economic Assistance Programs. This system also provides additional functionality such as case management, provider management and payment calculations.

Opening Date: Specified date and time for the public opening of received, labeled and sealed formal proposals. Not to be confused with "Release Date".

Operating System: The control program in a computer that provides the interface to the computer hardware and peripheral devices, and the usage and allocation of memory resources, processor resources, input/output resources, and security resources.

Outsourcing: Acquiring computing or related services from a source outside of the State of Nebraska which may include programming and/or executing the State's Licensed Software on the State's CPU's, programming, and/or executing the State's programs and Licensed Software on the contractor's CPU's or any mix thereof.

Outsourcing Company: A company that provides Outsourcing Services under contract to the State.

Performance Bond: A bond given by a surety on behalf of the contractor to ensure the timely and proper (in sole estimation of the State) performance of a contract.

PHI (Protected Health Information): Individually identifiable health information that is transmitted by, or maintained in, electronic media or any other form or medium. Individually identifiable health information is information that is a subset of health information, including demographic information collected from an individual, and 1) is created or received by a healthcare provider, health plan, employer, or healthcare clearinghouse; and 2) related to the past, present, or future physical or

mental health or condition of an individual; the provision of healthcare to an individual; or the past, pre-sent, or future payment for the provision of healthcare to an individual; (i) that identifies the individual; or (ii) with respect to which there is a reasonable basis to believe the information can be used to identify the individual.

PII (Personally Identifiable Information): Information: 1) that directly identifies an individual (e.g., name, address, social security number or other identifying number or code, telephone number, email, address, etc.), or 2) by which an agency intends to identify specific individuals in conjunction with other data elements, e.g., indirect identification. (These data elements may include a combination of gender, race, birth date, geographic indicator, and other descriptors.)

Platform: A specific hardware and Operating System combination that is different from other hardware and Operating System combinations to the extent that a different version of the Licensed Software product is required to execute properly in the environment established by such hardware and Operating System combination.

PPACA (Patient Protection and Affordable Care Act): See ACA: Affordable Care Act.

Pre-Proposal Conference: A meeting scheduled for the purpose of providing clarification regarding a Request for Proposal and related expectations.

Product: A module, a system, or any other software-related item provided by the contractor to the State.

Program Error: Code in Licensed Software which produces unintended results or actions, or which produces results or actions other than those described in the specifications. A program error includes, without limitation, any "Critical Program Error."

Program Set: The group of programs and products, including the Licensed Software specified in the RFP, plus any additional programs and products licensed by the State under this contract for use by the State.

Project: The total of all software, documentation, and services to be provided by the contractor under this contract.

Proposal: The executed document submitted by a bidder in response to a Request for Proposal.

Proprietary Information: Proprietary information is defined as trade secrets, academic and scientific research work which is in progress and unpublished, and other information which if released would give advantage to business competitors and serve no public purpose (see Neb. Rev. Stat. §84-712.05(3)). In accordance with Attorney General Opinions 92068 and 97033, proof that information is proprietary requires identification of specific, named competitor(s) who would be advantaged by release of the information and the specific advantage the competitor(s) would receive.

Protest: A complaint about a governmental action or decision related to a Request for Proposal or the resultant contract, brought by a prospective bidder, a bidder, a contractor, or other interested party to AS Materiel Division or another designated agency with the intention of achieving a remedial result.

Public Proposal Opening: The process of opening proposals, conducted at the time and place specified in the Request for Proposal, and in the presence of anyone who wishes to attend.

Recommended Hardware Configuration: The data processing hardware (including all terminals, auxiliary storage, communication, and other peripheral devices) to the extent utilized by the State as

recommended by the contractor.

Release Date: Date of release of the Request for Proposal to the public for submission of proposal responses. Not to be confused with “Opening Date”.

Renewal: Continuance of a contract for an additional term after a formal signing by the parties.

Representative: Includes an agent, an officer of a corporation or association, a trustee, executor or administrator of an estate, or any other person legally empowered to act for another.

Request for Proposal (RFP): All documents, whether attached or incorporated by reference, utilized for soliciting competitive proposals.

Responsible Bidder: A bidder who has the capability in all respects to perform fully all requirements with integrity and reliability to assure good faith performance.

Responsive Bidder: A bidder who has submitted a bid which conforms in all respects to the solicitation document.

Seven Standards and Conditions for Enhanced Funding: The Centers for Medicare & Medicaid Services (CMS) issued standards and conditions that must be met by the states in order for Medicaid technology investments (including traditional claims processing systems, as well as eligibility systems) to be eligible for enhanced match funding.

Shall: Denotes the imperative, required, compulsory or obligatory.

Should: Indicates an expectation.

SOA (Service Oriented Architecture): A set of principles and methodologies for designing and developing software in the form of interoperable services. These services are well-defined business functionalities that are built as software components (discrete pieces of code and/or data structures) that can be reused for different purposes. SOA design principles are used during the phases of systems development and integration.

Solicitation: The process of notifying prospective bidders or offerors that the State of Nebraska wishes to receive proposals for furnishing services. The process may consist of public advertising, posting notices, or mailing Request for Proposals and/or Request for Proposal announcement letter to prospective bidders, or all of these.

Solicitation Document: Request for Proposal.

Specifications: The information provided by or on behalf of the contractor that fully describes the capabilities and functionality of the Licensed Software as set forth in any material provided by the contractor, including the documentation and User’s Manuals described herein.

System: Any collection or aggregation of two (2) or more Modules that is designed to function, or is represented by the contractor as functioning or being capable of functioning as an entity.

Termination: Occurs when either party pursuant to a power created by agreement or law puts an end to the contract. All obligations which are still executory on both sides are discharged but any right based on prior breach or performance survives.

Trademark: A distinguishing sign, symbol, mark, word, or arrangement of words in the form of a label

or other indication, that is adopted and used by a manufacturer or distributor to designate its particular goods and which no other person has the legal right to use.

Trade Secret: Information, including, but not limited to, a drawing, formula, pattern, compilation, program, device, method, technique, code, or process that; (a) derives independent economic value, actual or potential, from not being known to, and not being ascertainable by proper means, other persons who can obtain economic value from its disclosure or use; and (b) is the subject of efforts that are reasonable under the circumstances to maintain its secrecy (see Neb. Rev. Stat. §87-502(4)).

Upgrade: Any improvement or change in the Software that improves or alters its basic function.

Vendor: An actual or potential contractor; a contractor

Will: Denotes the imperative, required, compulsory or obligatory.

I. SCOPE OF THE REQUEST FOR PROPOSAL

The State of Nebraska, Administrative Services (AS), Materiel Division, Purchasing Bureau, is issuing this Request for Proposal, RFP Number 4468Z1 for the purpose of selecting a qualified contractor to provide Eligibility and Enrollment Solution (EES) Independent Verification and Validation (IV&V) Services.

The IV&V contractor awarded the IV&V contract for the EES project, their subcontractor(s) and vendor(s) are precluded from submitting an EES proposal, assisting another company in making a proposal, or otherwise materially participating in any subsequent contract related to the EES project.

A contract resulting from this Request for Proposal will be issued from the date of the award through December 31, 2015, with the option to renew for one (1) additional six-month period as mutually agreed upon by all parties.

ALL INFORMATION PERTINENT TO THIS REQUEST FOR PROPOSAL CAN BE FOUND ON THE INTERNET AT: <http://www.das.state.ne.us/materiel/purchasing/rfp.htm>

A. SCHEDULE OF EVENTS

The State expects to adhere to the tentative procurement schedule shown below. It should be noted, however, that some dates are approximate and subject to change.

	ACTIVITY	DATE/TIME
1.	Release Request for Proposal	August 16, 2013
2.	Last day to submit written questions	August 30, 2013
3.	State responds to written questions through Request for Proposal "Addendum" and/or "Amendment" to be posted to the Internet at: http://www.das.state.ne.us/materiel/purchasing/rfp.htm	September 6, 2013
4.	Proposal opening Location: Nebraska State Office Building State Purchasing Bureau 301 Centennial Mall South, Mall Level Lincoln, NE 68508	September 24, 2013 2:00 PM Central Time
5.	Review for conformance of mandatory requirements	September 24, 2013
6.	Evaluation period	September 25, 2013 To October 11, 2013
7.	"Oral Interviews/Presentations and/or Demonstrations" (if required)	October 11, 2013 To November 1, 2013
8.	Post "Letter of Intent to Contract" to Internet at: http://www.as.materielpurchasing@nebraska.gov/rfp.htm	November 4, 2013
9.	Performance bond submission	November 11, 2013
10.	Contract award	November 11, 2013
11.	Contractor start date	November 15, 2013

II. PROCUREMENT PROCEDURES

A. PROCURING OFFICE AND CONTACT PERSON

Procurement responsibilities related to this Request for Proposal reside with the State Purchasing Bureau. The point of contact for the procurement is as follows:

Name: Peter Kroll/Robert Thompson
Agency: State Purchasing Bureau
Address: 301 Centennial Mall South, Mall Level
Lincoln, NE 68508

OR

Address: P.O. Box 94847
Lincoln, NE 68509
Telephone: 402-471-2401
Facsimile: 402-471-2089
E-Mail: as.materielpurchasing@nebraska.gov

B. GENERAL INFORMATION

The Request for Proposal is designed to solicit proposals from qualified vendors who will be responsible for providing Eligibility and Enrollment Solution (EES) Independent Verification and Validation (IV&V) Services at a competitive and reasonable cost. Proposals that do not conform to the mandatory items as indicated in the Request for Proposal will not be considered.

Proposals shall conform to all instructions, conditions, and requirements included in the Request for Proposal. Prospective bidders are expected to carefully examine all documentation, schedules and requirements stipulated in this Request for Proposal, and respond to each requirement in the format prescribed.

A fixed-price contract will be awarded as a result of this proposal. In addition to the provisions of this Request for Proposal and the awarded proposal, which shall be incorporated by reference in the contract, any additional clauses or provisions required by the terms and conditions will be included as an amendment to the contract.

C. COMMUNICATION WITH STATE STAFF

From the date the Request for Proposal is issued until a determination is announced regarding the selection of the contractor, contact regarding this project between potential contractors and individuals employed by the State is restricted to only written communication with the staff designated above as the point of contact for this Request for Proposal.

Once a contractor is preliminarily selected, as documented in the intent to contract, that contractor is restricted from communicating with State staff until a contract is signed. Violation of this condition may be considered sufficient cause to reject a contractor's proposal and/or selection irrespective of any other condition.

The following exceptions to these restrictions are permitted:

1. written communication with the person(s) designated as the point(s) of contact for this Request for Proposal or procurement;
2. contacts made pursuant to any pre-existing contracts or obligations; and

3. state-requested presentations, key personnel interviews, clarification sessions or discussions to finalize a contract.

Violations of these conditions may be considered sufficient cause to reject a bidder's proposal and/or selection irrespective of any other condition. No individual member of the State, employee of the State, or member of the Evaluation Committee is empowered to make binding statements regarding this Request for Proposal. The buyer will issue any clarifications or opinions regarding this Request for Proposal in writing.

D. WRITTEN QUESTIONS AND ANSWERS

Any explanation desired by a bidder regarding the meaning or interpretation of any Request for Proposal provision must be submitted in writing to the State Purchasing Bureau and clearly marked "RFP Number 4468Z1; Eligibility and Enrollment Solution (EES) Independent Verification and Validation (IV&V) Services Questions". It is preferred that questions be sent via e-mail to as.materielpurchasing@nebraska.gov Questions may also be sent by facsimile to 402-471-2089, but must include a cover sheet clearly indicating that the transmission is to the attention of Buyer, showing the total number of pages transmitted, and clearly marked "RFP Number 4468Z1; Eligibility and Enrollment Solution (EES) Independent Verification and Validation (IV&V) Services Questions".

It is recommended that Bidders submit questions sequentially numbered, include the RFP reference and page number using the following format:

Question Number	RFP Section Reference	RFP Page Number	Question

Written answers will be provided through an addendum to be posted on the Internet at <http://das.nebraska.gov/materiel/purchasing/rfp.htm> on or before the date shown in the Schedule of Events.

E. ORAL INTERVIEWS/PRESENTATIONS AND/OR DEMONSTRATIONS

The Evaluation Committee(s) may conclude after the completion of the Technical and Cost Proposal evaluation that oral interviews/presentations and/or demonstrations are required in order to determine the successful bidder. All bidders may not have an opportunity to interview/present and/or give demonstrations; the State reserves the right to select only the top scoring bidders to present/give oral interviews in its sole discretion. The scores from the oral interviews/presentations and/or demonstrations will be added to the scores from the Technical and Cost Proposals. The presentation process will allow the bidders to demonstrate their proposal offering, explaining and/or clarifying any unusual or significant elements related to their proposals. Bidders' key personnel will be requested to participate in a structured interview to determine their understanding of the requirements of this proposal, their authority and reporting relationships within their firm, and their management style and philosophy. Bidders shall not be allowed to alter or amend their proposals. Only representatives of the State and the presenting bidders will be permitted to attend the oral interviews/presentations and/or demonstrations.

Once the oral interviews/presentations and/or demonstrations have been completed the State reserves the right to make a contract award without any further discussion with the bidders regarding the proposals received.

Detailed notes of oral interviews/presentations and/or demonstrations may be recorded and supplemental information (such as briefing charts, et cetera) may be accepted; however, such supplemental information shall not be considered an amendment to a bidders' proposal.

Additional written information gathered in this manner shall not constitute replacement of proposal contents.

Any cost incidental to the oral interviews/presentations and/or demonstrations shall be borne entirely by the bidder and will not be compensated by the State.

F. SUBMISSION OF PROPOSALS

The following describes the requirements related to proposal submission, proposal handling and review by the State.

To facilitate the proposal evaluation process, one (1) original, clearly identified as such, and six (6) hardcopies of the entire proposal should be submitted. The copy marked "original" shall take precedence over any other copies, should there be a discrepancy. Proposals must be submitted by the proposal due date and time. A separate sheet must be provided that clearly states which sections have been submitted as proprietary or have copyrighted materials. All proprietary information the bidder wishes the State to withhold must be submitted in accordance with the instructions outlined in Section III, Proprietary Information. Proposal responses should include the completed Form A, Bidder Contact Sheet. Proposals must reference the request for proposal number and be sent to the specified address. Container(s) utilized for original documents should be clearly marked "ORIGINAL DOCUMENTS". Please note that the address label should appear in Section II part A as specified on the face of each container or bidder's bid response packet. Rejected late proposals will be returned to the bidder unopened, if requested, at bidder's expense. If a recipient phone number is required for delivery purposes, 402-471-2089 should be used. The request for proposal number must be included in all correspondence.

Emphasis should be concentrated on conformance to the Request for Proposal instructions, responsiveness to requirements, completeness and clarity of content. If the bidder's proposal is presented in such a fashion that makes evaluation difficult or overly time consuming, it is likely that points will be lost in the evaluation process. Elaborate and lengthy proposals are neither necessary nor desired.

The Technical and Cost Proposals should be packaged separately (loose-leaf binders are preferred) on standard 8 ½" by 11" paper, except that charts, diagrams and the like may be on fold-outs which, when folded, fit into the 8 ½" by 11" format. Pages may be consecutively numbered for the entire proposal, or may be numbered consecutively within sections. Figures and tables must be numbered and referenced in the text by that number. They should be placed as close as possible to the referencing text. The Technical Proposal must not contain any reference to dollar amounts. However, information such as data concerning labor hours and categories, materials, subcontracts and so forth, shall be considered in the Technical Proposal so that the bidder's understanding of the scope of work may be evaluated. The Technical Proposal shall disclose the bidder's technical approach in as much detail as possible, including, but not limited to, the information required by the Technical Proposal instructions.

G. PROPOSAL OPENING

The sealed proposals will be publicly opened and the bidding entities announced on the date, time and location shown in the Schedule of Events. Proposals will be available for viewing by those present after the proposal opening. Vendors may also contact the State to schedule an appointment for viewing proposals after the opening date.

H. LATE PROPOSALS

Proposals received after the time and date of the proposal opening will be considered late proposals. Rejected late proposals will be returned to the bidder unopened, if requested, at bidder's expense. The State is not responsible for proposals that are late or lost due to mail service inadequacies, traffic or any other reason(s).

I. REJECTION OF PROPOSALS

The State reserves the right to reject any or all proposals, wholly or in part, or to award to multiple bidders in whole or in part. The State reserves the right to waive any deviations or errors that are not material, do not invalidate the legitimacy of the proposal and do not improve the bidder's competitive position. All awards will be made in a manner deemed in the best interest of the State.

J. EVALUATION OF PROPOSALS

All responses to this Request for Proposal which fulfill all mandatory requirements will be evaluated. Each category will have a maximum possible point potential. The State will conduct a fair, impartial and comprehensive evaluation of all proposals in accordance with the criteria set forth below. Areas that will be addressed and scored during the evaluation include:

1. Executive Summary;
2. Corporate Overview shall include but is not limited to;
 - a. the ability, capacity and skill of the bidder to deliver and implement the system or project that meets the requirements of the Request for Proposal;
 - b. the character, integrity, reputation, judgment, experience and efficiency of the bidder;
 - c. whether the bidder can perform the contract within the specified time frame;
 - d. the quality of bidder performance on prior contracts;
 - e. such other information that may be secured and that has a bearing on the decision to award the contract;
3. Technical Approach
 - a. Program Management/IV&V Project Plan
 - b. Deliverables Review and Acceptance
 - c. Quality Assurance
 - d. Contract Compliance
4. Cost Proposal.

Evaluation criteria will become public information at the time of the Request for Proposal opening. Evaluation criteria and a list of respondents will be posted to the Internet at: <http://www.das.state.ne.us/materiel/purchasing/rfp.htm>. Evaluation criteria will not be released prior to the proposal opening.

K. EVALUATION COMMITTEE

Proposals will be independently evaluated by members of the Evaluation Committee(s). The committee(s) will consist of staff with the appropriate expertise to conduct such proposal evaluations. Names of the members of the Evaluation Committee(s) will not become public information.

Prior to award, bidders are advised that only the point of contact indicated on the front cover of this Request For Proposal For Contractual Services Form can clarify issues or render any

opinion regarding this Request for Proposal. No individual member of the State, employee of the State or member of the Evaluation Committee(s) is empowered to make binding statements regarding this Request for Proposal.

L. MANDATORY REQUIREMENTS

The proposals will first be examined to determine if all mandatory requirements listed below have been addressed to warrant further evaluation. Proposals not meeting mandatory requirements will be excluded from further evaluation. The mandatory requirement items are as follows:

1. signed Request For Proposal For Contractual Services form in ink;
2. Executive Summary;
3. Corporate Overview;
4. Technical Approach; and
5. Cost Proposal.

M. REFERENCE CHECKS

The State reserves the right to check any reference(s), regardless of the source of the reference information, including but not limited to, those that are identified by the company in the proposal, those indicated through the explicitly specified contacts, those that are identified during the review of the proposal, or those that result from communication with other entities involved with similar projects.

Information to be requested and evaluated from references may include, but is not limited to, some or all of the following: project description and background, job performed, functional and technical abilities, communication skills and timeliness, cost and schedule estimates and accuracy, problems (poor quality deliverables, contract disputes, work stoppages, et cetera), overall performance, and whether or not the reference would rehire the firm or individual. Only top scoring bidders may receive reference checks and negative references may eliminate bidders from consideration for award.

N. SECRETARY OF STATE/TAX COMMISSIONER REGISTRATION REQUIREMENTS

All bidders shall be authorized to transact business in the State of Nebraska. All bidders are expected to comply with all Nebraska Secretary of State registration requirements. It is the responsibility of the bidder to comply with any registration requirements pertaining to types of business entities (e.g. person, partnership, foreign or domestic limited liability company, association, or foreign or domestic corporation or other type of business entity). The Bidder who is the recipient of an Intent to Award will be required to certify that it has so complied and produce a true and exact copy of its current (within 90 days), valid Certificate of Good Standing or Letter of Good Standing; or in the case registration is not required, to provide, in writing, the reason as to why none is required. This must be accomplished prior to the award of the contract. Construction contractors are expected to meet all applicable requirements of the Nebraska Contractor Registration Act and provide a current, valid certificate of registration. Further, all bidders shall comply with any and all other applicable Nebraska statutes regarding transacting business in the State of Nebraska. Bidders should submit the above certification(s) with their bid.

O. VIOLATION OF TERMS AND CONDITIONS

Violation of the terms and conditions contained in this Request for Proposal or any resultant contract, at any time before or after the award, shall be grounds for action by the State which may include, but is not limited to, the following:

1. rejection of a bidder's proposal;

2. suspension of the bidder from further bidding with the State for the period of time relative to the seriousness of the violation, such period to be within the sole discretion of the State.

III. TERMS AND CONDITIONS

By signing the "Request For Proposal For Contractual Services" form, the Bidder guarantees compliance with the provisions stated in this Request for Proposal, agrees to the terms and conditions and certifies bidder maintains a drug free work place environment.

Bidders are expected to closely read the Terms and Conditions and provide a binding signature of intent to comply with the Terms and Conditions; provided, however, a bidder may indicate any exceptions to the Terms and Conditions by (1) clearly identifying the term or condition by subsection, (2) including an explanation for the bidder's inability to comply with such term or condition which includes a statement recommending terms and conditions the bidder would find acceptable. Rejection in whole or in part of the Terms and Conditions may be cause for rejection of a bidder's proposal.

The Contractor awarded the IV&V contract for the EES project, their subcontractor(s) and vendor(s) are precluded from submitting an EES proposal, assisting another company in making a proposal, or otherwise materially participating in any subsequent contract related to the EES project.

A. GENERAL

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contract resulting from this Request for Proposal shall incorporate the following documents:

1. Amendment to Contract Award with the most recent dated amendment having the highest priority;
2. Contract Award and any attached Addenda;
3. The signed Request for Proposal form and the Contractor's Proposal;
4. Amendments to RFP and any Questions and Answers; and
5. The original RFP document and any Addenda.

These documents constitute the entirety of the contract.

Unless otherwise specifically stated in a contract amendment, in case of any conflict between the incorporated documents, the documents shall govern in the following order of preference with number one (1) receiving preference over all other documents and with each lower numbered document having preference over any higher numbered document: 1) Amendment to Contract Award with the most recent dated amendment having the highest priority, 2) Contract Award and any attached Addenda, 3) the signed Request for Proposal form and the Contractor's Proposal, 4) Amendments to RFP and any Questions and Answers, 5) the original RFP document and any Addenda.

Any ambiguity in any provision of this contract which shall be discovered after its execution shall be resolved in accordance with the rules of contract interpretation as established in the State of Nebraska.

Once proposals are opened they become the property of the State of Nebraska and will not be returned.

B. AWARD

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

All purchases, leases, or contracts which are based on competitive proposals will be awarded according to the provisions in the Request for Proposal. The State reserves the right to reject any or all proposals, wholly or in part, or to award to multiple bidders in whole or in part, and at its discretion, may withdraw or amend the Request for Proposal at any time. The State reserves the right to waive any deviations or errors that are not material, do not invalidate the legitimacy of the proposal, and do not improve the bidder's competitive position. All awards will be made in a manner deemed in the best interest of the State. The Request for Proposal does not commit the State to award a contract. If, in the opinion of the State, revisions or amendments will require substantive changes in proposals, the due date may be extended.

By submitting a proposal in response to this Request for Proposal, the bidder grants to the State the right to contact or arrange a visit in person with any or all of the bidder's clients.

Once an intent to award decision has been determined, it will be posted to the Internet at: <http://www.das.state.ne.us/materiel/purchasing/rfp.htm>

Grievance and protest procedure is available on the Internet at: <http://www.das.state.ne.us/materiel/purchasing/agencyervicesprocurementmanual/ProtestGrievanceProcedureForServices.doc>

Any protests must be filed by a vendor within ten (10) calendar days after the intent to award decision is posted to the Internet.

C. COMPLIANCE WITH CIVIL RIGHTS LAWS AND EQUAL OPPORTUNITY EMPLOYMENT / NONDISCRIMINATION

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contractor shall comply with all applicable local, State and Federal statutes and regulations regarding civil rights laws and equal opportunity employment. The Nebraska Fair Employment Practice Act prohibits contractors of the State of Nebraska, and their subcontractors, from discriminating against any employee or applicant for employment, with respect to hire, tenure, terms, conditions or privileges of employment because of race, color, religion, sex, disability, or national origin (Neb. Rev. Stat. §48-1101 to 48-1125). The contractor guarantees compliance with the Nebraska Fair Employment Practice Act, and breach of this provision shall be regarded as a material breach of contract. The contractor shall insert a similar provision in all subcontracts for services to be covered by any contract resulting from this Request for Proposal.

D. PERMITS, REGULATIONS, LAWS

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contractor shall procure and pay for all permits, licenses and approvals necessary for the execution of the contract. The contractor shall comply with all applicable local, state, and federal laws, ordinances, rules, orders and regulations.

E. OWNERSHIP OF INFORMATION AND DATA

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The State of Nebraska shall have the unlimited right to publish, duplicate, use and disclose all information and data developed or derived by the contractor pursuant to this contract.

The contractor must guarantee that it has the full legal right to the materials, supplies, equipment, and other rights or titles (e.g. rights to licenses transfer or assign deliverables) necessary to execute this contract. The contract price shall, without exception, include compensation for all royalties and costs arising from patents, trademarks and copyrights that are in any way involved in the contract. It shall be the responsibility of the contractor to pay for all royalties and costs, and the State must be held harmless from any such claims.

F. INSURANCE REQUIREMENTS

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contractor shall not commence work under this contract until he or she has obtained all the insurance required hereunder and such insurance has been approved by the State. If contractor will be utilizing any subcontractors, the contractor is responsible for obtaining the certificate(s) of insurance required herein under from any and all subcontractor(s). Contractor is also responsible for ensuring subcontractor(s) maintain the insurance required until completion of the contract requirements. The contractor shall not allow any subcontractor to commence work on his or her subcontract until all similar insurance required of the subcontractor has been obtained and approved by the contractor. Approval of the insurance by the State shall not limit, relieve or decrease the liability of the contractor hereunder.

If by the terms of any insurance a mandatory deductible is required, or if the contractor elects to increase the mandatory deductible amount, the contractor shall be responsible for payment of the amount of the deductible in the event of a paid claim.

1. WORKERS' COMPENSATION INSURANCE

The contractor shall take out and maintain during the life of this contract the statutory Workers' Compensation and Employer's Liability Insurance for all of the contractors' employees to be engaged in work on the project under this contract and, in case any such work is sublet, the contractor shall require the subcontractor similarly to provide Worker's Compensation and Employer's Liability Insurance for all of the subcontractor's employees to be engaged in such work. This policy shall be written to meet the statutory requirements for the state in which the work is to be performed, including Occupational Disease. This policy shall include a waiver of subrogation in favor of the State. The amounts of such insurance shall not be less than the limits stated hereinafter.

2. COMMERCIAL GENERAL LIABILITY INSURANCE AND COMMERCIAL AUTOMOBILE LIABILITY INSURANCE

The contractor shall take out and maintain during the life of this contract such Commercial General Liability Insurance and Commercial Automobile Liability Insurance as shall protect contractor and any subcontractor performing work covered by this contract from claims for damages for bodily injury, including death, as well as from claims for property damage, which may arise from operations under this contract, whether such operation be by the contractor or by any subcontractor or by anyone

directly or indirectly employed by either of them, and the amounts of such insurance shall not be less than limits stated hereinafter.

The Commercial General Liability Insurance shall be written on an occurrence basis, and provide Premises/Operations, Products/Completed Operations, Independent Contractors, Personal Injury and Contractual Liability coverage. The policy shall include the State, and others as required by the contract documents, as an Additional Insured. This policy shall be primary, and any insurance or self-insurance carried by the State shall be considered excess and non-contributory. The Commercial Automobile Liability Insurance shall be written to cover all Owned, Non-owned and Hired vehicles.

3. INSURANCE COVERAGE AMOUNTS REQUIRED

a. WORKERS' COMPENSATION AND EMPLOYER'S LIABILITY

Coverage A	Statutory
Coverage B	
Bodily Injury by Accident	\$100,000 each accident
Bodily Injury by Disease	\$500,000 policy limit
Bodily Injury by Disease	\$100,000 each employee

b. COMMERCIAL GENERAL LIABILITY

General Aggregate	\$2,000,000
Products/Completed Operations Aggregate	\$2,000,000
Personal/Advertising Injury	\$1,000,000 any one person
Bodily Injury/Property Damage	\$1,000,000 per occurrence
Fire Damage	\$50,000 any one fire
Medical Payments	\$5,000 any one person

c. COMMERCIAL AUTOMOBILE LIABILITY

Bodily Injury/Property Damage	\$1,000,000 combined single limit
-------------------------------	-----------------------------------

d. UMBRELLA/EXCESS LIABILITY

Over Primary Insurance	\$1,000,000 per occurrence
------------------------	----------------------------

4. EVIDENCE OF COVERAGE

The Contractor should furnish the State, with their proposal response, a certificate of insurance coverage complying with the above requirements, which shall be submitted to the Buyer, Administrative Services, State Purchasing Bureau, 301 Centennial Mall S, 1st Fl., Lincoln, NE 68508 (facsimile 402-471-2089). These certificates or the cover sheet shall reference the RFP number, and the certificates shall include the name of the company, policy numbers, effective dates, dates of expiration and amounts and types of coverage afforded. If the State is damaged by the failure of the contractor to maintain such insurance, then the contractor shall be responsible for all reasonable costs properly attributable thereto.

Notice of cancellation of any required insurance policy must be submitted to Buyer, Administrative Services, State Purchasing Bureau, 301 Centennial Mall S, 1st Fl., Lincoln, NE 68508 (facsimile 402-471-2089) when issued and a new coverage binder shall be submitted immediately to ensure no break in coverage.

G. COOPERATION WITH OTHER CONTRACTORS

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The State may already have in place or choose to award supplemental contracts for work related to this Request for Proposal, or any portion thereof.

- 1. The State reserves the right to award the contract jointly between two or more potential contractors, if such an arrangement is in the best interest of the State.
- 2. The contractor shall agree to cooperate with such other contractors, and shall not commit or permit any act which may interfere with the performance of work by any other contractor.

H. INDEPENDENT CONTRACTOR

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

It is agreed that nothing contained herein is intended or should be construed in any manner as creating or establishing the relationship of partners between the parties hereto. The contractor represents that it has, or will secure at its own expense, all personnel required to perform the services under the contract. The contractor's employees and other persons engaged in work or services required by the contractor under the contract shall have no contractual relationship with the State; they shall not be considered employees of the State.

All claims on behalf of any person arising out of employment or alleged employment (including without limit claims of discrimination against the contractor, its officers or its agents) shall in no way be the responsibility of the State. The contractor will hold the State harmless from any and all such claims. Such personnel or other persons shall not require nor be entitled to any compensation, rights or benefits from the State including without limit, tenure rights, medical and hospital care, sick and vacation leave, severance pay or retirement benefits.

I. CONTRACTOR RESPONSIBILITY

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contractor is solely responsible for fulfilling the contract, with responsibility for all services offered and products to be delivered as stated in the Request for Proposal, the contractor's proposal, and the resulting contract. The contractor shall be the sole point of contact regarding all contractual matters.

If the contractor intends to utilize any subcontractors' services, the subcontractors' level of effort, tasks and time allocation must be clearly defined in the contractor's proposal. The contractor shall agree that it will not utilize any subcontractors not specifically included in its proposal, in the performance of the contract, without the prior written authorization of the State. Following execution of the contract, the contractor shall proceed diligently with all services and shall perform such services with qualified personnel in accordance with the contract.

J. CONTRACTOR PERSONNEL

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contractor warrants that all persons assigned to the project shall be employees of the contractor or specified subcontractors, and shall be fully qualified to perform the work required

herein. Personnel employed by the contractor to fulfill the terms of the contract shall remain under the sole direction and control of the contractor. The contractor shall include a similar provision in any contract with any subcontractor selected to perform work on the project.

Personnel commitments made in the contractor's proposal shall not be changed without the prior written approval of the State. Replacement of key personnel, if approved by the State, shall be with personnel of equal or greater ability and qualifications.

The State reserves the right to require the contractor to reassign or remove from the project any contractor or subcontractor employee.

In respect to its employees, the contractor agrees to be responsible for the following:

1. any and all employment taxes and/or other payroll withholding;
2. any and all vehicles used by the contractor's employees, including all insurance required by state law;
3. damages incurred by contractor's employees within the scope of their duties under the contract;
4. maintaining workers' compensation and health insurance and submitting any reports on such insurance to the extent required by governing State law; and
5. determining the hours to be worked and the duties to be performed by the contractor's employees.

Notice of cancellation of any required insurance policy must be submitted to the State when issued and a new coverage binder shall be submitted immediately to ensure no break in coverage.

K. STATE OF NEBRASKA PERSONNEL RECRUITMENT PROHIBITION

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contractor shall not, at any time, recruit or employ any State employee or agent who has worked on the Request for Proposal or project, or who had any influence on decisions affecting the Request for Proposal or project.

L. CONFLICT OF INTEREST

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

By submitting a proposal, bidder certifies that there does not now exist any relationship between the bidder and any person or entity which is or gives the appearance of a conflict of interest related to this Request for Proposal or project.

The bidder certifies that it shall not take any action or acquire any interest, either directly or indirectly, which will conflict in any manner or degree with the performance of its services hereunder or which creates an actual or appearance of conflict of interest.

The bidder certifies that it will not employ any individual known by bidder to have a conflict of interest.

M. PROPOSAL PREPARATION COSTS

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The State shall not incur any liability for any costs incurred by bidders in replying to this Request for Proposal, in the demonstrations, or oral presentations, or in any other activity related to bidding on this Request for Proposal.

N. ERRORS AND OMISSIONS

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The bidder shall not take advantage of any errors and/or omissions in this Request for Proposal or resulting contract. The bidder must promptly notify the State of any errors and/or omissions that are discovered.

O. BEGINNING OF WORK

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The bidder shall not commence any billable work until a valid contract has been fully executed by the State and the successful contractor. The contractor will be notified in writing when work may begin.

P. ASSIGNMENT BY THE STATE

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The State shall have the right to assign or transfer the contract or any of its interests herein to any agency, board, commission, or political subdivision of the State of Nebraska. There shall be no charge to the State for any assignment hereunder.

Q. ASSIGNMENT BY THE CONTRACTOR

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contractor may not assign, voluntarily or involuntarily, the contract or any of its rights or obligations hereunder (including without limitation rights and duties of performance) to any third party, without the prior written consent of the State, which will not be unreasonably withheld.

R. DEVIATIONS FROM THE REQUEST FOR PROPOSAL

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The requirements contained in the Request for Proposal become a part of the terms and conditions of the contract resulting from this Request for Proposal. Any deviations from the Request for Proposal must be clearly defined by the bidder in its proposal and, if accepted by the State, will become part of the contract. Any specifically defined deviations must not be in conflict with the basic nature of the Request for Proposal or mandatory requirements. "Deviation", for the purposes of this RFP, means any proposed changes or alterations to either the contractual language or deliverables within the scope of this RFP. The State discourages deviations and reserves the right to reject proposed deviations.

S. GOVERNING LAW

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contract shall be governed in all respects by the laws and statutes of the State of Nebraska. Any legal proceedings against the State of Nebraska regarding this Request for Proposal or any resultant contract shall be brought in the State of Nebraska administrative or judicial forums as defined by State law. The contractor must be in compliance with all Nebraska statutory and regulatory law.

T. ATTORNEY'S FEES

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

In the event of any litigation, appeal or other legal action to enforce any provision of the contract, the contractor agrees to pay all expenses of such action, as permitted by law, including attorney's fees and costs, if the State is the prevailing party.

U. ADVERTISING

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contractor agrees not to refer to the contract award in advertising in such a manner as to state or imply that the company or its services are endorsed or preferred by the State. News releases pertaining to the project shall not be issued without prior written approval from the State.

V. STATE PROPERTY

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contractor shall be responsible for the proper care and custody of any State-owned property which is furnished for the contractor's use during the performance of the contract. The contractor shall reimburse the State for any loss or damage of such property, normal wear and tear is expected.

W. SITE RULES AND REGULATIONS

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contractor shall use its best efforts to ensure that its employees, agents and subcontractors comply with site rules and regulations while on State premises. If the contractor must perform on-site work outside of the daily operational hours set forth by the State, it must make arrangements with the State to ensure access to the facility and the equipment has been arranged. No additional payment will be made by the State on the basis of lack of access, unless the State fails to provide access as agreed to between the State and the contractor.

X. NOTIFICATION

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

During the bid process, all communication between the State and a bidder shall be between the bidder's representative clearly noted in its proposal and the buyer noted in Section II, A. Procuring Office and Contact Person of this RFP. After the award of the contract, all notices under the contract shall be deemed duly given upon delivery to the staff designated as the

point of contact for this Request for Proposal, in person, or upon delivery by U.S. Mail, facsimile, or e-mail. Each bidder should provide in its proposal the name, title and complete address of its designee to receive notices.

1. Except as otherwise expressly specified herein, all notices, requests or other communications shall be in writing and shall be deemed to have been given if delivered personally or mailed, by U.S. Mail, postage prepaid, return receipt requested, to the parties at their respective addresses set forth above, or at such other addresses as may be specified in writing by either of the parties. All notices, requests, or communications shall be deemed effective upon personal delivery or three (3) days following deposit in the mail.
2. Whenever the contractor encounters any difficulty which is delaying or threatens to delay its timely performance under the contract, the contractor shall immediately give notice thereof in writing to the State reciting all relevant information with respect thereto. Such notice shall not in any way constitute a basis for an extension of the delivery schedule or be construed as a waiver by the State of any of its rights or remedies to which it is entitled by law or equity or pursuant to the provisions of the contract. Failure to give such notice, however, may be grounds for denial of any request for an extension of the delivery schedule because of such delay.

Either party may change its address for notification purposes by giving notice of the change, and setting forth the new address and an effective date.

For the duration of the contract, all communication between contractor and the State regarding the contract shall take place between the contractor and individuals specified by the State in writing. Communication about the contract between contractor and individuals not designated as points of contact by the State is strictly forbidden.

Y. EARLY TERMINATION

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contract may be terminated as follows:

1. The State and the contractor, by mutual written agreement, may terminate the contract at any time.
2. The State, in its sole discretion, may terminate the contract for any reason upon 30 days written notice to the contractor. Such termination shall not relieve the contractor of warranty or other service obligations incurred under the terms of the contract. In the event of cancellation the contractor shall be entitled to payment, determined on a pro rata basis, for products or services satisfactorily performed or provided.
3. The State may terminate the contract immediately for the following reasons:
 - a. if directed to do so by statute;
 - b. contractor has made an assignment for the benefit of creditors, has admitted in writing its inability to pay debts as they mature, or has ceased operating in the normal course of business;
 - c. a trustee or receiver of the contractor or of any substantial part of the contractor's assets has been appointed by a court;

- d. fraud, misappropriation, embezzlement, malfeasance, misfeasance, or illegal conduct pertaining to performance under the contract by its contractor, its employees, officers, directors or shareholders;
- e. an involuntary proceeding has been commenced by any party against the contractor under any one of the chapters of Title 11 of the United States Code and (i) the proceeding has been pending for at least sixty (60) days; or (ii) the contractor has consented, either expressly or by operation of law, to the entry of an order for relief; or (iii) the contractor has been decreed or adjudged a debtor;
- f. a voluntary petition has been filed by the contractor under any of the chapters of Title 11 of the United States Code;
- g. contractor intentionally discloses confidential information;
- h. contractor has or announces it will discontinue support of the deliverable;
- i. second or subsequent documented "vendor performance report" form deemed acceptable by the State Purchasing Bureau.

Z. FUNDING OUT CLAUSE OR LOSS OF APPROPRIATIONS

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The State may terminate the contract, in whole or in part, in the event funding is no longer available. The State's obligation to pay amounts due for fiscal years following the current fiscal year is contingent upon legislative appropriation of funds for the contract. Should said funds not be appropriated, the State may terminate the contract with respect to those payments for the fiscal years for which such funds are not appropriated. The State will give the contractor written notice thirty (30) days prior to the effective date of any termination, and advise the contractor of the location (address and room number) of any related equipment. All obligations of the State to make payments after the termination date will cease and all interest of the State in any related equipment will terminate. The contractor shall be entitled to receive just and equitable compensation for any authorized work which has been satisfactorily completed as of the termination date. In no event shall the contractor be paid for a loss of anticipated profit.

AA. BREACH BY CONTRACTOR

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The State may terminate the contract, in whole or in part, if the contractor fails to perform its obligations under the contract in a timely and proper manner. The State may, by providing a written notice of default to the contractor, allow the contractor to cure a failure or breach of contract within a period of thirty (30) days (or longer at State's discretion considering the gravity and nature of the default). Said notice shall be delivered by Certified Mail, Return Receipt Requested or in person with proof of delivery. Allowing the contractor time to cure a failure or breach of contract does not waive the State's right to immediately terminate the contract for the same or different contract breach which may occur at a different time. In case of default of the contractor, the State may contract the service from other sources and hold the contractor responsible for any excess cost occasioned thereby.

BB. ASSURANCES BEFORE BREACH

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

If any document or deliverable required pursuant to the contract does not fulfill the requirements of the Request for Proposal/resulting contract, upon written notice from the State, the contractor shall deliver assurances in the form of additional contractor resources at

no additional cost to the project in order to complete the deliverable, and to ensure that other project schedules will not be adversely affected.

CC. PENALTY

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

In the event that the contractor fails to perform any substantial obligation under the contract, the State may withhold all monies due and payable to the contractor, without penalty, until such failure is cured or otherwise adjudicated. Failure to meet the dates stipulated in the contract for the deliverables may result in an assessment of penalty due the State of \$1000.00 dollars per day, until the deliverables are approved. Contractor will be notified in writing when penalty will commence.

DD. FORCE MAJEURE

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

Neither party shall be liable for any costs or damages resulting from its inability to perform any of its obligations under the contract due to a natural disaster, or other similar event outside the control and not the fault of the affected party (“Force Majeure Event”). A Force Majeure Event shall not constitute a breach of the contract. The party so affected shall immediately give notice to the other party of the Force Majeure Event. The State may grant relief from performance of the contract if the contractor is prevented from performance by a Force Majeure Event. The burden of proof for the need for such relief shall rest upon the contractor. To obtain release based on a Force Majeure Event, the contractor shall file a written request for such relief with the State Purchasing Bureau. Labor disputes with the impacted party’s own employees will not be considered a Force Majeure Event and will not suspend performance requirements under the contract.

EE. PROHIBITION AGAINST ADVANCE PAYMENT

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

Payments shall not be made until contractual deliverable(s) are received and accepted by the State.

FF. PAYMENT

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

State will render payment to contractor when the terms and conditions of the contract and specifications have been satisfactorily completed on the part of the contractor as solely determined by the State. Payment will be made by the responsible agency in compliance with the State of Nebraska Prompt Payment Act (See Neb. Rev. Stat. §81-2401 through 81-2408). The State may require the contractor to accept payment by electronic means such as ACH deposit. In no event shall the State be responsible or liable to pay for any services provided by the contractor prior to the Effective Date, and the contractor hereby waives any claim or cause of action for any such services.

GG. INVOICES

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

Invoices for payments must be submitted by the contractor to the agency requesting the services with sufficient detail to support payment. Invoices must be submitted to: Medicaid and Long-Term Care Division, P.O. Box 95026, Lincoln, NE 68509. The terms and conditions included in the contractor’s invoice shall be deemed to be solely for the convenience of the parties. No terms or conditions of any such invoice shall be binding upon the State, and no action by the State, including without limitation the payment of any such invoice in whole or in part, shall be construed as binding or estopping the State with respect to any such term or condition, unless the invoice term or condition has been previously agreed to by the State as an amendment to the contract.

HH. AUDIT REQUIREMENTS

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

All contractor books, records and documents relating to work performed or monies received under the contract shall be subject to audit at any reasonable time upon the provision of reasonable notice by the State. These records shall be maintained for a period of five (5) full years from the date of final payment, or until all issues related to an audit, litigation or other action are resolved, whichever is longer. All records shall be maintained in accordance with generally accepted accounting principles.

In addition to, and in no way in limitation of any obligation in the contract, the contractor shall agree that it will be held liable for any State audit exceptions, and shall return to the State all payments made under the contract for which an exception has been taken or which has been disallowed because of such an exception. The contractor agrees to correct immediately any material weakness or condition reported to the State in the course of an audit.

II. TAXES

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The State is not required to pay taxes of any kind and assumes no such liability as a result of this solicitation. Any property tax payable on the contractor's equipment which may be installed in a state-owned facility is the responsibility of the contractor.

JJ. INSPECTION AND APPROVAL

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

Final inspection and approval of all work required under the contract shall be performed by the designated State officials. The State and/or its authorized representatives shall have the right to enter any premises where the contractor or subcontractor duties under the contract are being performed, and to inspect, monitor or otherwise evaluate the work being performed. All inspections and evaluations shall be at reasonable times and in a manner that will not unreasonably delay work.

KK. CHANGES IN SCOPE/CHANGE ORDERS

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The State may, at any time with written notice to the contractor, make changes within the general scope of the contract. Changes in scope shall only be conducted with the written approval of the State’s designee as so defined by the State from time to time. (The State retains the right to employ the services of a third party to perform any change order(s)).

The State may, at any time work is in progress, by written order, make alterations in the terms of work as shown in the specifications, require the performance of extra work, decrease the quantity of work, or make such other changes as the State may find necessary or desirable. The contractor shall not claim forfeiture of contract by reasons of such changes by the State. Changes in work and the amount of compensation to be paid to the contractor for any extra work so ordered shall be determined in accordance with the applicable unit prices of the contractor’s proposal.

Corrections of any deliverable services or performance of work required pursuant to the contract shall not be deemed a modification requiring a change order.

LL. SEVERABILITY

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

If any term or condition of the contract is declared by a court of competent jurisdiction to be illegal or in conflict with any law, the validity of the remaining terms and conditions shall not be affected, and the rights and obligations of the parties shall be construed and enforced as if the contract did not contain the particular provision held to be invalid.

MM. CONFIDENTIALITY

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

All materials and information provided by the State or acquired by the contractor on behalf of the State shall be regarded as confidential information. All materials and information provided by the State or acquired by the contractor on behalf of the State shall be handled in accordance with Federal and State Law, and ethical standards. The contractor must ensure the confidentiality of such materials or information. Should said confidentiality be breached by a contractor; contractor shall notify the State immediately of said breach and take immediate corrective action.

It is incumbent upon the contractor to inform its officers and employees of the penalties for improper disclosure imposed by the Privacy Act of 1974, 5 U.S.C. 552a. Specifically, 5 U.S.C. 552a (i)(1), which is made applicable to contractors by 5 U.S.C. 552a (m)(1), provides that any officer or employee of a contractor, who by virtue of his/her employment or official position has possession of or access to agency records which contain individually identifiable information, the disclosure of which is prohibited by the Privacy Act or regulations established thereunder, and who knowing that disclosure of the specific material is prohibited, willfully discloses the material in any manner to any person or agency not entitled to receive it, shall be guilty of a misdemeanor and fined not more than \$5,000.

NN. PROPRIETARY INFORMATION

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

Data contained in the proposal and all documentation provided therein, become the property of the State of Nebraska and the data becomes public information upon opening the proposal. If the bidder wishes to have any information withheld from the public, such information must fall within the definition of proprietary information contained within Nebraska’s public record statutes. All proprietary information the bidder wishes the State to withhold must be submitted in a sealed package, which is separate from the remainder of the proposal. The separate package must be clearly marked PROPRIETARY on the outside of the package. Bidders may not mark their entire Request for Proposal as proprietary. Bidder’s cost proposals may not be marked as proprietary information. Failure of the bidder to follow the instructions for submitting proprietary and copyrighted information may result in the information being viewed by other bidders and the public. Proprietary information is defined as trade secrets, academic and scientific research work which is in progress and unpublished, and other information which if released would give advantage to business competitors and serve no public purpose (see Neb. Rev. Stat. §84-712.05(3)). In accordance with Attorney General Opinions 92068 and 97033, bidders submitting information as proprietary may be required to prove specific, named competitor(s) who would be advantaged by release of the information and the specific advantage the competitor(s) would receive. Although every effort will be made to withhold information that is properly submitted as proprietary and meets the State’s definition of proprietary information, the State is under no obligation to maintain the confidentiality of proprietary information and accepts no liability for the release of such information.

OO. CERTIFICATION OF INDEPENDENT PRICE DETERMINATION/COLLUSIVE BIDDING

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

By submission of this proposal, the bidder certifies, that he or she is the party making the foregoing proposal that the proposal is not made in the interest of, or on behalf of, any undisclosed person, partnership, company, association, organization, or corporation; that the proposal is genuine and not collusive or sham; that the bidder has not directly or indirectly induced or solicited any other bidder to put in a false or sham proposal, and has not directly or indirectly colluded, conspired, connived, or agreed with any bidder or anyone else to put in a sham proposal, or that anyone shall refrain from bidding; that the bidder has not in any manner, directly or indirectly, sought by agreement, communication, or conference with anyone to fix the proposal price of the bidder or any other bidder, or to fix any overhead, profit, or cost element of the proposal price, or of that of any other bidder, or to secure any advantage against the public body awarding the contract of anyone interested in the proposed contract; that all statements contained in the proposal are true; and further that the bidder has not, directly or indirectly, submitted his or her proposal price or any breakdown thereof, or the contents thereof, or divulged information or data relative thereto, or paid, and will not pay, any fee to any corporation, partnership, company association, organization, proposal depository, or to any member or agent thereof to effectuate a collusive or sham proposal.

PP. PRICES

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

All prices, costs, terms and conditions outlined in the proposal shall remain fixed and valid commencing on the opening date of the proposal until an award is made (and for bidder

receiving award prices shall remain as bid for the duration of the contract unless otherwise so stated in the contract) or the Request for Proposal is cancelled.

Contractor represents and warrants that all prices for services, now or subsequently specified are as low as and no higher than prices which the contractor has charged or intends to charge customers other than the State for the same or similar products and services of the same or equivalent quantity and quality for delivery or performance during the same periods of time. If, during the term of the contract, the contractor shall reduce any and/or all prices charged to any customers other than the State for the same or similar products or services specified herein, the contractor shall make an equal or equivalent reduction in corresponding prices for said specified products or services.

Contractor also represents and warrants that all prices set forth in the contract and all prices in addition, which the contractor may charge under the terms of the contract, do not and will not violate any existing federal, state or municipal law or regulations concerning price discrimination and/or price fixing. Contractor agrees to hold the State harmless from any such violation. Prices quoted shall not be subject to increase throughout the contract period unless specifically allowed by these specifications.

QQ. BEST AND FINAL OFFER

Accept (Initial) Reject (Initial) Reject and Provide Alternative within RFP Response (Initial)

The State will compile the final scores for all parts of each proposal. The award may be granted to the highest scoring responsive and responsible bidder. Alternatively, the highest scoring bidder or bidders may be requested to submit best and final offers. If best and final offers are requested by the State and submitted by the bidder, they will be evaluated (using the stated criteria), scored and ranked by the Evaluation Committee. The award will then be granted to the highest scoring bidder. However, a bidder should provide its best offer in its original proposal. Bidders should not expect that the State will request a best and final offer.

RR. ETHICS IN PUBLIC CONTRACTING

Accept (Initial) Reject (Initial) Reject and Provide Alternative within RFP Response (Initial)

No bidder shall pay or offer to pay, either directly or indirectly, any fee, commission compensation, gift, gratuity, or anything of value to any State officer, legislator or employee based on the understanding that the receiving person's vote, actions or judgment will be influenced thereby. No bidder shall give any item of value to any employee of the State Purchasing Bureau.

Bidders shall be prohibited from utilizing the services of lobbyists, attorneys, political activists, or consultants to secure the contract. It is the intent of this provision to assure that the prohibition of state contact during the procurement process is not subverted through the use of lobbyists, attorneys, political activists, or consultants. It is the intent of the State that the process of evaluation of proposals and award of the contract be completed without external influence. It is not the intent of this section to prohibit bidders from seeking professional advice, for example consulting legal counsel, regarding terms and conditions of this Request for Proposal or the format or content of their proposal.

If the bidder is found to be in non-compliance with this section of the Request for Proposal, they may forfeit the contract if awarded to them or be disqualified from the selection process.

SS. INDEMNIFICATION

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

1. GENERAL

The contractor agrees to defend, indemnify, hold, and save harmless the State and its employees, volunteers, agents, and its elected and appointed officials (“the indemnified parties”) from and against any and all claims, liens, demands, damages, liability, actions, causes of action, losses, judgments, costs, and expenses of every nature, including investigation costs and expenses, settlement costs, and attorney fees and expenses (“the claims”), sustained or asserted against the State, arising out of, resulting from, or attributable to the willful misconduct, negligence, error, or omission of the contractor, its employees, subcontractors, consultants, representatives, and agents, except to the extent such contractor liability is attenuated by any action of the State which directly and proximately contributed to the claims.

2. INTELLECTUAL PROPERTY

The contractor agrees it will at its sole cost and expense, defend, indemnify, and hold harmless the indemnified parties from and against any and all claims, to the extent such claims arise out of, result from, or are attributable to the actual or alleged infringement or misappropriation of any patent, copyright, trade secret, trademark, or confidential information of any third party by the contractor or its employees, subcontractors, consultants, representatives, and agents; provided, however, the State gives the contractor prompt notice in writing of the claim. The contractor may not settle any infringement claim that will affect the State’s use of the Licensed Software without the State’s prior written consent, which consent may be withheld for any reason.

If a judgment or settlement is obtained or reasonably anticipated against the State’s use of any intellectual property for which the contractor has indemnified the State, the contractor shall at the contractor’s sole cost and expense promptly modify the item or items which were determined to be infringing, acquire a license or licenses on the State’s behalf to provide the necessary rights to the State to eliminate the infringement, or provide the State with a non-infringing substitute that provides the State the same functionality. At the State’s election, the actual or anticipated judgment may be treated as a breach of warranty by the contractor, and the State may receive the remedies provided under this RFP.

3. PERSONNEL

The contractor shall, at its expense, indemnify and hold harmless the indemnified parties from and against any claim with respect to withholding taxes, worker’s compensation, employee benefits, or any other claim, demand, liability, damage, or loss of any nature relating to any of the personnel provided by the contractor.

TT. NEBRASKA TECHNOLOGY ACCESS STANDARDS

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

Contractor shall review the Nebraska Technology Access Standards, found at <http://nitc.nebraska.gov/standards/2-101.html> and ensure that products and/or services provided under the contract comply with the applicable standards. In the event such standards change during the contractor’s performance, the State may create an amendment to

the contract to request that contract comply with the changed standard at a cost mutually acceptable to the parties.

UU. ANTITRUST

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contractor hereby assigns to the State any and all claims for overcharges as to goods and/or services provided in connection with this contract resulting from antitrust violations which arise under antitrust laws of the United States and the antitrust laws of the State.

VV. DISASTER RECOVERY/BACK UP PLAN

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contractor shall have a disaster recovery and back-up plan, of which a copy should be provided to the State, which includes, but is not limited to equipment, personnel, facilities, and transportation, in order to continue services as specified under these specifications in the event of a disaster.

WW. TIME IS OF THE ESSENCE

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

Time is of the essence in this contract. The acceptance of late performance with or without objection or reservation by the State shall not waive any rights of the State nor constitute a waiver of the requirement of timely performance of any obligations on the part of the contractor remaining to be performed.

XX. RECYCLING

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

Preference will be given to items which are manufactured or produced from recycled material or which can be readily reused or recycled after their normal use as per state statute (Neb. Rev. Stat. §81-15, 159).

YY. DRUG POLICY

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

Contractor certifies that it maintains a drug free work place environment to ensure worker safety and workplace integrity. Contractor agrees to provide a copy of its drug free workplace policy at any time upon request by the State.

ZZ. NEW EMPLOYEE WORK ELIGIBILITY STATUS

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The Contractor is required and hereby agrees to use a federal immigration verification system to determine the work eligibility status of new employees physically performing services within the State of Nebraska. A federal immigration verification system means the electronic verification of the work authorization program authorized by the Illegal Immigration Reform and Immigrant Responsibility Act of 1996, 8 U.S.C. 1324a, known as the E-Verify Program, or an equivalent federal program designated by the United States Department of Homeland Security

or other federal agency authorized to verify the work eligibility status of a newly hired employee.

If the Contractor is an individual or sole proprietorship, the following applies:

1. The Contractor must complete the United States Citizenship Attestation Form, available on the Department of Administrative Services website at www.das.state.ne.us.
2. If the Contractor indicates on such attestation form that he or she is a qualified alien, the Contractor agrees to provide the US Citizenship and Immigration Services documentation required to verify the Contractor's lawful presence in the United States using the Systematic Alien Verification for Entitlements (SAVE) Program.
3. The Contractor understands and agrees that lawful presence in the United States is required and the Contractor may be disqualified or the contract terminated if such lawful presence cannot be verified as required by Neb. Rev. Stat. §4-108.

AAA. CERTIFICATION REGARDING DEBARMENT, SUSPENSION AND INELIGIBILITY

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contractor, by signature to this RFP, certifies that the contractor is not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded by any federal department or agency from participating in transactions (debarred). The contractor also agrees to include the above requirements in any and all subcontracts into which it enters. The contractor shall immediately notify the Department if, during the term of this contract, contractor becomes debarred. The Department may immediately terminate this contract by providing contractor written notice if contractor becomes debarred during the term of this contract.

IV. PROJECT DESCRIPTION AND SCOPE OF WORK

In March 2010, PPACA and the Health Care and Education Reconciliation Act of 2010 were signed into law. The two laws are collectively referred to as the Affordable Care Act (ACA). Sections of the ACA, codified at 42 CFR 431, 435, and 437, require the creation of a health insurance exchange in each state, either by the state or by the federal government. The State of Nebraska will employ the Federally Facilitated Marketplace (Marketplace) option.

An analysis was conducted by the Nebraska Department of Health and Human Services' (Department) to determine the most desirable option for meeting ACA compliance, and CMS Seven Standards and Conditions as defined in Medicaid IT Supplement (MITS-11-01-v1.0). The analysis revealed that replacing the current Medicaid eligibility and enrollment system with a modern solution was the best course of action given the project constraints. The same analysis revealed there was not enough time to procure and implement a solution by the ACA mandated deadline of October 1, 2013.

The purpose of this RFP is to select a Contractor who is responsible for performing Independent Verification and Validation (IV&V) services for implementing a new Eligibility and Enrollment Solution (EES). The Department plans to release an RFP to procure an Eligibility and Enrollment Solution. The RFP will procure the products and services of a Systems Integrator with an Eligibility and Enrollment Solution.

Nebraska's existing Eligibility and Enrollment System is almost twenty years old. The current system was developed with client/server technology. Nebraska intends to complete replacement of the existing Medicaid Eligibility and Enrollment System in order to access the enhanced federal matching funds for these legacy system replacements since the enhanced funding expires at the end of 2015.

The Department will award one Contractor to fulfill all the IV&V responsibilities described herein. The awarded IV&V Contractor shall review EES related artifacts defined by the Department to gain sufficient understanding of the EES project.

The IV&V services described in this RFP must comply with IV&V regulatory requirements detailed in 45 CFR 95.626, which requires that IV&V efforts be conducted by an entity that is independent. The IV&V contractor is required to:

1. Develop an IV&V Workplan. The plan must be provided directly to the Centers for Medicare and Medicaid (CMS) at the same time it is given to the Department.
2. Review and make recommendations on both the management of the EES project (Department and Contractor), and the technical aspects of the project. The IV&V Contractor must provide the results of its analysis directly to CMS at the same time it reports to the State.
3. Consult with all stakeholders and assess the user involvement and buy-in regarding system functionality and the system's ability to support program business needs.
4. Conduct an analysis of past project performance sufficient to identify and make recommendations for improvement.
5. Provide EES risk management assessment.
6. Develop EES performance metrics which allow tracking project completion against milestones set by the Department.

The bidder must provide the following information in response to this Request for Proposal.

A. PROJECT OVERVIEW

The purpose of this procurement is to contract for the IV&V services to assist the Department to ensure the success of the EES project by facilitating early detection and correction of errors, enhance management insight into risks and ensure compliance with project performance, schedule, and budget requirements. The Information Systems and Technology (IS&T) Division provides leadership, project management, planning, implementation, and support services for information technology for the Department. IS&T will provide support for the project, including the technical planning, implementation, testing and maintenance of the new solution.

The Department is seeking proposals from qualified bidders with IV&V expertise, project management expertise, and relevant past experience performing IV&V work for Medicaid eligibility determination systems similar to the system that will be developed for the State.

The Department seeks an IV&V contractor who will bring project personnel, processes, approaches and tools to meet the requirements of the IV&V services for the EES Project.

The IV&V scope of work includes:

1. Program Management
2. Deliverables Review and Acceptance
3. Quality Assurance
4. Contract Compliance

The contractor awarded the IV&V contract for the EES project, their subcontractor(s) and vendor(s) are precluded from submitting an EES proposal, assisting another company in making a proposal, or otherwise materially participating in any subsequent contract related to the EES project.

B. PROJECT REQUIREMENTS

The IV&V Contractor will perform all IV&V responsibilities defined in this RFP throughout the life of the contract including the optional renewal period. The IV&V Contractor is expected to actively participate in meetings and to contribute IV&V expertise to all phases of the EES Project to ensure that the EES Contractor activities result in successful project completion.

The IV & V project requirements are outlined in the following sections. The tasks and activities within this section are not necessarily listed in the order that they should be completed. Bidders must reflect within their proposal and preliminary project plan their recommended approach to scheduling and accomplishing the tasks and activities identified within this RFP.

1. PROGRAM MANAGEMENT

Perform a review of IV&V project activities for the EES Project which shall be documented and submitted in the appropriate Management Briefing, EES Management, Project Status or Deliverable Review Report. Activities shall include but not be limited to:

- a. Delivery of an Initial Project Assessment Report that includes the initial status of each activity shown on the IV&V Management Plan for the EES project.
- b. A review of the EES Contractor's analysis of risk areas of the implementation of the EES Component and the risk mitigation plan for those identified risks. The IV&V Contractor shall include recommendations for any deficiencies it finds during its review of the risk mitigation plans. The results and recommendation

of the analysis shall be written and presented as part of the Risk Assessment Report.

- c.** Hosting the Monthly Management Briefings at times approved by the Department.
- d.** Attendance at all status meetings between the Department and the EES Contractor, which will occur on at least a monthly basis and may occur more regularly based on the phase and stage of the implementation of the EES.
- e.** Assessment of the methodology for maintaining requirements traceability throughout the transfer and development process.
- f.** A review all MITA documentation, guidance and rules promulgated by CMS..
- g.** A review all ACA Regulations documentation, guidance and rules promulgated by CMS.
- h.** Notification to the Department if any MITA documentation, guidance and rules, or any changes to those items, will impact the implementation of any EES Component or the work performed by any EES Contractor.
- i.** Notification to the Department if any ACA Regulation documentation, guidance and rules, or any changes to those items, will impact the implementation of any EES Component or the work performed by any EES Contractor.
- j.** Performance of program management services for all EES activities. These program management services shall include, at a minimum, all of the following:
 - i.** Assess the progress of the implementation of the entire EES project, and recommend improvements as necessary.
 - ii.** Verify that lines of reporting and associated responsibility within the EES Contractor to ensure adequate technical and managerial oversight of the project.
 - iii.** Verify the EES Contractor and the State are not independently duplicating effort toward the same end.
 - iv.** Evaluate project progress, resources, budget, schedules, work flow and reporting.
 - v.** Verify the EES Contractor has created a project management plan and that the EES Contractor is following the approved project management plan.
 - vi.** Evaluate the project management plans and procedures to verify that they are developed, communicated, implemented, monitored and complete.
 - vii.** Evaluate project reporting plan and actual project reports to verify project status is accurately traced using project metrics.
 - viii.** Verify milestones and completion dates contained in the EES Contractor's project management plan and contract are planned, monitored and met.
 - ix.** Verify the EES Contractor has created and implemented an appropriate project issue tracking mechanism that documents issues as they arise, enables communication of issues to proper stakeholders, documents a mitigation strategy as appropriate, and tracks the issue to closure.
 - x.** Evaluate the EES Contractor's planned life-cycle development methodology or methodologies (e.g. waterfall, evolutionary spiral, rapid prototyping, or incremental) to see if they are appropriate for the EES component that EES Contractor is developing.
 - xi.** Verify that all business process reengineering recommendations are strategic, have management backing, resources, skills and incentives necessary for effective change.

