

COMPLETED COST PROPOSAL TABLES

The summary of fees is included herein for your review.

Fees listed herein are inclusive of the following:

- Project Kickoff Meeting and Project Status Meetings (as needed)
- Sample Kits
- Pre-Labeled Sample Containers
- Sample Kit Delivery or Pick Up (pre-scheduled)
- Sample Pick Up or Drop Off (pre-scheduled)
- QC Level II (batch QC)
- Reports and Invoices via PDF

COST PROPOSAL – TABLE 1
Deliverables**

CORE TEST ANALYTES

Bidder's Company Name: Eurofins Eaton Analytical, LLC

For each analyte/method listed, the bidder must complete the following columns: Contractors Report Level, Contractors Method Used, Contractor Routine Turnaround Time, Cost per Analyte (EA), and any applicable comments. Costs quoted shall be firm and fixed, throughout the life of the initial contract term.

**Bidder must complete all fields in Table 1 and submit with the proposal response. Failure to submit a completed Table 1 will result in a rejection of the bidder's proposal response. Must use an EPA drinking water approved methodology **

Table 1 values are the methods and RLs currently being used. The State will consider EPA-approved alternatives for all tests in Table 1 EXCEPT the bromate method and RL of 1.0 ug/L.

*Unless indicated with subcontractor notation, analyses performed by contractor

All Isotopic Uranium results must include the total combined uranium activity in pCi/L from the individual uranium isotopes (U-234, U-235, U-238), U-234 and U-238 activities as well as U-234/U238 ratio must be reported so that a unique activity to mass conversion factor can be used to calculate uranium mass concentration in ug/L. All uranium data must include precision data (e.g. 2 sigma statistic).

Water Quality Tests for a New Well are: Gross Alpha, Radium-226, Radium-228, Isotopic Uranium, Asbestos, Endothall, Dioxin and TOC on each sample
Estimate 25 New Wells per year.

Total numbers of samples of each method is impossible to predict. The DHHS NPHEL does most of the routine testing.

The contracted laboratory would provide backup on all routine compliance monitoring and special requests by clients.

All Isotopic Uranium results must include the total combined uranium activity in pCi/L from the individual uranium isotopes (e.g., U-234, U-235, U-238), U-234 and U-238 activities as well as U-234/U238 ratio need to be reported so that a unique activity to mass conversion factor can be used to calculate uranium mass concentration in ug/L. All uranium data must include precision data (e.g. 2 sigma statistic).

Water Quality Tests for a New Well are: Gross Alpha, Radium-226, Radium-228, Isotopic Uranium, Asbestos, Endothall, Dioxin and TOC on each sample Estimate 25 New Wells per year.

All non-drinking water testing requests would be sent to the contracted laboratory such as EPA 625, RCRA metals, oil and grease, etc.
