B. Corporate Overview

Midwest Assistance Program (MAP), Inc. is a not-for-profit, technical assistance and training organization that serves the nine states of Nebraska, Iowa, Kansas, Minnesota, Missouri, Montana, North Dakota, South Dakota, and Wyoming. MAP has provided on-site technical assistance services and training to rural and tribal communities for over 40 years. This assistance and training have encompassed all forms of operational compliance, and technical, managerial, and financial capacity development related to water and wastewater systems. MAP will bring to this project the oversight of professional, competent managers, technical expertise of Nebraska based technical assistance providers (currently 4), and a national network of partners and resources.

Over the last 40 plus years, MAP has been granted and has successfully managed and serviced many drinking water contracts; including ones similar in scope of work identified for this solicitation. We are very familiar with the small public water systems in Nebraska and the challenges they face, as we currently provide TA and training under three federal grants, a NE DEE state contract and a Community College contract which we annually service/train and impact an average of 300-plus systems in Nebraska alone.

The Midwest Assistance Program has a team of leaders that always put the reputation and integrity of our industry above all else. MAP, Inc is truly an independent 3rd party organization which allows us to educate and support communities without having ties that could be affected adversely or have conflicts of interest. We have a multi-tiered Management Team that ensures all work is professional, efficient, competent and relevant to the scope of programs that we are awarded to implement. Almost 80% of our program funding is for direct implementation of programs by staff in the field and any resources they need to successfully accomplish the deliverables and intent of the programs. Utilizing the decades of program management and oversight, MAP is adept at maximizing program funding for production, results, and leveraging additional funds for the communities we serve. Our staff's diversity mixed with the numerous programs we manage allows us to maximize the not only the scope of work we can accomplish, but the number of systems we impact and to the degree of impact we can make.

MAP has always accomplished and in most cases exceeded the goals and deliverables of our grants and contracts, which has led to us sustaining seven national environmental grants, one regional EPA contract, four state contracts and one Community College contract for well over ten years. We additionally have been awarded three new state contracts in the past three years. We have always received high marks on evaluations of our performance and maintain a highly professional reputation known for being responsible and accountable. Meeting the specified

minimum requirements and timeline for this proposal will not be an issue. MAP continues to make drinking water and waste water its primary focus, and has never veered from its core skills, passion and roots.

8. Summary of Bidder's Corporate Experience

Three projects below describe MAP's experience with projects similar in size, scope and complexity to the activity requested for this solicitation.

1) MAP currently services a contract with Nebraska to provide technical, financial and managerial technical assistance (TA) for Nebraska public water systems as the primary contractor (no subcontracting utilized). The contract period started May 23, 2018 and will be completed as scheduled on July 1, 2022. MAP provides TA monthly to Systems referred by Nebraska Department of Environment and Energy per a list of Systems with noted compliance deficiencies. MAP is required to average 25 contacts per month (300 annual minimum), of which a minimum of 15 have to be on-site contacts. Contact purposes include, but is not limited to the review of a public water system's financial management and current user rates and proposing changes (regardless of whether the proposals are implemented by the public water system entity); work with public water systems in procurement of engineering services; work with public water systems to complete/revise pre-applications to the Water/Wastewater Advisory Committee; work with public water systems with income surveys for loan/grant applications; work with public water systems with managerial policies and procedures; work with NPWS that are on the Enforcement Targeting Tool (ETT) list, provided by the Department); Contractor is allowed contact credit for completion of a water line leak detection/correlation for a Nebraska public water system, provided the AWWA Leak Detection Survey Daily Log is used, and a copy of the log is included with the monthly report; and any other technical, financial and/or managerial assistance needed for a public water system to be sustainable, subject to the Department's approval. Management of this contract required monthly prioritization of contacts and efficient travel plans, as well as the review and submission of monthly reports. The monthly report provided details on what system was contacted, POC for system that was contact, manner utilized to make contact (phone, email, in-person, or combination), the deficiency being addressed, what TA was provided and whether deficiency was resolved or follow-up actions are needed. Staff additionally attended bi-monthly meetings to review TA provided, provide feedback on challenges systems/operators are facing as well as patterns identified, recommendations for policy changes, and agency priorities. MAP will complete this contract exceeding requirements, and with no known deficiencies or issues identified. The initial three-year award was completed and a one-year renewal was awarded. The first three years had a budget of \$117,500 and the one-year renewal awarded \$120,000.