- xii. Verify that the EES Contractor has a change management plan and that the change management plan and procedures to verify them are developed, communicated, implemented, monitored and complete.
 - xiii. Verify that the EES Contractor has a communication plan and that that plan is being followed.
 - xiv. Evaluate the EES Contractor's communication plans and procedures to verify that they support communications and work product sharing between all project stakeholders and that the communication plans and strategies are effective, implemented, monitored and complete.
- k. Manage the identification, resolution and tracking of stakeholder concerns, both internal and external.
 - l. All documentation and deliverables produced in the performance by the IV&V Contractor must be stored in a central repository to be designated by the Department.

2. DELIVERABLE REVIEW AND ACCEPTANCE

As part of the Deliverable Review Report, the IV&V Contractor shall assess the EES Deliverables based upon quality attributes including:

- a. Adherence to Requirements;
- b. Clarity;
- c. Completeness;
- d. Consistency;
- e. Traceability: and
- f. Adherence to laws, rules and guideline.

Deliverable review shall be performed by identified IV&V resources that are experienced and/or certified in the related technical, functional, and federal requirements of the deliverable under review, and comments shall be submitted to Department as part of the Deliverable Review Report within a timeframe that allows inclusion of IV&V feedback in Department's response to the EES Contractor.

The IV&V Contractor shall perform the following Deliverable Review and Acceptance tasks:

- a. Develop and submit a Performance Metrics Document to track project completion against milestones set by the Department using Department approved performance metrics.
- b. Review each deliverable and report submitted by the EES Contractor, as directed by the Department, for content, quality and timeliness.
- c. Notify the Department of any EES Contractor submitted management reports that do not contain the content required for that report, are of not sufficient quality or were not submitted in a timely manner.
- d. Participate in walk-through of EES Contractor deliverables as requested by the Department.
- e. Assess each reviewed deliverable and recommend a corrective action plan for each deliverable that fails to achieve the standards or timelines in that EES Contractor's contract with the Department.
- f. The IV&V Contractor will work with the Department to define criteria for a Critical Incident which could adversely affect the outcome of the EES Project.

- g.** Notify the Department immediately when the IV&V Contractor discovers any Critical Incident. Provide an EES Contractor Critical Incident Report for each Critical Incident that summarizes the incident, how it may affect the project, notes any discrepancies found by the IV&V Contractor and provides a proposed action plan to resolve the incident and mitigate its impact.

3. QUALITY ASSURANCE

The IV&V Contractor shall perform the following Quality Assurance tasks:

- a.** Write and verbally present Management Briefings on a monthly basis regarding the performance of the EES Contractor and the monitoring performed by the IV&V Contractor. This Management Briefing shall include, at a minimum, all of the following:

 - i.** The current general status of the EES Contractor in relation to the EES Contractor's work plans and implementation plans.
 - ii.** Any flaws or issues with the system design for each EES Component that may negatively impact the implementation of the EES with recommendations to mitigate or eliminate those flaws or issues.
 - iii.** Any flaws or issues regarding system security for each EES component that may negatively impact the implementation of the EES with recommendations to mitigate or eliminate those flaws or issues.
 - iv.** The results of any system testing or retesting performed during the prior month and recommendations on how to resolve any flaws or issues identified as a result of that system testing or retesting.
 - v.** Any flaws or issues with the interfaces within each EES Component, between each of the EES Components or between the EES Components and external systems that may negatively impact the implementation of the EES with recommendations to mitigate or eliminate those flaws or issues.
 - vi.** Any delays or issues with the transition from the Department's current Eligibility and Enrollment System to any EES Contractor and recommendations to mitigate or eliminate those delays or issues.
 - vii.** The results of all acceptance testing performed during the prior month and recommendations on how to resolve any flaws or issues identified as a result of that testing.
 - viii.** The status of the overall implementation and operation of each EES Component and any flaws or issues that are negatively impacting the operation of any EES Component with recommendations on how to resolve those issues or flaws.
 - ix.** Any recommendations regarding training provided by the EES Contractor to system users.
 - x.** Any recommendations regarding the EES Contractors' progress and procedures for managing requirements.
 - xi.** Any recommendations regarding each EES Contractor's policies and procedures for ensuring that each EES Component is secure and that the privacy of Client data is maintained.

4. CONTRACT COMPLIANCE

The IV&V Contractor shall perform the following EES Contract Compliance tasks which shall be documented and submitted in the appropriate Management Briefing, EES Management, Project Status or Deliverable Review Report:

- a.** As part of developing and submitting the Estimating and Schedule Review Recommendation Report evaluate and make recommendations on the estimating and scheduling process of the EES Project to ensure that the project budget and EES resources are adequate for the work break-down structure and schedule.
- b.** Review EES schedules to verify that adequate time and resources are assigned for planning, development, review, testing and rework.
- c.** Perform ongoing assessments of EES Contractor staffing, which include key and non-key personnel, to ensure adequate staffing for the EES Contractor to comply with their contract and maintain service levels defined throughout the EES contract.
- d.** Examine the job assignments, skills, training and experience of the EES Contractor personnel involved in program development to verify that they are adequate for the development task.
- e.** Verify that the EES Contractor's organizational structure supports training, process definition, independent Quality Assurance, Configuration Management, product evaluation, and any other functions critical for the project's success.
- f.** Monitor the performance of the EES Contractor to ensure that EES Contractor is in compliance with its contract with the Department and that the solution that EES Contractor is developing meets all requirements of its contract with the Department. This shall include, but is not limited to, monitoring all of the following:
 - i.** EES Contractor work plans.
 - ii.** EES Contractor implementation plans.
 - iii.** General Solution design for each EES Component.
 - iv.** Detailed Solution design for each EES Component.
 - v.** Solution security for each EES Component.
 - vi.** Solution testing for each EES Component.
 - vii.** EES Contractor transition from the Department's existing NE Eligibility and Enrollment System.
 - viii.** Acceptance Testing for each EES Component.
- g.** The IV&V Contractor shall evaluate the EES Contractor's progress and procedures for managing requirements. This shall include at minimum all of the following:
 - i.** Verify that system requirements are well-defined, understood and documented.
 - ii.** Verify that software requirements can be traced through design, code and test phases to verify that the system performs as intended and contains no unnecessary software elements.
 - iii.** Verify that requirements are under formal configuration control.
 - iv.** Evaluate on the EES Contractor's policies and procedures for ensuring that each EES Component is secure and that the privacy of Client data is maintained. This shall include all of the following:

- a) Evaluate the restrictions on system and data access.
 - b) Evaluate the system security plan to ensure it meets Department standards.
- v. Verify that EES processes and equipment are in place to back up client and project data files and archive them safely at appropriate levels.
- vi. The IV&V Contractor shall verify that the EES Contractor has performed an adequate requirements analysis for that EES Contractor's deliverables. This shall include a verification of all of the following:
 - a) An analysis of client, State, and Federal needs and objectives has been performed to verify that requirements of the system are well understood, well defined and satisfy federal regulations.
 - b) All stakeholders have been consulted to the desired functionality of the system, and that users have been involved in prototyping of the user interface.
- vii. All stakeholders have bought-in to all changes with impact project objectives, cost and schedule.
- viii. EES Performance requirements satisfy user needs.
- ix. User's maintenance requirements for the system are completely specified.
- h. The IV&V Contractor shall verify that the EES Contractor has described all system interfaces for each EES Component exactly, by medium and by function, including input/output control codes, data format, polarity, range, units and frequency. The IV&V Contractor shall also verify that all approved interface documents are available and that appropriate relationships are in place with all agencies and organizations supporting the interfaces.
- i. The IV&V Contractor shall verify that there is a well-defined plan for transferring data from the legacy system to the new EES.

5. EES SOFTWARE DEVELOPMENT

The IV&V Contractor shall evaluate both the high level and detailed design of any custom software developed or used by the EES Contractor for any EES component. The Design and Analysis Review Report shall include at minimum all of the following:

- a. Evaluate all high-level design products to verify the design is workable, efficient, and satisfies all system and system interface requirements.
- b. Evaluate all detail design products to verify that the design is workable, efficient, and satisfies all high level design requirements.
- c. Evaluate the design products for adherence to the project design methodology and standards.
- d. Evaluate the design and analysis process used to develop the design and make recommendations for improvements.
- e. Evaluate design standards, methodology and CASE tools used.
- f. Verify that design requirements can be traced back to system requirements.
- g. Verify that all design products are under configuration control and formally approved before detailed design begins.
- h. Verify that all design products are under configuration control and formally approved before coding begins.

- i. The IV&V Contractor shall evaluate the plans, requirements, environment, tools, and procedures used for unit testing system modules as well as the level of test automation, interactive testing, and interactive debugging available in the test environment.
- j. The IV&V Contractor shall review all unit testing to ensure that an appropriate level of test coverage was achieved by the test process, that test results were verified, that the correct code configuration was tested, and that the tests were appropriately documented. The IV&V Contractor shall develop and submit a Unit Testing Review Report documenting the results of all unit testing reviews and evaluations.

6. SYSTEM TESTING

The IV&V Contractor shall review all system testing performed on each EES component and submit all findings as part of the Management Briefing, Unit Testing or Critical Incident Reports. This review shall include the following:

- a. Assess planned testing activities, results reporting, and error correction/resolution, including an appropriate change control and configuration management process, to include all of the following:
 - i. Assess test efforts and schedules are based on defined requirements priorities as well as project risk.
 - ii. Assess test scenarios address the testable requirements.
 - iii. Assess specific business cases and test verification efforts for each case has been defined.
 - iv. Conduct reviews of testing to ensure that critical elements of the EES are stable and comply with Department requirements as detailed in the Department's contract with the EES Contractor.
 - v. Evaluate the plans, requirements, environment, tools, and procedures used for system testing.
 - vi. Evaluate the level of automation and the availability of the system test environment.
- b. Verify that an appropriate level of test coverage is achieved by the test process, that test results are verified, that the correct code configuration has been tested, and that the tests are appropriately documented, including formal logging of errors found in testing.
- c. Verify that the individuals conducting the test have an appropriate level of independence from those completing the development.
- d. Verify that a sufficient number and type of case scenarios are used to ensure comprehensive but manageable testing and those tests are run in a realistic, real-time environment.
- e. Verify that test scripts are complete, with step-by-step procedures, required pre-existing events or triggers and expected results.

7. DATA MANAGEMENT

The IV&V Contractor shall evaluate the EES Contractors' proposed plans, procedures and software for data conversion and submit a Data Conversion Process Review Report. This evaluation shall include, at a minimum, all of the following:

- a. Verify that procedures are in place and are being followed to review the completed data for completeness and accuracy and to perform data clean-up as required.
- b. As part of developing the Data Conversion Error Report, determine conversion error rates and if the error rates are manageable.
- c. Make recommendations on the conversion process to make it more efficient and on maintain the integrity of data during the conversion.
- d. The IV&V Contractor shall evaluate all EES Contractor database designs and system processes/workflows to determine if they meet system requirements contained in the EES Contractor's contract with the Department. This shall include an evaluation of all of the following:
 - i. The design for maintainability, scalability, refresh-ability, concurrence, normalization and any other factors affecting performance and data integrity.
 - ii. The process for administering the database, including backup, recovery, performance analysis and control of data item creation.

C. BUSINESS REQUIREMENTS

The IV&V Contractor shall develop a comprehensive Project Management Plan (IV&V Project Management Plan) for Department approval, and shall manage and carry out the IV&V services in accordance with the IV&V Project Management Plan. The IV&V Project Management Plan (PMP) must include at a minimum the following elements:

1. Description of how the IV&V Contractor plans to carry out the IV&V services. This description should include methodologies, strategies, standards, and approaches employed by the IV&V Contractor for executing each of the IV&V activities within this Scope of Work.
2. High level IV&V services schedule which aligns with the EES Master Project Schedule.
3. Detailed schedule that includes activities, tasks, task work effort estimates, estimated start and end dates, durations, deliverables, and assigned resources.. Coordinate and align the IV&V deliverable schedule with the Department and the EES Contractors.
4. Organizational structure which reflects, among other things, the need to coordinate activities among the Department, IV&V, and EES Contractor.
5. Description of resources assigned to activities, tasks and the IV&V deliverable creation.
6. Assigned personnel dedicated to the IV&V reviews on the EES project.
7. Description of the deliverables produced as a result of IV&V activities.

The IV&V Contractor shall perform ongoing program monitoring activities and shall review and validate issues/deficiencies/risks identified with the Department Project Management Team and the EES Contractor. Project monitoring tasks include but are not limited to:

1. Review and validate all project work plans and schedules, including staffing levels.
2. Develop and submit an EES Project Status and Milestone Report to monitor all project milestones and costs.
3. Perform ongoing assessments of project staffing levels (key and non-key personnel) and report on the ability to meet project schedule and milestones.
4. Provide Risk Assessment Reports for all project risks, with proposed mitigation strategies.
5. Monitor the Department's ACA project management office practices, processes and deliverables.

The IV&V Contractor shall conduct verification and validation reviews of the quality and completeness of critical path deliverables produced by the awarded contractor for the EES Project to help ensure they meet the requirements and expectations of the Department, CMS, and internal and external stakeholders.

D. SCOPE OF WORK

The following Scope of Work sections focus on the key IV&V activities and requirements for the Eligibility and Enrollment Solution project. Specifically:

1. Program Management - Oversight and acceptance of PMP Deliverables, Executive Committee Participation and Monthly Status Reporting
2. Deliverables Review and Acceptance
3. Quality Assurance
4. Contract Compliance

E. EES TECHNOLOGY REVIEW

The IV&V Contractor shall develop and submit a Technical Recommendations Report as part of performing the following defined EES Technology Review tasks:

1. EES Operating Environment

The IV&V Contractor will evaluate each EES Component for all of the following:

- a. System hardware configurations to determine if their performance is adequate to meet proposed system requirements as defined in the EES contract.
- b. Compatibility with the State's existing processing environment, if it is maintainable, and if it is easily upgradeable. This evaluation will include, but is not limited to Central Processing Units (CPUs) and other processors, memory, network connections, and bandwidth, communication controllers, telecommunications systems (Local Area Network/Wide Area Network [LAN/WAN]), terminals, printers, and storage devices.
- c. System software to determine if its capabilities are adequate to meet proposed system requirements.
- d. Whether the software is maintainable and easily upgradeable.
- e. Projected service provider support of the hardware and software.
- f. Database products to determine if their capabilities are adequate to meet proposed system requirements.
- g. The database's data format to determine if it is easily convertible to other formats, if it supports the addition of new data items, if it is scalable, if it is easily refreshable and if it is compatible with the State's existing hardware and software, including any on-line transaction processing environment.
- h. Processing capacity of the system to determine if it is adequate for current statewide needs for both batch and on-line processing.
- i. The system's capacity to support future growth.

The Contractor shall make recommendations on changes in processing hardware, storage, network systems, operating systems, consumer off the shelf software, and software design to meet future growth and improve system performance.

F. PROJECT PLANNING AND MANAGEMENT

The IV&V Contractor shall ensure that staff attending meetings between the Department and the IV&V Contractor has the authority to represent and commit the IV&V Contractor regarding work planning, problem resolution and program development.

At the Department's direction, the Contractor shall make its Key Personnel and other personnel assigned to the Contract available to attend meetings as subject matter experts with stakeholders both within the State government and external or private stakeholders. The IV&V Contractor shall be present at all scheduled status meetings between the Department and EES Vendor, unless the Department provides permission otherwise.

All of the IV&V Contractor's personnel that attend any meeting with the Department or other Department stakeholders shall be physically present at the location of the meeting, unless the Department gives prior, written permission to attend by telephone or video conference. In the event that the Contractor has any personnel attend by telephone or video conference and are the only entity not at the location of the meeting, the IV&V Contractor shall be responsible for providing the conference line or virtual meeting place.

The IV&V Contractor shall respond to all telephone calls, voicemails and emails from the Department within one (1) Business Day of receipt by the IV&V Contractor.

G. DELIVERABLES

The IV&V Contractor must provide the deliverables required by CMS and defined in the IV&V activities.

1. THE IV&V DELIVERABLES INCLUDE

- a. Initial Project Assessment Report
- b. IV&V Project Management Plan
- c. IV&V Project Status Report
- d. IV&V Project Schedule
- e. Performance Standards Planning Document
- f. Performance Metrics Document
- g. Monthly Management Briefing Report
- h. Risk Assessment Report
- i. EES Estimating and Schedule Review Recommendations Report
- j. EES Deliverable Review Report
- k. Critical Incident Report
- l. EES Project Milestone and Cost Status Report
- m. EES Estimating and Schedule Review Recommendations Report
- n. EES Design and Analysis Review Report
- o. Unit Testing Review Report
- p. EES Technical Recommendations Report
- q. Data Conversion Process Review Report
- r. Data Conversion Error Report

Once the detailed IV&V Project Plan is approved by the Department, the following sections detail the process for submission and review of deliverables during the life of the project/contract.

The IV&V Contractor must provide one electronic copy of each deliverable to the appropriate Department Project manager as identified in the contract. Once a deliverable is approved and

accepted by Department, the IV&V Contractor must upload an electronic copy into the designated Department SharePoint site.

Deliverables will be evaluated by the Department utilizing mutually agreed to acceptance/exit criteria.

2. DELIVERABLE SUBMISSION

Prior to development and submission of Department specified contract deliverable, a Deliverables Expectations Document (DED) containing a description of the format and content of each deliverable will be delivered to the Department for review and approval. The DED must contain, at a minimum, the following:

- a. Cover letter;
- b. Table of Contents with a brief description of the content of each section;
- c. Anticipated number of pages; and
- d. Identification of appendices/exhibits

The DED must contain an approval/rejection section that can be completed by the Department. The summary document will be returned to the IV&V Contractor within a mutually agreed upon time frame. Deliverables must be developed by the IV&V Contractor according to the approved format and content of the summary document for each specific deliverable.

At a mutually agreed to meeting, on or before the time of delivery to Department, the IV&V Contractor must provide a walkthrough of each IV&V deliverable. IV&V Deliverables must be submitted no later than 5:00 PM CST, per the approved contract deliverable schedule and must be accompanied by a deliverable sign-off form with the appropriate sections completed by the IV&V Contractor.

3. DELIVERABLE REVIEW

The Department's review time begins on the next business day following receipt of the deliverable. The Department's review time will be determined by the approved and accepted detailed project plan and the approved contract. The Department has up to five (5) working days to determine if a deliverable is complete and ready for review. Unless otherwise negotiated, this is part of the Department's review time.

Any subsequent deliverable dependent upon the Department's acceptance of a prior deliverable will not be accepted for review until all issues related to the previous deliverable have been resolved. Deliverables determined to be incomplete and/or unacceptable for review will be rejected, not considered delivered and returned to the IV&V Contractor. After review of a deliverable, the Department will return to the IV&V Contractor the project deliverable sign-off form with the deliverable submission and review history section completed.

4. DELIVERABLES ACCEPTANCE

If the deliverable is accepted, the original deliverable sign-off form signed by the appropriate Department representatives will be returned to the Contractor.

Comments/Revisions Requested by the State

If the Department has comments and/or revisions to a deliverable, the following will be provided to the IV&V Contractor:

- a. The original deliverable sign-off form with an updated entry to the deliverable submission and review history section.
- b. Attached to the deliverable sign-off form will be a detailed explanation of the revisions to be made and/or a marked up copy of the deliverable.
- c. The Department's first review and return with comments will be completed within the times specified in the contract.
- d. The IV&V Contractor will have five (5) working days, unless otherwise mutually agreed to, for review, acceptance and/or rejection of the Department's comments.

A meeting to resolve outstanding issues must be completed within three (3) business days after completion of the IV&V Contractor's review or a mutually agreed upon time frame. Agreements made during meetings to resolve issues must be documented separately. Once an agreement is reached regarding changes, the IV&V Contractor must incorporate them into the deliverable for resubmission to the Department. All changes must be easily identifiable by the Department.

Resubmission of the deliverable must occur within five (5) business days or a mutually agreed upon time frame of the resolution of any outstanding issues. The resubmitted deliverable must be accompanied by the original deliverable sign-off form. This review process continues until all issues have been resolved within a mutually agreed upon time frame.

During the re-review process, the Department will only comment on the original exceptions noted. All other items not originally commented on are considered to be accepted by the Department. Once all revisions have been accepted, the original deliverable sign-off form signed by the appropriate the Department representatives will be returned to the IV&V Contractor.

The IV&V Contractor must provide one (1) updated electronic copy of each deliverable after approval and acceptance by the Department. At this point the IV&V Contractor must submit the Department approved deliverable to CMS.

5. REJECTED, NOT CONSIDERED DELIVERED

If the Department considers a deliverable not ready for review, the following will be returned to the IV&V Contractor:

- a. The original deliverable sign-off form with an updated entry to the deliverable submission and review history section.
- b. The original deliverable and all copies with a written explanation as to why the deliverable is being rejected, not considered delivered.
- c. The IV&V Contractor will have five (5) business days, unless otherwise mutually agreed to, for review, acceptance and/or rejection of the Department's comments.

A meeting to discuss the Department's position regarding the rejection of the deliverable must be completed within three (3) business days after completion of the IV&V Contractor's review or a mutually agreed upon time frame. Resubmission of the deliverable must occur within a mutually agreed upon time frame. The resubmitted deliverable must be accompanied by the original deliverable sign-off form.

Upon resubmission of the completed deliverable, the Department will follow the steps outlined in this process.

H. REPORTING REQUIREMENTS

The IV&V Contractor shall deliver the IV&V Project Status Report to the Department on a monthly basis. The monthly IV&V Project Status Report should contain, at a minimum, all of the following:

1. Written support and documentation of all items to be presented during the next Management Briefing.
2. The results or findings of any assessments, evaluations, reviews or verifications completed during the prior month or updates in relation to any of the following areas:
 - a. CMS guidance.
 - b. Operational oversight.
 - c. Overview of IV&V Contractor Management Plan updates;
 - d. Overview of periodic reviews of the EES Project;
 - e. Updates to Risk Analysis and Mitigation Plan Review;
 - f. Overview of Corrective Action Plans produced during the previous month;
 - g. Overview of EES Contractor Critical Incident Reports;
 - h. Project Management updates;
 - i. Quality Assurance updates;
 - j. EES Operating Environment updates;
 - k. EES Software Development updates;
 - l. EES System Testing updates;
 - m. EES Data Management updates;
 - n. Any recommendations to mitigate any risk, deficiency or issue discovered as a result of any assessment, evaluation, review or verification completed during the prior month;
 - o. A Performance Standard Planning Document that includes the status of each activity shown on the IV&V Management Plan for that EES Component as well as the progress since the prior report; and
 - p. Any updated Work Breakdown Structure developed during the prior month.

V. PROPOSAL INSTRUCTIONS

This section documents the mandatory requirements that must be met by bidders in preparing the Technical and Cost Proposal. Bidders should identify the subdivisions of "Project Description and Scope of Work" clearly in their proposals; failure to do so may result in disqualification. Failure to respond to a specific requirement may be the basis for elimination from consideration during the State's comparative evaluation.

Proposals are due by the date and time shown in the Schedule of Events. Content requirements for the Technical and Cost Proposal are presented separately in the following subdivisions:

A. TECHNICAL PROPOSAL

The Technical Proposal shall consist of four (4) sections:

1. SIGNED "State of Nebraska Request For Proposal For Contractual Services" form;
2. Executive Summary;
3. Corporate Overview; and
4. Technical Approach.

1. REQUEST FOR PROPOSAL FORM

By signing the "Request For Proposal For Contractual Services" form, the bidder guarantees compliance with the provisions stated in this Request for Proposal, agrees to the Terms and Conditions stated in this Request for Proposal and certifies bidder maintains a drug free work place environment.

The Request For Proposal For Contractual Services form must be signed in ink and returned by the stated date and time in order to be considered for an award.

2. EXECUTIVE SUMMARY

The Executive Summary shall condense and highlight the contents of the solution being proposed by the bidder in such a way as to provide the Evaluation Committee with a broad understanding of the Contractor's Technical Proposal. The Executive Summary should include:

- a. A clear and concise summary of the bidder's understanding of the EES project, the IV&V Services and the Department's needs.
- b. A clear and concise summary of the proposed approach.
- c. A brief summary of the bidder's experience and ability to perform this project.
- d. A general description of the capabilities and role of any subcontractors

Bidders must present their understanding of the problems being addressed by implementing a new system, the objectives and intended results of the project, and the scope of work. Bidders shall summarize how their Technical Proposal meets the requirements of the Request for Proposal, and why they are best qualified to perform the work required herein.

3. CORPORATE OVERVIEW

The Corporate Overview section of the Technical Proposal must consist of the following subdivisions:

a. BIDDER IDENTIFICATION AND INFORMATION

The bidder must provide the full company or corporate name, address of the company's headquarters, entity organization (corporation, partnership, proprietorship), state in which the bidder is incorporated or otherwise organized to do business, year in which the bidder first organized to do business, whether the name and form of organization has changed since first organized, and Federal Employer Identification Number and/or Social Security Number.

b. FINANCIAL STATEMENTS

The bidder must provide financial statements applicable to the firm. If publicly held, the bidder must provide a copy of the corporation's most recent audited financial reports and statements, and the name, address and telephone number of the fiscally responsible representative of the bidder's financial or banking organization.

If the bidder is not a publicly held corporation, either the reports and statements required of a publicly held corporation, or a description of the organization, including size, longevity, client base, areas of specialization and expertise, and any other pertinent information must be submitted in such a manner that proposal evaluators may reasonably formulate a determination about the stability and financial strength of the organization. Additionally, a non-publicly held firm must provide a banking reference.

The bidder must disclose any and all judgments, pending or expected litigation, or other real or potential financial reversals, which might materially affect the viability or stability of the organization, or state that no such condition is known to exist.

c. CHANGE OF OWNERSHIP

If any change in ownership or control of the company is anticipated during the twelve (12) months following the proposal due date, the bidder must describe the circumstances of such change and indicate when the change will likely occur. Any change of ownership to an awarded vendor(s) will require notification to the State.

d. OFFICE LOCATION

The bidder's office location responsible for performance pursuant to an award of a contract with the State of Nebraska must be identified.

e. RELATIONSHIPS WITH THE STATE

The bidder shall describe any dealings with the State over the previous two (2) years. If the organization, its predecessor, or any party named in the bidder's proposal response has contracted with the State, the bidder shall identify the contract number(s) and/or any other information available to identify such contract(s). If no such contracts exist, so declare.

f. BIDDER'S EMPLOYEE RELATIONS TO STATE

If any party named in the bidder's proposal response is or was an employee of the State within the past twenty-four (24) months, identify the individual(s) by name, State agency with whom employed, job title or position held with the State, and separation date. If no such relationship exists or has existed, so declare.

If any employee of any agency of the State of Nebraska is employed by the bidder or is a subcontractor to the bidder, as of the due date for proposal submission, identify all such persons by name, position held with the bidder, and position held with the State (including job title and agency). Describe the responsibilities of such persons within the proposing organization. If, after review of this information by the State, it is determined that a conflict of interest exists or may exist, the bidder may be disqualified from further consideration in this proposal. If no such relationship exists, so declare.

g. CONTRACT PERFORMANCE

If the bidder or any proposed subcontractor has had a contract terminated for default during the past five (5) years, all such instances must be described as required below. Termination for default is defined as a notice to stop performance delivery due to the bidder's non-performance or poor performance, and the issue was either not litigated due to inaction on the part of the bidder or litigated and such litigation determined the bidder to be in default.

It is mandatory that the bidder submit full details of all termination for default experienced during the past five (5) years, including the other party's name, address and telephone number. The response to this section must present the bidder's position on the matter. The State will evaluate the facts and will score the bidder's proposal accordingly. If no such termination for default has been experienced by the bidder in the past five (5) years, so declare.

If at any time during the past five (5) years, the bidder has had a contract terminated for convenience, non-performance, non-allocation of funds, or any other reason, describe fully all circumstances surrounding such termination, including the name and address of the other contracting party.

h. SUMMARY OF BIDDER'S CORPORATE EXPERIENCE

The bidder shall provide a summary matrix listing the bidder's previous projects similar to this Request for Proposal in size, scope and complexity, specifically:

- i. Experience performing IV&V services for governmental agencies or large private health insurance providers.
- ii. Experience with a highly similar task for providing IV&V services on projects of similar scope.
- iii. Experience performing IV&V services for a project that included transitioning data from a legacy or existing system into a new system.
- iv. Demonstrated knowledge and understanding of the CMS Enterprise Life Cycle Gate Review process including required documents and their associated templates.
- v. Experience with CMS's Medicaid Information Technology Architecture (MITA).
- vi. Experience working with CMS or projects that had CMS oversight.

The State will use no more than three (3) narrative project descriptions submitted by the bidder during its evaluation of the proposal.

The bidder must address the following:

- vii. Bidder must provide narrative descriptions to highlight the similarities between their experience and this Request for Proposal. These descriptions must include:
 - a) the time period of the project;
 - b) the scheduled and actual completion dates;
 - c) the contractor's responsibilities;
 - d) for reference purposes, a customer name (including the name of a contact person, a current telephone number, a facsimile number and e-mail address); and
 - e) each project description shall identify whether the work was performed as the prime contractor or as a subcontractor. If a bidder performed as the prime contractor, the description must provide the originally scheduled completion date and budget, as well as the actual (or currently planned) completion date and actual (or currently planned) budget.
- viii. Contractor and subcontractor(s) experience must be listed separately. Narrative descriptions submitted for subcontractors must be specifically identified as subcontractor projects.
- ix. If the work was performed as a subcontractor, the narrative description shall identify the same information as requested for the contractors above. In addition, subcontractors shall identify what share of contract costs, project responsibilities, and time period were performed as a subcontractor.

i. SUMMARY OF BIDDER'S PROPOSED PERSONNEL/MANAGEMENT APPROACH

The bidder must present a detailed description of its proposed approach to the management of the project.

The bidder must identify the specific professionals who will work on the State's project if their company is awarded the contract resulting from this Request for Proposal. The names and titles of the team proposed for assignment to the State project shall be identified in full, with a description of the team leadership, interface and support functions, and reporting relationships. The primary work assigned to each person should also be identified.

The bidder shall provide resumes for all personnel proposed by the bidder to work on the project. The State will consider the resumes as a key indicator of the bidder's understanding of the skill mixes required to carry out the requirements of the Request for Proposal in addition to assessing the experience of specific individuals.

Resumes must not be longer than three (3) pages. Resumes shall include, at a minimum, academic background and degrees, professional certifications, understanding of the process, and at least three (3) client references (Client and Company Name, Project Name, address, email address and telephone number) who can attest to the competence and skill level of the individual. Any changes in proposed personnel shall only be implemented after written approval from the State.

A major factor in the success of the Project is the degree of collaboration between IV&V and EES Contractor staff and Department staff. The IV&V Contractor is expected to work with key Department stakeholders, management and subject matter experts throughout the business and technology enterprise when conducting the project activities and developing the work products and deliverables. The IV&V Contractor is expected to propose a project approach that incorporates the involvement of Department business and technology staff in order to obtain information and feedback necessary to produce quality work products and deliverables.

The Bidder will provide resume(s) for the key personnel proposed for this project. The Bidder is required to demonstrate that their consultant(s) or employee(s) will have the skills necessary to meet the objectives of this project as listed below. The resumes must include:

- i.** Educational qualifications
- ii.** Summary of employment experience
- iii.** Specific experience with the service areas for which they are being proposed
- iv.** Previous work assignments in a similar role for this type of engagement demonstrating ability to meet the objectives listed below:
- v.** Proven experience with Consulting, Project Administration and Technical Assistance for Commercial or State Government Eligibility Solutions for a period of at least two years within the last four years
- vi.** Core competency in IV&V and QA as demonstrated by the resume
- vii.** Experience in the design, development, testing, and implementation of Medicaid or Commercial eligibility system
- viii.** Government or public sector experience
- ix.** In-depth knowledge of ACA Regulations
- x.** Highly developed written and verbal communication skills

The Bidder's proposal shall describe policies, plans and intentions with regard to maintaining continuity of key personnel and the implementation team assigned to the project to avoid and minimize the impact of necessary staff changes.

The Department will provide workspace, equipment and conference telephone capabilities to house the IV&V Contractor staff in Lincoln, NE. Additionally, the IV&V Contractor will be assigned Department SharePoint repository capabilities for all IV&V Contractor project documents and deliverables.

In order to ensure the success of this project, it is important that there is a continuity of Key Staff assigned to the project. The Bidder's proposal must:

- i.** Describe policies, plans, and intentions with regard to maintaining continuity of personnel assignments throughout the performance of any agreement resulting from this RFP.
- ii.** Discuss the Bidder's plans to avoid and minimize the impact of personnel changes.
- iii.** Identify planned backup personnel assignments.

- iv. Commit to using the personnel identified in the proposal and agree to DHHS' right to approve proposed personnel changes during the term of the contract.
- v. Agree that the Bidder's proposed project personnel may not be reassigned, replaced, or added during the project without the prior written consent of the DHHS Project Manager. Should a key staff position be vacated, the IV&V Contractor must give DHHS resumes of, and an opportunity to interview and approve, potential replacements for that employee.
- vi. Agree that the Bidder's proposed key project personnel may not be assigned new or additional contract assignments outside the State of Nebraska contract, without the prior written consent of the DHHS Project Manager.
- vii. Agree that the DHHS Project Manager reserves the right to require a change in the IV&V Contractor's project personnel at the DHHS Project Manager's discretion and that DHHS must be given an opportunity to interview and approve potential replacements for that employee. However, DHHS will not unreasonably exercise this option and will take reasonable steps to work with the IV&V Contractor toward a solution.

j. SUBCONTRACTORS

If the bidder intends to subcontract any part of its performance hereunder, the bidder must provide:

- i. name, address and telephone number of the subcontractor(s);
- ii. specific tasks for each subcontractor(s);
- iii. percentage of performance hours intended for each subcontract; and
- iv. total percentage of subcontractor(s) performance hours.

4. TECHNICAL APPROACH

The technical approach section of the Technical Proposal must consist of the following subsections:

- a. Description how the IV&V Bidder plans to carry out the IV&V Services for the EES Project. This description shall include methodologies, strategies, standards and approaches employed by the Bidder for executing each of the IV&V activities within the Scope of Work of this RFP.
- b. Description of the deliverables produced as a result of IV&V activities, including sample reports.
- c. A documented methodology for performing IV&V Services that has proved successful on past projects.
- d. A documented methodology for developing performance matrices that has proved successful on past projects.
- e. A documented methodology for developing the performance matrices.
- f. Description for assessing risks, documenting findings and communicating them to the Department and contractors.
- g. A preliminary project management plan that includes the activities and deliverables which are defined in this RFP and expected of the vendor.

B. COST PROPOSAL REQUIREMENTS

This section describes the requirements to be addressed by bidders in preparing the Cost Proposal. The bidder must submit the Cost Proposal in a section of the proposal that is a separate section or is packaged separately as specified in the RFP from the Technical Proposal section.

The component costs of the fixed price proposal for providing the services set forth in the Request for Proposal must be provided by submitting forms substantially equivalent to those described below.

1. PRICING SUMMARY

This summary shall present the total fixed price to perform all of the requirements of the Request for Proposal - Use Form B. The bidder must include details in the Cost Proposal supporting any and all costs. These details must include, at a minimum, detailed descriptions and/or specifications of the goods and/or services to be provided, quantities, and timing and unit costs, if applicable.

The State reserves the right to review all aspects of the Cost Proposal for reasonableness and to request clarification of any proposal where the cost component shows significant and unsupported deviation from industry standards or in areas where detailed pricing is required.

2. PRICES

Prices quoted shall be net, including transportation and delivery charges fully prepaid by the bidder, F.O.B. destination named in the Request for Proposal. No additional charges will be allowed for packing, packages, or partial delivery costs. When an arithmetic error has been made in the extended total, the unit price will govern.

C. PAYMENT SCHEDULE

The payment schedule for the project is tied to specific dates and deliverables. Invoices may be submitted by the contractor on specific dates based on the completion and acceptance of related deliverables. No invoice will be approved unless the associated deliverables have been approved. A percentage of the total contract cost may then be invoiced based on the following schedule.

Form A

Bidder Contact Sheet

Request for Proposal Number 4468Z1

The Bidder Contact Sheet should be completed and submitted with each response to this Request for Proposal. This is intended to provide the State with information on the bidder's name and address, and the specific person(s) who are responsible for preparation of the bidder's response. Each bidder shall also designate a specific contact person who will be responsible for responding to the State if any clarifications of the bidder's response should become necessary. This will also be the person who the State contacts to set up a presentation/demonstration, if required.

Medicaid Eligibility and Enrollment System

Request for Proposal Number 4544Z1

There are two existing systems that Nebraska will be modifying for ACA compliance.

Nebraska's current functional environment is called ACCESSNebraska. ACCESSNebraska provides service delivery for Nebraska Medicaid and the Economic Assistance Programs (Temporary Assistance for Needy Families (TANF), Supplemental Nutrition Assistance Program (SNAP), Low Income Home Energy Assistance Program (LIHEAP) and several smaller programs. The environment contains the following components:

1. Web site
2. Customer Service Centers
3. Local Offices
4. Universal and Assigned Case Management model
5. Functional Case Management Assignments
6. Document Imaging

The web site ACCESSNebraska.ne.gov contains the following: Do I Qualify? (screening tool), Application, Change Reporting, Benefit Accounts, Submit Documents and information on Community Partners, Local Offices, etc. The Benefit Accounts contains information on benefit eligibility and copies of correspondence sent to the account holder. The accounts require a PIN authentication process and security questions to set up.

ACCESSNebraska has four (4) Customer Service Centers with a total of 400 staff. The Customer Service Centers utilize a single 800 telephone number for access with local calling available in Lincoln. With ACA implementation, a new phone number is being set up for Medicaid. Two of the Customer Service Centers will begin taking these calls for a total of 150 staff. The phone system utilizes an Integrated Voice Response System that retrieves customer data from N-FOCUS and is available 24 hours a day, seven days a week. The system is connected to an Automated Call Distribution System which directs callers to specific routing with case managers who have knowledge and expertise to answer the question. The system utilizes Call Quality Recording and Monitoring (CQRM) to store data. The voice signature will be stored as a part of this. It is currently envisioned that a staff member will take the application over the telephone. Eventually the application process will be moved to the IVR with the data transmitted to the new EES. The system is managed utilizing Contact Center Manager software that allows for reporting.

Nebraska has local offices throughout the state where customers can walk in. The local offices accept applications, conduct interviews, determine eligibility and have kiosks available for customers to utilize the web site and contact the Customer Service Center.

ACCESSNebraska utilizes a Universal Case Management system for most of its case management. In the Universal Case Management System, work tasks are created for staff to act on the cases as the need arises. Work is prioritized inside the work queues. Work queues in use include: Document Imaging, Application Management, Interviewing, Eligibility Processing, and Change Management. Some cases are assigned to a case manager and processed with the single case manager completing all case actions.

Staff is assigned to work out of queues according to functions. Staff complete all tasks for the function assigned. Staff is also divided into Service Delivery Groups known as adult and family. With ACA implementation, staff will now be divided by MAGI, Non-MAGI and Combined. Combined is a case with both MAGI and Non-MAGI eligible people.

The system is supported by two Document Imaging Centers. These centers contain two high speed IBML scanners that scan documents. In addition, documents can be moved electronically to be stored in the system. All documents are indexed by person and category. Local offices have Canon Scanners to scan documents received locally. The Document Imaging System is integrated and viewable through N-FOCUS.

MMIS Existing Infrastructure

Request for Proposal Number 4544Z1

The foundation of the current MMIS technical architecture was developed in 1973. The current MMIS has been fully operational since 1978 and became HIPAA compliant in October 2003. The MMIS consists of batch and online CICS mainframe components and a front-end HIPAA compliant Sybase Translator.

The Nebraska MMIS currently consists of the following 16 subsystems:

1. Data Management – The Nebraska DHHS currently contracts with Truven Health Analytics for data management, housing ten years of Medicaid claims and provider and client information used to facilitate management reporting, including the Management & Administrative Reporting Subsystem (MARS), the Surveillance and Utilization Review Subsystem (SURS) and the Medicaid Statistical Information System (MSIS) reporting.
2. Drug Claims Processing – The Nebraska DHHS currently contracts with Magellan Medicaid Administration (MMA) for drug claims receipt and adjudication. MMA's Point of Service (POS) system supports the National Council for Prescription Drug Programs standards, including currently D.0 and 1.1 (batch) formats. The POS sends processed pharmacy claims to the State's MMIS on a daily basis, where the claims are passed into the MMIS weekly payment cycle for final adjudication, payment, and reporting.
3. Management & Administrative Reporting Subsystem (MARS) – Provides system generated reports. The Nebraska DHHS also contracts with Truven Health Analytics to provide management information.
4. Medicaid Drug Rebate (MDR) – A PC-based extract from MMIS claims history to prepare quarterly invoices for drug rebates from manufacturers.
5. Medical Claims Processing (MCP) – Edits claims and calculates reimbursement amounts.
6. Medical Non-Federal (MNF) – Ensures that Title XIX Federal matching funds are not used to pay for health care services otherwise available through Title XVIII (Medicare) funding.
7. Medical Provider Subsystem (MPS) – Maintains demographic, eligibility, and licensing data for all enrolled Medicaid providers.
8. Nebraska Aging Management Information System (NAMIS II) – This application supports the activities of the State Unit on Aging. It was developed to enter, edit, monitor, and report services provided by Area Agencies on Aging in Nebraska, track services required by the U.S. Administration on Aging (AoA), and to compile information required by the AoA for NAPIS, the National Aging Program Information System. It is also used to manage programs, track costs in certain services, track program usage, and analyze client demographics.
9. Nebraska Disability Program (NDP) – Accounts for the separate funding of health care services for disabled persons who do not meet the SSI disability duration requirements but are eligible for the same medical services as Medicaid.
10. Nebraska Managed Care System (NMC) – Provides plan and PCP enrollment of Medicaid clients into managed care, and documentation of communications between the client, the enrollment broker, and the managed care plans. The NMC offers basic case management functionality.

11. Nebraska Medicaid Eligibility System (NMES) – An automated voice response system used to verify client Medicaid or managed care eligibility for Nebraska Medicaid. The current Interactive Voice Response Unit also supports the Nebraska's Child Support system, known as Children Have A Right To Support (CHARTS), which serves as Nebraska's statewide Child Support Enforcement (CSE) system.
12. Recipient File Subsystem (RFS) – Uses and maintains Medicaid client eligibility data obtained from N-FOCUS.
13. Reference File Subsystem (RSS) – A database containing various reference information that includes but is not limited to, procedure, diagnosis and drug codes, and fee schedules.
14. Screening Eligible Children (SEC) – Facilitates comprehensive, preventative health care and early detection and treatment of health problems in Medicaid eligible children.
15. Surveillance and Utilization Review Subsystem (SURS) – Provides system generated reports. MLTC also contracts with Truven Health Analytics for reports and tools to support the investigation of potential provider fraud, abuse, or misuse.
16. Third Party Liability (TPL) – Stores information on Medicaid clients with private insurance; contains edits and produces reports for coordination of benefits and recovery.

Current System

Current System Overview

- ◆ Current solution is comprised of two primary components
 - ◆ N-FOCUS and ACCESSNebraska

- ◆ Nebraska Family Online Client User System (N-FOCUS)
 - ◆ Integrated service delivery and case management system
 - ◆ Supports over 30 programs overseen by the Nebraska Department of Health and Human Services (DHHS)
 - ◆ Functions include client/case intake, eligibility determination, case management, service authorization, benefit payments, claims processing and payment, provider contract management, and government and management reporting.
 - ◆ Supports Medicaid Eligibility, as well as other programs such as SNAP and TANF
 - ◆ Statewide Automated Child Welfare Information System (SACWIS)
 - ◆ Interfaces with Medicaid Management Information System (MMIS)

Current System Overview

- ◆ ACCESSNebraska
 - ◆ Public facing web front-end
 - ◆ Provides the public a means to apply on-line for public aid
 - ◆ Supports subset of programs in N-FOCUS
 - ◆ Umbrella Application which includes the following functions:
 - ◇ Screening – survey that assists applicants in understanding their potential eligibility
 - ◇ E-App – electronic application for benefits
 - ◇ Change Reporting – update name, address other demographic data
 - ◇ Inquiry – check status of benefits
 - ◆ Call Centers
 - ◇ Operate in conjunction with the AccessNebraska system
 - ◇ Four centers located across the state
 - ◇ Functions include conducting interviews, taking customer changes, and providing information and referral services via the telephone

Current System Architecture

◆ N-FOCUS

- ◆ Highly integrated client/server application built in 1996
- ◆ On-line system
 - ◆ Client
 - ◆ Windows 7/XP
 - ◆ developed using CA Gen and AION to generate windows and C code
 - ◆ some custom developed C code
 - ◆ External Call Interface (ECI) used to connect to server components
 - ◆ 475 windows, 490 +client procedures
 - ◆ Server components
 - ◆ Z/OS
 - ◆ CICS transactions
 - ◆ CA Gen generated and in house developed COBOL
 - ◆ 470 server procedures
 - ◆ AION
 - ◆ Supports complex eligibility data gathering
 - ◆ Automated determination and noticing processes

Current System Architecture

- ◆ N-FOCUS On-line System (continued)
 - ◇ Web components
 - ◇ Java Server Faces and Facelets developed using Eclipse IDE
 - ◇ Tomcat WAS on Linux

- ◆ Batch System
 - ◇ Z/OS COBOL
 - ◇ 700+ procedures, 640+ programs, 220+ stored procedures
 - ◇ Crystal Reports
 - ◇ 540+ reports distributed via Business Objects Enterprise

- ◆ Database
 - ◇ Z/OS based DB2 database
 - ◇ 500+ tables, 550+ table relationships, 935 indexes, 8700+ attributes
 - ◇ Over 1.3 billion rows, largest table exceeds 200 million rows

Current System Architecture

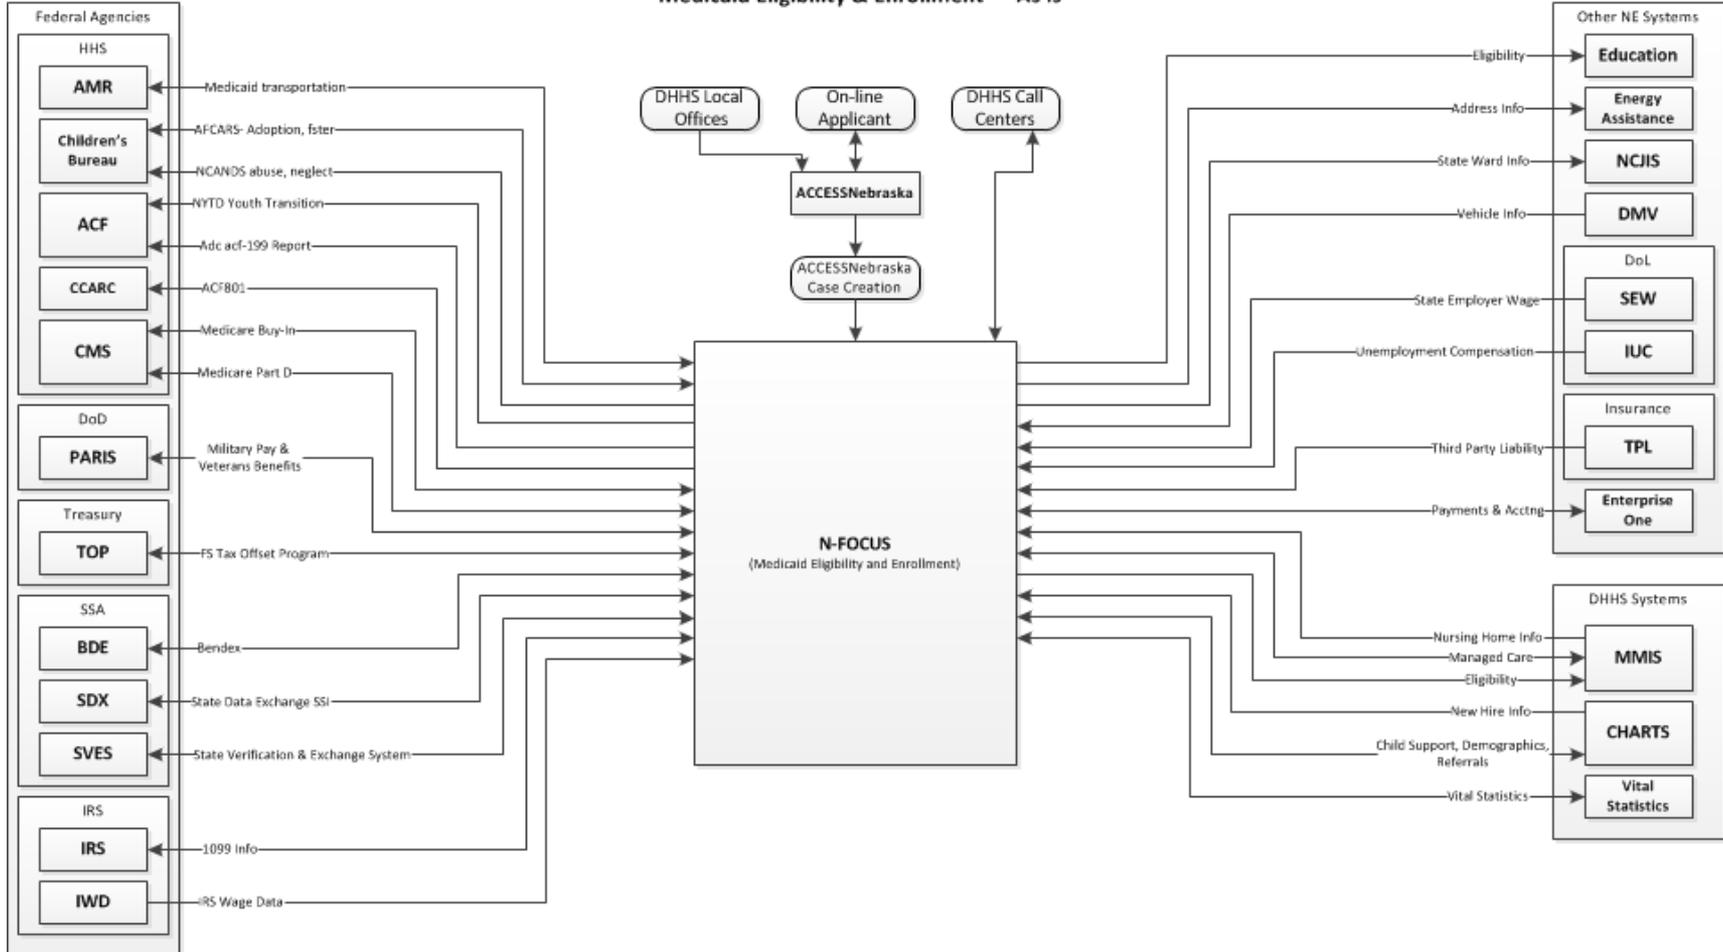

- ◆ ACCESSNebraska
 - ◆ Established in 2008
 - ◆ Web-Based Java application
 - ◆ Utilizes SQL server for temporary data and DB2 for long terms storage
 - ◆ Call Center Telephony Components
 - ◇ Interactive Voice Response System (IVR)
 - ◇ Automated Call Distribution (ACD)
 - ◇ Dashboard Client – provide CTI capabilities
 - ◇ Contact Recording and Quality Monitoring (CRQM) – provides call recording and playback capabilities
 - ◇ Dashboard Manager Shortcut – provides ability to review call statistics in real time

- ◆ N-FOCUS and ACCESSNebraska are not currently integrated electronically, therefore information is manually re-entered into N-FOCUS to initiate the eligibility process.

Current System

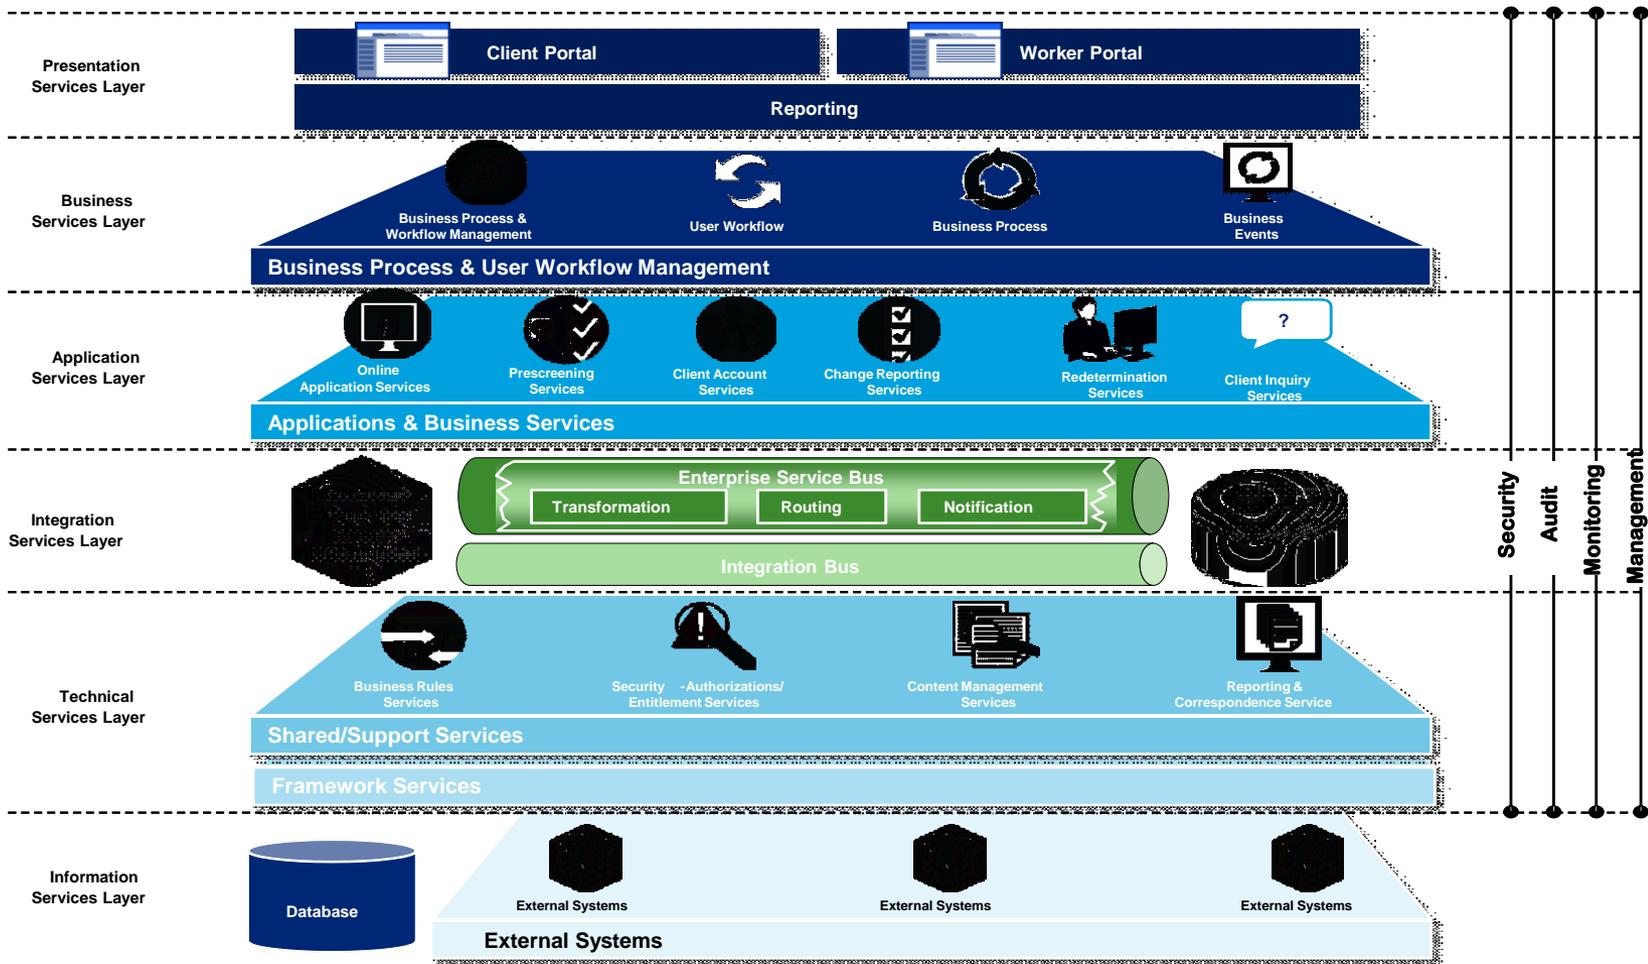

Medicaid Eligibility & Enrollment – “As Is”

Proposed System

Proposed System Conceptual Architecture

Proposed System Conceptual Architecture

Presentation Layer includes:

- User Interface(s)
 - Lightweight
 - Role based
 - Access Method based
- Data Entry validation
 - Complete
 - Type
 - Logical
- Help screens/prompts
- Standards compliant

Business Functions/Processes:

- Predefined Business processes/workflows like:
 - Eligibility
 - Enrollment
 - Plan Selection
 - Change of Circumstances
 - Renewal
- Configurable through external rules and/or business process/workflow definitions

Business Services:

- Predefined services used to construct Business Functions:
 - Determine Medicaid Eligibility
 - Conduct Verification
 - Verify Citizenship
 - Determine MAGI Eligibility
 - Calculate MAGI
 - Transfer Account
 - Check Exchange Enrollment
- Configurable through external rules

Data & Database Management includes:

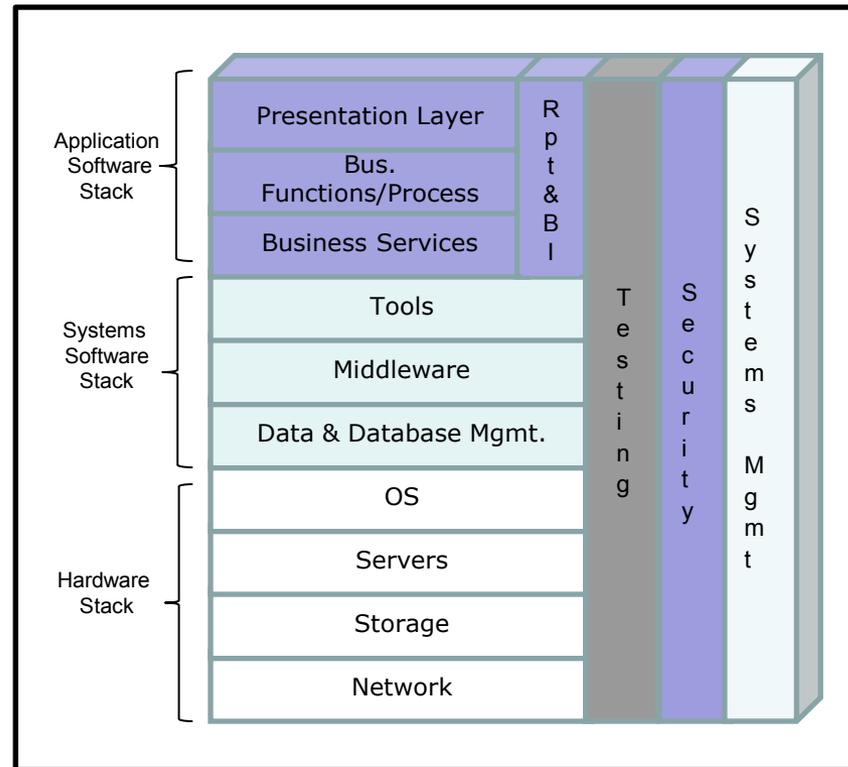

- Enterprise Content Management (ECM)
- Document Management & Imaging (DM)
- Extraction, Transformation, Load (ETL)
- Data Conversion
- Data Migration & Transfer
- Data Quality (DQ)
- Database Management Software (DBMS)
- Database Management & Monitoring
- Database Backup & Recovery
- Data Archival & Retrieval

Middleware includes:

- Business Process Management/Workflow (BPM/WF)
- Business Rules Management/Rules Engine (BRM/RE)
- Enterprise Service Bus/Message Broker (ESB/MB)
- Enterprise Application Integration (EAI)
- Electronic Data Integration (EDI)
- Web Application Server (WAS)
- Web Server (WS)
- Interactive Voice Response System (IVR)
- Computer Telephony Integration (CTI)

Tools includes:

- Integrated Development Environment (IDE)
- Source code control (check in/out, versioning, etc)
- Debuggers
- Report Development and Generation
- Ad-hoc Query & Reporting
- On-line Analytical Processing (OLAP, ROLAP, MOLAP, OOLAP)
- Data Mining

Systems Management includes:

- Performance Monitoring & Reporting
- Business Activity Monitoring (BAM)
- Workload/Job Scheduling
- System Backup & Recovery
- Configuration Management
- Release Management
- Change Management
- Event/Incident Management
- Problem Management
- Capacity Management
- Financial Management/Cost Allocation

Security includes:

- Identity Management
 - Authentication
 - Authorization
 - Access Control
 - Single Sign-On (SSO)
- Non-Repudiation
- Auditability
- Data Integrity
- Data Protection & Confidentiality
- Encryption (static and in motion)
- Intrusion Detection System (IDS)
- Firewalls
- Virus and Malware Detection

Testing includes:

- Test Management
- Functional/Regression Test
- Load & Performance Test
- Test Case Development
- Test Data Generator
- Capture & Playback
- Web App/UI
- Standards Compliance

N-FOCUS Interfaces

Interface Name	Incoming / Outgoing / Both	Recipient / Sender	Frequency	Transfer	Function
ADC ACF-199 Reporting	Both	Administration of Children and Families (ACF), Federal	Quarterly	Connect/Direct	ADC ACF-199 federal reports.
Child Care ACF-801 Reporting	Outgoing	Child Care Automation Resource Center (CCARC), Federal	Monthly	Connect/Direct	Child Care ACF-801 federal report.
Child Support (CHARTS)	Both	CHARTS State Application	Daily	State Mainframe File	Child Support data interface including eligibility, demographic, referral information. CHARTS also directly accesses some N-FOCUS table information.
Child Welfare AFCARS Reporting	Both	HHS Children's Bureau, Federal	Semiannual	Tibco Managed File Transfer (formerly named Cyberfusion)	Child Welfare AFCARS adoption and foster care information; incoming files are not automatically processed.
Child Welfare CONNECT	Outgoing	CONNECT State Application	Weekly	Invoked DB2 Stored Procedure	EDN and CAPTA referrals.
Child Welfare Court (JUSTICE)	Outgoing	JUSTICE State Application	Daily	FTP	Child Welfare state ward information for county courts.
Child Welfare Criminal Justice (NCJIS)	Outgoing	NCJIS State Application	Hourly, Daily	Hourly: invoked DB2 stored procedure; daily FTP	Child Welfare Nebraska Crime Commission information for state wards and law enforcement.
Child Welfare NCANDS Reporting	Outgoing	HHS Children's Bureau, Federal	Annual	Upload to NCANDS Portal	Child Welfare NCANDS (National Child Abuse and Neglect Data System) information.
Child Welfare Project Impact	Outgoing	Project Impact - Juvenile Accountability Impact Block Grant (Omaha)	Monthly	SFTP	Child Welfare Project Impact state ward information.
Child Welfare Quality Assurance	Outgoing	Child Welfare Quality Assurance State Application	Monthly	State Mainframe File	Child Welfare case information.
Debit Card (Reliacard)	Both	US Bank	Daily	Connect/Direct	Electronic payment debit card information.
Developmental Disabilities Therap	Outgoing	Therap vendor	Daily	SFTP	Client eligibility information. Future phases in 2012 will include Provider information as well as incoming service authorization/claim information.
Education	Outgoing	Department of Education, State	Daily	FTP	Client eligibility information.
Energy Assistance	Outgoing	Energy Assistance State Application	Monthly	Direct Data Access	Energy Assistance directly accesses N-FOCUS address information. LIHEAP is scheduled to be incorporated into N-FOCUS July 2012.
Enterprise One (NIS)	Both	Enterprise One (NIS) State Application	Daily	FTP	Payment and accounting information for clients and providers.
Interactive Voice Response (IVR)	Both	HHS Voice Response Unit	Real Time	Invoked DB2 Stored Procedure	Client and provider eligibility information.
IRS 1099	Both	Internal Revenue Service, Federal	Monthly	Axway Secure Transport (formerly named Tumbleweed)	IRS 1099 information.
Labor Employment	Incoming	State Department of Labor	Daily	State Mainframe File	Labor employer wage information (SEW).
Labor Unemployment	Incoming	State Department of Labor	Daily	State Mainframe File	Labor unemployment benefit information.
Labor Unemployment Compensation Tax	Both	State Department of Labor	Weekly, Quarterly	SFTP	Labor unemployment compensation tax information and reporting.

