Search Type "V" vs "PP" 1

Search Type "V" vs "PP"

"V" vs. "PP" Address Book Search Types

When there is a vendor with both a "V" and a "PP" record, always choose the "PP" record for payment. When there is just a "V" record available, it is acceptable to process the payment using the "V" record.

There is a function within the Address Book record, called the factor special payee, that will allow you to create a purchase order using a "V" search type address book record and then automatically pay the vendor using an alternate "PP" address book record.

When should this function be used?

1. When a vendor requires that purchase orders are to be sent to one address - "V" search type and the vendor requires that the all payments/accounts receivables go to a different address - "PP" search type
2. When a vendor requires that the purchase orders are to be sent to one address - "V" search type and the payment of that purchase order will be over \$75,000 and an ACH payment will need to be processed - "PP" search type

The "V" record and the "PP" record need to be tied together manually. This function can only be completed by either State Accounting or NIS.

When a "V" record and a "PP" record should be tied together, please send an email to State Accounting via the following steps:

1. Navigate to the State Accounting website. (<http://www.das.state.ne.us/accounting/> (<http://www.das.state.ne.us/accounting/>))
2. Click Agency Contacts.
3. Scroll down to the Mail-in Database Links and click "Link V & PP Search Types."