Point of contact for this contract is Sue Dempsey, NE DEE State Administrator for Drinking Water and Groundwater Division at 402-471-0510 / Sue.Dempsey@nebraska.gov.

2) MAP Inc. services an EPA Drinking water grant as part of a national Rural Communities Assistance Partnership (RCAP) grant as the primary contractor (no subcontracting utilized). We have been awarded EPA Drinking Water grants since 2014, with the current grant running from October 1, 2021 through March 30, 2023. This grant focuses on the technical, financial and managerial capacity development to ensure compliance with the Safe Drinking Water Act (SDWA). TA MAP's training approach utilizes proven adult-education techniques and incorporates strategies that will increase knowledge retention. Building on the experience of previous awards and a history of innovation in providing training, the MAP team implements the following adult-education techniques: 1) targeted training based on primacy agency collaboration; 2) training that includes networking between participants and engagement with the content; 3) opportunities for follow-up technical assistance after training; 4) blended learning programs that combine self-paced eLearning and instructor-led learning; and 5) use of innovative training methods (eLearning, webinars, video, podcasts, etc.). MAP trainers utilize an extensive curriculum library and adapt materials developed by EPA and others as needed including EPA's Partnership Training Toolbox and EPA/USDA's Workshop in a Box to move small systems toward compliance and sustainability including encouraging water system partnerships. MAP develops and updates training materials as needed, to ensure relevant trainings. Trainings must be at least four hours in duration. MAP's award amount for this grant is \$785,000. The Nebraska point of contact for this grant is NE DEE State Administrator for Drinking Water and Groundwater Division at 402-471-0510.

3) MAP Inc. serviced an EPA Region 5 Tribal Drinking Water contract in Minnesota and Wisconsin to provide on-site training and TA to tribal operation staff to maintain and enhance compliance with the Safe Drinking Water Act as the primary contractor (no subcontracting utilized). The contract was effective August 23, 2016 and ended February 22, 2022. MAP, Inc worked this program under previous contracts as well, dating back to 2004, and currently was awarded a new contract effective February 1, 2022 through January 31, 2026. Types of assistance provided included administering sanitary surveys, sanitary survey deficiency follow-ups, operator training, lead and copper sampling and monitoring training, site sampling plans, service line inventories, household plumbing surveys, asset management, GIS services for asset management plans/mapping/site sampling plans, emergency response plans, operations and maintenance plans, TMF capacity development, monitoring and reporting, cross connection control surveys, and ground water protection plans. There were 41 tribal systems supported under this contract. Monthly reporting was required, which included phone logs and site visit reports. MAP staff developed a Program Manual during this contract that provided TA guidance, reporting formats, and finished output templates that benefitted both the systems and TA providers. This manual was key in minimizing time spent on reporting and administrative tasks, while optimizing organization, time management and uniformity. Payment was not received until tasks were completed and products/outputs approved by Region 5 personnel. Management of this contract required monthly calls with EPA Region 5 and significant oversight for the TA and reporting requirements. This contract was completed to standard and on time, with no issues or deficiencies identified. The five-year budget was \$2,119,000 and was met

within the contract period. EPA Region 5 point of contact for this contract was Mostafa Nouredin at 312-886-0259 / noureldin.mostafa@epa.gov.

Midwest Assistance Program

The City of Valentine Water Department would like to thank the Midwest Assistance Program and Marty Ostransky for assistance and education at our water department here in Valentine. Marty has assisted us in getting back into compliance after sanitary surveys and lead and copper sample site plans. He recently assisted us when we lost pressure in our water system. He educated us on how to set up and calibrate our chlorinator's and how to sample for chlorine residuals in our system. With his help we were removed from the boil water notice in less than one week. He is always available to assist us with advice and education on matters that come up during our work here in Valentine.

Once again, we would like to thank the Midwest Assistance Program and Marty at Ostransky for the assistance. It is truly appreciated.

