**STATE OF MINNESOTA
DEPARTMENT OF ADMINISTRATION
MINNESOTA MULTISTATE CONTRACTING ALLIANCE FOR PHARMACY**

This contract is between the State of Minnesota, acting through its Commissioner of Administration on behalf of the Minnesota Multistate Contracting Alliance for Pharmacy (“MMCAP”) and Concordance Healthcare Solutions, LLC (“Concordance”), located at 3901 West 34th St. North, Sioux Falls, South Dakota 57107. Concordance is made up of the following legacy companies Kreisers, Inc.; Seneca Medical; MMS, A Medical Supply Co.; and Rockwell Medical.

ARTICLE 1: RECITALS

2.2. Member Participation Agreements (MPAs)

In order to access this Contract some members require jurisdiction-specific additional paperwork or contract language. Vendor must not sign any member documents without prior MMCAP review and approval. If needed, MMCAP will issue a Member-requested Participation Agreement (MPA) that will be amended into to this Contract. No other mechanism of modifying or “attaching to” MMCAP contracts is authorized. The MPA, which will only apply to the requesting Member and must be signed in the following order: Member, Vendor, then MMCAP. Vendor is not required to agree to any additional

MMCAP Contract No. MMS18008

terms; however, by not agreeing to the MPA Vendor may be precluded from doing business with that Member. In the event a Member requires a fee be added to the Contract price (e.g., member levied procurement fee or system use fee), that fee must be added on top of the MMCAP-contracted pricing. Vendor may not absorb the fee. Vendor must not pay a member levied fee without first collecting the fee through increased Product costs. The fees will be set aside and paid to the member as would be detailed in an MPA.

Except as provided in a Member-Requested Participation Agreement (MPA) approved by MMCAP and executed by an MMCAP Member, Vendor and MMCAP, all orders placed by MMCAP Members with Vendor will be priced and offered by Vendor per the terms and conditions of this Contract, and no other terms provided by the MMCAP Member will apply to such orders.

2.2.2. Should any terms in the Contract document or other attachments conflict with the state-specific terms set forth in *Attachment C*, the terms set forth in *Attachment C* shall take precedence over the terms of the Contract document, but only as between the Vendor and the MMCAP Member and/or MMCAP Participating Facility bound by said state-specific terms. No other State shall be bound by the terms set forth in any other State's state specific language set forth in the Exhibit provided by an MMCAP Member State and attached to *Attachment C*.

2.2.3. MMCAP and the State of Minnesota shall not be bound by non-Minnesota state-specific terms set forth in any Exhibit included in *Attachment C* at any time, nor when bringing any enforcement action on behalf of MMCAP or the State of Minnesota.

2.2.4. During the term of this Contract other MMCAP Member States may request the MMCAP Office or the Vendor to amend this Contract to include terms and conditions specific to the requesting MMCAP Member State by attaching an Exhibit to *Attachment C* specific to that State. If a MMCAP Member State requests an amendment to this Contract to include their state specific requirements, the Vendor must work with the MMCAP Member State and the MMCAP Office to execute an amendment to this Contract in a reasonable period of time. No verbal or written instructions from the MMCAP Member States, MMCAP Participating Facilities, or any of their staff or state officials to change any provision of this Contract will be accepted by the Vendor without the prior written approval of the MMCAP Office. The Vendor will immediately report any such requests to the MMCAP Office.

Products and pricing under this Agreement, and to extend pricing and applicable discounts, under the conditions of this Contract.

2.2. Pricing Accuracy

Contract Transition and Implementation.*

2.3. Accessibility to Vendor's Order Entry System

ATTACHMENT G: VENDOR'S SHIPPING POLICY

Other than any direct drop shipments from manufacturers, Concordance would process all orders, billing, delivery, and Customer Service within the Concordance organization. Concordance determines the shipping method based on the most efficient process for each specific location. Concordance has favored pricing contracts with Fed Ex and also uses LTL, messengers, and our own trucks. Stocked items will be delivered in 1-2 days depending on location. Non stock – 7-10 days, depending on manufacturer availability.

All scheduled deliveries will be FOB destination. Freight charges for any back-ordered item that has to be shipped from an alternate distribution center will be the responsibility of Concordance. There will not be any minimum order charges on scheduled deliveries. There is a 2PM cutoff time for the order to arrive for processing, orders which arrive after 2PM will be processed the next business day.