N-FOCUS Interfaces

Interface Name	Incoming / Outgoing / Both	Recipient / Sender	Frequency	Transfer	Function
Medicaid Cards	Outgoing	Lasermark Vendor	Daily	SFTP	Medicaid card information for printing/mailing.
Medicaid (MMIS)	Outgoing	MMIS State Application (RFS, SEC)	Daily	State Mainframe File; Direct Data Access	Medicaid data interface including eligibility, demographic information. MMIS also directly accesses some N-FOCUS table information.
Medicaid Long Term Care (MMIS)	Incoming	MMIS State Application (RFS)	Daily	State Mainframe File	Medicaid nursing home per diem rate information (Long Term Care interface)
Medicaid Managed Care (MMIS)	Both	MMIS Managed Care State Application (NMC)	Daily	State Mainframe File; Direct Data Access	Medicaid managed care information. Managed Care also directly accesses some N-FOCUS table information.
Medicaid Transportation Broker	Both	American Medical Response (AMR) Vendor	Daily	SFTP	Medicaid transportation and authorization information.
Medicare Buy-In	Both	Centers for Medicare and Medicaid Services (CMS), Federal	Monthly	Connect/Direct	Medicare buy-in information exchange.
Medicare Part D	Both	Centers for Medicare and Medicaid Services (CMS), Federal	Monthly	Connect/Direct	Medicare Part D information.
Motor Vehicles	Incoming	Department of Motor Vehicles (DMV) State Application	Real Time	Direct Data Access	Motor vehicle registration information.
New Hire	Incoming	CHARTS State Application	Daily	State Mainframe File	New Hire employment information which originates federally and is transmitted to N-FOCUS via CHARTS.
NTAP	Outgoing	Public Service Commission	Monthly	FTP	Nebraska Telephone Assistance Program (NTAP).
NYTD	Outgoing	Administration of Children and Families (ACF), Federal	Semiannual	Tibco Managed File Transfer (formerly named Cyberfusion)	National Youth Transition Database (NYTD)
OnBase Claims & Service Authorizations	Both	Enterprise Content Manager (ECM), State	Daily, Real Time	SFTP, invoked DB2 stored procedure	Child Care provider and client claims and service authorization information (will be expanded to other programs later in 2012).
PARIS	Both	Department of Defense, Federal	Quarterly / Request	Connect/Direct	PARIS military benefits information; matches from other states.
Provider Rating and Review Reporting	Outgoing	Center for Children, Family, and the Law (CCFL) Answer 4 Families, University	Monthly	SFTP	Client, provider, and service authorization information.
SNAP EBT	Both	JP Morgan Electronic Financial Services, EBT Vendor	Daily	Connect/Direct	SNAP electronic benefits transfer.
SNAP Treasury Offset	Both	Financial Management Services (FMS) Treasury Offset Program, Federal	Weekly	Connect/Direct	SNAP Treasury Offset Program.
Social Security (Bendex)	Both	Social Security Administration, Federal	Daily	Tibco Managed File Transfer (formerly named Cyberfusion)	Social Security beneficiary and earnings data exchange (BENDEX/SVES).
Social Security (LIS)	Incoming	Social Security Administration, Federal	Daily	Tibco Managed File Transfer (formerly named Cyberfusion)	Social Security medicaid applications for Low Income Subsidy (LIS)
Social Security (SDX)	Both	Social Security Administration, Federal	Daily	Tibco Managed File Transfer (formerly named Cyberfusion)	Social Security supplemental security income information (SDX/SVES).
Social Security (SVES)	Both	Social Security Administration, Federal	Daily	Tibco Managed File Transfer (formerly named Cyberfusion)	Social Security verification exchange system (SVES); includes SNAP forty quarters information and citizenship verifications.
Third Party Liability (TPL)	Incoming	TPL State Application	Daily	State Mainframe File	Third Party Liability insurance information.
Vital Statistics	Both	Vital Statistics State Application	Daily	Connect/Direct	Vital Statistics information (passed on to the CHARTS application too)

N-FOCUS Technical Overview

Request for Proposal Number 4544Z1

N-FOCUS (Nebraska Family Online Client User System) is an integrated system that automates benefit/service delivery and case management for more than 30 Nebraska Department of Health and Human Services (DHHS) programs, including Child Welfare, Aid to Dependent Children, Supplemental Nutrition Assistance Program, and Medicaid. N-FOCUS functions include client/case intake, eligibility determination, case management, service authorization, benefit payments, claims processing and payments, provider contract management, interfacing with other private, state and federal organizations, and management and government reporting. N-FOCUS was implemented in production in mid-1996 and is operational statewide.

The typical N-FOCUS user is a DHHS or contracted employee. N-FOCUS daily supports over 2500 workers, operating from offices around the State as well as from 4 customer service centers and 2 hub scanning facilities. Some cases are assigned to specific workers; however the majority of cases are managed via a universal caseload methodology coordinated by the customer service centers.

The application has both batch and online components and stores data in DB2, V9. The DB2 database has over 500 tables, some with a corresponding archive table. There are over 642 relationships between tables, 1054 indexes, and over 7839 attributes. There are over 1.6 billion rows of production data with over 206 million rows in one table with an average table size of 2.8 million rows.

The batch system is coded in Z/OS COBOL and executes in a Z/OS environment. There are more than 660 procedures, over 720 programs, and over 230 stored procedures. The application generates over 540 reports using Crystal Reports that are published to a web portal through Business Objects Enterprise software. Another 100 reports generated independently are published to the portal for viewing.

The online system is an integrated client/server based software system. The client software executes on Windows 7 and resides on Windows 2008 servers located throughout the State. Computer Associates Gen and AION toolsets are used to generate windows and C code, along with custom in-house architecture code written in C. The server components are Z/OS CICS transactions. The CICS programs are Gen-generated COBOL, along with in-house written COBOL and Assembler externals. The CICS programs access DB2 on the Z/OS mainframe. The Gen clients use External Call Interface (ECI), IBM's CICS Universal Client to connect to the Z/OS CICS using TCP/IP protocol. The Gen online system consists of over 570 client procedures, 555 server procedures, 550 windows, and 1450 dialog boxes. The AION online system supports the complex eligibility data gathering and automated determination and noticing processes.

N-FOCUS web applications consist of public applications, including dashboard applications, and applications launched directly from N-FOCUS. Eclipse is the IDE used to generate the Java Server Faces and Facelets code. These Java applications run on Tomcat application servers on the Linux Operating System. The Java applications call stored procedures to access DB2 data and SQL to access SQL server data.

The primary role of the N-FOCUS team today is to maintain and enhance the N-FOCUS application. This includes providing users with technical and business support to keep the system current with government policy and industry technology, both of which continue to change at a rapid pace. The N-FOCUS team works in the Nebraska State Office Building in Lincoln. Business and technical contract and full-time State team members are organized into teams that are involved in application development (Gen, AION, COBOL, Web, Reporting), technical architecture (workstation communications, mainframe communications, print architecture, reporting architecture administration, document imaging administration), database administration, configuration management, project management, business requirements and testing, application and production support, and training. Approximately 40 technical and 30 business team members are assigned to the N-FOCUS team.

Technology Framework

Request for Proposal Number 4544Z1

1.1 General

As part of this RFP procurement process the Department is looking for systems and technologies that can form the basis for an Enterprise Architecture that can be utilized and leveraged across Divisions and/or Programs. As such, we are looking for a solution that is built upon a technology framework that will support and promote this goal. The remaining sections of this document describe what the Department considers a “technology framework”.

1.2 Definitions

Architecture - the fundamental organization of a system embodied in its components, their relationships to each other, and to the environment, and the principles guiding its design and evolution.

Service-Oriented Architecture – an architecture that aims to enhance efficiency, agility, and productivity of an enterprise by positioning services as the primary means through which solution logic is represented. Services act as containers of related capabilities. High-quality service-oriented architectures are consistent with the following principles:

- Standardized service contract – services within the same service inventory are in compliance with the same contract design standards.
- Service loose coupling – service contracts impose low consumer coupling requirements and are themselves decoupled from their surrounding environment.
- Service abstraction – service contracts only contain essential information, and information about services is limited to what is published in the service contracts.
- Service reusability – services contain and express agnostic logic and can be positioned as reusable enterprise resources.
- Service autonomy – services exercise a high level of control over their underlying runtime execution environment.
- Service statelessness – services minimize resource consumption by deferring the management of state information when necessary.
- Service discoverability – services are supplemented with communicative meta data by which that can be effectively discovered and interpreted.
- Service composability – services are effective composition participants, regardless of the size and complexity of the composition.

Framework – for the purposes of this RFP, a framework is an extensible software platform providing general purpose and domain-specific services in the context of a uniform, reusable, service-oriented architecture with consistent abstractions. A framework may include the ability to both directly instantiate end-user capabilities and to provide developer-centric capabilities.

1.3 MITA Technical Principles

The Framework should support the MITA technical principles:

- **Business driven.** Technology will only be used when it supports a business goal or objective; technology will not be used for technology’s sake alone.
- **Implementation neutral.**
- **Platform independent.** Application software and infrastructure components should be developed for reusability and platform independence.
- **Adaptable, extensible, and scalable.**
- **Open technology and standards based.** The advantages of standardization (e.g., data sharing and interoperability) should be leveraged.
- **Security and privacy** must be integrated into a system.
- **Interoperability standards** are established and followed.
- **Quality data** are enabled to support good decision making.
- **Current and proven technology** is selected.

1.4 Seven Conditions and Standards

In order to receive enhanced Federal financial participation (FFP), the Department must implement solutions that are consistent with 42 CFR 433.112 and related guidance from the Centers for Medicare and Medicaid Services (CMS), e.g., *Medicaid IT Supplement MITS-11-01-VI.0*, commonly referred to as the seven conditions and standards (“Seven Conditions”). The Framework must allow the Department to satisfy, to the greatest extent practical, those portions of the Seven Conditions that are system-related. The Seven Conditions are:

- Modularity Standard
- MITA Condition
- Industry Standards Condition
- Leverage Condition
- Business Results Condition
- Reporting Condition
- Interoperability Condition

1.5 Framework Attributes, and Areas of Commonality

1.5.1 Attributes

The following attributes are required in the proposed framework:

The Framework for the Solution must be consistent. A framework is not merely a random or semi-related set of utilities or generic services. Various services, tools, and data structures should use a unified design paradigm and design patterns (service calls; service arguments and return values; data types, etc.) to improve productivity and reduce defects driven by “impedance mismatches.” Frameworks encourage the use of helpful design patterns, but don’t force developers into deep levels of abstraction that detract from their productivity (e.g., factories of factories). Database schema are normalized; data are stored in only one place within the framework and its resulting applications; and these data are accessible only by service calls to the services “owning” the data.

The Framework for the Solution must promote interoperability. The use of standards (where standards exist) and the use of well-documented information interchange specifications (where standards do not exist) assist the using organization in producing and consuming information and services that are interoperable with other systems and organizations. Frameworks should make using interoperable standards easier than creating homegrown interface solutions.

The Framework for the Solution must externalize parameters that are prone to frequent change. These include:

- Business rules
- Workflows
- Configuration, environment, and startup parameters
- Localization resources
- Security roles
- User interface elements

The Framework for the Solution must be service-oriented. The Framework should provide a discoverable service inventory containing service contracts having granularity that is neither so coarse as to result in performance and governance issues nor so fine as to result in excessive developer burden and poor reuse. Service orientation principles may be compromised to the extent necessary to meet performance standards.

The Framework for the Solution must enable functional build out by configuration rather than customization as much as is practical. This likely requires that the base functionality, as delivered, has been used and is configured to support the Medicaid and health insurance domains.

The Framework for the Solution should have a standard, domain-specific base data model. This data model should be consistent, normalized, and incorporate the common data elements used in Medicaid eligibility, enrollment, and member management. The data model must be extensible via documented processes, and must not have any proprietary restrictions on the State's use or extension of the data model.

The Framework for the Solution must encourage reuse. Areas of reuse may include:

- Intra-application. Developers on a single team should find it easy to reuse base framework services or custom services built by other team members.
- Inter-application. Developers on different teams within the same organization should find it easy to reuse base framework services to promote commonality and to discover and use services created by other application teams.
- Inter-enterprise. Developers in sister human and social services agencies and in sister states should find it easy to reuse base framework services to promote commonality and to discover and use services created by other agencies.

The Framework for the Solution must have a security architecture that supports standard security principles. These principles are:

- **Confidentiality** – prevent disclosure to unauthorized persons or systems.
- **Integrity** – data cannot be modified undetectably.

- **Availability** – access is not inappropriately blocked or denied.
- **Authenticity** – validation that the parties to a transaction are who they say they are and that their communications are genuine.
- **Non-repudiation** – parties to a transaction cannot deny their participation in the transaction.
- **Auditability** – track and log data changes including the user or system making the change. Track and log any inquiries, views or access of data that may require such tracking as a result of law, policy or data use agreements including user or system making inquiry, doing the viewing or accessing the data along with the data and time of the inquiry, view or access.

The Framework for the Solution must be architecturally-rich. A framework should have a thoughtful architecture that is better than one in which an organization would normally invest for a single project. Because a framework is intended to be reusable, the framework developer must ensure that the breadth and depth of the services extend to cover the uses that can be reasonably foreseen. Other attributes of the architecture are:

- The functional and structural abstractions chosen to implement the architecture are intuitive, robust, and consistent. Confusing, frail, or inconsistent architectures can destroy using development organization productivity and induce high defect rates.
- The framework is easily extensible. Lacking extensibility, a framework is merely an incomplete software application.
- The framework supports scalable, high-performance applications.
- Security and privacy are built into the architecture as primary considerations rather than as afterthoughts.

The Framework for the Solution must enhance the productivity of the using organization.

An important reason for an organization to use a framework is to improve productivity. The increase in productivity should enable an organization to deliver needed capabilities more rapidly and at a lower cost. It should also enable the organization to respond to life-cycle changes in business needs with greater agility. Frameworks enhance productivity by:

- Providing tools that assist the using organization in performing common, redundant, or complex tasks with ease.
- Providing pre-constructed features, services, and capabilities with default behavior that shorten the time from inception to deployment while allowing fine-grained control to avoid the need for workarounds.
- Being supported by a long-term maintenance concept that continues to improve the features and usability of the framework, reduces the burden of workarounds (particularly security workarounds), and minimizes “reinventing the wheel” by the using organization.
- Using self-documenting tools (e.g., maintaining the official business process diagrams in the business process management system) to avoid having to maintain business and technical design artifacts in multiple locations.

The Framework for the Solution should be multi-platform unless user or enterprise needs require targeting specific hardware/operating system platforms. As the use of specific CPUs, hardware architectures, and operating systems change rapidly, the Department prefers not to be tightly bound to a particular platform. Support for various platforms such as Windows,

z/OS, Linux, and various UNIX is desirable. In addition, the Department strongly prefers the use of products that can be run in virtualized environments while recognizing that some components may have performance needs that preclude or contraindicate the use of virtualization.

Additionally, the current migration towards mobile platforms is likely to continue for the foreseeable future. A framework should assist with and automate activities needed to optimize applications for mobile devices as well as desktop devices, including addressing touch interfaces; limited display sizes; limited bandwidth and intermittent network connectivity; limited processor capabilities; and the movement towards standards-based Web technologies, such as HTML 5.

Frameworks should minimize the number of programming languages necessary for their use, consistent with developer need and balanced against other principles. The Department has the following goals for various types of programming languages:

- General – the Department prefers using open, standards-defined programming languages to the greatest extent practical. The Department understands that there are some domains today (particularly business rules and business process management) where standards are still emerging and permeating the market.
- Object-oriented – the Department prefers the use of a single object-oriented language, that uses automated memory management, to create the majority of custom services and to extend the Framework. While it would consider other languages, the Department prefers Java.
- Procedural – the Department prefers little or no use of procedural languages (e.g., C) in the Framework.
- Declarative – the Department prefers that declarative languages (e.g., HTML) largely be limited to displaying Web-based user interfaces. Even when building user interfaces, the Department prefers to substantially limit the amount of hand-coding necessary by using graphical design and construction tools.
- Scripting – the Department prefers that scripting languages be limited to functions such as user interface code, build management, system startup, and integration with non-service based external systems. Even when performing these functions, the Department prefers to substantially limit the amount of hand-coding necessary by using graphical design and construction tools.
- Business rules – the Department prefers that business rules are represented in English-like statements that are easy to interpret by business users and business analysts. While the Department is not currently planning to allow business analysts to make changes directly to a production system, the ability for these analysts to create and interpret the business rules in the Framework’s native rules language will substantially improve productivity and agility in managing business rules. Based on the Department of the market, the Department would be willing to accept rules languages that are more developer-focused.
- Business Process Management System (BPMS) – the Department prefers the use of Business Process Execution Language (BPEL) for executing managed business processes. Direct consumption of Business Process Model and Notation models (perhaps via the XML Process Definition Language format) is also acceptable. As this area is still maturing, the Department would accept other languages for BPMS process execution, particularly if they are transformable to BPEL for forward compatibility. While the

Department would like direct access to the process execution files for manipulation, including the ability to “round trip” modifications through the Integrated Development Environment, the BPMS must have graphical design and construction tools as directly coding BPEL and other related languages would likely result in substantial productivity reductions and an increase in defects.

- Database – the Department prefers the use of standards-based Structured Query Language (SQL) for database queries. Based on the use of other languages and general purpose frameworks within the Framework (e.g., Java), programming language-specific query languages may also be acceptable (either for relational or object queries). The Department discourages the use of database stored procedures or DBMS specific functionality other than in those instances where needed performance can only be obtained with such use.
- XML-based – the Department encourages the use of XML-based documents for purposes such as system configuration and messaging. The Framework should generate documents without requiring the developer to hand-code XML; however, direct access to the XML documents for manipulation is desirable, including the ability to “round trip” modifications through the Integrated Development Environment.
- Proprietary languages – while there may be specific needs for using proprietary programming languages, the Department prefers to avoid proprietary languages to the greatest extent practical.

1.5.2 Areas of Commonality

In the list below, the Department has identified the areas of commonality it expects to be supplied by the Framework or supplied by the Department to supplement the Framework. These have been identified using common product-oriented terminology, but that does not mean that each capability must be satisfied by a separate, self-contained product. While the Department has a preference for using general purpose COTS products to perform major functions (where Framework capabilities and performance are not compromised), it is not mandating that the functions of the major capabilities be supplied by general purpose COTS products nor is it mandating that the functions are even performed by standalone software services partitioned as listed below. For example, while the Department prefers the use of general purpose COTS business process management and business rules management components, it would be willing to accept an integrated business process/business rules capability as part of the Contractor’s COTS suite. The Department does not intend the list of capabilities to be all-inclusive. Bidders must propose a complete suite of capabilities to comprise the Framework.

1.5.2.1 Framework Areas of Commonality

The following areas of commonality and capabilities are consistent with the State’s goals for the Framework and should be addressed in system solutions:

- **Unified data source/database** – this is a capability to store/persist information using a unified data model on a common database product. The unified data source should support the use of effective time segments and a “never delete a record” approach to enable maintaining complete historical data and referential integrity.
- **Business Process Management** – this is a capability to design and execute business processes enabled by automation for the purposes of orchestration (automated execution

of a workflow) and choreography (coordinated interaction between two or more independent parties or services). While these may include steps executed synchronously, business process management tools excel at automating processes where most or all tasks are executed asynchronously, potentially over extended periods of time.

- **Business Activity Monitoring (BAM)** – this is a capability to monitor and manage business processes, transaction volumes, and quality indicators, in real time and retrospectively. This capability may include statistical analyses of the execution of the indicators being monitored.
- **Business Rules Management** – this is a capability to design and manage the business rules logic within the system and is supported by a repository for the rules.
- **Interaction Management** – this is a capability that allows an organization to manage information about and interactions with stakeholders or clients via multiple channels including easy access to historical data.
- **Case Management** – this is a capability that allows an organization to manage information and transactional activities over time relative to a specific entity.
- **Correspondence** – this is a capability to generate and manage communications with stakeholders via multiple channels, and includes the ability to generate canned, semi-custom, and custom messages.
- **Service Integration/Enterprise Service Bus** – this is a capability that allows the discovery and interaction of distributed services via synchronous and asynchronous messaging in a service-oriented architecture. Through adapters, service integration should also allow interaction with non-service based capabilities.
- **Web Portal** – this is a capability that allows for configurable Web access to backend services. While any sort of Web page could conceivably allow access, a Web portal automates the access, security, and configuration of Web access, and is configurable by not only the developers, but to a limited extent by the end users (e.g., what information is shown and where on the page is it shown).
- **Reporting/Business Intelligence** – this is a capability that allows for textual, tabular, and graphical representations of data needed to answer questions, monitor/control parameters, and make decisions and querying to gather data to fill these reports.
- **Call Center Integration** – this is a capability for the Framework (and resulting system) to integrate with common call center technology to be able to link telephone calls to records, automatically call up useful information for the call center operator, etc.
- **Integrated Development Environment** – this is a capability to develop, integrate, build, test, deploy, and control configuration of software using a unified, integrated, and coherent suite of tools.
- **Security** – while security is an attribute that should apply across the suite of capabilities in the Framework, in this particular case it is a capability to manage authentication, authorization, and access to the system, including a single sign-on capability.
- **Data Management Tools** - This is the capability of collecting, aggregating, matching, consolidating, persisting, securing and distributing data and its meta data to ensure consistency and control in the ongoing maintenance and use of the information.
- **Online Help** – this is the capability to manage, produce, and publish help files, training, and reference information that is integrated in a context-sensitive fashion with the Framework and resulting applications.

- **Document Management*** - this is a capability to store, index, and access electronic documents and images of paper documents in a structured and scalable manner. The capability may have standalone uses or be integrated into an enterprise system via documented interfaces or services.

*Note that the State has designated and procured Hyland OnBase as the enterprise document management system. The preference would be to leverage OnBase as part of the Framework, therefore the Bidder should provide details regarding how their proposed Framework could integrate seamlessly with OnBase.

Nebraska EES Analysis

Request for Proposal Number 4544Z1

1. Summary of the Alternatives Analysis

As part of the systems strategy development process for the Medicaid Eligibility & Enrollment and Information Systems project, we considered a number of system options for delivering integrated eligibility, enrollment and case management functionality which satisfies the requirements of the ACA. The options were ultimately consolidated into four primary alternatives for comparison and evaluation purposes. Those options were:

1. Maintain Status Quo
2. Ground Up Development
3. Incremental Modernization
4. Transfer/COTS System

2. Evaluation Criteria and Results

The set of criteria that was used to evaluate these alternatives was primarily based upon the architectural principles set forth by the Centers for Medicare & Medicaid Services (CMS), which are presented and described in the following table.

Table 2-1: Description of Evaluation Criteria Used	Description
System Integration	<p>Applies a modular, flexible approach to systems development, including the use of open interfaces and exposed application programming interfaces, and the separation of business rules from core programming, available in both human and machine readable formats.</p> <p>Ensures seamless coordination between Medicaid, DHCP, and the Exchange, and allows interoperability with health information exchanges, public health agencies, human services programs, and community organizations providing outreach and enrollment assistance services.</p>
Service-Oriented Architecture (SOA)	Employs common authoritative data sources and data exchange services such as but not limited to, federal and state agencies or other commercial entities.
Isolation of Business Rules	Uses standards-based business rules and a technology-neutral business rules repository. Enables the business rules to be accessible and adaptable by other states.

OPENING DATE AND TIME	PROCUREMENT CONTACT
September 24, 2013 2:00 p.m. Central Time	Peter A. Kroll Robert Thompson

This form is part of the specification package and must be signed and returned, along with proposal documents, by the opening date and time specified.

PLEASE READ CAREFULLY!

SCOPE OF SERVICE

The State of Nebraska, Administrative Services (AS), Materiel Division, Purchasing Bureau, is issuing this Request for Proposal, RFP Number 4468Z1 for the purpose of selecting a qualified contractor to provide Eligibility and Enrollment Solution (EES) Independent Verification and Validation (IV&V) Services.

Written questions are due no later than August 30, 2013, and should be submitted via e-mail to as.materielpurchasing@nebraska.gov. Written questions may also be sent by facsimile to (402) 471-2089.

Bidder should submit one (1) original and six (6) hardcopies of the entire proposal. In the event of any inconsistencies among the proposals, the language contained in the original proposal shall govern. Proposals must be submitted by the proposal due date and time.

PROPOSALS MUST MEET THE REQUIREMENTS OUTLINED IN THIS REQUEST FOR PROPOSAL TO BE CONSIDERED VALID. PROPOSALS WILL BE REJECTED IF NOT IN COMPLIANCE WITH THESE REQUIREMENTS.

1. Sealed proposals must be received in State Purchasing by the date and time of proposal opening indicated above. No late proposals will be accepted. No electronic, e-mail, fax, voice, or telephone proposals will be accepted.
2. This form "REQUEST FOR PROPOSAL FOR CONTRACTUAL SERVICES" MUST be manually signed, in ink, and returned by the proposal opening date and time along with bidder's proposal and any other requirements as specified in the Request for Proposal in order to be considered for an award.
3. It is the responsibility of the bidder to check the website for all information relevant to this solicitation to include addenda and/or amendments issued prior to the opening date. Website address is as follows:
<http://das.nebraska.gov/materiel/purchasing/rfp.htm>
4. It is understood by the parties that in the State of Nebraska's opinion, any limitation on the contractor's liability is unconstitutional under the Nebraska State Constitution, Article XIII, Section 3, and that any limitation of liability shall not be binding on the State of Nebraska despite inclusion of such language in documents supplied with the contractor's bid or in the final contract.

BIDDER MUST COMPLETE THE FOLLOWING

By signing this Request for Proposal For Contractual Services form, the bidder guarantees compliance with the provisions stated in this Request for Proposal, agrees to the terms and conditions (see Section III) and certifies that bidder maintains a drug free work place environment.

GLOSSARY OF TERMS

AABD (Assistance to the Aged, Blind and Disabled): Medicaid available to certain Nebraskans to assist with medical expenses. Nebraskans who are aged, blind or have a disability (as classified by the Social Security Administration) must meet established financial guidelines in order to be eligible. Some consumers in the AABD Medicaid program access services through managed care while the remaining population access care through a fee-for-service delivery system.

Acceptance Test Procedure: Benchmarks and other performance criteria, developed by the State of Nebraska or other sources of testing standards, for measuring the effectiveness of products or services and the means used for testing such performance.

ACA (Affordable Care Act): On March 23, 2010, President Obama signed into law the Patient Protection and Affordable Care Act. On March 30, 2010, the Health Care and Education Reconciliation Act of 2010 was signed into law. The two laws are collectively referred to as the Affordable Care Act (ACA). ACA is also referred to as the “health reform act” or “Patient Protection and Affordable Care Act (PPACA).

ACCESSNebraska Web Portal: The public application portal for various Nebraska public assistance benefit programs such as: Medicaid, Supplemental Nutritional Assistance Program (SNAP), Aid to Dependent Children (ADC), Aid to Aged, Blind and Disabled, Energy Assistance, Kids Connection, and Child Care Subsidy.

Addendum: Something added or deleted.

Agency: Any state agency, board, or commission other than the University of Nebraska, the Nebraska State colleges, the courts, the Legislature, or any officer or agency established by the Constitution of Nebraska.

Agent: A person authorized by a superior or organization to act on their behalf.

Amend: To alter or change by adding, subtracting, or substituting. A contract can be amended only by the parties participating in the contract. A written contract can only be amended in writing.

Amendment: Written correction or alteration.

Appropriation: Legislative authorization to expend public funds for a specific purpose. Money set apart for a specific use.

Award: All purchases, leases, or contracts which are based on competitive proposals will be awarded according to the provisions in the Request for Proposal. The State reserves the right to reject any or all proposals, wholly or in part, or to award to multiple bidders in whole or in part. The State reserves the right to waive any deviations or errors that are not material, do not invalidate the legitimacy of the proposal, and do not improve the bidder’s competitive position. All awards will be made in a manner deemed in the best interest of the State.

Best and Final Offer (BAFO): A second-stage bid in a public procurement for services.

Bid: The executed document submitted by a bidder in response to a Request for Proposal.

Bid Bond: A bond given by a surety on behalf of the bidder to ensure that the bidder will enter into the contract as bid and is retained by the State from the date of the bid opening to the date of contract signing.

Bidder: Any person or entity submitting a competitive bid response to a solicitation.

Business: Any corporation, partnership, individual, sole proprietorship, joint-stock company, joint venture, or any other private legal entity.

Business Day: Any weekday, excepting public holidays.

Calendar Day: Every day shown on the calendar; Saturdays, Sundays and State/Federal holidays included. Not to be confused with "Work Day".

Centers for Medicare & Medicaid Services (CMS): is a federal agency within the United States Department of Health and Human Services (DHHS) that administers the Medicare program and works in partnership with state governments to administer Medicaid, the Children's Health Insurance Program (CHIP), and health insurance portability standards.

CHIP (Children's Health Insurance Program): Enacted in 1997, CHIP is a federal-state program that provides health care coverage for uninsured low-income children who are not eligible for Medicaid. States have the option of administering CHIP through their Medicaid programs or through a separate program (or a combination of both). The federal government matches state spending for CHIP but federal CHIP funds are capped.

Collusion: A secret agreement or cooperation between two or more persons or entities to accomplish a fraudulent, deceitful or unlawful purpose.

Competition: The process by which two or more vendors vie to secure the business of a purchaser by offering the most favorable terms as to price, quality, delivery and/or service.

Confidential Information: Unless otherwise defined below, "Confidential Information" shall also mean proprietary trade secrets, academic and scientific research work which is in progress and unpublished, and other information which if released would give advantage to business competitors and serve no public purpose (see Neb. Rev. Stat. §84-712.05(3)). In accordance with Nebraska Attorney General Opinions 92068 and 97033, proof that information is proprietary requires identification of specific, named competitor(s) who would be advantaged by release of the information and the specific advantage the competitor(s) would provide.

Configure: Modification to software that does not require changes to the Source Code for such software. This includes rules-based, rules engine based, or parameter driven modification.

Contract: An agreement between two or more persons to perform a specific act or acts.

Contract Administration: The Management of various facets of contracts to assure that the contractors total performance is in accordance with the contractual commitments and obligations to the purchaser are fulfilled.

Contract Management: Includes reviewing and approving of changes, executing renewals, handling disciplinary actions, adding additional users, and any other form of action that could change the contract.

Contractor: Any person or entity that supplies goods and/or services.

Conversion Period: A period of time not to exceed six (6) months, during which the State converts to a new Operating System under "Conversion" as per this RFP.

Copyright: A grant to a writer/artist that recognizes sole authorship/creation of a work and protects the creator's interest(s) therein.

CPU: Any computer or computer system that is used by the State to store, process, or retrieve data or perform other functions using Operating Systems and applications software.

Critical Program Error: Any Program Error, whether or not known to the State, which prohibits or significantly impairs use of the Licensed Software as set forth in the documentation and intended in the contract.

Default: The omission or failure to perform a contractual duty.

Deviation: Any proposed change(s) or alteration(s) to either the contractual language or deliverables within the scope of this Request for Proposal.

Documentation: The user manuals and any other materials in any form or medium customarily provided by the contractor to the users of the Licensed Software which will provide the State with sufficient information to operate, diagnose, and maintain the Licensed Software properly, safely, and efficiently.

Evaluation Committee: A committee (or committees) appointed by the requesting agency that advises and assists the procuring office in the evaluation of proposals.

Evaluation of Proposal: The process of examining a proposal after opening to determine the bidder's responsibility, responsiveness to requirements, and to ascertain other characteristics of the proposal that relate to determination of the successful bidder.

Extension: A provision, or exercise of a provision, of a contract that allows a continuance of the contract (at the option of the State of Nebraska) for an additional time according to contract conditions. Not to be confused with "Renewals."

FOA (Funding Opportunity Announcement): A publicly available document by which a U.S. Federal agency makes known its intentions to award discretionary grants or cooperative agreements, usually as a result of competition for funds. Funding opportunity announcements may be known as program announcements, requests for applications, notices of funding availability, solicitations, or other names depending on the agency and type of program

F.O.B. Destination: Free on Board. The delivery charges have been included in the quoted price and prepaid by the vendor. Vendor is responsible for all claims associated with damages during delivery of product.

Foreign Corporation: A foreign corporation is a corporation that was formed (i.e. incorporated) in another state but transacting business in Nebraska pursuant to a certificate of authority issued by the Nebraska Secretary of State.

HIPAA (Health Insurance Portability and Accountability Act of 1996): The Standards for Security and Privacy of Individually Identifiable Health Information found in the Health Insurance Portability and Accountability Act of 1996, Public Law 104-91, as amended and related HIPAA regulations at 45 C.F.R. part 160-164, as in effect or as amended.

Installation Date: The date when the procedures described in "Installation by Contractor, and Installation by State", as found in the RFP, are completed.

Late Proposal: A proposal received at the place specified in the solicitation after the date and time designated for all proposals to be received.

Licensed Software: Any and all software and documentation by which the State acquires or is granted any rights under this contract

Local Time: Central Time in Lincoln, NE.

MAGI (Modified Adjusted Gross Income): A definition of income from the tax system that will be used to determine eligibility for certain categories of Medicaid eligibility in addition to tax credits available to people buying insurance in exchanges.

Mandatory: Required, compulsory or obligatory.

May: Denotes discretion.

MITA (Medicaid Information Technology Architecture): an initiative of the Centers for Medicare and Medicaid Services (CMS), aligned with the National Health Infrastructure Initiative (NHII), and intended to foster integrated business and information technology transformation across the Medicaid enterprise to improve the administration of the Medicaid program.

Module: A collection of routines and data structures that perform a specific function of the Licensed Software.

Must: Denotes the imperative, required, compulsory or obligatory

N-FOCUS: (Nebraska Family Online Client User System) The Department's software application used to support eligibility determinations for Nebraska Medicaid, Nebraska CHIP and various Economic Assistance Programs. This system also provides additional functionality such as case management, provider management and payment calculations.

Opening Date: Specified date and time for the public opening of received, labeled and sealed formal proposals. Not to be confused with "Release Date".

Operating System: The control program in a computer that provides the interface to the computer hardware and peripheral devices, and the usage and allocation of memory resources, processor resources, input/output resources, and security resources.

Outsourcing: Acquiring computing or related services from a source outside of the State of Nebraska which may include programming and/or executing the State's Licensed Software on the State's CPU's, programming, and/or executing the State's programs and Licensed Software on the contractor's CPU's or any mix thereof.

Outsourcing Company: A company that provides Outsourcing Services under contract to the State.

Performance Bond: A bond given by a surety on behalf of the contractor to ensure the timely and proper (in sole estimation of the State) performance of a contract.

PHI (Protected Health Information): Individually identifiable health information that is transmitted by, or maintained in, electronic media or any other form or medium. Individually identifiable health information is information that is a subset of health information, including demographic information collected from an individual, and 1) is created or received by a healthcare provider, health plan, employer, or healthcare clearinghouse; and 2) related to the past, present, or future physical or

mental health or condition of an individual; the provision of healthcare to an individual; or the past, pre-sent, or future payment for the provision of healthcare to an individual; (i) that identifies the individual; or (ii) with respect to which there is a reasonable basis to believe the information can be used to identify the individual.

PII (Personally Identifiable Information): Information: 1) that directly identifies an individual (e.g., name, address, social security number or other identifying number or code, telephone number, email, address, etc.), or 2) by which an agency intends to identify specific individuals in conjunction with other data elements, e.g., indirect identification. (These data elements may include a combination of gender, race, birth date, geographic indicator, and other descriptors.)

Platform: A specific hardware and Operating System combination that is different from other hardware and Operating System combinations to the extent that a different version of the Licensed Software product is required to execute properly in the environment established by such hardware and Operating System combination.

PPACA (Patient Protection and Affordable Care Act): See ACA: Affordable Care Act.

Pre-Proposal Conference: A meeting scheduled for the purpose of providing clarification regarding a Request for Proposal and related expectations.

Product: A module, a system, or any other software-related item provided by the contractor to the State.

Program Error: Code in Licensed Software which produces unintended results or actions, or which produces results or actions other than those described in the specifications. A program error includes, without limitation, any "Critical Program Error."

Program Set: The group of programs and products, including the Licensed Software specified in the RFP, plus any additional programs and products licensed by the State under this contract for use by the State.

Project: The total of all software, documentation, and services to be provided by the contractor under this contract.

Proposal: The executed document submitted by a bidder in response to a Request for Proposal.

Proprietary Information: Proprietary information is defined as trade secrets, academic and scientific research work which is in progress and unpublished, and other information which if released would give advantage to business competitors and serve no public purpose (see Neb. Rev. Stat. §84-712.05(3)). In accordance with Attorney General Opinions 92068 and 97033, proof that information is proprietary requires identification of specific, named competitor(s) who would be advantaged by release of the information and the specific advantage the competitor(s) would receive.

Protest: A complaint about a governmental action or decision related to a Request for Proposal or the resultant contract, brought by a prospective bidder, a bidder, a contractor, or other interested party to AS Materiel Division or another designated agency with the intention of achieving a remedial result.

Public Proposal Opening: The process of opening proposals, conducted at the time and place specified in the Request for Proposal, and in the presence of anyone who wishes to attend.

Recommended Hardware Configuration: The data processing hardware (including all terminals, auxiliary storage, communication, and other peripheral devices) to the extent utilized by the State as

recommended by the contractor.

Release Date: Date of release of the Request for Proposal to the public for submission of proposal responses. Not to be confused with “Opening Date”.

Renewal: Continuance of a contract for an additional term after a formal signing by the parties.

Representative: Includes an agent, an officer of a corporation or association, a trustee, executor or administrator of an estate, or any other person legally empowered to act for another.

Request for Proposal (RFP): All documents, whether attached or incorporated by reference, utilized for soliciting competitive proposals.

Responsible Bidder: A bidder who has the capability in all respects to perform fully all requirements with integrity and reliability to assure good faith performance.

Responsive Bidder: A bidder who has submitted a bid which conforms in all respects to the solicitation document.

Seven Standards and Conditions for Enhanced Funding: The Centers for Medicare & Medicaid Services (CMS) issued standards and conditions that must be met by the states in order for Medicaid technology investments (including traditional claims processing systems, as well as eligibility systems) to be eligible for enhanced match funding.

Shall: Denotes the imperative, required, compulsory or obligatory.

Should: Indicates an expectation.

SOA (Service Oriented Architecture): A set of principles and methodologies for designing and developing software in the form of interoperable services. These services are well-defined business functionalities that are built as software components (discrete pieces of code and/or data structures) that can be reused for different purposes. SOA design principles are used during the phases of systems development and integration.

Solicitation: The process of notifying prospective bidders or offerors that the State of Nebraska wishes to receive proposals for furnishing services. The process may consist of public advertising, posting notices, or mailing Request for Proposals and/or Request for Proposal announcement letter to prospective bidders, or all of these.

Solicitation Document: Request for Proposal.

Specifications: The information provided by or on behalf of the contractor that fully describes the capabilities and functionality of the Licensed Software as set forth in any material provided by the contractor, including the documentation and User’s Manuals described herein.

System: Any collection or aggregation of two (2) or more Modules that is designed to function, or is represented by the contractor as functioning or being capable of functioning as an entity.

Termination: Occurs when either party pursuant to a power created by agreement or law puts an end to the contract. All obligations which are still executory on both sides are discharged but any right based on prior breach or performance survives.

Trademark: A distinguishing sign, symbol, mark, word, or arrangement of words in the form of a label

or other indication, that is adopted and used by a manufacturer or distributor to designate its particular goods and which no other person has the legal right to use.

Trade Secret: Information, including, but not limited to, a drawing, formula, pattern, compilation, program, device, method, technique, code, or process that; (a) derives independent economic value, actual or potential, from not being known to, and not being ascertainable by proper means, other persons who can obtain economic value from its disclosure or use; and (b) is the subject of efforts that are reasonable under the circumstances to maintain its secrecy (see Neb. Rev. Stat. §87-502(4)).

Upgrade: Any improvement or change in the Software that improves or alters its basic function.

Vendor: An actual or potential contractor; a contractor

Will: Denotes the imperative, required, compulsory or obligatory.

I. SCOPE OF THE REQUEST FOR PROPOSAL

The State of Nebraska, Administrative Services (AS), Materiel Division, Purchasing Bureau, is issuing this Request for Proposal, RFP Number 4468Z1 for the purpose of selecting a qualified contractor to provide Eligibility and Enrollment Solution (EES) Independent Verification and Validation (IV&V) Services.

The IV&V contractor awarded the IV&V contract for the EES project, their subcontractor(s) and vendor(s) are precluded from submitting an EES proposal, assisting another company in making a proposal, or otherwise materially participating in any subsequent contract related to the EES project.

A contract resulting from this Request for Proposal will be issued from the date of the award through December 31, 2015, with the option to renew for one (1) additional six-month period as mutually agreed upon by all parties.

ALL INFORMATION PERTINENT TO THIS REQUEST FOR PROPOSAL CAN BE FOUND ON THE INTERNET AT: <http://www.das.state.ne.us/materiel/purchasing/rfp.htm>

A. SCHEDULE OF EVENTS

The State expects to adhere to the tentative procurement schedule shown below. It should be noted, however, that some dates are approximate and subject to change.

	ACTIVITY	DATE/TIME
1.	Release Request for Proposal	August 16, 2013
2.	Last day to submit written questions	August 30, 2013
3.	State responds to written questions through Request for Proposal "Addendum" and/or "Amendment" to be posted to the Internet at: http://www.das.state.ne.us/materiel/purchasing/rfp.htm	September 6, 2013
4.	Proposal opening Location: Nebraska State Office Building State Purchasing Bureau 301 Centennial Mall South, Mall Level Lincoln, NE 68508	September 24, 2013 2:00 PM Central Time
5.	Review for conformance of mandatory requirements	September 24, 2013
6.	Evaluation period	September 25, 2013 To October 11, 2013
7.	"Oral Interviews/Presentations and/or Demonstrations" (if required)	October 11, 2013 To November 1, 2013
8.	Post "Letter of Intent to Contract" to Internet at: http://www.as.materielpurchasing@nebraska.gov/rfp.htm	November 4, 2013
9.	Performance bond submission	November 11, 2013
10.	Contract award	November 11, 2013
11.	Contractor start date	November 15, 2013

II. PROCUREMENT PROCEDURES

A. PROCURING OFFICE AND CONTACT PERSON

Procurement responsibilities related to this Request for Proposal reside with the State Purchasing Bureau. The point of contact for the procurement is as follows:

Name: Peter Kroll/Robert Thompson
Agency: State Purchasing Bureau
Address: 301 Centennial Mall South, Mall Level
Lincoln, NE 68508

B. GENERAL INFORMATION

The Request for Proposal is designed to solicit proposals from qualified vendors who will be responsible for providing Eligibility and Enrollment Solution (EES) Independent Verification and Validation (IV&V) Services at a competitive and reasonable cost. Proposals that do not conform to the mandatory items as indicated in the Request for Proposal will not be considered.

Proposals shall conform to all instructions, conditions, and requirements included in the Request for Proposal. Prospective bidders are expected to carefully examine all documentation, schedules and requirements stipulated in this Request for Proposal, and respond to each requirement in the format prescribed.

A fixed-price contract will be awarded as a result of this proposal. In addition to the provisions of this Request for Proposal and the awarded proposal, which shall be incorporated by reference in the contract, any additional clauses or provisions required by the terms and conditions will be included as an amendment to the contract.

C. COMMUNICATION WITH STATE STAFF

From the date the Request for Proposal is issued until a determination is announced regarding the selection of the contractor, contact regarding this project between potential contractors and individuals employed by the State is restricted to only written communication with the staff designated above as the point of contact for this Request for Proposal.

Once a contractor is preliminarily selected, as documented in the intent to contract, that contractor is restricted from communicating with State staff until a contract is signed. Violation of this condition may be considered sufficient cause to reject a contractor's proposal and/or selection irrespective of any other condition.

The following exceptions to these restrictions are permitted:

1. written communication with the person(s) designated as the point(s) of contact for this Request for Proposal or procurement;
2. contacts made pursuant to any pre-existing contracts or obligations; and

3. state-requested presentations, key personnel interviews, clarification sessions or discussions to finalize a contract.

Violations of these conditions may be considered sufficient cause to reject a bidder's proposal and/or selection irrespective of any other condition. No individual member of the State, employee of the State, or member of the Evaluation Committee is empowered to make binding statements regarding this Request for Proposal. The buyer will issue any clarifications or opinions regarding this Request for Proposal in writing.

D. WRITTEN QUESTIONS AND ANSWERS

Any explanation desired by a bidder regarding the meaning or interpretation of any Request for Proposal provision must be submitted in writing to the State Purchasing Bureau and clearly marked "RFP Number 4468Z1; Eligibility and Enrollment Solution (EES) Independent Verification and Validation (IV&V) Services Questions". It is preferred that questions be sent via e-mail to as.materielpurchasing@nebraska.gov Questions may also be sent by facsimile to 402-471-2089, but must include a cover sheet clearly indicating that the transmission is to the attention of Buyer, showing the total number of pages transmitted, and clearly marked "RFP Number 4468Z1; Eligibility and Enrollment Solution (EES) Independent Verification and Validation (IV&V) Services Questions".

It is recommended that Bidders submit questions sequentially numbered, include the RFP reference and page number using the following format:

Question Number	RFP Section Reference	RFP Page Number	Question

Written answers will be provided through an addendum to be posted on the Internet at <http://das.nebraska.gov/materiel/purchasing/rfp.htm> on or before the date shown in the Schedule of Events.

E. ORAL INTERVIEWS/PRESENTATIONS AND/OR DEMONSTRATIONS

The Evaluation Committee(s) may conclude after the completion of the Technical and Cost Proposal evaluation that oral interviews/presentations and/or demonstrations are required in order to determine the successful bidder. All bidders may not have an opportunity to interview/present and/or give demonstrations; the State reserves the right to select only the top scoring bidders to present/give oral interviews in its sole discretion. The scores from the oral interviews/presentations and/or demonstrations will be added to the scores from the Technical and Cost Proposals. The presentation process will allow the bidders to demonstrate their proposal offering, explaining and/or clarifying any unusual or significant elements related to their proposals. Bidders' key personnel will be requested to participate in a structured interview to determine their understanding of the requirements of this proposal, their authority and reporting relationships within their firm, and their management style and philosophy. Bidders shall not be allowed to alter or amend their proposals. Only representatives of the State and the presenting bidders will be permitted to attend the oral interviews/presentations and/or demonstrations.

Once the oral interviews/presentations and/or demonstrations have been completed the State reserves the right to make a contract award without any further discussion with the bidders regarding the proposals received.

Detailed notes of oral interviews/presentations and/or demonstrations may be recorded and supplemental information (such as briefing charts, et cetera) may be accepted; however, such supplemental information shall not be considered an amendment to a bidders' proposal.

Additional written information gathered in this manner shall not constitute replacement of proposal contents.

Any cost incidental to the oral interviews/presentations and/or demonstrations shall be borne entirely by the bidder and will not be compensated by the State.

F. SUBMISSION OF PROPOSALS

The following describes the requirements related to proposal submission, proposal handling and review by the State.

To facilitate the proposal evaluation process, one (1) original, clearly identified as such, and six (6) hardcopies of the entire proposal should be submitted. The copy marked "original" shall take precedence over any other copies, should there be a discrepancy. Proposals must be submitted by the proposal due date and time. A separate sheet must be provided that clearly states which sections have been submitted as proprietary or have copyrighted materials. All proprietary information the bidder wishes the State to withhold must be submitted in accordance with the instructions outlined in Section III, Proprietary Information. Proposal responses should include the completed Form A, Bidder Contact Sheet. Proposals must reference the request for proposal number and be sent to the specified address. Container(s) utilized for original documents should be clearly marked "ORIGINAL DOCUMENTS". Please note that the address label should appear in Section II part A as specified on the face of each container or bidder's bid response packet. Rejected late proposals will be returned to the bidder unopened, if requested, at bidder's expense. If a recipient phone number is required for delivery purposes, 402-471-2089 should be used. The request for proposal number must be included in all correspondence.

Emphasis should be concentrated on conformance to the Request for Proposal instructions, responsiveness to requirements, completeness and clarity of content. If the bidder's proposal is presented in such a fashion that makes evaluation difficult or overly time consuming, it is likely that points will be lost in the evaluation process. Elaborate and lengthy proposals are neither necessary nor desired.

The Technical and Cost Proposals should be packaged separately (loose-leaf binders are preferred) on standard 8 ½" by 11" paper, except that charts, diagrams and the like may be on fold-outs which, when folded, fit into the 8 ½" by 11" format. Pages may be consecutively numbered for the entire proposal, or may be numbered consecutively within sections. Figures and tables must be numbered and referenced in the text by that number. They should be placed as close as possible to the referencing text. The Technical Proposal must not contain any reference to dollar amounts. However, information such as data concerning labor hours and categories, materials, subcontracts and so forth, shall be considered in the Technical Proposal so that the bidder's understanding of the scope of work may be evaluated. The Technical Proposal shall disclose the bidder's technical approach in as much detail as possible, including, but not limited to, the information required by the Technical Proposal instructions.

G. PROPOSAL OPENING

The sealed proposals will be publicly opened and the bidding entities announced on the date, time and location shown in the Schedule of Events. Proposals will be available for viewing by those present after the proposal opening. Vendors may also contact the State to schedule an appointment for viewing proposals after the opening date.

H. LATE PROPOSALS

Proposals received after the time and date of the proposal opening will be considered late proposals. Rejected late proposals will be returned to the bidder unopened, if requested, at bidder's expense. The State is not responsible for proposals that are late or lost due to mail service inadequacies, traffic or any other reason(s).

I. REJECTION OF PROPOSALS

The State reserves the right to reject any or all proposals, wholly or in part, or to award to multiple bidders in whole or in part. The State reserves the right to waive any deviations or errors that are not material, do not invalidate the legitimacy of the proposal and do not improve the bidder's competitive position. All awards will be made in a manner deemed in the best interest of the State.

J. EVALUATION OF PROPOSALS

All responses to this Request for Proposal which fulfill all mandatory requirements will be evaluated. Each category will have a maximum possible point potential. The State will conduct a fair, impartial and comprehensive evaluation of all proposals in accordance with the criteria set forth below. Areas that will be addressed and scored during the evaluation include:

1. Executive Summary;
2. Corporate Overview shall include but is not limited to;
 - a. the ability, capacity and skill of the bidder to deliver and implement the system or project that meets the requirements of the Request for Proposal;
 - b. the character, integrity, reputation, judgment, experience and efficiency of the bidder;
 - c. whether the bidder can perform the contract within the specified time frame;
 - d. the quality of bidder performance on prior contracts;
 - e. such other information that may be secured and that has a bearing on the decision to award the contract;
3. Technical Approach
 - a. Program Management/IV&V Project Plan
 - b. Deliverables Review and Acceptance
 - c. Quality Assurance
 - d. Contract Compliance
4. Cost Proposal.

Evaluation criteria will become public information at the time of the Request for Proposal opening. Evaluation criteria and a list of respondents will be posted to the Internet at: <http://www.das.state.ne.us/materiel/purchasing/rfp.htm>. Evaluation criteria will not be released prior to the proposal opening.

K. EVALUATION COMMITTEE

Proposals will be independently evaluated by members of the Evaluation Committee(s). The committee(s) will consist of staff with the appropriate expertise to conduct such proposal evaluations. Names of the members of the Evaluation Committee(s) will not become public information.

Prior to award, bidders are advised that only the point of contact indicated on the front cover of this Request For Proposal For Contractual Services Form can clarify issues or render any

opinion regarding this Request for Proposal. No individual member of the State, employee of the State or member of the Evaluation Committee(s) is empowered to make binding statements regarding this Request for Proposal.

L. MANDATORY REQUIREMENTS

The proposals will first be examined to determine if all mandatory requirements listed below have been addressed to warrant further evaluation. Proposals not meeting mandatory requirements will be excluded from further evaluation. The mandatory requirement items are as follows:

1. signed Request For Proposal For Contractual Services form in ink;
2. Executive Summary;
3. Corporate Overview;
4. Technical Approach; and
5. Cost Proposal.

M. REFERENCE CHECKS

The State reserves the right to check any reference(s), regardless of the source of the reference information, including but not limited to, those that are identified by the company in the proposal, those indicated through the explicitly specified contacts, those that are identified during the review of the proposal, or those that result from communication with other entities involved with similar projects.

Information to be requested and evaluated from references may include, but is not limited to, some or all of the following: project description and background, job performed, functional and technical abilities, communication skills and timeliness, cost and schedule estimates and accuracy, problems (poor quality deliverables, contract disputes, work stoppages, et cetera), overall performance, and whether or not the reference would rehire the firm or individual. Only top scoring bidders may receive reference checks and negative references may eliminate bidders from consideration for award.

N. SECRETARY OF STATE/TAX COMMISSIONER REGISTRATION REQUIREMENTS

All bidders shall be authorized to transact business in the State of Nebraska. All bidders are expected to comply with all Nebraska Secretary of State registration requirements. It is the responsibility of the bidder to comply with any registration requirements pertaining to types of business entities (e.g. person, partnership, foreign or domestic limited liability company, association, or foreign or domestic corporation or other type of business entity). The Bidder who is the recipient of an Intent to Award will be required to certify that it has so complied and produce a true and exact copy of its current (within 90 days), valid Certificate of Good Standing or Letter of Good Standing; or in the case registration is not required, to provide, in writing, the reason as to why none is required. This must be accomplished prior to the award of the contract. Construction contractors are expected to meet all applicable requirements of the Nebraska Contractor Registration Act and provide a current, valid certificate of registration. Further, all bidders shall comply with any and all other applicable Nebraska statutes regarding transacting business in the State of Nebraska. Bidders should submit the above certification(s) with their bid.

O. VIOLATION OF TERMS AND CONDITIONS

Violation of the terms and conditions contained in this Request for Proposal or any resultant contract, at any time before or after the award, shall be grounds for action by the State which may include, but is not limited to, the following:

1. rejection of a bidder's proposal;

2. suspension of the bidder from further bidding with the State for the period of time relative to the seriousness of the violation, such period to be within the sole discretion of the State.

III. TERMS AND CONDITIONS

By signing the "Request For Proposal For Contractual Services" form, the Bidder guarantees compliance with the provisions stated in this Request for Proposal, agrees to the terms and conditions and certifies bidder maintains a drug free work place environment.

Bidders are expected to closely read the Terms and Conditions and provide a binding signature of intent to comply with the Terms and Conditions; provided, however, a bidder may indicate any exceptions to the Terms and Conditions by (1) clearly identifying the term or condition by subsection, (2) including an explanation for the bidder's inability to comply with such term or condition which includes a statement recommending terms and conditions the bidder would find acceptable. Rejection in whole or in part of the Terms and Conditions may be cause for rejection of a bidder's proposal.

The Contractor awarded the IV&V contract for the EES project, their subcontractor(s) and vendor(s) are precluded from submitting an EES proposal, assisting another company in making a proposal, or otherwise materially participating in any subsequent contract related to the EES project.

A. GENERAL

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contract resulting from this Request for Proposal shall incorporate the following documents:

1. Amendment to Contract Award with the most recent dated amendment having the highest priority;
2. Contract Award and any attached Addenda;
3. The signed Request for Proposal form and the Contractor's Proposal;
4. Amendments to RFP and any Questions and Answers; and
5. The original RFP document and any Addenda.

These documents constitute the entirety of the contract.

Unless otherwise specifically stated in a contract amendment, in case of any conflict between the incorporated documents, the documents shall govern in the following order of preference with number one (1) receiving preference over all other documents and with each lower numbered document having preference over any higher numbered document: 1) Amendment to Contract Award with the most recent dated amendment having the highest priority, 2) Contract Award and any attached Addenda, 3) the signed Request for Proposal form and the Contractor's Proposal, 4) Amendments to RFP and any Questions and Answers, 5) the original RFP document and any Addenda.

Any ambiguity in any provision of this contract which shall be discovered after its execution shall be resolved in accordance with the rules of contract interpretation as established in the State of Nebraska.

Once proposals are opened they become the property of the State of Nebraska and will not be returned.

B. AWARD

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

All purchases, leases, or contracts which are based on competitive proposals will be awarded according to the provisions in the Request for Proposal. The State reserves the right to reject any or all proposals, wholly or in part, or to award to multiple bidders in whole or in part, and at its discretion, may withdraw or amend the Request for Proposal at any time. The State reserves the right to waive any deviations or errors that are not material, do not invalidate the legitimacy of the proposal, and do not improve the bidder's competitive position. All awards will be made in a manner deemed in the best interest of the State. The Request for Proposal does not commit the State to award a contract. If, in the opinion of the State, revisions or amendments will require substantive changes in proposals, the due date may be extended.

By submitting a proposal in response to this Request for Proposal, the bidder grants to the State the right to contact or arrange a visit in person with any or all of the bidder's clients.

Once an intent to award decision has been determined, it will be posted to the Internet at: <http://www.das.state.ne.us/materiel/purchasing/rfp.htm>

Grievance and protest procedure is available on the Internet at: <http://www.das.state.ne.us/materiel/purchasing/agencyervicesprocurementmanual/ProtestGrievanceProcedureForServices.doc>

Any protests must be filed by a vendor within ten (10) calendar days after the intent to award decision is posted to the Internet.

C. COMPLIANCE WITH CIVIL RIGHTS LAWS AND EQUAL OPPORTUNITY EMPLOYMENT / NONDISCRIMINATION

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contractor shall comply with all applicable local, State and Federal statutes and regulations regarding civil rights laws and equal opportunity employment. The Nebraska Fair Employment Practice Act prohibits contractors of the State of Nebraska, and their subcontractors, from discriminating against any employee or applicant for employment, with respect to hire, tenure, terms, conditions or privileges of employment because of race, color, religion, sex, disability, or national origin (Neb. Rev. Stat. §48-1101 to 48-1125). The contractor guarantees compliance with the Nebraska Fair Employment Practice Act, and breach of this provision shall be regarded as a material breach of contract. The contractor shall insert a similar provision in all subcontracts for services to be covered by any contract resulting from this Request for Proposal.

D. PERMITS, REGULATIONS, LAWS

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contractor shall procure and pay for all permits, licenses and approvals necessary for the execution of the contract. The contractor shall comply with all applicable local, state, and federal laws, ordinances, rules, orders and regulations.

E. OWNERSHIP OF INFORMATION AND DATA

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The State of Nebraska shall have the unlimited right to publish, duplicate, use and disclose all information and data developed or derived by the contractor pursuant to this contract.

The contractor must guarantee that it has the full legal right to the materials, supplies, equipment, and other rights or titles (e.g. rights to licenses transfer or assign deliverables) necessary to execute this contract. The contract price shall, without exception, include compensation for all royalties and costs arising from patents, trademarks and copyrights that are in any way involved in the contract. It shall be the responsibility of the contractor to pay for all royalties and costs, and the State must be held harmless from any such claims.

F. INSURANCE REQUIREMENTS

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contractor shall not commence work under this contract until he or she has obtained all the insurance required hereunder and such insurance has been approved by the State. If contractor will be utilizing any subcontractors, the contractor is responsible for obtaining the certificate(s) of insurance required herein under from any and all subcontractor(s). Contractor is also responsible for ensuring subcontractor(s) maintain the insurance required until completion of the contract requirements. The contractor shall not allow any subcontractor to commence work on his or her subcontract until all similar insurance required of the subcontractor has been obtained and approved by the contractor. Approval of the insurance by the State shall not limit, relieve or decrease the liability of the contractor hereunder.

If by the terms of any insurance a mandatory deductible is required, or if the contractor elects to increase the mandatory deductible amount, the contractor shall be responsible for payment of the amount of the deductible in the event of a paid claim.

1. WORKERS' COMPENSATION INSURANCE

The contractor shall take out and maintain during the life of this contract the statutory Workers' Compensation and Employer's Liability Insurance for all of the contractors' employees to be engaged in work on the project under this contract and, in case any such work is sublet, the contractor shall require the subcontractor similarly to provide Worker's Compensation and Employer's Liability Insurance for all of the subcontractor's employees to be engaged in such work. This policy shall be written to meet the statutory requirements for the state in which the work is to be performed, including Occupational Disease. This policy shall include a waiver of subrogation in favor of the State. The amounts of such insurance shall not be less than the limits stated hereinafter.

2. COMMERCIAL GENERAL LIABILITY INSURANCE AND COMMERCIAL AUTOMOBILE LIABILITY INSURANCE

The contractor shall take out and maintain during the life of this contract such Commercial General Liability Insurance and Commercial Automobile Liability Insurance as shall protect contractor and any subcontractor performing work covered by this contract from claims for damages for bodily injury, including death, as well as from claims for property damage, which may arise from operations under this contract, whether such operation be by the contractor or by any subcontractor or by anyone

directly or indirectly employed by either of them, and the amounts of such insurance shall not be less than limits stated hereinafter.

The Commercial General Liability Insurance shall be written on an occurrence basis, and provide Premises/Operations, Products/Completed Operations, Independent Contractors, Personal Injury and Contractual Liability coverage. The policy shall include the State, and others as required by the contract documents, as an Additional Insured. This policy shall be primary, and any insurance or self-insurance carried by the State shall be considered excess and non-contributory. The Commercial Automobile Liability Insurance shall be written to cover all Owned, Non-owned and Hired vehicles.

3. INSURANCE COVERAGE AMOUNTS REQUIRED

a. WORKERS' COMPENSATION AND EMPLOYER'S LIABILITY

Coverage A	Statutory
Coverage B	
Bodily Injury by Accident	\$100,000 each accident
Bodily Injury by Disease	\$500,000 policy limit
Bodily Injury by Disease	\$100,000 each employee

b. COMMERCIAL GENERAL LIABILITY

General Aggregate	\$2,000,000
Products/Completed Operations Aggregate	\$2,000,000
Personal/Advertising Injury	\$1,000,000 any one person
Bodily Injury/Property Damage	\$1,000,000 per occurrence
Fire Damage	\$50,000 any one fire
Medical Payments	\$5,000 any one person

c. COMMERCIAL AUTOMOBILE LIABILITY

Bodily Injury/Property Damage	\$1,000,000 combined single limit
-------------------------------	-----------------------------------

d. UMBRELLA/EXCESS LIABILITY

Over Primary Insurance	\$1,000,000 per occurrence
------------------------	----------------------------

4. EVIDENCE OF COVERAGE

The Contractor should furnish the State, with their proposal response, a certificate of insurance coverage complying with the above requirements, which shall be submitted to the Buyer, Administrative Services, State Purchasing Bureau, 301 Centennial Mall S, 1st Fl., Lincoln, NE 68508 (facsimile 402-471-2089). These certificates or the cover sheet shall reference the RFP number, and the certificates shall include the name of the company, policy numbers, effective dates, dates of expiration and amounts and types of coverage afforded. If the State is damaged by the failure of the contractor to maintain such insurance, then the contractor shall be responsible for all reasonable costs properly attributable thereto.