Thanks

Justen Elliott

ATTENTION: US EPA REGION 5

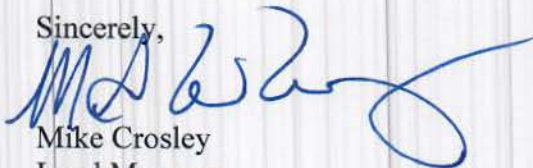

We are writing this letter to express our gratitude and immense satisfaction with the technical assistance provided to us by Midwest Assistance Program (MAP) staff. This technical assistance and training received has significantly increased our technical, financial and managerial capacity in regards to our drinking water utility and operations sustainment. With the assistance received, we have addressed compliance concerns, updated policies/practices/procedures, and have improved tools and knowledge for daily operations and management.

Having an organization like MAP to utilize is a tremendous asset, and absolute necessity. Our ability to operate, comply regulatorily, and ensure our community sustains a healthy environment is more dependent on organizations like MAP with each passing day. Key aspects of our operation that MAP has assisted with is as follows:

- **Organized workshops to identify issues with water quality and quantity in the Santee area**
- **Assisted with financial and managerial aspects towards future water projects**
- **Facilitated between federal organizations as well as state and local agencies**
- **Conducted research and feedback to the community**
- **Identifying solutions to Santee water quality issues**

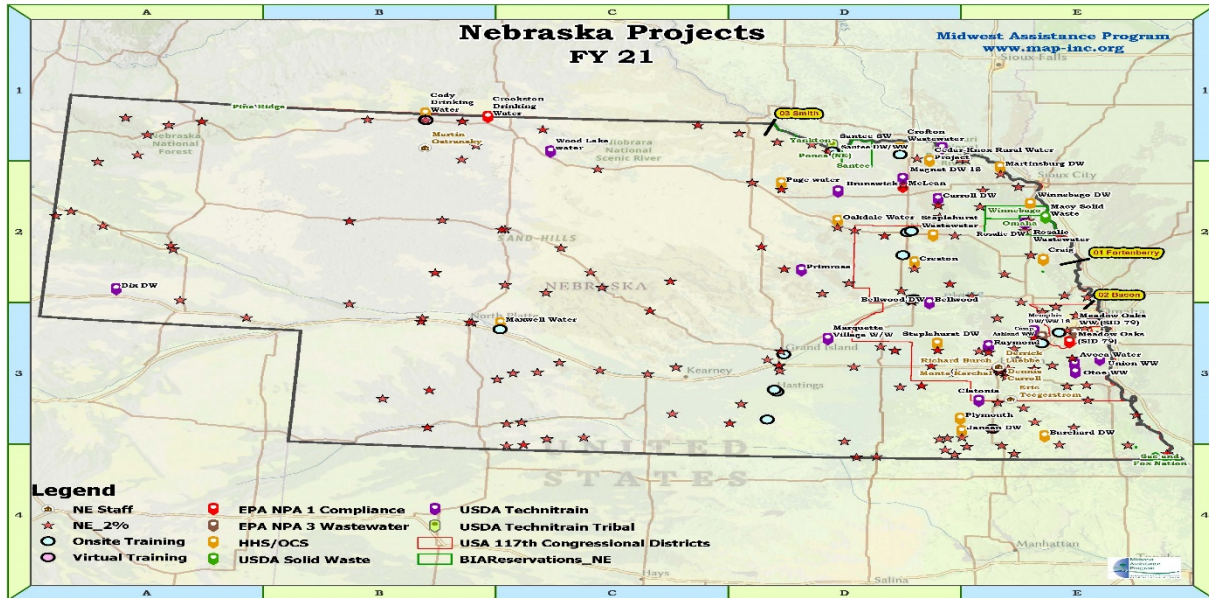

Please, feel free to notify us if we can provide anything to further demonstrate our support. We sincerely support MAP's efforts and the funding for technical assistance programs.

Sincerely,

Mike Crosley

Drinking Water State Revolving Fund (SRF) Program

Nebraska Department of Environment and Energy 2% SRF State Contract

Midwest Assistance Program (MAP)

Program Manager: Dennis Carroll

BACKGROUND

The primary purpose the Nebraska Department of Environment and Energy (NDEE) SRF 2% contract is to provide technical, financial and/or managerial assistance to board/council members, clerks, and operators of Nebraska's public water systems. Once identified by NDEE, MAP Staff assists communities in achieving/maintaining adequate technical, financial and/or managerial capacity, as well as correct compliance deficiencies.