Freight for special orders which require same-day or overnight AM delivery will be negotiated depending on product and delivery location.

Freight on capital equipment shipped direct to the end user from the manufacturer will be negotiated.

There will be no fuel surcharges from Concordance.

[REMAINDER OF PAGE LEFT INTENTIONALLY BLANK]

ATTACHMENT H: VENDOR'S STOCK OUTAGE AND BACKORDER POLICY

Concordance first priority is to PREVENT backorders. The Concordance operating system, and Purchasing Department, continually monitor and adjust usage to maintain inventory levels.

Most customers are notified of any backorders electronically via EDI transaction set 855. For orders not placed via EDI, Concordance customer service representatives can send a daily backorder report with information noted as to when the item will be available. Backorder and open order reports are also available on our website for customer access to real-time information.

In the case of an extended backorder from the manufacturer, our customer service representatives will communicate this information and, with MMCAP, identify a substitute product that is clinically acceptable. No product will be substituted without the prior agreement of the MMCAP member.

In addition to the standard backorder process, we can also generate a report that looks ahead 14 days and highlights any items that have an inventory level below the average 14-day usage. These items are then reviewed by the Concordance assigned customer service representative. Our customer service representative will determine if product is in route or if an alternative plan needs to be evaluated.

[REMAINDER OF PAGE LEFT INTENTIONALLY BLANK]

ATTACHMENT I: VENDOR'S PRODUCT RETURN POLICY

Authorization must be received from the Concordance Return department prior to returning merchandise for any reason. Credit for merchandise returned without authorization is subject to denial. Product must have been purchased from Concordance. Product must be in original packaging. Return request should be made within 30 days of invoice date. Carton must be sealed and in saleable condition. Credit may not be issued for product that is expired or will expire within 30 days, discontinued items, refrigerated items or custom orders.

Return Request - The following information is required when requesting a return authorization: customer name and number, date of purchase, original invoice number, product item number, product description and reason for return.

Upon verification of the above information and the return criteria has been met, the Concordance Return Department will assign the RGA for the merchandise to be returned.

Return Methods – Customers are responsible for returning products to the Concordance location noted on the RGA, except for merchandise shipped in error by Concordance or for products under manufacturer recall. Please ship via a traceable method, as Concordance cannot be responsible for products that do not arrive at our facility. Call tags will only be issued when a Concordance error has been made.

Freight on Returned Merchandise - All applicable freight charges and call tag fees are the responsibility of the customer, except for merchandise shipped in error by Concordance or for products under manufacturer recall.

Credit Procedures for Returned Merchandise - All stocked merchandise may be subject to a minimum 25% restocking charge, except for merchandise shipped in error by Concordance or for products under manufacturer recall. Non-Stock and/or special order merchandise may not be accepted back for return without express written approval by the manufacturer and may be subject to a minimum 25% restocking fee. The credit will appear on the next month's statement following receipt of product at the Concordance warehouse.

Customer returns are processed by our customer service and returned goods departments. Upon notification from a customer that a return is required, our customer service team will process a return goods authorization which is assigned a return order number that can be used for internal tracking purposes. Our returns department is given a hard copy of the RGA which they use to validate the return upon receipt of product. If the product requires return via commercial carrier, a call tag is issued that includes a confirmation number that can be used for traceability. If we are picking the product up via a Concordance vehicle, the tracking method is Concordance's internal RGA number. After receipt of product and collection of any additional information needed, credit is issued by our return goods department to our customer immediately based on the disposition of the product.

ATTACHMENT J: VENDOR'S PRODUCT RECALL PROCEDURES/POLICIES

Upon notification from a manufacturer of a product recall, we immediately implement internal communication to all Concordance distribution centers with instructions for quarantine and/or return of product, according to manufacturer specifications. Within 24 hours of receipt of notification, we send a written notification to all customers with purchase history on the products impacted by the recall with instructions. We have the ability to isolate customer by lot number for most manufacturers; however, we extend our sales history window to insure we communication recall data to every potentially impacted customer.