Notice of cancellation of any required insurance policy must be submitted to Buyer, Administrative Services, State Purchasing Bureau, 301 Centennial Mall S, 1st Fl., Lincoln, NE 68508 (facsimile 402-471-2089) when issued and a new coverage binder shall be submitted immediately to ensure no break in coverage.

G. COOPERATION WITH OTHER CONTRACTORS

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The State may already have in place or choose to award supplemental contracts for work related to this Request for Proposal, or any portion thereof.

- 1. The State reserves the right to award the contract jointly between two or more potential contractors, if such an arrangement is in the best interest of the State.
- 2. The contractor shall agree to cooperate with such other contractors, and shall not commit or permit any act which may interfere with the performance of work by any other contractor.

H. INDEPENDENT CONTRACTOR

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

It is agreed that nothing contained herein is intended or should be construed in any manner as creating or establishing the relationship of partners between the parties hereto. The contractor represents that it has, or will secure at its own expense, all personnel required to perform the services under the contract. The contractor's employees and other persons engaged in work or services required by the contractor under the contract shall have no contractual relationship with the State; they shall not be considered employees of the State.

All claims on behalf of any person arising out of employment or alleged employment (including without limit claims of discrimination against the contractor, its officers or its agents) shall in no way be the responsibility of the State. The contractor will hold the State harmless from any and all such claims. Such personnel or other persons shall not require nor be entitled to any compensation, rights or benefits from the State including without limit, tenure rights, medical and hospital care, sick and vacation leave, severance pay or retirement benefits.

I. CONTRACTOR RESPONSIBILITY

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contractor is solely responsible for fulfilling the contract, with responsibility for all services offered and products to be delivered as stated in the Request for Proposal, the contractor's proposal, and the resulting contract. The contractor shall be the sole point of contact regarding all contractual matters.

If the contractor intends to utilize any subcontractors' services, the subcontractors' level of effort, tasks and time allocation must be clearly defined in the contractor's proposal. The contractor shall agree that it will not utilize any subcontractors not specifically included in its proposal, in the performance of the contract, without the prior written authorization of the State. Following execution of the contract, the contractor shall proceed diligently with all services and shall perform such services with qualified personnel in accordance with the contract.

J. CONTRACTOR PERSONNEL

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contractor warrants that all persons assigned to the project shall be employees of the contractor or specified subcontractors, and shall be fully qualified to perform the work required

herein. Personnel employed by the contractor to fulfill the terms of the contract shall remain under the sole direction and control of the contractor. The contractor shall include a similar provision in any contract with any subcontractor selected to perform work on the project.

Personnel commitments made in the contractor's proposal shall not be changed without the prior written approval of the State. Replacement of key personnel, if approved by the State, shall be with personnel of equal or greater ability and qualifications.

The State reserves the right to require the contractor to reassign or remove from the project any contractor or subcontractor employee.

In respect to its employees, the contractor agrees to be responsible for the following:

1. any and all employment taxes and/or other payroll withholding;
2. any and all vehicles used by the contractor's employees, including all insurance required by state law;
3. damages incurred by contractor's employees within the scope of their duties under the contract;
4. maintaining workers' compensation and health insurance and submitting any reports on such insurance to the extent required by governing State law; and
5. determining the hours to be worked and the duties to be performed by the contractor's employees.

Notice of cancellation of any required insurance policy must be submitted to the State when issued and a new coverage binder shall be submitted immediately to ensure no break in coverage.

K. STATE OF NEBRASKA PERSONNEL RECRUITMENT PROHIBITION

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contractor shall not, at any time, recruit or employ any State employee or agent who has worked on the Request for Proposal or project, or who had any influence on decisions affecting the Request for Proposal or project.

L. CONFLICT OF INTEREST

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

By submitting a proposal, bidder certifies that there does not now exist any relationship between the bidder and any person or entity which is or gives the appearance of a conflict of interest related to this Request for Proposal or project.

The bidder certifies that it shall not take any action or acquire any interest, either directly or indirectly, which will conflict in any manner or degree with the performance of its services hereunder or which creates an actual or appearance of conflict of interest.

The bidder certifies that it will not employ any individual known by bidder to have a conflict of interest.

M. PROPOSAL PREPARATION COSTS

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The State shall not incur any liability for any costs incurred by bidders in replying to this Request for Proposal, in the demonstrations, or oral presentations, or in any other activity related to bidding on this Request for Proposal.

N. ERRORS AND OMISSIONS

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The bidder shall not take advantage of any errors and/or omissions in this Request for Proposal or resulting contract. The bidder must promptly notify the State of any errors and/or omissions that are discovered.

O. BEGINNING OF WORK

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The bidder shall not commence any billable work until a valid contract has been fully executed by the State and the successful contractor. The contractor will be notified in writing when work may begin.

P. ASSIGNMENT BY THE STATE

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The State shall have the right to assign or transfer the contract or any of its interests herein to any agency, board, commission, or political subdivision of the State of Nebraska. There shall be no charge to the State for any assignment hereunder.

Q. ASSIGNMENT BY THE CONTRACTOR

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contractor may not assign, voluntarily or involuntarily, the contract or any of its rights or obligations hereunder (including without limitation rights and duties of performance) to any third party, without the prior written consent of the State, which will not be unreasonably withheld.

R. DEVIATIONS FROM THE REQUEST FOR PROPOSAL

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The requirements contained in the Request for Proposal become a part of the terms and conditions of the contract resulting from this Request for Proposal. Any deviations from the Request for Proposal must be clearly defined by the bidder in its proposal and, if accepted by the State, will become part of the contract. Any specifically defined deviations must not be in conflict with the basic nature of the Request for Proposal or mandatory requirements. "Deviation", for the purposes of this RFP, means any proposed changes or alterations to either the contractual language or deliverables within the scope of this RFP. The State discourages deviations and reserves the right to reject proposed deviations.

S. GOVERNING LAW

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contract shall be governed in all respects by the laws and statutes of the State of Nebraska. Any legal proceedings against the State of Nebraska regarding this Request for Proposal or any resultant contract shall be brought in the State of Nebraska administrative or judicial forums as defined by State law. The contractor must be in compliance with all Nebraska statutory and regulatory law.

T. ATTORNEY'S FEES

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

In the event of any litigation, appeal or other legal action to enforce any provision of the contract, the contractor agrees to pay all expenses of such action, as permitted by law, including attorney's fees and costs, if the State is the prevailing party.

U. ADVERTISING

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contractor agrees not to refer to the contract award in advertising in such a manner as to state or imply that the company or its services are endorsed or preferred by the State. News releases pertaining to the project shall not be issued without prior written approval from the State.

V. STATE PROPERTY

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contractor shall be responsible for the proper care and custody of any State-owned property which is furnished for the contractor's use during the performance of the contract. The contractor shall reimburse the State for any loss or damage of such property, normal wear and tear is expected.

W. SITE RULES AND REGULATIONS

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contractor shall use its best efforts to ensure that its employees, agents and subcontractors comply with site rules and regulations while on State premises. If the contractor must perform on-site work outside of the daily operational hours set forth by the State, it must make arrangements with the State to ensure access to the facility and the equipment has been arranged. No additional payment will be made by the State on the basis of lack of access, unless the State fails to provide access as agreed to between the State and the contractor.

X. NOTIFICATION

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

During the bid process, all communication between the State and a bidder shall be between the bidder's representative clearly noted in its proposal and the buyer noted in Section II, A. Procuring Office and Contact Person of this RFP. After the award of the contract, all notices under the contract shall be deemed duly given upon delivery to the staff designated as the

point of contact for this Request for Proposal, in person, or upon delivery by U.S. Mail, facsimile, or e-mail. Each bidder should provide in its proposal the name, title and complete address of its designee to receive notices.

1. Except as otherwise expressly specified herein, all notices, requests or other communications shall be in writing and shall be deemed to have been given if delivered personally or mailed, by U.S. Mail, postage prepaid, return receipt requested, to the parties at their respective addresses set forth above, or at such other addresses as may be specified in writing by either of the parties. All notices, requests, or communications shall be deemed effective upon personal delivery or three (3) days following deposit in the mail.
2. Whenever the contractor encounters any difficulty which is delaying or threatens to delay its timely performance under the contract, the contractor shall immediately give notice thereof in writing to the State reciting all relevant information with respect thereto. Such notice shall not in any way constitute a basis for an extension of the delivery schedule or be construed as a waiver by the State of any of its rights or remedies to which it is entitled by law or equity or pursuant to the provisions of the contract. Failure to give such notice, however, may be grounds for denial of any request for an extension of the delivery schedule because of such delay.

Either party may change its address for notification purposes by giving notice of the change, and setting forth the new address and an effective date.

For the duration of the contract, all communication between contractor and the State regarding the contract shall take place between the contractor and individuals specified by the State in writing. Communication about the contract between contractor and individuals not designated as points of contact by the State is strictly forbidden.

Y. EARLY TERMINATION

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contract may be terminated as follows:

1. The State and the contractor, by mutual written agreement, may terminate the contract at any time.
2. The State, in its sole discretion, may terminate the contract for any reason upon 30 days written notice to the contractor. Such termination shall not relieve the contractor of warranty or other service obligations incurred under the terms of the contract. In the event of cancellation the contractor shall be entitled to payment, determined on a pro rata basis, for products or services satisfactorily performed or provided.
3. The State may terminate the contract immediately for the following reasons:
 - a. if directed to do so by statute;
 - b. contractor has made an assignment for the benefit of creditors, has admitted in writing its inability to pay debts as they mature, or has ceased operating in the normal course of business;
 - c. a trustee or receiver of the contractor or of any substantial part of the contractor's assets has been appointed by a court;

- d. fraud, misappropriation, embezzlement, malfeasance, misfeasance, or illegal conduct pertaining to performance under the contract by its contractor, its employees, officers, directors or shareholders;
- e. an involuntary proceeding has been commenced by any party against the contractor under any one of the chapters of Title 11 of the United States Code and (i) the proceeding has been pending for at least sixty (60) days; or (ii) the contractor has consented, either expressly or by operation of law, to the entry of an order for relief; or (iii) the contractor has been decreed or adjudged a debtor;
- f. a voluntary petition has been filed by the contractor under any of the chapters of Title 11 of the United States Code;
- g. contractor intentionally discloses confidential information;
- h. contractor has or announces it will discontinue support of the deliverable;
- i. second or subsequent documented "vendor performance report" form deemed acceptable by the State Purchasing Bureau.

Z. FUNDING OUT CLAUSE OR LOSS OF APPROPRIATIONS

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The State may terminate the contract, in whole or in part, in the event funding is no longer available. The State's obligation to pay amounts due for fiscal years following the current fiscal year is contingent upon legislative appropriation of funds for the contract. Should said funds not be appropriated, the State may terminate the contract with respect to those payments for the fiscal years for which such funds are not appropriated. The State will give the contractor written notice thirty (30) days prior to the effective date of any termination, and advise the contractor of the location (address and room number) of any related equipment. All obligations of the State to make payments after the termination date will cease and all interest of the State in any related equipment will terminate. The contractor shall be entitled to receive just and equitable compensation for any authorized work which has been satisfactorily completed as of the termination date. In no event shall the contractor be paid for a loss of anticipated profit.

AA. BREACH BY CONTRACTOR

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The State may terminate the contract, in whole or in part, if the contractor fails to perform its obligations under the contract in a timely and proper manner. The State may, by providing a written notice of default to the contractor, allow the contractor to cure a failure or breach of contract within a period of thirty (30) days (or longer at State's discretion considering the gravity and nature of the default). Said notice shall be delivered by Certified Mail, Return Receipt Requested or in person with proof of delivery. Allowing the contractor time to cure a failure or breach of contract does not waive the State's right to immediately terminate the contract for the same or different contract breach which may occur at a different time. In case of default of the contractor, the State may contract the service from other sources and hold the contractor responsible for any excess cost occasioned thereby.

BB. ASSURANCES BEFORE BREACH

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

If any document or deliverable required pursuant to the contract does not fulfill the requirements of the Request for Proposal/resulting contract, upon written notice from the State, the contractor shall deliver assurances in the form of additional contractor resources at

no additional cost to the project in order to complete the deliverable, and to ensure that other project schedules will not be adversely affected.

CC. PENALTY

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

In the event that the contractor fails to perform any substantial obligation under the contract, the State may withhold all monies due and payable to the contractor, without penalty, until such failure is cured or otherwise adjudicated. Failure to meet the dates stipulated in the contract for the deliverables may result in an assessment of penalty due the State of \$1000.00 dollars per day, until the deliverables are approved. Contractor will be notified in writing when penalty will commence.

DD. FORCE MAJEURE

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

Neither party shall be liable for any costs or damages resulting from its inability to perform any of its obligations under the contract due to a natural disaster, or other similar event outside the control and not the fault of the affected party (“Force Majeure Event”). A Force Majeure Event shall not constitute a breach of the contract. The party so affected shall immediately give notice to the other party of the Force Majeure Event. The State may grant relief from performance of the contract if the contractor is prevented from performance by a Force Majeure Event. The burden of proof for the need for such relief shall rest upon the contractor. To obtain release based on a Force Majeure Event, the contractor shall file a written request for such relief with the State Purchasing Bureau. Labor disputes with the impacted party’s own employees will not be considered a Force Majeure Event and will not suspend performance requirements under the contract.

EE. PROHIBITION AGAINST ADVANCE PAYMENT

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

Payments shall not be made until contractual deliverable(s) are received and accepted by the State.

FF. PAYMENT

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

State will render payment to contractor when the terms and conditions of the contract and specifications have been satisfactorily completed on the part of the contractor as solely determined by the State. Payment will be made by the responsible agency in compliance with the State of Nebraska Prompt Payment Act (See Neb. Rev. Stat. §81-2401 through 81-2408). The State may require the contractor to accept payment by electronic means such as ACH deposit. In no event shall the State be responsible or liable to pay for any services provided by the contractor prior to the Effective Date, and the contractor hereby waives any claim or cause of action for any such services.

GG. INVOICES

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

Invoices for payments must be submitted by the contractor to the agency requesting the services with sufficient detail to support payment. Invoices must be submitted to: Medicaid and Long-Term Care Division, P.O. Box 95026, Lincoln, NE 68509. The terms and conditions included in the contractor's invoice shall be deemed to be solely for the convenience of the parties. No terms or conditions of any such invoice shall be binding upon the State, and no action by the State, including without limitation the payment of any such invoice in whole or in part, shall be construed as binding or estopping the State with respect to any such term or condition, unless the invoice term or condition has been previously agreed to by the State as an amendment to the contract.

HH. AUDIT REQUIREMENTS

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

All contractor books, records and documents relating to work performed or monies received under the contract shall be subject to audit at any reasonable time upon the provision of reasonable notice by the State. These records shall be maintained for a period of five (5) full years from the date of final payment, or until all issues related to an audit, litigation or other action are resolved, whichever is longer. All records shall be maintained in accordance with generally accepted accounting principles.

In addition to, and in no way in limitation of any obligation in the contract, the contractor shall agree that it will be held liable for any State audit exceptions, and shall return to the State all payments made under the contract for which an exception has been taken or which has been disallowed because of such an exception. The contractor agrees to correct immediately any material weakness or condition reported to the State in the course of an audit.

II. TAXES

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The State is not required to pay taxes of any kind and assumes no such liability as a result of this solicitation. Any property tax payable on the contractor's equipment which may be installed in a state-owned facility is the responsibility of the contractor.

JJ. INSPECTION AND APPROVAL

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

Final inspection and approval of all work required under the contract shall be performed by the designated State officials. The State and/or its authorized representatives shall have the right to enter any premises where the contractor or subcontractor duties under the contract are being performed, and to inspect, monitor or otherwise evaluate the work being performed. All inspections and evaluations shall be at reasonable times and in a manner that will not unreasonably delay work.

KK. CHANGES IN SCOPE/CHANGE ORDERS

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The State may, at any time with written notice to the contractor, make changes within the general scope of the contract. Changes in scope shall only be conducted with the written approval of the State’s designee as so defined by the State from time to time. (The State retains the right to employ the services of a third party to perform any change order(s)).

The State may, at any time work is in progress, by written order, make alterations in the terms of work as shown in the specifications, require the performance of extra work, decrease the quantity of work, or make such other changes as the State may find necessary or desirable. The contractor shall not claim forfeiture of contract by reasons of such changes by the State. Changes in work and the amount of compensation to be paid to the contractor for any extra work so ordered shall be determined in accordance with the applicable unit prices of the contractor’s proposal.

Corrections of any deliverable services or performance of work required pursuant to the contract shall not be deemed a modification requiring a change order.

LL. SEVERABILITY

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

If any term or condition of the contract is declared by a court of competent jurisdiction to be illegal or in conflict with any law, the validity of the remaining terms and conditions shall not be affected, and the rights and obligations of the parties shall be construed and enforced as if the contract did not contain the particular provision held to be invalid.

MM. CONFIDENTIALITY

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

All materials and information provided by the State or acquired by the contractor on behalf of the State shall be regarded as confidential information. All materials and information provided by the State or acquired by the contractor on behalf of the State shall be handled in accordance with Federal and State Law, and ethical standards. The contractor must ensure the confidentiality of such materials or information. Should said confidentiality be breached by a contractor; contractor shall notify the State immediately of said breach and take immediate corrective action.

It is incumbent upon the contractor to inform its officers and employees of the penalties for improper disclosure imposed by the Privacy Act of 1974, 5 U.S.C. 552a. Specifically, 5 U.S.C. 552a (i)(1), which is made applicable to contractors by 5 U.S.C. 552a (m)(1), provides that any officer or employee of a contractor, who by virtue of his/her employment or official position has possession of or access to agency records which contain individually identifiable information, the disclosure of which is prohibited by the Privacy Act or regulations established thereunder, and who knowing that disclosure of the specific material is prohibited, willfully discloses the material in any manner to any person or agency not entitled to receive it, shall be guilty of a misdemeanor and fined not more than \$5,000.

NN. PROPRIETARY INFORMATION

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

Data contained in the proposal and all documentation provided therein, become the property of the State of Nebraska and the data becomes public information upon opening the proposal. If the bidder wishes to have any information withheld from the public, such information must fall within the definition of proprietary information contained within Nebraska’s public record statutes. All proprietary information the bidder wishes the State to withhold must be submitted in a sealed package, which is separate from the remainder of the proposal. The separate package must be clearly marked PROPRIETARY on the outside of the package. Bidders may not mark their entire Request for Proposal as proprietary. Bidder’s cost proposals may not be marked as proprietary information. Failure of the bidder to follow the instructions for submitting proprietary and copyrighted information may result in the information being viewed by other bidders and the public. Proprietary information is defined as trade secrets, academic and scientific research work which is in progress and unpublished, and other information which if released would give advantage to business competitors and serve no public purpose (see Neb. Rev. Stat. §84-712.05(3)). In accordance with Attorney General Opinions 92068 and 97033, bidders submitting information as proprietary may be required to prove specific, named competitor(s) who would be advantaged by release of the information and the specific advantage the competitor(s) would receive. Although every effort will be made to withhold information that is properly submitted as proprietary and meets the State’s definition of proprietary information, the State is under no obligation to maintain the confidentiality of proprietary information and accepts no liability for the release of such information.

OO. CERTIFICATION OF INDEPENDENT PRICE DETERMINATION/COLLUSIVE BIDDING

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

By submission of this proposal, the bidder certifies, that he or she is the party making the foregoing proposal that the proposal is not made in the interest of, or on behalf of, any undisclosed person, partnership, company, association, organization, or corporation; that the proposal is genuine and not collusive or sham; that the bidder has not directly or indirectly induced or solicited any other bidder to put in a false or sham proposal, and has not directly or indirectly colluded, conspired, connived, or agreed with any bidder or anyone else to put in a sham proposal, or that anyone shall refrain from bidding; that the bidder has not in any manner, directly or indirectly, sought by agreement, communication, or conference with anyone to fix the proposal price of the bidder or any other bidder, or to fix any overhead, profit, or cost element of the proposal price, or of that of any other bidder, or to secure any advantage against the public body awarding the contract of anyone interested in the proposed contract; that all statements contained in the proposal are true; and further that the bidder has not, directly or indirectly, submitted his or her proposal price or any breakdown thereof, or the contents thereof, or divulged information or data relative thereto, or paid, and will not pay, any fee to any corporation, partnership, company association, organization, proposal depository, or to any member or agent thereof to effectuate a collusive or sham proposal.

PP. PRICES

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

All prices, costs, terms and conditions outlined in the proposal shall remain fixed and valid commencing on the opening date of the proposal until an award is made (and for bidder

receiving award prices shall remain as bid for the duration of the contract unless otherwise so stated in the contract) or the Request for Proposal is cancelled.

Contractor represents and warrants that all prices for services, now or subsequently specified are as low as and no higher than prices which the contractor has charged or intends to charge customers other than the State for the same or similar products and services of the same or equivalent quantity and quality for delivery or performance during the same periods of time. If, during the term of the contract, the contractor shall reduce any and/or all prices charged to any customers other than the State for the same or similar products or services specified herein, the contractor shall make an equal or equivalent reduction in corresponding prices for said specified products or services.

Contractor also represents and warrants that all prices set forth in the contract and all prices in addition, which the contractor may charge under the terms of the contract, do not and will not violate any existing federal, state or municipal law or regulations concerning price discrimination and/or price fixing. Contractor agrees to hold the State harmless from any such violation. Prices quoted shall not be subject to increase throughout the contract period unless specifically allowed by these specifications.

QQ. BEST AND FINAL OFFER

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The State will compile the final scores for all parts of each proposal. The award may be granted to the highest scoring responsive and responsible bidder. Alternatively, the highest scoring bidder or bidders may be requested to submit best and final offers. If best and final offers are requested by the State and submitted by the bidder, they will be evaluated (using the stated criteria), scored and ranked by the Evaluation Committee. The award will then be granted to the highest scoring bidder. However, a bidder should provide its best offer in its original proposal. Bidders should not expect that the State will request a best and final offer.

RR. ETHICS IN PUBLIC CONTRACTING

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

No bidder shall pay or offer to pay, either directly or indirectly, any fee, commission compensation, gift, gratuity, or anything of value to any State officer, legislator or employee based on the understanding that the receiving person's vote, actions or judgment will be influenced thereby. No bidder shall give any item of value to any employee of the State Purchasing Bureau.

Bidders shall be prohibited from utilizing the services of lobbyists, attorneys, political activists, or consultants to secure the contract. It is the intent of this provision to assure that the prohibition of state contact during the procurement process is not subverted through the use of lobbyists, attorneys, political activists, or consultants. It is the intent of the State that the process of evaluation of proposals and award of the contract be completed without external influence. It is not the intent of this section to prohibit bidders from seeking professional advice, for example consulting legal counsel, regarding terms and conditions of this Request for Proposal or the format or content of their proposal.

If the bidder is found to be in non-compliance with this section of the Request for Proposal, they may forfeit the contract if awarded to them or be disqualified from the selection process.

SS. INDEMNIFICATION

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

1. GENERAL

The contractor agrees to defend, indemnify, hold, and save harmless the State and its employees, volunteers, agents, and its elected and appointed officials (“the indemnified parties”) from and against any and all claims, liens, demands, damages, liability, actions, causes of action, losses, judgments, costs, and expenses of every nature, including investigation costs and expenses, settlement costs, and attorney fees and expenses (“the claims”), sustained or asserted against the State, arising out of, resulting from, or attributable to the willful misconduct, negligence, error, or omission of the contractor, its employees, subcontractors, consultants, representatives, and agents, except to the extent such contractor liability is attenuated by any action of the State which directly and proximately contributed to the claims.

2. INTELLECTUAL PROPERTY

The contractor agrees it will at its sole cost and expense, defend, indemnify, and hold harmless the indemnified parties from and against any and all claims, to the extent such claims arise out of, result from, or are attributable to the actual or alleged infringement or misappropriation of any patent, copyright, trade secret, trademark, or confidential information of any third party by the contractor or its employees, subcontractors, consultants, representatives, and agents; provided, however, the State gives the contractor prompt notice in writing of the claim. The contractor may not settle any infringement claim that will affect the State’s use of the Licensed Software without the State’s prior written consent, which consent may be withheld for any reason.

If a judgment or settlement is obtained or reasonably anticipated against the State’s use of any intellectual property for which the contractor has indemnified the State, the contractor shall at the contractor’s sole cost and expense promptly modify the item or items which were determined to be infringing, acquire a license or licenses on the State’s behalf to provide the necessary rights to the State to eliminate the infringement, or provide the State with a non-infringing substitute that provides the State the same functionality. At the State’s election, the actual or anticipated judgment may be treated as a breach of warranty by the contractor, and the State may receive the remedies provided under this RFP.

3. PERSONNEL

The contractor shall, at its expense, indemnify and hold harmless the indemnified parties from and against any claim with respect to withholding taxes, worker’s compensation, employee benefits, or any other claim, demand, liability, damage, or loss of any nature relating to any of the personnel provided by the contractor.

TT. NEBRASKA TECHNOLOGY ACCESS STANDARDS

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

Contractor shall review the Nebraska Technology Access Standards, found at <http://nitc.nebraska.gov/standards/2-101.html> and ensure that products and/or services provided under the contract comply with the applicable standards. In the event such standards change during the contractor’s performance, the State may create an amendment to

the contract to request that contract comply with the changed standard at a cost mutually acceptable to the parties.

UU. ANTITRUST

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contractor hereby assigns to the State any and all claims for overcharges as to goods and/or services provided in connection with this contract resulting from antitrust violations which arise under antitrust laws of the United States and the antitrust laws of the State.

VV. DISASTER RECOVERY/BACK UP PLAN

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contractor shall have a disaster recovery and back-up plan, of which a copy should be provided to the State, which includes, but is not limited to equipment, personnel, facilities, and transportation, in order to continue services as specified under these specifications in the event of a disaster.

WW. TIME IS OF THE ESSENCE

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

Time is of the essence in this contract. The acceptance of late performance with or without objection or reservation by the State shall not waive any rights of the State nor constitute a waiver of the requirement of timely performance of any obligations on the part of the contractor remaining to be performed.

XX. RECYCLING

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

Preference will be given to items which are manufactured or produced from recycled material or which can be readily reused or recycled after their normal use as per state statute (Neb. Rev. Stat. §81-15, 159).

YY. DRUG POLICY

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

Contractor certifies that it maintains a drug free work place environment to ensure worker safety and workplace integrity. Contractor agrees to provide a copy of its drug free workplace policy at any time upon request by the State.

ZZ. NEW EMPLOYEE WORK ELIGIBILITY STATUS

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The Contractor is required and hereby agrees to use a federal immigration verification system to determine the work eligibility status of new employees physically performing services within the State of Nebraska. A federal immigration verification system means the electronic verification of the work authorization program authorized by the Illegal Immigration Reform and Immigrant Responsibility Act of 1996, 8 U.S.C. 1324a, known as the E-Verify Program, or an equivalent federal program designated by the United States Department of Homeland Security

or other federal agency authorized to verify the work eligibility status of a newly hired employee.

If the Contractor is an individual or sole proprietorship, the following applies:

1. The Contractor must complete the United States Citizenship Attestation Form, available on the Department of Administrative Services website at www.das.state.ne.us.
2. If the Contractor indicates on such attestation form that he or she is a qualified alien, the Contractor agrees to provide the US Citizenship and Immigration Services documentation required to verify the Contractor's lawful presence in the United States using the Systematic Alien Verification for Entitlements (SAVE) Program.
3. The Contractor understands and agrees that lawful presence in the United States is required and the Contractor may be disqualified or the contract terminated if such lawful presence cannot be verified as required by Neb. Rev. Stat. §4-108.

AAA. CERTIFICATION REGARDING DEBARMENT, SUSPENSION AND INELIGIBILITY

_____ Accept (Initial) _____ Reject (Initial) _____ Reject and Provide Alternative within RFP Response (Initial)

The contractor, by signature to this RFP, certifies that the contractor is not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded by any federal department or agency from participating in transactions (debarred). The contractor also agrees to include the above requirements in any and all subcontracts into which it enters. The contractor shall immediately notify the Department if, during the term of this contract, contractor becomes debarred. The Department may immediately terminate this contract by providing contractor written notice if contractor becomes debarred during the term of this contract.

IV. PROJECT DESCRIPTION AND SCOPE OF WORK

In March 2010, PPACA and the Health Care and Education Reconciliation Act of 2010 were signed into law. The two laws are collectively referred to as the Affordable Care Act (ACA). Sections of the ACA, codified at 42 CFR 431, 435, and 437, require the creation of a health insurance exchange in each state, either by the state or by the federal government. The State of Nebraska will employ the Federally Facilitated Marketplace (Marketplace) option.

An analysis was conducted by the Nebraska Department of Health and Human Services' (Department) to determine the most desirable option for meeting ACA compliance, and CMS Seven Standards and Conditions as defined in Medicaid IT Supplement (MITS-11-01-v1.0). The analysis revealed that replacing the current Medicaid eligibility and enrollment system with a modern solution was the best course of action given the project constraints. The same analysis revealed there was not enough time to procure and implement a solution by the ACA mandated deadline of October 1, 2013.

The purpose of this RFP is to select a Contractor who is responsible for performing Independent Verification and Validation (IV&V) services for implementing a new Eligibility and Enrollment Solution (EES). The Department plans to release an RFP to procure an Eligibility and Enrollment Solution. The RFP will procure the products and services of a Systems Integrator with an Eligibility and Enrollment Solution.

Nebraska's existing Eligibility and Enrollment System is almost twenty years old. The current system was developed with client/server technology. Nebraska intends to complete replacement of the existing Medicaid Eligibility and Enrollment System in order to access the enhanced federal matching funds for these legacy system replacements since the enhanced funding expires at the end of 2015.

The Department will award one Contractor to fulfill all the IV&V responsibilities described herein. The awarded IV&V Contractor shall review EES related artifacts defined by the Department to gain sufficient understanding of the EES project.

The IV&V services described in this RFP must comply with IV&V regulatory requirements detailed in 45 CFR 95.626, which requires that IV&V efforts be conducted by an entity that is independent. The IV&V contractor is required to:

1. Develop an IV&V Workplan. The plan must be provided directly to the Centers for Medicare and Medicaid (CMS) at the same time it is given to the Department.
2. Review and make recommendations on both the management of the EES project (Department and Contractor), and the technical aspects of the project. The IV&V Contractor must provide the results of its analysis directly to CMS at the same time it reports to the State.
3. Consult with all stakeholders and assess the user involvement and buy-in regarding system functionality and the system's ability to support program business needs.
4. Conduct an analysis of past project performance sufficient to identify and make recommendations for improvement.
5. Provide EES risk management assessment.
6. Develop EES performance metrics which allow tracking project completion against milestones set by the Department.

The bidder must provide the following information in response to this Request for Proposal.

A. PROJECT OVERVIEW

The purpose of this procurement is to contract for the IV&V services to assist the Department to ensure the success of the EES project by facilitating early detection and correction of errors, enhance management insight into risks and ensure compliance with project performance, schedule, and budget requirements. The Information Systems and Technology (IS&T) Division provides leadership, project management, planning, implementation, and support services for information technology for the Department. IS&T will provide support for the project, including the technical planning, implementation, testing and maintenance of the new solution.

The Department is seeking proposals from qualified bidders with IV&V expertise, project management expertise, and relevant past experience performing IV&V work for Medicaid eligibility determination systems similar to the system that will be developed for the State.

The Department seeks an IV&V contractor who will bring project personnel, processes, approaches and tools to meet the requirements of the IV&V services for the EES Project.

The IV&V scope of work includes:

1. Program Management
2. Deliverables Review and Acceptance
3. Quality Assurance
4. Contract Compliance

The contractor awarded the IV&V contract for the EES project, their subcontractor(s) and vendor(s) are precluded from submitting an EES proposal, assisting another company in making a proposal, or otherwise materially participating in any subsequent contract related to the EES project.

B. PROJECT REQUIREMENTS

The IV&V Contractor will perform all IV&V responsibilities defined in this RFP throughout the life of the contract including the optional renewal period. The IV&V Contractor is expected to actively participate in meetings and to contribute IV&V expertise to all phases of the EES Project to ensure that the EES Contractor activities result in successful project completion.

The IV & V project requirements are outlined in the following sections. The tasks and activities within this section are not necessarily listed in the order that they should be completed. Bidders must reflect within their proposal and preliminary project plan their recommended approach to scheduling and accomplishing the tasks and activities identified within this RFP.

1. PROGRAM MANAGEMENT

Perform a review of IV&V project activities for the EES Project which shall be documented and submitted in the appropriate Management Briefing, EES Management, Project Status or Deliverable Review Report. Activities shall include but not be limited to:

- a. Delivery of an Initial Project Assessment Report that includes the initial status of each activity shown on the IV&V Management Plan for the EES project.
- b. A review of the EES Contractor's analysis of risk areas of the implementation of the EES Component and the risk mitigation plan for those identified risks. The IV&V Contractor shall include recommendations for any deficiencies it finds during its review of the risk mitigation plans. The results and recommendation

of the analysis shall be written and presented as part of the Risk Assessment Report.

- c. Hosting the Monthly Management Briefings at times approved by the Department.
- d. Attendance at all status meetings between the Department and the EES Contractor, which will occur on at least a monthly basis and may occur more regularly based on the phase and stage of the implementation of the EES.
- e. Assessment of the methodology for maintaining requirements traceability throughout the transfer and development process.
- f. A review all MITA documentation, guidance and rules promulgated by CMS..
- g. A review all ACA Regulations documentation, guidance and rules promulgated by CMS.
- h. Notification to the Department if any MITA documentation, guidance and rules, or any changes to those items, will impact the implementation of any EES Component or the work performed by any EES Contractor.
- i. Notification to the Department if any ACA Regulation documentation, guidance and rules, or any changes to those items, will impact the implementation of any EES Component or the work performed by any EES Contractor.
- j. Performance of program management services for all EES activities. These program management services shall include, at a minimum, all of the following:
 - i. Assess the progress of the implementation of the entire EES project, and recommend improvements as necessary.
 - ii. Verify that lines of reporting and associated responsibility within the EES Contractor to ensure adequate technical and managerial oversight of the project.
 - iii. Verify the EES Contractor and the State are not independently duplicating effort toward the same end.
 - iv. Evaluate project progress, resources, budget, schedules, work flow and reporting.
 - v. Verify the EES Contractor has created a project management plan and that the EES Contractor is following the approved project management plan.
 - vi. Evaluate the project management plans and procedures to verify that they are developed, communicated, implemented, monitored and complete.
 - vii. Evaluate project reporting plan and actual project reports to verify project status is accurately traced using project metrics.
 - viii. Verify milestones and completion dates contained in the EES Contractor's project management plan and contract are planned, monitored and met.
 - ix. Verify the EES Contractor has created and implemented an appropriate project issue tracking mechanism that documents issues as they arise, enables communication of issues to proper stakeholders, documents a mitigation strategy as appropriate, and tracks the issue to closure.
 - x. Evaluate the EES Contractor's planned life-cycle development methodology or methodologies (e.g. waterfall, evolutionary spiral, rapid prototyping, or incremental) to see if they are appropriate for the EES component that EES Contractor is developing.
 - xi. Verify that all business process reengineering recommendations are strategic, have management backing, resources, skills and incentives necessary for effective change.

- xii. Verify that the EES Contractor has a change management plan and that the change management plan and procedures to verify them are developed, communicated, implemented, monitored and complete.
 - xiii. Verify that the EES Contractor has a communication plan and that that plan is being followed.
 - xiv. Evaluate the EES Contractor's communication plans and procedures to verify that they support communications and work product sharing between all project stakeholders and that the communication plans and strategies are effective, implemented, monitored and complete.
- k. Manage the identification, resolution and tracking of stakeholder concerns, both internal and external.
 - l. All documentation and deliverables produced in the performance by the IV&V Contractor must be stored in a central repository to be designated by the Department.

2. **DELIVERABLE REVIEW AND ACCEPTANCE**

As part of the Deliverable Review Report, the IV&V Contractor shall assess the EES Deliverables based upon quality attributes including:

- a. Adherence to Requirements;
- b. Clarity;
- c. Completeness;
- d. Consistency;
- e. Traceability: and
- f. Adherence to laws, rules and guideline.

Deliverable review shall be performed by identified IV&V resources that are experienced and/or certified in the related technical, functional, and federal requirements of the deliverable under review, and comments shall be submitted to Department as part of the Deliverable Review Report within a timeframe that allows inclusion of IV&V feedback in Department's response to the EES Contractor.

The IV&V Contractor shall perform the following Deliverable Review and Acceptance tasks:

- a. Develop and submit a Performance Metrics Document to track project completion against milestones set by the Department using Department approved performance metrics.
- b. Review each deliverable and report submitted by the EES Contractor, as directed by the Department, for content, quality and timeliness.
- c. Notify the Department of any EES Contractor submitted management reports that do not contain the content required for that report, are of not sufficient quality or were not submitted in a timely manner.
- d. Participate in walk-through of EES Contractor deliverables as requested by the Department.
- e. Assess each reviewed deliverable and recommend a corrective action plan for each deliverable that fails to achieve the standards or timelines in that EES Contractor's contract with the Department.
- f. The IV&V Contractor will work with the Department to define criteria for a Critical Incident which could adversely affect the outcome of the EES Project.

- g.** Notify the Department immediately when the IV&V Contractor discovers any Critical Incident. Provide an EES Contractor Critical Incident Report for each Critical Incident that summarizes the incident, how it may affect the project, notes any discrepancies found by the IV&V Contractor and provides a proposed action plan to resolve the incident and mitigate its impact.

3. QUALITY ASSURANCE

The IV&V Contractor shall perform the following Quality Assurance tasks:

- a.** Write and verbally present Management Briefings on a monthly basis regarding the performance of the EES Contractor and the monitoring performed by the IV&V Contractor. This Management Briefing shall include, at a minimum, all of the following:
 - i.** The current general status of the EES Contractor in relation to the EES Contractor's work plans and implementation plans.
 - ii.** Any flaws or issues with the system design for each EES Component that may negatively impact the implementation of the EES with recommendations to mitigate or eliminate those flaws or issues.
 - iii.** Any flaws or issues regarding system security for each EES component that may negatively impact the implementation of the EES with recommendations to mitigate or eliminate those flaws or issues.
 - iv.** The results of any system testing or retesting performed during the prior month and recommendations on how to resolve any flaws or issues identified as a result of that system testing or retesting.
 - v.** Any flaws or issues with the interfaces within each EES Component, between each of the EES Components or between the EES Components and external systems that may negatively impact the implementation of the EES with recommendations to mitigate or eliminate those flaws or issues.
 - vi.** Any delays or issues with the transition from the Department's current Eligibility and Enrollment System to any EES Contractor and recommendations to mitigate or eliminate those delays or issues.
 - vii.** The results of all acceptance testing performed during the prior month and recommendations on how to resolve any flaws or issues identified as a result of that testing.
 - viii.** The status of the overall implementation and operation of each EES Component and any flaws or issues that are negatively impacting the operation of any EES Component with recommendations on how to resolve those issues or flaws.
 - ix.** Any recommendations regarding training provided by the EES Contractor to system users.
 - x.** Any recommendations regarding the EES Contractors' progress and procedures for managing requirements.
 - xi.** Any recommendations regarding each EES Contractor's policies and procedures for ensuring that each EES Component is secure and that the privacy of Client data is maintained.

4. CONTRACT COMPLIANCE

The IV&V Contractor shall perform the following EES Contract Compliance tasks which shall be documented and submitted in the appropriate Management Briefing, EES Management, Project Status or Deliverable Review Report:

- a.** As part of developing and submitting the Estimating and Schedule Review Recommendation Report evaluate and make recommendations on the estimating and scheduling process of the EES Project to ensure that the project budget and EES resources are adequate for the work break-down structure and schedule.
- b.** Review EES schedules to verify that adequate time and resources are assigned for planning, development, review, testing and rework.
- c.** Perform ongoing assessments of EES Contractor staffing, which include key and non-key personnel, to ensure adequate staffing for the EES Contractor to comply with their contract and maintain service levels defined throughout the EES contract.
- d.** Examine the job assignments, skills, training and experience of the EES Contractor personnel involved in program development to verify that they are adequate for the development task.
- e.** Verify that the EES Contractor's organizational structure supports training, process definition, independent Quality Assurance, Configuration Management, product evaluation, and any other functions critical for the project's success.
- f.** Monitor the performance of the EES Contractor to ensure that EES Contractor is in compliance with its contract with the Department and that the solution that EES Contractor is developing meets all requirements of its contract with the Department. This shall include, but is not limited to, monitoring all of the following:
 - i.** EES Contractor work plans.
 - ii.** EES Contractor implementation plans.
 - iii.** General Solution design for each EES Component.
 - iv.** Detailed Solution design for each EES Component.
 - v.** Solution security for each EES Component.
 - vi.** Solution testing for each EES Component.
 - vii.** EES Contractor transition from the Department's existing NE Eligibility and Enrollment System.
 - viii.** Acceptance Testing for each EES Component.
- g.** The IV&V Contractor shall evaluate the EES Contractor's progress and procedures for managing requirements. This shall include at minimum all of the following:
 - i.** Verify that system requirements are well-defined, understood and documented.
 - ii.** Verify that software requirements can be traced through design, code and test phases to verify that the system performs as intended and contains no unnecessary software elements.
 - iii.** Verify that requirements are under formal configuration control.
 - iv.** Evaluate on the EES Contractor's policies and procedures for ensuring that each EES Component is secure and that the privacy of Client data is maintained. This shall include all of the following:

- a) Evaluate the restrictions on system and data access.
 - b) Evaluate the system security plan to ensure it meets Department standards.
- v. Verify that EES processes and equipment are in place to back up client and project data files and archive them safely at appropriate levels.
- vi. The IV&V Contractor shall verify that the EES Contractor has performed an adequate requirements analysis for that EES Contractor's deliverables. This shall include a verification of all of the following:
 - a) An analysis of client, State, and Federal needs and objectives has been performed to verify that requirements of the system are well understood, well defined and satisfy federal regulations.
 - b) All stakeholders have been consulted to the desired functionality of the system, and that users have been involved in prototyping of the user interface.
- vii. All stakeholders have bought-in to all changes with impact project objectives, cost and schedule.
- viii. EES Performance requirements satisfy user needs.
- ix. User's maintenance requirements for the system are completely specified.
- h. The IV&V Contractor shall verify that the EES Contractor has described all system interfaces for each EES Component exactly, by medium and by function, including input/output control codes, data format, polarity, range, units and frequency. The IV&V Contractor shall also verify that all approved interface documents are available and that appropriate relationships are in place with all agencies and organizations supporting the interfaces.
- i. The IV&V Contractor shall verify that there is a well-defined plan for transferring data from the legacy system to the new EES.

5. EES SOFTWARE DEVELOPMENT

The IV&V Contractor shall evaluate both the high level and detailed design of any custom software developed or used by the EES Contractor for any EES component. The Design and Analysis Review Report shall include at minimum all of the following:

- a. Evaluate all high-level design products to verify the design is workable, efficient, and satisfies all system and system interface requirements.
- b. Evaluate all detail design products to verify that the design is workable, efficient, and satisfies all high level design requirements.
- c. Evaluate the design products for adherence to the project design methodology and standards.
- d. Evaluate the design and analysis process used to develop the design and make recommendations for improvements.
- e. Evaluate design standards, methodology and CASE tools used.
- f. Verify that design requirements can be traced back to system requirements.
- g. Verify that all design products are under configuration control and formally approved before detailed design begins.
- h. Verify that all design products are under configuration control and formally approved before coding begins.

- i. The IV&V Contractor shall evaluate the plans, requirements, environment, tools, and procedures used for unit testing system modules as well as the level of test automation, interactive testing, and interactive debugging available in the test environment.
- j. The IV&V Contractor shall review all unit testing to ensure that an appropriate level of test coverage was achieved by the test process, that test results were verified, that the correct code configuration was tested, and that the tests were appropriately documented. The IV&V Contractor shall develop and submit a Unit Testing Review Report documenting the results of all unit testing reviews and evaluations.

6. SYSTEM TESTING

The IV&V Contractor shall review all system testing performed on each EES component and submit all findings as part of the Management Briefing, Unit Testing or Critical Incident Reports. This review shall include the following:

- a. Assess planned testing activities, results reporting, and error correction/resolution, including an appropriate change control and configuration management process, to include all of the following:
 - i. Assess test efforts and schedules are based on defined requirements priorities as well as project risk.
 - ii. Assess test scenarios address the testable requirements.
 - iii. Assess specific business cases and test verification efforts for each case has been defined.
 - iv. Conduct reviews of testing to ensure that critical elements of the EES are stable and comply with Department requirements as detailed in the Department's contract with the EES Contractor.
 - v. Evaluate the plans, requirements, environment, tools, and procedures used for system testing.
 - vi. Evaluate the level of automation and the availability of the system test environment.
- b. Verify that an appropriate level of test coverage is achieved by the test process, that test results are verified, that the correct code configuration has been tested, and that the tests are appropriately documented, including formal logging of errors found in testing.
- c. Verify that the individuals conducting the test have an appropriate level of independence from those completing the development.
- d. Verify that a sufficient number and type of case scenarios are used to ensure comprehensive but manageable testing and those tests are run in a realistic, real-time environment.
- e. Verify that test scripts are complete, with step-by-step procedures, required pre-existing events or triggers and expected results.

7. DATA MANAGEMENT

The IV&V Contractor shall evaluate the EES Contractors' proposed plans, procedures and software for data conversion and submit a Data Conversion Process Review Report. This evaluation shall include, at a minimum, all of the following:

- a. Verify that procedures are in place and are being followed to review the completed data for completeness and accuracy and to perform data clean-up as required.
- b. As part of developing the Data Conversion Error Report, determine conversion error rates and if the error rates are manageable.
- c. Make recommendations on the conversion process to make it more efficient and on maintain the integrity of data during the conversion.
- d. The IV&V Contractor shall evaluate all EES Contractor database designs and system processes/workflows to determine if they meet system requirements contained in the EES Contractor's contract with the Department. This shall include an evaluation of all of the following:
 - i. The design for maintainability, scalability, refresh-ability, concurrence, normalization and any other factors affecting performance and data integrity.
 - ii. The process for administering the database, including backup, recovery, performance analysis and control of data item creation.

C. BUSINESS REQUIREMENTS

The IV&V Contractor shall develop a comprehensive Project Management Plan (IV&V Project Management Plan) for Department approval, and shall manage and carry out the IV&V services in accordance with the IV&V Project Management Plan. The IV&V Project Management Plan (PMP) must include at a minimum the following elements:

1. Description of how the IV&V Contractor plans to carry out the IV&V services. This description should include methodologies, strategies, standards, and approaches employed by the IV&V Contractor for executing each of the IV&V activities within this Scope of Work.
2. High level IV&V services schedule which aligns with the EES Master Project Schedule.
3. Detailed schedule that includes activities, tasks, task work effort estimates, estimated start and end dates, durations, deliverables, and assigned resources.. Coordinate and align the IV&V deliverable schedule with the Department and the EES Contractors.
4. Organizational structure which reflects, among other things, the need to coordinate activities among the Department, IV&V, and EES Contractor.
5. Description of resources assigned to activities, tasks and the IV&V deliverable creation.
6. Assigned personnel dedicated to the IV&V reviews on the EES project.
7. Description of the deliverables produced as a result of IV&V activities.

The IV&V Contractor shall perform ongoing program monitoring activities and shall review and validate issues/deficiencies/risks identified with the Department Project Management Team and the EES Contractor. Project monitoring tasks include but are not limited to:

1. Review and validate all project work plans and schedules, including staffing levels.
2. Develop and submit an EES Project Status and Milestone Report to monitor all project milestones and costs.
3. Perform ongoing assessments of project staffing levels (key and non-key personnel) and report on the ability to meet project schedule and milestones.
4. Provide Risk Assessment Reports for all project risks, with proposed mitigation strategies.
5. Monitor the Department's ACA project management office practices, processes and deliverables.

The IV&V Contractor shall conduct verification and validation reviews of the quality and completeness of critical path deliverables produced by the awarded contractor for the EES Project to help ensure they meet the requirements and expectations of the Department, CMS, and internal and external stakeholders.

D. SCOPE OF WORK

The following Scope of Work sections focus on the key IV&V activities and requirements for the Eligibility and Enrollment Solution project. Specifically:

1. Program Management - Oversight and acceptance of PMP Deliverables, Executive Committee Participation and Monthly Status Reporting
2. Deliverables Review and Acceptance
3. Quality Assurance
4. Contract Compliance

E. EES TECHNOLOGY REVIEW

The IV&V Contractor shall develop and submit a Technical Recommendations Report as part of performing the following defined EES Technology Review tasks:

1. EES Operating Environment

The IV&V Contractor will evaluate each EES Component for all of the following:

- a. System hardware configurations to determine if their performance is adequate to meet proposed system requirements as defined in the EES contract.
- b. Compatibility with the State's existing processing environment, if it is maintainable, and if it is easily upgradeable. This evaluation will include, but is not limited to Central Processing Units (CPUs) and other processors, memory, network connections, and bandwidth, communication controllers, telecommunications systems (Local Area Network/Wide Area Network [LAN/WAN]), terminals, printers, and storage devices.
- c. System software to determine if its capabilities are adequate to meet proposed system requirements.
- d. Whether the software is maintainable and easily upgradeable.
- e. Projected service provider support of the hardware and software.
- f. Database products to determine if their capabilities are adequate to meet proposed system requirements.
- g. The database's data format to determine if it is easily convertible to other formats, if it supports the addition of new data items, if it is scalable, if it is easily refreshable and if it is compatible with the State's existing hardware and software, including any on-line transaction processing environment.
- h. Processing capacity of the system to determine if it is adequate for current statewide needs for both batch and on-line processing.
- i. The system's capacity to support future growth.

The Contractor shall make recommendations on changes in processing hardware, storage, network systems, operating systems, consumer off the shelf software, and software design to meet future growth and improve system performance.

F. PROJECT PLANNING AND MANAGEMENT

The IV&V Contractor shall ensure that staff attending meetings between the Department and the IV&V Contractor has the authority to represent and commit the IV&V Contractor regarding work planning, problem resolution and program development.

At the Department's direction, the Contractor shall make its Key Personnel and other personnel assigned to the Contract available to attend meetings as subject matter experts with stakeholders both within the State government and external or private stakeholders. The IV&V Contractor shall be present at all scheduled status meetings between the Department and EES Vendor, unless the Department provides permission otherwise.

All of the IV&V Contractor's personnel that attend any meeting with the Department or other Department stakeholders shall be physically present at the location of the meeting, unless the Department gives prior, written permission to attend by telephone or video conference. In the event that the Contractor has any personnel attend by telephone or video conference and are the only entity not at the location of the meeting, the IV&V Contractor shall be responsible for providing the conference line or virtual meeting place.

The IV&V Contractor shall respond to all telephone calls, voicemails and emails from the Department within one (1) Business Day of receipt by the IV&V Contractor.

G. DELIVERABLES

The IV&V Contractor must provide the deliverables required by CMS and defined in the IV&V activities.

1. THE IV&V DELIVERABLES INCLUDE

- a. Initial Project Assessment Report
- b. IV&V Project Management Plan
- c. IV&V Project Status Report
- d. IV&V Project Schedule
- e. Performance Standards Planning Document
- f. Performance Metrics Document
- g. Monthly Management Briefing Report
- h. Risk Assessment Report
- i. EES Estimating and Schedule Review Recommendations Report
- j. EES Deliverable Review Report
- k. Critical Incident Report
- l. EES Project Milestone and Cost Status Report
- m. EES Estimating and Schedule Review Recommendations Report
- n. EES Design and Analysis Review Report
- o. Unit Testing Review Report
- p. EES Technical Recommendations Report
- q. Data Conversion Process Review Report
- r. Data Conversion Error Report

Once the detailed IV&V Project Plan is approved by the Department, the following sections detail the process for submission and review of deliverables during the life of the project/contract.

The IV&V Contractor must provide one electronic copy of each deliverable to the appropriate Department Project manager as identified in the contract. Once a deliverable is approved and

accepted by Department, the IV&V Contractor must upload an electronic copy into the designated Department SharePoint site.

Deliverables will be evaluated by the Department utilizing mutually agreed to acceptance/exit criteria.

2. DELIVERABLE SUBMISSION

Prior to development and submission of Department specified contract deliverable, a Deliverables Expectations Document (DED) containing a description of the format and content of each deliverable will be delivered to the Department for review and approval. The DED must contain, at a minimum, the following:

- a. Cover letter;
- b. Table of Contents with a brief description of the content of each section;
- c. Anticipated number of pages; and
- d. Identification of appendices/exhibits

The DED must contain an approval/rejection section that can be completed by the Department. The summary document will be returned to the IV&V Contractor within a mutually agreed upon time frame. Deliverables must be developed by the IV&V Contractor according to the approved format and content of the summary document for each specific deliverable.

At a mutually agreed to meeting, on or before the time of delivery to Department, the IV&V Contractor must provide a walkthrough of each IV&V deliverable. IV&V Deliverables must be submitted no later than 5:00 PM CST, per the approved contract deliverable schedule and must be accompanied by a deliverable sign-off form with the appropriate sections completed by the IV&V Contractor.

3. DELIVERABLE REVIEW

The Department's review time begins on the next business day following receipt of the deliverable. The Department's review time will be determined by the approved and accepted detailed project plan and the approved contract. The Department has up to five (5) working days to determine if a deliverable is complete and ready for review. Unless otherwise negotiated, this is part of the Department's review time.

Any subsequent deliverable dependent upon the Department's acceptance of a prior deliverable will not be accepted for review until all issues related to the previous deliverable have been resolved. Deliverables determined to be incomplete and/or unacceptable for review will be rejected, not considered delivered and returned to the IV&V Contractor. After review of a deliverable, the Department will return to the IV&V Contractor the project deliverable sign-off form with the deliverable submission and review history section completed.

4. DELIVERABLES ACCEPTANCE

If the deliverable is accepted, the original deliverable sign-off form signed by the appropriate Department representatives will be returned to the Contractor.

Comments/Revisions Requested by the State

If the Department has comments and/or revisions to a deliverable, the following will be provided to the IV&V Contractor:

- a. The original deliverable sign-off form with an updated entry to the deliverable submission and review history section.
- b. Attached to the deliverable sign-off form will be a detailed explanation of the revisions to be made and/or a marked up copy of the deliverable.
- c. The Department's first review and return with comments will be completed within the times specified in the contract.
- d. The IV&V Contractor will have five (5) working days, unless otherwise mutually agreed to, for review, acceptance and/or rejection of the Department's comments.

A meeting to resolve outstanding issues must be completed within three (3) business days after completion of the IV&V Contractor's review or a mutually agreed upon time frame. Agreements made during meetings to resolve issues must be documented separately. Once an agreement is reached regarding changes, the IV&V Contractor must incorporate them into the deliverable for resubmission to the Department. All changes must be easily identifiable by the Department.

Resubmission of the deliverable must occur within five (5) business days or a mutually agreed upon time frame of the resolution of any outstanding issues. The resubmitted deliverable must be accompanied by the original deliverable sign-off form. This review process continues until all issues have been resolved within a mutually agreed upon time frame.

During the re-review process, the Department will only comment on the original exceptions noted. All other items not originally commented on are considered to be accepted by the Department. Once all revisions have been accepted, the original deliverable sign-off form signed by the appropriate the Department representatives will be returned to the IV&V Contractor.

The IV&V Contractor must provide one (1) updated electronic copy of each deliverable after approval and acceptance by the Department. At this point the IV&V Contractor must submit the Department approved deliverable to CMS.

5. REJECTED, NOT CONSIDERED DELIVERED

If the Department considers a deliverable not ready for review, the following will be returned to the IV&V Contractor:

- a. The original deliverable sign-off form with an updated entry to the deliverable submission and review history section.
- b. The original deliverable and all copies with a written explanation as to why the deliverable is being rejected, not considered delivered.
- c. The IV&V Contractor will have five (5) business days, unless otherwise mutually agreed to, for review, acceptance and/or rejection of the Department's comments.

A meeting to discuss the Department's position regarding the rejection of the deliverable must be completed within three (3) business days after completion of the IV&V Contractor's review or a mutually agreed upon time frame. Resubmission of the deliverable must occur within a mutually agreed upon time frame. The resubmitted deliverable must be accompanied by the original deliverable sign-off form.

Upon resubmission of the completed deliverable, the Department will follow the steps outlined in this process.

H. REPORTING REQUIREMENTS

The IV&V Contractor shall deliver the IV&V Project Status Report to the Department on a monthly basis. The monthly IV&V Project Status Report should contain, at a minimum, all of the following:

1. Written support and documentation of all items to be presented during the next Management Briefing.
2. The results or findings of any assessments, evaluations, reviews or verifications completed during the prior month or updates in relation to any of the following areas:
 - a. CMS guidance.
 - b. Operational oversight.
 - c. Overview of IV&V Contractor Management Plan updates;
 - d. Overview of periodic reviews of the EES Project;
 - e. Updates to Risk Analysis and Mitigation Plan Review;
 - f. Overview of Corrective Action Plans produced during the previous month;
 - g. Overview of EES Contractor Critical Incident Reports;
 - h. Project Management updates;
 - i. Quality Assurance updates;
 - j. EES Operating Environment updates;
 - k. EES Software Development updates;
 - l. EES System Testing updates;
 - m. EES Data Management updates;
 - n. Any recommendations to mitigate any risk, deficiency or issue discovered as a result of any assessment, evaluation, review or verification completed during the prior month;
 - o. A Performance Standard Planning Document that includes the status of each activity shown on the IV&V Management Plan for that EES Component as well as the progress since the prior report; and
 - p. Any updated Work Breakdown Structure developed during the prior month.

V. PROPOSAL INSTRUCTIONS

This section documents the mandatory requirements that must be met by bidders in preparing the Technical and Cost Proposal. Bidders should identify the subdivisions of "Project Description and Scope of Work" clearly in their proposals; failure to do so may result in disqualification. Failure to respond to a specific requirement may be the basis for elimination from consideration during the State's comparative evaluation.

Proposals are due by the date and time shown in the Schedule of Events. Content requirements for the Technical and Cost Proposal are presented separately in the following subdivisions:

A. TECHNICAL PROPOSAL

The Technical Proposal shall consist of four (4) sections:

1. SIGNED "State of Nebraska Request For Proposal For Contractual Services" form;
2. Executive Summary;
3. Corporate Overview; and
4. Technical Approach.

1. REQUEST FOR PROPOSAL FORM

By signing the "Request For Proposal For Contractual Services" form, the bidder guarantees compliance with the provisions stated in this Request for Proposal, agrees to the Terms and Conditions stated in this Request for Proposal and certifies bidder maintains a drug free work place environment.

The Request For Proposal For Contractual Services form must be signed in ink and returned by the stated date and time in order to be considered for an award.

2. EXECUTIVE SUMMARY

The Executive Summary shall condense and highlight the contents of the solution being proposed by the bidder in such a way as to provide the Evaluation Committee with a broad understanding of the Contractor's Technical Proposal. The Executive Summary should include:

- a. A clear and concise summary of the bidder's understanding of the EES project, the IV&V Services and the Department's needs.
- b. A clear and concise summary of the proposed approach.
- c. A brief summary of the bidder's experience and ability to perform this project.
- d. A general description of the capabilities and role of any subcontractors

Bidders must present their understanding of the problems being addressed by implementing a new system, the objectives and intended results of the project, and the scope of work. Bidders shall summarize how their Technical Proposal meets the requirements of the Request for Proposal, and why they are best qualified to perform the work required herein.

3. CORPORATE OVERVIEW

The Corporate Overview section of the Technical Proposal must consist of the following subdivisions:

a. BIDDER IDENTIFICATION AND INFORMATION

The bidder must provide the full company or corporate name, address of the company's headquarters, entity organization (corporation, partnership, proprietorship), state in which the bidder is incorporated or otherwise organized to do business, year in which the bidder first organized to do business, whether the name and form of organization has changed since first organized, and Federal Employer Identification Number and/or Social Security Number.

b. FINANCIAL STATEMENTS

The bidder must provide financial statements applicable to the firm. If publicly held, the bidder must provide a copy of the corporation's most recent audited financial reports and statements, and the name, address and telephone number of the fiscally responsible representative of the bidder's financial or banking organization.

If the bidder is not a publicly held corporation, either the reports and statements required of a publicly held corporation, or a description of the organization, including size, longevity, client base, areas of specialization and expertise, and any other pertinent information must be submitted in such a manner that proposal evaluators may reasonably formulate a determination about the stability and financial strength of the organization. Additionally, a non-publicly held firm must provide a banking reference.

The bidder must disclose any and all judgments, pending or expected litigation, or other real or potential financial reversals, which might materially affect the viability or stability of the organization, or state that no such condition is known to exist.

c. CHANGE OF OWNERSHIP

If any change in ownership or control of the company is anticipated during the twelve (12) months following the proposal due date, the bidder must describe the circumstances of such change and indicate when the change will likely occur. Any change of ownership to an awarded vendor(s) will require notification to the State.

d. OFFICE LOCATION

The bidder's office location responsible for performance pursuant to an award of a contract with the State of Nebraska must be identified.

e. RELATIONSHIPS WITH THE STATE

The bidder shall describe any dealings with the State over the previous two (2) years. If the organization, its predecessor, or any party named in the bidder's proposal response has contracted with the State, the bidder shall identify the contract number(s) and/or any other information available to identify such contract(s). If no such contracts exist, so declare.

f. BIDDER'S EMPLOYEE RELATIONS TO STATE

If any party named in the bidder's proposal response is or was an employee of the State within the past twenty-four (24) months, identify the individual(s) by name, State agency with whom employed, job title or position held with the State, and separation date. If no such relationship exists or has existed, so declare.

If any employee of any agency of the State of Nebraska is employed by the bidder or is a subcontractor to the bidder, as of the due date for proposal submission, identify all such persons by name, position held with the bidder, and position held with the State (including job title and agency). Describe the responsibilities of such persons within the proposing organization. If, after review of this information by the State, it is determined that a conflict of interest exists or may exist, the bidder may be disqualified from further consideration in this proposal. If no such relationship exists, so declare.

g. CONTRACT PERFORMANCE

If the bidder or any proposed subcontractor has had a contract terminated for default during the past five (5) years, all such instances must be described as required below. Termination for default is defined as a notice to stop performance delivery due to the bidder's non-performance or poor performance, and the issue was either not litigated due to inaction on the part of the bidder or litigated and such litigation determined the bidder to be in default.

It is mandatory that the bidder submit full details of all termination for default experienced during the past five (5) years, including the other party's name, address and telephone number. The response to this section must present the bidder's position on the matter. The State will evaluate the facts and will score the bidder's proposal accordingly. If no such termination for default has been experienced by the bidder in the past five (5) years, so declare.

If at any time during the past five (5) years, the bidder has had a contract terminated for convenience, non-performance, non-allocation of funds, or any other reason, describe fully all circumstances surrounding such termination, including the name and address of the other contracting party.

h. SUMMARY OF BIDDER'S CORPORATE EXPERIENCE

The bidder shall provide a summary matrix listing the bidder's previous projects similar to this Request for Proposal in size, scope and complexity, specifically:

- i. Experience performing IV&V services for governmental agencies or large private health insurance providers.
- ii. Experience with a highly similar task for providing IV&V services on projects of similar scope.
- iii. Experience performing IV&V services for a project that included transitioning data from a legacy or existing system into a new system.
- iv. Demonstrated knowledge and understanding of the CMS Enterprise Life Cycle Gate Review process including required documents and their associated templates.
- v. Experience with CMS's Medicaid Information Technology Architecture (MITA).
- vi. Experience working with CMS or projects that had CMS oversight.