THE CHALLENGE

Rural Nebraskans are proud people and don't necessarily like to ask for assistance. With dilapidated infrastructure and a lack of population to financially support the water enterprise, communities find themselves needing more assistance. This State contract allows MAP the opportunity to assist with educating and finding resources for the city councils, clerks and operators. This Third-Party approach is very beneficial in identifying technical, financial, and managerial deficiencies and working with the community leaders to resolve them.

" RCAP is a tremendous asset to small water systems like ours, and I know that other communities would benefit greatly from their expertise and assistance." - Board Chair Shawn Breckbill

THE APPROACH & SOLUTION

The services of this contract are delivered in-office and/or on-site at public water systems serving 10,000 or fewer persons in Nebraska. There are approximately 1300 public water systems in Nebraska serving approximately 10,000 residents. Public water systems identified monthly as needing assistance are communicated to MAP on the NDEE's most current Priority Assistance List. MAP then makes contact with the listed systems, and provides them the education, resources and/or assistance in resolving their listed deficiencies. In some cases these systems are taken on as a long-term project under other funding programs.

THE IMPACT

MAP staff make an average of 25 contacts and at a minimum 15 site visits per month, which equates to roughly to 300 systems per year receiving technical assistance under this program. With MAP assistance, Nebraska communities are able to stay in compliance with EPA regulations. MAP Staff also assists communities in achieving/maintaining adequate technical, financial and/or managerial capacity through onsite visits, virtual trainings, and consultation.

Training and Technical Assistance Enables Small Water Systems to Provide Safe Drinking Water

Meadow Oaks (Sarpy County Sanitary District #79), NE

Population: 300

Households: 68

Median Household Income: \$63,229

Nebraska's Second Congressional DIST

Region / Funder: MAP / EPA

Project Manager: Richard J. Burch

BACKGROUND

Midwest Assistance Program (MAP) has focused on working with the Meadow Oaks Board of Directors and their Engineers to take actions necessary for securing a new source of drinking water that provides the quality and quantity needed by the community. The Meadow Oaks community currently has two source wells that are located in close proximity to the Platter River. Their two source wells are shallow wells that are under the influence of groundwater and have tested positive for several contaminants that exceed the EPA's Secondary Water Quality standards and have a limited capacity due to their inability to recharge at rates needed to support the quantity needed for water customers.

THE CHALLENGE

MAP Staff is working closely with the Board of Directors to secure a site for a new source well. Setbacks from current wells (irrigation, private, and geothermal) have limited the possibilities for new locations. Additionally, easements are a challenge since land owners are concerned about their own ability to produce safe drinking water. Finally, low/no interest loan options are the preferred method to fund the water project.

“RCAP is a tremendous asset to small water systems like ours, and I know that other communities would benefit greatly from their expertise and assistance.”

- Shawn Brechbill, the Board Chair

THE APPROACH & SOLUTION

While assisting with plans for a viable solution, MAP Staff has provided a rate analysis showing future revenue requirements as well as liaison with engineering experts to ensure the needs and concerns of the Meadow Oaks leadership are up front in all planning. MAP Staff has conducted extensive training for the Board Members on roles & responsibilities, bookkeeping, record keeping, budgeting, asset management, compliance, and rate setting. MAP Staff has also made assistance in securing possible financing through State Revolving Funds a high priority. As soon as an agreement is reached for the purchase of a plot of ground, a test well will be drilled and the determination on quality and quantity of safe drinking water will be made. Favorable results will then lead to the construction necessary to connect this new source to the Meadow Oaks drinking water distribution system.

THE IMPACT

With the construction phase of the project drawing closer, the residents of the Meadow Oaks community are anxious to achieve a new and deeper source well to serve as the primary source for their distribution system. In doing so, the concerns they currently have concerning water quality will be eliminated, and they can then focus on future economic growth in the Sanitary Improvement District.