Product recall notifications received from manufacturers involve the following process:

1. Receive original notification (via letter or email) from the vendor/manufacturer.
2. Recall notification is provided to one employee responsible for coordinating all recall processes.
3. Scan the original notification and save on Concordance's "public drive" folder for all employees to access. Depending on the scope of the recall, the notification may also be placed on Concordance's web site.
4. Identify the affected product numbers and lot numbers in Concordance's system.
5. Communicate the recall notification and affect product information to each respective Concordance DC recall coordinator.
6. Go out to the warehouse to the affected product's location and check product for any affected products within our inventory.
7. Quarantine any affected product and place it in the respective DC returns department so it cannot be purchased by customers.
8. Identify in Concordance's order history what customers may have purchased and received any affected product.
9. Send recall notifications and a copy of the notice from the vendor/manufacturer to all customers that may have purchased affected product and explain what products and lots are affected. Give instruction for return to Concordance or the vendor/manufacturer, whichever the original notification states.
10. Notify all return departments and all customer service departments at Concordance of the recall and give them the instructions that were given to the customers. Returns departments follow specified procedures for processing the return and related credit to customers.
11. Notify all receiving departments at Concordance to watch for any affected products being received on open orders from the manufacturer (which may have been in transit during the notification period). Quarantine and return product to the respective manufacturer.
12. Once items are returned from customers, notify vendor/manufacturer of all affected products; return or destroy product and file for credit from the vendor/manufacturer.

1.1 CODE RED

Major Local / Regional Medical Disaster

In the event of a medical disaster of such magnitude as to require emergency delivery of medical supplies to multiple hospitals or an individual facility in a specific area, the following procedures will be followed:

- Customer Supply Chain / Facility Materials Management staff will be notified of such a disaster according to hospital notification procedures.
- In the event a disaster is called during traditional business hours (8 a.m. to 5 p.m. weekdays), Materials Management staff or other authorized facility personnel will immediately notify Concordance of such action. Communication should be made to Concordance and all appropriate Customer staff. In the event such notice is required during *off* business hours, Facility staff will notify Concordance in accordance with the attached *Concordance Distribution Center Contact Numbers and Emergency Disaster Phone Number List*.
- As much information as possible should be communicated, including scope of the emergency, primary contact person at a facility, potential product needs, anticipated time of need, delivery location, and any other information that will help Concordance prepare a response to the emergency.
- If a list of medical products identified as *critical emergency items* is maintained by Facility Materials Management staff, it should be communicated to Concordance. Likewise, if a Customer facility has established a *pre-planned emergency disaster order*, it should be communicated to Concordance. Both types of emergency documents should be provided and will be stored in hard copy format in a special file designated as "*Emergency Orders*" in the Concordance customer service operations area of the distribution center that services each respective Customer facility.
- In the event a pre-planned critical emergency item list or disaster order is not provided or on file, Facility Materials Management staff will work with Concordance staff to determine specific product requirements. Based upon staff's appraisal of such disaster, multiples of this critical item listing can be requested.
- Once product requirements are identified, Customer will provide Concordance a purchase order number or some type of authorization number or name in order to enter product requirements into our system. Concordance will activate picking and packaging of product in the shortest timeframe possible and arrange for immediate shipment to the facility using best means available.
 - During normal business hours, picking and packaging of emergency product will normally be completed within 1 hour, depending on the scope of the disaster. Shipment time will depend on distance to facility.
 - During non-business hours or weekends, additional time will be required to assemble the appropriate personnel needed to enter demand data into our system to facilitate product pick. Timeframe will normally not exceed two hours; however, it will vary depending on time of day and scope of the

Concordance Healthcare Solutions, LLC
MMCAP Contract No. MMS18008

emergency. Concordance will expedite the fastest response possible.

- For non-business hour emergencies, Concordance may elect to complete any additional ordering documentation the first business day immediately following the disaster requirement.
- “Pre-purchased” disaster product which is sequestered and inventoried at Concordance will be released upon notification from Customer.
- Concordance will expedite shipment of products to facilities / facility using best means available (Concordance truck or van, employee vehicle, contracted delivery vehicle, etc.). Concordance will not charge Customer for emergency disaster deliveries.
- Concordance will immediately pursue replenishment of product so that other Customer demand is not impacted.