The State will use no more than three (3) narrative project descriptions submitted by the bidder during its evaluation of the proposal.

The bidder must address the following:

- vii. Bidder must provide narrative descriptions to highlight the similarities between their experience and this Request for Proposal. These descriptions must include:
 - a) the time period of the project;
 - b) the scheduled and actual completion dates;
 - c) the contractor's responsibilities;
 - d) for reference purposes, a customer name (including the name of a contact person, a current telephone number, a facsimile number and e-mail address); and
 - e) each project description shall identify whether the work was performed as the prime contractor or as a subcontractor. If a bidder performed as the prime contractor, the description must provide the originally scheduled completion date and budget, as well as the actual (or currently planned) completion date and actual (or currently planned) budget.
- viii. Contractor and subcontractor(s) experience must be listed separately. Narrative descriptions submitted for subcontractors must be specifically identified as subcontractor projects.
- ix. If the work was performed as a subcontractor, the narrative description shall identify the same information as requested for the contractors above. In addition, subcontractors shall identify what share of contract costs, project responsibilities, and time period were performed as a subcontractor.

i. SUMMARY OF BIDDER'S PROPOSED PERSONNEL/MANAGEMENT APPROACH

The bidder must present a detailed description of its proposed approach to the management of the project.

The bidder must identify the specific professionals who will work on the State's project if their company is awarded the contract resulting from this Request for Proposal. The names and titles of the team proposed for assignment to the State project shall be identified in full, with a description of the team leadership, interface and support functions, and reporting relationships. The primary work assigned to each person should also be identified.

The bidder shall provide resumes for all personnel proposed by the bidder to work on the project. The State will consider the resumes as a key indicator of the bidder's understanding of the skill mixes required to carry out the requirements of the Request for Proposal in addition to assessing the experience of specific individuals.

Resumes must not be longer than three (3) pages. Resumes shall include, at a minimum, academic background and degrees, professional certifications, understanding of the process, and at least three (3) client references (Client and Company Name, Project Name, address, email address and telephone number) who can attest to the competence and skill level of the individual. Any changes in proposed personnel shall only be implemented after written approval from the State.

A major factor in the success of the Project is the degree of collaboration between IV&V and EES Contractor staff and Department staff. The IV&V Contractor is expected to work with key Department stakeholders, management and subject matter experts throughout the business and technology enterprise when conducting the project activities and developing the work products and deliverables. The IV&V Contractor is expected to propose a project approach that incorporates the involvement of Department business and technology staff in order to obtain information and feedback necessary to produce quality work products and deliverables.

The Bidder will provide resume(s) for the key personnel proposed for this project. The Bidder is required to demonstrate that their consultant(s) or employee(s) will have the skills necessary to meet the objectives of this project as listed below. The resumes must include:

- i.** Educational qualifications
- ii.** Summary of employment experience
- iii.** Specific experience with the service areas for which they are being proposed
- iv.** Previous work assignments in a similar role for this type of engagement demonstrating ability to meet the objectives listed below:
- v.** Proven experience with Consulting, Project Administration and Technical Assistance for Commercial or State Government Eligibility Solutions for a period of at least two years within the last four years
- vi.** Core competency in IV&V and QA as demonstrated by the resume
- vii.** Experience in the design, development, testing, and implementation of Medicaid or Commercial eligibility system
- viii.** Government or public sector experience
- ix.** In-depth knowledge of ACA Regulations
- x.** Highly developed written and verbal communication skills

The Bidder's proposal shall describe policies, plans and intentions with regard to maintaining continuity of key personnel and the implementation team assigned to the project to avoid and minimize the impact of necessary staff changes.

The Department will provide workspace, equipment and conference telephone capabilities to house the IV&V Contractor staff in Lincoln, NE. Additionally, the IV&V Contractor will be assigned Department SharePoint repository capabilities for all IV&V Contractor project documents and deliverables.

In order to ensure the success of this project, it is important that there is a continuity of Key Staff assigned to the project. The Bidder's proposal must:

- i.** Describe policies, plans, and intentions with regard to maintaining continuity of personnel assignments throughout the performance of any agreement resulting from this RFP.
- ii.** Discuss the Bidder's plans to avoid and minimize the impact of personnel changes.
- iii.** Identify planned backup personnel assignments.

- iv. Commit to using the personnel identified in the proposal and agree to DHHS' right to approve proposed personnel changes during the term of the contract.
- v. Agree that the Bidder's proposed project personnel may not be reassigned, replaced, or added during the project without the prior written consent of the DHHS Project Manager. Should a key staff position be vacated, the IV&V Contractor must give DHHS resumes of, and an opportunity to interview and approve, potential replacements for that employee.
- vi. Agree that the Bidder's proposed key project personnel may not be assigned new or additional contract assignments outside the State of Nebraska contract, without the prior written consent of the DHHS Project Manager.
- vii. Agree that the DHHS Project Manager reserves the right to require a change in the IV&V Contractor's project personnel at the DHHS Project Manager's discretion and that DHHS must be given an opportunity to interview and approve potential replacements for that employee. However, DHHS will not unreasonably exercise this option and will take reasonable steps to work with the IV&V Contractor toward a solution.

j. SUBCONTRACTORS

If the bidder intends to subcontract any part of its performance hereunder, the bidder must provide:

- i. name, address and telephone number of the subcontractor(s);
- ii. specific tasks for each subcontractor(s);
- iii. percentage of performance hours intended for each subcontract; and
- iv. total percentage of subcontractor(s) performance hours.

4. TECHNICAL APPROACH

The technical approach section of the Technical Proposal must consist of the following subsections:

- a. Description how the IV&V Bidder plans to carry out the IV&V Services for the EES Project. This description shall include methodologies, strategies, standards and approaches employed by the Bidder for executing each of the IV&V activities within the Scope of Work of this RFP.
- b. Description of the deliverables produced as a result of IV&V activities, including sample reports.
- c. A documented methodology for performing IV&V Services that has proved successful on past projects.
- d. A documented methodology for developing performance matrices that has proved successful on past projects.
- e. A documented methodology for developing the performance matrices.
- f. Description for assessing risks, documenting findings and communicating them to the Department and contractors.
- g. A preliminary project management plan that includes the activities and deliverables which are defined in this RFP and expected of the vendor.

B. COST PROPOSAL REQUIREMENTS

This section describes the requirements to be addressed by bidders in preparing the Cost Proposal. The bidder must submit the Cost Proposal in a section of the proposal that is a separate section or is packaged separately as specified in the RFP from the Technical Proposal section.

The component costs of the fixed price proposal for providing the services set forth in the Request for Proposal must be provided by submitting forms substantially equivalent to those described below.

1. PRICING SUMMARY

This summary shall present the total fixed price to perform all of the requirements of the Request for Proposal - Use Form B. The bidder must include details in the Cost Proposal supporting any and all costs. These details must include, at a minimum, detailed descriptions and/or specifications of the goods and/or services to be provided, quantities, and timing and unit costs, if applicable.

The State reserves the right to review all aspects of the Cost Proposal for reasonableness and to request clarification of any proposal where the cost component shows significant and unsupported deviation from industry standards or in areas where detailed pricing is required.

2. PRICES

Prices quoted shall be net, including transportation and delivery charges fully prepaid by the bidder, F.O.B. destination named in the Request for Proposal. No additional charges will be allowed for packing, packages, or partial delivery costs. When an arithmetic error has been made in the extended total, the unit price will govern.

C. PAYMENT SCHEDULE

The payment schedule for the project is tied to specific dates and deliverables. Invoices may be submitted by the contractor on specific dates based on the completion and acceptance of related deliverables. No invoice will be approved unless the associated deliverables have been approved. A percentage of the total contract cost may then be invoiced based on the following schedule.

Form A

Bidder Contact Sheet

Request for Proposal Number 4468Z1

The Bidder Contact Sheet should be completed and submitted with each response to this Request for Proposal. This is intended to provide the State with information on the bidder's name and address, and the specific person(s) who are responsible for preparation of the bidder's response. Each bidder shall also designate a specific contact person who will be responsible for responding to the State if any clarifications of the bidder's response should become necessary. This will also be the person who the State contacts to set up a presentation/demonstration, if required.

Excerpt from DHHS IT Securing Hardware and Software Standard DHHS-2013-001-A

3.8 Security Requirements for Cloud Services and Cloud Service Providers

All Cloud Service Providers (CSP's) must have an official FedRAMP certification by an accredited third-Party Assessor Organization (3PAO), or alternatively, the following conditions must be met or addressed via contractual agreement before engaging any cloud service providers or third-party hosting for DHHS when that cloud service may store or process any Confidential or Highly Restricted data:

1. The Cloud Service Provider or third-party host (CSP/3PH) must provide evidence of secure storage of access credentials that are at least equal to that of DHHS internal systems.
2. Access to the cloud service will require multi-factor authentication based on data classification levels.
3. De-provisioning of credentials must occur within two (2) hours of de-provisioning of the internal system credentials.
4. Information will be encrypted using IS&T approved technology for information in transit as well as information stored or at rest.
5. Encryption key management will be controlled and managed by DHHS unless explicit approval for key management is provided to CSP/3PH by IS&T. This may require an escrow service for key storage.
6. All equipment removed from service, information storage areas, or electronic media that contained DHHS information must have all DHHS information overwritten, sanitized, and data destruction verified by DHHS before allowing that equipment, information storage space, or media to be destroyed or assigned for reuse.
7. CSP/3PH will provide vulnerability scanning and testing on a schedule approved by the DHHS ISO. Results will be provided to DHHS as needed.
8. Patch management of hardware and software at the CSP/3PH are required to meet the same standards that are required at DHHS.
9. CSP/3PH will meet all DHHS requirements for chain of custody and PHI or PII breach notification in the event that DHHS requires forensic analysis. CSP/3PH will maintain an incident management program that notifies DHHS within one (1) hour of a breach.
10. CSP/3PH will provide evidence of audit and assessment of the security of the service environment, and will agree to reasonable inspection of such security by DHHS-authorized parties.
11. CSP/3PH is required to advise DHHS on all geographic locations of DHHS information. CSP/3PH will not allow DHHS information to be stored or accessed outside the USA without explicit approval by DHHS. This includes both primary and alternate sites.

12. Privileged access roles at the CSP/3PH are required to meet the same vetting standards of privileged access personnel at DHHS, such as background checks, etc.
13. Contracts with CSP/3PH's shall have SLAs in place that clearly define security and performance standards. Contracts will address how performance and security will be measured, monitored, and reported. Contracts will also establish an enforcement mechanism for SLA compliance.
14. CSP/3PH will provide assurance of compliance with the Privacy Act, HIPAA regulations, and IRS 1075 regulations. CSP/3PH will provide adequate security and privacy training to its associates, and provide the DHHS security officer with adequate evidence of this training.
15. CSP/3PH will provide DHHS with the ability to conduct a reasonable search to meet Nebraska Public Records Law.
16. Before contracting with a CSP/3PH, DHHS shall have proactive records planning in place to ensure the ability to have timely and actual destruction of records in accordance with DHHS record retention policies.
17. CSP/3PH will provide documentation, evidence, or reasonable access by IS&T and ISO to ensure compliance with these standards.

**REVISED Appendix B Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

The Functional Requirements Traceability Matrix (RTM) is used to document and track the project requirements from the proposal through to testing to verify that the requirement has been completely fulfilled. The Contractor will be responsible for maintaining the set of Baseline Requirements directly related to the configuration of the EES. Additions, modifications, and deletions to these requirements will be added and modified throughout the project so it is imperative that a current version of the matrix be maintained at all times.

Bidders must provide an initial RTM as part of its proposal. The RTM shall follow the instructions below. The Bidder must state requirements exactly as they are provided in this RFP. The Bidder must indicate how it will achieve full compliance (i.e., requirement fulfilled 100%). Any requirements that the Bidder cannot attest to full compliance must be documented as outlined in Appendix D: Gap Analysis.

Bidders are required to provide a response, using the appropriate codes provided in the tables below, for each requirements listed in the Functional Requirements Response Matrix. Scoring for each requirement will directly relate to the Ability Code indicated by the Bidder.

Ability Code	Condition	Description
S	Standard Function	The proposed EES fully satisfies the requirement as stated. The Bidder must describe how the requirement is satisfied by the EES.
W	Workflow or System Configuration Required	Current functionality of the proposed EES exists in the EES and can be modified by a system administrator to meet this requirement. The Bidder must describe how the requirement will be satisfied.
M	Modification Required	The proposed EES requires a modification to existing functionality to meet this requirement which requires a source code modification. The EES will be modified to satisfy the requirements as stated or in a different format. The Bidder must describe the modifications. If the modification requires 1000 or more hours the Bidder must also complete Appendix D Gap Analysis.
F	Planned for Future Release	This functionality is planned for a future release. The Bidder must describe how the requirement will be satisfied by the EES and when the release will be available.
C	Custom Design and Development	The proposed EES requires new functionality to meet this requirement which requires a source code addition. The Bidder must describe the feature and its value. If the custom design and development requires 1000 or more hours the Bidder must also complete Appendix D Gap Analysis.
N	Cannot Meet Requirement	The proposed EES will not satisfy the requirement. The Bidder must explain why the requirement cannot be satisfied. The Bidder must complete Appendix D Gap Analysis.
O	Other Software	If the requirement is to be satisfied through the use of a separate software package(s), the Bidder must identify those package(s) and describe how the functionality is integrated into the base system.

**REVISED Appendix B Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

1. General Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
GEN 001	The EES shall be branded using official State of Nebraska and Nebraska Department of Health and Human Services logos, images, etc.		
GEN 002	The EES shall provide customized local office information, through public-facing front-end (i.e. physical location of nearest local office, driving directions and name, email and phone number).		
GEN 003	The EES shall ensure alignment with HIPAA security, privacy and transaction standards		
GEN 004	The EES shall implement and support functionality to meet the requirements of the Affordable Care Act (ACA) and achieve compliance deadlines.		
GEN 005	The EES shall assure that all processes, user interfaces and documents produced by the system meet applicable State and federal accessibility standards for the life of the contract.		
GEN 006	The EES shall separate business rules from the application logic. Business rules will be contained in a COTS rules engine.		
GEN 007	The EES shall provide a scalable solution to allow for the incorporation of shared eligibility determination rules to support the State's phased approach.		
GEN 008	The EES will facilitate a "no wrong door" approach to insurance coverage as required in the ACA. The EES will accept account/application transfers to/from the Exchange to seamlessly facilitate eligibility determination for all Insurance Affordability Programs.		
GEN 009	The EES will allow applications and renewals via all ACA required media. E.G. Paper, online, phone, fax, in person and other commonly available electronic means.		
GEN 010	The EES shall leverage existing systems (where appropriate) and is built on system architecture that is scalable, flexible, modular and dynamic.		
GEN 011	The EES shall leverage connections to the federal data hub to access and verify data from participating agencies such as the IRS, federal DHHS, the Department and others. Hub – Required State - Required		

REVISED Appendix B Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
	Financial Institutions- Future		
GEN 012	The EES shall achieve the necessary degree of interoperability between technology components to determine eligibility for Medicaid or CHIP or if the customer is not eligible for Medicaid a transfer to the FFM.		
GEN 013	The EES shall support a timed release schedule.		
GEN 014	The EES shall support all Nebraska DHHS Medicaid programs.		
GEN 015	The EES shall allow business users, as determined by the Department, to easily read/modify the eligibility determination rules.		
GEN 016	The EES shall support client facing services and documents in English and Spanish languages.		
GEN 017	The EES shall screen for language needs (LEP) at first point of contact		
GEN 018	The EES shall provide functionality to interface with Multi-channel Workforce Management software, such as Verint.		
GEN 019	The EES shall have the ability to schedule staff performing call center functions, back office functions, local office appointments, and be integrated with task manager.		
GEN 020	The EES shall have the ability to interface with the quality management system.		
GEN 021	The EES shall have the ability to interface with the LINKS Performance Management and Training System.		
GEN 022	The EES should have the ability to measure case review and customer service contact review. It should utilize a scorecard or similar tool to provide feedback down to staff level.		
GEN 023	The EES shall have the ability to interface with the NE Financial and Accounting system.		
GEN 024	The EES shall accommodate phone application voice signature mechanism.		
GEN 025	The EES shall validate and return address information errors as entered in the system.		
GEN 026	The EES shall provide functionality to allow applicants to provide a signature via all ACA required modes of application.		
GEN 027	The EES shall provide free-form narrative notes capabilities with no character limit, wrap-around text, sortable and searchable.		
GEN	The EES shall auto-populate notes based on predefined business rules.		

**REVISED Appendix B Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
028			
GEN 029	The EES shall provide templates for notes entry.		
GEN 030	The EES shall provide mechanism to spell-check notes.		
GEN 031	The EES shall provide mechanism to associate notes to multiple beneficiary/households without retyping.		
GEN 032	The EES shall provide a mechanism to automatically date/time stamp all notes.		
GEN 033	The EES shall provide a mechanism for eligibility workers to edit their own notes with appropriate audit trails.		
GEN 034	The EES shall provide a mechanism for all system events, including system, user and administrative actions to be auditable.		
GEN 035	The EES shall provide a mechanism to restrict notes from being edited after the initial entry.		
GEN 036	The EES shall allow for any data element to be exported into an industry standard format.		
GEN 037	The EES shall allow applicant/beneficiaries to self-report changes in their personal information online, notify the appropriate eligibility worker based on parameters described by the Department when changes are made		
GEN 038	The EES shall re-determine eligibility when a Change of Circumstance is received electronically or entered by a worker.		
GEN 039	The EES shall provide the capability to view the new determination of eligibility after the change in information.		
GEN 040	The EES shall place an individual from one program into another, based on a Change of Circumstance or eligibility rules, without affecting other individuals in that household.		
GEN 041	The EES shall provide the capability to track and record any changes to an individual's information.		
GEN 042	The EES shall provide a mass change capability by a non-technical user to affect all or part of the Department caseload for any or all programs.		
GEN 043	The EES shall allow authorized users to update, add persons, and relationships to an existing household and maintain a history thereof.		
GEN 044	The EES shall close eligibility to a program without closing other programs associated with that household or individuals in the household.		

**REVISED Appendix B Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
GEN 045	The EES shall change the status of any individual in a household without terminating eligible household members.		
GEN 046	The EES shall provide web-based functionality to allow the applicant to renew and initially apply for eligibility online.		
GEN 047	The EES shall allow for renewals via all ACA required modalities.		
GEN 048	The EES shall accept a renewal prior to the 12 month renewal date. The renewal period may vary by case/household/individual and program.		
GEN 049	The EES shall track and allow beneficiaries who did not return the pre-populated renewal form or the required documentation and are terminated on that basis a reconsideration period, as defined the Department, when the Department would reconsider eligibility without a new application and renew eligibility if necessary information is provided.		
GEN 050	The EES shall allow an individual who regains coverage during the reconsideration period, retroactive coverage back to date of termination.		
GEN 051	The EES shall automate the renewal process if all information remains the same or if verified information remains within applicable limits.		
GEN 052	The EES shall integrate with various systems within the State for the purpose of data sharing, eligibility determination and data verification (i.e. incarceration, Unemployment Insurance benefits, child support income, State wage information)		
GEN 053	The EES shall adjust eligibility determination resulting from appeal.		
GEN 054	The EES shall notify the applicant/beneficiary, electronically and via paper, of adjusted eligibility within 30 days of the adjustment, regardless of the reason for the eligibility adjustment.		
GEN 055	The EES shall track timeframes and deadlines of the appeal process and alert a worker or management of overdue status.		
GEN 056	The EES shall allow a worker to view appeal progress/status to report back to the applicant/beneficiary.		
GEN 057	The EES shall support an integrated and customizable applicant complaint and grievance process, with reporting capabilities.		

REVISED Appendix B Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
GEN 058	The EES shall be scalable and flexible enough to accommodate and adapt to changes required by State and/or federal statute, regulation, mandate, decision, or policy without significant changes to the architecture and without impacting the scalability or response times of the system.		
GEN 059	The EES shall incorporate the policy choices and priorities of the Nebraska policymakers.		
GEN 060	The EES shall meet the requirements of the RFP and be compliant with MITA 3.0 standards.		
GEN 061	The EES shall be based on an orientation of business processes, business rules and data and metadata management that allows modular componentized design approach that enhances interoperability across service modules and with external applications and data sources.		
GEN 062	The EES shall identify individuals who are dual eligible (Medicare plus federal Medicaid) and determine eligibility for dual-eligibles, as well as for those who are eligible for other Medicare savings programs.		
GEN 063	The EES shall support secure messaging between the Department and the federal data hub and/or the Connector via federally defined interfaces and Business Service Descriptions.		
GEN 064	The EES shall include workflow management based on whether an applicant is MAGI-based and/or MAGI-excepted households.		
GEN 065	The EES shall allow individuals in a household to be eligible under different categories and receive different benefits based upon individual information.		
GEN 066	The EES shall provide the capability to defined and stored DDHS specific data. The ability to use the data to drive workflow or pre-populate forms.		
GEN 067	The EES shall be scalable so that it can identify those applicants that are potentially eligible for express lane eligibility should the Department choose to adopt Express Lane Eligibility Program.		
GEN 068	The EES shall provide the capability for presumptive eligibility as defined by the Department and include provider web access for application purposes.		
GEN 069	The EES shall provide a mechanism to define required and optional fields, including default data values as applicable, based on program rules.		
GEN 070	The EES shall provide an alert system to notify workers when action items are assigned, have been completed, or are past due.		

REVISED Appendix B Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
GEN 071	The EES shall manually/automatically assign priority to alerts.		
GEN 072	The EES shall automatically escalate an alert if not addressed within the time limits.		
GEN 073	The EES shall provide mechanism for supervisors to be able to view alerts for any individual or group.		
GEN 074	The EES shall provide a mechanism to associate and tie alerts to household or applicant/beneficiary and have alerts accessible when household is reviewed.		
GEN 075	The EES shall automatically delete alerts when action is taken.		
GEN 076	The EES shall manually create, assign, update, change, and delete alerts.		
GEN 077	The EES shall automatically or manually archive alerts when the required action is completed.		
GEN 078	The EES shall provide a sortable and searchable history of alerts that display all actions taken in regards to that alert.		
GEN 079	The EES shall provide a mechanism to indicate that a beneficiary/household is under review.		
GEN 080	The EES shall provide a mechanism to alert management that pending applications have exceeded specified time limits.		
GEN 081	The EES shall create an alert of approaching deadlines.		
GEN 082	The EES shall create and assign alerts associated with pending tasks.		
GEN 083	The EES shall alert specified work units when specific beneficiary/household changes are made based on program rules (e.g. customer/beneficiary/eligibility worker changes the address, certain demographic information, etc.		
GEN 084	The EES shall not allow any duplication or potential duplication of services to the beneficiary.		
GEN 085	The EES shall provide the capability to alert eligibility worker of multiple households at same physical and/or mailing address.		
GEN 086	The EES shall maintain individual and household information.		

REVISED Appendix B Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1

2. Reporting Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
RPT 001	The EES shall make available all business data elements for use with the business intelligence tool.		
RPT 002	The EES shall generate graphical representation of report data (e.g. pie charts, graphs, histograms, line plots, scatter plots)		
RPT 003	The EES shall generate all required Department and federal reports, in the format, media and schedule specified by the Department.		
RPT 004	The EES shall create 'canned' reports to be run on a scheduled basis. The schedule for each report should be easily changed through the system user interface by a non-IT worker.		
RPT 005	The EES shall retain report results in a manner that complies with Nebraska and applicable federal data retention policies, based on data type and program rules. The time period for which the reports are retained shall be mutually determined and shall be aligned with ongoing capacity planning exercise.		
RPT 006	The EES shall store all reports in such a manner as to allow online access to and retrieval of both current and historical reports via a user-friendly parameter and/or menu-driven access to reports, based on user permissions, as defined by the Department.		
RPT 007	The EES shall provide a mechanism to view online, save and print ad-hoc reports, based on user roles and program rules.		
RPT 008	The EES shall tabulate data by worker, county, region, etc.		
RPT 009	The EES shall provide a mechanism to perform a QC sampling by maintaining the current functionality for sampling methodology (regions, clusters, random, and stratification), including designating sampling size for random, designating month and year of a sample, designating regions and/or clusters (counties) of a sample.		
RPT 010	The EES shall provide a mechanism to create the universe from which the system pulls the samples.		
RPT 011	The EES shall provide a mechanism to manually eliminate a case from a sample and replace it with a replacement sample based on user roles. The EES shall capture a reason for eliminating/ replacing a case.		
RPT 012	The EES shall create, maintain and store QC review results for different program types, by office, sample month and year, sample ID.		

REVISED Appendix B Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
RPT 013	The EES shall define, implement, collect, and report using a set of business process-related performance metrics that conform to MITA defined performance metrics such as tracking changes in programs and policies and evaluating corresponding changes in health outcomes.		
RPT 014	The EES shall create case load reports such as active case list, active person list, pending application, review lists by manager, location, region and statewide.		
RPT 015	The EES shall provide multiple reports to include, but not limited to, fraud hearings, number and type of appeals decisions.		
RPT 016	The EES shall provide a dashboard summary view of the status of households across units for managers as for example, active, critical, error, quality assurance corrective action, QC reviews, pending reviews, etc.		
RPT 017	The EES shall provide a comprehensive reporting solution that will generate standard operating, pre-defined or operational reports without an adverse effect on system performance or response time.		
RPT 018	The EES shall generate standardized or ad-hoc reports without affecting worker response times.		
RPT 019	The EES shall store all reports in such a manner to allow online access to and retrieval of report information via a user-friendly parameter and/or menu-driven access to reports.		
RPT 020	The EES shall identify the date and time on all reports when it was generated and allow the worker to save the report multiple industry standard formats.		
RPT 021	The EES shall allow authorized workers to access, generate, and print reports.		
RPT 022	The EES shall save reports or raw data in multiple outputs formats (e.g. CSV, tab delimited, text, HTML, XML, XLS) in conformance to security standards and shall provide reports to be exported to an electronic file, PDF, Excel, Text, or Word format depending on the type of report.		
RPT 023	The EES shall maintain a history of documents and reports received, track these items and make them accessible in the electronic case file, so that information can be shared across programs and agencies using a HIPAA compliant method.		
RPT 024	The EES shall have standard reports to measure progress against the Department goals, initiatives, and policy changes, including, but not limited to, policy initiatives, budget initiatives, Affordable Care Act requirements, and grant opportunities.		

REVISED Appendix B Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
RPT 025	The EES shall generate ad-hoc and standard reports in real-time as well as historical.		
RPT 026	The EES shall provide summary tables of reports.		
RPT 027	The EES shall ensure that the reports are print-ready, visually acceptable to the user and provide the ability to format, set headers, labels.		
RPT 028	The EES shall be scalable to produce ad hoc reports on request without impacting system response times.		
RPT 029	The EES shall create reports using all current data elements available at the point of creation.		
RPT 030	The EES shall produce control and error reports from mass change processing.		
RPT 031	The EES shall have the capability to import data from other data sources.		
RPT 032	The EES shall support the ability to run online queries at the worker level.		
RPT 033	The EES shall produce reports on frequencies specified by the Department with the ability to change those frequencies at any time with minimal IT support.		
RPT 034	The EES shall allow users to sort, search, filter and drill down on any parameter of a standard report.		
RPT 035	The EES shall include version control for all reports.		
RPT 036	The EES shall generate data and reports needed to comply with federal audit and oversight requirements.		
RPT 037	The EES shall generate data and reports needed to apply for and demonstrate appropriate use of federal grant funding sources.		
RPT 038	The EES shall document the appropriate benefit programs, projects or other categories impacted by system or human actions to support claims for federal matching funds.		
RPT 039	The EES shall provide reports or data to support the cost allocation strategies (e.g., numbers and types of applications processed etc.).		
RPT 040	The EES shall differentiate funding source based on Department - specified criteria.		
RPT 041	The EES shall automate reports to support accurate forecasting of program costs.		
RPT 042	The EES shall automate reports to support evaluation of cost-containment and quality improvement initiatives		

**REVISED Appendix B Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
RPT 043	The EES shall create standard reports defined by the Department to compare program expenses to budgeted expenses for the State and federal fiscal year-to-date, prior State and federal fiscal year, and projected through the remainder of the State and federal fiscal year.		
RPT 044	The EES shall generate an inventory of current and available reports.		
RPT 045	The EES shall support the ability to produce formatted reports based on online queries.		
RPT 046	The EES shall provide access to Query builder application.		
RPT 047	The EES shall support the preparation of a branch report, i.e., standard template with pre-populated data.		

**REVISED Appendix B Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

3. Business Requirements/Processes Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
OPS 001	The EES shall create easy, efficient, and accurate interfaces with other systems, including the federal data hub, state and other data sources to verify application information		
OPS 002	The EES shall support integrated eligibility system and/or reduce errors associated with processing eligibility for more complex populations		
OPS 003	The EES shall support workers to improve workflow and reduce errors including:		
OPS 004	<ul style="list-style-type: none"> • Computerized case files and online case histories 		
OPS 005	<ul style="list-style-type: none"> • Automated assignments of case files to workers according to their expertise and availability 		
OPS 006	<ul style="list-style-type: none"> • Logic flags 		
OPS 007	<ul style="list-style-type: none"> • Online policy and procedure manuals 		
OPS 008	<ul style="list-style-type: none"> • Integrated document imaging 		
OPS 009	The EES shall contain the business rules and technical capability to determine online, real-time eligibility for Medicaid MAGI and non-MAGI based eligibility		
OPS 010	The EES shall automate eligibility verification including electronic acceptance of verification documents; validation of applicant data through electronic data exchanges with valid sources		
OPS 011	The EES shall centralize User Account Management, Authentication and Authorization		
OPS 012	The EES shall display and print stored or imaged forms		
OPS 013	The EES shall allow documents to be scanned into and associated with the electronic application/renewal individual, and/or household.		
OPS 014	The EES shall upload attachments to correspondence records.		
OPS 015	The EES shall link scanned images to correspondence and records to provide one view of all related material (images, letters, or contacts with		

REVISED Appendix B Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
	staff), with multiple links.		
OPS 016	The EES shall provide the ability to view related correspondence records from a single correspondence record.		
OPS 017	The EES shall meet federal and State records retention and purging standards		
OPS 018	The EES shall provide a searchable library, with highly flexible search criteria to enable a user to quickly find needed information in policy manuals, policy memos, training material, implementation memos and all help functions without affecting work in progress.		
OPS 019	The EES shall support both task-based, individual-based, and household-based operations.		
OPS 020	The EES shall forward finished tasks to the next responsible party or parties, when multiple levels of effort are required for resolution.		
OPS 021	The EES shall save work in progress, exit the workflow, access work at a later point with all of the information still populated from the previous worker's actions so previous work will not need to be repeated and the worker can enter the workflow where they left off.		
OPS 022	The EES shall track, monitor, and display work done/ in queue to supervisors.		
OPS 023	The EES shall create and maintain eligibility worker availability information at the local office level.		
OPS 024	The EES shall monitor caseload size in real time and support an automated workload assignment process.		
OPS 025	The EES shall weigh caseloads and provide recommended distribution.		
OPS 026	The EES shall establish a flexible assigned workload management hierarchy that identifies the responsible organizational unit.		
OPS 027	The EES shall provide an automated and manual benefit card generation capability.		
OPS 028	The EES shall provide a mechanism to override automatic mailing of benefit card.		
OPS 029	The EES shall provide a mechanism to indicate a replacement benefit card is needed.		
OPS 030	The EES shall assign work using flexible criteria; for example, assign work by worker or the type of work..		
OPS 031	The EES shall transfer a single case, or a collection of cases in mass, including all electronic supporting documentation to and from any		

REVISED Appendix B Functional Requirements

Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
	organizational unit.		
OPS 032	The EES shall automatically create a notification of a case transfer.		
OPS 033	The EES shall allow a worker to manually create a notification of case transfer.		
OPS 034	The EES shall evaluate a case prior to a transfer, prompt user if established transfer criteria are not met and not allow transfer until criteria is met.		
OPS 035	The EES shall allow user to override assignment rules and process a transfer when defined criteria are not met based on security rule and audit trail.		
OPS 036	The EES shall have the flexibility to assign a Single Point of Contact (SPOC) to a case or use a universal assignment.		
OPS 037	The EES shall identify if and when a SPOC is assigned to a case so all communications go through the SPOC.		
OPS 038	The EES shall update case and/or household members' information, based on user roles and business functions.		
OPS 039	The EES shall have a real time, comprehensive listing of workers per customer and/or case.		
OPS 040	The EES shall sort and display the type and number of cases assigned to a specific caseload.		
OPS 041	The EES shall add, subtract or modify the number of caseloads supported within the system.		
OPS 042	The EES shall assign a unique identifier to each caseload.		
OPS 043	The EES shall recommend transfer of cases from one caseload to another.		
OPS 044	The EES shall identify when a referral is required and automatically generate and track a referral.		
OPS 045	The EES shall allow and track manually generated referrals.		
OPS 046	The EES shall track status of referrals to monitor for required or expected action by the receiving entity.		
OPS 047	The EES shall provide the ability to differentiate types of referrals within programs. (e.g. Child only CSE referrals, ERU spousal elective share, TPL lead vs. change, HIPPS, subrogation)		
OPS	The EES shall identify when a Change referral is necessary (e.g.

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
048	employment changes, household changes, entering or leaving foster care, etc.) and send the referral.		
OPS 049	The EES shall associate a consumer notice related to the specific Cost Avoidance and Recovery area (CSE, TPL, HIPPS, ERU, and Medical Subrogation).		
OPS 050	The EES shall identify, generate and send potential resource situations to work unit as specified. (e.g. Annuities, Trust like Devices, Spousal Elective Shares, Personal Injury cases, Workers Comp, etc.)		
OPS 051	The EES shall display a summary of case information by user role (e.g. head of household, members, relationships, addresses, date of birth, caseworker or process queue, office location, case status, recertification date, simplified report date, current benefit amount, sanction status, etc.).		
OPS 052	The EES shall provide a mechanism to provide custom views of case summary information, based on user roles, program rules, and office procedure.		
OPS 053	The EES shall match and merge duplicate case information, based on user role and program rules.		
OPS 054	The EES shall automatically update case information received through electronic access.		
OPS 055	The EES shall update and track reported changes which do not affect eligibility and do not require verification that are submitted electronically (e.g. phone number, cell number, e-mail address, change in income which remains below program threshold, etc.)		
OPS 056	The EES shall have the ability to close or deny a Category of Eligibility when business rules dictate.		
OPS 057	The EES shall close a Category of Eligibility without closing other active Category of Eligibility s associated with that case.		
OPS 058	The EES shall close any individual other than the program case name in a Category of Eligibility without closing the entire Category of Eligibility that has other active members.		
OPS 059	The EES shall provide a mechanism for authorized users to manually override a category of eligibility and/or allow opt-in/opt-out functionality within an active Category of Eligibility.		
OPS 060	The EES shall provide a mechanism to automatically change Category of Eligibility within an active program.		
OPS 061	The EES shall assign a new eligibility begin date for a new Category of Eligibility and automatically assign eligibility end date for a Category of Eligibility being closed.		

**REVISED Appendix B Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
OPS 062	The EES shall provide a mechanism to release the hold after final disposition by the secondary reviewer.		
OPS 063	The EES shall share common data elements across multiple programs for selected fields.		
OPS 064	The EES shall have the capability to automatically reassign categories according to business rules.		
OPS 065	The EES shall apply specific eligibility rules during renewal, a reported change or processing simplified reporting for a program(s).		
OPS 066	The EES shall provide a mechanism to collect all information required to auto-populate all necessary Procuring Agency case processing forms, based on program rules.		

**REVISED Appendix B Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

4. Eligibility Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
ELG 001	The EES shall support eligibility determination in keeping with federal "timeliness" guidelines and State performance standards.		
ELG 002	The EES shall support electronic verification of application data, using State or federal sources, where possible, and support post-enrollment verification where electronic data cannot be obtained.		
ELG 003	The EES shall use the CMS Single Streamlined Application or a modified version of the Single Streamlined Application.		
ELG 004	The EES shall support the use of supplemental application for initial eligibility determinations, renewals or changes to existing Medicaid clients.		
ELG 005	The EES shall electronically capture and store all data elements on the CMS Single Streamlined Application, even if the data elements are not needed for Medicaid eligibility determination.		
ELG 006	The EES shall support the use of alternative applications such as shorten form for non-MAGI, and assessment of resources.		
ELG 007	The EES shall support multiple non-MAGI specific programs, such as spousal impoverishment, Medicare buy-in program; etc.		
ELG 008	The EES shall maintain beneficiary eligibility data and information on each beneficiary's benefits.		
ELG 009	Where an existing case (account) exists, the EES shall reuse relevant information and/or selections		
ELG 010	The EES shall ensure seamless transfer of customers between the EES and the FFM as appropriate.		
ELG 011	The EES shall provide beneficiaries with periodic notifications by mail, e-mail, text, telephone and/or other format according to their stated preference for receiving such communications. The EES shall follow-up electronic notifications with paper notifications where required by federal rules or desired by State operations.		
ELG 012	The EES shall provide the capability to determine eligibility, and make changes to eligibility, on a retroactive basis as allowed by federal and State statutes and regulations		
ELG 013	The EES shall provide beneficiaries with clearly stated details as to rights and opportunity for appeal and grievance processes		

REVISED Appendix B Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
ELG 014	The EES shall provide beneficiaries with clear information about privacy and confidentiality protections in the application process		
ELG 015	The EES shall provide beneficiaries with clear information about the Department's protocols in case of an information breach		
ELG 016	The EES shall integrate with the existing or replace a self-assessment tool to be used by external partners and customers to evaluate potential eligibility.		
ELG 017	The EES shall integrate with the existing or replace pre-application screening without entering any personal identifying information.		
ELG 018	The EES shall allow a customer to securely access an electronic account containing application information, notices and appeals information and Fair Hearing information.		
ELG 019	The EES shall use summarized household data for the pre-application process. (e.g. two adults with two children and estimated income).		
ELG 020	The EES shall apply eligibility rules to identify and flag potential financial and non-financial eligibility.		
ELG 021	The EES shall provide the customer information on eligibility and general verification requirements for Medicaid eligibility and timelines for applications and verification processes.		
ELG 022	The EES shall access educational materials on functions of Medicaid and on other state programs.		
ELG 023	The EES shall provide informational fact sheets on programs for which the customer is potentially eligible.		
ELG 024	The EES shall populate the online application with data entered in the pre-application screening tool, if a customer chooses to apply in the same session, where data elements are compatible.		
ELG 025	The EES shall track applications that originate from pre-application screening.		
ELG 026	The EES shall identify and flag expedited benefit cases, with user configurable triggers for expedited cases		
ELG 027	The EES shall use existing information on a known customer to preview the impact of potential changes via a new self-assessment.		
ELG 028	The EES shall assure consistency in eligibility determination processing when applicants attempt to access services through different entry points.		

**REVISED Appendix B Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
ELG 029	The EES shall accept complete applications from the Marketplace electronically and make Medicaid eligibility determination without requiring additional information from the applicant consistent with the policies set in the State Plan Amendment.		
ELG 030	The EES shall specify beginning coverage date for those who know their existing employer coverage will be ending.		
ELG 031	The EES shall determine eligibility for all Medical Assistance programs.		
ELG 032	The EES shall validate all data fields for valid format (e.g. valid text, numbers, currency, dates, special characters allowed etc.)		
ELG 033	The EES shall upload, store and index verification documents such that they are tied to the appropriate case and searchable.		
EIG 034	The EES shall provide electronic signature capabilities for customers applying in a local office using an electronic signature pad.		
ELG 035	The EES shall provide an electronic signature for an application		
ELG 036	The EES shall record and store a telephonic signature for an application		
ELG 037	The EES shall provide the customer with a notification of approval or denial.		
ELG 038	The EES shall confirm for customers or workers that submitted applications are complete.		
ELG 039	The EES shall maintain data privacy and security requirements consistent with applicable laws.		
ELG 040	The EES shall retain completed applications with various retention schedules. All application data will be easily searchable and retrievable.		
ELG 041	The EES shall allow the customers to track their status via online or telephone during the application process.		
ELG 042	The EES shall store a version of the completed application form and allow the customer to retrieve it.		
ELG 043	The EES shall save and print a version of a completed application form that was saved online.		
ELG 044	The EES shall auto-populate known data within the system between modules, functions and applications within the life of the household.		

**REVISED Appendix B Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
ELG 045	The EES shall process household with more than one applicant		
ELG 046	The EES shall refer cases with potentially fraudulent activity to appropriate agency		
ELG 047	The EES shall identify applications which are pending HUB Citizenship etc. verification		
ELG 048	The EES shall establish an eligibility base period from one to twelve months.		
ELG 049	The EES shall determine the correct eligibility base period automatically and manually.		
ELG 050	The EES shall retain a viewable history of changes to the eligibility base period.		
ELG 051	The EES shall place cases in a pending status if eligibility cannot be determined in real time due to system unavailability. The case will be flagged for follow up and verification of the required information		
ELG 052	The EES shall place cases in a pending status if eligibility cannot be determined in real time due to data inconsistencies in accordance with 155.315(f). The case will be flagged for follow up and verification of the required information		
ELG 053	The EES shall support multiple budgeting methodologies (e.g. perform multiple tests on a single household when family beneficiaries may be eligible for multiple programs).		
ELG 054	The EES shall identify all types of incomes (e.g. countable or exempt statuses of incomes, and resources by program or individual).		
ELG 055	The EES shall document case notes of actions which have occurred on case		
ELG 056	The EES shall calculate start and end dates of presumptive eligibility periods based on user configurable rules		
ELG 057	The EES shall create automatic and manual alerts to internal and external users upon the occurrence of specified events.		
ELG 058	The EES shall automatically re-determine eligibility for customers based on specified events (e.g. cost-of-living adjustment, changes in insurance premium amounts).		
ELG 059	The EES shall calculate customer responsibility/cost sharing for Long Term Care or Home and Community Based waiver programs.		
ELG 060	The EES shall determine applicant eligibility for specific non-independent living Long Term Care or waiver programs. (e.g. Institutional Living).		

REVISED Appendix B Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
ELG 061	The EES shall set a period of ineligibility for a Long Term Care or waiver customer who commits a prohibited transfer of resources.		
ELG 062	The EES shall track movement from one facility to another to re-determine insurance eligibility, and cost sharing based on regulations. (e.g. hospitalization, nursing home, independent living).		
ELG 063	The EES shall identify resources excluded due to Long Term Care insurance.		
ELG 064	The EES shall complete and retain a resource assessment.		
ELG 065	The EES shall support the process of reviewing program eligibility.		
ELG 066	The EES shall display the basis of the eligibility budget calculations.		
ELG 067	The EES shall support varying methods of reviewing program eligibility (e.g. paper process where a review form is generated with pre-populated information).		
ELG 068	The EES shall trigger redetermination on cases with a fixed schedule of timed intervals.		
ELG 069	The EES shall track eligibility determinations separately. (e.g., income used to determine eligibility for Program 1 may be different than the income used to determine eligibility for Program2, etc.)		
ELG 070	The EES shall send notification of eligibility determination.		
ELG 071	The EES shall use the available interfaces to process redetermination for the MAGI qualifying population.		
ELG 072	The EES shall provide the capability to create and maintain an electronic household file of all applicants and families requesting services from the time that they first make an entry to the system.		
ELG 073	The EES shall support a range of disposition action triggers including event-based triggers (e.g., creation date, closing date, date of last review).		
ELG 074	The EES shall allow authorized users to review disposition actions prior to their execution.		
ELG 075	The EES shall allow users to apply disposition action holds on records.		

**REVISED Appendix B Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
ELG 076	The EES shall have the flexibility to process individuals in the newly created categories.		
ELG 077	The EES shall provide a mechanism to generate a list of received and pending verifications including eligibility worker entered comments.		
ELG 078	The EES shall provide the ability to allow applicants to view, confirm, dispute and submit corrections to verification results.		
ELG 079	The EES shall provide applicants the ability to address inconsistencies reported by external entities (i.e. income, citizenship, etc.) within a timeframe defined by the Department.		
ELG 080	The EES shall update the applicant's record with the verification results as appropriate.		
ELG 081	The EES shall utilize master indexes to avoid duplicates.		
ELG 082	The EES shall search and match the existing client data before assigning new unique number (e.g., for example, search/match criteria could be the following, including but not limited to, "Fuzzy search", first name, last name, DOB, unique id, SSN, address, aliases, case number, etc.).		
ELG 083	The EES shall have the capability to reconcile duplicate records.		
ELG 084	The EES shall provide the data reports or file extracts to reconcile data between the EES and other systems.		
ELG 085	The EES shall capture alias information.		
ELG 086	The EES shall search account by multiple criteria (e.g., name, ID#, phone number, date of birth, county, assigned worker, etc.).		
ELG 087	The EES shall perform compound searches (e.g., names of married couple, names of parent and child, name of siblings, etc.).		
ELG 088	The EES shall easily modify list criteria while searching.		
ELG 089	The EES shall perform responsible person searches.		

REVISED Appendix B Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
ELG 090	The EES shall automatically identify a customer currently known to the system (e.g applicant pending determination, past member not currently enrolled, etc.)		
ELG 091	The EES shall electronically or manually assign a customer to a case.		
ELG 092	The EES shall conduct a manual case registration by a worker.		
ELG 093	The EES shall create a case by grouping associated customers together.		
ELG 094	The EES shall allow a worker to manually create a case.		
ELG 095	The EES shall use an existing case number per policy.		
ELG 096	The EES shall assign a unique case number to a case.		
ELG 097	The EES shall allow a customer to be associated to multiple cases at the same time. (e.g. customer may receive insurance products on one case number and be the case name for a different case number on which their child is receiving insurance products, etc.)		
ELG 098	The EES shall associate multiple cases to each other. (e.g. cases that share customers).		
ELG 199	The EES shall allow manually associate multiple cases to each other. (e.g. cases that share customers).		
ELG 100	The EES shall close beneficiaries/households/categories based on applicable eligibility rules resulting from changes in information and track closure reasons.		
ELG 101	The EES shall provide a process to override system closures.		
ELG 102	The EES shall provide functionality to manually close beneficiaries/households/categories based on applicable eligibility rules resulting from changes in information and track closure reasons.		
ELG 103	The EES shall allow the user to manually associate customers to each other.		
ELG 104	The EES shall create multiple cases based on regulations. (e.g. Disabled parent with a child).		
ELG 105	The EES shall manually separate cases per regulations.		

**REVISED Appendix B Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
ELG 106	The EES shall automatically create a task for updates in the eligibility determination of insurance products/other public assistance programs (e.g., child turning 18, 21 or an adult turning 65, etc.).		
ELG 107	The EES shall provide Medicaid enrollment roster to Marketplace at stipulated frequency.		
ELG 108	The EES shall display or capture prior insurance requests.		
ELG 109	The EES shall set 'special situation' indicators based on rules maintained in the system. (e.g. language, confidentiality situations).		
ELG 110	The EES shall allow manually override all automatically set 'special situation' indicators.		
ELG 111	The EES shall provide the customer with a paper receipt of the documentation (e.g. paystub or birth certificate) that has been turned in to a worker.		
ELG 112	The EES shall have the capability for the Department to notify Marketplace of Medicaid Determination		
ELG 113	The EES shall provide a mechanism to manually extend verification timeframes.		
ELG 114	The EES shall point out missing data, errors and inconsistencies as they progress through the application, performing verification in real time where possible		
ELG 115	The EES shall provide a mechanism to have a "same as" selection to enter repetitive data.		
ELG 116	The EES shall allow a worker to jump back to sections previously completed without losing data entered.		
ELG 117	The EES shall provide a mechanism to manually navigate/skip to any screens that the worker is authorized to access.		
ELG 118	The EES shall identify and display verifications required for the applicant based on program rules.		
ELG 119	The EES shall produce a customized listing of verification documents for an eligibility criteria required to complete eligibility determination.		
ELG 120	The EES shall allow a worker to upload and attach source documents to support eligibility determination.		
ELG 121	The EES shall present worker with a summary view of the information entered prior to submission.		

REVISED Appendix B Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
ELG 122	The EES shall provide applicants the ability to submit alternative verification via multiple avenues (e.g., email, mail, phone, fax, walk- in).		
ELG 123	The EES shall assign a unique identifier as specified by the Department to be for each person entered.		
ELG 124	The EES shall allow an applicant or applicant's authorized representative to review the current application before and after formal submission with the appropriate safeguards and security measures.		
ELG 125	The EES shall not allow an applicant and applicant's authorized representative to submit more than one application within 30 days from the initial submission unless the application was denied.		
ELG 126	The EES shall allow an applicant or applicant's representative to amend an application as long as a determination has not been made.		
ELG 127	The EES shall allow the applicant or applicant's authorized representative to save and amend the application or renewal for up to 30 days in order to gather additional information prior to submittal.		
ELG 128	The EES shall allow and record an applicant's request to withdraw an application.		
ELG 129	The EES shall only collect applicant/household information once and share across Department designated fields.		
ELG 130	The EES shall provide an automated or guided application process to enable the worker to easily enter required information.		
ELG 131	The EES shall capture and track from which organization an application was submitted.		
ELG 132	The EES shall monitor the number of applications submitted and abandoned and the number of applicants who requested assistance via chat, telephonic, etc.		
ELG 133	The EES shall monitor and report on number of applications received and the method by which they were submitted.		
ELG 134	The EES shall capture interview dates.		
ELG 135	The EES shall provide system-generated date and time stamp for receipt of electronic applications to be used in monitoring standards of promptness by program.		
ELG 136	The EES shall provide system-generated date and time stamp for registration of paper applications.		
ELG 137	The EES shall provide a mechanism to begin benefits on a date different than the application date and system-generated date.		
ELG 138	The EES shall capture and display date that a disposition was made on an application/renewal.		

**REVISED Appendix B Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
ELG 139	The EES shall check each incoming applicant against existing eligibility database to determine if the incoming applicant is new to the system, reopening a prior category, or adding applicants to existing household.		
ELG 140	The EES shall allow continuance of the application process for applicants without an SSN and assign pseudo-number and ensure pseudo number allows match to get correct SSN.		
ELG 141	The EES shall provide a mechanism to match and replace the pseudo-SSN with the actual SSN.		
ELG 142	The EES shall route applications to the appropriate staff, based on business rules.		
ELG 143	The EES shall display to the applicant discrepant information between the new application and information stored in the existing household.		
ELG 144	The EES shall provide a mechanism through which an applicant could check the applicant's status.		
ELG 145	The EES shall provide the ability to allow applicants to submit paper applications, whether through walk-in, fax or mail-in.		
ELG 146	The EES shall provide capability to track incomplete, new, add-on, and pending applications.		
ELG 147	The EES shall allow for a manual verification process when the Marketplace hub verification service is not available.		
ELG 148	The EES shall provide a mechanism to indicate which verification documents have already been provided.		
ELG 149	The EES shall send notification of alternative verification options to the applicant when electronic verification is not available.		
ELG 150	The EES shall provide the capability to determine and correct eligibility for current and prior months.		
ELG 151	The EES shall determine eligibility without worker intervention, as allowed by policy (e.g., exceeds the Medical Assistance income limit).		
ELG 152	The EES shall allow designated users to override eligibility determinations.		
ELG 153	The EES shall send eligibility determinations to the MMIS enrollment system on a real-time basis to support plan enrollment and claims processing functions.		
ELG 154	The EES shall generate reports related to eligibility decisions.		
ELG 155	The EES shall be flexible enough to add additional Medical Assistance programs.		
ELG 156	The EES shall display the eligibility results in a manner that is comprehensive and easy to understand.		

REVISED Appendix B Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
ELG 157	The EES shall have spenddown capability, including automating a spenddown of resources and income calculation.		
ELG 158	The EES shall allow the Department to set enrollment limits and provide a mechanism to manage applications for programs that are at whose enrollment is capped.		
ELG 159	The EES shall provide the capability for certain programs, as identified by the Department, to be flagged according to funding source.		
ELG 160	The EES shall evaluate the resource/asset eligibility of an applicant when determining eligibility for those programs requiring a resource / asset test.		
ELG 161	The EES shall allow authorized users to search online household files using key fields such as name, SSN, ID, date of birth, etc.		
ELG 162	The EES shall provide a mechanism for authorized users to access beneficiary/household summary from any screen.		
ELG 163	The EES shall provide the capability to re-open a category that is closed in the status it was before the closure.		
ELG 164	The EES shall provide a mechanism to indicate relationships between all members of a household.		
ELG 165	The EES shall provide a mechanism to automatically create the inverse family relationships (e.g., parent - child, child - parent, etc.).		
ELG 166	The EES shall provide the capability to perform mass terminations due to changes in status as well as program changes.		
ELG 167	The EES shall provide household-based activity checklists (to-do lists) to assist in prompting the workers in the completion of required household activities		
ELG 168	The EES shall allow for interview scheduling and tracking of completed interviews. Send client notification of interview is not completed.		
ELG 169	The EES shall include workflow management based on whether an applicant is MAGI-based and/or MAGI-excepted households.		
ELG 170	The EES shall identify all types of incomes (e.g. countable or exempt statuses of incomes, and resources by program or individual).		
ELG 171	The EES shall provide the capability at an individual level to be able to rework a prior case that is closed even if an open case exists.		
ELG 172	The EES shall track program requirements for individuals, e.g., those who are penalized due to transfer of assets.		
ELG 173	The EES shall provide an automated screening tool to determine potential eligibility status using predefined rules and to route to the next step in the process.		

**REVISED Appendix B Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

5. Appeals Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
APP 001	The EES shall support an electronic appeals process, which includes transmission of data to the federal Hub, interfacing with document imaging, and a client web accessibility		
APP 002	If an Appeals decision is in favor of The Department, the EES shall automate the recovery of premiums or medical services that were paid and auto-generate form to Finance Office for recovery.		
APP 003	The EES shall capture and track the disposition of appeals (including status, assignments, and relevant household notes).		
APP 004	The EES shall record the detailed results and supporting documentation that result from or support an appeals decision.		
APP 005	The EES shall have the ability to be notified of results of Appeals		
APP 006	The EES shall automatically capture, retain, and display receipt of eligibility appeals.		
APP 007	The EES shall allow manually entered eligibility appeals.		
APP 008	The EES shall record the reporter/source (name, address, associated agency of person expressing the eligibility appeals, etc.), if applicable.		
APP 009	The EES shall provide a mechanism to generate a list of received and pending verifications including eligibility worker entered comments.		
APP 010	The EES shall assign a unique tracking number to the eligibility appeals.		
APP 011	The EES shall assign a worker, or group of workers, to manage eligibility appeals.		
APP 012	The EES shall update/change manager assigned to a eligibility appeal.		
APP 013	The EES shall identify and assign the priority of eligibility appeals.		
APP 014	The EES shall cross reference common eligibility appeals (e.g. receiving 100 fair appeals requests from a single customer on a single policy change).		
APP 015	The EES shall track when a request for reconsideration becomes an appeal request.		

REVISED Appendix B Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
APP 016	The EES shall provide the facility to export and print case histories and case notes for the purposes of appeals.		
APP 017	The EES shall support the appeals process for customer exemption decision.		
APP 018	The EES shall accept and adjudicate customers appeals regarding eligibility determinations and exemptions from the customer responsibility requirement.		
APP 019	The EES shall associate the eligibility appeals to a case(s) and /or a customer(s).		
APP 020	The EES shall track all eligibility appeals.		
APP 021	The EES shall track multiple eligibility appeals from a single contact.		
APP 022	The EES shall store all eligibility appeals in a central location.		
APP 023	The EES shall track a request for reconsideration outside of standard case notes		
APP 024	The EES shall log updates to an appeal in case notes		
APP 025	The EES shall add notes to appeals		
APP 026	The EES shall capture history of eligibility appeals by multiple parameters (e.g. source, subject, date, etc.)		
APP 027	The EES shall sort history of eligibility appeals by multiple parameters (e.g. source, subject, date, etc.).		
APP 028	The EES shall document an audit trail which reflect who updated associated details to a case.		
APP 029	The EES shall provide the capability to record all decisions of appeals.		
APP 030	The EES shall alert appropriate staff when action is needed or information is due to ensure timely processing of the eligibility appeals.		
APP 031	The EES shall support an appeals process on individual exemption decisions from the individual responsibility requirement.		
APP 032	The EES shall provide the functionality to reinstate service coverage until the Administrative Appeals decision is rendered.		
APP 033	The EES shall provide the ability to allow applicants to view, confirm, dispute and submit corrections to verification results.		

REVISED Appendix B Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
APP 034	The EES shall have the ability for customers to request a postponement of an appeal if the request is made in compliance with State and federal guidelines.		
APP 035	The EES shall have the ability for the customers to request for reconsideration to handle inquiries.		
APP 036	The EES shall have an appeal request submitted through multiple channels including phone, e-mail, letter, etc.		
APP 037	The EES shall provide an electronic template for eligibility appeal process.		
APP 038	The EES shall generate a referral to a third party assignee. (e.g. regular letter, email, automated referral, etc.).		
APP 039	The EES shall require a response by the third party assignee on a case by case basis.		
APP 040	The EES shall have the ability for customers to request an appeal in written form or verbally and followed up in writing.		
APP 041	The EES shall maintain health benefit plan at the current level after an appeal is requested by the customer on a timely manner until the decision of appeal is made (for a discontinuance of an active case).		
APP 042	The EES shall notify customer, third party entity, worker, etc. that the status of an eligibility appeal has changed. (e.g. pending hearing, withdraw, referred, etc.).		
APP 043	The EES shall notify applicants of failed verifications.		
APP 044	The EES shall notify the customer that their eligibility appeal has been received.		
APP 045	The EES shall notify the customer who their eligibility appeal has been referred to.		
APP 046	The EES shall provide a mechanism to track required verification timeframes.		
APP 047	The EES shall provide the capability to create an electronic household file that records all application data and organizes all supporting documentation and images in an easy-to-use format.		
APP 048	The EES shall allow all individuals to exercise their right to appeal any eligibility determination for Medicaid, premium tax credits, cost sharing subsidies, or QHP eligibility.		

REVISED Appendix B Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1

6. Notifications Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
NOT 001	The EES shall generate notices by applicant/beneficiary preferred method of communication e.g., mail, email, or fax.		
NOT 002	The EES shall support multiple pages and applicant/beneficiaries standard "Rights and Responsibilities" text, including, but not limited to, applicant/beneficiary's right to an Administrative Appeal.		
NOT 003	The EES shall allow applicant/beneficiaries to choose the method of preferred communication.		
NOT 004	The EES shall record and track how correspondence was issued to the applicant/beneficiary.		
NOT 005	The EES shall provide the capability for mass notifications to applicant/beneficiaries or groups of applicant/beneficiaries.		
NOT 006	The EES shall auto-populate all forms with required information from the system (e.g., applicable dates, missing and provided verifications, notes, etc.).		
NOT 007	The EES shall not have page limits.		
NOT 008	The EES shall produce notices and forms in English and Spanish languages as required by the federal and State statutes, regulations, and policies.		
NOT 009	The EES shall issue notices at set timeframes according to program rules.		
NOT 010	The EES shall provide the capability to set and change release dates.		
NOT 011	The EES shall provide a mechanism to suppress and track any specific notice (one-time notice suppression).		
NOT 012	The EES shall provide a mechanism to suspend any notice type.		
NOT 013	The EES shall provide a mechanism for designated persons to create new versions of notices/forms/correspondence from templates.		
NOT 014	The EES shall provide standard letter templates and the ability to add free form text to customize a letter to the customer's specific issue.		
NOT 015	The EES shall allow workers to generate or regenerate a notice/form upon demand.		

REVISED Appendix B Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
NOT 016	The EES shall generate a notice which includes a list of needed actions by the applicant/beneficiary by a standard due date (with a worker override), depending on the status or type of program applied for.		
NOT 017	The EES shall notify the beneficiary when their enrollment status has changed based on pre-set parameters so that the appropriate notice is generated for the circumstance.		
NOT 018	The EES shall provide the capability to electronically generate notices to obtain missing information.		
NOT 019	The EES shall create a sortable history of all notices associated with the applicant/beneficiary, including specific dates, and have the ability to view notices.		
NOT 020	The EES shall provide the capability to bundle and send out multiple notices and/or send out notices with corresponding forms together.		
NOT 021	The EES shall provide the capability to change information in a notice or delete a notice if it has not been 'sent'.		
NOT 022	The EES shall identify whether notice was auto-generated or worker-generated.		
NOT 023	The EES shall have noticing tightly integrated with the Marketplace and complying with all ACA regulations for such integration.		
NOT 024	The EES shall send electronic and/or paper renewal notices to beneficiaries.		
NOT 025	The EES shall pre-populate electronic and/or paper renewal forms with beneficiary information that is currently on file and allow the beneficiary to change or add information.		
NOT 026	The EES shall renew eligibility based on current federal and State statutes and regulations. The system shall be modified as required to meet all federal and State statutes that are changed during the life of the contract.		
NOT 027	The EES shall track and provide notification to users when a renewal is due.		
NOT 028	The EES shall track which electronic and/or paper renewals have been sent and which have been returned,		
NOT 029	The EES shall allow workers to generate notices, compliant with State and federal regulations at the time of notice generation, throughout the appeal process.		
NOT 030	The EES shall accept automated and manual responses received on referrals sent and associate them with initial referral.		
NOT 031	The EES shall retain history of all referrals sent and responses received.		

**REVISED Appendix B Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
NOT 032	The EES shall store a copy of notices. These notices shall be available to the work units that support these functions (CSE, TPL, HIPPS, ERU, and Medical Subrogation).		
NOT 033	The EES shall generate Notice to customer that the full application must be completed to continue coverage beyond the presumptive eligibility period.		

**REVISED Appendix B Functional Requirements
December 20, 2013
Request for Proposal Number 4544Z1**

The Functional Requirements Traceability Matrix (RTM) is used to document and track the project requirements from the proposal through to testing to verify that the requirement has been completely fulfilled. The Contractor will be responsible for maintaining the set of Baseline Requirements directly related to the configuration of the EES. Additions, modifications, and deletions to these requirements will be added and modified throughout the project so it is imperative that a current version of the matrix be maintained at all times.

Bidders must provide an initial RTM as part of its proposal. The RTM shall follow the instructions below. The Bidder must state requirements exactly as they are provided in this RFP. The Bidder must indicate how it will achieve full compliance (i.e., requirement fulfilled 100%). Any requirements that the Bidder cannot attest to full compliance must be documented as outlined in Appendix D: Gap Analysis.

Bidders are required to provide a response, using the appropriate codes provided in the tables below, for each requirements listed in the Functional Requirements Response Matrix. Scoring for each requirement will directly relate to the Ability Code indicated by the Bidder.

Ability Code	Condition	Description
S	Standard Function	The proposed EES fully satisfies the requirement as stated. The Bidder must describe how the requirement is satisfied by the EES.
W	Workflow or System Configuration Required	Current functionality of the proposed EES exists in the EES and can be modified by a system administrator to meet this requirement. The Bidder must describe how the requirement will be satisfied.
M	Modification Required	The proposed EES requires a modification to existing functionality to meet this requirement which requires a source code modification. The EES will be modified to satisfy the requirements as stated or in a different format. The Bidder must describe the modifications. If the modification requires 1000 or more hours the Bidder must also complete Appendix D Gap Analysis.
F	Planned for Future Release	This functionality is planned for a future release. The Bidder must describe how the requirement will be satisfied by the EES and when the release will be available.
C	Custom Design and Development	The proposed EES requires new functionality to meet this requirement which requires a source code addition. The Bidder must describe the feature and its value. If the custom design and development requires 1000 or more hours the Bidder must also complete Appendix D Gap Analysis.
N	Cannot Meet Requirement	The proposed EES will not satisfy the requirement. The Bidder must explain why the requirement cannot be satisfied. The Bidder must complete Appendix D Gap Analysis.
O	Other Software	If the requirement is to be satisfied through the use of a separate software package(s), the Bidder must identify those package(s) and describe how the functionality is integrated into the base system.