Problem: Out of Compliance with State and Federal regulations due to technical, managerial, and financial deficiencies.

Solution: Assist Village officials and the operator to get in compliance while teaching them to maintain this status on their own.

Alvo, Nebraska

Alvo is a small community in Eastern Nebraska just South of Interstate 80. It is not far from the state capital, Lincoln, or other larger communities making it a small quiet place to live with a reasonable work commute.

The community had troubles in the past with employees that put the water system in a tough spot. They lost a large amount of money and had multiple deficiencies from the regulatory agency that needed to be addressed.

MAP faced many issues while assisting the community one being Village Board turnover. Working to train Board members was needed to ensure proper management oversight was being conducted. MAP also worked extensively with the operator to better operate the system and learn how to keep the necessary records.

With the assistance from MAP, the community was able to have better management skills, eliminate deficiencies from the state, stay up to date on maintenance, and better operate the system. They will now be more self-sufficient moving forward.

MAP helps revitalize small communities and tribal nations in nine states. MAP is a member of the Rural Community Assistance Partnership. RCAP is a national network of regional nonprofit organizations that provide comprehensive, on-site technical assistance and training to help small, rural communities address their drinking water, wastewater, and other community development needs.

Report on the Financial Statements

We have audited the accompanying financial statements of Midwest Assistance Program, Inc., which comprise the statements of financial position as of September 30, 2021 and 2020, and the related statements of activities and changes in net assets, functional expenses, and cash flows for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Board of Directors
Midwest Assistance Program, Inc.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Midwest Assistance Program, Inc. as of September 30, 2021 and 2020, and the changes in its net assets and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matters

Other Information – Schedule of Expenditures of Federal Awards

Our audit was conducted for the purpose of forming an opinion on the financial statements as a whole. The schedule of expenditures of federal awards, as required by Title 2 U.S. Code of Federal Regulations Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* is presented for purposes of additional analysis and is not a required part of the financial statements. The schedule of expenditures of federal awards is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. Such information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated, in all material respects, in relation to the financial statements as a whole.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued our report dated February 14, 2022 on our consideration of Midwest Assistance Program, Inc.'s internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of Midwest Assistance Program, Inc.'s internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering Midwest Assistance Program, Inc.'s internal control over financial reporting and compliance.

**MIDWEST ASSISTANCE PROGRAM, INC.
NOTES TO FINANCIAL STATEMENTS
SEPTEMBER 30, 2021 AND 2020**

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Midwest Assistance Program, Inc. (the Organization) is a nonprofit corporation, organized in 1979 in the state of Nebraska, to provide technical and other consultative services and assistance to public, private, profit-oriented, and nonprofit sponsors of community improvements in Iowa, Kansas, Minnesota, Missouri, Montana, Nebraska, North Dakota, South Dakota, and Wyoming. The Organization receives funding from the Office of Community Services (OCS) of the U.S. Department of Health and Human Services (HHS), the U.S. Environmental Protection Agency (EPA), the Rural Utilities Service (RUS) of the U.S. Department of Agriculture, and various other governmental agencies and private foundations.

Net Assets

Net assets, revenues, gains, and losses are classified based on the existence or absence of donor or grantor imposed restrictions. Accordingly, net assets and changes therein are classified and reported as follows:

Net Assets Without Donor Restrictions – Net assets available for use in general operations and not subject to donor (or certain grantor) restrictions. The governing board has not designated any net assets from net assets without donor restrictions.

Net Assets With Donor Restrictions – Net assets subject to donor- (or certain grantor-) imposed restrictions. Some donor-imposed restrictions are temporary in nature, such as those that will be met by the passage of time or other events specified by the donor. Other donor-imposed restrictions are perpetual in nature, where the donor stipulates that resources be maintained in perpetuity. Gifts of long-lived assets and gifts of cash restricted for the acquisition of long-lived assets are recognized as revenue when the assets are placed in service. Donor-imposed restrictions are released when a restriction expires, that is, when the stipulated time has elapsed, when the stipulated purpose for which the resource was restricted has been fulfilled, or both.

Cash and Cash Equivalents

Cash and cash equivalents consist of demand and savings deposits.