Note: Concordance will work with Materials Management staff to create the critical item list using historical usage information and departmental feedback and/or a disaster scenario formulary, in a similar format as provided by Association for Healthcare Resource & Materials Management (AHRMM), Health Industry Distributors Association (HIDA), and Health Industry Group Purchasing Association (HIGPA). *An example of our disaster formulary can be provided for a facility to develop their critical item list.*

- Additional Concordance Internal Procedures
 - Concordance will assemble a Disaster Response Team upon notice of disaster. This team will consist of the following individuals at each respective distribution center, depending on type and timing of emergency:
 - Chief Disaster Coordinator
 - Customer Service Representative or First Primary Contact (employee receiving the initial call)
 - Human Resources Manager
 - VP Information Services (or senior information services representative)
 - Warehouse/Operations Manager
 - Purchasing Manager
 - Chief Financial Officer
 - Other Concordance employees will be involved as needed (i.e. Account Managers, Customer Service Representatives)
 - This committee, in conjunction with Facility staff, will evaluate the supply needs of such disaster and all necessary Concordance staff will be assembled. Subsequent to the shipment of the *critical emergency items* earlier identified, Concordance will commence shipment of specific emergency

Concordance Healthcare Solutions, LLC
MMCAP Contract No. MMS18008

supplies as ordered on a *rolling delivery* basis. Emergency deliveries will be made as orders are received, and may be as frequent as every thirty minutes if necessary. Until such time as adequate supplies are in route to the hospital, this cycle will continue.

- o Concurrently with such emergency deliveries, Concordance's Disaster Response Team and Customer Facility Materials Management staff will pursue the following additional alternatives if needed:
 - Materials Management staff and Concordance personnel will contact other local healthcare facilities to request available emergency supplies.
 - Concordance will identify other local and regional health care facilities to request emergency supplies. Product may be transported from these institutions by Concordance to the hospital.
- o In the event such disaster is so widespread as to impact all local healthcare facilities and accordingly depletes or potentially impacts Concordance's supply of such critical items:
 - Concordance Purchasing Staff may immediately place affected products on an Allocation Code / Restriction status and product will be allocated according to historical facility usage or demand, enabling supplies to be provided to as many facilities who have ordered the product as possible.
 - Concordance Purchasing staff and Customer Service staff will utilize our Alternate Item / Product Cross-Reference System to identify potential substitute products for any item with limited or "zero" remaining inventory.
 - Manufacturers will be contacted to air-freight such supplies as required to the end user Customer facilities.
 - Concordance will contact one of our other respective facilities – Shelbyville, IN, Kalamazoo, MI, Mocksville, NC, Tiffin, OH, Knoxville, TN, Ripley, WV, St. Louis, MO, Phoenix, AZ, Wichita, KS, Baton Rouge, LA, Chicago, IL, Secaucus, NJ, Sioux Falls, ND, Billings, MT, Rapid City, SD, Waukesha WI, Brooklyn Park, MN, Fargo, ND – and other distribution organizations and/or manufacturers and request cross-industry support. If products are not readily available within our network or from manufacturers, other distributors will be requested to assist in such emergency supply deliveries.

Other Local "Limited Scale" Medical Emergencies

In the event of a medical emergency requiring emergency delivery of medical supplies on a limited scale, the same procedure will apply as outlined above.

Facility Materials Management staff or other authorized facility personnel will immediately notify Concordance of the emergency situation and provide the appropriate product need information. Concordance will immediately initiate picking of product(s) and arrange for the most expedient transportation possible from our nearest distribution center. If absolutely necessary, Concordance may contact other healthcare facilities in the effected Customer facility's vicinity and

Concordance Healthcare Solutions, LLC

arrange for transfer of inventoried product.

Concordance will commit whatever resources are necessary in order to effectively meet our Customer facility's immediate emergency need.

**2.0 Code GREEN – Near-Term Product Supply or
Product Demand Related Emergencies**

2.1 CODE GREEN:

Extended Manufacturer Backorder Emergency Scenario

Once Concordance is notified of a manufacturer disaster or capacity limiting event, we implement the following procedures:

- a. Immediately initiate communication with a manufacturer and determine what stock levels can be allocated to our distribution centers based on our historical purchasing patterns;
- b. Communicate Customer utilization data to our field and customer service representatives;
- c. Communicate alternative substitute item recommendations as available to field representative, customer service rep, and Customer Supply Chain staff;
- d. Place all inventory on allocation and release product based on historical Customer usage;
- e. Escalate communication with manufacturer representatives to support Customer emergency situations;
- f. Order and receive product on an expedited basis as available from a manufacturer.