**REVISED Appendix B Functional Requirements
December 20, 2013
Request for Proposal Number 4544Z1**

1. General Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
GEN 001	The EES shall be branded using official State of Nebraska and Nebraska Department of Health and Human Services logos, images, etc.		
GEN 002	The EES shall provide customized local office information, through public-facing front-end (i.e. physical location of nearest local office, driving directions and name, email and phone number).		
GEN 003	The EES shall ensure alignment with HIPAA security, privacy and transaction standards		
GEN 004	The EES shall implement and support functionality to meet the requirements of the Affordable Care Act (ACA) and achieve compliance deadlines.		
GEN 005	The EES shall assure that all processes, user interfaces and documents produced by the system meet applicable State and federal accessibility standards for the life of the contract.		
GEN 006	The EES shall separate business rules from the application logic. Business rules will be contained in a COTS rules engine.		
GEN 007	The EES shall provide a scalable solution to allow for the incorporation of shared eligibility determination rules to support the State's phased approach.		
GEN 008	The EES will facilitate a "no wrong door" approach to insurance coverage as required in the ACA. The EES will accept account/application transfers to/from the Exchange to seamlessly facilitate eligibility determination for all Insurance Affordability Programs.		
GEN 009	The EES will allow applications and renewals via all ACA required media. E.G. Paper, online, phone, fax, in person and other commonly available electronic means.		
GEN 010	The EES shall leverage existing systems (where appropriate) and is built on system architecture that is scalable, flexible, modular and dynamic.		
GEN 011	The EES shall leverage connections to the federal data hub to access and verify data from participating agencies such as the IRS, federal DHHS, the Department and others. Hub – Required State - Required		

**REVISED Appendix B Functional Requirements
December 20, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
	Financial Institutions- Future		
GEN 012	The EES shall achieve the necessary degree of interoperability between technology components to determine eligibility for Medicaid or CHIP or if the customer is not eligible for Medicaid a transfer to the FFM.		
GEN 013	The EES shall support a timed release schedule.		
GEN 014	The EES shall support all Nebraska DHHS Medicaid programs.		
GEN 015	The EES shall allow business users, as determined by the Department, to easily read/modify the eligibility determination rules.		
GEN 016	The EES shall support client facing services and documents in English and Spanish languages.		
GEN 017	The EES shall screen for language needs (LEP) at first point of contact		
GEN 018	The EES shall provide functionality to interface with Multi-channel Workforce Management software, such as Verint.		
GEN 019	The EES shall have the ability to schedule staff performing call center functions, back office functions, local office appointments, and be integrated with task manager.		
GEN 020	The EES shall have the ability to interface with the quality management system.		
GEN 021	The EES shall have the ability to interface with the LINKS Performance Management and Training System.		
GEN 022	The EES should have the ability to measure case review and customer service contact review. It should utilize a scorecard or similar tool to provide feedback down to staff level.		
GEN 023	The EES shall have the ability to interface with the NE Financial and Accounting system.		
GEN 024	The EES shall accommodate phone application voice signature mechanism.		
GEN 025	The EES shall validate and return address information errors as entered in the system.		
GEN 026	The EES shall provide functionality to allow applicants to provide a signature via all ACA required modes of application.		
GEN 027	The EES shall provide free-form narrative notes capabilities with no character limit, wrap-around text, sortable and searchable.		
GEN	The EES shall auto-populate notes based on predefined business rules.		

**REVISED Appendix B Functional Requirements
December 20, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
028			
GEN 029	The EES shall provide templates for notes entry.		
GEN 030	The EES shall provide mechanism to spell-check notes.		
GEN 031	The EES shall provide mechanism to associate notes to multiple beneficiary/households without retyping.		
GEN 032	The EES shall provide a mechanism to automatically date/time stamp all notes.		
GEN 033	The EES shall provide a mechanism for eligibility workers to edit their own notes with appropriate audit trails.		
GEN 034	The EES shall provide a mechanism for all system events, including system, user and administrative actions to be auditable.		
GEN 035	The EES shall provide a mechanism to restrict notes from being edited after the initial entry.		
GEN 036	The EES shall allow for any data element to be exported into an industry standard format.		
GEN 037	The EES shall allow applicant/beneficiaries to self-report changes in their personal information online, notify the appropriate eligibility worker based on parameters described by the Department when changes are made		
GEN 038	The EES shall re-determine eligibility when a Change of Circumstance is received electronically or entered by a worker.		
GEN 039	The EES shall provide the capability to view the new determination of eligibility after the change in information.		
GEN 040	The EES shall place an individual from one program into another, based on a Change of Circumstance or eligibility rules, without affecting other individuals in that household.		
GEN 041	The EES shall provide the capability to track and record any changes to an individual's information.		
GEN 042	The EES shall provide a mass change capability by a non-technical user to affect all or part of the Department caseload for any or all programs.		
GEN 043	The EES shall allow authorized users to update, add persons, and relationships to an existing household and maintain a history thereof.		
GEN 044	The EES shall close eligibility to a program without closing other programs associated with that household or individuals in the household.		

**REVISED Appendix B Functional Requirements
December 20, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
GEN 045	The EES shall change the status of any individual in a household without terminating eligible household members.		
GEN 046	The EES shall provide web-based functionality to allow the applicant to renew and initially apply for eligibility online.		
GEN 047	The EES shall allow for renewals via all ACA required modalities.		
GEN 048	The EES shall accept a renewal prior to the 12 month renewal date. The renewal period may vary by case/household/individual and program.		
GEN 049	The EES shall track and allow beneficiaries who did not return the pre-populated renewal form or the required documentation and are terminated on that basis a reconsideration period, as defined the Department, when the Department would reconsider eligibility without a new application and renew eligibility if necessary information is provided.		
GEN 050	The EES shall allow an individual who regains coverage during the reconsideration period, retroactive coverage back to date of termination.		
GEN 051	The EES shall automate the renewal process if all information remains the same or if verified information remains within applicable limits.		
GEN 052	The EES shall integrate with various systems within the State for the purpose of data sharing, eligibility determination and data verification (i.e. incarceration, Unemployment Insurance benefits, child support income, State wage information)		
GEN 053	The EES shall adjust eligibility determination resulting from appeal.		
GEN 054	The EES shall notify the applicant/beneficiary, electronically and via paper, of adjusted eligibility within 30 days of the adjustment, regardless of the reason for the eligibility adjustment.		
GEN 055	The EES shall track timeframes and deadlines of the appeal process and alert a worker or management of overdue status.		
GEN 056	The EES shall allow a worker to view appeal progress/status to report back to the applicant/beneficiary.		
GEN 057	The EES shall support an integrated and customizable applicant complaint and grievance process, with reporting capabilities.		

**REVISED Appendix B Functional Requirements
December 20, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
GEN 058	The EES shall be scalable and flexible enough to accommodate and adapt to changes required by State and/or federal statute, regulation, mandate, decision, or policy without significant changes to the architecture and without impacting the scalability or response times of the system.		
GEN 059	The EES shall incorporate the policy choices and priorities of the Nebraska policymakers.		
GEN 060	The EES shall meet the requirements of the RFP and be compliant with MITA 3.0 standards.		
GEN 061	The EES shall be based on an orientation of business processes, business rules and data and metadata management that allows modular componentized design approach that enhances interoperability across service modules and with external applications and data sources.		
GEN 062	The EES shall identify individuals who are dual eligible (Medicare plus federal Medicaid) and determine eligibility for dual-eligibles, as well as for those who are eligible for other Medicare savings programs.		
GEN 063	The EES shall support secure messaging between the Department and the federal data hub and/or the Connector via federally defined interfaces and Business Service Descriptions.		
GEN 064	The EES shall include workflow management based on whether an applicant is MAGI-based and/or MAGI-expected households.		
GEN 065	The EES shall allow individuals in a household to be eligible under different categories and receive different benefits based upon individual information.		
GEN 066	The EES shall provide the capability to defined and stored DDHS specific data. The ability to use the data to drive workflow or pre-populate forms.		
GEN 067	The EES shall be scalable so that it can identify those applicants that are potentially eligible for express lane eligibility should the Department choose to adopt Express Lane Eligibility Program.		
GEN 068	The EES shall provide the capability for presumptive eligibility as defined by the Department and include provider web access for application purposes.		
GEN 069	The EES shall provide a mechanism to define required and optional fields, including default data values as applicable, based on program rules.		
GEN 070	The EES shall provide an alert system to notify workers when action items are assigned, have been completed, or are past due.		

**REVISED Appendix B Functional Requirements
December 20, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
GEN 071	The EES shall manually/automatically assign priority to alerts.		
GEN 072	The EES shall automatically escalate an alert if not addressed within the time limits.		
GEN 073	The EES shall provide mechanism for supervisors to be able to view alerts for any individual or group.		
GEN 074	The EES shall provide a mechanism to associate and tie alerts to household or applicant/beneficiary and have alerts accessible when household is reviewed.		
GEN 075	The EES shall automatically delete alerts when action is taken.		
GEN 076	The EES shall manually create, assign, update, change, and delete alerts.		
GEN 077	The EES shall automatically or manually archive alerts when the required action is completed.		
GEN 078	The EES shall provide a sortable and searchable history of alerts that display all actions taken in regards to that alert.		
GEN 079	The EES shall provide a mechanism to indicate that a beneficiary/household is under review.		
GEN 080	The EES shall provide a mechanism to alert management that pending applications have exceeded specified time limits.		
GEN 081	The EES shall create an alert of approaching deadlines.		
GEN 082	The EES shall create and assign alerts associated with pending tasks.		
GEN 083	The EES shall alert specified work units when specific beneficiary/household changes are made based on program rules (e.g. customer/beneficiary/eligibility worker changes the address, certain demographic information, etc.		
GEN 084	The EES shall not allow any duplication or potential duplication of services to the beneficiary.		
GEN 085	The EES shall provide the capability to alert eligibility worker of multiple households at same physical and/or mailing address.		
GEN 086	The EES shall maintain individual and household information.		

**REVISED Appendix B Functional Requirements
December 20, 2013
Request for Proposal Number 4544Z1**

2. Reporting Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
RPT 001	The EES shall make available all business data elements for use with the business intelligence tool.		
RPT 002	The EES shall generate graphical representation of report data (e.g. pie charts, graphs, histograms, line plots, scatter plots)		
RPT 003	The EES shall generate all required Department and federal reports, in the format, media and schedule specified by the Department.		
RPT 004	The EES shall create 'canned' reports to be run on a scheduled basis. The schedule for each report should be easily changed through the system user interface by a non-IT worker.		
RPT 005	The EES shall retain report results in a manner that complies with Nebraska and applicable federal data retention policies, based on data type and program rules. The time period for which the reports are retained shall be mutually determined and shall be aligned with ongoing capacity planning exercise.		
RPT 006	The EES shall store all reports in such a manner as to allow online access to and retrieval of both current and historical reports via a user-friendly parameter and/or menu-driven access to reports, based on user permissions, as defined by the Department.		
RPT 007	The EES shall provide a mechanism to view online, save and print ad-hoc reports, based on user roles and program rules.		
RPT 008	The EES shall tabulate data by worker, county, region, etc.		
RPT 009	The EES shall provide a mechanism to perform a QC sampling by maintaining the current functionality for sampling methodology (regions, clusters, random, and stratification), including designating sampling size for random, designating month and year of a sample, designating regions and/or clusters (counties) of a sample.		
RPT 010	The EES shall provide a mechanism to create the universe from which the system pulls the samples.		
RPT 011	The EES shall provide a mechanism to manually eliminate a case from a sample and replace it with a replacement sample based on user roles. The EES shall capture a reason for eliminating/ replacing a case.		
RPT 012	The EES shall create, maintain and store QC review results for different program types, by office, sample month and year, sample ID.		

**REVISED Appendix B Functional Requirements
December 20, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
RPT 013	The EES shall define, implement, collect, and report using a set of business process-related performance metrics that conform to MITA defined performance metrics such as tracking changes in programs and policies and evaluating corresponding changes in health outcomes.		
RPT 014	The EES shall create case load reports such as active case list, active person list, pending application, review lists by manager, location, region and statewide.		
RPT 015	The EES shall provide multiple reports to include, but not limited to, fraud hearings, number and type of appeals decisions.		
RPT 016	The EES shall provide a dashboard summary view of the status of households across units for managers as for example, active, critical, error, quality assurance corrective action, QC reviews, pending reviews, etc.		
RPT 017	The EES shall provide a comprehensive reporting solution that will generate standard operating, pre-defined or operational reports without an adverse effect on system performance or response time.		
RPT 018	The EES shall generate standardized or ad-hoc reports without affecting worker response times.		
RPT 019	The EES shall store all reports in such a manner to allow online access to and retrieval of report information via a user-friendly parameter and/or menu-driven access to reports.		
RPT 020	The EES shall identify the date and time on all reports when it was generated and allow the worker to save the report multiple industry standard formats.		
RPT 021	The EES shall allow authorized workers to access, generate, and print reports.		
RPT 022	The EES shall save reports or raw data in multiple outputs formats (e.g. CSV, tab delimited, text, HTML, XML, XLS) in conformance to security standards and shall provide reports to be exported to an electronic file, PDF, Excel, Text, or Word format depending on the type of report.		
RPT 023	The EES shall maintain a history of documents and reports received, track these items and make them accessible in the electronic case file, so that information can be shared across programs and agencies using a HIPAA compliant method.		
RPT 024	The EES shall have standard reports to measure progress against the Department goals, initiatives, and policy changes, including, but not limited to, policy initiatives, budget initiatives, Affordable Care Act requirements, and grant opportunities.		

**REVISED Appendix B Functional Requirements
December 20, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
RPT 025	The EES shall generate ad-hoc and standard reports in real-time as well as historical.		
RPT 026	The EES shall provide summary tables of reports.		
RPT 027	The EES shall ensure that the reports are print-ready, visually acceptable to the user and provide the ability to format, set headers, labels.		
RPT 028	The EES shall be scalable to produce ad hoc reports on request without impacting system response times.		
RPT 029	The EES shall create reports using all current data elements available at the point of creation.		
RPT 030	The EES shall produce control and error reports from mass change processing.		
RPT 031	The EES shall have the capability to import data from other data sources.		
RPT 032	The EES shall support the ability to run online queries at the worker level.		
RPT 033	The EES shall produce reports on frequencies specified by the Department with the ability to change those frequencies at any time with minimal IT support.		
RPT 034	The EES shall allow users to sort, search, filter and drill down on any parameter of a standard report.		
RPT 035	The EES shall include version control for all reports.		
RPT 036	The EES shall generate data and reports needed to comply with federal audit and oversight requirements.		
RPT 037	The EES shall generate data and reports needed to apply for and demonstrate appropriate use of federal grant funding sources.		
RPT 038	The EES shall document the appropriate benefit programs, projects or other categories impacted by system or human actions to support claims for federal matching funds.		
RPT 039	The EES shall provide reports or data to support the cost allocation strategies (e.g., numbers and types of applications processed etc.).		
RPT 040	The EES shall differentiate funding source based on Department - specified criteria.		
RPT 041	The EES shall automate reports to support accurate forecasting of program costs.		
RPT 042	The EES shall automate reports to support evaluation of cost-containment and quality improvement initiatives		

**REVISED Appendix B Functional Requirements
December 20, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
RPT 043	The EES shall create standard reports defined by the Department to compare program expenses to budgeted expenses for the State and federal fiscal year-to-date, prior State and federal fiscal year, and projected through the remainder of the State and federal fiscal year.		
RPT 044	The EES shall generate an inventory of current and available reports.		
RPT 045	The EES shall support the ability to produce formatted reports based on online queries.		
RPT 046	The EES shall provide access to Query builder application.		
RPT 047	The EES shall support the preparation of a branch report, i.e., standard template with pre-populated data.		

**REVISED Appendix B Functional Requirements
December 20, 2013
Request for Proposal Number 4544Z1**

3. Business Requirements/Processes Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
OPS 001	The EES shall create easy, efficient, and accurate interfaces with other systems, including the federal data hub, state and other data sources to verify application information		
OPS 002	The EES shall support integrated eligibility system and/or reduce errors associated with processing eligibility for more complex populations		
OPS 003	The EES shall support workers to improve workflow and reduce errors including:		
OPS 004	<ul style="list-style-type: none"> • Computerized case files and online case histories 		
OPS 005	<ul style="list-style-type: none"> • Automated assignments of case files to workers according to their expertise and availability 		
OPS 006	<ul style="list-style-type: none"> • Logic flags 		
OPS 007	<ul style="list-style-type: none"> • Online policy and procedure manuals 		
OPS 008	<ul style="list-style-type: none"> • Integrated document imaging 		
OPS 009	The EES shall contain the business rules and technical capability to determine online, real-time eligibility for Medicaid MAGI and non-MAGI based eligibility		
OPS 010	The EES shall automate eligibility verification including electronic acceptance of verification documents; validation of applicant data through electronic data exchanges with valid sources		
OPS 011	The EES shall centralize User Account Management, Authentication and Authorization		
OPS 012	The EES shall display and print stored or imaged forms		
OPS 013	The EES shall allow documents to be scanned into and associated with the electronic application/renewal individual, and/or household.		
OPS 014	The EES shall upload attachments to correspondence records.		
OPS 015	The EES shall link scanned images to correspondence and records to provide one view of all related material (images, letters, or contacts with		

**REVISED Appendix B Functional Requirements
December 20, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
	staff), with multiple links.		
OPS 016	The EES shall provide the ability to view related correspondence records from a single correspondence record.		
OPS 017	The EES shall meet federal and State records retention and purging standards		
OPS 018	The EES shall provide a searchable library, with highly flexible search criteria to enable a user to quickly find needed information in policy manuals, policy memos, training material, implementation memos and all help functions without affecting work in progress.		
OPS 019	The EES shall support both task-based, individual-based, and household-based operations.		
OPS 020	The EES shall forward finished tasks to the next responsible party or parties, when multiple levels of effort are required for resolution.		
OPS 021	The EES shall save work in progress, exit the workflow, access work at a later point with all of the information still populated from the previous worker's actions so previous work will not need to be repeated and the worker can enter the workflow where they left off.		
OPS 022	The EES shall track, monitor, and display work done/ in queue to supervisors.		
OPS 023	The EES shall create and maintain eligibility worker availability information at the local office level.		
OPS 024	The EES shall monitor caseload size in real time and support an automated workload assignment process.		
OPS 025	The EES shall weigh caseloads and provide recommended distribution.		
OPS 026	The EES shall establish a flexible assigned workload management hierarchy that identifies the responsible organizational unit.		
OPS 027	The EES shall provide an automated and manual benefit card generation capability.		
OPS 028	The EES shall provide a mechanism to override automatic mailing of benefit card.		
OPS 029	The EES shall provide a mechanism to indicate a replacement benefit card is needed.		
OPS 030	The EES shall assign work using flexible criteria; for example, assign work by worker or the type of work..		
OPS 031	The EES shall transfer a single case, or a collection of cases in mass, including all electronic supporting documentation to and from any		

**REVISED Appendix B Functional Requirements
December 20, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
	organizational unit.		
OPS 032	The EES shall automatically create a notification of a case transfer.		
OPS 033	The EES shall allow a worker to manually create a notification of case transfer.		
OPS 034	The EES shall evaluate a case prior to a transfer, prompt user if established transfer criteria are not met and not allow transfer until criteria is met.		
OPS 035	The EES shall allow user to override assignment rules and process a transfer when defined criteria are not met based on security rule and audit trail.		
OPS 036	The EES shall have the flexibility to assign a Single Point of Contact (SPOC) to a case or use a universal assignment.		
OPS 037	The EES shall identify if and when a SPOC is assigned to a case so all communications go through the SPOC.		
OPS 038	The EES shall update case and/or household members' information, based on user roles and business functions.		
OPS 039	The EES shall have a real time, comprehensive listing of workers per customer and/or case.		
OPS 040	The EES shall sort and display the type and number of cases assigned to a specific caseload.		
OPS 041	The EES shall add, subtract or modify the number of caseloads supported within the system.		
OPS 042	The EES shall assign a unique identifier to each caseload.		
OPS 043	The EES shall recommend transfer of cases from one caseload to another.		
OPS 044	The EES shall identify when a referral is required and automatically generate and track a referral.		
OPS 045	The EES shall allow and track manually generated referrals.		
OPS 046	The EES shall track status of referrals to monitor for required or expected action by the receiving entity.		
OPS 047	The EES shall provide the ability to differentiate types of referrals within programs. (e.g. Child only CSE referrals, ERU spousal elective share, TPL lead vs. change, HIPPS, subrogation)		
OPS	The EES shall identify when a Change referral is necessary (e.g.		

**REVISED Appendix B Functional Requirements

Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
048	employment changes, household changes, entering or leaving foster care, etc.) and send the referral.		
OPS 049	<p>The EES shall associate a consumer notice related to the specific Cost Avoidance and Recovery area (CSE, TPL, HIPPS, ERU, and Medical Subrogation).</p> <p>The EES shall capture third party coverage information for applicable Medicaid clients and pass the third party payer information to the MMIS system for collection of TPL as appropriate.</p>		
OPS 050	The EES shall identify, generate and send potential resource situations to work unit as specified. (e.g. Annuities, Trust like Devices, Spousal Elective Shares, Personal Injury cases, Workers Comp, etc.)		
OPS 051	The EES shall display a summary of case information by user role (e.g. head of household, members, relationships, addresses, date of birth, caseworker or process queue, office location, case status, recertification date, simplified report date, current benefit amount, sanction status, etc.).		
OPS 052	The EES shall provide a mechanism to provide custom views of case summary information, based on user roles, program rules, and office procedure.		
OPS 053	The EES shall match and merge duplicate case information, based on user role and program rules.		
OPS 054	The EES shall automatically update case information received through electronic access.		
OPS 055	The EES shall update and track reported changes which do not affect eligibility and do not require verification that are submitted electronically (e.g. phone number, cell number, e-mail address, change in income which remains below program threshold, etc.)		
OPS 056	The EES shall have the ability to close or deny a Category of Eligibility when business rules dictate.		
OPS 057	The EES shall close a Category of Eligibility without closing other active Category of Eligibility s associated with that case.		
OPS 058	The EES shall close any individual other than the program case name in a Category of Eligibility without closing the entire Category of Eligibility that has other active members.		
OPS 059	The EES shall provide a mechanism for authorized users to manually override a category of eligibility and/or allow opt-in/opt-out functionality within an active Category of Eligibility.		

**REVISED Appendix B Functional Requirements
December 20, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
OPS 060	The EES shall provide a mechanism to automatically change Category of Eligibility within an active program.		
OPS 061	The EES shall assign a new eligibility begin date for a new Category of Eligibility and automatically assign eligibility end date for a Category of Eligibility being closed.		
OPS 062	The EES shall provide a mechanism to release the hold after final disposition by the secondary reviewer.		
OPS 063	The EES shall share common data elements across multiple programs for selected fields.		
OPS 064	The EES shall have the capability to automatically reassign categories according to business rules.		
OPS 065	The EES shall apply specific eligibility rules during renewal, a reported change or processing simplified reporting for a program(s).		
OPS 066	The EES shall provide a mechanism to collect all information required to auto-populate all necessary Procuring Agency case processing forms, based on program rules.		

**REVISED Appendix B Functional Requirements
December 20, 2013
Request for Proposal Number 4544Z1**

4. Eligibility Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
ELG 001	The EES shall support eligibility determination in keeping with federal "timeliness" guidelines and State performance standards.		
ELG 002	The EES shall support electronic verification of application data, using State or federal sources, where possible, and support post-enrollment verification where electronic data cannot be obtained.		
ELG 003	The EES shall use the CMS Single Streamlined Application or a modified version of the Single Streamlined Application.		
ELG 004	The EES shall support the use of supplemental application for initial eligibility determinations, renewals or changes to existing Medicaid clients.		
ELG 005	The EES shall electronically capture and store all data elements on the CMS Single Streamlined Application, even if the data elements are not needed for Medicaid eligibility determination.		
ELG 006	The EES shall support the use of alternative applications such as shorten form for non-MAGI, and assessment of resources.		
ELG 007	The EES shall support multiple non-MAGI specific programs, such as spousal impoverishment, Medicare buy-in program; etc.		
ELG 008	The EES shall maintain beneficiary eligibility data and information on each beneficiary's benefits.		
ELG 009	Where an existing case (account) exists, the EES shall reuse relevant information and/or selections		
ELG 010	The EES shall ensure seamless transfer of customers between the EES and the FFM as appropriate.		
ELG 011	The EES shall provide beneficiaries with periodic notifications by mail, e-mail, text, telephone and/or other format according to their stated preference for receiving such communications. The EES shall follow-up electronic notifications with paper notifications where required by federal rules or desired by State operations.		
ELG 012	The EES shall provide the capability to determine eligibility, and make changes to eligibility, on a retroactive basis as allowed by federal and State statutes and regulations		
ELG 013	The EES shall provide beneficiaries with clearly stated details as to rights and opportunity for appeal and grievance processes		

**REVISED Appendix B Functional Requirements
December 20, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
ELG 014	The EES shall provide beneficiaries with clear information about privacy and confidentiality protections in the application process		
ELG 015	The EES shall provide beneficiaries with clear information about the Department's protocols in case of an information breach		
ELG 016	The EES shall integrate with the existing or replace a self-assessment tool to be used by external partners and customers to evaluate potential eligibility.		
ELG 017	The EES shall integrate with the existing or replace pre-application screening without entering any personal identifying information.		
ELG 018	The EES shall allow a customer to securely access an electronic account containing application information, notices and appeals information and Fair Hearing information.		
ELG 019	The EES shall use summarized household data for the pre-application process. (e.g. two adults with two children and estimated income).		
ELG 020	The EES shall apply eligibility rules to identify and flag potential financial and non-financial eligibility.		
ELG 021	The EES shall provide the customer information on eligibility and general verification requirements for Medicaid eligibility and timelines for applications and verification processes.		
ELG 022	The EES shall access educational materials on functions of Medicaid and on other state programs.		
ELG 023	The EES shall provide informational fact sheets on programs for which the customer is potentially eligible.		
ELG 024	The EES shall populate the online application with data entered in the pre-application screening tool, if a customer chooses to apply in the same session, where data elements are compatible.		
ELG 025	The EES shall track applications that originate from pre-application screening.		
ELG 026	The EES shall identify and flag expedited benefit cases, with user configurable triggers for expedited cases		
ELG 027	The EES shall use existing information on a known customer to preview the impact of potential changes via a new self-assessment.		
ELG 028	The EES shall assure consistency in eligibility determination processing when applicants attempt to access services through different entry points.		

**REVISED Appendix B Functional Requirements
December 20, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
ELG 029	The EES shall accept complete applications from the Marketplace electronically and make Medicaid eligibility determination without requiring additional information from the applicant consistent with the policies set in the State Plan Amendment.		
ELG 030	The EES shall specify beginning coverage date for those who know their existing employer coverage will be ending.		
ELG 031	The EES shall determine eligibility for all Medical Assistance programs.		
ELG 032	The EES shall validate all data fields for valid format (e.g. valid text, numbers, currency, dates, special characters allowed etc.)		
ELG 033	The EES shall upload, store and index verification documents such that they are tied to the appropriate case and searchable.		
EIG 034	The EES shall provide electronic signature capabilities for customers applying in a local office using an electronic signature pad.		
ELG 035	The EES shall provide an electronic signature for an application		
ELG 036	The EES shall record and store a telephonic signature for an application		
ELG 037	The EES shall provide the customer with a notification of approval or denial.		
ELG 038	The EES shall confirm for customers or workers that submitted applications are complete.		
ELG 039	The EES shall maintain data privacy and security requirements consistent with applicable laws.		
ELG 040	The EES shall retain completed applications with various retention schedules. All application data will be easily searchable and retrievable.		
ELG 041	The EES shall allow the customers to track their status via online or telephone during the application process.		
ELG 042	The EES shall store a version of the completed application form and allow the customer to retrieve it.		
ELG 043	The EES shall save and print a version of a completed application form that was saved online.		
ELG 044	The EES shall auto-populate known data within the system between modules, functions and applications within the life of the household.		

**REVISED Appendix B Functional Requirements
December 20, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
ELG 045	The EES shall process household with more than one applicant		
ELG 046	The EES shall refer cases with potentially fraudulent activity to appropriate agency		
ELG 047	The EES shall identify applications which are pending HUB Citizenship etc. verification		
ELG 048	The EES shall establish an eligibility base period from one to twelve months.		
ELG 049	The EES shall determine the correct eligibility base period automatically and manually.		
ELG 050	The EES shall retain a viewable history of changes to the eligibility base period.		
ELG 051	The EES shall place cases in a pending status if eligibility cannot be determined in real time due to system unavailability. The case will be flagged for follow up and verification of the required information		
ELG 052	The EES shall place cases in a pending status if eligibility cannot be determined in real time due to data inconsistencies in accordance with 155.315(f). The case will be flagged for follow up and verification of the required information		
ELG 053	The EES shall support multiple budgeting methodologies (e.g. perform multiple tests on a single household when family beneficiaries may be eligible for multiple programs).		
ELG 054	The EES shall identify all types of incomes (e.g. countable or exempt statuses of incomes, and resources by program or individual).		
ELG 055	The EES shall document case notes of actions which have occurred on case		
ELG 056	The EES shall calculate start and end dates of presumptive eligibility periods based on user configurable rules		
ELG 057	The EES shall create automatic and manual alerts to internal and external users upon the occurrence of specified events.		
ELG 058	The EES shall automatically re-determine eligibility for customers based on specified events (e.g. cost-of-living adjustment, changes in insurance premium amounts).		
ELG 059	The EES shall calculate customer responsibility/cost sharing for Long Term Care or Home and Community Based waiver programs.		
ELG 060	The EES shall determine applicant eligibility for specific non-independent living Long Term Care or waiver programs. (e.g. Institutional Living).		

**REVISED Appendix B Functional Requirements
December 20, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
ELG 061	The EES shall set a period of ineligibility for a Long Term Care or waiver customer who commits a prohibited transfer of resources.		
ELG 062	The EES shall track movement from one facility to another to re-determine insurance eligibility, and cost sharing based on regulations. (e.g. hospitalization, nursing home, independent living).		
ELG 063	The EES shall identify resources excluded due to Long Term Care insurance.		
ELG 064	The EES shall complete and retain a resource assessment.		
ELG 065	The EES shall support the process of reviewing program eligibility.		
ELG 066	The EES shall display the basis of the eligibility budget calculations.		
ELG 067	The EES shall support varying methods of reviewing program eligibility (e.g. paper process where a review form is generated with pre-populated information).		
ELG 068	The EES shall trigger redetermination on cases with a fixed schedule of timed intervals.		
ELG 069	The EES shall track eligibility determinations separately. (e.g., income used to determine eligibility for Program 1 may be different than the income used to determine eligibility for Program2, etc.)		
ELG 070	The EES shall send notification of eligibility determination.		
ELG 071	The EES shall use the available interfaces to process redetermination for the MAGI qualifying population.		
ELG 072	The EES shall provide the capability to create and maintain an electronic household file of all applicants and families requesting services from the time that they first make an entry to the system.		
ELG 073	The EES shall support a range of disposition action triggers including event-based triggers (e.g., creation date, closing date, date of last review).		
ELG 074	The EES shall allow authorized users to review disposition actions prior to their execution.		
ELG 075	The EES shall allow users to apply disposition action holds on records.		

**REVISED Appendix B Functional Requirements
December 20, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
ELG 076	The EES shall have the flexibility to process individuals in the newly created categories.		
ELG 077	The EES shall provide a mechanism to generate a list of received and pending verifications including eligibility worker entered comments.		
ELG 078	The EES shall provide the ability to allow applicants to view, confirm, dispute and submit corrections to verification results.		
ELG 079	The EES shall provide applicants the ability to address inconsistencies reported by external entities (i.e. income, citizenship, etc.) within a timeframe defined by the Department.		
ELG 080	The EES shall update the applicant's record with the verification results as appropriate.		
ELG 081	The EES shall utilize master indexes to avoid duplicates.		
ELG 082	The EES shall search and match the existing client data before assigning new unique number (e.g., for example, search/match criteria could be the following, including but not limited to, "Fuzzy search", first name, last name, DOB, unique id, SSN, address, aliases, case number, etc.).		
ELG 083	The EES shall have the capability to reconcile duplicate records.		
ELG 084	The EES shall provide the data reports or file extracts to reconcile data between the EES and other systems.		
ELG 085	The EES shall capture alias information.		
ELG 086	The EES shall search account by multiple criteria (e.g., name, ID#, phone number, date of birth, county, assigned worker, etc.).		
ELG 087	The EES shall perform compound searches (e.g., names of married couple, names of parent and child, name of siblings, etc.).		
ELG 088	The EES shall easily modify list criteria while searching.		
ELG 089	The EES shall perform responsible person searches.		

**REVISED Appendix B Functional Requirements
December 20, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
ELG 090	The EES shall automatically identify a customer currently known to the system (e.g applicant pending determination, past member not currently enrolled, etc.)		
ELG 091	The EES shall electronically or manually assign a customer to a case.		
ELG 092	The EES shall conduct a manual case registration by a worker.		
ELG 093	The EES shall create a case by grouping associated customers together.		
ELG 094	The EES shall allow a worker to manually create a case.		
ELG 095	The EES shall use an existing case number per policy.		
ELG 096	The EES shall assign a unique case number to a case.		
ELG 097	The EES shall allow a customer to be associated to multiple cases at the same time. (e.g. customer may receive insurance products on one case number and be the case name for a different case number on which their child is receiving insurance products, etc.)		
ELG 098	The EES shall associate multiple cases to each other. (e.g. cases that share customers).		
ELG 199	The EES shall allow manually associate multiple cases to each other. (e.g. cases that share customers).		
ELG 100	The EES shall close beneficiaries/households/categories based on applicable eligibility rules resulting from changes in information and track closure reasons.		
ELG 101	The EES shall provide a process to override system closures.		
ELG 102	The EES shall provide functionality to manually close beneficiaries/households/categories based on applicable eligibility rules resulting from changes in information and track closure reasons.		
ELG 103	The EES shall allow the user to manually associate customers to each other.		
ELG 104	The EES shall create multiple cases based on regulations. (e.g. Disabled parent with a child).		
ELG 105	The EES shall manually separate cases per regulations.		

**REVISED Appendix B Functional Requirements
December 20, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
ELG 106	The EES shall automatically create a task for updates in the eligibility determination of insurance products/other public assistance programs (e.g., child turning 18, 21 or an adult turning 65, etc.).		
ELG 107	The EES shall provide Medicaid enrollment roster to Marketplace at stipulated frequency.		
ELG 108	The EES shall display or capture prior insurance requests.		
ELG 109	The EES shall set 'special situation' indicators based on rules maintained in the system. (e.g. language, confidentiality situations).		
ELG 110	The EES shall allow manually override all automatically set 'special situation' indicators.		
ELG 111	The EES shall provide the customer with a paper receipt of the documentation (e.g. paystub or birth certificate) that has been turned in to a worker.		
ELG 112	The EES shall have the capability for the Department to notify Marketplace of Medicaid Determination		
ELG 113	The EES shall provide a mechanism to manually extend verification timeframes.		
ELG 114	The EES shall point out missing data, errors and inconsistencies as they progress through the application, performing verification in real time where possible		
ELG 115	The EES shall provide a mechanism to have a "same as" selection to enter repetitive data.		
ELG 116	The EES shall allow a worker to jump back to sections previously completed without losing data entered.		
ELG 117	The EES shall provide a mechanism to manually navigate/skip to any screens that the worker is authorized to access.		
ELG 118	The EES shall identify and display verifications required for the applicant based on program rules.		
ELG 119	The EES shall produce a customized listing of verification documents for an eligibility criteria required to complete eligibility determination.		
ELG 120	The EES shall allow a worker to upload and attach source documents to support eligibility determination.		
ELG 121	The EES shall present worker with a summary view of the information entered prior to submission.		

**REVISED Appendix B Functional Requirements
December 20, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
ELG 122	The EES shall provide applicants the ability to submit alternative verification via multiple avenues (e.g., email, mail, phone, fax, walk-in).		
ELG 123	The EES shall assign a unique identifier as specified by the Department to be for each person entered.		
ELG 124	The EES shall allow an applicant or applicant's authorized representative to review the current application before and after formal submission with the appropriate safeguards and security measures.		
ELG 125	The EES shall not allow an applicant and applicant's authorized representative to submit more than one application within 30 days from the initial submission unless the application was denied.		
ELG 126	The EES shall allow an applicant or applicant's representative to amend an application as long as a determination has not been made.		
ELG 127	The EES shall allow the applicant or applicant's authorized representative to save and amend the application or renewal for up to 30 days in order to gather additional information prior to submittal.		
ELG 128	The EES shall allow and record an applicant's request to withdraw an application.		
ELG 129	The EES shall only collect applicant/household information once and share across Department designated fields.		
ELG 130	The EES shall provide an automated or guided application process to enable the worker to easily enter required information.		
ELG 131	The EES shall capture and track from which organization an application was submitted.		
ELG 132	The EES shall monitor the number of applications submitted and abandoned and the number of applicants who requested assistance via chat, telephonic, etc.		
ELG 133	The EES shall monitor and report on number of applications received and the method by which they were submitted.		
ELG 134	The EES shall capture interview dates.		
ELG 135	The EES shall provide system-generated date and time stamp for receipt of electronic applications to be used in monitoring standards of promptness by program.		
ELG 136	The EES shall provide system-generated date and time stamp for registration of paper applications.		
ELG 137	The EES shall provide a mechanism to begin benefits on a date different than the application date and system-generated date.		
ELG 138	The EES shall capture and display date that a disposition was made on an application/renewal.		

**REVISED Appendix B Functional Requirements
December 20, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
ELG 139	The EES shall check each incoming applicant against existing eligibility database to determine if the incoming applicant is new to the system, reopening a prior category, or adding applicants to existing household.		
ELG 140	The EES shall allow continuance of the application process for applicants without an SSN and assign pseudo-number and ensure pseudo number allows match to get correct SSN.		
ELG 141	The EES shall provide a mechanism to match and replace the pseudo-SSN with the actual SSN.		
ELG 142	The EES shall route applications to the appropriate staff, based on business rules.		
ELG 143	The EES shall display to the applicant discrepant information between the new application and information stored in the existing household.		
ELG 144	The EES shall provide a mechanism through which an applicant could check the applicant's status.		
ELG 145	The EES shall provide the ability to allow applicants to submit paper applications, whether through walk-in, fax or mail-in.		
ELG 146	The EES shall provide capability to track incomplete, new, add-on, and pending applications.		
ELG 147	The EES shall allow for a manual verification process when the Marketplace hub verification service is not available.		
ELG 148	The EES shall provide a mechanism to indicate which verification documents have already been provided.		
ELG 149	The EES shall send notification of alternative verification options to the applicant when electronic verification is not available.		
ELG 150	The EES shall provide the capability to determine and correct eligibility for current and prior months.		
ELG 151	The EES shall determine eligibility without worker intervention, as allowed by policy (e.g., exceeds the Medical Assistance income limit).		
ELG 152	The EES shall allow designated users to override eligibility determinations.		
ELG 153	The EES shall send eligibility determinations to the MMIS enrollment system on a real-time basis to support plan enrollment and claims processing functions.		
ELG 154	The EES shall generate reports related to eligibility decisions.		
ELG 155	The EES shall be flexible enough to add additional Medical Assistance programs.		
ELG 156	The EES shall display the eligibility results in a manner that is comprehensive and easy to understand.		

**REVISED Appendix B Functional Requirements
December 20, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
ELG 157	The EES shall have spenddown capability, including automating a spenddown of resources and income calculation.		
ELG 158	The EES shall allow the Department to set enrollment limits and provide a mechanism to manage applications for programs that are at whose enrollment is capped.		
ELG 159	The EES shall provide the capability for certain programs, as identified by the Department, to be flagged according to funding source.		
ELG 160	The EES shall evaluate the resource/asset eligibility of an applicant when determining eligibility for those programs requiring a resource / asset test.		
ELG 161	The EES shall allow authorized users to search online household files using key fields such as name, SSN, ID, date of birth, etc.		
ELG 162	The EES shall provide a mechanism for authorized users to access beneficiary/household summary from any screen.		
ELG 163	The EES shall provide the capability to re-open a category that is closed in the status it was before the closure.		
ELG 164	The EES shall provide a mechanism to indicate relationships between all members of a household.		
ELG 165	The EES shall provide a mechanism to automatically create the inverse family relationships (e.g., parent - child, child - parent, etc.).		
ELG 166	The EES shall provide the capability to perform mass terminations due to changes in status as well as program changes.		
ELG 167	The EES shall provide household-based activity checklists (to-do lists) to assist in prompting the workers in the completion of required household activities		
ELG 168	The EES shall allow for interview scheduling and tracking of completed interviews. Send client notification of interview is not completed.		
ELG 169	The EES shall include workflow management based on whether an applicant is MAGI-based and/or MAGI-excepted households.		
ELG 170	The EES shall identify all types of incomes (e.g. countable or exempt statuses of incomes, and resources by program or individual).		
ELG 171	The EES shall provide the capability at an individual level to be able to rework a prior case that is closed even if an open case exists.		
ELG 172	The EES shall track program requirements for individuals, e.g., those who are penalized due to transfer of assets.		
ELG 173	The EES shall provide an automated screening tool to determine potential eligibility status using predefined rules and to route to the next step in the process.		

**REVISED Appendix B Functional Requirements
December 20, 2013
Request for Proposal Number 4544Z1**

5. Appeals Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
APP 001	The EES shall support an electronic appeals process, which includes transmission of data to the federal Hub, interfacing with document imaging, and a client web accessibility		
APP 002	If an Appeals decision is in favor of The Department, the EES shall automate the recovery of premiums or medical services that were paid and auto-generate form to Finance Office for recovery.		
APP 003	The EES shall capture and track the disposition of appeals (including status, assignments, and relevant household notes).		
APP 004	The EES shall record the detailed results and supporting documentation that result from or support an appeals decision.		
APP 005	The EES shall have the ability to be notified of results of Appeals		
APP 006	The EES shall automatically capture, retain, and display receipt of eligibility appeals.		
APP 007	The EES shall allow manually entered eligibility appeals.		
APP 008	The EES shall record the reporter/source (name, address, associated agency of person expressing the eligibility appeals, etc.), if applicable.		
APP 009	The EES shall provide a mechanism to generate a list of received and pending verifications including eligibility worker entered comments.		
APP 010	The EES shall assign a unique tracking number to the eligibility appeals.		
APP 011	The EES shall assign a worker, or group of workers, to manage eligibility appeals.		
APP 012	The EES shall update/change manager assigned to a eligibility appeal.		
APP 013	The EES shall identify and assign the priority of eligibility appeals.		
APP 014	The EES shall cross reference common eligibility appeals (e.g. receiving 100 fair appeals requests from a single customer on a single policy change).		
APP 015	The EES shall track when a request for reconsideration becomes an appeal request.		

**REVISED Appendix B Functional Requirements
December 20, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
APP 016	The EES shall provide the facility to export and print case histories and case notes for the purposes of appeals.		
APP 017	The EES shall support the appeals process for customer exemption decision.		
APP 018	The EES shall accept and adjudicate customers appeals regarding eligibility determinations and exemptions from the customer responsibility requirement.		
APP 019	The EES shall associate the eligibility appeals to a case(s) and /or a customer(s).		
APP 020	The EES shall track all eligibility appeals.		
APP 021	The EES shall track multiple eligibility appeals from a single contact.		
APP 022	The EES shall store all eligibility appeals in a central location.		
APP 023	The EES shall track a request for reconsideration outside of standard case notes		
APP 024	The EES shall log updates to an appeal in case notes		
APP 025	The EES shall add notes to appeals		
APP 026	The EES shall capture history of eligibility appeals by multiple parameters (e.g. source, subject, date, etc.)		
APP 027	The EES shall sort history of eligibility appeals by multiple parameters (e.g. source, subject, date, etc.).		
APP 028	The EES shall document an audit trail which reflect who updated associated details to a case.		
APP 029	The EES shall provide the capability to record all decisions of appeals.		
APP 030	The EES shall alert appropriate staff when action is needed or information is due to ensure timely processing of the eligibility appeals.		
APP 031	The EES shall support an appeals process on individual exemption decisions from the individual responsibility requirement.		
APP 032	The EES shall provide the functionality to reinstate service coverage until the Administrative Appeals decision is rendered.		
APP 033	The EES shall provide the ability to allow applicants to view, confirm, dispute and submit corrections to verification results.		

**REVISED Appendix B Functional Requirements
December 20, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
APP 034	The EES shall have the ability for customers to request a postponement of an appeal if the request is made in compliance with State and federal guidelines.		
APP 035	The EES shall have the ability for the customers to request for reconsideration to handle inquiries. <u>The EES shall have the ability for customers to appeal an eligibility determination.</u>		
APP 036	The EES shall have an appeal request submitted through multiple channels including phone, e-mail, letter, etc.		
APP 037	The EES shall provide an electronic template for eligibility appeal process.		
APP 038	The EES shall generate a referral to a third party assignee. (e.g. regular letter, email, automated referral, etc.).		
APP 039	The EES shall require a response by the third party assignee on a case by case basis.		
APP 040	The EES shall have the ability for customers to request an appeal in written form or verbally and followed up in writing.		
APP 041	The EES shall maintain health benefit plan at the current level after an appeal is requested by the customer on a timely manner until the decision of appeal is made (for a discontinuance of an active case).		
APP 042	The EES shall notify customer, third party entity, worker, etc. that the status of an eligibility appeal has changed. (e.g. pending hearing, withdraw, referred, etc.).		
APP 043	The EES shall notify applicants of failed verifications.		
APP 044	The EES shall notify the customer that their eligibility appeal has been received.		
APP 045	The EES shall notify the customer who their eligibility appeal has been referred to.		
APP 046	The EES shall provide a mechanism to track required verification timeframes.		
APP 047	The EES shall provide the capability to create an electronic household file that records all application data and organizes all supporting documentation and images in an easy-to-use format.		

**REVISED Appendix B Functional Requirements
December 20, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
APP 048	The EES shall allow all individuals to exercise their right to appeal any eligibility determination for Medicaid, premium tax credits, cost sharing subsidies, or QHP eligibility.		

6. Notifications Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
NOT 001	The EES shall generate notices by applicant/beneficiary preferred method of communication e.g., mail, email, or fax.		
NOT 002	The EES shall support multiple pages and applicant/beneficiaries standard "Rights and Responsibilities" text, including, but not limited to, applicant/beneficiary's right to an Administrative Appeal.		
NOT 003	The EES shall allow applicant/beneficiaries to choose the method of preferred communication.		
NOT 004	The EES shall record and track how correspondence was issued to the applicant/beneficiary.		
NOT 005	The EES shall provide the capability for mass notifications to applicant/beneficiaries or groups of applicant/beneficiaries.		
NOT 006	The EES shall auto-populate all forms with required information from the system (e.g., applicable dates, missing and provided verifications, notes, etc.).		
NOT 007	The EES shall not have page limits.		
NOT 008	The EES shall produce notices and forms in English and Spanish languages as required by the federal and State statutes, regulations, and policies.		
NOT 009	The EES shall issue notices at set timeframes according to program rules.		
NOT 010	The EES shall provide the capability to set and change release dates.		
NOT 011	The EES shall provide a mechanism to suppress and track any specific notice (one-time notice suppression).		

**REVISED Appendix B Functional Requirements
December 20, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
NOT 012	The EES shall provide a mechanism to suspend any notice type.		
NOT 013	The EES shall provide a mechanism for designated persons to create new versions of notices/forms/correspondence from templates.		
NOT 014	The EES shall provide standard letter templates and the ability to add free form text to customize a letter to the customer's specific issue.		
NOT 015	The EES shall allow workers to generate or regenerate a notice/form upon demand.		
NOT 016	The EES shall generate a notice which includes a list of needed actions by the applicant/beneficiary by a standard due date (with a worker override), depending on the status or type of program applied for.		
NOT 017	The EES shall notify the beneficiary when their enrollment status has changed based on pre-set parameters so that the appropriate notice is generated for the circumstance.		
NOT 018	The EES shall provide the capability to electronically generate notices to obtain missing information.		
NOT 019	The EES shall create a sortable history of all notices associated with the applicant/beneficiary, including specific dates, and have the ability to view notices.		
NOT 020	The EES shall provide the capability to bundle and send out multiple notices and/or send out notices with corresponding forms together.		
NOT 021	The EES shall provide the capability to change information in a notice or delete a notice if it has not been 'sent'.		
NOT 022	The EES shall identify whether notice was auto-generated or worker-generated.		
NOT 023	The EES shall have noticing tightly integrated with the Marketplace and complying with all ACA regulations for such integration.		
NOT 024	The EES shall send electronic and/or paper renewal notices to beneficiaries.		
NOT 025	The EES shall pre-populate electronic and/or paper renewal forms with beneficiary information that is currently on file and allow the beneficiary to change or add information.		
NOT 026	The EES shall renew eligibility based on current federal and State statutes and regulations. The system shall be modified as required to meet all federal and State statutes that are changed during the life of the contract.		
NOT 027	The EES shall track and provide notification to users when a renewal is due.		

**REVISED Appendix B Functional Requirements
December 20, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed Solution/Comments
NOT 028	The EES shall track which electronic and/or paper renewals have been sent and which have been returned,		
NOT 029	The EES shall allow workers to generate notices, compliant with State and federal regulations at the time of notice generation, throughout the appeal process.		
NOT 030	The EES shall accept automated and manual responses received on referrals sent and associate them with initial referral.		
NOT 031	The EES shall retain history of all referrals sent and responses received.		
NOT 032	The EES shall store a copy of notices. These notices shall be available to the work units that support these functions (CSE, TPL, HIPPS, ERU, and Medical Subrogation).		
NOT 033	The EES shall generate Notice to customer that the full application must be completed to continue coverage beyond the presumptive eligibility period.		

REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1

The Non-Functional Requirements Traceability Matrix (RTM) is used to document and track the project requirements from the proposal through to testing to verify that the requirement has been completely fulfilled. The Contractor will be responsible for maintaining the set of Baseline Requirements directly related to the configuration of the EES. Additions, modifications, and deletions to these requirements will be added and modified throughout the project so it is imperative that a current version of the matrix be maintained at all times.

Bidders must provide an initial RTM as part of its proposal. The RTM shall follow the instructions below. The Bidder must state requirements exactly as they are provided in this RFP. The Bidder must indicate how it will achieve full compliance (i.e., requirement fulfilled 100%). Any requirements that the Bidder cannot attest to full compliance must be documented as outlined in Appendix D: Gap Analysis.

Bidders are required to provide a response, using the appropriate codes provided in the tables below, for each requirements listed in the Functional Requirements Response Matrix. Scoring for each requirement will directly relate to the Ability Code indicated by the Bidder.

1.

Ability Code	Condition	Description
S	Standard Function	The proposed EES fully satisfies the requirement as stated. The Bidder must describe how the requirement is satisfied by the EES.
W	Workflow or System Configuration Required	Current functionality of the proposed EES exists in the EES and can be modified by a system administrator to meet this requirement. The Bidder must describe how the requirement will be satisfied.
M	Modification Required	The proposed EES requires a modification to existing functionality to meet this requirement which requires a source code modification. The EES will be modified to satisfy the requirements as stated or in a different format. The Bidder must describe the modifications. If the modification requires 1000 or more hours the Bidder must also complete Appendix D Gap Analysis.
F	Planned for Future Release	This functionality is planned for a future release. The Bidder must describe how the requirement will be satisfied by the EES and when the release will be available.
C	Custom Design and Development	The proposed EES requires new functionality to meet this requirement which requires a source code addition. The Bidder must describe the feature and its value. If the custom design and development requires 1000 or more hours the Bidder must also complete Appendix D Gap Analysis.
N	Cannot Meet Requirement	The proposed EES will not satisfy the requirement. The Bidder must describe why the requirement cannot be satisfied. The Bidder must complete Appendix D Gap Analysis.
O	Other Software	If the requirement is to be satisfied through the use of a separate software package(s), the Bidder must identify those package(s) and describe how the functionality is integrated into the base system

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

1. General System Requirements

Req #	Requirement Description	Bidding Ability Code	Proposed EES/Comments
GSR 001	The EES shall follow a modular, flexible approach to systems development which is consistent with the MITA 3.0 guidelines, the CMS Exchange Reference Architecture, and Service-Oriented Architecture (SOA) design principles.		
GSR 002	The EES shall follow an n-tiered (layered) architectural approach in which presentation, business logic, and data access are separated.		
GSR 003	The EES shall provide scalable architecture.		
GSR 004	The EES shall be architected with no single point of failure, supporting a high-availability enterprise.		
GSR 005	The EES shall be deployable to servers running one of the following operating systems: - Linux - Unix - Windows - z/OS		
GSR 006	The EES shall support deployment on virtualized servers to support scalability and flexibility.		
GSR 007	All infrastructure software used by the EES (operating system, databases, web servers, network management, etc.) shall be a version that is currently supported under standard maintenance agreements and is generally available during the life of the contract.		
GSR 008	The EES shall incorporate an externalized rules repository and engine that allows business rules (including, but not limited to eligibility rules, program determination rules, rate calculations, and application validation rules) to be separated from application logic and defined and maintained through graphical user interfaces or other non-programmatic means.		
GSR 009	The rules engine shall be scalable and flexible to allow it to support expanded eligibility and enrollment rules in the future.		
GSR 010	The EES shall use an enterprise workflow engine to support the routing of work items, work queues, etc.		
GSR 011	The EES shall leverage an electronic document management system that is integrated with the workflow engine to support the storage and retrieval of document images associated with member and eligibility and enrollment processes.		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidding Ability Code	Proposed EES/Comments
GSR 012	The EES shall use an industry-standard commercial Relational Database Management System (RDBMS), Application Server, and Web Server infrastructure.		
GSR 013	The EES' transactional databases shall use data models, referential integrity, constraints, stored procedures, and other DB specific functions to ensure data is properly formatted and orphaned records are not allowed in the EES		
GSR 014	The EES shall support a multi-tiered network deployment model that allows some physical tiers (e.g. load balancers, web servers) to be deployed in one network zone and other tiers (e.g. application servers, databases) to be secured behind internal firewalls		
GSR 015	The EES shall employ an Enterprise Service Bus (ESB) that serves as the integration backbone and the broker between service consumers and producers.		
GSR 016	The EES shall provide a business process layer that manages/orchestrates executable business processes via the ESB, including reusable business services such as encryption, compression, validation, and dynamic routing.		
GSR 017	The EES shall be architected using Business Process Management and workflow technologies as the primary integrated vehicle to implement business processes by composing them from human interactions and coarse-grained services.		
GSR 018	The EES shall support multi-node application server processing so that application processing load can be distributed and balanced across multiple physical servers.		
GSR 019	The EES architecture shall ensure that reporting and batch processing does not interfere with general system responsiveness or availability.		
GSR 020	The EES workflow, web pages and program functions, shall be configurable and modifiable without changing program code.		
GSR 021	The EES shall be designed and developed using a component-based architecture that is modifiable and reusable.		
GSR 022	The EES shall be designed, built and deployed in accordance with Enterprise Architecture best practices.		
GSR 023	The EES shall be built upon an infrastructure that is easily upgradable through patches and point releases, including the upgrading of the EES software and all prerequisite infrastructure software and the application of data migration or update scripts.		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidding Ability Code	Proposed EES/Comments
GSR 024	The EES shall have the ability to interact with the N-FOCUS legacy system to allow for all functionality of the old and new systems to be available.		
GSR 025	The EES shall comply with CMS requirements to establish a framework of enabling technologies and processes that support improved administration of the Medicaid program.		
GSR 026	The EES shall provide the ability to terminate, reverse or back-out a software update in the event it is discovered the update is erroneous or corrupted. The EES shall provide the ability to restore the data to the state prior to the update.		
GSR 027	The EES shall provide a clearly defined promote-to-production process that enforces a strictly defined methodology for movement from development to QA and production.		
GSR 028	The EES shall provide the ability to roll back data and software releases/programs as requested by DHHS during testing cycles.		
GSR 029	The EES shall provide DHHS with all changes, modifications, enhancements, or customized features it makes to any licensed software approved by the Department to be used in The EES.		
GSR 030	The EES shall include appropriate checkpoint/restart capabilities, and other features necessary to ensure reliability and recovery, including telecommunications reliability, file backups, and disaster recovery.		
GSR 031	The EES shall be deployed primarily as a web-based interface, so that users only need a web browser to access the EES.		
GSR 032	The EES workflow, web pages, and program functions shall be configurable and modifiable without changing program code.		
GSR 033	The EES shall maintain the security requirements set forth by federal and Nebraska government.		
GSR 034	The EES shall be scalable and flexible enough to accommodate any changes required by Nebraska and/or federal statute, mandate, decision or policy.		
GSR 035	The EES shall support multiple deployment environments, including development, test, training, and production. (sandbox, break-fix)		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidding Ability Code	Proposed EES/Comments
GSR 036	<p>The EES shall provide the following testing functions:</p> <ul style="list-style-type: none"> - Functional Testing - Regression Testing - Load & Performance Testing - Test case creation and tracking - Test data generation (i.e. data masking, data filtering, etc.) 		
GSR 037	<p>The EES should make the rules engine available in a shared services model to be accessed by other Nebraska systems.</p>		
GSR 038	<p>The EES should leverage an enterprise content management system to store digital content, downloadable forms, and personalized on-screen content.</p>		
GSR 039	<p>The EES should assure that third party software, used for ancillary aspects of the EES, that require distribution or maintenance to remote desktops or servers can be capable of being distributed and configured on user work stations from a central site and not require onsite intervention. In other words, software should support "silent" or unattended installation functionality for any non-web based features.</p>		
GSR 040	<p>The EES should be able to support the following multi-agency configurations:</p>		
GSR 041	<ul style="list-style-type: none"> • Two or more independent yet integrated Agencies in a single instance of the business application running on a single instance of the technical infrastructure 		
GSR 042	<ul style="list-style-type: none"> • Two or more independent yet integrated Agencies each with a separate instance of the business application which all run on the same instance of the technical infrastructure 		
GSR 043	<ul style="list-style-type: none"> • Two or more independent, yet integrated, Agencies each with a separate instances of the business application which run on separate instances of the technical infrastructure. 		
GSR 044	<p>The EES should include a service management layer that provides the following:</p>		
GSR 045	<ul style="list-style-type: none"> • A registry/repository in which all services related to the EES can be published. This registry should support Universal Description Discovery and Integration (UDDI) and the Web Services Description Language (WSDL) 		
GSR 046	<ul style="list-style-type: none"> • Service monitoring, logging, and audit 		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidding Ability Code	Proposed EES/Comments
GSR 047	<ul style="list-style-type: none"> • Should be open to others and reusable by other systems and agencies 		
GSR 048	The EES should ensure that the use of acronyms and codes are consistent across the EES components (windows, screens, reports and databases or data dictionary).		
GSR 049	The EES should provide the ability to support client services through a variety of channels. This may include, but is not limited to web, kiosks, call centers, other organizations, and walk ins.		
GSR 050	The EES should allow new data items to be automatically included in migration paths during software upgrades.		
GSR 051	The EES should document and expose all SOA services using standard WSDL and industry best practices.		
GSR 052	The EES should leverage webs services and adhere to key standards such as SOAP, XML, UDDI, WSDL, BPEL, SAML, and other standards as detailed by the Department.		
GSR 053	The EES should define service modules independently, with the interface modules bridging the gap between modules.		
GSR 054	The EES should provide the ability to refresh each environment.		
GSR 055	The EES should have the ability to backup, recover, restart, and cancel jobs.		
GSR 056	The EES should utilize a web portal that is scalable and has the ability to accommodate additional systems and content in the future.		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

2. Service Oriented Architecture (SOA) Requirements

Req #	Requirement Description	Bidding Ability Code	Proposed EES/Comments
SOA 001	The EES components shall be committed to an advanced approach to interoperability using web services and SOA aligned with Nebraska standards and vision for interoperability.		
SOA 002	The EES shall provide the ability to distribute services amongst different components and tiers of the architecture.		
SOA 003	The EES shall develop/integrate services using standardized Web Services formats.		
SOA 004	The EES shall allow for centralized service maintenance (new, update, delete).		
SOA 005	The EES shall provide the ability to publish services and related data to be used by different types and classes of service consumers.		
SOA 006	The EES shall ensure enterprise-wide access to services through all required channels such as Nebraska facilities, phone, mail, and online via the Internet.		
SOA 007	The EES shall provide the capabilities for a Real-Time (or near real-time) Integrated Enterprise where common data elements about the consumers served and services rendered are easily shared across organizational units with appropriate adherence to security and privacy restrictions.		
SOA 008	The EES shall establish an interoperability layer that supports interactions among components via a variety of protocols (HTTP/plain old XML, SOAP, Internet Inter-ORB Protocol [IIOP], .NET remoting, Message-Oriented Middleware [MOM] protocols, file transfer protocols and others) and interaction styles (request/reply, conversational, publish and subscribe, asynchronous messaging and others).		
SOA 009	The EES shall implement synchronous and asynchronous program-to-program communication, moving messages between SOA service consumer modules and service provider modules at runtime. The ESB component may also move files, database rows and other data.		

REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidding Ability Code	Proposed EES/Comments
SOA 010	EES shall implement a SOA by using an ESB, responsible to monitor and control routing of message exchange between services, resolve contention between communicating service components, control deployment and versioning of services and marshal use of redundant services.		
SOA 011	EES shall support creation and extension of service interfaces through the use of WSDL.		

REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1

3. Interoperability & Interfaces Requirements

Req #	Requirement Description	Bidding Ability Code	Proposed EES/Comments
IO1 001	The EES shall provide a SOA based infrastructure (i.e. hub and spoke) for connecting to other EESs using an ESB infrastructure.		
IO1 002	The EES's Interface architecture for internal A2A (Application to Application) integration shall not have a negative impact on the user experience and expectation for application performance. All points of contacts for A2A communications shall be documented.		
IO1 003	The EES's interfaces shall secure and protect the data and the associated infrastructure from a confidentiality, integrity and availability perspective.		
IO1 004	The EES shall be able to support Application to Application (A2A) synchronous and asynchronous messaging using web services. The messaging capabilities will be able to support a wide variety of A2A patterns including, but not limited to, the following: -		
IO1 005	<ul style="list-style-type: none"> • Data look-up and retrieval 		
IO1 006	<ul style="list-style-type: none"> • Data look-up with services provided by other applications 		
IO1 007	<ul style="list-style-type: none"> • Simple bulk data transfer to/from other EES's. 		
IO1 008	The EES' interface infrastructure shall continue to operate despite failure or unavailability of individual technology components such as a server platform or network connection.		
IO1 009	The EES shall have the capability to notify System Administrators/system support staff if an interface is not available for any reason. The notification and issue(s) shall be invisible to the applicant/beneficiary/client.		
IO1 010	The EES' interfaces must be scalable to accommodate changes in scale including changes in user population, transaction volume, throughput and geographical distribution.		
IO1 011	The EES shall be capable of making any changes to the interface data elements/layouts easily, and to test those changes.		
IO1 012	The EES shall implement, at a minimum, interfaces (both real-time or batch) with the applications and data sources listed in "Interface List - N-FOCUS" document included in the procurement library.		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidding Ability Code	Proposed EES/Comments
IOI 013	The EES shall provide the capability to detect and remediate errors caused by batch processing and real time processing via user defined rules		
IOI 014	The EES shall provide the capability to perform source to destination file integrity checks for exchange data and alert appropriate parties with issues		
IOI 015	The EES shall build in contingencies for the storage of transactions where there is dependency on availability of data from business partners that provide authoritative data (e.g., the IRS, DHS, and SSA).		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

4. Scalability and Extensibility Requirements

Req #	Requirement Description	Bidding Ability Code	Proposed EES/Comments
SCA 001	The EES shall be designed for ease of maintenance and readily allow future functional enhancements. This shall be accomplished through use of modern design principles for SOA, applying principles of modularity, interface abstraction, and loose coupling.		
SCA 002	The EES shall be adequately flexible to keep up with ever changing technology and regulatory changes. This shall be accomplished by separating workflow and business rules into their own separate tiers.		
SCA 003	The EES shall be scalable and adaptable to meet future growth and expansion/contraction needs such that the EES can be expanded on demand and be able to retain its performance levels when adding additional users, functions, and data.		
SCA 004	The screens shall be highly re-configurable, providing ability to reposition and rename field labels/data fields, remove or "turn-off" unused fields, maintain data, and allow addition of custom-defined fields.		
SCA 005	The Department shall be able to modify the labels and arrangement of information in the data model EES documentation templates and can create custom data fields.		
SCA 006	The EES shall provide the ability to create and/or modify edits and business rules which determine the correctness/integrity of data.		
SCA 007	The EES shall provide the ability for on-line access by any site connected to the organization WAN.		
SCA 008	The EES shall provide the capability for remote access in compliance with existing Nebraska / federal connectivity/security policies.		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

5. EES Performance Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
PER 001	The Contractor must build the EES such that expansion of the system can be achieved with a minimum of additional system administration burden and staffing.		
PER 002	EES Administration staffing requirements and workload should be minimally impacted with expanded system usage.		
PER 003	The Contractor must build the EES so that there is a near linear relationship between each additional server added, and the additional load that can be accommodated (load vs. capacity added), up to specified limit.		
PER 004	The EES shall use fully redundant network and hardware. Hardware components (such as processor and memory) should have built-in redundancy to allow a second component to take over in the event of a failure in the primary component. Similarly, redundant paths should also exist for networks.		
PER 005	The EES shall leverage virtualization to expedite disaster recovery.		
PER 006	The EES shall have the ability to support either a Production and hot (real time replication) disaster recovery design or a multi host site Production design that would allow one site to seamlessly be offline and the other site would maintain service without interruption.		
PER 007	The EES shall include a disaster recovery plan and provide contingency plans for client lookup capabilities and online collaboration in the event of a disaster.		
PER 008	The EES shall provide the ability to recover from data loss due to end user error and application error.		
PER 009	The EES shall provide the ability to perform archival/incremental backups and the ability to perform open/closed database backups.		
PER 010	The EES shall provide tools for managing an environment that supports both high availability and disaster recovery.		
PER 011	The EES shall include the capability to maintain all data according to Department defined records retention guidelines (i.e. record schedule). In general document retentions range from 3 to 10 years.		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
PER 012	The EES shall include the capability to maintain all images and electronic documents according to Department defined document retention guidelines (i.e. record schedule).		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

6. Regulatory & Security Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RSR 001	The EES must provide a mechanism to comply with EES security requirements and safeguards requirements following federal agencies/entities:		
RSR 002	<ul style="list-style-type: none"> • United States Department of Agriculture (USDA) 		
RSR 003	<ul style="list-style-type: none"> • Food & Nutrition Services (FNS)

RSR 036	The EES shall conform to the sub-parts of Section 508 of the Americans with Disabilities Act (ADA), and any other appropriate Nebraska or federal disability legislation.		
RSR 037	The EES shall comply with all applicable Nebraska security policies and adhere to all legal, statutory, and regulatory requirements, as determined by Nebraska Leadership.		
RSR 038	The EES should have a unique identifier which is not the SSN.		
RSR 039	The EES shall comply with accessibility requirements described in 45 CFR 85 and with Nebraska accessibility requirements.		
RSR 040	The EES shall comply with Nebraska branding standards as defined by the Department.		
RSR 041	The Contractor shall adhere to the principle of “Fail Safe” to ensure that a system in a failed state does not reveal any sensitive information or leave any access controls open for attacks.		
RSR 042	The EES shall allow for controlled access to participant records. Users will be able to view participant data within the EES at the Department defined levels of access based on user security privileges.		
RSR 043	The EES shall maintain a level of security that is commensurate with the risk and magnitude of the harm that could result from the loss, misuse, disclosure, or modification of information.		
RSR 044	Information security shall be built into the EES from its inception rather than “bolted on” after the EES has been implemented.		
RSR 045	The EES shall support security at the object level (e.g. Table, View, Index).		
RSR 046	The EES shall support security at the row and column level.		
RSR 047	The EES shall support auditing at the object level (i.e. Table, Column).		

REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RSR 048	The EES shall provide the ability for concurrent users to simultaneously view the same record, documentation and/or template.		
RSR 049	The EES shall provide protection to maintain the integrity of data during concurrent access.		
RSR 050	The software used to install and update the systems, independent of the mode or method of conveyance, shall be certified free of malevolent software ("malware"). Contractor may self-certify compliance with this standard through procedures that make use of commercial malware scanning software.		
RSR 051	The EES shall be configurable to prevent corruption or loss of data already accepted into the EES in the event of an EES failure (e.g. integrating with a UPS, etc.).		
RSR 052	The EES shall support protection of confidentiality of all Protected Health Information (PHI) delivered over the Internet or other known open networks via encryption using triple-DES (3DES) or the Advanced Encryption Standard (AES) and an open protocol such as Transport Layer Security (TLS), Secure Sockets Layer (SSL), Internet Protocol Security (IPsec), XML encryptions, or Secure/Multipurpose Internet Mail Extensions(S/MIME) or their successors.		
RSR 053	The EES, when storing PHI on any device intended to be portable/removable (e.g. smartphones, portable computers, portable storage devices), shall support use of a standards based encrypted format using 3DES, AES or their successors.		
RSR 054	The EES, prior to access to any PHI, shall display a configurable warning or login banner (e.g. "The EES should only be accessed by authorized users"). In the event that an EES does not support pre-login capabilities, the EES shall display the banner immediately following authorization.		
RSR 055	The EES shall comply with Title XIX and related regulations and guidance.		
RSR 056	The EES shall comply with Title XXI and related regulations and guidance.		
RSR 057	The EES shall comply with the Office of the National Coordinator's Nationwide Privacy and Security Framework for Electronic Exchange of Individually Identifiable Health Information.		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RSR 058	The EES shall comply with the Section 504 of the Rehabilitation Act.		
RSR 059	The EES shall comply with the Section 6103 of the Internal Revenue Code.		
RSR 060	The EES should comply with the National Information Exchange Model (NIEM).		
RSR 061	The EES should support processing of data in multiple formats such as XML, X12, and other industry standard formats.		
RSR 062	The EES shall provide for security concepts covering the following components: Virtual Private Network (VPN), firewall technology and Demilitarized Zone (DMZ), virus-/intrusion detection, mail/content filtering avoiding fault positives, encryption, Public Key Infrastructure (PKI).		
RSR 063	The EES upon detection of inactivity of an interactive session shall prevent further viewing and access to the EES by that session by terminating the session, or by initiating a session lock that remains in effect until the user reestablishes access using appropriate identification and authentication procedures. The inactivity timeout shall be configurable.		
RSR 064	The EES shall enforce a limit of (configurable) consecutive invalid access attempts by a user. The EES shall protect against further, possibly malicious, user authentication attempts using an appropriate mechanism (e.g. locks the account/node until released by an administrator, locks the account/node for a configurable time period, or delays the next login prompt according to a configurable delay algorithm).		
RSR 065	The EES shall provide the capability to prevent database administrators from seeing the data in databases they maintain.		
RSR 066	The EES shall provide the ability to maintain a directory of all personnel who currently use or access the system/IVR/SQL database.		
RSR 067	The EES shall provide the ability to create and maintain a directory of external providers to facilitate communication and information exchange.		
RSR 068	The EES shall provide the ability to identify certain information as confidential (e.g. PII, PHI, etc.) and only make that accessible by appropriately authorized users.		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RSR 069	The EES shall restrict access to summarized information according to organizational policy, scope of practice, and jurisdictional law.		
RSR 070	The EES must be able to associate permissions with a user using one or more of the following access controls:		
RSR 071	<ul style="list-style-type: none"> User-based (access rights assigned to each user) 		
RSR 072	<ul style="list-style-type: none"> Role-Based Access Controls (RBAC; users are grouped by role and access rights assigned to these groups) 		
RSR 073	<ul style="list-style-type: none"> Context-based (role-based with additional access rights assigned or restricted based on the context of the transaction such as time-of-day, workstation-location, emergency-mode, etc.) 		
RSR 074	The EES shall provide the ability to prevent specified user(s) or groups from accessing confidential information such as a patient's chart.		
RSR 075	The EES should preserve and report specified audit data when potential security violations are detected.		
RSR 076	When access to a user's account is restricted, the EES shall provide a means for appropriately authorized users to "break the glass" and obtain access for emergency situations, as defined by Nebraska policy.		
RSR 077	When access to a chart is restricted and the "break the glass" has occurred, the EES shall provide the ability to notify specified users and provide an audit trail for this access.		
RSR 078	The EES shall enforce the most restrictive set of rights/privileges or accesses needed by users/groups or processes acting on behalf of users, for the performance of specified tasks.		
RSR 079	The EES shall provide the ability for authorized administrators to assign restrictions or privileges to users/groups.		
RSR 080	The EES shall support removal of a user's privileges without deleting the user from the EES to ensure history of user's identity and actions.		
RSR 081	The EES shall be able to support RBAC in compliance with the HL7 Permissions Catalog.		
RSR 082	The EES shall provide more-advanced session management abilities such as prevention of duplicate logins, remote logout and location-specific session timeouts.		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RSR 083	The EES shall provide the ability to perform EES administration functions such as reference table maintenance and adding/removing users from the system.		
RSR 084	The EES shall allow users access based on their roles irrespective of their geographical location.		
RSR 085	The EES shall provide the capability to integrate with existing authentication and authorization mechanisms (RACF on the mainframe).		
RSR 086	The EES shall provide the capability to create temporary and emergency accounts and terminate those accounts automatically after a user defined period of time.		
RSR 087	The EES shall provide the capability to override a role and restrict access to information by users or groups of users.		
RSR 088	The EES shall allow an individual with active eligibility under a different user ID to reapply under their own user ID.		
RSR 089	The EES shall provide the capability to monitor events on the information system, detect attacks, and provide identification of unauthorized use of the system.		
RSR 090	The EES shall provide the capability to identify and report on inappropriate access to information in the system, based on user defined criteria.		
RSR 091	The EES shall manage user profiles, including enforcing role-based security access to system data and functions.		
RSR 092	The EES shall enforce strong password rules per NITC & IRS requirements.		
RSR 093	The EES support the use of Multi-factor authentication		
RSR 094	The EES shall support the ability to disable user accounts and ensure no disabled accounts can log in or access the solution.		
RSR 095	The EES shall provide the same security provisions for all the environments as those used in the production environment.		
RSR 096	The EES shall support user account authentication procedures with configurable parameters (time, cipher strength, logon attempts, etc.).		
RSR 097	The EES shall implement appropriate encryption mechanisms to protect the confidentiality and integrity of critical types of data, including but not limited to passwords, social security numbers, and bank account numbers.		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RSR 098	All sensitive data shall be encrypted in transit (including emails) to protect data confidentiality and integrity as appropriate based on the sensitivity of data.		
RSR 099	The EES shall provide the ability to implement security for transport and messaging via web services.		
RSR 100	The EES shall have the ability to support strong authentication through SSL, Kerberos, RADIUS, SAML, XACML, or OpenID.		
RSR 101	The EES shall provide the ability to virus scan uploaded files using Department approved virus scanning software.		
RSR 102	The EES shall provide the ability to administer user security based on organizational unit.		
RSR 103	The EES shall support the latest version of Secure Sockets Layer (SSL)/Transport Layer Security.		
RSR 104	The EES shall be able to use HTTPS/SSL for connections between interfaces.		
RSR 105	The EES shall pass vulnerability tests that are deemed industry standard for an application which hosts confidential information of clients like Social Security Numbers, dates of birth, addresses etc.		
RSR 106	The EES shall pass tests for common web vulnerabilities such as poor session controls, injection flaws, denial of service, un-validated input, and cross site scripting.		
RSR 107	The EES shall manage user authentication and authorization via LDAP version 3.0 or higher.		
RSR 108	The solution shall contain verification mechanisms that are capable of authenticating authority (as well as identify) for the use or disclosure requested.		
RSR 109	The EES should provide role-based security using unique identifiers (IDs), mandatory password standards, and profile or group access assignments. All users should be authenticated when establishing a connection to the solution. Authentication should be based on unique user IDs and should support separation of duties based on roles.		
RSR 110	The EES shall enforce password policies for length, character requirements, forced reset intervals, and updates, as defined by the Department.		
RSR 111	The EES shall have the ability to use secure (SSL/SSH) FTP to accommodate file transfers.		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RSR 112	The EES shall ensure a timely and reliable process for security breach notification to the appropriate entity.		
RSR 113	The EES shall alert appropriate staff authorities of potential violations of privacy safeguards, such as inappropriate access to confidential information.		
RSR 114	The EES shall assure strict adherence to IRS security and privacy requirements for data obtained from IRS and the federal Data Hub.		
RSR 115	The EES shall adhere to all Nebraska and federal requirements to secure, store, and dispose of data.		
RSR 116	The EES shall provide complete control and accounting of all data received, stored, accessed, or transmitted to ensure administrative, physical, and technical security of the data		
RSR 117	The EES shall ensure the security of all State documents and data ensuring that complete segregation of the State data and files exists from other selected Contractors/selected Contractor customers.		
RSR 118	The EES shall offer the latest, commercially available and industry accepted encryption technologies for any file transfers or information exchanges within the solution network through the Internet and with any potentially unsecured network.		
RSR 119	The EES should implement a security architecture based on MITA 3.0 Security and Privacy model, including the following security architectural elements: <ul style="list-style-type: none"> - Multi-Level Security - Identity Management - Role Based Access Control (RBAC) - Decentralized Label Model (DLM) 		
RSR 120	The EES should support a defense-in-depth, multi-zone computing architecture that physically separates the layers between the solution components. Each layer should be protected by firewalls and appropriate security devices based on the sensitivity of data it houses and functions it performs.		
RSR 121	The EES should be built upon an infrastructure that protects against the known forms of exploits and attacks, including SQL injection, code injection, cross-site scripting, request forgery, and session fixation.		
RSR 122	The EES should support the saving of user profiles for archival purposes, including the ability to re-enable/reuse the profile.		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RSR 123	The EES should pass credentials for authentication and authorization from the solution to authenticate system access to web service transactions (that is, connect to external web systems in the context of a named user, not super-user, account).		
RSR 124	The EES should support, issue, and manage public key certificates for secure transactions, following standard practices such as the use of accepted Certification Authorities (CA), documented Certificate Policies (CP), and Certificate Practice Statements (CPS), including key escrow strategy. Implementation should use fundamental technical standards such as X.509 certificate format and Public Cryptographic Standards (PKCS).		
RSR 125	If a system component or application fails, the EES should not leave sensitive data accessible, and should return user-friendly error messages that do not expose internal system details and does not include information that might help an attacker exploit vulnerabilities in the application.		
RSR 126	The EES should have the ability to support robust session management controls, including the ability to limit the number of concurrent sessions for an individual user.		
RSR 127	The EES should ensure transactions and messages are accurately received as they were sent and information is not altered by non-authorized individuals.		
RSR 128	The EES should support the latest version of the IP Protocol Security extension (IPSec).		
RSR 129	The EES should support S/MIME for email communications.		
RSR 130	The EES should support cryptography levels set forth in FIPS 1402.		
RSR 131	The EES should prevent the creation of duplicate user accounts.		
RSR 132	The EES should use file encryption for data transfer between entities.		
RSR 133	The EES should provide the ability to create, display and maintain an administrative structure as specified by the Department.		
RSR 134	The EES should provide the ability to include a viewable online history of all changes made by User Account Managers as specified by the Department.		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RSR 135	The EES should prevent installation or use of remote control or file sharing software unless explicitly approved by the Department.		
RSR 136	The EES should detect and prevent hacking, intrusion, and other unauthorized use of system resources.		
RSR 137	The EES should provide procedures for guarding, monitoring and detecting malicious software.		
RSR 138	The EES should update virus blocking software daily and aggressively monitor for and protect against viruses.		
RSR 139	The EES should suspend all EES users who have not accessed the solution within a specified number of days as specified by the Department. The suspension requirements should be configurable and distinct for each system environment.		
RSR 140	The EES should provide screen/window security, including links that route to interfaces.		
RSR 141	The EES should provide a secure web portal with authentication and encryption to protect interactions and transactions including, at a minimum Secure Socket Layers (SSL).		
RSR 142	The EES should provide a secure web portal with role based access enabling viewing and maintenance of information across all components of the solution meeting all applicable Nebraska and federal standards.		
RSR 143	The EES should accommodate all current HIPAA revisions/updates including those that may occur during the life of the project.		
RSR 144	The EES should maintain all data sets defined by the HIPAA Implementation Guides to support all transactions required under HIPAA Administrative Simplification Rule.		
RSR 145	The EES should protect the confidentiality and integrity of electronic Protected Health Information (PHI).		
RSR 146	The EES should support encryption and decryption of stored PHI or an equivalent alternative protection mechanism, if approved by the Department.		
RSR 147	The EES should track disclosures of PHI; provide authorized users access to, and reports on the disclosures.		
RSR 148	The EES should include procedures for accessing necessary electronic PHI in the event of an emergency and continue protection of PHI in emergency.		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RSR 149	The EES should provide data integrity of PHI by preventing and detecting improper alteration or destruction (including but not limited to: message authentication, electronic signature, check sums etc.).		
RSR 150	The EES should perform data mapping to identify the PHI contained in the solution.		
RSR 151	The EES should provide ability to redact records in whole or in part to comply with Nebraska and federal privacy standards based on role and authority.		
RSR 152	The EES should provide audit reports for tracking users, associated security groups, roles, settings, passwords and duplicate IDs. The frequency and content of security audit reports will be determined by the Department.		
RSR 153	The EES should track adds, changes and deletes of individual user data.		
RSR 154	The EES shall audit/track all activity specific to each user and process, including at a minimum date and time of last login, invalid login attempts, system errors, and all transaction activities, including inquiry.		
RSR 155	The EES should provide read-only access to system job and maintenance schedule, submission, and processing statistics, and system performance tools for designated staff.		
RSR 156	The EES should monitor system activity and log and examine system activity in accordance with audit policies and procedures adopted by the Department.		
RSR 157	The EES should provide security administrative rights to the Department security administrator(s) for the purpose of adding, updating, and deleting security access.		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

7. Audit & Compliance Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
AUD 001	The EES shall maintain a record (e.g. audit trail) of all additions, changes and deletions made to data in the system. This should be readily searchable by user ID or client ID. This must include but is not limited to:		
AUD 002	<ul style="list-style-type: none"> • The user ID of the person who made the change 		
AUD 003	<ul style="list-style-type: none"> • The date and time of the change 		
AUD 004	<ul style="list-style-type: none"> • The physical, software/hardware and/or network location of the person while making the change 		
AUD 005	<ul style="list-style-type: none"> • The information that was changed 		
AUD 006	<ul style="list-style-type: none"> • The outcome of the event 		
AUD 007	<ul style="list-style-type: none"> • The data before and after it was changed, and which screens were accessed and used 		
AUD 008	The EES shall allow an authorized administrator to set the inclusion or exclusion of auditable events based on organizational policy and operating requirements/limits.		
AUD 009	The EES shall support logging to a common audit engine using the schema and transports specified in the Integrating the Healthcare Enterprise (IHE) Audit Trails and Node Authentication (ATNA) profile, Audit Log specification.		
AUD 010	The EES shall be able to detect security-relevant events that it mediates and generate audit records for them. At a minimum the events shall include those listed here:		
AUD 011	<ul style="list-style-type: none"> • start/stop 		
AUD 012	<ul style="list-style-type: none"> • user login/logout 		
AUD 013	<ul style="list-style-type: none"> • session timeout 		
AUD 014	<ul style="list-style-type: none"> • account lockout 		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
AUD 015	<ul style="list-style-type: none"> client record created/viewed/updated/deleted 		
AUD 016	<ul style="list-style-type: none"> scheduling 		
AUD 017	<ul style="list-style-type: none"> query 		
AUD 018	<ul style="list-style-type: none"> order 		
AUD 019	<ul style="list-style-type: none"> node-authentication failure 		
AUD 020	<ul style="list-style-type: none"> signature created/validated 		
AUD 021	<ul style="list-style-type: none"> Personally Identifiable Information (PII) export 		
AUD 022	<ul style="list-style-type: none"> PII import 		
AUD 023	<ul style="list-style-type: none"> security administration events 		
AUD 024	<ul style="list-style-type: none"> backup and restore 		
AUD 025	The EES shall provide authorized administrators with the capability to read all audit information from the audit records.		
AUD 026	The EES shall provide the audit records in a manner suitable for the user to interpret the information.		
AUD 027	The EES shall provide the capability to generate reports based on ranges of EES date and time that audit records were collected.		
AUD 028	The EES shall be able to export logs into text format in such a manner as to allow correlation based on time (e.g. Coordinated Universal Time [UTC] synchronization).		
AUD 029	The EES shall be able to perform time synchronization using NTP/SNTP, and use this synchronized time in all security records of time.		
AUD 030	The EES shall have the ability to format for export recorded time stamps using UTC based on ISO 8601.		
AUD 031	The EES shall prohibit all users read access to the audit records, except those users that have been granted explicit read access.		
AUD 032	The EES shall protect the stored audit records from unauthorized deletion.		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
AUD 033	The EES shall prevent modifications to the audit records.		
AUD 034	The proposed EES shall provide logging, reporting and accessing errors and exceptions.		
AUD 035	The EES shall maintain an audit trail of all inquiry, and updates to the EES that are required by State and federal policies and regulations.		
AUD 036	The EES shall ensure plans and procedures are in place for all modules to meet audit and compliance requirements		
AUD 037	The EES should capture and retain the data that was used to determine eligibility, calculate benefits, and generate various outputs, at the point in time that the particular action took place. Subsequent changes to data elements (e.g. an applicant's income) should not over-write the value that used to make a determination at a particular point in the past.		
AUD 038	The EES should have the ability to research transaction exceptions (e.g. a failed "add" transaction due to business rule violation) and make corrections within the system as necessary to correct enrollment discrepancies.		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

8. Usability Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
USE 001	The EES will adhere to the accessibility standard as outlined in the web guidelines and based on the W3C level 2 accessibility guidelines: (http://www.w3.org/TR/WCAG10/full-checklist.html).		
USE 002	The EES shall adhere to all federal and Nebraska accessibility requirements, or their successors: (section 508 of the Rehabilitation Act and detailed in section 1194.22 of the Code of Federal Regulations, "Web-based intranet and internet information and applications").		
USE 003	The EES shall provide a user interface that shall be simple and consistent throughout all areas and functions of the EES.		
USE 004	The EES shall minimize the number of mouse clicks/user interaction to complete any action.		
USE 005	The EES shall use a Graphical User Interface (GUI) to help the user navigate to the next logical step in the workflow, or freely navigate to other parts of the EES functionality, and then allow the user to return to complete the in-process task.		
USE 006	The EES shall preserve context by limiting abrupt transitions and redispays in order to maximize and enhance the user experience and EES usability.		
USE 007	The EES shall speak the users' language, with words, phrases and concepts familiar to the user, rather than EES-oriented terms.		
USE 008	The EES shall follow real-world conventions, making information appear in a natural and logical order.		
USE 009	The EES shall allow the users to easily navigate to a variety of functions available to them without having to move sequentially through excessive menus and screens.		
USE 010	The EES shall support undo and redo, or provide onscreen confirmation/acceptance to the user to confirm a change that is permanent and cannot be "undone".		
USE 011	The EES shall provide users with a clearly marked "emergency exit" for the instances when a user mistakenly chooses a function and such "emergency exit" must be simple with minimal dialogue.		

REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
USE 012	The EES shall follow standardized conventions and limit the use of words, situations, or actions that have multiple meanings.		
USE 013	The EES shall eliminate error-prone conditions or check for them and present users with a confirmation option before they commit to the action.		
USE 014	The EES shall minimize the user's memory load by making objects, actions, and options visible.		
USE 015	The EES shall provide the option to have rollover/ tool-tip help or context messages and provide the option to turn off this option in the user preferences profile.		
USE 016	The EES shall provide all user instructions in a visible or easily retrievable location, when appropriate.		
USE 017	The EES shall cater to both inexperienced and experienced users and shall provide accelerators (e.g. onscreen short cuts, hot-keys, alternate workflows, etc.) to speed up the interaction for the expert user.		
USE 018	The EES will allow users to create shortcuts (e.g. onscreen short cuts, hot-keys, etc.) for frequent actions.		
USE 019	The EES's error messages shall be expressed in plain language, precisely indicate the problem, and constructively suggest a solution.		
USE 020	The EES shall use colors to enhance user experience and EES usability while complying with all disability requirements notated elsewhere in these requirements.		
USE 021	The EES shall allow the user to navigate to any functional component from a client landing page.		
USE 022	The EES shall alert the user with information relevant to required next steps.		
USE 023	The EES shall provide drop down and list boxes for all key entry, and text entry will display existing values for selection (auto fill).		
USE 024	The EES shall accommodate point and click selection and check box entry for all relevant data entries to ensure that the user does not have to enter textual data that may already be available to the system.		
USE 025	The EES shall facilitate data entry and shall contain pop-up list boxes for all code fields in all processing windows and allow selection of the entry with use of hot keys.		

REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
USE 026	The EES shall provide field level on-screen edits with limited user override capabilities.		
USE 027	The EES shall not show fields that are not accessible to a given user based on access rights, nor shall the EES show fields not in use.		
USE 028	The EES cursor shall automatically advance to the next logical input field when the maximum allowed numbers of characters have been entered for the keyed field.		
USE 029	The EES shall provide the option of having a selection from the drop down boxes automatically take the user to the next field.		
USE 030	The EES shall provide validation checks by methods described within policy, functional, and detailed requirements.		
USE 031	The EES shall identify invalid entries to the user as immediately as possible.		
USE 032	The EES shall provide the ability to suggest or automatically change entries that do not conform to data entry standards.		
USE 033	The EES shall be designed to include only the necessary information and functionality on screens and shall be based on the user's access level and the user's configuration.		
USE 034	The EES shall be designed to include logical transitions between screens and level of detail during navigation.		
USE 035	The EES shall provide templates for data entry with identified mandatory and optional data fields.		
USE 036	The EES shall allow incomplete data sets to be saved for completion of the workflow at a later time.		
USE 037	The EES shall highlight and flag required and incomplete data fields.		
USE 038	The EES shall include a graduated system of alert levels to allow users to determine urgency and relevancy.		
USE 039	The EES shall allow configuration of alerts by a user, for a user by a supervisor, and for a user by an EES administrator		
USE 040	The EES shall allow for the request of or entry of data from external devices (e.g. tablets, kiosks, barcode scanner, RFID scanner, speech).		
USE 041	The EES shall notify the user when a source system is unavailable/inoperable and notify user that any available information about the subject being viewed is as of certain time and date.		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
USE 042	The EES's web interface shall be aligned with Web 2.0 design principles and best practices.		
USE 043	The EES shall not require users to reenter data due to validation errors if the systems can auto-correct based on the entered data or the user can navigate to the entry error to correct the entry.		
USE 044	The EES shall enable central workflow alerts and transactional status.		
USE 045	The EES shall centralize pending work items for the user as in a "work queue"		
USE 046	The EES shall have the capability to push messages to the intended workers without requiring them to specifically inquire for the data.		
USE 047	The EES shall provide linked access to help functions which contain the appropriate information and search of all help information from every window, based on user profiles.		
USE 048	The EES shall have the capability to capture a public benefit applicant's application in a disconnected/offline mode to be processed once a connection to the Internet is established		
USE 049	The EES shall utilize standard web browser-based technology with the ability to provide data over a web browser interface (i.e. HTML over HTTP).		
USE 050	The EES shall include the capability to encrypt the data communicated over the network via SSL (HTML over HTTPS).		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

9. Integrated Eligibility Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
IER 001	The EES shall have the capability of exchanging information with the legacy N-FOCUS system.		
IER 002	The EES shall have the capability to provide data and access to notifications to the Federal Facilitated Marketplace.		
IER 003	The EES shall have the capability to request and store data from federal Hub for a number of purposes including, but not limited to: updated Citizenship and Income verification.		
IER 004	The EES shall have the capability to request and store results of IRS service information.		
IER 005	The EES shall have the capability to request and store results of Equifax – TALX wage verification.		
IER 006	The EES shall have the capability to request and store results of verification service citizenship/lawful presence provided by CMS		
IER 007	The EES must be able to express eligibility determination business rules outside transactional system in the business rules engine implemented as part of the Nebraska EES.		
IER 008	The EES shall have the capability of exchanging eligibility information with the legacy N-FOCUS system.		
IER 009	The EES shall have the capability of exchanging eligibility information with the legacy MMIS.		
IER 010	The EES shall have the capability to provide results of eligibility determination to other systems.		
IER 011	The EES shall have the capability to provide data and access to notifications to other systems.		
IER 012	The EES shall have the capability to store results/client attestation of a number of factors including, but not limited to Native American Status, Residency, Incarceration Status, and Individual Exemption qualification.		
IER 013	The EES shall have the capability to store results of alternate client verifications for a number of items including, but not limited to income, Citizenship / Lawful presence		
IER 014	The services and consumers employed in the EES shall be loosely-coupled to ensure service logic can evolve while guaranteeing backwards compatibility to existing consumers.		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
IER 015	The EES shall be able to interface with multiple state systems as well as external partner systems to allow interoperability as appropriate with outside entities and state agencies. (Real-time, near-time, batch)		
IER 016	The EES shall provide the ability to leverage the federal approach to verification from federal agencies such as the Internal Revenue Service, Department of Health and Human Services, and Department of Homeland Security to eliminate the independent establishment of those interfaces and connections at the Nebraska level.		
IER 017	The EES shall provide standard, secure, and configurable interfaces between all interfacing information sharing entities.		
IER 018	The EES shall provide the ability to support real-time automated data exchanges with internal systems to ensure that data is aligned.		
IER 019	The EES shall provide the ability to communicate the eligibility decision to other relevant systems.		
IER 020	The EES shall provide the ability to export an enrollment file to external entities as specified by the Department.		
IER 021	The EES shall provide the ability to export Medicaid benefits to the Nebraska MMIS.		
IER 022	The EES shall ensure that dates across Nebraska systems remain in synch (e.g., a case's closing or some other action).		
IER 023	The EES shall provide the ability for data and process integration between programs according to state and federal regulations as required.		
IER 024	The EES should expose a web service that allows other systems to submit requests to verify an individual's enrollment.		
IER 025	All web services used in the EES should be reusable as enterprise resources by systems external to the EES.		
IER 026	The data exchange infrastructure should support multiple open standards and industry standard protocols, including Secure FTP (S-FTP), SOAP over HTTPS, and JMS/ MQ messages.		
IER 027	The EES should provide common bi-direction interfaces (preferably, a web service API) that will support the integration with Computer Telephone Integration (CTI) systems for purposes such as retrieving caller information and triggering screen pops.		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
IER 028	The EES should provide the ability to report on interface transmissions (e.g., total number of records loaded, date of interface transmission, amount of time to execute the interface transmission, errors, and failures).		
IER 029	The EES should provide the ability to import data into the EES in multiple formats (e.g., csv, fixed length ASCII, tab-delimited).		
IER 030	The EES should provide the ability to automatically identify inconsistencies between the case record and information received from interfaces as specified by the Department.		
IER 031	The EES should support integration with Nebraska's current calendar and e-mail environment.		
IER 032	The EES should employ XML-based standards for communication and integration with other environments.		
IER 033	The EES should provide alerts to DHHS staff on status of interface data processing (e.g., when processing is completed or error occurs).		
IER 034	The EES should provide the ability to support Interfaces by exchanging information on schedule as specified by the Department.		
IER 035	The EES should provide the ability to automatically track inbound customer service interactions received through the IVR and/or interfaces based on program rules.		
IER 036	The EES should provide the ability to present a result list for data imports and exports (e.g., success or failure, time started, time completed).		
IER 037	The EES should provide the ability to restart an interface transmission from a specific point (e.g., restart at failed record, restart from beginning).		
IER 038	The EES should associate information received via interface with the line-of-business record which generated the information request.		
IER 039	The EES should support exchange of bulk data information to be printed and mailed.		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

10. EES Administration Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
ADM 001	The EES shall provide data archiving capabilities based on Department defined criteria.		
ADM 002	The EES shall provide the capability to move all historical, expired and/or unnecessary data to offline storage according to a set of business rules and schedule to be defined by the Department as a part of the ongoing system operational decision making.		
ADM 003	The EES shall maintain an archival process so that accumulated historical records and log files do not consume large amounts of disk space.		
ADM 004	The EES shall provide an auto archive/purge of the log files to prevent uncontrolled growth of the log and historical records storage using administrator-set parameters.		
ADM 005	The EES shall provide version control capabilities to ensure the integrity of all software releases.		
ADM 006	The EES shall monitor and provide reports on any unauthorized access.		
ADM 007	All EES communications shall be protected by at least 128-bit encryption.		
ADM 008	The EES shall be supported by public key/private key encryption Secure Socket Layer (SSL) certificates.		
ADM 009	The EES shall provide admin tools and maintenance routines to change access rights quickly.		
ADM 010	The EES shall use firewalls and Demilitarized Zones (DMZs) for external access and remote access.		
ADM 011	The EES shall allow EES administrators to create and manage user accounts.		
ADM 012	The EES shall allow EES administrators to assign status and permissions to user accounts.		
ADM 013	The EES shall allow EES administrators to create and manage user roles.		
ADM 014	The EES shall allow EES administrators to create user groups to manage workflow.		
ADM 015	The EES shall allow EES administrators to assign users to particular local offices.		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
ADM 016	The EES shall allow EES administrators to assign users to particular user groups / units.		
ADM 017	The EES shall allow EES administrators to assign users to particular supervisors.		
ADM 018	The Contractor shall establish an automated maintenance routine that shall at a minimum: - backup the user IDs and password data - identify expired IDs and related data		
ADM 019	The Contractor shall use offsite storage. Data backup should be stored offsite in the event of a physical disaster		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

11. EES Management Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
MGT 001	The EES shall have the ability to generate administrative alerts and warnings when statistics indicate an impact or potential limits on EES component performance and availability. The specific alerts will be defined by the hosting services provider.		
MGT 002	The EES shall allow for all changes/updates to the distributed components to be administered and completed centrally and available immediately to all source systems and sites.		
MGT 003	The EES shall provide Service Level Requirements (SLR) monitoring and reporting capabilities. Service Level definitions will be drafted into a single document provided as an attachment.		
MGT 004	The EES shall securely support State's existing remote control (i.e. support personnel ability to take over the user device for troubleshooting and support) capabilities deployed for any type of client workstation.		
MGT 005	The EES shall provide event management and monitoring functionality according to Information Technology Infrastructure Library version 3 (ITIL v3) or equivalent best practices.		
MGT 006	The EES shall provide application performance monitoring and management capabilities (i.e. transaction monitoring, synthetic transactions, component root cause analysis)		
MGT 007	The EES shall provide transaction tracking and log consolidation capabilities across all tiers of the application		
MGT 008	The EES shall use automated application and network performance measuring tools for proactive system monitoring, tuning mechanisms, reporting, and trend analysis. Performance monitoring alerts shall be configurable and allow for user notification using multiple communication methods.		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
MGT 009	The EES shall provide a custom report outlining system anomalies such as high levels of utilization, poor response times, large number of failed logins, and other abnormal activities, identified, repaired and resolved. This report's frequency shall be dictated by the number of anomalous activities. The report shall include specifics regarding the issues encountered, the measures taken to resolve the anomalies and the resources (EES Contractor, Department and third-party, as applicable) participating in the process.		
MGT 010	The EES shall provide a report reflective of system performance statistics. This performance statistics report shall be presented to the Department not less than monthly for the purposes of monitoring the Department's systems and network activity.		
MGT 011	The EES shall provide event and incident notification capabilities which can integrate with industry standard system management frameworks such as those provided by CA, IBM and Microsoft.		
MGT 012	The EES shall have the ability to capture and report on system utilization needed to allocate costs down to the user and transaction level.		
MGT 013	All performance and systems management functions shall be able to operate without degrading business systems response time.		
MGT 014	The EES shall include the infrastructure (e.g. via the ESB and business process layer) needed to support effective Business Activity Monitoring and Reporting of various business performance metrics, and the information reports necessary to allocate costs based on usage.		
MGT 015	The EES shall provide the ability for system capacity monitoring including, but not limited to, server volume/capacity, and network volume/capacity.		
MGT 016	The EES shall have the ability to provide workload statistics (e.g., work-in-process, queues, waiting-for-resources).		
MGT 017	The EES shall have the ability to notify users, via multiple channels, when the measured performance is outside tolerances.		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
MGT 018	The EES shall have the ability for users, upon notification of performance outside tolerance, to identify the cause of the performance issue.		
MGT 019	The EES shall have the ability to provide dashboard and other report types suitable for business activity monitoring including templates for common display types.		
MGT 020	The EES shall provide for and support the ability to control batch job execution by time of day, date, and processing cycle (weekly, monthly, yearly, quarterly, on request, etc.).		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

12. Enterprise Service Bus (ESB) Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
ESB 001	The EES shall provide reliable, once-only delivery of messages (guarantee of reliable and non-repetitive delivery).		
ESB 002	The EES shall have the ability to support varying message payloads, ranging from individual transactions to large files (more than 1GB) containing multiple transactions.		
ESB 003	The EES shall have the ability to track a message from its origin to its destination (inside a firewall), inquire on the status of that message and address exceptions (for example, resend the message if a target times out).		
ESB 004	The EES shall have the ability to use standards-based communication protocols, such as TCP/IP, HTTP, HTTP/S and SMTP.		
ESB 005	The EES shall have the ability to convert between the protocol native to the messaging platform and other protocols, such as Remote Method Invocation (RMI), IIOP and .NET remoting.		
ESB 006	The EES shall have features that enable in-flight message manipulation, such as transformation (typically XML-based), intelligent routing, naming and addressing.		
ESB 007	The EES shall have the ability to apply logic to the routing of messages, including support for the following file interaction styles:		
ESB 008	<ul style="list-style-type: none"> • Store and forward: Ability to persist a message and then send it to destinations. 		
ESB 009	<ul style="list-style-type: none"> • Publish/subscribe: Ability to distribute a message to multiple destinations based on a message attribute usually described as the subject area of the message. 		
ESB 010	<ul style="list-style-type: none"> • Request/reply: Ability to correlate asynchronous messages so that the target's response is associated with the appropriate request made by the source. 		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
ESB 011	<ul style="list-style-type: none"> Content-based: The ability to route a message based on a value or values within a message. For example, the ability to route a referral message whose target turnaround time is small to a different set of targets than a referral message whose turnaround time is high. 		
ESB 012	The EES shall provide for syntactic conversion and semantic transformation, including ease of use and reuse, number of built-in functions, ease of extending the transformation function with custom-coded logic and XML support (e.g. schema or Extensible Style sheet Language Transformations [XSLT]).		
ESB 013	The EES shall have the capability during operations, to assist service consumers by dynamically finding, binding to and invoking the execution of service providers.		
ESB 014	The EES shall provide the technology that combines design tools and runtime software to implement programs that act as "glue," transforming among protocols, connecting to databases and linking pre-SOA Application Programming Interfaces (APIs) to the SOA backplane. To support B2B projects, adapters also need to support SOA services using B2B protocols such as Applicability Statement 1 (AS1)/Applicability Statement 2 (AS2), RosettaNet and Electronic Data Interchange for Administration, Commerce and Transportation (EDIFACT).		
ESB 015	The EES shall support the industry-standards messaging and interfaces relevant to health and human services organizations including, but not limited to: - Health Level Seven (HL7) Versions 2.x, 3.x, and CCD - Integrating the Healthcare Enterprise (IHE) XD* Profiles		
ESB 016	The EES shall provide the technology that hosts the execution of process logic spanning multiple back-end services or applications - typically for short-term (seconds or minutes) processes that can occasionally also be long term (hours, days, weeks) - with the aim of implementing composite services or automated EES-to-EES processes. Features include:		
ESB 017	<ul style="list-style-type: none"> Graphical design surface for specifying process flows 		

REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
ESB 018	<ul style="list-style-type: none"> • Support for standard specification languages including Business Process Modeling Notation (BPMN) 		
ESB 019	<ul style="list-style-type: none"> • Support for standard representations including Business Process Execution Language (BPEL), XML Process Definition Language (XPDL), Business Process Modeling Language (BPML) and Web Services Flow Language (WSFL) 		
ESB 020	<ul style="list-style-type: none"> • Ability to specify compensating transactions and execute those transactions upon failure of the process flow 		
ESB 021	<ul style="list-style-type: none"> • Integration with workflow 		
ESB 022	The EES shall provide the technology to perform syntactic and semantic hub-based transformation of messages, including:		
ESB 023	<ul style="list-style-type: none"> • Support of taxonomy 		
ESB 024	<ul style="list-style-type: none"> • Support of ontology 		
ESB 025	<ul style="list-style-type: none"> • Reusable transformation maps 		
ESB 026	<ul style="list-style-type: none"> • Built-in transformation functions 		
ESB 027	<ul style="list-style-type: none"> • Extending the transformation function with custom-coded logic 		
ESB 028	<ul style="list-style-type: none"> • Support B2B project translation including Electronic Data Interchange (EDI), RosettaNet, HL7, etc. 		
ESB 029	The EES shall provide the functionality that provides reliability for applications, services or message flows:		
ESB 030	<ul style="list-style-type: none"> • Load balancing 		
ESB 031	<ul style="list-style-type: none"> • High availability 		
ESB 032	<ul style="list-style-type: none"> • Fault tolerance 		
ESB 033	<ul style="list-style-type: none"> • Failover 		

REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
ESB 034	<ul style="list-style-type: none"> • In-order delivery 		
ESB 035	<ul style="list-style-type: none"> • Transaction support 		
ESB 036	<ul style="list-style-type: none"> • Execution prioritization 		
ESB 037	<ul style="list-style-type: none"> • Message prioritization 		
ESB 038	<ul style="list-style-type: none"> • Downstream throttling 		
ESB 039	The EES shall provide the functionality used to monitor the operation of the overall system (services, applications, processes and application infrastructure), and to collect events and usage information aimed at populating technical KPIs of the deliverables supported by the SOA backplane and of the SOA backplane components by monitoring and collecting metrics for:		
ESB 040	<ul style="list-style-type: none"> • Messaging traffic 		
ESB 041	<ul style="list-style-type: none"> • Process state and behavior 		
ESB 042	<ul style="list-style-type: none"> • Application and service parameters and behavior for all nodes in a LAN or WAN 		
ESB 043	The EES must provide for any combination of Alert Destinations such as Email, JMS, SNMP, reporting services, and server logs. The alerts shall be customizable with respect to the frequency of the alert, the ability to enable/disable an alert, rule expiration dates, starting and ending times for an alert, and customizable conditions for an alert".		
ESB 044	The EES shall provide the tools and technologies required to implement the necessary control access to the services and the connected resources (for example, other services and databases), as well as the SOA backplane functionality. Capabilities include:		
ESB 045	<ul style="list-style-type: none"> • Authentication 		
ESB 046	<ul style="list-style-type: none"> • Authorization 		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
ESB 047	<ul style="list-style-type: none"> • Encryption/decryption 		
ESB 048	<ul style="list-style-type: none"> • Digital signatures 		
ESB 049	<ul style="list-style-type: none"> • Credential mapping 		
ESB 050	The EES shall provide the functionality to assist Department's operations personnel in keeping the resultant system (applications, services and infrastructure) running at peak efficiency at all times, including:		
ESB 051	<ul style="list-style-type: none"> • Establishing rules for automated system monitoring 		
ESB 052	<ul style="list-style-type: none"> • Establishing network-alert-based management 		
ESB 053	<ul style="list-style-type: none"> • Supporting autonomous network behavior so local management and problem resolution can continue during an outage 		
ESB 054	<ul style="list-style-type: none"> • A console that enables domain-specific display for multiple devices 		
ESB 055	The EES shall provide the technology that manages the metadata and provides the features needed to support the reliable operation of services. Examples include:		
ESB 056	<ul style="list-style-type: none"> • Online catalog of services and associated artifacts such as WSDL files, XSDs, BPEL files 		
ESB 057	<ul style="list-style-type: none"> • A single point of controlled access for cataloging, promoting, publishing and searching for information about managed assets 		
ESB 058	<ul style="list-style-type: none"> • Metadata that enables an ESB to find, bind to and invoke the execution of a service implementation 		
ESB 059	<ul style="list-style-type: none"> • Support for extending existing asset types and defining and populating custom asset types 		
ESB 060	The EES shall provide support for building frameworks and extensible tools that enable the design, configuration, assembly, deployment, monitoring, and management of software designed around an SOA.		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
ESB 061	The EES shall provide assistance for deploying applications with SOA and event-driven architecture in a manner that supports the following implementation strategies:		
ESB 062	<ul style="list-style-type: none"> • Web Services: Web Services Interoperability (WS-I) Organization-compliant implementation of basic Web services standards, including SOAP, WSDL and Universal Description, Discovery and Integration (UDDI), as well as higher-level Web services standards, such as WS-Security. 		
ESB 063	<ul style="list-style-type: none"> • Representational State Transfer (REST): Support for XML-based message processing as well as HTTP, and XHTML. 		
ESB 064	The EES shall support Transport Security, Message Security, WS-Security, SAML architecture, and WS-Policy.		
ESB 065	The EES shall implement the ability to externalize security by using a third-party security infrastructure whereby the ESB's proxy action calls a third-party for user/role information.		
ESB 066	The EES shall provide the technology to implement processing logic that directly manipulates data values, and the representation of those values for storage, transport or presentation purposes to establish common access to data sources (structured and unstructured), improve data quality or federate data from multiple sources.		
ESB 067	The EES shall provide the tooling that enables the recording (storage) or retrieving (reading) of information (data) from data stores. An example is distributed query functionality that parses incoming queries into sub queries and the execution of those sub queries, via the connectivity layer, against the respective sources where the desired data resides.		
ESB 068	The EES shall provide the data infrastructure tooling that enables users to represent semantic models, identify model-to-model relationships, and execute the necessary translations to reconcile data with differing semantic models.		

REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
ESB 069	The EES shall provide optimization services that continuously read various types of metadata from across the architecture. The optimization verbs shall use the semantic/logical services to reconcile context to data content and deliver against some aspect of the application service-level agreement (requirements for data quality, data freshness, data volumes, throughput parameters, data-mining results, on-demand data aggregation or summarization, data enrichment, and many others).		
ESB 070	The EES shall provide tooling that supports data profiling: the process of examining the data available in an existing data source (for example, a database or a file), and collecting statistics and information about that data.		
ESB 071	The EES shall provide a modeling environment to support the roles of the business analyst, process architect, EES architect and developer.		
ESB 072	The EES shall support individual and group teamwork at design time and runtime.		
ESB 073	The EES must incorporate the ability to undo changes, detect and resolve conflicts, test service connectivity with tracing information, easily enable/disable services, provide logging and view all session activities/change history attributable to each logged in user.		
ESB 074	The EES must incorporate Role/Group-based rights for the management of the ESB across the environments.		
ESB 075	The EES shall have the ability to automatically manage complex workflow patterns that are system-based, human-based, or a mixture of both.		
ESB 076	The EES shall have the ability to design workflows, preferably using Business Process Model and Notation (BPMN).		
ESB 077	The EES shall provide the ability to schedule events (e.g., reminders, notification generation, business process execution, etc.).		
ESB 078	The EES shall provide the ability to associate the scheduled event with a system record (e.g., case record to an event).		
ESB 079	The EES shall provide the ability to attach documentation to the scheduled event.		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
ESB 080	The EES shall provide the ability to notify a user of a scheduled event based on user-defined criteria (e.g., reminder time, delivery mechanism).		
ESB 081	The EES shall provide the ability to modify existing scheduled events (e.g., begin date, end date, frequency, and business process specific information).		
ESB 082	The EES shall have the ability to monitor and manage executing processes, including the capability to override workflows and business rules by authorized users.		
ESB 083	The EES shall provide the ability to suspend a scheduled event.		
ESB 084	The EES shall provide the ability to cancel a scheduled event.		
ESB 085	The EES shall provide the ability to route imaged correspondence to any work queue.		
ESB 086	The EES shall provide the ability to maintain historical information related to scheduled events.		
ESB 087	The EES shall provide the ability to maintain user-defined calendars and dates specific to business functionality (e.g., time off, work hours, review dates).		
ESB 088	The EES shall provide the ability to associate comments with scheduled events.		
ESB 089	The EES should have the ability to import and export process designs using an industry standard format, such as Business Process Execution Language (BPEL) or XML Process Definition Language (XPDL).		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

13. Data Integration & ETL Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
ETL 001	The EES shall have the ability to convert message formats and translate coded data within messages.		
ETL 002	The EES shall provide support for a metadata repository for data and message conversion and transformations.		
ETL 003	The EES shall at a minimum support the following standards:		
ETL 004	<ul style="list-style-type: none"> • Integrating the Health Enterprise (IHE): Cross-Enterprise Document Sharing (XDS); Cross-Community Access (XCA) 		
ETL 005	<ul style="list-style-type: none"> • Health Level Seven (HL7) Continuity of Care Document (CCD) C32 profile 		
ETL 006	<ul style="list-style-type: none"> • ONC Direct Project 		
ETL 007	The EES shall provide the technology to implement processing logic that can manipulate data values, and the representation of those values for transport or conversion purposes.		
ETL 008	The EES shall provide tools for data source connectivity: Adapters for a range of source types beyond RDBMS' and legacy databases (access to data stored in non-relational structures - for example, VSAM files and IMS databases), including packaged applications and Web services, the ability to access semi-structured and unstructured data (such as e-mail, websites, office productivity tools, content repositories and rich media) and the ability to interpret (as a source) XML structures.		
ETL 009	The EES shall provide tools to support the Extract-Transform-Load (ETL) process that involves:		
ETL 010	<ul style="list-style-type: none"> • Extracting data from data sources 		
ETL 011	<ul style="list-style-type: none"> • Transforming it to fit business needs (which can include quality levels). 		
ETL 012	<ul style="list-style-type: none"> • Loading it into the target data store 		

REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
ETL 013	<ul style="list-style-type: none"> Caching: The ability to cache federation results and various subsets of the source data to improve performance in situations where source data volumes are large; therefore, retrieving all data required for integration directly from the source is not feasible. 		
ETL 014	<ul style="list-style-type: none"> Verbose ETL process logging to allow for ease of support and debugging. 		
ETL 015	The EES shall have the ability to load data in a variety of approaches including (but not limited to) the following:		
ETL 016	<ul style="list-style-type: none"> Bulk data extraction and loading 		
ETL 017	<ul style="list-style-type: none"> Granular trickle-feed acquisition and delivery 		
ETL 018	<ul style="list-style-type: none"> Changed-data capture (ability to identify and extract modified data) 		
ETL 019	<ul style="list-style-type: none"> Event-based acquisition (time-based or data-value-based) 		
ETL 020	The EES shall include the following types of transformation:		
ETL 021	<ul style="list-style-type: none"> Simple transformations such as data-type conversions, string manipulations and Simple calculations 		
ETL 022	<ul style="list-style-type: none"> Moderate-complexity transformations, such as lookup and replace operations, aggregations, summarizations, deterministic matching and management of slowly changing dimensions 		
ETL 023	<ul style="list-style-type: none"> Higher-order transformations, such as sophisticated parsing operations on free-form text and rich media 		
ETL 024	<ul style="list-style-type: none"> Facilities for developing custom transformations and extending packaged transformations 		
ETL 025	The EES shall provide tools that enables the recording (storage) or retrieving (reading) of information (data) from data stores. An example is distributed query functionality that parses incoming queries into sub-queries and the execution of those sub-queries, via the connectivity layer, against the respective sources where the desired data resides.		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
ETL 026	The EES shall comply with all relevant HIPAA standards, including national standards for electronic health care transactions and code sets, unique employee and provider identifiers, and security and privacy of individually identifiable health information (called "protected health information" or PHI).		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

14. Master Data Management Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
MDM 001	The EES shall have the capability to support the global identification, linking and/or synchronization of client and provider information across heterogeneous data sources through semantic reconciliation of master client and master provider data.		
MDM 002	The EES shall create and manage a central, database-based EES or index of record for master client (i.e. Master Client Index [MCI]) and master provider (i.e. Master Provider Index [MPI]) data.		
MDM 003	The EES shall enable the delivery of a single client and a single provider view for all stakeholders.		
MDM 004	The EES shall support ongoing client and provider data stewardship and governance requirements through monitoring of policy decisions and corrective action.		
MDM 005	The EES shall track and maintain detailed records on all changes via interfaces and authoring to support audit requirements.		
MDM 006	The EES must include a flexible data model that can model the complex relationships between the internal application sources inside Nebraska, its trading partners, clients and providers, as well as intermediaries and other parties, with the ability to handle complex hierarchies.		
MDM 007	The EES's data model must be capable of handling at least the following categories of elements for clients and providers:		
MDM 008	<ul style="list-style-type: none"> • Identification 		
MDM 009	<ul style="list-style-type: none"> • Demographics 		
MDM 010	<ul style="list-style-type: none"> • Contact information 		
MDM 011	<ul style="list-style-type: none"> • Relationships with other entities / providers 		
MDM 012	<ul style="list-style-type: none"> • Interactions with other entities / providers 		
MDM 013	The EES shall include data modeling capabilities that will be configurable, customizable, extensible, and upgradable.		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
MDM 014	The EES data model must be able to support Nebraska's standards for data content and coding where they exist.		
MDM 015	The EES data model must be expressed using commonly accepted logical data model conventions with associated metadata.		
MDM 016	The EES shall have strong facilities, in batch and real-time mode, for profiling, cleansing, matching, linking, identifying and semantically reconciling master client and master provider data in different data sources to create and maintain golden records.		
MDM 017	The EES's business rules and associated metadata related to data cleansing shall be sufficiently visible to satisfy any audit requirements.		
MDM 018	The EES shall include the ability to review data quality metrics and track corrective actions.		
MDM 019	The EES shall provide dynamically configurable rules for comparing and reconciling semantics across data sources, matching (both probabilistic and tunable) across changing demographic data structures, linking data, and managing the merging and unmerging of client and provider records with full auditability and survivability.		
MDM 020	Where data is matched by a proxy rather than the actual identifier (e.g. client or provider ID) the EES shall load data no less quickly, efficiently or accurately.		
MDM 021	The EES shall include integration middleware to provide a communication backbone for the bidirectional flow of client and provider data between the central repository and the spoke solutions, and/ or remote applications.		
MDM 022	The EES shall provide tools to validate and manage all client and provider addresses to include all address types (mailing, residential, etc.).		
MDM 023	The EES shall be able to leverage a range of middleware products to data sources, including all Nebraska and trading partner data sources, and expose Healthcare industry-standard interfaces.		
MDM 024	The EES shall support integration with different latency characteristics and styles (e.g. real-time, batch).		
MDM 025	The EES shall support integration with downstream Business Intelligence (BI) and analytical requirements.		

REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
MDM 026	The EES shall provide flexible and comprehensive workflow capabilities to enable business users and client and provider data managers to collaborate effectively in the authoring and management of client and provider data across the multiple source systems.		
MDM 027	The EES shall include facilities for managing and controlling access to client and provider data in the MDM such as reporting on MDM activities.		
MDM 028	The EES shall have the ability to integrate the data within the MDM with management and security tools.		
MDM 029	The EES shall manage the policies and rules associated with privacy access rights.		
MDM 030	The EES shall configure and manage differing visibility rules, providing different views for different roles.		
MDM 031	The EES shall integrate with the Department's Active Directory to provide authorization, e.g., role-based security.		
MDM 032	The EES shall provide analytics and performance measures related to the range of processes and activities taking place within the MDM; from the running of batch data loads and the execution of workflows against benchmarks to the quality of active client and provider data in the MDM.		
MDM 033	The EES shall include status and management tools for the data stewards to monitor to-do lists to ensure effective action takes place across the management of the master client and master provider data.		
MDM 034	The EES shall include solution-wide meta models to help identify what users, roles, applications and systems are responsible for which client and provider data.		
MDM 035	The EES shall provide workflow services for remediation of quality issues in client and provider data.		
MDM 036	The EES shall include business rules services to interrogate which rules are used by MDM by frequency and preference and to provide suggested enhancements to such business rules.		
MDM 037	The EES shall be based on up-to-date, mainstream technologies, and capable of flexible and effective integration with a wide range of other application and infrastructure platform components (whether from the same Contractor or not) that will be deployed by Nebraska.		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
MDM 038	The EES shall protect and complement the data layer with a layer of business services for accessing and manipulating the client and provider data that is built for an SOA environment, by exposing web services interfaces.		
MDM 039	The EES shall be capable of flexible configuration into a range of architectural styles in terms of instantiation, latency and use of client and provider data to enable different deployment scenarios, such as the consolidation, registry, coexistence and centralized scenarios.		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

15. Consent Management Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
CMT 001	The EES shall be interoperable/Contractor agnostic.		
CMT 002	The EES shall support break-the-glass/ override access for emergency data access per HIPAA.		
CMT 003	The EES shall provide an alert mechanism for privacy breaches.		
CMT 004	The EES shall be non-disruptive to worker workflow.		
CMT 005	The EES shall be centralized to consistently enforce policies network-wide.		
CMT 006	The EES shall enable all applications to support consumer consent.		
CMT 007	The EES shall accommodate granular directives.		
CMT 008	The EES shall audit all access to protected information in real time.		
CMT 009	The EES shall provide an alert mechanism for privacy breaches or when HIPAA break-the-glass or override functions are enacted.		
CMT 010	The EES shall be highly flexible to meet changing requirements.		
CMT 011	The Department has a strong preference to use a COTS product to provide the consent management required for the EES.		
CMT 012	The EES shall have the consent service tied into role-based access control system for real-time permissions access-granting/removal/denial.		
CMT 013	The EES shall provide extensive search and reporting capabilities on any consent audit event data.		
CMT 014	The EES shall maintain historical record of consent/removal of consent.		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

16. Business Intelligence and Reporting Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
BIR 001	The EES shall provide the ability to impose graduated access to reports based on user role and agency requirements/permissions to better analyze program data.		
BIR 002	The EES's business intelligence and reporting capabilities must be scalable to accommodate changes in EES scale including changes in user population, transaction volume, throughput and geographical distribution while maintaining the agreed service levels.		
BIR 003	The EES shall have a mechanism to share specific data (e.g. limited data sets, detailed data at the level of the individual but with the data anonymous and completely de-identified, etc.) in a controllable fashion with other State and local agencies.		
BIR 004	The EES shall be extensible and have a scalable data architecture incorporating State and external data.		
BIR 005	The EES shall provide a tool to allow predictive modeling and analysis utilizing production data and coexist and integrate with tools such tools as SPSS and SAS.		
BIR 006	The EES shall provide the ability for user to create and customize reports, queries, and dashboards.		
BIR 007	The EES shall provide scalable architecture and support designs that will provide flexibility to add more data fields and change granularity level efficiently as analytic demand matures and expands.		
BIR 008	The EES shall have the ability for logical and physical view creation and storage.		
BIR 009	The EES shall support designs that facilitate a single view of business data.		
BIR 010	The EES shall support OLAP database structure for use in analytics and business intelligence to include ROLAP or MOLAP processing.		
BIR 011	The EES shall support hierarchical drill up/down; ad-hoc query; multi-dimensional tables and views.		
BIR 012	The EES shall provide the ability to support data mining functions.		

REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
BIR 013	The EES shall provide the ability to perform in-database analytics.		
BIR 014	The EES shall offer options to use Database Management EES (DBMS)-integrated data integration tool and/or third party Contractor integration tool.		
BIR 015	The EES shall support fast large volume data loading and shall have the ability to capture real-time data.		
BIR 016	The EES shall have the ability to capture delta of changes to data from diverse systems and populate them to Shared Analytics.		
BIR 017	The EES shall provide the ability to capture and load data via SOA-based services and the ability to schedule data integration and load jobs.		
BIR 018	The EES shall include the ability to facilitate design and construction of data integration processes.		
BIR 019	The EES shall provide the ability to create custom transformations and the ability to group and reuse mapping and transformation operations.		
BIR 020	The EES shall provide comprehensive metadata management from source to target.		
BIR 021	The EES shall provide single repository for metadata, such as mappings of business concepts to underlying data structures, business glossary, data lineage, reference data, and objects (e.g. view, table, join) and reports from source to target.		
BIR 022	The EES shall provide the ability to import metadata from tools and data sources.		
BIR 023	The EES shall provide data quality tools and/or support 3rd party data quality tools for data profiling, cleansing and monitoring.		
BIR 024	The EES shall produce metadata and/or data dictionaries in a format that the Department can consume, e.g., Word, Excel, PDF, OF, etc.		
BIR 025	The EES shall be highly available via various mechanisms, e.g. data marts, data replication, clustering and backup configuration.		
BIR 026	The EES shall support reorganization of databases, indexes and configurations online without the need for the EES to shut down.		
BIR 027	The Contractor shall release upgrades and patches that shall be applied with minimal loss of system availability during production hours.		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
BIR 028	The EES shall allow data loading to support environments with small or no window where system is down when loading data.		
BIR 029	The EES shall provide standards based connectivity including Open Database Connectivity (ODBC), Java Database Connectivity (JDBC), Web Services (WS) and others.		
BIR 030	The EES shall have no limit on the size of data types (including CHAR, NUM, CLOB, BLOB and XML) that are less than that of the manufacturer-known and published limits of the underlying DBMS.		
BIR 031	The EES shall have no limits on the size of tables, indexes and other database-level objects that are less than that of the manufacturer-known and published limits of the underlying DBMS.		
BIR 032	The EES shall support both horizontal and vertical scaling.		
BIR 033	The EES shall have an option for fast loading of data into the database. Where necessary this will include minimal relaxation of quality and integrity constraints and mechanisms for carrying out data quality checks as the final stage in the process.		
BIR 034	The EES shall provide for expansion of data storage as needed to accommodate increased volume of data based on approved Capacity Plans by the Department.		
BIR 035	The EES shall be American National Standards Institute (ANSI) Structured Query Language (SQL) Compliant. (Contractor needs to specify version of SQL compliance – e.g. 2003, 2006, 2008).		
BIR 036	The EES shall be XQuery 1.0 standard compliant.		
BIR 037	The EES shall support industry standards for electronic data exchange.		
BIR 038	The EES shall provide flexibility in using public/private cloud versions of the DBMS as an option to provide cost-effective scalability as needed.		
BIR 039	The EES shall run on and be portable across multiple Contractors' hardware and operating systems (e.g. IBM, HP, and Dell hardware, AIX, Linux, and Windows Operating Systems and VMware)		
BIR 040	The EES shall make an underlying DBMS available as a data warehouse appliance so it is also available as a standalone query-able DBMS.		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
BIR 041	The EES shall support major application development interfaces (e.g. .NET interface, Java 2 Platform, Enterprise Edition [J2EE]).		
BIR 042	The EES shall support various database connectivity protocols (e.g. ODBC, JDBC, etc.)		
BIR 043	The EES shall support all connections required for BI analysis and reporting tools and ETL tools.		
BIR 044	The EES shall support stored procedures and extensions.		
BIR 045	The EES shall not employ triggers or cursors.		
BIR 046	The EES shall support native geo-spatial data types.		
BIR 047	The EES shall provide DBA tools for monitoring and administering DBMS and contain tools to manage the storage devices.		
BIR 048	The EES shall have built-in utilities to the DBMS to automate the normal day-to-day DBA operations (e.g., automated index rebuilding, free space reclamation and block reorganization).		
BIR 049	The EES shall provide the ability to:		
BIR 050	<ul style="list-style-type: none"> • prioritize workload executions and ensure quality-of-service; 		
BIR 051	<ul style="list-style-type: none"> • partition indexing and aggregate management via parameters and tools; 		
BIR 052	<ul style="list-style-type: none"> • simulate the various workloads and mixes 		
BIR 053	The EES shall provide workflow and collaboration support for administrator tasks.		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

17. Rules Engine Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RLE 001	The EES shall support data verification and consistency checks.		
RLE 002	The EES shall support compute values based on input data.		
RLE 003	The EES shall support the selection of business process path.		
RLE 004	The EES shall support mechanisms and ease of use for users to edit rules while maintaining compliance with CMS rules.		
RLE 005	The Contractor must follow all standards defined by CMS in Guidance for Exchange and Medicaid Technology Systems and Enhanced Funding Requirements: Seven Conditions and Standards; and other federal guidelines yet to be defined; including use a technology neutral rules repository.		
RLE 006	The EES shall support design for a multi-step decision.		
RLE 007	The EES shall have the ability to tune individual steps in the overall decision process for maximum performance by the execution engine.		
RLE 008	The EES shall support reporting requirements either natively or integrate with other reporting tools to provide reporting.		
RLE 009	The EES shall support repository infrastructure for rule storage and versioning.		
RLE 010	The EES shall support seamless and easy user interaction.		
RLE 011	The EES shall provide context sensitive help and extensive documentation.		
RLE 012	The Rules Engine must be able to submit business rules to a federal repository at such time as the repository exists.		
RLE 013	The EES shall support high performance and scalability, including the following characteristics:		
RLE 014	<ul style="list-style-type: none"> • High performance for large rule bases (more than 20,000 rules) 		
RLE 015	<ul style="list-style-type: none"> • Ability to share rule sets across multiple engines 		

REVISED Appendix C Non-Functional Requirements

REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RLE 052	The EES shall support ease of use in operation/development and administration, including:		
RLE 053	<ul style="list-style-type: none"> • Rule-firing audit report capabilities 		
RLE 054	<ul style="list-style-type: none"> • Rule views by project or role 		
RLE 055	<ul style="list-style-type: none"> • Ability to be used as a wizard/plugin for multiple development environments 		
RLE 056	<ul style="list-style-type: none"> • Dynamic rule change supported 		
RLE 057	<ul style="list-style-type: none"> • Rules separated from the engine 		
RLE 058	<ul style="list-style-type: none"> • Constraints naturally supported 		
RLE 059	The EES will include the capability to save and retrieve partial user sessions.		
RLE 060	The EES shall provide the capability to associate effective dates with each program and rule in the rules engine.		
RLE 061	The EES shall provide the capability to associate a rule with multiple program profiles.		
RLE 062	The EES shall provide the capability to identify and apply a rule change appropriately to existing cases.		
RLE 063	The EES shall provide the capability to copy an existing rule to create a new rule.		
RLE 064	The EES shall provide the ability to identify all other rules that are dependent on a specific rule by allowing rules association.		
RLE 065	The EES shall provide the capability to generate and display a flow chart of each program profile.		
RLE 066	The EES shall provide the ability to maintain and display the history of each rule change in the rules engine to show previous versions of the rule, a timestamp of when the change was made and the ID of the user making the change.		
RLE 067	The EES shall provide the capability to add additional table-driven variables to support new regulations using a rules engine.		
RLE 068	The EES shall include an automated rule build capability for rule repository propagation through the environments Development, Integration/Test, User Acceptance Testing and Production.		

REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RLE 069	The EES shall have the ability to expose sets of interrelated rules in the rules repository as either a web service and/or in an interactive, web-based interview format.		
RLE 070	The EES shall have the ability to create customizable web-based, interview sessions based on defined rule sets.		
RLE 071	The EES must facilitate the creation and maintenance of rules referencing complex data relationships this will include, but not be limited to, rules referencing complex many-to-many relationships between entity types		
RLE 072	The EES must have the ability for text documentation and meta-data to be included as part of the rules repository.		
RLE 073	The EES will have documentation to assist rule authors and administrators with best practices for rule repository creation and maintenance, repository check-in/checkout, repository promotion across environments.		
RLE 074	The Contractor shall partner with the Department management and Rule Author(s) to design suitable policy models for Eligibility Determination and other rules to be automated using the proposed Rules Management System.		
RLE 075	The Contractor shall transform all of the state's Medicaid eligibility program rules into a format that can be consumed by the proposed Rules Management System.		
RLE 076	The Contractor shall create the program rules in the proposed Rules Management System and test them in an established environment.		
RLE 077	The Contractor shall create a valid set of rules to transition from the current mainframe system to the proposed Rules Management system in preparation for the new SOA system.		
RLE 078	The Contractor rules management team will work with and mentor the Department staff Rule Author(s) in the best practices of: - Converting rules from federal or legislative documents into properly structured rules that can be consumed by the proposed Rules Management System and writing future rules in such a way that eases the transition - Capturing meta-data about each of the rules sets and how they function		

REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RLE 079	The Contractor shall provide guidance on: <ul style="list-style-type: none"> - How best to store and look up the meta-data - Defining the Lifecycle of rule sets - How to integrate or flow rules - How to provide help or commentary on rules - General use of the proposed Rules Management System 		
RLE 080	The Contractor shall provide selected Department staff with holistic education on the proposed Rules Management system that includes (but is not limited to): <ul style="list-style-type: none"> - Knowledge about how the proposed Rules Management system works - Knowledge about how to structure the Rule Author(s) to meet the Agency goals - Knowledge about how to create, maintain and update rules in the proposed Rules Management system 		
RLE 081	The EES shall have the ability to test rules independently from the application with which they are being integrated.		
RLE 082	The EES shall have the ability to debug rules using an integrated tool.		
RLE 083	The EES shall have the ability to assign effective dates to rules to control when rules are applied and to allow the storage and application of rules in historical, current, and future contexts.		
RLE 084	The EES shall have the ability to invoke rules as a service from the service integration capability as well as directly from other system modules.		
RLE 085	The EES shall have the ability to record and output the exact reasons and/or basis for decisions determined by the Rules Engine.		
RLE 086	The EES business rules shall be expressed using a consistent, technology-neutral standard format that is human-readable.		
RLE 087	The EES shall provide a Business Rules Engine to generate transaction logs in accordance with the Harmonized Security and Privacy Framework and other federal requirements.		
RLE 088	The EES shall provide a Business Rules Engine, which generates transaction logs in accordance with the Health Insurance Portability and Accountability Act (HIPAA)		

REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
RLE 089	The EES should be able to recreate results on a unique set of data regardless of when the rules are executed; modeled and/or What-if situations are required.		
RLE 090	The EES should provide a Business Rules Engine which contains a process for built-in rule review and approval process that should identify any conflicts in business rules as they are being developed.		
RLE 091	The EES should include a Business Rules Engine which provides a debugging process that automatically analyzes and identifies logical errors (i.e. conflict, redundancy, and incompleteness) across business rules.		
RLE 092	The EES should provide a Business Rules Engine which allows for the tracking and reporting of rules usage.		
RLE 093	The EES should include a Business Rules Engine which provides the flexibility to define business rules by inclusion or exclusion.		
RLE 094	The EES should include a Business Rules Engine which provides the capability for the user to view and model rules for system exceptions online and to trace exception rule dependencies.		
RLE 095	The EES should provide a Business Rules Engine to manage the synchronization of business policies and rules across physical system environments. (e.g. development, test, training and production).		
RLE 096	The EES should have the ability to automatically promote rules from one environment to another (e.g. development to system test to user acceptance to production) as well as rollback changes to a previous version.		
RLE 097	The EES should have the ability to produce and consume rules in both machine and human readable formats (which may be the same format).		
RLE 098	The EES should have the ability to define rules via a customizable business vocabulary using rule metaphors, including decision tables, decision trees, and text-based rules.		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

18. Portal Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
PRT 001	The EES shall provide a portal UI framework that separates content from logic and is robust, scalable and interoperable with W3C Web-based standards.		
PRT 002	The EES shall provide session management capabilities to support user sessions and coordinated back-end application functionality.		
PRT 003	The EES shall provide support for multiple languages and character set encoding standards.		
PRT 004	The EES shall provide portal personalization and customization capabilities for the constituent user experience.		
PRT 005	The EES shall support access from multiple channels and devices.		
PRT 006	The EES shall provide support for Web content management EES that is robust and scalable.		
PRT 007	The EES shall provide time-based content expiration and version management capabilities.		
PRT 008	The EES shall provide Web content related workflow management capabilities.		
PRT 009	The EES shall provide syndicated content capabilities including creation and subscription to RSS feeds		
PRT 010	The EES shall provide content metadata attributes for portal extensibility.		
PRT 011	The EES shall provide multimedia Web content management capabilities.		
PRT 012	The EES shall provide wiki- and blog-based capabilities		
PRT 013	The EES shall provide XHTML e-form capabilities.		
PRT 014	The EES shall provide survey engine capabilities.		
PRT 015	The EES shall provide chat and instant messaging (IM) support.		
PRT 016	The EES shall provide the capability to consume externally available mapping Web services.		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
PRT 017	The EES shall provide portlet capabilities.		
PRT 018	The EES shall provide inter-portlet communications that are robust, scalable and reliable using Shared Render Parameter and Events methods.		
PRT 019	The EES shall provide search engine capabilities.		
PRT 020	The EES shall provide taxonomy-based cataloging of portal resources.		
PRT 021	The EES shall provide index-based search capabilities.		
PRT 022	The EES must allow for user analytics to be captured and reported		
PRT 023	The EES shall support commonly used Internet browsers without any degradation in functionality, including the following:		
PRT 024	<ul style="list-style-type: none"> • Internet Explorer Version 8.0 or greater 		
PRT 025	<ul style="list-style-type: none"> • Mozilla Firefox Version 6 or greater 		
PRT 026	<ul style="list-style-type: none"> • Google Chrome Version 20 or greater 		
PRT 027	<ul style="list-style-type: none"> • Apple Safari version 5.1 or greater 		
PRT 028	<ul style="list-style-type: none"> • Opera Browsers 10 or greater 		
PRT 029	The EES shall meet all American with Disabilities Act (ADA) and Limited English (LEP) requirements as required by the ACA and Federal regulations.		
PRT 030	The EES shall allow consumers to submit applications with an electronic signature that complies with State, federal, and agency requirements and standards.		
PRT 031	The EES shall use cascading style sheets and other modern browser technologies to ensure that the look and feel of the site can be changed without requiring reprogramming the portal if using a browser based interface.		
PRT 032	The EES shall provide the ability to capture, display and maintain confidentiality statements and privacy protections as specified by the Department.		

REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
PRT 033	The EES shall provide the ability to capture, display and maintain signature acknowledgement(s) of completed forms / case activity(s) as specified by the Department.		
PRT 034	The EES shall provide the ability for external users (e.g. Clients, Community Partners) to upload documents as specified by the Department.		
PRT 035	The EES should support small form-factor devices, including the following mobile phone and tablet platforms:		
PRT 036	<ul style="list-style-type: none"> • iOS phones and tablets 		
PRT 037	<ul style="list-style-type: none"> • Android phones and tablets 		
PRT 038	<ul style="list-style-type: none"> • Blackberry phones and tablets 		
PRT 039	<ul style="list-style-type: none"> • Windows mobile phones and tablets 		
PRT 040	The EES should be 100% accessible via the Internet and require no desktop software (including specialized plug-ins and applets) except for the commercially-available web browsers listed above.		
PRT 041	The EES should provide web analytics.		
PRT 042	The EES should provide citizen and business-centric portals.		
PRT 043	The EES should have a common look and feel across the portal, regardless of the source of information		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

19. Application Server Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
APP 001	The Application Server shall be a scalable, enterprise-ready application and shall support the deployment of many types of distributed applications and provides an ideal foundation for building applications based on SOA.		
APP 002	The Application Server shall enable deployment of mission-critical applications or components in a robust, secure, highly available, and scalable environment.		
APP 003	The Application Server clusters shall provide scalability and reliability for applications by distributing the work load among multiple instances of the server.		
APP 004	The Application Server clusters shall have overload protection to allow the server the ability to detect, avoid, and recover from overload conditions.		
APP 005	The Application Server clusters shall prioritize work based on pre-defined rules and by monitoring actual run time performance statistics.		
APP 006	The Application Server clusters shall store-and-forward services to enable the server to deliver messages reliably between applications that are distributed across many Server instances.		
APP 007	Allows for System Administration that include tasks such as creating Application Server domains; deploying applications or components; migrating domains from development environments to production environments; monitoring and configuring the performance of the application Server domain; and diagnosing and troubleshooting problems.		
APP 008	The Application Server security architecture shall provide a comprehensive, flexible security infrastructure designed to address the security challenges of making applications or components available on the Web.		
APP 009	Shall provide for a monitoring and diagnostic service that creates, collects, analyzes archives, and accesses diagnostic data generated by a running server and its deployed applications.		
APP 010	The EES must allow for user analytics to be captured and reported.		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
APP 011	The EES shall support session replication to support transparent fail over.		
APP 012	The EES shall provide guidelines and tools (MVC frameworks, persistent frameworks) to create web applications (portal or stand-alone) with basic CRUD functionality.		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

20. Database Management System Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
DMS 001	The EES shall lock database records based on various parameters (e.g., at row level, field level, or at the application level).		
DMA 002	The EES shall accommodate separate instances of databases.		
DMS 003	The EES shall support online modifications to database structures with minimal user downtime.		
DMS 004	The EES shall allow for data and transaction replication including, but not limited to, copying an instance of any database to specified locations (e.g. SAN, Multi-site implementations)		
DMS 005	The EES shall provide standard data extraction APIs to allow import and export of data.		
DMS 006	The EES shall provide documented best practices including, but not limited to optimum database configuration, client maintenance and change control.		
DMS 007	The EES shall handle load balancing, failover and/or clustering ability for extended scalability and performance		
DMS 008	The System shall avail the capacity planning model for database configuration.		
DMS 009	The EES supports advanced configurations for data caching (e.g., support of client/application caching, support of server caching, etc.)		
DMS 010	The EES shall have the ability to optimize performance in transaction processing versus report processing		
DMS 011	The EES shall use history tracking within the database and logging options (e.g., transaction auditing)		
DMS 012	The EES shall be fully ACID (Atomicity, Consistency, Isolation, Durability)- compliant so as to ensure it handles transaction rollbacks, validity and referential integrity checks, etc.		
DMS 013	The EES shall handle record locking (e.g., row, field, other) and record updating/committing.		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
DMS 014	The EES shall support indexing technology (multiple types of Indexing shall be available to tune performance of SQL statements).		
DMS 015	The EES must have the ability to support a variety of data model constructs including complex entity relationships and complex many-to-many relationships		
DMS 016	The EES shall provide the ability to optimize individual queries and support parallelizing a query to run on multiple CPUs at the same time to increase performance.		
DMS 017	The EES shall manage multiple query queue entries in parallel.		
DMS 018	The EES shall offer tools to manage and control disparate mixed workloads in a DBMS environment.		
DMS 019	The EES must have the ability to maintain security based upon defined roles.		
DMS 020	The EES must have data replication capabilities to external file formats or other RDBM Systems.		
DMS 021	The EES shall have full, incremental and transaction log backup and recovery capabilities on both a regular schedule and an ad hoc basis, including redundant off-site backups.		
DMS 022	The EES shall provide the capability to remain fully-functional during database backup windows.		
DMS 023	The EES must support geo-coded address data for the storage and retrieval of latitude and longitude coordinates.		
DMS 024	The EES shall assist the Department in developing procedures to ensure that specified data is archived and protected from loss, unauthorized access, or destruction.		
DMS 025	The EES shall have the ability to extend the data model in a manner that is compatible with framework upgrades.		
DMS 026	The EES shall have the ability within the base data model to store effective and expiration dates for items being tracked.		
DMS 027	The EES shall have the ability to prevent the alteration of information that has been deemed as historical.		
DMS 028	The EES shall have the ability to maintain the data model and associated dictionaries and generate appropriate DDL for local modifications and new releases of the product.		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
DMS 029	The EES shall have the ability to gather and analyze database performance information and provide recommendations for improvement.		
DMS 030	The EES shall employ one defined set of data standards (e.g., consistent data schema, data element, data class, field lengths, data tables, view naming conventions).		
DMS 031	The EES shall provide consistency and validity checks on data elements at the database level.		
DMS 032	The EES shall provide a data history in accordance with state and federal law (7 years is the general requirement except where otherwise indicated).		
DMS 033	The EES shall provide the ability to archive records (i.e., remove from active system) based on administrator defined criteria.		
DMS 034	The EES shall properly normalize or de-normalize all tables for efficient operation.		
DMS 035	The EES shall store all data (data, configuration, user, etc.) in a central repository.		
DMS 036	The EES shall provide sharing of data among all parts of an integrated system.		
DMS 037	The EES shall store all data in industry-standard relational databases that use referential integrity rules.		
DMS 038	The EES shall have the capability and capacity to maintain data as required by Nebraska and federal requirements as well as the DHHS electronic retention policy		
DMS 039	The EES should have the ability to support conceptual, logical and physical modeling.		
DMS 040	The EES should have the ability to reverse engineer, document, and inventory existing databases.		
DMS 041	The EES should include metadata on all data fields stored in the database, web services, or indexed documents in the document library.		
DMS 042	The EES should provide the ability to return archived records to the active system based on user request and/or administrator defined criteria.		
DMS 043	The EES should provide the ability to configure a retention schedule for records and documents.		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
DMS 044	The EES should provide automatic program checks for controlling data files, verifying correct processing, and ensuring data integrity.		
DMS 045	The EES should have the ability to retrieve data based on worker requests and retrieve the data and return it to the system within 24 hours.		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

21. SOA Governance Infrastructure Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
GOV 001	The Enterprise Metadata Repository shall provide design-time governance in support of the service life phase, delivering key capabilities for the storage and management of an extensible set of metadata for number of composites, services, business processes, and other IT-related assets.		
GOV 002	A Service Registry shall serve as an integration point for runtime tooling.		
GOV 003	The SOA governance infrastructure should support the Service Bus in subscribing to new or modified assets.		
GOV 004	The SOA governance infrastructure should facilitate composite applications in discovering updated endpoints and WSDL locations.		
GOV 005	As part of the SOA governance model, Runtime monitoring tooling should publish metrics to the Service Registry.		
GOV 006	The security policy manager for Web services shall allow for centrally defined security policies that govern Web services operations (such as access policy, logging policy, and load balancing).		
GOV 007	The ESB solution shall provide dynamic discovery and service level monitoring of all artifacts deployed in the Application Server.		
GOV 008	The Contractor shall define governance processes for the following domains:		
GOV 009	<ul style="list-style-type: none"> • Service Portfolio Management 		
GOV 010	<ul style="list-style-type: none"> • Services Technical Architecture 		
GOV 011	<ul style="list-style-type: none"> • Service Design & Development 		
GOV 012	<ul style="list-style-type: none"> • Configuration & Release Management 		
GOV 013	<ul style="list-style-type: none"> • Contract Management 		

**REVISED Appendix C Non-Functional Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
GOV 014	<ul style="list-style-type: none"> • Service Monitoring & Control 		
GOV 015	<ul style="list-style-type: none"> • Incident Management 		
GOV 016	<ul style="list-style-type: none"> • Change Management 		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

22. Business Process and Case Management Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
CSE 001	The EES shall include business process management capabilities (e.g., roles, responsibilities, policies, procedures, approvals, deadlines, integrations, etc.).		
CSE 002	The EES shall provide process execution and state management.		
CSE 003	The EES shall interact/integrate with the case management components with Enterprise Data Management and Content Management Systems.		
CSE 004	The EES shall enable collaboration.		
CSE 005	The EES shall enable BAM (Business Activity Monitoring) and event-based notifications.		
CSE 006	The EES shall provide simulation and optimization.		
CSE 007	The EES shall provide a registry for process components.		
CSE 008	The EES shall provide robust Administration functions.		
CSE 009	The EES shall provide and/or integrate with a robust and easily configurable workflow engine.		
CSE 010	The EES shall include the capability to assign tasks to staff based on defined business rules.		
CSE 011	The EES shall include the capability to route work to the next person in a workflow based on process outcomes.		
CSE 012	The EES shall provide an automated method to balance workload based on user and work unit queues or skills and availability.		
CSE 013	The EES will provide a method to manually reassign workload based on user input.		
CSE 014	The EES shall support e-mail (push) or on-line queries (pull) by a user for work that is in their queue.		
CSE 015	The EES shall provide data validation rules to ensure data validity		
CSE 016	The EES shall enforce workflow rules (with task checklists) to ensure that processes are completed correctly.		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
CSE 017	The EES shall improve management and staff accountability through the production of reports and/or electronic notifications which will alert users of pending and overdue work.		
CSE 018	The EES shall provide for comprehensive case tracking as defined in requirements detailed during system configuration - minimally these requirements will include logging of task status, case and contact history, issues, etc.		
CSE 019	The EES shall track milestones and due dates and support notification of the appropriate parties about upcoming and overdue milestones.		
CSE 020	The EES shall support multiple forms of electronics notification channels for external users (e.g. text, page, etc.).		
CSE 021	The EES shall support a visual/modeling tool to define business process flows.		
CSE 022	The EES shall be integrated and exposed via portal for citizens (100%) and key functionality for other users, enabling high usage of system within portal.		
CSE 023	The EES shall support standard business process definition languages.		
CSE 024	The EES shall provide the capability to tie business rules to workflows.		
CSE 025	The EES shall provide the capability to link a workflow to one or more workflows.		
CSE 026	The EES shall provide the capability to suspend and resume a workflow that is incomplete.		
CSE 027	The EES shall provide production of reports and/or electronic notifications to identify suspended workflows.		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

23. Application/Transaction Monitoring and Logging Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
TNS 001	The EES shall log all system transactions and keep them easily retrievable and sortable.		
TNS 002	The EES shall detect major errors related to one or more components including loss of network connectivity, a database server going off line, or the application suffers an out-of-memory situation.		
TNS 003	The EES shall detect less than desirable application performance, such as degraded servlet, database or other back end resource response times.		
TNS 004	The EES shall have safeguards designed to ensure that configuration variables affecting the application and the back end resources remain at Department predetermined configuration settings.		
TNS 005	The EES shall detect intrusion attempts by unauthorized system users.		
TNS 006	The EES shall monitor critical performance parameters such as response time, resource availability, CPU Utilization, etc.		
TNS 007	The EES shall provide a holistic view of a wide range of application services and network services providing the ability to drill down to a level where the observations provide useful information and both real-time and snapshot views.		
TNS 008	The EES shall send alarms based on the monitored attributes; these can be escalated through E-Mail / SMS etc.		
TNS 009	The EES shall provide information on the bottleneck in the system.		
TNS 010	The EES shall allow Department staff to perform admin activities through an intuitive user interface.		
TNS 011	The EES shall have the ability to create custom dashboards to empower the users.		
TNS 012	The EES shall allow for different roles for Users including Operators, Administrators, Managers etc.		
TNS 013	The EES shall allow for report generation and analysis for application troubleshooting and capacity planning.		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

24. Enterprise Content Management Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
	Document Management		
DOC 001	The EES shall provide the ability to capture EES-generated documents and store them at appropriate level (e.g. individual, case, program, application, various workflow/process).		
DOC 002	The EES shall provide the ability to store electronic forms (EES generated or 3rd-party generated forms).		
DOC 003	The EES shall enable indexing and searching of documents by a variety of user-defined metadata attributes.		
DOC 004	The EES shall provide support for full text search.		
DOC 005	The EES shall provide built-in viewers/converters for a wide variety of file types.		
DOC 006	The EES shall provide digital rights management capabilities.		
DOC 007	The EES shall provide check-in/check-out functionality for electronic documents.		
DOC 008	The EES shall provide notification features for files that are checked out (overdue, availability, etc.).		
DOC 009	The EES shall ensure version control of documents as they are changed or modified.		
DOC 010	The EES shall allow rollback to a previous version of a document.		
DOC 011	The EES shall enable collaborative document creation and/or markup.		
DOC 012	The EES shall enable attachment of documents to e-mails and e-mail distribution lists.		
DOC 013	The EES shall utilize the EES' authorization and access control for file level security.		
DOC 014	The EES shall have the ability to, based on rules or context, automate the creation of indexing, meta data and overall taxonomy.		
DOC 015	The EES shall have robust bulk load and conversion features.		

REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
DOC 016	The EES shall provide the capability to communicate natively with the document management API.		
DOC 017	The EES shall provide the capability to access the output of the document management system over the Internet and/or Intranet web sites.		
DOC 018	The EES shall develop a user guide that can be accessed online and printed on demand.		
DOC 019	The EES shall provide the capability for online access to policy and procedure and training materials.		
DOC 020	The EES shall be integrated with document processing center workflow.		
Imaging and Image Capture			
IMG 001	The EES shall accommodate multiple imaging locations.		
IMG 002	The EES shall integrate the Imaging and Document Management System with Nebraska's Hyland On-Base solution.		
IMG 003	The EES shall provide the capability to access Nebraska's Hyland On-Base solution to extract data to pre-populate index fields, and/or values on forms.		
IMG 004	The EES shall provide the capability to send and receive faxed and e-form documents, process the data and image directly into and out of the system including the ability to automatically send confirmation of transmission to the sender.		
IMG 005	The EES shall provide the capability for performing conditional routing that will send documents to a specific queue or inbox, either manually or electronically, based on preset conditions as defined by the User.		
IMG 006	The EES shall provide the capability to store and view a multiple page document as a single document.		
IMG 007	The EES shall provide the capability to attach notes, annotations, e-mails and other documents to an original scanned document at any time without rescanning.		
IMG 008	The EES shall provide the capability to notify the user when a duplicate document has been received so the user can decide whether to use the previously received document, replace the existing document or store the new document separately.		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
IMG 009	The EES shall provide the capability to link imaged documentation together and link it to an individual and/or cases within Nebraska EES.		
IMG 010	The EES shall provide the capability to record user and workstation identification for each document processed, accessed or updated.		
IMG 011	The EES shall provide the capability for documents to be grouped together during scanning based on user defined criteria.		
IMG 012	The EES shall provide the capability to allow the User to manually remove, rescan and replace a previously scanned image or document(s).		
IMG 013	The EES shall provide the capability to employ user-defined form/template, indexes and/or field values for recognition and retrieval of documents.		
IMG 014	The EES shall provide the capability to validate data captured from specific fields on forms electronically read by OCR/OMR/ICR.		
IMG 015	The EES will provide the capability to archive documents manually and/or automatically by user-defined criteria.		
IMG 016	The EES shall provide the capability for archived documents to be retrieved and re-indexed.		
IMG 017	The EES shall provide the capability to permanently delete documents based on user defined criteria.		
IMG 018	The EES shall provide the capability to interface with other imaging systems using industry standard interfaces and file formats.		
IMG 019	The EES shall provide the capability to version multiple copies of scanned documents.		
IMG 020	Scanners provided as part of the EES shall have the capability to scan at least 80 pages per minute.		
IMG 021	The EES shall provide image retrieval response times within a maximum of two seconds for all documents stored in the system given a minimum level of bandwidth agreed during detailed requirements and EES configuration.		
IMG 022	Scanners provided as part of the EES shall provide the capability for simplex and duplex scanning.		

REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
IMG 023	The EES shall provide audit trail functions with the ability to log every step in the process to a database for query and reporting purposes.		
	Records Management		
REC 001	The EES shall automatically calculate transfer and destruction dates (and assign records ready for deletion to the appropriate review process for approval of final deletion) for all records in the retention schedules.		
REC 002	The EES shall provide email notification of disposition results		
REC 003	The EES shall include a workflow tool to support the records management process.		
REC 004	The EES shall allow users to manually or automatically classify records or classified automatically based on a policy/rules engine.		
REC 005	The EES shall allow administrators and authorized users to create, apply, view or remove legal holds for individual or multiple records.		
REC 006	The EES shall have the capability to produce colored and bar-coded labels created for physical records.		
REC 007	The EES shall have the capability to check records in and out using barcodes, with adherence to security permissions and support the use of barcode scanners for the purpose.		
REC 008	The EES shall have the capability to track all types and sizes of storage containers within storage locations.		
REC 009	The EES shall have the ability for an administrator to create and maintain retention schedules.		
REC 010	The EES shall have the ability to create disposition, legal hold and audit reports for the records.		
	Web Content Management		
WEB 001	The EES shall provide content authoring capabilities including:		
WEB 002	<ul style="list-style-type: none"> • Provide a structured container for the content (e.g. document) 		
WEB 003	<ul style="list-style-type: none"> • Support reuse via Copy and Paste or "Save As" 		
WEB 004	<ul style="list-style-type: none"> • Tracking of changes to content within a container 		

REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
WEB 005	<ul style="list-style-type: none"> Drag-and-drop page layout 		
WEB 006	<ul style="list-style-type: none"> Ability for collaboration by allowing the “single control” to transfer between authors, reviewers and authorizers 		
WEB 007	<ul style="list-style-type: none"> Real-time active collaboration allowing multiple authors to review and update the content in a container during the course of a shared session 		
WEB 008	<ul style="list-style-type: none"> Standard templates to make authoring documents within certain parameters 		
WEB 009	<ul style="list-style-type: none"> Facilitate the use of Microsoft Office creation tools to submit content directly into the WCM repository 		
WEB 010	<ul style="list-style-type: none"> The bulk import and export of XML content for integration and migration 		
WEB 011	<ul style="list-style-type: none"> Reuse of content and templates to enforce a common “look and feel” and brand identity 		
WEB 012	<ul style="list-style-type: none"> A flexible and extensible workflow to manage authoring review and approval of content across its life cycle 		
WEB 013	<ul style="list-style-type: none"> The ability to expire and retire content. 		
WEB 014	The EES shall support the combination of text and other page elements, such as graphics, logos and buttons and multimedia, such as audio/video and Flash.		
WEB 015	The EES shall include the ability to support content in multiple languages.		
WEB 016	The EES shall support multiple versions of the same site using the same WCM instance and repository.		
WEB 017	The EES shall display content targeted toward specific user profiles.		
WEB 018	The EES shall target content based on visitor-supplied preferences		
WEB 019	The EES shall personalize a site based on customer transaction data, apply personalization rules to elements smaller than pages and use perceived behavior employing mechanisms to assess the behavior of an individual user (known or unknown) in real time and enable choice of delivered content based on that analysis).		
WEB 020	The EES shall provide reporting of:•

WEB 036	<ul style="list-style-type: none"> Support dynamic and event-driven presentation of content 		

**REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1**

25. Identity Management Requirements

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
IDT 001	The EES shall provide APIs/Connectors to integrate with a variety of 3rd party/custom applications to provide single sign-on.		
IDT 002	The EES shall enforce a limit of (configurable) consecutive invalid access attempts by a user.		
IDT 003	The EES shall protect against further, possibly malicious, user authentication attempts using an appropriate mechanism (e.g. locks the account/node until released by an administrator, locks the account/node for a configurable time period, or delays the next login prompt according to a configurable delay algorithm).		
IDT 004	The EES shall provide an administrative function to reset passwords.		
IDT 005	The EES shall not display passwords while being entered.		
IDT 006	The EES shall provide only limited feedback information to the user during the authentication.		
IDT 007	The EES shall support case-sensitive usernames that contain typeable alpha-numeric characters in support of ISO-646/ECMA-6 (aka US ASCII).		
IDT 008	The EES shall allow an authenticated user to change their password, automatically when possible, consistent with password strength rules.		
IDT 009	The EES shall support password strength rules that allow for minimum number of characters, and inclusion of alpha-numeric complexity.		
IDT 010	The EES shall support case-sensitive passwords that contain typeable alpha-numeric characters in support of ISO-646/ECMA-6 (aka US ASCII).		
IDT 011	The EES shall use either standards-based encryption, e.g., 3DES, AES, or standards-based hashing, e.g., SHA1 to store or transport passwords.		
IDT 012	The EES shall prevent the reuse of passwords previously used within a specific (configurable) timeframe, or shall prevent the reuse of a specific (configurable) number of the most recently used passwords.		

REVISED Appendix C Non-Functional Requirements
November 26, 2013
Request for Proposal Number 4544Z1

Req #	Requirement Description	Bidder Ability Code	Proposed EES/Comments
IDT 013	The EES shall meet:		
IDT 014	<ul style="list-style-type: none"> • CMS E-Authentication Assurance Levels 		
IDT 015	<ul style="list-style-type: none"> • NIST 800-63 guidance Level 1: Single factor authentication, Identity proofing relies on subscriber's own assertions Level 2: Single factor authentication, requires verifying the individual's financial account information, and other information Level 3: Multifactor authentication, requires verifying the individual's financial account information, and other information Level 4: Multifactor authentication, In-person proofing is required Tokens (typically a cryptographic key or password) for proving identity, 		
IDT 016	<ul style="list-style-type: none"> • Identity proofing, registration and the delivery of credentials which bind an identity to a token, 		
IDT 017	<ul style="list-style-type: none"> • Remote authentication mechanisms, that is the combination of credentials, tokens and authentication protocols used to establish that a claimant is in fact the subscriber he or she claims to be 		
IDT 018	<ul style="list-style-type: none"> • Assertion mechanisms used to communicate the results of a remote authentication to other parties. 		
IDT 019	The EES should re-authenticate the user before any access to Protected Health Information (PHI) or other sensitive or confidential information is allowed, including when not connected to a network (e.g. on unconnected mobile devices).		
IDT 020	The EES shall encrypt storage of all passwords using a one-way hash or other equivalent functionality to minimize damage from a security breach.		

Revised Appendix D Gap Analysis
November 26, 2013

Any requirements that the Bidder cannot attest to full compliance; i.e., provides a value of “N” in the Ability Code field of the Appendix B Functional Requirements Traceability Matrix or Appendix C Non-Functional Requirements Traceability Matrix, must document the requirement gap as outlined in this Appendix.

The Bidder must ensure that the Gap Analysis Matrix contains an entry for each requirement where one or more of these conditions are true:

1. The Bidder has indicated “N” to Compliant in either RTM
2. The Bidder has indicated an M or C and indicated that 1,000 or more hours will be needed to meet the requirement as documented in the EES description in the RTM.

For each requirement gap, the Bidder must follow the instructions in this Appendix. The Bidder must copy exactly the Identifier, Requirement Description, and Ability Code from the RTM to ensure linkage between the RTM and the Requirement Gap Analysis Matrix.

The Bidder must provide an assessment of the requirement gap, including an estimate of its impact or severity if not compliant, and the steps necessary to close the gap and achieve full compliance. For system and/or product features that will support the requirement and close the gap, the Bidder must also provide an estimated date when the capability will be available as part of the Bidder’s baseline capability.

Bidders are required to use the following Gap Analysis instructions:

Column Description	Bidder Responsibility
Identifier	The unique identifier of the requirement which does not have a compliant solution according to the criteria established in either Appendix B Functional Requirements Traceability Matrix or Appendix C Non-Functional Requirements Traceability Matrix. Copy the requirement identifier from the applicable RTM.
Requirement Description	Copy the requirement description from the applicable RTM for the requirement identified above.
Ability Code	Copy from the RTM for the requirement identified above.
Impact/Severity (Product development or integration effort to fulfill the requirement)	High (H) = >2500 hours Medium (M) =>1000 hours to <2500 hours Low (L) =<1000 hours
Gap Description	Provide a description and analysis of the gap.
Recommendation for Closure	Recommended steps provided by the Bidder to close the gap and achieve full compliance with the requirement.
Date Available	Date to be published/for release to baseline capability (e.g., available to installed EES base) per recommendation for closure above.

RFP Revision 12/20/2013 Section IV. N - Provide Post Implementation Support

Request for Proposal Number 4544Z1

RFP Section IV.N Provide Post Implementation Support has been replaced and superseded in its entirety. RFP Sections IV.N.12 Warranty and RFP Section IV.N.13 Software Maintenance and Operations (M&O) have been revised.

N. PROVIDE POST IMPLEMENTATION SUPPORT

The EES Contractor must provide EES hosting, Disaster Recovery services and a dedicated Service Desk and Application Support Help Desk. The Service Desk will provide the single point of contact for systems related issues. The Application Support Help Desk, to be staffed during business hours (to be determined by the State of Nebraska), will provide support for issues related to the systems business functionality which need to be escalated for investigation and resolution. Both the Service Desk and Application Support Help Desk must be integrated into the internal support structures within the State of Nebraska. The Service Desk, the Application Support Help Desk, and associated staff must be physically located in the continental United States.

1. SYSTEM HOSTING

The EES Contractor will be responsible for hosting all systems during the DDI Period and must provide approach and costs for Infrastructure as a Service (IaaS) and Platform as a Service (PaaS) for all environments. The EES must be hosted in a Tier IV data center with the provision of disaster recovery during the DDI Period. The Contractor shall provide, or utilize as applicable, the following hosted services by environment type. The Bidder is to propose, specify, implement and support as many environments or instances within each environment type as necessary to fully support the design, construction, delivery, operation and ongoing maintenance of the system as per this RFP. These environments are deliverables and are therefore required to be approved by the Department.

Sandbox: The sandbox environment is intended primarily for learning and experimentation of system features rather than for testing alterations to existing functionality. It isolates configuration changes and outright experimentation from the other environments within the systems landscape. Sandboxing protects "live" servers and their data, tested source code distributions, and other collections of code, data and/or content from changes that could be damaging. The Sandbox should replicate the minimal functionality needed to accurately test the functionality or configuration being exercised. This will be hosted by the Contractor in its facilities in the continental United States.

Configuration/Development: This environment will consist of the servers necessary to implement all the servers including Database, Application, Portal and other technical layers of the system stack. The environment will be used to support the daily software build cycle and to execute unit test to verify the continuous integration of the code base throughout the development cycle. This will be hosted by the Contractor in its facilities in the continental United States.

Testing: At scheduled intervals, specific builds of the code base will be placed into a “testing environment.” This environment will be overseen by the testing team who will use it to verify functionality that has been implemented. This will be hosted by the Contractor in its facilities in the continental United States.

Quality Assurance: This environment will be used to assess compliance to requirements, risk of release, and performance capacity. This environment may be a scaled replication of the production environment to minimize errors caused by incompatibility. This will be hosted by the Contractor in its facilities in the continental United States.

Production: This environment should scale to accommodate the proposed and future capacity of the system and will be built for flexibility, scalability and redundancy. This will be hosted with the Contractor, or potentially collocated with other mission critical HHS applications with another provider. This will be hosted by the Contractor in its facilities in the continental United States.

Training: This separate and stable environment, must mirror production or as specified by the State of Nebraska, for use to train staff and other system users. The environment must have a minimum daily refresh capability to allow Trainers to delete practice and assessment data. This will be hosted by the Contractor in its facilities in the continental United States.

Disaster Recovery: All required environments to support the ongoing operation of the production system in the event of a disaster or outage condition at the selected computing center(s).

Each environment should be on a logically and/or physically separate sub-network to safeguard access to configuration, data, and code. The EES Contractor will maintain tight control over the configuration of all code through the use of a source control tool. This tool will provide the Development Team with the ability to check out code for editing in developer workstation sandboxes and to maintain a common code repository. At the end of the implementation of the EES, the State of Nebraska will have access to all environments.

The EES Contractor will provide a System Maintenance, Support and System Transition Plan for transitioning the production environment to the State of Nebraska’s Data Center if desired by the State.

2. **EQUIPMENT SUMMARY**

The proposed infrastructure and systems will be housed in a purpose-built and dedicated physical environment. It is imperative that the proposed infrastructure and systems provide the highest level of control and responsiveness in meeting the State of Nebraska’s business needs. The Primary Data Center (PDC) shall be configured at the Tier IV – Fault Tolerant Site Infrastructure Level (as defined by the Uptime Institute).

The PDC will provide processing power, control data traffic, and will house and manage all participant and program data. The PDC will at a minimum house:

- a. Web Server(s);

- b. Application Server(s);
- c. Integration Server(s);
- d. Portal Server(s);
- e. Database Server(s);
- f. Analytics Server(s);
- g. Report Server(s); and
- h. Storage Area Network (SAN).

The proposed infrastructure and solution set shall explore the use of server virtualization technologies in the data center in order to optimize the investments in server infrastructure and accelerate the ability to provision and deploy new servers and applications. Virtualization shall help reduce the TCO during the life of the EES.

In addition to these servers, managed enterprise class switches and routers shall help direct data traffic. Other hardware equipment at the PDC include generators, Uninterruptible Power Supplies (UPS) to provide continuous power in the event of a power failure, backup devices (Tape, RAID, SAN, etc.), Power Distribution Units (PDUs), fire suppression system, HVAC, telecommunications lines and equipment (DS3 lines) as well as an enterprise hardware firewall. Where applicable, the UPS should have the ability for unattended graceful shutdowns and restarts in the case of a total power failure.

A secondary data center will need to be established to handle failovers in case of problems with the PDC. This failover site equipment will mirror the PDC equipment configuration and data needed to restore full data center operations within the agreed to Recovery Time Objectives.

3. NETWORK

The Contractor is expected to provide highly redundant connectivity to the State of Nebraska Data Center facilities located in Lincoln, NE for all communications between the systems at Contractor's facility and those at the State of Nebraska. All users will be using the existing network infrastructure and functionality of the State of Nebraska's WAN. The Contractor is expected to leverage the State of Nebraska's WAN and the Internet to provide connectivity to all State of Nebraska workers.

4. IT SERVICE DESK

The EES Contractor will be responsible for providing a professional IT Service Desk to be physically located in the continental United States. The IT Service Desk will enable the central management of service delivery and provides the functions and oversight of Contractor's support services including:

- a. Incident Management;
- b. Problem Management;
- c. Change Management; and
- d. Service Requests.

Service support management represents a core support center that handles and manages the resolution of Incidents, Problems and Changes. This set of services manages events as they occur, and assures escalation, ownership and closure

of these events. The Service Desk should follow best practices based on ITIL v3 standards.

IT Service Desk approach should structure the engagement into four distinct stages:

- a. **Stage 1:** Service Initiation - This stage covers all initiation activities.
- b. **Stage 2:** Service Transition - This stage describes a process of transitioning the Service Desk into a full production environment.
- c. **Stage 3:** Service Operations - This stage is the full systems support of the Maintenance & Operations Phase, where the Contractor has assumed full operational responsibilities.
- d. **Stage 4:** Service Re-Transition - Upon written notification, if the State of Nebraska elects to assume operational responsibility for the Service Desk, this represents the stage where the Contractor will transfer knowledge and collateral to the State or a designated Service Provider.

During the above four staged approach, the following activities shall be addressed during Service Operations:

- a. **PRODUCTION SUPPORT**
Supporting production, addressing system interruptions focusing on identifying and fixing system faults quickly or crafting workarounds enabling later root cause analysis and problem remediation.
- b. **MAINTENANCE SUPPORT**
Making changes to existing functionality and features that are necessary to continue proper system operation. This includes routine maintenance, root cause analysis, applying change requirements, software upgrades, business need changes, rule changes, infrastructure policy impacts, and corrective, adaptive or perfective maintenance, as appropriate.
- c. **ENHANCEMENT SUPPORT ANALYSIS**
Analyzing the functional and non-functional requirements for adding new functionality/features to the EES on prioritized requests from the user community. This includes interpreting any rules changes and other critical business needs from a technical and logistical standpoint.
- d. **USER SUPPORT**
Providing application-specific support coordinated through the IT Service staff as well as conducting system research and inquiries.
- e. **HELPDESK PLATFORM**
The IT Service Desk shall utilize a dedicated implementation of industry standard service desk software suite to be hosted and used by the State of Nebraska.
- f. **DATABASE SUPPORT**

This includes both DB support as well as refactoring the EES to enhance database efficiency in storage and query response time and coordinating with system administrators to enable ideal hardware.

5. SOFTWARE CONFIGURATION MANAGEMENT

Software Configuration Management includes the identification and maintenance of System software components and the relationships and dependencies among them. These activities include:

- a.** Automatic capture and storage of IT Service to Application, Application-to-Component and Component-to-Component relationships; and
- b.** Maintenance of the history of those relationships and any transformation required to appropriately manage and document (e.g., source control, version control, profiles, security plans) configuration changes affecting the application and its processing environment.

Code Migration includes promoting new and modified code, configuration, and scripts, in support of new and existing applications through development, test, and production. These activities include:

- c.** Migrate code from development to test on an agreed upon basis;
- d.** Track migration status and notification;
- e.** Identify and resolve issues with the services delivery team and development teams;
- f.** Develop and document recommended operations and administration procedures related to code migration; and
- g.** Develop and document test-to-production turnover requirements and instructions for each project or release.

6. CHANGE AND RELEASE MANAGEMENT

Change and Release Management activities include services required to appropriately manage and document (e.g., impact analysis, version control, library management, turnover management, build management, parallel development) changes to the application and any of the constituent components being developed. Change and Release Management also includes services required to appropriately manage and document changes to the underlying application development environment components. These include the following:

- a.** Library Management the classification, control, and storage of the physical components of the application;
- b.** Version Control the maintenance, tracking, and auditing of modifications to an application's components over time, facilitating the restoration of an application to prior development stages; and
- c.** Turnover Management the automated promotion of software changes across different phases of the life cycle (e.g., development, unit test, systems test, and production), including management of the approval process, production turnover, and software migration control.

The EES shall utilize a centralized solution to automate and control the software change and release management process.

- a.** This software change and release management process will control migration patterns (i.e., how a given set of code moves from one environment to another); and

- b. This software configuration management process will control versioning, access controls, data quality, etc., for each environment.

7. DATA RETENTION AND ARCHIVING

The EES should be designed to support multiple layers of data backup protection using a combination of both disk based and tape based technologies to meet the EES Backup and Recovery (BU/R) requirements.

The EES should leverage SAN replication and mirroring technologies to provide online, disk based system data protection. The EES should utilize SAN-based; block level data replication to protect both critical Database and Application components. Mission critical system components will also be mirrored synchronously to provide fast access to critical functions in the event of failure. In the event of catastrophic system failure at the primary site, clients can be redirected to the secondary site via DNS to utilize redundant systems present at the secondary site. Clients will then be able to retrieve application from replicated sources that will be up to date based on the last completed replication cycle. Additionally, database replication should also be utilized to synchronize data between both primary and secondary databases. Finally, another layer of protection should be designed to provide traditional, versioned system data backup to tape storage. The implementation team shall create new backup job policies specific to the EES.

All EES database and application backup policies will utilize recommended schedules, and all policies will include at least one weekly full backup plus daily incremental backups to ensure data integrity and prevent data loss. Data on all tapes will also be encrypted to ensure security in the event tapes are taken to an offsite storage facility. The backup solution shall utilize on-line backup methodologies where possible that would enable quick backup and restore. Tape and off-site backups should be used to comply with long-term retention and meet the Nebraska Secretary of State Records Retention standards.

Documentation of all B/UR related processes and procedures will be generated during the course of the project, will be validated during system test, and will be presented t at project close. Additionally, processes and procedures that mandate routine testing and restoration of system backup data will also be developed. In this manner, the effectiveness and health of the proposed System B/UR solution will be continually validated.

8. SYSTEM PERFORMANCE MONITORING AND REPORTING

a. PERFORMANCE MONITORING

Operational performance monitoring begins with the tracking of each and every service request via a ticket tracking tool capable of capturing and providing detailed information regarding the Contractor's efforts associated with resolving each specific request. The Contractor must ensure that all data collected is accessible by appropriate stakeholders to ensure an "open book" approach to problem management and performance monitoring.

b. PERFORMANCE REPORTING

The Contractor's Service Delivery Manager is responsible for presenting the Monthly Performance Status deliverable against the SLR expectations. The monthly report will include monthly progress for each support area as well as a rolling trend chart. Any deviations from expected performance will be reviewed and discussed with agreements toward corrective action plans defined jointly with the appropriate State of Nebraska management. Continued failure to meet or exceed committed targets should result in escalation of issues.

c. MONITORING TOOLS

The Contractor should propose one or more monitoring tool(s) to proactively monitor the performance of key infrastructure components of the EES. These tools should provide a flexible, well-rounded solution for monitoring server and network health. These should also monitor basic services and database connectivity, and perform advanced monitoring of Web-based applications through customizable monitoring scripts. These tools should have extensively customizable dashboards to provide availability and response time on devices, URLs, WAN links and services; besides providing health and performance statics of the servers, network devices, services and applications. These tools should utilize a combination of ICMP, SNMP, and WMI protocols that enables them to monitor almost any networked device. Automatic alerting and reporting in multiple formats including email, SMS text messages, and application pop-up windows should also be available.

9. COMPLIANCE WITH FEDERAL HIPAA, HI-TECH AND STATE OF NEBRASKA CONFIDENTIALITY LAW

The EES Contractor acknowledges its duty to become familiar with and comply, to the extent applicable, with all requirements of the Federal Health Insurance Portability and Accountability Act (HIPAA), 42 U.S.C. § 1320d et seq. and implementing regulations including 45 CFR Parts 160 and 164. The Contractor also agrees to comply with all State of Nebraska Privacy Policies.

The Contractor shall maintain the privacy and security of all individually identifiable health information acquired by or provided to it as a part of the performance of this contract. The Contractor shall follow federal and State of Nebraska law relating to privacy and security of individually identifiable health information as applicable, including the Health Insurance Portability and Accountability Act (HIPAA) and its federal regulations.

Protected Health Information as defined in the HIPAA regulations at 45 CFR 160.103 and 164.501 means information transmitted that is individually identifiable; that is created or received by a healthcare provider, health plan, public health authority, employer, life insurer, school or university, or healthcare clearinghouse; and that is related to the past, present, or future physical or mental health or condition of an individual, to the provision of healthcare to an individual, or to the past, present, or future payment for the provision of healthcare to an individual. The definition excludes certain education records as well as employment records held by a covered entity in its role as employer.

Based on the determination that the functions to be performed in accordance with this RFP constitute Business Associate functions as defined in HIPAA, the EES Contractor shall execute a Business Associate Agreement as required by HIPAA regulations at 45 CFR §164.501.

10. DATA SYSTEMS ACCESS

The Contractor agrees that all information accessed in the State of Nebraska computer systems is the sole property of the State of Nebraska; Contractor employees are granted access to this under the terms and conditions of this Contract. All information collected and compiled by the Contractor under the terms and conditions defined in this Contract is the sole property of the State of Nebraska and subject to all privacy and security safeguards defined by the State of Nebraska.

The Contractor agrees that under the terms and conditions of the contract resulting from this RFP, that the State of Nebraska computer system access will only be granted to employees or subcontractors approved by the Department.

The Contractor agrees that under the terms of this contract they are responsible for ensuring all State of Nebraska approved subcontractors understand and agree to abide by the same terms and conditions defined in this contract.

The Contractor agrees that unique access logon accounts into the State of Nebraska's data systems will be assigned to an individual and that logon account may only be used by the individual to which it is originally assigned.

The Contractor agrees to access the State of Nebraska data systems only through State supplied CITRIX access and encryption technology.

The Contractor agrees to meet compliance requirements for all applicable State of Nebraska and federal physical, administrative, and electronic safeguard standards (as per safeguard publications listed below) and abide by State of Nebraska Information Technology Policies that govern the appropriate use of disclosure of privacy of and security of information provided by the State under the terms and conditions defined in this Contract.

11. SAFEGUARD PUBLICATIONS

- a. Health Information Portability Accountability Act of 1996 (HIPAA—privacy rule 45 CFR Part 160 and subparts A and B of Part 164)
- b. HIPPA – Security Rules 45 CFR Part 160 and subpart A and C Part 164
- c. Internal Revenue Service (IRS) Publication 1075
- d. Social Security Administration (SSA) – Computer Match Agreement
- e. DHHS Information Technology Policies

The Contractor agrees that the State of Nebraska or federal agencies with jurisdiction (i.e., OCR, IRS, SSA, DHHS, or State of Nebraska Auditor's Office) may conduct unannounced compliance inspections related to the physical administrative and electronic safeguards defined in the publications listed above.

The Contractor understands that it will be held responsible for all criminal and civil penalties for actions of the subcontractor as defined in the publications listed above.

The Contractor agrees to immediately notify the State of Nebraska's HIPPA privacy/security office of any suspected loss of, threat of, inappropriate disclosure of, unauthorized access of, or destruction of and/or corruption of Departmental information obtained from Departmental computer systems and agree to comply with incident reporting criteria as defined in their BAA and the publication listed above.

The Contractor agrees to immediately notify the State of Nebraska of any lost or stolen computer hardware that may have been used to access, process, or store State of Nebraska information or State computer systems.

Contractor agrees to comply with State of Nebraska Breach Notification Law Revised Statute 87-802 any time there is a suspected loss of personal information as defined in the revised statute.

The Contractor agrees that no State of Nebraska information will be stored on a personal device and all State of Nebraska information stored, processed, or otherwise transmitted will be performed on State of Nebraska resources accessed through CITRIX or through the State of Nebraska secure e-mail system.

12. WARRANTY

The Contractor shall be responsible for fixing defects with the EES solution that occur during the DDI phase of the contract and for six (6) months into the operation of the entire solution at no additional cost. The six month Warranty period starts after the deployment of the full scope of the project into production.

The Contractor shall provide the equipment needed to support its staff for the duration of the warranty. The Contractor shall be responsible for the root cause analysis activities to demonstrate whether a defect is related to the scope of functionality delivered by the Contractor.

The six-month Warranty period includes maintenance, modifications and services needed to correct any faults, failures, errors or other defects in system functionality , and underlying systems, delivered as part of the EES DDI effort. The six-month Warranty period also includes any maintenance, modifications and support needed to stabilize the system so that system performance falls within agreed upon Service Level Requirements. All such fixes are required to occur in a reasonable timeframe (depending on severity as defined in the table below) and shall be produced at no additional cost to the State of Nebraska.

Production Defect Severity	Response Time
Severity 1 - The EES no longer functions at all, or a System component is unavailable to more than 20% of active production users.	4 Hours
Severity 2 - Any defect that affects less than 20% of the EES functionality or less than 20% of active	8 Hours

production users.	
Severity 3 - The EES is able to function with a temporary workaround.	72 Hours

a. PROPOSAL REQUIREMENTS

The Bidder must provide a narrative overview of how the proposed solution will meet the EES requirements. The following response requirements pertaining to the Non-functional Requirements for the EES and must be responded by the Bidder.

Provide specific details of the proposed approach to meeting the State of Nebraska's requirements in each area. Also, include one or more diagrams where necessary that detail the proposed design and the relationships between key technical components.

Responses in this section must be highly-focused on the specific requirements and must not simply provide generic or marketing descriptions of technology or product capabilities.

- i. Describe the proposed approach to system warranty, including the type of warranty being offered. In addition, provide a summary of the Bidder's proposed strategy for supporting that warranty. Please address the following areas (at a minimum):

- a) Four-Year Software Warranty;
- b) Staff Resources and Supporting Equipment; and
- c) Meeting Service Level Requirements (SLRs)

13. SOFTWARE MAINTENANCE AND OPERATIONS (M&O)

A contract resulting from this Request for Proposal will be issued from the date of the award for six (6) years, with the option to renew for two (2) additional two-year renewal periods as mutually agreed upon by all parties. The initial period of the contract will be the Design, Development and Implementation (DDI) of the EES, with the expectation that it will be completed and approved by the State of Nebraska by December 31, 2015. The DDI period will be followed by a six-month Warranty period described in section XXXXX. The subsequent Base Maintenance and Operations Support (M&O) period shall be forty-two (42) months from the end of the Warranty period.

The Base M&O period, which begins at the end of the Warranty period, includes maintenance, modifications and services performed to correct faults, failures, errors or any other defects in system functionality, and underlying systems. In addition, Base M&O includes regular maintenance releases, systems modifications and/or services needed to keep the EES usable in a changed or changing environment.

Costs for this item must be clearly defined in the Cost Proposal. The Bidder shall communicate and document all software faults that are not a part of the scope of the original development effort during the M&S period.

At the expiration of the Base M&O period, the State of Nebraska may elect to enter optional renewal M&O Period(s). The scope of services covered under the optional renewal M&O Period(s) will be the same as the Base M&O period.

The Bidder agrees to propose two (2) two-year renewal M&O periods. The State of Nebraska shall be able to exercise its option to sign-up for the same services to those offered in the Base M&O period.

a. PROPOSAL REQUIREMENTS

This section defines Bidder requirements regarding the M&O Support approach (availability of staff, lead time for on-boarding of staff, staff due diligence process, knowledge transfer and documentation processes, etc.). The Bidder's proposal must provide information that can be used by the State of Nebraska to evaluate the Bidder's knowledge of, and intended approach to, the M&O Support requirements. This information must include at least the following:

- i. Describe the approach for providing ongoing maintenance and support services, including a flexible and scalable approach to providing the various types of personnel, including:
 - a) Architect;
 - b) Business Analyst/Functional Lead;
 - c) Communication/Network Specialist;
 - d) Database Administrator;
 - e) Help Desk Specialist;
 - f) Hardware Specialist;
 - g) Operations Lead/Manager;
 - h) Project Manager;
 - i) Programmer;
 - j) Security Systems Engineer; and
 - k) Systems Administrator.

- ii. Describe the approach to system operations support, including the levels of support offered and the process for requesting support. In addition, provide a summary of the strategy for maintaining and repairing the system. Please address the following areas (at a minimum):
 - a) Base Software Maintenance Period;
 - b) Incident and maintenance request reporting; and
 - c) Optional Extension Software Maintenance Period.

- iii. Describe the proposed approach to Defect Resolution and Solution Acceptance that shall incorporate methodologies and practices which will assist the State of Nebraska to successfully manage the enterprise's M&O lifecycle phase and shall address at least the following areas:
 - a) Support Model;
 - b) Triage Procedures;

- c) Tools;
- d) Roles and Responsibilities of support personnel;
- e) Release Management;
- f) Upgrades;
- g) Maintenance;
- h) On-going Operations;
- i) Customer Support;
- j) Specific support procedures for production;
- k) Deliverables;
- l) Capacity Management;
- m) Technology Refresh;
- n) Solution Security;
- o) Backup and Recovery;
- p) Disaster Recovery; and
- q) Defect/Issue Management.

iv. Describe the approach to Solution Administration that shall incorporate methodologies and practices which will assist the State of Nebraska to successfully administrate the EES and shall address at least the following areas:

- a) Archive/Purge of Log files;
- b) Version control capabilities;
- c) Logging and reporting for accessing errors and exceptions and unauthorized access;
- d) Public key/private key encryption Secure Socket Layer (SSL) certificates;
- e) Single sign-on capability and integration with Nebraska's Active Directory authentication and authorization;
- f) Admin tools and maintenance routines;
- g) Firewalls and DMZ for external access and remote access; and
- h) Administration of User Accounts, User Roles, User Groups etc.

v. Describe the approach to Solution Management that shall incorporate methodologies and practices which will assist the State of Nebraska to successfully manage the EES and shall address at least the following areas:

- a) Generate Administrative Alerts;
- b) Updates to Distributed components;
- c) SLR Monitoring;
- d) Remote support;
- e) Event Management and Monitoring using ITIL v3 or equivalent best practices; and
- f) Application Performance Monitoring.

14. HOSTING AND DISASTER RECOVERY SERVICES

The State of Nebraska has requirements for the Contractor to host the environments associated with the development phases of the EES project (DDI period), provide support services to long term development environments,

provide application support services for production environment(s), as well as provide disaster recovery site and technical services.

15. DEVELOPMENT ENVIRONMENTS

The Bidder must propose, provide and operate all required environments to support its proposal for the specification, design, development and implementation of the system including, but not limited to the following environments:

- a. Sandbox;
- b. Configuration/Development;
- c. Test;
- d. Quality Assurance;
- e. Production
- f. Training; and
- g. Disaster Recovery

These environments should be sized in accordance with planned use and be inclusive of all hardware, storage, networking, backup/restore, database, file system, monitors and other items as required to comprehensively support the development effort.

16. PRODUCTION ENVIRONMENT

The State of Nebraska may choose to use the services of the Contractor for the EES and EES Platform Production hosting. In advance of use, and in consideration of the State of Nebraska procurement, installation and commissioning cycles, the Bidder will specify all required environments to support their proposal for the ongoing specification, design, development of the project associated with subsequent cycles including, but not limited to the following environments:

- a. Full Production Operation;
- b. Production Replica for Fault Resiliency/Onsite Disaster Recovery Purposes and debugging/issue resolution purposes;
- c. Offsite Disaster Recovery Replication; and
- d. Other environments deemed necessary by the Contractor to support production operations.

These environments should be sized in accordance with planned use and be inclusive of all hardware, storage, networking, backup/restore, database, file system, monitors and other items as required to comprehensively support the ongoing development operation of the EES as well as to support the debugging or resolution of issues within the production environment.

17. DISASTER RECOVERY ENVIRONMENTS

The State of Nebraska may choose to use the services of the Contractor for the EES and the EES Platform Disaster Recovery site hosting. The Bidder must specify all required environments to support their proposal for the ongoing operation of the production system in the event of a disaster or outage condition at the selected computing center(s) associated with the following environments:

- a. Full Production Operation;

- b. Systems Development inclusive of then current code bases and associated data associated with the development effort; and
- c. Other environments deemed necessary by the Bidder to support production operations in the event of an outage or disaster.

These environments should be sized in accordance with planned use and be inclusive of all hardware, storage, networking, backup/restore, database, file system, monitors and other items as required to support limited development effort during the disaster or outage condition as well as to not adversely impact or jeopardize phases that are being developed.

Bidders must detail the proposed approach to system hosting and disaster recovery support services, including the type and levels of services offered and the process for requesting changes to the services. In addition, provide a summary of the Bidder's strategy for ensuring stable and uninterrupted operations. Specifically, describe any industry best practices employed (e.g. ITIL) or certifications achieved (e.g. ISO 20000) that would provide assurances that the Bidder shall be able to provide a consistent and high quality level of services.

The term for providing these environments shall commence upon execution of an agreement between the State of Nebraska and Contractor, and shall conclude upon the end of the term for this contract or upon notification from the State of Nebraska of the desire to host the system(s) elsewhere. During the term of this contract the off-site hardware used by the Contractor to provide the hosting service is and will remain the property of the contractor. The State of Nebraska will pay the Contractor an agreed upon fee for the use of the hosted environments.

Upon notification by the State of Nebraska of the availability or receipt of the hardware to support these environments in the State of Nebraska data center or an alternate data center, the Contractor shall install, configure and commission for ongoing use these environments within the State of Nebraska data center or alternate data center, if required.

Upon completion of this migration and direction from the State of Nebraska, the old non-production environment should be decommissioned by the Contractor, any Contractor hardware usage charges arising from the use of this equipment shall no longer be the responsibility of, nor billed to the State of Nebraska, and all State data or other artifacts resident on this hardware shall be destroyed or otherwise deleted.

RFP Revision 12/20/2013 Section IV. R – Value Added Options

Request for Proposal Number 4544Z1

RFP Section IV.R Value Added Options has been replaced and superseded in its entirety.

R. VALUE ADDED OPTIONS – REVISED 12/20/2013

The State of Nebraska has attempted to identify and incorporate the requirements necessary to successfully procure and install the Nebraska EES. We recognize that Bidders may have completed an installation in another state or for a commercial client. The Bidder is requested to convey any other considerations, products or services which they believe the State of Nebraska may have overlooked or not requested.

The Bidder may submit Value Added Options that have not been requested in this RFP, but are based on a Bidder's market knowledge and experience. The Value Added Options will not be evaluated to determine the EES Contractor; however the State of Nebraska may determine to contract for an option after the Contractor selection has been made. Bidders must include a cost for each Value Added Option in their Cost proposal.

1. PROPOSAL REQUIREMENT

a. Describe each Value Added Option. The description should include:

- i.** How the Value Added Option could enhance the EES;
- ii.** How the State of Nebraska could benefit from the Value Added Option;
- iii.** How the Medicaid eligibility effort could benefit from the Value Added Option; and
- iv.** Where and when the recommended Value Added Option(s) has been implemented.

b. Describe the EES' current mobility (e.g. smartphone, tablet, etc.) capabilities and/or plans for mobility in upcoming version(s).
