Total Value of Contracts Awarded to Vendors (Preference Given)	510,966.65

Explanation for Transparency in Government Procurement Act Report (Neb. Rev. Stat. §§ 73-601 to 73-605):

Values of Commodity Contracts are placeholder amounts, as required by the State's accounting system, as currently designed by the manufacturer, and do not represent actual expenditures, nor do they actually commit the State to future expenditures.

The value of a Service Contract reflects the entire value over the life of the contract and may also include optional contract renewal periods or optional services, and thus may not represent actual total expenditures.

The number of contracts awarded to vendors with a preference given in accordance with 73.101.01 represents the number of contracts awarded to bidders who were given preference and does not include contracts where the preference was only applied, but awarded to a non-preferred bidder.

Contracts may span multiple fiscal years, thus the value of any contract is not necessarily the value for any one fiscal year.