If a backorder situation is not cleared, Concordance staff and Customer Supply Chain staff will work together to identify and source alternative products.

2.2 CODE GREEN

Seasonal Product Demand Increase / Customer Event-Driven Shortage

Unforeseen peak demand periods "can" result in product availability delays if communication is not managed effectively among all parties – Customer, Concordance, and manufacturers. Concordance maintains over 30 days inventory for all products regularly purchased and requested for stocking, though there may be fluctuations due to customer demand spikes, manufacturer backorders, and manufacturer lead time changes. Our systems are designed to adjust for peak demand periods based on history and forecasted increases in usage that are provided by Customer. Concordance field representatives are responsible for working with each Customer facility to determine potential peak demand cycles (i.e. "normal" flu season), and to plan for critical product needs. If it is determined additional inventory needs to be purchased to protect against potential product shortage situations, Concordance will work with manufacturers to bring additional inventory on hand. For this process to be effective, it is critical that two-way communication occur.

In the event a Customer's usage escalates beyond anticipated demand and actual inventory levels, or a manufacturer places product on allocation due to widespread demand increase, additional actions will be taken with Customer Supply Chain staff to identify and source alternative products to meet clinical requirements.

2.3 CODE GREEN

Healthcare Pandemic Planning / Response

Preparing the healthcare supply chain and providers for a large-scale national flu or other pandemic requires communication and cooperation from all parties involved in the supply chain – providers, federal / state / local government, distributors, and manufacturers. The length of a pandemic could span anywhere from 3 to 36 months, and according to many healthcare industry experts, the risk of ongoing annual pandemic situations due H1N1, H5N1, and other flu strains / disease states is increasing but not necessarily predictable. There are many qualified opinions on the subject and industry-wide standards on how all parties coordinate the supply chain response are still in development. However, it is important that Concordance and Customer continue actively communicating and developing plans to increase the probability of continuity of supply.

Important issues / action steps Concordance and Customers should consider in advance of future pandemic situations:

- Anticipate product demand
 - Types of products: syringes, gloves, gowns, masks, rapid diagnostics, hygiene products, water, IV fluids & sets, etc.
 - Pre-determined list of products should be developed and communicated to Concordance
 - “Push-Pack” options – pre-packaged materials for provider protection and patient care can be developed and maintained in inventory
 - Pre-Assess amount of supplies required in a pandemic, anticipate usage, and prioritize products; determine substitute options for products that could develop into back-order status; and communicate information to each party
 - Discuss options for allocation of product in the event of a large-scale surge in demand
 - Concordance has the system capabilities to place any product on allocation or restriction in time of national back-order with “primary” customers such as Customer receiving “first priority” service
- Address challenges in potential logistics scenarios
 - Parameters for determining priority status for orders/deliveries – most severe areas of incidence and large metropolitan areas are the highest priority
 - Assess storage/warehousing capabilities and delivery to alternative locations – off-site store rooms, temporary “make-shift” care locations
 - Concordance is confident in its capacity availability to support our response in the event of large surge in demand
 - Discuss potential security limitations for deliveries and steps to prevent uninterrupted supply
 - Address compromised transportation systems (third party delivery vs. owned-vehicle delivery)
 - 90% of Concordance deliveries are made via our own vehicles

Concordance Healthcare Solutions, LLC
MMCAP Contract No. MMS18008

- Develop communication system to ensure continuous connectivity
 - Email, Phone, Cell Phone contacts – Concordance and Customer
 - Identify primary contacts for “who” will deal with pandemic situations at each provider location
- Discuss “Stockpiling” issues
 - Negative impacts of stockpiling – product expiration, resource and space constraints, unpredictable demand, impact on continuous supply to all providers
 - Assess how government stockpiles will support provider demand and how they will be accessed
- Communicate with manufacturers
 - Factor in circumstances that could impact manufacturer ability to produce supplies, i.e. international events, border closures, quarantines
 - Identify primary source for manufacturing products (US-based, off-shore) and place priority on US-based manufacturers
 - Identify alternative products recommended by a manufacturer in the event of supply disruption
 - Stay apprised of manufacturing ramp-up periods and special inventory programs
- Anticipate impact on employees
 - Cross-train employees to support potential impact from sick leave
 - Establish thresholds and protocols for calling in sick, quarantines, employee interaction, and travel

