Duplicate Records Check – Merge

IMPORTANT NOTE: After you move a Candidate record to Background Check OR Offer, you **MUST** check for duplicates in both Workday and the Payroll and Financial Center (JDE/JD Edwards/E1/Oracle) **PRIOR** to moving to ready for hire.

If the person's Candidate record does not include her/his Social Security Number, you must enter her/his SSN onto her/his Candidate Record to prevent an incorrect Merge! You can do this by opening the candidate profile and clicking Actions in the blue menu. Select Personal Data and then Edit Government IDs.

You should check the SSN in JDE on the Employee Look-Up screen (Navigator > State of Nebraska > Payroll > EMPLOYEE LOOK-UP) to identify if the person has a prior work history with the State, and, therefore, a prior Employee ID. Knowing the prior Employee ID will help with further searching in Workday and with the Candidate records merge.

If the candidate has a prior worker account in Workday, her/his Candidate record MUST be merged with the previous Worker record. If this does not happen:

- **The candidate will have duplicate accounts, causing issues which require the process to be rescinded until the profiles are merged.**
- **The record will not feed over to the Payroll and Financial Center because of duplicate SSN.**

64. Verify that the Social Security Number for the Candidate matches the SSN on the prior Worker record. Candidate records should not be merged with prior worker records without verification.

- a. Find the candidate in question, navigate to Personal -> IDs (in the blue section). If the person's SSN does not show up on that screen, ask her/him for the information. You can then input the person's SSN on her/his Candidate record.
 - i. Click Actions > Personal Data > Edit Government IDs.
 - ii. Complete the following fields:
 - a) Country = United States of America.
 - b) National ID Type = Social Security Number (SSN).
 - c) Type the SSN in the Current ID field, verifying that the number you enter matches with the person's ID documentation.
- b. If you are a Recruiter, you will need to have an agency HR Partner do this step – Search for their SSN in Workday using the following format in the search bar: id: 123456789.
(Remember the colon and no dashes in the SSN!)

Screen and Move Candidate(s)

65. MERGE - If the candidate has an old employee account in Workday, you will need to merge their external Candidate record with their old Workday worker account. Do this on the candidate record by navigating to the candidate record, clicking Duplicates in the blue section, and then Merge on the appropriate record. The table below provides information on how Workday populates duplicates. Note, just because a duplicate is listed, doesn't mean they are a match to your candidate. Verify the SSN match prior to proceeding with a merge.

Type	Description
Candidate name	At least one of these combinations must be an exact match: <ul style="list-style-type: none">• First letter of the First Name and full Last Name• Full First Name and Last Name
Contact information	The Phone Number or Email <ul style="list-style-type: none">• must be an exact match. Only available for candidate-to-candidate matching.• Workday doesn't match phone numbers if the formatting differs. Example: 555-1234 doesn't match with 5551234.
Date of birth	Must be an exact match.
National ID	You can merge records with national IDs that have different expiration or issue dates when the national ID type and ID are the same. You can't merge 2 records that have different values for the same type of national ID. If both the source and target records have national IDs of the same type, either: <ul style="list-style-type: none">• All of the source's national IDs of that type must be contained within the target's IDs of the same type, or• All of the target's national IDs of the same type must be contained within the source's IDs of the same type. Example: You can merge 2 records if the source and target share the same SSN (Social Security Number) and the source has an additional SSN. However, you can't merge the records if they share the same SSN, but both of them have additional, different SSNs. Workday doesn't compare government IDs when identifying duplicate candidates.

66. You will need to confirm and submit on the next page.

Move Forward to Ready for Hire

This is the final step of application process. Candidates who are moved to this stage will populate an inbox task for the applicable HR Partner for next steps in the Hire Business Process or the Change Job Business Process. Note, they should NOT manually initiate the hire or transfer, as this has already been populated by the recruiter moving the candidate record to ready for hire. See Hire Event Guide or Change Job Guide for more information.