Grants, Contracts, and Accounts Receivables

Accounts receivable are stated at net realizable value. The Organization's policy is to recognize accounts receivable based on services provided during the fiscal year. The Organization reviews receivables for collectibility, and when an amount is not deemed collectible, it is written off to a related allowance account. Any allowance for doubtful accounts is estimated by management based on bad debt history from previous years and the aging of accounts receivable balances. Management has evaluated the collectibility of amounts and deems all amounts to be collectible at September 30, 2021 and 2020. At September 30, 2021 and 2020, all grants and contracts accounts receivable were due within one year.

**MIDWEST ASSISTANCE PROGRAM, INC.
NOTES TO FINANCIAL STATEMENTS
SEPTEMBER 30, 2021 AND 2020**

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Property and Equipment

Property and equipment is recorded at cost or at fair value if donated or purchased. The Organization follows a policy that only items costing greater than \$5,000 and having a useful life over one year are capitalized. Depreciation is provided on the straight-line method over the estimated useful lives of the respective assets. Maintenance and repairs are charged to expense as incurred; major renewals and betterments are capitalized. When items of equipment are sold or retired, the related cost and accumulated depreciation are removed from the accounts, and any gain or loss is included in the results of operations.

Equipment acquired with federal grant funds is considered to be owned by the Organization while used in the program for which it was purchased or in other authorized programs; however, the United States has a reversionary interest in the property. Its disposition, along with ownership of any proceeds there from, is subject to federal regulations.

Grants and Contract Revenue

The Organization receives a significant amount of revenue in the form of grants. The Organization recognizes grant funds received or receivable as revenue to the extent that qualifying allowable expenses have been incurred and barriers have been overcome, as such, the donor restriction is met prior to the revenue being recognized causing it to be considered revenue without donor restriction. Any funds received but not yet earned are shown as deferred revenue.

Expenditures under government contracts are subject to review by the granting authority. To the extent, if any, that such a review reduces expenditures allowable under these contracts, the Organization will record such disallowance at the time the final assessment is made.

Functional Allocation of Expense

Salaries and related expenses are allocated based on employees and management direct time spent on program or support activities or the best estimate of time spent. Rents are allocated based on direct program or support service usage. Expenses, other than salaries and related expense, which are not directly identifiable by program or support services, are allocated based on the best estimates of management.

Direct costs which benefit more than one program are allocated to the various programs on the basis of the relative benefits received by each program; allocation methods comply with the requirements and limitations of the underlying grants.

Indirect or overhead costs are charged to programs through an indirect cost rate approved annually by the U.S. Department of Health and Human Services.

Use of Estimates

Management uses estimates and assumptions in preparing financial statements in accordance with accounting principles generally accepted in the United States of America. Those estimates and assumptions affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities, and the reported revenues and expenses. Significant estimates incorporated into the Organization's financial statements include the estimated lives of depreciable assets, and the allocation incorporated into the statements for functional expenses. Actual results could vary from the estimates that were used.

Subsequent Events

MIDWEST ASSISTANCE PROGRAM, INC.
NOTES TO SCHEDULE OF EXPENDITURES OF FEDERAL AWARDS
SEPTEMBER 30, 2021 AND 2020

NOTE 1 BASIS OF PRESENTATION

The accompanying schedule of expenditures of federal awards (the Schedule) includes the federal award activity of Midwest Assistance Program, Inc. (the Organization) under programs of the federal government for the year ended September 30, 2021. The information in this Schedule is presented in accordance with the requirements of 2 CFR Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance). Because the Schedule presents only a selected portion of the operations of Midwest Assistance Program, Inc., it is not intended to and does not present the financial position, changes in net assets, or cash flows of Midwest Assistance Program, Inc.

NOTE 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Expenditures reported on the Schedule are reported on the accrual basis of accounting. Such expenditures are recognized following the cost principles contained in the Uniform Guidance, wherein certain types of expenditures are not allowable or are limited as to reimbursement. Negative amounts shown on the Schedule represent adjustments or credits made in the normal course of business to amounts reported as expenditures in prior years. Midwest Assistance Program, Inc. has a federally negotiated indirect cost rate and therefore has not elected to use the 10 percent de minimis indirect cost rate as allowed under the Uniform Guidance.