3.0 Code YELLOW – Emergency Disaster Training

3.1 CODE YELLOW

Emergency Disaster Testing / Planning Scenario

Periodically, healthcare providers will need to test internal and external disaster plans and may require various levels of support from Concordance during this testing. Upon receipt of “any” type of disaster call or communication, Concordance personnel will qualify the disaster event and direct required internal support for Customer. If a disaster call or communication is for testing purposes, Concordance personnel will treat our response with the same time sensitivity as we would live disaster scenarios. However, Concordance does request that Customer inform us whether the call is related to a test or live event, so that our resources can be allocated according to clinical priority. In the event a healthcare provider requests Concordance to implement a physical operational response for testing purposes only, a reasonable charge to cover costs of labor and transportation may be invoiced. *NOTE: The initial recipient of the call must remain involved throughout Concordance’s disaster response to insure that Customer’s needs are met. During disaster “tests” or live scenarios, only direct communication is appropriate for relaying required actions to other Concordance employees (i.e. either face-to-face or direct phone communication).*

**4.0 CODE GRAY – Service Center Emergency
And/or Communications Disruption**

4.1 CODE GRAY

Concordance Service Center Emergency

In the event one of our distribution centers is damaged due to weather, acts of God, war, or other circumstances and the damage impacts continuous supply to Customer facilities, Concordance maintains a Disaster Recovery Policy and Information Systems Disaster Plan at each distribution center. This policy contains the procedures for data and inventory transfer in the event one of our service centers is rendered less than 100% functional. Specific daily procedures are outlined for back-up of data and off-site storage of back-up tapes.

If a distribution center is not capable of providing ongoing services, Concordance will transfer support to one of our other distribution centers – Shelbyville, IN, Kalamazoo, MI, Mocksville, NC, Tiffin, OH, Knoxville, TN, Ripley, WV, St. Louis, MO, Phoenix, AZ, Wichita, KS, Baton Rouge, LA, Chicago, IL, Spartanburg, SC, Secaucus, NJ, Sioux Falls, ND, Billings, MT, Rapid City, SD, Waukesha WI, Brooklyn Park, MN, Fargo, ND – for the duration of the service delay. This type of disruption may require us to request cross-industry support from other distribution organizations and/or manufacturers. Our industry understands the need to provide support to all participants in the supply chain, and our relationships with other distributors will be leveraged if required.

4.2 CODE GRAY

Local or Regional Communications Disruption

In the event there is a local or regional power outage or communication grid disruption that affects one of our distribution centers, Concordance has contingency plans in place to restore operations. For power supply to our information systems, we have an uninterrupted power supply (UPS) system installed to maintain power to information systems and phone systems in the event of short-term, intermittent power supply issues. For extended interruptions, our facilities have on-site back-up generators capable of providing sufficient power capacity to support critical operations – system, phones, emergency lighting. We also have back-up generator capacity available through local sources and through a contract with a regional power network. For power supply to operate lighting and other power source needs, we have a separate power feed system for rapid activation of our back-up generator(s). Concordance also has redundant data and phone systems in the event of the primary feed being inactivated.

4.3 CODE GRAY

Concordance – Customer Notification/Alert System (In the event of communication disruption)

In the event communication with one of our facilities or listed cell phone contact numbers is not possible due to power outage or communication line impairment, Customer facilities can contact one of our other distribution centers at the numbers provided below or physically drive to one of our distribution centers. If communications are impaired, we will have staff at our facility. If these actions do not result in positive contact, Concordance's field Territory Managers will use best effort to physically contact each Customer facility to help facilitate communication of product requirements to each respective distribution center. These procedures will be implemented until normal communication is operational.

For LUM/Stockless Customer facilities, Concordance may push orders to Customer facilities based on historical usage data or pre-planned emergency disaster orders on file at Concordance.

Concordance is committed to providing the highest level of service and product sourcing / logistics support to Customer facilities; and we will deploy every necessary resource to provide uninterrupted service. Our nineteen distribution centers – Shelbyville, IN, Kalamazoo, MI, Mocksville, NC, Tiffin, OH, Knoxville, TN, Ripley, WV, St. Louis, MO,
