Comments				<p>Section IV, subsection H: Vavles to & from sample tube are 1/4" stainless ball valves. This size valve works very well in feeding brine samples into & out of the sampler tube at a controlled rate</p> <p>Section IV, subsection J: Four total float switches: Two in lower brine holding tank (one to control brine pump & one control electric water valve; & two in upper hopple (one inidicate "time to clean" & other shuts electric water valve off). Fuctionallity the same.</p> <p>Section IV, subsection N: We can provide 20 systems or more per year.</p> <p>Section IV, subsection P: Delivery is running approx. 8 to 9 months from date of orders, but will be 80 days after July 2022.</p>