NOTE 3 SUBRECIPIENTS

The purpose of the schedule of expenditures of federal awards is to present a summary of the Organization's federal grant activity. The Organization did not provide any federal awards to subrecipients for the year ended September 30, 2021.

**INDEPENDENT AUDITORS' REPORT ON INTERNAL CONTROL OVER
FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS
BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED
IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS***

Board of Directors
Midwest Assistance Program, Inc.
Maryville, Missouri

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of Midwest Assistance Program, Inc., which comprise the statement of financial position as of September 30, 2021, and the related statements of activities and changes in net assets, functional expenses, and cash flows for the year then ended, and the related notes to the financial statements, and have issued our report thereon dated February 14, 2022.

Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered Midwest Assistance Program, Inc.'s internal control over financial reporting (internal control) as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of Midwest Assistance Program, Inc.'s internal control. Accordingly, we do not express an opinion on the effectiveness of Midwest Assistance Program, Inc.'s internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that were not identified. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Board of Directors
Midwest Assistance Program, Inc.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether Midwest Assistance Program, Inc.'s financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the financial statements. However, providing an opinion on compliance with those provisions was not an objective of our audit and, accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the result of that testing, and not to provide an opinion on the effectiveness of Midwest Assistance Program, Inc.'s internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering Midwest Assistance Program, Inc.'s internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

**INDEPENDENT AUDITORS' REPORT ON COMPLIANCE FOR EACH MAJOR
FEDERAL PROGRAM AND REPORT ON INTERNAL CONTROL OVER
COMPLIANCE REQUIRED BY THE UNIFORM GUIDANCE**

Board of Directors
Midwest Assistance Program, Inc.
Maryville, Missouri

Report on Compliance for Each Major Federal Program

We have audited Midwest Assistance Program, Inc.'s compliance with the types of compliance requirements described in the *OMB Compliance Supplement* that could have a direct and material effect on each of Midwest Assistance Program, Inc.'s major federal programs for the year ended September 30, 2021. Midwest Assistance Program, Inc.'s major federal programs are identified in the summary of auditors' results section of the accompanying schedule of findings and questioned costs.

Management's Responsibility

Management is responsible for compliance with federal statutes, regulations, and the terms and conditions of its federal awards applicable to its federal programs.

Auditors' Responsibility

Our responsibility is to express an opinion on compliance for each of Midwest Assistance Program, Inc.'s major federal programs based on our audit of the types of compliance requirements referred to above. We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and the audit requirements of Title 2 U.S. Code of Federal Regulations Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance). Those standards and the Uniform Guidance require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about Midwest Assistance Program, Inc.'s compliance with those requirements and performing such other procedures as we considered necessary in the circumstances.

We believe that our audit provides a reasonable basis for our opinion on compliance for each major federal program. However, our audit does not provide a legal determination of Midwest Assistance Program, Inc.'s compliance.

Opinion on Each Major Federal Programs

In our opinion, Midwest Assistance Program, Inc. complied, in all material respects, with the types of compliance requirements referred to above that could have a direct and material effect on each of its major federal programs for the year ended September 30, 2021.

Report on Internal Control Over Compliance

Management of Midwest Assistance Program, Inc. is responsible for establishing and maintaining effective internal control over compliance with the types of compliance requirements referred to above. In planning and performing our audit of compliance, we considered Midwest Assistance Program, Inc.'s internal control over compliance with the types of requirements that could have a direct and material effect on each major federal program to determine the auditing procedures that are appropriate in the circumstances for the purpose of expressing an opinion on compliance for each major federal program and to test and report on internal control over compliance in accordance with the Uniform Guidance, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of Midwest Assistance Program, Inc.'s internal control over compliance.

A deficiency in internal control over compliance exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of a federal program on a timely basis. A *material weakness in internal control over compliance* is a deficiency, or a combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis. A *significant deficiency in internal control over compliance* is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over compliance was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that were not identified. We did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

The purpose of this report on internal control over compliance is solely to describe the scope of our testing of internal control over compliance and the results of that testing based on the requirements of the Uniform Guidance. Accordingly, this report is not suitable for any other purpose.

financial statements, business paper and computer files, client or employee lists, and any other information pertaining to the business of MAP or any of its clients, consultants, licensees, or affiliates acquired during their employment, unless it is determined to be necessary in the ordinary course of performing their duties as an employee of MAP.

If in doubt as to whether any program, material or other information is confidential, employees must ask their supervisor prior to such disclosure. Failure to comply may result in corrective action up to and including termination of employment.

Upon termination of employment, employees will be required to return all materials and information and any copies of such materials to their supervisor.

Internal Relationships

MAP recognizes that involvement in a romantic relationship may compromise or create a perception that compromises a member of management's ability to perform his/her job. This includes the internal relationships between members of MAP's management and their subordinates. Any involvement of a romantic nature between an officer, director, manager, or supervisor of the organization and anyone he/she either directly or indirectly supervises is strongly discouraged. This also includes relationships between employees and any MAP external customers, clients, suppliers, vendors, or individuals who work for other organizations with whom we partner.

Should such a relationship develop, it must be disclosed as follows: The highest member of management directly involved in an internal relationship must disclose it to his/her supervisor or the Human Resources Coordinator. The employee directly involved in an external relationship must disclose to his/her supervisor or the Human Resources Coordinator. An assessment of the situation and recommendation to resolve any actual or potential conflict of interest or impropriety created by the relationship will be made. The recommendation may require a transfer to another position. Failure to make the disclosure or comply with a recommendation to resolve any conflict with this policy can result in corrective action up to and including termination of employment.

Drug & Alcohol/Substance Abuse and Illegal Drug Use

MAP is committed to providing a safe, comfortable and productive work environment for its employees. We recognize that employees who abuse drugs or alcohol at work or who appear at work under the influence of alcohol or illegal drugs harm both themselves and the work environment. As a result, we prohibit employees from doing the following:

- Appearing at work under the influence of alcohol or illegal drugs.
- Conducting MAP business while under the influence of alcohol or illegal drugs (whether or not the employee is actually on work premises at the time).
- Using alcohol or illegal drugs on the worksite.
- Possessing, buying, selling, or distributing alcohol or illegal drugs on the worksite and possessing, buying, selling, or distributing alcohol or illegal drugs

while conducting MAP business (whether or not the employee is actually on work premises at the time).

MAP will adhere to federal law concerning illegal drug use regardless of any current state law permitting the use of the drug. Illegal drug use includes more than just outlawed drugs, such as marijuana, cocaine, or heroin. It also includes the misuse of otherwise legal prescription and over-the-counter drugs. This policy covers times when employees are on-call but are not working and times when employees are driving MAP vehicles or using MAP equipment. Employees who violate this policy may face disciplinary action up to and including termination.

As part of our efforts to keep this workplace safe and free of illegal drug use, we conduct random and intermittent drug tests in accordance of federal procurement guidelines. In addition, we may ask any employee regardless of job responsibility to submit to a drug test in the following circumstances:

- When we reasonably suspect that the employee is under the influence of alcohol or illegal drugs.
- When we suspect that the employee has been involved in the sale, purchase, use, or distribution of alcohol or illegal drugs on the work site or while performing job duties.
- When the employee has been involved in a workplace accident or incident.
- When an employee has been involved in an accident or incident off-site but while on MAP business.
- When the employee has violated a safety rule.

Employees who violate this policy will be subject to corrective action up to and including termination of employment.

Inclement Weather or Travel Issues

If weather conditions or traffic conditions make it impossible for an employee on travel status to get to a location where they are to be working or if they will be arriving late or need to leave early, employees must contact their supervisor and all affected parties as soon as possible in order to make alternative arrangements. Field staff must advise their supervisor if inclement weather conditions or traffic conditions are making it impossible to get to their office or a scheduled appointment.

The closing of the MAP Central Office due to inclement weather conditions is at the ED's discretion. If this occurs, employees assigned to work at that office will be notified of the closing in accordance with established procedures and have the option of working from their homes.

Employee Dress Code

Employees are expected to dress appropriate to the work they do on any given day. Employees are to present a professional business image and attitude working with clients and when representing MAP to the public.
